Prior to joining Latham & Watkins, Mr. Remy served as an attorney and business person for a major U.S. company where he held a number of positions including: Vice President and Deputy General Counsel for litigation; Senior Vice President and Deputy General Counsel; Senior Vice President and Chief Compliance Officer; and Senior Vice President, Housing and Community Development. In these roles, his responsibilities included managing litigation, handling employment law matters, advising on procurement contracts, investigating employee and contractor malfeasance, developing and implementing a corporate compliance system, and building an investment strategy to rebuild communities on the Gulf Coast after Hurricane Katrina.

From 1997–2000 Mr. Remy served in the U.S. Department of Justice as a Senior Counsel for Policy and as a Deputy Assistant Attorney General for the Torts and the Federal Programs Branches of the Civil Division. He supervised litigation on behalf of 100 Federal agencies, the President and Cabinet officers, and other governmental officials. Those matters involved a myriad of subject areas and included the defense against constitutional challenges to Federal statutes, suits to overturn government policies and programs, and attacks on the legality of government decisions. Mr. Remy also personally handled litigation in the matters arising out of the events at Waco and Ruby Ridge.

As an Army Captain, Mr. Remy was an Assistant to the General Counsel of the Army from 1991–1995, where he advised senior Army officials on legal and policy issues concerning all aspects of government contracting, specifically including major weapon system acquisition. Further, he assisted in the Army's litigation of bid protests and contract disputes and assisted the Department of Justice in government contract litigation that directly affected the Army. During his tour of duty at the Pentagon, Mr. Remy was detailed on special projects to other offices in the Department of Defense where he analyzed statutes and regulations governing programs affecting small and disadvantaged business and historically black college and university contracting with the Department of Defense, recommended modifications to ensure compliance with both the law and the President's guidance, assisted in development of the Department of Defense position on acquisition reform, crafted proposed legislation related to the Federal Acquisition Streamlining Act, negotiated legislative proposals, drafted portions of Defense Performance Reviews, and coordinated with the Office of the Vice-President on issues related to the National Performance Review.

Mr. Remy also served as a clerk to The Honorable Nathaniel R. Jones of the U.S. Court of Appeals for the Sixth Circuit. Mr. Remy is a cum laude graduate of Howard University School of Law and received his undergraduate degree from Louisiana State University, where he graduated with honors and was commissioned a 2nd

Lieutenant in the U.S. Army. Mr. Remy has published, lectured, and testified before Congress on legal topics relating to torts, constitutional law, employment law, diversity, government contracts, litigation, and compliance. In 2005, Mr. Remy was recognized by Black Enterprise as one of America's most powerful executives under 40. He is a DC Bar Delegate to the American Bar Association. Further, Mr. Remy sits on the Boards of Louisiana State University-University College, the Washington Lawyers Committee on Civil Rights and Urban Affairs, the Abramson Foundation, and the Legal Counsel for the Elderly.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by Donald M. Remy in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Donald Michael Remy; Don Remy.
2. **Position to which nominated:**
General Counsel, Department of the Army.
3. **Date of nomination:**
April 20, 2009.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
February 8, 1967; Fort Lee (Petersburg), VA.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Monitra Charrise Lashawn Butler.
7. **Names and ages of children:**
Jonathan Alexander Remy; 15.
Jason Andrew Remy; 11.
8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
Howard University School of Law, 08/1988-05/1991, J.D.-05/11/1991.
Louisiana State University, 08/1984-05/1988, B.A.-05/18/1988.
University of New Orleans, 05/1986-08/1986.

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Latham & Watkins LLP, Partner, 555 11th St., NW., Washington, DC, 09/06–Present.

Fannie Mae, Senior Vice President & Deputy General Counsel, 11/02–03/06, Vice President & Deputy General Counsel, 03/00–11/02, 3900 Wisconsin Ave., NW, Washington, DC.

U.S. Department of Justice, Deputy Assistant Attorney General, Civil Division, 950 Pennsylvania Ave., Washington, DC, 03/97–03/00.

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Consultant (SGE), Department of Defense, April 17, 2008–present.

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Partner—Latham & Watkins LLP

Member of Board of Directors—Washington Lawyers Committee on Civil Rights & Urban Affairs

Member of Board of Directors—Abramson Foundation

Member of Board of Directors—Louisiana State University, University College

Member of Board of Directors—AARP, Legal Counsel for the Elderly

DC Bar Delegate—ABA House of Delegates

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

See response to question 11 above. Additionally, I hold the following memberships:

Member, American Bar Association
 Member, National Bar Association
 Member, Washington Bar Association
 Member, District of Columbia Bar
 Member, Pennsylvania Bar Association
 Member, Kappa Alpha Psi Fraternity
 Member, Army Navy Club
 Volunteer Coach, Cardinal AAU Basketball

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

Obama for America: Volunteer (conducted canvassing in various States), fundraiser (Member of the Mid-Atlantic Finance Committee), and legal advisor (assisted with election protection and other legal issues).

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

10/15/08 Barack Obama—Obama Victory Fund—\$1,000
 09/30/08 Barack Obama—Obama Victory Fund—\$1,000
 09/21/08 Barack Obama—Obama Victory Fund—\$1,000
 03/21/07 Barack Obama—Obama for America—\$2,300
 03/31/06 Hillary Clinton—Friends of Hillary—\$1,000
 10/15/05–1/7/06 Payroll deduction to Fannie Mae Pac—\$5,000
 05/03/05 Adrian Fenty Exploratory Committee—\$250
 06/24/04 Fannie Mae Pac—\$5,000
 06/12/04 Barack Obama—Obama for Illinois—\$1,000

14. Honors and Awards: List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

Fellow, Litigation Counsel of America; America's Most Powerful Executives under 40, Black Enterprise Magazine; Meritorious Service Medal, U.S. Army; American Jurisprudence Award for Torts, Criminal Law, Remedies, Commercial Paper, Small Business Law, and Constitutional Law II; Merit Scholarship for High Scholastic Achievement (Full Law School Tuition); Chancellor's Scholarship; National Political

Science Honor Society; 4 Year Army ROTC Scholarship; Distinguished Military Graduate.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

U.S. Department of Justice Makes Prevention and Prosecution of Procurement Fraud a Top Priority through Creation of National Procurement Fraud Task Force. Latham & Watkins Client Alert, January 22, 2007.

Commission on Wartime Contracting First Public Hearing: Burgeoning Waste, Fraud and Abuse Investigations. Latham & Watkins Client Alert, February 10, 2009.

Student Note: The Constitutionality of Drug Testing in Government Regulated "Private" Industries 34 Howard Law Journal 4 1990.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

None.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

DONALD M. REMY.

This 27th day of April, 2009.

[The nomination of Donald M. Remy was withdrawn by the President on June 17, 2009.]

[Prepared questions submitted to Dr. Michael Nacht by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. Goldwater-Nichols was landmark legislation that led to dramatic improvements in operational effectiveness, unity of effort, and civilian oversight. There is now a generation of military leaders who are experienced with operating in a coordinated and joint, multi-service environment. At this time, I do not see the need to change the provisions of this legislation.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. I see none at this time.

RELATIONSHIPS

Question. If confirmed, what will be your relationship with:

The Secretary of Defense.

Answer. Under the direction of the Under Secretary of Defense for Policy, the Assistant Secretary of Defense for Global Strategic Affairs (ASD(GSA)) advises the Secretary of Defense on global security strategy and policy on issues of DOD interest that relate to nuclear weapons, missile defense, countering weapons of mass destruction (WMD), and the space and cyberspace domains.

Question. The Deputy Secretary of Defense.

Answer. The ASD(GSA) provides similar support to the Deputy Secretary of Defense as described above.

Question. The Under Secretary of Defense for Policy.

Answer. The ASD(GSA) provides similar support to the Under Secretary of Defense for Policy as described above.

Question. The Under Secretary of Defense for Acquisition Technology and Logistics.

Answer. At the direction of the Under Secretary for Policy, the ASD(GSA) works closely with the Under Secretary of Defense for Acquisition, Technology, and Logistics to achieve the Secretary's objectives and ensure that policy formulation and execution are well informed and supported appropriately. The ASD(GSA) also provides policy input regarding acquisition and programmatic activities of the Under Secretary of Defense for Acquisition Technology and Logistics that relate to nuclear weapons, missile defense, countering WMD, and the space and cyberspace domains.

Question. The Assistant Secretary of Defense for International Security Affairs.

Answer. The ASD(GSA) works with the Assistant Secretary of Defense for International Security Affairs to provide sound policy advice to the Under Secretary and the Secretary on crosscutting global security strategy and policy issues, such as countering the proliferation of WMD in the Middle East.

Question. The Assistant Secretary of Defense for Asian and Pacific Security Affairs.

Answer. The ASD(GSA) works with the Assistant Secretary of Defense for Asian and Pacific Security Affairs to provide sound policy advice to the Under Secretary and the Secretary on crosscutting global security strategy and policy issues, such as the requirement for a missile defense system in the Pacific region.

Question. The Assistant Secretary of Defense for Homeland Defense.

Answer. The ASD(GSA) works with the Assistant Secretary of Defense for Homeland Defense to provide sound policy advice to the Under Secretary and the Secretary on crosscutting global security strategy and policy issues, such as enhancing the survivability of critical cyberspace infrastructure.

Question. The Assistant Secretary of Defense for Special Operations and Low Intensity Conflict

Answer. The ASD(GSA) works with the Assistant Secretary of Defense for Special Operations/Low-Intensity Conflict and Interdependent Capabilities to provide sound policy advice to the Under Secretary and the Secretary on crosscutting global security strategy and policy issues.

Question. The Assistant to the Secretary for Nuclear Chemical and Biological Defense.

Answer. The ASD(GSA) works with the Assistant to the Secretary for Nuclear and Biological Defense (ATSD-NCB) to provide sound policy advice to the Under Secretary and the Secretary on crosscutting global security strategy and policy issues. The ATSD-NCB is responsible for implementing the range of activities for which the ASD(GSA) develops policy guidance. Therefore, the relationship between the two offices should be very close.

Question. The Chairman and Vice Chairman of the Joint Chiefs of Staff.

Answer. As the principal military advisor to the Secretary of Defense, the President and the National Security Council, the Chairman has a unique and critical military role. At the direction of the Under Secretary or Principal Deputy Under Secretary of Defense for Policy, the ASD(GSA) works with the Chairman and Vice Chairman to provide support on matters that affect strategy and policy for nuclear weapons, missile defense, countering WMD, and the space and cyberspace domains, working to ensure that military advice is taken into account in an appropriate manner.

Question. The Service Secretaries.

Answer. The ASD(GSA) works with the Service Secretaries on a broad range of global strategic issues.

Question. The Service Chiefs.

Answer. The ASD(GSA) works with the Service Chiefs on a broad range of global strategic issues.

Question. The regional combatant commanders.

Answer. In coordination with the Chairman of the Joint Chiefs of Staff, the ASD(GSA) works closely with the regional combatant commanders to provide policy oversight of strategy, plans and operations in support of the Under Secretary of Defense for Policy, the Secretary of Defense, and the President of the United States.

Question. The Administrator and Deputy Administrators of the National Nuclear Security Administration

Answer. The ASD(GSA) works with the Administrator and Deputy Administrators of the National Nuclear Security Administration to provide sound policy advice to the Under Secretary and the Secretary on crosscutting global security strategy and policy issues, relating to nonproliferation of nuclear weapons, nuclear material security, U.S. nuclear stockpile matters, and related issues.

DUTIES

Question. The position for which you have been nominated is being substantially restructured.

What is your understanding of the duties that you will be assigned if you are confirmed?

Answer. My understanding is that the newly restructured Assistant Secretariat for Global Strategic Affairs is primarily responsible for advising and supporting the Under Secretary of Defense for Policy and the Secretary of Defense on policy and strategy in the areas of nuclear weapons, missile defense, countering WMD and the space, and cyberspace domains.

Question. Are there any additional or other duties that have not yet been assigned but are under discussion for assignment to the office of the Assistant Secretary for Global Security Affairs?

Answer. I am not aware of any duties that have not yet been assigned but are under discussion for assignment to the ASD(GSA).

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. My career has focused on technology, national security and public policy, which is the centerpiece of GSA's responsibilities. I have considerable government experience working these issues.

Question. What additional actions do you believe you need to take, if any, to fulfill the responsibilities of this position?

Answer. If confirmed, I will work closely with the stakeholders in Office of the Secretary of Defense (OSD) Policy, AT&L, the Joint Staff and others to ensure sound and effective policy development.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that will confront the Assistant Secretary of Defense for Global Security Affairs?

Answer. The ASD(GSA) will be involved in a number of major reviews relating to key DOD mission areas. These include the Nuclear Posture Review (NPR), the Missile Defense and Space Posture Reviews, as well as implementation of the interagency Cyber Policy review. In addition, the ASD(GSA) will be able to play an important supporting role in new U.S. Government overtures to the Russian Federation, particularly in the nonproliferation and nuclear security areas where DOD has previously developed good working relationships.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed as ASD(GSA), I believe the key priority for addressing these challenges will be prompt establishment of close relationships with key stakeholders in DOD, among interagency partners, and in Congress to develop broadly coordinated solutions.

Question. What do you anticipate will be the most serious problems in the performance of your responsibilities?

Answer. If confirmed, I will assess the resources and other "tools" available to me to perform my responsibilities. Presently I am not able to evaluate in detail the challenges I might face in performing my duties, if confirmed.

Question. If confirmed, what management action and timelines would you establish to address these problems?

Answer. If confirmed, I would work with my new staff and the Under Secretary for Policy to identify and prioritize problems impeding performance of my responsibilities, and to developing timelines for their rectification.

PRIORITIES

Question. If confirmed, what broad priorities would you establish for the office to which you have been nominated?

Answer. Under Secretary Flournoy has emphasized enhancement of her office's voice supporting the Secretary in the Planning, Programming, Budgeting and Execution System. If confirmed, I would seek to maximize my support to this and any other issues the Under Secretary for Policy has highlighted in support of the Secretary.

NUCLEAR POSTURE REVIEW

Question. If confirmed what role will you play in the NPR?

Answer. If confirmed, it is my understanding that I would develop guidance for the NPR, coordinate the review with my colleagues in the Departments of State and Energy, and help frame issues and strategic decisions for the Undersecretary for Policy and the Secretary. The Secretary has highlighted the group of issues covered in the NPR as being among the most important long-term challenges we face, and key to restoring confidence in our nuclear complex. The NPR will help define how to support the President's ultimate goal of eliminating nuclear weapons worldwide while ensuring that in the meantime the United States retains a nuclear deterrent capable of deterring any threat.

Question. What steps will you take to ensure the Strategic Command, the military Services, and the National Nuclear Security Administration participate in the NPR process?

Answer. It is my understanding that Strategic Command and the National Nuclear Security Administration (NNSA) are already formal members of the NPR analytical process, supporting examination of nuclear arsenal issues, force posture, and the international dynamics associated with possible changes in our strategic deterrent. Similarly, it is my understanding that the military services are involved at all levels of the NPR process. Such participation and leadership by NNSA, STRATCOM, and the military services are critical in ensuring that their perspectives, expertise, and equities are leveraged to their fullest extent as the NPR process unfolds.

SPACE POSTURE REVIEW

Question. If confirmed what role will you play in the Space Posture Review?

Answer. My understanding is that the Space Posture Review is a joint review to be conducted by the Secretary of Defense and the Director of National Intelligence, intended to clarify national security space policy and strategy of the United States. In this regard, if I am confirmed, I will support the Secretary and work with the Office of the Director of National Intelligence and others to ensure the review is responsive to the congressional requirement and inclusive of all stakeholders' views.

SPACE PROGRAMS

Question. If confirmed what role will you play in establishing architectures for various space systems, such as communications and Overhead Persistent Infra-red (OPIR)?

Answer. The capabilities provided from space, such as satellite communications and OPIR, are very important to our forces, the global economy, and the defense of our Nation. If confirmed, I expect to participate actively in a variety of DOD decisionmaking processes, including in strategy development and the Planning, Programming, Budgeting and Execution system in order to ensure architectures for our space systems are implemented in a manner to effectively achieve our national security objectives.

Question. If confirmed what role will you play in developing a space protection strategy and improving space situational awareness?

Answer. The protection of our national security space systems is very important to our military capabilities and the defense of our Nation. In this regard, if I am confirmed, I will work to ensure appropriate and effective strategies are in place to assure the missions provided by our space systems. The foundation of protection for our space capabilities is knowledge of the space environment provided by our space situational awareness systems.

SPACE RULES OF THE ROAD

Question. Over the course of the last several years there has been discussion about establishing international space rules of the road to deal with, mitigate, and reduce generation of space debris.

What are your views on establishing space rules of the road?

Answer. The safe and responsible use of space and preservation of the space environment are important issues for all nations, especially for space-faring nations. Encouraging responsible behavior through establishment of international norms, such as the Space Debris Mitigation Guidelines led by the United States and endorsed by the U.N. General Assembly, may be an excellent model. If confirmed, I will work closely with other Departments and Agencies to explore options to address generation of space debris and to promote the development of international norms for safe and responsible behavior in space.

INTERNATIONAL SPACE COOPERATION

Question. Given the concern about increase in space debris generated by the collision of the Iridium satellite and a nonfunctioning Russian satellite, and the need to improve the ability to forecast potential conjunctions, in your view is there an opportunity to cooperate with Russia in the area of space debris analysis and warning?

Answer. The collision of the Iridium satellite and a nonfunctioning Russian satellite illustrates the increasing number of objects in space and the need to improve our space situational awareness capabilities. All space-faring nations, including Russia, have a shared interest in the area of space situational awareness to avoid collisions.

NUCLEAR CAPABILITIES

Question. Since the Air Force unknowingly flew nuclear weapons on a B-52 bomber on August 30, 2007, the Air Force has taken a number of significant steps to increase its attention, discipline and expertise on nuclear weapons management.

What role if any will you play in ensuring that nuclear weapons are safe, secure and accounted for, and that the military services have established a high level of attention, discipline and conduct of operations with respect to nuclear weapons?

Answer. If confirmed, I will work with the other OSD, Military Services and NNSA stakeholders and direct my staff to support both ongoing and new activities to ensure that the necessary focus and attention is given to all aspects of our nuclear force and the nuclear weapons enterprise, to include safety, security, and accounting.

Question. The various reviews of the Air Force incident also exposed significant gaps in the OSD with respect to the attention and expertise to deal with nuclear weapons issues.

What steps will you take to address the recommendations in the Welsh, Schlesinger and other reports that identify shortfalls in management of nuclear matters in the OSD?

Answer. If confirmed, I will work with the Under Secretary of Defense for Policy, the Assistant to the Secretary for Nuclear, Chemical, and Biological matters, and other key stakeholders, to identify the best solutions that can effectively be implemented.

Question. What steps will you take to ensure that there is sufficient technical expertise in the OSD with respect to nuclear weapons?

Answer. If confirmed, I will press for inclusion of "human capital" solutions among the various proposals to address shortfalls in nuclear weapons-related activities. I will also reach out to institutions such as the NNSA National Security Laboratories, with which I have well-established relationships, in order to strengthen interagency relationships and enlist on-site support through their experts detailed to the OSD.

STRATEGIC NUCLEAR PROGRAMS

Question. The NPR will establish among other things, nuclear force structure for the near term.

Do you see any force structure decisions being made in advance of the NPR?

Answer. I am not aware of any force structure decisions being considered for finalization in advance of the NPR.

BALLISTIC MISSILE DEFENSE

Question. For many years the Department of Defense (DOD) and Congress have agreed on the principle that major weapon systems should be operationally effective, suitable, survivable, cost-effective, affordable, and should address a credible threat.

Do you believe that any ballistic missile defense systems we deploy operationally must be operationally effective, suitable, survivable, cost-effective, affordable, and should address a credible threat?

Answer. Yes.

Question. Do you agree that our missile defense systems should be tested in a rigorous and operationally realistic manner in order to demonstrate, and provide confidence in, their capabilities, including through operational test and evaluation?

Answer. My understanding is that testing of weapons systems is not among the responsibilities of the Office of the Undersecretary of Defense for Policy. As a general matter, I agree that testing of any weapon system should be done in a rigorous and operationally realistic manner.

ADDRESSING CURRENT THEATER MISSILE THREATS

Question. Iran and North Korea currently possess hundreds of short- and medium-range ballistic missiles that can reach forward deployed U.S. forces and our allies. In an April 6 press briefing, Secretary Gates said that “to better protect our forces and those of our allies in theater from ballistic missile attack, we will add \$700 million to field more of our most capable theater missile defense systems, specifically the Terminal High Altitude Area Defense and the Standard Missile-3 programs.”

What are your views on the need to increase the focus of our missile defense programs on protecting our forward-deployed forces, allies, and friends from existing missile threats?

Answer. It is important to have an appropriate mix of short-, medium-, and long-range ballistic missile defense capabilities that are responsive to existing and emerging threats to our homeland, deployed forces, allies and other friendly nations.

MISSILE DEFENSE POLICY AND STRATEGY REVIEW

Question. Section 234 of the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 (Public Law 110–417) requires a comprehensive review of U.S. ballistic missile defense policy and strategy, with a report due no later than January 31, 2010. The Assistant Secretary of Defense for Global Strategic Affairs will be responsible for missile defense policy, among other issues.

If confirmed, what role would you expect to play in the required missile defense policy and strategy review?

Answer. If confirmed, I would expect to be significantly involved in the missile defense policy and strategy review.

MISSILE DEFENSE COOPERATION WITH RUSSIA

Question. After their recent summit meeting, President Obama and President Medvedev of Russia issued a joint statement which noted that they “discussed new possibilities for mutual international cooperation in the field of missile defense, taking into account joint assessments of missile challenges and threats, aimed at enhancing the security of our countries, and that of our allies and partners.”

Do you believe that U.S.-Russian cooperation on missile defense has the potential to enhance our mutual security, as well as that of our allies and partners?

Answer. Cooperation with Russia on missile defense has long been desired. If confirmed, I intend to make this a priority. Having the Russians on board with missile defense could not only help ease tensions in the region, but potentially also lead to the creation of a better system with a larger protective umbrella.

Question. Do you believe it would be beneficial to conduct “joint assessments of missile challenges and threats” with Russia, particularly concerning Iran’s missile programs?

Answer. I have not been briefed on this aspect of the matter and will consider it carefully if confirmed.

Question. Do you believe that U.S.-Russian missile defense cooperation could send an important signal to Iran that the United States and Russia are unified in their determination to reduce the risks of Iran’s nuclear and missile programs?

Answer. Yes.

PROPOSED EUROPEAN MISSILE DEFENSE DEPLOYMENT

Question. The Obama administration is reviewing the proposed deployment of a U.S. missile defense system in Europe. At her confirmation hearing, Under Secretary Flournoy said that reviewing this issue would be a good topic for the Quadrennial Defense Review.

If confirmed, what role would you expect to play in the administration’s review of the proposed European missile defense deployment?

Answer. If confirmed, I expect to be significantly involved in the missile defense policy and strategy review.

Question. Do you agree that such a review should consider a variety of options and alternatives to determine the best path forward to enhance our security, as well as that of our allies and partners?

Answer. Yes.

Question. Do you believe that such a review should also consider the potential for a cooperative approach with Russia on regional missile defense, including the sharing of Russian missile early warning information from the Gabala radar in Azerbaijan and the Armavir radar under construction in southern Russia?

Answer. Yes, I believe that the review of U.S. missile defense in Europe should consider options for cooperation with Russia, including U.S. and Russian proposals made in recent years, as well as new proposals.

NORTH ATLANTIC TREATY ORGANIZATION (NATO) AND MISSILE DEFENSE

Question. The April 4, 2009, NATO Summit declaration from Kehl and Strasbourg states that “we judge that missile threats should be addressed in a prioritized manner that includes consideration of the level of the imminence of the threat and the level of acceptable risk.”

Do you agree with this statement of NATO’s approach to missile defense?

Answer. Yes. This statement was endorsed by all NATO members including the U.S.

Question. The proposed U.S. missile defense deployment in Europe would not defend all of NATO Europe, and would not protect those portions of NATO Europe that are currently within range of Iranian ballistic missiles.

Based on the central NATO principle of the indivisibility of Allied security, do you believe that any future NATO territorial missile defense system should provide protection for all NATO allies, and not leave some allies unprotected?

Answer. The principle of the indivisibility of Allied security is longstanding and also applies to ballistic missile attack against member states. If confirmed, I expect to contribute to our ongoing work with NATO allies on alternatives to provide protection to member states.

CHEMICAL AND BIOLOGICAL DEFENSE

Question. One of the areas under the Assistant Secretary of Defense for Global Strategic Affairs is the Chemical and Biological Defense Program of the DOD.

What do you believe are the principal challenges in chemical and biological defense, and what would be your priorities for the DOD Chemical and Biological Defense Program?

Answer. My understanding is that the Office of the Assistant to the Secretary of Defense for Nuclear, Chemical and Biological matters manages the Chemical Biological Defense Program. If confirmed, I would be responsible for policy oversight of the program. I have not been briefed yet on the details of this program, but I understand that key issues include developing defenses against nontraditional chemical agents, accelerating the ability to conduct CBRN detection and forensics, and working toward the development of vaccines and other medical countermeasures to protect our personnel against multiple threats.

CHEMICAL DEMILITARIZATION

Question. DOD Directive 5160.05E states the DOD policy that “the DOD shall be in full compliance” with the Chemical Weapons Convention (CWC) and the Biological Warfare Convention (BWC). In 2006, the Department announced that the United States would not meet even the extended deadline of April 2012 for destruction of its chemical weapons stockpile, as required under the CWC.

Do you agree that the DOD and the United States Government should be in full compliance with the terms and obligations of the CWC and the BWC, including the deadline for destruction of the U.S. chemical weapons stockpile under the CWC?

Answer. I believe that the United States should meet its treaty commitments, and if that is not possible to state so clearly and come into compliance expeditiously. Although I have yet to examine this issue in detail, I understand that in 2006, the United States informed the Organization for the Prohibition of Chemical Weapons that it would not meet the 2012 deadline, but would accelerate the destruction effort as much as practical. To date, I understand that the Department is on track to destroy 90 percent of the US stockpile by the CWC deadline.

Question. If confirmed, will you work to ensure that the Department takes steps needed to minimize the time to complete destruction of the U.S. chemical weapons stockpile, without sacrificing safety or security, and that the Department requests the resources necessary to complete destruction as close to April 2012 as practicable?

Answer. Yes.

COUNTER-WMD EFFORTS

Question. One of the issue areas proposed under the position for which you have been nominated is the DOD efforts to counter WMD, meaning nuclear, biological, and chemical weapons.

What do you believe are the principal challenges in countering WMD, and what are your priorities for DOD efforts to counter WMD?

Answer. WMD in the hands of hostile states and terrorists represent one of the greatest security challenges we face. If I am confirmed, I will seek to increase barriers to WMD proliferation, develop integrated, layered WMD defenses, improve DOD abilities to hold emergent WMD threats at risk, and prepare for complex WMD contingencies.

Question. If confirmed, what role do you expect to play in the creation of policy for, and oversight of, DOD programs to counter WMD?

Answer. If confirmed, I would support the USD(P) in overseeing development of policies governing all DOD programs to counter WMD. I would engage other senior officials in DOD, as well as officials in the Departments of Homeland Security, Energy, and Department of State, and to consult fully with Congress in executing this responsibility.

PROLIFERATION SECURITY INITIATIVE

Question. The Proliferation Security Initiative (PSI) is an international effort to identify and interdict WMD and related materials.

If confirmed would you recommend that the PSI program continue and if so do you believe that it should be modified in any way?

Answer. If confirmed, I would recommend that PSI should continue and I would work with my staff to turn PSI into a “durable international institution” as President Obama called for during his April 5, 2009, speech in Prague.

Question. The absence of funding specifically identified for the PSI program has made it difficult for the Department and the Congress to provide appropriate oversight.

If confirmed would seek to establish a separate budget account for PSI? If not, why not?

Answer. If confirmed, I would review PSI’s current funding in order to determine if a separate budget account is needed for PSI to accomplish its goals.

COOPERATIVE THREAT REDUCTION PROGRAM

Question. If confirmed what will your role be in implementing and overseeing the Cooperative Threat Reduction (CTR) Program?

Answer. If confirmed, I will lead development of policy guidance for CTR program objectives, scope and direction, as well as providing strategic vision for long range planning. My understanding is that the ASD(GSA) works closely with the Defense Threat Reduction Agency and the Assistant to the Secretary of Defense for Nuclear, Chemical, and Biological matters to ensure proper execution of policy guidance.

Question. If confirmed what changes, if any, would you recommend to the CTR program, including changes in legislative authorities, programs, or funding?

Answer. If confirmed, I would review carefully the several studies of CTR activities conducted in the past year. If confirmed, I will consider these studies’ findings, and work with CTR stakeholders and Congress to improve upon existing CTR successes and look for ways to better meet the WMD proliferation challenges of the 21st century.

COMPREHENSIVE TEST BAN TREATY

Question. If confirmed what role will you play in any efforts to obtain Senate ratification of the Comprehensive Test Ban Treaty?

Answer. If confirmed, I would support the USD(P), as the lead DOD policy point of contact responsible for the Comprehensive Test Ban Treaty. In this role, I would support the administration in any of its efforts to obtain Senate ratification of the Comprehensive Test Ban Treaty. I would expect to engage other senior officials in DOD, as well as officials in the Departments of Energy and State.

FOLLOW-ON TO THE STRATEGIC ARMS REDUCTION TREATY

Question. If confirmed, what role will you play in the administration’s negotiations and efforts to agree upon a new strategic arms reduction treaty?

Answer. If confirmed, I will support the Secretary of Defense's Representative to follow-on treaty negotiations, personally and through my staff.

RUSSIA

Question. What areas of opportunity and cooperation do you believe the U.S. could take to improve overall U.S. Russian relationships?

Answer. DOD's involvement in Russian relations generally is the responsibility of the Assistant Secretary of Defense for International Security Affairs (ASD(ISA)). If confirmed, I would expect to contribute to policy development, drawing on the several areas of non-proliferation and nuclear security cooperation that have developed between DOD and various Russian Federation ministries.

Question. Would you support an expansion of U.S. and Russian military-to-military relationships?

Answer. My understanding is that the office of the ASD(GSA) does not have significant involvement in military-to-military relations with the Russian Federation, aside from any nonproliferation, nuclear security, or arms control contacts we might have with the Russian Ministry of Defense.

Question. What role do you expect to play, if confirmed, on these issues?

Answer. If confirmed, I would expect to support the ASD(ISA) in any way possible.

CYBER SECURITY

Question. What are the main policy challenges facing the DOD in the area of cyber security, both within the Department and with respect to the Federal Government as a whole?

Answer. The DOD relies upon global data and telecommunication networks, defense industries, and other critical infrastructure, much of which is owned and operated by the commercial sector, to conduct full spectrum land, sea, air, and space operations. I understand that the National Security Council's 60-Day Cyber Review, directed by the President and assisted by the DOD will soon prioritize cyber challenges and propose a coordinated way forward for the Nation.

Question. What should the DOD's role be in defending the Nation against cyber threats? Should the Department play the lead role in stopping attacks from abroad through cyberspace, just as the Department defends the Nation from attack by missiles, aircraft, or ships?

Answer. My understanding is that the DOD has been focused on securing its own networks, which are crucial to the success of military and other operations, as well as providing information assistance to other departments and agencies when needed. If confirmed, I will involve myself promptly in the broader debate on DOD's role in this area.

Question. What should be the role of law enforcement and the Department of Homeland Security in directing operations to defend the Nation in cyberspace?

Answer. My understanding is that the Department of Homeland Security plays a leading role in defending the Nation against cyber attacks. I have been told that the Cyber Security Enhancement Act gives the Department of Homeland Security additional tools to combat cybercrime. Federal, state, and local law enforcement agencies in partnership with the Department of Homeland Security play an important role in the defense, investigation, and prosecution of cyber criminals and cyber terrorists. However, to achieve a confident national cybersecurity posture, all Federal departments need to collaborate more closely and better involve the private sector in their efforts.

Question. What organizational and operational construct would allow multiple departments and agencies to mount an effective, unified defense of the Nation's cyber networks and resources?

Answer. My understanding is that the National Security Council's 60-Day Cyber Review, directed by the President and assisted by the DOD is specifically reviewing organizational and operational constructs to improve interagency unified defense.

Question. In your view, is there a need for a strategy and doctrine for deterring foreign adversaries from engaging in attacks on the United States through cyberspace, just as there is a nuclear deterrence strategy and doctrine based on the threat of retaliation?

Answer. My understanding is that there may be a need to adapt our defense and military strategies to ensure that we preserve the ability to protect our national security. These concepts can be incorporated into our general deterrence strategies.

Question. Should the United States have the ability, and announce the intention, to undertake offensive operations in cyberspace, through the DOD, in retaliation

against, or to defeat, foreign aggression in cyberspace? Does such doctrine exist today, in your view?

Answer. All nations have the right of self-defense. Military doctrine is adaptive and has recognized the growing importance of cyber capabilities. If confirmed, I will consider this issue carefully and work with Congress and key stakeholders on potential improvements.

Question. Defending cyberspace implies the need for conducting surveillance in cyberspace to achieve the ability to warn of threats and to characterize them.

Can surveillance in cyberspace be conducted effectively without impinging on the privacy interests of the American people?

Answer. Any surveillance activity conduct by or on behalf of the U.S. government must be conducted in accordance with applicable statutes and regulations designed to protect the privacy of the American people.

Question. In your view, will it be necessary to publicly disclose more information about the government's plans and methods for conducting surveillance in cyberspace in order to explain how civil liberties and privacy will be protected?

Answer. It is important for the government to be able to explain its tactics, techniques, and procedures with enough context to ensure public confidence that activities are being undertaken appropriately, and for worthwhile purposes.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Assistant Secretary of Defense for Global Strategic Affairs?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JOHN THUNE

FISCAL YEAR 2010 DEFENSE BUDGET PROPOSAL

1. Senator THUNE. Dr. Nacht, on April 6, Secretary Gates announced significant changes in the fiscal year 2010 defense budget proposal. Some of the most significant changes deal with canceling some programs, prematurely ending production of others, or putting other programs on hold—as is the case for the CSAR-X, the F-22, and the Next Generation Bomber, respectively. This announcement came 2 weeks prior to the Department announcing the start of the 2010 Quadrennial Defense Review (QDR) and Nuclear Posture Review (NPR). As future policy advisors to the Secretary, I would like to get your opinions on whether or not these most recent budget decisions were indeed informed policy decisions. Before making such significant changes, wouldn't these important changes benefit from the knowledge gained by the QDR and the NPR?

Dr. NACHT. Yes, Secretary Gates' most recent budget decisions were informed policy decisions. He reached these decisions after consultations with the President, and with the military and civilian leadership of the Department of Defense (DOD). On his Defense Budget Recommendation Statement on 6 April 2009, Secretary Gates described these decisions as the product of "a holistic assessment of capabilities, requirements, risks and needs for the purpose of shifting the department in a different strategic direction."

Secretary Gates announced significant changes in the fiscal year 10 defense budget proposal and he wants that the QDR and the NPR inform programs affected by these decisions. Some of the programs were halted or delayed and others cancelled to allow the Department to reassess the needs that these programs are supposed to meet. The Department will consider the outcome of major defense reviews and arms control negotiations in this process. Clear examples of this approach are the three programs you addressed in this question.

First, to sustain U.S. air superiority, Secretary Gates committed to build a fifth generation of tactical fighters capability that can be produced in quantity at sustainable cost. He recommended increasing investment on the F-35 Joint Strike Fighter and ending production of the F-22 fighter at 187. Secondly, he placed the Next Generation Bomber on hold to first assess the requirements, develop a better understanding of the technology and of other capabilities we might have for this mission, and to incorporate the outcome of the QDR, the NPR and the Strategic Arms Reduction Treaty (START) Follow-on negotiations. Finally, Secretary Gates recommended terminating the Air Force Combat and Rescue X (CSAR-X) helicopter program. This program has a history of acquisition problems and is another example of single-service solution with a single-purpose aircraft for an important mission affecting all Services. The Department will reassess the requirements and develop a more sustainable approach.

POST-START NEGOTIATIONS AND THE NEXT GENERATION BOMBER

2. Senator THUNE. Dr. Nacht, as an experienced nuclear arms reduction negotiator, you no doubt have unique insight into what will be involved in negotiating a Post-START arms treaty. How long do you predict the Post-START arms treaty negotiation process will take?

Dr. NACHT. Everyone recognizes that the negotiation of a START Follow-on Treaty will be difficult. The negotiations have started and thus far have been business like. The Obama administration will make every effort to conclude the Treaty before the expiration of the START Treaty in December 2009.

3. Senator THUNE. Dr. Nacht, do you think the Senate will have enough time to fully consider and ratify the follow-on treaty by December 5, 2009, when the current START treaty expires? If not, how long do you think it will be before a follow-on START treaty can be ratified by the Senate?

Dr. NACHT. We hope to conclude a START Follow-on Treaty by December 2009. There are options we might pursue if this does not prove possible. We hope that the Senate will promptly ratify a START Follow-on Treaty. The procedure and times lines for providing Senate advice and consent are a matter for the Senate, not the executive branch.

4. Senator THUNE. Dr. Nacht, one of the reasons Secretary Gates gave for delaying development of the Next Generation Bomber is to ensure the program will be informed by the outcome of the Post-START arms control negotiations. One can only assume the Secretary is concerned that the Post-START may restrict the Next Generation Bomber to a conventional-only role, negating the requirement to design it as a nuclear capable platform. In your opinion, what role do bombers play as a nuclear deterrent?

Dr. NACHT. Currently, the United States maintains a triad of strategic nuclear forces that includes land-based intercontinental ballistic missiles (ICBMs), nuclear-powered ballistic missile submarines (SSBNs) armed with submarine-launched ballistic missiles (SLBMs), and long-range bombers able to deliver both stand-off cruise missiles and gravity bombs. Each leg of the triad brings unique capabilities. Together, the legs of the nuclear triad combine to provide operational flexibility and help ensure that an adversary cannot pose a threat that could potentially negate the entire force.

Secretary Gates stated that, "We will not pursue a development program for a follow-on Air Force bomber until we have a better understanding of the need, the requirement and the technology. We will examine all of our strategic requirements during the QDR, the NPR, and in light of post-START arms control negotiations." He did not link the funding of the new bomber to the outcome of the negotiations. As Secretary of the Air Force Michael Donley and Air Force Chief of Staff General Norton Schwartz have both stated, "We are also modernizing our existing bomber force to increase its effectiveness and survivability against emerging threats, while meeting the requirements of today's Joint Force Commanders." I agree with this policy.

Any decisions on the future of the bomber force in the nuclear deterrent role will be informed by the NPR.

5. Senator THUNE. Dr. Nacht, since ground-based and submarine-based ballistic missiles are not overtly visible deterrents, is it important to have a credible, nuclear capable bomber force that can be used as a visible sign of our National will?

Dr. NACHT. Everyone recognizes the need to maintain an effective bomber force. As Secretary of the Air Force Michael Donley and General Norton A. Schwartz have recently stated, "We are also modernizing our existing bomber force to increase its effectiveness and survivability against emerging threats, while meeting the requirements of today's Joint Force Commanders." The U.S. Air Force is in the process of setting up the Global Strike Command to assure that we have an effective nuclear capable bomber force.

The United States maintains a triad of strategic nuclear forces that includes land-based ICBMs, SSBNs armed with SLBMs, and long-range bombers able to deliver both stand-off cruise missiles and gravity bombs. Each leg of the triad brings unique capabilities. Together, the legs of the nuclear triad combine to provide operational flexibility and help ensure that an adversary cannot pose a threat that could potentially negate the entire force.

The U.S. strategic bomber force, along with U.S. and the North Atlantic Treaty Organization dual-capable aircraft, provides a visible deterrence tool that can be used to signal U.S. and allied resolve in an escalating or continuing crisis.

The overall U.S. nuclear posture, including the issue of the nuclear role bomber force, will be reviewed as part of the NPR, and any changes to the current policy will be informed by the review.

JOINT TASK FORCE GUANTANAMO DETAINEES

6. Senator THUNE. Dr. Nacht, I would like to get your opinion on the increasing burden of proof our military forces face when capturing and prosecuting terrorists. With some of the recent decisions being made, it appears the burden of proof that a detainee constitutes a threat to the U.S. has increased to a level that is beyond our servicemember's capability to meet. In other words, the review process increasingly requires levels of evidence and chain of evidence, such that our military is ill equipped, not properly trained, and, in my opinion, should not be required to obtain while operating on the battlefield. As the Assistant Secretary of Defense for Global Security Affairs, one of your responsibilities will be detainee affairs. How should the DOD properly balance the need for battlefield commanders to detain hostile individuals with the increasing requirement to validate their detention with an ever-increasing amount of substantiated evidence?

Dr. NACHT. First, I would like to clarify that the office of Detainee Affairs has been transitioned into the office of Detainee Policy. Moreover, the office of Detainee Policy is no longer part of my office, Global Strategic Affairs.

To respond to your question, U.S. forces conduct detention operations in accordance with the law of war and are trained to be able to determine which individuals may be lawfully detained. However, they are not trained as criminal investigators, and the traditional battlefield is not conducive to classic chain-of-evidence and similar requirements. Imposing such requirements in a battlefield setting would be problematic. Although detainees held at Guantanamo Bay have the right to contest the basis for their detentions through petitions for the writ of habeas corpus, the Federal Courts have also affirmed the lawfulness of detaining those who engage in hostile activities against U.S. and allied forces under the law of war.

7. Senator THUNE. Dr. Nacht, the administration has stated that it will close the Guantanamo detention facility within a year. What are your thoughts on how the administration should close Guantanamo?

Dr. NACHT. Although this topic is not under my purview as Assistant Secretary of Defense for Global Strategic Affairs, my colleagues who work this issue inform me that the President's Executive Order, signed on January 22, 2009, states that the detention facilities at Guantanamo shall be closed as soon as practicable, and no later than one year from the date of this order. The Executive Order also directs a review of the status of each individual currently detained at Guantanamo and a determination as to the appropriate disposition for each individual. DOD is fully participating in this Attorney General-coordinated review, and it would be premature to comment on how Guantanamo should be closed before the review is completed.

8. Senator THUNE. Dr. Nacht, what plans would you propose in terms of transfer of detainees to the U.S.?

Dr. NACHT. Although this topic is not under my purview as Assistant Secretary of Defense for Global Strategic Affairs, my colleagues who work this issue inform me that at this time, there are no court orders to transfer detainees to the United States. DOD is fully participating in the Attorney General-coordinated review of all 240 detainees currently being detained by DOD at Guantanamo, and it would be premature to decide on such a plan prior to the completion of the review.

9. Senator THUNE. Dr. Nacht, how will you take into account that the Senate has passed a resolution by a vote of 94 to 3 that Guantanamo detainees, including senior members of al Qaeda, should not be transferred stateside into facilities in American communities and neighborhoods?

Dr. NACHT. Although this topic is not under my purview as Assistant Secretary of Defense for Global Strategic Affairs, my colleagues who work this issue inform me that the President's Executive order, which was signed on January 22, 2009, directed a review of the status of each individual currently detained at Guantanamo and a determination as to the appropriate disposition for each individual. The review is identifying and considering all legal, logistical, and security issues relating to the potential transfer of individuals currently detained at Guantanamo to facilities within the United States. DOD is fully participating in this Attorney General-coordinated review.

IMPORTANCE OF MISSILE DEFENSE THIRD SITE

10. Senator THUNE. Dr. Nacht, based on the changes to the ballistic missile defense program Secretary Gates recently announced, coupled with statements the administration has previously made, it appears that President Obama has no intention to continue with plans to field a third ballistic missile defense site in Eastern Europe. As the Assistant Secretary of Defense for Global Security Affairs, your office will be responsible for building the capability of partners and allies, coalition affairs, as well as security cooperation. How will the decision to delay, and likely cancel, the third ballistic missile defense site affect your ability to partner with other nation's defense agencies?

Dr. NACHT. The administration currently is reviewing ballistic missile defense policies, plans and strategies. No decision has been made on whether to proceed, delay or cancel the "third site" in Europe. Any such decision will be made in the context of pursuing missile defenses that are effective and well proven.

We will consult with our allies to ensure they are fully aware of and understand the basis for any decision on the third site. Therefore, we expect to continue to enjoy close relations and full cooperation with other nations' defense agencies.

11. Senator THUNE. Dr. Nacht, won't our allies and coalition partners be less likely to enter into arrangements with us for fear we will back out based on the political circumstances back home?

Dr. NACHT. The United States is currently reviewing its BMD policies and strategies, including options for defending against the Iranian ballistic missile threat. Initial results will be available later this year. Regardless of the option selected to address the Iranian threat, the United States will move forward with missile defenses and continue work with our allies where our common strategic interests are best served.

[The nomination reference of Dr. Michael Nacht follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
April 20, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Michael Nacht of California, to be an Assistant Secretary of Defense, vice Joseph A. Benkert.

[The biographical sketch of Dr. Michael Nacht, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF DR. MICHAEL NACHT

Michael Nacht is currently Professor of Public Policy and former Aaron Wildavsky Dean at the Goldman School of Public Policy at the University of California-Berkeley. Nacht served a 3-year term as a member of the U.S. Department of Defense Threat Reduction Advisory Committee, for which he chaired panels on counter terrorism and counter proliferation of weapons of mass destruction, reporting to the Deputy Secretary of Defense. He continues to consult for Sandia National Laboratories and Lawrence Livermore National Laboratory. From 1994–1997, Nacht was assistant director for Strategic and Eurasian Affairs at the Arms Control and Disarmament Agency, leading its work on nuclear arms reduction negotiations with Russia and initiating nuclear arms control talks with China. He participated in five summit meetings with President Clinton—four with Russian President Boris Yeltsin and one with Chinese President Jiang Zemin. Nacht has testified before Congress on subjects ranging from arms control to the supply and demand for scientists in the workplace. Nacht earned his B.S. in aeronautics and astronautics at New York University and began his career working on missile aerodynamics for the National Aeronautics and Space Administration before earning a Ph.D. in political science at Columbia University.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by Dr. Michael Nacht in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Michael Leonard Nacht.

2. **Position to which nominated:**

Assistant Secretary of Defense for Global Strategic Affairs.

3. **Date of nomination:**

April 20, 2009.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. Date and place of birth:

September 1, 1942; New York, NY.

6. Marital Status: (Include maiden name of wife or husband's name.)

Married to Marjorie Jo (Seltzer) Nacht.

7. Names and ages of children:

David Allen Nacht, 43.

Alexander Carey Nacht, 39.

8. Education: List secondary and higher education institutions, dates attended, degree received, and date degree granted.

Christopher Columbus High School, New York City, NY; Attended: 1956–1959; High School Diploma, 1959.

New York University, New York City, NY; Attended: 1959–1963; BS Aeronautics and Astronautics, 1963.

Case Western Reserve University, Cleveland, OH; Attended: 1963–1966; MS, Statistics, 1966.

New York University, New York City, NY; Attended: 1966–1969; MS Operations Research, 1969.

New School for Social Research; Attended: 1967–1970; MA Political Science, 1970.

Columbia University, New York City, NY; Attended: 1970–1973; Ph.D. Political Science, 1973.

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Professor of Public Policy, Goldman School of Public Policy, University of California, Berkeley, Berkeley, CA, July 1998–Present.

Dean, Goldman School of Public Policy, University of California, Berkeley, Berkeley, CA, July 1998–June 2008.

10. Government experience: List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed above.

2002–2004; Chair, Panel on Counterproliferation, Threat Reduction Advisory Committee, Defense Threat Reduction Agency.

2001–2002; Chair, Panel on Counterterrorism, Threat Reduction Advisory Committee, Defense Threat Reduction Agency.

1994–1997; Assistant Director for Strategic and Eurasian Affairs, U.S. Arms Control and Disarmament Agency (U.S. Senate Confirmed July 1994).

1963–1966; Aerospace Engineer, NASA Lewis (now John Glenn) Research Center, Cleveland, OH.

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Goldman School of Public Policy, University of California, Berkeley, Professor (1998–Present), Dean (1998–2008).

Sandia National Laboratories, Consultant.

Lawrence Livermore National Laboratory, Consultant.

Corporate Scenes, Inc., Consultant.

Center for Global Partnership, Consultant.

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

See Question 11 above. In addition, I hold the following memberships:

Council on Foreign Relations (New York), Member.

International Institute for Strategic Studies (London), Member.

Cosmos Club (Washington, DC), Member.

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

09/08, \$2,300, Obama, Barack.

06/07, \$1,300, Obama, Barack.

06/07, \$1,000, Obama, Barack.
 05/07, \$500, Democratic Congressional Campaign Committee, 2008.
 05/07, \$2,300, David Nacht for Congress, 2007.
 04/07, \$2,300, David Nacht for Congress, 2007.
 09/07, (\$400), David Nacht for Congress, 2007.
 09/07, (\$2,300), David Nacht for Congress, 2007.
 03/06, \$1,000, Miller, Harris.
 08/04, \$1,000, Kerry, John.
 07/04, \$1,000, Kerry, John.

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

2007, Fellow, California Council on Science and Technology.
 2002, Listed, Who's Who in America.
 1997, Distinguished Honor Award, U.S. Arms Control and Disarmament Agency.
 1983, Traveling Fellowship, International Research and Exchange Board.
 1972, President's Fellow, Columbia University.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

See attached list of publications.

[Nominee responded and the information is retained in the committee's executive files.]

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

Speech on American foreign policy delivered at the University of Sydney, Australia, and December 2007. A published version was printed in the Sydney Morning Herald, mid-December 2007. See attached speech.

[Nominee responded and the information is retained in the committee's executive files.]

Prepared Statement Before the Subcommittee on International Operations of the Committee on Foreign Relations of the U.S. Senate on the Future of the Arms Control And Disarmament Agency, May 11, 1995.

Prepared Statement Before the Subcommittee on Asian and Pacific Affairs of the Committee on Foreign Affairs of the U.S. House of Representatives, July 1991.

Prepared Statement on "Scientists and Engineers: Supply and Demand," Hearings Before the Science Policy Task Force of the Committee on Science and Technology. House of Representatives, 99th Cong., 2nd Sess., July 1985.

Prepared Statement on "Security Relations," Hearings Before the Subcommittee on Asian and Pacific Affairs and on International Economic Policy and Trade of the Committee on Foreign Affairs. House of Representatives, 98th Cong., 2nd Sess., May-June 1984.

Prepared Statement on "Japanese Defense Policy," Hearings Before the Committee on Foreign Affairs. House of Representatives, Subcommittee on Asian and Pacific Affairs. 97th Cong., 2nd Sess., March 1982.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B-F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B-F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

MICHAEL NACHT.

This 27th day of April, 2009.

[The nomination of Dr. Michael Nacht was reported to the Senate by Chairman Levin on May 6, 2009, with the recommendation

that the nomination be confirmed. The nomination was confirmed by the Senate on May 7, 2009.]

[Prepared questions submitted to Wallace C. Gregson by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions? If so, what areas do you believe might be appropriate to address in these modifications?

Answer. Goldwater-Nichols was landmark legislation that led to dramatic improvements in operational effectiveness, unity of effort, and civilian oversight. There is now a generation of military leaders who are experienced with operating in a coordinated and joint, multi-service environment. At this time, I do not see the need to change the provisions of this legislation.

DUTIES

Question. Department of Defense (DOD) Directive 5111.17 assigns the responsibilities, functions, relationships, and authorities of the Assistant Secretary of Defense for Asian and Pacific Security Affairs (ASD(APSA)). The directive establishes ASD(APSA) as the principal advisor to the Under Secretary of Defense for Policy and the Secretary of Defense on various matters relating to the Asian and Pacific regions, their governments, and defense establishments.

What is your understanding of the duties and functions of the ASD(APSA)? Will they differ in any way from those described in DOD Directive 5111.17?

Answer. The ASD(APSA) is the principal advisor to the Under Secretary of Defense for Policy (USD(P)) and the Secretary of Defense on international security strategy and policy on issues of DOD interest that relate to the Nations and international organizations of the Asian and Pacific regions, their governments, and defense establishments and for oversight of security cooperation programs, including Foreign Military Sales, in these regions.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. Throughout my 37-year career in the U.S. Marine Corps, I had the privilege of serving the United States of America throughout the Asia-Pacific region along side my fellow marines, soldiers, airmen, sailors, coast guardsmen, and civilians. From 2003 to 2005 I served as Commanding General of the Marine Corps Forces Pacific and Marine Corps Forces Central Command, where I led and managed over 70,000 marines and sailors in the Middle East, Afghanistan, East Africa, Asia, and the United States. From 2001 to 2003 I served as Commanding General of all Marine Corps forces in Japan. Prior to my time in Japan I was Director of Asia-Pacific Policy in the Office of the Secretary of Defense from 1998 to 2000. I am a member of the Council on Foreign Relations; the Pacific Council on International Policy; and the International Institute for Strategic Studies.

RELATIONSHIPS

Question. If confirmed, what will be your relationship with: the Secretary of Defense; the Deputy Secretary of Defense; The Under Secretary of Defense for Policy; the Under Secretary of Defense for Intelligence; the Chairman of the Joint Chiefs of Staff; Commander, U.S. Pacific Command; Commander, U.S. Central Command; Commander, U.S. Special Operations Command; other combatant commanders; the Service Secretaries and Service Chiefs; the Assistant Secretary of Defense for International Security Affairs; the Assistant Secretary of Defense for Homeland Defense; the Assistant Secretary of Defense for Global Strategic Affairs; and the Assistant Secretary of Defense for SO/LIC & Interdependent Capabilities?

Answer. If confirmed, I will report to the Secretary of Defense and Deputy Secretary of Defense through the Under Secretary of Defense for Policy. I expect to develop and maintain a close working relationship with under secretaries and assistant secretaries across the Department, the General Counsel of the DOD, the Secretaries of the Military Departments, the Chairman and Vice Chairman of the Joint Chiefs of Staff, and with combatant commanders. As appropriate, if confirmed, I would also work closely with and coordinate with the other Assistant Secretaries of Defense within OSD Policy. Examples of this coordination include working with the Assistant Secretary of Defense for International Security Affairs on the role of the North Atlantic Treaty Organization (NATO) in Afghanistan; the Assistant Secretary of Defense for Special Operations and Low Intensity Conflict and Interdependent Capabilities on Counterterrorism and Pakistan; the Assistant Secretary of Defense for Homeland Defense and Americas Security Affairs on humanitarian assistance and disaster relief efforts in Asia; and the Assistant Secretary of Defense for Global Strategic Affairs on counternarcotics, nuclear and security assistance matters.

CHALLENGES AND PRIORITIES

Question. In your view, what are the major challenges that will confront the next ASD(APSA)?

Answer. I believe there are six major challenges in Asia and the Pacific that the next ASD(APSA) will face. First, the Governments of Afghanistan and Pakistan both need support to counter and defeat al Qaeda and its extremist allies. Second, North Korea's conventional military threat, weapons of mass destruction (WMD) and proliferation activities are a threat to regional security. Third, China's military buildup may be tipping the stability balance in the Taiwan Strait and poses an unknown risk to the region at large. Fourth, we must remain vigilant as we continue alliance transformation and strengthening of our important security alliances with Japan and South Korea. Fifth, a conventional or even nuclear confrontation between Pakistan and India would be a disaster. Finally, in Southeast Asia there are challenges in sustaining defense reforms and democratic consolidation, as well maintaining effective counter-terrorism cooperation.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. Strategies for dealing with many of the challenges are in place at the Pentagon, but I am informed that since January, the administration has been conducting a number of major strategy reviews, particularly the recently completed Afghanistan-Pakistan strategic review. These reviews are being conducted in close coordination with the interagency community and with consultations with Congress and our international partners. If confirmed, I will analyze current strategies, review the results of the recent strategy reviews, and participate in ongoing policy reviews, such as the Quadrennial Defense Review (QDR).

Question. If confirmed, what broad priorities would you establish in terms of issues that must be addressed by the ASD(APSA)?

Answer. Strategies for dealing with these challenges are largely in place at the Pentagon, among the U.S. interagency, and in agreements with our partners in the region. If confirmed, I see the challenge as principally one of careful, sustained execution of these strategies rather than devising new initiatives.

In Afghanistan, my principal focus would be on supporting coalition efforts to train and equip Afghan security forces, as well as integrating both the military and governance elements of the counterinsurgency. This also includes working with Pakistan to eliminate safehavens in the Federally Administered Tribal Areas.

Regarding North Korea, I would work with the Department of State and regional partners to press North Korea to meet its commitments—including denuclearization—as agreed to during the Six-Party Talks, while maintaining the capability to deter potential North Korea military threats and countering proliferation activities.

With regard to China, the strategy is one of careful, measured military engagement with the Government of China and the Peoples Liberation Army, pressing for transparency while also sustaining our military capabilities to fulfill our defense commitments in the region.

In order to sustain the realignment and transformation processes already underway, we need to review progress constantly and resolve challenges in the bilateral relations with both Tokyo and Seoul: these are complex, multi-stage projects that require sustained political and budgetary support on both sides of the Pacific.

In South Asia, I would work with the Department of State to promote confidence building measures between India and Pakistan while continuing to develop our bilateral security relations with both nations.

Finally, in Southeast Asia I would sustain and expand our relations with regional militaries to promote regional security, defense reforms and respect for human rights.

ENGAGEMENT POLICY

Question. One of the central pillars of our national security strategy has been military engagement as a means of building relationships around the world. Military-to-military contacts, Joint Combined Exchange Training exercises, combatant commander exercises, humanitarian assistance operations, and similar activities are used to achieve this goal.

If confirmed, would you support continued engagement activities of the U.S. military? If yes, would you advocate for expanding U.S. military-to-military engagement? If not, why not?

Answer. If confirmed, I will support continued U.S. military-to-military engagement. I believe the current and emerging security environment will require robust engagement with the militaries of our partners and allies around the world, and building productive relationships with many States in which our past military-to-military engagements have been limited or absent entirely.

Question. Do you believe that these activities contribute to U.S. national security?

Answer. Yes.

STABILITY OPERATIONS

Question. Experience in Iraq has underscored the importance of planning and training to prepare for the conduct and support of stability operations in post-conflict situations.

In your view, what is the appropriate relationship between DOD and other departments of government in the planning and conduct of stability and support operations in a post-conflict environment?

Answer. DOD has and will continue to play a supporting role to civilian agencies in stability and support operations post-conflict.

Question. What lessons do you believe the Department has learned from the experience of planning and training for post-conflict operations in Iraq?

Answer. Recent operations in Iraq demonstrate that long-term success requires a robust capacity for integrated civil-military action and substantially more resources to support the expeditionary capacity of civilian departments. Long-term success will also require close cooperation between DOD and other U.S. Government departments in planning, preparing for, and conducting stability and support operations, both in terms of DOD participation in whole-of-government efforts and for inter-agency participation in the development of military campaign and contingency planning.

BUILDING PARTNER CAPACITY

Question. In the past few years, Congress has provided the DOD a number of temporary authorities to provide security assistance to partner nations. These include the global train and equip authority ("Section 1206") and the security and stabilization assistance authority ("Section 1207").

In your view, what are our strategic objectives in building the capacities of partner nations in the Asian and Pacific region?

Answer. The strategic imperatives driving our partner capacity building efforts include strengthening bilateral relationships; increasing access and influence; promoting militaries that respect human rights, civilian control of the military, and the rule of law; and building capacity for common military objectives. These objectives differ by country and by context. DOD has a particular interest in building the capacity of partner-nations to participate in coalition operations or counterterrorism, or promote regional or global security in order to reduce stress on the U.S. Armed Forces and reduce the risk of future military interventions.

Question. What is your understanding of the purpose of the section 1206 global train and equip authority? What is your assessment of the implementation of the global train and equip program?

Answer. As I understand it, section 1206 is intended to provide a quicker more targeted ability to build partner capacity than the more traditional routes of security assistance and is focused on building capacity to achieve security objectives. This authority has two discrete purposes outlined in law: to build a partner's national military or maritime security forces' capacity either to: (1) conduct counterterrorist operations; or (2) conduct or support stability operations where U.S. forces are participating.

If confirmed, I will assess the program to ensure it is used in keeping with the intent of the authority and that it produces the intended security outcomes.

Question. What is the relationship of the global train and equip authority to other security assistance authorities, such as counternarcotics assistance and foreign military financing? What should be done to ensure that the global train and equip authority does not duplicate the efforts of these other assistance programs?

Answer. The global train and equip authority fills two specific legal requirements (to build capacity for counterterrorism and stability operations where U.S. forces are a participant). Foreign Military Financing serves broad foreign policy objectives such as improving bilateral relations, encouraging behavior in the U.S. interest, increasing access and influence, and building capacity particularly where host-nation and U.S. interests align. Secretary Gates noted in April 2008 that “. . . building partner capacity is a vital and enduring military requirement—irrespective of the capacity of other departments.” Counternarcotics authorities are focused on providing DOD the ability to support U.S. or other Government efforts to counter the flow of narcotics globally.

We should avoid duplication of effort among these activities. If confirmed, I will do everything I can to deconflict among them.

Question. What is your understanding of the purpose of the security and stabilization assistance authority (“Section 1207”)? What is your assessment of how this authority has been utilized?

Answer. My understanding is that section 1207 fills a gap in the Department of State’s ability to provide stabilization and reconstruction assistance. It allows DOD to transfer funding to the State Department to help meet State’s reconstruction, security, or stabilization efforts. Secretary Gates made clear in past testimony how he sees the purpose of “Section 1207” authority: “A touchstone for the Defense Department is that 1207 should be for civilian support for the military—either by bringing civilians to serve with our military forces or in lieu of them.” I will monitor it closely, especially as it relates to the Asia-Pacific region, if confirmed.

Question. Secretary Gates has called for an expansion of the Government’s resources devoted to instruments of non-military “soft power”—civilian expertise in reconstruction, development, and governance.

Do you agree with Secretary Gates that there is a need to expand the Government’s resources devoted to the ability of civilian departments and agencies to engage, assist, and communicate with partner nations?

Answer. Yes.

Question. In your view, what should be the role of the DOD, vis-à-vis other civilian departments and agencies of the Government, in the exercise of instruments of soft power?

Answer. Generally, the Department’s role should be to support, not lead, in the exercise of “soft power.”

Question. Which department should have the lead in setting U.S. Government security assistance policy, the Department of State or the DOD?

Answer. The Department of State should retain the lead in setting U.S. Government security assistance policy.

AFGHANISTAN

Question. In your view, what should be our strategic objectives in Afghanistan?

Answer. I believe that America’s most enduring interest in the region is eliminating extremist threats in Afghanistan and Pakistan by disrupting, dismantling, and defeating al Qaeda and its safe havens in Pakistan and preventing their return to Afghanistan or Pakistan. If confirmed, I expect to support the Department’s efforts in this critical challenge, which requires urgent and sustained attention.

Question. What changes, if any, would you recommend to our current strategy in Afghanistan?

Answer. The President’s new strategy for Afghanistan and Pakistan takes the important step of adopting an integrated approach between civilian and military elements and approaching Afghanistan and Pakistan as one theater for diplomacy. This will help achieve key objectives of disrupting terrorist networks, promoting a more capable, accountable and effective government in Afghanistan, developing increasingly self-reliant Afghan security forces, supporting civilian control, constitutional government and a vibrant economy in Pakistan, as well as supporting international community involvement and UN leadership in the effort. If confirmed, I look forward to working with Congress in achieving the important goals of this strategy.

Question. Do you believe that there is a need to develop a comprehensive civil-military plan for Afghanistan, akin to that used in Iraq?

Answer. Yes.

Question. What is your assessment of the contributions of NATO allies to the effort in Afghanistan? Should the United States continue to press the NATO and other allied countries to increase their contributions to the Afghanistan effort, and if so, how might these countries do so?

Answer. Our allies and non-NATO partners contribute significant resources and personnel to the efforts in Afghanistan. Non-U.S. members of NATO, Australia and other non-NATO allies are contributing approximately 32,000 forces in Afghanistan. NATO countries also announced new commitments of personnel and resources at the recent NATO summit, with particular focus on building Afghanistan's own security forces. Japan has made significant financial contributions, including its recent \$1 billion commitment to Pakistan. Nevertheless, the challenges and needs in Afghanistan and Pakistan are even greater.

The United States should continue to look to our allies around the world to shoulder a significant share of the military and financial burdens in Afghanistan. If confirmed, I would support continued efforts to urge our friends and allies to increase contributions in their areas of greatest strength. I would particularly look forward to working with our partners in Asia toward that end.

Question. General David McKiernan, USA, Commander of the NATO International Security Assistance Force and Commander, U.S. Forces—Afghanistan, has identified a need for 4 additional combat brigades and support units in Afghanistan, equaling up to 30,000 additional troops. President Obama has approved the deployment of an additional 17,000 U.S. troops to Afghanistan in late spring and summer of this year. General McKiernan has said that these additional forces provide him what he needs for the coming months, but additional forces will still be needed to meet fully his request.

Do you support General McKiernan's request for additional forces?

Answer. I have not been fully briefed on the details of current operations and threat assessments, or internal deliberations associated with the Afghanistan/Pakistan strategy review. If confirmed, I look forward to assisting the USD(P) and others to assess the appropriate level of military forces required.

Question. If so, how should the Department support combat brigades increases in Afghanistan, ahead of the national elections? Would you support drawing down U.S. forces in Iraq faster or redirecting to Afghanistan combat brigades already slated to replace brigades in Iraq in order to meet General McKiernan's request?

Answer. The President has approved the deployment of more than 21,000 additional U.S. forces to Afghanistan to meet urgent security needs, particularly in the volatile southern provinces, including the critical necessity to train additional Afghan National Security Forces (ANSF). My understanding is that these forces will arrive in Afghanistan in advance of the presidential election in August. It is also my understanding that the administration has looked to our allies and partners to provide additional forces to ensure security during the elections as well as the success of the ANSF training mission, and many allies have recently made additional commitments. To my knowledge no decision has been made on the deployment of additional U.S. combat brigades beyond the 21,000 additional U.S. forces noted above.

Question. Would you support the temporary extension of combat brigades already deployed to Afghanistan? Would you support the accelerated deployment of combat brigades slated to deploy later this year to Afghanistan?

Answer. If confirmed, I would expect to work closely with USD(P), the Joint Staff and Secretary of Defense to ensure deployment lengths of combat brigades in Afghanistan strike an appropriate balance between meeting our commanders' operational requirements and maintaining the health and readiness of our forces.

Question. The goal for increasing the size of the Afghan National Army (ANA) has been revised from 68,000 to approximately 134,000 soldiers.

In your view, should rapidly increasing the number of U.S. trainers to accelerate the expansion of the ANA be a top priority in Afghanistan?

Answer. Building an effective, broadly representative, and respected ANA requires significant resources, and the President's strategy review has made this objective a top priority. If confirmed, I will support the USD(P) and Secretary of Defense in providing oversight and guidance that ensures there are the right numbers of trainers, mentors, and advisors with sufficient resources to accomplish their mission.

Question. What recommendations, if any, would you have for encouraging or enabling our coalition partners to provide more training team personnel to embed with ANA units?

Answer. It is my understanding that the United States and NATO have assumed a long-term commitment to develop Afghan forces that can eventually take the lead

for security in Afghanistan. If confirmed, I look forward to supporting the Department's efforts to encourage our coalition partners to deliver on their commitments to provide training team personnel.

Question. One of the main threats to U.S. and coalition forces in Afghanistan comes from cross-border attacks by the Taliban and extremist militants who find safe haven in Pakistan's border regions. Director of National Intelligence Dennis Blair recently stated that "No improvement in the security in Afghanistan is possible without progress in Pakistan." He also stated, "No improvement in Afghanistan is possible without Pakistan taking control of its border areas and improving governance, creating economic and educational opportunities throughout the country."

What steps in your view need to be taken to eliminate or mitigate the threat posed by Afghan Taliban and extremist militants hiding out across the Afghan-Pakistan border?

Answer. As the President's strategy makes clear, Afghanistan and Pakistan are in many respects a single theater of operations, and both President Obama and Secretary Gates have cited the need to eliminate the terrorist sanctuary in the border regions of Pakistan. This sanctuary poses a potential threat not only to Afghanistan, but to the region and indeed to the United States. Clearly however, there is no purely military solution. The United States must pursue an integrated civil-military approach to promote development and prevent terrorism across the Afghanistan-Pakistan border region, as called for in our new strategy. If confirmed, I intend to work closely with my DOD and interagency colleagues to that purpose.

Question. Would you agree that it is possible that developments within Afghanistan could lead to improvements in Afghanistan's security irrespective of developments in Pakistan's border areas?

Answer. I agree that many of Afghanistan's challenges are internal. This is true of certain insurgent activities, the problem of warlords, poppy cultivation and narcotics production, and general criminality. However, I believe that we have learned from years of conflict that insurgent and terrorist safe-havens in Pakistan and illicit cross-border activity must also be suppressed to establish sustainable security in Afghanistan.

Question. The ANA has shown itself to be effective, well-motivated, and respected by the Afghan people.

Would you support giving the ANA the lead in stopping cross-border incursions, either by transferring the mission of patrolling the border to the ANA or by bringing the Afghan Border Patrol under the ANA?

Answer. The ANA has increasingly shown itself to be effective, well-motivated, and respected. Clearly securing the border areas from cross-border incursions and illegal smuggling is an important element of a successful long-term strategy. The issue of command relationships between the Afghan Border Patrol and ANA is an area that I have not examined in detail, and if confirmed, will study more closely.

AFGHANISTAN-COUNTERDRUG EFFORTS

Question. The cultivation of poppies and trafficking of opium has reached alarming proportions in Afghanistan. Some estimate that over 50 percent of Afghanistan's gross national product is associated with the illegal opium trade and that Afghanistan is at risk of failing as a nation state. Coalition strategies for countering the opium trade have not been effective to date.

In your view, what strategy would be most effective in reducing opium production and trafficking in Afghanistan?

Answer. Opium traffic continues to distort the Afghan economy, corrode the judicial system, and exacerbate corruption and criminal violence. Countering the opium trade should include a nuanced and fully resourced coalition and Afghan strategy, including crop substitution and alternative livelihoods, interdiction and eradication, judicial reform, better law enforcement and intelligence sharing, and rural economic development and public information.

Question. What is the appropriate role for coalition nations and the larger international community in effectively addressing the counterdrug challenge in Afghanistan and the surrounding region?

Answer. I believe it is critical for the international community to play a greater role across the full range of initiatives and operations designed to help the Government of Afghanistan strengthen Afghan institutions, ranging from the judicial and law enforcement system, to its intelligence service, and the Afghan National Security Forces, so that it can better take the lead in combating narcotics in Afghanistan.

AFGHANISTAN-RECONSTRUCTION

Question. What is your assessment of the relationship between reconstruction and development in Afghanistan and achieving U.S. policy objectives in Afghanistan?

Answer. I believe that effective reconstruction and development programs are essential elements of an integrated civil-military strategy to achieve U.S. objectives in Afghanistan. These programs are especially important at the provincial and local levels where they can have the most direct impact in creating opportunity and improving lives. Unless young Afghans have reasonable economic opportunities there will never be stability and security in the country.

Question. What are the main challenges facing the U.S. and international community's reconstruction and development efforts in Afghanistan?

Answer. In my view, high levels of violence in Afghanistan constitute the most immediate and pressing challenge to reconstruction and development efforts, which must feature prominently in any successful long-term strategy. The Afghan people have suffered through more than a generation of war, and the country's development challenges are immense. The majority of Afghans make their living from farming, yet extensive drought and failing agricultural infrastructure create openings for opium production to supplant the legal agricultural economy. While Afghanistan has seen improvements in health care in recent years, life expectancy remains below 45 years while more than half of Afghan children suffer from poor nutrition and disease. While progress has been made towards primary education in Afghanistan, fewer than half of adult males and only one in eight females can read, impeding the professionalization of the Afghan Government and security forces and limiting economic growth.

Question. What would be your priorities for addressing those challenges?

Answer. If confirmed, I look forward to supporting the USD(P) in working with interagency partners to help implement the administration's strategy, including by engaging our coalition partners and the international community to advance reconstruction and development efforts in Afghanistan.

Question. What changes, if any, would you recommend for the strategy, organizational structure, or resourcing of Provincial Reconstruction Teams (PRTs) in Afghanistan?

Answer. I believe that PRTs have been critical to the development work undertaken in Afghanistan and Iraq in recent years. If confirmed, I look forward to discussing the committee's concerns and ideas on the use of PRTs.

PAKISTAN

Question. What is your view of the current state of U.S.-Pakistani security relations? Are there steps you would recommend to improve these relations?

Answer. Pakistan is a critical ally in the long-term struggle against extremism and terrorism. A confluence of overlapping security concerns—including the presence of al Qaeda terrorists and Taliban affiliated extremists, United States and NATO lines of communication to Afghanistan, nuclear weapons, and an unstable economic environment—make Pakistan a key national security interest for the United States. Pakistan and the United States share mutual interests in these areas and it is essential to continue to build and cultivate a long-term relationship built on respect and trust regarding security and other overlapping interests. If confirmed, I look forward to learning more about all aspects of ongoing U.S.-Pakistan relations and helping the USD(P) shape effective policies for engagement by the U.S. military, the State Department, and other agencies.

Question. What is your understanding and assessment of the efforts by the Pakistani Government to counter militant groups along the Afghan-Pakistan border and to fight terrorism in general?

Answer. Any enduring solution to the challenge of defeating the terrorist and cross-border insurgent groups that threaten Afghanistan, Pakistan, and the international community requires Pakistan's strong support. While the Pakistani Government has conducted several military operations in the past against militants in border areas, the region remains a sanctuary for al Qaeda and Taliban affiliated groups. The threat appears to be increasing.

Question. In your view, is the Pakistani Government doing enough to combat these threats? If not, what more should it be doing? What in your view should be the U.S. approach vis-à-vis Pakistan?

Answer. While I have not been briefed in detail on any assessments of Pakistan's willingness and ability to combat these threats, I believe that any long-term success in countering them requires extensive and sustained attention by various elements of Pakistan's Government. If confirmed, I look forward to assessing ways in which

the United States and Pakistan can work better together to combat these shared threats.

INDIA

Question. What is your view of the current state of the U.S.-India security relations?

Answer. A close and continuing security relationship with India will be important for Central Asia's security and for effectively managing Indian Ocean security in the 21st century. The United States and India have a range of common security interests that include maritime security, counterterrorism, and regional stability. I understand that U.S.-India security relations are currently quite positive, multi-faceted, and getting stronger. Military-to-military engagement is growing in size, scope, and sophistication as the two militaries become more familiar with each other through frequent exercises and subject matter exchanges.

Question. If confirmed, what specific priorities would you establish for this relationship?

Answer. If confirmed, I believe our priorities for this relationship should be focused on increasing maritime security cooperation, cooperating on counterproliferation, collaborating on humanitarian assistance and disaster response, dealing with piracy, finding ways to cooperate on counterterrorism, and deepening defense trade. Additionally, I believe there is potential for greater intelligence sharing on common threats, cooperation on missile defense, and working towards stability in Afghanistan.

Question. What, in your view, is the effect on DOD interests, if any, of the civil nuclear cooperation agreement with India?

Answer. The civil nuclear cooperation agreement was a landmark agreement that significantly transformed the U.S.-India bilateral relationship. The agreement has also deepened the level of trust between the United States and India which will have positive effects on DOD interests and will hopefully lead to greater military-to-military cooperation and increased defense trade.

Question. How do you assess the relationship between India and China and how does that relationship impact the security and stability of the region?

Answer. As Asia's two largest powers, India and China collectively will have a significant impact on Asia's future security landscape. Both countries are in the process of building their respective military capabilities. I understand India has concerns about China's increasing presence in the Indian Ocean, and also has outstanding border disputes with China. It is important to actively engage both of these Asian powers to ensure they both contribute in a positive way towards Asian stability and security.

Question. The recent incident in Mumbai raises questions about what more might be done to help India guard against and react to terrorist incidents, and underscores the fragile nature of the relationship between India and neighboring Pakistan.

What do you believe the United States should do to assist the Indian government in the prevention of and response to terrorist events?

Answer. As the world's largest democracy, India is a critical strategic partner of the United States. Both India and the United States share an interest in preventing terrorism. After the Mumbai attacks, I understand there may be greater interest from India in counterterrorism cooperation. If confirmed, I will work with the State Department to carefully consider all requests for counterterrorism assistance from India.

Question. What is your assessment of the relationship between India and Pakistan?

Answer. Tensions between India and Pakistan significantly increased after the Mumbai attacks in November 2008. India's response after the Mumbai attacks was commendable for its restraint and responsible behavior. While the situation has stabilized somewhat since November, I believe relations between India and Pakistan remain fragile.

Question. In your view, what impact has this rise in tensions between Pakistan and India had on the stability of the South Asia region, generally, and on the prospects for security in Afghanistan?

Answer. India, Pakistan, and Afghanistan are linked by history, culture, language, and trade, and regional stability cannot be achieved without the cooperation of all three. It is in America's national interest to play a constructive role in helping defuse the recent rise in tensions and to help derive from the tragic attacks in Mumbai an opportunity for further cooperation between three of America's crucial partners. Doing so will allow Pakistan to commit more of its resources to its western regions against extremist elements that are undermining its stability, and will per-

mit Afghanistan to focus its efforts on developing an effective government that is able to secure both its borders and its citizens.

FORCE POSTURE IN THE USPACOM AOR

Question. Perhaps more than with any other combatant command, military exigencies in the U.S. Pacific Command (USPACOM) area of responsibility (AOR) are subject to the “tyranny of distance” in getting forces to points of conflict. Significant changes to the U.S. force posture in the region are planned over the next several years, including movement of marines from Okinawa to Guam and relocation of U.S. forces within South Korea.

In your view, how important is the forward basing strategy to the ability of USPACOM to execute its operational contingencies?

Answer. The United States’ forward-basing strategy is critical to enable USPACOM’s execution of its operational contingencies given the importance of providing capabilities that can be flexibly deployed, employed, and sustained in a timely manner across a spectrum of contingencies.

Question. What do you see as the implications of the proposed force structure changes, particularly in Korea, Japan, and Guam, with respect to the Asia-Pacific region in general?

Answer. I believe U.S. posture changes in Korea and Japan contribute to strengthening our alliances and better positioning U.S. forces to ensure a more sustainable and capable regional force posture. By relocating U.S. forces, the United States will address longstanding host-nation concerns such as noise and encroachment without compromising their missions. The moves also improve and enhance mutual defense infrastructure in the region, incorporating and executing several large investment projects from the Governments of South Korea and Japan. At the same time, the United States will make better use of Guam’s strategic advantages by arraying U.S. forces in Asia more effectively for the evolving security environment.

Question. How does the relocation of U.S. forces from Okinawa to Guam improve our security posture in the region?

Answer. This is the most comprehensive package of force posture changes in Japan and Guam in decades, and I believe that these initiatives will further several strategic goals. First, they will strengthen our alliance with Japan by addressing long-standing problems with our presence in Okinawa. Second, they will ensure the continued long-term presence of U.S. forces in Japan and in the Western Pacific. Third, by making better use of Guam’s strategic advantages, they will array U.S. forces in Asia more effectively for the evolving security environment.

Question. What impact, if any, do you expect the proposed changes in our force posture will have on the U.S. ability to defend South Korea and Japan or to react to a crisis in the Taiwan Strait?

Answer. These posture changes increase flexibility to respond when and where U.S. forces are needed, and strengthen the United States’ overall capacity to deter coercive and aggressive action in the Asia-Pacific region. Planned posture changes in the region will strengthen deterrent and strike capabilities (i.e., U.S. maritime, air, and deployable ground forces) forward in the Pacific as well as strategic mobility and command and control (C2) support from the United States—all of which are relevant to supporting our allied commitments for self-defense in contingencies.

Question. Some observers suggest that the United States is preoccupied in Iraq and Afghanistan and not focused sufficiently on the challenges in East Asia at a critical time in the development of that region.

How do you assess the U.S. engagement in East Asia relative to U.S. engagement in other parts of the world, particularly Central and Southwest Asia?

Answer. I agree with Secretary Gates’ observation at the 2008 Shangri La dialogue that the United States has never been more engaged with more Asian countries.

Question. Are the levels of funding, manning and military-to-military engagement in the Asia-Pacific region appropriate as compared to other regions? Do you see a need to increase those levels in the coming years?

Answer. Strengthening partnership capacity, reinforcing existing alliances, and enhancing emerging relationships will continue to require investment of resources and attention. If confirmed, I will advocate for appropriate levels of funding, manning and military-to-military engagement in the Asia-Pacific region.

Question. Many of our key alliances in Asia were established years ago when global conditions and threats to U.S. security were different than today. USPACOM has as a top objective the development of cooperative security arrangements with allies and partners in the region.

Do you agree with this objective and, if so, what countries do you see as the top priority for such arrangements to best enhance stability and security in the region? Why?

Answer. If confirmed, I will continue to support the development of cooperative security arrangements with allies and partners in the region. Access to regional ports, airfields, and logistical facilities on a nonpermanent but recurring basis, increases the flexibility of our force employment options. Australia and Singapore are top priorities in this regard. I will work with the Commander, U.S. Pacific Command, to ensure a complementary approach to this important objective.

Question. How should U.S. policies and engagements in the Asia-Pacific region change to best meet new threats and conditions

Answer. A critical step to meeting the new threats and conditions in the Asia-Pacific region is to execute the transformational security agendas we have with many allies and partners in the region. Additional significant changes will be guided by the ongoing QDR process.

CHINA

Question. China is viewed by some in the United States as a potential threat and by others as a potential constructive international partner that should be welcomed and integrated into the international economic and political community.

How would you characterize the U.S. relationship with China?

Answer. I would characterize the U.S.-China security relationship as complex, with some elements of cooperation and others of potential competition. The military aspect of the relationship is embedded within an even more complex set of political and economic relationships between Washington and Beijing, and fundamentally colors our security relationships with Japan, South Korea, the Southeast Asian nations, and Taiwan.

Question. To what extent do you believe the policies and actions of the United States and other major regional and international actors will affect the direction in which China develops, and the extent to which it becomes a cooperative partner or a competitor of the United States?

Answer. I believe that U.S. policies and actions can influence the direction of China's development. No country has done more to assist, facilitate, and encourage China's national development and integration into the international system than the United States. However, U.S. policy and actions, or the policies and actions of any country or group of countries for that matter, cannot alone determine China's future which, in many ways, will be based upon the choices that China's leaders make. Today, as Secretary Gates noted in a speech at the U.S. Institute of Peace on October 15, 2008, "China is a competitor but not necessarily an adversary, and there is no reason for China to become an adversary." More fundamentally, the United States can also help to shape the environment in which China makes its strategic choices, and in so doing, encourage China to "do the right thing."

Question. What do you see as the impact of the current global economic crisis on stability and security in China specifically, and in the region generally?

Answer. It is too early to gauge the full impact of the global economic crisis upon China and stability in the Asia-Pacific region more broadly. But those who manage defense and security issues must be attentive to the security-economic interconnections and be prepared to work together with colleagues in economic and diplomatic fields, both to guard against negative outcomes and also to seek positive ways forward where they may exist.

Question. China's defense spending in 2009 will exceed 2008 spending by 15 percent. This continues China's trend of double-digit increases in defense spending every year since the late 1980s.

What do you believe are the objectives of China's steady increase in defense spending and its military modernization program?

Answer. I am deeply concerned about China's military modernization. China continues to invest heavily in strategic weapons, power projection, area denial, and asymmetric warfare. China appears focused in the near-term on generating capabilities for potential Taiwan contingencies, including those that would involve U.S. intervention. China is also developing longer range capabilities that have implications beyond Taiwan. Some of these capabilities have allowed it to contribute cooperatively to the international community's responsibilities in areas such as peacekeeping, humanitarian assistance and disaster relief, and counterpiracy. However, some of these capabilities, as well as other, more disruptive ones, could allow China to project power to ensure access to resources or to enforce claims to disputed territories. China has left unclear to the international community the purposes and objectives of China's evolving doctrine and capabilities. Seeking to clarify this ambi-

guity is an important strategic goal for the United States. If China exercises responsibility and restraint in the pursuit of its legitimate aspirations, it will find a willing partner in the United States.

Question. How should the United States respond to the Chinese military modernization program?

Answer. The pace and scale of Chinese modernization, coupled with the lack of transparency surrounding both capabilities and intentions, are a source of concern for the United States as well as for its allies and the region more broadly. An appropriate U.S. response would include efforts to fully comprehend the future direction of China's intentions and capabilities, active engagement to reduce the potential for miscalculations and to manage unwanted competition, and, finally, defense preparedness to ensure the United States maintains an enduring strategic presence in the Asia-Pacific region, and retains an edge in areas that are critical to achieving specific operational objectives.

Question. What do you believe are the Chinese political-military goals in the Asia-Pacific region? Globally?

Answer. Broadly, the overriding objectives of China's leaders appear to be to ensure the continued rule of the Chinese Communist Party, continue China's economic development, maintain the country's domestic political stability, defend China's national sovereignty and territorial integrity, and secure China's status as a great power. Within this context, preventing any moves by Taipei toward de jure independence is a key part of Beijing's strategy. Within each dimension there lies a mix of important challenges and opportunities for the United States that will continue to deserve priority attention.

Question. How do you assess the current cross-strait relationship between China and Taiwan, and how can we help prevent miscalculation on either side?

Answer. Taiwan has made significant strides to reduce tensions in the Taiwan Strait. These initiatives should be encouraged. I believe the United States can help to prevent miscalculation on either side by continuing to abide by our longstanding policies, based on the three joint U.S.-China Communiqués and the Taiwan Relations Act, to include making available to Taiwan "defense articles and services in such quantities as may be necessary to enable Taiwan to maintain a sufficient self-defense capability." Such a continued commitment by the United States will allow Taiwan to continue its outreach to the PRC without fear of coercion.

Question. What is your view regarding the longstanding U.S. policy of selling military equipment to Taiwan despite objection and criticism from China?

Answer. U.S. policy on arms sales to Taiwan is based on the 1979 Taiwan Relations Act, which provides that the United States "will make available to Taiwan defense articles and services in such quantities as may be necessary to enable Taiwan to maintain a sufficient self-defense capability (sec. 3.a)." That policy has contributed to peace and stability in the region for over 30 years and is consistent with the longstanding U.S. calls for peaceful resolution of the Taiwan issue in a manner acceptable to the people on both sides of the Taiwan Strait. I believe our arms sales have been carried out in a responsible manner.

Question. How do China's efforts to establish a strategic presence in various South Asian seaports affect its political-military posture and influence in the region?

Answer. China looks to South Asia as an area of strategic importance, which includes political objectives, access to resources, trade, and investment. In regards to South Asian seaports, the important question is how China intends to use its presence. The United States retains strong relationships in South Asia and should continue to monitor China's growing presence in the region.

Question. What are your views of China's recent deployment of warships to the west Indian Ocean to counter piracy in that area and how does this deployment contribute to China's ability to project power?

Answer. Generally speaking, I see China's participation in counter piracy operations as a positive development that contributes to solving a global security challenge and demonstrates China's ability to use its military in a positive, constructive, and responsible manner. It is more than likely that from this experience China could begin to develop capabilities that would enhance its ability to sustain a deployed force over an extended period of time.

Question. Our military-to-military relations with the Chinese military have been characterized as "modest" and the Chinese approach to these relations can be accurately described as "on again, off again."

What is your assessment of the current state of U.S.-China military-to-military relations?

Answer. There are some signs of progress, but overall there is a lack of trust and mutual understanding, and the relationship continues to be marred by incidents such as those involving USNS *Impeccable* in March 2009.

Question. Do you believe that we should make any changes in the quality or quantity of our military relations with China? If so, what changes and why?

Answer. More can be done to improve the U.S.-China military-to-military relationship, both in terms of the quality and the quantity of exchanges between the Armed Forces of our countries. If confirmed, I would look closely at exchanges with the Chinese armed forces at all levels and across a range of issues, including the recently opened dialogue on nuclear policy and strategy, which I understand is a priority for Secretary Gates. If confirmed, I look to engage in a wide range of areas where we can encourage China to act responsibly both regionally and globally.

Question. Recently, Chinese-flagged ships harassed the USNS *Impeccable*, a U.S. military ship conducting ocean surveillance in the international waters of the South China Sea. The incident underscores the nature of certain Chinese maritime claims and the sensitivity associated with U.S. naval operations in these areas.

What is your assessment of the incident?

Answer. I view the harassment of the USNS *Impeccable* within China's exclusive economic zone (EEZ) as a serious incident. The United States has a longstanding policy on freedom of navigation, consistent with customary international law and as reflected in the U.N. Convention on the Law of the Sea.

Question. What can the United States do to help prevent such incidents in the future?

Answer. I believe the United States should clearly assert and exercise its rights, work with other states with similar interests and perspectives as appropriate, and ensure effective communications to reduce the risks of accident or miscalculation. I was very pleased by Secretary Gates' statement on March 18 that ". . . based on the diplomatic exchanges that have taken place, since the aggressive acts against the *Impeccable* . . . there won't be a repetition of this [incident]."

Question. In its 2008 Report to Congress, the U.S.-China Economic and Security Review Commission (USCC) concluded that China is asserting various excessive claims of sovereignty, including maritime, air and space, and also concluded that these claims have negative implications for the United States. Further, the Commission concluded that more must be done to ensure that China's rapid expansion of nuclear power does not result in the decline in safety or an increase in proliferation of nuclear weapons technology or expertise.

How should the United States respond to excessive claims of sovereignty by China? Would U.S. accession to the United Nations Law of the Sea Convention be beneficial in this regard? If so, how?

Answer. As stated above, the United States has a longstanding policy on Freedom of Navigation, and as recent events relating to the USNS *Impeccable* have demonstrated, does not acquiesce to excessive maritime, air, or space claims that restrict navigation and over-flight rights under customary international law (as reflected for example in the U.N. Convention on the Law of the Sea). In addition to asserting U.S. rights, I believe the United States should work with other countries that have a stake in this issue to engage China.

I support U.S. accession to the Law of the Sea Convention. It is in America's enduring interest to be at the forefront of promoting the rule of law, including in the world's oceans. Were we to become a party to the Convention it would send a clear signal to the world that we are committed to advancing the rule of law at sea. Additionally under the Convention, we would provide the firmest possible legal foundation for the navigational rights and freedoms needed to project power, reassure our friends and allies, deter adversaries, respond to crises, sustain deployed combat forces, and secure sea and air lines of communication that underpin international trade and our own economic prosperity.

Question. What is the role of DOD in helping to ensure that China's nuclear power industry does not contribute to the proliferation of nuclear weapons in the region?

Answer. The Obama administration has reiterated that preventing the proliferation of WMD and delivery systems, along with related technologies and materials, is a key goal for the United States. I believe that DOD should work in the inter-agency process to ensure that any proliferation concerns relating to China including its nuclear power industry are expressed to the Chinese Government in appropriate forums, and should similarly support the development of appropriate interagency responses in the event that China takes steps that do contribute to proliferation.

Question. The USCC also concluded that cyber space is a critical vulnerability for the United States, that China is aggressively pursuing cyber warfare capabilities, and that China would likely seek to take advantage of the U.S. dependence on the internet and cyber space in the event of a potential conflict situation.

If confirmed, what would you do to help ensure our military is protected in cyber space and prepared to defend against a cyber attack?

Answer. We, as many other nations, have been the target of innumerable malicious activities via cyberspace from hackers, criminals, and unidentified entities, some of which may well be nation states. I understand that numerous steps have been taken to increase network defense and monitoring capabilities. This work continues aggressively today. The DOD should also continue to evaluate all global threats to its networks and work closely with other government agencies, industry, and the international community in order to meet those threats.

Question. On January 11, 2007, China used a ground-based missile to hit and destroy one of its weather satellites in an anti-satellite test creating considerable space debris and raising serious concerns in the international community.

What is your view of China's purpose in conducting this test?

Answer. In my view, this test was just one element of China's military modernization effort to develop and field disruptive military technologies, including those for anti-access/area-denial, as well as for nuclear, space, and cyber warfare.

Question. What do you see as the long-term implications of this test for the U.S. military, for U.S. national security, and for U.S. interests in space?

Answer. Space systems are vital to our national interest. In this regard, the United States should seek ways to protect our interests in space.

Question. If China were to conduct a second test, would that change your view? Why or why not?

Answer. A second test of such a system would reaffirm my view that this system is one element of China's broad military modernization program that features a number of disruptive elements designed to support a strategy of anti-access and area denial. More troubling than that would be China's blatant disregard for the concerns expressed by the international community after their January 2007 test if China were to conduct another such test in the future.

Question. What are your views regarding the potential weaponization of space and the international agreements to prevent space weaponization?

Answer. The safe and responsible use of space and preservation of the space environment are important issues for all nations, especially for space-faring nations. Encouraging responsible behavior through establishment of international norms, such as the Space Debris Mitigation Guidelines led by the United States and endorsed by the U.N. General Assembly, is an excellent model.

TAIWAN

Question. What is your view of the current state of the U.S.-Taiwan security relations?

Answer. The United States has a robust security relationship with Taiwan. I have had the privilege to go to Taiwan as a private citizen and observe first-hand how we support Taiwan during their annual Han Kuang Field Training Exercise. This is just one aspect of our relationship and I will continue to look for additional ways to work with Taiwan to bolster their defensive capabilities, consistent with our obligations under the Taiwan Relations Act.

Question. What are the priorities, in your view, for U.S. military assistance to Taiwan?

Answer. I believe priority areas include: enhancing the training establishment; hardening of critical infrastructure; ensuring increased munitions are available to counter the threat; and an advanced integrated air and missile defense. If confirmed, I would continue to work with Taiwan to review its defensive needs considering the current and projected PRC threat.

Question. What is your view of the relationship between the type of assistance we offer Taiwan and regional stability?

Answer. The United States is closely monitoring the shifting balance in the Taiwan Strait and Taiwan's defense needs, and we are well aware of the increasing capability of the PRC military. Regional stability depends on a strong Taiwan. Taiwan must be able to deter PRC coercion, and the best deterrent available to Taiwan is a strong defensive military.

Question. What is your opinion of the Taiwan Relations Act (TRA)? Enacted 30 years ago this year, do you see any need to modify the TRA to reflect the current state of affairs in the region? If so, how?

Answer. The TRA has been in force for over 30 years, its flexibility has allowed it to accommodate changing circumstances on both sides of the Taiwan Strait, as well as Taiwan's evolving relationship with the United States.

Question. What is your assessment of the implementation of the TRA?

Answer. The TRA provides that the United States "will make available to Taiwan such defense articles and defense services in such quantity as may be necessary to enable Taiwan to maintain a sufficient self-defense capability (sec. 3.a)." That policy

has contributed to peace and stability in the region for over 30 years and is consistent with the longstanding U.S. calls for peaceful resolution of the Taiwan issue in a manner acceptable to the people on both sides of the Taiwan Strait.

Question. Given the increasing military imbalance across the Taiwan Strait, what is the best policy prescription to encourage Taiwan to invest more in its own self-defense?

Answer. The best method to improve Taiwan's defensive capability is not just spending more; it must include spending more wisely. Taiwan can no longer outspend the PRC on its defense. However, they can invest more wisely to compensate for the current and future threats posed by the PRC. Taiwan needs to enhance the professionalism of their military, and transform their military to meet future threats. Some of these ideas were addressed by Taiwan's QDR and, if confirmed, I intend to work closely with PACOM to improve Taiwan's defensive capabilities.

Question. What measures, if any, would you recommend be implemented to encourage China to soften its military posture vis-à-vis Taiwan?

Answer. Consistent with longstanding U.S. policy, I believe that the United States would support any resolution in the Taiwan Strait provided that it is arrived at peacefully and with the support of the people on both the Mainland and Taiwan. If confirmed I would look for ways to highlight to Beijing the inconsistency between its military posture opposite Taiwan and a peaceful resolution of the Taiwan Strait issue that both sides can support.

THE KOREAN PENINSULA

Question. North Korea represents one of the greatest near-term challenges to U.S. national security interests in Asia. Deterring conflict on the Korean peninsula remains a top priority. At the same time, the United States and South Korean relationship, while strong, is undergoing substantial changes in terms of command and control and force laydown over the next several years.

What is your assessment of the current security situation on the Korean peninsula and the diplomatic efforts to date to persuade North Korea to verifiably dismantle its nuclear weapons program?

Answer. North Korea's conventional military, WMD and proliferation activities continue to pose a significant threat to regional peace and security. Recent North Korean provocations, including its launch of a Taepo Dong-2 missile, are unhelpful to regional stability and relations. Working with our allies and other key parties in the region and internationally on diplomatic solutions is an essential element in addressing the totality of security problems on the Korean peninsula, the most vital of which is the complete and verifiable denuclearization of North Korea. Likewise, it is essential to maintain the capabilities to deter North Korea's military threat and proliferation activities. Strong alliances with South Korea and Japan remain instrumental in this regard. These alliances help maintain the peace and stability that have allowed the wider East Asia region to prosper over the past several decades. Ongoing transformation and realignment efforts will continue to strengthen our alliances, ensure an enduring U.S. military presence, and improve U.S. capabilities to address future security challenges.

Question. What is your assessment of the threat posed to the United States and our allies by North Korea's ballistic missile and WMD capabilities, and the export of those capabilities?

Answer. I believe that North Korea missile and WMD programs pose a serious threat to the United States, our forces, and our allies. This threat was evidenced recently in North Korea's April launch of a Taepo Dong-2 missile. Strong alliances and allied security cooperation, regional partnerships, and forward military presence remain key means to deal with these threats and to uphold allied defense commitments. U.S. national capabilities, such as ballistic missile defense, are also an essential element in deterring the threat and defending our interests, and it is my understanding that these capabilities and related developments in this area played an important role in the improved cooperation with our allies, Japan and the Republic of Korea, surrounding the April 2009 North Korean missile launch.

Question. What are the short-term and long-term military implications for the United States of the ongoing tension on the Korean Peninsula?

Answer. North Korea's actions and behavior pose a threat to the peace and stability of the Republic of Korea, the United States, Japan, and others in the region. While North Korea's conventional military continues to deteriorate due to a lack of force modernization and advanced training programs, the asymmetric threat it poses continues to grow. North Korea continues to maintain strong nuclear ambitions. In early April, North Korea demonstrated, against the will of the international community, that it intended to continue its ballistic missile development

program. Additionally, North Korea's Special Operations Forces, the largest in the world, maintain a high operational readiness and training tempo, and its cyber capability is also increasingly concerning. Given these asymmetric capabilities, the combined U.S.-ROK defense posture on the Korean Peninsula continues to be instrumental in deterring North Korean provocation. The U.S. commitment to the Alliance and to the Republic of Korea plays an immeasurable role in containing the North Korean threat and in reducing the risk of the North's miscalculation on the peninsula.

Question. How do we ensure that we continue to protect our vital regional interests, while continuing meaningful progress toward the transfer of command and control to the Republic of Korea and the relocation of U.S. forces on the Korean Peninsula?

Answer. The U.S.' vital regional interests are well served by both the successful transition of wartime operational control (OPCON) to the Republic of Korea as well as the relocation of U.S. forces on the Korean Peninsula to enduring facilities. With the transition of wartime OPCON, the South Korean people will take a leadership role in the Alliance and a greater role in the defense of their own country. While this is long overdue, completing this transition in 2012 will demonstrate to North Korea and the region that the Republic of Korea military is strong and capable, thereby enhancing the Alliance's deterrent and stabilizing role and shaping the attitudes of future generations of Koreans about the Alliance. Similarly, the relocation of U.S. Forces Korea is advancing U.S. vital interests in the region by ensuring a sustainable U.S. military presence for the long-term. The ROK's substantial investment in this relocation effort is demonstrating that it will continue to welcome this U.S. military presence on the Korean Peninsula for the foreseeable future. As a result of this combined realignment effort, the U.S. military's enduring presence will continue to provide an effective deterrent and ensure peace and stability on the Korean Peninsula and throughout the region, conditions under which the Republic of Korea developed into a thriving democracy and a robust free market economy (the world's 14th largest).

Question. With recent speculation regarding the possible poor health of North Korean leader Kim Jong-il, what, if anything, should the U.S. be doing now to prepare for the possibility of a change in leadership in North Korea?

Answer. If confirmed, I will work to ensure that the United States and our allies are capable of addressing sudden onset crises, other forms of instability, or any other scenario that may result from a change in North Korean leadership. Fundamentally, our focus should be ensuring we are ready to maintain stability in the region, support defense of the Republic of Korea and Japan, and prevent the proliferation of WMD or other dangerous technologies from North Korea.

Question. The alliance between the United States and South Korea has been a key pillar of security in the Asia Pacific region. This relationship has gone through periods of inevitable change.

What is your understanding of the current status of the U.S. security relationship with South Korea?

Answer. I believe that the U.S.-Republic of Korea (ROK) alliance remains strong and continues to ensure peace and stability on the Korean Peninsula and in Northeast Asia. In the face of changes in the regional security environment, the United States and the ROK have made great strides in transforming their collective deterrent and defense posture. In particular, the ROK has made major strides in developing its defense capabilities, commensurate with its economic development. Consequently, the Alliance remains relevant and capable both for deterring aggression on the peninsula and for addressing regional and global security issues.

Question. If confirmed, what measures, if any, would you take to improve the U.S.-South Korean security relationship?

Answer. If confirmed, I would support the continued realignment of U.S. forces on the Korean Peninsula and the return of facilities that our forces no longer require. The United States is also working toward developing new command and control relationships with Korea and should ensure that contingency plans remain appropriate to changing circumstances. Additionally, I believe it is important to ensure the U.S. and Korean publics continue to understand the enduring mutual benefits derived from this alliance, and that the U.S. work effectively with the Republic of Korea as it plays an increasing role in regional and global security issues commensurate with its economic status and influence.

Question. What is your view regarding the timing of turning over wartime operational command to South Korea?

Answer. As Secretary Gates said publicly following his meeting with the Korean Minister of Defense last October, the ROK military forces and U.S. forces are on track to complete the alliance agreement to transition wartime operational control

in 2012. This effort will enable the ROK military to take the lead role in the defense of Korea. If confirmed, I will support the efforts of the Secretary, this committee, and others to ensure that the important transition in command relationships is carried out in a manner that strengthens deterrence and maintains a fully capable U.S.-ROK combined defense posture on the Korean Peninsula.

Question. Do you support expanding the number of U.S. personnel assigned to the Korea Peninsula for 2- or 3-year tours of duty and increasing the number of military and civilian personnel authorized to be accompanied by their dependents for these longer assignments?

Answer. Yes. If confirmed, I would support the expansion of tour lengths for servicemembers assigned to Korea. Normalization of tours will provide greater stability for U.S. servicemembers and their families in Korea, enhance operational readiness on the Peninsula, and demonstrate U.S. commitment to an enduring U.S. presence in the ROK.

Question. What is your assessment of Beijing's relative influence over Pyongyang?

Answer. As North Korea's closest neighbor and historic ally, China's influence has waned in recent years. However, it still retains more influence than most. I believe that as the chair of the Six-Party Talks, China has used its influence to play an important role in our collective efforts along with Japan, the Republic of Korea, and Russia toward achieving stability in the region through the peaceful denuclearization of the Korean Peninsula.

Question. What do you believe must occur within the framework of the Six-Party Talks to ensure North Korea discontinues its nuclear program, and what posture would you recommend in future negotiations on this subject?

Answer. My understanding is that in accordance with the September 2005 Joint Statement, the DPRK committed to abandoning its nuclear programs. Despite North Korea's recent statement of its intent to withdrawal from the Six-Party Talks and nullify any agreements, the United States should be prepared to resume negotiations to peacefully and verifiably denuclearize the Korean Peninsula.

Question. Do you believe that the security relationship with South Korea should remain focused on defense of the Korean Peninsula, or should U.S. forces stationed in Korea have a more regional mission?

Answer. In accordance with the commitment to the Mutual Defense Treaty, U.S. presence on the Korean Peninsula serves to deter potential aggressors from taking hostile actions that would threaten the peace and security of the Republic of Korea. This presence has both deterred further war on the Korean Peninsula and contributed to the stability of the Northeast Asia region. The U.S.-ROK Alliance is transforming to ensure a capable and relevant forward presence for the future security environment. As ROK military forces have served and will continue to serve with the U.S. military in places off of the Peninsula (e.g., Iraq, Afghanistan, and in the Gulf of Aden), the U.S.-ROK Alliance will continue to serve an important role regionally and globally.

JAPAN

Question. How would you characterize the U.S.-Japan security relationship?

Answer. The U.S.-Japan relationship is the cornerstone of security in East Asia. Japan is a valued ally and anchor of democracy and prosperity in the region. Our alliance has held fast through the turbulence of the post-Cold War, political turnover in Japan, and some contentious trade disputes and now stands poised to become a truly global alliance. The United States and Japan are in the middle of a complicated realignment process that is part of a larger Alliance Transformation agenda that also includes a review of roles, missions, and capabilities to strengthen and ensure the relevance, capability, and cohesiveness of the Alliance for the next several decades. This is an ambitious agenda that is worthy of attention and increased effort.

Question. How would you characterize Japan's relationship with its regional neighbors, mainly China, North Korea and South Korea?

Answer. I believe it is important for Japan to continue to cultivate constructive relations with all of its neighbors. By moving forward, Japan and other East Asian nations can increase their security cooperation. Working with other U.S. allies and friends in the region, Japan can increase its contribution to peace, security, and prosperity throughout Asia and globally. Japan is a valued and essential partner in the Six-Party Talks process and in other important regional security architectures.

Question. What steps, if any, do you believe Japan ought to take to become a more active partner in security activities with the United States and in the international security arena?

Answer. The security environment in Asia is changing and the United States needs a more capable alliance with Japan to deal with those challenges, including greater interoperability between armed forces at the strategic, operational, and tactical levels. If confirmed, I would work to encourage Japan's increasing contributions to the Alliance, both regionally and globally. Cooperation and the development of complementary and mutually reinforcing capabilities should range from missile defense to increased bilateral training opportunities—in Guam, for example.

Question. What is your view of the United States-Japanese joint development of the Standard Missile-3, Block IIA missile defense interceptor, and of the overall program of cooperation between the United States and Japan on ballistic missile defense?

Answer. As we recently witnessed in the run up to the TD-2 launch, ballistic missile defense cooperation with Japan is a success story for the Alliance and has resulted in Japan's fielding of both sea- and land-based missile defense systems. U.S.-Japan bilateral cooperation on ballistic missile defense plays an important role in supporting our common strategic objectives on defense. The SM-3 Block IIA is an important cooperative program that will result in a significant increase in SM-3 capability.

Question. Should the United States be doing anything more to encourage the Japanese Government to increase their participation in ongoing military operations, such as Operation Enduring Freedom and Operation Iraqi Freedom, or future operations?

Answer. Japan is considering how to conduct international security missions with its very capable Self-Defense Force while keeping its Asian neighbors' historical concerns over the Japanese exercise of military power in mind. The overall trend has been positive, but slow. The deployment of Japanese Maritime Self-Defense Force destroyers to the Horn of Africa to conduct escort operations to protect shipping from piracy is another step forward. The Department is looking forward to the dispatch of P-3Cs to join the counterpiracy mission, Japan's first-ever "joint" deployment.

Question. Is the cost-sharing arrangement between the United States and Japan to pay for the relocation of U.S. forces from Okinawa to Guam and the costs associated with the continued presence of U.S. forces in Japan equitable and appropriate? Why or why not?

Answer. I believe the cost arrangement between the United States and Japan as outlined in the May 2006 Security Consultative Committee (SCC) document known as the Realignment Roadmap is equitable and appropriate. For relocations within Japan, the GOJ is paying the lion's share of the costs to develop new facilities. The GOJ also understood the strong desire of Okinawa residents for the relocation of forces from Japan to Guam to occur rapidly and recognized that this move—which it explicitly sought—would not happen anytime soon without substantial investment on its part. Spending less than one percent of its gross domestic product on its national defense, yet desiring the continued regional presence of U.S. forces, Japan could also clearly justify financial support for U.S. military construction within a U.S. territory on the grounds that it is making a direct contribution to Japan's own security and to overall alliance burdensharing. This decision was not without controversy in Japan, as it is highly unusual—perhaps even unprecedented—for a host country to pay for U.S. forces to relocate out of that country. It will be important for the DOD to work closely with the GOJ on project scope, management, and other factors to minimize risks to the efforts.

COUNTERTERRORISM IN SOUTH EAST ASIA

Question. Admiral Keating, Commander, USPACOM, has described South East Asia as "the central front against terrorism in the Pacific." Indeed, the rise of Islamic militants in this region poses an ever-increasing threat to security and stability throughout the Asia-Pacific theater.

What more can the United States do in South East Asia to help combat the threat of terrorism?

Answer. The DOD plays an important supporting role in combating terrorism, mainly by helping build capacity in partner nation's armed forces through security assistance and security cooperation programs. If confirmed, I will work closely with the State Department's Office of the Coordinator for Counter-Terrorism (S/CT) which has primary lead on counterterrorism assistance.

Question. Which South East Asian countries are most important in the fight against terrorism in that region and what should the United States do to enhance our relations with those countries?

Answer. Again, because of the prominent interagency role in building partner-nation counterterrorism capacity, especially on the law enforcement side, the Department of State Office of the Coordinator for Counterterrorism plays the critical role in synchronizing the efforts of the U.S. Government. It is my understanding that the U.S. Government takes a regional approach to counter terrorism and encourages intelligence cooperation and law enforcement cooperation within the region. For the DOD, Indonesia, and the Philippines should be the top priorities for counter terrorism capacity-building assistance in Southeast Asia, notably through National Defense Authorization Act (NDAA) Section 1206-funded programs, which remains one of the Department's most effective tools in building partner capacity to combat terrorism. The Department enjoys good relations with Indonesia and the Philippines and, in close consultation with Congress and the Department of State, should sustain and enhance these relationships through continued policy dialogues, security cooperation and security assistance programs.

Question. How do you assess the security situation in the Strait of Malacca and what can the United States do to better protect this important trade route?

Answer. The security situation in the Strait of Malacca has improved due largely to more effective coordination between the Governments of Indonesia, Malaysia, Singapore, and Thailand. The United States has also contributed to improved security through NDAA Section 1206-funded programs in Indonesia and USPACOM's robust security cooperation outreach in the region aimed at improving maritime security. It is important that the United States continue to work with regional governments and militaries to safeguard this critical trade route.

Question. What improvements or changes would you make to the Proliferation Security Initiative (PSI)?

Answer. If confirmed, I would recommend that PSI should continue, and, I would work with the appropriate offices within the Office of the Secretary of Defense to turn PSI into a "durable international institution" as President Obama called for during his April 5, 2009, speech in Prague. I would defer recommendations on improvements or changes to the incoming Assistant Secretary of Defense for Global Strategic Affairs, which manages PSI for the DOD.

REPUBLIC OF THE PHILIPPINES

Question. What is your view of the current state of U.S.-Philippine military-to-military relations?

Answer. The Philippines is one of the United States' five treaty allies in East Asia and is a committed bilateral and regional partner in combating terrorism. The alliance remains strong and the Philippines remain important to the United States and to regional stability in general. I believe the top two defense priorities with the Philippines should be counterterrorism cooperation and defense reform.

Question. What is your assessment of U.S. military efforts in the Philippines and the effectiveness of the U.S. assistance being provided to the Philippine military in its fight against insurgent groups?

Answer. The U.S. military is working effectively with the Armed Forces of the Philippines to provide assistance that is consistent with Philippine Constitutional restrictions on foreign forces. The Philippine Armed Forces continue to professionalize and reform in a manner consistent with U.S. and Philippine defense goals and objectives. They benefit from various security assistance programs, exercises, and engagement opportunities that develop capacity and capability with their military. These efforts have resulted in numerous strides against Abu Sayaf Group and Jemah Ismailiya terrorists in the Southern Philippines and have resulted in better regional maritime security cooperation.

Question. What do you believe the U.S. goals should be in the Philippines and how best can we achieve those goals?

Answer. U.S. Defense goals are to deny safe haven, sanctuary and training areas for Abu Sayaf Group and Jemah Ismailiya terrorists; and to partner in cooperative regional maritime security programs. These goals are best achieved through existing U.S. Government security assistance and security cooperation programs.

Question. What policy guidelines, if any, would you establish, if confirmed, to ensure that U.S. personnel do not become involved in combat or law enforcement in the Republic of the Philippines?

Answer. The established current policy guidelines are clear: the Mutual Defense Treaty and the Visiting Forces Agreement guide bilateral policy with the Republic of Philippines. The Philippine Constitution prevents foreign forces from conducting combat operations in the Philippines. Deployed U.S. forces will continue to be in strict compliance with these strictures.

INDONESIA

Question. Indonesia is a key Asian power, and is the largest Muslim country in the world. Consequently, it is important to build on opportunities to improve and expand U.S. relations with Indonesia where possible.

What is your understanding of the extent to which the Indonesian Government is cooperating with the United States in the war on terrorism?

Answer. If confirmed, I would consult with the Assistant Secretary of Defense for Special Operations and Low Intensity Conflict and Interdependent Capabilities on this question. Based on my current understanding, I believe that the Government of Indonesia has cooperated closely and effectively with the United States and our allies in combating global terrorist networks in the region, particularly against Jema'a Islamiya.

Question. What is your view of the current state of military-to-military contacts with Indonesia?

Answer. Current military-to-military contacts with Indonesia are positive and expanding. I believe that enhanced military contacts with the Indonesian military (TNI) can help cement the recent progress we have seen on human rights, particularly in conflict areas such as Aceh and Papua, maritime security and military reforms. I also appreciate Indonesia's contribution to peacekeeping operations—including Lebanon. Going forward, I would like to see military-to-military contacts with Indonesia deepen through a series of regular, predictable exercises and engagements.

Question. Do you favor increased U.S.-Indonesian military-to-military contacts? If so, under what conditions? Why?

Answer. If confirmed, I would support increased military-to-military contacts, in close consultation with Congress and the Department of State.

Question. What is your view of the commitment of the Indonesian military leadership to professionalization of its armed forces, adhering to human rights standards, improving military justice, and cooperating with law enforcement efforts to investigate and prosecute those military personnel accused of human rights abuses?

Answer. The Government of Indonesia continues to make progress in military reform. Early progress toward defense reform—separation of the police from the military, eliminating formal political roles for the TNI, increasing accountability, and human rights training—has been sustained. Continued progress on the divestiture of TNI businesses would be unmistakable evidence of Indonesia's commitment to reform. The 2002 Defense Law and the 2004 TNI Law formally codified the roles and responsibilities of the TNI as a mechanism to support, not replace, civilian government. Continued "hard" reforms that the United States should continue to push for include full accountability for past human rights abuses, strengthening civilian control, putting the TNI fully "on budget", and continued professionalization of the TNI officer corps. It also worth noting the TNI's professional conduct during recently completed parliamentary elections.

Question. If confirmed, what would you do to encourage respect for human rights and accountability in the Indonesian military?

Answer. If confirmed, I would sustain efforts of encouraging professionalism within the military in terms of both human rights respect and accountability, through bilateral security discussions, joint training, military assistance and military training programs. U.S. security assistance and security cooperation programs are the most effective channels to encourage professionalism in the Indonesian military.

WAR ON DRUGS

Question. The DOD serves as the single lead agency for the detection and monitoring of aerial and maritime foreign shipments of drugs flowing toward the United States. In recent years, DOD has sought to expand the list of countries eligible for counternarcotics train and equip assistance authority (e.g. Section 1033) to combat drug trafficking in the Asia-Pacific.

What is your assessment of the drug trafficking threat emanating from the Asia-Pacific region?

Answer. South and Southeast Asia have become increasingly more attractive as bases for drug trafficking organizations' production and smuggling operations. Several Asian and Pacific nations have experienced a significant increase in the production, trans-shipment, trafficking, and consumption of narcotics in recent years. Methamphetamine produced using diverted precursor chemicals, heroin trans-shipment through Asia, poppy cultivation, and potential narcoterrorist funding remain the primary drug threats to the United States from the Asia Pacific region.

HUMANITARIAN ASSISTANCE AND DISASTER RELIEF (HA/DR)

Question. You have been quoted as saying that “[h]umanitarian assistance and disaster-relief (HA/DR) operations contribute directly to the [Asia-Pacific] region’s common stability and security” and that “[m]ilitary involvement is often essential”.

What is your assessment of the U.S. military contributions to HA/DR in the Asia-Pacific region?

Answer. The Asia-Pacific region has experienced some of the worst natural disasters in recent history and threatens to give the world an even greater calamity—an avian influenza pandemic. In support of USAID and the U.S. Government’s broader relief efforts, DOD has played an instrumental role in the international response to recent Asian disasters (in Burma, Philippines, Bangladesh, China) and is deeply involved in interagency disaster preparedness/mitigation planning efforts.

DOD’s HA/DR efforts have provided unique military capabilities (strategic airlift, logistics, transportation, communication) and have made significant contributions to security in the region by saving lives, reducing human suffering, helping to build partner capacities, and preventing crisis from becoming conflicts thereby increasing security and stability in the region.

Question. In your view, what should the United States do to enhance HA/DR efforts in the region?

Answer. In my view, DOD’s HA/DR efforts in the region could be enhanced through improved civilian-military cooperation and collaboration. Successful civilian-military collaboration reduces duplication of efforts, facilitates communication and information sharing, and increases the military’s effectiveness in providing urgent, lifesaving capabilities in the immediate aftermath of a disaster abroad.

PRISONER-OF-WAR (POW)/MISSING-IN-ACTION (MIA) ACCOUNTING EFFORTS

Question. The Joint POW/MIA Accounting Command is critical to the recovery and identification of remains of missing military members. Recovery of remains of U.S. servicemembers from World War II, the Korean War, and the Vietnam war continue to be a very high priority. In 2005, the DOD suspended U.S. cooperation with North Korea on recovery and identification of the remains of U.S. personnel, citing concern for the security of U.S. personnel in North Korea.

In your view is there any reason why we should not now resume cooperation with North Korea to recover the remains of U.S. personnel?

Answer. I believe these efforts should resume once appropriate conditions exist that both enable the United States to carry out this important mission and to take all possible precautions to ensure the safety of U.S. personnel.

Question. If confirmed, what steps, if any, would you take to enhance POW/MIA recovery efforts in the PACOM area of responsibility?

Answer. If confirmed, I will work closely with the Deputy Assistant Secretary for POW/Missing Personnel Affairs to ensure that APSA continues its strong support for this mission and provides all necessary assistance to enhance cooperation with the relevant countries.

Question. If confirmed, what steps would you take, if any, specifically with regard to recovery efforts in North Korea?

Answer. If confirmed, I will work closely with the Deputy Assistant Secretary for POW/Missing Personnel Affairs, U.S. Pacific Command, the State Department, and all other organizations involved to provide advice and support whenever necessary.

FOREIGN LANGUAGE POLICY

Question. In 2005, the Department of Defense approved the Defense Language Transformation Roadmap to improve the Department’s foreign language capability and regional area expertise. Since then, the Department has been working toward implementing that roadmap.

How many Mandarin and/or Cantonese speakers does the Department of Defense have in intelligence analyst positions?

Answer. I have not had an opportunity to examine this issue in detail. If confirmed, I will research this issue and look forward to working with Congress to ensure the Department of Defense builds sufficient foreign language capability and regional area expertise.

Question. Is this number sufficient to ensure good intelligence assessments for use by the Office of Asian and Pacific Security Affairs?

Answer. I have not had an opportunity to examine this issue in detail. If confirmed, I will research this issue and look forward to working with Congress to ensure the Department of Defense builds sufficient foreign language capability and regional area expertise.

Question. In your view, how should the Federal Government expand the foreign language skills of civilian and military personnel in order to improve the quality of intelligence input to, and policy output by, the Office of Asian and Pacific Security Affairs?

Answer. I have not had an opportunity to examine this issue in detail. If confirmed, I will research this issue and look forward to working with Congress to ensure the Department of Defense builds sufficient foreign language capability and regional area expertise.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Assistant Secretary of Defense for Asian and Pacific Security Affairs?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis of any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JOHN THUNE

FISCAL YEAR 2010 DEFENSE BUDGET PROPOSAL

1. Senator THUNE. General Gregson, on April 6, Secretary Gates announced significant changes in the fiscal year 2010 defense budget proposal. Some of the most significant changes deal with canceling some programs, prematurely ending production of others, or putting other programs on hold—as is the case for the Combat and Rescue X (CSAR-X), the F-22, and the Next Generation Bomber, respectively. This announcement came 2 weeks prior to the Department announcing the start of the 2010 Quadrennial Defense Review (QDR) and Nuclear Posture Review (NPR). As future policy advisors to the Secretary, I would like to get your opinions on whether or not these most recent budget decisions were indeed informed policy decisions. Before making such significant changes, wouldn't these important changes benefit from the knowledge gained by the QDR and the NPR?

General GREGSON. Yes, Secretary Gates' most recent budget decisions were informed policy decisions. He reached these decisions after consultations with the President, and with the military and civilian leadership of the Department of Defense. On his Defense Budget Recommendation Statement on 6 April 2009, Secretary Gates described these decisions as the product of "a holistic assessment of capabilities, requirements, risks and needs for the purpose of shifting the department in a different strategic direction."

Secretary Gates announced significant changes in the fiscal year 2010 defense budget proposal and he wants that the QDR and the NPR inform programs affected by these decisions. Some of the programs were halted or delayed and others cancelled to allow the Department to reassess the needs that these programs are supposed to meet. The Department will consider the outcome of major defense reviews and arms control negotiations in this process. Clear examples of this approach are the three programs you addressed in this question.

First, to sustain U.S. air superiority, Secretary Gates committed to build a fifth generation of tactical fighters capability that can be produced in quantity at sustainable cost. He recommended increasing investment on the F-35 Joint Strike Fighter and ending production of the F-22 fighter at 187. Second, he placed the Next Generation Bomber on hold to first assess the requirements, develop a better under-

standing of the technology and of other capabilities we might have for this mission, and to incorporate the outcome of the QDR, the NPR and the Strategic Arms Reduction Treaty follow-on negotiations. Finally, Secretary Gates recommended terminating the Air Force CSAR-X helicopter program. This program has a history of acquisition problems and is another example of single-service solution with a single-purpose aircraft for an important mission affecting all Services. The Department will reassess the requirements and develop a more sustainable approach.

IMPORTANCE OF LONG-RANGE STRIKE TO FUTURE OPERATIONS

2. Senator THUNE. General Gregson, last month Lieutenant General Maples, the Director of the Defense Intelligence Agency, testified before this committee. During that hearing, I asked about his assessment of China's modernization programs that threaten the way the United States projects power in the Pacific region. General Maples said, "China has developed a very modern layered air defense capability in depth and is seeking additional air defense capabilities that will project even out to a range of 400 kilometers. It significantly affects potential U.S. operations in that region." Coupled with China's investment in asymmetric capabilities such as cyber warfare, anti-satellite warfare, and anti-ship weaponry, China's modernization programs gravely threaten potential U.S. operations in the Pacific region. Do you agree that long-range systems able to penetrate sophisticated air defenses will be necessary to ensure the United States maintains its ability to project power in the Pacific region in future years?

General GREGSON. Developing long-range systems able to penetrate modern integrated air defense systems is an important element of the U.S. deterrence and warfighting capability. I agree with Secretary Gates that these capabilities are necessary and that we will probably need to develop these capabilities further. However, the decision to pursue long-range systems must depend upon careful analyses that examine which types of long-range capabilities are most appropriate to deter and defeat emerging security challenges. Being flexible and avoiding staid projections of thinking in the research and development process will help us get this analysis right. The NPR and the QDR, two major studies currently underway within the Department of Defense, will help clarify the capabilities the United States will require to maintain our ability to protect U.S. interests, allies, and partners.

3. Senator THUNE. General Gregson, given this future environment, how important is it that the Air Force continues plans to field the Next Generation Bomber by 2018?

General GREGSON. As in the case of the future of long-range systems able to penetrate sophisticated air defenses, I agree with Secretary Gates that the question of the Next Generation Bomber should be a part of the analysis conducted under the QDR and the NPR.

[The nomination reference of Wallace C. Gregson follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
April 20, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Wallace C. Gregson, of Colorado, to be an Assistant Secretary of Defense, vice James Shinn.

[The biographical sketch of Wallace C. Gregson, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF LT. GEN. WALLACE C. GREGSON, USMC (RET.)

Since 2006, Lieutenant General Gregson (USMC, Retired) has been a foreign policy and military affairs consultant for WCG & Associates International. Previously he served as Chief Operating Officer for the U.S. Olympic Committee. From 2003 to 2005 he was Commanding General of the Marine Corps Forces Pacific and Ma-

rine Corps Forces Central Command, where he led and managed over 70,000 marines and sailors in the Middle East, Afghanistan, East Africa, Asia, and the United States. From 2001 to 2003 he served as Commanding General of all Marine Corps forces in Japan, where he was awarded the Japanese Order of the Rising Sun, the Gold and Silver Star, and the Korean Order of National Security Merit Gukseon Medal. Prior to his time in Japan he was Director of Asia-Pacific Policy in the Office of the Secretary of Defense from 1998 to 2000. He has served in the Marine Corps since his graduation from the U.S. Naval Academy in 1968, and is a combat veteran earning the Bronze Star with Combat "V" device for valor and heroism, and also awarded the Purple Heart.

He is a member of the Council on Foreign Relations; the Pacific Council on International Policy; the International Institute for Strategic Studies; the U.S. Naval Institute; and the Marine Corps Association.

His civilian education includes a Bachelor's degree from the U.S. Naval Academy, Master's degrees in Strategic Planning from the Naval War College and International Relations from Salve Regina College. He was awarded an Honorary Doctorate in Public Service by the University of Maryland, University College.

General Gregson and his wife Cindy currently reside in Colorado. They have two sons, one serving as a Marine Corps officer.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by Wallace C. Gregson in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Wallace C. Gregson, Jr., "Chip".

2. **Position to which nominated:**

Assistant Secretary of Defense for Asian and Pacific Security Affairs.

3. **Date of nomination:**

April 20, 2009.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

March 31, 1946; Pittsburgh, PA.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Married to Cynthia Ann Gregson. Maiden Name: Graham.

7. Names and ages of children:

Benjamin Wallace Gregson, 29.
Nicholas Scott Gregson, 26.

8. Education: List secondary and higher education institutions, dates attended, degree received, and date degree granted.

Valley Forge Military Academy, 1962–1964, high school diploma.
U.S. Naval Academy, 1964–1968, Bachelor of Science; 5 June 1968.
Salve Regina College, Master of Arts; 17 May 1987.
U.S. Naval War College; 1986–1987, Master of Arts; June 1991.

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

U.S. Marine Corps officer, 1968–2005.
1999–2000, served as Director, Asia Pacific, Office of the Secretary of Defense.
2000–2001, served as Commanding General, 3d Marine Division, Okinawa, Japan.
2001–2003 served as Commanding General, III Marine Expeditionary Force, Okinawa, Japan.
2003–2005, served as Commander, Marine Corps Forces Pacific and Marine Corps Forces Central Command, Camp H M Smith, HI.
September 2005–April 2006, Chief Operating Officer, U.S. Olympic Committee, Colorado Springs, CO.
April 2006 to present, owner of WCG & Associates International, LLC, a consulting firm, Colorado Springs, CO.

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Consultant to Governor Benigno Fitial, Commonwealth of the Northern Mariana Islands (CNMI) and the CNMI Military Task Force; April 2007–November 2008.

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Vice president, NOETIC Corporation.
Trustee, Marine Corps University Foundation.
Treasurer, Injured Marine Semper Fi Fund.
Officer, Global Relief Technologies, Inc.
Advisor, Center for Unconventional Security Affairs, University of California Irvine.
Advisor, Center for a New American Security.
Honorary Advisor, Okinawa International Development Council.

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Member, Council on Foreign Relations.
Member, Marine Corps Association.
Member, U.S. Naval Institute.
Member, International Institute of Strategic Studies.
Member, Pacific Council on International Policy.

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

James Webb, August 2006, \$2,100, campaign for Senate.
Joseph Bouchard, May 2007, \$250, campaign for Virginia House of Representatives.

14. Honors and awards: List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

Defense Distinguished Service Medal.
Defense Meritorious Service Medal.

Legion of Merit (3).
 Bronze Star with Combat "V".
 Purple Heart.
 Honorary Ph.D., Public Service, University of Maryland University College, Okinawa, Japan.
 Japanese Order of the Rising Sun, Gold and Silver Star.
 Korean Order of National Security Merit Gukseon Medal. .

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.
 Asia Now, Winning the War of Ideas; U.S. Naval Institute Proceedings; February 2004.
 Ready, Fire, Aim; U.S. Naval Institute Proceedings; April 1996.
 Ideological Support, Attacking the Critical Linkage, Chapter 2 of The Struggle Against Extremist Ideology; Center for Strategic Leadership, the U.S. Army War College; August 2005.
 Overseas Presence, Maintaining the Tip of the Spear; Marine Corps Gazette; April 1999.
 PP&O Responds; Marine Corps Gazette; September 1997.
 Big Change; Marine Corps Gazette; December 1994.
 A Tale of Two States; Marine Corps Gazette; December 1994 (with Frank Hoffman).
 Keeping Up with Navy Doctrine; Marine Corps Gazette; December 1990.
 Sea Based Indirect Warfare; Marine Corps Gazette; May 1990.
 Remembering the Maritime Side; Marine Corps Gazette; August 1989.
 Portrait of the Arabs; Marine Corps Gazette; November 1987.
 CPs, Softest Target on the Battlefield; Marine Corps Gazette; August 1985.
 Forward, Rule Number Two by Dr. Heidi Kraft; Little Brown and Company; 2007.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.
 Remarks at Armed Forces Communications and Electronics Association (AFCEA) TechNet Asia-Pacific 2004, November 10, 2004, Royal Hawaiian Hotel, Waikiki, HI, MARFORPAC Breakfast.
 Remarks at the U.S. Army War College, June 5, 2008, Carlisle, PA.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?
 Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

WALLACE C. GREGSON.

This 27th day of April, 2009.

[The nomination of Wallace C. Gregson was reported to the Senate by Chairman Levin on May 6, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on May 7, 2009.]

[Prepared questions submitted to Jo-Ellen Darcy by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DUTIES

Question. What is your understanding of the duties and functions of the Assistant Secretary of the Army for Civil Works?

Answer. The duties and functions of the Assistant Secretary of the Army for Civil Works are specified in section 3016 of title 10 of the U.S.C. and Department of the Army General Orders No. 3, dated July 9, 2002 and General Orders No. 13, dated October 29, 2004. Section 3016 of title 10 states that the Assistant Secretary of the Army (Civil Works) "shall have as his principal duty the overall supervision of the functions of the Department of the Army relating to programs for conservation and development of the National water resources, including flood damage reduction, river and harbor navigation, environmental restoration and protection, water supply, shore protection, hydroelectric power, recreation, and related purposes."

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. I have served in a variety of governmental and legislative senior positions responsible for formulating and implementing energy, environmental and conservation laws and policies. I currently serve as the Senior Environmental Advisor to the U.S. Senate Committee on Finance, working to develop energy, environmental and conservation initiatives through the tax code. Previously, I served as the Senior Policy Advisor, Deputy Staff Director and Professional Staff on the U.S. Senate Committee on Environment and Public Works. Both of these positions have afforded me the opportunity to work closely with the U.S. Army Corps of Engineers and Office of the Assistant Secretary of the Army (Civil Works) officials and to develop a keen appreciation for the scope, complexity and challenges facing them today.

I have served in a number of other governmental positions that provided me with leadership and management skills necessary to be effective in this important position. These include serving as the Executive Director at the Great Lakes and Water Resources Planning Commission in Michigan, as the Assistant to the Director of Personnel for Gubernatorial Appointments for the Governor of Michigan and as a Legislative and Policy Analyst in the U.S. House of Representatives Banking Subcommittee on Economic Stabilization.

I have come to understand how large organizations function, to work within the parameters of plans, programs, and budgets, and to face and overcome challenges. I have had the privilege of building strong, effective relationships with Senators, congressional staff, key officials within the executive department, including the Department of Defense, the Army Corps of Engineers, and civil works stakeholders.

I hold a Master of Science degree in Resource Development from Michigan State University and a Bachelor of Science degree from Boston College. My education and experiences have given me a broad base of knowledge to lead in the development of sound processes, practices, and policies to execute the critical mission of Army civil works.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the Assistant Secretary of the Army for Civil Works?

Answer. If confirmed, I would take several actions to enhance my expertise as Assistant Secretary of the Army (Civil Works). My goal would be to travel to each Corps of Engineers division to see first-hand the infrastructure development and environmental restoration projects to fully understand the planning, design, construction, operation and maintenance of these projects. I also intend to reach out to Members of Congress, other Federal agencies, State and local interests, study and project sponsors, and other stakeholders to understand their perspectives in areas of mutual concern. I would also work to develop a close relationship with other offices within the Department of the Army and the Department of Defense to make better use of resources and advance the interests of the Civil Works program.

I also will work closely with the Chief of Engineers and the Deputy Commanding General for Civil and Emergency Operations to ensure that I am fully informed and prepared to address the important issues I would oversee as Assistant Secretary of the Army (Civil Works).

Question. Assuming you are confirmed, what duties and functions do you expect that the Secretary of the Army would prescribe for you?

Answer. If I am confirmed, I expect to carry out the duties and functions of the Assistant Secretary of the Army (Civil Works) as articulated in General Orders No. 3, dated July 9, 2002 and General Orders No. 13, dated October 29, 2004. In addition, I expect to support and assist the Secretary of the Army in carrying out critical departmental responsibilities, including Continuity of Operations.

RELATIONSHIPS

Question. Please describe how you envision your working relationship, if confirmed, with the following:

The Secretary of the Army.

Answer. If confirmed, I expect the Secretary of the Army will discuss the roles and responsibilities he wishes me to assume in furthering the goals and priorities of the Secretary of Defense and the President. Consistent with the statutory responsibilities of the Assistant Secretary of the Army for Civil Works and the responsibilities and authorities assigned under the General Orders of the Army, I expect the Secretary will rely on me to oversee the Civil Works program of the Army Corps of Engineers, the programs of Arlington National Cemetery and Soldiers' and Airmen's Home National Cemetery.

Question. Under Secretary of Defense for Logistics and Materiel Readiness.

Answer. If confirmed, I will work closely with the Under Secretary of Defense (Logistics, Materiel Readiness) in areas of shared responsibility.

Question. The Under Secretary of the Army.

Answer. If confirmed, I will work closely with the Under Secretary of the Army in furthering the goals and priorities of the President and the Secretary of the Army.

Question. Deputy Under Secretary of Defense for Installations and Environment.

Answer. If confirmed, I will work closely with the Deputy Under Secretary of Defense (Installations and Environment) in areas of shared responsibility.

Question. The Assistant Secretary of Defense for Homeland Defense.

Answer. If confirmed, I will work closely with the Assistant Secretary of Defense for Homeland Defense in areas of shared responsibility.

Question. The Assistant Secretary of the Army for Installations and Environment.

Answer. If confirmed, I will work closely with the Assistant Secretary for Installations and Environment in areas of shared responsibility, such as land acquisition for civil works projects. I will develop a cooperative relationship as we carry out the respective duties assigned to us by the Secretary of the Army to protect and preserve the environment and manage the Army's resources under our stewardship.

Question. The Chief of Staff of the Army and the Army Staff.

Answer. If confirmed, I will work closely with the Chief of Staff of the Army and the Army Staff. I expect to coordinate closely with the Army Staff regarding our responsibilities relating to the duties of the Chief of Engineers.

Question. The Chief of Engineers.

Answer. If confirmed, I will develop a close working relationship with the Chief of Engineers as we work effectively to manage the Nation's Civil Works programs and projects, remaining mindful of my oversight responsibility under the law and the Army General Orders. I believe the interests of the Nation are best served when the relationship between the Assistant Secretary of the Army (Civil Works) and the Chief of Engineers is based on mutual respect, trust, and cooperation. Both positions have enormous responsibilities and demand focused attention to very complex issues. Our respective abilities to respond to the President's priorities and carry out laws enacted by Congress will depend heavily on the success of this relationship.

Question. State Governors.

Answer. The execution of the Corps of Engineers civil works mission often demands a balancing of diverse interests. The proper reconciliation of these interests requires an understanding of the Corps' authorities and legal responsibilities and open communication among all parties. If I am confirmed, I am committed to working cooperatively with the Governors of the States for the public interest, and I pledge to establish and maintain a full dialogue with the Governors of the States on all issues that we must cooperatively address.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that will confront the Assistant Secretary of the Army for Civil Works?

Answer. Communities across the country rely on Army Corps of Engineers water resources projects to reduce flood damages, to enable efficient competition in world trade, to provide needed water and power, and to protect and restore our rich environmental resources. The Civil Works program provides a sound investment in the Nation's security, economic future, and environmental stability. I believe the greatest continuing water resources challenge is to find sustainable ways to strengthen the Nation's economy, while protecting and restoring unique water and related land resources for the benefit of future generations.

Two other challenges the Corps faces are the need to maintain its existing water infrastructure and to repair damages to the natural environment. An efficient water

transportation system is critical if we are to remain competitive in international trade. Our system of ports and inland waterways enable us to efficiently transport goods in an environmentally acceptable manner.

Flooding also continues to threaten communities. We should use the Corps limited resources not only to respond to natural disasters when floods and hurricanes occur, but also to work more creatively with nature to prevent or reduce flood damages.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed I would expect the Secretary of the Army and I to work together to define the appropriate role for the Corps of Engineers in addressing these problems. The challenges the Nation faces are complex, and there are many difficult decisions to make. It is of paramount importance that we bring all interests to the table and that all have a voice in the development of solutions to our Nation's problems. The Army Corps of Engineers should always engage in an open and cooperative dialogue with Congress, other Federal agencies, States, Tribes and local governments in addressing those important challenges where the Corps can contribute to solutions for the Nation.

Question. What do you consider to be the most serious problems in the performance of the functions of the Assistant Secretary of the Army for Civil Works?

Answer. The Assistant Secretary of the Army for Civil Works has wide-ranging responsibilities arising from the varied purposes of the Civil Works Program. I believe the Assistant Secretary should continue and improve its efforts to clearly establish and communicate policy and direction so the Corps can effectively execute its important Civil Works mission and to ensure continued broad support within the Department of Defense and the Department of the Army for the national cemeteries program.

Question. If confirmed, what management actions and timelines would you establish to address these problems?

Answer. If confirmed, one of my first priorities will be to meet with the Chief of Engineers and others in the administration and Congress to seek their input on how the Corps can best meet the Nation's water resources needs.

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed by the Assistant Secretary of the Army for Civil Works?

Answer. If confirmed, I will work to improve the management and administration of the Army Civil Works Program and the Army's national cemetery program and would seek ways to more efficiently use Army's resources in the development and execution of these programs.

CIVILIAN OVERSIGHT OF THE ARMY CORPS OF ENGINEERS

Question. What is your view of the relative authority of the Chief of Engineers, the Assistant Secretary of the Army for Civil Works, the Secretary of the Army, the Army Chief of Staff, and the Secretary of Defense with regard to the civil works function of the Army Corps of Engineers?

Answer. My view of the relative authority of the Chief of Engineers, the Assistant Secretary of the Army for Civil Works, the Secretary of the Army, the Army Chief of Staff, and the Secretary of Defense with regard to the civil works function of the Army Corps of Engineers follows:

Secretary of Defense

The Secretary of Defense has full authority, direction, and control over all elements of the Department of Defense. He exercises this power over the Corps of Engineers through the Secretary of the Army, whose responsibility for, and authority to conduct, all affairs of the Army is subject to the authority, direction and control of the Secretary of Defense. If confirmed, I will cooperate fully with the Secretary of Defense in fulfilling the administration's national defense priorities and efficiently administering the Corps of Engineers in accordance with the policies established by the Office of the Secretary of Defense.

The Secretary of the Army

As head of the Department of the Army, the Secretary of the Army is responsible for, and has the authority necessary to conduct all affairs of the Department of the Army. He may assign functions, powers and duties as he considers appropriate to the Under Secretary of the Army, as well as the Assistant Secretaries of the Army, and require officers of the Army to report to these officials on any matter.

The Chief of Staff of the Army

The Chief of Staff of the Army performs his duties under the authority, direction, and control of the Secretary of the Army and is directly responsible to the Secretary. The Chief of Staff also performs the duties prescribed for him by law as a member of the Joint Chiefs of Staff. If confirmed, I will establish and maintain a close, professional relationship with the Chief of Staff. I will communicate with him directly and openly as he performs his prescribed duties.

The Assistant Secretary of the Army for Civil Works

The Assistant Secretary of the Army for Civil Works is principally responsible for the overall supervision of the Army's civil works program, including flood damage reduction, river and harbor navigation, environmental restoration and protection, water supply, shore protection, hydroelectric power, recreation and related purposes. The complex issues that arise in these areas demand a close, professional relationship between the Assistant Secretary and the Chief of Engineers, based on mutual respect, trust, cooperation and full and open communication. The Assistant Secretary also is responsible for the program and budget of the Army national cemeteries, namely Arlington National Cemetery and the Soldiers' and Airmen's Home National Cemetery. If I am confirmed, I am committed to establishing and maintaining close professional relationships with all officials who share and are responsible for aspects of these programs, in order to respond effectively to the President's priorities and laws enacted by Congress.

The Chief of Engineers

As a member of the Army Staff, the Chief of Engineers reports to the Chief of Staff, through the Vice Chief of Staff, with respect to military matters. The Chief of Engineers reports to the Assistant Secretary of the Army (Civil Works) on civil works functions of the Army, including those relating to the conservation and development of water resources and the support for others program. The Chief of Engineers also reports to the Assistant Secretary of the Army (Civil Works) with respect to reimbursable support for non-Defense agencies and for reimbursable international activities not directly in support of U.S. forces overseas. In the area of military installation activities, the Chief reports to the Assistant Secretary of the Army (Installations & Environment), who has principal responsibility for all Department of the Army matters related to installations and the environment.

Question. In your view, does the Corps need to make fundamental changes in the way it operates? If so, what changes would you recommend?

Answer. No. I believe the Corps is a fundamentally sound organization. It has strong technical abilities and has proven time and time again that it can solve difficult problems. It has served this Nation for many years and can be counted on to continue to do so in the future. However, the Corps should continually re-examine the way it manages policy and technical reviews in order to ensure projects will receive broad support. Also, the Corps should always seek better, more effective ways of communicating with the broad range of interests that have a stake in its projects.

Question. If confirmed, what procedures would you follow regarding consultation with Congress prior to issuing any secretarial decisions or announcements regarding reforms that may affect the execution of the civil works and environmental functions of the Army Corps of Engineers?

Answer. If confirmed, I will follow Departmental procedures regarding consultation with Congress that facilitate full and open communication among all interested parties, including the executive branch, Members of Congress, or the public. In performing my statutory duties, I intend to appropriately involve all interested parties and make decisions that take into account all relevant information.

Question. What is your view of the role of the civilian and military leadership of the Army Corps of Engineers in developing goals for Corps programs and presenting these goals to the legislative branch?

Answer. If confirmed, I will provide leadership to enable the Corps to continue to be a valuable asset to the Nation. Representing the administration, I will work with Congress to insure the proper direction for the Corps. I will work with the Corps' military and civilian leaders to establish and provide to the legislative branch appropriate Civil Works goals, and I will ensure that both the Office of the Assistant Secretary for Civil Works and the Corps continue to respond to requests for information from the legislative branch.

INTEGRITY OF CORPS OF ENGINEERS PROJECTS

Question. In November 2000, the Army Inspector General found that three Army Corps of Engineers officials had manipulated data in a cost-benefit analysis in order to justify a \$1 billion project.

What steps have been taken since 2000 to ensure that projects are appropriately analyzed and justified?

Answer. My understanding is that the Corps has made substantial changes to assure that projects are appropriately analyzed and justified. The Corps has strengthened its procedures for internal peer review and adopted procedures for external peer review that is both consistent with guidance issued by the Office of Management and Budget and responsive to directives contained in the Water Resources Development Act of 2007. Further, several years ago the Corps established the Civil Works Review Board as a means to vet Corps Civil Works project recommendations with the Corps senior leadership, Office of Management and Budget staff, as well as the Office Assistant Secretary of the Army (Civil Works) personnel in advance of completing Chief of Engineers reports. The Directorate of Civil Works several years ago created the Office of Water Project Review, which is separate from project development functions and, as I understand it, further strengthens the internal review procedures.

Question. If confirmed, what further steps, if any, would you take to ensure integrity in the oversight of projects executed by the Army Corps of Engineers?

Answer. If confirmed, I will evaluate the current process guided by the principle that Corps technical analyses must be absolutely sound and the project evaluation process must be transparent and inclusive. External reviews can contribute to reducing controversy and risk, but these reviews must be integrated into the project development process not added at the end of the process. Integration of external review will improve projects and will assist the Corps in meeting urgent needs in a timely manner.

NAVIGATION

Question. The Army Corps of Engineers has built and maintains an intracoastal and inland network of commercial navigation channels, and locks and dams for navigation, which comprise an integral parts of the Nation's critical infrastructure. The Corps also maintains 300 commercial harbors, through which pass 2 billion tons of cargo a year, and more than 600 smaller harbors. Significant amounts of heavy equipment and supplies bound for potential overseas military operations move by ship through ports maintained by the civil works program.

What do you view as the greatest challenges facing the Army with respect to the execution of its navigation mission?

Answer. I expect one of the greatest challenges with the execution of the navigation mission to be the maintenance, recapitalization and modernization of aging infrastructure. Maintaining ports and waterways is critical to our economic well-being. Another significant challenge to the navigation mission is the management of hundreds of millions of cubic yards of dredged material removed annually from our Nation's marine transportation harbors and waterways. I believe the Army and the Corps are continually working to make dredging and placement of dredged material environmentally safe and acceptable. I believe these efforts should be continued and we should look for innovative ways to integrate the critical need for navigation improvements with and opportunities to protect and restore the Nation's aquatic environment.

Question. Are there aspects of this mission which you believe should be transferred from the Department of the Army?

Answer. At this time I do not believe that any aspects of the Corps' navigation mission should be transferred from the Department of the Army.

Question. In your view, how can the Corps best respond to environmental concerns in carrying out its navigation mission?

Answer. I believe the Corps not only should continue to assess environmental considerations as they arise in its Navigation program, but also seek out opportunities for regional sediment management and beneficial uses of dredged material. As lessons are learned, they should be incorporated into the management of the navigation program to best provide a safe, efficient, reliable, and environmentally sound marine transportation system.

ENVIRONMENTAL MISSION

Question. The Corps is responsible for environmental restoration projects at Department of Defense Formerly Used Defense Sites and also at Department of Energy Formerly Utilized Sites Remedial Action Program. Under the DOE program, the Army Corps of Engineers cleans up former Manhattan Project and Atomic Energy Commission sites, making use of expertise gained in cleaning up former military sites, and civilian hazardous waste sites under the Environmental Protection Agency "Superfund" program.

What do you view as the greatest challenges facing the Army with respect to the execution of its environmental restoration mission?

Answer. Continuing to execute the vital cleanup mission while always protecting the health and safety of workers and the public is perhaps the biggest challenge for the Formerly Used Defense Sites Program and the Formerly Utilized Sites Remedial Action Program. The Corps should continue to apply good science and management practices that will increase remediation efficiency and continue to meet the commitments made to stakeholders. The Formerly Utilized Sites Remedial Action Program is a Civil Works mission under the oversight of the ASA(CW), as is the Superfund and other environmental work the Corps carries out on behalf of non-Defense agencies on a reimbursable basis due to the Corps special expertise. In contrast, the Formerly Used Defense Sites Program is an element of the Defense Environmental Restoration Program under the responsibility of the Assistant Secretary of the Army (Installations & Environment).

Question. Are there aspects of this mission which you believe should be transferred from the Department of the Army?

Answer. At this time I believe the Army is the appropriate agency to perform this mission.

Question. What is your vision for this aspect of the Corps' mission?

Answer. My vision for the Civil Works Formerly Utilized Sites Remedial Action Program and for the Corps' reimbursable support for non-Defense agencies is that these programs should be executed efficiently, in partnerships with others, and with the highest possible level of technical competence.

Question. If confirmed, how would you propose to address the Corps' environmental funding requirements?

Answer. If confirmed, I will evaluate the environmental funding needs within the overall Corps Civil Works mission.

Question. If confirmed, how would you preserve the integrity of the Corps' environmental and civil works mission?

Answer. If confirmed, I will work closely with others, including the Chief of Engineers, to ensure that all aspects of the Civil Works program are carried out to the highest possible standards of engineering and environmental science, and I will strongly support the practice, strengthened by the Water Resources Development Act of 2007, of engaging outside experts for independent reviews of the Corps' work. I have an understanding of the practical issues regarding independent review and will work to achieve the fullest implementation of congressional intent.

Question. What are your views about the potential performance of regulatory functions presently performed by the Army Corps of Engineers by other governmental or nonmilitary entities?

Answer. At this time I believe the Army continues to be the appropriate agency to carry out the regulatory functions currently assigned to the Corps of Engineers.

Question. The Corps is also responsible for Environmental and Ecosystem Restoration as part of its Civil Works mission. These include the Everglades, Coastal Louisiana, and the Great Lakes. There are many large ecosystem restoration projects around the Nation.

How do you propose to balance the Corps' work between ecosystem restoration and traditional navigation?

Answer. The Corps Civil Works program has three major mission areas: Navigation, Flood Damage Reduction, and Ecosystem Restoration. If confirmed, I will work to improve watershed planning to balance needs and facilitate comprehensive and integrated solutions that preserve or enhance performance and sustainability at a system level.

STATE WATER QUALITY STANDARDS

Question. In the past, the Army Corps of Engineers has not always been required to meet State water quality standards in constructing and operating its water resources projects.

Do you believe that the Army Corps of engineers should be required to meet State water quality standards in constructing and operating Corps projects?

Answer. Yes, I do. Section 401 of the Clean Water Act requires that the Army Corps of Engineers obtain certification from States, or interstate water control agencies, that a proposed water resources project is in compliance with established effluent limitations and water quality standards. If a State in question has assumed responsibilities for the section 404 regulatory program, a State 404 permit would be obtained which would serve as the certification of compliance.

Section 404r of the Clean Water Act waives the requirement to obtain the State water quality certification if the information on the effects of the discharge is in-

cluded in an Environmental Impact Statement on the proposed project submitted to Congress before the discharge takes place and prior to either authorization of the project or appropriation of construction funds. Nevertheless, it is my understanding that it is the policy of the Corps to seek State water quality certification rather than utilizing the Section 404r exemption provision.

BUDGETING

Question. The Corps of Engineers has a significant backlog of Operations and Maintenance work and Construction work throughout the country. This backlog has very real economic, environmental, and safety implications.

How do you plan to address the backlog of work? How will you prioritize certain types of projects above others?

Answer. If confirmed, I will review the backlog of authorized projects that have not been started to determine whether they are still appropriate to meet today's water resources challenges, and I will consider whether they should be recommended for inclusion in the President's budget. Regarding the balance to complete for ongoing construction projects, which sometimes is also referred to as part of the backlog, I will strive to complete them as efficiently as possible in accordance with administration budgetary criteria, in order for the Nation to realize the benefits provided by those projects. Regarding the maintenance backlog, I will carry out a thorough analysis of the remaining backlog after assessing the benefits from the funding provided for this purpose under the American Reinvestment and Recovery Act.

Question. What are your views on using the Harbor Maintenance Trust Fund, which has approximately a \$4 billion surplus, to address the Corps' backlog?

Answer. I understand that there is a large unspent balance of revenues and interest in the Harbor Maintenance Trust Fund and that the annual revenues exceed recent rates of spending for eligible navigation operation and maintenance. I believe this matter merits serious review within the administration to determine whether policy, budgetary, or legislative changes are appropriate.

WORKFORCE IN THE CORPS OF ENGINEERS

Question. There has been much discussion and publicity about the reduction in engineers graduating from our Nation's universities over the last 20 years.

How would you assess the overall health of the national engineering expertise and capability maintained within the Corps of Engineers workforce?

Answer. From what I understand, this issue has been of great importance to the Chief of Engineers for some time. I believe the Corps is generally successful in filling positions and usually has multiple highly qualified candidates for each position announced. Many of the Corps' employees, both civilians and military officers have either professional engineering degrees or project management skills experience. I believe that recruiting and retaining talented employees is key and is an area of great interest to me and, if confirmed, look forward to working with the Chief of Engineers to ensure that emphasis remains on this critical area within the Corps of Engineers.

Question. In your opinion, are adequate programs in place and funded to ensure the Corps engineering workforce is educated on the latest technologies and innovations?

Answer. If confirmed, I would work with the Chief of Engineers to learn more about the programs that are in place and to explore additional options and ideas.

Question. Do you see any challenges or opportunities for improvement to the workforce?

Answer. I believe that there are always opportunities to improve an organization's overall workforce. If confirmed, I would work with the Chief of Engineers to explore opportunities to improve.

ACQUISITION PROCESSES FOR THE CORPS OF ENGINEERS

Question. In the last 5 years, the Corps of Engineers has increasingly relied upon a contract process known as Design-Build, which requires a design agent to partner with a construction agent to compete for a contract. This differs from the traditional design-bid-build process, where the Corps contracts first for a design product and subsequently issues a separate solicitation for the construction. While there are many benefits to a collaborative process between a designer and the construction agent, there are also drawbacks. These include the reduced oversight by the Corps engineers in the design/construction process, and the systematic elimination of small to medium size engineering/architecture firms as well as construction contractors who do not have the resources to compete for design-build contracts.

In your opinion, what are the strengths and weaknesses in each acquisition process?

Answer. From my limited prior experience in this area, by way of strengths, the design-build process generally results in faster project delivery because the requirements can be quickly defined in performance terms and the design and construction phases can proceed largely concurrently. In terms of weaknesses, the design build process requires more effort and therefore may be more costly to industry to submit offers and the Government and its customers have less control over the final design solutions.

Question. How should the Corps determine which acquisition process to use?

Answer. I believe the Corps plans all acquisitions pursuant to the Federal Acquisition Regulations. The decision to use one delivery system over another depends on many factors which involve the customer, the project, industry and the Corps of Engineers. I believe all factors must be weighed and considered before any particular acquisition method is chosen.

Question. Do you believe the use of design-build contracts has any effect on the proficiency of the Corps engineering and contract management workforce? If so, can you elaborate?

Answer. If confirmed, I would consult with the Chief of Engineers, to better understand the process and considerations when using the design-build option and how it affects the proficiency of the Corps' engineering and contract management workforce.

Question. Do you foresee any issues over the long term emerging from the preponderant use of design-build contracts?

Answer. From what I understand, the Corps plans all acquisitions and selects the appropriate delivery system depending on the specific requirements. At this time, I do not foresee any issues over the long term using design-build contracts.

NATION-WIDE LEVEE SYSTEMS AND FLOOD CONTROL

Question. The recent floods in North Dakota and surrounding States reemphasized the importance and fragility of our Nation's levee systems.

How would you assess the health of these systems?

Answer. I understand that the Corps of Engineers is in the process of inventorying and evaluating levees nation-wide. Until all the information is collected, there are still many unknowns. However, in general, I agree with the premise that levees across the Nation are aging and that this is an important concern.

Question. In your opinion, is the process used by the Corps of Engineers to prioritize national levee requirements adequate?

Answer. I believe the Corps of Engineers holds public safety as top priority and uses basic risk concepts, such as population at risk, to prioritize all aspects of levee activities, including inspections, operation and maintenance, and construction projects. The Corps is currently developing risk tools to improve how it evaluates the risk associated with levees in order to improve how national priorities are determined. If confirmed, I plan to review the prioritization of levy requirements.

Question. Are the resources provided to date to address these requirements adequate?

Answer. If confirmed, I will evaluate how resources are allocated among all of the Civil Works programs.

Question. If not, what additional resources are needed, in your opinion?

Answer. At this time, I do not know what additional resources may be needed in this area. However, if confirmed, I will evaluate funding for all programs within Civil Works.

Question. If confirmed, how would you address concerns about the future of the Mississippi River Gulf Outlet (MRGO) and a determination on whether it should be closed?

Answer. It is my understanding that the MRGO was deauthorized on 5 June 2008, when the Assistant Secretary of the Army for Civil Works, the Honorable John Paul Woodley, Jr., sent to Congress the Report of the Chief of Engineers, which presents the results of the comprehensive plan for MRGO. The report recommended deauthorizing the portion of the MRGO navigation channel from the Gulf of Mexico to Mile 60 at the southern bank of the Gulf Intracoastal Waterway and physical modifications to the MRGO and, based on the requirements of section 7013 of the Water Resources Development Act of 2007, includes a plan to address ecosystem restoration.

I also understand that the Corps is currently building the MRGO closure structure and conducting a feasibility study to develop an ecosystem restoration plan for

estuarine areas impacted by the MRGO and that closure construction work is scheduled for completion this year.

If confirmed, I will closely monitor the MRGO project.

PRIORITIZATION PROCESS IN THE CORPS OF ENGINEERS

Question. The Corps of Engineers have always been subject to pressure from various levels of government to carry out certain projects of special interest.

Do you believe the prioritization process used by the Corps of Engineers for civil works projects is adequate?

Answer. It is my understanding that the Corps does not prioritize projects for authorization. Once authorized, projects are recommended for appropriation consistent with the budgetary criteria set by the administration on a yearly basis. Because the budget must address prioritization of projects to receive limited funding, budgetary criteria are often different from the criteria used to establish Federal interest and ultimately support project authorization.

Question. If confirmed, do you plan to adhere to the established prioritization processes, barring any unforeseen circumstances?

Answer. Yes, I believe that, in general, budgetary criteria reflect the priorities of the administration and, if confirmed, I would support the administration's budgetary criteria.

Question. What is your opinion of using peer reviews of Corps projects to get an outside opinion on the need, urgency, and assessment of effects caused by Corps projects?

Answer. I believe Corps project proposals should be reviewed by both internal and external parties and that these reviews should be integrated into the planning process in a way that is transparent and seamless. In addition, these reviews should be undertaken in an integrated manner to ensure feedback is appropriately incorporated into planning investigations at the earliest possible stages of plan formulation.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Assistant Secretary of the Army for Civil Works?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR CARL LEVIN

HARBOR MAINTENANCE TRUST FUND

1. Senator LEVIN. Ms. Darcy, the Harbor Maintenance Trust Fund (HMTF) has approximately a \$4 billion surplus that is growing every year, yet there are ports, waterways, and small harbors, including harbors of refuge in Michigan, that are silting due to the U.S. Army Corps of Engineers (Corps) having insufficient funds available for dredging and other operations and maintenance needs. The money collected for the HMTF is intended for a specific purpose—maintaining harbors and channels. As I mentioned though, the Corps has significant operations and maintenance backlogs, and yet in fiscal year 2008 the Corps only spent \$766 million in operations and maintenance from the HMTF, while the tax revenues collected were

\$1.6 billion. If confirmed, how would you propose to address these needs as you work with the Corps divisions and districts and the Office of Management and Budget in developing the administration's future budget requests?

Ms. DARCY. Since I am not yet confirmed, I do not have a specific proposal to address the imbalance between revenues to and spending from the HMTF. If confirmed, I will work with the Office of Management and Budget, other Federal agencies that have responsibilities related to the Nation's waterborne commerce, and with nongovernmental stakeholders with an interest in the Federal navigation channels and harbors maintained by the Army Corps of Engineers, to explore options for dealing with this issue. I know from my experience working for Senate committees that the HMTF has been a longstanding concern to many interested parties.

SOO LOCKS

2. Senator LEVIN. Ms. Darcy, over \$30 million has been allocated to the Soo Lock Replacement project over several years for engineering and design work as well as construction. The Corps has stated that it will not provide funding in its budget for the project. Roughly two-thirds of the Great Lakes fleet is limited to the current 1,000-foot lock, and if something happens which would incapacitate the current lock, there would be severe repercussions throughout the region. The Corps is considering whether homeland security concerns should also be considered since so much raw material moves through the existing Poe Lock. Along a parallel track, the Corps is also working on a Soo Locks Asset Renewal Plan to upgrade the existing Poe and McArthur locks. This project is estimated to cost \$70 million, and is critical for the Great Lakes shipping industry and American manufacturing. If confirmed, what steps would you take to ensure that sufficient infrastructure investments are made to maintain the Great Lakes maritime competitiveness?

Ms. DARCY. I appreciate the importance of the Soo Locks to the movement of cargo and the commensurate benefit to the economy. If confirmed, I will review matters related to the Soo Lock Replacement project, the Soo Locks Asset Renewal study, and the Army Civil Works budgeting practices. I will give careful attention to impacts on Great Lakes maritime competitiveness arising from existing and potential Civil Works infrastructure investments.

3. Senator LEVIN. Ms. Darcy, will you commit to considering relevant homeland security concerns in the cost-benefit analysis when reviewing the Soo Locks Replacement project?

Ms. DARCY. If confirmed, I will review how homeland security concerns should be considered in analysis and justification of Corps of Engineers projects.

4. Senator LEVIN. Ms. Darcy, will the Corps' value the benefit of reducing the risk and associated cost of lock failure as a result of a terrorist act, natural disaster, or mechanical failure?

Ms. DARCY. I am not familiar with the Corps' current practices for placing a value on the benefit of reducing the risk and impacts of possible lock failure arising from a terrorist act, natural disaster, or mechanical failure. If confirmed, I will review the current practices and give full consideration to whether modifications are warranted in the interest of national security.

NATIONAL AND GREAT LAKES OPERATIONS AND MAINTENANCE BACKLOG

5. Senator LEVIN. Ms. Darcy, in Michigan, throughout the Great Lakes, and across the country, there is a significant backlog of Corps' work. In the Great Lakes, we have been contending with a backlog of dredging and other operations and maintenance work. The Corps estimates a backlog of 17 million cubic yards at commercial harbors that need to be dredged and over 100 miles of breakwaters that need repairs. Due to the dredging backlog, several freighters have become stuck in Great Lakes channels; ships have had to carry reduced loads, and many shipments have simply ceased altogether. Because of the disrepair to the breakwaters, some vessels have been unable to use harbors of refuge during storms, presenting real threats to public safety.

This problem stems in part because the Corps views the Great Lakes as a coastal system and compares individual ports using tons as a budget metric. In contrast, the Corps budgets our Nation's river systems on a ton-mile metric. The current budget process and metrics put the Great Lakes navigational system at a disadvantage compared to other domestic navigational systems. For example, based on fiscal year 2005 funding levels, the Corps spent about \$0.52 per ton of cargo carried in

the Great Lakes, but the Missouri River received about \$15 per ton of cargo carried. Clearly, the Great Lakes are being shortchanged.

How do you plan to address the backlog of Corps' work across the country, and in particular the Great Lakes?

Ms. DARCY. The Nation's navigation channels and waterways are vital components of our transportation system. However, competition for Federal funds is very keen, and in a constrained funding environment the Corps must prioritize its maintenance needs across the spectrum of projects. If confirmed, I will analyze the Corps' current procedures and performance measures for allocating scarce funding and will seek ways to refine the metrics applicable to maintenance funding to ensure that funding for navigation infrastructure is budgeted on a sound basis that takes systematic impacts into consideration.

6. Senator LEVIN. Ms. Darcy, would you be willing to change the Corps' budgeting guidelines to provide more equitable funding allocations for the Nation's shipping channels?

Ms. DARCY. If confirmed, I will review current budgetary guidelines and give full consideration to what changes, if any, are needed to enable the Corps to allocate available Civil Works funds in the most equitable manner possible.

GREAT LAKES FISHERY AND ECOSYSTEM RESTORATION PROGRAM

7. Senator LEVIN. Ms. Darcy, the Great Lakes are home to some very unique species of fish and wildlife, but unfortunately, the fishery and the ecosystem health of the Great Lakes are threatened by invasive species, nonpoint source pollution, contaminated sediments, and habitat loss. The Great Lakes Fishery and Ecosystem Restoration Program (GLFER) was authorized 9 years ago. The Great Lakes Fishery Commission, which is the Corps' primary partner in implementing GLFER, and the Corps has expended considerable time, energy, and funds to begin the implementation of GLFER. Unfortunately, the Corps has done little to support GLFER in its proposed budget. In fact, the Corps has called GLFER 'unbudgetable' until a feasibility study is conducted to identify every project to be done under GLFER. I believe that this is unsatisfactory given the fact that it is impossible to identify the universe of projects because some will emerge over time. Additionally, GLFER is similar to other continuing authority programs such as Section 206 and Section 1135 for which it does budget. If you are confirmed, will you continue to call GLFER 'unbudgetable,' hamstringing its contribution to Great Lakes restoration?

Ms. DARCY. From my prior experience, I am familiar with the view that programs such as the GLFER Program should have a detailed programmatic report on which their budget priority could be evaluated. If confirmed, I will review this practice in general and its application to the GLFER Program in particular.

INVASIVE SPECIES-ASIAN CARP

8. Senator LEVIN. Ms. Darcy, by all accounts, invasive Asian carp have the potential to wreak havoc on the Great Lakes economy and environment. In an effort to slow or stop the spread of invasive species between the Great Lakes and the Mississippi River watersheds, which are connected as a result of a Corps project, Congress authorized a dispersal barrier demonstration project in the National Invasive Species Act of 1996. The barrier has been operating successfully for several years, and a second, permanent barrier is partially operational. If confirmed, will you make ecosystem protection and prevention of organism movement the principle driver for making decisions about the electrical barrier system?

Ms. DARCY. I am aware that invasive species such as the Asian carp are a critical concern for the Great Lakes. The Chicago Sanitary and Ship Canal is an obvious pathway for these species to reach the Lakes, presenting a pressing threat. If confirmed, I will ensure that the best science and engineering are applied to complete the proposed three barrier system to keep the Asian Carp out of the Great Lakes. In coordination with the U.S. Coast Guard, I will work to ensure the barriers are employed at the maximum safe levels of operation. I will also explore additional alternatives, making every effort to keep invasive species from the Lakes.

9. Senator LEVIN. Ms. Darcy, will you commit to completing the authorized report on progress toward identifying a more permanent solution to the problem of interbasin organism movement?

Ms. DARCY. If confirmed, I will make every effort within my authority to complete the authorized report seeking a more permanent solution to the problem of interbasin organism movement.

GREAT LAKES INTERAGENCY TASK FORCE

10. Senator LEVIN. Ms. Darcy, beginning in 2004, the Federal agencies that manage programs on the Great Lakes began working cooperatively as part of the Great Lakes Interagency Task Force. The Corps of Engineers has many authorized programs and projects on the Great Lakes, and your predecessor, Secretary Woodley, was engaged in the activities of this Task Force. If confirmed, will you commit to being an active partner in the Great Lakes Interagency Task Force?

Ms. DARCY. I believe the Great Lakes Interagency Task Force is one of the most effective interagency collaborations both within the United States and between the United States and Canada, and I understand the Corps of Engineers has been instrumental in this collaboration. If confirmed, I will be an active partner in the Task Force and will try not only to sustain these collaborative efforts, but to strengthen them.

LOCAL AND STATE COORDINATION

11. Senator LEVIN. Ms. Darcy, the Corps has a great deal of expertise and resources that can be very valuable in the effort to restore the health of the Great Lakes. One of the challenges local organizations and State agencies often face in working with the Corps is meeting the requirements for local cost share. Do you have any recommendations for ways that the Corps might be a more effective partner with local organizations in pursuing restoration projects by reducing the overall cost of Corps restoration projects so that the local share will be more affordable?

Ms. DARCY. I believe that one way the partnerships could be more effective is to renew efforts to reduce the time it takes to plan and make decisions regarding projects. If the time it takes to complete a study is shortened, the overall cost of the study will be reduced since a large portion of the cost is salaries and overhead. If confirmed, I will work with the Corps to identify opportunities to shorten the time required to complete studies, as well as opportunities to better integrate existing planning studies and to examine benefits from more emphasis on watershed-wide and regional programmatic analyses.

INTERAGENCY COORDINATION

12. Senator LEVIN. Ms. Darcy, one of the challenges we face in restoring the Great Lakes is bringing the resources and talents of multiple Federal agencies of the Federal Government together to meet a common challenge. Too often, Federal agencies are confined by narrow authorities or interpretations of their authority that make it difficult for Federal agencies to work together on common Great Lakes projects. President Obama's recent \$475 million budget request for an interagency Great Lakes restoration initiative (led by the Environmental Protection Agency (EPA)) may be an opportunity for Federal agencies to pool or share resources so that the Corps can bring its unique skills and expertise together with the unique skills and areas of expertise of others in the Federal family to tackle a problem. Can you recommend ways that the Corps can improve its ability to work in a team setting with other Federal agencies to bring the best combination of Federal skills and resources together to tackle a problem?

Ms. DARCY. If confirmed, I will work with the Corps of Engineers, the EPA, and other Federal agencies to determine the appropriate role for the Corps in supporting the execution of President Obama's fiscal year 2010 interagency initiative to restore the Great Lakes. I am committed to maximizing interagency collaboration by building and sustaining strong working relationships with sister agencies. If confirmed, I will work to expand the Corps' watershed planning and management activities and to more fully engage Federal and non-Federal stakeholders in a wide variety of efforts.

13. Senator LEVIN. Ms. Darcy, are there any changes in authority that might make this approach more feasible?

Ms. DARCY. While I am not aware of any specific concerns with the Corps' current authorities to engage in partnerships with other Federal agencies, if confirmed I will look into this matter. Also, I will work with the EPA and other Federal agencies

to determine whether any additional authority is needed to enable the Corps to fully support the President's initiative.

QUESTION SUBMITTED BY SENATOR JACK REED

MARITIME HAZARDS

14. Senator REED. Ms. Darcy, in past years, both the Corps and I have sought and secured funding to remove several large boulders from the mouth of the Charlestown (Rhode Island) Breachway, which connects Ninigret Pond to the Block Island Sound. The boulders are a severe safety hazard to vessels attempting to enter or exit the pond. There are on average 20 grounding incidents on the rocks per year, and severe damage causing complete loss of a boat occurs on average once every 10 years. While the damages from groundings are significant, town officials are most concerned about the potential for loss of life during a grounding accident in poor conditions.

This project has been funded and designed under section 107 of the River and Harbors Act. However, as the project has gone through design, the cost benefit ratio for commercial vessels, which does not include the potential for loss of life, has been difficult to justify. Nonetheless, Federal funds to complete the project have been appropriated and are in hand. The Corps does have authority under section 3 to help clear snags, debris, other impediments to navigation, and I understand that the Corps has looked into using this authority to complete the project, but such projects are capped at a total of \$1 million.

Knowing the critical need for this project and the fact that funds are available to complete it, will you work with me, once you are confirmed, to ensure that this project can move forward with the funding that has been appropriated and without an additional burden on the local sponsor?

Ms. DARCY. I am aware of this project, and if confirmed, I will work with you and the Corps to explore potential solutions to this problem.

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

PRIORITIZING PROJECTS

15. Senator MCCAIN. Ms. Darcy, in your answers to advance policy questions submitted by this committee, and in response to my question posed during the hearing, you responded to a question about prioritization processes in the Corps for civil works projects with the following: "It is my understanding that the Corps does not prioritize projects for authorization." Can you clarify exactly what you mean by this statement?

Ms. DARCY. Yes, I would be happy to clarify my response to your question. I understood your question to concern project authorizations, as distinguished from project budgeting. It is my understanding that in the budget formulation process, Civil Works projects are prioritized annually on the basis of the economic and environmental benefits they will provide to the Nation when completed. The authorization process for Civil Works projects is different. The planning process for each project looks at alternatives and recommends for authorization the best overall project to achieve the intended purposes for that particular project. Each proposed project is considered on its own merits. The Corps of Engineers Headquarters conducts a policy review of the project "feasibility" reports, and the Office of the Assistant Secretary of the Army for Civil Works also conducts a policy review of the reports.

It is my understanding that, once the Assistant Secretary's questions and concerns have been satisfactorily addressed, the report is forwarded to the Office of Management and Budget, where it receives a third policy review pursuant to Executive Order # 12322. Only after a feasibility report has been approved at all of these levels is the project recommended by the Assistant Secretary for authorization by Congress. Congress sometimes has a different view and does not always enact legislation, including project authorizations, exactly as the administration has proposed. One could consider the various policy reviews a project undergoes before being recommended by the Assistant Secretary for authorization to be a process of prioritization, although I think of that term as applying to the budget formulation process.

CORPS RESPONSIBILITIES

16. Senator MCCAIN. Ms. Darcy, what is your understanding of the responsibilities of the Corps of Engineers as it relates to recommendations for resource allocation and prioritization for the Nation's navigation infrastructure, flood and storm damage controls, hydropower, and numerous environmental requirements?

Ms. DARCY. I understand that the Corps of Engineers provides to the Assistant Secretary of the Army (Civil Works) and the Office of Management and Budget accurate and complete information and options on to make sound resource allocation and budget prioritization decisions. The Corps also applies the resulting policy decisions, and priorities in its justification of the budget and in the execution of the annual program, unless Congress provides direction through Appropriations Acts that modify the program proposed in the budget.

The Chief of Engineers has the responsibility to make technical recommendations that are sound on an engineering and scientific basis. Our shared responsibility, if I am confirmed, will be to ensure that projects are properly formulated and consistent with law and administration policies applicable to water resources project planning and authorization.

CORPS' BUDGET

17. Senator MCCAIN. Ms. Darcy, if confirmed, how do you plan to take part in the development of budgets and proposed project authorizations for Corps programs?

Ms. DARCY. If confirmed, I will devote a significant amount of my time to the development and defense of the budget for the Corps' Civil Works program and to overseeing its execution from a policy perspective. I also will devote my time to reviewing the Corps proposed project authorizations, as documented in feasibility reports. I understand that within the Office of the Assistant Secretary of the Army (Civil Works), there is one team responsible for overseeing the Budget process, and a separate team responsible for providing planning policy guidance to the Corps, reviewing feasibility reports, and recommending to the Office of Management and Budget whether or not the administration should support authorization of the projects addressed in the feasibility reports.

18. Senator MCCAIN. Ms. Darcy, what is your understanding of your potential responsibilities as they relate to the development of the Army Corps of Engineers Civil Works Program 5-Year Development Plan, the most recent version being for years, fiscal year 2009 to fiscal year 2013?

Ms. DARCY. I understand that my responsibilities, if confirmed, would be overseeing the preparation and approval of the Civil Works 5 Year Development Plan (FYDP). The Civil Works FYDP differs significantly from the Future Years Defense Plan that is developed as part of Department of Defense's military budget and program planning. Also, since Civil Works projects and programs are individually authorized, there is no annual authorization act to support the Civil Works budget, as there is on the military side.

19. Senator MCCAIN. Ms. Darcy, how do you plan to handle requests by Members of Congress and other Federal, State, and local entities to have special interest projects and earmarks inserted into various legislation regarding Corps projects if these projects are not consistent with the priorities proposed by the Corps?

Ms. DARCY. If confirmed, I will consider all proposals for inclusion in the Civil Works budget and, by extension, the Civil Works FYDP. I will apply administration policy for the Civil Works program to my decisions and, if I believe the policy needs to be changed, I will work within the administration to achieve this outcome. I will listen to all parties who have an interest in a project. I will rely heavily on the Corps of Engineers for information, but I will make the decisions. My legislative proposals will align with administration policy or will contain proposals to change policy. Since the Civil Works FYDP is a 5-year extension of the Civil Works annual budget, it will continue to reflect the administration's and the Army's priorities for resource allocation.

20. Senator MCCAIN. Ms. Darcy, if confirmed, do you plan to change or eliminate the prioritization processes outlined for each program in the 5-Year Plan?

Ms. DARCY. If confirmed, I will consider all proposals for inclusion in the Civil Works budget and, by extension, the Civil Works FYDP. I will apply administration policy for the Civil Works program to my decisions and, if I believe the policy needs to be changed, I will work within the administration to achieve this outcome. I will listen to all parties who have an interest in a project. I will rely heavily on the

Corps of Engineers for information, but I will make the decisions. My legislative proposals will align with administration policy or will contain proposals to change policy. Since the Civil Works FYDP is a 5-year extension of the Civil Works annual budget, it will continue to reflect the administration's and the Army's priorities for resource allocation.

QUESTIONS SUBMITTED BY SENATOR JAMES M. INHOFE

WATER RESOURCES DEVELOPMENT ACT

21. Senator INHOFE. Ms. Darcy, Congress has tried to pass Water Resources Development Acts (WRDA) every 2 years, with varying success. Under that schedule, this year should see work on another WRDA. If confirmed as Assistant Secretary, do you anticipate sending an administration proposal to Congress for consideration this year?

Ms. DARCY. If confirmed, I will initiate discussions on whether the administration should submit a WRDA legislative proposal this year. While I cannot commit to the outcome of those discussions, I will ensure that they take place.

INLAND WATERWAYS TRUST FUND

22. Senator INHOFE. Ms. Darcy, as I am sure you are well aware, the Inland Waterways Trust Fund no longer contains a surplus, and annual revenues are not sufficient to support investments of the same level as have been made for the past several years. President Obama's fiscal year 2010 budget blueprint released earlier this year expressed support for transitioning away from the current fuel tax and to lock-age fees as the revenue source for the Trust Fund. That concept was advanced by the Bush administration last year, but received no traction here in Congress. Are you willing to work with Congress, as well as the navigation industry, to try to find an answer to this problem that can be supported by all interested parties?

Ms. DARCY. While I have not seen the details of the Inland Waterways Trust Fund legislative proposal being submitted with the fiscal year 2010 budget, I am aware that a similar proposal was made last year by the prior administration. I do appreciate both the need for increased revenues in the Trust Fund and that there are differing views on the best solution. If confirmed, I will work with Congress and the navigation industry to find an answer to this matter.

WATER STORAGE PRICING

23. Senator INHOFE. Ms. Darcy, one of the problems some of the communities in Oklahoma have run into is that even when there is available municipal water supply storage at existing reservoirs, the Corps' policy on pricing that water supply storage makes it prohibitively expensive. Do you know how long it has been since this policy has been reevaluated?

Ms. DARCY. At this time, I do not know how much time has passed since the policy regarding water supply storage has been reevaluated. If confirmed, I will work with the Corps of Engineers to evaluate this policy and consider if changes are appropriate.

24. Senator INHOFE. Ms. Darcy, will you commit to working with me to see if we can improve this policy—either administratively or legislatively—so that communities can afford the water supply storage opportunities that exist at Corps reservoirs?

Ms. DARCY. If confirmed, I will work with you and the Corps of Engineers to determine what changes are necessary and the best method to implement appropriate changes.

25. Senator INHOFE. Ms. Darcy, on the other side of the issue, hydropower interests have expressed frustration with the Corps' policy of determining compensation for lost generation due to reallocations. Will you work with me to see if we can find a compromise?

Ms. DARCY. If confirmed, I will review the Corps' policy for determining compensation for lost hydropower generation due to reallocation of reservoir storage space, and I will work with you to try to address this important issue.

WATER RESOURCE PROBLEM IDENTIFICATION

26. Senator INHOFE. Ms. Darcy, many individuals and organizations who work with the Corps of Engineers have complained that the process the Corps follows to get from identifying a water resources problem or need to implementing a solution can be very frustrating, overly long, and costly. Do you have any ideas on improving that process?

Ms. DARCY. I am familiar with this longstanding issue due to my prior position with the Committee on Environment and Public Works (EPW). Periodically, there have been efforts to streamline the Corps planning process, some of which have proven successful. Although I do not have specific ideas at this time on how to improve the process, I will, if confirmed, make it a priority to identify ways to shorten and simplify the planning process and will work diligently to implement these initiatives as quickly as practicable.

27. Senator INHOFE. Ms. Darcy, will you make it a priority to develop and implement ways to rationalize the process?

Ms. DARCY. If confirmed, I will make it a priority to identify ways to shorten and simplify the planning process and will work diligently to implement these initiatives as quickly as practicable.

FEE COLLECTION

28. Senator INHOFE. Ms. Darcy, you may have heard me state in hearings and other meetings that I am very supportive of the concept of allowing the Corps to use the fees it collects at recreation facilities to operate, maintain, and improve recreation opportunities. Unfortunately, we have consistently run into budget scoring problems that have prevented us from enacting such a proposal. Will you please commit to working with me to see if we can come up with other ways to accomplish this goal of improving recreation opportunities that do not have the same scoring hurdles?

Ms. DARCY. If confirmed, I commit to working with you and the EPW committee to develop alternatives to improve recreation opportunities that either don't create scoring hurdles or include means of addressing the scoring issues that arise.

CLEAN WATER ACT

29. Senator INHOFE. Ms. Darcy, the legislative debate regarding Clean Water Act jurisdiction will be a controversial issue that the Obama administration will have to deal with. Please describe what you would like to see accomplished under the Obama administration regarding Clean Water Act jurisdiction, keeping in mind the Federal interests and State prerogatives envisioned in the Clean Water Act.

Ms. DARCY. I have not had specific conversations with the President or members of his staff about Clean Water Act jurisdiction, but I do know that generally, his administration is looking for good government, and applying the principles of consistency, predictability, and transparency to its regulatory programs is consistent with this philosophy. I support these tenets. If confirmed, I will certainly keep in mind the Federal interests and State prerogatives envisioned in the Clean Water Act when implementing the section 404 program.

30. Senator INHOFE. Ms. Darcy, do you believe the Corps' and the EPA's interpretation of "waters of the U.S." in recent years has been appropriate, overly broad, or overly narrow?

Ms. DARCY. I cannot say at this time whether the agencies' interpretations of the term "waters of the U.S." have been overly broad or narrow. If confirmed, I will be looking to see exactly what the Clean Water Act and relevant court decisions say with respect to this question. I will then review the Corps' existing regulations to ensure that the Corps is applying the law and regulations appropriately, as influenced by court decisions.

31. Senator INHOFE. Ms. Darcy, can you please provide examples of waters that are not currently considered jurisdictional waters of the United States, but that you believe should be jurisdictional and vice versa?

Ms. DARCY. I cannot provide you with a definitive response to this question at this time. While I am familiar with the term "waters of the U.S.," and how it is applied, I do not at this time have a full understanding of what waters, by type or other descriptor, the Corps considers jurisdictional or not. If confirmed, I will explore this

very important question. Not only would I be interested in fully understanding the jurisdictional status of various waters, but I would want to learn how consistently the Corps applies or doesn't apply jurisdiction across the country.

32. Senator INHOFE. Ms. Darcy, what is your opinion of the Clean Water Restoration Act, as introduced earlier this month by Senator Feingold?

Ms. DARCY. I am aware of the Clean Water Restoration Act introduced earlier this year by Senator Feingold. However I have not yet formulated an opinion on the bill, nor do I yet fully understand its implications for the Section 404 Regulatory Program. If confirmed, I will make it a priority to study that bill and any other legislation relevant to the Corps' mission, and work with you and the Corps to understand the implications.

33. Senator INHOFE. Ms. Darcy, the significant nexus test has been criticized for leading to arbitrary applications and uncertainty within industry regarding what waters are, and are not, considered waters of the United States. Do you agree or disagree?

Ms. DARCY. As I understand it, the Supreme Court did not provide a definition of the term "significant nexus", nor did the Court explain exactly how such a test might be conducted. The decision only made mention of certain waters having a significant nexus with traditionally navigable waters. This state of play is posing challenges for both the Corps and the regulated community. I believe that the Corps has worked hard to figure out exactly what the term means and how to operationalize it in the field. If confirmed, I will take a hard look at how significant nexus determinations are being made, talk to industry and the public, and work to clarify how jurisdictional determinations are made.

34. Senator INHOFE. Ms. Darcy, how would you, as Assistant Secretary of the Army for Civil Works, seek to bring more certainty to industry regarding where Clean Water Act regulation applies?

Ms. DARCY. If confirmed, I would meet with industry representatives and other stakeholders to learn first hand what are the issues and concerns. I would work within the administration to look at legislative and policy guidance options for addressing certainty issues. Certainty is important to industry for many obvious reasons, but it is also important to the Corps Regulatory Program because clear, transparent, predictable, and science-based regulatory processes and decisions are fair, efficient, and effective in protecting the aquatic environment while allowing important economic development activities to move forward.

35. Senator INHOFE. Ms. Darcy, will you commit to working with my staff in finding ways to improve certainty and increase permitting efficiency?

Ms. DARCY. If confirmed, I am committed to working with you and your staff to review to address jurisdictional, regulatory certainty, and permitting efficiency issues.

36. Senator INHOFE. Ms. Darcy, what is your understanding of the shared role of the EPA and the Army Corps of Engineers in implementing the Clean Water Act?

Ms. DARCY. My experience working for the Senate EPW Committee has afforded me insight into how the Corps and EPA share Clean Water Act responsibility. The Act clearly gives both agencies specific roles and responsibilities, with EPA being responsible for most of the act and the Corps responsible for Section 404 permitting.

37. Senator INHOFE. Ms. Darcy, do you intend to seek to modify the shared responsibilities?

Ms. DARCY. If confirmed, I would support continued cooperation between the agencies, but at this time have no plans for seeking to modify the sharing of responsibilities.

38. Senator INHOFE. Ms. Darcy, do you intend to coordinate with other agencies in implementing the Clean Water Act?

Ms. DARCY. Absolutely. The responsibility for implementing the Clean Water Act is shared by the EPA and Army Civil Works, acting through the Corps of Engineers. In addition, the Departments of the Interior and Commerce have important roles in providing comments, advice, and recommendations for fish and wildlife species, and their habitat. I also believe that coordination with the Department of Agriculture will be important because the NRCS is involved in wetlands work and determinations under Swampbuster legislation, and the Department of Transportation

where the Corps and transportation agencies have developed procedures to integrate NEPA and Section 404 actions.

COAL MINING PERMITS

39. Senator INHOFE. Ms. Darcy, I am sure you are aware of current backlogs of section 404 permits for coal mining, primarily the Huntington and Louisville Corps District Offices. These permits are critical to the continuation of existing mines and for new and expanding mines that will create or maintain thousands of high paying jobs in these regions. Many of the permits have been pending for 2 or 3 years—what will you do to address the backlogs?

Ms. DARCY. The efficient processing section 404 permits is important to the Nation, our economic recovery and health, and for achieving CWA environmental protection objectives. If confirmed, I will make the Section 404 Regulatory Program a priority, and work with the Corps and Congress to address issues like permitting efficiency, backlogs, staffing, and funding for all permits under the Section 404 Regulatory Program.

40. Senator INHOFE. Ms. Darcy, the U.S. Court of Appeals for the Fourth Circuit recently issued a decision that in large part validates the Corps' process for reviewing and issuing permits authorizing discharges to waters associated with coal mining operations—yet, the EPA is advocating the need for a much stronger role in Corps Section 404 permit decisionmaking process for coal operations. This can cause duplication, delay, and increasing uncertainty in the program. What will you do to ensure the Corps maintains the ability to exercise its independent and primary decisionmaking authority as Congress intended?

Ms. DARCY. While I am familiar with the 4th Circuit's decision, I have only limited knowledge as to how the decision is being interpreted by the Corps or EPA. If confirmed, I will examine how the Corps is executing its responsibilities regarding the Section 404 permit decisions for coal operations to ensure we are carrying out the law.

41. Senator INHOFE. Ms. Darcy, what will you do to ensure those of us that believe the Corps is doing a good job of performing environmental review of these permits, as recognized by the courts, that the flow of permits will no longer be unnecessarily delayed by the EPA re-review process?

Ms. DARCY. If confirmed, I will look into issues regarding permit processing times and procedures, and also coordination requirements, with a view to having the Corps Regulatory Program be as efficient as practicable. I do not have any information regarding EPA wanting to re-review Corps permits. I will have to look into this issue and provide you with a response in the future, should I be confirmed.

42. Senator INHOFE. Ms. Darcy, I believe that there are individuals in the EPA that would like to see coal removed from our energy portfolio. I know you have no direct role in the EPA deliberations but you will have a consultative role, at least given your responsibilities to administer the Clean Water Act Section 404 permit program. What are your views on our continued use of coal and more specifically, what are your views on the current methods used to extract coal?

Ms. DARCY. I am aware that there are issues regarding the use of coal and the methods by which it is mined. If confirmed, I will be briefed by the Army General Counsel, by my staff, and by the Corps and consult with officials from the Department of the Interior and the Office of Surface Mining before I could comment on these important questions.

[The nomination reference of Jo-Ellen Darcy follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
April 2, 2009.

Ordered. That the following nomination be referred to the Committee on Armed Services:

Jo-Ellen Darcy, of Maryland, to be an Assistant Secretary of the Army, vice John Paul Woodley, Jr.

[The biographical sketch of Jo-Ellen Darcy, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF JO-ELLEN DARCY

Jo-Ellen Darcy is the Senior Environmental Advisor to the Senate Finance Committee responsible for environment, conservation, and energy issues. Previously, she was Senior Policy Advisor to the Senate Environment and Public Works (EPW) Committee, Democratic staff, concentrating on fish and wildlife issues, the Army Corps of Engineers, nominations, and a variety of conservation and water issues. At the start of the 107th Congress, she was the Deputy Staff Director for the EPW Committee. From 1993 through 2000, she served as a professional staff member on the EPW Committee, working on a variety of issues, including the Safe Drinking Water Act, Army Corps of Engineers programs, Federal Emergency Management Agency, Everglades Restoration, and the Clean Water Act.

Before joining the EPW Committee, Jo-Ellen worked on the Clinton campaign in 1992, and was a legislative representative for the Investment Company Institute. She worked on water resources issues for Governor Jim Blanchard of Michigan in both Lansing and Washington, DC. Previously, she worked for the Subcommittee on Economic Stabilization of the House Banking Committee and was an elementary school teacher.

She hails from Fitchburg, MA, and has a B.A. in philosophy and sociology from Boston College and a M.S. in resource development from Michigan State University.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Jo-Ellen Darcy in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Jo-Ellen Darcy.
2. **Position to which nominated:**
Assistant Secretary of the Army for Civil Works.
3. **Date of nomination:**
April 3, 2009.
4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. Date and place of birth:

July 11, 1951; Fitchburg, MA.

6. Marital Status: (Include maiden name of wife or husband's name.)

Single.

7. Names and ages of children:

None.

8. Education: List secondary and higher education institutions, dates attended, degree received, and date degree granted.

Fitchburg High School, Fitchburg, MA; 1966–1969; diploma received: 1969.

Boston College, Chestnut Hill, MA; 1969–1973; graduated Cum Laude with a Bachelor of Arts degree in Philosophy and Sociology, 1973.

Michigan State University, East Lansing, MI; 1983–1984; Master of Science in Natural Resource Development received 1987.

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Senior Environmental Advisor, Committee on Finance, U.S. Senate, Washington, DC; 2007–present.

Senior Policy Advisor, Committee on Environment and Public Works, U.S. Senate, Washington, DC; 2001–2006.

Deputy Staff Director, Committee on Environment and Public Works, U.S. Senate, Washington, DC; 2001.

Professional Staff, Committee on Environment and Public Works, U.S. Senate, Washington, DC; 1993–2001.

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

None.

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

None.

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

Member, Democratic National Committee.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

\$400, Obama, 2008.

14. Honors and awards: List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Department of the Army Commander's Award for Public Service, 2001.

15. Published writings: List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

None.

16. Speeches: Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

None.

17. Commitment to testify before Senate committees: Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

JO-ELLEN DARCY.

This 16th day of April, 2009.

[The nomination of Jo-Ellen Darcy was reported to the Senate by Chairman Levin on May 6, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on August 7, 2009.]

[Prepared questions submitted to Dr. Inés Triay by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DUTIES

Question. What is your understanding of the duties and functions of the Assistant Secretary of Energy for Environmental Management?

Answer. The duties and functions of the Assistant Secretary of Environmental Management (EM) include providing leadership, management, and oversight of cleanup activities at Department of Energy (DOE or Department) sites across the country. EM is responsible for the risk reduction and cleanup of the environmental legacy of the U.S. nuclear weapons production, and is the largest and most technically complex environmental cleanup program in the world. The Assistant Secretary directs the EM program and establishes the vision of the environmental cleanup; is externally focused and responsible for representing the program to Congress, the tribal nations, the States, regulatory, oversight, and advisory organizations, the media, and other stakeholders. The Assistant Secretary is the chief executive of the Environmental Management program, and in that capacity is responsible for assuring that the corporate strategies of the Department for the environmental cleanup are effectively implemented by the Federal and contractor workforce. The Assistant Secretary is also responsible for assuring that the projects in the EM portfolio are delivered on schedule and within cost; the overall program is managed in an efficient and effective manner; and all EM activities are conducted in a safe, secure, and compliant manner.

Question. Assuming you are confirmed, what duties and functions do you expect that Secretary Chu would prescribe for you?

Answer. I expect to be asked to carry out those duties and functions outlined above.

QUALIFICATIONS

Question. What qualifications and experience do you have that would qualify you to perform the duties of the Assistant Secretary of Energy for Environmental Management?

Answer. I have a thorough understanding of the complexity and magnitude of the task that we face in the Environmental Management (EM) program. My formal training is as a physical chemist with a doctorate from the University of Miami, FL. I worked at Los Alamos National Laboratory for 14 years in progressively more responsible positions, from Postdoctoral Researcher to Group Leader in the Isotope and Nuclear Chemistry Division, to Acting Deputy Director of the Chemical Science and Technology Division. While at Los Alamos, I focused on the study of the same nuclear isotopes we are concerned with in the cleanup program today.

In April 1999, former Energy Secretary Bill Richardson named me as Manager of the Department’s Carlsbad Field Office in New Mexico. There, I was responsible for the Waste Isolation Pilot Plant (WIPP), the Nation’s only deep geologic repository for the disposal of transuranic waste. I am most proud of the fact that during

my tenure, I led the engineering of the transuranic waste complex from its inception of 1 or 2 shipments to WIPP per week, to full operations at 25 shipments per week.

In January 2004, I was named the Deputy Chief Operating Officer for Environmental Management, and in May 2005, I assumed the position of Chief Operating Officer. Under my leadership in these positions, the EM program completed the cleanup of the former Rocky Flats nuclear weapons site in Colorado and the former Fernald uranium processing plant in Ohio. I played a leadership role in the commencement of remote-handled transuranic waste disposal operations at the WIPP in New Mexico.

In October 2007, I was named Principal Deputy Assistant Secretary for the EM program, and since November 2008, I have been the acting Assistant Secretary for Environmental Management. To summarize, I have extensive experience as a field and laboratory researcher, as a contractor operations manager, as a DOE field operations manager, and as a senior member of the EM headquarters team. I have worked diligently with our stakeholders and regulators at the local and at the national level, and I have had the opportunity to work closely with Members of Congress and their staffs as well. I have witnessed every function that we perform in the program on a first hand basis and I have dedicated my life to the successful cleanup of the environmental legacy of the Cold War nuclear production.

MAJOR CHALLENGES

Question. In your view, what are the major challenges confronting the Assistant Secretary of Energy for Environmental Management and the Environmental Management program?

Answer. The major challenges facing the new Assistant Secretary and the Environmental Management (EM) program are:

- (1) Ensuring the completion of the EM projects on schedule and within costs, with emphasis on our first-of-a-kind construction projects to address highly-radioactive waste in underground tanks; and
- (2) Delivering better value to the American taxpayer through decreasing the projected life-cycle cost of conducting the EM cleanup.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. The Environmental Management (EM) program must strengthen the Federal and contractor project management capability and improve the skill set of the project management teams. Aggressive efforts are underway in EM, in partnership with the U.S. Army Corps of Engineers, to identify and implement the necessary enhancements in personnel capabilities and systems to transform EM into a "best-in-class" project management organization. EM is also developing and implementing processes and procedures for quality assurance and for identifying and managing project risks.

If confirmed, under my leadership, EM will identify and minimize the programmatic risks associated with start of construction during the early stages of the design phase. EM is incorporating technology readiness assessment and maturity planning into construction and cleanup projects at all stages, along with DOE Standard 1189, Integration of Safety into the Design Process, which requires safety to be integrated early in the design phases of projects.

In addition, if confirmed, I intend to look within the Department to the Office of Science, which has had an excellent record of completing their construction projects on time and within cost. The Secretary has made their lead project management expert available to advise us, and we have developed a review process modeled after the DOE Office of Science project reviews, tailored for the EM projects. These construction project reviews determine if project performance is consistent with agreed upon mission and project requirements; has reached the appropriate level of maturity; and can be completed successfully as planned, budgeted, and scheduled. These reviews are scheduled approximately every 6 months, and are intended to reduce the risk of project failure by identifying existing and potential problems in a timely manner so that adequate resolution is possible.

These independent reviews will examine in detail all aspects of a construction project, including: project management; technology, design, and engineering; safety; environmental compliance; security; and quality assurance. The process will rely on expert knowledge and experience of world-class engineers, scientists, and managers sourced from Federal staff, DOE contractors, engineering firms, national laboratories, and the academic community.

The Government Accountability Office (GAO) continues to include DOE contract and project management on its list of government programs at high risk, the GAO believes "that DOE as a whole has met three of the five criteria necessary for re-

removal from the high risk list.” The two criteria that remain before we can be removed entirely from the list require having the capacity (people and resources) to resolve the problems, as well as monitoring and independently validating the effectiveness and sustainability of corrective measures. I am committed to completing the actions in DOE’s Corrective Action Plan, which will address these two criteria. If I am confirmed, my personal goal will be to see that we are removed from the GAO high-risk list during my tenure.

We have taken a number of other specific steps to ensure superior project performance:

- Initiated a thorough review of the contract type and fee structure for all construction projects in order to ensure that the contract type and fee structure will result in maximizing improved performance in the EM projects.
- Required the parent companies carrying out the major EM projects (including all construction projects) to justify and improve the composition of the contractor management teams in charge of executing the EM projects.
- Increased the EM on-board count during the past 2 years by approximately 300 Federal employees (from 1370 to 1680) in the areas of project and contract management, safety, engineering, and quality assurance. The EM program is poised to increase its Federal staff to 1,800 to further strengthen our oversight capability. While EM hires Federal personnel, continued use of staff augmentation through the U.S. Army Corps of Engineers will be employed to fill the gaps.
- Established an Office of Quality Assurance at Headquarters, and required Federal and contractor quality assurance professionals at every field site. This is needed to assure quality is incorporated into EM projects, thus avoiding cost increases and schedule delays. Federal quality assurance resources now account for almost 6 percent of the total number of EM employees, which is within the industry range of 4 to 7 percent.
- Continued training sessions and supplier workshops attended by hundreds of large and small businesses alike, in order to increase the cadre of suppliers qualified to the high standards of nuclear quality assurance.
- Implemented the Department of Defense and National Aeronautics and Space Administration Technology Readiness Levels to judge the relative maturity of new technologies prior to approving full-scale development.
- Established a cost-estimating group at the EM Consolidated Business Center, in order to improve the quality of the EM program’s independent government estimates for construction and cleanup projects.
- Initiated the process of implementing a project management software tool to further increase transparency of the health of EM projects not only to EM management but also to the DOE’s Office of Engineering and Construction Management.
- Increased the frequency of the EM headquarters and field project management reviews from quarterly to monthly to increase management attention and accountability at all levels. These reviews are attended regularly by DOE’s Office of Engineering and Construction Management and often times by the Office of Management and Budget.

We will address life-cycle costs by continuing our strategic planning efforts to identify and evaluate alternative approaches for radioactive waste in tanks, spent nuclear fuel, and special nuclear materials. Strategic planning efforts are underway in these areas that have the highest overall life-cycle costs of the program. We are looking for both incremental improvements to optimize waste operations, and transformational approaches, which could involve alternate technologies and other approaches.

Coincident with these planning efforts, we are also proposing to focus additional resources towards technology development, particularly for tank waste and groundwater remediation. We are looking to make investments in new technologies and computer modeling.

In summary, if confirmed, I will assure that EM uses science and technology, robust project management, and our intergovernmental partnerships to reduce the cost and schedule of the program.

MANAGEMENT ISSUES

Question. The Assistant Secretary for Environmental Management is responsible for cleanup activities occurring at Department of Energy (DOE) sites across the country.

What are your views on the roles and responsibilities of field managers relative to those of Environmental Management (EM) headquarters managers?

Answer. The roles and responsibilities of field managers include the management and direction of the safe, secure, compliant, and effective execution of the Environmental Management (EM) projects. The field managers and the field staff manage the contracts and oversee the contractors' performance in order to deliver the EM projects on time and within cost. The roles and responsibilities of EM headquarters managers include overseeing the performance of the field sites as well as policy development, budget formulation, and addressing the field offices' needs in order to accomplish the objectives of the EM mission.

Question. What is your view of EM's organizational structure? Is there a well-delineated and consistent chain of command and reporting structure from the field staff to headquarters staff, from the contractors to DOE officials, and from the Office of Environmental Management to the Secretary of Energy and other DOE officials?

Answer. I believe that our current chain of command and reporting structure are adequate to perform the EM program mission. Improving the efficiency of EM is always of critical importance. The National Academy of Public Administration (NAPA) completed a detailed review of several aspects of the EM program between April 2006 and December 2007. One area that was carefully analyzed was organizational efficiency. NAPA provided 20 recommendations in this area and EM implemented 18 of them. However the former Assistant Secretary for EM deferred implementation of the remaining two: establishment of a Chief Business Officer position and realignment of two Deputy Assistant Secretary offices between the Chief Business Office and the Chief Operations Office. I believe that these recommendations have merit and I will carefully review those recommendations to identify improved organizational efficiency.

Question. Do the field offices have enough autonomy and flexibility to work with the contractors at the sites to get the cleanup finished in a safe and efficient manner?

Answer. It is my philosophy to delegate as much authority as possible and appropriate to the field offices and their managers. If the field managers had more authority than they do now, the EM program might be more efficient.

Question. In your opinion, should the field offices have more autonomy than they currently have?

Answer. Yes. The additional authority would come with the responsibility to deliver excellent performance. Performance is measured by the results obtained, and the manner in which they are achieved. Therefore, we will be seeking to align authority with performance at each site to deliver projects on time and within cost.

Question. The EM program has used a variety of contracting methods, including management and operating contracts, cost plus award fee contracts, cost plus incentive fee contracts, performance-based, fixed-priced contracts, and closure contracts, among others.

What is your view of the utility and appropriate role of these, or other, contracting methods, and what principles do you believe DOE should follow when entering into EM contracts in the future?

Answer. Each contracting method has a "sweet-spot" for its application. During the acquisition planning phase, there is continuing improvement to appropriately match the type of work and program requirements with the contract approach. For the following types of EM work, the successful contract approaches generally are:

(1) Cleanup Work

- For well defined and repetitious activities—fixed unit rate contracts are optimal (for instance, mill tailing relocations at past closure sites such as Grand Junction and Monticello);
- For work with relatively high confidence in the scope definition, clear end-state, most regulatory decisions have been made, stable and predictable funding, and it will take 5 to 7 years to complete—closure or completion contracts, which are typically cost plus incentive fee contracts are optimal (for instance, Rocky Flats, Mound, and Fernald);
- For work with relatively high confidence in the scope definition, discrete portions with clear end-states, regulatory decisions have been made, fluctuating funding, and 10 years or less to complete cleanup—the optimal contract type is cost plus incentive fee (for instance, Hanford River Corridor and Idaho Cleanup);
- For work with various levels of scope definition, discrete portions have clear end-states and regulatory decisions made, fluctuating funding and more than 10 years to complete—the successful contracts are cost plus award fee contracts with performance-based incentives (for instance, main site cleanup contracts, such as Hanford, Oak Ridge; operations of individual

processing facilities, such as Idaho Advanced Mixed Waste Treatment and Oak Ridge Transuranic Waste facilities); and

- For work with continual operations of nuclear facilities and disposal facilities for more than 10 years—the successful contracts are management and operating contracts (Savannah River Site and Carlsbad).

(2) *Construction Projects*

- For storage of high-level waste or spent nuclear fuel canisters, storage approach used in previous applications, minimal technology issues, typically \$100–200 million or less, and 3 years or less to completion—the optimal contract type is fixed price (for instance, Savannah River Site Glass Storage Facility, Hanford Spent Nuclear Fuel Storage Facility);
- For packaging or disposal of low-level or transuranic waste, well-understood technology, technology used in previous applications, typically \$100–200 million but could be up to \$500 million, and 4 to 7 years to completion—the optimal contracts are fixed unit rate contracts (Oak Ridge Disposal Cell, Idaho Advanced Mixed Waste Treatment Project, WIPP Transportation, Oak Ridge Transuranic Waste Treatment Project); and
- For treating and stabilizing high-level waste or complex low-level waste, first of a kind technology, significant technical issues, nuclear facilities, \$500 million and greater, 5 years and greater to completion—the successful contracts are cost plus award fee contracts with multiple incentives, such as performance-based incentives, award fee, operational fee, and schedule fee.

MISSION

Question. DOE has offered changing views, over the lifetime of the EM program, as to whether the program should focus on cleaning up the sites within its purview as of a date certain or whether the program should have an ongoing mission of cleaning up all surplus DOE facilities, as the facilities become excess, over time.

Do you believe there is a point at which the EM program should stop taking surplus buildings, facilities, or waste streams from other components of the DOE into the EM program for decommissioning, decontamination, and disposal?

Answer. No. I don't believe that the EM program should cease accepting surplus facilities from other DOE programs, but continue to accept them. From a technical standpoint, placing DOE's excess facilities under EM makes business sense because EM possesses both the experience and expertise to move these assets to ultimate disposition or demolition, more so than other DOE programs. There is a consensus within DOE that placing all surplus assets under the purview of one program leads to management efficiencies and produces long-term cost savings. Finally, by continuing the transfer of surplus assets to EM, the decontamination and demolition of excess facilities will result in the reduction of the legacy footprint. This allows other DOE programs to expand their current missions or launch important new ones, such as those in science, energy, and national security, or use the lands for beneficial reuse.

Question. If confirmed, what requirements would you place on the other DOE programs before you would take additional buildings, facilities or waste into the EM program?

Answer. The EM program does have existing stringent requirements it applies to surplus assets, prior to accepting them from other DOE programs. These established criteria, based on formal DOE orders and technical policies for facilities and wastes, are applied to each individual asset nominated for transfer to EM. Furthermore, in concert with the criteria, EM implements a rigorous in-person assessment process, in which EM technical experts walk down and inspect nominated assets to determine if they meet the transfer criteria. This process ensures that any asset deemed surplus by other DOE programs is truly "transfer ready," and complies with EM's standards for acceptance.

Question. Do you believe it is an appropriate policy for the EM program to "go out of business" at some point and leave the remainder of newly-generated waste as the responsibility of existing DOE programs? If not, in your view, how should newly-generated wastes be managed and which program (EM or the program generating the waste) should budget for these activities?

Answer. I believe that it is appropriate for the generating programs to be responsible for and budget for newly-generated waste. Currently, the Department's policy is that EM is responsible for the final disposition of legacy waste, while requiring landlord programs to manage newly-generated waste at their sites. However, in specific instances when EM is recognized as having unique experience and expertise

with certain waste types such as transuranic waste, exceptions may be necessary on a case-by-case basis. Newly-generated waste responsibility was transferred to landlord programs in order to encourage waste minimization and proper “ownership” for wastes. I believe this is a good concept.

Question. Do you believe that making the program responsible for newly-generated waste would incentivize the program to minimize the amount of waste created or, conversely, would it result in the program storing waste, perhaps indefinitely?

Answer. EM and the rest of the Department comply with DOE Order 435.1, Radioactive Waste Management, which defines the requirements for the management and minimization of radioactive waste within DOE. The Order provides specific requirements for the management and timely disposition of each radioactive waste type, such as high-level waste, transuranic waste, low-level waste, and mixed wastes. The Order also defines the responsibilities of each headquarters element, particularly those programs that generate these waste types as part of their operations mission.

Question. In drafting the National Defense Authorization Act for Fiscal Year 2006, this committee did not adopt the proposal in the President’s budget request to transfer certain activities from the EM program into the National Nuclear Security Administration (NNSA).

To your knowledge, are there any plans to make a similar proposal in the fiscal year 2010 budget request?

Answer. There are no plans to make a similar proposal in the fiscal year 2010 budget request.

Question. The EM program demonstrated that accelerating cleanup at specific sites could result in a more cost effective approach to cleanup over the long term. After the Rocky Flats and the Fernald Sites were completed, the accelerated approach was abandoned.

If confirmed would you look at renewing an accelerated approach for specific sites if significant long-term cost savings could be achieved?

Answer. Over the past year and a half, the EM program has conducted strategic planning analysis, which indicates that substantial benefit in terms of life cycle cost savings and cleanup completion can be achieved with additional investments in the areas of decontamination and decommissioning of facilities, remediation of contaminated soils and groundwater, and disposition of solid waste (low-level and transuranic) to achieve footprint reduction. These results were discussed in the EM progress report that the National Defense Authorization Act for Fiscal Year 2008 required, and was submitted to Congress in January 2009.

We are renewing the accelerated approach with implementation of the footprint reduction initiative with the \$6 billion from the American Recovery and Reinvestment Act of 2009 (Recovery Act).

Question. Do you believe this promise of accelerated cleanup has yet been realized, and if not, why not?

Answer. We are renewing the accelerated approach with the Recovery Act funding. Our strategic planning analysis was based on achieving a 90 percent footprint reduction by 2015. The Recovery Act funding will allow 40–50 percent footprint reduction by 2011, and will go a long way in achieving this goal.

END STATES

Question. A previous Assistant Secretary sought to develop “end states” documents for each major site in the EM program depicting the residual contamination levels remaining at each site after the completion of cleanup.

What is the status of these “end states” for each major site?

Answer. The end-state documents were intended as a tool to help focus discussions with the Department’s regulators and stakeholders on the likely future land uses of contaminated lands as a means to facilitate the early identification of remedial action objectives and appropriate response actions. The Department’s field office personnel, the U.S. Environmental Protection Agency, and State regulators have incorporated these end-state documents in their discussions and negotiations.

Question. If confirmed, would you continue efforts to reach an agreed upon “end state” with the State and Federal environmental regulators at each site, or in your view is there a different way to approach the issue of what is clean enough?

Answer. The Department will continue to work with our regulators on identifying and attaining, whenever possible, those land uses and end states we agree represent both a desirable and viable outcome. We are doing this, and will continue to do so, in accordance with the applicable Federal and State requirements governing our

cleanup activities. This process ultimately determines the scope of the cleanup and viable future land uses, and therefore is critical to our mission.

TECHNOLOGY DEVELOPMENT

Question. Do you believe that the EM program has conducted sufficient technology development so that a treatment and disposition pathway exists for all identified waste streams under the program?

Answer. The treatment and disposal of DOE low-level and mixed low-level waste is not dependent on additional technology development. While there may be small volumes of challenging waste streams identified through future cleanup activities, it is expected that existing technologies will enable treatment and disposal of the remaining waste.

Currently, we do not foresee any technology development necessary to support disposal of transuranic wastes. While there are some innovative packaging and characterization techniques that still require regulatory approval prior to implementation, the research and development of these techniques have been completed, and is now being demonstrated through the regulatory process.

In the area of highly-radioactive waste in underground tanks retrieval and processing, there continues to be technology development needs, and they have been identified and planned within the EM program's Engineering and Technology Roadmap.

Question. If any orphan waste streams—those for which there is no identified disposition pathway—exist within the EM program, what technology development or other efforts would you undertake, if confirmed, to address them?

Answer. The orphan waste streams challenges that currently exist within EM are programmatic in nature. For example, EM has a small quantity of low-level and transuranic waste (greater-than-Class C low-level waste), which does not meet the current waste acceptance criteria for existing disposal facilities. EM needs to complete the process for siting a facility for greater-than-Class C low-level waste, which could accommodate those particular wastes.

Question. What, in your view, are the continuing requirements for developing and fielding new technologies, and what are the highest priorities?

Answer. Continuing technology development and deployment is a key element of the EM program's strategy to reduce the technical risk and uncertainty of EM projects. The highest priority for EM is to develop new technologies for tank waste systems and for groundwater remediation.

Tank waste is by far the Department of Energy's most significant environmental, safety, and health risk. EM plans to retrieve this highly-radioactive waste from storage tanks and convert it into stable waste forms (such as glass) using treatment facilities. Because of the unique and hazardous nature of this radioactive waste, new technologies are needed to:

- (1) Retrieve waste to the maximum extent possible in an efficient manner;
- (2) Improve glass formulations that can increase the amount of waste in each glass canister, which will reduce operating costs;
- (3) Improve glass melters which will increase production throughput and decrease costs; and
- (4) Improve processes to remove non-radioactive components, such as aluminum, from the tank waste in order to increase glass waste loading and production throughput.

Innovative groundwater remediation technologies are also needed to:

- (1) Treat subsurface contamination through bioremediation or reactive sorptive barriers that can be more effective and efficient than current methods, and
- (2) More effectively predict contaminant migration resulting in better remediation methods.

The National Academy of Sciences supports a significant and ongoing research and development program, as delineated in the EM program's Engineering and Technology Roadmap to address these unique technical challenges.

WORKFORCE RESTRUCTURING

Question. If confirmed, your duties could involve the review and approval of workforce restructuring plans at sites under the EM program.

Please describe your general approach and philosophy in reviewing workforce restructuring plans.

Answer. The EM program complies with DOE Order 350.1, Contractor Human Resource Management Programs, as well as all other applicable requirements, and we direct our contractors to do the same as they plan and execute workforce restructuring actions.

Question. Given the nature of their work, cleanup workers are fundamentally in a position of “working themselves out of a job.”

How do you believe this particular challenge is best handled from both a corporate perspective and as a manager of these workers?

Answer. At most of our remaining sites, the cleanup mission has many more years until completion. To manage work effectively at our sites, there is a broad life-cycle to perform characterization, plan, decontaminate and decommission, and then beneficially re-use. We need workers with different skills and specializations at each phase of that life-cycle. The specialized skills and certifications our workers acquire doing EM work is highly marketable.

The Department of Energy resources, in partnership with tribal nations, the States, industry and other regional stakeholders, can be leveraged for beneficial reuse at our sites. As part of DOE’s footprint reduction effort, designated tracts of land would be transferred to other government programs, communities, or the private sector for rapid development of large scale facilities for any number of uses. The outcomes of transforming the Department’s sites for beneficial reuse could include: (1) industrial uses sited on “brownfields” with existing infrastructure and a trained workforce; (2) transition of the current workforce and recruit the future workforce to take advantage of the wealth of technical knowledge and operational experience; and (3) potential to create new jobs for the long term.

WASTE INCIDENTAL TO REPROCESSING (WIR)

Question. One of the biggest challenges of the EM program is emptying the large tanks of highly radioactive waste that exist at defense nuclear sites in South Carolina, Washington, and Idaho. In the National Defense Authorization Act for Fiscal Year 2005, Congress granted DOE, in consultation with the Nuclear Regulatory Commission (NRC), the authority to determine that portions of this waste are not high level radioactive waste and thus DOE may leave residue that meets the requirements of the provision at the bottom of the tanks in South Carolina and Idaho after these tanks are otherwise emptied.

How is DOE using this new authority?

Answer. The Department has used this authority successfully at both the Savannah River Site and at the Idaho National Laboratory. At Savannah River Site, we use that authority to dispose of the low-activity fraction of tank waste in onsite “saltstone” vaults, which is facilitating the emptying of the highly-radioactive waste tanks. Savannah River Site is in the process of removing residuals from several tanks, and is working closely with Nuclear Regulatory Commission (NRC), the State, and the U.S. Environmental Protection Agency, using the 2005 National Defense Authorization Act (NDAA) authority, to ultimately close these and the other highly-radioactive waste tanks. At Idaho, in November 2006, the former Secretary of Energy determined that the residual wastes in the 15 tanks were no longer high-level waste, and 11 of those tanks were filled with cement. In undertaking these actions, the Department consulted with the NRC, in accordance with the 2005 NDAA authority, and will continue to do so in the future.

Question. If confirmed will you ensure that the NRC has full access to documents and information at these sites that the NRC determines is needed to allow them to conduct their responsibilities?

Answer. Yes. The NRC has had, and will continue to have full access to documents and information at these sites that the NRC determines is needed to allow them to conduct their responsibilities.

WASTE DISPOSAL

Question. Completion of cleanup at a number of EM sites depends on the timely shipment of quantities of transuranic waste to the Waste Isolation Pilot Plant (WIPP) in New Mexico for disposal. In some cases, DOE is under regulatory deadlines for completing shipments to WIPP.

What regulatory deadlines do the EM program currently face related to WIPP shipments and what is the current progress against those deadlines?

Answer. At the Idaho National Laboratory, the Idaho Settlement Agreement (Settlement Agreement) requires DOE to maintain a running average of 2,000 m3 of transuranic (TRU) waste shipped offsite yearly. DOE is well ahead of this milestone. The Settlement Agreement also includes milestones for completing shipment of 65,000 m3 TRU (target completion date of 12/31/2015, but no later than 12/31/2018).

DOE is on track to complete this milestone ahead of schedule. The Idaho Site Treatment Plan requires a more aggressive shipping rate of 4,500 m³ of TRU per year. DOE continues to ship TRU waste from Idaho at a rate that exceeds this requirement.

At Oak Ridge, the Site Treatment Plan defines specific volume goals for contact handled (CH) and remote handled (RH) TRU waste each year. While DOE has met its CH milestones to date and met the first RH milestone for start of RH shipments, DOE recently requested an extension to the 4/30/2009 milestone to have processed 35 m³ of RH TRU waste. This extension was required due to unexpected technical issues encountered during waste processing (water was found to be present in many of the TRU canisters retrieved for processing and shipping). DOE anticipates that these issues will be addressed and future milestones will be met.

At Nevada, the Site Treatment Plan requires the completion of the legacy TRU project by the end of April 2009. DOE is on track to meet this milestone. Three shipments remain to be completed and are scheduled to occur before 4/30/2009.

At Los Alamos, the Consent Order requires the cleanup of Area G to be completed by the end of 2015. While there are no specific deadlines related to shipment of TRU, the TRU within Area G must be processed and shipped offsite in time to support Area G closure in 2015.

Regarding Hanford, DOE and the regulators have reached agreement on revised milestones for TRU waste in the Tri-Party Agreement. These milestone revisions are currently out for public review.

Question. Are you aware of any issues that jeopardize DOE's ability to meet these deadlines? If so, what is DOE doing to address these issues?

Answer. We are not aware of any specific issues at this time. However, given that much of the transuranic waste has been buried for many decades at some of our sites, it is likely that DOE may encounter challenges regarding the condition of the waste as it is retrieved. DOE has carefully developed a detailed waste processing and characterization strategy and is working closely with the regulators.

Question. What, if any, additional permits or permit modifications are needed for WIPP in order to meet these deadlines?

Answer. There are no additional permits or permit changes needed to support these milestones.

WASTE TREATMENT PLANT

Question. Maintaining the steady state funding commitment, not changing requirements, and not changing the design of the facility, are all necessary actions to ensure that the Waste Treatment Plant (WTP) is completed within its current baseline cost and schedule.

If confirmed would you plan to make any changes to WTP funding, requirements, or design?

Answer. The stable funding level of \$690 million a year has provided the WTP project with stability and predictability, which affords the contractor the ability to plan the work, make commitments to subcontractors and suppliers, and minimize turnover of the workforce. The requirements are appropriate to build a functioning plant, although there are still certain opportunities to refine the requirements for a more cost effective plant. There are several technical issues, which are on schedule to be resolved by the end of December 2009, which should permit the finalizing of the design.

ENDURING SITES

Question. Cleanup under the EM program occurs not only at closure sites, but at DOE national laboratories and other sites with ongoing missions. These locations are sometimes distinguished from sites that will be closed by use of the term "enduring sites."

Does the EM program approach cleanup differently at closure sites than at enduring sites?

Answer. No. Cleanup work across the entire complex is conducted in accordance with the applicable requirements from Federal environmental laws, primarily the Comprehensive Environmental Response, Compensation, and Liability Act and the Resource Conservation and Recovery Act. The Department consistently applies these requirements in accordance with site-specific conditions, and has entered into agreements with the States in which cleanup sites are located and the U.S. Environmental Protection Agency to come into compliance with these laws.

Question. How should the EM program best manage the interfaces between its cleanup operations and other ongoing missions at the enduring sites?

Answer. The EM program works closely with senior managers and staff of the landlord programs and those programs' sites in planning for and executing the cleanup. This includes their active involvement in developing scope, cost, and schedule baselines, formulating budgets, and overseeing execution. With these close interactions, the Department can develop an overall approach that appropriately prioritizes cleanup in support of and recognizing the enduring sites' ongoing and future missions.

Question. Does the EM program prioritize work differently at enduring sites, and if so, in what way?

Answer. In planning its program, EM develops an integrated priority list for all its cleanup activities across the entire DOE complex at both closure and enduring sites based on risk categories. These categories, in descending order of risk, are: (1) highly-radioactive liquid waste in underground tanks; (2) nuclear materials (e.g., uranium and plutonium) and spent nuclear fuel; (3) transuranic and low-level radioactive waste; (4) soil and groundwater remediation; and (5) decontamination and decommissioning of surplus contaminated facilities. The EM program overlays site-specific regulatory compliance milestones and the need to support ongoing and future missions at enduring sites to the overall program priorities in order to prioritize its work at each site.

DESIGN BASIS THREAT

Question. Some of the DOE sites including EM sites will not achieve compliance with the current design basis threat and do not plan to achieve compliance.

Given the seriousness of the need to secure nuclear materials, both abroad and at home, do you believe that this is a sufficiently rapid response to the threats currently outlined by the intelligence community and against which DOE has agreed it must defend at its nuclear sites?

Answer. The EM program is in compliance with the Department's 2005 Design Basis Threat (DBT) policy and is transitioning to the requirements of the Graded Safeguards Protection (GSP) policy issued in August 2008. This policy provides a robust framework considering the broad spectrum of threats.

Question. If confirmed, what actions would you undertake to consolidate and more rapidly secure any special nuclear material existing within the EM program?

Answer. The EM program has been aggressively consolidating special nuclear materials and will continue to do so:

- At Savannah River Site, surplus plutonium has been consolidated from Rocky Flats, and will continue to be consolidated from Hanford and the National Nuclear Security Administration sites, such as Lawrence Livermore and Los Alamos National Laboratory.
- At Oak Ridge and Portsmouth, surplus uranium has been consolidated from Rocky Flats and Fernald.
- At Savannah River Site and Idaho, spent nuclear fuel has been consolidated from West Valley, and will continue to be consolidated from U.S. university research reactors, and foreign research reactors.
- At Hanford, onsite spent nuclear fuel has been consolidated into a single location.

Question. Do you agree that, even with a primary focus on accelerating cleanup, it is still an essential responsibility of the EM program to secure these materials against the threats existing now?

Answer. Yes. The EM program is committed to protect its special nuclear materials against the prevailing threat level while expediting the cleanup progress. EM has successfully reduced the number of facilities and sites that possess special nuclear materials from 13 to 2, and will continue to protect these facilities in accordance with DOE policy.

YUCCA MOUNTAIN

Question. In the EM 5-year plan published in early 2007, a number of program-specific uncertainties that could impact the overall cleanup scope, schedule, and cost are identified. Among those uncertainties identified is the possibility of a delay in the availability of Yucca Mountain. EM has indicated that a delay in Yucca Mountain would lead to the delay in site completion and increase storage costs for high-level waste and spent nuclear fuel.

What increases in storage costs for high-level waste and spent nuclear fuel and in the length of the delay can be expected if Yucca Mountain is closed?

Answer. Over the period of the next two decades, the delay in the establishment of a permanent high-level waste repository will in no way impact the current scope, schedule, and cost for treatment and storage of defense spent nuclear fuel and high-

level waste. The Secretary of Energy is in the process of establishing a Blue Ribbon Commission/Panel to provide recommendations to the Department on spent nuclear fuel and high-level waste. The panel needs to provide those recommendations and the Department needs to determine the path forward for that waste prior to being able to assess the length of potential delays or additional storage costs. The EM program manages its life cycle cost in a detailed, rigorous manner and, therefore, will be able to ascertain any impacts of the selected path forward. EM will work diligently with the committee to provide any required information on the impacts to EM's life cycle cost.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes. I agree that, if I am confirmed as Assistant Secretary for Environmental Management, I will appear before this committee and other appropriate committees of Congress.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Assistant Secretary of Energy for Environmental Management?

Answer. Yes. I agree that if I am confirmed, I will appear before this committee or to a designated member of this committee, and provide information subject to appropriate and necessary security protection with respect to my responsibilities as Assistant Secretary of Environmental Management.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes. If confirmed, I agree to ensure that testimony, briefings, and other communications of information will be provided to this committee and its staff and other appropriate committees.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes. If confirmed, I agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or consult with the committee regarding the basis for any good faith delay or denial in providing such documents.

[The nomination reference of Dr. Inés R. Triay follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
March 31, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Inés R. Triay, of New Mexico, to be an Assistant Secretary of Energy (Environmental Management), vice James A. Rispoli, resigned.

[The biographical sketch of Dr. Inés R. Triay which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF DR. INÉS R. TRIAY

Dr. Inés R. Triay is the Principal Deputy Assistant Secretary for the U.S. Department of Energy's Environmental Management Program and has been acting as the Assistant Secretary since November 2008. She has devoted her career to the safe cleanup of the environmental legacy of the Nation's Cold War nuclear weapon production and research activities. This is the largest, most diverse, and technically

complex environmental cleanup program in the world, originally involving more than 100 geographic sites located in more than 30 States.

Prior to her current position, she served as the cleanup program's Chief Operations Officer and Deputy Chief Operations Officer. During her tenure in these positions, the program completed the cleanup of the Department's Rocky Flats site in Colorado and the Fernald site in Ohio. She also played an instrumental role in the commencement of remote-handled transuranic waste disposal operations at the Department's Waste Isolation Pilot Plant in New Mexico.

Prior to her executive positions in Washington, DC, she served as Manager of the Department's Carlsbad Field Office in New Mexico. During her tenure there, the number of transuranic waste shipments to the Waste Isolation Pilot Plant increased from 1 or 2 per week to 25 per week. She also spearheaded a national effort to significantly accelerate cleanup of transuranic waste sites, culminating in a plan that completes the disposal of all legacy transuranic waste about 20 years early. Before managing the Carlsbad Field Office, she spent 14 years at Los Alamos National Laboratory leading efforts in subsurface radionuclide migration, waste characterization and disposal, and environmental remediation.

Her honors include the 2007 Wendell D. Weart Lifetime Achievement Award, the 2007 Presidential Rank Award, the American Society of Mechanical Engineers' 2003 Dixy Lee Ray Award for Environmental Protection, the National Atomic Museum's 2003 National Award of Nuclear Science, and numerous awards from the Department and Los Alamos National Laboratory recognizing her for excellence in performance.

Dr. Triay received her bachelor degree in chemistry, magna cum laude, and her doctorate degree in physical chemistry from the University of Miami in Florida. She is a member of the American Chemical Society and has produced more than 100 papers, reports, and presentations for professional conferences and workshops, as well as major trade publications.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by Dr. Inés R. Triay in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Inés Ramona Triay.

2. **Position to which nominated:**
Assistant Secretary for Environmental Management, U.S. Department of Energy.

3. Date of nomination:

March 31, 2009.

4. Address: (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. Date and place of birth:

January 30, 1958; Havana, Cuba.

6. Marital Status: (Include maiden name of wife or husband's name.)

Married to John Harvey Hall.

7. Names and ages of children:

None.

8. Education: List secondary and higher education institutions, dates attended, degree received, and date degree granted.

University of Miami, Coral Gables, FL; 1976–1985; B.S. Chemistry Major, 1980; Ph.D. in Chemistry, 1985;

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Dates of Employment	Title/Job Description	Employer	City/State
10/2007 to Present ..	Principal Deputy Assistant Secretary for Environmental Management.	U.S. Department of Energy	Washington, DC.
05/2005 to 10/2007	Chief Operating Officer for Environmental Management.	U.S. Department of Energy	Washington, DC.
01/2005 to 05/2005	Acting Carlsbad Field Office Manager.	U.S. Department of Energy	Carlsbad, NM.
01/2004 to 05/2005	Deputy Chief Operating Officer for Environmental Management.	U.S. Department of Energy	Washington, DC.
05/1999 to 01/2004	Carlsbad Field Office Manager Waste Isolation Pilot Plant.	U.S. Department of Energy	Carlsbad, NM.
02/1994 to 05/1999	Group Leader, Chemical Science and Technology Carlsbad Field Office Manager Waste Isolation Pilot Plant.	Los Alamos National Laboratory, University of California.	Los Alamos, NM.
11/1985 to 02/1994	Staff member, Isotope and Nuclear Chemistry Division.	Los Alamos National Laboratory, University of California.	Los Alamos, NM.

10. Government experience: List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed above.

None.

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Member, American Chemical Society (27 years).

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

On March 25, 2007, I made a \$2,300 contribution to New Mexico Governor Bill Richardson while he was running in the Presidential Democratic primary.

On November 16, 2005, I made a \$1,000 contribution to New Mexico Senator Jeff Bingaman (D).

On October 13, 2005, I made a \$500 contribution to New Mexico Senator Pete Domenici (R).

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

2009, Department of Energy Secretary's Achievement Award.

2007, Presidential Rank Award.

2007, Wendell D. Weart Lifetime Achievement Award.

2004, National Award for Nuclear Science from the Einstein Society of the National Atomic Museum.

2003, American Society of Mechanical Engineers Dixy Lee Ray Award for significant achievements and contributions in the field of environmental protection,

2003, Woman of Achievement Award from the Radiochemistry Society.

1999, Albuquerque Operations Office Manager's Performance Excellence Award for "Ship to WIPP."

1998, Los Alamos National Laboratory Distinguished Performance Award for Nonmixed Waste Sampling/Chemical Analysis for Transuranic Waste Characterization/Certification Project.

1997, Los Alamos National Laboratory Outstanding Mentor Award.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

Attached.

[Nominee responded and the information is retained in the committee's executive files.]

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

Attached are the last two presentations that I have given: one in the Energy Communities Alliance Annual Conference (2/12/2009) and the other in the Waste Management Symposium (3/2/2009).

[Nominee responded and the information is retained in the committee's executive files.]

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

INÉS RAMONA TRIAY.

This 7th day of April, 2009.

[The nomination of Dr. Inés R. Triay was reported to the Senate by Chairman Levin on May 6, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on May 20, 2009.]

NOMINATIONS OF ANDREW C. WEBER TO BE ASSISTANT TO THE SECRETARY OF DEFENSE FOR NUCLEAR AND CHEMICAL AND BIOLOGICAL DEFENSE PROGRAMS; DR. PAUL N. STOCKTON TO BE ASSISTANT SECRETARY OF DEFENSE FOR HOMELAND DEFENSE AND AMERICAS' SECURITY AFFAIRS; THOMAS R. LAMONT TO BE ASSISTANT SECRETARY OF THE ARMY FOR MANPOWER AND RESERVE AFFAIRS; AND CHARLES A. BLANCHARD TO BE GENERAL COUNSEL OF THE DEPARTMENT OF THE AIR FORCE

TUESDAY, MAY 12, 2009

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 10:07 a.m. in room SH-216, Hart Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Webb, Hagan, Begich, and McCain.

Other Senators present: Senators Durbin and Lugar.

Also present: Representative Sam Farr.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Joseph M. Bryan, professional staff member; Jonathan D. Clark, counsel; Madelyn R. Creedon, counsel; Richard W. Fieldhouse, professional staff member; Michael J. Kuiken, professional staff member; and Gerald J. Leeling, counsel.

Minority staff members present: Joseph W. Bowab, Republican staff director; Adam J. Barker, professional staff member; Daniel A. Lerner, professional staff member; David M. Morriss, minority counsel; Diana G. Tabler, professional staff member; and Richard F. Walsh, minority counsel.

Staff assistants present: Kevin A. Cronin, Mary C. Holloway, and Jessica L. Kingston.

Committee members' assistants present: Gordon I. Peterson, assistant to Senator Webb; Roger Pena, assistant to Senator Hagan;

Gerald Thomas, assistant to Senator Burris; and Lenwood Landrum and Sandra Luff, assistants to Senator Sessions.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody. Today the committee considers the nominations of Andrew Weber to be Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs; Paul Stockton to be Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs; Thomas Lamont to be Assistant Secretary of the Army for Manpower and Reserve Affairs; and Charles Blanchard to be General Counsel of the Air Force.

We welcome our nominees and their families to today's hearing. Senior Defense Department officials put in long hours every day. We appreciate the sacrifices that our nominees, but frankly even more importantly that their families are willing to make to serve their country.

Each of our nominees has a distinguished background. Mr. Weber spent 24 years in public service, serving most recently as Adviser for Threat Reduction Policy in the Office of the Secretary of Defense, a position in which he has helped to run the Nunn-Lugar Cooperative Threat Reduction Program. Dr. Stockton has been a senior member of the faculty at the Naval Postgraduate School and Stanford University's Center for International Security and Cooperation for almost 20 years. Mr. Lamont served in the Illinois National Guard for over 25 years while working as a partner in two Illinois law firms and holding a succession of positions in State government. Mr. Blanchard served as General Counsel of the Army from 1999 to 2001 before joining the Phoenix office of a major law firm.

If confirmed, our nominees will play a critical role in helping the Department of Defense (DOD) address any number of critical challenges and difficult issues. These challenges range from ensuring that our nuclear stockpile remains safe, secure, and reliable to determining the appropriate role of our Armed Forces in securing the border with Mexico at a time of unprecedented drug violence and a potential pandemic outbreak of swine flu, and from addressing the burdens and stress imposed on our soldiers and their families by repeated deployment in two wars, to ascertaining the appropriate legal status of individuals detained at Guantanamo Bay, Cuba.

We look forward to the testimony of our nominees on these important issues, and I now turn it over to Senator McCain.

STATEMENT OF SENATOR JOHN McCAIN

Senator McCAIN. Thank you, Senator Levin.

I want to thank our colleagues from the Senate for being here this morning, and from the House, to introduce our nominees. I'll be brief except to say welcome to the nominees. I thank them and their families for their willingness to serve in the new administration.

At the outset, I join you in expressing our sorrow over the deaths of five soldiers and wounding of three others at Camp Liberty at

the hands of another soldier and extend our condolences and sympathy to the families of all who are involved.

Mr. Chairman, in August 1999, I had the pleasure of introducing Mr. Blanchard to the committee at the hearing on his nomination to be General Counsel of the Army. I applaud his willingness to once again depart his law practice in Phoenix and return as the nominee to be the General Counsel of the United States Air Force.

Mr. Blanchard is extraordinarily well qualified to assume these duties. His academic credentials include outstanding achievement at the Lewis and Clark College and at Harvard Law School, where he graduated first in his class. He completed a master's degree at the John F. Kennedy School of Government and subsequently clerked for one of Arizona's greatest jurists, Justice Sandra Day O'Connor.

In addition to his prior service as General Counsel of the Army, Mr. Blanchard's contributions in the public sector are particularly noteworthy. He was chief counsel to General Barry McCaffrey in his role as drug czar in the White House Office of National Drug Control Policy from 1997 to 1999. In 2003, Mr. Blanchard acted as interim Homeland Security Director in the office of Governor Janet Napolitano, crafted a homeland security plan and helped establish an Arizona Office of Homeland Security. From 1991 to 1995, Mr. Blanchard served as an Arizona State senator, where he chaired the judiciary committee.

It's gratifying that Mr. Blanchard has again stepped forward to serve his country and I know he will be heavily relied on by Secretary of the Air Force Donley and General Schwartz.

Mr. Andrew Weber, the nominee for the position of Assistant Secretary of Defense for Nuclear and Chemical and Biological Defense Programs, as I noted, will be introduced by our esteemed colleague Senator Lugar. However, I am aware he has worked in DOD since 1996 as the Adviser for Threat Reduction Policy. He has over 24 years of Government service, most of which has been dedicated to reducing the threat of weapons of mass destruction.

Thomas Lamont, the nominee for Assistant Secretary of the Army for Manpower and Reserve Affairs, is an accomplished attorney. He'll be introduced by Senator Durbin. He recently completed a 25-year career of service as a judge advocate with the Illinois Army National Guard.

The Army is severely stressed today and we know that its leaders at every level are working hard to craft programs and policies that will enable soldiers and their families to meet the great demands being placed on them. Mr. Lamont, I know you will be a positive influence in assisting Army leaders in addressing these critically important problems.

Yesterday I met with wounded warriors at Walter Reed Army Medical Center. I learned from them that the staff is stressed, case managers have very high case loads, and that high turnover of these managers is a negative factor in achieving continuity and smooth transition for these young heroes. This indicates to me that more work needs to be done to improve execution of the Warrior Transition Unit concept.

Dr. Stockton, you have an impressive record of academic scholarship in homeland defense and homeland security policy, including

leadership positions at the Naval Postgraduate School and most recently at Stanford University. I have to say that your qualifications for the equally important Americas' Security Affairs portion of the portfolio you've been nominated for appears to be lacking. Your responses to the committee's advance policy questions relating to Haiti, Cuba, Venezuela, Bolivia, Panama, U.S. Southern Command, and others were completely unresponsive and raise serious questions which must be clarified before any action should be taken on your nomination. I understand the committee staff intends to follow up with you in this regard.

Thank you, Mr. Chairman, and I welcome our nominees and our colleagues.

Chairman LEVIN. Thank you so much, Senator McCain.

First we'll call on an old friend, Senator Lugar, to make his introduction. Then we'll call on Senator Durbin to make your introduction. Representative Sam Farr, you would then become next. Senator McCain has already introduced Mr. Blanchard. Then once each of you make your introductions, you can either stay or leave as you need to. We know you all have heavy schedules.

Senator Lugar, it's always great to see you here. I made reference to Nunn-Lugar in my introduction and you're well known for many wonderful advances, but that surely is one of them; and we now call on you.

**STATEMENT OF HON. RICHARD G. LUGAR, U.S. SENATOR
FROM THE STATE OF INDIANA**

Senator LUGAR. Thank you very much, Mr. Chairman, Senator McCain. It's a real privilege to be here to introduce my friend Andy Weber.

President Obama has nominated Andy to be Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs. I've worked closely with Andy for more than a decade. I believe the President could not have made a better choice. Andy Weber has played an instrumental role in the success of the Nunn-Lugar program. He's been at the forefront of our Government's efforts to meet the threat posed by weapons of mass destruction. I've seen Andy's decisionmaking, energy, personal diplomacy firsthand during many Nunn-Lugar inspection visits to the former Soviet Union.

He has served his country with honor and courage, most recently as a long-time adviser on the Nunn-Lugar program in the Office of the Secretary of Defense, and I am confident he will continue to do so in his new position.

Mr. Chairman, because of Andy's work we live in a safer world. He has led the program's efforts to address the threat posed by biological weapons. Under his leadership, the program has secured toxic pathogens that could have fallen into terrorist hands, and because of his efforts pathogen strain samples that might some day lead to cures and treatments are being studied in United States laboratories and public health professionals are developing important assessment tools to understand and to prevent the outbreak of deadly diseases that directly threaten the well-being and stability of the world.

In addition to securing biological weapons, Andy has been the point man for our nonproliferation operations in a number of countries. He led the American team that traveled to Moldova to remove 21 MIG-29 fighter aircraft and personally oversaw the transportation of the planes back to the United States. The jets were capable of launching nuclear weapons and would have been extremely dangerous had they been transferred to rogue states.

Andy also led the United States efforts in a once-classified operation known as Project Sapphire. In the winter of 1994, the Kazakh Government discovered nearly 600 kilograms of highly enriched uranium, enough to make several nuclear weapons. The material was highly vulnerable. We know that a number of governments and organizations had a strong interest in acquiring it. Andy's efforts ensured that these materials were transported to the United States for safekeeping.

He also played a crucial role in razing the largest anthrax production facility in the world. The plant, known as Stepnogorsk, was built by the Soviet Union during the Cold War. Each piece of equipment involved in the production and weaponization of biological weapons was destroyed and the structure was bulldozed to the ground.

Andy's operational successes are matched by his diplomatic skills. With an innovative negotiating style all his own, he has built relationships that led to unprecedented nonproliferation breakthroughs. With little fanfare, he has served in remote locations negotiating, monitoring, and implementing the elimination of the most deadly substances ever created.

The position for which Andy has been nominated will be different than the role he played in the Nunn-Lugar program. But I am confident that in a few years we will be reflecting on another long list of his accomplishments. I am proud to offer my strongest endorsement of Andy Weber's nomination. I urge the committee to act favorably. I urge my colleagues in the Senate to confirm him promptly. I thank very much the committee for inviting me to appear today.

Chairman LEVIN. Thank you so much, Senator Lugar. We're delighted to hear from you. We know that you have another commitment, as do our other introducers.

Now a great favorite of all of ours, Senator Dick Durbin.

STATEMENT OF HON. RICHARD DURBIN, U.S. SENATOR FROM THE STATE OF ILLINOIS

Senator DURBIN. Thanks a lot, Senator Levin, chairman of the committee, and Senator McCain. Thank you very much for your hospitality today.

It's my honor to introduce Tom Lamont to support his confirmation as Assistant Secretary of the Army for Manpower and Reserve Affairs. President Obama made the right choice when he nominated Tom for this position. Tom is a dedicated public servant who's spent a lifetime dedicating himself to public life. He is also a good friend and neighbor in Springfield. I know him and his family very well.

Unfortunately, his wife Bridget and family could not join him today as Bridget's father passed away Saturday evening. He was

90 years old. That's why Tom is here by himself, but they are with him in spirit and totally supportive of this nomination. I know that Bridget is proud of Tom's service, 25 years of experience as a Judge Advocate General (JAG) with the Illinois Army National Guard. He was the State staff JAG before retiring at the rank of colonel in 2007.

Tom's public service goes beyond the Guard. In 1990 he was elected to the Board of Trustees of the University of Illinois. He also served in the highest capacities with the Office of State's Attorney as appellate prosecutor, civil litigation in the Office of the Illinois Attorney General, and the Illinois Board of Higher Education. He has a private law practice in Springfield and most recently has served as Special Counsel for the University of Illinois.

If confirmed, this broad array of service and experience will serve him well. The Army needs leaders like Tom right now. The Army has soldiers deployed around the world. The wars in Iraq and Afghanistan create tremendous strain on the soldiers and their families, as we saw with this morning's tragic headline.

Of the 178,000 troops serving today in Iraq and Afghanistan, roughly 138,600 are Army soldiers. Of those, 88,000 to 90,000 are members of the Guard and Reserve. That includes, incidentally, 2,700 members of the Illinois Army National Guard's 33rd Infantry Brigade Combat Team. Many of these soldiers have served extended deployments and often multiple deployments.

As the Assistant Secretary for Manpower and Reserve Affairs, Tom will supervise the essential manpower and personnel issues facing the Army, no small task, but one that he is certainly up to. He will be responsible for championing the Army's Reserve components. With his years of experience in the Illinois Guard, he has a strong understanding of the needs of the Reserves as well. He will make sure the Army Reserve has the resources and capabilities it needs to be an operational force.

I strongly support his nomination. I urge the committee to favorably report this nomination for full consideration by the Senate.

Thank you, Mr. Chairman, Senator McCain.

Chairman LEVIN. Thank you so much, Senator Durbin.

Now we will call on Congressman Farr. We're delighted that you could join us today, Sam.

STATEMENT OF HON. SAM FARR, U.S. REPRESENTATIVE FROM THE STATE OF CALIFORNIA

Mr. FARR. Thank you very much, Mr. Chairman and Ranking Member McCain.

I'm very pleased to introduce to you Paul Stockton, who I have known for more than a decade as a friend and a mentor. Paul and I became acquainted when he became the Director for the Center of Civil-Military Affairs at the Naval Postgraduate School in Monterey, CA. From my background as a former Peace Corps volunteer in Colombia, I was interested in how the United States could assist foreign nations in resolving civil-military affairs and Paul was the leading expert in this area.

Paul was interested in and knowledgeable about Latin American affairs and developed the DOD programs in Colombia that helped build the effective security partnerships with important democ-

racies, including assisting the Colombian Armed Forces with programs to reinforce the rule of law and respect for human rights. That program involved officers from throughout Central America, El Salvador, and Latin America.

His expertise in international affairs led him to establish the School of International Graduate Studies, where he served as the acting dean until he was appointed provost of the Naval Postgraduate school in 2001. The tragedy of September 11 drove Dr. Stockton to create the Center for Homeland Defense and Security at the Naval Postgraduate School. Dr. Stockton developed the Nation's premier master's degree curriculum that educates our Nation's first responders in critical homeland security issues.

Again, recognizing the need to integrate DOD and the Department of Homeland Security, Paul brought the DOD officers together with their civilian counterparts at the local, State, and Federal level. As the first Director of the Nation's only Department of Homeland Security-supported master's degree program, at the Center for Homeland Defense and Security, Dr. Stockton developed education modules to support the homeland security efforts of governors and mayors all across the country.

Dr. Paul Stockton is among the Nation's top experts in homeland security issues and will lead the Office of the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs with honor and distinction.

In closing, Senators, I'd like to mention that Paul's beautiful wife Missy and his two adorable sons William and Henry cannot be here today, but his in-laws are present and I would like to recognize Bill and Carol Engler, who are sitting right behind me.

Thank you for allowing me this time to pay tribute to my good friend and mentor Dr. Paul Stockton.

Chairman LEVIN. Thank you so much, Congressman. Say hello to my brother, would you? I haven't seen him for a few days.

We'll now turn to our nominees. We're going to ask you all first our standard questions. First, have you adhered to applicable laws and regulations governing conflicts of interest?

Mr. WEBER. Yes.

Dr. STOCKTON. Yes.

Mr. LAMONT. Yes.

Mr. BLANCHARD. Yes.

Chairman LEVIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

Mr. WEBER. No.

Dr. STOCKTON. No.

Mr. LAMONT. No.

Mr. BLANCHARD. No.

Chairman LEVIN. Will you ensure that your staff complies with deadlines established for requested communications, including questions for the record, in hearings?

Mr. WEBER. Yes.

Dr. STOCKTON. Yes.

Mr. LAMONT. Yes.

Mr. BLANCHARD. Yes.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

Mr. WEBER. Yes.

Dr. STOCKTON. Yes.

Mr. LAMONT. Yes.

Mr. BLANCHARD. Yes.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

Mr. WEBER. Yes.

Dr. STOCKTON. Yes.

Mr. LAMONT. Yes.

Mr. BLANCHARD. Yes.

Chairman LEVIN. Do you agree, if confirmed, to appear and testify upon request before this committee?

Mr. WEBER. Yes.

Dr. STOCKTON. Yes.

Mr. LAMONT. Yes.

Mr. BLANCHARD. Yes.

Chairman LEVIN. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Mr. WEBER. Yes.

Dr. STOCKTON. Yes.

Mr. LAMONT. Yes.

Mr. BLANCHARD. Yes.

Chairman LEVIN. Thank you.

Now, as I call upon each of you, you should feel free to introduce members of your families if they're with you or friends who are with you. We'll start with Mr. Weber, and we'll go from Mr. Weber, to Dr. Stockton, Mr. Lamont, and then Mr. Blanchard. Mr. Weber, do you have an opening statement?

STATEMENT OF ANDREW C. WEBER, NOMINEE TO BE ASSISTANT TO THE SECRETARY OF DEFENSE FOR NUCLEAR AND CHEMICAL AND BIOLOGICAL DEFENSE PROGRAMS

Mr. WEBER. Thank you, Mr. Chairman. Yes, I do. Chairman Levin, Senator McCain: It is an honor and a privilege to appear before you today as the nominee for Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs. I am grateful to President Obama and Secretary Gates for their confidence in nominating me to this important position.

I would like to thank Senator Lugar for the generous introduction and note that he has been an inspiration to me and countless other people around the world, and that his vision and leadership of the Nunn-Lugar programs have made us all safer.

I especially want to thank my loving family. Let me introduce my wife Julie, my daughter Eleanor Jane, and my mother Pat. I would also like to thank my father, James Weber, an Army Air Corps veteran, resting in peace across the Potomac River in Arlington National Cemetery. Finally, I would like to thank my friends and colleagues who are here today to support me.

By nominating a career public servant to this important position, President Obama has demonstrated his faith in the professionals, civilian and military, whose greatest calling is to serve the American people. I have had the privilege of serving under every President since Ronald Reagan these last 24 years. I am truly humbled by the opportunity President Obama has given me, and if confirmed I pledge to work closely with you and this committee to strengthen the Nation's security against weapons of mass destruction.

Mr. Chairman, Senator McCain, I thank you for your consideration and welcome any questions you may have.

Chairman LEVIN. Thank you, Mr. Weber.

Next, Dr. Stockton.

STATEMENT OF DR. PAUL N. STOCKTON, NOMINEE TO BE ASSISTANT SECRETARY OF DEFENSE FOR HOMELAND DEFENSE AND AMERICAS' SECURITY AFFAIRS

Dr. STOCKTON. Thank you, Mr. Chairman and Senator McCain, for the opportunity to appear before you this morning. I'm honored that the President has nominated me to be the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs. This day would not have been possible without the love and support of my wife Missy, who had to stay back in California with my two wonderful boys, William and Henry, and with my parents, to whom I owe so much.

I want to acknowledge two special debts of gratitude. The first is to Senator Daniel Patrick Moynihan, who gave me my real education in government. Second, I want to acknowledge Lacy Suiter, who helped me understand the importance of building effective partnerships between DOD and local, State, and Federal civil authorities.

Should I be confirmed by the Senate, I would welcome the opportunity to strengthen those partnerships in support of the Under Secretary of Defense for Policy, the Deputy Secretary, and the Secretary of Defense. I would also do everything possible to strengthen the homeland defense of the United States and to build security in the western hemisphere with our regional partners.

Finally, if confirmed by the Senate I would commit myself to respecting the vital role played by this committee and the Senate as a whole, and would welcome any questions you might have for me this morning.

Chairman LEVIN. Thank you very much, Dr. Stockton.

Mr. Lamont.

STATEMENT OF THOMAS R. LAMONT, NOMINEE TO BE ASSISTANT SECRETARY OF THE ARMY FOR MANPOWER AND RESERVE AFFAIRS

Mr. LAMONT. Thank you, Mr. Chairman. Chairman Levin, Senator McCain: I am deeply honored and privileged to appear before this committee as the President's nominee for Assistant Secretary of the Army for Manpower and Reserve Affairs. I'd like to thank the President and the Secretary of Defense for the trust and confidence shown me by nominating me to serve in this position. I'd

like to also thank Senator Durbin for introducing me here today and for his support and guidance through this process.

If I am confirmed, as a former National Guardsman I look forward to the opportunity to serve my country again at a time when our national security environment is as challenging as it has been at any other time in our Nation's history. If confirmed, it would be my distinct honor to help them accomplish the complex and challenging missions our Nation asks the Army to perform.

I'd like also to thank my family for their support and encouragement to undertake this new challenge. Unfortunately, my wife of 37 years cannot be here today. Her father passed away this past weekend and the funeral is today. Our son Michael is the oldest grandchild and he is serving as a pallbearer. His duty is with his mother. While I would have liked to have joined the family today, we decided family trials such as this can and do arise at any time for our soldiers and they persevere and soldier on. They should not expect any less from me.

Mr. Chairman, I look forward to any questions you and other members of this committee may have. Thank you very much.

Chairman LEVIN. Thank you, Mr. Lamont. If you would extend our condolences to your family. Their separation from you on a day like this I'm afraid is standard for families.

Mr. LAMONT. Absolutely.

Chairman LEVIN. They come through a lot of trials supporting their member who is in public service, and here we have a very dramatic example on the very day that you have your confirmation hearing. Thank them for their understanding and tell them that we miss them. We understand why they're not here and we very much appreciate their support.

Mr. LAMONT. Thank you for your remarks.

Chairman LEVIN. Thank you.

Mr. Blanchard.

**STATEMENT OF CHARLES A. BLANCHARD, NOMINEE TO BE
GENERAL COUNSEL OF THE DEPARTMENT OF THE AIR FORCE**

Mr. BLANCHARD. Yes, Mr. Chairman and Senator McCain. It's a great honor to be before this committee as a nominee for General Counsel of the Air Force. I especially want to thank Senator John McCain for his kind introduction. This is twice he's done this for me and I deeply appreciate it.

I would also like to thank President Obama and Secretaries Gates and Donley for the trust they have placed in me. Finally, I want to thank the staff and the members of this committee for the great courtesy that they've shown during this process. I realize this is a very busy time and I appreciate the hard work it took to do this hearing so quickly.

My wife Allison wanted to be here today, but obligations have required her to remain in Arizona. I'm very proud of my wife. In addition to being the best possible mother to our very active 4-year-old boy, she also has a long history of public service, including many years in the Pentagon.

I am deeply humbled and honored by this nomination. The most fulfilling job I've had in my career to date was as General Counsel

of the Army and I'm excited by the prospect, if confirmed, of serving as General Counsel of the Air Force.

The challenges facing the Department of the Air Force are many and I look forward to helping Secretary Donley and the rest of the Air Force team as they grapple with these challenges. But most of all, I'm especially happy to be nominated for a position that will allow me to improve the lives of the dedicated Air Force personnel who work to protect America and, when called upon, put themselves in harm's way for our country.

I am committed to a close and productive working relationship and partnership with the Air Force JAG and the other military lawyers in the department. I am proud that I had a great relationship with the Army JAG leadership during my tenure as General Counsel of the Army and General Walt Huffman was not merely a great colleague, he became a close friend. I am firmly convinced that the leadership of the Air Force is best served when the civilian and military lawyers work together as a team to offer the best possible legal advice to our mutual clients.

Should I be confirmed, I look forward to working with this committee in addressing any legal issues that may arise during my tenure, and I appreciate the opportunity to appear today and would be happy to answer any questions.

Chairman LEVIN. Thank you so much.

Let's try an 8-minute round for our first round of questions.

Mr. Lamont, family support programs are more important than ever in light of continued deployments and the related stress, both on members of the armed services, as probably was the cause of yesterday's tragedy, but also on their families. Can you give us your view of the importance of family support programs? Where would you put greater focus?

Mr. LAMONT. Thank you, Mr. Chairman. Obviously, the family support program is extremely important. When a soldier deploys, his family goes to war in many respects themselves. They are confronted with many of the same concerns, housing and education, financial issues, of our society, but yet it's exacerbated with the loss of a loved one.

If I am confirmed, I think it behooves us to do everything in our power to ensure the strength of our family support program, because if we are to sustain the volunteer Army we need to sustain that family support group.

Chairman LEVIN. We've seen a significant increase in suicides. Can you give us your thoughts on prevention?

Mr. LAMONT. I'm aware that it seems to be a significant increase in suicides. This is a terrible tragedy. Again, it somewhat mirrors society, and again exacerbated by the long deployments and the lack of a family support group. We think much more needs to be done in recognizing behavioral and risk factors, and the Army I'm aware has initiated a great deal of new training regimens just in order to try to recognize those risk factors among our troubled soldiers. It's something that we must have constant vigilance on.

Chairman LEVIN. Mr. Weber, you've spent many years working in the Cooperative Threat Reduction (CTR) program, particularly in the implementation of the biological threat reduction programs. The National Academy of Science recently released a report which

set forth recommendations on future opportunities for the CTR program, particularly within the area of biological threat reduction initiatives. Can you give us your view of the report and the recommendations and which of those recommendations would you follow or try to follow for expansion of the CTR program?

Mr. WEBER. Mr. Chairman, my friends Ron Lehman and Dave Franz did an excellent job co-chairing that National Academy report. As required by law, the Secretary will soon be reporting to you with his assessment of that report. But I have studied it closely. It's an excellent report and I personally endorse all of the recommendations.

The most important one is that we take the lessons learned from our threat reduction programs in the former Soviet Union and expand them geographically to other areas of the world. The Secretary is working on a determination to allow us to use the new authorities given by this committee in Pakistan and Afghanistan, and the initial focus of that will be on biological threat reduction programs. Later perhaps we could expand these programs into other parts of the world, like Southeast Asia and Africa.

Another recommendation which I fully endorse is the need for less bureaucracy and more agility and flexibility as we implement these programs. If confirmed for this position, I will oversee the Defense Threat Reduction Agency and will work with that agency on improving the flexibility. Secretary Gates has said that a 75 percent solution in months is better than a 100 percent solution in years, and I think that will be sort of our guiding mandate as we move forward with these programs.

Finally, the report criticized the Government for not having more high-level attention on these programs. The fact that I am being considered for this senior leadership position in DOD will position me personally to give these programs the attention that you and Senator Lugar have given them and Senator McCain by traveling to the countries, meeting with our partners, and visiting some of these weapons of mass destruction sites where the day-to-day work goes on.

Thank you.

Chairman LEVIN. Thank you.

Dr. Stockton, the Commission on National Guard and Reserves made a number of findings and recommendations in their final report on increasing the capabilities and responsibilities of the National Guard and Reserves in the homeland. The commission concluded that: "DOD must improve its capabilities and readiness to play a primary role in the response to major catastrophes that incapacitate civilian government over a wide geographic area." This is a responsibility, in their words, that is "equal in priority to its combat responsibilities."

In response to a request from this committee, Admiral Mullen, the Chairman of the Joint Chiefs, wrote in April 2008 that: "I have some concerns with the Commission's ideas on enhancing the Defense Department's role in the homeland. While Reserve component civil support requirements are important, they should not be of equal importance to DOD's combat responsibilities."

Can you give us your view on that issue? Do you agree with Admiral Mullen or do you agree with the finding of the Commission on the National Guard and Reserves?

Dr. STOCKTON. Thank you for the question, Mr. Chairman. I agree with Admiral Mullen. I believe that the current national defense strategy specifies that the core mission of DOD is the defense of U.S. homeland from attack and the securing of U.S. interests abroad. The civil support mission and support of civil authorities is absolutely vital and if confirmed I would work to strengthen U.S. capacity for that. But the core missions are as stated in the national defense strategy.

Chairman LEVIN. Dr. Stockton, State Governors have authority to activate their National Guard in State status to respond to major disasters and emergencies. However, much of the equipment and many of the specialties needed to respond to these disasters and emergencies are in the Reserves of the Armed Forces and the President is precluded from mobilizing these Federal forces for that purpose.

Governors have opposed DOD's efforts to authorize the President to mobilize the Reserves to respond to insurrections and manmade disasters, accidents, or catastrophes because the Reserves would not be under State command and control.

My question is whether you believe that Congress should authorize the President to order the Army Reserve, Navy Reserve, Air Force Reserve, Marine Corps Reserve, and Coast Guard Reserve to Active Duty to respond to an insurrection or a serious natural or manmade disaster, accident, or catastrophe even though they would not be under the Governors' command and control?

Dr. STOCKTON. Thank you, Senator. My view is that the current statutory authorities of the President are adequate and that the Insurrection Act as in law today spells out the very limited circumstances under which these kinds of uses of Federal forces, National Guard forces under Federal control, might be used. I do not see at this time the need for further legislation on that subject.

Chairman LEVIN. Thank you all.

Senator McCain.

Senator MCCAIN. Thank you, Mr. Chairman.

Mr. Weber, do you believe that any ratification of the Comprehensive Test Ban Treaty (CTBT) should be preceded by plans for a new redesign and more reliable warhead? Secretary Gates recently stated that without future testing it will become impossible to keep extending the life of our nuclear arsenal.

Mr. WEBER. Senator McCain, I believe that the President's desire to have ratification of the CTBT needs to be backed up by increased attention of the Nuclear Weapons Council of the Department of Defense and the Department of Energy on ensuring that we have a safe, secure, reliable, and credible deterrent. We have an aging stockpile and over time it becomes more difficult to certify the reliability of those weapons without testing. I believe one of the safeguards that we need to have is a supreme national interest clause that would allow testing if it were in the supreme national interest, and we also need to maintain our nuclear weapons testing readiness if one of those situations arose.

But if I am confirmed, making sure that the Department of Energy and DOD dedicate the resources as outlined by the recent Perry-Schlesinger Commission on the U.S. Strategic Posture, that will help us continue into the future to be able to certify the safety, security, reliability, and most importantly, credibility of our nuclear deterrent.

Thank you.

Senator MCCAIN. Dr. Stockton, recently the Senate Homeland Security and Governmental Affairs Committee had a hearing on the increasing violence on the border with Mexico. Do you think that the United States is doing enough to assist the Calderon Government in combating these cartels?

Dr. STOCKTON. Thank you, Senator McCain, for the question. I believe that under the Merida Initiative and other opportunities for the United States to be in support of President Calderon's Government, that we have some ongoing programs of support that are very valuable, and should I be confirmed in this position I would welcome the chance to hear your insights and those of your staff as to how those programs could be further strengthened.

Senator MCCAIN. Let me suggest that you take a trip down to the U.S.-Mexican border and get an assessment. The level of violence is dramatically increasing, the atrocities that are being committed between the cartels and the government to an unprecedented level.

I don't know if you're aware, but the Governors of California, New Mexico, Arizona, and Texas have requested the National Guard to be deployed on the border because of their concerns of the spillover of violence into our country. Do you think that the deployment of National Guard along the southern border would be helpful?

Dr. STOCKTON. Sir, any such deployment would be in support of the local, State, and Federal law enforcement agencies that have primary responsibility for dealing with violence spilling over from the activities of the drug cartels. Should I be confirmed by the Senate for this position, I again would look forward to opportunities for DOD to play that support role consistent with law, as appropriate and as approved by the President of the United States.

Senator MCCAIN. General Michael Hayden, former Director of Central Intelligence, recently said: "Escalating violence along the U.S.-Mexico border will pose the second greatest threat to U.S. security this year, second only to al Qaeda." If General Hayden is correct—and from my own experience I believe he is—I would suggest that you pay attention to that issue and make a recommendation to the President accordingly, because right now the governors, who have to deal with this issue every single day along the border, are strongly in favor of deploying our Guard troops, at least until we have sufficient security along the border.

Mr. Lamont, I think it's important to note that the retention and recruiting in the Army has increased rather dramatically. We know that part of that is the economy, part of it is willingness to serve and a desire to serve, part of it is the fact that we've achieved success in Iraq, and it has had a very significant impact on morale.

I was out at Walter Reed Army Medical Center yesterday and I had the opportunity of having lunch with some of our wounded

warriors. They overall are satisfied with a lot of the treatment they're receiving and the improvements that have been made since the scandal out there. But they also think that there are some needed improvements, particularly in the transition area, from discharge from hospital care to civilian life.

I would suggest that maybe a trip out to Walter Reed and Bethesda Naval Medical Center, where there are some Army personnel as well, and to Brook Army Hospital would be one of your top priorities so that you can get a firsthand understanding of the challenges that these brave warriors are facing. You will be astounded by the morale and the rehabilitation that's taking place, but there are still areas that need to be addressed if we're going to provide them with the care and attention that they have obviously earned.

I hope you'll take the time to go to Walter Reed, Bethesda, Brook, and other facilities that are providing care for our wounded warriors.

Mr. LAMONT. Absolutely.

Senator MCCAIN. Mr. Blanchard, there's been a couple of scandals in the Air Force. One of them had to do with Boeing. Another one had to do with the former Chief of Staff of the Air Force. I urge you to make sure that the performance of all, both civilian and uniformed, in the United States Air Force comports themselves with the highest standards of public service that we expect of them. I would imagine that your previous experience will qualify you to hit the ground running on this issue.

Dr. Stockton, again, our hemisphere is important. It's an important part of your portfolio. We have individuals such as President Chavez in Venezuela, Nicaragua, Bolivia, and Ecuador, where we have significant challenges. I hope you'll clarify your answers to the committee and make sure that they are full and comprehensive.

I congratulate you all and your families, and we look forward to an early confirmation so that you can get to work.

Thank you, Mr. Chairman. I thank the witnesses and their families for their willingness to serve the country.

Chairman LEVIN. Thank you, Senator McCain.

Senator Begich.

Senator BEGICH. Thank you very much, Mr. Chairman.

To all of you, congratulations on being here at this point and I look forward to being one of those that vote for confirmation for you all. I think you're a great group of folks and President Obama has once again selected some good individuals, especially in the armed services area. Again, congratulations to the families that are here. I wish you all the best because I know their hours now will be longer than you had anticipated and what you were told. So be patient with them, but thank you for your support for them. It's very important when they have to do their duty late in the evenings. It's the family that makes the difference. So thank you all for doing that.

I just have questions for two of you, and that could be good and bad; good for the two that don't have to answer questions, bad that you have to wait for the other two to finish. But one is for Dr. Stockton and a couple for Mr. Lamont.

First, Dr. Stockton, in regards to Arctic policy, how do you see your role or how do you see long-term impacts with regards to Arctic policy on homeland security and defense in general as it continues to have more activity and will obviously in the future have a lot of activity, based on the climate change issues? Do you have any general comments you'd like to make on that or specifics, if you could?

Dr. STOCKTON. Thank you for the question, Senator. There are a lot of priorities competing for funding and programmatic support across the Federal Government now. I think in this realm of homeland defense and homeland security there are also terrific opportunities for more effective collaboration between DOD and the civilian agencies, Federal, State, and local, that DOD can support.

In addition to continuing to strengthen capacity to deal with the challenges that our Nation faces, I will look for efficiencies and ways to make sure that these agencies are a more effective mutual support as we go forward.

Senator BEGICH. Do you see, as you look at the different agencies and working with them, as Congress and the White House are developing how we're going to deal with the issues up in the Arctic, how—let me put it another way. Do you think we have enough resources to deal with the future of the Arctic? Is that an area that, as again the Departments of Defense and Homeland Security work together on, which is probably very critical, do you think we have enough resources, or do you think that's an area that we need more engagement?

Dr. STOCKTON. I think we need more engagement, sir. The position for which I have been nominated is responsible for western hemisphere affairs. There are new challenges emerging due to climate change. In the polar region, new passages are opening up for ship traffic. New opportunities for exploitation of minerals, oil for example, in the seabed; and unresolved issues now that have been raised by this.

Should I be confirmed by the Senate, I would pay special attention to these emerging western hemisphere security issues that would fall under my policy purview.

Senator BEGICH. Very good. Thank you very much for that. As a Senator from Alaska, that's obviously an area of concern. We are an Arctic Nation because of the State of Alaska. I truly believe we are totally underresourced up there for what is going to be necessary, not only today but into the future. I appreciate your comments in that regard.

Dr. STOCKTON. Thank you, sir.

Senator BEGICH. Thank you very much.

Mr. Lamont, I have a couple questions and I do want to follow up on the chairman's questions in regards to family support, and something that I know—in Alaska we have lots of folks that have been deployed as well as rotated back. As a former mayor of Anchorage, we've done a lot of work with family support and the necessity of it. I want to echo that I think families and spouses are under great stress at this time based on the deployments and the amount of deployments.

I want to echo the question and have you expand on it, if you could. Do you think we have enough resources focused on family

support, not only here in country, but also on service, outside of the country, in the sense of folks that have been deployed in making sure that the families are well taken care of? Again, not just the large picture, but at the battalion and company level. Can you give me some comment on that?

Mr. LAMONT. I share your concern with that issue. It's absolutely vital that we have an extremely strong family support group. As I mentioned to Chairman Levin, soldiers don't deploy by themselves. All families share in the sacrifices that their loved ones are going through.

I am not totally familiar with all the resources available at this present time to suggest that we need more or less. Clearly, I think we're always open to doing whatever we can to support our families.

I will mention a new program entitled the Army Family Covenant, in which there is great stress and great emphasis on how we can serve the families, no matter where they're situated. Yes, we do have our share of thorns.

Senator BEGICH. Thank you very much. Actually, I was one of the first mayors when I served as mayor to sign the covenant with the Army, because it was an important message and mayors have capacity, especially because they're so local in the sense of connection to the bases, to do whatever they can to serve. We had our superintendent, myself, and others sign that. So I agree with you.

Mr. LAMONT. We need that cooperative effort.

Senator BEGICH. That's a great program.

The other issue is also in regards to families: Do you think within the leadership at your level and other levels that people have made the psychological adjustment that the families—or the Army—the military of today—let me broaden it—the military of today versus 30, 40 years ago—it used to be 75 percent, basically single men enlisted, and now it is 75 percent families instead of single individuals.

Do you think that the folks have adjusted and psychologically changed in the sense of how they deal with the operations of the military, and the Army specifically? Because it has changed dramatically in the last 40-plus years, from 75 percent single males to 75 percent family, give or take a percent there. Do you think that's occurred or do you think there's a lot more work or some work to be done?

Mr. LAMONT. It certainly is a changing environment, although I'm led to believe that the Army has absorbed and reprogrammed to the extent they believe, to move to that psychology of a much larger number of female soldiers now, with families. In fact, I'm told we have over 700,000 children in our Army families right now. I do think there's a lot to be done in that regard. Have we done enough?

Senator BEGICH. Hard to say.

Mr. LAMONT. I don't know that.

Senator BEGICH. That would be an area to look at, because I know when you shift like this you have to get the leadership to also recognize the change that's occurred. It's a tough change because some have been in the system so long, they've been there a long

time, but some of the new challenges of families are pretty dramatic. But I appreciate that.

One other question, I think I'm getting close on time. Let me ask you about some of the recruitment and what's been happening in somewhat of a positive way, because the economy has been flat and in some cases, in some communities, very dramatically hit in the sense of unemployment and so forth.

Some of the recent reports that I have seen, at least in the Army, they have curtailed the waiver policies, reduced recruitment bonuses, and been a lot more selective in admittance, because they have a lot more choices now, which is a good thing in a lot of ways. But on the flip side, in this economy that's flat also the National Guard has had to cut personnel and recruitment budgets have also been reduced. So it's going to have an impact in the economy.

I guess the question is, do you think we have the right level of strength cap, the right levels here, and this is the right move to start reducing in some areas at this time, where we're in somewhat of a transition?

Mr. LAMONT. I think the end strength issues are very important. I share with you the concern of how we reach that end strength. Our recruiting and retention successes have been noted. I also note, frankly in today's paper, that there is a potential budget recommendation of a reduction in recruitment budget.

Senator BEGICH. Yes.

Mr. LAMONT. I would suggest that was not done without full and deliberate consultation with our senior defense leaders, and I look forward to realizing what those discussions were.

Senator BEGICH. Very good. I appreciate it. My time is up and I do thank you for your answers to the questions.

Again, to all four of you, thank you for your willingness to serve your country in this manner. Thank you very much.

Chairman LEVIN. Thank you, Senator Begich.

Senator Webb.

Senator WEBB. Thank you, Mr. Chairman.

Gentlemen, I apologize for having stepped out. I'm on the Senate Foreign Relations Committee as well and we have Ambassador Holbrooke two floors away. So it's a typical mil drill up here in the Senate.

Chairman LEVIN. We cannot hear him.

Senator WEBB. Excuse me?

Chairman LEVIN. Usually we can hear him two floors away. [Laughter.]

Senator WEBB. You'll hear about him, I'm sure, in the next hour or 2.

Mr. Lamont, I wanted to take some time today and talk to you about my concerns with respect to the approach that's been taken on manpower issues in recent years. A good place to start and a follow-on to what Senator Begich was saying, I grew up in the military. I grew up in a military family. I know that part of it very well, the stress on the spouse and on the kids.

At one point there was a 3½ year period where my father was either deployed or assigned to bases where there wasn't family housing. When you go through the numbers that you and Senator Begich were trading about the transition of the percentage of mar-

ried personnel, it really occurred principally in the 1980s, when I was Assistant Secretary of Defense responsible for the Guard and Reserve programs.

We saw huge jumps in the percentage of people who were married. In fact, we did a through-line study. I had asked the question, what percentage of sergeants, E-5, in the Army were married in 1971 as compared to 1986, and I think it was 14 percent up to 73 percent. We did a lot of funding during those periods, put a lot of quality of life programs on line.

As someone who had grown up in a different era, it was just remarkable to see the way that DOD stepped forward, and it has continued. I don't think that really is the main impediment today. There are two issues and I want to talk to you about both of them. One is the deployment obligations right now; and the second, it's a little bit of a different question, but I have great concern about this and I've been raising it ever since I've been here in the Senate, and I want to lay this down because I hope you will do something about it in your own position. When people from the Pentagon come over here to this committee and start talking about our Active Duty people, they tend to forget that a great percentage of them are citizen-soldiers. We tend to talk about, oh, you enlist the soldier, you reenlist the family, retain the family.

But it took me a year to get this data when I was pushing the GI Bill, which I wrote and introduced my first day in office, that 75 percent of the soldiers in the Army leave the military on or before the end of their first enlistment and 70 percent of United States marines do the same thing. They leave on or before the end of their first enlistment.

That is healthy for the country. We are a citizen soldiery. But at the same time, I'm not seeing from the leadership in the military today that same tone, at least over here in these hearings, of stewardship, a lifetime of stewardship toward the people who are not career people. We do very well in terms of identifying the needs and the requirements of the career force. I would urge you to, whenever you're looking at any of these issues, to consider the long-term impacts of service in this type of environment.

That's why I introduced the GI Bill. There are so many people who were leaving the military with the Montgomery GI Bill that couldn't even get into basic community college programs, when they had carried the load that very few other people in this country have been carrying since September 11.

It's also, by the way, why I introduced the dwell time amendment twice in 2007, basically saying, however long you've been gone, you deserve that much time back at home before you have to deploy again.

I will say here that—I'm not saying anything that I haven't said directly to General Casey—I was stunned when General Casey called me 2 years ago and said that the Army was going to 15-month deployments with only 12 months at home. The historical ratio on deployments has been 2 to 1. In the Navy, the Marine Corps, in the Army—in the Navy, when I was Secretary of the Navy, their deployment cycle was 6 months at sea, 12 months back at home. The deployment cycle was a year away in the Marine Corps, 2 years at home.

We've gone down to .75 on the rotational cycle. I expressed my concerns very seriously more than 2 years ago about the emotional impact long-term on good people that could potentially come out of that. I'm not going to simply put the suicide issue on that.

But having spent 4 years as a counsel on the House Veterans Affairs Committee right after the Vietnam War and working on these issues of post-traumatic stress and these sorts of things, it's very clear that a lot of the long-term emotional difficulties come from your best people, people who have given the most, and then need the right sort of stewardship, whether they stay in or not.

My strong request to you is that in the policy discussions that you have in your position that you will keep both of those on the table, because they tend to fall off the table when we're talking about effective deployment strategies or maintaining the size of the force and those sorts of things.

Mr. LAMONT. Certainly I'll take your comments to heart.

First let me applaud you for your efforts on the GI Bill. In my previous capacity, one of the first calls I got right after that took place was from our chancellor at the University of Illinois: How can we do this? How can we bring these people in? We want to encourage these people to take their ability to come in and accept that bill and work with it. We want them to use that bill. So we appreciate that.

I am also very aware of the concerns with dwell time. We've seen it with our Reserve component. Secretary Gates has suggested a goal of 1 to 5 years. We're not there yet. I'm aware that the goal for our Active component, we are not able to accomplish yet either. These are serious concerns, and they go to some of the other questions that have been raised here today with our family support. They all tie in together. I will certainly take your comments to heart.

Senator WEBB. I would say, one of the real surprises for me as we move forward on the GI Bill and the dwell time amendment was that the previous administration opposed both of them. They said that it was going to affect retention or that there were political overtones in terms of dwell time. I'm here to tell you, we have a stewardship toward these people and if we, the civilian leadership, don't articulate this stewardship, in a lot of cases it's not going to happen.

Another piece of that, by the way, when you're looking at issues like recruitment, there's two pieces on this GI Bill. One is the best way to make sure that individuals have the proper transition out of a combat environment is to have an affirmation of their service. They go back in that community and say: You know what, I just got a 4-year scholarship for serving my country, and there's only one way you can get it.

The other piece of that is, in all the work that I've done over my lifetime, on the committee, I have 5 years in the Pentagon, the best recruiter is a former military person who has had a positive experience who's back in the community. Someone who has had a good experience and is back on the GI Bill is going to help you selfishly as well.

I wish you the best. For all of you, our door is open and I hope that if you have any questions with respect to issues that you're

working on or if you want to ever take the temperature of our office, we are there.

Mr. LAMONT. Thank you.

Senator WEBB. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Webb.

Mr. Lamont, I can assure you that Senator Webb's sentiments reflect the sentiments probably of every member of this committee.

Senator Hagan.

Senator HAGAN. Thank you, Mr. Chairman.

I, too, want to congratulate all of you on your nominations to these very important positions. I want to welcome the family members here because you are definitely crucial to the fact that these individuals are going to be doing an outstanding job. I just want to thank you too for your commitment and in particular your support.

My first question is for Mr. Weber. Transnational terrorism, I think, is among the most important threats that the United States must be capable of combating and deterring. Key to this is preventing the terrorists from obtaining the nuclear fissile materials, to include highly enriched uranium. My question is how do you propose that the United States can achieve this objective in not allowing this fissile material to get into the wrong hands?

Mr. WEBER. Senator, I agree with you. I have had personal experience in this area. In Kazakhstan I helped lead an operation to remove highly enriched uranium for safekeeping at the Y-12 plant in Tennessee.

President Obama in his Prague speech has announced that locking up loose nuclear materials around the globe during his first administration will be a very high priority. He's asked Vice President Biden to help with that. I believe that DOD can play a role, working together with the Departments of State and Energy and other allies, in expediting this effort, because there is no greater threat to our national security than, God forbid, a group like al Qaeda getting its hands on an improvised nuclear weapon.

Senator HAGAN. Do you have any area that you would target first?

Mr. WEBER. DOD under the guidance of the National Security Council, together with the Department of Energy, is working on developing a campaign plan. There are a number of countries that have weapons-usable materials. Some are more cooperative than others. A lot of work has been done in this area over the past 10 or 15 years.

We're left with some of the more difficult countries. It's going to take a lot of effort. But as I tell my colleagues, when Senators Nunn and Lugar created the Nunn-Lugar program they didn't tell anybody it was going to be easy. There's a lot of work to do, but we have a great team in the U.S. Government, and with presidential interest and support I think we will accomplish that objective in the next 4 years.

Senator HAGAN. Last week we had the chairman and the vice chairman of the Congressional Commission on the Strategic Posture of the United States testify before this committee. They suggested the importance of obtaining Russian cooperation on air and

missile defense as a strategic message aimed to curtail the Iranian aspirations of developing nuclear weapons.

Once again a question for you: How do you think such an objective can be obtained?

Mr. WEBER. It's clear that we need Russian cooperation in this global effort to lock down loose nuclear material. We also need more Russian support of the international objective of preventing Iran from acquiring a nuclear weapons capability and mating that to their current ballistic missile capability.

I think President Obama has made this a personal priority. He's traveling this summer to Moscow to continue discussions with President Medvedev on this issue. But clearly we need more active Russian involvement in joining the international community to pressure the Government of Iran to forego its nuclear weapons and related enrichment programs.

Senator HAGAN. Dr. Stockton, key to protecting the United States is to ensure that critical energy infrastructure in strategic parts of the world, such as Saudi Arabia, are protected from asymmetric and unconventional attack, most notably from Iranian ballistic missile surrogates and proxies, as well as al Qaeda hubs in Yemen. These factors can affect the world's oil supply and affect our military capabilities to conduct operations in theater.

What are your thoughts in countering this threat and what types of capabilities do you foresee that we need?

Dr. STOCKTON. Thank you for the question, Senator. My office, the one for which I've been nominated, has some very important support functions. The Assistant Secretary of Defense for Special Operations and Low Intensity Conflict has primary responsibility for global counterterrorism, and some of that would involve protection of these very important energy facilities.

But my organization, the one which I'm proposed to head up, also has very significant responsibilities. Let me talk a little bit about those responsibilities and then what I'd do to help strengthen them.

First of all, this position is responsible for global anti-terrorism. That is, the protection of U.S. bases and other facilities abroad from terrorist attacks so they can execute their missions. I would ensure that I did everything possible to strengthen the ability of our forward-deployed forces to accomplish their responsibilities in protecting these critical energy resources.

Second, within the United States the position of Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs is responsible for defense-critical infrastructure protection. To the degree that DOD is dependent on sources of energy in order to execute its missions, both at home and abroad, again I would treat this responsibility very seriously, especially, as you note, the risk that our adversaries will attack us asymmetrically in ways in which we are not well prepared today as we should be.

Senator HAGAN. Thank you.

Mr. Lamont, a question for you, and this follows up a little bit on what Senator Webb was talking about. The United States Army Reserve Command will transition to Fort Bragg by 2011. I represent North Carolina and I've been to Fort Bragg a number of times recently, and they are doing an incredible job in a lot of the

housing, in particular for the married families. I think that's also attributed to the fact that when many of the people are deploying their spouses and families actually stay on base now, instead of returning home to their families in other States and other communities, which I think is very positive, in particular for the community of Fayetteville.

But one of the things that people are concerned about is the number of new people coming into that area and whether or not the infrastructure and the standards and requirements will be ready for this influx of new people.

Mr. LAMONT. I certainly share with you those concerns. Clearly, adequate housing for those new people will be paramount, and I would like to believe that in the deliberations concerning the transition there that they are making efforts to resource them adequately and address those family needs. I think in my new role it'll be very obvious that I will have to be involved in that situation.

Senator HAGAN. Another key component is education. I think we talked about the number of families with students involved, and I know the State government is doing a lot to help prepare, but I think that there will be such a large number of children going to the schools in the community also, that a lot of attention needs to be addressed to that issue.

Mr. LAMONT. The Army is aware of the large number of children in our Army families and we have to address that situation. Beyond housing, there is nothing more important than education in the minds of the family support groups at home. It's educating the children. We must do whatever we can to provide them with, not just an adequate education, but a good education.

Senator HAGAN. I really encourage you to spend a lot of time and energy being sure that does take place, because it is of crucial importance to those young children, but obviously to their parents, too.

Once again, congratulations to all of you and I look forward to working closely with you.

Thank you.

Chairman LEVIN. Thank you very much, Senator Hagan.

I just have a few additional questions for Mr. Blanchard and then, Senator Hagan, do you have any additional ones that you want to ask now? You can do that now if you'd like, because then you will be able to leave if you need to.

Senator HAGAN. I had another one for Dr. Stockton. Last week I had the opportunity to meet with the Ambassador from Mexico. He emphasized that drug trafficking violence in Mexico obviously has been affected by the availability of the assault rifles and extensive flow of cash emanating from the U.S. border in numerous places. In particular he was talking about El Paso, TX, while we were talking.

I was just wondering, what steps can we take in working with the Mexican Government and security officials to curb the flow of cash and these assault rifles across the border?

Dr. STOCKTON. Senator Hagan, I haven't been briefed in detail yet on the policy opportunities that exist. But in general, I'm aware that Secretary Napolitano has expressed strong interest in ensuring that the border is treated from a two-way perspective. That is,

just as we are concerned about ensuring that we do whatever possible to prevent drugs and violence from coming north from Mexico, that the United States has a responsibility to do whatever is possible within the law to prevent the illicit flow of weapons and cash going down to Mexico.

Senator HAGAN. I think it's something that obviously is of a concern.

Thank you.

Chairman LEVIN. Thank you, Senator Hagan.

Mr. Blanchard, we just received a devastating report on the Air Force acquisition system that was prepared by the Center for Naval Analysis at the request of the Secretary of the Air Force. The report says in part that: "Today the Air Force acquisition community is a mere shell of its former self. Since the mid-1990s, not only has cost growth for Air Force programs been rising at an ever-increasing rate, but it seems worse than the cost performance of its system services. Every day it seems there's a new story in the public media suggesting Air Force acquisition incompetence."

Some of the well-publicized Air Force problems include the presidential helicopter, the tanker lease program, and the improper sole source contracts awarded in the so-called Thunder Vision case. Now, I'd like to ask you about what role you expect to play in the acquisition system? More particularly, will you be limited to defending the Air Force in bid protests and other legal actions, or are you going to be able to play a more proactive role in making sure that the Department complies with law and regulation from the outset?

Mr. BLANCHARD. Mr. Chairman, Secretary Donley has made it very clear that acquisition reform and improving the acquisition workforce in the Air Force is one of his top priorities and that I need to play a major role; and that, if confirmed for this position, I would expect acquisition issues to be one of the top priorities. That includes not coming in at the end of the process, and making sure that I, if confirmed, and other lawyers are involved early on in the process.

Chairman LEVIN. Which means proactively?

Mr. BLANCHARD. Absolutely.

Chairman LEVIN. This committee has always valued the important role that's been played by judge advocates general of the military departments in providing independent legal advice to the chiefs of staff. Now, there were a number of attempts to subordinate the legal functions and authorities of the judge advocates general to the general counsels of the Air Force and the other military departments, and we in response to that enacted legislation prohibiting any officer or employee of DOD from interfering with the ability of The Judge Advocates General of the Military Services to provide their independent advice to the respective service chiefs.

Will you comply fully with that legislation if you're confirmed?

Mr. BLANCHARD. Absolutely.

Chairman LEVIN. Can you describe your relationship which you expect to have with the JAG of the Air Force?

Mr. BLANCHARD. In my view, the best relationship is a partnership. It's where you recognize the special expertise that comes from years of service in the Air Force. They know the Air Force better

than I could possibly learn the Air Force, so I need to have that understanding. They know law of war issues and they also obviously know military justice issues, which is why they have the special role for military justice.

I expect to have a collegial, cooperative relationship, much as I had when I was General Counsel of the Army. I understand that our aim is to have concurrence in our legal opinions, but if there comes a day when we have a different point of view I think our client, the Air Force, is best served when both legal views are expressed.

Chairman LEVIN. So you're going to respect and defend that independence?

Mr. BLANCHARD. Absolutely.

Chairman LEVIN. Mr. Blanchard, during the last few years there has been a number of issues regarding religious practices in the military that have gained some attention. They've required some revision of Air Force policies. Some of those issues involved some senior officers who used their position to proselytize other military personnel. They've also involved on the other side military chaplains who expressed concern that they're constrained in their ability to offer public prayer in accordance with their beliefs.

Can you give us some views on the authority of the Air Force relative to the rights of military personnel who have different religious beliefs or no religious beliefs, for that matter, not to be proselytized?

Mr. BLANCHARD. Yes, Mr. Chairman. I believe it's really important that we recognize that there are two parts of the First Amendment that deal with religion, the Establishment Clause and the Free Exercise Clause, and they both come into play. The Establishment Clause really requires that we be very careful that our leaders don't inject religion into areas where it's inappropriate to interject religion, and that's the experience I understand the Air Force had at the Air Force Academy and other areas, where there was a concern that subordinates felt that if they didn't have a particular religious view that would not be respected. It's very important that we be very careful in those settings.

On the other hand, we also need to respect the free exercise of religion by our airmen, which means that we need to help facilitate their religious beliefs. So I think the current policies the Air Force has adopted in light of recent events are appropriate, but I also understand that you can't just say, problem solved, put it away, and go on to the next problem. This is an area by its very nature that has some tension and has to be watched very carefully by senior leaders.

Chairman LEVIN. Will you keep an eye on that issue, and particularly the policy clarification which resulted from some excesses where people were confronted with religious views and put in a position where they were forced to listen, in effect, to religious views which they felt reflected one particular segment of our religious community?

Mr. BLANCHARD. Yes, Mr. Chairman.

Chairman LEVIN. Senator Hagan, are you all set?

Senator HAGAN. Yes.

Chairman LEVIN. I just have one additional question of Mr. Weber. How old is your daughter Eleanor Jane? Is that her name, Eleanor Jane?

Mr. WEBER. Yes, Senator, her name is Eleanor Jane.

Chairman LEVIN. How old is she? Because she's amazing.

Mr. WEBER. She's been very good. It's been a help to have my family behind me. She's 5 years old, Senator. She's at the Tuckahoe Elementary School in Arlington, VA.

Chairman LEVIN. Well, I have three daughters, all of whom at one point were 5 years old. I have five grandchildren, four of whom are granddaughters, three of whom have been 5 years old. I can only tell you your young daughter is truly amazing. She has sat there looking absolutely enthralled and entranced with every question we asked, and she doesn't have the vaguest idea I'm talking to her, but some day you can just tell her what a big hit she was. Would you do that for all of us?

Mr. WEBER. I will. Thank you, Mr. Chairman.

Chairman LEVIN. Dr. Stockton, you're going to get your answers in quickly for the record that Senator McCain asked. It's important that those prehearing questions be answered fulsomely.

We congratulate you all and look forward to a speedy confirmation, and we'll stand adjourned.

[Whereupon, at 11:31 a.m., the committee adjourned.]

[Prepared questions submitted to Andrew C. Weber by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and the chain of command by clearly delineating the combatant commanders' responsibilities and authorities and the role of the Chairman of the Joint Chiefs of Staff. These reforms have also vastly improved cooperation between the Services and the combatant commanders, among other things, in joint training and education and in the execution of military operations.

Do you see a need for modifications of any Goldwater-Nichols Act provisions?

Answer. At this point I do not. However, if confirmed I will remain sensitive to the goals that Goldwater-Nichols set forth to facilitate jointness in operations, command and control, and acquisition.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. If confirmed and in the exercise of my duties I became convinced of the desirability of a modification of a Goldwater-Nichols Act provision, I would consult closely with the Department of Defense (DOD) leadership and Congress.

DUTIES

Question. What is your understanding of the duties and functions of the Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs?

Answer. The Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs (ATSD(NCB)) advises the Secretary of Defense on nuclear and radiological matters and chemical and biological defense, to support strategic direction, oversight, and integration of DOD Countering Weapons of Mass Destruction (WMD) activities, and to ensure that resources and the development of Countering WMD operational capabilities are aligned with national policy, strategy and the requirements of combatant commanders.

Question. The primary function of the Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs is to ensure that the nuclear stockpile remains safe, secure, and reliable.

If confirmed, what steps will you take to ensure that the Secretary receives full and complete technical advice on the nuclear stockpile?

Answer. If confirmed, I will place a very high priority on working closely with the Secretary and the Members of the Nuclear Weapons Council (NWC) in overseeing the Nation's nuclear stockpile and ensuring the Secretary receives comprehensive, excellent quality technical advice on all aspects of the stockpile.

Question. The Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs serves as the Executive Director of the NWC.

If confirmed what steps will you take to ensure that the NWC duties are effectively executed?

Answer. At this time, it would be premature to identify specific steps. If confirmed, I intend to work energetically with the NWC to ensure that it effectively carries out its statutorily mandated duties. Reporting to and consulting closely with Congress is an important component of the execution of the Board's duties.

Question. Assuming you are confirmed, what additional duties and functions do you expect that the Secretary of Defense would prescribe for you?

Answer. If confirmed, I expect the Secretary to direct me to support his emphasis on re-establishing the professionalism, dedication, and attention to detail necessary to maintain the Department's nuclear weapons in a safe and secure manner. In addition, I expect he will ask me to oversee the Cooperative Threat Reduction Program, the Chemical Weapons Demilitarization Program, the Defense Threat Reduction Agency (DTRA), and the Chemical and Biological Defense Programs.

RELATIONSHIPS

Question. If confirmed, how will you work with the following officials in carrying out your duties:

The Secretary of Defense.

Answer. If confirmed, I expect to report directly to the Under Secretary of Defense for Acquisition, Technology and Logistics (USD(AT&L)), and through him and the Deputy Secretary and Secretary. On matters directly affecting my technical responsibilities (safety, security, and reliability of the stockpile), I expect to have direct access to the Secretary as needed.

Question. The Deputy Secretary of Defense.

Answer. If confirmed, I would report through the USD(AT&L) to the Deputy Secretary of Defense. I would also have direct access to the Deputy Secretary in my role as the Executive Secretary of the NSPD-28 Committee of Principals, which the Deputy Secretary chairs.

Question. The Under Secretaries of Defense.

Answer. If confirmed, I would report directly to the USD(AT&L). I would also work closely with Under Secretary of Defense for Policy (USD(P)) to insure the Secretary's nuclear, chemical and biological defense policies, both home and abroad, are understood and implemented. I would work closely with the Under Secretary of Defense Comptroller (USD(C)) and Under Secretary of Defense for Personnel and Readiness (USD(P&R)) to ensure nuclear, chemical and biological defense, and chemical demilitarization programs are adequately resourced and staffed.

Question. The Service Secretaries.

Answer. If confirmed, I will work with the Service Secretaries to ensure that nuclear, chemical and biological defense, and chemical demilitarization programs are given the high priority they deserve.

Question. The commanders of the combatant commands, particularly U.S. Strategic Command, U.S. Special Operations Command, and U.S. Northern Command.

Answer. If confirmed, I would work closely with the combatant commanders to ensure that they have the appropriate systems needed to execute their chemical, nuclear, and biological defense mission.

Question. The Assistant Secretary of Defense (ASD) for Homeland Defense and America's Security.

Answer. If confirmed, I would work closely with the ASD for Homeland Security to ensure that Nuclear, Chemical, and Biological Defense programs and DTRA meet his requirements.

Question. The Assistant Secretary of Defense for Global Strategic Affairs.

Answer. If confirmed, I would work with the ASD for Global Strategic Affairs to ensure that the policy requirements for Nuclear, Chemical and Biological Defense Programs are met. I would also expect to work closely on programs to counter WMD, including the Cooperative Threat Reduction Program.

Question. The ASD for Special Operations and Low Intensity Conflict (SOLIC) and Independent Capabilities.

Answer. If confirmed, I would work closely with ASD(SOLIC) to insure the Secretary's nuclear, chemical and biological defense policies are consistent, understood by our forces and allies, and are being properly implemented.

Question. The Director of the Defense Threat Reduction Agency.

Answer. If confirmed, the Director of DTRA would report to me regarding his responsibilities in combat support, the Cooperative Threat Reduction Program, counter proliferation, on-site inspection, research and development, and chemical and biological defense programs.

Question. The Secretary of Energy.

Answer. If confirmed, I would work with the Secretary of Energy and his staff on issues related to the nuclear stockpile, nonproliferation and counterterrorism.

Question. The Administrator and Deputy Administrators of the National Nuclear Security Administration.

Answer. As partners in the nuclear weapons program, if confirmed, I would work closely with both the Administrator and Deputy Administrator to ensure there are sufficient reliable, safe, and secure weapons to support deterrence, and the Nation has the capability to maintain them.

Question. Officials in the Department of Homeland Security (DHS) with responsibilities for nuclear, chemical, and biological homeland defense matters.

Answer. ATSD(NCB) and DHS are partners in a number of areas such as nuclear detection, nuclear forensics, chemical and biological defense, and counter-proliferation. I will work closely with DHS to ensure programs in these areas are mutually supportive.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. I have been privileged to dedicate 24 years of continuous public service to strengthening U.S. national security and countering the threat of WMD. My experience leading sensitive projects to reduce nuclear, chemical and biological weapons threats will serve me well if I am confirmed in the position of Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs?

Answer. As with every new position I have taken during my long career in public service, if confirmed I will expend considerable effort studying those areas of the portfolio for which I do not have in depth experience. In addition to extensive briefings and meetings with counterparts and subject matter experts, I would early on visit the facilities where important work on nuclear, chemical and biological defense programs takes place. If confirmed, I would also focus on ensuring that I have the best possible team in place to successfully execute the duties of the office.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that will confront the Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs?

Answer. First, making sure that a high priority is placed ensuring that Department's nuclear weapons are safe, secure and reliable. Second, to improve our Nation's defensive preparations for an enemy's potential use of nuclear, biological or chemical weapons. Third, promoting the rapid and safe demilitarization of our chemical weapons stockpile. Fourth, continuing and expanding the Cooperative Threat Reduction program beyond the Former Soviet Union to help prevent the proliferation of WMD.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. To meet the first challenge, I intend to focus on the actions taken to date, review the DTRA conducted inspection reports to ensure the follow-up actions are effective and work with each stakeholder to ensure the proper focus on nuclear policies and procedures. For the second challenge, I would work with stakeholders to enhance the nation's ability to defend against potential WMD attacks. For the third challenge, I intend to closely monitor the execution of the Chemical Demilitarization Program. For the fourth challenge, I intend to work with OSD Policy and DTRA to ensure that there is strong acquisition oversight of the CTR program as it expands.

Question. What do you anticipate will be the most serious problems in the performance of the functions of the Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs?

Answer. The most serious problem will be enabling the nuclear enterprise to meet the challenges of an aging stockpile and infrastructure in order to maintain a safe, secure, reliable, and credible deterrent.

Question. If confirmed, what management actions and time lines would you establish to address these problems?

Answer. I would consult closely with the NWC and Congress regarding the findings of the Congressional Commission on the Strategic Posture of the United States and the ongoing Nuclear Posture Review.

PRIORITIES

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed by the Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs?

Answer. First, placing a high priority on a safe, secure, reliable and credible deterrent. Second, furthering the acceleration of our national capability to respond to new and emerging nuclear, biological and chemical threats. Third, continuing and expanding the CTR program to prevent proliferation of WMD. Fourth, continue to maintain a strong NWC.

REPORTING CHAIN

Question. Section 142 of title 10, U.S.C., requires that the Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs advise the Secretary of Defense on nuclear energy, nuclear weapons, and chemical and biological defense programs. The responsibilities for chemical and biological defense were added to the Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs in 1996. The position was originally created as the Assistant to the Secretary of Defense to ensure direct and timely access to the Secretary of Defense in the event that any matter implicating the safety, security, or reliability of the nuclear weapons stockpile needed to be immediately provided to the Secretary.

What is your understanding of to whom you would report, if confirmed, within DOD, and who would report to you?

Answer. If confirmed, I would report to USD(AT&L), and through him and the Deputy Secretary and Secretary of Defense.

Question. If confirmed, would you expect to have direct and timely access to the Secretary of Defense for matters pertaining to the safety, security, and reliability of nuclear weapons?

Answer. Yes.

NUCLEAR WEAPONS COUNCIL

Question. Section 179 of title 10 of the U.S.C. designates the Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs as the Executive Director of the NWC. The Chairman of the NWC is the Under Secretary of Defense for Acquisition, Technology, and Logistics.

Would it be your expectation, if confirmed, to have direct responsibility, authority, direction, and control of all the assets, resources, and personnel needed to fulfill the responsibilities of Executive Director of the NWC?

Answer. Yes.

Question. If confirmed as Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs, how frequently would you expect the NWC to meet and, in your view, would that be sufficient to meet the obligations of the Council?

Given the large number of critical issues that are on the agenda of the NWC, I would expect the NWC to meet more frequently than the statutory minimum of four times per year.

If confirmed as Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs, how would you ensure that the NWC carries out its statutorily mandated duties?

Answer. If confirmed, I intend to work personally with each of the members of the Council to ensure it effectively carries out its statutorily mandated duties.

Question. Are there any changes that you would recommend to the membership, organization, or structure of the NWC?

Answer. Based on my current knowledge, I do not see the need to recommend structural changes to the NWC at this time. If confirmed, I would evaluate this issue.

Question. What do you see as the challenges that face the NWC in the next 4 years and what would you do to address these challenges?

Answer. The foremost challenges I see are the need to support the Nuclear Posture Review and implement its findings; address mounting concerns in the aging stockpile; and ensure that we have the human capital and resources required to maintain a safe, secure, reliable, and credible stockpile.

ORGANIZATIONAL STRUCTURE OF THE OFFICE OF THE ASSISTANT TO THE SECRETARY

Question. What is your understanding of the organizational structure of the office of the Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs?

Answer. My understanding is that there is currently a Principal Deputy who is also responsible for Nuclear, Chemical and Biological Treaty Management, a Nuclear Matters Deputy, a Chemical and Biological Defense Programs and Chem Demil Deputy, and the Director of DTRA, who reports to the ATSD(NCB). In addition, there are supporting staff to enable the functions of the office.

Question. Do you believe this structure is adequate or would you make any changes if confirmed?

Answer. If confirmed I plan to evaluate the structure and make specific changes as appropriate.

NUCLEAR WEAPONS AND THE STOCKPILE STEWARDSHIP PROGRAM

Question. Do you believe that there are any technical reasons to resume nuclear weapons testing at the present time or at any foreseeable time in the future?

Answer. No.

Question. Do you support the Stockpile Stewardship Program?

Answer. Yes.

Question. Do you believe that the Stockpile Stewardship Program is capable for the foreseeable future of supporting the nuclear weapons stockpile without nuclear weapons testing?

Answer. Yes.

Question. What are your views on the current moratorium on nuclear weapons testing?

Answer. I support the moratorium.

Question. What are your views on the Comprehensive Test Ban Treaty (CTBT)?

Answer. I support the President's position regarding ratification of the CTBT.

Question. In your view, are there any additional capabilities that the Stockpile Stewardship program should develop?

Answer. If confirmed I would consult with counterparts to determine what, if any, additional capabilities should be developed to maintain a safe, secure, reliable, and credible deterrent.

Question. What are your views on the feasibility and certifiability (without nuclear testing) of the Reliable Replacement Warhead (RRW)?

Answer. My understanding is the RRW was technically feasible within existing policy.

Question. What role would you play in establishing requirements to ensure security of nuclear weapons in the custody of the Military Services?

Answer. If confirmed, I intend to review the current program and make any necessary changes or recommendations to ensure the security of our nuclear weapons.

Question. If confirmed, how quickly and under what circumstances would you inform Congress in the event there is ever any problem with any nuclear warhead?

Answer. As quickly as possible, and in accordance with statutory requirements.

Question. If confirmed, what role, if any, do you anticipate you will play in reviewing the size and makeup of the nuclear weapons stockpile?

Answer. If confirmed, I would expect to be a major voice in recommending to the Secretary the size and makeup of the nuclear weapons stockpile.

Question. If confirmed, what role, if any do you anticipate you will play in the annual certification process?

Answer. I would expect to support the annual certification process in my role as Executive Director for the NWC.

Question. Do you believe the annual certification process is adequate or would you recommend any changes?

Answer. At this time, I have no reason to doubt the adequacy of the current process. It would be premature to recommend any changes.

SECURITY OF THE NUCLEAR WEAPONS STOCKPILE

Question. If you are confirmed, what role would you have and do you believe the NWC should have in developing, implementing, and overseeing implementation of nuclear security orders and regulations?

Answer. Both the ATSD(NCB) and the NWC have responsibilities to insure that our nuclear weapons are secure. Monitoring security operations and implementation policies, reviewing inspection reports, and insuring sufficient funding for Service security programs are some of those responsibilities.

Question. If confirmed what role would you play in nuclear security and nuclear operational inspections?

Answer. If confirmed, I would expect to review all DTRA conducted inspections. Additionally, I would expect to review all Service conducted inspections and of the results of the Mighty Guardian Force on Force exercises.

DEGRADATION IN NUCLEAR EXPERTISE, TECHNICAL RIGOR, AND COMPLIANCE WITH REGULATIONS, RULES, AND ORDERS

Question. Over the course of the last 18 months there have been a number of instances within DOD of inattention, sloppiness, and intentional disregard for nuclear rules, orders and regulations. The reviews that have been conducted as a result of these incidents have identified degradation in the attention to nuclear matters as one of the root causes of the many incidents.

If confirmed, what role would you anticipate you would play and the NWC would play in restoring discipline and credibility in the nuclear enterprise within DOD and military Services?

Answer. If confirmed, I expect to personally work with the Secretary, Service Secretaries, and the NWC continuing to restore discipline and credibility of the nuclear enterprise and continue to implement necessary reforms to ensure the highest standards for safeguarding our Nation's nuclear weapons.

IMPLEMENTATION OF THE ADMIRAL DONALD REPORT

Question. If confirmed, what role, if any, would you expect to play in implementing corrective actions recommended by Admiral Donald in his report on the security of nuclear weapons in the Air Force?

Answer. I have not been briefed on the Admiral Donald Report, and it would not be appropriate to comment on it at this time. If confirmed, I will review it carefully and evaluate the progress on implementation of its recommendations.

Question. Are there any aspects of the report with which you disagree?

Answer. I have not been briefed on the report and cannot comment at this time.

IMPLEMENTATION OF THE DEFENSE SCIENCE BOARD REPORT

Question. At the end of 2008, the Defense Science Board (DSB) also completed a review of the nuclear enterprise in DOD and made recommendations. If confirmed, what role, if any, would you expect to play in implementing corrective actions recommended by the DSB?

Answer. I have not had the opportunity to meet with this DSB task force and be briefed on their findings. If confirmed, I expect to work with the Secretary and the NWC on any necessary corrective actions identified in the Defense Science Board review.

Question. Are there any aspects of the report with which you disagree?

Answer. As stated above, I have not yet read the report. If confirmed, I intend to work with the Secretary and the NWC in overseeing implementation of appropriate recommendations.

CHEMICAL AND BIOLOGICAL DEFENSE PROGRAM

Question. Section 142 of title 10, U.S.C., states that the Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs shall advise the Secretary of Defense on chemical and biological defense, as well as on nuclear matters. Your background is primarily in biological threat reduction and related issues.

If confirmed, how would you plan to become familiar with the issues and technology associated with chemical and biological defense matters?

Answer. I am familiar with the issues and technology associated with chemical and biological defense matters based upon my prior experience in the Office of the Secretary of Defense. If confirmed, I will increase my knowledge of the current programs and issues in the NCB portfolio. I believe that to fully understand the NCB Defense Programs for which I would have oversight I will engage the elements of

the Chemical and Biological Defense Program (CBDP), the CDP, and DTRA at their locations. I will visit early on the demilitarization sites and the CBDP research laboratories.

CHEMICAL AND BIOLOGICAL DEFENSE MATTERS

Question. If you are confirmed, what do you expect your roles and responsibilities would be with respect to chemical and biological defense matters?

Answer. The ATSD(NCB) is the principal staff advisor to the Secretary on Chemical and Biological Defense matters. The ATSD(NCB) is responsible for oversight, coordination, and integration of the Chemical and Biological Defense Program. If confirmed, I would expect to work closely with the Services, Joint Program Executive Office for Chemical and Biological Defense, and DTRA to meet those responsibilities.

Question. If confirmed, would you review the chemical and biological defense program and make any needed recommendations to Congress for improving the program?

Answer. Yes.

Question. What are your general priorities with respect to the Chemical and Biological Defense Program?

Answer. The general priorities for the Chemical and Biological Defense Program are: contamination avoidance, protection, and enhancing the Department's ability to respond to emerging biological and chemical threats.

INTERACTION WITH OTHER FEDERAL AGENCIES ON CHEMICAL AND BIOLOGICAL MATTERS

Question. DHS and the Department of Health and Human Services play important roles in planning and implementing U.S. policy and programs for protecting the United States against biological and chemical threats, including the development and stockpiling of vaccines and therapeutic products.

If confirmed, how would you work with these agencies to ensure the effective coordination and collaboration of efforts to improve U.S. security against biological and chemical threats?

Answer. If confirmed I would work with each of these Agencies to insure that programs are mutually supportive, avoid duplication, and share results.

WMD COMMISSION VIEW ON BIOLOGICAL THREATS

Question. The Commission on the Prevention of WMD Proliferation and Terrorism concluded that "terrorists are more likely to be able to obtain and use a biological weapon than a nuclear weapon," and also that "the U.S. Government needs to move more aggressively to limit the proliferation of biological weapons and reduce the prospect of a bioterror attack."

If confirmed, what approach would you take to reducing the risks and consequences of a biological terror attack against the United States?

Answer. I would continue the current Departmental emphasis to protect military forces from current and/or emerging biological threats through aggressive research and development, and proactive coordination and integration with the Departments of Homeland Security and Health and Human Services. I would also work to strengthen the Department's Nunn-Lugar Biological Threat Reduction Program to prevent such threats.

TRANSFORMATIONAL MEDICAL TECHNOLOGY INITIATIVE

Question. DOD has undertaken a Transformational Medical Technology Initiative (TMTI) for chemical and biological defense. The purpose of this initiative is to pursue broad spectrum approaches to protecting our military forces against a wide variety of threats, including genetically engineered biological threats. One of the objectives of the program is to develop advanced means of rapid and affordable vaccine production.

What are your views on the value of this initiative, and would you support it if confirmed?

Answer. Yes, I would support TMTI as a high value initiative within the Department. I understand it has developed a preliminary end-to-end capability for response to emerging and engineered biological threats. I am aware TMTI is a vital part of the National Biodefense Strategy and the Integrated National Biodefense Medical Countermeasures Portfolio, which is coordinated with Executive Office of the President, DOD, and the Department of Health and Human Services.

VACCINE DEVELOPMENT AND ACQUISITION

Question. What role would you expect to play, if confirmed, in ensuring that vaccines and therapeutic products needed to ensure protection and medical treatment of military and civilian employees of DOD are developed and acquired in a timely and effective manner?

Answer. If confirmed I would work closely with the ASD for Health Affairs to ensure medical treatment and protection of deployed U.S. servicemembers and civilian employees are developed and acquired. As the ATSD(NCB) I will work through our Joint Program Executive Office for Chemical and Biological Defense which is responsible for the development, procurement, fielding, and sustaining of premier medical protection and treatment capabilities against chemical and biological warfare agents.

CHEMICAL DEMILITARIZATION ISSUES

Question. Since 2001, responsibility and oversight for the chemical demilitarization program within DOD have been under the Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs.

If confirmed, would responsibility for and oversight of the chemical demilitarization program remain within your office?

Answer. Yes.

Question. The United States is a party to the Chemical Weapons Convention (CWC) and, under the terms of the treaty, is obligated to destroy its chemical weapons stockpile by no later than the extended deadline of April 2012.

Do you agree that the United States should take all necessary steps to meet its obligations under the CWC?

Answer. Yes.

Question. If confirmed, what actions would you take to ensure adequate funding is requested to permit the most expeditious destruction of the U.S. chemical weapons stockpile, consistent with the legal requirement to protect public health, safety, and the environment?

Answer. If confirmed, I will review the current program to ensure that priorities, funding, and operations are consistent with its objectives. If additional funding is needed, I will support those requests.

Question. On April 10, 2006, Secretary of Defense Rumsfeld notified Congress that the United States would not meet the extended deadline under the CWC for destruction of the United States chemical weapons stockpile, but would "continue working diligently to minimize the time to complete destruction without sacrificing safety and security," and would also "continue requesting resources needed to complete destruction as close to April 2012 as practicable."

If confirmed, what actions would you take to ensure the full implementation of those commitments?

Answer. If confirmed, I will review the program against those commitments and make any necessary changes or recommendations needed to ensure full implementation.

CONSEQUENCE MANAGEMENT OF CHEMICAL, BIOLOGICAL, RADIOLOGICAL, NUCLEAR, OR HIGH-YIELD EXPLOSIVE INCIDENTS

Question. DOD has a mission of providing support to civil authorities for consequence management of domestic chemical, biological, radiological, nuclear, or high-yield explosive (CBRNE) incidents, if directed by the President or the Secretary of Defense. Since 2002, the ASD for Homeland Defense and Americas' Security Affairs and the Commander of U.S. Northern Command have had responsibilities for planning and executing that mission.

If confirmed, how would you expect to work with the ASD for Homeland Defense and Americas' Security Affairs and the Commander of U.S. Northern Command on issues related to the Department's capabilities to provide support to civil authorities for CBRNE consequence management, as well their homeland defense missions related to nuclear, chemical, or biological weapons or materials?

Answer. ATSD(NCB) oversees a number of programs designed to provide DOD CBRNE responders with equipment, training, command and control support, logistical planning, and technical support. If confirmed I will insure that these programs are responsive to the needs of ASD (HD) and combatant commands.

Question. DHS is the lead Federal agency for planning, coordinating, and implementing consequence management of CBRNE incidents in the United States, in conjunction with the States and territories.

If confirmed, what relationship would you expect to have with DHS and its component entities?

Answer. If confirmed I would expect to coordinate closely with DHS for planning, coordinating, and implementing consequence management of CBRNE incidents.

Question. What do you believe is the appropriate role for DOD in providing support to civil authorities for CBRNE consequence management?

Answer. A CBRNE event would most likely constitute a national emergency. DOD's role should be to provide whatever support and assets that the President requested in order to save lives, minimize damage, and facilitate recovery.

Question. If confirmed, what role would you expect to have in regard to the oversight of DOD capabilities related to consequence management of CBRNE incidents?

Answer. If confirmed, I would expect my role to be a senior advisor to the Secretary of Defense on consequence management capabilities. This would include the states use of Title 32 assets including their WMD Civil Support Teams and CBRNE Enhanced Response Force Packages.

COOPERATIVE THREAT REDUCTION PROGRAMS (NUNN-LUGAR PROGRAMS)

Question. Do you support the Cooperative Threat Reduction Programs?

Answer. Yes.

Question. If confirmed, would you support joint research programs between Russia and the United States in the areas of chemical or biological weapons defense?

Answer. Yes.

Question. What is your understanding as to your responsibilities with respect to the Cooperative Threat Reduction programs?

Answer. The ATSD(NCB) has oversight responsibility for the implementation of the CTR program.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Question for the record with answer supplied follows:]

QUESTION SUBMITTED BY SENATOR SUSAN COLLINS

EMERGENCY PREPAREDNESS

1. Senator COLLINS. Mr. Weber, one of the most disturbing conclusions of the Commission on the National Guard and Reserves report was the assertion that there was "an appalling gap" in our Nation's ability to respond to the use of a weapon of mass destruction on our soil. Specifically, the Commission expressed concern that the forces that would respond to such events had not been fully budgeted for, sourced, manned, trained, or equipped. In a hearing earlier this year, General Victor Renuart stated that he felt that gap no longer existed, and he pointed to the establishment of Chemical, Biological, Radiological, Nuclear, and Explosive (CBRNE) Consequence Management Response Forces (CCMRFs)—one already stood up with two more on the way—as evidence of this. It is my understanding that Guard and Reserve personnel will comprise a substantial amount of these units. However, in

the event of something as catastrophic as the detonation of a nuclear weapon in an American city, it seems likely that Governors are going to have a significant need for these troops. As has been discussed in several hearings held by the Senate Homeland Security and Governmental Affairs Committee, such an event may necessitate closing down interstate highways and major transportation hubs, handling evacuees from other States, and maintaining civil order in the event that people begin evacuating major cities out of a fear of other nuclear weapons being detonated. Do you believe that the States that will be required to provide these troops to the CCMRF units are going to actually be prepared to release them in the event of a catastrophic incident?

Mr. WEBER. The release of Guard and Reserve personnel to support the CBRNE CCMRFs is not under the purview of the Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs as I understand the functions of my office. However, the employment of Guard and Reserve troops in response to something as catastrophic as the detonation of a nuclear weapon in an American city is a vital concern to the department and I am evaluating my office's role in this matter.

[The nomination reference of Andrew C. Weber follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
April 29, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Andrew Charles Weber, of Virginia, to be Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs, vice Frederick S. Celec.

[The biographical sketch of Andrew C. Weber, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF ANDREW C. WEBER

Andy Weber is currently Adviser for Threat Reduction Policy in the Office of the Secretary of Defense, where he has been serving since 1996. For the past 13 years his responsibilities have included the Nunn-Lugar Department of Defense Cooperative Threat Reduction Program. He played a key role in Nunn-Lugar operations to remove weapons grade uranium from Kazakhstan and Georgia, and nuclear capable MiG-29 aircraft from Moldova. Mr. Weber developed and oversees the Department of Defense Biological Threat Reduction Program, which prevents the proliferation of pathogens, technology, and expertise. For his work at the Department of Defense, Mr. Weber has twice been awarded the Exceptional Civilian Service Medal.

Most of Mr. Weber's 24 years of public service have been dedicated to reducing the threat of weapons of mass destruction. He served previously as a United States Foreign Service Officer, and his diplomatic assignments included Saudi Arabia, Germany, Kazakhstan, and Hong Kong.

Since 2002 Mr. Weber has taught a course on Force and Diplomacy at the Edmund A. Walsh Graduate School of Foreign Service of Georgetown University.

He is a graduate of Cornell University, and has a Master's of Science in Foreign Service from Georgetown University.

Mr. Weber speaks Russian and is a member of the Council on Foreign relations. He lives in Arlington, VA, with his wife Julie and daughter Eleanor.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by Andrew C. Weber in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Andrew Charles Weber.

2. **Position to which nominated:**
Assistant to the Secretary of Defense for Nuclear, Chemical, and Biological Defense Programs.

3. **Date of nomination:**
April 29, 2009.

4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**
April 28, 1960; New York City, NY.

6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Julie Powell Holt.

7. **Names and ages of children:**
Eleanor Jane Weber, age 5.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
Edmund A. Walsh School of Foreign Service, Georgetown University, Washington, DC, M.S.F.S. 1986 (1984-1986).
Cornell University, Ithaca, NY, B.A. 1982 (1978-1982).
Scarsdale High School, Scarsdale, NY, 1978 (1974-1978).

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.
Adviser for Threat Reduction Policy, Office of the Secretary of Defense, U.S. Department of Defense, July 1999-present.
Special Adviser for Threat Reduction Policy, Detailed from Department of State to the Office of the Secretary of Defense, December 1996-July 1999.

10. **Government experience:** List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed above.

U.S. Department of State, Analyst, 1985-1986.

U.S. Foreign Service Officer, U.S. Department of State, 1986-1999:

Training Assignment (1986-1987)

Vice Consul, U.S. Consulate Jeddah (1987-1989)

Political Officer, U.S. Embassy Bonn (1990-1992)

Russian Language Training, Middlebury, VT, and Arlington, VA (1992-1993)

Political Officer, U.S. Embassy Almaty (1993-1995)

Political Officer, U.S. Consulate Hong Kong (1995-1996)

Detail from the Department of State to the Office of the Secretary of Defense, Special Adviser for Threat Reduction Policy, Office of the Deputy Assistant Secretary of Defense for Threat Reduction Policy (December 1996–July 1999)

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Edmund A. Walsh Graduate School of Foreign Service, Adjunct Faculty (2002–present).

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Council on Foreign Relations, member.

The Textile Museum, Advisory Council member.

International Hajji Baba Society (rugs and textiles), board member.

Overlee Association, swimming pool membership.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

Obama for America, volunteer (2008).

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

Obama for America, \$4,600 (\$2,300 primary, \$2,300 general).

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Nunn-Lugar Award for Outstanding Contribution to Global Security (2006).

U.S. Department of Defense Medal for Exceptional Civilian Service (2001, 2003).

Edward Weintal Fellowship, Edmund A. Walsh Graduate School of Foreign Service, Georgetown University (1985).

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

None.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

None.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

ANDREW C. WEBER.

This 11th day of May, 2009.

[The nomination of Andrew C. Weber was reported to the Senate by Chairman Levin on May 14, 2009, with the recommendation

that the nomination be confirmed. The nomination was confirmed by the Senate on May 18, 2009.]

[Prepared questions submitted to Dr. Paul N. Stockton by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. Goldwater-Nichols was landmark legislation that led to dramatic improvements in operational effectiveness, unity of effort, and civilian oversight. We now have a generation of military leaders for whom operating in a coordinated and joint, multi-Service environment is the norm. Given these successes, I do not see an immediate need to change the provisions of this legislation. If confirmed, I would hope to be in a position to help strengthen the U.S. Government's ability to craft effective whole-of-government approaches to the national security challenges we face.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. See my previous answer.

RELATIONSHIPS

Question. What do you see as the relationship between the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs and each of the following:

The Secretary of Defense.

Answer. Pursuant to the authority, direction, and control of the Under Secretary of Defense for Policy, the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs serves as the principal civilian advisor to the Secretary of Defense and the Under Secretary of Defense for Policy on Homeland Defense activities, Defense Support of Civil Authorities, and Western Hemisphere security matters.

Question. The Deputy Secretary of Defense.

Answer. The Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs provides support to the Deputy Secretary similar to that provided to the Secretary, as described above.

Question. The Under Secretary of Defense for Policy.

Answer. The Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs functions under the authority, direction and control of the Under Secretary of Defense for Policy and provides advice, counsel, and support to the Under Secretary on Homeland Defense, Defense Support of Civil Authorities, and Western Hemisphere security matters in interagency for a (such as National Security Council and Homeland Security Council deliberations), engagement with interagency and Western Hemisphere interlocutors, and in the Planning, Programming, Budgeting, and Execution (PPBE) processes inside the Department, including the Quadrennial Defense Review, the Quadrennial Roles and Missions Review, and annual program and budget reviews.

Question. The Under Secretary of Defense for Intelligence.

Answer. Pursuant to the authority, direction, and control of the Under Secretary of Defense for Policy, the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs works closely with, and provide homeland defense, Defense Support of Civil Authorities, and Western Hemisphere policy inputs to the Under Secretary of Defense for Intelligence to achieve the Secretary of Defense's objectives, particularly the defense of the United States from attack upon its territory at home and to secure its interests abroad in the Western Hemisphere.

Question. The Assistant Secretary of Defense for Special Operations and Low-Intensity Conflict.

Answer. The Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs works closely with the Assistant Secretary of Defense for Special Operations/Low Intensity Conflict and Interdependent Capabilities to provide the Under Secretary of Defense for Policy and the Secretary of Defense with advice and recommendations on policy issues regarding combating terrorism within the United States and policy oversight to ensure that the Secretary's guidance and decisions are implemented properly.

Question. The Assistant Secretary of Defense for International Security Affairs.

Answer. The Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs works closely with the Assistant Secretary of Defense for International Security Affairs to provide the Under Secretary of Defense for Policy and the Secretary of Defense with advice and recommendations on policy issues regarding emerging threats to the United States and policy oversight to ensure that the Secretary's guidance and decisions are implemented properly.

Question. The Assistant Secretary of Defense for Reserve Affairs and the civilian officials of the military departments in charge of Reserve affairs.

Answer. The Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs works closely with the Assistant Secretary of Defense for Reserve Affairs and the civilian officials of the military departments in charge of Reserve affairs on Department of Defense policy regarding the development, readiness, and employment of National Guard and Federal Reserve component forces within the United States and policy oversight to ensure that the Secretary of Defense's guidance and decisions are implemented properly.

Question. The Chief of the National Guard Bureau, and the Directors of the Army and Air National Guard.

Answer. The Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs works closely with the Chief of the National Guard Bureau, and the Directors of the Army and Air National Guard, particularly regarding the roles, capabilities, and readiness of the National Guard to support the homeland defense and civil support priorities and objectives of the Secretary of Defense.

Question. The Director of the Defense Intelligence Agency.

Answer. Pursuant to the authority, direction, and control of the Under Secretary of Defense for Policy, the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs works closely with, and provide homeland defense, Defense Support of Civil Authorities, and Western Hemisphere policy inputs to, the Director of the Defense Intelligence Agency to achieve the Secretary of Defense's objectives, particularly the defense of the United States from attack upon its territory at home and to secure its interests abroad in the Western Hemisphere.

Question. The Assistant Secretary of Defense for Health Affairs.

Answer. The Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs works closely with the Assistant Secretary of Defense for Health Affairs on Department of Defense policy, particularly regarding health force protection, the threat of biological terrorism, the medical aspects of domestic consequence management, and Defense Support of Civil Authorities.

Question. The Assistant Secretary of Defense for Networks and Information Integration.

Answer. The Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs works closely with the Assistant Secretary of Defense for Networks and Information Integration on programs, processes, and supporting infrastructures to provide for mission assurance, crisis management, and information sharing with DOD's Federal, State, local, and international partners.

Question. The Chairman and Vice Chairman of the Joint Chiefs of Staff and the Joint Staff.

Answer. As the principal military advisor to the Secretary of Defense, the President, the National Security Council, and the Homeland Security Council, the Chairman has a unique and critical military role. If confirmed as the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs, I will work closely with the Chairman and Vice Chairman to support the efforts of the Secretary and Deputy Secretary, and to ensure that their military advice is taken into account in an appropriate manner.

Question. The Commander of United States Northern Command and the North American Aerospace Defense Command.

Answer. The Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs works closely with the Commander of the North American Aerospace Defense Command and U.S. Northern Command to support the efforts of the Under Secretary of Defense for Policy, Secretary and Deputy Secretary, particularly

in the areas of homeland defense, Defense Support of Civil Authorities, and Western Hemisphere strategy and policy, contingency planning and policy oversight of operations.

Question. The Commander of United States Southern Command.

Answer. The Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs works closely with the Commander of the U.S. Southern Command to support the efforts of the Under Secretary of Defense for Policy, Secretary and Deputy Secretary, particularly in the areas of homeland defense, Defense Support of Civil Authorities, and Western Hemisphere strategy and policy, contingency planning and policy oversight of operations.

Question. The Commander of United States Pacific Command.

Answer. The Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs works closely with the Commander of the U.S. Pacific Command to support the efforts of the Under Secretary of Defense for Policy, Secretary and Deputy Secretary, particularly in the areas of homeland defense and Defense Support of Civil Authorities strategy and policy, contingency planning and policy oversight of operations.

Question. The Commander of United States Strategic Command.

Answer. The Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs works closely with the Commander of the U.S. Strategic Command to support the efforts of the Under Secretary of Defense for Policy, Secretary and Deputy Secretary, particularly in the areas of homeland defense and Defense Support of Civil Authorities strategy and policy, contingency planning and policy oversight of operations.

Question. The Director of the Defense Threat Reduction Agency.

Answer. The Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs, in coordination with the Under Secretary of Defense for Acquisition, Technology, and Logistics, works closely with the Director of the Defense Threat Reduction Agency, particularly regarding efforts in domestic chemical, biological, radiological, and nuclear threat reduction and defense, counterproliferation, and emergency response support and training.

Question. The Assistant to the Secretary of Defense for Nuclear, Chemical, and Biological Defense Programs.

Answer. The Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs works closely with the Assistant to the Secretary of Defense for Nuclear, Chemical, and Biological Defense Programs, particularly regarding DOD chemical, biological, and nuclear defense programs as they relate to homeland defense, antiterrorism/force protection, and Defense Support of Civil Authorities.

Question. The State Governors.

Answer. In accordance with title 50, U.S.C., the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs is responsible for coordinating DOD assistance to Federal, State, and local officials. Governors play a critical role in Homeland Security. If confirmed, I look forward to becoming more familiar with my responsibilities to support state governors and to take carefully into account their perspective on the role of DOD in this process.

DUTIES AND QUALIFICATIONS

Question. DOD Directive 5111.13 of January 16, 2009, states that the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs (ASD(HD&ASA)), "under the authority, direction, and control of the Under Secretary of Defense for Policy (USD(P)), serves as the principal civilian advisor to the Secretary of Defense and the USD(P) on homeland defense activities, Defense Support of Civil Authorities (DSCA), and Western Hemisphere security matters." It further elaborates that the ASD(HD&ASA) shall provide overall supervision of homeland defense activities of the Department of Defense (DOD) which include "Defense Critical Infrastructure Program (DCIP); domestic antiterrorism; the Defense Continuity Program; other homeland defense-related activities; and alignment of homeland defense policies and programs with DOD policies for counterterrorism and counternarcotics."

What is your understanding of the duties and functions of the Assistant Secretary of Defense (ASD) for Homeland Defense and Americas' Security Affairs position to which you have been nominated, and do they differ from those described in DOD Directive 5111.13?

Answer. My understanding of the duties and functions of the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs is consistent with those described in DOD Directive 5111.13, as well as other applicable DOD directives.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. As the founding director of the Center for Homeland Defense and Security at the Naval Postgraduate School in Monterey, California, I have led a wide range of graduate education and research programs in direct support of the Department of Defense the Department of Homeland Security, other Federal departments, and state and local agencies and elected officials across the United States. That position gave me an opportunity to closely listen to and learn from those on the front lines of strengthening homeland defense and security. My subsequent position as senior research scholar at Stanford University has enabled me to examine these issues in still greater detail.

My background and experience in Western Hemispheric Affairs security issues stemmed initially from staffing those regional issues for Senator D.P. Moynihan as his PRM in the Senate Foreign Relations Committee. Building on that expertise, I helped found and then directed the Center for Civil Military Relations (CCMR) at the Naval Postgraduate School. Sponsored by the Defense Security Assistance Agency, CCMR has conducted dozens of seminars in the Western Hemisphere to help partner nations strengthen democratic control over their security forces. I have served on the seminar faculty teams in seminars in Colombia and El Salvador, and in many more seminars at NPS conducted for participants from our Western Hemisphere partners. I also helped build the Masters Degree curriculum in International Security and Civil-Military Relations at NPS that has enrolled hundreds of students from the region, and addresses issues of defense planning, strategy development, and related topics designed to build partner defense capacity and collaboration with their U.S. military counterparts. I subsequently supervised these curricula as the Dean of the NPS School of International Graduate Studies, and have continued to keep up with developments in the region at Stanford University.

Question. What additional actions do you believe you need to take, if any, to prepare yourself to fulfill these duties?

Answer. If confirmed, I look forward to working closely with the members of this committee in carrying out the duties and functions of the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs.

COMBATING TERRORISM ROLES AND RESPONSIBILITIES

Question. The Department of Defense's combating terrorism activities are currently divided into four categories: Antiterrorism/Force Protection, Counterterrorism, Terrorism Consequence Management, and Intelligence. Section 902 of the National Defense Authorization Act for Fiscal Year 2003, which established the position of Assistant Secretary of Defense for Homeland Defense, also transferred the responsibility for the overall direction and supervision for policy, program planning and execution, and allocation of resources for the Department's combating terrorism activities to the Under Secretary of Defense for Policy.

Please specify what activities within each of the four combating terrorism categories will be under the jurisdiction of the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs.

Answer. If confirmed, I will work closely with the Assistant Secretary of Defense for Special Operations/Low Intensity Conflict and Interdependent Capabilities, the Assistant Secretary of Defense for Global Strategic Affairs, and the Under Secretary of Defense for Intelligence to achieve the Secretary of Defense's objectives with respect to proper alignment of DOD combating terrorism activities. After review and consultation with these individuals, I will make any recommendations with respect to the overall direction and supervision for policy, program planning and execution, and allocation of resources for the Department's role in support of combating terrorism activities to the Under Secretary of Defense for Policy.

Question. What DOD official or officials will be responsible for DOD combating terrorism activities not under your jurisdiction?

Answer. See my previous answer.

Question. What steps will you take to ensure that the Department's efforts are focused and well coordinated in this critical area of homeland defense?

Answer. If confirmed, I will work closely with the Assistant Secretary of Defense for Special Operations/Low Intensity Conflict and Interdependent Capabilities, the Assistant Secretary of Defense for Global Strategic Affairs, and the Under Secretary of Defense for Intelligence to achieve the Secretary of Defense's objectives in this critical area of homeland defense.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that will confront the ASD for Homeland Defense and Americas' Security Affairs?

Answer. If confirmed, my office would likely play an important role within the Department and the interagency process in developing policy for a number of key issues, including among others: preventing terrorist attacks against the United States, particularly attacks using weapons of mass destructions; planning and preparing for the response to catastrophic incidents in the United States; combating terrorism; adapting the U.S. military for 21st century challenges to the homeland; and strengthening our alliances with key partners and allies in the Western Hemisphere. If confirmed, I look forward to ensuring that the Under Secretary of Defense for Policy and the Secretary of Defense receive the best possible policy input on these vital questions.

Question. If you are confirmed, what priorities and plans do you have for addressing these challenges?

Answer. If confirmed, I expect to provide advice and counsel to the Under Secretary of Defense for Policy and aid in the development of policy advice to the Secretary of Defense. In this, I would give priority to the major challenges identified by the Secretary of Defense and the Under Secretary of Defense for Policy, and to strengthening the organizational capacity of the Office of the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs to address them. I would also pay close attention to the development and maintenance of effective working relationships with both military and civilian counterparts in the Department and the interagency. I would also participate in a number of processes, including the Quadrennial Defense Review and the PPBE process, which will provide an opportunity to assess these challenges and develop policy, plans, and investments to address them.

Question. What do you anticipate will be the most serious problems in the performance of the responsibilities of the ASD for Homeland Defense and Americas' Security Affairs?

Answer. If confirmed, one of my greatest imperatives will be to establish close, cooperative relations with DOD's Federal, State, local, and Western Hemisphere partners. I believe that the serious challenges to the security of the United States and that of its friends and allies in the Western Hemisphere cannot be solved by any single agency or country, but instead must be faced together cooperating towards common goals.

Question. If confirmed, what management actions and timelines would you establish to address these problems?

Answer. If confirmed, I look forward to working closely with the Under Secretary of Defense for Policy in establishing appropriate priorities, actions, and timelines to address these problems.

DIFFERENCE BETWEEN HOMELAND DEFENSE AND HOMELAND SECURITY

Question. The Department of Defense is responsible for homeland defense, and the Department of Homeland Security is responsible for Homeland security.

Please describe your understanding of the differences between the two different missions.

Answer. The Department of Defense and Department of Homeland Security have complementary and mutually supporting roles, missions, and responsibilities. The Department of Defense is responsible for the military defense of the United States from attack upon its territory at home and securing its interests abroad; military missions aim to deter, defend against, and defeat those who threaten the United States. For its part, the Department of Homeland Security is responsible for leading the Nation's efforts to prepare for, protect against, respond to, recover from, and mitigate against the risk of natural disasters, acts of terrorism, and other manmade disasters; to secure the Nation's borders, ports, and airports; and to ensure that the Federal Government works with states, localities, and the private sector as a true partner in prevention, mitigation, and response. As necessary, and consistent with the law, the Department of Defense provides support to the Department of Homeland Security in the execution of its missions.

Question. Do you agree that the Department of Defense should not be responsible for Homeland security, but may serve in a supporting role to assist civilian Federal agencies as directed by the President or Secretary of Defense?

Answer. Congress, in the Homeland Security Act of 2002, assigned to the Department of Homeland Security the responsibility for preventing terrorist attacks within the United States; reducing the vulnerability of the United States to terrorism; and minimizing the damage, and assisting in the recovery from terrorist attacks that

occur within the United States. As necessary, and consistent with the law, the Department of Defense provides support to the Department of Homeland Security in the execution of its missions.

INSTALLATION SECURITY

Question. The security of U.S. military installations—both at home and abroad—has been a longstanding priority for the Senate Armed Services Committee.

If confirmed, what would be your priorities for ensuring an adequate level of security for military installations in the United States?

Answer. If confirmed, I would work to ensure the effectiveness of Department of Defense antiterrorism and protection policies in detecting, deterring, and responding to threats directed at Department of Defense installations, facilities, and personnel, including their families. I would also work to ensure that adequate resources are provided to execute these policies and that the Department of Defense is working closely with its Federal, State, local, and tribal partners in establishing a mutually supportive protective posture inside and outside Department of Defense installations and facilities.

DEFENSE CRITICAL INFRASTRUCTURE PROGRAM

Question. The ASD for Homeland Defense and Americas' Security Affairs is responsible for overseeing DOD efforts and programs to protect defense critical infrastructure.

If confirmed, what plans, approaches, and priorities would you have for ensuring that the Defense Critical Infrastructure Program is functioning properly?

Answer. While I am familiar with the importance of the Defense Critical Infrastructure Program, I have not had the opportunity to review the plans, approaches, and priorities for ensuring that the program is functioning properly. If confirmed, I would review such plans, approaches, and priorities, and make recommendations to the Under Secretary of Defense for Policy to ensure that adequate measures are taken for the protection of defense critical infrastructure against current and emerging threats.

VULNERABILITY OF DEFENSE ENERGY SUPPLIES

Question. In February 2008, the Defense Science Board Task Force on DOD Energy Strategy issued a report that considered, among other issues, the vulnerability of assured energy supply to military installations, including those installations that host task critical assets for high priority defense missions. The Task Force concluded that relying on commercial electrical power is not adequate for the Department to assure adequate power to its critical missions, and that "critical national security and Homeland defense missions are at an unacceptably high risk of extended outage from failure of the grid and other critical national infrastructure."

If confirmed, will you review the Task Force report and examine the related issues of the vulnerability of the commercial power grid to prolonged outages, and options and alternatives for assuring adequate power to Department of Defense critical missions at installations in the United States?

Answer. If confirmed, I will review the Task Force report and examine the related issues. I will make necessary recommendations to the Under Secretary of Defense for Policy.

WEAPONS OF MASS DESTRUCTION CIVIL SUPPORT TEAMS

Question. There are now 54 National Guard Weapons of Mass Destruction Civil Support Teams (WMD-CSTs) established, at least one in each State and territory.

If confirmed, what would be your role with regard to the oversight, training, and employment of the WMD-CSTs?

Answer. If confirmed, I would expect to be responsible for coordinating with other DOD Components regarding the readiness posture of CBRNE forces, including the WMD-CSTs.

CBRNE ENHANCED RESPONSE FORCE PACKAGES (CERFPs)

Question. The National Guard Bureau has established 17 Chemical, Biological, Radiological, Nuclear, and high-yield Explosive (CBRNE) Enhanced Response Force Packages (CERFPs).

Please provide your understanding of the role and capabilities of these units.

Answer. It is my understanding that the National Guard CERFPs, in conjunction with WMD-CSTs, assist local, State, and Federal authorities in CBRNE consequence management. If confirmed, I intend to improve my understanding of these

roles and capabilities and if necessary make recommendations as appropriate to the Under Secretary of Defense for Policy.

Question. If confirmed, what would be your role with regard to the oversight, training, and employment of the CERFPs?

Answer. If confirmed, I would expect to be responsible for coordinating with other DOD Components regarding the readiness posture of CBRNE forces, including the CERFPs.

CBRNE CONSEQUENCE MANAGEMENT RESPONSE FORCES

Question. The Secretary of Defense has issued guidance to establish three CBRNE Consequence Management Response Forces (CCMRFs) by October 1, 2010.

Please provide your understanding of the roles and capabilities of the CCMRFs.

Answer. It is my understanding that the CCMRFs are trained, equipped, and prepared to assist (upon request) Federal, State, and local civil authorities in the response to a CBRNE incident within the United States. If confirmed, I intend to improve my understanding of these roles and capabilities and if necessary make recommendations as appropriate to the Under Secretary of Defense for Policy.

Question. Do you have any concerns about the ability of the Department to implement the Secretary's direction to create the three CCMRFs on the prescribed schedule?

Answer. I do not have a detailed understanding of current implementation plans. If confirmed, I would monitor implementation of the Secretary's direction closely.

Question. If confirmed, what would be your role with regard to the oversight, training, and employment of the CCMRFs?

Answer. If confirmed, I would expect to be responsible for coordinating with other DOD Components regarding the readiness posture of CBRNE forces, including the CCMRFs.

Question. Concerns have been raised about CCMRFs having a possible peacetime role that is inconsistent with other laws (such as Posse Comitatus).

Do you agree that the purpose of CCMRFs is as a DOD support element for CBRNE incidents, and not for peacetime or civil disturbance missions?

Answer. It is my understanding that the purpose of the CCMRFs is to assist (upon request) Federal, State, and local civil authorities in the response to a CBRNE incident within the United States. It is also my understanding that the CCMRFs' mission set does not include domestic law enforcement, crowd control, peacekeeping activities, assistance to civil authorities in instances of civil unrest, or activities to suppress civil disturbances, insurrections, or rebellions.

DOD CBRNE CONSEQUENCE MANAGEMENT CAPABILITIES

Question. Section 1082 of the National Defense Authorization Act for Fiscal Year 2008 (Public Law 110-181) required the Department to establish an advisory panel to review the Department's capabilities to provide defense support of civil authorities in the event of a chemical, biological, radiological, nuclear, or high-yield explosives (CBRNE) incident, and to recommend any changes it believes necessary. The advisory panel has not yet been finalized or had its first meeting, and it would likely take a year after the first meeting before it reports its recommendations.

If confirmed, will you take the steps necessary to ensure that the provisions of section 1082 are implemented, and that the advisory panel undertakes its mission?

Answer. Yes.

MEXICO—VIOLENCE FROM DRUG CARTELS

Question. Mexico has been wracked by high levels of violence related to drug trafficking and drug cartels fighting among themselves and against the Mexican authorities. This violence threatens to spill over the southwestern border of the United States, and has led the border Governors to call for increased National Guard troops along the border. The ASD for Homeland Defense and Americas' Security Affairs has responsibility for oversight of U.S.-Mexican military relations and security cooperation between the two militaries.

What do you believe is the correct approach for the Department of Defense in working with Mexico to help mitigate this drug-related violence?

Answer. I believe that preventing and responding to drug-related violence, in Mexico as in the United States, is primarily the responsibility of civilian law enforcement agencies. If confirmed, I look forward to working with my counterparts at the Department of State and other relevant Federal agencies to strengthen programs to support efforts to mitigate this drug-related violence, and make appropriate recommendations on the DOD role to the Under Secretary of Defense for Policy.

Question. What do you believe is the proper role for other civilian agencies in protecting the U.S. border against drug-related violence from Mexico, and what role do you believe the Department of Defense should have, if any?

Answer. Protecting the U.S. border against drug-related violence from Mexico is primarily the responsibility of Federal, State, and local law enforcement agencies. DOD's role in the execution of this responsibility is to provide appropriate lawful support when requested, and subsequently approved, by the President or the Secretary of Defense.

PANDEMIC INFLUENZA

Question. The United States is currently facing a pandemic influenza virus that appears to have originated in Mexico. The Department of Defense has had a very limited role in this situation, since other civilian agencies—particularly the Department of Homeland Security (DHS) and the Department of Health and Human Services (DHHS)—have the primary responsibilities for such a public health challenge.

Do you agree that DHS and DHHS should have the primary responsibilities for such a situation?

Answer. Yes.

Question. What role do you see for the Department of Defense in responding to a pandemic influenza situation?

Answer. I believe DOD has a two-fold role. First, DOD should be responsible for protecting the health of the Armed Forces and ensuring their preparedness to execute military missions to protect the United States and its interests. Second, DOD should be a supporting partner as required in the implementation of U.S. Government plans concerning influenza

NATIONAL GUARD AND RESERVE ROLE IN HOMELAND DEFENSE

Question. There is currently considerable debate about the role the National Guard should play in defending the Homeland and in providing civil support assistance in Homeland security missions. The Commission on the National Guard and the Reserves recommended that the National Guard and Reserves be given “the lead role in and form the backbone of DOD operations in the homeland. Furthermore, DOD should assign the National Guard and Reserves homeland defense and civil support as a core competency consistent with their warfighting tasks and capabilities.”

What role do you believe that the National Guard and Reserve should have in homeland defense, as compared to the Active component?

Answer. Homeland defense is a Total Force responsibility. If confirmed, I will update my understanding of the roles, missions and capabilities of the National Guard and the Reserves and will work to ensure that they have the equipment, training, and personnel to accomplish their missions, both at home and abroad.

Question. What role do you believe the National Guard and Reserves should have in providing civil support assistance to other Federal agencies, as compared to the active component?

Answer. Civil support is a Total Force responsibility. If confirmed, I look forward to helping to ensure that the National Guard and Reserves are equipped, trained, and prepared to execute vital missions in support of civil authorities in the United States.

RELATIONSHIP WITH U.S. NORTHERN COMMAND

Question. U.S. Northern Command was established in October 2002 with the mission of conducting operations to deter, prevent, and defeat threats and aggression aimed at the United States, its territories, and interests within the Command's assigned area of responsibility; and, as directed by the President or Secretary of Defense, to provide military assistance to civil authorities, including consequence management operations.

If confirmed, how do you anticipate you would coordinate roles and responsibilities with the Commander of U.S. Northern Command?

Answer. If confirmed, I would expect to be responsible for working closely with the Commander of U.S. Northern Command to support the efforts of the Secretary of Defense, particularly in the areas of Homeland Defense, Defense Support of Civil Authorities, and Western Hemisphere strategy and policy, contingency planning and policy oversight of operations.

Question. How do you anticipate that the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs and the Commander of U.S. Northern Command will coordinate with other Federal and State entities in plan-

ning for response to catastrophic events that might require Defense Department support?

Answer. If confirmed, I look forward to working closely with the Commander of U.S. Northern Command to ensure that Defense Department support to other Federal and state entities in response to catastrophic events, if required, is provided in a timely and coordinated fashion.

RELATIONSHIP WITH THE DEPARTMENT OF HOMELAND SECURITY

Question. The establishment of the Department of Homeland Security was one of the U.S. Government's largest cabinet-level reorganizations in the last 50 years. Despite this reorganization, the Department of Defense will continue to play an important role in providing Defense Support to Civil Authorities for Federal response to certain domestic incidents, as directed by the President or the Secretary of Defense.

If confirmed, what role do you expect to play in the coordination of DOD activities with the Department of Homeland Security and its component elements?

Answer. If confirmed, I would be responsible for coordinating the integration of homeland defense policies, programs and activities with DHS, as well as coordinating on the development, validation, and execution of DOD support to civil authorities such as DHS.

USE OF ACTIVE DUTY AND RESERVE PERSONNEL FOR HOMELAND DEFENSE/POSSE COMITATUS

Question. The Department of Defense has a mission to provide support to other Federal agencies in the event of a domestic incident that requires a Federal response, if directed by the President or the Secretary of Defense. The Posse Comitatus Act prohibits military personnel in a Federal status from engaging directly in domestic law enforcement "except in cases and under circumstances expressly authorized by the Constitution or Act of Congress." Use of National Guard personnel in a state status is not prohibited by this act, but the use of military personnel, including the National Guard in a Federal status, is prohibited.

What is your understanding of the legal issues and authority associated with using National Guard and Reserve personnel in security roles within the United States?

Answer. Under the authority of State Governors, in State Active Duty status or duty status under title 32, U.S.C., the National Guard is not subject to the restrictions imposed by the Posse Comitatus Act. However, when ordered to Active Duty, the National Guard and the Federal Reserve components are subject to the restrictions imposed by the Posse Comitatus Act with certain exceptions specifically authorized by Congress.

Question. In your opinion, does the Posse Comitatus Act (title 18 U.S.C. § 1385) or chapter 18 of title 10, U.S.C. (which regulates the use of the Armed Forces in support of civilian law enforcement and related activities) require amendment to deal with the present homeland security situation?

Answer. If confirmed, I would carefully review this issue and if necessary make appropriate recommendations to the Under Secretary of Defense for Policy.

Question. Under what circumstances do you believe that it is appropriate for the Department of Defense to provide assistance to law enforcement authorities in response to a domestic terrorist event? What about a non-terrorist event?

Answer. I do not yet have a detailed understanding of the legal and policy issues at stake on this issue.

Question. If confirmed, what role do you expect to play in making such determinations and making such assistance available?

Answer. If confirmed, I would be responsible for advising, through the Under Secretary of Defense for Policy, the Secretary of Defense on requests for DOD assistance to law enforcement agencies.

MODULARITY

Question. Modularity refers to the Army's fundamental reconfiguration of the force from a large division-based to a brigade-based structure. The new modular brigade combat team is supposed to have an increased capability to operate independently based upon increased and embedded combat support capabilities such as military intelligence, reconnaissance, and logistics. Although somewhat smaller in size, the new modular brigades are supposed to be just as or more capable of full spectrum operations than the divisional brigades they replace. Additionally, under the modular construct, combat, support, and service support brigades would transform to standardized designs that would be self contained with organic support and service support units, full spectrum capable, networked, and compatible with any divi-

sion headquarters. This, the Army argues, provides increased strategic flexibility and force availability. Modular units would share common structure and equipment to allow complete interchangeability across the spectrum of conflict. The plan also provides for the transformation of the Total Army—Active and Reserve components—to modular design and equipment.

What is your understanding and assessment of the Army's modular design and implementation of this transformation strategy as it relates to the Department's homeland defense and civil support missions?

Answer. I have not had the opportunity to become familiar with the Army's modular design and its implementation. If confirmed, I would review this program and its implementation as it relates to DOD's homeland defense and civil support missions and if necessary make any necessary recommendations to the Under Secretary of Defense for Policy.

Question. In your view, what are the greatest challenges, if any, for Department's homeland defense and civil support missions related to the Army's transformation to the modular design?

Answer. See my previous answer.

Question. If confirmed, what actions or changes would you propose, if any, relative to the Army's modular transformation strategy?

Answer. See my previous answer.

ARMY FORCE GENERATION MODEL (ARFORGEN)

Question. The Army relies on a force generation model (ARFORGEN) in which units are manned, equipped, and trained to levels of low to higher readiness over time as they cycle through "reset and train," "ready," and "available for deployment" force pools. This approach will also apply to the Army's Reserve components.

What is your understanding and assessment of the Army's force generation model and its implications for the Department's readiness for homeland defense and civil support missions?

Answer. While I am generally not familiar with the ARFORGEN concept, I have not had the opportunity to review in detail the ARFORGEN implementation plan. If confirmed, I would review the force generation models used by all of the Services and their implementation as they relate to DOD's homeland defense and civil support missions and make any necessary recommendations to the Under Secretary of Defense for Policy.

Question. In your view, what are the greatest resource, readiness, and operational challenges, if any, with respect to ARFORGEN model?

Answer. See my previous answer.

Question. If confirmed, what actions or changes would you propose, if any, to the design, implementation, or management of ARFORGEN?

Answer. See my previous answer.

COORDINATION OF EXPERTISE BETWEEN THE DEPARTMENTS OF HOMELAND SECURITY AND ENERGY

Question. The personnel at the Department of Energy's (DOE) national laboratories have expertise that may be useful to the Department of Homeland Security and to the Department of Defense in the execution of their respective homeland security and homeland defense missions.

How do you believe the Department of Defense can help ensure coordination and communication with the appropriate experts of the national labs to help respond quickly in the event of a national incident or emergency that would require their assistance?

Answer. While I understand the value of the expertise inherent in the national laboratories, I have not had the opportunity to become familiar with the full spectrum of capabilities offered by the national laboratories. If confirmed, I look forward to learning more about these capabilities with respect to incident emergency management and making any necessary recommendations to the Under Secretary of Defense for Policy and the Department of Homeland Security.

WESTERN HEMISPHERE INSTITUTE FOR SECURITY COOPERATION

Question. Western Hemisphere Institute for Security Cooperation (WHINSEC), which replaced the School of the Americas in 2001, has the mission of contributing to theater cooperation activities and capacity building efforts through the education and training of students in the Western Hemisphere from Canada to Chile.

What is your view of WHINSEC and its mandate?

Answer. I agree with the sense of Congress provided in section 1257 of the National Defense Authorization Act for Fiscal Year 2008: WHINSEC "is an invaluable

education and training facility which the Department of Defense should continue to utilize in order to help foster a spirit of partnership and interoperability among the United States military and the militaries of participating nations." The training and education provided by WHINSEC are absolutely vital to advancing security cooperation in the Western Hemisphere. These missions promote national security interests and support the strategic objective of building lasting partnerships that will ensure security, enhance stability, and enable prosperity throughout the Americas. Should I be confirmed, I welcome detailed briefings on WHINSEC and look forward to working with the committee and State Department to build lasting partnerships throughout the region.

Question. In your view, does WHINSEC promote the national security interests of the United States in the Western Hemisphere?

Answer. See the answer above.

ROLE OF U.S. SOUTHERN COMMAND

Question. If confirmed, you will be responsible for overseeing policy for defense security cooperation, the Department's counternarcotics efforts in the source nations and transit zone, security of the Panama Canal, implementation of security assistance programs, and development of democratic values within the military organizations of the region. To complicate matters, you will face the challenge of pursuing these missions at a time when there appears to be movement away from democracy in some nations, and increasing instability in other nations.

If confirmed, what will be your highest priorities for Western hemisphere security?

Answer. If confirmed, I would recommend to the Under Secretary of Defense for Policy that our priorities for Western Hemisphere security should be to strive to achieve the following goals:

- The U.S. and its partners become more secure from existing and potential threats;
- Partners gain an increasing capacity to address security challenges within their territories;
- Partners are better able to help each other solve security challenges; and
- Partners have the leadership capacity to promote security cooperation in the Americas and beyond.

Question. What actions would you propose to counter the growing threat to democracy in the region?

Answer. I am concerned by recent trends in some parts of the Hemisphere that seem to be weakening the health of democratic institutions. DOD can and should play a supporting role to U.S. Government efforts to keep democracy strong in the Hemisphere. DOD can do this by supporting friends and allies, denying opportunities to hostile influences, respecting differences of opinion, being good listeners, and maximizing interaction. If confirmed, I look forward to furthering this support role. Education exchanges also allow DOD to help reinforce the ideals of democracy, civilian authority, and a well-informed citizenry in our contacts with partners in the Hemisphere.

Question. What is your assessment of the strengths and weaknesses of military-to-military exchange programs and contacts in the U.S. Southern Command area of responsibility?

Answer. My view is that the U.S. Government derives great benefit from our military-to-military exchange programs and conducts them with most countries in the Hemisphere. The United States Southern Command has performed this mission magnificently. U.S. relations with countries in the Americas are strengthened significantly thanks to their efforts. If there is a weakness, it may be that resources available to conduct these activities are limited, and thus desires for engagement exceed the amount of funding and personnel available to do all that the U.S. and its partners would like to do together. If confirmed, I look forward to supporting this program and ensuring that sufficient resources are made available.

COUNTERNARCOTICS EFFORTS

Question. Each year the Department of Defense spends several hundred million dollars to counter the flow of illegal drugs into the United States, yet the availability of drugs on the street has not been significantly reduced, and some countries continue to face internal security challenges in responding to this threat. This has led many to question the effectiveness and focus of our counternarcotics programs.

How would you recommend that the success of the Department's counternarcotics programs be measured?

Answer. While I believe that metrics to assess this program are important, I have not had the opportunity to become familiar with the details of DOD's counternarcotics programs. If confirmed, I will work closely with the Assistant Secretary of Defense for Special Operations/Low Intensity Conflict and Interdependent Capabilities, who I understand is OSD's lead office for counternarcotics, to review DOD's counternarcotics programs in the United States and the Western Hemisphere.

Question. Do you believe that the current programs that the Department is pursuing are the most effective for the region, or should the Department's efforts focus elsewhere?

Answer. See my previous answer.

Question. If confirmed, where would you rank counternarcotics in terms of its contribution to our national security and the ability of the Department of Defense to make a meaningful contribution, as compared to other missions for which you would be responsible?

Answer. The most recent National Defense Strategy states that the core responsibility of the Department of Defense is to defend the United States from attack upon its territory at home and to secure its interests abroad. Nonetheless, the nexus between narcotics and terrorism is a serious challenge to the United States and its interests abroad. Countering this challenge requires an integrated interagency approach, of which DOD is an integral part. DOD brings important tools and global capabilities to interagency efforts to counter networks that support both terrorist and international criminal organizations. If confirmed, I would work closely with the Assistant Secretary of Defense for Special Operations/Low Intensity Conflict and Interdependent Capabilities to review the DOD role in combating this nexus in the United States and Western Hemisphere and to coordinate with the other elements of the U.S. Government to determine the best way ahead.

TERRORISM THREAT FROM CARIBBEAN AND CENTRAL AMERICA

Question. In your view, what is the extent of the current threat to the homeland of terrorist extremists from the Caribbean and Central America?

Answer. The threat to the United States from the Caribbean basin and Central America stems primarily from the extensive and well-developed illicit trafficking routes used by criminals and drug trafficking organizations. If confirmed, I will pay particular attention to other emerging threats.

Question. How would you broadly characterize that threat—low, medium, or high?

Answer. Given the aforementioned illicit trafficking routes used by criminals and drug trafficking organizations and the increasing nexus between such trafficking and terrorism, I would broadly characterize the threat level as medium. It would be in the best interest of the U.S. for our Government to work closely with our Caribbean and Central American partners to reduce the threats of drug trafficking and terrorism in the Western Hemisphere. If confirmed, I look forward to closely reviewing this area with the Intelligence Community and developing a more refined assessment of the threat level.

HAITI

Question. The U.N. Security Council voted unanimously on October 14, 2008, to extend the U.N. peacekeeping mission in Haiti for 1 year. Haiti continues to experience turmoil and instability.

How would you characterize the current military, economic, and political situation in Haiti, including the role of the U.N. peacekeeping force and the U.S. military?

Answer. As a direct result of U.N. peace operations, Haiti is more secure and stable than 5 years ago. Many countries in the Hemisphere, such as Brazil, Argentina, Chile, Uruguay, Peru and Guatemala, contribute personnel to these peace operations and are directly responsible for many of the successes. However, security continues to be fragile as a result of weak institutions, underlying poverty, and a history of political instability in Haiti. Significant improvements may be hard to see within the next 6 months. In the longer term, economic and political progress will be necessary before lasting stability can be assured. One of the most important goals should be to assist the Haitian police in assuming increased responsibility for security, thereby allowing this peace operation to downsize its military component, and ultimately, its civilian police component as well.

Question. How do you assess the security situation in Haiti now and what is your estimate of how the situation will look in 6 months?

Answer. See my previous answer.

Question. What conditions or indicators do you consider important in determining whether there will be another wave of Haitian emigration?

Answer. Political instability, a natural disaster such as a hurricane, or a new economic crisis could trigger another wave of Haitian migration. Perceptions of an impending change to U.S. immigration policy could also lead to an increase in Haitian migration.

Question. In your view, what is the cost and effectiveness of U.S. assistance to Haiti?

Answer. It appears to me that U.S. assistance, coupled with the ongoing U.N. peace operation, has contributed to making Haiti more secure and stable over the last 5 years. As far as the cost of that assistance, I would defer to the State Department on the question of how much U.S. foreign assistance funds have been expended on Haiti. The State Department is the lead Federal department for U.S. foreign assistance; DOD plays an important but supporting role.

CUBA

Question. What is your opinion about the need for, and pros and cons of, military-to-military contact with Cuba?

Answer. Currently, my understanding is that the U.S. military conducts regular "fence-line" talks with the Cuban military at the Guantanamo Bay Naval Base, to help ensure that there are no misunderstandings between both sides. If confirmed, I will closely examine whether additional military-to-military contact can play a helpful role in supporting the President's policy of promoting democracy and human rights in Cuba.

Question. What is your view of the need for review, and potentially revision, of U.S. policies regarding Cuba?

Answer. I understand that President Obama has been reviewing U.S. policies toward Cuba, and has already taken important steps to revise some policies. If confirmed, I look forward to joining in that review. As the President has said, "Cuba needs to take steps to revise its policies."

BOLIVIA

Question. In the past few years, Bolivia has experienced extreme political unrest and, lately, President Morales has taken some positions that could complicate U.S. relations with Bolivia.

How do you assess the situation in Bolivia and, if confirmed, how would you seek to accomplish the goals of combating drug trafficking and enhancing military engagement goals?

Answer. The situation in Bolivia is of great concern. President Evo Morales expelled the U.S. Ambassador, all the officers of the U.S. Drug Enforcement Agency, and another U.S. diplomat based on unsubstantiated, incorrect allegations. He has also accused the U.S. Government of plotting his assassination and conspiring with the political opposition. It is my hope that the United States can reestablish cooperation with the Bolivian Government to combat drug trafficking, which threatens both our countries, and that the United States can work positively with Bolivia's military. Ultimately, the choice is up to President Morales. If confirmed, I will support efforts by the Department of Defense to work with countries in the common fight against international drug trafficking and other transnational threats.

VENEZUELA

Question. U.S.-Venezuelan relations have continued to be strained as President Chavez continues to propagate anti-American rhetoric to anyone that will listen, import increasing amounts of military armament, politicize the Venezuelan military forces, and export his brand of populism to the region.

What is your view of President Chavez's intentions in the region?

Answer. I believe that President Chavez seeks to be a regional player and expand his sphere of influence.

Question. How would you characterize the current state of military-to-military relations between the United States and Venezuela?

Answer. It is my understanding that there are minimal military-to-military relations with Venezuela. This has not always been the case. In the past, the United States and Venezuela enjoyed a close military-to-military relationship. It would be good for each nation's military to have closer contact once again, but that would take a change in the current policy of the Venezuelan Government.

Question. What role do you see President Chavez playing in national elections throughout the Western Hemisphere area of operations?

Answer. I believe that is a question that the Department of State is best qualified to address.

Question. How would you assess Venezuelan relations with Cuba and China vis-à-vis the national security interests of the United States?

Answer. In my view, Venezuela and Cuba have a close relationship. Venezuela and China have entered into economic cooperation agreements that have led to a practical relationship. Venezuela's relationships with Cuba and with China do not appear to pose a significant threat to U.S. national security interests. If confirmed, I look forward to carefully reviewing these complex relationships and the potential threats that Cuba, China, and other countries may pose to national security interests.

PANAMA

Question. How do you assess the current political and economic situation in Panama?

Answer. Panama held elections on May 3, 2009 and elected Ricardo Martinelli as its next president. It is important for the United States to continue working closely with Panama, which is an important political and economic partner to the United States. I would defer to the State Department to offer a more detailed assessment of Panama's political and economic situation.

Question. To what extent do you assess that the Panamanian Government attempts to interdict the drug flow out of South America through Panama?

Answer. My understanding is that Panama, which has suffered from increased levels of violence tied to narcotics trafficking, has recently approached the United States in an effort to expand and improve its ability to interdict drug trafficking originating in South America. If confirmed, I will support cooperation to assist Panama in achieving that goal.

Question. What is your assessment of how Panama is protecting and maintaining the Panama Canal?

Answer. My understanding is that Panama is doing a good job of protecting and maintaining the Canal and investing resources to make necessary infrastructure improvements. The Canal is vital to U.S. commercial interests. Regarding protection, I understand that the Canal Authority maintains a highly professional security force that is well trained, funded, and equipped.

Question. How vulnerable is the Panama Canal to attack by terrorists, and what would be the consequences of an attack to U.S. national security interests?

Answer. My understanding is that although the Canal is well protected, Panama recognizes the challenge in safeguarding a large infrastructure target such as the Canal. Panama and U.S. Southern Command co-sponsor PANAMAX, a large-scale annual multinational exercise focusing on protection of the Canal. The consequences to the U.S. economy from a terrorist attack on the Canal, depending on the severity and time needed for repairs, could range from mild to serious. Shutting down the Canal, even for a few weeks, would raise the price of goods, especially imports from Asia to the U.S. east coast.

FORWARD OPERATING LOCATIONS

Question. One of the elements of the counternarcotics strategy in the Western Hemisphere is the establishment of forward operating locations (FOLs) in the source and transit zone. There is some concern that the Department has not deployed sufficient aircraft and other resources to these FOLs to justify sustainment costs and continued improvements. There is also concern that after U.S. investment of several million dollars in these facilities, the host nations will restrict our use of these facilities. The Department is also losing one of its strategic locations (i.e. Manta, Ecuador) on the Pacific coast later this year.

In your view, what is the role that these FOLs play in the Department's counter-drug efforts?

Answer. My understanding is that FOLs play a significant role in the Department's counternarcotics mission. These FOLs support DOD detection and monitoring flights, which are more effective due to their proximity to the area of interest. If confirmed, I will continue to support FOLs in strategic locations.

Question. In your view, does current use continue to justify the costs of sustaining these locations?

Answer. It appears to me that the counternarcotics FOLs have more than justified their initial cost and annual upkeep. Without these FOLs, DOD would have to launch surveillance flights from U.S. soil, which would reduce U.S. response capability.

COLOMBIA

Question. Under President Uribe's leadership, Colombia has improved its military performance in pursuing the paramilitary groups and their associated drug networks, and demonstrated an increased willingness and commitment to address and defeat the insurgency.

Please outline your views regarding the current situation in Colombia focusing upon: (1) the current military and political situation in Colombia; (2) the ability of the Colombian military to regain control of its territory; and (3) ongoing DOD programs, including the effects of the caps on U.S. troops and contractor personnel.

Answer. (1) In my view, Colombia is not the same country it was 10 years ago. With the support of Congress, the U.S., in partnership with President Uribe, his administration, and Colombians at all levels, has made considerable progress against the drug lords and terrorist organizations. In Colombia, problems of every variety are linked to drug trafficking and terrorism, including deep-seated political conflicts, social exclusion, economic inequality, endemic violence, and corruption. Through fiscal year 2009, United States assistance to the Government of Colombia has helped achieve dramatic changes in Colombia's political and military situation. Nevertheless, I believe that to secure the progress Colombia has made will require sustained commitment from the United States and the international community.

(2) Since 2002, President Alvaro Uribe has provided increased resources to the military for the implementation of his "Democratic Security" strategy, and increased their capacity to directly confront illegal armed groups and protect the general public. Since then, with U.S. support, the Colombian military has grown significantly, and is now more capable of providing the security needed to protect Colombians and control its territory. The Colombian operation that rescued 15 high-profile hostages, including three Americans, on July 2, 2008, was a spectacular demonstration of the improving competence of the Colombian military.

(3) Ongoing DOD Programs. Current U.S. security assistance provides training, equipment, planning assistance, intelligence and funding for Colombian military forces, in the areas of counternarcotics and counterterrorism. Specifically, the United States currently supports program areas such as: Air, ground and riverine operations to help the Colombian Armed Forces defeat illegal armed groups; governance programs to strengthen the Government of Colombia's presence in recovered areas; joint intelligence and communications programs that support coordination, and integration between the military services; and institutional transformation initiatives of the Ministry of Defense and the Colombian military to help them become more modern, efficient and capable institutions.

I do not believe that the caps on U.S. troops and contractor personnel have had a significant impact on our efforts to provide support. I should note that the United States provides support and training but does not conduct "military operations" and that U.S. personnel are prohibited from engaging in combat.

Question. When the United States began providing increased support through Plan Colombia for Colombia's efforts to significantly reduce or eliminate paramilitary groups and their associated drug networks operating in their country, much concern was expressed about human rights abuses that the Colombian military forces had committed.

What is your assessment of the record of the Colombian military with regard to respect for human rights over the past 3 years?

Answer. While challenges remain, the Colombian Ministry of Defense and its military are making significant progress on promoting human rights, preventing abuses, protecting vulnerable groups, and prosecuting perpetrators of abuses; and I believe they are committed to doing more. Work remains to be done to ensure no breakdowns in command and control occur in the military and that all elements in the Colombian military act within the law. If confirmed, I will work to ensure that progress continues in this important area.

Question. What more remains to be done and how would you approach the issue of respect for human rights in the Colombian military?

Answer. We should continue to encourage the transparency and determination of the Government of Colombia in confronting this situation. An especially positive action that the Colombian MOD has taken to ensure human rights compliance is the publication of a Human Rights and International Humanitarian Law policy that is being implemented to internalize appropriate conduct at all levels of the military.

My own view is that there can be no tolerance for those who commit human rights abuses, and those who break the law must be held accountable. The United States Government needs to be clear with the Government of Colombia that any kind of complicity with drug trafficking or illegal armed groups will not be tolerated. The Colombian Government and its uniformed services must continue the positive steps

that have been taken and thoroughly investigate and prosecute all such cases in a timely manner. It must be clear that failure to do so could jeopardize further U.S. Government funding and support.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information in a timely manner.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR MEL MARTINEZ

LATIN AMERICA

1. Senator MARTINEZ. Dr. Stockton, when the Office of Western Hemisphere Affairs was merged into the Assistant Secretary of Defense for Homeland Security, it signaled to Latin America that U.S. interest in the region was little more than an adjunct to our own homeland security. If confirmed, what steps will you take to ensure that priority attention is given to Latin America?

Dr. STOCKTON. In my view, working with our Nation's partners in Central America, the Caribbean, and South America is a top priority, and not simply an adjunct to our own homeland security. If confirmed, I hope to signal that view to our friends and allies in Latin America. I expect Latin American issues to occupy an important part of my portfolio and my attention. To help ensure that this region receives sufficient attention, I would direct my staff to increase bilateral and multilateral engagements with their foreign counterparts, and would support requests from foreign defense officials to meet with senior Department of Defense (DOD) officials at home and abroad to discuss the full range of common security interests and challenges we share, not just those associated with homeland defense. I also would advocate for the allocation of sufficient funding and other resources to support security cooperation activities with our partners.

2. Senator MARTINEZ. Dr. Stockton, recognizing that you are still getting acquainted with specific U.S. programs in Latin America, what are the general principles by which you will make judgments regarding ongoing DOD programs?

Dr. STOCKTON. I look forward to becoming more acquainted with specific U.S. programs in Latin America; however, if confirmed, there are certain general principles that I will follow regarding ongoing DOD programs. First, it is important to maintain mutually effective defense relationships with our allies and friends in the hemisphere. Second, DOD programs focused on Central America, South America, and the Caribbean must continue to support democracy, human rights, cooperation, and the effort to secure the hemisphere from transnational threats such as terrorism and illicit trafficking in arms and drugs. I will use these general principles in considering the effectiveness of existing programs, to identify opportunities for improvement, and to make recommendations to the Under Secretary of Defense for Policy, the Deputy Secretary of Defense, and the Secretary of Defense.

3. Senator MARTINEZ. Dr. Stockton, in your view, should there be different principles for interaction with the militaries of countries whose leaders are openly anti-American, such as exists in Venezuela, Bolivia, and Nicaragua?

Dr. STOCKTON. I believe that it is in the best interest of the United States to strive to maintain positive military-to-military relationships with all countries in the Americas, even in cases where countries' leaders criticize the United States. Transnational threats affect all our countries, and it is important that our militaries be able to work together to confront those threats where possible. In addition, our contacts with other countries' militaries can serve to reinforce the importance of principles such as democratic norms, respect for human rights, and the need for Armed Forces to remain apolitical and under civilian control. Finally, it is important to maintain contacts with foreign nations' militaries to develop relationships that may be important in the future, including under future governments that may be friendlier to the United States. Of course, there may be times when, despite our best efforts, cooperation with another country's military is not possible.

U.S. SOUTHERN COMMAND

4. Senator MARTINEZ. Dr. Stockton, in your responses to the advance policy questions on the role of U.S. Southern Command, you stated that a priority is to "continue to focus on making the United States and its partners more secure from existing and potential threats." In your view, what are those threats as you currently understand the situation?

Dr. STOCKTON. As I currently understand the situation, such threats include illicit trafficking in drugs, arms, and persons; money laundering; and criminal gangs. I also consider as potential vulnerabilities for concern the inability of governments to exercise effective sovereignty over their territory and the lack of preparedness to respond adequately to natural disasters.

MILITARY-TO-MILITARY RELATIONSHIPS

5. Senator MARTINEZ. Dr. Stockton, in your view, what is the role of military-to-military relationships with those Latin American militaries in countries where governments are closing political space and dismantling democratic institutions?

Dr. STOCKTON. See the answer to question number 3.

6. Senator MARTINEZ. Dr. Stockton, what role do you see military educational institutions, such as the Western Hemisphere Institute for Security Cooperation (WHINSEC) and the Center for Hemispheric Defense Studies, having in building military-to-military relationships?

Dr. STOCKTON. I believe that educational institutions such as WHINSEC and the Center for Hemispheric Defense Studies (CHDS) can play a key role in promoting democracy and human rights in the Western Hemisphere by providing professional education and training for military, civilian, and law enforcement personnel from countries throughout the Hemisphere. These institutions promote our Nation's national security interests, support our Nation's strategic objective of building lasting partnerships, and establish mutual relationships and understanding, and, in turn, help ensure security, enhance stability, and enable prosperity throughout the Americas. WHINSEC and CHDS are dedicated to fostering mutual knowledge, transparency, confidence, and cooperation among individual military participants and participating nations, and to promoting democratic values, respect for human rights, and knowledge and understanding of U.S. customs and traditions.

CUBA

7. Senator MARTINEZ. Dr. Stockton, since a central element of U.S. policy is to promote democratic institutions and respect for human rights, to what extent will the Castro Government's treatment of the Cuban people factor into your assessment of any military-to-military contacts between U.S. military personnel and members of the Cuban military and other elements of that government's repressive apparatus?

Dr. STOCKTON. It is my understanding that the U.S. military currently conducts regular fence-line talks at the Guantanamo Naval Base with Cuban military officials in order to help ensure there are no misunderstandings on either side. President Obama has recently taken steps to revise U.S. policy toward Cuba, and the United States is seeking greater openness and respect for human rights and democratic principles from the Cuban Government. In this, the U.S. military can be of assistance in reaching out to the Government of Cuba through existing diplomatic

channels. Also, it is my understanding that the Cuban military remains a highly respected institution within Cuba because it has not participated in human rights abuses. Accordingly, an avenue may be open for the U.S. military to help U.S. diplomatic efforts by leveraging common military traditions to open new diplomatic outreach opportunities, find common ground on which to pursue productive dialogue, and promote respect for human rights.

BOLIVIA

8. Senator MARTINEZ. Dr. Stockton, President Evo Morales has repeatedly attempted to mischaracterize the United States, including the role of U.S. military and law enforcement personnel in Bolivia, as engaging in activities against his government. Should Morales' unfounded accusations continue, are you prepared to recommend to the Under Secretary of Defense for Policy and, ultimately, the Secretary of Defense that all U.S. military contact with Bolivia be suspended?

Dr. STOCKTON. Eliminating all U.S. military contact with the Bolivian Government is an option that I would not recommend at this time. I believe it is important to maintain U.S. military diplomatic dialogue with the Bolivian military through our Defense Attaché. Nonetheless, if confirmed, I will consider all the possibilities and make my recommendation on the option that would best advance our interests in Bolivia and in South America.

VENEZUELA

9. Senator MARTINEZ. Dr. Stockton, in your responses to the advance policy questions, you state the belief that "President Chavez seeks to be a regional player and expand his sphere of influence." In such a situation, what is your view of the interaction the U.S. military should have with the Venezuelan military?

Dr. STOCKTON. It is my understanding that currently our military-to-military relations with Venezuela are minimal, largely due to limitations imposed by President Chavez. This has not always been the case. In the past, our countries enjoyed a close military-to-military relationship. It would be good for our militaries to have closer contact once again, but that would take a change in the current policy of the Venezuelan government.

 QUESTIONS SUBMITTED BY SENATOR SUSAN COLLINS

CIVIL SUPPORT MISSION

10. Senator COLLINS. Dr. Stockton, last year, the Commission on the National Guard and Reserves criticized DOD for not having made civil support a primary mission of the Department, stating that this was a contributing factor to the Nation being unprepared to respond effectively to a catastrophic incident. While I do not agree that the civil support mission should be of the same priority as the warfighting mission of the Department, this is clearly an important responsibility. As Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs, how will you ensure that the Department's civil support mission is suitably prioritized?

Dr. STOCKTON. Both the 2007 National Strategy for Homeland Security and the 2008 National Defense Strategy recognize that the core responsibility of the Defense Department is to defend the homeland in depth, and both documents reinforce the Department's responsibility to maintain and enhance its capacity to support civil authorities in preventing terrorist attacks and responding to catastrophic natural and man-made disasters. If confirmed as the Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs, I will be the principal civilian advisor to the Secretary of Defense and the Under Secretary of Defense for Policy on homeland defense activities, Defense Support of Civil Authorities, and Western Hemisphere security matters. In this capacity, I will ensure that the Under Secretary of Defense for Policy and the Secretary of Defense receive the best possible policy input on how the Department can meet the challenges of defending the United States and assisting civil authorities in preventing terrorist attacks and responding to disasters more effectively. An important aspect of my approach will be to focus on ensuring development of realistic, detailed, and coordinated plans for civil support. Such plans can aid significantly in defining and validating the assistance needed by Federal, State, and local civil authorities, eliminating organizational, jurisdictional, and operational seams and gaps, and ensuring a unity of effort.

EMERGENCY PREPAREDNESS

11. Senator COLLINS. Dr. Stockton, your predecessor, Assistant Secretary Paul McHale, was a proponent of the Task Force for Emergency Readiness program, which facilitates State emergency planning by teaming State civilian planners, National Guard planners, Department of Homeland Security (DHS) Federal Preparedness Coordinators, and DOD Emergency Preparedness Liaison Officers. The Federal Emergency Management Administration is currently conducting a pilot program to evaluate the effectiveness of this idea. Provided that the pilot program proves successful, will you continue to support the participation of DOD planners in this effort?

Dr. STOCKTON. Yes. Deliberate contingency planning improves effectiveness by clearly defining what capabilities are needed, where they are needed, and when they are needed. The coordinated State and Federal contingency planning intended by the Task Force for Emergency Readiness initiative also can reduce delays in necessary actions to save and sustain lives, reduce seams and gaps in a response, and limit shortfalls in critical resources needed for the response. Moreover, contingency plans can provide an invaluable mechanism by which to prepare potential responders through routine and rigorous training and exercises.

12. Senator COLLINS. Dr. Stockton, one of the most effective ways to ensure that our Nation is prepared to manage catastrophic incidents is to conduct in-depth planning for those incidents before they occur. DOD excels at contingency planning, and has spent decades developing and refining an effective planning, budgeting, and evaluation system. Over the past several years, DHS has attempted to develop their own planning system and plans for dealing with various planning scenarios. How well do you believe DHS and DOD have been working together toward that end?

Dr. STOCKTON. I believe that DHS and DOD have worked quite well together to develop both a planning system and specific plans. It is my understanding that DHS, DOD, and other Federal departments and agencies developed an Integrated Planning System, which was published in January 2009, that was intended to be the national planning system for developing interagency and intergovernmental plans for domestic events. It also is my understanding that DHS, DOD, and other Federal departments and agencies have since December 2007 been developing Federal plans addressing the 15 National Planning Scenarios. If confirmed, I intend to work hard to ensure that DOD continues its strong support of DHS in this interagency planning effort.

13. Senator COLLINS. Dr. Stockton, has DHS appropriately leveraged DOD planning capabilities and expertise?

Dr. STOCKTON. There is always room for improvement, but I believe that DHS has leveraged DOD's planning capabilities and expertise quite appropriately. It is my understanding that: DOD planners are permanently attached, along with planners from other Federal departments and agencies, in the DHS office responsible for developing interagency plans for the 15 National Planning Scenarios; DOD, at DHS's request, frequently provides planners to augment DHS crisis planning during such events as the recent H1N1 outbreak; and DHS personnel routinely attend DOD contingency planning courses.

14. Senator COLLINS. Dr. Stockton, how can DOD better integrate into Federal planning for catastrophic disasters?

Dr. STOCKTON. It is my understanding that DOD is very integrated into and, in many ways, has provided substantial expertise and momentum to Federal planning for catastrophic disasters. If confirmed, I intend to review DOD's planning for catastrophic disasters and will work hard to make DOD's integration into, and support of, Federal planning for catastrophic disasters even more effective.

[The nomination reference of Dr. Paul N. Stockton follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
April 28, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Paul Noble Stockton.

2. **Position to which nominated:**
Under preliminary consideration for Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs.

3. **Date of nomination:**
April 28, 2009.

4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**
August 10, 1954; Los Angeles, CA.

6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Christin Anne Englert.

7. **Names and ages of children:**
William Noble Stockton, 11.
Henry Foster Stockton, 9.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.

Harvard University, Cambridge, MA; Attended September 1978–November 1986, Received Ph.D. in Government in November 1986.

Dartmouth College, Hanover, NH; Attended September 1972–June 1976, Received B.A in Government in June 1976.

Highland Park Senior High School, St. Paul, MN; Attended September 1971–June 1972, high school diploma awarded June 1972.

River Falls Senior High, River Falls, WI; Attended September 1969–June 1971.

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

August 2006–present, Senior Research Scholar, Center for International Security and Cooperation (CISAC), Stanford University, Stanford, CA. Performed research and taught undergraduate classes related to Homeland Defense and Security issues.

2001–2006, Associate Provost for Institutional Development, Naval Postgraduate School, Monterey, CA. Oversaw development and execution of programs to meet post-September 11 security challenges.

Served simultaneously during same period as Director, NPS Center for Homeland Defense and Security (CHDS). Supervised the staff and directed the strategic planning for the graduate education and research center which is sponsored by DHS.

2000–2001, Acting Dean, School of International Graduate Studies, Naval Postgraduate School, Monterey, CA. Supervised the faculty and support staff who provided graduate level education in the international field.

1995–2000, Director, Center for Civil-Military Relations, Naval Postgraduate School, Monterey, CA 1995–2000. Directed the faculty and staff of this DOD sponsored center with focus on civil defense capacity for U.S. security partners.

Associate Professor in NPS' Department of National Security Affairs. Taught graduate level courses to U.S. and international military officers.

10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Legislative Assistant to U.S. Senator D.P. Moynihan (D–NY), 1986–1989.

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Member, Board of Advisors, Homeland Security Management Institute (HSMI), Long Island University, 121 Speonk-Riverhead Road, LIU Bldg., Riverhead, NY.

Member, DHS Training Grant Advisory Board, Center for Continuing Studies, University of Connecticut, One Bishop Circle, Unit #4056, Storrs, CT.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.
None.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

Obama for America (2008) \$100.

Obama for America (2008) \$250.

Equality CA-Legal Action Committee (2008) \$100.

Murtha for Congress (2008) \$100.

2006 Vilsack for President (2006) \$250.

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Naval Postgraduate School:

Hamming Award for Interdisciplinary Innovation, 2004

Certificate for Outstanding Instructional Contributions, November 1996

Certificate for Outstanding Instructional Contributions, October 1991

Stanford University:

Post-doctoral Fellowship, Center for International Security and Arms Control, 1989

Harvard University:

Certificate of Distinction in Teaching, Committee on Undergraduate Education, 1982

Earhart Foundation Fellowship, 1980–1982

Sloan Foundation Public Management Grant, 1980

RayAtherton Fellow, 1978–1979

Dartmouth College:

Phi Beta Kappa, 1976

Dartmouth College Citation, 1976

Chase Peace Prize, 1976

Bradley Scholarship, 1976

Reynolds Scholarship (honorary award), 1976

Public Affairs Fellowship, 1975

Rufus Choate Scholar, 1973

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

Books and Monographs:

Paul Stockton and James Tritton, eds., *Reconstituting Defense: America's New National Security Strategy* (New York: Praeger, 1992).

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

Testimony before the Subcommittee on Economic Development, Public Buildings, and Emergency Management, Committee on Transportation and Infrastructure, U.S. House of Representatives, Hearing on “Readiness in the Post Katrina and Post-September 11 World: An Evaluation of the New National Response Framework,” 11 September 2007.

Testimony before the Appropriations Subcommittee on Homeland Security, U.S. House of Representatives, Hearing on “5 and 10 Year Homeland Security Goals: Where We Need to Be As a Nation and How We Judge Progress?” 30 January 2007.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

PAUL N. STOCKTON.

This 11th day of May, 2009.

[The nomination of Dr. Paul N. Stockton was reported to the Senate by Chairman Levin on May 14, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on May 18, 2009.]

[Prepared questions submitted to Thomas R. Lamont by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of

the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. The Goldwater-Nichols Act changed Department of Defense (DOD) operations profoundly and positively. Although I believe that the framework established by Goldwater-Nichols has significantly improved inter-service and joint relationships and promoted the effective execution of responsibilities, the Department, working with Congress, should continually assess the law in light of improving capabilities, evolving threats, and changing organizational dynamics. I am currently unaware of any reason to amend Goldwater-Nichols, but if confirmed, I will have an opportunity to assess whether the challenges posed by today's security environment require amendments to the legislation with a view to continuing the objectives of defense reform.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. If confirmed, I look forward to reviewing this milestone legislation and assessing whether any changes should be considered to address the challenges posed by today's security environment.

DUTIES

Question. Section 3016 of title 10, U.S.C., provides that the Assistant Secretary of the Army for Manpower and Reserve Affairs shall have "as his principal duty the overall supervision of manpower and Reserve component affairs of the Department of the Army."

If confirmed, what duties do you expect that the Secretary of the Army will prescribe for you?

Answer. Although the Secretary of the Army has not discussed with me the duties and functions he will expect that I perform if I am confirmed, I anticipate that he will rely on me to provide accurate and timely advice in the area of Army manpower and Reserve affairs, as the statute establishing the position of the Assistant Secretary of the Army for Manpower and Reserve Affairs provides. I presume also that the specific duties assigned to this position would be consistent with the responsibilities assigned to the Assistant Secretary for Manpower and Reserve Affairs in Headquarters, Department of the Army General Orders Number 3, which sets forth the duties of each principal office of the Headquarters, Department of the Army. In addition, I believe the Secretary of the Army would expect me to continue pursuing an effective, professional relationship with the Under Secretary of Defense (Personnel and Readiness) and other key officials within the Office of the Secretary of Defense, other Military Department Assistant Secretaries for Manpower and Reserve Affairs, and the other Army Assistant Secretaries. I anticipate that the Secretary will expect me to continue and to build upon the effective and professional working relationships between the Office of the Assistant Secretary of the Army (Manpower and Reserve Affairs) and the Deputy Chief of Staff, G-1 (Personnel); The Surgeon General; the Chief, Army Reserve; the Chief, National Guard Bureau; and the Director of the Army National Guard.

Question. What actions will you take to enhance your ability to perform the duties of the Assistant Secretary of the Army for Manpower and Reserve Affairs?

Answer. Although I look forward to assuming the duties of the Assistant Secretary of the Army (Manpower and Reserve Affairs), should the Senate confirm me, I recognize that every new Assistant Secretary has much to learn. If I am confirmed, I will work to further my understanding and knowledge of the Army, its people and organizations, the challenges it faces and the resources necessary to sustain and transform it. I will work with and through the talented and dedicated military and civilian personnel serving the Department to broaden my expertise and increase my knowledge and will seek advice and counsel from the many and diverse stakeholders dedicated to the success of the Army, including the Members and staff of Congress.

Question. In carrying out these duties, what would be your relationship with the following officials:

The Secretary of the Army.

Answer. If I am confirmed, my relationship with the Secretary of the Army would be close, direct, and supportive. I would work to communicate as effectively as possible with the Secretary regarding the advice, views, and plans of the Secretariat and Army Staff and to oversee the implementation of the Secretary's decisions

through the Army. If I am confirmed, I understand that my actions would be subject to the authority, direction, and control of the Secretary of the Army.

Question. The Under Secretary of the Army.

Answer. If confirmed, I would establish a close, direct, and supportive relationship with the Under Secretary of the Army. Within the Department of the Army, my responsibilities would also involve communicating the Secretariat and Army Staff advice, views, and plans to the Under Secretary of the Army and to oversee the implementation of his decisions falling within my area of responsibility (AOR). I further understand that the Under Secretary is the Chief Management Officer (CMO) of the Department of the Army and, in that role, exercises primary management responsibility for the business operations of the Army. If confirmed, I would work closely with the Under Secretary in his role as CMO, particularly to the extent those duties affect human capital management and other "business operations" within the functional purview of the Assistant Secretary of the Army (Manpower and Reserve Affairs).

Question. The other Assistant Secretaries of the Army.

Answer. The other Assistant Secretaries of the Army set strategic direction by formulating and overseeing policies and programs within their respective functional areas of responsibility, consistent with applicable laws and regulations and in accordance with the objectives and guidance of the Secretary of the Army. If confirmed, I will establish and maintain close and professional relationships with each of the Assistant Secretaries and seek to foster an environment of cooperative teamwork, working together on the day-to-day management and long-range planning needs of the Army.

Question. The General Counsel of the Army.

Answer. The General Counsel is the chief legal officer of the Department of Army. His duties include providing legal and policy advice to officials of the Department of the Army, as well as determining the position of the Army on any legal question or procedure. If confirmed, I will establish and maintain a close and professional relationship with the General Counsel of the Army.

Question. The Inspector General of the Army.

Answer. The Inspector General of the Army is charged with inquiring into, and reporting on the discipline, efficiency, economy, morale, and training, and readiness of the Army. If confirmed, I will establish and maintain a close and professional relationship with The Inspector General of the Army.

Question. The Chief of Legislative Liaison of the Department of the Army.

Answer. The Chief of Legislative Liaison is responsible for all Department of the Army Congressional affairs, to include formulating, coordinating, and supervising policies and programs on the Army's relations with Congress and the Department's legislative strategy. If confirmed, I will establish and maintain a close and professional relationship with the Chief of Legislative Liaison.

Question. The Under Secretary of Defense for Personnel and Readiness.

Answer. Acting on behalf of the Secretary of Defense, the Under Secretary of Defense for Personnel and Readiness performs responsibilities that require the issuance of guidance to the military departments. If confirmed, I will communicate openly and directly with the Under Secretary of Defense for Personnel and Readiness in articulating the views of the Department of the Army. I will have a close and professional relationship with the Under Secretary of Defense for Personnel and Readiness, characterized by continuous consultation, communication, and cooperation on matters of mutual interest, in furtherance of the best interests of the Army and DOD.

Question. The Principal Deputy Under Secretary of Defense for Personnel and Readiness.

Answer. Acting on behalf of the Secretary of Defense and Under Secretary of Defense for Personnel and Readiness, the Principal Deputy Under Secretary of Defense for Personnel and Readiness performs responsibilities that require, from time to time, the issuance of guidance to the military departments. If confirmed, I will communicate openly and directly with the Principal Deputy Under Secretary of Defense for Personnel and Readiness in articulating the views of the Department of the Army. I will work closely with the Principal Deputy Under Secretary of Defense for Personnel and Readiness to ensure that the Department of the Army is administered in accordance with the guidance and direction issued by the Office of the Secretary of Defense.

Question. The Chief of Staff of the Army.

Answer. The Chief of Staff of the Army is the Secretary's senior military advisor in all matters and has responsibility for the effective and efficient functioning of Army organizations and commands in performing their statutory missions. If con-

firm, I will work closely and in concert with the Chief of Staff to supervise the implementation of the Secretary's decisions.

Question. The Deputy Chief of Staff of the Army for Personnel.

Answer. The Deputy Chief of Staff, G-1, serves as the principal military advisor to the Assistant Secretary for Manpower and Reserve Affairs and formulates, manages, evaluates and executes military and civilian personnel plans and programs for the Army for peacetime, contingency and wartime operations. If confirmed, I will establish a close, professional relationship with the Deputy Chief of Staff, G-1 (Personnel). I will consult with him frequently and communicate with him directly and openly as he performs his prescribed duties. I expect that, if I am confirmed, he and I will work together as a team on a daily basis.

Question. The Surgeon General of the Army.

Answer. The Surgeon General is a special advisor to the Secretary of the Army and to the Chief of Staff on all matters pertaining to the military health service system. In that role, The Surgeon General assists the Secretary and the Chief in carrying out their responsibilities by ensuring a medically ready force as well as a trained and ready medical force. If confirmed, I intend to work closely with The Surgeon General to ensure that the Army's health care systems and medical policies support the Army's objectives, responsibilities, and commitments effectively and uniformly across the total force, with a particular focus on Wounded Warriors.

Question. The Chief, National Guard Bureau

Answer. The Chief, National Guard Bureau is a principal advisor to the Secretary of Defense, through the Chairman of the Joint Chiefs of Staff, on matters involving non-Federalized National Guard forces and on other matters as determined by the Secretary of Defense and is the principal advisor to the Secretary of the Army and the Chief of Staff of the Army, and to the Secretary of the Air Force and the Chief of Staff of the Air Force, on matters relating to the National Guard, the Army National Guard of the United States, and the Air National Guard of the United States. Because the National Guard is a key element of the Reserve component, the Assistant Secretary of the Army for Manpower and Reserve Affairs must work closely with the Chief, National Guard Bureau to provide overall supervision of National Guard matters across all aspects of Army business. If confirmed, I will establish a close, professional relationship with the Chief, National Guard Bureau. I will communicate with him directly and openly as he performs his prescribed duties.

Question. The Chief, Army Reserve

Answer. The Chief, Army Reserve is the principal advisor to both the Secretary of the Army and Chief of Staff of the Army on all Army Reserve matters. Because the Army Reserve is a key element of the Reserve component, the Assistant Secretary of the Army for Manpower and Reserve Affairs must work closely with the Chief, Army Reserve, to provide overall supervision of Reserve matters across all aspects of Army business. If confirmed, I will establish a close, professional relationship with the Chief, Army Reserve. I will communicate with him directly and openly as he performs his prescribed duties.

Question. Soldiers and their families.

Answer. The men and women who serve in the Armed Forces are our Nation's most valuable national security assets. The Army owes its success to these versatile young Americans who answer its call to duty and service. Caring for soldiers and their Army families through effective quality of life programs both demonstrates the Army's commitment to the total Army family and endeavors to reflect the value of their service to our Nation. If confirmed, I will work diligently to ensure the needs of soldiers and their families are addressed across the total Army.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. The diversity and complexity of issues confronting the Department of the Army are such that very few can have in-depth experience in them all. However, an Assistant Secretary of the Army must possess the personal attributes of integrity, mature judgment, and strong interpersonal and leadership abilities. I believe that my diverse legal and managerial experiences in both the public and private sectors have prepared me to meet the many challenges of this office.

I have 37 years of organizational experience in the public and private sectors during which I have developed valuable executive leadership and problem-solving skills. In addition, I served as a judge advocate in the National Guard for more than 25 years, experiencing first-hand the life of a soldier. As an attorney in the private sector, I concentrated my efforts in government, administrative and regulatory matters, serving a broad spectrum of clients ranging from individual entrepreneurs to

Fortune 500 companies. In the public arena, I had the privilege of serving in leadership roles with the Illinois Attorney General's Office, the State's Attorney Appellate Prosecutor Commission and, most recently, as executive director of the Illinois Board of Higher Education (IBHE). As executive director of the IBHE, I was responsible for budgeting and appropriations, curriculum approval, degree granting authority, and the implementation of gubernatorial and legislative policy in all Illinois public colleges and universities. As Chairman of the Board of Trustees for the University of Illinois, the Nation's fourth largest public university, with some 70,000 students and 22,000 employees, I experienced, first-hand, the challenges of leading and managing a large organization, working with widely diverse cultural and geographic population groups, and the myriad issues associated with an academic environment.

Question. In your view, what are the major challenges confronting the next Assistant Secretary of the Army for Manpower and Reserve Affairs?

Answer. In my view, the fundamental challenge facing the Assistant Secretary of the Army for Manpower and Reserve Affairs is manning the force. I view the recruitment and retention of high caliber citizens to man the active, Reserve and civilian ranks as an important aspect of maintaining Army readiness. The Army's ability to staff the Army fully with the Active, Guard, and Reserve component military members and civilians necessary to execute its complex and challenging missions, both today, and in the future, presents unprecedented challenges. The Army will continue to have a compelling need to garner support for soldiers, to obtain sufficient funding to achieve critical recruiting and retention goals, and to maintain the financial investment in the quality of life programs that help to sustain the All-Volunteer Force. I believe that the Army must continue to engage actively in proactive marketing campaigns, pursue robust and attractive initiatives and incentives, and continue to seek ways to improve health and well-being programs. If confirmed, I would candidly assess the Army recruiting and retention posture and work to initiate or enhance programs of the type and quality most likely to support the Army's recruiting and retention needs—both military and civilian.

Second, I believe that the Army's ability to prevail in current operations and to sustain global commitments is critical. The Army must continue to maintain the momentum of transformation by adapting Army forces and balancing the employment of Active and Reserve component units and soldiers. If confirmed, I would lead and partner on efforts to formulate policies that will help facilitate the Department's adaptation to the changing operational environment.

Finally, among the major challenges I would face, if confirmed, is the need to foster and maintain an environment in which soldiers and civilian employees can serve free of discrimination and harassment and pursue assignments and advancement, that while responsive to the needs of the Army, are based on individual qualification and performance.

Question. If confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I will focus immediately on these matters, review those actions that are underway, and join with other civilian leaders and with my counterparts in uniform to resolve them to the best of my ability. I will build upon this and other recent successes in holding the Department of the Army up as a model employer in both the military and civilian contexts.

Question. In your view, what were the most critical shortcomings in warrior care since 2001?

Answer. As I understand it, the Army was not prepared for the increase in wounded, ill, and injured soldiers that resulted from overseas contingency operations such as Operations Enduring Freedom and Iraqi Freedom. One area that needed improvement was the management of outpatient soldiers during their recovery period. If confirmed, it will be my distinct honor and privilege to do all I can to continue to promote a high standard of care for our Wounded Warriors.

Question. What is your assessment of the effectiveness of the Army's response?

Answer. I am advised that the Army has increased Warrior Transition Unit resources, established a proven approach to care management through the triad of care concept, centralized support to Warriors in Transition and their families by collocating support services in Soldier Family Assistance Centers, implemented the Comprehensive Transition Plan approach to helping soldiers plan and attain their recovery goals and has begun the process of building Warrior Transition Complexes. If confirmed, I will assess the effectiveness of the Army's response and continue to work with Congress to ensure our warriors receive the highest possible care and support.

Question. If confirmed, are there additional strategies and resources that you would pursue to increase the Army's support for wounded soldiers, and to monitor their progress in returning to duty or to civilian life?

Answer. If confirmed, I will assess continuously the efficiency and appropriateness of the Army's response. I will implement strategies and seek additional resources as appropriate to ensure the Army meets the needs of our wounded soldiers.

Question. Studies following the revelations at Walter Reed point to the need to reform the Army's disability evaluation system.

What is your assessment of the need to streamline and improve the Army's disability evaluation system?

Answer. I am informed that beginning November 26, 2007, the Army started to test a revamped physical disability evaluation program at Walter Reed Army Medical Center, streamlining the process used to determine soldiers' fitness for service or eligibility for military and veterans' benefits. I am advised that key features of this pilot program include a single medical examination and a single-sourced disability rating. It is my understanding that the Department of Veterans Affairs (DVA) conducts a single comprehensive exam and will rate all medical conditions. The Military Departments accept the DVA rating for all medical conditions determined unfitting for continued military Service unless the condition involves non-compliance, misconduct, or a nonservice aggravated medical condition which existed prior to service.

Based on the limited information I have so far, I believe the process does need to be improved. If confirmed, I will work to this end with stakeholders in the Army, as well as with experts in DOD and DVA.

Question. If confirmed, how will you address any need for change?

Answer. If I am confirmed, I will listen to the information presented by the experts in this area and study the process myself. After becoming fully briefed on the issues, I would work with the stakeholders in the Army and appropriate personnel in both DOD and DVA to determine what areas should be changed and how best to accomplish those changes.

OFFICER MANAGEMENT ISSUES

Question. As the Assistant Secretary of the Army for Manpower and Reserve Affairs you would have significant responsibilities with regard to officer management policies, the promotion system, and recommending officers for nomination to positions of authority and responsibility.

If confirmed, what changes, if any, would you make to the officer management system?

Answer. The Army has an exceptionally talented officer corps spanning all three components of the Army. I have been informed that the Army is in the process of initiating a comprehensive review of the laws and policies that govern the management of the officer corps across all components. If confirmed, I look forward to reviewing the report and assessing whether changes might be appropriate. If confirmed, I will not hesitate to seek your assistance should the Army's review indicate that changes to law are needed in order to optimize the development of the officer corps. The management and development of these talented and skilled leaders should be supported by systems, laws and policies that reflect the challenges the Army faces today, and should not be constrained by outdated paradigms.

Question. Do you believe the current Army procedures and practices for reviewing the records of officers pending nomination by the President are sufficient to ensure the Secretary of the Army, the Secretary of Defense, and the President can make informed decisions?

Answer. I have been assured that the current Army procedures for case review of officer promotion nominations are sufficient and provide Army leadership with accurate and timely information in order to make informed decisions and recommendations. I believe these procedures must be sufficiently rigorous to ensure officers meet the statutory requirement of exemplary conduct both before and after the convening of a promotion selection board.

Question. In your view, are these procedures and practices fair and reasonable for the officers involved?

Answer. It is my understanding that if any adverse information is discovered during the screening process, the officer is provided with notice and an opportunity to respond, and that the officer's response is provided to the promotion board. This appears to be reasonable; however, if confirmed, I will have the opportunity to witness these procedures in action and make a more fully informed assessment.

GENERAL AND FLAG OFFICER NOMINATIONS

Question. Under DOD Instruction 1320.4, adverse and alleged adverse information pertaining to general and flag officers must be evaluated by senior leaders in the Services and in the Office of the Secretary of Defense prior to nomination.

If confirmed, what role would you play in the officer promotion system, particularly in reviewing general and flag officer nominations?

Answer. I have been advised that all officer promotions, including general officer promotions, are provided to the Assistant Secretary of the Army (Manpower and Reserve Affairs) for review and coordination. These actions will have received a thorough legal review by both the Office of The Judge Advocate General and the Army General Counsel, prior to Assistant Secretary review. If confirmed, I will ensure that each Army general officer nomination receives my personal review and approval prior to forwarding to the Secretary of the Army for further processing. I will give special attention to any case of a nominee with a report of adverse or reportable information in order to ensure that the Army's support of the officer's nomination is appropriate, and that adverse and reportable information is reported to the Senate Armed Services Committee in a timely, accurate, and comprehensible manner.

Question. What is your assessment of the ability of the Services to timely document credible information of an adverse nature for evaluation by promotion selection boards and military and civilian leaders?

Answer. While it is too early to make a true assessment, it is my understanding that under current Department of the Army practice, the adverse information presented to promotion selection boards is culled from numerous Army organizations that maintain relevant data, and generally has been found to be accurate and timely. A panel of senior officials conducts a special screening of adverse information to ensure that any credible information of an adverse nature is presented to general officer promotion selection boards as required by title 10, U.S.C., section 615. I understand that, if confirmed, I would be a member of this panel.

Question. If confirmed, what steps will you take to ensure that only the best qualified officers are nominated for promotion to general and flag officer rank?

Answer. It is my understanding that the Army promotion board system is fair and efficient and consistently produces promotion recommendations of the best qualified officers for promotion at all levels. As stated above, if confirmed, I will personally review each general officer nomination, and I will give special attention to any case of a nominee with a report of adverse or reportable information, in order to ensure that the Army's support of the officer's nomination is appropriate and that adverse and reportable information is reported to the Senate Armed Services Committee in a timely, accurate, and comprehensible manner.

TECHNICAL TRAINING OF GENERAL OFFICERS

Question. In your view, do a sufficient number of Army general officers have advanced training and degrees in scientific and technical disciplines?

Answer. I have been informed that the selection requirements for one- and two-star promotion selection boards are developed based upon the needs of the Army and necessarily include the scientific and technical disciplines projected by Army requirements.

Question. Are the career paths for officers with technical skills appropriate to ensure that the Army can execute complex acquisition programs, adapt to a rapidly changing technological threat environment, and make informed investment decisions on DOD and Army resources?

Answer. I have been informed that the Army carefully manages its officer corps to ensure officers have the appropriate level of adaptability and technical expertise relevant to each career field. I have also been informed that the Army is presently growing its Acquisition Corps. If I am confirmed, I will study whether career paths for officers provide them with the technical skills and experiences to take on the responsibilities of our complex acquisition programs.

Question. If not, what will you do to address this deficiency?

Answer. As stated above, the Army is in the process of shaping and developing a more robust Acquisition Corps. If confirmed as the Assistant Secretary of the Army (Manpower and Reserve Affairs), I will have oversight of this process and will ensure that plans and strategies remain suitable and viable.

MID-CAREER OFFICER SHORTFALL

Question. The requirement stemming from Army modernization, in addition to the high tempo of operations, has created the need for significantly more officers in the grades of captain and major.

Do you agree that there is a significant shortfall of mid-career officers in the Army?

Answer. I have been informed that the Army is currently experiencing a shortfall of 4,000 captains and majors, which is a critical issue for the Army. If confirmed,

I will review the plans in place to ensure that this shortfall is being appropriately addressed in a timely manner.

Question. What is your understanding of the reasons for the shortfall?

Answer. It is my understanding that there are three primary reasons for this shortfall. First, during the post-Cold War drawn-down from an end-strength of 770,000 to 480,000 resulted in lower accession rates for officers in year groups in the 1990s. Second, the more recent transformation to a modular force structure increased the officer-enlisted ratio. Third, the increase in end strength to 547,400 increased the overall demand for officers.

Question. What is the Army doing to address this shortfall?

Answer. I have been informed that the Army has a number of initiatives designed to address this critical issue, which includes increasing accessions, incentives, and appropriate adjustments to the time-in-grade requirements. As noted above, if confirmed, I will carefully review all these initiatives.

Question. If confirmed, will you undertake a comprehensive review of the medical support requirements for the Army and the sufficiency of the plans to meet recruiting and retention goals in these specialties?

Answer. I appreciate the committee's concerns in this regard and, if confirmed, pledge to consider this matter with the seriousness of purpose it mandates. Medical support requirements are critical to the success of our All-Volunteer Force and I intend to pay special attention to health care requirements and needs. Recruiting and retention of health care professionals is a challenge across the country, and the Army is experiencing shortages in several specialties; however, even during these challenging times, I am pleased to have learned that Army medicine continues to attract and produce world-class physicians, nurses, and medics.

Question. What legislative and policy initiatives, including bonuses and special pays, do you think may be necessary to ensure that the Army can continue to meet medical support requirements?

Answer. I am not familiar with the full scope of the Army's program for recruiting and retaining military and civilian medical personnel; however, if confirmed, I will work closely with The Surgeon General to evaluate the Army's requirements and to support on-going programs and develop initiatives to enhance the Army's ability to recruit and retain care providers and support personnel with the requisite critical skills. Should legislative or policy changes be required, I will work with the Secretary of the Army, other Army leaders, the leadership of DOD, and Congress, to bring them to fruition.

REPORT OF THE DOD TASK FORCE ON MENTAL HEALTH

Question. The Department of Defense Task Force on Mental Health found that the stigma surrounding post-traumatic stress disorder and other mental health issues acts as a barrier to many servicemembers seeking the help that they need. Additionally, the Task Force found that there are significant issues with accessibility and numbers of mental health providers, stating that the "military system does not have enough fiscal or personnel resources to adequately support the psychological health of servicemembers and their families."

If confirmed, what actions will you take to ensure that appropriate numbers of mental health resources are available to soldiers in theater, and to the soldiers and their families upon return to home station?

Answer. It appears to me that the Army has made great strides in improving the number and accessibility of mental health care providers. If confirmed, I will continue this effort by reviewing the Army's current force structure and its retention and recruitment programs across all force components, military and civilian. I will endeavor to ensure that the beneficiaries of the Army health care system have access to mental health services of the highest possible quality.

Question. What actions should senior leaders take to erase the stigma associated with seeking mental health care in the Army?

Answer. The stigma associated with seeking mental health care is not unique to the military; it exists across the country. I perceive that the Army is working diligently to eliminate the stigma associated with seeking mental health care, although it appears that more needs to be done. If confirmed, I would review carefully the factors that contribute to the misperception that seeking mental health care is evidence of personal weakness or that seeking care will derail one's military career. I would continue to support broad-based positive communication, training, and outreach programs, and promote access to mental health services so as to minimize actual and perceived barriers to care.

ACTIVE-DUTY END STRENGTH

Question. The Army has increased its active-duty end strength to meet current and future operational requirements. The Army had planned to increase its end strength to 547,400 by 2010, but has already achieved this goal in 2009.

In your view, what is the appropriate Army Active-Duty end strength needed to meet the demand for deployed forces, increase nondeployed readiness, build strategic depth, and relieve stress on soldiers and their families?

Answer. If confirmed, I will review the Army's projections in light of the demands and ensure that any increases in end strength are well analyzed, coordinated across the Department, and fully justified.

Question. If Army end strength is projected to be above the authorized 547,000 in fiscal years 2009 or 2010, how would you propose, if confirmed, to fund the additional end strength above current authorized levels?

Answer. If I am confirmed, I would work closely with the Assistant Secretary for Financial Management, the Under Secretary of the Army, and the Secretary of the Army to identify appropriate funding sources.

Question. Do you believe that an end strength of 547,400 is sustainable in the long term?

Answer. Yes, given the appropriate level of resourcing.

MODULARITY

Question. Modularity refers to the Army's fundamental reconfiguration of the force from a large division-based to a brigade-based structure. The new modular brigade combat team is supposed to have an increased capability to operate independently based upon increased and embedded combat support capabilities such as military intelligence, reconnaissance, and logistics. Although somewhat smaller in size, the new modular brigades are supposed to be just as or more capable of full spectrum operations than the divisional brigades they replace.

What is your understanding and assessment of the manpower and personnel management requirements of the Army's modular design and implementation of this transformation strategy?

Answer. It is my understanding that the increased capabilities resident in the modular brigade combat teams have greatly enhanced their ability to meet current and projected Combatant Commander (COCOM) requirements. This increased capability places additional requirements on numerous skill sets, which are already in high demand. I believe it may take years to mature the full complement of senior officers and NCOs necessary to support these increased capabilities.

Question. In your view, what are the greatest personnel challenges, if any, in realizing the transformation of the Army to the modular design? If confirmed, what actions or changes would you propose, if any, relative to the Army's modular transformation strategy?

Answer. It is my understanding that the Army remains committed to fielding the best trained, most capable forces possible, and that the Army should not compromise on training to increase availability. The longer train/educate/mature times required by the Army's modular formations for the additional field grade officer and senior NCO personnel requirements may take us years to generate. If I am confirmed, I will assess whether any changes should be considered to address these challenges, and after careful study and deliberation, I will provide the Secretary with cogent advice regarding these changes.

ARMY FORCE GENERATION MODEL

Question. The Army relies on a force generation model (ARFORGEN) in which units are manned, equipped, and trained to appropriate readiness levels over time as they cycle through "reset and train," "ready," and "available for deployment" force pools.

What is your understanding and assessment of the manpower and personnel management requirements of the Army's force generation methodology?

Answer. ARFORGEN provides cyclic readiness for the force over a given time period. The current manpower processes and procedures support this cyclic readiness by providing the manpower required for next deployers and other high priority missions. If confirmed, I will work diligently to ensure that the Army's current manpower processes and procedures continue to support the ARFORGEN model.

Question. In your view, what are the greatest manpower and personnel management challenges, if any, in implementing ARFORGEN?

Answer. It is my understanding that the greatest challenge facing manpower and personnel management is that ARFORGEN and the Army are coping with shortfalls

of high-demand grades and skills, which results in a short dwell in the continental United States between deployments. High demand personnel are arriving at next deploying units on a Just-In-Time basis for training and deployment.

Question. If confirmed, what actions or changes would you propose, if any, to the design, implementation, or management of ARFORGEN?

Answer. It is my understanding that ARFORGEN significantly changed the way the Army generates forces to support Combatant Commanders' requirements, moving from tiered readiness to cyclic readiness. At this time I am unaware of any need to amend or modify the ARFORGEN model; however, if confirmed, I will fully assess the manpower processes and procedures that support ARFORGEN and make appropriate recommendations, if required.

STOP-LOSS

Question. How does the Army plan to implement the Secretary of Defense's recent direction to end the use of stop-loss without eroding unit manning and unit cohesion?

Answer. The Secretary of Defense has directed that the Army phase out the use of Stop-Loss over time in order to mitigate manning issues created by soldier separations and retirements. Further, I understand that adjustments to manning mechanisms are underway that are designed to replace separating soldiers in units scheduled to deploy; and that incentive programs have been developed to encourage soldiers who do not intend to reenlist to extend their service long enough to complete a deployment with their units.

OPERATIONAL AND PERSONNEL TEMPO

Question. Current DOD policy is that Active component personnel will have 2 years of dwell time for each year of deployment and that Reserve component members have 5 years of dwell time for each year they are mobilized.

What is your view of the achievability of this goal? What measures must be taken by the Army to be able to achieve it in 5 years or less?

Answer. It is my understanding that this is an important aspect of sustaining the All-Volunteer Force because it facilitates predictability for our soldiers and their families, allows for professional military development, and facilitates time for Army National Guard dual-use with the States. If confirmed, I will undertake a review of the Army's current personnel programs with a view of assessing the achievability of the DOD goal, and when necessary, I will make appropriate recommendations to the Secretary designed to maximize dwell time consistent with the DOD policy.

Question. In your view, how will shifting resources from Iraq to Afghanistan affect dwell-time ratios?

Answer. It is my understanding that the concept outlined by the President and the plan briefed to senior DOD leaders by Central Command (CENTCOM) will result in increases in the dwell-time ratios for many of the affected units.

Question. How will the end of the use of stop-loss affect dwell time ratios?

Answer. I have been informed that the reduction of the use of Stop Loss will not affect unit Boots-on-the-Ground (BOG) to Dwell Time ratios. It may, however, have a negative impact on the dwell times of individual soldiers with high demand skills.

Question. What is your assessment of the Army's ability to support scheduled troop rotation planning in 2009 and beyond, particularly in combat support and combat service support missions, given this goal?

Answer. I have been informed that based on the anticipated transition force demand in the CENTCOM AOR, the Army will be able to meet validated requirements—combat, combat support, and combat service support missions—while increasing dwell-time ratios across the force.

Question. What measures are being taken to respond to operational requirements for low-density/high-demand units and personnel whose skills are found primarily in the Reserve components, e.g., civil affairs, medical personnel, and truck drivers?

Answer. I have been informed that the Army assesses force capabilities and adjusts force unit capacity, as necessary, to respond to operational requirements in low-density/high-demand units. If confirmed, I would ensure that the Army continues to assess force mix across all three components to meet the strategic demands of conventional campaigns, irregular warfare operations and homeland defense/civil support missions, with a view towards balancing the force structure to minimize risk in availability of low-density/high-demand units.

Question. In your view, what will be the effect on recruiting, retention, and readiness of the Army of the current rates of operations and personnel tempo through 2010?

Answer. I have been informed that the Army has experienced no negative effects on recruiting and retention due to operational and personnel tempo. If confirmed, I will continue to monitor this critical area.

Question. In your judgment, what would be the impact on the current rates of operations and personnel tempo of assigning principal responsibility for support to civil authorities for consequence management of natural, domestic disasters to either our Active or Reserve component forces?

Answer. If confirmed, I would work with Department leaders, in coordination with appropriate members of the Joint Staff, to make a careful assessment of this issue and provide the Secretary with cogent advice that will fully consider the challenges of today's security environment.

MOBILIZATION AND DEMOBILIZATION OF NATIONAL GUARD AND RESERVES

Question. In the aftermath of the attacks of September 11, 2001, the National Guard and Reserves have experienced their largest and most sustained employment since World War II. Numerous problems arose in the planning and procedures for mobilization and demobilization, e.g., inadequate health screening and medical readiness, monitoring, antiquated pay systems, limited transition assistance programs upon demobilization, and lack of access to members of the Individual Ready Reserve (IRR). Reserve Force management policies and systems have been characterized in the past as "inefficient and rigid" and readiness levels have been adversely affected by equipment stay-behind, cross-leveling, and reset policies.

What is your assessment of advances made in improving Army Reserve component mobilization and demobilization procedures, and in what areas do problems still exist?

Answer. It is my understanding that since the beginning of Operations Enduring Freedom and Iraqi Freedom, the Army has made significant advances in improving mobilization and demobilization processes. Most importantly, the Army has achieved improved predictability and pre-mobilization readiness through the implementation of Army Force Generation (ARFORGEN) and through achieving earlier notification of sourcing (NOS) and Alert prior to mobilization.

Question. What do you consider to be the most significant enduring changes to the administration of the Reserve components aimed at ensuring their readiness for future mobilization requirements?

Answer. The implementation of ARFORGEN has been a significant change to the administration of the Reserve components and I believe helped to ensure readiness for future mobilization requirements.

Question. Do you see a need to modify current statutory authorities for the mobilization of members of the National Guard and Reserves?

Answer. At this point, based predominantly on my personal experience as a member of the National Guard, I feel current statutory authorities are sufficient to support mobilization requirements. If confirmed, I will be in a better position to assess whether to recommend changes to applicable law and policy.

Question. Do you agree that National Guard and Reserve personnel should be mobilized to augment civilians deployed to Afghanistan?

Answer. Yes, I believe that National Guard and Reserve component personnel bring skills and experience that can be used to augment other executive branch agencies and their civilian employees. For example, Army Civil Affairs soldiers are currently employed in this capacity in Afghanistan.

Question. What are your views on the proper role of the IRR in Army force management planning?

Answer. It has been explained to me that the IRR is an available manpower pool consisting of individuals who have been trained and previously served in the active forces or in the Selected Reserve. The IRR has proven to be a steady and valuable asset for the Army. Even given my limited knowledge, it would appear that the IRR is serving an important role. If confirmed I will have the opportunity to look more closely at this issue.

Question. If confirmed, what changes, if any, do you foresee making to the Army's IRR recall policy?

Answer. At this stage of the confirmation process I cannot predict what changes may be required. However, I am informed that the Army continuously monitors and reviews its processes and procedures. If confirmed, I believe that my assigned duties would afford me the opportunity to further evaluate the processes and policies applicable to the IRR.

Question. What are your views about policies affecting continued service by officer and enlisted personnel in the Reserve components who have fulfilled their Military Service Obligation (MSO)?

Answer. It is my understanding that all Ready Reserve soldiers are retained for the entire period of their MSO or contractual obligation, or they may voluntarily remain in the IRR. Our soldiers are very loyal to their country and should be commended for their continuing service. If confirmed I will be in a position to review the relevant policies and better determine if they remain suitable.

Question. What is your assessment of the adequacy of the system in place for members in the IRR receiving orders to Active Duty to request a delay or exemption for that activation, including the procedures in place for appealing the Army's decision on that request?

Answer. I have been informed that the system in place to process requests from an IRR soldier for delay, exemption, or appeal of an order to Active Duty allows for appropriate consideration of the soldier's personal circumstances, together with consideration of the needs of the Army. If confirmed, I will undertake an assessment of this system to determine whether changes should be made.

Question. What is your assessment of the value of the IRR to the All-Volunteer Force?

Answer. It is my understanding that the value of the IRR is its ability to provide individual replacements for deploying units and to provide soldiers to support short-term missions throughout the Army. The IRR has allowed the Army to meet critical requirements within mobilizing Army Reserve and Army National Guard units.

Question. Medical and dental readiness of Reserve component personnel has been an issue of significant concern to the committee, and shortfalls that have been identified have indicated a need for improved policy oversight and accountability.

If confirmed, how would you seek to clarify and coordinate reporting on the medical and dental readiness of the Reserves?

Answer. First, let me say that I am extremely proud of our Reserve component servicemembers and their service to our Nation during this time of war and transformation. Based upon my own experience as an officer in the National Guard, I believe that all components of the total force must be prepared to deploy at any time. If confirmed I will assess the effectiveness of reporting on the medical and dental readiness and to evaluate the need for policy changes and increased oversight.

Question. How would you improve upon the Army's ability to produce a healthy and fit Reserve component?

Answer. I am advised that the Army has comprised a multi-disciplinary task force to address and promote Comprehensive Soldier Fitness across all components. If confirmed, I look forward to learning more about the Comprehensive Soldier Fitness program, particularly as it applies to the Reserve component, and working with leaders across the Army to implement it.

LESSONS LEARNED

Question. What do you believe are the major personnel lessons learned from Operation Enduring Freedom (OEF) and Operation Iraqi Freedom (OIF) which you would seek to address if confirmed as Assistant Secretary of the Army for Manpower and Reserve Affairs?

Answer. Undoubtedly, lessons learned from throughout OEF/OIF will enhance the Army's ability to plan and execute ongoing and future missions. If confirmed, I will seek out and examine these lessons learned, with a focus on their application to manpower and Reserve affairs matters and apply them to the challenges and complexities of our ongoing contingency operations.

NATIONAL GUARD ORGANIZATION, EQUIPMENT, AND READINESS

Question. Legislative proposals introduced in recent years and recommendations of the Commission on the National Guard and Reserves have proposed numerous changes to the roles and responsibilities of the National Guard and Reserves. Several of the proposed changes have been implemented, and numerous others are under consideration.

How do you assess the changes in the roles, mission, and authorities of the Chief of the National Guard Bureau and the Director of the Army National Guard?

Answer. I believe that the changes that have been made thus far to enhance, clarify, and refine the roles missions and authorities of the Director of the Army National Guard (DARNG) have been effective. If confirmed, I will study the additional proposals under consideration and determine whether they are appropriate.

Question. In your view, do the current Army processes for planning, programming, and budgeting sufficiently address the requirements of the Army National Guard? What is the appropriate role of the Chief of the National Guard Bureau in this regard?

Answer. The Army National Guard is an integral part of the Army and has representation in all the Program Evaluation Groups (PEGs) that inform the process including Manning, Training, Organizing, Equipping, Sustaining, and Installations. The Army National Guard also has representatives in all Army staff sections to ensure that Army National Guard requirements and priorities are integrated into the budgeting process.

I believe that in his advisory role to the Secretary of the Army and the Chief of Staff of the Army, the Chief, National Guard Bureau (CNGB) supports the Army planning, programming, and budgeting process.

TRICARE FEE INCREASES FOR MILITARY RETIREES

Question. Secretary Gates recently told officers at the Air War College that “health care is eating the (Defense) Department alive.”

Do you agree with the Secretary’s assessment?

Answer. Yes.

Question. What is your view of the need for increased beneficiary payments in reducing overall health care costs to the Department?

Answer. I am advised that costs have grown due to many factors: increased utilization by a mobilized RC force, expansion of benefits to support basic health care needs and that of more severely wounded soldier and their families, increased use by retiree beneficiaries, health inflation, and finally no change in TRICARE premiums in the last 10 years. It is my understanding that a sound medical benefit program directly impacts retention of soldiers and their families. If confirmed, I would support a DOD review of the current beneficiary payment structure to ensure that future benefit costs are sustainable.

Question. What other reforms in infrastructure, benefits, or benefit management, if any, do you think should be examined in order to control the costs of military health care?

Answer. It is my understanding that to a great extent, the costs of military health care are subject to prevailing rates for labor, equipment and supplies within the health care industry. If confirmed, I will study this issue further and work with the other military departments and DOD to determine the best structure for the future.

PERSONNEL AND ENTITLEMENT COSTS

Question. In addition to health care costs, personnel and related entitlement spending continues to soar and is becoming an ever increasing portion of the DOD budget.

If confirmed, what actions will you take to control the rise in personnel costs and entitlement spending?

Answer. I have been advised that the military departments have limited authority to reduce overall personnel costs and entitlement spending. If I am confirmed, I will ensure adequate oversight through processes/procedures and audit reviews to provide early warning regarding the costs and effects of proposed new military pays or benefits.

Question. If confirmed, what actions will you take to avoid a requirement for massive end-of-year reprogramming to cover personnel costs?

Answer. As is the case with regard to change in any large organization, military personnel changes take time to execute and implement throughout the force. In order to avoid unnecessary changes, if confirmed, I will work closely within the Army and DOD to accurately budget, and then will monitor execution, strength, and incentives, to ensure the Army remains in balance.

STRESS ON ARMY FAMILIES

Question. Army families have been under great stress since 2001 as a result of multiple and lengthy deployments in OIF and OEF.

In your view, what are the key indicators of the stress on Army families at this time?

Answer. I recognize that soldiers and their families have made and continue to make significant personal sacrifices in support of our Nation. If confirmed, I will ensure that the Army remains committed to providing soldiers and families with a quality of life commensurate with their service. It is my understanding that the Army monitors a number of indicators, and Army families continue to demonstrate how resilient they are. However, after experiencing soldier absences during deployments of varying duration and frequency, often with less time between them than needed to truly reset, families have indicated a need for: expanded support for their children; greater access to health care resources; more robust family programs and

services; additional education and employment opportunities; and available, quality housing.

Question. If confirmed, what will you do to address these key indicators?

Answer. It is my understanding that the Army Family Covenant formalizes senior leadership commitment and addresses the following key areas for families: standardizing and funding existing family programs and services; increased accessibility and quality of health care; improving soldier and family housing; ensuring excellence in schools, youth services, and child care; and expanding education and employment opportunities for family members. If confirmed, I would exercise oversight of the execution of the key soldier and family programs and services, keep an ear to the ground to ensure the Army meets the needs of its people, and identify funding requirements to continue efforts that are critical to the sustainment of an All-Volunteer Force.

Question. If confirmed, what will you do to address these key indicators?

Answer. If confirmed, I would exercise oversight of the execution of the key soldier and family programs and services, keep an ear to the ground to ensure the Army meets the needs of its people, and identify funding requirements to continue efforts that are critical to the sustainment of an All-Volunteer Force.

Question. What do you consider to be the most important family readiness issues in the Army?

Answer. Family readiness issues vary by family, but one commonality among all families is the need for information and communication. To meet this critical need, I am advised that Family Readiness Groups have been established to provide important support and assistance and a network of communication among the family members, the chain of command, and community resources.

Additionally, Army OneSource, the Army's online portal for family support information, programs, and services, provides a comprehensive multi-component approach for community support and services to meet the diverse needs of all soldiers and families.

FAMILY READINESS

Question. If confirmed, how would you address family readiness needs in light of global rebasing, BRAC, continuing deployments, and the growth of the Army?

Answer. Military families make extraordinary sacrifices as their loved ones advance the cause of freedom around the world. Military families have set aside careers, interrupted their education, and when living far from a military base, struggled to locate child care equal to the price and quality available at military installations. The Army must recognize those sacrifices and deliver quality programs and services that geographically dispersed and frequently relocating families must endure.

I am informed that on October 8, 2007, Secretary Geren unveiled the Army Family Covenant, a commitment to provide soldiers and their families—Active, Guard, and Reserve—a quality of life commensurate with their level of service and sacrifice to the Nation. I fully support the Covenant's commitment to soldiers and families and, if confirmed, will continue to improve family readiness through the Family Covenant.

Question. If confirmed, how would you ensure support for Reserve component families, particularly those who do not reside near an active-duty military installation, related to mobilization, deployment, and family readiness?

Answer. Family readiness is a very important issue to me. The Army Family Covenant commits the Army to improve family readiness—in both the Active and Reserve components—by standardizing family programs and services, increasing accessibility to health care; improving soldier and family housing; ensuring excellence in schools, youth and child services; and expanding education and employment opportunities for family members. The Soldier Family Action Plan provides the roadmap to implement the Army Family Covenant commitment and improve and/or address gaps in existing soldier and family programs and services.

Question. In your view, what progress has been made, and what actions need to be taken in the Army to provide increased employment opportunities for military spouses?

Answer. I am extremely appreciative of the undaunted support of military spouses to our soldiers and am aware of the importance of supporting employment opportunities for military spouses. If confirmed, I will continue to pursue the initiatives that have been set in place to benefit military families during this troubled economic era.

SUPPORT FOR THE SINGLE SOLDIER

Question. While the percentage of married soldiers has steadily increased, a substantial portion of soldiers, especially young soldiers, are single.

What are the unique support needs of single soldiers, especially those returning from combat?

Answer. It is my understanding that the needs of single soldiers, especially those returning from deployments, may differ from the needs of soldiers with spouses and children. I have been informed that in the past few years, the Army has made significant investments in single soldier barracks and programs to mitigate the stress of deployment and improve single soldier readiness.

Question. If confirmed, what would you do to address these needs?

Answer. If confirmed, I will review Army's soldier support programs designed to improve the quality of life for all soldiers—Active and Reserve component, single and married, with a view toward ensuring that these programs are effective in meeting the specific needs of each group.

NATIONAL SECURITY PERSONNEL SYSTEM

Question. Section 1106 of the National Defense Authorization Act for Fiscal Year 2008 restored the collective bargaining rights of civilian employees included in the National Security Personnel System (NSPS) established by DOD pursuant to section 9902 of title 5, U.S.C. Under section 1106, the Department retains the authority to establish a new performance management system (including pay for performance) and streamlined practices for hiring and promotion of civilian employees. Senior DOD officials have stated that they do not intend to expand NSPS to include employees in bargaining units that are represented by employee unions.

What is your view of the NSPS system, as currently constituted?

Answer. I understand the NSPS's key features were to support a streamlined and flexible civilian compensation, staffing, classification, and performance management system essential to effective management of a mission-oriented and results-driven civilian workforce that are vital to the success of DOD missions. I understand that DOD and the Office of Personnel Management (OPM) are currently conducting a comprehensive evaluation of the NSPS system. If confirmed, I look forward to working with DOD and OPM to ensure an optimum system.

Question. Do you support the pay-for-performance approach adopted for civilian employees in the NSPS system?

Answer. As a general principle, I support pay-for-performance; an employee's compensation should be based on contribution to mission. If confirmed, I look forward to seeing the results of DOD and OPM's comprehensive evaluation of NSPS in order to work toward addressing any identified concerns.

Question. Do you believe that the Department needs streamlined authority for hiring and promotion of civilian employees to meet its human capital needs?

Answer. I am advised that the Department is challenged to meet increased civilian labor requirements in critical occupations and to develop human capital strategies to respond to these challenges. It is my understanding that there are situations where specialized hiring authorities are required in order to provide sufficient qualified applicants to meet mission needs. However, before making recommendations for additional authorities, I would want to ensure that managers fully understand the flexibilities and authorities currently available. If confirmed, I will ask managers to creatively and actively use available authorities and will explore the need for and use of direct and expedited hiring authorities to assist in achieving the Department's human capital objectives.

Question. In your view, is it viable in the long run for DOD to maintain two separate systems (NSPS and the General Schedule) for its civilian employees?

Answer. It is my understanding that DOD has a number of other personnel systems, such as Defense Civilian Intelligence Personnel System and that for non-appropriated fund personnel. If confirmed, I will work with DOD and OPM to assess the appropriate number and types of personnel systems for effective and efficient personnel management.

Question. What changes, if any, would you recommend to the NSPS authorizing legislation?

Answer. It is my understanding that DOD, in conjunction with OPM, is planning to conduct a comprehensive evaluation of NSPS, as currently implemented. If confirmed, I would seek to ensure that the Army participates fully in this evaluation. Depending on the outcome of this evaluation, legislation and/or policy changes may be appropriate to ensure that NSPS is on track to achieve its full potential.

Question. What changes, if any, would you recommend to the NSPS regulations?

Answer. It is my understanding that DOD, in conjunction with the Office of Personnel Management, is planning to conduct a comprehensive evaluation of NSPS, as currently implemented. If confirmed, I would seek to ensure that the Army participates fully in this evaluation. Depending on the outcome of this evaluation, regulatory changes may be appropriate to ensure that NSPS is on track to achieve its full potential.

BALANCE BETWEEN CIVILIAN EMPLOYEES AND CONTRACTOR EMPLOYEES

Question. In recent years, DOD and the Army have become increasingly reliant on services provided by contractors. Over the past 8 years, DOD's civilian workforce has remained essentially unchanged in size. Over the same period, DOD's spending on contract services has more than doubled, with the estimated number of contractor employees working for the Department increasing from an estimated 730,000 in fiscal year 2000 to an estimated 1,550,000 in fiscal year 2007. As a result of the explosive growth in service contracts, contractors now play an integral role in the performance of functions that were once performed exclusively by government employees, including the management and oversight of weapons programs, the development of policies, the development of public relations strategies, and even the collection and analysis of intelligence. In many cases, contractor employees work in the same offices, serve on the same projects and task forces, and perform many of the same functions as Federal employees.

Do you believe that the current balance between civilian employees and contractor employees is in the best interests of the Army?

Answer. The information set forth in the committee's question presents cause for concern and warrants comprehensive examination. I agree with President Obama's government contracting memorandum of March 4, 2009, directing the Federal Government to ensure that functions that are inherently governmental in nature are performed by executive agencies and are not outsourced. If confirmed, I would work with the Secretary of the Army, the Under Secretary, and leaders across the Army to assess this matter so as to ensure compliance with the law and with the President's policy.

Question. In your view, has the Army become too reliant on contractors to perform its basic functions?

Answer. As set forth above, I agree fully with President Obama's memorandum of March 4, 2009, directing the Federal Government to ensure that functions that are inherently governmental in nature are performed by executive agencies and are not outsourced. If confirmed, I would work with the Secretary of the Army, the Under Secretary, and leaders across the Army to assess this matter so as to ensure compliance with the law and with the President's policy.

Question. Do you believe that the current extensive use of personal services contracts is in the best interests of the Army?

Answer. As I understand it, the Army may use personal services contracts only in limited circumstances, when specifically authorized by law and policy. If confirmed, I would work with the Secretary of the Army, the Under Secretary, and leaders across the Army to ensure compliance with applicable law and policy.

Question. Do you believe that the Army should undertake a comprehensive reappraisal of "inherently governmental functions" and other critical government functions, and how they are performed?

Answer. I support fully the principles and policies set forth in President Obama's memorandum of March 4, 2009. That memorandum directs the Office of Management and Budget, in coordination with the Secretary of Defense, among others, to develop and issue government-wide guidance to assist executive branch agencies in reviewing the propriety of existing contracts and to formulate corrective action when appropriate. I believe that any such review must include an appraisal of inherently governmental functions and other critical government functions and how they are performed. If confirmed, I will support any such review and corrective action, particularly as it relates to matters under the purview of the Assistant Secretary of the Army (Manpower and Reserve Affairs).

Question. If confirmed, will you work with other appropriate officials in the Army to address these issues?

Answer. The issues you raise cross functional lines. Accordingly, I believe that a comprehensive effort involving stakeholders across the Army, DOD, the interagency, and Congress, will be required to address these issues in a comprehensive fashion. I pledge that if confirmed, I will work collaboratively with other Army officials on these matters, in furtherance of the best interests of the Army and DOD.

Question. One reason for the explosive growth in DOD's contractor workforce has been the continuing limitation placed on the number of civilian employees of DOD.

Rather than saving money as intended, this limitation has shifted all growth to contractor employees.

Would you agree that the balance between civilian employees and contractor employees in performing Army functions should be determined by the best interests of the Army and not by artificial constraints on the number of civilian employees?

Answer. Yes, I agree.

Question. If confirmed, will you work to remove any artificial constraints placed on the size of the Army's civilian workforce, so that the Army can hire the number of employees most appropriate to accomplish its mission?

Answer. I understand that by law, the Army is required to manage its civilian personnel solely on the basis of, and consistent with, the workload required to carry out the Army's functions and activities and the funds Congress appropriates to the Department. If confirmed, I would support all efforts to ensure compliance with the law and to remove inappropriate constraints on the size of the Army civilian workforce.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. Numerous cases of sexual misconduct involving soldiers in Iraq, Kuwait, and Afghanistan have been reported over the last several years. Many victims and their advocates contend that they were victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate military treatment. They asserted that the Army failed to respond appropriately by providing basic services, including medical attention and criminal investigation of their charges.

What is your understanding of the resources and programs the Army has in place in deployed locations to offer victims of sexual assaults the medical, psychological, and legal help that they need?

Answer. I have been advised that the Army goes to great lengths to ensure appropriate levels of support are available to our deployed soldiers, including medical, psychological, and legal support. While I have not been fully briefed on all Army initiatives, I understand that the Army has taken significant steps to improve the assistance to victims of all sexual assaults, with enhanced recognition of the special circumstances that apply to deployments. I have been advised, for example, that for the past 3 years, the Army has had in place a comprehensive Sexual Assault Prevention and Response Program. I am informed that under this program, the Army requires every unit, brigade-sized and higher, to appoint and train a deployable Sexual Assault Response Coordinator and requires every battalion to appoint and train two Unit Victim Advocates. If confirmed, I will study this matter in greater depth with a view to ensuring that the Army continues to take appropriate steps to aid victims of sexual assault, both in garrison and in deployed locations.

Question. What is your view of the steps the Army has taken to prevent additional sexual assaults at home stations as well as deployed locations?

Answer. In my opinion, the Army has taken several extremely important steps in its campaign to prevent sexual assaults both at home stations and deployed locations. For instance, I have been advised that the Army launched a new comprehensive sexual assault prevention campaign in 2008: the "I. A.M. Strong" program in which the letters I, A, and M stand for Intervene-Act-Motivate. The "I. A.M. Strong" program features soldiers as influential role models providing peer-to-peer messages to encourage other soldiers to take action to promote a positive command climate in which sexual assault is not acceptable. If confirmed, I will continue these vital initiatives and assess whether additional steps should be taken.

Question. What is your view of the adequacy of the training and resources the Army has in place to investigate and respond to allegations of sexual assault?

Answer. Based upon the information I have been provided to date, it appears that the Army is committed to ensuring that it has trained personnel and resources in place to investigate and respond to allegations of sexual assault. I have been advised that the Army continues to emphasize victim services and response capabilities. I have also been advised that the Army intends to hire and place additional special investigators and prosecutors at Army installations with the highest occurrences of sexual assault and to add examiners to the U.S. Army Criminal Investigation Laboratory. If confirmed, I will assess whether additional steps should be taken to support victims and hold offenders accountable.

Question. Do you consider the Army's current sexual assault policies and procedures, particularly those on confidential reporting, to be effective?

Answer. I have been advised that the Army has focused both on eliminating sexual assault from its ranks and on victim response—both key elements of an effective sexual assault program. I have been advised that part of the focus on victim response was the implementation of confidential reporting (also called "restricted" re-

porting), which I understand allows sexual assault victims to disclose confidentially the details of their assault to specified individuals and receive medical treatment and counseling, without triggering the official investigative process. If confirmed, I will work with knowledgeable professionals to assess and ensure the continuation of effective Army programs.

Question. What problems, if any, are you aware of in the manner in which the confidential reporting procedures have been put into effect?

Answer. Based on the information I have been provided to date, I am not aware of any problems with the manner in which confidential reporting procedures have been put into effect. If I am confirmed, I will closely monitor the Army's sexual assault response procedures to determine whether improvements are needed in the area of confidential reporting.

Question. If confirmed, what actions would you take to ensure senior management level direction and oversight of Departmental efforts on sexual assault prevention and response?

Answer. If confirmed, I will have an active role in the oversight and implementation of the Army's Sexual Harassment/Assault Response and Prevention (SHARP) Program. I will work with the Secretary and the Chief of Staff to ensure the Army's SHARP program continues to receive the appropriate level of supervision and support.

RELIGIOUS GUIDELINES

Question. What is your understanding of current policies and programs of DOD and the Department of the Army regarding religious practices in the military?

Answer. I have been informed that the Army's policies support religious tolerance and respect. It appears that Army and DOD regulations provide commanders and other leaders with ample guidance regarding the free exercise of religion in the Army. Army policies provide detailed guidance on the important responsibilities of commanders and leaders in this regard. It is my understanding that these policies are consistent with the First Amendment.

Question. Do these policies accommodate, where appropriate, religious practices that require adherents to wear particular articles of faith?

Answer. I have been informed that the Army places a high value on the rights of soldiers to observe the tenets of their respective religious faiths. I have been advised that the Army will approve requests for accommodation of religious practice, to include the wear of particular articles of faith, unless the accommodation will have an adverse impact on unit readiness, individual readiness, unit cohesion, morale, discipline, safety, and health. It is my understanding that Army policies are consistent with the First Amendment.

Question. In your view, do these policies accommodate the free exercise of religion and other beliefs without impinging on those who have different beliefs, including no religious belief?

Answer. I understand that Army policies require chaplains to support all unit personnel, regardless of their beliefs.

Question. In your opinion, do existing policies and practices regarding public prayers offered by military chaplains in a variety of formal and informal settings strike the proper balance between a chaplain's ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious beliefs?

Answer. I have been advised that, during mandatory official functions, chaplains are not compelled to offer prayers that are inconsistent with their faith, but are expected to remain sensitive to the pluralistic Army and society they serve. It is my understanding that these policies are consistent with the First Amendment.

UNITED STATES MILITARY ACADEMY

Question. What is your assessment of the policies and procedures at the United States Military Academy to prevent and respond appropriately to sexual assaults and sexual harassment and to ensure essential oversight?

Answer. I have been informed that the United States Military Academy continues to institutionalize prevention strategies designed to end sexual harassment and violence by providing consistent policy, removing barriers to victim reporting, ensuring accessible care, and providing comprehensive education and training to all personnel. I am advised that the Superintendent personally chairs the monthly Sexual Assault Review Board, which provides executive oversight of all aspects of the Academy's Sexual Harassment/Assault Response and Prevention program. If confirmed, I will continue these initiatives and assess whether any additional steps should be taken.

Question. What is your assessment of the policies and procedures at the United States Military Academy to ensure religious tolerance and respect?

Answer. It is my understanding that the Chief of Chaplains (CCH) is responsible for religious support activities Army wide, to include at the USMA, and that CCH policies and procedures support religious tolerance and respect. It is my understanding that these policies are consistent with the First Amendment.

SUICIDE PREVENTION

Question. The committee is concerned about the increasing rate of suicides in the Army.

In your view, what is the cause of this surge in suicides?

Answer. It is my understanding that the increase in suicides in the Army is likely not due to any single cause. Although there are recognized suicide risk factors, such as deployments, that are unique to Army life, it appears that risk factors such as relationship, financial, and legal problems also play a significant role.

Question. What is your assessment of the Army's response to this increase in suicides?

Answer. It is my understanding that the Army has taken a comprehensive, strategic approach to mitigating suicidal and high-risk behavior. In my view, this approach is the best way to address the problem of suicides by improving the mental, physical, and emotional health of soldiers, and by taking steps to reduce personal risk; a reduction in suicides should follow. If confirmed, I will fully support suicide prevention and intervention efforts.

Question. The Army recently signed an agreement with the National Institutes of Health to perform a 5-year study on suicides in the Army. If confirmed, what actions would you suggest the Army take to enhance its suicide prevention program while the study is ongoing?

Answer. I appreciate and share the committee's sense of urgency in addressing issues of suicide prevention and intervention. If confirmed, I will work with the leadership of the Army to assess all available options to enhance the Army's suicide prevention program while the National Institute of Health study is ongoing.

WOMEN IN COMBAT

Question. What is your understanding of the conclusions and lessons that have been learned about the feasibility of current policies regarding women in combat from Operation Iraqi Freedom and Operation Enduring Freedom and what is your assessment of the Army's compliance with the requirements of law relating to women in combat?

Answer. It is my understanding that the Army is in compliance with the requirements of law relating to women in combat. It is also my understanding that Army's transformation to modular units took into account and is in compliance with the current DOD assignment policy for women. Women have and will continue to be an integral part of our Army team, performing exceptionally well in all specialties and positions open to them.

Question. In your view, should the current policy prohibiting the assignment of women to ground combat units be revised to reflect changing roles for female soldiers and the changing nature of warfare?

Answer. If I am confirmed and after careful study and deliberation, that there is a need to seek a change to the policy, I will provide the Secretary with cogent advice regarding the changes sought and their potential impact on the manpower and Reserve affairs of the Army.

FOREIGN LANGUAGE PROFICIENCY

Question. A Foreign Language Transformation Roadmap announced by DOD on March 30, 2005, directed a series of actions aimed at transforming the Department's foreign language capabilities, to include revision of policy and doctrine, building a capabilities based requirements process, and enhancing foreign language capability for both military and civilian personnel. More recently, Congress authorized incentive pay for members of precommissioning programs to study critical foreign languages.

In your view, what should be the priorities of the Federal Government in expanding the foreign language skills of civilian and military personnel and improving coordination of foreign language programs and activities among the Federal agencies?

Answer. In my view, our Nation's current and future involvement in overseas contingency operations will rely heavily on both foreign language skills and cultural knowledge. The Army, as well as other government agencies, should focus on increasing foreign language and cultural awareness skills across their entire force as

well as in its language specialists (Foreign Area Officers, Civil Affairs, Special Forces, linguists, etc.). These skills will allow us to strengthen and multiply our forces' capabilities across the full operational spectrum. Further, I am aware that two of the best Foreign Language schools in the Federal Government exist in the Defense and State departments

Question. If confirmed, what steps would you take to identify foreign language requirements, and to design military and civilian personnel policies and programs to fill those gaps?

Answer. I have been advised that the Army is in the initial stages of conducting a Foreign Language Capabilities Based Assessment; this joint effort will analyze and identify critical capabilities required to support DOD operations in conventional and irregular warfare as well as contingency operations. If confirmed, I would ensure that policies involving recruiting, training and mobilization are reviewed and adjusted accordingly to meet the validated foreign language needs of the operational environment.

Question. What is your assessment of an appropriate time frame within which results can be realized in this critical area?

Answer. I have been advised that the timelines in the initial Defense Language Transformation Roadmap have already been met and fulfilled with exception of a couple initiatives. It is critical that the Army continues to look ahead to meet the needs of the operational commanders. These foreign language needs are ever changing, as the challenges of overseas contingency operations take us into regions of diverse and low-density languages. I have been advised that the Army is finalizing a Culture and Foreign Language Strategy that will outline a holistic approach to the development of cultural and foreign language training.

LEGISLATIVE FELLOWSHIP PROGRAM

Question. Each year, the Services assign mid-career officers to the offices of Members of Congress under the Legislative Fellows Program. Upon completion of their legislative fellowships, officers are required to be assigned to follow-on positions in their Services in which they effectively use the experience and knowledge they gained during their fellowships.

What is your assessment of the value of the Legislative Fellows program to the Army and the utilization of officers who have served as legislative fellows?

Answer. It is my understanding that the Fellowship program has been a valuable program that provides participants an understanding of the complexities of congressional operations and Congress's role in the process of government as a whole. Fellowships help participants gain an understanding and appreciation for the strategic relationship between the Army and Congress. I understand that the Army carefully evaluates fellows' post-fellowship assignment, taking into account each fellow's recent experience with Congress as well as duty specialty and past experiences. The Army has a large requirement for personnel with legislative experience at many levels of command and the fellows trained each year help fill those needs.

DEFENSE INTEGRATED MILITARY HUMAN RESOURCES SYSTEM (DIMHRS)

Question. The Department and the Services are moving toward adoption of DIMHRS as a cross-service, fully integrated personnel and pay system. Under the proposed timeline, the Army is the first in line to launch DIMHRS, with the Air Force, Navy, and Marine Corps to follow. Recent reports indicate technical difficulties will postpone the Army's launch date.

What is the status of the Army's implementation of DIMHRS? What is your assessment of the need for an integrated, cross-service personnel and pay system?

Answer. I have not been informed of the specific status of Army's implementation of the DIMHRS, however, it is my understanding that once fully implemented, this program will substantially improve the accuracy and efficiency of our ability to manage our personnel across DOD.

Question. If confirmed, what changes, if any, would you recommend to the implementation schedule and process currently in place?

Answer. If confirmed, I will carefully review the implementation plan and associated milestones. If my review identifies any weakness, I will make appropriate recommendations, after cross-Service coordination, to the responsible officials.

GI BILL BENEFITS

Question. Last year, Congress passed the Post-9/11 Veterans Educational Assistance Act that created enhanced educational benefits for servicemembers who have served at least 90 days on active duty since September 11. The maximum benefit

would roughly cover the cost of a college education at any public university in the country.

What is your assessment of the effect of the act on recruiting and retention of servicemembers?

Answer. It is my understanding that the new post-September 11 GI Bill is designed to enhance the Army's recruiting efforts in that it will assist the Army in targeting that population of young adults who desire to attend college but cannot afford to do so at the current time. This benefit will open up opportunities for them to achieve their educational goals. The impact of this benefit on retention will require careful monitoring, but the provision in the new program that allows career servicemembers to share or transfer their GI Bill benefits with immediate family members may mitigate any negative retention impacts.

Question. What is your understanding of the sufficiency of the implementation plan for the transferability provisions contained in the act?

Answer. I have been informed that the Army is working closely with DOD on the implementation of this new program and that DOD will publish its implementing policies in the near future. If confirmed, I will continue this important work and ensure that the Army's implementation of this program is well executed, consistent with published DOD guidelines.

QUADRENNIAL REVIEW OF MILITARY COMPENSATION

Question. The Department recently completed work on the 10th Quadrennial Review of Military Compensation (QRMC), releasing Volume I of its report in February 2008 and Volume II in July 2008. Among other recommendations, the QRMC proposes a new defined benefit retirement plan that more resembles the benefits available under the Federal Employee Retirement System than the current military retirement benefit; increasing TRICARE fees for retirees; and the adoption of dependent care and flexible spending accounts for servicemembers.

What is your assessment of the QRMC recommendations, particularly the proposed new defined retirement plan?

Answer. Reductions in current entitlements and benefits could impact the morale of the current force and weaken future recruiting and retention efforts. Proposed changes in military retirement entitlements and benefits must be thoroughly reviewed to fully understand these impacts. If I am confirmed, I will be mindful that our military forces, who are often called upon to fight under extremely arduous conditions, should receive the pay and entitlements promised them and that they deserve.

SENIOR EXECUTIVE WORKFORCE

Question. What is your vision for the management and development of the Army senior executive workforce, especially in the critically important areas of acquisition, financial management, and the scientific and technical fields?

Answer. The Army should carefully manage and develop the senior executive workforce to meet the evolving work force challenges facing the Department. With transformation, members of the senior executive service are increasingly being looked to as military replacements in critically important areas of acquisition, financial management, and the scientific and technical fields. To support this effort, I understand the Army's senior executive program focuses on the recruitment, assignment, and development of adaptive, multi-skilled senior civilian leaders and that the current senior executive program includes periodic education and development opportunities and performance based evaluations.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Assistant Secretary of the Army for Manpower and Reserve Affairs?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided in a timely manner to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JACK REED

DIRECT HIRE AUTHORITY AT ARMY LABS

1. Senator REED. Mr. Lamont, section 1108 of the National Defense Authorization Act for Fiscal Year 2009 permitted the defense demonstration laboratories to exercise direct hire for a limited number of senior level scientists and engineers. On December 16, 2008, that authority was delegated to the individual Services without restriction on further delegation. On March 3, 2009, the Navy had effectively delegated that authority to the laboratory directors and by mid-March one of the Navy laboratories had actually hired approximately a dozen senior scientists and engineers. To the committee's knowledge, the authority, which had been delegated to the Army, still remains unused within the office of the Secretary of the Army. This is a very valuable tool, permitting the laboratory directors to compete effectively with private industry in the hiring of senior people. If you are confirmed, do you intend to implement this statute and to delegate this authority to the laboratory directors?

Mr. LAMONT. Yes, I fully support the use of this authority. The authority provides an additional recruitment tool to fill critical scientific and engineering positions. The Secretary of the Army delegated this authority to me in late May. On June 2, 2009, I delegated the authority to the three Army Commanders (U.S. Army Materiel Command, U.S. Army Medical Command, and U.S. Army Corps of Engineers) with oversight of the six Army personnel demonstration laboratories and authorized further delegation of the authority directly to the Laboratory Directors.

ESTABLISHING PERSONNEL DEMO PROGRAMS AT ARMY LABS

2. Senator REED. Mr. Lamont, the laboratory personnel demonstration program has proven to be a successful personnel management system for the defense research laboratories. It is ideally suited to attract and retain the type of key personnel necessary if our defense laboratories are to maintain their technological preeminence. There are at least four Army laboratories that have indicated a desire to be part of the lab demo personnel program. Two (the Natick Soldier Research Development and Engineering Center and the Edgewood Chemical and Biological Center) have already made application and two others (Tank and Automotive Research Development and Engineering Center and the Armament Research Development and Engineering Center) would like to adopt the demo personnel system but are currently in the National Security Personnel System (NSPS). It is the committee's understanding the Army Research, Development and Engineering Command (RDECOM) supports these requests. If confirmed, would you expedite the movement of these Army laboratories into the demo system?

Mr. LAMONT. Yes, however, statutory relief is needed to expand beyond the five RDECOM subordinate elements covered by the current laboratory personnel demonstration program to include, not only the Tank and Automotive Research, Development and Engineering Center and the Armament Research, Development and Engineering Center; but also the Simulation and Training Technology Center and the RDECOM Headquarters. This will help eliminate several of the multiple personnel systems (NSPS, Acquisition Demo, General Schedule, and Wage Grade) currently affecting RDECOM civilian personnel scattered throughout the command. This will foster and promote the development and acceleration of innovative technology and sound engineering solutions. Any statutory relief that would permit RDECOM to fold its eligible personnel into laboratory demo personnel systems would promote efficiency and cost savings, and more importantly promote research, development, test, and evaluation and science and technology business processes to improve practices associated with getting technology to the field in a shorter period of time and in support of the War fighter.

EXCLUSION OF ARMY LABS FROM NATIONAL SECURITY PERSONNEL SYSTEM

3. Senator REED. Mr. Lamont, this committee, on a bipartisan basis, has continually been concerned that artificial limitations on the ability of our defense laboratories to discharge their mission be removed. It is essential that these laboratories be able to hire, compensate, and retain the employees they need to discharge their mission and to compete successfully with private industry for such talent. In this regard, would you support the permanent exclusion of the lab demos from possible inclusion in the NSPS?

Mr. LAMONT. I would not favor a permanent exclusion. The law pertaining to the Defense Laboratories' inclusion in NSPS states that the laboratories are excluded from coverage until October 1, 2011; and that after October 1, 2011, NSPS would apply only to the extent that the Secretary of Defense determines that the flexibilities provided by NSPS are greater than those the laboratories have under section 342 of the National Defense Authorization Act for Fiscal Year 1995, Public Law 103-337. As such, the Department and Army would prefer to retain the flexibility to apply NSPS to the laboratories, if NSPS provides greater flexibilities than currently provided under section 342. The Army recognizes the critical role the defense laboratories play in supporting the national security mission. As such, retaining the existing statutory language provides the maximum flexibility to ensure the laboratories have the authorities they need to attract, competitively compensate, and retain a high quality, high performing workforce.

[The nomination reference of Thomas R. Lamont follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
April 27, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Thomas R. Lamont, of Illinois, to be an Assistant Secretary of the Army, vice Ronald J. James.

[The biographical sketch of Thomas R. Lamont, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH BY THOMAS R. LAMONT

Thomas R. Lamont, Nominee for Assistant Secretary of the Army for Manpower and Reserve Affairs, Department of the Army, Department of Defense. He is the former Chair of University of Illinois Board of Trustees and a longtime Springfield attorney and resident partner for the Chicago firms of Gordon & Glickson and Altheimer & Gray, and the Springfield firm of Brown, Hay & Stephens. He concentrated his practice in Government Law and Legislative Affairs.

In the public arena, Mr. Lamont has served as executive director, Office of the State Attorney Appellate Prosecutor, Director of Civil Litigation in the Office of the Illinois Attorney General, executive director of the Illinois Board of Higher Education, and currently, as Special Counsel and Adjunct Professor of Law to the University of Illinois. In the mid-1970s, he served as a Counsel to the Speaker and the Illinois House Democratic Staff.

In 1990, Mr. Lamont was elected to the University of Illinois Board of Trustees. In addition, he has served as a trustee of the State University Retirement System, a member of the Illinois Board of Higher Education, and on U.S. Senator Carol Mosely Braun's Judicial Advisory Committee.

Mr. Lamont served in a variety of Judge Advocate positions in the Illinois Army National Guard for over 25 years. He culminated his career serving as the Illinois Staff Judge Advocate. He retired as a Colonel in 2007.

Mr. Lamont received his bachelor's degree from Illinois State University in 1969 and earned his law degree from the University of Illinois College of Law in 1972.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the

advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by Thomas R. Lamont in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Thomas Ray Lamont.

2. **Position to which nominated:**
Assistant Secretary of the Army for Manpower and Reserve Affairs.

3. **Date of nomination:**
April 27, 2009.

4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**
March 8, 1947; Jacksonville, IL.

6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Bridget Anne Later (now Bridget L. Lamont).

7. **Names and ages of children:**
Michael Thomas Lamont, 28.
Jeffrey Stephen Lamont (deceased).

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
Virginia (IL) High School, 1961-1965.
Illinois State University, Normal, IL, 1965-1969, B.S., 1969.
University of Illinois, Urbana, IL, 1969-1972, JD, 1972.

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Nov. 2005-present, Special Counsel and Adjunct Professor of Law, University of Illinois; Springfield, IL.

Aug. 2004-Nov. 2005, Executive Director (interim) Illinois Board of Higher Education; Springfield, IL.

Feb. 2002-Aug. 2004, Partner, Brown, Hay & Stephens, Attorneys at Law, Springfield, IL.

Feb. 1998-Feb. 2002, Partner, Altheimer & Gray, Attorneys at Law, Springfield and Chicago, IL.

10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Judge Advocate, Illinois Army National Guard, 1982–2007.
 Member University of Illinois Board of Trustees, 1990–2003.
 Chair, University of Illinois Board of Trustees 1992–1993, 1995–1997.
 Trustee, State Universities Retirement System, 1992–1995.
 Member, Executive Comm., Illinois State University Alumni Association, 2007–present.
 U.S. Senator Alan Dixon’s Military Academy Appointments Committee, 1985–1992.
 U.S. Senator Carol Mosely Braun’s Judicial Advisory Committee, 1992–1996.
 Executive Director, State’s Attorneys Appellate Prosecutor’s Commission, 1979–1981.
 Division Head, Illinois Attorney General’s Office, 1983–1987.
 Staff Attorney, Illinois Legislative Reference Bureau, 1972–1973.
 Staff Attorney/Committee Counsel, Illinois State House of Representatives, 1973–1976.

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Director, Academic Development, Inc. (non-compensated).
 Member, Executive Committee, Illinois State University Alumni Association.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

See Question 11 above. In addition, I hold the following memberships:

- Trustee, YMCA, Springfield, IL
- Member, Sangamon County Bar Association
- Member, Illinois State Bar Association
- Member, Military Law Committee, Illinois State Bar Association
- Member, Pritzker Military Library

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

Democratic candidate and elected office holder to the position of Trustee, University of Illinois, 1990–2003.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

03/04	Committee to Elect Jay Hoffman	\$150
03/04	Sangamon County Democrats	\$200
05/04	Citizens for Londrigan	\$100
06/04	Sangamon County Democrats	\$150
08/04	Friends of Dick Durbin	\$100
01/05	Sangamon County Democrats	\$100
03/05	Friends of Dick Durbin	\$100
04/05	Friends of Mike Madigan	\$150
06/05	Friends of Dick Durbin	\$250
06/06	Friends of Dick Durbin	\$500
06/06	Friends of Tammy Duckworth	\$100
08/06	Friends of Dick Durbin	\$500
10/06	Friends of Dick Durbin	\$150
10/06	Friends of Dick Durbin	\$100
04/07	Sangamon County Chairman’s Club	\$150
04/07	Friends of Dick Durbin	\$200
12/07	Joseph McMenimen for Congress	\$500
01/08	Friends of Dick Durbin	\$400
01/08	Obama for America	\$250
06/08	Friends of Dick Durbin	\$500
07/08	Obama for America	\$250
09/08	Citizens for Callahan for Congress	\$100
10/08	Sangamon County Democrats	\$100
10/08	Obama for America	\$250

10/08	Obama for America	\$100
03/09	Douglas Whitley for Illinois Governor	\$500

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Distinguished Alumnus—University of Illinois College of Law
 Resolution of Distinguished Service—Illinois Board of Higher Education, 2004
 Resolution of Distinguished Service—University of Illinois, 2006

Military Medals:

- Distinguished Service Medal (IL)
- Legion of Merit (IL)
- Meritorious Service Medal (1 OLC)
- Army Commendation Medal
- Army Achievement Medal (2 OLC)
- Army Reserve Components Achievement Medal
- National Defense Service Medal
- Armed Forces Reserve Medal
- Army Service Ribbon

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

“Power and Authority of the Attorney General’s Office,” *Administrative Law Handbook*, Illinois Institute for Continuing Legal Education (1986).

“Getting Involved In the Legislative Process,” *Small Business Reports*, Vol. 13, no. 9; (November 1988).

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

None.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

THOMAS R. LAMONT.

This 11th day of May, 2009.

[The nomination of Thomas R. Lamont was reported to the Senate by Chairman Levin on May 14, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on May 18, 2009.]

[Prepared questions submitted to Charles A. Blanchard by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of

the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. At this time I am unaware of any reason to amend the Goldwater-Nichols Act. If I am confirmed and I identify areas that I believe merit changes, I will propose those changes through the established process.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. See my prior answer.

DUTIES

Question. What is your understanding of the duties and functions of the General Counsel of the Department of the Air Force?

Answer. The duties and functions of the General Counsel are determined and assigned by the Secretary of the Air Force. The General Counsel provides legal advice and guidance to the Secretary, the Under Secretary, the Assistant Secretaries, their staffs, and other offices within the Office of the Secretary, as well as to the Chief of Staff and the rest of the Air Staff. The General Counsel also provides legal services throughout the entire Department in a variety of disciplines including fiscal law, ethics, dispute resolution, contract law, environmental law, international law, intellectual property law, real property law, personnel law, labor law, and litigation. As the chief legal officer of the Department of the Air Force, the General Counsel determines the controlling legal positions of the Department of the Air Force. The General Counsel also serves as the Designated Agency Ethics Official, the Suspension and Debarring Official for the Department of the Air Force, and exercises oversight of intelligence and other sensitive activities and investigations.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. I believe that my education and over 20 years of practice—in both public service and private practice—has well prepared me for the challenges of this office.

I received a Bachelors of Science degree (with honors) from Lewis & Clark College, where I was awarded the Rena Ratte Award given to the most outstanding graduating senior. After graduating from college, I attended Harvard Law School and the Harvard Kennedy School of Government, where I received both a J.D. and a Master of Public Policy in 1985. I graduated first in my class at Harvard Law School, and served as one of two Articles Editors at the Harvard Law Review. I clerked for Judge Harry Edwards of the U.S. Court of Appeals for the District of Columbia and Justice Sandra Day O'Connor on the U.S. Supreme Court.

After serving as an Associate Independent Counsel in the Office of Independent Counsel James C. McKay, in 1988, I returned to Phoenix, AZ, and joined the law firm of Brown & Bain, which subsequently merged with Perkins Coie, my present firm. I became a partner at the firm in 1996, and my practice has focused on complex commercial litigation, antitrust law, state constitutional law and election law.

My work in private practice has been interrupted by several years in public service. While still an associate at Brown & Bain, I served as a member of the Arizona State Senate from 1991–1995, where I chaired the Judiciary Committee and also served as Vice Chair of the Environment Committee. In 1997, I left the firm and became the Chief Legal Counsel for the White House Office of National Drug Control Policy, which was under the leadership of General (Ret.) Barry McCaffrey.

For purposes of the position for which I am nominated, my most relevant experience was as General Counsel of the Army from 1999 until 2001.

I returned to private practice in Arizona in 2001, where I also serve as Adjunct Professor of Law at the Arizona State University Sandra D. O'Connor College of Law, where I have taught National Security Law and Election Law.

I believe that my experience as the chief legal counsel for two government agencies, especially my service as General Counsel of the Army, as well as my experience in private practice at a national law firm, have prepared me for the challenging and diverse legal issues that will face the Department of the Air Force.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the General Counsel of the Department of the Air Force?

Answer. I believe I have the necessary legal training, experience and leadership abilities to be the General Counsel. This is especially true given my experience as the Army General Counsel for 2 years. I am also a firm believer, however, that the best lawyers work hard to completely understand the operations of their client. If

confirmed, I will benefit from the extraordinary talent, expertise and experience of the civilian and military lawyers in the Department as I broaden my understanding of the issues the Air Force faces every day.

Question. Assuming you are confirmed, what duties and functions do you expect that the Secretary of the Air Force would prescribe for you?

Answer. If confirmed, I anticipate Secretary Donley will expect me to provide timely, accurate, and candid legal advice and counsel, ensuring compliance with the law and the protection of the legal prerogatives of the Department. I expect the duties and functions of the office will cover the wide range of legal issues and responsibilities prescribed by the Secretary. I anticipate the Secretary would expect me to manage the General Counsel's Office efficiently and effectively. Additionally, I anticipate the Secretary would expect me to foster an atmosphere of professionalism and responsiveness regarding all legal matters and services while working with the Office of The Judge Advocate General, the General Counsels of the Department of Defense (DOD) and the other military departments, as well as the legal staffs of other government agencies.

Question. In carrying out your duties, how will you work with the General Counsel of DOD?

Answer. The General Counsel of DOD is the Chief Legal Officer and final legal authority for DOD. Although there is no direct reporting relationship to the General Counsel of DOD, Jeh Johnson has made clear in his testimony before this Committee and his actions in the Department, that he intends to work closely with the Service General Counsels. If confirmed, I anticipate having a close and professional relationship with Mr. Johnson, characterized by continuing consultation, communication, and cooperation on matters of mutual interest, in furtherance of the best interests of DOD.

MAJOR CHALLENGES

Question. In your view, what are the major challenges that will confront the General Counsel of the Department of the Air Force?

Answer. The challenges facing the Department of the Air Force as a whole, as well as DOD, will largely determine the challenges that will confront the General Counsel of the Air Force. Certainly both President Obama and Secretary Gates have made clear that acquisition reform will be a priority in the near term, and I expect that to be a priority for the General Counsel of the Air Force as well. Although the current environment makes it difficult to anticipate all specific legal questions, I also expect to confront issues relating to operational matters, intelligence, privatization initiatives, military and civilian personnel policies, and compliance with environmental laws. In addressing these challenges, I think it will be critically important that the Office of the General Counsel and the Office of The Judge Advocate General have a cooperative and professional partnership.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I plan on working closely with the Secretary, the Chief of Staff, The Judge Advocate General, and the talented and dedicated attorneys in the Department of the Air Force to candidly evaluate the challenges and to ensure responsive and accurate legal services are provided to meet and address these challenges. In addition, if confirmed, I will work to adequately resource and expertly staff the Air Force legal community, in order to guarantee decision makers at all levels access to the best legal advice possible.

Question. What broad priorities will you establish in terms of issues which must be addressed by the Office of the General Counsel of the Department of the Air Force?

Answer. If confirmed, my foremost priority will be to provide the Air Force timely, accurate, and candid legal advice, ensuring compliance with the law and protection of the legal prerogatives of the Air Force. It is imperative that the Air Force has the legal support necessary to build and maintain the very best air, space and cyberspace capabilities possible.

RELATIONSHIP WITH THE JUDGE ADVOCATE GENERAL

Question. In carrying out your duties, if you are confirmed, how will you work with The Judge Advocate General of the Air Force?

Answer. As General Counsel of the Army from 1999 to 2001, I enjoyed an excellent working relationship with The Judge Advocate General's Corps that resulted in the delivery of high quality legal services to the Army leadership. I learned that civilian and military lawyers bring unique and vital experiences and expertise to the table, and that the final legal advice given to the client benefited greatly from our

close working relationship. If confirmed, I will work to establish a close professional relationship with The Judge Advocate General. Consultation on matters of mutual import and interest should characterize that relationship. It is imperative that the two offices work well together to provide the highest quality of legal support to the Department of the Air Force.

Question. How are the legal responsibilities of the Department of the Air Force allocated between the General Counsel and The Judge Advocate General?

Answer. My experience at the Army convinced me that it is critical that The Judge Advocate General and the General Counsel work as collaborative partners in providing the best possible legal services to our common client. If confirmed, I will make developing such a partnership a priority. The Secretary of the Air Force has designated the Air Force General Counsel as the chief legal officer of the Department of the Air Force. In recognition of the unique expertise and experiences provided by the Office of the General Counsel and The Judge Advocate General, both offices provide legal advice to the Secretary of the Air Force and other Department officials. In addition, The Judge Advocate General is responsible for the activities of The Judge Advocate General's Corps and is primarily responsible for providing legal advice and services regarding the Uniform Code of Military Justice. The law expressly prohibits interference with the ability of The Judge Advocate General to give independent legal advice to the Secretary of the Air Force. Even in the absence of that statutory requirement, I would welcome the expression of independent views on legal issues by The Judge Advocate General.

Question. How will you ensure that legal opinions of your office will be available to Air Force attorneys, including judge advocates?

Answer. It is my understanding that the majority of legal opinions provided to Air Force attorneys and judge advocates are published through a cooperative General Counsel and TJAG process. Close professional cooperation between the civilian and uniformed members of the Air Force's legal community is absolutely essential to ensure appropriate legal opinions issued by the Office of the Air Force General Counsel will be available to all Air Force attorneys and Judge Advocates, and vice versa.

Question. In response to attempts within DOD to subordinate legal functions and authorities of The Judge Advocates General to the General Counsels of DOD and the Military Services, Congress enacted legislation prohibiting any officer or employee of DOD from interfering with the ability of The Judge Advocates General of the Military Services and the legal advisor to the Chairman of the Joint Chiefs of Staff to provide independent legal advice to the Chairman, Service Secretaries, and Service Chiefs. Congress also required a study and review by outside experts of the relationships between the legal elements of each of the military departments.

What is your view of the need for The Judge Advocate General of the Air Force to provide independent legal advice to the Secretary of the Air Force and the Chief of Staff of the Air Force?

Answer. The Judge Advocate General's ability to provide independent legal advice has been statutorily recognized as essential to the effective delivery of legal services. I share that view. Uniformed attorneys bring another perspective and can provide insight and advice shaped by years of service throughout the Air Force.

Question. What is your view of the responsibility of Air Force judge advocates to provide independent legal advice to military commanders?

Answer. Air Force Judge Advocates have a critical responsibility to provide independent legal advice to commanders, given the missions they perform. I think that this is well stated by The Judge Advocate General Corps mission statement, which emphasizes the importance of professional, candid and independent legal advice.

Question. If confirmed, would you propose any changes to the current relationships between the uniformed judge advocates and General Counsel?

Answer. If confirmed, I will make improving the relationship between the General Counsel and The Judge Advocate General a top priority, to ensure the effective delivery of legal services to the Department of the Air Force.

Question. Article 6 of the Uniform Code of Military Justice gives primary jurisdiction over military justice to The Judge Advocates General of the Army, Navy, and Air Force.

How do you view your responsibilities in the performance of military justice matters with regard to The Judge Advocate General of the Air Force?

Answer. The Judge Advocate General has the primary responsibility for providing legal advice and services regarding the Uniform Code of Military Justice and the administration of military discipline. Article 6 of the Uniform Code of Military Justice requires The Judge Advocate General or senior members of his staff to make "frequent inspections in the field" in furtherance of his responsibility to supervise the administration of military justice. I will, if confirmed, consult with The Judge Advocate General on matters of mutual interest or concern relating to military jus-

tice, recognizing his statutory duties and special expertise in this area, and will provide advice to the Secretary of the Air Force as needed.

ATTORNEY RECRUITING AND RETENTION ISSUES

Question. How do you assess your ability to hire and retain top quality attorneys and provide sufficient opportunity for advancement?

Answer. If confirmed, I plan to work to maintain the Air Force's ability to obtain and retain the highest quality civilian and military attorneys both in the General Counsel's Office and The Judge Advocate General's Corps. If confirmed, I want to make Federal service as a civilian attorney in the Air Force as attractive and professionally rewarding as possible. I will also work with The Judge Advocate General to ensure the Air Force has the tools we need to continue to recruit and retain the best attorneys available.

Question. In your view, does the Department of the Air Force have a sufficient number of attorneys to perform its missions?

Answer. If confirmed, I will, in consultation with The Judge Advocate General, evaluate the adequacy of the numbers of attorneys in the Department of the Air Force to accomplish the Air Force's missions.

Question. In your view, what incentives to successful recruiting and retention of attorneys, if any, need to be implemented or established?

Answer. While General Counsel of the Army, I worked closely with The Judge Advocate General to implement retention bonuses for military lawyers. My understanding is that this program was very effective in retaining outstanding military lawyers. I am not familiar with the full scope of the Air Force's programs for recruiting and retaining military and civilian attorneys, but if confirmed, in consultation with The Judge Advocate General, I will look at this area very carefully and support initiatives that enhance the Air Force's ability to recruit and retain the best legal talent available.

DETAINEE ISSUES

Question. What role do you expect to play, if confirmed, in helping DOD and the Department of the Air Force address legal issues regarding detainees?

Answer. The legal issues regarding detainees are of critical importance to DOD and the Department of the Air Force. These issues need to be handled with great care, and with a clear focus on the rule of law. I understand that the Air Force Office of the General Counsel and the Office of The Judge Advocate General have representatives assisting the DOD General Counsel in responding to the President's executive orders in this area. If confirmed, I will work closely with the DOD General Counsel in executing the President's directives. Additionally, in consultation with The Judge Advocate General, I will provide advice to the Secretary regarding detainee issues affecting the Air Force, with particular focus on our obligation to treat all detainees humanely.

Question. Section 1403 of the National Defense Authorization Act for Fiscal Year 2006 provides that no individual in the custody or under the physical control of the United States Government, regardless of nationality or physical location shall be subject to cruel, inhuman, or degrading treatment or punishment.

In your view, is the prohibition in the best interest of the United States? Why or why not?

Answer. Yes, this prohibition is in the best interest of the United States. Prohibiting the cruel, inhumane, or degrading treatment or punishment of individuals in our custody or under our physical control upholds our ideals and obligations, and reinforces our moral authority around the world.

Question. Do you believe that the phrase "cruel, inhuman, or degrading treatment or punishment" has been adequately and appropriately defined for the purpose of this provision?

Answer. I understand that considerable attention is being given to this issue within DOD. If confirmed, I will play an active part in ensuring the Department's implementing directives make clear what conduct is prohibited.

Question. What role do you believe the General Counsel of the Air Force should play in the interpretation of this standard?

Answer. The appropriate role of the General Counsel is to provide advice to the Secretary of the Air Force and his staff on policies that implement this standard. If confirmed, I will ensure Air Force implementation is consistent with the law.

Question. What role do you believe The Judge Advocate General of the Air Force should play in the interpretation of this standard?

Answer. The Judge Advocate General provides advice on policies that implement this standard. The Judge Advocate General should also continue to train and super-

wise the judge advocates in the field, who are instrumental in maintaining this standard.

Question. If confirmed, will you take steps to ensure that all relevant Air Force directives, regulations, policies, practices, and procedures fully comply with the requirements of section 1403 and with Common Article 3 of the Geneva Conventions?

Answer. I will. The requirements of section 1403 and Common Article 3 of the Geneva Conventions remain essential to maintaining a disciplined Air Force, bound by the Rule of Law.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2–22.3, issued in September 2006, and in DOD Directive 2310.01E, DOD Detainee Program, dated September 5, 2006?

Answer. I do.

Question. Section 2441 of title 18, U.S.C., as amended by the Military Commissions Act of 2006, defines grave breaches of common Article 3 of the Geneva Conventions, including torture and cruel and inhuman treatment.

In your view, does section 2441 define these terms in a manner that provides appropriate protection from abusive treatment to U.S. detainees in foreign custody and to foreign detainees in U.S. custody?

Answer. This statute is intended to provide criminal sanctions for specific war crimes as provided under international law and also violations of the Uniform Code of Military Justice. Even apart from our obligations to prosecute these violations, however, the United States also has the obligation to “take all measures necessary for the suppression” of all other violations of the Geneva Conventions, even those that are not grave breaches, and I believe the Department must continue to hold military members accountable for violations of these standards as well. I think that this statute, in addition to robust and vigilant training of Airmen of our legal obligations, will protect against abusive treatment of foreign detainees in U.S. custody, as well as provide proper criminal sanctions against those who do not likewise secure reciprocal protection of U.S. detainees in foreign custody.

CONTRACTORS ON THE BATTLEFIELD

Question. U.S. military operations in Iraq have relied on contractor support to a greater degree than any previous U.S. military operations. The extensive involvement of contractor employees in a broad array of activities—including security functions—has raised questions about the legal accountability of contractor employees for their actions.

Do you believe that current DOD and Department of the Air Force regulations appropriately define and limit the scope of security functions that may be performed by contractors in an area of combat operations?

Answer. It is my understanding that DOD instructions and procurement regulations that define the limit and scope of security functions are currently under review. Accordingly, it would be premature for me to offer an opinion at this time regarding whether current DOD and Department of the Air Force regulations on the subject are adequate.

Question. What changes, if any, would you recommend to such regulations?

Answer. I have been advised that the Office of Management and Budget is leading an interagency working group to write definitions and criteria for sorting out the blended workforce and that the DOD is reviewing certain instructions in this area. Accordingly, it would be premature for me to offer specific changes to DOD or Department of the Air Force regulations until the results of these reviews are known.

Question. Do you believe that current DOD and Department of the Air Force regulations appropriately define and limit the scope of contractor participation in the interrogation of detainees?

Answer. It is my understanding that current DOD policy appropriately limits contractor participation in the interrogation of detainees. If confirmed, I will examine the Air Force implementation of these policies.

Question. What changes, if any, would you recommend to such regulations?

Answer. I have no basis to propose any changes at this time.

Question. OMB Circular A–76 defines “inherently governmental functions” to include “discretionary functions” that could “significantly affect the life, liberty, or property of private persons”.

In your view, is the performance of security functions that may reasonably be expected to require the use of deadly force in highly hazardous public areas in an area of combat operations an inherently governmental function?

Answer. I understand that support services that require substantial discretion or prudent judgment are inherently governmental, and that the likelihood that an individual will be required to resort to force, especially deadly force, and the degree to

which an individual may be required to exercise force in public are important factors to consider in assessing whether a particular security mission is inherently governmental. Therefore, if I am confirmed, I am willing to examine this matter to ensure appropriate attention is given to the legal aspects of this issue.

Question. In your view, is the interrogation of enemy prisoners of war and other detainees during and in the aftermath of hostilities an inherently governmental function?

Answer. I understand that under DOD policy the direction and control of interrogations—to include the approval, supervision and oversight of interrogations, as well as the execution of those aspects of an interrogation that entail substantial discretion—are inherently governmental activities. Consequently, in my view, the Department should continue to assess the appropriateness of the contractor's role, if any, in interrogations.

Question. What role do you expect to play, if confirmed, in addressing the issue of what functions may appropriately be performed by contractors on the battlefield?

Answer. If confirmed, I will advise senior Air Force leadership regarding the functions that contractors may legally perform on the battlefield, and I will assist them in implementing policies regarding the use of contractors that are consistent with applicable law and DOD policy.

Question. The Military Extraterritorial Jurisdiction Act (MEJA) was enacted in 2000 to extend the criminal jurisdiction of the U.S. courts to persons employed by or accompanying the Armed Forces outside the United States.

In your view, does MEJA provide appropriate jurisdiction for alleged criminal actions of contractor employees in Iraq, Afghanistan, and other areas of combat operations?

Answer. I understand that MEJA was intended to address the jurisdictional gap in U.S. law regarding criminal sanctions, as applied to civilians employed by or accompanying the Armed Forces outside the United States, members of the Armed Forces, and former members of the Armed Forces, including their dependents. In my opinion, MEJA provides an effective means of exercising extraterritorial criminal jurisdiction over contractor employees in Iraq, Afghanistan, and other areas of combat operations who engage in conduct that would constitute a felony-level Federal crime in the United States.

Question. What changes, if any, would you recommend to MEJA?

Answer. If confirmed, I will study this issue and assess what changes to MEJA may be appropriate, if any.

Question. What role would you expect to play, if confirmed, in developing administration recommendations for changes to MEJA?

Answer. If confirmed, I expect to play an active role in the development of any proposals to change MEJA. I would also coordinate closely with The Judge Advocate General in the development of any such proposals given the complementary and sometimes overlapping availability of jurisdiction under the Uniform Code of Military Justice.

Question. Section 552 of the National Defense Authorization Act for Fiscal Year 2007 extended criminal jurisdiction of the military courts under the Uniform Code of Military Justice to persons serving with or accompanying an armed force in the field during time of declared war or a contingency operation, such as our current operations in Iraq and Afghanistan.

In your view, does the UCMJ provide appropriate jurisdiction for alleged criminal actions of contractor employees in Iraq, Afghanistan, and other areas of combat operations?

Answer. The UCMJ provides commanders the tools necessary to maintain good order and discipline and the morale, welfare and safety of all those under their jurisdiction during military operations. Because misconduct by contractors may undermine good order and discipline, Congress extended UCMJ jurisdiction over such individuals, and the Secretary of Defense, in turn, published guidance on the prudent exercise of such jurisdiction. This guidance ensures that the Department of Justice and the DOD each play an appropriate role in resolving whether, and under which system, jurisdiction might be better exercised in each potential case.

Question. What is your view of the procedures agreed upon by DOD and the Department of Justice to reconcile jurisdictional responsibilities under MEJA and the UCMJ?

Answer. I have not had an opportunity to review the procedures agreed upon by DOD and the Department of Justice to reconcile jurisdictional responsibilities under MEJA and the UCMJ. If confirmed, I will, in coordination with The Judge Advocate General, assess the effectiveness of the procedures and whether further refinements of these procedures are necessary.

Question. What changes, if any, would you recommend to the UCMJ to ensure appropriate jurisdiction for alleged criminal actions of contractor employees?

Answer. At present, I am not aware of any specific provisions in need of change.

RELIGIOUS GUIDELINES

Question. What is your understanding of current policies and programs of DOD and the Department of the Air Force regarding religious practices in the military?

Answer. It is my understanding that the Air Force has supported policies of religious tolerance and mutual respect. If confirmed, I would continue the Air Force's commitment to upholding the constitutional tenets of the "free exercise" and "establishment" clauses, and review policies as necessary to assure continued compliance with the First Amendment.

Question. In your view, do these policies accommodate the free exercise of religion and other beliefs without impinging on those who have different beliefs, including no religious belief?

Answer. I have not had opportunity to review the Air Force's policies regarding free exercise of religion and other beliefs. If confirmed, I will study this issue to determine if changes in policy are necessary under the law.

Question. In your opinion, do existing policies and practices regarding public prayers offered by military chaplains in a variety of formal and informal settings strike the proper balance between a chaplain's ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious belief?

Answer. I understand that chaplains are not compelled to offer prayers that are inconsistent with their faith, but are expected to remain sensitive to the pluralistic Air Force and society they serve. In my opinion, such an approach strikes an appropriate balance given the diversity of religious views in the Air Force. If confirmed, I am willing to study this issue further to determine if changes in policy are necessary under the law.

GENERAL AND FLAG OFFICER NOMINATIONS

Question. Under DOD Instruction 1320.4, adverse and alleged adverse information pertaining to general and flag officers must be evaluated by senior leaders in the Services and in the Office of the Secretary of Defense prior to nomination.

If confirmed, what role, if any, would you play in the officer promotion system, particularly in reviewing general and flag officer nominations?

Answer. As General Counsel of the Army, I played a role in reviewing general officer nominations, and I understand that the role of the Air Force General Counsel is similar to that of the Army General Counsel. I understand that, for general officer promotions, the Office of the General Counsel reviews the following:

a. Memoranda of Instruction that govern the conduct of promotion selection boards and subsequent promotion selection board reports.

b. Adverse information that is not in an officer's official military personnel file that may be presented to the promotion selection board. I have been advised that this information is reviewed to ensure it is accurate and comports with the requirements of Title 10 such that the information is "substantiated, relevant information that could reasonably affect the deliberations of the selection board."

c. Adverse information related to general officers. In general officer cases, the standard for adverse information that must be presented to a promotion selection board is "any credible information of an adverse nature." I have been advised that the Office of the General Counsel participates in a detailed screening process in which all credible information related to officers whose records will be reviewed by a promotion selection board for promotion to a general officer grade. The process ensures that all adverse information is properly identified for presentation to the promotion selection board.

d. Adverse information that becomes available after a promotion selection board makes its recommendations. I have been advised that the Office of the General Counsel provides legal advice to the Secretary of the Air Force so that he may determine whether a promotion review board should be convened to consider whether to continue to support the promotion of the considered officer or take steps to remove the officer from the board report or promotion list.

Question. What is your understanding of the role of the General Counsel of the Department of the Air Force in ensuring the legal sufficiency of statutory selection board processes?

Answer. I understand that, prior to approval by the Secretary of the Air Force, all Memoranda of Instructions for officer promotion selection boards are reviewed by the Office of the General Counsel to ensure the Secretary's instructions conform to statutes and accurately reflect his guidance regarding attributes necessary for service in the next grade. All reports of promotion selection boards are reviewed by the Office of the General Counsel prior to final action on the report by the Secretary. The General Counsel must determine that the Air Force has met applicable statutory standards, DOD direction and Secretary of the Air Force guidelines and that individual selection board reports conform to the law. The General Counsel must advise the Secretary of the Air Force of any case in which a selection board report fails to adhere to the statutory standards, either generally or with regard to a particular officer being considered for promotion. In advising the Secretary of the Air Force and the Office of the Assistant Secretary of the Air Force (Manpower and Reserve Affairs), the General Counsel helps to ensure that Air Force promotion policies properly implement applicable laws and regulations and are fairly applied.

Question. What is the role, if any, of the General Counsel of the Department of the Air Force in reviewing and providing potentially adverse information pertaining to a nomination to the Senate Armed Services Committee?

Answer. From my service as General Counsel of the Army, I understand the importance of ensuring that substantiated or potentially adverse information is reported to the Senate Armed Services Committee in a timely, accurate, and comprehensive manner. It is my understanding that under current Department of the Air Force practice, the General Counsel's office reviews each selection board report, as well as Departmental communications to the Committee, the President, and the Secretary of Defense concerning nominations, to ensure that the reports and communications comply in form and substance with law and regulation. If confirmed, I will ensure that the General Counsel's office gives special attention to cases of nominees with substantiated or potentially adverse information, in order to ensure that such information is reported to the Senate Armed Services Committee in a timely, accurate, and comprehensible manner.

MILITARY PERSONNEL POLICY AND CASES

Question. In your view, what role, if any, should the General Counsel play in military personnel policy and individual cases, including cases before the Board for Correction of Military Records?

Answer. If confirmed, I will work closely with the Secretary of the Air Force, the Assistant Secretary of the Air Force (Manpower and Reserve Affairs), and other senior Department leaders to ensure that the Department of the Air Force military personnel policies are formulated and applied uniformly, fairly, and in accordance with applicable laws and regulations. If confirmed, it will be my duty to take appropriate action if I become aware of an individual case in which military personnel policies were not fairly and lawfully applied. If confirmed, I will coordinate with the Assistant Secretary of the Air Force (Manpower and Reserve Affairs), who exercises overall supervision of the Air Force Review Boards Agency, regarding the legal sufficiency of the determinations made by the Air Force Board for the Correction of Military Records. In addition, I am aware of and fully respect the independent role that the Air Force Board for the Correction of Military Records plays in the correction of military records.

SEXUAL ASSAULT PREVENTION AND RESPONSE POLICY

Question. Numerous cases of sexual misconduct involving airmen and cadets have been reported over the last several years. Many victims and their advocates contend that they were victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate military treatment. They asserted that the military failed to respond appropriately by providing basic services, including medical attention and criminal investigations of their charges.

What is your understanding of the resources and programs the Air Force has in place in deployed locations to offer victims of serious sexual assaults the medical, psychological, and legal help they need?

Answer. This is an extremely important issue for the Air Force and, if confirmed, I will focus significant attention on this area. I am not fully aware of all Air Force initiatives or resources, but I understand that the Air Force has recently taken steps to improve the assistance to all victims of sexual assaults, with enhanced recognition of the special circumstances that apply to deployments. If confirmed, in consultation with The Judge Advocate General and other senior leaders, I will study this matter in greater depth with a view to ensuring the Air Force continues to take

appropriate steps to provide medical, psychological, and legal help to airmen who are victims of sexual assault.

Question. What is your view of the steps the Air Force has taken to prevent additional sexual assaults on female soldiers at their home stations and when they are deployed?

Answer. I do not have sufficient information to evaluate the steps taken by the Air Force to prevent sexual assaults on female airmen. I understand the importance of this issue, however, and if confirmed, I will assess whether additional steps need to be taken. If confirmed, I look forward to working closely with Air Force leaders on all initiatives to prevent sexual assault.

Question. What is your view of the adequacy of the training and resources the Air Force has in place to investigate and respond to allegations of sexual assault?

Answer. Presently, I am not familiar with all of the Air Force training and resources to investigate and respond to allegations of sexual assault. If confirmed, I will become familiar with them and will assess whether additional steps should be taken to support victims and hold offenders accountable.

WHISTLEBLOWER PROTECTION

Question. Section 1034, title 10, U.S.C., prohibits taking retaliatory personnel action against a member of the Armed Forces as reprisal for making a protected communication. By definition, protected communications include communications to certain individuals and organizations outside of the chain of command.

If confirmed, what actions will you take to ensure that senior military leaders understand the need to protect servicemembers who report misconduct to appropriate authorities within or outside the chain of command?

Answer. If confirmed, I will work with The Judge Advocate General to ensure that military leaders are fully and accurately advised of the whistleblower protections accorded by law and regulation, and that they understand their legal responsibilities in this important area. In addition, if I become aware of any particular cases involving reprisals, I will ensure that they are addressed in accordance with the law. Whistleblower protections for military personnel are essential to the integrity of the Air Force, and merit serious attention by the General Counsel.

SUPPORT TO AIR FORCE INSPECTOR GENERAL

Question. What role, if any, do you think the General Counsel of the Air Force should have in reviewing the investigations and recommendations of the Air Force Inspector General?

Answer. If confirmed, I will establish and maintain a close, professional relationship with the Inspector General, and will provide candid, independent, and objective legal advice. As part of my responsibility to review legal and policy issues arising from the Air Force intelligence and counterintelligence activities, I will advise the Inspector General concerning proper reporting of the Air Force intelligence oversight activities. Of course, given the Inspector General's mandate for independence and candor in advising the Secretary as to his investigative findings and recommendations, the Inspector General has final authority over matters within his functional purview.

CIVILIAN ATTORNEYS

Question. Judge advocates in the Armed Forces benefit from an established career ladder, substantial training opportunities, and exposure to a broad spectrum of legal areas and problems. By contrast, civilian attorneys in the military departments normally do not have established career programs and may do the same work for many years, with promotion based solely upon longevity and vacancies.

In your opinion, does the personnel management of civilian attorneys need changing? If so, what do you see as the major problems and what changes would you suggest?

Answer. Comprehensive and deliberate professional development of career civilian attorneys and paralegals is an important building block to ensure the Air Force receives the highest quality legal services. I understand that in December 2006 the Air Force General Counsel and The Judge Advocate General formed a joint program to actively develop civilian legal personnel to meet current and future Air Force functional and leadership requirements. I am advised that, in accordance with the charter for this program, a Civilian Legal Community Policy Council composed of representatives of both organizations meets regularly to advance initiatives for the development of the Air Force civilian legal community. If confirmed, I will work closely with all of the entities affected by this issue to support the continuing and important efforts of the Policy Council and any other initiative deemed appropriate.

CLIENT

Question. In your opinion, who is the client of the General Counsel of the Department of the Air Force?

Answer. The client of the General Counsel of the Department of the Air Force is the Department of the Air Force, acting through its authorized officials.

ACQUISITION ISSUES

Question. What role should the General Counsel play in ensuring that Air Force procurement programs are executed in accordance with the law and DOD acquisition policy?

Answer. If confirmed, I will work closely with the Secretary of the Air Force, the Assistant Secretary of the Air Force (Acquisition), and other senior officials to ensure the Department of the Air Force's acquisition and procurement programs are executed in accordance with applicable provisions of law, as well as DOD guidance. Participation by Air Force lawyers should start in the earliest stages of program development. They should seek out potential legal issues and, where appropriate, identify lawful alternative courses of action.

Question. What role should the General Counsel play in ensuring that ethics provisions on conflict of interest are followed both by Air Force personnel and by Air Force contractors?

Answer. Ethics training, acquisition ethics training, and fostering a culture of ethics throughout the Air Force are paramount in creating an organizational climate that is sensitive to the need of avoiding conflicts of interest and that reacts appropriately when such issues arise. If confirmed, I will work closely with the Secretary of the Air Force, the Assistant Secretary of the Air Force (Acquisition), The Judge Advocate General, and other senior officials to promote an organizational climate that is sensitive to the need to avoid conflicts of interest and that reacts appropriately when specific issues arise. This also extends to ensuring that Air Force personnel adhere to the letter and spirit of the law relating to post-employment restrictions. I believe Air Force lawyers can make a significant contribution to these endeavors through provision of training, through early and sustained involvement in the Department's acquisition programs and procurement activities, and through continued instructional outreach to industry.

Question. Allegations of fraud and abuse during contingency contracting in Iraq and Afghanistan have been wide-spread.

What role should the General Counsel play in ensuring that Air Force personnel are properly trained in contingency contracting and are supervised in the performance of their duties?

Answer. If confirmed, I will work closely with the Secretary of the Air Force, the Assistant Secretary of the Air Force (Acquisition), The Judge Advocate General, and other senior officials to ensure the legal community continues to fully support training, policy development, and an ethical climate to promote the highest technical and ethical standards in our contingency contracting operations. I strongly support initiatives to adequately resource, train and equip contracting personnel to properly conduct contingency contracting, assuring vigilant stewardship of taxpayer dollars. Lastly, I would promote increased collaboration between our acquisition professionals, investigators, fraud counsel, and other stakeholders to ensure that we are doing everything we can to limit the opportunity for fraud, waste, and abuse in the contingency contracting process, and to correct those situations where there has been a breach.

DETECTING ORGANIZATIONAL CONFLICTS OF INTEREST

Question. Organizational conflicts of interest have become a major concern with the growing use of private contractors being tasked to perform key functions that the services had formerly performed in-house. This has been seen in cases in which highly qualified individuals who expect to be hired as government employees need a salary pending completion of the hiring process.

What do you think the Air Force should do, and what should the General Counsel's role be, in ensuring that the Air Force identifies organizational conflicts of interests and takes the appropriate steps to avoid or mitigate them?

Answer. If confirmed to serve as the General Counsel, I will work with Air Force senior leadership to educate our personnel to understand the circumstances that can lead to an organizational conflict of interest and to identify those circumstances at the earliest opportunity. I will help ensure that all circumstances of potential organizational conflicts are promptly addressed in a manner consistent with appropriate guidance. Our goals need to include avoidance of conflicting roles that might bias

a contractor's judgment and prevention of circumstances that may result in an unfair competitive advantage.

Question. What is your understanding of steps the Air Force has taken to address the problems created by delays in the hiring process under circumstances in which the Air Force intends to hire an individual into government service?

Answer. I understand that Air Force leadership has engaged with the Office of Personnel Management, DOD and associated liaison offices to address factors which can delay hiring actions. If confirmed, I look forward to working with Air Force leadership to continue this effort to minimize or eliminate delays.

LEGAL ETHICS

Question. What is your understanding of the action a Department of the Air Force attorney or an Air Force Judge Advocate should take if the attorney becomes aware of improper activities by a Department of the Air Force official who has sought the attorney's legal advice and the official is unwilling to follow the attorney's advice?

Answer. The attorney should immediately bring the matter to the attention of the attorney's supervisor and, if not satisfactorily resolved, to higher level supervisory lawyers or authorities in the chain of supervision or command.

Question. Do you believe that the present limits on pro bono activities of government attorneys are generally correct as a matter of policy or does the policy need to be reviewed?

Answer. I understand that government attorneys may participate in pro bono activities on their own time, consistent with statute, regulation, or other rule or guidelines. I also understand that specific guidance applicable to the JAG Corps permits pro bono work with supervisory approval so long as the representation does not occur on government time or at its expense, does not interfere with official duties, and does not create a conflict of interest or the appearance of a conflict of interest. Although I am not aware of the need to address pro bono activities, if confirmed, I would review the current policy with The Judge Advocate General.

Question. In your view, do the laws, regulations and guidelines that establish the rules of professional responsibility for attorneys in the Department of the Air Force provide adequate guidance?

Answer. I understand that all DOD lawyers are required to be members in good standing of a State Bar and are therefore subject to the rules of professional responsibility of their particular jurisdiction. Lawyers engaged in litigation must also comply with the rules of the court in which they appear. All military and civilian lawyers in The Judge Advocate General's Corps must comply with the specific rules applicable to them. If confirmed, I will review the rules of professional responsibility applicable to Air Force lawyers to assess if changes are required.

ROLE IN THE OFFICER PROMOTION AND CONFIRMATION PROCESS

Question. In your view, what is the role of the General Counsel of the Department of the Air Force in ensuring the integrity and proper functioning of the officer promotion process?

Answer. I understand that, under title 10, U.S.C., the Secretary of the Air Force is responsible for the proper functioning of the Department of the Air Force promotion selection process. In addition to the legal review of memoranda of instruction and selection board reports to ensure they comport with statutory standards, DOD policy and Secretary of the Air Force guidance the Air Force General Counsel must also ensure the conduct of the board process conforms to all legal requirements. Additionally, the General Counsel must advise the Secretary of the Air Force of any case in which a selection board report or selection board process fails to adhere to the statutory standards, either generally or with regard to a particular officer being considered for promotion. In advising the Secretary of the Air Force and the Office of the Assistant Secretary of the Air Force (Manpower and Reserve Affairs), the General Counsel helps to ensure that Air Force promotion policies properly implement applicable laws and regulations and are fairly applied.

LITIGATION INVOLVING THE DEPARTMENT OF THE AIR FORCE

Question. In your opinion, what is the relationship between the Department of the Air Force and the Department of Justice with respect to litigation involving DOD?

Answer. The Department of Justice represents the Department of the Air Force in civil litigation. If confirmed, I will work with The Judge Advocate General to ensure the continuation of a collaborative relationship with the Department of Justice with respect to litigation involving the Department of the Air Force.

Question. In your view, does the Department need more independence and resources to conduct its own litigation or to improve upon its current supporting role?

Answer. It is my understanding that the Air Force's interests in civil litigation are effectively protected and defended by the Department of Justice. If confirmed, I will work with The Judge Advocate General to ensure that adequate resources are available to ensure that the Air Force is able to provide the appropriate level of support to the Department of Justice and protect the Air Force's interests in civil litigation in which the department is involved.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the General Counsel of the Department of the Air Force?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Question for the record with answer supplied follows:]

QUESTION SUBMITTED BY SENATOR JOHN THUNE

TRAINING RANGE ENCROACHMENT

1. Senator THUNE. Mr. Blanchard, community encroachment has been an issue around Air Force bases for several years. As the size of surrounding communities increase, the number of complaints about aircraft operations often increases as well. The same can be said with respect to military training routes, military operations areas airspace, and training ranges. These complaints can instigate operational changes as well as airspace changes. While some of these changes make good common sense, others adversely affect aircrew training and combat readiness. In your opinion, does the Air Force have legal authority to prevent training range encroachment? If so, to what extent should the Air Force use this authority to help maintain its capacity for realistic training?

Mr. BLANCHARD. The safety of our Airmen while carrying out their training and combat readiness missions is critical. To further this end, the Air Force has at its disposal a number of tools to manage encroachment and noise issues. The cooperation and support of surrounding communities is always the first choice. Development restriction in the form of zoning by municipalities and counties surrounding an installation is the most common method to prevent land uses incompatible with the mission. The Air Force uses its Air Installation Compatible Use Zone process and Joint Land Use Studies as means to work with municipalities and counties to promote compatible uses surrounding installations and ranges. In addition, the Office of the Secretary of Defense makes funding available each year to military installations under the Readiness and Environmental Protection Initiative (REPI) to enter into agreements with eligible partners to purchase surrounding property rights from willing sellers to prevent encroachment and protect species habitat. The Air Force is currently using REPI program authority and funds at 10 different bases to acquire conservation or other restrictive easements to help address encroachment issues.

[The nomination reference of Charles A. Blanchard follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
April 30, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Charles A. Blanchard of Arizona, to be General Counsel of the Department of the Air Force, vice Mary L. Walker, resigned.

[The biographical sketch of Charles A. Blanchard, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF CHARLES A. BLANCHARD

Charles A. Blanchard is a partner at the Phoenix office of Perkins Coie Brown & Bain, with a practice that focuses on complex commercial litigation, antitrust, State constitutional law, and election law. In addition to his career at Perkins Coie, Blanchard's over 20 year legal career includes many years of public service, included positions as the chief attorney at two Federal governmental agencies.

Most recently, from 1999 until 2001, he served as General Counsel of the Army, where he acted as the top legal officer to the Department of the Army. From 1997 until 1999, he served as Chief Counsel to the White House Office of National Drug Control Policy during the tenure of Barry McCaffrey as Drug Czar. Other government experience includes two terms as a member of the Arizona State Senate, work as an Associate Independent Counsel in the Office of James C. McKay, law clerk for D.C. Circuit Judge Harry Edwards and law clerk for U.S. Supreme Court Justice Sandra Day O'Connor. He also served as the Interim Homeland Security Director for Governor Janet Napolitano in 2003.

Blanchard is a 1985 graduate of Harvard Law School (where he graduated first in his class) and the Harvard Kennedy School of Government (where he earned a Masters in Public Policy). He graduated with a Bachelor of Science from Lewis & Clark College in Portland, OR, in 1981. Blanchard is active in the community and has served on numerous Boards and Commissions, including the Governor's Regulatory Review Council, Children's Action Alliance, and the Arizona Foundation for Legal Services and Education. He lives in Phoenix, AZ, with his wife Allison and his 4 year old son Teddy.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by Charles A. Blanchard in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Charles Alan Blanchard.
2. **Position to which nominated:**
General Counsel, U.S. Department of the Air Force.
3. **Date of nomination:**
April 30, 2009.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
April 14, 1959; San Diego, CA.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to the former Allison Jo Major.
7. **Names and ages of children:**
Charles Edward Blanchard (Teddy); age 4.
8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
Harvard University (1981–1985), JD/MPP magna cum laude (June 1985).
Lewis & Clark College (1977–1981), Bachelor of Science (Chemistry) (June 1981).
Sprague High School (1974–1977), High School Diploma (June 1977).
9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.
Partner, Perkins Coie Brown & Bain, PA; Phoenix, AZ; (March 2001–present).
General Counsel, U.S. Army; Arlington, VA; (August 1999–January 2001).
Director, Office of Legal Counsel, Office of National Drug Control Policy; Washington, DC (August 1997–August 1999).
10. **Government experience:** List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed above.
Consultant (SGE), Department of Defense Pentagon Transition Office (April 14, 2009–present).
Council Member, Governor's Regulatory Review Council; Phoenix, AZ (February 2004–January 2009).
Interim Homeland Security Director (consultant) Office of Governor Janet Napolitano (January 2003–May 2003).
Arizona State Senator (1991–1995).
Associate Independent Counsel, Office of Independent Counsel James C. McKay; Washington, DC (June 1987–April 1988).
Law Clerk, U.S. Supreme Court Justice Sandra Day O'Connor (July 1986–June 1987).
Law Clerk, Judge Harry T. Edwards, U.S. Court of Appeals for the DC Court, Washington, DC (July 1985–July 1986).
11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.
Partner, Perkins Coie Brown & Bain PA
Adjunct Professor, Sandra Day O'Connor School of Law, Arizona State University
12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.
Vice President, Florence Immigrant & Refugee Rights Project
Vice President, Children's Action Alliance
Board Member, Arizona Foundation for Legal Services and Education
Member, Arizona Bar Association
Member, Maricopa County Bar Association
Member, American Bar Association
Member, Nature Conservancy
Member, Arizona Town Hall

Member, Harvard Law School Alumni Association

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

Candidate:

Arizona State Senate (Democrat) (1990, 1992); U.S. Congress (AZ CD1) (Democrat) (1994)

Officer:

State Committeeman, Arizona Democratic Party (1991–1995, 2003–2005).
Precinct Committeeman, Arizona Democratic Party (1988–1995, 2003–2005).

Delegate, Democratic National Convention (1992).
Rules Committee, Democratic National Convention (1996).

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

In addition to the offices listed in (a) above, I have been outside legal counsel for the following committees:

Arizona Democratic Party
Ellen Simon for Congress
Giffords for Congress
Harry Mitchell for Congress
Bob Lord for Congress

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

Note: These are contributions made both by me and my wife:

Al Franken for Senate
01/10/2009; \$100

Arizona Democratic Party
11/08/2005; \$400
04/24/2006; \$1,000
06/12/2007; \$1,000
12/12/2007; \$250
10/29/2008; \$500

Arizona List
09/23/2004; \$200
04/18/2007; \$100
01/09/2008; \$100
09/18/2008; \$200

Arizona Senate 2006
06/08/2006; \$2,000

Kerry Victory Fund
06/12/2004; \$2,000

Committee to Elect Chad Campbell
04/26/2005; \$370

Doug Allsworth for School Board
09/16/2006; \$500

Bob Lord for Congress
02/14/2007; \$500
12/22/2007; \$500

Ellen Simon for Congress
09/21/2006; \$1,000

Friends of Tom Umberg
03/10/2004; \$500

Georgians for Meade (Howard Meade—Member running for judge of Court of Appeals)

03/14/2004; \$500
09/23/2007; \$250

Giffords for Congress
01/03/2006; \$1,000
10/26/2006; \$1,000
06/12/2007; \$200
03/22/2008; \$1,000

Harry Mitchell for Congress

09/22/2006; \$1,000
 10/27/2006; \$1,000
 04/05/2007; \$1,000
 03/27/2008; \$500
 07/02/2008; \$1,000
 10/27/2008; \$500
 Janet Napolitano (Governor) 2006
 03/03/2006; \$120
 Keep It Clean
 07/06/2004; \$250
 Kirkpatrick for Arizona
 03/22/2008; \$500
 06/19/2008; \$1,000
 07/23/2008; \$500
 09/28/2007; \$500
 10/27/2008; \$500
 Kris Mayes 2004
 03/17/2004; \$110
 Napolitano Office Account
 07/28/2005; \$120
 Obama for America
 02/04/2008; \$2,000
 03/26/2008; \$300
 05/28/2008; \$1,000
 09/04/2008; \$2,300
 Obama Fund
 10/23/2008; \$500
 Jose Cerda for Clerk (Cook County Clerk)
 12/24/2006; \$500
 Pederson for Senate
 12/02/2005; \$1,000
 09/29/2006; \$1,000
 People for Grijalva
 04/16/2004; \$250
 06/01/2005; \$250
 Spitzer 2006
 06/01/2006; \$500
 Tim Nelson for County Attorney
 05/08/2008; \$780
 Warshaw for County Attorney, Maricopa County
 07/13/2004; \$200

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Army Distinguished Service Award (2001)
 ONDCP Directors Award for Distinguished Service (1999)
 Governors Council on Highway Safety Awareness (1992)
 Toll Fellowship (Council of State Governments) (1993)
 Arizona Attorney General's Distinguished Service Award (1992)
 Fay Diploma (Top Student), Harvard Law School (1985)
 Rena Ratte Award (Top Student), Lewis & Clark College (1981)
 Winning Team, Ames Moot Court, Harvard Law School (1984)
 Marshall Scholar (1981) (declined)

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

The New Deal Lawyer. 20 Harv. J. Leg. 678 (1983).

Note, Restrictions on Bank Underwriting of Corporate Securities: A Proposal for More Permissive Regulations, 97 Harv. L. Rev. 720 (1984).

"Exclusionary Rule—Good Faith Exception: Massachusetts v. Sheppard and United States v. Leon," 98 Harv. L. Rev. 108 (November 1984).

Report of Independent Counsel, In re Edwin Meese III (July 5, 1988) (co-author).

"Riparian Areas: Protect Them for Our Future," The Arizona Republic (February 2, 1992).

“We need a plan to deal with crime, its causes,” The Arizona Republic (October 17, 1993).

“Education Reform: Charter Schools Better Serve Kids,” The Phoenix Gazette (June 15, 1994).

“Make a Commitment to Cut Teen Drug Use,” Arizona Republic (August 27, 1998) [modified versions of this oped also published in Deseret News, The Oregonian, Tacoma News Tribune and Spokane Spokesman].

“Drugs, Crime, Prison, and Treatment,” Spectrum [quarterly publication of Council of State Governments] (Winter 1999).

“Boost Drug Treatment, Cut Crime: Failure to Invest Dooms Communities to Repeat Offenders,” Arizona Daily Star (February 21, 1999).

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

None.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

CHARLES A. BLANCHARD.

This 11th day of May, 2009.

[The nomination of Charles A. Blanchard was reported to the Senate by Chairman Levin on May 14, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on May 18, 2009.]

**NOMINATIONS OF ADM JAMES G. STAVRIDIS,
USN, FOR REAPPOINTMENT TO THE GRADE
OF ADMIRAL AND TO BE COMMANDER, U.S.
EUROPEAN COMMAND AND SUPREME AL-
LIED COMMANDER, EUROPE; LT. GEN.
DOUGLAS M. FRASER, USAF, TO BE GEN-
ERAL AND COMMANDER, U.S. SOUTHERN
COMMAND; AND LTG STANLEY A.

TUESDAY, JUNE 2, 2009

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:36 a.m. in room SH-216, Hart Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Lieberman, Reed, Akaka, Bill Nelson, Webb, Udall, Hagan, McCain, Inhofe, Sessions, Chambliss, Graham, Thune, Wicker, and Collins.

Also present: Senator Murkowski.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Joseph M. Bryan, professional staff member; Ilona R. Cohen, counsel; Mark R. Jacobson, professional staff member; Jessica L. Kingston, research assistant; Michael J. Kuiken, professional staff member; Gerald J. Leeling, counsel; William G.P. Monahan, counsel; Michael J. Noblet, professional staff member; and William K. Sutey, professional staff member.

Minority staff members present: Joseph W. Bowab, Republican staff director; Adam J. Barker, professional staff member; Richard H. Fontaine, Jr., deputy Republican staff director; Michael V. Kostiw, professional staff member; David M. Morriss, minority counsel; Richard F. Walsh, minority counsel; and Dana W. White, professional staff member.

Staff assistants present: Christine G. Lang and Brian F. Sebold.

Committee members' assistants present: James Tuite, assistant to Senator Byrd; Vance Serchuk, assistant to Senator Lieberman; Carolyn A. Chuhta, assistant to Senator Reed; Nick Ikeda, assistant to Senator Akaka; Christopher Caple, assistant to Senator Bill Nelson; Patricia Hayes, assistant to Senator Bayh; Gordon I. Peterson, assistant to Senator Webb; Jennifer Barrett, assistant to Senator Udall; Roger Pena, assistant to Senator Hagan; Anthony J. Lazarski, assistant to Senator Inhofe; Lenwood Landrum and Sandra Luff, assistants to Senator Sessions; Clyde A. Taylor IV, assistant to Senator Chambliss; Adam G. Brake, assistant to Senator Graham; Jason Van Beek, assistant to Senator Thune; Dan Fisk and Brian W. Walsh, assistants to Senator Martinez; Erskine W. Wells III, assistant to Senator Wicker; and Chip Kennett, assistant to Senator Collins.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody. The committee meets this morning to consider three military nominations: Admiral James Stavridis, nominated to be Commander, U.S. European Command (EUCOM) and Supreme Allied Commander, Europe; Lieutenant General Douglas Fraser, nominated to be general and to succeed Admiral Stavridis as Commander, U.S. Southern Command (SOUTHCOM), marking the first time that an Air Force general would take command of SOUTHCOM, if confirmed; and Lieutenant General Stanley McChrystal, nominated to be General and Commander, North Atlantic Treaty Organization (NATO) International Security Assistance Force (ISAF), and Commander, U.S. Forces, Afghanistan.

On behalf of the committee, we want to thank each one of you for your service to our country, your willingness to continue to serve. We also want to acknowledge the sacrifices that you and your families have made along the way. The support that our military families provide is critical, and we want to do all that we can to support them.

If confirmed, these three nominees will lead our military in meeting today's security concerns in their areas of responsibility, and preparing for tomorrow's. One of the most immediate challenges is implementing the President's new civil military strategy for Afghanistan and Pakistan. If confirmed, two of our witnesses, Admiral Stavridis and General McChrystal, will need to coordinate closely for that strategy to work. As Commander EUCOM and Supreme Allied Commander, Europe, Admiral Stavridis will need to work with our NATO and other European coalition partners to build the capabilities needed in Afghanistan and secure allied commitments to the NATO ISAF mission.

Our European allies continue to provide the majority of the nearly 35,000 non-U.S. troops in Afghanistan, but only a portion are in the fight where the fight mainly is, in the south and east of Afghanistan. The NATO contribution in Afghanistan remains inadequate, even as President Obama has approved increasing the U.S. presence by some 21,000 soldiers, to a total U.S. force of 68,000 by the end of this summer.

Moreover, Secretary Robert Gates testified recently that the NATO Afghan Army Trust Fund has received contributions of less

than one-tenth of its target of 1 billion Euros from our NATO allies. Admiral Stavridis, we'd be interested in any thoughts that you may have as to how to get NATO and our other allies in Europe to do their share for the Afghanistan mission, whether by providing additional military resources, additional trainers for the absolutely critical task of growing the Afghan security forces faster, financial contributions to defray the costs of Afghanistan reconstruction, or providing civilian technical expertise to build the country's governance capacity.

Another issue relative to European security relates to Russia. Vice President Joseph Biden and Secretary of State Hillary Clinton have called for resetting U.S.-Russian relations. I believe there are opportunities to find and build common security interests between the United States and Russia, including the development of a unified response to the threat of a nuclear-armed Iran.

The President, Secretary Clinton, Secretary Gates, and National Security Advisor General Jim Jones have all commented positively about the prospects of the United States and Russia working on a common missile defense as a way of deterring Iran's nuclear ambitions. Senators Bill Nelson, Susan Collins, and I recently explored that possibility on our visit to Moscow, Prague, and Warsaw, and came back with some positive possibilities worth exploring.

Admiral Stavridis, I invite your comments on whether a cooperative U.S.-Russian missile defense program could possibly change the overall dynamic in the region and might cause Iran to recalculate any nuclear weapons ambitions. We also would welcome comments that you might have on the potential for the NATO-Russia Council to serve as a useful forum for discussing such possible joint missile defense cooperation.

General McChrystal, if you're confirmed, you would bring what Secretary Gates called "fresh eyes" to the task of commanding NATO's ISAF and U.S. forces, Afghanistan. Implementing the counterinsurgency approach outlined in the President's strategy will require significant coordination, not only between two chains of command, one reporting up to the NATO Supreme Allied Commander, Europe, and the other through U.S. Forces, Afghanistan, to General David Petraeus at the U.S. Central Command, but also to coordinate between the military and civilian components of the effort in Afghanistan.

The next commander of ISAF and U.S. forces in Afghanistan will confront a myriad of challenges, including a resurgent Taliban, an effectively open border in the area between Kandahar, Afghanistan, and Quetta, Pakistan, over which border extremists come into Afghanistan and return to safe havens in Pakistan. In addition to that, there is crippling poverty and unchecked narcotics trafficking corrupting the government. All instruments of U.S. and coalition power, not just military force, but also diplomatic, economic, and legal tools, will be needed to turn the situation in Afghanistan around.

General McChrystal, I also invite you this morning to clarify your understanding of U.S. standards for the treatment of detainees and to comment on allegations of detainee mistreatment by units under your command during your tenure as Commander of the Joint Special Operations Command from 2003 to 2008. You

may want to address both that issue and the Tillman matter in your opening statement. Both subjects were discussed in executive session of the Senate Armed Services Committee last year in connection with your nomination to your current position as Director of the Joint Staff.

General Fraser, if confirmed, the challenges facing you in the western hemisphere may be different, but they are also complex. As a result of the relative success of Plan Colombia over the past decade, security has improved for Colombians; however, you will still be confronted by an illegal narcotics trade that is constantly adjusting its tactics in response to U.S. surveillance and counter-narcotics efforts. As Admiral Stavridis can attest, the violence that shook Bogota 10 years ago is now challenging governments across Central America and Mexico. Countries like El Salvador, Guatemala, and Panama have now become the focal point of territorial battles for production sites and trafficking routes for drugs. The committee will be interested in hearing your views on this situation and how you intend to address this burgeoning challenge.

In addition to addressing these issues, you'll also be in charge of developing our security relations with important allies. General Fraser, we look forward to hearing from you on these matters, and how you plan to build on the work of your predecessors.

Senator McCain.

STATEMENT OF SENATOR JOHN McCAIN

Senator McCAIN. Thank you, Mr. Chairman. I join you in welcoming Admiral Stavridis, General McChrystal, and General Fraser, and congratulating them on their nominations. The importance of each of these positions to our national security can't be overstated.

The recent fighting in Pakistan, coupled with our ongoing challenges in Afghanistan, underscore the high stakes our country faces in this theater. I support the long overdue change of course announced for Afghanistan earlier this year. The war there and in Pakistan is one that we can and must win. But, for years now we have been fighting without a clear strategy, with insufficient resources, and with less than total support of the Government of Pakistan. Now that we have a new strategy, I believe we must quickly follow up with the development of an integrated joint-agency civil-military campaign plan for all of Afghanistan and for the Pakistan border area.

We also need to ensure that General David Rodriguez has the staff and resources he will need to conduct operational planning similar to the activities conducted by the Multi-National Corps-Iraq.

Finally, we must take every possible step to accelerate the growth of the Afghan security forces. The Afghan army is too small, and, even with the current projected end strengths of 134,000, it will not be big enough to tackle the many security challenges at hand.

At a minimum, we need to more than double the current size of the Afghan army to 160,000 troops and consider enlarging it to 200,000. The costs of this increase should not be borne by the United States alone, but by the international community. I look

forward to hearing General McChrystal's thoughts on these aims, as well as your views on the need for a comprehensive civil-military campaign plan and for the establishment of a planning corps under General Rodriguez.

Admiral Stavridis, you will play a critical role in marshaling NATO's efforts in Afghanistan and elsewhere. While I believe the United States should continue to encourage European troop contributions and press for reductions of caveats on their use, I also believe we should move away from stressing what Washington wants Europe to give and more toward encouraging what Europe is prepared to contribute.

Many of our NATO allies, and other allies and partners outside NATO, including countries in Asia and the Gulf, are fully capable of contributing many badly needed resources. As Secretary Gates noted in remarks over the weekend, in many areas, noncombat-related contributions, from police training to a trust fund for the Afghan National Army (ANA), will be as critical to long-term success, as more European troops on the ground. Admiral Stavridis, we will look to you for new approaches in these areas that will increase NATO involvement.

America's future is fundamentally tied to the stability, prosperity, and security of our southern neighbors. The recent uptick in violence along our southern border is perhaps the chief example of the interplay between our own security and that of our southern neighbors.

Today, Phoenix, Arizona, is the kidnapping capital of America, and gangs that were born on the streets of El Salvador and Nicaragua wreak havoc on our Nation's cities and towns.

Through the Merida Initiative with Mexico and via our various SOUTHCOM security partnerships throughout the hemisphere, we must help our southern neighbors help themselves in a concerted effort to fight crime, stop drug trafficking, and provide security for their people. General Fraser, I look forward to hearing your thoughts on how SOUTHCOM is addressing these problems.

I thank our nominees for their service, and I look forward to their testimony today, and rapid confirmation.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator McCain.

Before we call on our witnesses for their opening statements and to introduce their families, one of our dear colleagues, Senator Murkowski, is here, and we will call on her to make an introduction.

Senator Murkowski.

STATEMENT OF HON. LISA MURKOWSKI, U.S. SENATOR FROM THE STATE OF ALASKA

Senator MURKOWSKI. Thank you, Mr. Chairman, Ranking Member McCain. Thank you.

I am truly honored this morning to sit before you to introduce Lieutenant General Douglas Fraser. General Fraser is accompanied by his wife Rena, his son, Ian, and his daughter, Heather, and, I also understand, her husband, as well.

I have had the pleasure and the privilege to come to know, not only General Fraser, but his family, through the time that he has

spent up north in Alaska. He comes before the committee this morning for confirmation to the rank of general, capping off a 34-plus-year Air Force career. That career officially began in 1975, upon his graduation from the Air Force Academy. Following graduation, General Fraser served in Oklahoma, Arizona, New Mexico, Texas, Alabama, Idaho, Hawaii, Colorado, Washington, DC, in addition to Alaska. So, I think those children are certainly well traveled, there. He's also served in Germany and Japan. But, General Fraser calls Alaska home, and we certainly could not be prouder.

General Fraser served two memorable assignments in Alaska, the first from January 2000 to April 2002, when he commanded the 3rd Wing at Elmendorf Air Force Base there in Anchorage. It was during those years that I represented the airmen of Elmendorf in the Alaska legislature. I became familiar with General Fraser's leadership, both on base and off. General Fraser and his wife, Rena, were more than ambassadors for the Air Force, they were truly forces of good for our whole community.

In October 2005, General Fraser returned to Elmendorf after two assignments in Colorado. He headed up the Joint Alaskan Command, where he remained until April 2008. It was during this time period where our Armed Forces were really coming to grips with the challenge of treating men and women returning from Iraq with post-traumatic stress disorder and traumatic brain injuries. General Fraser was truly committed to addressing the challenges. He was involved in a roundtable that we had convened to discuss how we deal with the healthcare facilities, how our ability to deal with the challenges could be handled. At the time I learned about an innovative project that the Air Force medical wing at Elmendorf would undertake, it was called a Hometown Healing. The Air Force medical wing determined that it was capable of treating wounded warriors in Alaska. It sought out Alaskans who were recovering in the lower 48 hospitals, brought them back to Alaska, and this occurred under General Fraser's watch at the Alaska Command, and it's something that we are very proud of. That Elmendorf hospital was subsequently voted the best in the Air Force.

Alaska is known across the globe for the high level of support that it provides to members of the armed services that are stationed in our State. This doesn't happen by coincidence. It's the product of strong partnerships between the senior leaders on Alaska's installations and the leaders of our Alaska communities, partnerships that each senior leader improves upon during his tenure and passes along to his successors. The Air Force has sent to Alaska some of its very best, people like the current Air Force Chief of Staff, General Norton Schwartz; and the Commander of Pacific Air Forces, General Howie Chandler. I would say that, General Fraser, you stand shoulder-to-shoulder with these senior leaders, in terms of support for Alaska's military communities.

While I have to express some disappointment that General Fraser's next assignment is going to take him away from the Pacific, that's where the Nation needs him, and that's where he will go. Wherever General Fraser goes, I know that he will be an inspiration to the troops that he leads, a strong force in his community, and a military leader of the highest qualities. I strongly endorse his confirmation.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Murkowski. A very significant introduction. We're delighted you were able to join us today.

Let me now call on our three witnesses, in the following order, for their opening comments: Admiral Stavridis, General Fraser, and General McChrystal.

STATEMENT OF ADM JAMES G. STAVRIDIS, USN, NOMINEE FOR REAPPOINTMENT TO THE GRADE OF ADMIRAL AND TO BE COMMANDER, U.S. EUROPEAN COMMAND AND SUPREME ALLIED COMMANDER, EUROPE

Admiral STAVRIDIS. Chairman Levin, Ranking Member McCain, members of the committee, I'd like to begin by simply saying how proud I am to be here with General Fraser and General McChrystal. I couldn't ask for a better Army-context battle buddy, Air Force-context wingman, and the Navy would say shipmates. We're glad to be here together.

I'd just make the comment, as you look at the three of us here, it really is a joint Goldwater-Nichols kind of panel—Army, Navy, Air Force—and also, Skeet Fraser, nominated as the first airman to go to SOUTHCOM, I'm lucky enough to be nominated as the first admiral to go to Europe; Stan McChrystal, a product of real improvements in legislative quality built into special operations, all came out of this Congress, came out of Goldwater-Nichols. So, we're proud to be here, and I thank you for taking the time to hear us.

I'm here with my family—my wife, Laura, right here behind me, my childhood sweetheart. We lived together in Europe when we were both children, so the prospect of going back to Europe is extremely appealing to both of us. We have two daughters ourselves now, who are both here, Christina, a proud graduate of the University of Virginia, works out at Google in San Francisco, my daughter, Julia, makes us very proud by signing up, this year, for the Navy Reserve Officer Training Corps program, going to the University of Texas at Austin. I'm very proud and lucky to have the family here with me.

I am personally, obviously, very honored and humbled by the President's nomination and the Secretary's recommendation for this position. I have a fair amount of background in Europe. In addition to having lived there as a child, I've traveled throughout Europe extensively over the years. I've operated with NATO off of Haiti, the Balkans, in the Gulf; and studied NATO as part of my academic work that the Navy sent me to at the Fletcher School, years ago. I believe in the transatlantic alliance. I think it's an important one, and if confirmed, I hope to be a positive force, as Senator McCain was just talking about, and the Chairman, in convincing our allies to continue to stand shoulder-to-shoulder with us in important missions throughout the world, and, in particular, in Afghanistan.

My approach will be, as it has been at SOUTHCOM for the last 3 years, to be collegial, to be oriented toward international solutions, multilateral approaches, and, above all, interagency and whole of government. These are challenging times in Europe,

they're challenging times in Afghanistan and the world. If confirmed, I will do my best.

Thank you very much, Mr. Chairman.

Chairman LEVIN. Admiral, thank you so much.
General Fraser?

STATEMENT OF LT. GEN. DOUGLAS M. FRASER, USAF, NOMINEE TO BE GENERAL AND COMMANDER, U.S. SOUTHERN COMMAND

General FRASER. Mr. Chairman, thank you very much for this opportunity. Senator McCain. I would like to also thank Senator Murkowski for her kind introduction and for her continued support of our men and women in uniform.

If I could, let me first introduce my wife, Rena, my partner for 11 years, who has eagerly learned about the Air Force and the joint community, and now steadfastly advocates for and supports military families around the globe.

Next, I'm joined by my son, Ian. He spent 4 years in the Air Force. He's a veteran of Operation Iraqi Freedom and now works with industry.

I'm also accompanied by my daughter, Heather, and her husband, Lieutenant Colonel Bruce Lyman, a businessman and member of the Air Force Reserve. Lieutenant Colonel Lyman, when performing duty with the Air Force Reserve, routinely travels forward to Iraq and Afghanistan to directly support our joint warfighters. Heather and Bruce have also blessed us with our first grandchild.

We're also joined today by Lieutenant Michael Dinmore, a U.S. Air Force Academy graduate who we sponsored while we were in Colorado Springs while he was attending the Academy, and he's now a third-year medical student at Bethesda, and he's essentially another son to us.

Finally, our daughter, Hannah Green, couldn't be with us today. She is, I'm sure, studying very hard and doing well in her final exams back in Honolulu.

Mr. Chairman, thank you for this opportunity to introduce my family. As you can see, we've grown very robustly, in our Air Force career and our time in the Armed Forces.

Distinguished members of the committee, it's my distinct privilege to appear before you today as the nominee for the Commander of United States Southern Command. I am both honored and humbled to be nominated by the President and the Secretary of Defense for this important role and for the opportunity to continue serving with the magnificent men and women who voluntarily defend this Nation.

I am no stranger to Latin America. I spent 3 years in high school in Bogota, Colombia, graduating there in 1971. During this time, I gained a lifelong appreciation and affection for Latin America. Since that time, I have visited several countries in the region on a couple of different occasions, and, if confirmed, I relish the opportunity to return to the wonderful lands of my childhood.

While I haven't spent much time in Latin America during my career, let me assure you that I will spend all my time and energy enhancing the role that United States SOUTHCOM plays with our partner Armed Forces in the region and continue Admiral

Stavridis' dedicated efforts to enhance the interagency cooperation and coordination.

Finally, as Admiral Stavridis mentioned, I am honored to share this venue with him and Lieutenant General McChrystal. I can't think of two better joint partners—battle buddies, wingmen, shipmates—I'd rather be with here today than these two distinguished gentlemen.

I've not had the pleasure of directly serving with Admiral Stavridis. As I have looked more closely at SOUTHCOM, I'm impressed by what SOUTHCOM has accomplished under his leadership, by his foresight and his innovation, and I look forward to the opportunity to build on his distinguished accomplishments.

Likewise, during my current duty as the Deputy Commander United States Pacific Command, I've shared some time with Lieutenant General McChrystal while he served as the Director of Joint Staff. I am equally impressed with his vision, intellect, and drive to improve the coordination and operation of our joint forces.

Mr. Chairman, thank you for the opportunity and the privilege to appear before you today. I look forward to your questions.

Chairman LEVIN. Thank you very much, General.

General McChrystal?

STATEMENT OF LTG STANLEY A. McCHRYSTAL, USA, NOMINEE TO BE GENERAL AND COMMANDER, INTERNATIONAL SECURITY ASSISTANCE FORCE AND COMMANDER, U.S. FORCES, AFGHANISTAN

General McCHRYSTAL. Mr. Chairman, Senator McCain, members of the committee, thank you for the opportunity to appear before you.

I'd like to thank the Chairman of the Joint Chiefs of Staff and the Secretary of Defense for recommending me, and the President for nominating me to serve the team engaged in this important mission.

I'm accompanied today by my wife, Annie. Her love and support for more than 32 years have been extraordinary.

The President's new Afghanistan-Pakistan strategy outlines a path to attaining our strategic goal in the region through a fully resourced counterinsurgency campaign in Afghanistan. It is important for me to give you my perspective on where I believe we are and where we must go. I appreciate this opportunity.

First, I'd like to recognize the many Afghan civilians, soldiers, and police, who, along with young Americans and all our coalition partners, have sacrificed greatly to stand up and fight for Afghanistan. I honor the fallen, as I know do each of you on this committee.

You gave me the opportunity to discuss in detail one of those fallen, Corporal Pat Tillman, in closed session with this committee a year ago, in advance of my confirmation as Director of the Joint Staff, which I appreciated. I stand ready to answer any additional questions you may have.

I would like to express my deepest condolences to his fellow Rangers, who lost a comrade, and to his family, who lost a brother, a husband, and a son.

As a fellow soldier, I'd also like to recognize the service of General David McKiernan.

In Afghanistan, despite impressive progress in many areas since 2001, the situation is serious. Afghans face a combination of challenges: a resilient Taliban insurgency, increasing levels of violence, lack of governance capacity, persistent corruption, lack of development in key areas, illicit narcotics, and malign influences from other countries. Together, these challenges threaten the future of Afghanistan and regional stability.

The potential re-emergence of al Qaeda or other extremist safe havens in Afghanistan, as were present before September 11, and existing safe havens in Pakistan, are critical threats to our national security and to our allies.

Additionally, challenges to legitimate governance, like those underway in Pakistan, undermine an important partner and threaten regional stability.

Finally, I believe that providing the Afghan people, battered by 30 years of almost unbroken violence, an opportunity to shape their future requires our firm commitment and demonstrates the values that underpin America's credibility worldwide.

For all these reasons, we must succeed.

The challenge is considerable. This is not the environment we, along with our NATO allies and other international partners, envisioned 4, or even 2, years ago, but it is the environment we have today and the place from which we must navigate a way forward.

There is no simple answer. We must conduct a holistic counterinsurgency campaign, and we must do it well. Success will not be quick or easy. Casualties will likely increase. We will make mistakes. The commitment and continued support of this committee, Congress, and the American people will be vital. With the appropriate resources, time, sacrifice, and patience, we can prevail.

A key component of resourcing is people. More than 21,000 additional U.S. military personnel will have deployed to Afghanistan by October this year. You might properly ask if that is enough. I don't know. It may be some time before I do. What I do know is that military-centric strategy will not succeed. The Department of State and other members of the interagency are preparing to train and deploy additional civilian personnel with vital governance and development expertise. Development of an integrated civil-military plan with Ambassador Karl Eikenberry and his team to unite efforts across security, governance, and development is ongoing. It complements efforts by Ambassador Richard Holbrooke, General David Petraeus, and others to address issues across the region. I will support fully the completion and execution of that plan.

Counterinsurgency is difficult business and demands resources, courage, and commitment over time. Each step of the essential shape-clear-hold-build process offers challenges and pitfalls. We face serious challenges, but the insurgency threat and the Afghan people offer no vision for a better future and, thus, remain vulnerable to a government in Afghanistan that can provide one.

Central to counterinsurgency is protecting the people. Efforts to convince Afghans to confer legitimacy on their government are only relevant if Afghans are free to choose. They must be shielded from coercion while their elected government secures their trust through

effective governance and economic development at all levels. This must be Afghanistan's effort, with our committed support.

In counterinsurgency, how you operate, the impact of civilian casualties, collateral damage, cultural insensitivity, and the inherent complexities involved in separating insurgents from the population often determine success or failure. If defeating an insurgent formation produces popular resentment, the victory is hollow and unsustainable.

In Afghanistan, faced with a determined and unconstrained foe, precision and discipline are essential, from limited but necessary air strikes to small-unit search and detention operations. If confirmed, I would emphasize that how we conduct operations is vital to success. This is a critical point. It may be "the" critical point. This is a struggle for the support of the Afghan people. Our willingness to operate in ways that minimize casualties or damage, even when doing so makes our task more difficult, is essential to our credibility. I cannot overstate my commitment to the importance of this concept.

My experiences leading counterterrorist forces in Afghanistan, Iraq, and other locations did much to develop my strong belief in the importance of a holistic counterinsurgency campaign. While proud of the contributions of the forces I was honored to command, we were most effective when integrated with interagency and allied-nation partners in full-spectrum counterinsurgency campaigns. In Afghanistan, I believe intelligence-driven precision operations will remain critical, but must be subordinate to efforts that protect the population and set conditions for governance and economic advancement.

Although I expect stiff fighting ahead, the measure of effectiveness will not be enemy killed, it will be the number of Afghans shielded from violence. Securing the population is ultimately best done by Afghans. I consider the development of Afghan Security Forces, both the ANA and Afghan National Police (ANP), our highest-priority security task. If confirmed, I would work with our NATO, European Union, and Afghan partners to support this effort.

At this point, I also believe the Afghan National Security Forces will likely need to grow beyond the currently approved strengths to provide adequate security. Like you, I am keenly aware their efforts are part of a coalition, many of whom have sacrificed greatly and invested heavily to support Afghanistan. If we are both confirmed, I will have the honor of working for my friend Admiral Jim Stavridis, and my command will include approximately 59,000 servicemembers from 41 nations, all 28 NATO nations, and 14 NATO partner nations supporting Afghanistan. Presently, ISAF forces are conducting security and stability operations, providing senior leadership in all five regional commands, and are directly involved in the mentoring, training, and equipping of the ANA. I look forward to listening to, learning from, and leading, this team in our common challenge.

As this committee knows, since September 11 our forces have learned valuable lessons regarding the treatment of detainees, and made mistakes along the way. When I took command in 2003, I found our treatment of detainees followed existing guidance but

needed improvement. Our facilities were limited, our expertise in specialties like interrogation was insignificant—or, insufficient—and we lacked organizational experience at every level. In the months and years that followed, we invested considerable energy, developed expertise and experience, and improved continuously. If confirmed, I will strictly enforce the highest standards of detainee treatment consistent with international and U.S. law.

Our effort in Afghanistan demands expertise and continuity. Working within the realities of family needs and career development, we must develop a core of professionals who possess expertise in the theater, in its languages and culture. Assigned for repeated tours, remaining focused on Afghanistan when not deployed, these experts can significantly increase the effectiveness of our overall effort.

I'd like to thank the committee for their consistent support. Programs like the Commanders Emergency Response Program (CERP) offer critical flexibility. Robust intelligence, surveillance, and reconnaissance (ISR) assets facilitate unprecedented intelligence fusion. Equipment like the Mine Resistant Ambush Protected all-terrain vehicle save lives, and programs like the Afghan National Trust Fund build partner capacity. But, most important is our magnificent volunteer force. Seasoned by years and growing experience in counterinsurgency operations, they continue to inspire us with their courage and commitment. They are strong, but have given much.

Thank you for the unfailing support you have provided these tremendous professionals and their families.

I was honored to be nominated for this position, and, if confirmed, pledge to you and to the men and women for whom I would serve the best of which I am capable. With that, I look forward to answering your questions.

Chairman LEVIN. Thank you, General.

We'll have an 8-minute round. Before we begin with questions, let me ask the standard questions of each of you. We ask these of all of our nominees.

Have you adhered to applicable laws and regulations governing conflicts of interest?

[All three witnesses answered in the affirmative.]

Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

[All three witnesses answered in the negative.]

Will you ensure that your staff complies with deadlines established for requested communications, including questions for the record in hearings?

[All three witnesses answered in the affirmative.]

Will you cooperate in providing witnesses and briefers in response to congressional requests?

[All three witnesses answered in the affirmative.]

Will those witnesses be protected from reprisal for their testimony or briefings?

[All three witnesses answered in the affirmative.]

Do you agree, if confirmed, to appear and testify, upon request, before this committee?

[All three witnesses answered in the affirmative.]

Do you agree to give your personal views, when asked before this committee to do so, even if those views differ from the administration in power?

[All three witnesses answered in the affirmative.]

Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly-constituted committee, or to consult with the committee regarding the basis for any good-faith delay or denial in providing such documents?

[All three witnesses answered in the affirmative.]

I think there's going to be a vote at 11 o'clock, and if there is, we'll try to work right through it.

Let me ask both Admiral Stavridis and General McChrystal about the end strength of the ANA. General McChrystal, you made reference to it. The current goal, target end strength, for the ANA is 134,000. As of April, there are 86,000 troops assigned to the army. President Obama has approved the deployment, later this year, of 4,000 soldiers as trainers to embed and to work with the Afghan Security Forces. But, I'm very much concerned, as many of us are, about the size of that army and the lack of a higher end strength goal. I joined with Senator Lieberman and 13 other Senators in a letter to the President to urge him to support, now, the increase in the end strength levels for the Afghan army and the police to the higher ranges, which were recommended by the Afghan defense and interior ministers; and for the army, that range was between 250,000 and 300,000, which would mean double the current target.

Admiral, let me ask you first, because General McChrystal has already commented on it, but then I want to ask the General the same question. Do you believe that the realities on the ground in Afghanistan necessitate growing the Afghan National Security Forces beyond the currently planned end strengths?

Admiral STAVRIDIS. Mr. Chairman, my study of, sort of, classic counterinsurgency doctrine, looking at everything from T.E. Lawrence through David Kilcullen's "The Accidental Guerrilla" as I prepared for these hearings, would lead me to believe that we do need larger security forces in what Stan has correctly referred to as a classic counterinsurgency campaign.

Chairman LEVIN. That means larger than the current end strength?

Admiral STAVRIDIS. Yes, sir.

Chairman LEVIN. General, you said that we're likely to need them; in your judgment, will the Afghan Army need to have a significantly higher end strength than 134,000?

General MCCHRYSAL. Yes, sir, that's my belief right now.

Chairman LEVIN. In terms of the Pakistan situation—and here, I think, General, you also made reference to this—would you agree with me that assistance to Pakistan will only be effective if the Pakistani Government is perceived by the people of Pakistan as taking the fight to the insurgents because of their own needs as a nation, not because of U.S. pressure?

General MCCHRYSAL. Yes, sir, I do.

Chairman LEVIN. Admiral, do you want to give a quick comment on that?

Admiral STAVRIDIS. Yes, sir, I do.

Chairman LEVIN. All right.

General McChrystal, are you familiar with the National Solidarity Program in Afghanistan?

General MCCHRYSAL. Yes, sir, I am.

Chairman LEVIN. Do you have an opinion as to its success and whether it's a good program?

General MCCHRYSAL. Sir, at this point—and I want to learn more when I get on the ground, but, what I've seen from here, it's been very successful and very positive.

Chairman LEVIN. All right. Now, relative to the question of detainees—and you made brief reference to it, General—we have a letter from you, which I'll make part of the record—clarifying an answer which you provided for the committee in advance of the hearing today.

One line in your letter says that, "We must at all times adhere to our obligation to treat detainees humanely. Military necessity, as well—along with humanity or principles of—underlying the Law of War, military necessity does not permit us to derogate from those imperatives." I'll put the entire letter in the record, but it is an important clarification of your pre-hearing answer for the record.

[The information referred to follows:]

THE JOINT STAFF
WASHINGTON, DC

Reply ZIP Code:
20318-0300

1 June 2009

The Honorable Chairman Levin
Chairman, Committee on Armed
Services
United States Senate
Washington, D.C. 20510

Dear Mr. Chairman,

It was brought to my attention that the committee expressed concerns related to my language "...to the extent appropriate and consistent with military necessity..." in response to an advanced policy question on treatment of detainees.

Let me be clear--It is my duty to ensure that all detainees are held in conformity with all applicable laws governing the conditions of confinement, including Common Article 3 of the Geneva Conventions. We must at all times adhere to our obligation to treat detainees humanely. Military necessity, along with humanity, are principles underlying the law of war. Military necessity does not permit us to derogate from these imperatives. However, the principle of military necessity recognizes that under certain battlefield conditions it is infeasible to render certain benefits to detained individuals. For example, at the point of capture while still engaged in an uncertain situation it may be impossible for a temporary period to make provisions for the exercise of religious beliefs by detained persons. Once a detainee is processed into a controlled detention facility; such provisions are made readily available to detained persons.

Finally, I will ensure our Soldiers continue to provide custody with dignity and respect for every detainee with a dedication to modeling and maintaining world class standards.

Very respectfully,

STANLEY A. MCCHRISTAL
Lieutenant General, USA
Director, Joint Staff

Copy to: Senator John McCain

Chairman LEVIN. Now, relative to the events that occurred, I want to just clarify your understanding and your awareness and knowledge of what occurred when you were the commander of special operations. How many special-mission unit task forces were there when you were the commander?

General MCCHRISTAL. Sir, they were multiple. We had a task force at Afghanistan, which then had subordinate task forces, and sometimes it was as few as two, sometimes it was as many as four. In Iraq, similarly, we had a major task force, then later went to

two major task forces, and each of those had subordinate task forces.

Chairman LEVIN. All right.

General MCCHRYSTAL. I couldn't give you, off the top of my head, but it was—at times it was as many as 8 to 10 task forces, all under my command.

Chairman LEVIN. All right. Now, you were the commander of special operations, is that correct?

General MCCHRYSTAL. Sir, I was commander of part of special operations. There were theater special operations, as well.

Chairman LEVIN. All right. Now, you were not the task force commander?

General MCCHRYSTAL. Sir, I was the Joint Task Force Commander for Task Force 714.

Chairman LEVIN. But, in terms of those special-mission unit task forces, you were not the commander of those task forces?

General MCCHRYSTAL. Sir—

Chairman LEVIN. You were not a commander of one of those task forces?

General MCCHRYSTAL. Sir, those task forces made up my joint task force.

Chairman LEVIN. Did each of those task forces, those special-mission unit task forces, have a commander?

General MCCHRYSTAL. Yes, sir.

Chairman LEVIN. All right. Now, what was your understanding, your awareness of the treatment of detainees when you were the overall commander? The Inspector General of the Department of Defense (DOD) indicated that a memorandum of the Secretary of Defense which was approved on December 2, 2002—and that memorandum, relative to the interrogation of detainees, authorized the use of things like stress positions, sleep deprivation, and the use of dogs. The report of this committee showed how that memorandum of December 2, 2002, then went to, first, Afghanistan and then was transmitted verbatim to Iraq. In terms of the treatment of detainees—when you got there, tell us what you were aware of, what you did, relative to that subject.

General MCCHRYSTAL. Yes, Mr. Chairman.

I took over in October 2003, and I'd like to sort of start with three things, to begin with. First, I do not, and never have, condoned mistreatment of detainees, and never will. When we found cases where we thought there was an allegation of mistreatment, we investigated every one, and we punished, if, in fact, it was substantiated, and that was from the beginning.

That said, when I took command, I found the detainee facilities really insufficient for need. They were physically not prepared for that. We didn't have the right number of interrogators. We didn't have the right experience in the force, either. None of us had ever done this with the level of precision that we needed to, so we learned.

We stayed within all of the established and authorized guidelines. They were in them when I took command, and then, with each change in guidelines, we did a legal review, and stayed within those all the time. But as I outlined last year when we discussed it, it also was something that I believe continuously improved.

Each month, we got better at it, for lots of reasons. One, our experience got better. Two, the procedures got, just, constantly looked at and so that they were improved. So, I think the constant improvement is the thing that took us from what I think was acceptable and legal to something that I became much more proud of over time, in terms of the quality of the operation.

Chairman LEVIN. When you say “acceptable and legal,” you mean that they were within the guidelines established by the Secretary of Defense.

General MCCHRYSTAL. Sir, they were within legally prescribed guidelines, that’s right, the policy we were given.

Chairman LEVIN. The policy that you were given that you understood at that time was legal.

General MCCHRYSTAL. Yes, sir, that’s right.

Chairman LEVIN. That policy included, at that time, under that December 2, 2002, memorandum of the Secretary of Defense—that policy included the aggressive acts that I described: stress positions, the use of dogs, and nudity. Is that correct?

General MCCHRYSTAL. Sir, it did. We did not use all of the things that were outlined there.

Chairman LEVIN. Were some of them used?

General MCCHRYSTAL. Some of them were used when I took over, sir, and then, we immediately began to reduce that.

Chairman LEVIN. You immediately began what?

General MCCHRYSTAL. To reduce those, sir.

Chairman LEVIN. Okay.

Senator McCain.

Senator MCCAIN. Go ahead if you want to—

Chairman LEVIN. No, I think that—

Well, I just want to make sure, when you say that you “improved” you meant that even though some of the actions relative to detainees, the aggressive interrogation techniques, had been approved by the Secretary of Defense in a memorandum, which you understood had been legally authorized, that, when you say you “improved them,” you reduced the number of techniques which were utilized, even though they had been authorized, is that correct?

General MCCHRYSTAL. That’s correct, Mr. Chairman.

Chairman LEVIN. All right. Now, were you uncomfortable with some of the techniques that you saw there?

General MCCHRYSTAL. When I took over, I was, Mr. Chairman.

Chairman LEVIN. All right. The direction of reduction of the use of those techniques, even though they had been authorized by the Secretary, nonetheless was something that you felt was appropriate and necessary?

General MCCHRYSTAL. That’s correct, Mr. Chairman.

Chairman LEVIN. All right. Thank you.

Senator McCain.

Senator MCCAIN. Thank you, Mr. Chairman.

I thank the witnesses for their excellent opening statements.

General McChrystal, General McKiernan reportedly had a request pending for the deployment of an additional 10,000 U.S. troops to Afghanistan in 2010. Do you expect to renew this request, alter it, or rescind it?

General MCCHRYSTAL. Sir, I believe I'll have to make an assessment on the ground, and can't tell you right now whether I would do that.

Senator MCCAIN. What is your initial assessment? Do we need the additional 10,000?

General MCCHRYSTAL. Sir, I'm just not sure, at this point.

Senator MCCAIN. How long do you expect the counterinsurgency effort in Afghanistan to last?

General MCCHRYSTAL. Sir, I can't put a hard date on it. I believe that counterinsurgency takes time. I believe that we need to start making progress within about the next 19 to 24 months to know—

Senator MCCAIN. But, you do comment, in your statement, that you believe that casualties will go up in the short term.

General MCCHRYSTAL. Sir, I do.

Senator MCCAIN. I think that's an important message that Members of Congress and the American people understand.

Roughly how many detainees are in prison in Bagram today? Roughly.

General MCCHRYSTAL. Sir, I believe it's about 600, but I—

Senator MCCAIN. Not all are from Afghanistan? Some are other foreign nationals?

General MCCHRYSTAL. I don't know the detailed breakdown right now, sir.

Senator MCCAIN. Do you expect that, as we saw in Iraq, fighters from other countries will be on the battlefield in Afghanistan?

General MCCHRYSTAL. I do, Senator.

Senator MCCAIN. We will probably be capturing some of those?

General MCCHRYSTAL. I do, Senator.

Senator MCCAIN. Then our problem with what to do with detainees from other countries will continue.

General MCCHRYSTAL. I believe that it will.

Senator MCCAIN. The death by friendly fire of Corporal Tillman was a great tragedy, as we all know, and the pain and the loss of this American hero to his family was compounded by the misinformation that quickly spread about the circumstances of his death, some of which were included in the recommended citation for the award of the Silver Star Medal that was forwarded by his commanding officer through you, as the commanding general of the Joint Special Operations Command, and approved by you on April 28, 2004. Can you describe what happened in April with respect to the information regarding the circumstances of Corporal Tillman's death, and why you forwarded the Silver Star recommendation in the form that it was in?

General MCCHRYSTAL. Senator, I can. I appreciate the opportunity to do that.

Corporal Tillman was killed on April 22, and in the days following, as with the loss of any soldier, a number of things happened, administrative and just practical things that occurred. I particularly took part in two things. I arrived back into Afghanistan from a meeting in Qatar with General John Abizaid on about the 23rd, and I was informed, at that point, that they suspected that friendly fire might have been the cause of death, and they had initiated what we call a 15-6, or an investigation of that. We ini-

tially were waiting for the outcome of that initial review before we went forward with any conclusions. It was a well-intended intent to get some level of truth before we went up.

At the same time, we looked at his potential award for valor. Any lost soldier, they immediately look and determine whether an award was appropriate. In the case of Corporal Tillman, a Silver Star was recommended. I sat down with the people who recommended it. That was higher than some had been given, and we went over a whiteboard, and we looked at the geometry of the battlefield, and I queried the people to satisfy myself that, in fact, that his actions warranted that, even though there was a potential that the actual circumstance of death had been friendly fire.

I need to stress, here, we've had a number of famous people in American history killed by friendly fire—Stonewall Jackson, Leslie McNair, and the like—and I don't separate or I don't believe that the circumstance of his death detracts from his courage, commitment, or contribution.

So, I was comfortable recommending, once I believed that the people in the fight were convinced it warranted a Silver Star, and I was too, with forwarding that.

I also sent a message informing my chain of command that we believed it was fratricide, and we did that when we were told there were going to be fairly high-profile memorial services.

Now, what happens, in retrospect, is—and I would do this differently if I had the chance again—in retrospect, they look contradictory, because we sent a Silver Star that was not well written. Although I went through the process, I will tell you now I didn't review the citation well enough to capture or, catch that, if you read it, you can imply that it was not friendly fire. Also, when I sent the message, the intent entirely was to inform everybody up my chain of command so that nobody would be surprised.

If I had it to do all over again—and we subsequently changed Army policy after this, because the intent on awards at that time was to do an award rapidly so that it could be presented to the family at the memorial service for their comfort. What we have learned since is, it is better to take your time, make sure you get everything right with the award, and not rush it.

I say that, in the two things which I believe were entirely well intentioned on my part and, in my view, everyone forward that I saw was trying to do the right thing. It still produced confusion at a tragic time. I'm very sorry for that because I understand that the outcome produced a perception that I don't believe was at all intended, at least in the forces that were forward.

Senator MCCAIN. Do you believe that Corporal Tillman earned the Silver Star by his actions before he died?

General MCCHRYSTAL. Sir, I absolutely do. I did then, I do now.

Senator MCCAIN. Given your experience in Afghanistan, do you believe that the interrogation techniques that are provided in the Army Field Manual are sufficient to get the information to fight the battle that you need?

General MCCHRYSTAL. Yes, sir, I do.

Senator MCCAIN. Do you believe any additional techniques are necessary?

General MCCHRYSTAL. No, sir.

Senator MCCAIN. I interrupted you. You expect the counterinsurgency in Afghanistan to be dependent, to some degree, on Pakistan; therefore, unpredictable. Are you encouraged by the recent, perhaps temporary, success by the Pakistani Army in Swat and perhaps moving in to Waziristan?

General MCCHRYSTAL. Sir, I am encouraged.

Senator MCCAIN. How do you account for that?

General MCCHRYSTAL. Sir, I believe that, if you looked back several years, what appeared to the people of Pakistan as an American problem of terrorists that were transnational, some of whom happened to be in Pakistan, I believe that they now view it as an internal insurgency. They have an internal insurgency. The actions which they have taken over the last weeks have been resolute in going after that internal insurgency.

Senator MCCAIN. So, the situation isn't as bad as we had feared, but not as good as we hope, regarding the effectiveness or commitment of the Pakistani Government and military.

General MCCHRYSTAL. Sir, I think the situation is very serious, but they know it and are acting on it.

Senator MCCAIN. Aren't you concerned about the overall corruption problem in Afghanistan?

General MCCHRYSTAL. Sir, I am.

Senator MCCAIN. Are you worried that there's still not a joint strategy, or agreed-upon strategy, as far as the eradication or control of the poppy crops?

General MCCHRYSTAL. Sir, I believe that is critical, that we develop one.

Senator MCCAIN. Do you see any coherency in that policy?

General MCCHRYSTAL. Sir, I haven't been forward to look at it closely, but I know we need one.

Senator MCCAIN. As a result of your experience in Iraq, what lessons do you apply to Afghanistan? Briefly, since I think I'm out of time.

General MCCHRYSTAL. Sir, I believe a counterinsurgency campaign, a classic counterinsurgency campaign, well resourced, is going to be required. I think that's all—

Senator MCCAIN. Under very different circumstances.

General MCCHRYSTAL. It's different, sir, but many of the same requirements. We have to get governance, development, and security, or we won't make progress.

Senator MCCAIN. A large geographic area?

General MCCHRYSTAL. Sir, it is more limited than it was at some times in Iraq; it's mostly in the south and the east, but there are some problems in the west and popping up in the north, as well.

Senator MCCAIN. We will experience significant resistance as we move into the south of Afghanistan?

General MCCHRYSTAL. Sir, I believe that we will.

Senator MCCAIN. Am I out of time?

Chairman LEVIN. You are out of time.

Senator MCCAIN. I thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator McCain.

Senator Lieberman.

Senator LIEBERMAN. Thank you, Mr. Chairman.

Thanks, to the three of you for your extraordinary careers of service to our country, and congratulations on these nominations.

I want to focus in on Afghanistan, for most of my questions, and say that, in nominating Admiral Stavridis and General McChrystal to the positions you're going to, it seems to me that the President has put in place here what I would call, not just a strong team, but really an all-star team. With Admiral Stavridis, for EUCOM, General Petraeus in Central Command, you now, General McChrystal, heading our operations, as you've described, in Afghanistan, with General Rodriguez, that, together with the diplomatic nonmilitary effort there with Ambassador Holbrooke, now Ambassador Eikenberry going into Kabul with crew of his own that will feature, I guess, several State Department personnel of ambassadorial rank, we're really concentrating our strength, here, because it's so important to win in Afghanistan. I suppose I want to ask you that, as a first question.

General McChrystal, do you believe this is a winnable war in Afghanistan for ourselves and our Afghan allies?

General MCCHRISTAL. Sir, I believe it is winnable, but I don't think it will be easily winnable.

Senator LIEBERMAN. I think both of those points—very important to hear from you—that is, for Members of Congress and the American people to understand, that it's winnable, but it's not going to be easy; it's probably going to get worse before it gets better.

I know you're a general and not a political leader, but, I think, in these kinds of positions these days, you're going to probably be asked the kinds of questions that we're asked. So, let me ask you, Why do you think it is important that we succeed in Afghanistan?

General MCCHRISTAL. Sir, I think the first and obvious thing is to prevent al Qaeda safe havens as were before September 11. I actually believe that the importance is much wider than that. I believe the regional stability of Afghanistan and Pakistan are linked, and a lack of stability in that area, I think, is going to cause geopolitical problems. Even if there were no al Qaeda, I think it would still be an important region.

Finally, I think our credibility in the world—we have the ability to support the people of Afghanistan and to move in to shape a better future that they want, and I think that that will make a difference in how we are viewed, worldwide.

Senator LIEBERMAN. You made some interesting statements in the question and answers you exchanged with the committee about the linkage between the Taliban and al Qaeda. There have been a lot of people, in recent months, who have been saying that it may be possible to break off the Taliban to cooperate with us. But, you've made some very strong statements here about your skepticism about our ability to do that, to break the Taliban away from al Qaeda, certainly not so long as they think they are winning. I want to ask you to speak a little bit to the Taliban/al Qaeda linkage, as you see it.

General MCCHRISTAL. Yes, sir. I guess, first, I'd say that the al Qaeda linkage is somewhat to the Taliban, but it's also to other organizations there. They have, in fact, been there for many years now. They've intermarried, they've created connections that are beyond just organizational.

Insofar as with the Taliban, they do have a link with the Taliban, and I don't think that the Taliban have any reason, right now, to turn their back on al Qaeda. Therefore, I don't think there's a motivation to do that.

I think what is probably more important is, I don't believe that the Taliban is a single, cohesive organization. They are more a confederation of smaller entities, many of which are absolutely motivated by regional or financial or almost warlordism, so they do not have a large coherent structure, to the level it sometimes can look on a map or on an organizational chart. I think it might be easier to fragment the Taliban and separate the hardcore Taliban from the hardcore al Qaeda.

Senator LIEBERMAN. Thank you.

General, it's my understanding that, as of today, we still don't have the kind of integrated joint civil-military plan for Afghanistan that we have for, and had for some time now, in Iraq. Is that your understanding?

General MCCHRYSTAL. Sir, I know that planning is ongoing to develop that. Karl Eikenberry is an old friend of mine, and I have committed that, if confirmed, that would be something that we absolutely will complete as quickly as possible.

Senator LIEBERMAN. So, it's your statement, here, that you intend to work with Ambassador Eikenberry on a joint civil-military plan for Afghanistan.

General MCCHRYSTAL. Absolutely, sir.

Senator LIEBERMAN. Do you have a goal, a time by which you hope to complete that?

General MCCHRYSTAL. Sir, I hate to be pinned to goals, but I think we need to finish that this summer.

Senator LIEBERMAN. Soon. Okay, good.

Admiral, there's a lot of both appreciation for NATO involvement in Afghanistan, and also a dissatisfaction with how it's working, overall, and particularly those of us who are very committed to NATO, concern that this significant out-of-theater involvement by this great military alliance succeed. Of course, it's hard to run a war with this many nations, particularly if they come into the battlefield with individual caveats. As you assume this command, what are your thoughts about what we can do to improve NATO's involvement, here, in Afghanistan?

Admiral STAVRIDIS. Sir, thank you. First, if I could, I'd add to Stan's excellent list of why Afghanistan matters. The point precisely that you just raised, it matters because of the NATO engagement. How the Alliance performs there will bleed over into the future of the Alliance. I don't think it's a go/no-go for the Alliance, but it's certainly important and critical. In addition to all the excellent points Stan made, I would add that one, as well.

As I look at it—and, of course, I have not had any conversations yet with my military interlocutors in the world of NATO—I was very struck by what Ranking Member McCain said, that we need to think about asking our allies to do what they are willing to do and recognize where there are places they just cannot go. That runs the gamut of things, from money to civil-military actions, along the lines of the plan that General McChrystal and Ambassador Eikenberry are going to put together. It includes the trust

fund that we talked about because, as the Chairman said, the odds are high that we will need more Afghan security forces, at the end of the day. At the end of the day, all security is local. So we'll need funding for that. That's a potential zone of contribution for NATO.

Sir, I think there are many different avenues for me to pursue, if confirmed, and I look forward to those interactions with our allies, working with General McChrystal to hear what he needs, and attempting to facilitate that.

Senator LIEBERMAN. Thank you, Admiral. My time's expiring. I just want to state for the record, on a different matter, you have some very strong statements, in the question and answer with the committee, on the rising ballistic missile threat to Europe, and particularly that posed by Iran. As a consequence, you argue that—and I quote you, “the deployment of ballistic missile defense assets in Europe would make a significant contribution to the protection of the United States and Europe from a Middle-Eastern ballistic missile threat.” You also very strongly said, “We need multi-layered missile defense capabilities stationed and operational in the region before a threat fully emerges to ensure our common European allies' and partners' security.” In this vein, and quite specifically, warn that though the sea-based—basically the Aegis and THAAD Patriot programs are very important, they cannot defeat, and I quote you again, “the entire range of threats by themselves.”

I want to thank you for those statements. I couldn't agree with you more, and I look forward to working with you on those and other matters related to your command.

Thanks, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Lieberman.

Senator Inhofe.

Senator INHOFE. Thank you, Mr. Chairman.

First of all, let me just state—which you're aware of, Mr. Chairman, but our guests may not be—that they always have a Senate Committee on Environment and Public Works meeting at the same time they have this, so that puts me in an awkward situation of having to go back and forth. Let me say, second, I can't think of any three people who are more qualified for the positions for which you're nominated than the three of you, and I am very excited about things to come.

Now, you may have covered this in my absence, but I want to mention, in fact, there was a great editorial in Investors Business Daily called “Iran Grows Bold.” I'll just read a little bit of here and then I want to make it as part of the record—“That's why, knowing we've decided on appeasement as the best course, Iran's Mahmoud Ahmadinejad, on the very day of North Korea's demonstration of a nuclear bomb said that a “freeze” of Iran's own nuclear program was out of the question.” It goes on and talks about some of the individuals from—here it is—“General Vladimir Dvorkin, head of Center for Strategic Nuclear Forces in Moscow, recently said, Iran is actively working on a missile development program, 1 or 2 years away from having a nuclear weapon.”

[The information referred to follows:]

Iran Grows Bold

By INVESTOR'S BUSINESS DAILY | Posted Tuesday, May 26, 2009 4:20 PM PT

Axis Of Evil: The U.S. has given Iran until year-end to clean up its act. Iran's making the most of its opportunity — shooting off missiles, sending ships into the Gulf of Aden and defying efforts to halt its nuclear program.

Read More: [Iran](#)

 [Listen to Audio Version](#) | [Podcast IBD Editorials](#)

As with North Korea, a problem allowed to fester until it set off a Hiroshima-sized nuke, we're now in the process of ignoring a potentially bigger problem as Iran develops its own nuclear weapon. How do such things happen? As they say: All that's required for evil to prevail is for good people to do nothing.

In this case, Iran has routinely made its aims clear — as did North Korea. Iran sees nuclear hegemony in the Mideast as its divine right.

That's why, knowing we've decided on appeasement as the best course, Iran's Mahmoud Ahmadinejad on the very day of North Korea's demonstration of a nuclear bomb said that a "freeze" of Iran's own nuclear program was out of the question.

The U.S., along with Russia, China, France, Germany and Britain, has asked Iran to discuss their differences. As part of President Obama's decision to "engage" with Iran, rather than threaten it, we've gotten a clear response from Iran: No. Diplomatic engagement lets Iran buy time while the world dithers, as with North Korea, and lets Iran's scientists finish their nuclear plans.

Iran already has in its possession workable plans for a bomb. It may only need bomb-grade uranium. Well, guess what? An Israeli report says Venezuela and Bolivia are supplying Iran with just that. This augments what Iran has already acquired by sending teams of engineers and top government officials to North Korea and Pakistan to tap their nuclear know-how.

Emboldened by the rest of the world's inability — or lack of will — to stop it, Iran is now flexing its muscles. Last week, Iranian Adm. Habibollah Sayyari said Iran had test-fired a new surface-to-surface missile with a 1,200-mile range. For the record, it can hit Israel. It can also hit U.S. bases in the region.

Iran isn't stopping there. It's developing missiles that will soon let it directly threaten the easily intimidated governments of the European Union, and all of the Middle East.

This week, it sent six warships into the Gulf of Aden, supposedly as an anti-pirate move. But sending ships to the Gulf, through which 7% of the world's oil is shipped, might also be a threat to oil producers in the region who are now at odds with Iran: Mess with us, and we cut off your oil.

We continue to pretend that Iran's intimidation of Europe and the rest of the Middle East would disappear if only Israel would agree to a Palestinian state on its border. On Sunday, a five-member U.S. congressional delegation in Israel bluntly said it was "skeptical" that Israeli leader Benjamin Netanyahu would be able to make peace.

But how can peace be made under a perpetual threat of annihilation? Iran has made it clear, repeatedly, that once it gets

the means, it will have the will to destroy Israel. The lack of a Palestinian state will only be a pretense — one the world will eagerly swallow.

Netanyahu seems to understand this all too well. Addressing Iran's growing nuclear threat, he said Sunday: "My job is first and foremost to ensure the future of the state of Israel . . . Who will eliminate it (the danger of Iranian nuclear weapons)? It is us or no one."

Two months ago, as the Obama administration contemplated dropping its missile shield for Europe, the U.S. got a warning. "Iran is actively working on a missile development program," said Maj. Gen. Vladimir Dvorkin, head of the Center for Strategic Nuclear Forces in Moscow, adding that Iran is "one or two years" away from having a nuclear weapon.

Yes, we've heard such warnings before — about North Korea, a country far less wealthy and technically sophisticated than Iran. Sitting on our hands and pursuing "diplomatic engagement" didn't work too well with them. It won't work any better with Iran.

Senator INHOFE. I'm getting mixed signals here, because we're all very familiar with the capabilities that we need to protect western Europe, and maybe even the United States, from a missile coming from Iran, and it's necessary to have the radar in the Czech Republic, as well as the Poland opportunities. While they're for it, and they're ready to do it, and the Polish Parliament is even saying that they are hoping that "We don't regret our trust in the United States." I'd just like to have one of you respond to what is confusing to me, and that is why it is that we now have Russia saying that they don't want to participate in this, or they don't want to approve this until and unless they have certain conditions met on the Strategic Arms Reduction Treaty, and yet they turn around and say that, yes, it is necessary to have this. Where do you think Russia is, and how important do you think—let's start with you, Admiral Stavridis—to have that European site?

Admiral STAVRIDIS. Yes, sir, I think I'm probably the right one to answer the question, given that Russia is part of the EUCOM area of focus.

Sir, as you fully appreciate, and the Chairman alluded to this in his opening statement, any of these decisions really are a matrix of diplomatic and political activity that goes well beyond the purview of a military commander. My own view, at this point, looking at it from a distance and before I have an opportunity, if confirmed, to go and interact with the—

Senator INHOFE. Forget about the politics, just the importance of the European site, from a military perspective.

Admiral STAVRIDIS. From what I can see, at this point, I'd agree with the President's comments that he made at the NATO summit, which are that, as long as the Iranian threat persists, the system is effective, that the likelihood of proceeding forward is important.

Senator INHOFE. I would say it looks like the Iranian threat will persist. While I'm asking you a question, this is kind of off the wall—I've fought and lost the 3-year battle of Vieques a few years ago. I felt, at that time, that was the best integrated training opportunity that we had. We've been using it since 1941, we lost it, for political reasons, both Democrats and Republicans, because President Bush was in on this decision. Now the things that I said were going to happen, the adverse things, in terms of Roosevelt Roads and adversely affecting Puerto Rico, I'm getting people com-

ing back to me, saying, “Any possibility of reopening Vieques as a site?” Any thoughts on that?

Admiral STAVRIDIS. Sir, that would, of course, fall under the purview of my good friend, Chief of Naval Operations, Admiral Gary Roughead. I’ll take that message back to Admiral Roughead and ask him to interact with you.

Senator INHOFE. Do you think the quality of training today is as good as it was when we had that integrated training at Vieques?

Admiral STAVRIDIS. Sir, I don’t know the answer to that question. I have not operated—

Senator INHOFE. Okay, but maybe for the record we could do that.

[The information referred to follows:]

From my perspective as a combatant commander, the Navy has been providing me with highly trained personnel and units who have accomplished so much in the Southern Command area of focus. The Navy has made a huge and significant impact through exercises such as Unitas and Panamax, as well as Operation Continuing Promise and real world disaster relief efforts. So, as a user I am very satisfied with the training the Navy is providing its sailors under their mobile training concept, which was created following the closing of the Atlantic Fleet Weapons Training Facility in Vieques to meet the training needs of the Navy.

Senator INHOFE. General McChrystal, you and I talked about this, and I appreciate all of you visiting with me and giving me the time that you have. I know you’ve been very busy. The Nebraska—I don’t see the Senator from Nebraska here—National Guard has been in Afghanistan on these agricultural programs, and then the Oklahoma Guard is going up to carry them on. Would you give a very brief assessment as to what successes or failures they’re having up there on that?

General MCCRYSTAL. Sir, my information, as we discussed, is secondhand, but all I’ve gotten is very positive, and I do know that the importance of the agricultural part of the development program is key. On the basis of what I know right now, it’s very positive.

Senator INHOFE. Good, I’m glad to hear that. I’ve heard that from a lot of the commanders in the field, and others.

Let me get my three or four programs that are my favorites, just, for yes-or-no answers from the three of you. It would be on train-and-equip, sections 1206, 1207, and 1208, as it refers to Special Forces, the International Military Education and Training (IMET) program, the CERP program, and the Combat Commander Initiative Fund programs. I think those four programs are among the most significant programs that we have going for us right now. Do you agree?

General FRASER?

General FRASER. Yes, sir, I do agree, they’re very important programs.

Senator INHOFE. Admiral?

Admiral STAVRIDIS. Yes, sir. Based on 3 years at SOUTHCOM, they approach indispensable.

Senator INHOFE. Good.

General MCCRYSTAL. Yes, sir, I concur.

Senator INHOFE. All right. Well, what I’d like to have you do—and this would be for the record—Admiral, if you could respond. I have been told, over there, that, by spending no more money, but by handling the cashflow in the IMET program, that we would—

and maybe having a multiyear program—it would not be scored, and it would be immensely more beneficial to us for those partnerships with the other countries. If you could kind of answer that for the record, I'd appreciate it.

Admiral STAVRIDIS. Aye-aye, sir.

[The information referred to follows:]

The International Military Education and Training (IMET) program is one of the best and most cost-effective engagement tools for forging longlasting, military-to-military relationships with the current and future leaders of our hemisphere's security institutions. The funding flow for IMET is complex, with multiple government agencies participating in the budget planning process, and requiring a 3-year planning process. The complicated and time intensive planning process results in allocation occurring in the second half of the programmatic year. Because IMET is currently 1-year funding, this leaves little time for execution of funds before the end of the programmatic fiscal year. This would be a tight timeline for any program. However, IMET presents additional complications. Execution of the IMET program necessitates enrollment in the military institutions to which we bring our partner militaries. By the time we receive the budget allocations, enrollment in these institutions is sometimes full or closed, presenting additional challenges to execution of the program. For all of these reasons, it would be very useful if this was multi-year funding.

Senator INHOFE. All right. AFRICOM, I know this is not directly involved with what you would be doing in your case—I've been concerned that they're not getting their resources. I was one of them who, when the continent was divided into three different commands, said that it would make much more sense to have AFRICOM, and that's what's happening today, although it appears to me that they're not getting the resources. I'm talking about airlift resources and others. Do you think they are? If not, would you try to improve that?

Admiral STAVRIDIS. Sir, I don't have the answer to the question. I'll ask General Ward, who's a colleague and good friend. I would support the adequate resourcing of Africa Command. I agree it's important for unity of effort in that continent.

[The information referred to follows:]

In speaking to Africa Command, I understand that airlift is certainly a challenge, and some help may be coming. However, generally speaking, they are satisfied that they can conduct their missions within their resourcing.

Senator INHOFE. Okay, good.

Lastly, I'm getting it all in here—the concern that I have had for the aging fleet of everything that we're having right now—of course, the average of over 18 years old, the Navy aircraft averages 18 years; Marine Corps, over 21 years; refueling tankers, over 44 years. I'd like to ask each one of you what the impact on operating and maintaining 20- to 40-plus-year-old equipment has on combat readiness and if you have any thoughts about what we can do on this, the aging aircraft fleet.

Tinker Air Force Base, being in my State of Oklahoma, they're doing a great job on the KC-135s, but you know how old they are. If we are successful today and make a determination as to what kind of a tanker we would have, we would still be using them for another 30 years.

Let's start with you, General. Does that keep you up at night, concern about the aging equipment that we have?

General FRASER. Sir, it is a concern, and we need to keep our focus on it. I've really been on the outside as the Services have

really deliberated on this—as I look at my position currently, as the Deputy Commander, Pacific Command, we have the resources we need to do the job; it's one of those things we need to make sure we continue to focus on and enable us in the future.

Senator INHOFE. Admiral?

Admiral STAVRIDIS. I agree, sir.

Senator INHOFE. All right.

General McChrystal, I might go a little further, when I see your green uniform there, the Future Combat System is one of the first things—transformations in 50 years that we've had on the ground, and I know that it's very controversial. Many of these decisions are political decisions. But, I would still say that we're using some of the really outdated stuff. The Paladin was World War II technology. Recognizing the Paladin/FAASV Integrated Management (PIM) program is going to at least go forward to improve the Paladin, it's undergone two or three of these renovations already in the last 30 or 40 years. What do you think about the Army's aging equipment?

General MCCHRISTAL. Sir, my expertise on much of the equipment is pretty thin, but I would say that I think tough decisions were made in the Secretary's budget recommendations for this year, particularly moving toward some of the irregular warfare. I think they've had to make tough tradeoffs. There are none that I've seen I didn't agree with—

Senator INHOFE. Yes. Well, I know that's not in your purview, but it's still you; you're Army.

Thank you very much.

Admiral STAVRIDIS. Sir, I just add, the Quadrennial Defense Review that Secretary Gates is doing now is looking very specifically at that issue, as well.

Senator INHOFE. Very good, thank you, Admiral.

Chairman LEVIN. Thank you, Senator Inhofe.

Senator Reed.

Senator REED. Thank you very much, Mr. Chairman.

Gentlemen, thank you for your service to the Nation, and the service of your families.

Admiral Stavridis, Senator Lieberman raised the question of the long-term NATO commitment to this effort. The NATO heads of states agreed to create these training missions and operational liaison and mentoring teams. They still haven't filled them.

Is that going to be a deficit that will continue forward, or are you confident they can fill that and continue for a long period of time?

Admiral STAVRIDIS. Sir, the Operational Mentoring and Liaison Teams (OMLTs) are in shortfall right now. There are 52 fielded; we need 64. The really bad news is, looking ahead, we're positioned to have 71, and need as many as 90-plus.

[The information referred to follows:]

During my testimony on June 2, 2009, I misspoke concerning the number of Operational Mentoring and Liaison Teams (OMLTs) in Afghanistan. I would like to take this opportunity to correct the record.

There are currently 54 OMLTs fielded; we need 66. I originally said there were 52 fielded and we needed 64. We are positioned to have 70 OMLTs, while I originally said we are positioned to have 71.

Thank you for the opportunity to correct the record.

Admiral STAVRIDIS. Sir, you've identified, I think, a crucial area. It's at the top of my priority list, if confirmed, to put an argument forward to our allies that this is the kind of thing they could perform very well in. The same discussion we were having earlier about, "Where are the comparative advantages?" these small teams could have tremendous effect and would be threaded into General McChrystal's civil-military campaign plan as a very central feature, because, at the end of the day, again, security is local; you have to train up these Afghans. That's what these so-called OMLTs would be very good at. Top of my list, sir.

Senator REED. Let me ask you another question, Admiral. With the exception of the British, who have combat brigades in-country—and, frankly, I think French commandos and a few other national units—what's the ability to generate brigade-sized forces comparable to an American brigade?

Admiral STAVRIDIS. Sir, it's limited. I think that, again, this is why we need to work with the allies to find the sizing of units that they could put in the field. The Canadians do terrific work, down south. They have, actually, the highest per-capita casualty rate; higher than our own in the United States, for example. The Dutch are doing terrific work. The French are doing terrific work, and so forth and so on. Of course, the British.

We need to find the right sizing units, and that's something that I'll be looking very much for General McChrystal's expertise, and also talking to General Petraeus, who has excellent experience at this type of coalition structuring on the Iraq side. I think, between the three of us, we need to find ways to generate combat effect if we can't have big standing combat formations.

Senator REED. Thank you.

General McChrystal, the command structure now with General Rodriguez, how do you propose to utilize General Rodriguez?

General MCCHRISTAL. Sir, General Rodriguez has extraordinary operational experience, which most of you are aware of, both in Afghanistan and Iraq. I think that in almost any role, he's going to be value added.

What I would like to aspire to is that he would be in operational command of the regional commands, the five regional commands. That would allow me to look at the strategic level and the interface, and he would do the maneuvering. That requires NATO to agree to that. That is not yet done, so I don't want to get ahead of reality. But, that would be my aspiration.

Senator REED. There's another aspect to the questions that Admiral Stavridis and I have, and that is shifting away from a geographical base of operations to functional. That is, if NATO takes the training mission, if NATO takes logistical missions, then the geography of the fight could be up to those combat units. They're not all exclusively American, but mostly American. Is that a thought you're giving?

General MCCHRISTAL. Sir, I just looked at that. I haven't studied it. It seems to make a lot of sense to me.

Senator REED. Okay. There is another aspect, too, here, which is very sensitive; that is, the civilian casualties. Like so many of my colleagues, I've been out there recently, and that is an issue that has a great political effect, manipulated for self-interested purposes

by all sides. How are you going to ramp up the battle as you intend to, particularly in the south, and then also minimize collateral civilian casualties?

General MCCHRYSTAL. Sir, I believe the perception caused by civilian casualties is one of the most dangerous things we face in Afghanistan, particularly with the Afghan people; the Pashtun, most likely. I think that we have to recognize that that is a way to lose their faith and lose their support, and that would be strategically decisive against us.

So, my intent, if confirmed, is to review all of our existing rules of engagement, review all of our tactical directives, get with all of our forces, with the goal of not putting ourselves in a position, except when we have to protect American or coalition or Afghan forces, actual survival, from positions where we create civilian casualties.

Now, I'm free to say, with the chaos of war, it's difficult to say "always" or "ever." But, certainly I think it has to be viewed as a critical requirement for us.

Senator REED. One of the aspects of your mission, not only to attack and disrupt the Taliban and the other elements there, but to minimize casualty, is the use of technology, like unmanned aerial vehicles. Do you think you have enough of those? Do you need more?

General MCCHRYSTAL. Sir, I have a history of saying, "I've never had enough," and I can't ever envision a day when I'd say that an operation I'm involved in has enough ISR. That said, there has been significant increase in Afghanistan this year, and by the end of this year it's going to be significantly more. But, every time you get more ISR, you get more precision. Every time you get more precision, then what you can do is, you can reduce civilian casualties, you can also reduce impact on civilian population. If you are going to an individual, and the operation goes after a single house or a single compound, and you don't affect the whole village, you don't have a negative impact on everyone else. So, while ISR is not a panacea for everything, the more you have, the smarter you are as a force, and the more precise you can be. I'm just a huge believer. Everything we can do to continue to increase that will be of value to us.

Senator REED. Thank you.

General Fraser, you have an area of the world which is very close to us. One of the lessons I think we've learned worldwide is that governmental capacity is such a critical element of stability. I wonder if you will undertake an assessment of the governmental capacity of the countries in your areas of operations as a leading-edge indicator of where problems might exist.

General FRASER. Senator, thank you for that question. As I understand it and as I've studied what SOUTHCOM is already doing, I think they already have a very robust program that looks to do that, a very interagency, very cooperative program. The issues we deal with in that region, I think, reflect that. It's a whole-of-government approach, it's an interagency approach, it's an international approach. So, yes, sir, if confirmed, I'll continue efforts along that line.

Senator REED. Thank you.

Thank you, gentlemen.

Chairman LEVIN. Thank you, Senator Reed.

Senator Thune is next.

Senator THUNE. Thank you, Mr. Chairman.

Let me echo what's already been said. You all are extremely qualified. I can't think of individuals who are better equipped to serve in the posts for which you're here this morning. I want to thank you for that service, and also add my appreciation to your families for the sacrifice that they make each and every day so that you can continue to serve our country with such distinction.

I also want to associate myself with the remarks that were made by Senator Lieberman earlier, and also Senator Inhofe, with regard to the third site in Europe and the danger imposed by the Iranian threat. Admiral Stavridis, you have made some fairly strong comments in that regard, and I also want to express my support for that view. I think it's just really important that we continue to pursue that undertaking.

General McChrystal, if I might—the core goal of the new AfPak strategy is to destroy the extremists and their safe havens within both Pakistan and Afghanistan, and you would imply from that, I think, that it's not necessary to form a coalition government or a reconciliation of political elements in Afghanistan, as General Petraeus did in Iraq. It seems, rather, that the goal requires only that an agreement be reached with the Taliban to block al Qaeda operations in Afghanistan.

My question is, is it acceptable, in your opinion, to have the Taliban once again in charge of Afghanistan if they agree to deny al Qaeda safe haven in Afghanistan?

General MCCHRISTAL. Senator, I find it very unlikely that the Taliban would make a credible agreement to do that. So, I would have a difficult time even speculating.

That said, I think that the President's intent, and my belief, is that we need to create in Afghanistan a state that would not allow the return of safe havens. In my view, I think that means it's going to have to be a government that may be a working coalition that may have some former Taliban. But, right now, based upon Taliban statements, I can't see them being a credible official part of the government.

Senator THUNE. The Washington Post report, on April 29, that Pakistan's inability to slow Taliban advances has forced the administration to shift its Afghan-Pakistan strategy from a step-by-step process of greater engagement with Pakistan to a more accelerated approach. I'd be interested in knowing what that shift in strategy will do, in terms of affecting your job in Afghanistan.

General MCCHRISTAL. Sir, I actually think it's positive. I think the degree to which Pakistan shows the resolve which they have shown lately, and their willingness to go after what they view as an important internal problem and let us partner and help them in any way possible, I think that's positive. If we can, in good faith, do that, I think we continue to build a strategic partnership that I think is important for the long haul.

Senator THUNE. I'd like to get at one other issue—and, again, I'd address this to General McChrystal—dealing with the issue of corruption in Afghanistan. There is, of course, a lot being written

about it. According to Sarah Chayes, who operates an economic cooperative in Kandahar and appeared as a witness before the Senate Foreign Relations Committee earlier this year, corruption so widespread that nearly every citizen interaction with the government results in some form of shakedown. Traveling along the roadways requires one to pay a bribe at each police checkpoint. According to Ms. Chayes, "To pay your electricity bill, you have to go to eight different desks in two different buildings, and you have to pay bribes in order to have the privilege of paying your electricity bill."

This sort of unchecked dishonest form of governance, I think, really is obstructing our progress in Afghanistan. As she has noted, people, in some cases, prefer probably to live under the Taliban because of the excruciating difficulty that they encounter with the corruption in the government. In fact, I think that's what brought the Taliban to power back in 1994.

My question is—if we don't work to clean up the corruption in the Afghan Government, we may not be able to win this war, and the question is, what, if confirmed, can you do, in terms of taking steps that would implement our new strategy there, that would lead to more honest government and end some of this corruption that is really plaguing the government and our ability, I think, to be successful there?

General MCCHRYSTAL. Sir, I concur with what both Sarah told you and also what you've stated, in terms of corruption. I think it has a corrosive effect that undermines the legitimacy of any government, particularly Afghanistan right now, where it is a real problem, and it is perceived by the people to be a real problem. I think we need to help them at every level, partnering with them to try to work out corruption. I don't think there is a way we can suddenly take a society that, after 30 years of war, has developed some bad habits, and wring it out suddenly. But, I do think constant pressure on it, at the ministerial level—and I would look to partner with Ambassador Eikenberry and his team to try to provide people at each level to work, and then, out more locally, things like Provincial Reconstruction Teams (PRTs) and our forces to put pressure on it to try to reduce it. I think it's one of the things that must be reduced for the government to be legitimate, and therefore, for the people to trust it.

Senator THUNE. Do you see us having any kind of success there, long term, absent a functioning—and "clean" is probably too much of a word to use, but at least a capable, accountable, and at least effective government in that country?

General MCCHRYSTAL. No, sir. It may not look exactly like a structure of our Government, but it has to be functioning, it has to be perceived by the people as legitimate.

Senator THUNE. Okay.

I want to come back to one other question, I think, that was asked earlier by Senator Reed, and it has to do with the issue of the command structure there, and how that sometimes has hampered our efforts, as well. Critics often point out that part of the problem in Afghanistan is the lack of unified effort among our allies, and that we managed to cripple our effort, because there's not broad coordination or vision, and that there's confusion about strat-

egy and tactics and operations and those sorts of things. You've touched on this already. I would direct this to you, General, and to Admiral Stavridis, as well, about what can be done to establish a more unified effort, especially as we contemplate pouring troops into Afghanistan.

General MCCRYSTAL. Sir, I think the first point I'd make is, it's not as clean and as unified as we might like. On the other hand, the nature of coalition warfare is such that you bring a number of partners together with different values, different goals, different habits, and you get them to work together. At the end of the day, I think you have to judge whether you get more from fighting as a coalition than you give up by not having unity. I think, historically—and I think strongly—we get more out of being a coalition, and it's sort of like democracy, you pay for a certain lack of order, but the benefits are so great.

I think what we have to do is work through it by overcommunicating, just constantly staying wired. There are probably some things we can do, as I mentioned, with the aspiration for General Rodriguez's role that would make us more effective.

Admiral STAVRIDIS. I would agree, and I would add that the command relationships are complicated, but they are not, in any sense, unworkable. I believe that the communication, and indeed, the friendship between myself, General McChrystal, General Petraeus, Ambassador Eikenberry, all of us well known to each other, will be very effective in then turning and working with our allies to try and create a holistic approach, a pallet upon which we can all paint our different pictures, and yet, have it come out as the picture we want.

Senator THUNE. In your efforts with our allies—

Chairman LEVIN. Excuse me for interrupting, Senator Thune. I'm going to run and vote now. A vote has begun. After you, Senator Akaka would be next, and he will then identify whoever else is here.

Thank you. Excuse the interruption.

Senator THUNE. One final point I want to make on that is, in your efforts to—as you strengthen and build some of those relationships with our allies, this issue of caveats is really problematic. If you talk to troops or commanders, it continually comes up, and it really does undermine and hamstring our ability to be effective. I understand there are certain, as you noted, limitations when you're dealing with a coalition effort like this, but I really hope that you all can home in on that and see if perhaps we can provide some relief from some of these, just—the conditions and caveats that some of our allies impose on our ability to get the job done.

Admiral STAVRIDIS. Sir, if I could, we spoke earlier about the importance of these OMLTs, these teams that we're going to try and bring together. That's at the very top of the priority list for me. I would say caveats would be the next. I sat down, in the course of preparing for this hearing, and read every one of the 69 caveats that applied to the various nations involved in this. It is complicated. It's worth mentioning, 18 of the 41 countries are caveat-free, so there are examples, amongst the coalition, of nations, who do not place caveats upon themselves.

So, I think by working with our allies, and, again, as we've talked about, trying to find where the absolute redlines are, but getting close and close and closer to those every day, will reduce the caveats. Again, that's, I think, an area where Stan and I will be working very closely together.

Senator THUNE. Thank you all very much.

Mr. Chairman, thank you.

Senator AKAKA [presiding]. Thank you.

Thank you very much, to our panel, for being here. Welcome and aloha. Congratulations on your nominations, also, thank you to your families. I know families are great supporters of what you do, and I know your outstanding leadership is due to the support of your families. Thank you all for being here.

General Fraser, I would like to thank you very much for your steadfast leadership over the past year in the Pacific Command, under the leadership of Admiral Keating and yourself. The proud men and women of the Pacific Command have met the challenges of a very demanding region, and I want to thank you for your service out there as you move on to SOUTHCOM.

General, SOUTHCOM is critical to our U.S. strategic objectives. If confirmed, what would be your top priorities for that region?

General FRASER. Thank you, Senator. I see two basic issues that we need to work. One is, in my role there, it's the basic defense in defending the southern approaches to the United States. It is, and will remain, a key effort, but that's for the United States.

I think the big thing within the region is an international and interagency approach. The issues that are resident there require us to take that approach. If I'm confirmed, my goal is to continue what Admiral Stavridis has so aptly done, and that is engage with the militaries in the region, engage in the interagency, engage internationally to continue to address the problems in the region, primarily poverty and income distribution.

Senator AKAKA. Thank you, General, for that. I'm glad to also know that you did spend your young life in that area, and for me, being knowledgeable of the culture of these areas makes a difference in the command there.

General McChrystal, according to Secretary Gates, the goal in Iraq is to have a soldier in a medical facility within 1 hour of being wounded. In Afghanistan, the response time has been closer to 2 hours. I applaud the initiative of Secretary Gates, in his defense budget, to improve the medical evacuation capability in Afghanistan. General, what is your current assessment of the medical evacuation issues in Afghanistan?

General MCCHRISTAL. Senator, thank you. You're exactly right, what they refer to sometimes as "the golden hour" is how quickly you can get a casualty to the right level of care, and the medical outcomes affected by that, always to the positive if it's lower.

Sir, we were behind in Afghanistan what we had in Iraq, just not nearly as many assets, plus not as many bases as distance to base. The Secretary directed some changes at the beginning of this calendar year. Many of those forces have already flowed in. Some of the others are still flowing, I believe, as part of the 82nd Combat Aviation Brigade. When all of those are on the ground, and some

of the additional new bases are established, I believe that that time will be down very close to or about what it is in Iraq.

If confirmed, one of the things I would look at closely is to make sure we maintain the ability to get our casualties—and that's all our casualties—coalition, Afghan, United States—to the right level of care quickly.

Senator AKAKA. Thank you.

Admiral, a major focus of EUCOM is building partnerships and its capacity within the region. There are several security cooperation programs dedicated to building relationships. These programs conduct peacekeeping and contingency operations, and help minimize conditions that lead to conflict. What is your assessment of the partner capacity-building efforts of EUCOM?

Admiral STAVRIDIS. Sir, let me begin by saying I'm in complete agreement that this kind of effort, which we in the military sometimes call "phase zero," meaning working very early on in the problem to build partnership capacity, is crucial to the security of our Nation, and indeed to global security.

I have used those programs very effectively. We alluded to them a few moments ago. Sometimes called 1206, 1207, 1208, building partnership capacity funds in SOUTHCOM. If confirmed, I'd like to take that same approach with me to EUCOM.

From what I can see at a distance, not having traveled forward, General Craddock is doing a very good job of using those funds, as well, particularly in Eastern Europe and in the Caucasus, and if confirmed, I would seek to build on his good work.

Senator AKAKA. Thank you.

General McChrystal, DOD has made significant progress caring for our returning warriors that have been diagnosed with mental health issues, but because of the stigma association, many don't seek assistance that is required. We must get the message to our warriors that one of the most courageous acts is reaching out for help.

General, if confirmed, what would you do to continue the efforts to tear down the stigma that deters many from seeking counseling?

General MCCHRISTAL. Sir, I think primarily just talk to leaders. We've had some senior leaders who have very publicly sought help, and I thought that was hugely helpful. I would continue to talk to our leaders and try to convince them that, obviously, they don't have to pretend they need help if they don't need it, but to break down the walls on the stigma of it. It really begins with leadership at every level, all the way down to squad and team leader, to take that away.

Senator AKAKA. Thank you very much.

Senator WICKER.

Senator WICKER. Senator Akaka, I'm on the horns of a dilemma. I understand you haven't voted.

Senator AKAKA. No.

Senator WICKER. Neither have I. I'd have a lot more confidence that they'll hold the vote open if you could get some assurance from the Majority Leader. My questions may be brief, therefore. But, I certainly appreciate the hearing. It's been very educational.

Admiral Stavridis and Lieutenant General McChrystal, both of you said that you believe the Afghan army end strength will have to be higher than they are currently projecting. Is that correct?

Admiral STAVRIDIS. Based on very preliminary and from-a-distant look at everything, but that's my intuition.

Senator WICKER. Okay, so that's your intuition. I guess it's an intuition on the part of General McChrystal, too, because, General, you are not willing to speculate on your predecessor's request for an additional 10,000 American troops. So, square that with us, if you can. What's the estimate, from both of you gentlemen, on how much higher than 134,000 the Afghans might need to go, and how are you able to say that and not give us an estimate on the 10,000?

General MCCHRISTAL. Yes, Senator. When you look at the Afghan requirement, I look at the police and the army together, because together they form the security that the government has. I think that it's about, I think, 80,000 policemen right now, a little bit more than that, approved already, about 82,000 to 84,000 military. You have about 160,000 total. I think we can literally just look at the size of Afghanistan and the size of the population, and you can extrapolate out, even without a significant insurgency, that would be a challengingly small number of security forces to have. With an insurgency, I think you factor it in.

I am reticent to speculate on U.S. forces, because I just want to get on the ground. We haven't even gotten the additional forces the President authorized there yet, so I'd like to see them on the ground, see the impact we're having before I feel comfortable giving that kind of estimate.

Senator WICKER. Okay. You are, all three, going to be involved in counternarcotics. Let me start with you, Admiral Stavridis. Are you proud of the 10-year history of Plan Colombia? Are there fewer drugs coming from Latin America, as a whole, because of this? What advice, based on that, will you have for General McChrystal in the field with the poppies, and for your successor in South America? Are we thinking outside the box enough, in terms of fighting the narcotics? I know we want them to go to alternative crops. Are we thinking outside the box, in terms of addressing the demand for narcotics, which we know will still be there, and thinking of ways to address that question, not only from the supply side, but the demand side?

Admiral STAVRIDIS. Senator, as I have testified on numerous occasions, any counternarcotics effort is composed of three interlocking tasks. One is the demand side, which you just alluded to. One is the supply side, which gets into crop substitution and those kinds of things. One is the interdiction piece, trying to understand the supply chain, reverse engineer it, and kill it. Those three things have to work together.

If I have advice for General McChrystal or advice for General Fraser, it would be to understand that you can't attempt to use precision-guided ideas, if you will, to go after one single part of a counternarcotics problem. You have to have a robust demand side. You have to have an enlightened supply-side approach, which, again, crop substitution, I think, is very central to, but really encompasses the entire realm of development. Finally, you have to have capability in the middle, in the interdiction piece. That's

where I think General Fraser will find great challenge in SOUTHCOM, because the distances are great, and I think General McChrystal will be working very hard on the supply side of this.

At the end of the day, the solutions are international, inter-agency, local security, and, I think, also with an additional component of strategic communications. It's very important to convince people not to use it, on the demand side, as you talked about, and also to convince them to quit growing and producing it, on the supply side. These are immense tasks.

Senator WICKER. Although we've made progress in Colombia.

Admiral STAVRIDIS. We have made progress.

Senator WICKER. Can you address the question about overall drug trafficking from Colombia and the neighboring region?

Admiral STAVRIDIS. There is still an extremely high level of drugs flowing through the region, Senator, as you well know.

To your point about, "Are we thinking out of the box enough?" I think that's an area where we need more creative thinking. To give you an example of the narcotic traffickers' innovative thinking, they're creating semisubmersible submarines to move cocaine from Colombia. This is a real innovation, a difficult challenge. We need to step up and take similar types of approaches on the interdiction side, as well as on the demand-and-supply sides.

Senator WICKER. Thank you, gentlemen.

Senator UDALL [presiding]. Gentlemen, welcome. I want to congratulate all three of you on your nominations. I know you're careful to say "if confirmed," but I'm confident that all three of you will be confirmed.

I'm glad to have a chance to ask some questions today. I'm going to start with General McChrystal. We had talked before the hearing again, and I mentioned, I had a chance to travel to Afghanistan and Pakistan with Senator Hagan, Senator Begich, Senator Shaheen, and Senator Carper last week. It's hard to see a lot in 5 days, but we had back-to-back meetings, and we were in forward operating bases in Kandahar and Helmand. We also visited Lahore, in Islamabad. We did cover a lot of ground. We met with people on the ground who are working tactically to deliver the new strategy. We also had a chance to meet with many of the Afghan and Pakistan leaders, plus key American and NATO leaders, as well.

General, I came up with the sense that the new strategy has a chance to work. No strategy can work if it doesn't have buy-in, but I really had the feeling that this one clearly does. We met State Department personnel who were coordinating the influx of citizens and civilians for the new PRTs to the senior commanders, who talked a lot more about good governance than they did about weaponry or military tactics. All in all, there was just a feeling that we're on the march. In particular, the Pakistani political leaders were evincing real concern about the western regions of their country, not the eastern border with India.

If I might, I'd like to just drill down into this concept of success. It's hard to define. Even a strategy with widespread support could fail. Could you talk about what success might look like in Afghanistan and Pakistan? You said you hope to see progress in 18 to 24 months. What might that look like?

General MCCHRYSTAL. Sir, I think it would have several components. I think, first, it would be a reduction or, hopefully, a complete elimination of al Qaeda inside Pakistan, where they mostly are now, with occasional elements inside Afghanistan. But, it would be essentially reducing their ability to either operate transnationally or to cooperate with elements like the Taliban in either country.

Inside Pakistan, I think it's a return to stability and essentially their victory against their internal insurgency. They do have a functioning government with a strong history, so if they continue with their counterinsurgency campaigns and they get relative stability, then I think it sort of looks like that.

Afghanistan has much further to go, because after 30 years of war, their economic infrastructure is, I believe, fifth poorest in the world. There's just not much to build on physically so they have to start by doing that. I think we achieve a level of security that allows each of the areas, to include those currently challenged by the Taliban, to bring in governance that is maybe locally based, but it is linked to the national government. So, when they think of their governmental chain, they may think locally, and it may be tribal, in a village, but when it goes back up the chain, it is absolutely recognized as going up through the district province and then to the national government. They are not challenged to the point where they have a Taliban shadow government.

I think the other aspect of the Taliban, rather than destroyed—I'll steal a term that came from a bright young officer I worked with, he said, the challenge is to make them irrelevant, push them away from the population, and let them be irrelevant, a percentage of whom will, I believe, stop insurgency, and a percentage of them may not. Then, of course, you can allow actual governance and economic development to go. I don't expect a skyrocketing growth in the country, economically, but steady growth underpinned by solid governance is what I think success looks like.

Senator UDALL. I think, in a sense, you're distinguishing between the big-T Taliban and the little-t taliban. You talked about the hardcore Taliban elements that you believe are irredeemable, but you alluded to those Taliban who join the fight because that's what Afghans do in the spring, join the fight because it's the only way they can provide for their families.

General MCCHRYSTAL. Absolutely, sir. Like Admiral Stavridis, I'm a friend of David Kilcullen's, and I think a lot of what he says about "the accidental guerrilla" is true. I think what we have to do is eliminate the people who do it for other than just absolutely strong ideological reasons.

Senator UDALL. This may be a rhetorical question, but I want to ask it anyway. The al Qaeda situation is a large part of the problem in Afghanistan and Pakistan. But, if we were to capture or kill Osama bin Laden tomorrow, which is a goal we all hold, would the job be done in Afghanistan and Pakistan?

General MCCHRYSTAL. Sir, I don't believe it would. When I think of al Qaeda, I think that you cannot destroy al Qaeda, finally, until Osama bin Laden and Ayman al Zawahiri are gone. But, getting them gone doesn't conversely automatically cause al Qaeda to go away.

Senator UDALL. Yes.

General MCCHRYSTAL. I don't think it does.

Senator UDALL. An editorial comment from me. I know we've focused on Osama bin Laden a lot of the time, but his number-two in command, the Egyptian, I think, is a serious target for us, as well. We'll continue that work, I know. That's a goal we all hold.

We had a changing focus to the ANA and ANP, the Afghan Security Forces, in a meeting with Defense Minister Wardak. He agreed that the new strategy's stated goals of 134,000 ANA troops and 82,000 ANP personnel would not be sufficient. We had some additional conversations about the sustainability of a large Afghan force—how would we pay for it. Do you have any thoughts about that question that we face?

General MCCHRYSTAL. Sir, I agree, as I said earlier, I think a growth in the Afghan Security Forces, army and police, are likely to be required. I'd be surprised if we don't. Resourcing it, I think, is going to be a challenge, and I have not really seen a solid recommendation for that yet.

Senator UDALL. General Fraser, you have similar challenges on the counternarcotics front. Admiral Stavridis has to oversee all of this from his position in Europe. It would seem like there are some common lessons and approaches that we might be able to apply, both in Afghanistan and in the northern reaches of South America. Would you care to comment?

General FRASER. Thank you, Senator. I do think there are great similarities between it, and I think, if confirmed, one of the challenges that I will have, that we'll all have, is communicating between one another. I will endeavor to do that, to make sure that we communicate what's working in one region, how that applies to what would work in another region so that we're crossing the boundaries, we're decreasing the boundaries and enabling one another to use the best practices, wherever they are, to success in our regions.

Admiral STAVRIDIS. If I could add, Senator, it's worth noting that we're in conversations at SOUTHCOM with our Colombian friends about the possibility of Colombian military engagement in Afghanistan. If that comes to fruition, it is a very direct and personal venue to have soldiers who have had experience in both counterinsurgency and counternarcotics transferring some of those lessons learned. I think, also important to note in that context, we talk a lot about NATO's involvement in Afghanistan, there are 28 NATO nations, but 13 other countries that are also involved there. So, moving these lessons are very important.

Senator UDALL. Thank you. I see my time's expired. I would make one final comment—and, General McChrystal, you're well aware of this—that at one point before the last 30-year misadventure that's characterized Afghanistan, it fed much of the region; it has the potential to produce a lot of food. We did hear that, for example, the price of wheat can rival that of poppies. It's not as if we're trying to fight upstream when it comes to the markets there, but we do have to provide an alternative. We have to provide that security and that development opportunity for the farmers, particularly in the south of Afghanistan.

Thank you again.

Chairman LEVIN [presiding]. Thank you, Senator Udall.
Senator Chambliss.

Senator CHAMBLISS. Thank you, Mr. Chairman.

To each of you, having gotten to know all of you over the last many years, thank you for your leadership, thanks for your service, and Americans feel they're fortunate to have men like you in the roles that you are now. To your families, we say thanks.

General McChrystal, I think I've seen you probably in theater more than I've seen you out of theater here in recent years, and I note those bars on your sleeve indicate you've been gone from home a lot more often than you've been at home. To each of you, thank you for that.

Admiral Stavridis, I was in your ethnic home, over the last week, and had the opportunity to observe what's going on in Greece, particularly with regard to what's happening with the migration of folks out of Afghanistan and Pakistan through Turkey, through Greece, sometimes staying in Turkey, sometimes staying in Greece, causing some problems there. But, Turkey obviously is a very strategic country right now. Its European orientation, NATO membership, and enduring relationship make it a bridge of stability between the Euro-Atlantic community and the Nations of Central Asia and the Arabian Gulf. How would you describe our relationship with Turkey today? How has the situation in northern Iraq, with the Kurdistan Workers' Party and the Kongra-Gel, threaten that relationship?

Admiral STAVRIDIS. Thank you, Senator. Probably worth noting that, although I'm ethnically Greek, my grandfather was actually born in Turkey and came through Greece on his way to the United States. I think I have cultural understanding of both of those nations.

Turkey is an incredibly important friend and ally to the United States. I would categorize our relationship at the moment from what I can see before going to theater, if confirmed, and actually meeting with our Turkish military counterparts, it is a strong relationship. We are conducting a great deal of information and intelligence-sharing with our friends. We recognize the threat to Turkey posed by the Kurdish separatist movements. I believe it is both an important and a strong relationship, and one that I intend to focus on, if confirmed.

Senator CHAMBLISS. General McChrystal, Afghanistan obviously is so closely tied with what's going on in Pakistan that it's going to be a very difficult situation for us there. As you and I talked the other day, a military solution in Afghanistan is one thing, but, at the end of the day, it's going to have to require a political solution to ultimately solve the issues there. One of those political issues that we have is what is taking place in Pakistan. How do you see the relationship between what's going on in Pakistan right now having a direct impact on Afghanistan? After your confirmation and being put in place, what are your intentions with respect to Pakistan?

General MCCRYSTAL. Senator, thanks for your question. I view Afghanistan and Pakistan as absolutely linked, but not one and the same. Sometimes people use the term "PakAf" or "AfPak," and I think that may do a disservice to both of those countries, because

both are very unique situations, unique people. I do believe, however, they suffer a very similar problem. In Pakistan, they now have what has become an internal insurgency. It's not strictly Taliban, although it uses that moniker. It's a collection of different groups that have essentially turned inward against the Government of Pakistan. Unless they can bring that insurgency under control and reestablish governance, I think that they will have tremendous problems. But, also it makes Afghanistan very difficult, because it offers a sanctuary, which any guerrilla force or insurgency benefits from, and makes it very difficult to defeat. A friend of mine used to use the analogy, it's like burning leaves in your backyard on a windy day; it just constantly will keep blowing over and causing problems. I think we have to see solution and progress in both countries almost simultaneously—the increase of governance, the reduction of the ability of elements like the Taliban to catch hold.

Senator CHAMBLISS. The 48th Brigade of the Georgia National Guard is back in Afghanistan. Again, you and I discussed this, and I look forward to visiting them and visiting you while they're over there. We continue to call on our Guard and Reserve on a very regular basis. It's no longer a volunteer service on their part, almost; it's a constant service. Not part-time, for sure. We've talked about the seamless integration of the Guard and Reserve. Can you talk for a minute about that? Any issues there that we need to be thinking about that you're prepared to implement that would change what's going on right now?

General MCCHRYSTAL. Sir, I think we've made a lot of progress in the last few years. As you and I discussed, I have a history with the 48th, back to about 1982, very close with that brigade. We do very well in the field. There is just not an issue in the field, and organizations work together. Sometimes we do have to employ organizations in smaller formations than they might like to be, the battalion or brigade level, and that's a challenge. But, it's a challenge, Active and Reserve component. I think it's legitimately looked at by all the commanders.

I think the chairman has done an awful lot. He has General Craig McKinley very integrated now, as the Chief of the National Guard Bureau, in what he does. I sense progress there.

Admiral STAVRIDIS. Senator, could I add something?

Senator CHAMBLISS. Sure.

Admiral STAVRIDIS. The State Partnership Program, which was mentioned earlier, is a Guard and Reserve program that is just of seminal importance, based on my 3 years in SOUTHCOM, and, I think, throughout these regions. It gets to Stan's point about how smaller formations can have tremendous impact, particularly in these counterinsurgency situations. It's a real strength of the Guard and Reserve, sir.

Senator CHAMBLISS. Not unlike what we saw in Iraq, the training of the military and the enlistment of folks into the military in Afghanistan has been on the rise, and it appears that we have some very capable fighters; they've been fighting all their lives, so they certainly know what they're doing. But, on the other side of that coin, the security police is an issue. It has been, in Iraq. I think that still remains our weakest link there. I saw, in my recent

trip to Afghanistan, the same thing in Afghanistan. General McChrystal, what's your direction, there? What's your thought with respect to how we continue, number one, to provide funding? Or, do we look to the Afghans for the funding? As far as the training, what about our partners? Are they stepping up and helping us like we need them to?

General MCCHRISTAL. Sir, first, I absolutely agree with the assessment. I think that the army's come along well, although it has some challenges. The police are lagging a bit. We have not been able to put the level of mentoring or partnering with them out in as many locations, or the training down to as low a level, as will need to be to be effective. We'd like to see more help from our NATO partners. We are now going to do more with the deployment of the 4th of the 82nd, which actually goes, in late August and in September, that will essentially double our ability to do that. But, I think it's overdue. I think that will be progress. It may be all that's required to get them to the level needed.

Senator CHAMBLISS. General, Senator Levin and I serve on the board at the Western Hemisphere Institute for Security Cooperation (WHINSEC), and we've had a good working relationship with the admiral and folks at WHINSEC. We look forward to you being in place and continuing that strong relationship. We're doing good work down there. Again, just thank all of you for your willingness to serve and your great leadership.

Chairman LEVIN. Thank you, Senator Chambliss.

Senator HAGAN.

Senator HAGAN. Thank you, Mr. Chairman.

I just want to once again welcome our men here today and thank you so much for your commitment to our country, to our military, to the men and women serving in the military, and, in particular, to their families, too. Certainly, welcome to all of the family members, your wives, and children. I know it's so important for you to have them here. The ones who aren't here, in spirit, I'm sure they're watching.

But, as I'm sure Senator Udall said, he and I and several others just got back from a trip to Afghanistan and Pakistan, and it was certainly educational for me to be there, but to see the terrain that our military is working on, and obviously the heat, the need for equipment, the need for maintenance is also very important.

It was interesting, as I'm sure you've heard, too, we had an opportunity to meet with President Hamid Karzai and President Asif Ali Zardari, a number of the other ministers, as well as the people in both countries. I certainly enjoyed talking one on one to the troops that I could speak with from North Carolina, and they are certainly proud, serving and what a good job they're doing.

While we were there, it was interesting, too, Karzai, Zardari and Ahmadinejad actually had a joint meeting in Iran during that time, so it was interesting hearing Karzai's and Zardari's aspects on that meeting.

But, in our meeting with President Karzai—and this is to Admiral Stavridis and General McChrystal—in our meeting with President Karzai last week, he emphasized the importance of defining the mission in Afghanistan and to work with Pakistan on the other side of the border. The feeling that al Qaeda's presence in Afghani-

stan has really shifted to Pakistan's Federally Administered Tribal Area (FATA), and specifically in Waziristan, and the fact that they've pretty much moved into the FATA area, but compounding the problem is that the Afghan Taliban High Command dwells in Quetta inside Pakistan's Baluchistan Province. The increased U.S. ground strength in Afghanistan, coupled with the coordination with the Pakistan Army and Frontier Corps, are critical in depriving al Qaeda and the Taliban of safe havens in Pakistan and preventing the cross-border attacks.

My question has to do with keeping in mind Pakistan's sovereignty and reluctance for the United States to conduct operations inside Pakistan's FATA, what type of cross-border coordination strategy can we adopt with the Pakistan Army to deny the Taliban and al Qaeda safe havens there?

General MCCHRYSTAL. Yes, ma'am. I think that the idea that we would conduct operations in Pakistan in any extent is not valid, and nor do I think we would want to. I think the road to success in Pakistan is through the Government of Pakistan and through the Pakistani military and Pakistani police.

It gets to the building-partnership-capacity kinds of activities that we have done with Pakistan, and hopefully will do with increasing effectiveness over the years, or in the years in the future.

I think everything we can do to share intelligence with them, to share, in some cases, ISR assets, that sort of thing, to coordinate operations—there have been a number of coordination centers established—those are still growing in size and in scope. So, I think everything we can do to empower and increase their capacity is really the road we have to go inside Pakistan.

Admiral STAVRIDIS. I agree with General McChrystal completely.

Senator HAGAN. Another comment that we heard quite a bit about was in the Swat Valley, obviously the military operations going on there in Pakistan, and the number of the internally displaced people (IDPs) in Pakistan; it was numbering 2.4 million while we were there. I was just wondering about any of the humanitarian needs and aspects that are taking place right now within Pakistan to help those huge numbers of people. Can you give me an update? Are you aware of any activity going on in helping, from a humanitarian aspect?

General MCCHRYSTAL. Ma'am, in my role as Director of the Joint Staff, we were working to provide, through U.S. Central Command (CENTCOM), whatever the Government of Pakistan requested. It did request some support. Maybe not as much as we expected at the beginning, but they have requested it, and we provided it. I think, again, that's key. I think the number of IDPs, if they hold the government responsible for their plight, obviously offer the chance for greater unrest. I think, right now, the sense is, they hold the Taliban, the insurgents, responsible. But, I think that has to be worked hard by the Pakistani Government, with whatever help the world can give.

Senator HAGAN. In Afghanistan, I met with the Minister of Interior Mohammad Hanif Atmar, and he indicated—it was interesting—that the ANP was undergoing a pilot program to allow females to actually accompany, with members of their families, their fathers or their brothers—to come in as police recruits within the

ANP, in an effort to utilize family dynamics, to control violence, and to sustain order in the urban areas. Security checkpoints in Afghanistan are, in many cases, manned by men, and obviously there have been a number of female suicide bombers recently. What I understand, that the strategy of utilizing the women has been done effectively in Jordan, in performing security functions and countering female suicide bombers.

It was interesting, too, Minister Atmar said that it was within several months that the enemy targeted its first female officer, and she was killed. But, I was just wondering if you were aware of that or what your opinion is on this initiative to recruit the Afghan women.

General MCCHRYSTAL. Ma'am, I was not aware of it, but, on the sound of it, makes absolute sense. When we deal with the cultural realities or sensitivities of any area we're operating in, the ability to adapt and get to the right person—I mean, I would guess that a female police officer could question females much more effectively, certainly, than a foreign soldier could, but probably even better than a male Afghan policeman. So, theoretically, I think it makes absolute sense.

Admiral STAVRIDIS. I would just add, ma'am, that this is an example of a program in which our allies could potentially play a very good role. Many of their police forces have cultural sensitivities that are different than ours and might be adaptable to this region. A good example of the benefits of approaching the coalition in a way that they can participate in comfortable ways for them.

Senator HAGAN. Thank you.

General Fraser, multilateral cooperation on drug interdiction and cashflow and the smuggling of weapons is essential in maintaining stability in the SOUTHCOM region. It's also an area of significant overlap with U.S. Northern Command (NORTHCOM), particularly with regard to the smuggling of drugs, cash, cashflow, weapons across the border in El Paso to the Mexican state near there. To what extent do you foresee working with NORTHCOM on these issues? I know it's such a huge problem right now.

General FRASER. Yes, thank you, Senator.

A lot of the cocaine that flows into the United States flows through Central America into Mexico and then into the United States. SOUTHCOM has already initiated a very close relationship with NORTHCOM. They have liaison officers. They share a joint operating area with Joint Interagency Task Force South. They've had staff-to-staff talks. They continue that dialogue on a routine basis. I know Admiral Stavridis and General Renuart have a close working relationship.

I've had the pleasure of working for General Renuart before, so I anticipate, and, if confirmed, I look forward to, continuing and building on the relationship that Admiral Stavridis has already done.

Senator HAGAN. Thank each and every one of you for your comments, and I look forward to working closely with you.

Chairman LEVIN. Thank you, Senator Hagan.

Senator Graham.

Senator GRAHAM. Thank you, Mr. Chairman.

I, also, want to compliment you on your careers. I think you're excellent choices for the jobs that you're about to take on, and I'm sure you'll be confirmed by the Senate.

General Fraser, along the lines of what the Senator from North Carolina was asking, if you haven't had a chance to evaluate it, that's fine, but could you give me an opinion as to whether or not the fence we're building on the U.S.-Mexican border is helping, in terms of drugs and illegal immigration? Do you have a view of that?

General FRASER. Senator, I don't have a view on that. I have not studied that.

Senator GRAHAM. Could you take a look at it and give me an opinion about that?

General FRASER. Yes, sir. I'll take that and get back to you.

[The information referred to follows:]

Mexico is a part of the U.S. Northern Command (NORTHCOM) Area of Focus (AOF), as such the monitoring of the U.S.-Mexican border and the border fence issue fall under NORTHCOM responsibility. The border fence issue is not a situation directly monitored by U.S. Southern Command (SOUTHCOM). However, because of the shared linkages between Mexico and the SOUTHCOM AOF I am told that SOUTHCOM works closely with NORTHCOM on security in the region. I believe a border fence, while important, is just one aspect of the full spectrum of efforts required to secure the border. The requirement to monitor and enforce the sovereignty of not just the land portion of the border, but all domains that make up the border must be considered. Relying on a fence alone has the potential to simply drive illegal border traffic to other avenues which will in turn lead to border excursions via air, subterranean, and sea routes. It is my opinion that the greatest aid to protecting the sovereignty of the border is ensuring the prevalence and enforcement of law on both sides of the border.

Senator GRAHAM. General McChrystal, as I understand it, as we go forward, it's helpful to look back and see where we're at, a baseline in Afghanistan. Under the NATO operations, the Germans were supposed to train the police. Are they training the police now?

General MCCHRISTAL. Sir, I'm not sure of their current role, but—

Senator GRAHAM. I think they're not. I think the U.S. Army, and particularly the National Guard, are training the police. We had several years lost, where one of our NATO allies who was primarily responsible for police training, and we, quite frankly, went nowhere. Now the U.S. military has taken over that job. The Phoenix Program seems to have a lot of potential, where you put mentors out in different regions to train the police.

The Italians, Admiral, were supposed to be in charge of the judiciary. How well did that work?

Admiral STAVRIDIS. Sir, I don't have the details on it, but I think the current state of the judiciary in Afghanistan needs improvement, as well.

Senator GRAHAM. I can tell you, I think it was a miserable failure and that we now are having to take that job upon ourselves.

Admiral, who was in charge of dealing with the drug eradication program originally?

Admiral STAVRIDIS. I believe the British were, sir.

Senator GRAHAM. I think we've had a different view of how to do it.

The reason I point out these things is not to be overly critical of our allies, but you have the police, which are key to us winning,

have gone nowhere for years; the judiciary, I think, has probably gone backwards; and when it comes to drug eradication, we're having to start all over again. So, both of you have a real challenge, here. We've lost time, money, and effort, and I want people in America to understand that you're taking over a NATO operation that has been less than successful.

Now, Admiral, you said the outcome in Afghanistan is important to the future of NATO, but it's not a go or no-go. In my view, it is, that if NATO fails in Afghanistan, it will never recover. Is that off-base?

Admiral STAVRIDIS. Again, sir, I think it's critically important, and I think we're going to have to succeed, for a whole host of reasons, both national and international.

Senator GRAHAM. I say this because I support what the President's doing. I want the American public to know that this has been a NATO operation all along. That was a positive. It could be a positive, but, quite frankly, when it comes to implementing the war plan, the way to stabilize Afghanistan, we have not gone forward; we've, quite frankly, gone backwards.

If we go to 160,000 Afghan-manned army, General McChrystal, how much will that cost, each year?

General MCCHRISTAL. Sir, I don't have the figures. I can get them.

Senator GRAHAM. Okay. What's the entire budget for Afghanistan, their national government? How much money do they collect?

General MCCHRISTAL. Sir, I don't have that figure right now either.

[The information referred to follows:]

The entire budget for the National Government of Afghanistan (expenditures) in 2008 was \$2.7 billion and the total revenue was \$887.5 million. Afghanistan also had \$1.74 billion which comes from unspent funds from the 2007 budget as well as new financing from various donors, including the Afghanistan Reconstruction Trust Fund, the Law and Order Trust Fund for Afghanistan, the World Bank, and Asian Development Bank. These figures come from the Defense Intelligence Assessment report, Afghanistan: Defense Economic Assessment.

Senator GRAHAM. Well, it's under \$1 billion. So, the American people need to understand that we're about to build 150–160,000-man Afghan army, which I think is the key to getting home, but we're going to wind up paying for it. We're having to pay for our own Army, we're having to carry a lot of burdens in the world. We are the arsenal of democracy. But, Admiral, don't you think it's fair to ask our NATO allies that it's in their self-interest to build a larger Afghan army so we all can come home being safe? They've contributed a whopping \$100 million to this effort, is that correct?

Admiral STAVRIDIS. Yes, sir, I agree with you. Again, I think this is an area where persuasion with the allies is crucial. The trust fund needs at least \$1 billion, and we're at \$100 million—10 percent, so we have a long way to go.

Senator GRAHAM. I may be wrong, but I think the cost of the Afghan Army at that level's going to be \$3 or \$4 billion, at the very minimum. I hope our allies understand that the outcome in Afghanistan is important to them, just as it is to us.

Now, everyone's asked about winning. Tell me the consequence of losing in Afghanistan or Pakistan.

General McChrystal, walk me through. What would happen if America lost in Afghanistan and Pakistan collapsed?

General MCCHRYSAL. Sir, I think, in the near term, and it's speculation to predict the future, but I think that what would happen is, it would break down into civil war. I don't believe that the Taliban would take over Afghanistan. I think it would go back to what it was before 2001, and that would be an ongoing civil war between different factions. I believe that al Qaeda would have the ability to move back into Afghanistan. I cannot imagine why they would not do that. I think that if there was then that kind of safe haven in Afghanistan, with the ongoing problem in Pakistan, I think Pakistan would find winning its insurgency very difficult, if not impossible, because that is—

Senator GRAHAM. Would it probably lead to the collapse of the civilian government in Pakistan?

General MCCHRYSAL. Sir, I think it's very likely. Of course, that's a nuclear-armed state, so you have nuclear weapons under questionable control at that point. Sir, I think, wider, the entire region is affected by that.

Senator GRAHAM. Admiral, do you agree with that assessment?

Admiral STAVRIDIS. I do. I would add, as you just alluded to, at a minimum, the extreme demoralization of the NATO Alliance for having failed. So I'd add that to the list of bad outcomes.

Senator GRAHAM. As Senator McCain and Chairman Levin indicated, the American people need to understand this is going to be difficult, it's going to be more expensive, more lives are going to be lost, but I hope we understand, as a Nation, the consequences of losing. The benefits of winning are real, but the consequences of losing are equally real. That's why I support President Obama's efforts to interject more troops.

Do you feel constrained at all, General McChrystal, to ask for more troops? Is there any political restraint upon you to ask for more troops if you think they're necessary? Do you think you could make that request without any concerns?

General MCCHRYSAL. Sir, I'm not in the job yet, so I'm speculating on that. In a meeting yesterday, Admiral Mullen said if I was confirmed, to ask for what I need, that's almost a direct quote. He looked me in the eye and said that. So, I believe that, if I have a requirement, I can look Admiral Mullen in the eye and tell him, "That's what I need."

Senator GRAHAM. Do you think that's true of the administration, also?

General MCCHRYSAL. Sir, I don't know.

Senator GRAHAM. Don't know. Fair enough.

Detainee policy. Senator Levin brought up an example of where we had gotten off script in Afghanistan. I think, General McChrystal, you've done a lot to put us back on script there. But, Senator McCain mentioned a dynamic that the country needs to get braced for. I think there's almost 700 detainees in Bagram. A percentage, under 100, but close to 100 percent, are foreign fighters that I don't think will ever be sent to the Afghan legal system, because they don't want to try them, and that we're not going to find a third country to repatriate them. Don't you think we need a comprehensive detainee strategy regarding Afghanistan, future detain-

ees who are foreign fighters, as well as what we do with the people in Guantanamo Bay, that it all goes together?

General MCCHRYSAL. Sir, I think we need a comprehensive detainee strategy, not just Afghanistan, but worldwide, for anyone.

Senator GRAHAM. Yes, including Iraq.

General MCCHRYSAL. Absolutely, sir.

Senator GRAHAM. Okay. Thank you all for your service. I look forward to working with you.

Chairman LEVIN. Thank you, Senator Graham.

Senator Webb.

Senator WEBB. Thank you, Mr. Chairman.

I appreciate all three of you individuals coming by my office and visiting with our staff and with me. We've been able to have a lot of good discussions. I regret that we are unable, because of the Senate schedule, to have individual hearings on each of you, although I'm not sure you share that regret. [Laughter.]

I remember when I went for my confirmation hearings, years ago, it was usually one individual in front of the entire committee.

General Fraser, I look forward to working with you in a very energetic way, following on some of the discussions that we had and I also had with Admiral Stavridis before, particularly focusing on the impact of these transnational gang operations emanating from the area that you are going to be responsible for, but back up into American cities. It's a huge problem, and it's one that we are only now beginning to address.

Admiral, I want to make a point for the record here, that I have some real concerns about what has happened to the NATO Alliance, not with respect to Afghanistan, but I guess the only phrase you can really use is international sprawl. If you look at the NATO that I worked with particularly when I was Assistant Secretary of Defense, I spent a lot of time in NATO, doing mobilization issues. It was really a different NATO. We have, on the one hand, I think, become a much more unilateral guarantor among the NATO countries for security issues, and, on the other, we have brought countries into the NATO Alliance, that traditionally could only be called "protectorates." They really don't add, quite frankly, to the security of the United States to have them as members of NATO. We add to their security. All we have to do is take a look at what happened in the situation in Georgia last year and to contemplate what that would have looked like if they had actually been a NATO member, to understand the implications of that. There's not time today to have a full discussion of that, but I want you to know that's on my radar screen, and I will look forward to discussing it with you further.

General McChrystal, first I would like to ask you—you commented that you would agree that our goal, in terms of increasing the ANA, would be higher even than is what is now proposed. Is that correct?

General MCCHRYSAL. Sir, I believe that it would.

Senator WEBB. What would you say—I'm not asking you to pick a number out of the air, but would you agree with Senator Lieberman's approach on this?

General MCCHRYSAL. Sir, I believe we have to look at it. I think some significant growth over what is already approved is probably

going to be required, but I'd like to get on the ground to get a better idea.

Senator WEBB. You and I had something of a discussion about this, but can you tell me the largest national army that the Afghans have ever had?

General MCCHRYSTAL. Sir, I—

Senator WEBB. In size? The numbers that I've see were approximately 80,000 to 90,000, with Soviet backing; and, of those, only a marginal percentage really effective as a valid national army. We are talking about more than doubling what they have been able to do at any time in their past. Are you comfortable that that actually is achievable?

General MCCHRYSTAL. Sir, I know that it would be a challenge, for lots of reasons. Afghanistan has about 34-million-person population, but it also is struggling with about 28-percent literacy. As you develop the leadership core, you have the challenge that you have to teach people.

Senator WEBB. But, also a national army is a component of a viable national government.

General MCCHRYSTAL. Sure.

Senator WEBB. We saw this in Lebanon, when I was a journalist there in the early 1980s, where they attempted to create a national army, but because of the strong factions that had their own militia, it was basically impossible to have a national government that had that sort of reach. Do you think you're going to be able to do that?

General MCCHRYSTAL. Sir, I think it's one of the things that must be done. I believe that one thing the ANA can do, it can be one of the leaders of creating a more national view of the government. Right now, one of the good things about it is, it is viewed as national, not as of a certain sect.

Senator WEBB. Do you have an idea about how these monies are going to be paid to this national army? I don't mean how they are going to be raised, but actually how we're going to transmit these monies in a situation where we all agree there's high-level corruption in the government—I'm speaking principally in terms of transparency, so that we know actually where our money is going?

General MCCHRYSTAL. Sir, I don't, but I absolutely agree with you on the importance.

Senator WEBB. Okay. General, you and I talked about another issue, and I want to address it here. It relates to Corporal Tillman's situation, and his family's situation. I know you would agree, with your background, that the definition of "leadership" goes well beyond battlefield competence, it goes to stewardship toward the people who have served under us. You would agree with that, would you not?

General MCCHRYSTAL. Absolutely, sir.

Senator WEBB. To their families?

General MCCHRYSTAL. Absolutely.

Senator WEBB. We have a situation here that I think is highly unusual in our history. I really mean that. You did mention other notable Americans who died of friendly-fire incidents on the battlefield—General McNair, Stonewall Jackson. I actually had an ancestor who fought under Stonewall Jackson and died at Chancellorsville. But, this is a situation where a very special Amer-

ican, with a unique intellectual and athletic background, forewent millions of dollars in order to serve his country, and there was a period where I believe the Army failed the family, when the knowledge was going up through the chain of command that this was a friendly-fire incident.

I've been contacted by their family again, once your name was forwarded. I'm going to read from a 2005 letter from Pat Tillman's father, who is an attorney. He is very learned in these matters. He had been briefed by the Army in 2005. He said, "No investigator worth a damn would have made the presentation I sat through unless they had an agenda different from the truth. The initial investigation was changed. Conflicting testimony was disregarded. Key evidence was destroyed and/or omitted. Witnesses, probably with supervision of superiors, changed their testimony. No one has been confronted with their conduct. The issue of importance is the integrity of the military"—this is from Pat Tillman's father, not from me, although I would agree—"from the lieutenant colonel on the ground all the way up and past General Jones."

The Inspector General of DOD acted on this. In their review, they said, "Corporal Tillman's chain of command made critical errors in reporting Corporal Tillman's death and in assigning investigative jurisdiction in the days following his death, and bears ultimate responsibility for the inaccuracies, misunderstandings, and perceptions of concealment. Army officials failed to properly update family members when an investigation was initiated into Corporal Tillman's death, and that the justification for his Silver Star contained inaccuracies."

His brother, who also served our country with great sacrifice, testified, after this finding, saying that, "The deception surrounding this case was an insult to the family, but, more importantly, its primary purpose was to deceive a nation. We say these things with disappointment and sadness. We have been used as props in a public-relations exercise."

Secretary Geren apologized. He said, "We, as an Army, failed in our duty to the Tillman family and the duty we owe to all families of our fallen soldiers."

You have not, to my knowledge, been on record in terms of how you personally feel about this incident, and I would like to give you the opportunity to do that.

General McCRYSTAL. Thank you, Senator. I do appreciate that.

I would say up front, I agree with Secretary Geren, we failed the family. I was a part of that, and I apologize for it. I would say that there is nothing we can do to automatically restore the trust, which was the second casualty of April 22. The first was the loss of a great American, the second was the loss of trust with a family, and, wider than that, with some additional people.

I will say that it was not intentional, with the people that I saw. I didn't see any activities by anyone to deceive. That said, I do believe that the confluence of mistakes, either because they didn't know the policy or people just didn't line things up right—my own mistakes in not reviewing the Silver Star citation well enough and making sure that I compared it to the message that I sent—were mistakes. They were well intentioned, but they added to the doubt and the sense of mistrust, and we didn't get it right.

To provide context, as you remember, Senator, we were still in combat when we were doing all of that. So, we were in combat in the days after his death as we did this. We were in the first battle of Fallujah in Iraq at the same time, so we were making mistakes. But, I would say the people who made them also were in a situation where you sometimes do make mistakes.

That's not an excuse, but I would say that we've learned from it. I've learned from it.

Senator WEBB. First of all, I was at the Army Infantry School, giving a talk on lessons learned from Vietnam, the evening that we found out that Corporal Tillman had lost his life. I don't need to say to you the impact that had on the leadership. But, no matter what else is going on, with the enormity of that incident, in terms of national perceptions and the attention that it got nationally, and the fact that you were sending a private message, P4 message, up your chain of command warning about the potential impact of a friendly-fire incident, I regretfully say I think that the Army really failed the Tillman family. I appreciate your speaking about this today.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Webb.

Senator Nelson.

Senator BILL NELSON. Thank you, Mr. Chairman.

General Fraser, you have some experience in China. What do you think is the growing influence of China in South America?

General FRASER. Sir, from my study there, what I see is that they have commercial interests, they have interests to gain access to natural resources. I see them working the same purposes in other parts of the world, also, not just influenced on and focused on Latin America. I do not see, from my study, that there is a military threat from that influence. All of it right now is focused commercially. I also see an interest on the part of Latin American Caribbean nations to gain access to markets in China, as well.

Senator BILL NELSON. As we discussed, when you kindly came by to visit, that SOUTHCOM is a great command, headed by a four-star who is not only a warrior, but is also a diplomat. Of course, Admiral Stavridis has perfected that role. It had been done before by General James T. Hill. It's been evolving over time. What kind of twist do you see, as you apply diplomacy, with being a commander? Just give me some of your ideas as you take over this command.

General FRASER. Sir, I think, from my standpoint, it's really about partnership-building throughout. That's partnership internationally, that's partnership with the interagency. From a specific SOUTHCOM standpoint, responsibility is for the military portion of that. But, it is working with the State Department, with the U.S. Agency for International Development (USAID), with the other Federal agencies involved there, also working with partner nations, armed forces, to build the capacities, build the capabilities that are there. So, if confirmed, I really look forward to engaging in all those arenas very robustly.

Senator BILL NELSON. I think we're going to have to perfect this role, wherever we are projecting United States force in the future. General McChrystal, you and I talked about it, even in a war zone

like Afghanistan, same thing. Now it's not just the United States military. The military can take the lead, but it's all the other agencies of government to work in projecting our power in order to secure the interests of the United States.

Now, one area in your future command that is just still a basket case—I thought I'd ask Admiral Stavridis to comment on this—is Haiti. Then let's pick up the conversation, General Fraser.

Admiral STAVRIDIS. Senator, of course, you and I have spent some time on the road together, including Haiti, and it is, indeed, a nation in extreme distress. It's the poorest nation in the Americas. It's among the poorest countries in the world. It was devastated last summer by three separate major storms; two of them, high-level hurricanes. It has severe problems with soil erosion. I could go on and on.

What am I encouraged by there? I'm encouraged by the United Nations peacekeeping force, which has done a superb job with very little U.S. military engagement. I'm encouraged by what our ambassador has done down there, Ambassador Janet Sanderson. I'm encouraged by the recent appointment of former President Bill Clinton. The situation is desperate, but not hopeless, is how I would categorize it at the moment, sir.

Senator BILL NELSON. I personally think that President René Préval is really trying. What faces him is what faces sufficiently motivated elected leaders elsewhere in the world, is, underneath him is so much corruption.

What do you want to do, General Fraser, since Haiti will be in your area of responsibility?

General FRASER. Senator, I think it's very much along the line that I talked about earlier, and that is, a lot of the capability-building within Haiti, I think really still involves with an interagency approach. There's a lot of USAID, there's the State Department role. From my role, if confirmed for SOUTHCOM, it is really going in, assisting those agencies in their capacities, as well as working with the armed forces in Haiti, although they are small, to improve their capacity. It's an overall ability to go at the poverty, to work on the distressed incomes, just the overall capacity of the Nation. It will be an international and an interagency approach.

I'm also, as Admiral Stavridis said, very encouraged by the continued presence of the United Nations mission there.

Senator BILL NELSON. Admiral Stavridis, the chairman and I and Senator Collins went to Russia, and then Poland and the Czech Republic, and we came away convinced that, for the future threat of an Iranian missile with a nuclear warhead against Europe, that, in the foreseeable future, our Standard Missile-3, and on ships placed in the Mediterranean, the Aegis system, and then upgraded over time, could take care of that particular threat. In the meantime, we want to make sure that our commanders in the field have the Standard Missile-3 and the Terminal High Altitude Area Defense system. Do you want to give us some of your ideas of this?

Admiral STAVRIDIS. I have, of course, talked to the chairman about this, as well as you in your office earlier. I'm very intrigued by the findings of the three of you, and I look forward, if confirmed, to immediately probing this, both from an Iranian-threat perspec-

tive and from the perspective of our military interlocutors in those countries and exploring this idea. Then if it makes sense, which it certainly seems to, pushing that forward as military advice to Secretary Gates, who would then take it into the interagency. At the end of the day, of course, this is a political/diplomatic decision that the administration would have to take. I think it's a very intriguing idea, as it's been outlined. I look forward, if confirmed, to doing the military piece of that along the lines you've described, sir.

Senator BILL NELSON. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you.

When you're referring to the possibility of the option as outlined, you're talking about the possibility of pursuing missile defense cooperation with Russia?

Admiral STAVRIDIS. I am. I think that's a very intriguing idea, sir.

Chairman LEVIN. Thank you.

There will be questions for the record. I know that I'll have some additional questions for you, General, particularly relative to the chronology of the detainee treatment issue in Iraq and Afghanistan, which we talked about briefly. There will be other questions, I assume, from other Senators, as well.

We will stand adjourned, with thanks, again, to you and your families that provide the great support that makes it possible for you and so many others like you to serve this country.

We stand adjourned.

[Whereupon, at 12:14 p.m., the committee adjourned.]

[Prepared questions submitted to ADM James G. Stavridis, USN, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and the chain of command by clearly delineating the combatant commanders' responsibilities and authorities and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Based on your experiences in U.S. Southern Command (SOUTHCOM), do you see the need for modifications of any Goldwater-Nichols Act provisions or the Special Operations reforms?

Answer. Yes, I do.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. The Goldwater-Nichols Act vastly improved the way our joint force operates. Today, our military functions extremely well in the joint world. I believe the next step toward increasing effectiveness of our national security apparatus is to institute similar provisions that encourage an interagency approach. Many working groups at the national level have been thinking through the possibilities for this kind of legislation, including the Project on National Security Reform. I believe this would increase efficiency in our whole-of-government initiatives. One of the ways to enable increased interagency cooperation is to incentivize interagency assignments throughout the government, and particularly within the military, similar to what Goldwater-Nichols did by incentivizing joint assignments.

Additionally, there may be benefit in amending the Goldwater-Nichols Act to encourage Professional Education in the civil service employee sector, as the original legislation did for military officers. As more of the force is civilianized, it is in the

Department's interest to promote joint educational opportunities for civilian employees of the Department of Defense (DOD).

DUTIES

Question. What is your understanding of the duties and functions of the Commander, U.S. European Command (EUCOM) and the North Atlantic Treaty Organization's (NATO) Supreme Allied Commander, Europe (SACEUR)?

Answer. The Commander of EUCOM is responsible for coordinating and conducting all U.S. military operations and activities across the 51 independent states in the EUCOM Area of Responsibility (AOR) in pursuit of U.S. national military objectives. This AOR includes all of Europe (including Turkey), the Caucasus Region, and Israel. He is also responsible for the health, welfare and security of the approximately 85,000 servicemembers forward deployed within that AOR. He coordinates the efforts of the Service component commands assigned to the European Theater.

The NATO Military Command Structure assigns specific roles and duties to SACEUR. These include:

- Strategic planning: Identifying and requesting forces for the full range of Alliance missions and contributing to crisis management and effective defense of NATO territory and forces.
- Operational leadership: Upon aggression, executes military measures within the capability of the command to preserve or restore the security of NATO nations.
- Transformation: Cooperates with the Supreme Allied Commander for Transformation (SACT) on integrating transformation efforts. Contributes to stability throughout Euro Atlantic area for developing contacts and participating in exercises and activities with NATO and Partnership for Peace (PfP) partners.
- Strategic Analysis: Conducts strategic level analysis to identify and prioritize type and scale of capability shortfalls. Manages NATO allocated operation and exercises resources to accomplish operational missions as directed by the North Atlantic Council (NAC).

The responsibilities of the Commander EUCOM and the SACEUR are complementary. The fact that they have traditionally been vested in one officer facilitates near-seamless coordination between the U.S. and NATO military command structures.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. I am deeply honored by the President's nomination to be SACEUR and Commander, EUCOM. Over the past three decades, I have served in a wide variety of Navy and Joint Commands that I believe have prepared me well for the challenges ahead if confirmed by the U.S. Senate.

Operationally, I have served in several key operational command positions for the Navy, including destroyer and destroyer squadron command, and culminating in command as a Rear Admiral of a Navy Carrier Strike Group, which conducted operations in the SOUTHCOM AOR as well as in the Mediterranean and the Arabian Gulf. I have also served on the Joint Staff, the Secretary of Defense Staff, the Secretary of the Navy Staff, and Chief of Naval Operations Staff. During my time in each of these locations, I actively worked on issues involving EUCOM's AOR, as well as NATO military issues.

Most recently, I was the Commander of SOUTHCOM, an interagency oriented combatant command whose mission is to conduct military operations and promote security cooperation to achieve U.S. strategic objectives in the Americas. Although the issues are vastly different and unique in each region, there are some basic principles that are shared among geographic combatant command regions that I would bring to Europe, if confirmed.

- International - Building the capacity of our partners ensures stronger defense for the United States and our allies and takes some burden off of our troops.
- Interagency - Cooperation is important to address the complex spectrum of issues facing any region. I am a military officer, so if confirmed as SACEUR, I will ensure security of the United States and our allies. However, there is more to the region's stability than just defense. While State Department does Diplomacy and U.S. Agency for International Development (USAID) works on Development, we of course focus on Defense. I believe our success will depend on all of us working together in a robust inter-agency approach.

- Cultural understanding - In order to truly cooperate successfully with our allies, we must walk in their shoes and understand their culture. This is a lesson learned from my time at SOUTHCOM.
- Strategic communication - important in any part of the world - The United States must get our message out in a way that resonates with our international allies, as well as our own citizenry.
- Counternarcotics and Counterinsurgency - Dealing with the challenges of narcotics has clearly been a large part of my portfolio at SOUTHCOM and there are lessons learned that I could bring to Europe and Afghanistan. I do not believe in the term "war on drugs," but rather on a shared international, interagency, and even private-public approach to dealing with this issue.

Other specific experiences and background include:

- Ph.D. in International Relations from the Fletcher School of Law and Diplomacy at Tufts University, where my work was partially focused on NATO.
- I have been involved in multiple NATO operations throughout my career, including operations in Haiti, the Balkans, and Afghanistan.
- Working knowledge of Spanish and French, and am currently studying Portuguese.
- Lived in Europe for 3 years in my youth and have traveled extensively throughout the region.

Question. Do you believe that there are any steps that you need to take to enhance your expertise to perform the duties of the Commander, EUCOM, or NATO SACEUR?

Answer. If confirmed, I will engage with key officials and personnel within the executive and legislative branches of the U.S. Government to uphold and advance the national policies and interests of the United States for the region through the missions established and executed within the command. To this end, I will also engage with the governments and militaries of our allies to understand the magnitude and interdependent issues within the region. I will seek the cooperation of the Alliance leadership to work together to engage on vital regional issues. I will also continue to study the languages and culture of the region to better understand the populations with which I would be engaging.

RELATIONSHIPS

Question. Section 162(b) of title 10, U.S.C., provides that the chain of command runs from the President to the Secretary of Defense and from the Secretary of Defense to the combatant commands. Other sections of law and traditional practice, however, establish important relationships outside the chain of command. Please describe your understanding of the relationship of the Commander, EUCOM/NATO SACEUR, to the following:

The Secretary of Defense.

Answer. The Secretary of Defense exercises authority over the Armed Forces through the EUCOM Commander for those forces assigned to the EUCOM AOR. The EUCOM Commander exercises command authority over assigned forces and is directly responsible to the Secretary of Defense for the performance of assigned missions and the preparedness of the command.

Question. The Deputy Secretary of Defense.

Answer. The Deputy Secretary of Defense is delegated full power and authority to act for the Secretary of Defense and to exercise the powers of the Secretary on any and all matters for which the Secretary is authorized to act pursuant to law. The EUCOM Commander coordinates and exchanges information with the Deputy Secretary on matters delegated by the Secretary. The Commander directly communicates with the Deputy Secretary on a regular basis.

Question. The Under Secretary of Defense for Policy.

Answer. A direct command relationship between the Under Secretary of Defense for Policy and the EUCOM Commander does not exist. However, the EUCOM Commander regularly interacts, coordinates and exchanges information with the Under Secretary of Defense for Policy on policy issues relating to NATO, European, and Eurasian affairs. The commander directly communicates with the Under Secretary of Defense for Policy on a regular basis.

Question. The Under Secretary of Defense for Intelligence.

Answer. There is not a direct command relationship between the Under Secretary of Defense for Intelligence and the EUCOM Commander. However, the EUCOM Commander regularly interacts with, coordinates and exchanges information with the Under Secretary of Defense for Intelligence on intelligence related matters.

Question. The Assistant Secretary of Defense for International Security Affairs.

Answer. There is not a direct command relationship between the Assistant Secretary of Defense for International Security Affairs and the EUCOM Commander. The EUCOM Commander and the Assistant Secretary of Defense for International Security Affairs work together on coordinating international security policy and strategy.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The Chairman functions under the authority, direction, and control of the National Command Authority. The Chairman transmits communications between the National Command Authority and the EUCOM Commander as well as oversees the activities of the EUCOM Commander as directed by the Secretary of Defense. As the principal military advisor to the President and the Secretary of Defense, the Chairman is a key conduit between the combatant commander, interagency, and Service chiefs.

The EUCOM Commander keeps the Chairman informed on significant issues regarding NATO and the EUCOM AOR. The Commander directly communicates with the Chairman of the Joint Chiefs of Staff on a regular basis.

Question. The Secretaries of the Military Departments.

Answer. The Secretaries of Military Departments are responsible for administration and support of forces that are assigned or attached to the EUCOM Commander. The Secretaries fulfill their responsibilities by exercising administrative control through the Service component commands assigned to EUCOM.

Question. The other combatant commanders, in particular Commander, U.S. Central Command.

Answer. Formal relationships between the EUCOM Commander and the geographic and functional combatant commanders derives from command authority established by title 10, U.S.C., section 164. Combatant commanders closely coordinate as necessary to accomplish all assigned missions.

Question. Commander, International Security Assistance Force.

Answer. The EUCOM Commander has no formal relationship with Commander, International Security Assistance Force (ISAF); however, COM ISAF is "dual-hatted": 1. As the Commander U.S. Forces in Afghanistan he reports to Commander, U.S. CENTCOM (national C2); 2. The SACEUR exercises command authority over the Commander ISAF via the Commander, Joint Forces Command Brunssum in the Netherlands (operational C2).

Question. The Supreme Allied Commander for Transformation.

Answer. Both NATO's Strategic Commanders, SACEUR and SACT, carry out roles and missions assigned to them by the NAC or in some circumstances by NATO's Defence Planning Committee. SACEUR and SACT work together to ensure the transformation of NATO's military capabilities and interoperability that support Allied Command Operations.

Question. The U.S. Permanent Representative to the North Atlantic Council.

Answer. There is not a direct command relationship between the U.S. Permanent Representative to the NAC and either the EUCOM Commander or the SACEUR. The NAC provides direction to NATO military authorities and the U.S. Permanent Representative is one of 28 members of the NAC. The EUCOM Commander works with the U.S. Permanent Representative on matters of mutual interest, such as EUCOM military operations and security cooperation activities that support U.S. objectives and military contributions to NATO.

Question. U.S. Chiefs of Mission within the U.S. EUCOM AOR.

Answer. There is not a formal command relationship between the EUCOM Commander and the U.S. Chiefs of Mission for the 51 independent states in the EUCOM AOR. In a foreign country, the U.S. Ambassador is responsible to the President for directing, coordinating and supervising all U.S. Government executive branch employees in the host nation, except those under the command of a United States area military commander. The EUCOM Commander coordinates and exchanges information with U.S. Chiefs of Mission regularly on matters of mutual interest, to include military operations and engagement activities that support the Ambassador's approved in-country U.S. strategy for engagement. In addition to the regular exchange of information with the U.S. Chiefs of Mission, past EUCOM Commanders have hosted regional conferences. If confirmed, I intend to continue this practice.

Question. U.S. Ambassador to Afghanistan

Answer. As the EUCOM Commander, I have no formal relationship with the U.S. Ambassador to Afghanistan. In my role as SACEUR, while no formal relationship exists, I would expect to periodically meet informally with the various NATO nations and partner nation ambassadors to Afghanistan—for which the U.S. Ambassador is 1 of 42—to garner their perspectives, as well as address their questions.

MAJOR CHALLENGES

Question. In your view, what are the major challenges and problems you would confront if confirmed as the next Commander, EUCOM, and SACEUR?

Answer. As SACEUR, one major challenge to be confronted is successfully conducting the Alliance military operations in support of Trans-Atlantic Security, including ISAF in Afghanistan, Kosovo Force (KFOR), Operation Active Endeavor, and Operation Allied Protector. All of NATO's forces, from Kosovo to ISAF to those conducting counter-piracy and other missions, deserve the best guidance and planning as well as the necessary resources and support to conduct operations. Of these operations, ISAF will likely prove to be most important to our security as well as pivotal to the Alliance's further adaptation of strategies, capabilities, and internal processes to address the myriad of 21st century risks and threats confronting our Nations. ISAF not only reflects the Alliance's will to address the instability in a country destabilized by extremism and terrorism, but it reflects the Alliance's will and capability to conduct operations at strategic distance outside the traditional NATO area. Success in Afghanistan will contribute to stabilizing a very important region and demonstrate that NATO in the 21st century is politically prepared and militarily capable of dealing successfully with risks and threats to Trans-Atlantic Security at strategic distances far from the borders of the U.S. or European members.

Second, we face the challenge of resetting the NATO-Russia relationship and building a predictable, mutually-beneficial relationship that strengthens security. Military cooperation with Russia should figure prominently in the reset of this strategic relationship. This relationship has been stressed by policy differences over the years, and continues to be a complex relationship given the comprehensive nature of U.S.-Russia engagement across the full spectrum of regional and global security matters. It is a strategic relationship that we must get right, and one that the Russians must demonstrate that they value in both words and deeds. There is great opportunity in the U.S.-Russia relationship as well as great challenge. In many cases we share common strategic challenges that present opportunities for beneficial engagement, such as countering the proliferation of weapons of mass destruction. I look forward to working in support of overall U.S. national security objectives to help forge a constructive, reliable, and predictable relationship with Russia.

Third, the Heads of State and Government tasked the NATO Secretary General to develop a new strategic concept for the Alliance. The last concept was developed in 1999. A new NATO strategic concept is crucially important to forging a common perspective on the regional and global security environment; the risks and challenges we face in the 21st century such as energy security, cyber defense, or counter proliferation; the role Alliance members want NATO to play in addressing these risks based on a common perception and common goals; and the strategies, capabilities, and internal processes necessary to successfully be prepared. The Alliance will engage in debate on these important issues. My initial assessment is that the military authorities will seek a balance of collective defense and global operations. Once the political leaders reach consensus, further development of military tasks and defining capabilities will be no easy task and must be done with a realistic understanding of the means available. I look forward to contributing my military advice to the development of a new NATO Strategic Concept, a concept that will drive and frame NATO's role in the international security sphere for years to come.

Finally, French reintegration into the NATO military structure would also be a key area of focus. As France has always been a very active partner in NATO's ongoing operations, their reintegration is nominally only a "formal" step to capture their current participation. Their further involvement in NATO's military command structure will provide an avenue for greater involvement—especially in the planning processes.

In addition to the above stated challenges, I believe there will be additional challenges facing the next EUCOM Commander such as defense cooperation in Eastern Europe and further progress in the Balkans, especially Kosovo.

As the focus of European security continues to shift from Central to Eastern Europe, EUCOM strategic plans and activities to address the challenges in Eastern Europe and Eurasia complement NATO efforts to strengthen new Alliance partner capability in this region. EUCOM efforts to stage U.S. forces in Bulgaria and Romania will focus on military-to-military activities that continue to build the military capacities of new NATO Alliance and prospective Alliance countries along with strategic partners in Eastern Europe and Eurasia. Ukraine and Georgia, considered exceptionally important countries in the EUCOM AOR, will continue the trend of bilateral relationships and capacity building. EUCOM continues to assist both countries with their NATO-oriented defense transformation and institution-building ef-

forts, which have begun to bear fruit with peacekeeping presences in Kosovo, Operation Active Endeavor, and Africa.

Question. If confirmed, what plans do you have for addressing these challenges and problems?

Answer. In the previously mentioned areas, the key to success will be proactive engagement and clear direction. The next SACEUR and EUCOM Commander must establish clear priorities and provide a strategic vision to guide transformation, foster relationships, and set the conditions for successfully implementing the full spectrum of measures necessary to contribute to security. Additionally, constant reassessment of these challenges and coupled with the ability to adjust will be critical enablers as we address evolving security challenges in the EUCOM AOR.

NATO has provided for peace and security in Europe for 60 years because of an unwavering commitment to the founding principles and the understanding that the best solution will always be found in working together. The strategic landscape is continually evolving and SACEUR must continually engage military and political leaders to understand the range of perspectives inherent in an Alliance of 28 members. He must effectively communicate key elements required for military success both today and in the future. It is imperative the SACEUR work closely with the 28 nations of the Alliance, Partnership for Peace nations, and other special partners to forge common understanding of the challenges we face together and the measures necessary to address them together.

If confirmed, my approach will be collegial, international, and interagency focused. I will also work hard to build effective strategic communications, which I believe are key to our work throughout the spectrum of challenges.

NATO COMMITMENT TO AFGHANISTAN MISSION

Question. The NATO ISAF has grown and will include some 68,000 U.S. troops by this fall and more than 32,000 soldiers from NATO and other allies. NATO ISAF is responsible for providing security throughout Afghanistan and assisting the Government of Afghanistan in extending its authority.

What challenges do you foresee for NATO ISAF as the administration's new strategy for Afghanistan and Pakistan is implemented?

Answer. The new U.S. strategy for Afghanistan and Pakistan has been briefed to the NAC on numerous occasions by senior U.S. political and military officials. It is clear that NATO Allies support the new U.S. strategy, welcome the increased resources to be provided by the United States, and want to work with the United States in a NATO-framework as well as bi-laterally to support the range of political and military initiatives associated with the new strategy. NATO nations recognize the importance of ISAF and its contribution to the overall efforts of the International Community in Afghanistan. Enhancing security in Afghanistan through both ISAF operations and further developing the capacity of the Afghan National Army (ANA) and Afghan National Police (ANP) is essential to all other efforts in Afghanistan and the region and will be the greatest initial challenge of implementing the strategy.

Question. How confident are you that NATO is prepared to sustain its long-term commitment to ISAF given the challenging security situation in Afghanistan? If confirmed, are there additional steps you would recommend in order to help sustain that commitment?

Answer. From all that I can see thus far—but without the benefit of actually speaking to any allies personally—I am confident that NATO is capable and willing to fulfill and sustain its commitment to ISAF. The NATO Alliance took a significant step when it decided to conduct military operations in Afghanistan. That it did so reinforces its commitment to wider security and NATO's belief that this effort is central to continued peace and stability in Europe. It was a decision made with deliberation and a significant commitment of resources. Thus far, NATO forces have shown determination and resilience. The Alliance has given no indication as having any doubt in their decision and I am confident that member nations will stay the course in providing Afghanistan the stability and security it needs to move forward. If confirmed as SACEUR, I will continue to devote a high priority to force generation working with NATO nations and partners to maintain the appropriate forces and resources for the ISAF operation.

Question. National caveats restricting the use of certain NATO members forces in Afghanistan continue to impede ISAF operations and are a source of friction within the alliance.

What is your assessment of the impact of national caveats on NATO ISAF operations and how can their impact be reduced?

Answer. In a perfect world, there would be no caveats, as they constrain the commander's ability to plan and limit capabilities to execute operations. Some caveats will reflect limitations imposed on a nation's forces by that country's constitution. Others reflect the military reality of a nation's inability to sustain its forces outside a particular geographical area, it is that inability which is the constraint, not the caveat that reflects it. Others apply to very small numbers of troops or personnel, contributions that show political commitment and solidarity, but which are at the limits of what some are capable of contributing. Where caveats have a sizeable effect on the commander's flexibility to achieve his mission, either through their content or the number and capabilities of the forces they affect, then we should devote all our efforts to addressing the issues which stimulated them in the first place, thereby removing them. I will work with national Chiefs of Defense individually and work with the NAC to explain the operational impact of national caveats and the importance of removing as many of them as possible.

COMMAND STRUCTURE IN AFGHANISTAN

Question. The Commander, ISAF, has been dual-hatted as Commander, U.S. Forces Afghanistan, and reports to both the SACEUR and the Commander, U.S. Central Command. In addition, Secretary Gates has recently created a three-star position of Deputy Commander, U.S. Forces-Afghanistan (USFOR-A) to handle day-to-day operations in theater.

What is your assessment of the command structure for ISAF and for USFOR-A?

Answer. In general, the current ISAF command structure combines the military doctrine of 'unity of command' with the special requirements arising from the multinational composition of ISAF—the key to successful allied operations. I support the Secretary of Defense and his recent decision to establish a three-star position of Deputy Commander, USFOR-A to handle day-to-day, tactical operations in theater. The operations in Afghanistan are complex for many reasons. The additional commander and headquarters will prove to be advantageous to the conduct of operations in theater. At the same time, this new structure will allow the ISAF Commander and Commander of USFOR-A to focus on the strategic level, working with other components of the Afghan Government and the organizations of the international community.

Question. What changes, if any, would you recommend to these command structures?

Answer. Without having witnessed ISAF operations first hand, but having been briefed numerous times, my initial reaction is that this new structure is about right. All military structures undergo minor changes and modifications with time to correspond to unique characteristics of specific operations. I am sure this new structure will be no exception. Naturally, if confirmed, I will assess it personally.

Question. In your view, should the three-star position of Deputy Commander, USFOR-A, also be dual-hatted within the NATO ISAF command?

Answer. The dual-hatting of a U.S. commander as a NATO commander should be based on the inherent operational benefits of such an approach, the impact of unity of effort, and the resource implications associated with this command arrangement. At the same time, these benefits must exist for both the United States and its allied forces in the operation and in the NATO chain of command. In the end, a decision on amending the NATO chain of command in Afghanistan is both a military decision and a political decision, and requires approval by the NAC. This can be one of the issues we look at in the future—how successful the structure has been in its initial setup and whether we believe it would increase synergy to expand/dual-hat the role to include NATO ISAF Command. Assessing this will be primary order of business for me if confirmed.

Question. As additional U.S. forces flow into southern Afghanistan, what adjustments, if any, should be made to the theater and regional command to take into account the larger U.S. presence?

Answer. NATO has a system which takes into account the composition of ISAF's command structure based on national contributions to combat forces. As U.S. forces increase, so will its representation in the ISAF command structure. However, we should take into account the multinational nature of this operation and should be cautious not to create the impression of a unilateral command structure. The significant increase of U.S. forces in Afghanistan will have an impact on the tempo of operations and the number of concurrent operations in-theater, along with the associated logistical and support aspects of the forces. I would not wish to pre-judge the situation on the ground or preempt the recommendations of tactical and operational commanders in the field—views and recommendations that may well be provided in the future from the tactical level to COMISAF to the strategic level. As SACEUR,

I would seek the advice and recommendations of subordinate commanders and work with the Nations individually and collectively in the military committee and NAC to gain their support.

BUILDING THE AFGHAN NATIONAL SECURITY FORCES

Question. The administration's new strategy calls for fully resourcing the growth of the ANA and the ANP to 134,000 and 82,000 personnel, respectively, by 2011. Some observers, however, believe that the currently planned end strength levels for the ANA and the ANP will be insufficient over the long-run to provide security throughout Afghanistan.

Do you believe that the realities on the ground in Afghanistan necessitate growing the Afghan National Security Forces beyond the currently-planned end strengths of 134,000 for the ANA and 82,000 for the ANP?

Answer. The administration's new strategy does call for a rapid build-up of the ANA and the ANP to 134,000 and 82,000 personnel respectively over the next 2 years. U.S. and NATO support to these approved strengths should be in our current focus. However, the new strategy also allows for additional enlargements as circumstances warrant. As Afghan Forces mature, we can work with the Afghan Government and our Allies to re-evaluate these end strengths.

Question. The Combined Security Transition Command Afghanistan (CSTC-A) has the mission to provide training, advice, and assistance to Afghan security forces.

What is your assessment of CSTC-A?

Answer. CSTC-A is a U.S.-led organization under the command of U.S. Forces—Afghanistan and subsequently U.S. Central Command. Therefore, I leave any judgment on improving their performance to those capable commanders. From all I can see thus far, I believe CSTC-A has been a critical part of the success achieved in Afghanistan in terms of both building a capable ANA and taking on the additional tasks of developing the ANP. Together the ANA and ANP contribute to current NATO-led and coalition-led operations. More importantly, they represent the future capacity of the Afghan Government to secure and protect its citizens from the threat posed by extremists without further international assistance.

Question. If confirmed, what plans do you have, if any, to improve the effectiveness or efficiency of the Combined Security Transition Command Afghanistan?

Answer. As CSTC-A is a U.S.-led program outside my remit as either SACEUR or EUCOM commander, I do not have specific plans for enhancing the effectiveness or efficiency of CSTC-A. However, I will work with great interest to see how NATO nations may wish to work more closely with CSTC-A in training the ANA and ANP. Heads of State and Government tasked NATO to develop proposals on a possible NATO Training Mission—Afghanistan, similar to the current NATO effort in support of U.S.-led coalition training in Iraq. NATO military authorities are examining options on how to proceed on the basis of determining what would be NATO's added value. I believe NATO does have added value in the training of ANA and ANP, and I believe this is a very important new tasking for the Alliance to consider. I will be working closely with General Petraeus on this specific issue, which is crucial to the overall effort in Afghanistan.

Question. Witnesses at committee hearings have cited a number of challenges impeding the acceleration of expanding the Afghan National Security Forces, including: 1) a lack of training or mentoring teams to embed with Afghan units; 2) a lack of equipment; and 3) developing leadership among officers and noncommissioned officers.

What do you view as the greatest challenge to accelerating the growth of the Afghan National Security Forces?

Answer. These are all major challenges impeding expansion. However, I share General Petraeus's opinion that the greatest challenge is the lack of training teams to embed with Afghan units. We currently have 54 Operational Mentor and Liaison Teams (OMLTs) in place, which does not meet the current requirement of 66 OMLTs. By December 2010, it is estimated that we will have 70 OMLTs in place, but actually require 91. The expansion of the Afghan National Security Forces over the next 2 years is directly tied to the number of partner nations we can get contributing to the fight. The sooner we can expand the Afghan National Security Forces and build their capacity to secure Afghan territory, the sooner U.S. and allied forces can begin to withdraw. Additionally, the issues of illiteracy, lack of sufficient time to train effective leaders, and an operational tempo for the Afghan Army and Police all further impact the training and development of their military.

Question. If confirmed, how would you recommend addressing this challenge?

Answer. This is one area with opportunity for greater cooperation with our Allies and partners. If confirmed, I would work with the Allies and partners to find ways

in which they can contribute to the NATO Mission in Afghanistan, such as rapidly filling the remaining training teams (OMLTS) and developing the institutional military training schools necessary for the continued professional development of the Afghan military. A number of allies and partners are willing to contribute additional military forces to operations in Afghanistan, but lack the capability to operate safely and effectively with coalition forces. I would work to build the capacity of these countries to enable them to deploy interoperable and effective forces to Afghanistan. In addition, Furthermore, with the establishment of the NATO Training Mission-Afghanistan (NTM-A), Allied Command Operations will have an opportunity to play a greater role in supporting the training of the Afghan police—an area in critical need of improvement. There are excellent law enforcement capabilities in Europe like the Carabinieri and the Gendarmerie that could deploy to train the Afghan National Police. I will continue to work with Chiefs of Defense and leaders of Allied nations to fully resource the ISAF mission. EUCOM has a robust security cooperation program, including exercises, high-level visits, State Partnership Program, and component activities that can be leveraged to influence and enable further participation in ISAF as well.

Question. The European Union has launched the European Union Police Mission in Afghanistan (EUPOL) to contribute to establishing a sustainable and effective Afghan police force by providing mentoring, advising and training at the national, regional, and provincial levels.

In your view, what should be the relationship between CSTC-A and EUPOL for building the Afghan National Police?

Answer. Again, as CSTC-A is under the command of U.S. Forces-Afghanistan and subsequently U.S. Central Command, I leave any judgment on its activities to those capable commanders. While both organizations are valuable contributors to ANP development, I cannot speak to the details of their relationship. In general terms, all organizations and national efforts need to be integrated where possible and coordinated to the greatest extent. This is an area I will pursue if confirmed.

Question. What more should NATO and EUPOL do to improve the capabilities and effectiveness of the police?

Answer. I understand great effort is being made to find synergy between all national and international actors. While EUPOL is responsible to the EU, it is the responsibility of the ISAF mission to foster and maintain a productive relationship with all major security and sector reform actors in Afghanistan in order to bring coherency to all efforts. NATO leaders acknowledge that development of the ANP is a critical element of security and stability in Afghanistan, but police training is not identified as a key military task in the Operational Plan for ISAF operations. Some NATO nations are conducting police training on a bilateral basis. The EUPOL Mission mentors and advises the Afghan Ministry of Interior, but with only 400 personnel they have limited ability to assist the regions and provinces. NATO military authorities are examining options on how to contribute further, possibly through a NATO Training Mission-Afghanistan.

NATO TRAINING MISSION IN AFGHANISTAN

Question. At the NATO Summit in Strasbourg/Kehl in April, NATO Heads of State agreed to establish the NATO Training Mission in Afghanistan. However, there continues to be a shortfall in the number of Operational Liaison and Mentoring Teams (OMLTs) available to embed with Afghanistan units.

What should be done to encourage NATO allies to provide more OMLTs? Are there steps that NATO or the United States should take to assist NATO members in generating more training teams?

Answer. The United States should continue to work with Allies and partners to fully resource the ISAF mission, whether they provide OMLTs, forces, equipment, or funding. The United States should also be prepared to provide immediate assistance—be it training, equipment, or other forms of support—to partners and Allies that are willing to contribute OMLTs (and other forces) to Afghanistan. EUCOM will continue to leverage security cooperation activities to build partner capacity, enabling deployment of forces to ISAF. For example, through the State Partnership Program, EUCOM has arranged the augmentation of partner nation OMLTs with a limited number of National Guard personnel. This has proven to be a highly effective means of enabling Allies and partners to deploy additional OMLTs to Afghanistan. By expanding upon existing capacity-building programs and pursuing new and more agile ways of recruiting, training and equipping partners, we will enhance the contributions of all partner nations in Afghanistan.

COUNTERNARCOTICS

Question. What is your assessment of the current U.S. and NATO strategies for combating the production and trafficking of illegal narcotics in Afghanistan? What changes, if any, would you make in those strategies?

Answer. Clearly the illicit drug trade is a critical issue that must be addressed in order to reach our objectives in Afghanistan. This is a complex issue that requires significant resourcing and there is no singular solution. From what I have learned so far, the Afghan authorities are working closely with international partners to execute the Afghan National Drug Control Strategy. This five pillar approach includes efforts in institution building, judicial reform, law enforcement, alternative livelihoods, and demand reduction. My impression is that recent efforts to disrupt the flow of funds from the drug trade to insurgents, including NATO's expanded authority, will be beneficial. I am hopeful that my experiences in dealing with counternarcotic issues in the SOUTHCOM region may be helpful in allowing me to work with partners and develop new ideas and approaches.

Question. In December, Secretary Gates approved an expanded set of rules of engagement for U.S. forces combating narcotics in Afghanistan. NATO has reportedly approved a comparable expansion of the rules of engagement for NATO forces operating in Afghanistan.

Please discuss your understanding of the reasons behind these changes in the counternarcotics rules of engagement.

Answer. NATO Defense Ministers in October 2008 approved expanded authorities for ISAF to address both the illegal narcotics business and its facilitators because of the support rendered to the Taliban. Each year the narcotics trade provides \$100 million directly to the insurgency, in addition to fueling corruption, undermining the rule of law, and impeding long-term economic growth of legitimate agriculture and business. Prior to the decision at the Defense Ministerials, ISAF assistance was primarily in-extremis support, while some nations provided additional support on a bilateral basis and through their Provincial Reconstruction Teams (PRTs). Recognizing the nexus between the narcotics trade and the insurgency, ISAF forces are now authorized to take direct and deliberate action against drug laboratories and traffickers providing support to the insurgents.

Question. What is the impact of these changes in the rules of engagement to the best of your knowledge?

Answer. Since the approval of enhanced ISAF counternarcotics (CN) authorities in early 2009, over 40 CN operations, the majority of which were Afghan-led, have been conducted. To date, several tons of drugs with an Afghan domestic value of over \$4 million and over 50 tons of various precursor chemicals needed to process Opium have been seized and destroyed. Apart from these initial effects on the capabilities to produce and deal with drugs, CN operations in Afghanistan clearly underline the United States and NATO will and capability to effectively engage the narcotics network, which is fueling the insurgency.

Question. In March 2009, Iran, Afghanistan, and Pakistan carried out a joint counternarcotics operation. The operation was part of a U.N. initiative, called the Rainbow Strategy, aimed at getting the three countries to carry out joint patrols and share intelligence on the members of the drug trade that process opium poppy into heroin and smuggle the drug to markets in Europe. The NATO Secretary General has discussed his desire to boost these joint efforts to counteract the illegal drug trade and trans-border organized crime from Afghan territory.

What are your views on the possibility of NATO and U.S. opportunities to conduct joint efforts, including with Iran, to counter narcotics trafficking in Afghanistan?

Answer. The illegal narcotics industry is a transnational threat that reaches far beyond the borders of Afghanistan. With more than 90 percent of the world's opium originating in Afghanistan, countering the production and trafficking at the source is a key aspect of reducing the global impact of the drug trade. Most of the opium-producing areas of Afghanistan are along the Iranian and Pakistani borders, so joint efforts such as the Rainbow Strategy are encouraging and further similar efforts will be beneficial.

AFGHAN NATIONAL SOLIDARITY PROGRAM

Question. One program that contributes to enhancing development and empowering governance at the local level in Afghanistan is the National Solidarity Program (NSP). This program provides block grants directly to locally-elected Community Development Councils, which are responsible for identifying, planning and managing their own development projects. Funding for the NSP comes from the World Bank/International Development Association, bilateral donors, and through the Afghanistan Reconstruction Trust Fund. According to its website, the NSP has

provided more than \$500 million in payments to 21,000 Community Development Councils, which have financed more than 39,000 subprojects to improve access to infrastructure, markets, and services.

Are you familiar with the National Solidarity Program in Afghanistan?

Answer. Yes, I am. The National Solidarity Program (NSP) is an effective tool enabling community councils to participate in decisions, planning, and management of local development projects. With funding from a variety of international sources, including the Afghan Reconstruction Trust Fund and bilateral national donations, combined with facilitating partners, the NSP has reached 34 districts and 359 provinces. With tangible benefits to the population, including the most impoverished and vulnerable, NSP builds local governance capacity and ultimately extends the reach of the government.

Question. Would you support expanding the National Solidarity Program as a means of building local governance and strengthening development?

Answer. The NSP is one of many valuable efforts to support reconstruction, development, and governance throughout Afghanistan. In my view, it makes sense to build on this success and continue the program from what I understand about it at this point.

CIVILIAN CASUALTIES

Question. What is your assessment of the impact of civilian casualties on the success of the coalition's counterinsurgency operations in Afghanistan?

Answer. U.S. and allied forces always try their very best to avoid civilian casualties through prudent planning and conducting operations with extreme care and the highest concern for innocent lives. In contrast, the extremists we combat in Afghanistan actually target innocent civilians as a means of terrorizing and intimidating the Afghan people to achieve their aims. Civilian casualties are inconsistent with our aims since the Afghan people are our center of gravity. Civilian casualties, however, are in fact a tactic deliberately employed by the Taliban to achieve their aims. The Taliban intentionally operates among civilians as part of its strategy to undermine public trust of coalition forces, and has frequently used innocent civilians as human shields. We will take all actions to avoid civilian casualties in what is an extremely complex operating environment.

Question. In your view, what additional steps, if any, need to be taken to address the issue of civilian casualties in Afghanistan?

Answer. ISAF takes every precaution to avoid civilian casualties and makes adjustments to the existing tactical directive as the situation on the ground permits and necessitates. Ultimately, reducing or eliminating ISAF caused civilian casualties requires a fully trained and equipped Afghan National Security Force capable of conducting operations and ensuring the security of the population. This is an issue I will work upon with great diligence, as any counterinsurgency effort must place the security and confidence of the people squarely at the center of the equation.

FRANCE

Question. What is your assessment of the impact of France rejoining the integrated military structure?

Answer. I believe that the full reintegration of France back into the integrated military structure of the Alliance is a very positive thing for NATO. France was a founding member of NATO and has contributed greatly throughout its history. France's full participation will only strengthen the Alliance and further build European defense capabilities.

Question. Do you support giving France the position of SACT? Why or why not?

Answer. As a major contributor to the Alliance's integrated military structure, France has been given a major command inside the Alliance—one of two NATO strategic commands. This decision, agreed to by Alliance members, reflects the contributions of France to the military structure in terms of manpower, resources, and budget as well as their contributions to NATO operations. I support the idea of Strategic Commander-Transformation as a French military officer and I understand the importance the French military accord to NATO's transformation policy and believe it will be a very good and effective arrangement.

NATO ENLARGEMENT

Question. What are your views on whether NATO would benefit from further rounds of enlargement?

Answer. This is a purely political issue, one that is the remit of the NATO nations. Heads of State and Government have reaffirmed that NATO's door remains

open, as reflected in Article 10 of the Washington Treaty. My understanding of the North Atlantic Treaty is that any European nation that is willing and capable of undertaking the commitments and obligations of being a member state is welcome to join the alliance, should all members agree. This was articulated in the Alliance's Declaration on Alliance Security, approved at the Strassbourg-Kehl Summit in April of this year.

Question. What criteria should the United States apply in evaluating candidates for future NATO enlargement?

Answer. NATO considers and accepts new members in accordance with the Washington Treaty, the Alliance's 1995 Study on NATO Enlargement, and the NATO Membership Action Plan. With careful consideration, they developed over 30 separate political, economic, defense, military, financial, security, and legal criteria, which each NATO aspirant is expected to meet. The United States, as a NATO member, uses these same criteria to evaluate candidates. The successful integration of new members and their contributions to the Alliance demonstrates this process is working. In the end, new NATO members must be contributors to security—not consumers of security—as well as meet all the criteria as outlined above that provides for a country to enter the Alliance.

Question. In your view, is there a limit to how far NATO can be enlarged and still be an effective military organization capable of making decisions and acting in a timely fashion?

Answer. Expansion of the Alliance is a result of deliberate action taken by each member's government, which follows a collective decision of the Heads of State and Government to accept new members. NATO maintains an open door policy according to all of the documentation and study I have undertaken thus far; in particular, Article 10 of the Washington Treaty states clearly that NATO membership is open to all European nations. Democratic reform, defense reform, and interoperability all play a key role in a country's eligibility to be a member.

GEORGIA

Question. In your view, how should the United States and NATO proceed on the issue of NATO membership for Georgia?

Answer. NATO has clearly stated that Georgia and the Ukraine will become NATO members, though the timing and path have not been determined. Georgia is currently in a process of Intensified Dialogue with NATO, and continues to participate in PfP activities and supports NATO military operations. Based on the political decisions in the NAC, the NATO military will have a supporting role in advancing defense reforms in Georgia and developing interoperability. EUCOM, as guided by U.S. Government policy, will work in concert with NATO Allies, to assist with the military and security related part of this reform. This is an important part of advancing Georgia's partnership with NATO.

Question. Would you support further U.S. military assistance to Georgia to help it rebuild its military?

Answer. I think it is reasonable for Georgia to possess a capable military for its own defense and to participate in coalition operations. I agree with current, prudent policy to focus our security cooperation with Georgia on fundamental intellectual issues like training, doctrine, and personnel management—the recent PfP exercise in Georgia was an example of this. This provides a measured and meaningful way to help a country that has helped us in Iraq and has voiced its willingness to assist the United States in Afghanistan.

Question. In your view, is there a way to implement military assistance in a manner that does not provoke Russia and do you consider that to be advisable?

Answer. As we discussed earlier when we were speaking about cooperation with Russia, the key to this will be to pursue common interests with Russia, while being transparent concerning our cooperation with Georgia. Prudent transparency concerning our assistance to Georgia would help Russia to see that ultimately we are merely trying to help catalyze regional stability and enable Georgia to do its part in working against many of the same transnational threats that worry both Russia and the United States. The NATO-Russia Council, for example, is a good mechanism to provide this kind of transparency.

RUSSIA

Question. How do you see the NATO-Russia relationship evolving in the future?

Answer. The conflict between Russia and Georgia last year led NATO to temporarily suspend the NATO-Russia council but has since been reinstated. Decisions about NATO-Russia relations, and subsequent military engagements, are made at the political level. However, I believe that the NATO-Russia relationship will be a

high priority for the Alliance at both the political and military levels. NATO and Russia have numerous arrangements in place to discuss a broad security agenda, enhance confidence and mutual security, as well as build the capability for joint military operations. Since the end of the Cold War, the relationship has been marked with successes like the joint operations in Stabilization Force (SFOR), Kosovo Force (KFOR), and Operation Active Endeavor, and political differences such as those over Kosovo, Georgia, Conventional Armed Forces in Europe (CFE) Treaty, and Missile Defense. The relationship will continue to evolve at a pace determined by the success in breaching these differences and forging common perspectives and ultimately common approaches to security. I do believe that both NATO and Russia believe that the relationships with one another are vital, and see utility in the re-starting of the relationship to address common concerns.

Question. What steps, if any, should NATO take to help mitigate Russian concerns about further enlargements of NATO?

Answer. It is expected that Russia will continue to voice concerns about further enlargement of NATO. NATO's leaders have made clear they desire a constructive partnership with Russia. NATO does not see enlargement as a choice between good relations or poor relations with Russia. NATO enlargement is not a zero-sum security equation, accomplished at the expense of Russia's or other countries' security. It is designed to support the expansion of the community of democracies and market economies, and strengthen regional security. However, the Russian government has a different view. NATO clearly wants to use the full range of cooperation and partnership under the NATO-Russia framework to build a constructive relationship with Russia, and use this very same framework to address the issues where NATO and Russia have different perceptions.

Question. What do you believe are appropriate objectives for U.S.-Russian security relations, and what do you believe are the areas of common interest between the United States and Russia in the security sphere?

Answer. The United States and Russia share many areas of common interest. We have ample opportunity to engage with the Russians on strategic arms reduction and arms control, military-to-military engagement, energy security, humanitarian assistance, counterterrorism, counterpiracy, counterproliferation, and counter-narcotics. Interoperability is a fundamental requirement for successful operations, and the U.S./NATO and Russia should be prepared for missions our political leaders may task us to conduct jointly or within the same framework of an action by the international community. NATO-Russia military activities have evolved since the Rome Summit and have incrementally increased in terms of the number and complexity of events. These events include exercises, seminars, academic exchanges, and technical conferences. These activities will play an important part in developing common approaches with Russia as well as the trust and confidence in these approaches to addressing a wide variety of risks and threats together.

Furthermore, if confirmed as EUCOM Commander, I envision EUCOM's objectives for engaging Russia to be two-fold. First, we want to ensure compliance with national policy in anything we plan to do with respect to military-to-military engagement with Russia. The EUCOM staff has already taken steps in developing a plan intended to re-invigorate the military-to-military programs, albeit at a cautious and measured pace. Second, and probably more important, we want to address those areas of mutual understanding that support the interests of both the United States and Russia.

EUROPEAN MISSILE DEFENSE OPTIONS

Question. The Obama administration is currently reviewing the previously proposed deployment of missile defenses in the Czech Republic and Poland, and is also considering a variety of options and possible alternatives to that proposed deployment, to include using the Standard Missile-3 (SM-3) interceptor either on Aegis BMD ships or on land. One consideration is that the proposed deployment in Poland and the Czech Republic, which neither nation has yet ratified, would not provide coverage of Southeastern portions of NATO Europe, some of which are already within range of Iranian missiles. Such incomplete coverage would be inconsistent with the central NATO principle of the indivisibility of security of all NATO members. Another consideration is the desire to have cost-effective and operationally effective missile defense systems.

Do you agree that it is in our security interests to explore the full range of options and alternatives for possible future missile defense capabilities in Europe that would meet the security interests of NATO and our other allies and partners in the region?

Answer. Yes, based on what I know at this time and without the benefit of actually discussing this with allies, I do agree. Rogue states in the Middle East and Southwest Asia possess a current ballistic missile capability that threatens a major portion of Europe. Iran is aggressively expanding the range and sophistication of its ballistic missiles and is pursuing nuclear capabilities that dramatically expand the threat to the entire European region. The deployment of ballistic missile defense assets in Europe would make a significant contribution to the protection of the United States and Europe from a Middle Eastern ballistic missile threat. Ballistic missile defense must remain a priority so that we are postured to counter threats to the United States, deployed forces and allies. Ballistic missile defense is directly linked to the other theater priorities such as deterring/defeating the use of missiles and WMD as a means of terrorism, defending against cruise missiles, and protecting peacekeeping forces from these threats.

United States ballistic missile defense assets are dedicated not only to defense of the U.S. Homeland, but also to the defense of deployed forces and allies from the growing ballistic threat from rogue states. Sea-based (Aegis with SM-3) and transportable land-based assets (THAAD and Patriot) are integral components of a comprehensive ballistic missile defense system, but cannot defeat the entire range of threats by themselves. Sophisticated sensors are required for early acquisition and target discrimination and ground based interceptors are needed to defeat longer range missiles. In addition, The United States is working towards synergistically integrating its ballistic missile defense capabilities with current and emerging NATO missile defense capabilities and concepts. We need multi-layered missile defense capabilities stationed and operational in the region before a threat fully emerges to ensure our common European allies and partners' security.

MISSILE DEFENSE COOPERATION WITH RUSSIA

Question. Secretary of Defense Gates has stated his interest in pursuing cooperation with Russia on missile defense relative to potential future Iranian missile threats, including the possibility of Russia sharing radar data from its Gabala and Armavir radars. NATO communiqués have repeatedly expressed support for missile defense cooperation between the United States and Russia.

Do you agree that it is in our security interests to pursue missile defense cooperation with Russia relative to potential future Iranian missile threats?

Answer. Yes, I do, based on my preliminary understanding of the situation. I believe Missile Defense is a potential area of cooperation with Russia that is well worth exploring.

Question. Do you believe that such cooperation could help in our efforts to dissuade Iran from pursuing nuclear weapons and long-range ballistic missiles?

Answer. Yes, I do believe the potential exists to achieve such an effect, although this of course is a diplomatic issue outside of my specific purview.

NATO-RUSSIA COUNCIL

Question. The NATO-Russia Council (NRC) has served as an important venue for discussions and cooperation between NATO and Russia, including missile defense cooperation such as the Theater Missile Defense exercise program. Recent NATO communiqués have expressed support for expanded cooperation through the NATO-Russia Council, including on missile defense.

Do you believe the NATO-Russia Council has valuable potential as a forum for NATO-Russian cooperation, including cooperation on missile defense?

Answer. Yes, I do. The NRC's role is to provide a forum for consultation, cooperation, and consensus building between NATO and Russia. The NRC has facilitated discussion and cooperation on a broad range of issues over the past years. The NATO-Russia program of cooperation has included activities in the past in the sphere of theater missile defense cooperation. This area has been a long standing priority activity for both NATO and Russia. I believe that the NRC will continue to play an important role as a vehicle for discussion and cooperation in this sphere and in other areas of mutual interest.

Question. Do you support continuation of the Theater Missile Defense exercise program within the NRC?

Answer. NATO nations approve the NATO-Russia annual work plan, including all aspects of cooperation—civilian and military—between NATO and Russia. The Alliance is restarting the relationship with Russia after a lengthy suspension and the NATO nations will be making decisions on the priority areas of work and cooperation. I would not want to make a judgment on the role and place of a specific exercise program until the appropriate political authorities had determined the political scope, breadth, timing, and objectives for restarting the relationship. Clearly, mili-

tary cooperation will have a role, but it will be a supporting role and one that serves the overall objectives of the U.S. national security policy and Alliance decisions.

PATRIOT BATTERY TO POLAND

Question. The United States and Poland have agreed that the United States will deploy a U.S. Patriot air and missile defense battery to Poland, although the terms and details remain to be worked out.

Do you believe that it could be of benefit to NATO nations for the United States to deploy a Patriot battery to Poland, potentially on a rotating basis, as a NATO training battery, to improve the skills of NATO forces on the Patriot system?

Answer. Yes, from what I currently understand and without the benefit of speaking to our allies, I do believe that deploying U.S. Patriot battery rotations to Poland for training and exercises could benefit NATO nations, assuming Poland continues with its planned future acquisition of a Patriot system.

KOSOVO

Question. What do you see as the major challenges in Kosovo, including in connection with the stand down of the Kosovo Protection Corps and the establishment of the Kosovo Security Force?

Answer. The security situation in Kosovo remains calm and the progress and success in Kosovo has led NATO to decide to move to the next stage in the mission, Deterrent Presence, which includes a significant reduction of forces in place. The UN Interim Administration Mission in Kosovo (UNMIK) is drawing down, and the European Rule of Law Mission (EULEX) has now achieved full operating capability. Following its deactivation in January, the Kosovo Protection Corps remains on track for its official stand-down in June and the Kosovo Security Force is on schedule to reach Initial Operating Capability in September with an effective strength of around 1,500. An extensive training program is in place which includes the first 400 civilian recruits. However, shortages in the trust fund and donations will have a tangible impact on delivering a force equipped to carry out its tasks and we may have a trained force that remains incapable of fulfilling its role in Kosovo.

NATO-EUROPEAN UNION

Question. The NATO-European Union (EU) relationship is viewed by some as competitive and by others as complementary.

How would you characterize the NATO–EU relationship today?

Answer. This matter is largely a political issue outside the purview of the role of the SACEUR. My understanding is that NATO has an established arrangement with the EU for supporting EU military operations called “Berlin Plus”. This has worked effectively and has improved EU–NATO coordination. The political level relationship also has improved, but probably not to the level of expectations by some countries. I understand this matter is seen as an important priority at the political level. If confirmed, I intend to explore areas for cooperation in the military sphere in a complementary way.

Question. In your view, what should be NATO’s position with regard to European efforts to strengthen the European Security and Defense Policy and build military capacity within the European Union?

Answer. NATO’s position will be decided at the political level. Without detailed information on existing capabilities, I am not prepared to take a position on development of EU military capacity. From a purely military perspective, however, every initiative strengthening or improving the military capabilities of our European allies should be welcomed; and if confirmed, this is an area in which I would seek to develop complementary activities.

Question. What is your view of the future of NATO–EU cooperation in areas relating to security, defense, and crisis management? Should NATO do more to institutionalize cooperation between the two organizations?

Answer. Future cooperation in these areas first depends on further development of the political relationship between NATO and the EU. It is my understanding that the “Berlin Plus” arrangement has been effective and I would prefer to Reserve judgment about future possibilities until I have the benefit of experience in the European theater and NATO. As I mentioned earlier, this is an interest area of mine and if confirmed I would pursue it in a collegial and complementary way.

BUILDING PARTNER CAPACITY WITHIN THE EUCOM AREA OF RESPONSIBILITY

Question. In the past few years, Congress has provided DOD a number of temporary authorities to provide security assistance to partner nations. These include

the global train and equip authority (section 1206) and the security and stabilization assistance authority (section 1207). Some have argued that security assistance has traditionally been a State Department responsibility and that these programs ought to be transferred from DOD to the Department of State.

What should be our strategic objectives in building the capacities of partner nations?

Answer. In the Guidance for Employment of the Force (GEF), the President has established theater strategic objectives for the EUCOM AOR. Building partner capacity is one of many means through which EUCOM achieves its Theater Objectives, while supporting US national objectives in the AOR. In general, capable, well-resourced Allies and Partners are critical enablers for all eight of EUCOM's Theater Objectives. Specifically, building partner capacity in the EUCOM AOR supports the following objectives:

- NATO is capable and willing to conduct out-of-area operations
- Partner nations have the capacity to provide for their own security and to sustain regional stability
- Local crises are prevented from becoming regional conflicts

Do these objectives differ by region, e.g. do our objectives within the EUCOM AOR differ from those in the SOUTHCOM AOR?

Answer. Yes, each Geographic Combatant Command has specific theater strategic objectives outlined in the GEF and its own theater strategy. The GEF objectives for the EUCOM AOR and EUCOM's theater strategy are specifically tailored to the opportunities and challenges found in Europe and Eurasia.

Question. What is your understanding of the purpose of the section 1206 global train and equip authority?

Answer. The purpose of section 1206 is to provide combatant commanders the ability to respond to urgent and emergent threats or opportunities in their AORs by building the capacity of allies and partners to conduct counterterrorism operations or support stability operations in which U.S. military forces are participating. The law requires the Secretary of Defense to coordinate with the Secretary of State when executing global train and equip authority.

Question. What is the relationship of the global train and equip authority to other security assistance authorities, such as DOD counternarcotics assistance and foreign military financing?

Answer. Global train and equip authority complements other security assistance authorities. It enables combatant commanders to respond to urgent situations or opportunities in the near-term and render assistance to allies and partners that cannot be provided under other authorities. When appropriate, it can and should be used in combination with other security assistance authorities as part of a comprehensive approach to building partner capacity.

Question. What should be done to ensure that the global train and equip authority does not duplicate the efforts of these other assistance programs?

Answer. Avoiding duplication of effort with other assistance programs involves two key measures. The first is adherence to the criteria of the global train and equip authority established in the law and DOD policy. The second is robust internal and interagency coordination in the development of proposals for funding under the global train and equip authority.

Question. What is your understanding of the purpose of the security and stabilization assistance authority (section 1207)?

Answer. The purpose of section 1207 is to facilitate non-military, interagency support to reconstruction, stabilization and security activities in foreign countries. It is an important tool in EUCOM's efforts in the Balkans and the developing Eastern European countries.

INTERAGENCY ORGANIZATION MODEL

Question. While you were the Commander of U.S. SOUTHCOM, the SOUTHCOM command structure was reorganized into an interagency model, where officials detailed from other agencies, such as the State Department, USAID, and the Federal Bureau of Investigations (FBI), are embedded as staff members within the command. U.S. Africa Command has adopted a similar organizational structure.

What were the reasons behind the decision to alter the command structure of U.S. SOUTHCOM and the lessons learned after a little more than a year of operation under this model?

Answer. As a Combatant Command, warfighting will always be the core competency at SOUTHCOM. However, SOUTHCOM reorganized to become a more interagency-oriented organization to address the specific challenges and opportunities in Latin America and the Caribbean.

The Secretary of Defense authorized this reorganization in September 2007, and SOUTHCOM's efforts were also highlighted as one of the Top 25 DOD Transformation Priorities. A principal driver for the reorganization stemmed from my assessment of the regional security environment, based upon the underlying conditions that foster the security challenges of the SOUTHCOM area of focus, such as narco-trafficking and other illicit-trafficking activities, and organized crime and gangs. Exacerbated by conditions of poverty, income inequality, and social exclusion, these security challenges are transnational in terms of impact and manifestation, and cross roles and mission lines of U.S. Government departments and agencies.

I am a strong supporter of the "3 D" approach—State does Diplomacy, AID does Development, and DOD does Defense. I believe that our ability to work together, and for us in DOD to be helpful to our partners, is a key element in providing security for our country. Our approach at SOUTHCOM is designed to ensure we do that in the best and most efficient way.

In this regard, the new SOUTHCOM organizational structure is designed to allow the command to collaborate proactively with the U.S. Government interagency community and with partner nations in the region—ultimately improving collective responses to regional and transnational security challenges.

Question. What staffing support did you receive from other government agencies?

Answer. SOUTHCOM has received a reasonable level of support from the interagency. There are 22 interagency personnel assigned to and working full-time at SOUTHCOM headquarters. Additionally, there are 13 part-time liaison officers with full access and to the headquarters building and use of SOUTHCOM credentials for email, data sharing and web page browsing. Beyond these 35 personnel, there are some 40 interagency personnel (in Miami; Washington, DC; and elsewhere) that have habitual relationships with SOUTHCOM via assignments by their home agencies (and many have either visited the headquarters or conducted brief 1–2 week orientation assignments).

The Department of State continues to take an active role in SOUTHCOM's transformation. Ambassador Paul Trivelli has been assigned as the Civilian Deputy to the Commander and retains the role of Political-Military Advisor. USAID has also assigned a Senior Development Advisor to the command. The SOUTHCOM Security and Intelligence Directorate is led by a two-star U.S. Coast Guard Admiral.

Question. Based on your experience with this new interagency command structure, if confirmed, what changes, if any, would you consider regarding the command structure for EUCCOM? What metrics would you use to make a determination?

Answer. Although some principles associated with the concept of functioning with an interagency approach have universal applicability and utility, every command and region of the world is unique. The changes my team and I made at SOUTHCOM to the command structure may not necessarily be the best approach for operations in the European theater. If confirmed, I would assess the security environment and challenges in that region and take a hard look at the current command structure at EUCCOM to ensure that it is maximized for effectiveness and efficiency. At this point, and based on what I know now, I do not anticipate undertaking significant organizational changes at EUCCOM.

NATO TRANSFORMATION

Question. What is your assessment of the role of Allied Command Transformation in effecting positive change among NATO member nations?

Answer. The role of SACT is to identify, facilitate and advocate the continuous improvement of Alliance capabilities to maintain and enhance the military relevance and effectiveness of the Alliance. SACT leads the transformation of NATO's military structure, forces, capabilities, and doctrines to improve interoperability and the military effectiveness of NATO. SACEUR and SACT work in cooperation, not competition, to realize effective change across the alliance.

Question. What will you do, if confirmed, to ensure that military capability and interoperability remain top priorities for NATO?

Answer. Military capability and interoperability should remain top priorities for NATO. Without the necessary military capabilities, armed forces will not be able to provide an effective contribution to whole-of-government efforts. From the Alliance's perspective, interoperability is the key to any multinational operation because in today's world, armed forces can no longer operate in an isolated manner, but have to share a very dynamic battle space and critical information. Ongoing operations in Afghanistan, Iraq, and Kosovo provide "real world" experience upon which to base our future plans. If confirmed, I would ensure that our ability to work together will be enhanced by these experiences.

UNITED NATIONS CONVENTION ON THE LAW OF THE SEA

Question. The United Nations Convention on the Law of the Sea (UNCLOS) is currently pending in the Senate.

What are your views on U.S. accession to UNCLOS?

Answer. Like the Chairman of the Joint Chiefs of Staff and the Chief of Naval Operations, I support U.S. accession to the Convention on the Law of the Sea.

Question. From a national security standpoint, what do you see as the advantages and disadvantages to being a party to UNCLOS?

Answer. As the CNO has testified, the Law of the Sea Convention provides a robust legal regime for global operations by U.S. Armed Forces. It codifies navigation and overflight rights and high seas freedoms that are necessary for mobility of our forces. It is completely in line with and supports the U.S. National Security Strategy. To date, 157 nations are signatories to the convention and I believe it is in our national security interests to do the same. Our current non-party status constrains our efforts to develop enduring maritime relationships with Partner Nations. It also inhibits our efforts to expand the Proliferation Security Initiative and elevates the level of risk for our Sailors as they undertake operations to preserve navigation rights and freedoms. We need to eliminate seams as much as possible when we operate in difficult circumstances in the maritime environment with like-minded partners—the Law of the Sea Convention would allow us to do that.

U.S. MILITARY BASING IN EUROPE

Question. Current DOD plans provide for the drawdown of U.S. Army forces in Europe to 32,000 U.S. soldiers by no later than 2013. However, General Craddock, the Commander, EUCOM, has recommended that the two brigades currently scheduled for redeployment back to the United States remain in Europe, keeping U.S. forces based there at a force of around 42,000.

Do you support maintaining the current U.S. force presence in Europe beyond 2013? Why or why not?

Answer. EUCOM and its forces have undergone significant transformation in recent years, transformation that was necessary in light of the changing geopolitical and security environment. That transformation continues today and will continue in the future as we continue to monitor and assess the security environment and U.S. requirements to ensure our safety, security, and protection of our national interests.

The decisions that were made in the past regarding U.S. force presence in Europe were made based on an assessment of the geopolitical and security realities at the time. It would be prudent of me, if confirmed as the EUCOM Commander, to conduct a fresh assessment of the security environment and make recommendations to the Secretary of Defense on the best mix of U.S. forces in Europe now and in the future.

QUALITY OF LIFE PROGRAMS FOR MILITARY FAMILIES

Question. The top three quality of life issues in the EUCOM AOR include obtaining quality living accommodations; gaining predictable access to health care to include family member dental support; and ensuring high-quality dependent education programs provided by the DOD Dependent Schools. Commanders in the EUCOM region have emphasized their support for and reliance on EUCOM resources to provide crucial morale programs, enhance retention, and foster esprit de corps.

What do you see as the most significant long-term challenges for EUCOM in preserving and enhancing the quality of life for assigned personnel while force redeployments to the United States proceed?

Answer. We are demanding a great deal from our force today and must remain focused on our warriors and their families. As we adjust our basing posture in Europe to become more operationally effective, we must also take the opportunity to address and enhance our Quality of Life posture as well. If confirmed, I will support existing EUCOM programs and processes that leverage our partnership with supporting agencies and Service components to build effective quality of life programs for our military families, and continue to focus on improving support to sustain our military personnel and their families. EUCOM servicemembers and their families (some facing their second or third deployments) deserve a quality of life commensurate to the Nation they serve. If confirmed, quality of life programs is one of the first topics I will discuss with the component commanders.

Question. If confirmed, what steps would you take to ensure the adequacy of support services for military families during the transition to ensure that vital support mechanisms, such as DOD schools, morale, welfare and recreation services, family

housing, and commissary and exchange facilities continue to serve military personnel?

Answer. Every year EUCOM hosts a DOD renown Quality of Life conference to discuss Quality of Life requirements and shortfalls with military members of all ranks and their families. If confirmed, I will continue the practice of listening directly to the men and women of the command on what we are doing right and where we need to improve. I would continue to work closely with our Quality of Life Partners to focus resources where needed. For example, I am aware that EUCOM has worked extensively with DODEA to ensure that our military families' dependents are receiving a quality education, and to substantially improve school investment to restore our aging school infrastructure. It is essential we retain and sustain this level of effort in the coming years. The EUCOM team, comprised of Service component and HQ EUCOM policy and technical experts, will continue to partner to ensure full support for our warriors and their families.

SEXUAL ASSAULT PREVENTION AND RESPONSE IN EUCOM

Question. Numerous cases of sexual misconduct involving military personnel have been reported over the last several years. Many victims and their advocates contend that they were victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate investigations and emotional support. Assertions have been made that their Command failed to respond appropriately by providing basic services, including medical attention and timely disposition of their charges.

What is your understanding of the resources and programs in place in EUCOM to offer victims of sexual assault the medical, psychological, investigative, and legal help that they need?

Answer. I am not aware of any shortfalls or deficiencies in command leadership, personnel, or training to prevent or respond to sexual assault in the EUCOM AOR. I will certainly look at the totality of these programs as a significant command responsibility.

I understand the entire EUCOM AOR has robust resources and programs in place to offer victims of sexual assault the medical, psychological, investigative, and legal help required. If confirmed, I will work with Service component commanders to ensure they continue to have the appropriate resources and support to manage sexual assault prevention and response training programs. In addition, I will ensure every measure is in place to support victims.

Question. What is your view of steps the command has taken to prevent sexual assaults in EUCOM?

Answer. From the briefings I have received, I believe that EUCOM works directly with Service components and their leadership in building robust training programs to prevent sexual assault. All military and civilian members across the command have mandatory training requirements on an annual basis focused on prevention. Education has proven to be critical in preventing sexual assault, therefore EUCOM will continue to educate all of our military and civilian members annually.

Question. What is your view of the adequacy of the training and resources in EUCOM to investigate and respond to allegations of sexual assault?

Answer. Across the EUCOM AOR, I am told there are adequate training and resources in order to investigate and respond to allegations of sexual assault. If confirmed, I will work with the component commanders to ensure we continue to emphasize the importance of training and resources to investigate and respond to allegations of sexual assault.

Question. Do you consider the current sexual assault policies and procedures, particularly those on confidential reporting, to be effective?

Answer. I am not aware of any problems with current sexual assault policies and procedures.

Question. What problems, if any, are you aware of regarding the manner in which the confidential reporting procedures have been put into effect?

Answer. I am not aware of any problems in this regard.

MENTAL HEALTH OF SERVICEMEMBERS AND STRESS ON THE FORCE

Question. The committee is concerned about the stress on military personnel resulting from lengthy and repeated deployments and their access to mental health care to deal with this increased stress. The Chairman of the Joint Chiefs of Staff recently said that the shooting of five servicemembers at a stress control clinic by a troubled Army sergeant in Iraq speaks to "the need . . . to redouble our efforts" and "the issue of multiple deployments" and increasing dwell time "to try to improve to relieve that stress." This tragic incident, as well as increasing suicide rates in every Service, are clear reminders that servicemembers, particularly those who have

been deployed multiple times, are under tremendous stress and need access to mental health care.

In your view, are there sufficient mental health assets in EUCOM to address the mental health needs of the military personnel and their families?

Answer. I understand there is a shortfall in health care professionals to assist military personnel and their families. However, this shortfall is being addressed in the fiscal year 2010 budget under the Warrior and Family Mental and Behavioral Health Support Program. EUCOM has requested \$12.5 million in fiscal year 2010 for additional mental health care professionals to evaluate and counsel military and family members.

Question. If confirmed, what actions will you take to address the mental health needs of military personnel and their families in EUCOM?

Answer. Following budgeting actions, I would ensure all mental health professionals are hired in an expeditious manner.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes, I do.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes, I do.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Commander, U.S. EUCOM and SACEUR?

Answer. Yes, I do.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes, I do.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes, I do.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

BASING OF FORCES IN EUROPE

1. Senator MCCAIN. Admiral Stavridis, the Department of the Army announced today the cancellation of plans to build three Brigade Combat Teams (BCTs) at Fort Bliss, TX; Fort Stewart, GA; and Fort Carson, CO, as well as announcing that White Sands Missile Range, NM, will no longer receive a BCT from Europe in fiscal year 2013 as originally planned. This is the latest decision in a 5-year process by the Department of Defense (DOD) to realign the military's global force posture in order to respond to emerging threats and missions. In your opinion, how many Army BCTs should be stationed in Europe?

Admiral STAVRIDIS. From what I have seen so far, the Army cancellation of plans to build three BCTs is not directly tied to the delay in a BCT moving from Europe to New Mexico. I am aware of a proposal within the Department to review the earlier decision to move two BCTs from Europe to the continental United States (CONUS), in light of the realization that the strategic landscape has changed between the time of the original decision to return those two BCTs to CONUS and present day. However, I also understand that the ongoing Quadrennial Defense Review (QDR) has a focus group looking specifically at Ground Forces in Europe as a directed issue. The results of this study will validate what is the correct number of BCTs to station in Europe in order to work within the resource constraints of the Department while facilitating an acceptable amount of strategic risk.

Some of the decisions that were made in the past regarding U.S. force presence in Europe and have yet to be completely realized were made based on an assess-

ment of the geopolitical and security realities at the time. Should I be confirmed as the European Command (EUCOM) Commander, I will look forward to working with the Secretary of Defense on the best mix of U.S. forces in Europe now and in the future.

2. Senator MCCAIN. Admiral Stavridis, what is the military rationale for this number?

Admiral STAVRIDIS. As I stated in my response to Question #1, should I be confirmed as the EUCOM Commander, I will look forward to working with the Secretary of Defense on the best mix of U.S. forces in Europe now and in the future.

However, the current rationale to review EUCOM ground force requirements is predicated on the projected security environment unique to the EUCOM AOR. The demand signal is to have a force in Europe capable of deterring, dissuading, and engaging adversaries from a position of U.S. strength in Europe. This forward presence assures our allies and sustains the U.S. leadership in NATO. It also maintains strong relationships with key alliance partners in Europe and Eurasia which is important to enabling global access and strategic reach. Moreover, forward stationed U.S. forces fulfill an expeditionary mission just as CONUS based forces do as part of the general global force management pool. However, their persistent forward presence in Europe affords them an inherent capability to conduct theater security cooperation in the margins of their Global Force Management (GFM) rotations, thereby increasing the capability of European partner nations to export security from Europe for missions in ISAF and Iraq.

If confirmed, I plan to coordinate with the ongoing efforts of the QDR to adequately assess the right defense posture to maintain in Europe, particularly with respect to ground forces, in order to ensure that EUCOM has the forces it needs to meet mission requirements.

3. Senator MCCAIN. Admiral Stavridis, do you agree with the current DOD plan to relocate two BCTs in 2012 and 2013 from Europe to locations in the United States?

Admiral STAVRIDIS. I am aware of a proposal within the Department to review the earlier decision to move two BCTs from Europe to CONUS, in view of the opinion that the strategic landscape has changed between the time the original BCT decision was made and today. However, I also understand that the ongoing QDR has a focus group looking specifically at Ground Forces in Europe as a directed issue. The results of this study will validate the correct number of BCTs to station in Europe in order to work within the resource constraints of the Department while facilitating an acceptable amount of strategic risk.

If confirmed, I plan to continue to work with the Department of the Army, the Joint Staff, and the Office of the Secretary of Defense efforts on the directed issue for Ground Forces in Europe as part of the ongoing QDR.

4. Senator MCCAIN. Admiral Stavridis, do you concur with the recent decision by the Air Force to remove tactical fighters from Europe?

Admiral STAVRIDIS. I support the Defense Department's plan to sustain U.S. air superiority through the program as articulated in the Secretary's Defense Budget recommendation announcement. This plan includes a retirement of tactical aircraft from among the oldest in the U.S. Air Force inventory, as well as significant investment in a fifth generation tactical fighter capability.

From what I have seen so far, I do not believe the fighter reductions have been ultimately decided to the particulars of how many should be stationed at each location. If confirmed, I intend to fully coordinate any fighter modernization program with the U.S. Air Forces Europe component, as I believe it is important to find the right balance between sustainment of current capability and delivery of future systems.

5. Senator MCCAIN. Admiral Stavridis, in your opinion, what major military units and at what locations in Europe would you need to successfully carry out the missions of EUCOM?

Admiral STAVRIDIS. I believe military units in Europe need to be of sufficient capacity and capability to conduct missions across the spectrum of military operations: from 'Phase 0' engagement and security cooperation activities to major combat operations. Military forces in Europe provide a critical layer to the strategic depth and defense of the homeland forward, and remain available to the DOD global force management pool for out-of-area operations. These military units need to remain on the leading edge of technological capability in order to effectively lead our partners and allies. Our locations in Europe should continue to support not only these for-

ward assigned forces but should reinforce our critical partnerships with European nations committed to the global security effort. These locations are visible demonstrations of U.S. commitment to our host nations and enable the global access and strategic reach the United States requires in order to support other geographic regions from the position of stability and strength in Europe. Additionally important are the support units and facilities required to provide high quality of life for European soldiers, sailors, airmen, and marines.

6. Senator McCAIN. Admiral Stavridis, concerning basing of forces in Europe, United States Army Forces in Europe is planning to spend over \$320 million to relocate its headquarters from Heidelberg, Germany, to Weisbaden, Germany. If confirmed, will you take a look at this plan to ensure it is in the best interest of your forces in Europe and the U.S. taxpayers? Please report back to this committee whether, in your professional opinion, this is a wise and prudent investment.

Admiral STAVRIDIS. I am aware that the ongoing QDR has a focus group looking specifically at Ground Forces in Europe as a directed issue and that options regarding the Wiesbaden consolidation are being examined. The results of the QDR study on this issue will validate the way ahead in light of operational requirements and considering the fiscal constraints the Department faces regarding the basing of our forces in Europe.

If confirmed, I will ensure we adequately steward our Nation's resources while improving efficiencies in our organizational construct. I will also report back to the committee following the completion of the QDR study.

QUESTION SUBMITTED BY SENATOR SUSAN COLLINS

RUSSIAN TRANSFORMATION

7. Senator COLLINS. Admiral Stavridis, despite a recession and massive cuts throughout his government, Russian President Dmitri Medvedev has vowed to increase defense spending by nearly 26 percent to about \$37 billion, and to transform Russia's Soviet-era defense industry into a modern technological power. Media reports indicate Medvedev intends to cut Russia's officer corps from 355,000 to 150,000, and dismiss more than 200 generals, 15,000 colonels, and 70,000 majors. How will Russia's transformation factor into the upcoming QDR?

Admiral STAVRIDIS. Regardless of media reports of Russian transformation, the fact of the matter is that the European and Eurasian security environment is in complicated transition—coping with anxiety associated with the perception of unpreparedness to address 21st century challenges, coupled with unresolved 20th century security problems, and a global economy suffering the worst crisis in almost 100 years. The August 2008 Russia-Georgia conflict drew into question not only the vision of a post-Cold War Europe, but the fundamental post-Cold War approach to security. Russia is an international prestige-seeking state focused on economic growth. It wants to solidify its economic progress and strives to be perceived as a modern great power. Our relationship, and those of our allies and partners, with Russia is a significant security determinant on the continent. Prudent policy dictates that we conduct a strategic review of those relationships and our role within them, within the NATO Alliance, and on the continent.

If confirmed, I plan to coordinate with ongoing efforts of the QDR to ensure the Europe and Eurasia security environment is sufficiently addressed and that EUCOM is properly positioned in that environment.

[The nomination reference of ADM James G. Stavridis, USN, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
May 12, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment in the United States Navy to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

791

To be Admiral

ADM James G. Stavridis, 5127.

[The biographical sketch of ADM James G. Stavridis, USN, which was transmitted to the committee at the time the nomination was referred, follows:]

DEPARTMENT OF THE NAVY
OFFICE OF THE CHIEF OF NAVAL OPERATIONS
2000 NAVY PENTAGON
WASHINGTON, D.C. 20350-2000

APR 21 2009

Dear Mr. Chairman:

The President, under the provisions of Section 601, Title 10, United States Code, has submitted to the Senate the nomination of Admiral James G. Stavridis, United States Navy, for reappointment to the grade of admiral.

Admiral Stavridis is presently serving as Commander, United States Southern Command. He will be assigned as Commander, United States European Command and Supreme Allied Commander, Europe. He is 54 years of age.

This action will not result in the Navy exceeding the number of authorized four-star positions.

For the information of the Committee, I am enclosing a career resume on Admiral Stavridis which includes a summary of his joint duty assignments.

Most respectfully,

A handwritten signature in cursive script, appearing to read "R. S. Brskine".

R. S. BRSKINE
Director, Flag Officer
Management and Distribution

The Honorable Carl Levin
Chairman, Senate Armed Services Committee
United States Senate
Washington, DC 20510

cc: The Honorable John McCain
Ranking Member
Senate Armed Services Committee
United States Senate
Washington, DC 20510

RÉSUMÉ OF ADM JAMES GEORGE STAVRIDIS, USN

15 Feb 1955	Born in West Palm Beach, FL
01 Jun 1976	Ensign
02 Jun 1978	Lieutenant (junior grade)
01 Jul 1980	Lieutenant
01 Oct 1984	Lieutenant Commander
01 Nov 1990	Commander
01 Jun 1997	Captain
08 Jan 2001	Designated Rear Admiral (lower half) while serving in billets commensurate with that grade
01 Mar 2002	Rear Admiral (lower half)

01 Jan 2005 Rear Admiral
 01 Sep 2004 Vice Admiral
 19 Oct 2006 Admiral, Service continuous to date

Assignments and duties:

	From	To
U.S. Naval Academy (Instructor)	June 1976	Aug. 1976
Naval Amphibious Base, Coronado, San Diego, CA (DUINS)	Aug. 1976	May 1977
Service School Command, Naval Training Center, Great Lakes, IL (DUINS)	May 1977	June 1977
USS <i>Hewitt</i> (DD 966) (Anti-Submarine Warfare Officer)	July 1977	Apr. 1979
Surface Warfare Officers School Command Newport, RI (DUINS)	Apr. 1979	Aug. 1979
USS <i>Forrestal</i> (CV 59) (Electrical Officer)	Aug. 1979	Mar. 1981
Office of the CNO (Strategic Concepts Group) (OP-603)	Mar. 1981	Aug. 1981
Tufts University (Student)	Aug. 1981	Oct. 1983
Surface Warfare Officers School Command Newport, RI (DUINS)	Oct. 1983	May 1984
Combat Systems Engineering Development Site, Moorestown, NJ (DUINS)	May 1984	Sep. 1984
USS <i>Valley Forge</i> (CG 50) (Operations Officer)	Oct. 1984	Aug. 1987
Office of the CNO (Assistant for Long Range Requirements)	Sep. 1987	July 1989
Surface Warfare Officers School Command Newport, RI (DUINS)	July 1989	Oct. 1989
XO, USS <i>Antietam</i> (CG 54)	Oct. 1989	July 1991
National War College (Student)	July 1991	July 1992
Office of the Secretary of the Navy (Special Assistant and Speechwriter)	July 1992	Mar. 1993
Ships Material Readiness Group, Newport, RI (DUINS)	Mar. 1993	June 1993
CO, USS <i>Barry</i> (DDG 52)	June 1993	Dec. 1995
Joint Staff (Branch Chief, Force Policy Branch) (J5)	Dec. 1995	Nov. 1997
Commander, Destroyer Squadron Two One	Nov. 1997	Dec. 1998
Office of the Secretary of the Navy (Executive Assistant)	Jan. 1999	Mar. 2001
Office of the CNO (Deputy Director for Requirements Assessment, N81D/Director, CINC Liaison Division, N83)	Mar. 2001	Jan. 2002
Office of the CNO (Director, Naval Operations Group)	Jan. 2002	Aug. 2002
Commander, Cruiser Destroyer Group 12	Aug. 2002	July 2004
Office of the Secretary of Defense (Senior Military Assistant to the Secretary of Defense)	July 2004	Oct. 2006
Commander, U.S. Southern Command	Oct. 2006	To date

Medals and awards:

Defense Superior Service Medal
 Legion of Merit with four Gold Stars
 Meritorious Service Medal with two Gold Stars
 Navy and Marine Corps Commendation Medal with three Gold Stars
 Navy and Marine Corps Achievement Medal
 Joint Meritorious Unit Award with Bronze Oak Leaf Cluster
 Navy Unit Commendation
 Meritorious Unit Commendation
 Navy "E" Ribbon with "E" Device
 Navy Expeditionary Medal
 National Defense Service Medal with one Bronze Star
 Armed Forces Expeditionary Medal with two Bronze Stars
 Southwest Asia Service Medal with one Bronze Star
 Global War on Terrorism Expeditionary Medal
 Global War on Terrorism Service Medal
 Armed Forces Services Medal with two Bronze Stars
 Sea Service Deployment Ribbon with three Bronze Stars
 NATO Medal
 Kuwait Liberation Medal (Kingdom of Saudi Arabia)
 Kuwait Liberation (Kuwait)
 Expert Rifleman Medal
 Expert Pistol Shot Medal

Special qualifications:

BS (English) U.S. Naval Academy, 1976
 Designated Surface Warfare Officer, 1978
 Ph.D. (Foreign Affairs) Tufts University, 1984
 Graduate of Naval War College, 1985
 Graduate of National War College, 1992
 Designated Joint Specialty Officer, 1999
 Capstone, 2001-2

Personal data:

Wife:

Laura Elizabeth Hall of Ann Arbor, Michigan.

Children:

Christina A. Stavridis (Daughter), Born: 20 August 1985.

Julia E. Stavridis (Daughter), Born: 14 February 1991.

Summary of joint duty assignments:

Assignment	Dates	Rank
Joint Staff (Branch Chief, Force Policy Branch) (J5)	Dec. 1995–Dec. 1997	CDR/CAPT
Office of the Secretary of Defense (Senior Military Assistant to the Secretary of Defense).	July 2004–To date	VADM
Commander, U.S. Southern Command	Oct. 2006–to date	ADM

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by ADM James G. Stavridis, USN, in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR–228

Washington, DC 20510–6050

(202) 224–3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A–9, B–4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

James G. Stavridis.

2. **Position to which nominated:**

Commander, United States European Command and Supreme Allied Commander Europe.

3. **Date of nomination:**

May 12, 2009.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

February 15, 1955; West Palm Beach, FL.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Married to Laura Elizabeth Stavridis (maiden name: Hall).

7. **Names and ages of children:**

Christina, 23.

Julia, 18.

8. **Government experience:** List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.

None.

9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

10. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

U.S. Naval Institute, Surface Navy Association, Council on Foreign Relations.

11. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

None.

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes.

13. **Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

JAMES G. STAVRIDIS.

This 2nd day of April, 2009.

[The nomination of ADM James G. Stavridis, USN, was reported to the Senate by Chairman Levin on June 9, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on June 10, 2009.]

[Prepared questions submitted to Lt. Gen. Douglas M. Fraser, USAF, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and the chain of command by clearly delineating the combatant commanders’ responsibilities and authorities and the role of the Chairman of the Joint Chiefs of Staff. These reforms have also vastly improved cooperation between the Services and the combatant commanders, among other things, in joint training and education and in the execution of military operations.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?
Answer. No.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. I do not have any recommendations for modifications to the Goldwater-Nichols provisions. If confirmed and if I see a need for modifications, I will not hesitate to make appropriate recommendations.

RELATIONSHIPS

Question. Section 162(b) of title 10, U.S.C., provides that the chain of command runs from the President to the Secretary of Defense and from the Secretary of Defense to the combatant commands. Other sections of law and traditional practice, however, establish important relationships outside the chain of command. Please describe your understanding of the relationship of the Commander, U.S. Southern Command (SOUTHCOM), to the following:

The Secretary of Defense.

Answer. The Commander is responsible to the President and the Secretary of Defense for accomplishing the military missions assigned to him and exercising command authority over forces assigned to him by the Secretary of Defense.

Question. The Deputy Secretary of Defense.

Answer. The Deputy Secretary of Defense performs duties as delegated by the Secretary and exercises the duties of the Secretary in his absence. The Commander communicates regularly with the Deputy Secretary and provides the information and support the Deputy Secretary needs to accomplish his job.

Question. The Under Secretary of Defense for Policy.

Answer. The Commander does not have a direct command relationship with the Under Secretary of Defense for Policy. The Commander routinely interacts with, exchanges information, and coordinates with the Under Secretary on strategic policy issues.

Question. The Under Secretary of Defense for Intelligence.

Answer. The Commander does not have a direct command relationship with the Under Secretary of Defense for Intelligence. The Commander does interact with, exchange information, and coordinate with the Under Secretary as needed to set and meet intelligence requirements for the command's area of focus.

Question. The Assistant Secretary of Defense for International Security Affairs.

Answer. The Commander does not have a direct command relationship with the Assistant Secretary of Defense for International Security Affairs, but routinely exchanges information and coordinates on issues of mutual concern.

Question. The Assistant Secretary of Defense for Special Operations and Low Intensity Conflict and Interdependent Capabilities.

Answer. The Commander does not have a direct command relationship with the Assistant Secretary of Defense for Special Operations and Low Intensity Conflict. The Commander routinely exchanges information and coordinates on issues of mutual concern.

Question. The Assistant Secretary of Defense for Homeland Defense and America's Security Affairs.

Answer. The Commander does not have a direct command relationship with the Assistant Secretary of Defense for Homeland Defense and America's Security Affairs but routinely exchanges information and coordinates on homeland defense matters.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The Chairman serves as the principal military advisor to the President and the Secretary of Defense and is a key communication link between the combatant commanders and the President. The SOUTHCOM Commander keeps the Chairman apprised of significant events and issues in his area of focus to enable the Chairman to perform his critical role.

Question. The Secretaries of the Military Departments.

Answer. The Secretaries of the Military Departments are responsible for organizing, training, and equipping forces in their departments for assignment to the combatant commanders. They are responsible for the administration and support of these forces. The commander does not have a direct command relationship with the Service Secretaries, but routinely exchanges information and coordinates on issues of mutual concern.

Question. The Chief of Staff of the Army, Chief of Naval Operations, Commandant of the Marine Corps and Chief of Staff of the Air Force.

Answer. The Service Chiefs are responsible for organizing, training, and equipping forces for assignment to the combatant commands. The Commander routinely discusses issues and concerns with the Service Chiefs and works closely with them to understand service capabilities, discuss combatant command requirements, and effectively employ service capabilities in conducting the U.S. SOUTHCOM mission.

Question. The other combatant commanders, particularly U.S. Northern Command.

Answer. The Commander, SOUTHCOM maintains a close relationship with the other combatant commanders, especially U.S. Northern Command (NORTHCOM), closely coordinating issues of mutual concern, maintaining frequent contact, and exchanging information. When directed or specified by the Secretary of Defense, the relationship between combatant commanders becomes formal for the planning and execution of specific operational plans.

Question. U.S. Chiefs of Mission within the SOUTHCOM area of responsibility.

Answer. The Commander does not have a formal relationship with the Chiefs of Mission. The respective U.S. Ambassador is responsible for directing and supervising all U.S. Government activity in the host nation, with the exception of those military activities under the combatant commander's direction. The Geographic Combatant Commander routinely discusses and coordinates issues and concerns of mutual interest with the Chief of Mission within the host nation. The combatant commanders direct and coordinate U.S. military activity throughout their areas of responsibility, negotiating force protection arrangements with Chiefs of Mission, as appropriate. If confirmed, I intend to maintain close coordination and contact with the Chiefs of Mission throughout the SOUTHCOM area of focus. In addition, I will continue to host annual subregional conferences with the Chiefs of Mission to exchange regional information and perspectives.

Question. Director of National Drug Control Policy, Executive Office of the President.

Answer. The Commander does not have a direct command relationship with the Director of the Office of National Drug Control Policy. The Commander interacts with, exchanges information, and coordinates with the Director as needed to set and meet counternarcotics requirements and policy for the command's area of focus.

DUTIES

Question. What is your understanding of the duties and functions of the Commander, SOUTHCOM?

Answer. The Commander, SOUTHCOM is responsible for directing the missions assigned by the President and the Secretary of Defense, to include conducting military operations, logistical support, and joint training of assigned military forces. The Commander, SOUTHCOM is responsible for conducting these operations within his assigned area of focus which includes 31 nations and 10 territories.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. I am honored the President nominated me to be the Commander, SOUTHCOM. Over the past 3½ decades, I have served in a variety of Air Force and joint assignments, in both operational and staff positions. If confirmed, these experiences have prepared me well to meet the challenges and opportunities of commanding SOUTHCOM.

I commanded a fighter squadron in the Pacific, a combined air operations group in the United States, including periods of combat operations during Operation Southern Watch, a combined air wing supporting worldwide airlift and providing forces for combatant command operations, the Space Warfare Center, and simultaneously commanded four organizations in Alaska, including a binational NORAD region, a PACOM subunified command, a NORTHCOM joint task force, and a USAF numbered air force. My current position has given me the experience and insight of helping to direct the operation of a geographic combatant command. In addition to this experience, I served in various staff positions on the Headquarters, U.S. Air Force staff, the Office of the Secretary of Defense staff, the U.S. Pacific Command staff, and the Air Force Space Command staff. These jobs have enabled me to observe and participate in joint, international, and interagency strategy and policy development as well as have given me the opportunity to engage with international partners across the Asia Pacific, to include military engagement with representatives from Chile and Mexico.

In addition to military experience, I lived in Bogota, Colombia, for 3 years and graduated from high school there. While I need to regain proficiency, I have a working level knowledge of Spanish. As a result of my time in Colombia, I have maintained a life-long interest in and affinity for Latin America and the Caribbean. I also visited Central America while assigned to 12th Air Force in the mid-1980s and visited Central and South America in early 2002 as part of a Capstone trip.

Question. Do you believe that there are any steps that you need to take to enhance your expertise to perform the duties of the Commander, SOUTHCOM?

Answer. If confirmed, I will engage with key leaders and personnel within the executive and legislative branches of the U.S. Government to better understand United States policies and interests in the SOUTHCOM area of focus. I will engage with government and military leaders of the Nations throughout the region to understand their perspectives and concerns. I will engage with experts in academia, the media, and think tanks around the United States and in Latin America and the Caribbean to understand the complexities of the issues impacting the region. I will engage with the commanders of other U.S. combatant commands to better understand operational integration across combatant command seams. Finally, I will continue to study and enhance my proficiency in Spanish and familiarize myself with Portuguese.

MAJOR CHALLENGES

Question. If confirmed as the Commander of SOUTHCOM, you will be responsible for all military operations in that region. These include operations supporting homeland defense and security, the Department's counternarcotics efforts in the source nations and transit zone, detainee and interrogation operations at Guantanamo Bay, security of the Panama Canal, and development of democratic values within the military organizations of the region. If confirmed, you will be pursuing these missions amidst an economic downturn and the threat of a pandemic, and at a time when the region appears to be moving away from democracy in some nations and growing increasingly unstable in other nations.

In your view, what are the major challenges and problems you would confront if confirmed as the next Commander, SOUTHCOM?

Answer. I do not foresee any imminent conventional military threat to the United States in the region. However, other security challenges are present, including narcoterrorism, illicit trafficking, crime, and natural disasters. In addition, transnational radical extremist organizations in the region are actively engaged with fundraising and logistics support for their parent organizations.

Narcoterrorist networks are active throughout the region. These networks include domestic narco-terrorists, such as the FARC in Colombia and the Shining Path in Peru. These groups undermine democratic governments, terrorize populations, impede economic development, and hinder domestic and regional stability.

Global illicit trafficking remains a significant transnational security threat in the region. Illicit trafficking undermines domestic and regional stability in much the same manner as narco-terrorism.

Islamic radical terrorist networks are also active, primarily involved in fundraising and logistical support for parent organizations based in the Middle East, such as Hizballah and Hamas.

Still another challenge to watch is the nexus between these two groups in which well resourced narco-traffickers coordinate their activities with terrorist networks and vice versa.

Underlying the security challenges mentioned above, poverty, income inequality, and lack of opportunity drive social unrest and corruption, fostering many of the region's public security challenges. These conditions make societies vulnerable to the influence of illicit activity—such as drugs, crime, gangs, and illicit immigration. Such conditions are aggravated by the region's economic downturn.

Question. If confirmed, what plans do you have for addressing these challenges and problems?

Answer. If confirmed, I will work with the U.S. interagency and partner nations to enhance our mutual capability to address the region's security challenges. The challenges we face affect all the Nations in the region and require collaborative, interagency and international solutions. I will continue to evaluate, assess, and execute SOUTHCOM's comprehensive regional plan to address the illicit trafficking problem plaguing the region. I will continue to reach out to the militaries in the region, encourage regional engagement and train, exercise, and partner as appropriate, to address regional security concerns. In addition, I will continue to reach out to those militaries in countries that have been distancing themselves from the United States to encourage military engagement.

Finally, if confirmed, I will maintain a command focus on the detention facility in Guantanamo Bay to ensure all laws, regulations, and policies are followed until the last detainee departs the facility and the detention facility is closed.

Question. What actions would you propose to counter the growing threat to democracy in the region?

Answer. I think the key to countering the threat to democracy in the region is continuing to improve the security, stability, and adherence to the rule of law by nations in the region. SOUTHCOM can improve security and stability in the region

by continuing to build partner nation security capacity consistent with the command's Theater Security Cooperation program. Improving security and stability creates the conditions necessary for improving adherence to the rule of law, which in turn fosters and preserves democracy. SOUTHCOM is only a part of the solution, however, because effectively countering threats to democracy requires the United States to continue a whole-of-government approach. If I am confirmed, I will work closely with the other Federal agencies and our regional partners to support and encourage the continued growth of democracy in the region. In addition, I will constantly evaluate and assess the command's Theater Security Cooperation program, adjusting it as required, to support U.S. and regional efforts to support democracy. My intent, if confirmed, will be to continue the command's efforts to make SOUTHCOM an indispensable regional partner.

Question. What is your assessment of the strengths and weaknesses of military-to-military exchange programs and contacts in the SOUTHCOM area of responsibility (AOR)?

Answer. I think SOUTHCOM maintains a strong military-to-military exchange program. They use the full set of available tools to conduct their program, including a robust State Partnership program, an innovative Partnership of the America's maritime engagement operation, and continuing military exchanges, totaling 845 events in 2008. If confirmed, I will work hard to enhance and increase these important military-to-military programs.

INTERAGENCY ORGANIZATION MODEL

Question. The SOUTHCOM structure was reorganized into an interagency model, where officials detailed from other agencies, such as the State Department, U.S. Agency for International Development (USAID), and the Federal Bureau of Investigations (FBI), are embedded as staff members within the command. U.S. Africa Command has adopted a similar organizational structure.

Please discuss your views of this new command structure model.

Answer. From my understanding, SOUTHCOM reorganized to become a more interagency-oriented command in order to better meet its mission. Many of the underlying challenges in the region fall under the lead of other U.S. agencies and the complexity of coordinating and working to address these challenges only reinforces the need for coordinated interagency solutions.

As I understand it, this new organization enables SOUTHCOM to collaborate proactively with U.S. executive branch agencies and departments and with partner nations in the region—improving collective responses to regional and transnational security challenges. The new structure also created the position of Civilian Deputy to the Commander, who is a Senior Foreign Service Officer from the State Department and a former Chief of Mission from the area of focus.

In my view, this new command structure assists SOUTHCOM in synchronizing its activities with ongoing whole-of-government approaches in the region, and ensures it continues to conduct military operations with an unbroken and capable military chain of command and authority.

Question. Based on your understanding of this new interagency command structure, if confirmed, what changes, if any, would you consider making regarding the command structure and what metrics would you use to make a determination?

Answer. If confirmed, I will examine the organization closely to understand its operation and assess its effectiveness. My study of SOUTHCOM indicates the command, through a directorate specifically designed to assess its processes and activities, regularly evaluates its effectiveness and makes changes as needed to improve its capability to direct its operations.

COUNTERNARCOTICS EFFORTS

Question. Each year the Department of Defense (DOD) spends several hundred million dollars to counter the flow of illegal drugs into the United States, yet the availability of drugs on the street has not been significantly reduced, and some countries continue to face internal security challenges in responding to this threat. Much of these funds are executed within the SOUTHCOM AOR, and some have questioned the effectiveness and focus of our counternarcotics programs.

What is your assessment of the ongoing counternarcotics operations within the SOUTHCOM AOR?

Answer. As I understand it, while many challenges remain, counternarcotics operations in the SOUTHCOM area of focus are providing a positive impact on the comprehensive U.S. Government program.

If confirmed, what changes, if any, would you propose?

Answer. If confirmed, I will regularly assess the situation and evaluate ways to improve SOUTHCOM's role in the program. Based on my initial impression, I will continue SOUTHCOM's work to strengthen its already strong coordination and communication with U.S. Federal agencies and with partner nations. I will continue to engage with our partner nations and help them improve their counternarcotics capabilities. I will continue to build on command successes to date, continue to enhance our national and international efforts to anticipate and adjust to changes in illicit drug activity, and continue to improve counternarcotics cooperation and focus across the region, as well as with other combatant commands.

Question. How would you recommend that the success of the Department's counternarcotics programs be measured?

Answer. No single DOD measure can effectively gauge the success of a counternarcotics program which encompasses diverse elements from across the U.S. and international governments. As the lead agency for counternarcotics detection and monitoring in the source and transit zones, the DOD concentrates on successful detection of illicit drug activity and, as appropriate, supports resultant endgame operations. Last year, for example, SOUTHCOM's Interagency Task Force stopped more than 228 metric tons of cocaine and helped facilitate the capture, by U.S. law enforcement or partner nation organizations, of 317 drug traffickers. In addition, the DOD trained and provided logistical support to partner nations' militaries and law enforcement agencies, substantially improving their counternarcotic capabilities. While such efforts are only part of a comprehensive program, they demonstrate the positive impact the DOD is making in regional counternarcotics efforts.

Question. Do you believe that the current programs that the Department is pursuing are the most effective for the region, or should the Department's efforts focus elsewhere?

Answer. DOD constantly evaluates its programs and seeks ways to improve results. DOD's focus is on detection and monitoring operations. Its programs complement other U.S. programs, such as the Department of State's eradication and economic development programs. All these programs must complement and support each other to work across the entire illicit narcotics enterprise—production, transportation, consumption, treatment, and education—to produce effective results. I think the current DOD programs are appropriately synchronized with other agency efforts, but if confirmed, I will continue to explore ways to improve coordination and increase DOD's efficiency and effectiveness working across interagency requirements.

Question. Compared to other missions that you would be responsible for as Commander, SOUTHCOM, if confirmed, where would you rank counternarcotics in terms of its contribution to our national security and the ability of DOD to make a meaningful contribution?

Answer. One of my top priorities, if confirmed, will be supporting the broad U.S. struggle against violent extremism. My understanding is that some of the drug trafficking networks in Latin America have extremist group affiliations, and at least a portion of drug trafficking profits may be transferred by extremist network members to their parent terrorist groups. Because of this, the counternarcotics mission and the struggle against violent extremism are intertwined. I think the Defense Department should continue to support U.S. and partner nation drug enforcement efforts, working to deny narco-traffickers the capability to maintain terrorist group affiliations through their narcotics trade.

Question. West Africa has emerged as a key player in the trafficking of drugs from Latin American to Europe. Latin American drug cartels are taking advantage of poor countries like Guinea Bissau that have weak central governments, as well as corrupt and inept law enforcement agencies, that are unable to control their coasts and ports.

In your view, what is the most effective way for U.S. Africa Command and SOUTHCOM to collaborate along this seam between your respective Commands?

Answer. From what I've studied, over the past year the Joint Interagency Task Force-South (JIATF-S) worked closely with U.S. Africa Command to share information and help them build an effective counternarcotics organization. Additionally, in an effort to directly improve the coordination between SOUTHCOM and U.S. Africa Command, the two commanders and staffs recently held staff talks that brought together all levels of both commands, from action officer through senior leadership, to discuss this issue along with several other topics. Staff counterparts across the commands work on a one-to-one basis on everything from actionable drug interdiction information to collaborative papers. If confirmed, I intend to continue this close collaboration and information sharing, and where it makes sense, coordinate activities between the two combatant commands.

Question. There has been a surge in drug-related violence in Mexico over the past year, which has increased the risk of cross-border violence into the United States. Much of the drug supply comes into Mexico across its southern border. While Mexico is in the NORTHCOM AOR, the rest of Latin America is in the SOUTHCOM AOR. So the security situation in Mexico is an example of the need for a well-coordinated effort between NORTHCOM and SOUTHCOM.

What is your vision of how SOUTHCOM and NORTHCOM could work together in a fully coordinated and seamless fashion with respect to Mexico and other security challenges?

Answer. The drug-related violence in Mexico remains unsettling. As indicated, the flow of drugs starts in South America and passes through Central America. I'm told that SOUTHCOM and NORTHCOM collaborate regularly to deal with this and other security issues. For example, the two commands held a major coordination conference last year, use liaison officers for daily collaboration, have a Joint Operating Area through JIATF-S where they collaborate in real time on illicit trafficking interdiction, and share information on countries of mutual interest under the new Unified Command Plan. If confirmed, I will continue the close coordination between SOUTHCOM and NORTHCOM to address illicit trafficking and other security challenges.

Question. The United States and Mexico announced in 2007, the start of a multiyear, bilateral security agreement called the Mérida Initiative. This Initiative aims to combat drug trafficking and other criminal activity along the U.S.-Mexican border, as well as in Central America. The U.S.-Mexican border is viewed as especially important for U.S. counternarcotics efforts because Mexico is currently the primary point of entry for cocaine and other drug shipments smuggled into the United States.

What is your understanding of the Mérida Initiative as it relates to Central America and the role of SOUTHCOM?

Answer. My understanding is that in addition to providing assistance to Mexico, Mérida provides assistance to Central America, Haiti and the Dominican Republic. The Central America portion of the Merida Initiative is a comprehensive public security package that works to tackle insecurity in Central America by more effectively addressing criminal gangs, improving information sharing between countries in the region, modernizing and professionalizing the police forces, expanding maritime interdiction capabilities, and reforming the judicial sector in order to restore and strengthen confidence in those institutions by the citizens in the region. The SOUTHCOM's specific role in Mérida is improving maritime security capacity with such things as improved radios and interceptor speed boats. If confirmed, I will continue to support these programs to help build the capacity of partner nations to improve regional security and counter illicit trafficking activities.

U.S. assistance has focused mainly on four strategic pillars: (1) eradication of coca and opium poppy crops, (2) illegal drug interdiction, (3) alternative development to provide coca and opium poppy farmers other sources of income, and (4) institution-building to train security forces and to strengthen democratic governance capacity. Supporters of the program argue that U.S. assistance has been vital to building foreign government counternarcotics capacities. Critics often question the program's effectiveness to reduce the amount of cocaine and heroin entering the United States, because the Andean region still accounts for the production of virtually all of the world's cocaine and increasing amounts of high-quality heroin. Some also criticize the program for excessively emphasizing supply-side eradication and interdiction, especially in Colombia, without sufficient focus on economic development, institution building, and public and private sector reform.

Question. What is your assessment of this issue and, if confirmed, where do you believe the funds dedicated to combating the narcotics trade in the SOUTHCOM AOR can most effectively be used?

Answer. The counternarcotics effort requires a whole-of-government approach; no one pillar alone can accomplish the job. While SOUTHCOM through JIATF-S and its other components is responsible for counternarcotics detection and monitoring throughout its area of focus, other U.S. Government agencies have the lead on supply-side eradication, interdiction, economic development, institution building, and public and private sector reform. I think the United States should continue this multi-pronged approach and continue pursuing coordinated efforts.

Question. If confirmed, how would you work with respective Chiefs of Mission to accomplish your objectives?

Answer. If confirmed, I will communicate often and coordinate closely with the Chiefs of Mission to accomplish U.S. objectives in the counternarcotics effort.

BUILDING PARTNER CAPACITY WITHIN THE SOUTHCOM AREA OF RESPONSIBILITY

Question. In the past few years, Congress has provided DOD a number of temporary authorities to provide security assistance to partner nations. These include the global train and equip authority (section 1206) and the security and stabilization assistance authority (section 1207). Some have argued that security assistance has traditionally been a State Department responsibility and that these programs ought to be transferred from DOD to the Department of State.

What should be our strategic objectives in building the capacities of partner nations?

Answer. U.S. strategic objectives in building partner capacity are to increase the capacity of the armed forces in our partner nations to address the security challenges within their territories, increase their capability to help each other solve cooperative security challenges and promote security cooperation among all partner nations in the region.

Question. Do these objectives differ by region, e.g., do our objectives within the PACOM AOR differ from those in the SOUTHCOM AOR?

Answer. In my view, while the specific capacities desired for specific countries or subregions within each command's AOR may differ, the objectives of both programs are the same.

Question. What is your understanding of the purpose of the section 1206 global train and equip authority?

Answer. I understand that section 1206 authority enables combatant commanders, in coordination with U.S. Ambassadors to host nations in which specific 1206 activities are proposed, to build partner nation capacity by rapidly training and equipping their armed forces to conduct counterterrorism or stability operations against urgent or emergent threats.

Question. What is the relationship of the global train and equip authority to other security assistance authorities, such as DOD counternarcotics assistance and foreign military financing (FMF)?

Answer. In my view, section 1206 authority is one of many tools available to combatant commanders to use in a whole-of-government approach to their region's security challenges. All these tools are used together to enhance regional security. The DOD counternarcotics assistance program builds partner nation capacity and coordinates regional counternarcotic activities to counter illicit drug trafficking. FMF helps build long-term relationships that provide access and cooperation in the region. Section 1206 builds operational capability in the armed forces of partner nations to enable them to conduct effective counter-terrorism operations within their borders and with other nations to counter emergent threats. In my view, SOUTHCOM uses its various authorities to coordinate multiple activities with other Federal interagency partners and Chiefs of Mission to build an effective whole-of-government approach to regional security challenges.

Question. What should be done to ensure that the global train and equip authority does not duplicate the efforts of these other assistance programs?

Answer. Host country funding and FMF plans are included when combatant commanders build a section 1206 proposal. These proposals are coordinated directly with each host nation U.S. Ambassador to deconflict the activities of various assistance programs. If confirmed, I will continue this close coordination between the Defense Department and the State Department to provide safeguards against duplicating efforts.

Question. What is your understanding of the purpose of the security and stabilization assistance authority (section 1207)?

Answer. I understand that section 1207 provides authority for the Defense Department to transfer to the State Department up to \$100 million per fiscal year in defense articles, services, training or other support for reconstruction, stabilization, and security activities in foreign countries.

TERRORISM THREAT FROM CARIBBEAN AND CENTRAL AMERICA

Question. In your view, what is the extent of the current threat of terrorist extremists from the Caribbean and Central America?

Answer. Terrorist activity in the Caribbean and Central America is generally limited to fundraising and logistics. While terrorism emanating from the region is rare, the presence of individuals with operational terrorism experience is cause for concern. Such concern is further justified in light of the impending New York trial of individuals from Trinidad and Tobago and Guyana, who allegedly plotted to blow up gas pipelines into JFK Airport. If confirmed, I will keep SOUTHCOM vigilant to detect and defend against terrorist threats to the United States and our partners.

Question. How would you broadly characterize the terrorism threat—low, medium, or high?

Answer. I understand that extremist organizations are active in Latin America and the Caribbean, primarily focused on fundraising and logistics support for parent organizations in the Middle East. However, as the alleged plot described in the answer above indicates, there are individuals in the region who are interested in doing harm to the United States. For that reason, I would characterize the threat as low to medium.

HAITI

Question. The United Nations (U.N.) Security Council voted unanimously on October 14, 2008, to extend the U.N. peacekeeping mission in Haiti for 1 year. Haiti continues to experience turmoil and instability.

How would you characterize the current military, economic, and political situation in Haiti?

Answer. Haiti remains relatively calm, but security challenges continue to impact this fragile democracy. The 2008 hurricane season decimated Haiti with four consecutive tropical weather events. Recovery has been slow, and another such hurricane season could be devastating for the country. The U.N. Stabilization Mission in Haiti (MINUSTAH) continues to perform well and is the major force keeping criminal elements in check. My understanding is that several nations in the region have participated, are actively participating, or are interested in participating in this important U.N. mission.

Question. How do you assess the security situation in Haiti now, and what is your estimate of how the situation will look in 6 months?

Answer. The potential for violence remains present in Haiti, but because of the successes of the MINUSTAH forces, violence will remain in check. As I understand it, the 7,000 plus MINUSTAH troops and 2,000 U.N. civilian police fill the gap left by inadequate force levels and capabilities of the Haitian National Police. As long as MINUSTAH remains in country while police forces are being recruited and trained, violence will remain manageable.

Question. What conditions or indicators do you consider important in determining whether there will be another wave of Haitian emigration?

Answer. In the first quarter of calendar year 2009, I understand that migration from Haiti increased when compared to the same period of 2008. This increase in migration was caused primarily by the downturn in the global economy and the ravages of last year's hurricane season. The potential for mass migration from Haiti is largely conditioned by Haitian perceptions of how quickly they will be interdicted and repatriated by the U.S. Coast Guard and/or other U.S. authorities. If they perceive they will be quickly interdicted and repatriated, mass migration, as I understand it, will be lower. Another condition that reduces potential mass migration is Haiti's capability to ensure individual safety and provide jobs.

CUBA

Question. Recently, President Obama announced authorization for unlimited travel and money transfers for Americans with relatives in Cuba and an easing of restrictions on telecommunications.

What is your view of the need for review and, potentially, revision of U.S. policies regarding Cuba?

Answer. I think U.S. policy, including our policy toward Cuba, should be periodically reviewed. As appropriate, if confirmed, I will be ready to implement any changes to U.S. policy.

Question. What is your opinion about the need for, and the pros and cons of, military-to-military contact with Cuba?

Answer. In general, I think military-to-military engagement with any nation's armed forces is valuable, consistent with U.S. law and policy. Under current Helms-Burton legislation, any significant military engagement with Cuba must be met with Cuban willingness to discuss Defense Policy, military subordination to democratically elected leadership, and military disengagement from domestic economic policy. Currently, the only military-to-military contacts I am aware of with Cuba are administrative "fence-line" meetings conducted by the Commanding Officer, U.S. Naval Station Guantanamo Bay and his Cuban military counterparts. If confirmed, I will continue to assess the value of military engagement with Cuba, consistent with U.S. law and policy.

GUANTANAMO BAY

Question. If confirmed as Commander of SOUTHCOM, what do you see as the major operational challenges to implementing the President's January 22, 2009, executive order directing the closure of the Guantanamo Bay detention facility?

Answer. From what I've studied, logistics and security are the major operational challenges of closing the detention facility. The specifics of the logistical and security challenges will be worked as the final placement of detainees is determined. If confirmed, I will ensure SOUTHCOM continues close coordination with the joint community, the interagency, and multinational partners to provide the safe and humane care, custody, and transport of detainees as directed by the Secretary of Defense, consistent with U.S. law and policy.

Question. Regardless of the outcome of ongoing discussions on closing the Guantanamo Bay detention facility, what is your assessment of the value of this military base? Is it a strategic asset for SOUTHCOM?

Answer. The U.S. Naval Station, on which the detention facility is located, is a separate command with a separate mission from that of the detention facility. For example, the Naval Station supports the Department of Homeland Security in the event of a mass migration. The Naval Station, with its airfield and port, remains an important strategic facility for the United States and should remain open long after the detention facility closes.

VENEZUELA

Question. U.S.-Venezuelan relations have continued to be strained as President Chavez continues to propagate anti-American rhetoric, import increasing amounts of military armament, politicize the Venezuelan military forces, and export his brand of populism to the region.

What is your view of President Chavez's intentions in the region?

Answer. I think President Chavez seeks to establish Venezuela as the leader of a broad anti-U.S. populist movement throughout the region and is working to limit U.S. influence and engagement.

Question. How would you characterize the current state of military-to-military relations between the United States and Venezuela?

Answer. I understand military-to-military relations with Venezuela are minimal, despite SOUTHCOM efforts to maintain interaction and dialogue. SOUTHCOM invites Venezuela to regional military events, including international and regional military forums, but they have not attended lately. JIATF-S maintains an opening for a Venezuelan liaison officer; however, Venezuela has chosen not to fill that position for over a year. If confirmed, I will continue to seek engagement opportunities with the Venezuelan military.

Question. What role do you see President Chavez playing in national elections throughout the SOUTHCOM's area of operations?

Answer. I think President Chavez will continue to support political parties, grassroots organizations and anti-U.S. candidates throughout the region who support his populist program and his anti-U.S. stance. Currently, lower oil prices have limited the Government of Venezuela's ability to support this effort.

Question. How would you assess Venezuelan relations with China, Cuba, Iran, and Russia vis-à-vis the national interests of the United States?

Answer. I think Venezuela is strengthening its ties with Cuba, China, Iran, and Russia. President Chavez recently visited China, during which the PRC leadership recognized Venezuela as a "strategic partner." In addition, Iranian President Ahmadinejad has made a number of visits to Venezuela, signing an agreement on military cooperation and agreeing to establish several multi-billion dollar investments. Russia has also been active with Venezuela. During a visit to Venezuela last year, Russian Navy ships conducted a naval exercise of limited scope with the Venezuelan Navy. If confirmed, I will monitor developments in Venezuelan relations closely, particularly as they relate to U.S. national security interests.

BOLIVIA

Question. In the past few years, Bolivia has experienced extreme political unrest and, lately, President Morales has taken some positions that could complicate U.S. relations with Bolivia.

How do you assess the situation in Bolivia and, if confirmed, how would you seek to accomplish the goals of combating drug trafficking and enhancing military engagement goals?

Answer. In October 2008, President Morales declared the U.S. Ambassador persona non grata and also evicted U.S. DEA representatives from Bolivia. Under

President Morales, U.S. relations with Bolivia continue to erode while Bolivia's relations with Venezuela, Cuba and Iran improve. In addition, despite earlier cooperation with the United States in the interdiction of narcotics, Bolivia is now the world's third largest producer of coca. My understanding is that military-to-military relations with Bolivia continue to deteriorate despite SOUTHCOM and country team efforts to remain engaged. If confirmed, I will promote limited military-to-military relationships with the Bolivian armed forces, to include educational programs, conferences, and seminars in line with U.S. Government policy towards Bolivia.

PANAMA

Question. How do you assess the current political and economic situation in Panama?

Answer. Panama is a stable country with a strong economy.

Question. To what extent do you assess that the Panamanian Government attempts to interdict the drug flow out of South America through Panama?

Answer. My understanding is that Panama, within the constraints of their resources, actively cooperates with U.S. counter-drug efforts to stem the flow of drugs through their country.

Question. What is your assessment of how Panama is protecting and maintaining the Panama Canal?

Answer. The Panama Canal is a significant strategic waterway and plays a significant role in global trade. The complex endeavor of operating and protecting the Canal is a top priority of the Panamanian government. Addressing this challenge, I understand that Panama continues investing in technology and security training to enhance its defensive ability and continues working with regional allies to protect the Canal. SOUTHCOM annually conducts Exercise PANAMAX, a joint, multinational training exercise focused on defending the Panama Canal. Last year, PANAMAX was SOUTHCOM's largest and most comprehensive exercise to date with 20 participating nations.

Question. How vulnerable is the Panama Canal to attack by terrorists, and what would be the consequences of an attack to U.S. national security interests?

Answer. The Panama Canal is the most important infrastructure in SOUTHCOM's area of focus. The Canal is economically important to the world and critical to the people of Panama. Two-thirds of the goods that pass through the Canal are moving to or from U.S. ports. The disruption of Canal operations would create a significant impact on global commerce as well as the U.S. economy.

Securing the Canal is a complex challenge. The Panama Canal Authority Security Division is responsible for securing the Canal. In addition, SOUTHCOM and many of the armed forces in Latin American work together to ensure the Canal's security. Annually, SOUTHCOM conducts a multinational exercise, Panamax, providing a critical training exercise focused on defending the Canal. It is the primary example of the regional cooperative security efforts focused on keeping the Canal secure.

FORWARD OPERATING LOCATIONS

Question. One of the elements of the regional counternarcotics strategy is the SOUTHCOM's establishment of forward operating locations (FOLs) in the source and transit zone.

In your view, what is the role that these FOLs play in the Department's counternarcotics efforts?

Answer. Now called Cooperative Security Locations (CSLs), my understanding of SOUTHCOM's CSLs is that they provide strategic basing for the conduct of regional counternarcotic detection and monitoring operations. Because forward bases are closer to the narcotic operation source and transit areas, CSLs increase the mission effectiveness of detection and monitoring operations because they significantly reduce aircraft transit time to and from the search areas. The CSLs in Curacao and Aruba, Netherlands Antilles, and in Comalapa, El Salvador remain critical to the success of the detection and monitoring mission.

Question. In your view, does current use continue to justify the costs of sustaining these locations?

Answer. I think the cost of supporting the CSLs is justified. As I mentioned earlier, SOUTHCOM's task force stopped more than 228 metric tons of cocaine in 2008. In my estimate, if SOUTHCOM were asked to provide the same results without operating from CSLs, the cost of operations would be significantly higher because the number of aircraft and the number of flight hours required to accomplish the mission would be much higher.

Question. What assurances do we have from host nations that these locations will continue to be available to us, and under what conditions?

Answer. Beyond the current 10 year agreements, there are no assurances from any of the host nations. My understanding is that our relationships with host countries, the Dutch Government (in the case of Aruba/Curacao), the El Salvadoran Government (in the case of Comalapa), and the Honduran Government (in the case of Soto Cano, JTF-B) are strong. These agreements provide mutual benefit. If confirmed, I support continuing these operating agreements.

Question. Since 1999, the United States has operated an Air Force counter drug unit out of a Forward Operation Location in Manta, Ecuador. However, last year, the Government of Ecuador decided the U.S. military was no longer welcome. According to the U.S. Ambassador in Ecuador, all U.S. personnel and equipment must be out of the country before November. At present, no new location for a similar base has been confirmed.

What is your understanding of the status of our transition from Eloy Alfaro Air Base in Manta, Ecuador to an alternative location?

Answer. It is my understanding that the Government of Ecuador fulfilled its agreement allowing the United States to conduct counterdrug operations out of Manta through 2009. They chose not to renew that agreement. If confirmed, I'll ensure SOUTHCOM acts as a good tenant and leaves Manta in improved condition. From my understanding, the current turnover plan calls for a cessation of operations by mid-July to allow for an orderly turnover of facilities by the end of September 2009.

I'm told that the base at Manta provided a unique set of capabilities that are difficult to replace in a single location. I understand SOUTHCOM is looking at several options to mitigate the loss of Manta and, if confirmed, I will review the results of this assessment and work to find the best solutions.

Question. What is your assessment of whether maintaining a presence on the Pacific Coast is critical to U.S. counternarcotics activities?

Answer. As I understand it, the loss of operational reach provided by Manta will impact the detection and monitoring in the Eastern Pacific. Some operations can be conducted from other facilities in the region and will mitigate some of the loss of Manta. However, operating from different locations creates new problem sets, such as increased transit times and operational costs. If confirmed, I will continue to analyze the options to offset the loss of Manta and work towards the best possible solutions.

COLOMBIA

Question. Plan Colombia has enabled the Colombian Government to make significant gains against the Revolutionary Armed Forces of Colombia (FARC) and other paramilitary forces in Colombia, as well as enabled the government to secure many of its previously ungoverned areas. In recent months, there has been much discussion about the impact of the global economic downturn on Latin America. Over the past decade, the United States has provided over \$6 billion to help the Colombians secure their country and eliminate domestic terrorist groups. As planned, this funding is declining in the coming fiscal years.

What are your views regarding the current situation in Colombia focusing upon: (1) the current military and political situation in Colombia; (2) the ability of the Colombian military to regain control of its territory; and (3) ongoing DOD programs, including the effects of the caps on U.S. troops and contractor personnel?

Answer. From what I see, Colombia has made a great deal of progress in its fight against narco-terrorists. The Uribe administration has instilled a sense of hope and pride in the country and Colombia is a strong, thriving democracy. Statistics show terrorist attacks, homicides and kidnappings have dropped considerably and the Colombian military is effectively prosecuting their war against the FARC. The FARC has been pushed back and the Government of Colombia now has security representation throughout its 1,098 municipalities. Despite this success, the FARC and other Illegal Armed Groups still remain a threat. While I think U.S. support to Colombia can start moving towards a more "smart power" approach, I think the United States should continue strong support to ensure Colombia's success.

Question. Do you believe the Colombian Government is capable of sustaining the last decade's gains during this economic downturn and the scheduled decline in U.S. security assistance?

Answer. In 2007, the Government of Colombia launched "Plan Consolidation," a whole-of-government approach to establish control of the territory and provide social and economic development to all Colombian citizens. To be sure, the current global economic downturn will impact Colombia's ability to fund this plan, but I think they are capable and committed to sustaining their hard fought gains. If I am confirmed, I look forward to working with the committee to continue U.S. support to Colombia.

Question. When the United States began providing increased support through Plan Colombia for efforts to significantly reduce or eliminate narcotics organizations operating in their country, many expressed concern about the Colombian military's human rights record.

What is your assessment of the record of the Colombian military with regard to respect for human rights over the past 3 years?

Answer. I am told that, today, the Colombian military is one of the most respected institutions in Colombia and continues to improve its human rights record. The Ministry of Defense established a comprehensive human rights and International Humanitarian Law (IHL) program. Colombian military forces are required to receive mandatory human rights training, for every officer and soldier at every stage of their military careers. The Colombian military continues to partner with civil society groups, universities, and international organizations to strengthen their human rights programs. These programs have been instrumental in reducing the number of human rights complaints against the Colombian military.

Colombia continues to aggressively address human rights infractions. Recently, the Colombian Army dismissed 27 Army personnel, including three generals, for not conforming to human rights standards. I think Colombia will continue to aggressively pursue and tackle human rights issues, and if confirmed, I will keep human rights as a key element of SOUTHCOM's interaction with Colombia.

Question. What remains to be done and how would you approach the issue of respect for human rights in the Colombian military?

Answer. If confirmed, I will continue to keep human rights as a key element of SOUTHCOM's interaction with Colombia.

WESTERN HEMISPHERE INSTITUTE FOR SECURITY COOPERATION

Question. The Western Hemisphere Institute for Security Cooperation (WHINSEC), which replaced the School of the Americas in 2001, has the mission of contributing to theater cooperation activities through the education and training of students in the Western Hemisphere from Canada to Chile.

What is the relationship between SOUTHCOM and WHINSEC?

Answer. WHINSEC does not fall under SOUTHCOM's authority but is one of many valuable tools available to strengthen military-to-military relations in the region. I also understand the Commander of SOUTHCOM is a member of WHINSEC's Board of Visitors. If confirmed, I look forward to joining this distinguished group.

Question. In your view, does WHINSEC promote the national security interests of the United States in the Western Hemisphere?

Answer. WHINSEC provides important training, education, and relationship building opportunities that are absolutely vital to advancing security cooperation in the Western Hemisphere. These objectives support the U.S. goal of building lasting partnerships and promoting broad national security interests. In my view, Congress was correct when it wrote in section 1257 of the National Defense Authorization Act for Fiscal Year 2008 that WHINSEC "is an invaluable education and training facility which the DOD should continue to utilize in order to help foster a spirit of partnership and interoperability among the United States military and the militaries of participating nations." If confirmed, I will continue SOUTHCOM's support of WHINSEC.

Question. In your view, how does SOUTHCOM participate in command oversight and curriculum development?

Answer. SOUTHCOM regularly reviews the curriculum to ensure it matches and supports SOUTHCOM theater security cooperation objectives and regional priorities. I understand the command recommends changes, as required.

Question. In your view, what more, if anything, does WHINSEC need to do to emphasize human rights in its curriculum?

Answer. From what I understand, WHINSEC has a very comprehensive human rights program and maximizes the quality and quantity of human rights instruction in its curriculum. If confirmed, I will continue to monitor and assess the human rights curriculum, stressing the value of WHINSEC attendance for Western Hemisphere militaries and police forces.

Question. In your view, how can WHINSEC improve its outreach efforts to individuals or groups interested in its activities, particularly those who have accused the school of contributing to human rights violations by former students?

Answer. From all accounts, WHINSEC is a very transparent institution. In my view, WHINSEC should maintain this transparency and continue its open program of encouraging individuals and groups to visit the school whenever desired. Maintaining a transparent, open program can help minimize accusations against the school.

IRANIAN INFLUENCE IN LATIN AMERICA

Question. In testimony before the Senate Armed Services Committee in January 2009, Secretary Gates expressed real concern about Iranian “subversive activity.” He went on to say “[t]hey’re opening a lot of offices and a lot of fronts behind which they interfere in what is going on in some of these countries.”

What do you assess to be the intent of Iranians in Latin America and are governments in Latin America welcoming the Iranians?

Answer. Like Secretary Gates, I am concerned about Iran’s meddling in Latin America. Iran is a state sponsor of terror. I’m told that Iran has increased its diplomatic efforts in the region and has initiated trade relations with many countries in the region. I think Iran’s goal is to decrease U.S. influence in the region and support those countries with an anti-U.S. message.

Most of the governments in the region appear to welcome Iran as a potential economic partner. For example, President Ahmadinejad has had numerous visits to Venezuela, and there have been numerous multi-billion dollar investments between the two countries in recent years.

Question. In your view, is there a connection between the Iranians and the drug trade?

Answer. I have not been told of any direct connection between Iran and the drug trade in the SOUTHCOM area of focus.

SEXUAL ASSAULT PREVENTION AND RESPONSE IN U.S. SOUTHERN COMMAND

Question. Numerous cases of sexual misconduct involving military personnel have been reported over the last several years. Many victims and their advocates contend that they were victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate military treatment. They assert that their command failed to respond appropriately by providing basic services, including medical attention and criminal investigation of their charges.

What is your understanding of the resources and programs in place in SOUTHCOM to offer victims of sexual assault the medical, psychological, and legal help that they need?

Answer. I am told that SOUTHCOM has an active Sexual Assault Prevention and Response program in place that affords victims all the help they need. The command has a Zero Tolerance Policy and ensures all incidents are handled using the exact procedures outlined in DOD directives and policy, which promote sensitive care, confidential reporting for victims of sexual assault, and accountability for those who commit these crimes.

SOUTHCOM has a dedicated Sexual Assault Response Coordinator (SARC) who is trained to respond to allegations of sexual assault and provide victim advocacy. The SARC is knowledgeable of reporting requirements and victims’ rights regarding medical care, investigation, legal assistance and restricted reporting, and maintains direct personal contact with all military assistance providers. Because SOUTHCOM is located in a large urban area, the SARC also maintains contacts with local social services agencies.

Question. What is your view of steps taken to prevent sexual assaults in SOUTHCOM?

Answer. From my perspective, SOUTHCOM has a positive command climate that emphasizes civility and mutual respect. The command took specific action to prevent incidents of sexual assault, including establishing a sexual assault prevention training and awareness program, encouraging victims to report incidents of sexual assault without fear, ensuring leaders understood their roles and responsibilities regarding response to sexual assault incidents, and establishing a toll-free help line for reporting Sexual Assault and Harassment. In regards to victim care and response, the command ensures sensitive and comprehensive treatment to restore victims’ health and well-being, thoroughly investigates allegations of sexual assault, and takes appropriate administrative and disciplinary action. If confirmed, I will continue SOUTHCOM’s zero tolerance policy, actively support its programs, and regularly monitor and assess its operations and resources.

Question. What is your view of the adequacy of the training and resources in SOUTHCOM to investigate and respond to allegations of sexual assault?

Answer. I am told that SOUTHCOM provides its personnel the resources needed to investigate and respond to sexual assault allegations. The Army, as the Headquarters executive agent, uses a comprehensive Sexual Assault Prevention and Response Program Training Support Package to provide training to all military personnel, which is further enhanced by senior leader emphasis. SOUTHCOM recently participated in the Army’s 2009 Sexual Assault Prevention Summit in Washington, DC, ensuring that key people received world-class training during the summit.

Do you consider the current sexual assault policies and procedures, particularly those on confidential reporting, to be effective?

Answer. Yes. I am told that the policies and procedures, outlined above, are effective.

Question. What problems, if any, are you aware of regarding the manner in which the confidential reporting procedures have been put into effect?

Answer. In my view the policies and procedures in place are strong.

MENTAL HEALTH OF SERVICEMEMBERS AND STRESS ON THE FORCE

Question. The committee is concerned about the stress on military personnel resulting from lengthy and repeated deployments and their access to mental health care to deal with this increased stress. The Chairman of the Joint Chiefs of Staff recently said that the shooting of five servicemembers at a stress control clinic by a troubled Army sergeant in Iraq speaks to "the need . . . to redouble our efforts" and "the issue of multiple deployments" and increasing dwell time "to try to improve to relieve that stress." This tragic incident, as well as increasing suicide rates in every Service, are clear reminders that servicemembers, particularly those who have been deployed multiple times, are under tremendous stress and need access to mental health care.

In your view, are there sufficient mental health assets in SOUTHCOM to address the mental health needs of the military personnel and their families?

Answer. As I understand it, the majority of forces that deploy within the SOUTHCOM region rely on their parent service for medical care during post-deployment, including the very important post-deployment monitoring of mental health. During deployment, the SOUTHCOM Surgeon closely monitors all command mental health issues and helps ensure that SOUTHCOM provides necessary immediate support.

The approximately 1,500 personnel assigned to the SOUTHCOM Headquarters have their medical needs met through a small U.S. Army Health Clinic. I have been told that no organic mental health professionals are assigned to this clinic and that patients are referred to civilian providers to address their mental health needs.

Question. If confirmed, what actions will you take to address the mental health needs of military personnel and their families in SOUTHCOM?

Answer. If confirmed, I will continue the emphasis on ensuring that military personnel and their families have adequate access to mental health services, including programs on suicide prevention and substance abuse prevention and treatment. I will work to improve the coordination between headquarters SOUTHCOM's military doctors and local civilian providers to ensure that we understand and address the mental health needs of our personnel.

UNITED NATIONS CONVENTION ON THE LAW OF THE SEA

Question. The United Nations Convention on the Law of the Sea (UNCLOS) is currently pending in the Senate.

What are your views on U.S. accession to UNCLOS?

Answer. As an official policy matter, I defer questions associated with the U.N. Law of the Sea Convention to the Chief of Naval Operations. However, as a joint officer, I support the U.S. accession to the Convention.

Question. From a national security standpoint, what do you see as the advantages and disadvantages to being a party to UNCLOS?

Answer. The Law of the Sea Convention codifies navigation and overflight rights and high seas freedoms that are essential for the global mobility of our Armed Forces. From a national security standpoint, UNCLOS does not hinder military forces; rather, it directly supports our National Security Strategy. It is my understanding that as a matter of customary law the United States is already in compliance. I also understand that Article 298 of the Convention permits the United States to completely exempt its military activities from dispute resolution.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes, I do.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes, I do.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Commander, SOUTHCOM?

Answer. Yes, I do.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes, I do.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes, I do.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR SUSAN COLLINS

DRUG TRAFFICKING

1. Senator COLLINS. General Fraser, media reports indicate the Revolutionary Armed Forces of Colombia and other Colombian traffickers are shipping more drugs from Colombia overland across Panama to avoid tighter control of the Pacific and Caribbean coastal waterways by the Panamanian and U.S. naval forces, further suggesting that Panama could become the next narcotics battleground. If confirmed, will you have the resources you need in order to counter these adversarial efforts to shift from sea to shore lines of communications?

General FRASER. I am very concerned about the change in illicit trafficking patterns through Panama and, for that matter, the rest of Central America. Drug trafficking organizations look for the paths of least resistance and are finding them in Central America. They exploit borders and under-governed areas. To counter their activity, the United States can work with nations in the region to build and pursue a comprehensive regional approach that includes international partnerships and a U.S. "whole-of-government" effort. I understand that U.S. Southern Command (SOUTHCOM) actively supports U.S. Government and international counter-narcotics efforts in the region by building partner nation capacity and capability. If confirmed, I will continue this approach and look for ways to enhance SOUTHCOM's support to U.S. and international programs.

While I need more time to study this issue, I'm told that SOUTHCOM could make a relatively significant impact on trafficking in Panama and Central America with nominal increases in resources, including greater support for partner nation Maritime Patrol Aircraft, enhanced support for Joint Combined Operations Centers in the region and further development and support for vetted host nation response forces.

2. Senator COLLINS. General Fraser, increased enforcement activity on both sides of the southwest border may be prompting the Mexican drug cartels to exploit maritime coastal smuggling routes. In recent months, the Coast Guard and the Drug Enforcement Agency have successfully made drug interdictions in the Brownsville ship channel (two undocumented men on a raft with 240 pounds of marijuana), as well as Corpus Christi and remote portions of South Padre Island. What actions are being taken to deny the cartels' use of these coastal smuggling routes?

General FRASER. While Mexico is a part of the U.S. Northern Command (NORTHCOM) area of focus, I understand that SOUTHCOM works closely with NORTHCOM to counter illicit trafficking and its effects in Mexico. Central America is facing similar challenges because it is used by traffickers as the major transit-zone for moving narcotics into Mexico. I'm told that SOUTHCOM is engaged with NORTHCOM to integrate partner nation and U.S. surveillance and communication assets in ongoing efforts to counter illicit trafficking. Additionally, SOUTHCOM is working with Partner Nations to train and equip security forces in the region. If confirmed, I will continue these efforts. In addition, I will continue to seek congressional support for many of the regional initiatives, such as the Merida Initiative and ongoing SOUTHCOM efforts to build partner nation capabilities.

[The nomination reference of Lt. Gen. Douglas M. Fraser, USAF, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
April 23, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment in the United States Air Force to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

To be General.

Lt. Gen. Douglas M. Fraser, 7505.

[The biographical sketch of Lt. Gen. Douglas M. Fraser, USAF, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF LT. GEN. DOUGLAS M. FRASER, USAF

Lt. Gen. Douglas M. Fraser is Deputy Commander, U.S. Pacific Command, Camp H.M. Smith, HI.

General Fraser earned his commission upon graduation from the U.S. Air Force Academy in 1975. His operational assignments include Europe, the Pacific, Air Combat Command and Air Force Space Command. Prior to this current assignment, he was Commander, Alaskan Command, U.S. Pacific Command; Commander, 11th Air Force, Pacific Air Forces; and Commander, Alaskan North American Defense Region, with headquarters at Elmendorf Air Force Base, AK.

The general is a command pilot with more than 2,700 flying hours, primarily in the F-15A/B/C/D, F-15E, and the F-16.

RÉSUMÉ OF CAREER SERVICE OF LT. GEN. DOUGLAS M. FRASER, USAF

Education:

1975 Bachelor of Science degree in political science, U.S. Air Force Academy, Colorado Springs, CO.

1979 Squadron Officer School, Maxwell Air Force Base, AL.

1987 Air Command and Staff College, Maxwell Air Force Base, AL.

1987 Master's degree in political science, Auburn University at Montgomery, AL.

1992 National War College, Fort Lesley J. McNair, Washington, DC

2005 Joint Flag Officer Warfighting Course, Maxwell Air Force Base, AL.

Assignments:

August 1975–July 1976, student, undergraduate pilot training, Vance Air Force Base, OK.

September 1976–March 1977, F-15 student, 405th Tactical Training Unit, Luke Air Force Base, AZ.

June 1977–May 1980, F-15 pilot, 36th Tactical Fighter Wing, Bitburg Air Base, West Germany.

June 1980–June 1983, F-15 squadron weapons officer, 405th Tactical Training Wing, Luke Air Force Base, AZ.

July 1983–June 1985, flight commander, 49th Tactical Fighter Wing, Holloman Air Force Base, NM.

July 1985–July 1986, aide to the Commander, 12th Air Force, Bergstrom Air Force Base, TX.

August 1986–June 1987, student, Air Command and Staff College, Maxwell Air Force Base, AL.

July 1987–July 1989, fighter programmer, Directorate of Programs and Resources, Headquarters U.S. Air Force, Washington, DC.

July 1989–May 1991, member, Chief of Staff of the Air Force Staff Group, Headquarters U.S. Air Force, Washington, DC.

July 1991–June 1992, Commander, Weapons and Tactics Flight, 18th Operations Support Squadron, Kadena Air Base, Japan.

June 1992–October 1992, Director of Operations, 44th Fighter Squadron, Kadena Air Base, Japan.

October 1992–July 1993, Commander, 12th Fighter Squadron, Kadena Air Base, Japan.

August 1993–June 1994, student, National War College, Fort Lesley J. McNair, Washington, DC.

July 1994–July 1996, analysis assistant, Office of Assistant Secretary of Defense for Strategy and Requirements, Washington, DC.

July 1996–June 1997, Director, Chief of Staff of the Air Force Operations Group, Headquarters U.S. Air Force, Washington, DC.

July 1997–January 1999, Commander, 366th Operations Group, Mountain Home Air Force Base, ID.

February 1999–January 2000, executive assistant to the Commander in Chief, U.S. Pacific Command, Camp H.M. Smith, HI.

January 2000–April 2002, Commander, 3rd Wing, Elmendorf Air Force Base, AK.

April 2002–June 2003, Commander, Space Warfare Center, Air Force Space Command, Schriever Air Force Base, CO.

May 2003–October 2005, Director of Air and Space Operations, Headquarters Air Force Space Command, Peterson Air Force Base, CO.

October 2005–April 2008, Commander, Alaskan Command, U.S. Pacific Command; Commander, 11th Air Force, Pacific Air Forces; and Commander, Alaskan North American Defense Region, Elmendorf Air Force Base, AK.

April 2008–present, Deputy Commander, U.S. Pacific Command, Camp H.M. Smith, HI.

Flight information:

Rating: Command pilot

Flight hours: More than 2,700

Aircraft flown: F-15A/B/C/D, F-15E, and F-16

Major awards and decorations:

Distinguished Service Medal

Defense Superior Service Medal with oak leaf cluster

Legion of Merit

Meritorious Service Medal with three oak leaf clusters

Air Force Commendation Medal with oak leaf cluster

Air Force Achievement Medal

Effective dates of promotion:

Second Lieutenant - June 4, 1975

First Lieutenant - June 4, 1977

Captain - June 4, 1979

Major - Oct. 1, 1986

Lieutenant Colonel - April 1, 1990

Colonel - Feb. 1, 1995

Brigadier General - July 1, 2001

Major General - Aug. 1, 2004

Lieutenant General - Oct. 11, 2005

(Current as of May 2008)

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by Lt. Gen. Douglas M. Fraser, USAF, in connection with his nomination follows:]

UNITED STATES SENATE
 COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
 NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Douglas M. Fraser.

2. **Position to which nominated:**

Commander, United States Southern Command.

3. **Date of nomination:**

April 23, 2009.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

April 16, 1953; Casper, WY.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Married to Rena Kate Fraser (maiden name: Doty).

7. **Names and ages of children:**

Heather C. Lyman, 31.

Ian D. Fraser, 28.

Hannah E. Green, 17.

8. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.

None.

9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

10. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Member - Air Force Association

Member and local Flight Captain (2001-2003) - Order of the Daedalians

Member - National War College Alumni Association

Member - Air Force Academy Association of Graduates

Member - Command Bar Stool Association (1984-1993)

11. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

None.

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify before any duly constituted committee of the Senate?
Yes.

13. **Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?
Yes.

[The nominee responded to the questions in Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

DOUGLAS M. FRASER.

This 23th day of March, 2009.

[The nomination of Lt. Gen. Douglas M. Fraser, USAF, was reported to the Senate by Chairman Levin on June 9, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on June 10, 2009.]

[Prepared questions submitted to LTG Stanley A. McChrystal, USA, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DUTIES

Question. What is your understanding of the duties and functions of the Commander, North Atlantic Treaty Organization (NATO) International Security Assistance Force (ISAF)?

Answer. Commander, ISAF is responsible for executing NATO’s strategy in Afghanistan as delineated in OPLAN 10302. Commander, ISAF’s responsibility is to ensure that ISAF forces are utilized in the most effective manner possible in order to accomplish its objectives under U.N. mandate as well as meet the reporting requirements of Supreme Allied Commander, Europe (SACEUR) (as Commander of NATO Operations).

Question. What is your understanding of the duties and functions of the Commander, U.S. Forces-Afghanistan (USFOR–A), and how do those duties and functions relate to those of the Commander, NATO ISAF?

Answer. The Commander of the United States Central Command (CENTCOM) is my immediate commanding officer in the U.S. chain of command. Pursuant to title 10, U.S.C., section 164, he exercises combatant command authority which includes the command functions of giving authoritative direction over all aspects of military operations, joint training and logistics, over all U.S. forces in Afghanistan, less those under NATO Operational Control to ISAF. Commander, CENTCOM provides the national level logistics and administrative support to USFOR–A to accomplish its mission as the National Support Element (NSE) for U.S. forces under NATO Operational Control to ISAF.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. My operational experience in Afghanistan, Iraq, and other locations from 2002–2008 have provided me extensive experience in the region—and this conflict. While the operational focus of my most recent command (JSOC) focused primarily on counterterrorist operations, our integration with wider counterinsurgency efforts provided me almost continuous interaction with units and commands of every type and at every level.

At the strategic level, my assignments (2002–2003 and 2008–present) on the Joint Staff as the Vice Director, J–3 and then Director, Joint Staff have provided me insights into strategic issues and decisionmaking processes.

Finally, since 2001 I have had unique opportunities for extensive interaction with a wide range of U.S. Government interagency partners and had British Forces in my Joint Task Force in Iraq for almost 5 years.

Question. Do you believe that there are any steps that you need to take to enhance your expertise to perform the duties of the Commander, ISAF, and/or Commander, USFOR–A?

Answer. Yes, I need to better understand the NATO construct and the nuances of being a NATO commander. As for USFOR–A, I need to better understand the NSE and NCE responsibilities.

RELATIONSHIPS

Question. Please describe your understanding of the relationship of the Commander, ISAF/Commander, USFOR–A, to the following:

NATO Supreme Allied Commander, Europe.

Answer. Commander, ISAF is a subordinate commander, through Joint Forces Command Brunssum, to NATO's Supreme Allied Commander, Europe (SACEUR). SACEUR is one of NATO's two strategic commanders and is the head of Allied Command Operations. As such, he is responsible for the command and control of all NATO military operations, to include identifying forces required for the mission and requesting those forces from NATO countries, as authorized by the North Atlantic Council and as directed by NATO's military committee.

Question. NATO Supreme Allied Commander, Transformation.

Answer. As the other strategic commander within NATO, Supreme Allied Commander Transformation (SAC–T) and SACEUR work in tandem to promote the evolution of NATO's military capabilities and the requisite interoperability of those capabilities. Commander, ISAF coordinates with SAC–T to leverage the expertise of ACT in order to maximize the effectiveness of pre-deployment training efforts and capture lessons learned of our NATO forces once in theater.

Question. NATO Military Committee.

Answer. The Military Committee (MC) is charged with providing the North Atlantic Council (NAC) military advice on policy and strategy. As such, there is not a direct command relationship between Commander, ISAF and the MC. However, it is critical that Commander, ISAF provide honest and timely assessments of the situation so that the MC can make informed recommendations for the NAC.

Question. Commander, U.S. Central Command.

Answer. The Commander of CENTCOM, as my immediate commanding officer in the U.S. chain of command, exercises combatant command authority over USFOR–A and provides the national level logistics and administrative support for USFOR–A to accomplish its mission as the NSE for forces under NATO Operational control to ISAF.

Question. Commander, Combined Joint Task Force 82, Afghanistan.

Answer. Operational control of forces assigned to ISAF is exercised through Regional Commanders. The United States is the designated lead for Regional Command (RC)–East, and as such, Commander, ISAF exercises control over U.S. forces assigned to RC–East via Combined Joint Task Force–101. The 82nd Airborne Division is currently transitioning with the 101st Airborne Division and is expected to complete Transfer of Authority (TOA) by 1 June 2009. The COMUSFOR–A functions as the National Command and NSE for all forces under the command of CJTF–82.

Question. Commander, Combined Special Operations, Joint Task Force, Afghanistan.

Answer. Commander, ISAF has no command relationship, other than a coordinating role through the DCOS Operations. However, as Commander of USFOR–A, the forces assigned to CJSOTF fall under the command of Combined Forces Special Operations Component Command–Afghanistan (CFSOCC–A) which falls under the tactical control of USFOR–A. This allows Commander of USFOR–A to integrate the Foreign Internal Defense (FID) tasks planned and executed by CFSOCC–A with the counterinsurgency (COIN) plans and tasks executed by ISAF. Since counterterrorism, FID and counternarcotics (CN) must be integrated with COIN for operations in Afghanistan to be successful, having CFSOCC–A under the tactical control of USFOR–A helps him synchronize the COIN fight successfully.

Question. Commander, Combined Security Transition Command–Afghanistan (CSTC–A).

Answer. CSTC–A is responsible for planning, programming, and implementing the generation and development of the Afghan National Security Forces (ANSF). CSTC–

A is operationally controlled by and receives tasks and orders from USFOR–A. CSTC–A also has coordinating authority with ISAF in order to synchronize ANSF development with the COIN mission.

Question. United Nations Special Representative in Afghanistan.

Answer. Commander, ISAF and the United Nations Special Representative work together in close coordination and partnership. The role of Commander, ISAF is to create a security environment that enables government capacity building and development efforts by UNAMA and other international agencies that ultimately will benefit the Afghan Government and its people.

Question. U.S. Ambassador to Afghanistan.

Answer. The U.S. Ambassador to Afghanistan is the President’s Senior Representative in the country. Commander, USFOR–A serves as the senior military advisor to the U.S. Ambassador. Commander, USFOR–A and the Ambassador work closely together to integrate civilian-military efforts across all lines of operation.

AFGHANISTAN-PAKISTAN STRATEGY AND MAJOR CHALLENGES

Question. What role, if any, did you play in the formulation of the administration’s new strategy for Afghanistan and Pakistan announced in March?

Answer. In my position as the Director of the Joint Staff, I supervised and provided guidance to Joint Staff directorates and offices to ensure the Joint Staff effectively coordinated with OSD, Services, combatant commands, and the interagency in the development of the new Afghanistan-Pakistan strategy. I also provided my inputs to the Chairman of the Joint Chiefs of Staff during the formulation of the new strategy as he formulated his best military advice for the President.

Question. Do you agree with the strategic goals set out in the new strategy?

Answer. I agree with the strategic goal and associated strategic objectives outlined in the new Afghanistan-Pakistan strategy.

They dovetail closely with the assessment that the Chairman provided to the President through the Secretary of Defense.

Increasing the strategic calculus to include Pakistan assesses the region as a whole in order to address common transnational challenges that face both Afghanistan and Pakistan, namely al Qaeda and other terrorist organizations.

The United States has a vital national interest in addressing the current and potential security threats posed by extremists in Afghanistan and Pakistan. The strategy identifies a realistic and achievable strategic goal and strategic objectives in the near- to mid-term in order to reduce the threat.

The strategic goal to disrupt, dismantle, and defeat al Qaeda and its safe havens in Pakistan, and to prevent their return to Pakistan or Afghanistan is essential to the long-term security of the United States, our allies, and the region.

The strategy calls for the resources necessary for a fully-resourced counterinsurgency. It promotes a whole-of-government integrated counterinsurgency approach to address challenges in the region. As a result, significantly more resources will be devoted to the civilian efforts in both Afghanistan and Pakistan. It also calls for a regional approach requiring increased international engagement and participation as the international community must work with Pakistan to help disrupt the threats to security along Pakistan’s western border.

Question. Has NATO adopted those goals?

Answer. During the recent 60th Anniversary Summit in Strasbourg/Kehl, NATO Heads of State reiterated the four principles of NATO’s strategic vision for Afghanistan: long-term commitment, Afghan leadership, a comprehensive approach and regional engagement. The U.S. strategy includes these principles and in particular it calls for a “whole-of-government” methodology to achieve a comprehensive approach.

Question. What are the major challenges and problems you foresee, if confirmed as the next Commander, ISAF/Commander, USFOR–A, in the implementation of that strategy?

Answer. I believe we face three major challenges. The first of these is to secure the population and separate them from the insurgents. Only where we can prevent insurgents from controlling the population through intimidation and coercion can we provide an opportunity for the Government of Afghanistan, with our support, to establish full legitimate governance and stability.

Second, we must work to improve governance at every level in order to facilitate development and other activities that will strengthen the legitimacy of, and popular support for, the Government—and reduce insurgent control or influence.

The third major challenge is to increase the capacity of ANSF (Army and Police). Ultimately, security in Afghanistan must be provided by a combination of military and police forces of sufficient strength in personnel, equipment, and training to cover security missions ranging from national defense to local policing.

Question. If confirmed, what plans do you have for addressing these challenges and problems?

Answer. If confirmed it would be my intent to review current assessments and strategy, ensuring we produce an Integrated Civilian-Military Plan to fully integrate efforts. Within that plan, I would anticipate designating development of ANSFs as our highest priority task, and focusing all our forces on effective execution of counterinsurgency operations.

SECURITY SITUATION IN AFGHANISTAN

Question. What is your assessment of the security situation in Afghanistan and the nature, size, and scope of the anti-government insurgency?

Answer. The Afghanistan insurgency is Taliban dominated, but comprised of multiple groups including al Qaeda pursuing various short and long term goals. Their common goals are to expel foreign forces from Afghanistan, undermine local and international perceptions of security and to ultimately undermine the authority of the Afghan Government. There is some operational cooperation between the Taliban and other insurgent networks. However, insurgent group identities are often blurred by overlapping operating areas and cooperation amongst tactical commanders in some areas of Afghanistan. Since 2004, the Taliban-led insurgency has continued to increase in scope, and its influence has expanded in some geographic areas despite significant losses in leadership and military engagements. In addition to the increasing quantity of attacks, insurgents have increased tactical proficiency and have adapted to coalition countermeasures.

Violence levels have increased significantly over the last year. The increased U.S. force deployments in RC-South will likely result in higher violence levels in 2009 because of ISAF initiated operations against Taliban controlled areas. While some insurgents will choose to directly engage coalition forces in contested areas, most will either reintegrate into the local population or relocate to more permissive areas in Afghanistan.

Question. What is the nature and extent of the al Qaeda threat in Afghanistan?

Answer. Reports indicate that the scale and scope of al Qaeda's operational presence on-the-ground in Afghanistan has increased—but remains limited in size. However, their partnership and support to Taliban insurgents cannot be discounted. Despite significant leadership losses and increased pressure on its safe havens in Pakistan's Federally Administered Tribal Areas (FATA), al Qaeda maintains the capability to plan, direct, and support attacks against coalition forces in Afghanistan in 2009. Even with these losses, several Afghanistan-focused operatives and trainers remain at large and al Qaeda's senior leadership structure is largely intact. Al Qaeda exploits multiple lines of facilitation (handlers) routes into the FATA, relying on facilitation networks for recruits' travel to the region.

Question. What is your understanding of the extent to which the Taliban and al Qaeda cooperate in Afghanistan?

Answer. Despite occasional tensions between Pakistan-based al Qaeda senior leaders and the Quetta-based Taliban Senior Shura council, the two organizations maintain a mutually beneficial relationship characterized by tactical-level cooperation between al Qaeda operatives and Taliban commanders in Afghanistan. The nature of their relationship is unlikely to change. This relationship, based on historical ties (Osama Bin Laden), and overlapping regional goals, is durable—although continuing differences over strategic goals persist and intermittently provoke tensions between the two groups. Al Qaeda also continues to provide tactical expertise and training to Afghan insurgents, focused on suicide bombings, IEDs, Vehicle-Borne Improvised Explosive Devices, and some logistical support.

COALITION CAPABILITIES

Question. Do you believe that the current level of ISAF troops and equipment in Afghanistan is sufficient to carry out the ISAF mission? If not, what are the current shortfalls in troops and/or equipment required for that mission?

Answer. The Combined Joint Statement of Requirements (CJSOR) established the total force requirements for ISAF. Shortfalls exist which hamper ISAF's ability to carry out the mission to the full extent possible. Current shortfalls include various HQ elements, rotary wing support, lift and medical evacuation (MEDEVAC) capabilities, and airborne Intelligence, Surveillance, and Reconnaissance (ISR) assets. If confirmed and once in theater, I will be in a better position to review the specific requirements for the mission and recommend adjustments to the CJSOR as appropriate.

Question. Do you believe our NATO allies should be doing more to eliminate the shortfall in resourcing the NATO ISAF mission requirements?

Answer. I appreciate the contributions and sacrifices of our allies and partners in this complex mission. Having stated that, I do believe that our allies could do more to meet the requirements in the CJSOR. If confirmed, one of my roles as Commander, ISAF will be to actively campaign for capabilities and forces through the chain of command and when the opportunity presents itself with allied leadership.

Question. If NATO members are unable to contribute additional military resources to the ISAF mission, do you believe those countries should contribute to the Afghanistan mission in other ways, and if so, how?

Answer. By accepting the mission in Afghanistan, the Nations that comprise NATO have agreed to share the burden of the mission and each one contributes military and civilian resources. Where nations are unable to contribute additional military resources to the CJSOR, I would ask that they contribute civilian advisors and assistance such as police trainers and governance mentors, as well as financially, through such mechanisms as the ANA Trust Fund. These aspects of the mission are just as critical to the overall success of the strategy in Afghanistan.

COMMAND STRUCTURES IN AFGHANISTAN

Question. What is your assessment of the current command structures for ISAF and for USFOR-A? What changes, if any, would you recommend to those command structures?

Answer. I provide the following response without the benefit of having served inside the ISAF command structure. However, I believe that one area in which the current command structure falls short is the ability of Commander, ISAF to concentrate on strategic and higher-level operational tasks, due to his direct role in providing day-to-day tactical-level direction to the Regional Commands.

I would recommend, in coordination with SHAPE, a relook of this command arrangement, with a possible three-star level headquarters within the ISAF command structure to assume the role of directing the counterinsurgency operations of the regional commands. Such a headquarters would allow Commander, ISAF to concentrate on strategic level tasks, the complexities of the civil-military integration, and engaging with the Afghan Government, UNAMA, and the international community.

Question. What is the justification for a U.S. chain of command separate from the NATO chain of command?

Answer. A U.S. chain of command separate from NATO provides unified command and control of U.S. efforts outside the NATO mandate, such as ANSF development, detention operations, and counter-terrorism operations. A separate U.S. command in theater provides unified execution and oversight of Title 10 responsibilities and national support for logistical, administrative, and intelligence activities.

Question. Is it your understanding that if you are confirmed as Commander, USFOR-A, all U.S. forces in Afghanistan would be under your command?

Answer. Yes, with very few exceptions the details of which are classified, all U.S. forces are under my command. However, the command relationships are varied depending on the unit and its mission. For instance, while the majority of the combat forces conducting counterinsurgency operations are under the Operational Control of ISAF, I would still have Administrative Control (funding, justice, logistics, and intelligence activity supervision) over those units. Some units conducting operations under OEF mandate would be under my Operational Control. In addition, I would have Tactical Control of select counterterrorism elements; while, CENTCOM retains Operational Control over them.

Question. The position of a three-star Deputy Commander, USFOR-A, has been established to oversee the day-to-day operations in Afghanistan.

Do you believe there is a need to dual-hat the Deputy Commander, USFOR-A, within the ISAF command structure to ensure proper coordination of ISAF forces throughout Afghanistan?

Answer. I believe the optimal solution is to dual-hat the Deputy Commander, USFOR-A as the commander of a NATO, 3-star operational headquarters. This solution would allow one commander to direct ISAF tactical operations and ensure unity of effort where appropriate with USFOR-A/OEF operations. I recognize that this is a NATO decision and currently under consideration.

BUILDING THE AFGHAN NATIONAL SECURITY FORCES

Question. The administration's new strategy calls for training and equipping the Afghan National Army to a level of 134,000 and the Afghan National Police to a level of 82,000, by 2011.

In your view will the currently-planned end strength levels for the ANA and ANP be sufficient to provide security and stability in Afghanistan or should these end

strength levels be increased? If so, what levels would you recommend for the ANA and the ANP?

Answer. The ANSF today (approximately 86,000 ANA and 82,000 ANP) is not of sufficient size to provide long-term security and stability for the people of Afghanistan. While I would need to make an on-the-ground assessment, at this time I do not believe the current authorized ANSF force levels (134,000 ANA and 86,800 ANP) are sufficient to provide this security.

There are two ongoing studies that will help inform our recommendations and decisions regarding the future size and capabilities of the ANSF. The European Community (EC) has commissioned a study, expected to be complete in mid-summer 2009, to assess the required capabilities of the Afghan National Police. The Secretary of Defense also directed that a detailed analysis, led by CENTCOM and the Joint Staff, be conducted in order to help us make informed recommendations on options for future end-strength and capabilities for both the ANA and the ANP. This study with assessed courses-of-action is due back to the Secretary by mid-June 2009. If confirmed, I will use the results of both of these studies and my own assessment to make recommendations to Secretary Gates on the future size and capabilities of the ANSF.

Question. Traditionally, Foreign Internal Defense (FID) and the security force assistance mission have been the responsibility of Special Operations Forces (SOFs). Army and Marine Corps general purpose forces (GPFs), however, have provided the bulk of the troops advising and assisting Afghan National Army and Police forces.

What is your assessment of the differences between SOF and GPFs in performing the security force assistance mission?

Answer. Both SOF and GPFs have a role in the development of the ANSF. Both must be involved in the training, partnering, and mentoring of ANSF at the appropriate unit level. Effective and steady ANSF development focused on bringing Afghan forces to a level where they can operate across the shape, clear, hold, build continuum with minimal to no U.S./coalition support is a critical and essential aspect of the new strategy.

The specialized nature of SOF in the FID role provides unique and focused skills and training needed by ANSF as they become more advanced in their development as a security and COIN force. GPFs bring an order of magnitude of capacity to the security force assistance mission that does not exist within our SOF. The skills and expertise of GPFs along with the larger size of these units provides the opportunity to ensure the ANSF are grounded in the essential basics of a professional military force as well as the opportunity to engage across a larger footprint of ANSF units on a sustained basis.

I believe the first foundation of any quality COIN force is a well-trained and disciplined soldier/policeman who understands the basics of his profession. GPF and SOF forces together provide that building block approach for ANSF development.

Question. If confirmed, what plans do you have, if any, to employ SOF's and GPF's to advise and assist the Afghan National Army and Police?

Answer. I support the current employment of both SOF and GPF in training, partnering, and mentoring the ANSF. SOF provides mentors for the Afghan National Army Commando Kandaks (battalions) as well as some infantry kandaks. They also provide mentors for the Afghan Public Protection Force (APPF), a pilot program. GPFs provide mentors for the Afghan National Army and mentors along with civilian police experts for the Afghan National Police. Combined Security Transition Command-Afghanistan (CSTC-A) coordinates the efforts of SOF and GPF in order to ensure unity of effort.

Question. If confirmed, what changes would you recommend, if any, with respect to the organizational, training, equipping, or deployment policies of GPFs performing the security force assistance mission?

Answer. If confirmed I would work with CENTCOM, SHAPE, CJCS and our Service chiefs to ensure that all units that deploy to Afghanistan can conduct the full range of counter insurgency tasks as well as support ANSF development. As of this year, all U.S. maneuver units are deploying with this dual capability. I would work to ensure that our allies and partners prepare and deploy their maneuver forces to do the same.

I would encourage increased language and cultural awareness training for all forces. I would seek 1 year tours for ministerial-level mentors and trainers like their ANA and ANP counterparts in order to establish the necessary relationships with their Afghan partners.

Question. There remains a shortfall in the number of Operational Mentoring and Liaison Teams (OMLTs) for training the Afghan National Army and for similar embedded training teams for building the capabilities of the Afghan National Police.

What should be done to encourage NATO allies to provide more OMLTs?

Answer. I believe that there is already progress on the part of NATO to increase the number of OMLTs being provided. At the recent NATO Summit, Allied Heads of State and Governments all agreed on the importance of providing mentoring teams for Afghan security forces. There are several Allies, as well as non-NATO partners, who have pledged additional OMLTs to fill shortfalls, and although we don't have as many as we need yet, we're heading in the right direction.

Question. What is your assessment of the Afghan National Police? What more should be done to build the ANP?

Answer. The Afghan National Police continue to be challenged by corruption, lack of training, and overall capability. Minister of Interior Atmar recognizes these shortcomings and has identified acceleration of training, elimination of corruption, and force growth as his top priorities for the police. I recognize that Police training and reform is a joint effort between the U.S. Departments of State and Defense, and the European Union Police Mission—Afghanistan (EUPOL). If confirmed I will work closely with Ambassador Eikenberry to support Minister Atmar's priorities to ensure that police training, reform and growth are properly aligned with other larger rule of law and security efforts.

The most critical shortcoming for ANP training has been the shortage of trainers and mentors. President Obama's decision in March to deploy 4,000 additional trainers to Afghanistan will help to address this shortfall. We must also continue to encourage our NATO partners to provide police mentors—especially in the districts where they are the battlespace owners and where we can create a real synergy of effort to develop a quality, respected police force. The United States is already adopting this strategy with our COIN Brigade Combat Teams (BCTs) in the east and south providing additional police mentors.

Question. What more can NATO and the European Union Police Mission in Afghanistan do in your judgment to improve the effectiveness of the police?

Answer. Reports indicate EUPOL has to date done well in the training of police forces and staffs on a provincial level. We must continue to support the organization and encourage greater capacity as they bring law and order, rule of law, and other police expertise to this effort. However, it is readily apparent that the true front lines of this conflict are on the district and urban police levels; Afghan police officers are suffering a much higher casualty rate at the hands of the insurgent forces than their Army counterparts. NATO recognizes this and recently approved the concept of a NATO Training Mission-Afghanistan (NTM-A) geared towards the police force. This concept will allow nations to contribute police trainers, and in fact some Allies have already pledged personnel even though the details of this concept are still being vetted. I completely concur with the U.S. recommendation for NTM-A to take on police institutional training and will aggressively encourage its application and development.

CHALLENGES FOR ACCELERATING THE GROWTH OF THE AFGHAN NATIONAL SECURITY FORCES

Question. Witnesses at committee hearings have cited a number of challenges impeding the acceleration of expanding the ANSFs, including: (1) a lack of training/mentoring teams to embed with Afghan units; (2) a lack of equipment; and (3) the challenge of developing leadership among officers and noncommissioned officers.

What in your assessment is the greatest challenge to accelerating the growth of the ANSFs?

Answer. I concur that the greatest international community challenge to accelerating the growth of the ANSF is the requirement for mentors for these forces. I also concur that the greatest Afghan challenge is the development of leadership for the expanded forces.

Question. If confirmed, how would you recommend addressing this challenge?

Answer. The President's decision in March to deploy the 4/82 BCT to provide additional mentors for the ANSFs will allow us to meet our ANA embedded training team requirements for the 134K Army and will significantly increase the number of ANP police mentor teams. U.S. COIN BCTs are also assuming responsibility for police mentors in districts within their battlespace. We must continue to encourage our NATO partners to provide additional district mentors in order to build synergy for security within the battlespace and increase the number of districts with police mentor coverage. I also recommend encouraging NATO to use the proposed NTM-A as an opportunity to enhance its training and mentoring of the ANP.

Expanding the leadership capacity of the ANSF requires training and experience. Both the ANA and ANP have leadership development programs in place and if confirmed I will work with CSTC-A and the Ministries to identify efficiencies in both programs and also identify other ways to mitigate their leadership challenges. How-

ever, we must also recognize that leader development requires time and we must balance the pressing need for additional growth and progress in leadership with this reality in order to build forces that are self-sustaining over the long-term.

AFGHAN PUBLIC PROTECTION PROGRAM

Question. A pilot program called the Afghan Public Protection Program (APPP) has been launched in Wardak Province to empower local communities to provide for their own security, reportedly modeled on the Sons of Iraq program. Some experts have expressed concern, however, that the program risks strengthening local warlords.

What is your assessment of the APPP?

Answer. As mentioned, and as a pilot program, the APPP is still in its early stages but assessments of the APPP up to this point have been positive. This pilot program has been closely coordinated among the Afghan Ministries of Interior and Defense, USFOR-A, and local Afghan authorities and community leaders. If confirmed, I would assess this program as part of the overall efforts to improve security.

Question. What concerns, if any, do you have about the program? If confirmed, how would you seek to address those concerns?

Answer. Connection to and the ability to secure the local population are key to the success of the program. We must ensure, without creating new tensions, the Ministry of Interior has the capability to provide the proper level and quality of oversight, the appropriate selection and training of the APPP, and the mutual commitment of community leaders and local authorities. Currently, the APPP is deployed in one district under the direct control of the local police chiefs with guidance and management provided by the MOI as well as the district and provincial governors. U.S. forces continue to provide oversight and mentoring to the pilot program. Further, all members of the APPP are carefully selected through a collaborative community vetting process that involves not only village elders and shura leaders but key stakeholders from Government of Afghanistan. Ensuring the APPP is and remains connected to ANP at the local level is critical to avoid a return to 'armed bands of warlords'. If confirmed I would review this process, and if it is effective, intend to continue it.

COUNTERNARCOTICS

Question. What is your assessment of the current U.S. and NATO strategies for combating the production and trafficking of illegal narcotics in Afghanistan? What changes, if any, would you make in those strategies if you are confirmed?

Answer. The U.S. and NATO military strategies and actions to combat the production and trafficking of illegal narcotics in Afghanistan are more robust now than before, but we clearly need to continue to improve. The corrosive effects of narcotics undermine all efforts to improve security, governance, and development in Afghanistan. A nexus exists between narcotics and the insurgency as well as corruption and criminality. Recent decisions by the NATO Defense Ministers and the Secretary of Defense, at the request of the Afghan Government, provided the guidance and authorities for both ISAF forces and the U.S. military to target the trafficking and production of narcotics where the nexus exists. Additionally, the recent change to DOD's international counternarcotics policy enabled more robust support and integration of capabilities with civilian law enforcement agencies operating in Afghanistan.

I understand the U.S. Government's intent to rebalance its counternarcotics strategy and I support this effort because I don't think that crop eradication alone is the right approach. I believe we need a multi-pronged approach that targets laboratories, traffickers and movement of drugs, and facilitators at the same time we work to provide alternative income opportunities for farmers.

Question. In December, Secretary Gates approved an expanded set of rules of engagement for U.S. forces combating narcotics in Afghanistan. NATO has reportedly approved a comparable expansion of the rules of engagement for NATO forces operating in Afghanistan.

What is your understanding of the reasons behind these changes in the counternarcotics rules of engagement and the impact of these changes in the rules of engagement?

Answer. It is clear that a nexus exists between the insurgency and the narcotics trade in Afghanistan. Prior to fall 2008, the U.S. military's rules of engagement made it problematic to target those engaged in the drugs trade and providing support to insurgents. Also, military support to host nation and civilian law enforcement agencies was restricted by military commanders' interpretation of DOD's coun-

ternarcotics policy. The refinement of that policy was requested by the CENTCOM commander and in December 2008 a new policy was signed out that now fosters the integration of military support to law enforcement activities against the narcotics trade in Afghanistan. The guidance from the NATO Defense Ministers' meeting in November of 2008 resulted in the refinement of ISAF's Operational Plan (OPLAN) counternarcotics annex (Annex RR) rules of engagement to "take action in concert with the Afghans against facilities and facilitators of the narcotics trade supporting the insurgency."

Question. When recently asked about what U.S. and NATO forces had done to stop the flow of opium and heroin, the Afghan Minister for Counternarcotics reportedly said "nothing." This response is deeply concerning particularly in light of the significant investment the American people have made in training Afghan counternarcotics forces.

Please discuss your assessment of U.S. and NATO operations to stop the flow of opium and heroin.

Answer. In 2009 year to date, the Afghan security forces supported by ISAF and USFOR-A have made progress interdicting the narcotics trade with respect to last year. Destruction of labs, seizures of drugs and precursor chemicals, and targeting of facilitators have increased. However, the full impact of these interdiction efforts is not yet known. Our multi-pronged approach to CN must include a comprehensive assessment process.

Question. In March 2009, Iran, Afghanistan, and Pakistan carried out a joint counternarcotics operation. The operation was part of a U.N. initiative, called the Rainbow Strategy, aimed at getting the three countries to carry out joint patrols and share intelligence on the members of the drug trade that process opium poppy into heroin and smuggle the drug to markets in Europe. The NATO Secretary General has discussed his desire to boost these joint efforts to counteract the illegal drug trade and trans-border organized crime from Afghan territory.

Please discuss your views on the possibility of NATO and U.S. opportunities to cooperate with Iran in countering the narcotics trade in Afghanistan.

Answer. Counternarcotics in Central Asia is a regional problem. In addition to Afghanistan, the negative effects of the drug trade are felt in Iran and Pakistan. The United Nations Office on Drugs and Crime (UNODC) has cited the Iranians as being the most successful at interdiction in the region, seizing more than one-third of the opium smuggled out of Afghanistan through Iran (Source—UNODC report and recent comments by the UNODC Executive Director). These and other successful lessons could be shared between the Iranian and Afghan border security and law enforcement officials. This could be positive development and help improve stability in the region. As Commander, ISAF I would work through Afghan officials to find opportunities to support the Afghanistan's participation in this type of regional cooperation.

MISSION FOCUS OF SPECIAL OPERATIONS FORCES

Question. Some observers have contended that U.S. Special Forces operations and resources have been focused on "direct action" strategies aimed at killing or capturing insurgents, while foreign internal defense efforts emphasizing the protection of the Afghan people and training the Afghan security forces have taken a back seat.

What do you believe should be the proper balance between U.S. Special Forces operations and resources committed to direct action versus foreign internal defense, including intelligence, force levels, and logistics?

Answer. Striking the appropriate balance between direct and indirect actions is critical. SOF is often wrongly perceived as focused on direct action, when in fact a top priority role for SOF in Afghanistan has always been its foreign internal defense role in partnering and training ANSFs. SOF is one contributing element to that goal, along with CSTC-A and our international partners. We work "by, with, and through" the Afghan Government, because that is the only way to build necessary and sustainable capacity.

Question. In your view, what should be the role of direct action operations in Afghanistan? Do you believe that direct action operations can defeat the Taliban?

Answer. Disruption of terrorist and extremist groups relies in part on direct and focused counterterrorism actions. SOF units are trained and equipped to be the most lethal and precise operators in achieving this mission. Direct action remains an important aspect of disrupting our enemies, but it is neither the only role, nor the most important role, of SOF in Afghanistan. SOF is agile and adaptive, with unique skills in engaging indigenous and tribal groups, enabling our strategic communications through psychological operations, and targeting developmental and eco-

conomic improvements through civil affairs officers. Direct action operations alone can not defeat the Taliban but is crucial to the overall COIN strategy.

Question. Do you believe that U.S. Special Forces have enough experts in the foreign internal defense mission in Afghanistan and are being used fully to train Afghan security forces to protect the population and win “hearts and minds”?

Answer. By their very nature, SOF units are comparatively small in size and scope. They are specially trained to build and partner with indigenous security forces and to operate independently under austere conditions. We must optimize the limited SOF resources available to maximize their impact in theatre by ensuring that they are used for those activities that support our strategic priorities and capitalize on SOF specialties.

In February 2009, a new one-star SOF command was established to plan and synchronize direct and indirect activities to achieve a balanced approach to COIN across Afghanistan.

Combined Forces Special Operations Component Command Afghanistan (CFSOCC-A) operates at the strategic-operational level and brings important resources and capacity to efforts in Afghanistan. These include high-level strategic guidance, synchronization of SOF throughout the Afghan theatre, enhanced support to SOF units, liaison with ISAF, the U.S. Embassy, and other key elements of our national and international effort.

RECONSTRUCTION EFFORTS AND PROVINCIAL RECONSTRUCTION TEAMS

Question. If confirmed, what would be your role as Commander, ISAF, and COMUSFOR-A in reconstruction efforts in Afghanistan?

Answer. I would work to establish an integrated “whole of international community and whole of U.S. Government approach” to reconstruction. I would work to establish comprehensive linkages between all lines of effort (security, governance, development, and strategic communications) the Government of Afghanistan, the Afghanistan National Development Strategy (ANDS) and the priorities of the Afghan people. I would ensure the efforts of our military forces are linked to those of the Afghan Government, UNAMA, USAID, other national development agencies, and NGOs. I would also work to ensure that our efforts are sustainable, meaning that they are Afghan led and maintained, and respond to Afghan priorities. This requires capacity building at all levels of the Afghan Government and must include constant engagement with local Afghan leaders and communities.

Question. What is your assessment of the performance of the Provincial Reconstruction Teams (PRTs) in Afghanistan?

Answer. I believe that the PRTs are of tremendous value and that they are making a difference across Afghanistan, many working with extremely limited resources. I’m aware that Congress legislated a report on measuring progress in the U.S. PRTs in the 2009 NDAA and that this report is still in final coordination within the inter-agency. I look forward to its submission in order to help us better refine measures of effectiveness. If I am confirmed, assessing PRTs is one of my highest priorities with the intent of determining how we can improve on a concept that has had some remarkable successes.

Question. What improvements, if any, do you believe need to be made in the operations or coordination of the U.S. and NATO PRTs in Afghanistan?

Answer. As outlined earlier, if confirmed I need to conduct an assessment. My current belief is that we need to improve collaboration among all stakeholders to better synchronize our collective efforts. This collaboration includes the PRTs, the United States and other partner embassies, the Government of Afghanistan, and international aid/development organizations. I believe the most immediate need is linking these capacity building efforts down to the local level in partnership with the increases in forces this year. These efforts must operate in parallel so that capacity building and development efforts can be executed as soon as clearing operations permit.

Question. What improvements, if any, do you believe need to be made in the coordination of military and civilian efforts to provide reconstruction relief and development and to enhance the governance capacity of the Afghan Government?

Answer. There is an ongoing effort within the interagency to increase the number of civilian experts to build capacity in governance and development. I am also aware that the international community, the Government of Afghanistan, and the interagency are currently looking at the overall requirements for increased civilian capacity from the national down to the local levels. We are working with the interagency on how best to support and employ these civilian experts on the ground. We will not succeed if all we do is establish security and a strong military and police. The most crucial component is to get international and U.S. civilian experts on the

ground to improve capacity in governance and development where we've made gains in security.

NATIONAL SOLIDARITY PROGRAM

Question. One program that contributes to enhancing development and empowering governance at the local level in Afghanistan is the National Solidarity Program (NSP). This program provides block grants directly to locally-elected Community Development Councils, which are responsible for identifying, planning and managing their own development projects. Funding for the NSP comes from the World Bank/International Development Association, bilateral donors, and through the Afghanistan Reconstruction Trust Fund. According to its website, NSP has provided more than \$500 million in payments to 21,000 Community Development Councils, which have financed more than 39,000 subprojects to improve access to infrastructure, markets, and services.

What is your understanding of the value of NSP in Afghanistan?

Answer. The Government of Afghanistan created the National Solidarity Program (NSP) to allow local populations to identify, plan, manage and monitor its own development projects. As an important means of promoting rural development, the NSP empowers rural communities to make livelihood-affecting decisions. Its goal is to reduce poverty by strengthening a national network of self-governing community institutions which plans and implements development projects against local priorities.

The value of the NSP, as I understand it, is that it builds capacity at the community level and elevates and improves base competencies of local communities in financial management, procurement, technical skill, and transparency. Additionally, the Community Development Councils include and integrate women and other traditionally marginalized groups into the decisionmaking cycle at the local level. I believe its greatest value is that it strengthens society, empowers communities, and establishes trust and confidence in the government's ability to assist the people of Afghanistan.

Question. Would you support expanding NSP as a means of building local governance and strengthening development?

Answer. Yes, I would support expanding NSP as a means of building local governance and strengthening development, primarily because the Government of Afghanistan, as a sovereign nation, has implemented this initiative to address internal challenges. Since its inception in mid-2003, the NSP has become the Government of Afghanistan's main instrument for restoring and reconstructing the village social and economic infrastructure and is operating (or being established in) 359 of 364 districts and provincial centers throughout the 34 provinces in Afghanistan.

One of the U.S. strategic objectives is to promote a more capable, accountable, and effective central government in Afghanistan that serves the Afghan people and can eventually function, particularly with regard to providing internal security, with limited international support. This program appears to be an effective method to help achieve that end.

CIVILIAN CASUALTIES

Question. In your view, what can be done to reduce the levels of civilian casualties resulting from operations by coalition forces?

Answer. In addition to the tragic loss of life, I am acutely aware of the negative repercussions resulting from civilian casualties. Any time an innocent person is killed our mission becomes harder and our men and women in Afghanistan fully understand this dynamic. We have procedures in place to make every effort to avoid civilian casualties because our purpose is to protect the population. However, we are fighting an enemy who conducts operations specifically designed to produce casualties that can be attributed to coalition forces. If confirmed, I intend to reiterate guidance on the use of force—emphasizing the importance of not alienating the population—and to continue to review ways to avoid civilian casualties.

Question. What more needs to be done to address the level of civilian casualties in Afghanistan?

Answer. As stated above, if confirmed I intend to continually refine our ways to avoid civilian casualties. In the event that they do occur, I believe it essential to rapidly engage Afghan Government and local community leaders, make rapid compensation where appropriate and conduct joint investigations with Afghan authorities to ensure that the local population sees us as a responsible partner in their security and progress and that we have a common understanding of the events and how we can work together to avoid them.

TREATMENT OF DETAINEES

Question. Section 1403 of the National Defense Authorization Act for Fiscal Year 2006 provides that no individual in the custody or under the physical control of the United States Government, regardless of nationality or physical location shall be subject to cruel, inhuman, or degrading treatment or punishment.

If confirmed, will you take steps to ensure that all relevant Department of Defense directives, regulations, policies, practices, and procedures applicable to U.S. forces in Afghanistan fully comply with the requirements of section 1403 and with Common Article 3 of the Geneva Conventions?

Answer. Yes, I will. The United States has treated, and will continue to treat enemy combatants humanely and, to the extent appropriate and consistent with military necessity, in a manner consistent with the principles of international law and Common Article 3. They are provided with proper shelter and medical care. Each is allowed to exercise his religious beliefs, and is provided food consistent with his religious requirements.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated September 5, 2006?

Answer. I do support the standards outlined in the documents you quote and I will ensure that we continue to operate a safe, humane, legal, transparent and professional enemy combatant detention operation that adheres to our obligations under U.S. and international law, and reflects the highest standards and values of the American people.

U.S. policy requires that all detainees—at all times—be treated humanely and, to the extent appropriate and consistent with military necessity, in accordance with the principles of the Third Geneva Convention of 1949.

Question. How would you ensure a climate that not only discourages the abuse of detainees, but that encourages the reporting of abuse?

Answer. U.S. policy condemns and prohibits torture and abuse of detainees. U.S. personnel are required to follow this policy and applicable law. All credible allegations of illegal conduct by U.S. personnel will be taken seriously and investigated.

Unfortunately criminal acts take place on the battlefield, just like they do in normal society. Fortunately, through improved training and education, substantiated allegations of abuse have decreased over time.

When new allegations arise in the future, I will continue to hold individuals accountable, investigate fully, and take appropriate disciplinary action. I will ensure that all in my chain of command understand they have a duty to report suspected abuse.

Question. In the past 2 years, significant changes have been made in Iraq in the way detention operations have been conducted in a counterinsurgency environment, including through the establishment of reintegration centers at theater internment facilities.

Are you familiar with these changes in detention operations for conducting counterinsurgency operations “inside the wire”? If so, what do you consider to be the main lessons learned from the changes to detention operations in Iraq?

Answer. The primary reason why we have been successful with “inside the wire” detention operations over the last few years is because of your support with the large increase in resources made available for our detention operations. Over the past year, the Department of Defense has constructed a Theater Internment Facility Reintegration Center (TIFRIC), which incorporates a detainee work program to teach valuable, marketable skills to enable detainees to reintegrate into Iraqi society. We have used detention facilities to learn why Iraqis join the insurgency so that the insurgents can be rehabilitated and turned into allies instead of enemies. We segregated extremists, nurtured moderates, and ensured first-rate care and custody for every detainee. We set out to counteract the motivations to join al Qaeda or the insurgency—such as cash incentives and fears of reprisal—and provide detainees with an alternative.

The TIFRIC and other detention facilities now provide rehab programs offering real skills and education like carpentry, textile manufacturing (sewing Bucca Bears and Cropper camels), painting, and limited use of automation, reinforced with moderate clerics messaging has made the difference. In addition our enhanced family visitation programs take advantage of the detainees’ web of relatives, friends, and tribesmen who then also benefit from his rehabilitation.

The critical first step in this successful program is to identify extremists and separate from moderates to enable rehabilitation of moderates and their eventual re-

integration into society. We use military intelligence trained experts to analyze the detainee population and identify the radicals.

Once separated from extremists, we empower and rehabilitate moderates through education, vocational training, and paid work programs to give them the incentive and means to reintegrate into society.

Question. If confirmed, what steps would you take to incorporate those lessons learned into detention operations in Afghanistan?

Answer. Although Afghan society is in many respects different than Iraqi society, I believe many of the lessons learned from conducting Iraqi detention operations can be applied to Afghanistan.

If confirmed, I will establish, or where already in place, strengthen rehabilitation programs to:

- Separate and segregate the extremists.
- Develop a moderate understanding of Islam.
- Impart basic education and vocational skills.
- Continue family visitation and the use of extended family members and tribal associations to aid in a released detainee's abstention from violence.

I will establish a new review process to determine more quickly which detainees do not pose a substantial threat to U.S. forces and can be released immediately

I will work to provide increased transparency to media and international organizations, the Government of Afghanistan, the International Committee of the Red Cross, the U.N., and families so they can see at first hand the high standard of care, the humane conditions, and the rehabilitation programs in order to actively counteract misperceptions and propaganda about our detention facilities.

Finally, I will continue to provide care and custody with dignity and respect for every detainee with a guard force and staff dedicated to modeling and maintaining world class standards.

SAFE HAVENS IN PAKISTAN

Question. The Intelligence Community assesses that Pakistan's FATAs along the border with Afghanistan provide a safe haven for al Qaeda and other extremists supporting the Taliban-led insurgency in Afghanistan.

What should be done to prevent cross-border incursions by al Qaeda and the Taliban from Pakistan into Afghanistan?

Answer. Preventing all incursions is difficult due to the length and porous nature of the border. However, practical cooperation between Afghan, Pakistani, and international forces improves border security. Effective military operations in the Pakistani tribal areas are key to disrupt and eventually deny safe havens to al Qaeda and the Taliban from which to launch these incursions.

ISAF and USFOR-A must continue to enhance the practical cooperation among ANSF, Pakistani military and international forces and increase the effectiveness of our counterinsurgency operations. Effective programs like Border and Joint Coordination Centers, regular tripartite engagements at all levels, and counterinsurgency training are essential to continued progress.

Question. What role should ISAF forces play in countering this threat?

Answer. ISAF operations are restricted to the country of Afghanistan. However, ISAF conducts extensive tripartite coordination at all levels from national command to local tactical units, which contribute to disrupting insurgents operating from safe havens in Pakistan. Despite political constraints from operating in Pakistan, ISAF should and is planning improvements in border security, ISR capacity, and tripartite coordination to interdict and disrupt cross-border operations by insurgents based in Pakistan.

Question. What role should the Afghan National Army play in preventing cross-border attacks by extremist militants from Pakistan into Afghanistan?

Answer. The Afghan Border Police (ABP) have primary responsibility for border security. The Afghan National Army provides direct support and support in depth to the ABP. Operational Coordination Centers are currently being established at the Regional and Provincial levels to improve information sharing and synchronization of efforts.

Question. In your view, should the Pakistan Government be doing more to prevent these incursions?

Answer. The Pakistani military is currently conducting operations against extremist elements in Pakistan. We must continue to support their efforts, encourage operations in the tribal areas against insurgent safe havens, and persuade them to improve their military counterinsurgency capability.

AFGHANISTAN-PAKISTAN COOPERATION

Question. What is your assessment of the current level of cooperation between Afghanistan and Pakistan in confronting the threat of militant extremists in the border region?

Answer. There are encouraging signs that the Pakistani Government's most recent efforts against extremists in Western Pakistan are, in part, facilitated by expanded cooperation with Afghanistan and international forces. This coordination has expanded at political and military levels and if confirmed, I will make every effort to maintain positive momentum.

Question. If confirmed, what recommendations would you have for improving security cooperation between Afghanistan and Pakistan?

Answer. I will continue to support the mechanisms we already have in place such as the Tripartite Commission, border security meetings, the Border and Joint Coordination Centers and other relationships that enhance the cooperation of all parties involved in this fight. I will also support other cooperative mechanisms where appropriate and the efforts of the international community to build regional security. More specifically, I would like to see an expansion in information and intelligence sharing; conduct pre-planned operations that are mutually supporting; and continue to build on the foundation of political cooperation which is maturing every day.

SEXUAL ASSAULT PREVENTION AND RESPONSE IN AFGHANISTAN

Question. Numerous cases of sexual misconduct involving military personnel in Iraq, Kuwait, and Afghanistan have been reported over the last several years. Many victims and their advocates contend that they were victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate military treatment. They assert that the Command failed to respond appropriately by providing basic services, including medical attention and criminal investigation of their charges.

What is your understanding of the resources and programs in place in Afghanistan to offer victims of sexual assault the medical, psychological, and legal help that they need?

Answer. The military Services have primary responsibility to ensure sexual assault response personnel deployed to Afghanistan (Sexual Assault Response Coordinators, Victim Advocates, medical and mental health providers, and criminal investigation personnel) are well trained to support victims and investigate and respond to allegations of sexual assault. If resources are not readily available where the alleged incident occurred, victims are transported to a facility where there is appropriate victim advocate support, medical and psychological care (regardless of service) and investigative/legal support.

I am aware that a number of recommendations were made to CENTCOM in the Department of Defense Fiscal Year 2008 Report on Sexual Assault in the Military, released in March. These included deploying Sexual Assault Response Coordinators and Victim Advocates and outfitting larger field hospitals with Sexual Assault Forensic Examination kits for evidence collection. Initial, independent Service responses to these recommendations may have created areas where duplicative support structures exist. In these instances, opportunities may exist to better pool and employ resources to optimize coverage and improve response. If confirmed, I will look more closely at available resources and find ways to improve support to sexual assault victims.

Also, the Defense Task Force on Sexual Assault in the Military Services is currently evaluating how effectively the Services are implementing the DOD sexual assault policy and procedures. They interviewed key sexual assault responders currently deployed in Afghanistan, including chaplains, counselors, medical and legal personnel, and Criminal Investigations Division agents regarding how they handle cases of sexual assault. In addition, the Task Force has surveyed Sexual Assault Response Coordinators and Victim Advocates in Afghanistan regarding the level of resources and support they have, and regarding the effectiveness of restricted reporting in the deployed environment. Their findings and recommendations will be reported to Secretary of Defense later this year. If confirmed, I will ensure that all of the recommendations are considered for implementation within Afghanistan.

Commanders at all levels must remain committed to eliminating sexual assault within our forces by sustaining robust prevention and response policies; by providing thorough and effective training to all assigned servicemembers, by identifying and eliminating barriers to reporting; and by ensuring care is available and accessible.

Question. What is your view of steps the Command has taken to prevent sexual assaults in Afghanistan?

Answer. If I am confirmed, I will need to assess this. I am aware that a congressionally mandated DOD Task Force on Sexual Assault is currently reviewing sexual assault to include an assessment of response capabilities in Afghanistan. I look forward to their report.

Currently, it is my understanding that DOD policy guidance is in place in theater for the prevention of sexual assault which includes reporting procedures and command responsibilities. As we increase our presence in the area, I will ensure that our Sexual Assault resources are sufficient to respond to any incidents that may occur. But my primary objective will be to implement preventive measures through training and leadership involvement.

Question. What is your view of the adequacy of the training and resources in Afghanistan to investigate and respond to allegations of sexual assault?

Answer. The military Services have primary responsibility for the sexual assault response personnel deployed to Afghanistan to ensure they are well trained to investigate and respond to allegations of sexual assault. My expectation is that Sexual Assault Response Coordinators (SARCs) and Victim Advocates are designated for every operating area and are committed to providing the best care possible for deployed victims.

Additionally, each of the military Services have identified investigative resources in deployed areas. However, as you may imagine, the combat environment and deployed operations are very dynamic. The investigative resources are often strained by other mission requirements. Access to resources may be complicated by remoteness of locations, availability of transportation to and from those areas or the level of ongoing operations. I believe the DOD training network in place now prepares them and investigators to handle sexual assault cases in a caring, responsive and professional manner. Our ability to respond and support victims is paramount.

Question. Do you consider the current sexual assault policies and procedures, particularly those on confidential reporting, to be effective?

Answer. I believe current policies and procedures have improved care to victims of sexual assault. However, restricted reporting limits a commanders' ability to support the victim, investigate and/or hold alleged offenders accountable.

Restricted reporting allows a sexual assault victim to confidentially receive medical treatment and counseling without triggering the official investigation process. Personnel may make a restricted report to the SARC, Victim Advocate or health care professional. Communications with chaplains also are confidential.

Unrestricted reporting supports a sexual assault victim who desires medical treatment, counseling but also provides for official investigation of his or her allegations within existing administrative reporting channels (such as their chain of command, law enforcement or through the Sexual Assault Response Coordinator (SARC)).

Although the use of restricted, or confidential, reporting doesn't allow a commander to investigate alleged assaults, it does allow a sexual assault victim to confidentially receive medical treatment and counseling without triggering the official investigation process.

As our military members' confidence in the reporting and investigative policies and procedures improve, I believe more alleged offenders can be held accountable. The greatest effect still lies in preventive measures and eliminating sexual assaults.

Question. What problems, if any, are you aware of regarding the manner in which the confidential reporting procedures have been put into effect?

Answer. In Afghanistan, I suspect that privacy for restricted and unrestricted reporting becomes a challenge in a deployed environment where units are small communities where accountability of personnel is a critical task for units. It becomes more difficult for the victim to reach out to the SARC or a victim advocate because of the need to keep track of all personnel movements within the theater and that support resources may not be co-located with the victim. The joint deployed environment could present additional difficulties in case management, delivering care and tracking services due to differences among Service programs. It is my understanding that the DOD Sexual Assault Prevention and Response Office is working to field a Joint Sexual Assault Database to improve our ability to communicate between the Services. The database is currently projected for fielding in 2010.

MENTAL HEALTH OF SERVICEMEMBERS AND STRESS ON THE FORCE

Question. The committee is concerned about the stress on military personnel resulting from lengthy and repeated deployments and their access to mental health care to deal with this increased stress. The Chairman of the Joint Chiefs of Staff recently said that the shooting of five servicemembers at a stress control clinic by

a troubled Army sergeant in Iraq speaks to “the need . . . to redouble our efforts” and “the issue of multiple deployments” and increasing dwell time “to try to improve to relieve that stress.” This tragic incident, as well as increasing suicide rates in every Service, are clear reminders that servicemembers, particularly those who have been deployed multiple times, are under tremendous stress and need access to mental health care.

In your view, are there sufficient mental health assets in theater to address the mental health needs of the military personnel who are serving in Afghanistan?

Answer. Trying to assign a number or percentage of fill to define the sufficiency of assets does not accurately portray the complexity of the mental health issues or the individual needs of our forces on the ground as we continue to support operations in Afghanistan. I am aware of multiple efforts across the DOD that are looking at the issue of mental health assets in theater and most have shown that we need to have a change in both provider quantity and distribution, favoring increasing providers and stationing them closer to the line troops. Additionally, we must continue to evaluate and increase the availability of care for our servicemembers assigned to CSTC-A, who are traditionally not going to be co-located with or near our U.S. bases. I can assure you that I will work to make resilience training and mental health care available to every man and woman under my command and I will leave no stone unturned to get those capabilities to them as soon as possible. The DOD has made huge strides in our combat capabilities leveraging advanced technologies and I see no reason why we cannot bring those lessons learned into the medical and behavioral health arena, such as expanding our telemedicine capabilities to address the needs of our more remote outposts. Without a doubt, these issues will need to be handled with great care and respect for the sacrifices and incredible work of our brave men and women who deploy to this very challenging environment.

Question. If confirmed, what actions will you take to address the mental health needs of military personnel serving in Afghanistan?

Answer. First, let me say that the responsibility for the mental health and fitness of the forces under my command will fall on me and my subordinate commanders. This issue is not simply a medical matter but a complex topic that requires a team response and a coordinated effort. Commanders must set the right command climate, not only to remove the stigma of asking for and receiving care for psychological injury, but to build cohesive teams, recognize the need for prevention and identification of problems—as well as having the right resources in place when problems do arise. When behavioral health problems do surface, as they do in any population of human beings—not just in combat troops—we should be ready to address those. I am aware of the multiple efforts underway within the DOD to increase the number of behavioral health providers in theater. I support these efforts. In addition, it is critical to point out that mental health is not simply a numbers issue but an asset distribution issue as well. We need to make sure everybody gets taken care of and not just the people on the large bases. That means pushing behavioral health assets forward to embed with the line units; in other cases, it may involve leveraging our telecommunications assets to get to those very small and remote operating bases. If I have to make more bandwidth available to support those remote locations with mental health access then that is what I am going to do. In any case, I plan to look at the problem carefully and not simply go with the path of least resistance or most conventional choice—I’ll do whatever it takes to maintain a fit and ready force both in body and spirit.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the ISAF Commander/Commander, USFOR-A?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR SUSAN COLLINS

AFGHANISTAN PROGRESS

1. Senator COLLINS. General McChrystal, I have long advocated for a mechanism for measuring our progress in Afghanistan. The President has announced his strategy; however, it is still unclear just how we intend to measure success in Afghanistan. How do you intend to measure progress in Afghanistan?

General McCHRISTAL. I intend to use the core goal and objectives articulated in the President's strategy announced at the end of March as my guide for measuring progress in Afghanistan. Currently, under the lead of the National Security Council, work is being done through interagency policy coordination processes to develop benchmarks and metrics for measuring progress against the President's strategy for both Afghanistan and Pakistan. My responsibilities as the USFOR-A Commander requires me to provide input into that process through CENTCOM. I will ensure the metrics and benchmarks developed for Afghanistan measure progress with respect to the principles of counterinsurgency.

COMMANDERS EMERGENCY RESPONSE PROGRAM

2. Senator COLLINS. General McChrystal, General Petraeus has stated Commanders Emergency Response Program (CERP) funds provide maximum capability to the U.S. mission in Afghanistan. These funds are used on reconstruction projects that build goodwill and presumably reduce the threat to U.S. forces. Do you believe that CERP funds should reside with DOD or the State Department? Who should have oversight of these funds?

General McCHRISTAL. The oversight of these funds should remain with DOD. The impact of the ability of the commander on the ground to use his discretion in allocating these funds to support local projects is vital. The credibility that it brings to our efforts to secure the population also pays huge dividends by establishing a sense of trust and loyalty which can often lend itself to developing important intelligence on insurgents in the area, which if verified and acted upon quickly, exponentially increases security for the population. The close relationship between our commanders on the ground and the PRT's allows for significant input from DoS on how and when the funds should be used.

TALIBAN FUNDING

3. Senator COLLINS. General McChrystal, can you comment on what portion of the funding for the Taliban comes from wealthy individuals and "charitable" organizations in the Middle East versus narcotics?

General McCHRISTAL. Based on available information we can assess that both funding streams are major sources of significant and consistent levels of funds to the Taliban, and will continue to do so for the foreseeable future, based on the established networks specific to each source. We believe that targeting one source will not be enough to significantly disrupt the Taliban's ability to conduct operations.

NORTH ATLANTIC TREATY ORGANIZATION

4. Senator COLLINS. General McChrystal, we discussed the role of the North Atlantic Treaty Organization (NATO) during our meeting in my office last month. Do you think NATO will embrace the counterinsurgency strategy?

General McCHRISTAL. Militarily, I think in many ways NATO is already embracing the counterinsurgency (COIN) strategy through the various missions their

forces, and those of our non-NATO partners, execute. At the same time, the political reality in NATO is such that the phrase 'counterinsurgency' is problematic. During the Strausborg/Kiel Summit in April, the NATO Heads of State and Governments (HOSGs) reaffirmed their commitment to Afghanistan with a Declaration, which included the following statement: 'We will fill ISAF's military requirements and provide our commanders with the maximum possible operational flexibility for the use of our forces.' As the Commander, ISAF, I view that as an implied acceptance of the COIN mission, even as it avoids using that term. Within NATO there are ongoing discussions about codifying the term 'asymmetric warfare' to embody what we would consider COIN; should it be agreed upon, I would consider that a sufficient compromise.

5. Senator COLLINS. General McChrystal, has any progress been made toward removing some of the rules of engagement (ROE) caveats that our NATO allies operate under?

General McCHRISTAL. In the past 6 months, there was a modest decrease in the number of total caveats reported by our allies and partners, from 76 to 69. Regarding ROE caveats, there are currently 26 in place by 9 nations, mainly due to national laws and/or policies pertaining to the use of force and detention guidelines. As part of my initial assessment once in country, I will review the caveat list to look for potential areas where my staff can apply effort, as well as where NATO leadership can engage with capitals to lift or reduce caveats.

[The nomination reference of LTG Stanley A. McChrystal, USA, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
May 18, 2009.

Ordered. That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment in the United States Army to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

To be General.

Lt. Gen. Stanley A. McChrystal, 3565.

[The biographical sketch of LTG Stanley A. McChrystal, USA, which was transmitted to the committee at the time the nomination was referred, follows:]

831

BIOGRAPHICAL SKETCH OF LTG STANLEY A. McCHRISTAL, USA

REPLY TO
ATTENTION OF

DEPARTMENT OF THE ARMY
OFFICE OF THE CHIEF OF LEGISLATIVE LIAISON
1600 ARMY PENTAGON
WASHINGTON DC 20310-1600

MAY 21 2009

The Honorable Carl Levin
Chairman
Committee on Armed Services
United States Senate
Washington, D. C. 20510

Dear Mr. Chairman: *Sir,*

The President has forwarded to you under separate cover the following nomination.

For appointment to the grade of General:

Lieutenant General Stanley A. McChrystal, Director, The Joint Staff, Washington, DC, as Commander, International Security Assistance Force/Commander, United States Forces, Afghanistan.

For the information of the Committee, I am enclosing a military career resume for this officer showing his assignments and grades held.

Sincerely,

Bernard S. Champoux
Major General, U.S. Army
Chief of Legislative Liaison

Enclosure

RÉSUMÉ OF CAREER SERVICE FOR LTG STANLEY A. McCHRISTAL, USA

Source of commissioned service: USMA.

Educational degrees:

United States Military Academy - BS - No Major.
United States Naval War College - MA - National Security and Strategic Studies.
Salve Regina University - MS - International Relations.

Military schools attended:

Infantry Officer Basic and Advanced Courses.
United States Naval Command and Staff College.
Senior Service College Fellowship - Harvard University.

Foreign languages: Spanish.

Promotions:

Promotions	Date of Appointment
2LT	June 2, 1976
1LT	June 2, 1978
CPT	August 1, 1980
MAJ	July 1, 1987
LTC	September 1, 1992
COL	September 1, 1996
BG	January 1, 2001
MG	May 1, 2004
LTG	February 16, 2006

Assignment:

From	To	Assignment
Nov. 1976	Feb. 1978	Weapons Platoon Leader, C Company, 1st Battalion, 504th Parachute Infantry Regiment, 82d Airborne Division, Fort Bragg, NC
Feb. 1978	July 1978	Rifle Platoon Leader, C Company, 1st Battalion, 504th Parachute Infantry Regiment, 82d Airborne Division, Fort Bragg, NC
July 1978	Nov. 1978	Executive Officer, C Company, 1st Battalion, 504th Parachute Infantry Regiment, 82d Airborne Division, Fort Bragg, NC
Nov. 1978	Apr. 1979	Student, Special Forces Officer Course, Special Forces School, Fort Bragg, NC
Apr. 1979	June 1980	Commander, Detachment A, A Company, 1st Battalion, 7th Special Forces Group (Airborne), Fort Bragg, NC
June 1980	Feb. 1981	Student, Infantry Officer Advanced Course, United States Army Infantry School, Fort Benning, GA
Feb. 1981	Mar. 1982	S-2/S-3 (Intelligence/Operations), United Nations Command Support Group-Joint Security Area, Korea
Mar. 1982	Nov. 1982	Training Officer, Directorate of Plans and Training, A Company, Headquarters Command, Fort Stewart, GA
Nov. 1982	Sep. 1984	Commander, A Company, 3d Battalion, 19th Infantry, 24th Infantry Division (Mechanized), Fort Stewart, GA
Sep. 1984	Sep. 1985	S-3 (Operations), 3d Battalion, 19th Infantry, 24th Infantry Division (Mechanized), Fort Stewart, GA
Sep. 1985	Jan. 1986	Liaison Officer, 3d Battalion, 75th Ranger Regiment, Fort Benning, GA
Jan. 1986	May 1987	Commander, A Company, 3d Battalion, 75th Ranger Regiment, Fort Benning, GA
May 1987	Apr. 1988	Liaison Officer, 3d Battalion, 75th Ranger Regiment, Fort Benning, GA
Apr. 1988	June 1989	S-3 (Operations), 3d Battalion, 75th Ranger Regiment, Fort Benning, GA
June 1989	June 1990	Student, Command and Staff Course, United States Naval War College, Newport, RI
June 1990	Apr. 1993	Army Special Operations Action Officer, J-3, Joint Special Operations Command, Fort Bragg, NC, and Operations Desert Shield/Desert Storm, Saudi Arabia
Apr. 1993	Nov. 1994	Commander, 2d Battalion, 504th Parachute Infantry Regiment, 82d Airborne Division, Fort Bragg, NC
Nov. 1994	June 1996	Commander, 2d Battalion, 75th Ranger Regiment, Fort Lewis, WA
June 1996	June 1997	Senior Service College Fellowship, John F. Kennedy School of Government, Harvard University, Cambridge, MA
June 1997	Aug. 1999	Commander, 75th Ranger Regiment, Fort Benning, GA
Aug. 1999	June 2000	Military Fellow, Council on Foreign Relations, New York, NY
June 2000	June 2001	Assistant Division Commander (Operations), 82d Airborne Division, Fort Bragg, NC, to include duty as Commander, Combined Joint Task Force-Kuwait, Camp Doha, Kuwait
June 2001	July 2002	Chief of Staff, XVIII Airborne Corps and Fort Bragg, Fort Bragg, NC, to include duty as Chief of Staff, Combined Joint Task Force-180, Operation Enduring Freedom, Afghanistan
July 2002	Sep. 2003	Vice Director for Operations, J-3, The Joint Staff, Washington, DC
Sep. 2003	Feb. 2006	Commanding General, Joint Special Operations Command, Fort Bragg, NC
Feb. 2006	June 2008	Commander, Joint Special Operations Command/Commander, Joint Special Operations Command Forward, United States Special Operations Command, Fort Bragg, NC
Aug. 2008	Present	Director, The Joint Staff, Washington, DC

Summary of joint assignments:

Assignment	Date	Grade
S-2/S-3 (Intelligence/Operations), United Nations Command Support Group-Joint Security Area, Korea.	Feb. 1981-Mar. 1982	Captain
Army Special Operations Action Officer, J-3, Joint Special Operations Command, Fort Bragg, NC, and Operations Desert Shield/Desert Storm, Saudi Arabia.	June 1990-Apr. 1992	Major/Lieutenant Colonel

Assignment	Date	Grade
Chief of Staff, XVIII Airborne Corps and Fort Bragg, Fort Bragg, NC, to include duty as Chief of Staff, Combined Joint Task Force-180, Operation Enduring Freedom, Afghanistan.	June 2001–July 2002	Brigadier General
Vice Director for Operations, J-3, The Joint Staff, Washington, DC	July 2002–Sept. 2003	Brigadier General
Commanding General, Joint Special Operations Command, Fort Bragg, NC	Sept. 2003–Feb. 2006	Brigadier General/ Major General
Commander, Joint Special Operations Command/Commander, Joint Special Operations Command Forward, United States Special Operations Command, Fort Bragg, NC.	Feb. 2006–June 2008	Major General/ Lieutenant General
Director, The Joint Staff, Washington, DC	Aug. 2008–Present	Lieutenant General

Summary of operations assignments:

Assignment	Date	Grade
Army Special Operations Action Officer, J-3, Joint Special Operations Command, Operations Desert Shield/Desert Storm, Saudi Arabia.	June 1990–Mar. 1991	Major
Commander, Combined Joint Task Force-Kuwait, Camp Doha, Kuwait	Apr. 2001–June 2001	Brigadier General
Chief of Staff, Combined Joint Task Force-180, Operation Enduring Freedom, Afghanistan.	May 2002–July 2002	Brigadier General

 Master Parachutist Badge
 Ranger Tab
 Special Forces Tab
 Joint Chiefs of Staff Identification Badge

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by LTG Stanley A. McChrystal, USA, in connection with his nomination follows:]

UNITED STATES SENATE
 COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
 NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed, use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Stanley A. McChrystal.
2. **Position to which nominated:**
Commander, International Security Assistance Force/Commander, United States Forces Afghanistan.
3. **Date of nomination:**
May 18, 2009.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
August 14, 1954; Fort Leavenworth, KS.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Annie McChrystal (Maiden name: Cocoran).
7. **Names and ages of children:**
Sam McChrystal, 25.
8. **Government experience:** List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.
None
9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.
None.
10. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.
Council on Foreign Relations.
11. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.
None.
12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?
Yes.
13. **Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?
Yes.

[The nominee responded to the questions in Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–E are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

STANLEY A. MCCHRYSAL.

This 13th day of May, 2009.

[The nomination of LTG Stanley A. McChrystal, USA, was reported to the Senate by Chairman Levin on June 9, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on June 10, 2009.]

NOMINATIONS OF GORDON S. HEDDELL TO BE INSPECTOR GENERAL, DEPARTMENT OF DEFENSE; DR. J. MICHAEL GILMORE TO BE DIRECTOR OF OPERATIONAL TEST AND EVALUATION, DEPARTMENT OF DEFENSE; ZACHARY J. LEMNIOS TO BE DIRECTOR OF DEFENSE RESEARCH AND ENGINEERING; LT. GEN. DENNIS M. McCARTHY, USMC (RET.) TO BE ASSISTANT SECRETARY OF DEFENSE FOR RESERVE AFFAIRS; DR. JAMES M. MORIN TO BE ASSISTANT SECRETARY OF THE AIR FORCE FOR FINANCIAL MANAGEMENT AND COMPTROLLER; AND DANIEL B. GINSBERG TO BE ASSISTANT SECRETARY OF THE AIR FORCE FOR MANPOWER AND RESERVE AFFAIRS

THURSDAY, JUNE 11, 2009

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:35 a.m. in room SD-106, Dirksen Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, McCain, Hagan, Begich, and Burris.

Other Senators present: Senators Conrad and Leahy.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Jonathan D. Clark, counsel; Richard W. Fieldhouse, professional staff member; Gerald J. Leeling, counsel; Peter K. Levine, general counsel; Roy F. Phillips, professional staff member; and Arun A. Seraphin, professional staff member.

Minority staff members present: Joseph W. Bowab, Republican staff director; Paul C. Hutton IV, professional staff member; and Richard F. Walsh, minority counsel.

Staff assistants present: Paul J. Hubbard, Christine G. Lang, and Breon N. Wells.

Committee members' assistants present: Gordon L. Peterson, assistant to Senator Webb; Roger Pena, assistant to Senator Hagan; and Jason Van Beek, assistant to Senator Thune.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everyone. The committee meets today to consider the nominations of Gordon Heddell to be the Department of Defense (DOD) Inspector General (IG), Michael Gilmore to be Director of Operational Test and Evaluation (OT&E), Zachary Lemnios to be Director of Defense Research and Engineering (DDR&E), Dennis McCarthy to be Assistant Secretary of Defense for Reserve Affairs, Jamie Morin to be Assistant Secretary of the Air Force for Financial Management and Comptroller, and Daniel Ginsberg to be Assistant Secretary of the Air Force for Manpower and Reserve Affairs.

We welcome our nominees and their families to today's hearing. As senior defense officials put in long hours every day, we appreciate the sacrifices that they and their families are willing to make to serve our country.

Each of our nominees has a distinguished background. Gordon Heddell has served in law enforcement positions since he completed his service as an Army helicopter pilot in December 1969. In December 2000, Mr. Heddell was confirmed as IG of the Department of Labor, and in 2008 he became acting IG of DOD.

The DOD IG plays a vital role in ensuring the integrity and efficiency of DOD programs and activities. If confirmed, Mr. Heddell will continue the job of restoring the reputation of this important office, which has been shaken in recent years. We need an IG that we can rely upon to dig into the department's problems, and to tell the truth about what he finds.

Michael Gilmore has served in national security positions for the last 20 years, first in DOD's office of Program Analysis and Evaluation where he rose to be Deputy Director in 2001, and more recently at the Congressional Budget Office where he has served for the past 8 years as Assistant Director for National Security.

The Director of OT&E plays a key role in ensuring that our weapons systems perform as intended. The Director of OT&E, like the DOD IG, must be able to tell the truth to power. If confirmed, it will be Dr. Gilmore's job to tell DOD and Congress whether we have gotten what we paid for in our major defense acquisition programs. A successful Director of OT&E will not be popular within DOD, and plays a vitally important role in protecting both the troops and the taxpayers.

Zachary Lemnios is a scientist and engineer who has spent most of the last 2 decades in various positions at the Massachusetts Institute of Technology's (MIT) Lincoln Lab where he now serves as chief technology officer. His qualifications are only enhanced by his status, and I say very proudly he is a graduate of the University of Michigan. If confirmed as DDR&E, Mr. Lemnios will be the top science and technology officer of DOD, responsible for guiding the advanced research that will keep our military ahead of its competitors for the next generation.

In addition, the Weapon's System Acquisition Reform Act, which we enacted just last month, gives the DDR&E the important new

responsibility of assessing the technological maturity of key technologies to be used in major defense acquisition programs to ensure that we won't try to build systems that we haven't sufficiently tested.

I'm going to save my brief comments about the nominees on the second panel until we finish questioning the first panel. We do have one Senator, one of our colleagues who is here to introduce one of the nominees on the second panel, and we expect Senator Leahy, at any moment, to make an introduction for the second panel as well. Both our colleagues, who are great friends as well as colleagues, have other obligations and so we're going to take care of the introductions by those Senators who have nominees on both panels as soon as Senator McCain finishes his opening statement.

Senator McCain.

STATEMENT OF SENATOR JOHN MCCAIN

Senator MCCAIN. Thank you, Mr. Chairman. I join you in welcoming our nominees this morning, and I welcome their families as well. They will all play an important role in achieving the positions for which they are nominated, and as far as I can tell will certainly be confirmed by the U.S. Senate.

They possess impressive backgrounds in both the public and private sectors. I consider all the nominees today to be well qualified for the positions for which they are being considered, and I thank them for their willingness to serve the Nation in these difficult times in the new administration. Without question, the position of DDR&E and Director of OT&E are key to maintaining superiority in technology, wisely spending billions of defense dollars for vital scientific research, and most importantly, in protecting and empowering our combat forces in the current fight.

Dr. Gilmore and Mr. Lemnios, I look forward to hearing how you intend to make positive contributions in achieving these goals, and in helping to correct the Department's dismal record in weapons systems development.

General McCarthy and Mr. Ginsberg, I know you'll appreciate that our national security has never been more dependent on the willingness of patriotic young men and women to voluntarily serve in the Armed Forces. It depends on the willingness of combat tested noncommissioned officers, officers, and their families to choose careers and continue serving. This is as true for active duty personnel as it is for members of the National Guard and Reserve. I look forward to hearing how you intend to improve the lives of our military personnel and their families.

Mr. Heddell, there are very few positions in DOD that I consider to be more important than that of IG. Regrettably for several years, the Office of the DOD IG has been lacking in resources and talented leadership with predictable problems emerging in performance and morale. This has to change.

I've expressed on numerous occasions my concern about corruption in government, and in DOD in particular. The contracting and procurement scandals in Iraq are one manifestation of this problem. The Department's troubled acquisition programs and the incentives that exist for individuals who know better than to aban-

don their principals to achieve an end are well known. The manner in which Congress, in a regrettable bipartisan fashion, has allowed the appropriations process to evolve has contributed greatly to these problems and presents one reason why Congress has such low grades in public opinion. The American people are fed up with the system that breeds corruption and will not continue to tolerate it.

Transparency and knowledge of the truth are the antidotes to the corruption that is bred by earmarks and abuse of authority. The IG of DOD must be an independent leader in providing that transparency and knowledge, and I know we will receive that leadership from you.

Dr. Morin, I view the DOD and the Service Comptrollers as individuals who can facilitate business as usual or make a very positive difference in the programs and policies of the Department. We face a number of challenges including enhancing the transparency of Air Force financial management activities, and improving acquisition processes. I trust you will advise the Air Force leadership accordingly to ensure that these issues are appropriately addressed. I again, welcome the witnesses and congratulate them, and look forward to working with them in the future. Thank you, Mr. Chairman.

[The prepared statement of Senator McCain follows:]

PREPARED STATEMENT BY SENATOR JOHN MCCAIN

Thank you, Senator Levin. I join you in welcoming our nominees this morning.

They possess impressive experience in both the public and private sectors. I consider all of the nominees today to be well qualified for the positions for which they are being considered, and I thank them for their willingness to serve in the new administration.

Without question, the positions of Director of Defense Research and Engineering and Director of Operational Test and Evaluation are key to maintaining superiority in technology, wisely spending billions of Defense dollars for vital scientific research, and, most importantly, in protecting and empowering our combat forces in the current fight. Dr. Gilmore and Mr. Lemnios, I look forward to hearing how you intend to make positive contributions in achieving these goals and in helping to correct the Department's dismal record in weapons system development.

General McCarthy and Mr. Ginsberg, I know you appreciate that our national security has never been more dependent on the willingness of patriotic young men and women to voluntarily serve in the Armed Forces. It depends on the willingness of combat-tested noncommissioned officers, officers, and their families to choose careers and continue serving. This is as true for active duty personnel as it is for members of the National Guard and Reserve. I look forward to hearing how you intend to improve the lives of our military personnel and their families.

Mr. Heddell, there are few positions in the Department of Defense (DOD) I consider to be more important than that of the Inspector General. Regrettably, for several years the Office of the DOD Inspector General has been lacking in resources and talented leadership with predictable problems emerging in performance and morale. This has to change.

I have expressed on numerous occasions my concern about corruption in government and in DOD in particular. The contracting and procurement scandals in Iraq are one manifestation of this problem. The Department's troubled acquisition programs and the incentives that exist for individuals who know better to abandon their principles to achieve an end are well known. The manner in which Congress in a regrettable bipartisan manner has allowed the appropriations process to evolve has contributed greatly to these problems and presents one reason why Congress has such low grades in public opinion. The American people are fed up with a system that breeds corruption and will not continue to tolerate it.

Transparency and knowledge of the truth are the antidotes to the corruption that is bred by earmarks and abuse of authority. The Inspector General of DOD must

be an independent leader in providing that that transparency and knowledge, and we expect that leadership from you.

Dr. Morin, I view the DOD and the Service Comptrollers as individuals who can facilitate business as usual or make a very positive difference in the programs and policies of the Department. You face a number of challenges, including enhancing the transparency of Air Force financial management activities and improving acquisition processes. I trust you will advise Air Force leadership accordingly to ensure that these issues are appropriately addressed.

Chairman LEVIN. Thank you so much, Senator McCain.

Senator Kennedy if he were here would have been introducing Mr. Lemnios. He obviously is not with us, but he has asked that a statement of introduction be placed on the record. We are joined by two of our dear friends and colleagues. Senator Leahy, you're here I believe to introduce Mr. Ginsberg, and so we'll start with you, and then Senator Conrad to introduce Dr. Morin.

[The prepared statement of Senator Kennedy follows:]

PREPARED STATEMENT BY SENATOR EDWARD M. KENNEDY

Mr. Chairman and Senator McCain, it is a privilege to have the honor to introduce Zachary J. Lemnios of Massachusetts Institute of Technology's Lincoln Laboratories who has been nominated to be Director of Defense Research and Engineering, and I commend President Obama and Secretary Gates for selecting him for this important position in the Department of Defense (DOD).

Zach has a distinguished record of public service. He has broad and extensive experiences, and has a solid understanding and vision of the national security technology challenges facing DOD and the Nation.

Most recently, Zach has been Chief Technology Officer at The Lincoln Laboratory, where he was responsible for developing, coordinating and overseeing the implementation of the Laboratory's strategy, including establishing relationships with DOD and reaching out to academic and industrial communities for technology innovation.

In his impressive career, Zach has held major positions in the Defense Advanced Research Projects Agency, and has worked closely with DOD and the Intelligence Community. In recognition of his significant contributions to national security, he was awarded the Office of Secretary of Defense Medal for Exceptional Public Service.

Zach's leadership in developing new defense technologies has significantly benefited our military systems, and has also significantly strengthened the Nation's industrial technology base.

I'm confident that Zach will carry out his responsibilities as Director of Defense Research and Engineering with the same skill and dedication that he has brought to his past assignments. I urge the committee and the Senate to act quickly on his nomination, so that Zach can begin working to implement the provisions of the Weapon Systems Acquisition Reform Act, recently signed by the President, and help us meet the major technology challenges facing DOD in protecting our national security. Thank you Mr. Chairman.

**STATEMENT OF HON. PATRICK J. LEAHY, U.S. SENATOR FROM
THE STATE OF VERMONT**

Senator LEAHY. Thank you, Mr. Chairman. Thank you, Senator McCain.

It's somewhat unusual to be on this side of the table, but I'm glad to see so many friends here. I just wanted to be here to express my strong support for Daniel Ginsberg. He has been nominated by the President to be Assistant Secretary of the Air Force for Manpower and Reserve Affairs, and I welcome he and his wife Jessica, his parents, Rhonda and Jerry, and other family members who are here with him today.

Daniel had worked for former Senator Sam Nunn, and for the past 9 years has served as my Defense Policy Adviser. He has been fantastic in that area. We've had an emphasis on the Guard and

Reserves because as the two of you know better than anyone in this room, they have become a keystone for our military operations, particularly in Iraq and Afghanistan. The support for homeland duties has been at all time high, everything from natural disasters such as Katrina to floods and fires and so on, as well as Homeland Security. We've done some updated policies for them. We have a 95 member U.S. Senate National Guard caucus. I co-chair that with Senator Kit Bond of Missouri. It has worked in a, I was going to say a bipartisan fashion, actually a nonpartisan fashion, and Daniel Ginsberg as my senior adviser helped coordinate the caucus and develop detailed legislation and far-reaching strategies that enacted strong changes expeditiously. At a time when we've had increasing interparty rank on the Hill, he forged a bipartisan consensus and the need to better support the efforts of the Guard and in turn the Reserves. He worked with the General and the Governors of the State, so I'll put my full statement in the record praising him, but I just want to say that it's a bittersweet moment for me. I have benefited so much from Daniel's work in my office. I joked a couple weeks ago when I was in Afghanistan, Iraq, and Pakistan, something the two of you have done so many times, and I joked that I was going to put a hold on his nomination until that trip was over because I, so vitally, needed him, and it was just emphasized one more time as he met with generals, ambassadors, and leaders of coalition forces. His depth of knowledge, his breadth of knowledge, and his caring for the United States of America. Mr. Chairman, I can't think of a better person to fill this position. With that I'll put my full statement on the record.

[The prepared statement of Senator Leahy follows:]

PREPARED STATEMENT BY SENATOR PATRICK LEAHY

Mr. Chairman, I am pleased to be with you this morning to express my strong support for Daniel Ginsberg who has been nominated by President Obama to be Assistant Secretary of the Air Force for Manpower and Reserve Affairs. I want to welcome his wife Jessica, parents Rona and Jerry, and other family members who are here with him today.

For the past 9 years, Daniel has served as my defense policy advisor and has excelled in his duties, particularly in the area of manpower and reserve affairs issues.

Over the past decade, our country has relied on our Guard and Reserves more than any other time in recent history. Reservists became a keystone to our military operations, particularly in Iraq and Afghanistan, and stepped forward repeatedly to answer the call-to-duty at a tempo not seen in decades. At the same time, the Guard and Reserve support for homeland duties was at an all time high. The Guard has provided crucial support to our Governors and states during natural disasters such as Katrina. In addition the Guard has assumed additional roles in homeland security as our country adopted new policies after the attacks on September 11, 2001.

This new era for the Guard and Reserves prompted Congress and the Department of Defense to review many existing and frankly outdated policies for this part of our Armed Forces. The 95-member U.S. Senate National Guard Caucus, which I co-chair along with Senator Kit Bond of Missouri, played an integral role in that review and implementation of new policies. It was Daniel Ginsberg who helped coordinate the Caucus' successful efforts in this area.

As my senior advisor, Daniel helped me develop detailed legislation and design the far-reaching strategies that would enact these changes expeditiously. At a time of increasing inter-party rancor on the Hill, we forged a bipartisan, bicameral consensus on the need to better support the efforts of the Guard and, in turn, the Reserves. He has helped the Caucus achieve an unheralded relationship with the Nation's Governors and the Adjutants General, bringing in key leaders at every stage of the legislative process.

This is a bittersweet appearance for me today. While I am glad to support this nomination, I am disappointed that it will result in the departure of such a fine in-

dividual from my policy staff. President Obama and Secretary Gates will be well served by Daniel. I hope the committee will report this nomination favorably and that the full Senate will soon send the nomination to the President.

Chairman LEVIN. Thank you so much, Senator Leahy. We really appreciate your getting here today for that introduction. I know that Mr. Ginsberg does as well. Now for Jamie Morin, I think I pronounced his name correctly. We'll call upon Senator Conrad.

STATEMENT OF HON. KENT CONRAD, U.S. SENATOR FROM THE STATE OF NORTH DAKOTA

Senator CONRAD. Thank you, Mr. Chairman and Ranking Member McCain. Thank you so much for your very positive statement. We appreciate that very much. Senator Hagan, Senator Begich.

I'm here to strongly support the nomination of Dr. Jamie Morin to be the Assistant Secretary of the Air Force for Financial Management. Many of you know Jamie because he has been the Senior Defense Analyst on the Budget Committee since 2003, very well regarded on both sides of the aisle. He really is an exceptional nominee, and has an absolutely encyclopedic knowledge of military affairs. His mom, Bridgette who is with us here today, told me this morning that at age four Jamie was looking in the encyclopedia reading about the military services, and that he has had an interest and a devotion to military matters ever since. That's probably why he has such an extraordinary knowledge of military affairs, an intense interest in that subject.

More than that, he has good judgment, really exceptional judgment, and that will serve him well in this position. He also has a very strong academic background, a Ph.D. from Yale, M.S. from the London School of Economics. He has a B.S. in foreign service from Georgetown. A very good background for the position he'll be moving into. He also, I might add, has a strong devotion and interest in the United States Air Force. I know members of this committee are aware that we have two major Air Force bases in North Dakota, and he has followed the Air Force very closely during his entire career.

I believe the Obama administration is extremely fortunate to be able to track somebody of Dr. Morin's character and quality. He is absolutely first rate. He served the Committee on Budget well. I believe he served the country well, and I believe we're fortunate to have people of his ability come forward and be willing to serve in public service. With that, I'll put my full statement in the record, and I thank you very, very much for listening.

[The prepared statement of Senator Conrad follows:]

PREPARED STATEMENT BY SENATOR KENT CONRAD

Mr. Chairman, members of the committee, I come here today to offer my full backing to President Obama's nomination of Dr. Jamie Morin to serve as the next Assistant Secretary of the Air Force for Financial Management.

Many of you already know Jamie quite well from his work as the Senior Defense Analyst for the Senate Budget Committee, where he has served since 2003. He has always provided outstanding analysis and guidance on defense budget issues.

Without question, Jamie is an extraordinary nominee. His encyclopedic knowledge of military issues, keen judgment, and collegiality have been of great benefit to me as chairman, to the Committee as a whole, and to our country. Jamie's background in academia has also prepared him well for this position. In researching and writing as a fellow at the University of Virginia and at the Center for Strategic and Budg-

etary Assessments, and while earning his Ph.D. at Yale, Jamie proved his ability to pore over data and interpret it in a meaningful way.

In these tough economic times, responsible budgeting is more important than ever. The Obama administration is extremely fortunate to attract someone of Jamie Morin's quality and character to such a critical post. The American people are fortunate to have someone of his talent willing to continue in public service. I believe that Jamie is the perfect fit for this position. He has repeatedly demonstrated the experience, judgment, and character necessary to be an extremely successful Assistant Secretary. I fully support his nomination and urge the committee and the full Senate to act quickly to confirm his nomination.

Chairman LEVIN. Thank you very much, Senator Conrad. Thank you for leaving for me the choice tidbit that Dr. Morin went to high school in Detroit, graduated at the University of Detroit High School, is a Michigan native. I appreciate you allowing me to make that important significant addition.

Senator CONRAD. Also you know Mr. Chairman, as a Senator from North Dakota, I have not spent a lot of time talking to my constituents about his checkered background.

Chairman LEVIN. Well, in that case you're not excused. I think you need to stay here for the additional questions. Thanks so much for coming.

Okay. We now will call our first panel forward, please. We ask you first, each of you to answer the following questions. These are standard questions we ask of all nominees that come before us.

Have you adhered to applicable laws and regulations governing conflicts of interest?

Dr. GILMORE. Yes.

Mr. HEDDELL. Yes.

Mr. LEMNIOS. Yes.

Chairman LEVIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

Dr. GILMORE. No.

Mr. HEDDELL. No.

Mr. LEMNIOS. No.

Chairman LEVIN. Will you ensure your staff complies with deadlines established for requested communications including questions for the record and hearings?

Dr. GILMORE. Yes.

Mr. HEDDELL. Yes.

Mr. LEMNIOS. Yes.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

Dr. GILMORE. Yes.

Mr. HEDDELL. Yes.

Mr. LEMNIOS. Yes.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

Dr. GILMORE. Yes.

Mr. HEDDELL. Yes.

Mr. LEMNIOS. Yes.

Chairman LEVIN. Do you agree if confirmed to appear and testify upon request before this committee?

Dr. GILMORE. Yes.

Mr. HEDDELL. Yes.

Mr. LEMNIOS. Yes.

Chairman LEVIN. Do you agree to provide documents, including copies of electronic forms of communication in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding any of the basis for any good faith delay or denial in providing such documents?

Dr. GILMORE. Yes.

Mr. HEDDELL. Yes.

Mr. LEMNIOS. Yes.

Chairman LEVIN. Thank you very much. I think we'll call first on Mr. Heddell, and the other witnesses and nominees can, of course, be free to introduce any family or guests that you might have if they are with you. Mr. Heddell.

Mr. HEDDELL. Thank you, sir. I have an opening statement. May I do that?

Chairman LEVIN. Please.

**STATEMENT OF GORDON S. HEDDELL, NOMINEE TO BE
INSPECTOR GENERAL, DEPARTMENT OF DEFENSE**

Mr. HEDDELL. Chairman Levin, Senator McCain, distinguished members of the Senate Armed Services Committee, I am honored to appear before you today as the nominee to serve as the DOD IG.

Being nominated for this position is a remarkable opportunity, and I am prepared to meet the challenges ahead, if confirmed. The responsibility of this position is of great importance to ensure the health, the safety, and the welfare of DOD personnel, and to make sure that the taxpayer receives a good return on their investment. As an IG with over 8 years experience, I know that the DOD IG has exceptional responsibility. I am committed to ensuring that this office of IG serves as a model of integrity and dedicated service as well as a highly respected organization. If confirmed, I will accept the duties of the office with appreciation, humility, and a commitment to doing what is right while always honoring the principal of independence. I am truly grateful for the support and partnership of this committee and Secretary Gates in ensuring that there is effective oversight of the department.

On a personal note, I want to acknowledge the love and support of my family who have truly been the inspiration behind any successes that I have had in my life or in my career. I thank you, Mr. Chairman and members of this committee, for your time and attention. I look forward to answering your questions.

Chairman LEVIN. Thank you very much, Mr. Heddell.

Dr. Gilmore.

**STATEMENT OF DR. J. MICHAEL GILMORE, NOMINEE TO BE
DIRECTOR OF OPERATION TEST AND EVALUATION, DEPARTMENT OF DEFENSE**

Dr. GILMORE. Mr. Chairman, Senator McCain, members of the committee it's an honor to appear here today. I thank President Obama for having the confidence in me to nominate me to be Director of OT&E in DOD, and I thank Secretary Gates for supporting that nomination.

My wife, Ai-Chi Liu, is here today, and suffice it to say that without her support and encouragement, I would not be here today.

Mr. Chairman, I believe that the Weapons Systems Acquisition Reform Act that the President recently signed into law demonstrates his commitment, as well as DOD's to working with Congress, and in particular with this committee to solve the many problems that have arisen in developing, producing, and fielding weapons systems. If I am confirmed, I pledge that I'll do my best to help that important effort, and I'll do that by providing this committee, the Secretary, and Congress with independent objective evaluations of the effectiveness, suitability, and survivability of weapons systems based on realistic operational testing. My goal would be to ensure that the men and women in uniform are provided weapons that they can be confident will work. Thank you.

Chairman LEVIN. Thank you so much, Dr. Gilmore.

Finally Zachary Lemnios. Mr. Lemnios.

**STATEMENT OF ZACHARY J. LEMNIOS, NOMINEE TO BE
DIRECTOR OF DEFENSE RESEARCH AND ENGINEERING**

Mr. LEMNIOS. Thank you, Mr. Chairman, Senator McCain, and members of the committee.

I'm honored by the opportunity to appear before you today as the President's nominee for the position of DDR&E. I'd like to thank my wife, Stephanie, who is with me today, and my children, Melanie, Grace, Sarah, and Jonathan. My parents, William and Angela, are watching on the committee's webcast. They are my foundation, and I could not have considered this opportunity without their love and support.

In fact, public service is deeply rooted in our family. My wife Stephanie works at a nonprofit organization, Science Club for Girls, inspiring young girls to be in appreciation of science and technology. My brother, Phil, was in the Peace Corp for several years in Africa, later became the town manager of Hull, MA. My daughter, Grace is a special education teacher in Woodbridge, VA, not too far from here. I'd like to recognize my father's service to the Nation as an 18-year-old private first class and later sergeant in the 20th Army Division, his unit fought across Europe during World War II. On April 29, 1945, his was one of three U.S. Army Divisions that took part in the liberation of the Dekalb Concentration Camp.

My career is focused on opening new technology frontiers to guarantee our Nation's advantage over those who threaten us. I have seen the power of invention and innovation firsthand, and have had the opportunity to participate in opening new fields of study in industry, academia, and the Federal Government. Rapidly evolving technology such as robotics, cognitive, bio, and nanotechnologies will have profound implications for our country to go well beyond our understanding today. We simply must lead in these and other critical areas to ensure our national security.

The Department of Science and Technology Investment serve three critical functions in my view. First they preserve the technological age of our current forces by extending the capabilities of our current war fighting systems. They offer the opportunity for breakthrough capabilities allowing us to choose those capabilities on our timelines, and finally they provide a hedge against the uncertain future with a set of scientific and engineering options to counter-

strategic surprise. For the 21st century, the most critical capabilities that defense, science and technology can deliver to the war fighter and to the American taxpayer would be systems that can adapt to changing applications and environments, systems that scale flexibly with demand, and capabilities that react faster than our adversaries with minimal support and logistics. We simply owe it to our soldiers, sailors, airmen, and marines to rapidly accelerate those breakthroughs from the laboratory to the field. I fully support the important accusation elements outlined in the Weapons System Acquisition Reform Act of 2009 draft by this committee, and recently signed by the President.

A renewed focus on systems engineering and more frequent technology assessments will significantly reduce program risk, and the cost of major defense acquisition programs. If confirmed, I look forward to working across the Department, and with this committee and others to strengthen our core competencies to deliver state of the art capabilities to our forces on time and within budget.

In closing, I want to thank again the President for nominating me, the Secretary of Defense for his support, and to this committee for your time today. I'm honored to be before you, and if confirmed, I look forward to working with this committee and your staff, and I look forward to your questions.

Chairman LEVIN. Thank you so much, Mr. Lemnios. Why don't we try an 8-minute first round of questioning for this panel. We do have two panels.

First Mr. Heddell, let me ask you about the DOD IG report on the use of retired military officers as surrogates to make the former administration's case in the media. The report was totally inadequate, and 4 months after it was released the IG withdrew this report noting that the report was using inaccurate and incomplete data, did not meet the accepted quality standards for an IG work product, but you as the acting IG also stated that the additional investigative work will not be taken to reissue a new report, and that raises the question as given all the flaws in the withdrawn report why not redo it.

Mr. HEDDELL. Sir, I do currently have a review ongoing, and two of the points of that review have to determine what findings we can, in fact, report back to you and this committee on, and also for the future, what judgments we could make about such a program. So, in spite of the feeling that we may not be able to redo that investigation because people that manage that program are no longer in positions at the Department, and because certain members of the retired military analyst group would not allow themselves to be interviewed, as well as other former DOD officials, it's difficult if not impossible to provide the answers that you have asked for. However, I'm committed to meeting the request that you have made of me to determine what I can determine from that report. I think it's an important review, and I have committed to you to get back to you on that, and to tell you what I think we can about that program.

Chairman LEVIN. I appreciate that answer. First of all you have certain limits obviously. The IG doesn't have subpoena powers, and that is a limitation which needs to be addressed. We're going to use this situation where you are not getting the cooperation of people

who you must talk to as the example that we're going to take one of them to the Homeland Security and Governmental Affairs Committee, where I also serve, that has the responsibility generically relative to the powers of the IGs because we can't permit an IG to be thwarted by the failure to have access to documents and to people.

So does the lack of subpoena power apply both to documents and to people, or just to people?

Mr. HEDDELL. The IG has the authority to subpoena documents but not testimony.

Chairman LEVIN. All right. So we're going to take this shortfall to the other committee that has jurisdiction, but in the meantime this committee has power to subpoena, and we are going to support our IG. So if there are people who need to be subpoenaed for testimony in order to get their information, who refuse to show up voluntarily, we would appreciate your notifying them that you again request their testimony, and if not, that you would make a request for this committee to hold a hearing where we will subpoena them to a hearing of the committee. Hopefully if the committee will issue a subpoena, which we hope it would in support of our IG. Will you do that?

Mr. HEDDELL. You have my commitment to do that, sir.

Chairman LEVIN. Thank you. There's another report which is due, overdue actually for 3 years now, and that's the IG's review of allegations that senior Air Force officials had improperly steered contracts for publicity in connection with Thunderbird air shows, and that they had allegedly steered those contacts to friends and insiders. The DOD IG concluded this investigation and issued a report early last year. The report raised serious questions about the role played by senior Air Force officials, but the report avoided making any findings or recommendations with regard to the conduct of the senior officials.

So Senator McCain and I sent a letter to the then IG more than a year ago asking that he review the conduct of current and former senior Air Force officials named in the report. Not only possible improper conduct, criminal conduct theoretically or possibly, but also for possible ethical violations and failures of leadership and provide specific findings and recommendations to the Secretary of the Air Force and to the committee. These allegations have been out there for 3 years. The review has still not been completed apparently, and my question, Mr. Heddell is when can we expect to see a completed report on this matter?

Mr. HEDDELL. Sir, that's one of the top senior official investigations that I'm reviewing. I believe that we can give you relatively good assurance that within 4 weeks we will have a report to you.

Chairman LEVIN. Thank you.

Dr. Gilmore, let me ask you a question relative to the independence of the office to which you've been nominated, which is so critical, and you made reference to it in your opening statement.

How will you ensure the independence of that office, particularly if you're challenged by DOD officials or contractors?

Dr. GILMORE. By exercising leadership, Senator. I think that the key to maintaining independence is having a director who is willing to be straightforward in their assessments to both the Secretary

and Congress, and that is what I would be. I would provide you the best information that I could if I were confirmed, about the performance of these systems.

Chairman LEVIN. One question relative to the test and evaluation that's occurred of the ground-based midcourse defense system, which is a missile defense system, you're very familiar with this. The Director of OT&E reported to us last December that the ground-based midcourse defense system, the flight testing to date will not support a high degree of confidence in its limited capabilities. Do you believe that it's important that our ballistic missile defense (BMD) systems and its elements like other systems should undergo OT&E, and that any elements to be deployed should be operationally effective, suitable, and survivable?

Dr. GILMORE. Yes, sir, I do. I think the information on that is required for operational decisionmakers to make proper decisions about how to employ the systems.

Chairman LEVIN. Mr. Lemnios, I believe you're a graduate of the University of Michigan, and I'm tempted to ask you how that training and experience qualifies you for the office for which you've been nominated, but I'm going to resist temptation because I may assure my vote but lose a few others around here, so I'm not going to do that, but you've been appointed to, or nominated to an extraordinarily important position. You're going to have responsibility for the departments of science and technology programs which play such a critical role in helping the United States maintain the advantage over competitors and adversaries, current and potential adversaries around the world.

The department's 2010 budget request reduces funding for these accounts by nearly 10 percent relative to the 2009 request, and I'm just wondering whether that concerns you as to whether we are adequately investing in the research and engineering programs that are essential to develop new capabilities, and to help train the next generation of scientists and systems engineers to work on our problems.

Mr. LEMNIOS. Mr. Chairman, first of all, it was a delight to go to the University of Michigan in Ann Arbor. I'm now at the MIT in Cambridge. It's a different institution but, in fact, these schools and many others have an enormous impact in training scientists and engineers, and a whole quadrant of people who will serve our Nation in very important areas.

I fully support the President's 2010 budget as submitted, and certainly in my role if confirmed, the critical part of that is shaping the science and technology portfolio that is shaped over the near-term and long-term requirements of the department, and takes in opportunities to invest in whatever technologies that come out of the universities and many other areas to support our warfighting needs.

Chairman LEVIN. Okay. My time is up.

Senator Hagan.

Senator HAGAN. Thank you, Mr. Chairman. I want to welcome all of you gentlemen here today, and I certainly want to say welcome to your families and especially your wives for being here because I know how critical and important your support is, so I thank each and every one of you.

Mr. Lemnios, I had one question for you. I'm impressed with your credentials, and I think that it's a very important role that you bring to DOD. I think that science and cutting edge technology is absolutely critical in our weapons systems and our security. I think that in your comments you stated that research and engineering is the first step in the overall acquisition process. I'm concerned about two particular issues, and one is the continued threat of improvised explosive devices (IEDs) that are killing and maiming our troops, I wanted to know your comments, and what you think from a technological standpoint we can do, I know we've done a lot, but I think that it's still a huge threat. What you see in the future about that, and then taking it another step further with cyberspace and cyber protection is also a very critical element in protecting the country today, and some comments that you might have on that.

Mr. LEMNIOS. Senator, those are two very important issues that are very high on the priority list of the current research portfolio of the department. The IED threat has been a particularly troublesome one to date. The number of military folks that have been killed or wounded is enormous, and it concerns all of us. The initial response was to try to build a set of capabilities to improve force protection. There are technologies involved in that, and those have found their way into the field. The next response was to try to build systems that would help counter the triggering mechanisms of the IED, and those have also found their way into the field, but at a tempo perhaps not at the same rate that they're being developed, and that's a concern as well. The third piece, the one that's really sort of in the science and technology regime is to try to understand the entire chain or events that occurs, not just in building the IED and deploying it, but what are the precursors up front that could be detected. In fact, there's a rich research community that's working through that to try to identify those and transition those, and in fact, organizations like the Joint IED Defeat Office, the Army Rapid Equipping Force, the Air Force Rapid Capability Office, all of those are working to quickly transition those concepts to field.

With regard to cyberspace, I read the Cyber Policy Review that was issued by the White House about 2 weeks ago. It was a policy review, and there's a compendium of technology underpinnings that support those policy positions. That's an area that I think we're going to need to learn a lot. There's a community that's understanding what the threat is. The Defense Advanced Research Projects Agency is standing up a national cyber test range. There are other ranges that exist that will allow us to test techniques, to protect networks, and protect information on those networks. I see both of those areas, both the IED threat as it emerges, and certainly the cyber threat, as we're better understanding that threat, are both important areas to couple with the research community.

Chairman LEVIN. Senator, I wonder if I can just interrupt you for a minute because of your interest in the IED. I was with a bunch of Michigan National Guardsmen and there was a colonel there who actually was in Iraq with his unit deployed, out in a vehicle and they thought they saw an IED on the road, and they actually thought they saw the people who were trying to control it on top

of a building, sent out a robot to that IED and watched the robot actually dismantle an IED. So we talk a lot about science and new technologies, that was an example where he actually saw it, was in the vehicle that would have been hit by that IED. I want to thank you for raising this question. It has been a major concern, and I appreciate it, and your time will not be deducted by my intrusion here.

Senator HAGAN. You certainly have that pleasure. Thank you.

Mr. Heddell, I had a question for you concerning the contracting companies. A few weeks ago, I attended a policy committee hearing that was chaired by Senator Dorgan. Senator Dorgan examined \$83 million in bonuses that was paid by DOD to the contractor Kellogg, Brown, & Root (KBR) in 2007 and 2008 despite this company's poor electrical work in Iraq, which resulted in the deaths of at least three U.S. soldiers killed by electrocution while showering, and then others who have been injured or killed in other electrical incidents. Witnesses at the hearing described how KBR failed to hire qualified personnel, how they performed electrical work in a matter that continues to place our troops in danger, and failed to make repairs once the hazards were identified. Moreover, an electrical inspector that was hired by the U.S. Army to review the U.S. run facilities in Iraq indicated that 90 percent of KBR's wiring in the newly constructed buildings in Iraq was not properly done. But despite all these concerns, KBR was awarded a \$35 million contract earlier this year for a project in Iraq that included electrical work.

My question is, can you comment on the status of this investigation as well as explain how you propose to work with the Department of the Army and other departments to ensure that they have qualified personnel to oversee the contract management, especially regarding the services performed in theater in support of our troops.

Mr. HEDDELL. Yes, Senator Hagan. I appreciate that question. It's an extremely important issue to the Office of IG. We've been working on the issue of accidental electrocution since April or May of last year. The most prominent case that you're referring to involved Sergeant Ryan Maseth who died while taking a shower on January 2, 2008, and that was the catalyst for beginning to take a look at this entire situation. We are very close to completing our work regarding how that could have happened to Sergeant Maseth as well as an additional 17 other accidental electrocutions that have occurred. We have had teams working in southwest Asia, both Iraq and also in Afghanistan, to work with the commanders to determine whether or not the lessons that we have learned are being passed on to them. We don't believe that this is an area that anyone should wait for a final report; it's too critical. So we, in fact, sent a team to Afghanistan just a few months ago to see what was happening over there to hopefully preempt any kinds of issues. So we're getting ahead of the game. We're finding that the commanders are responding. They're taking great steps to conduct inspections for safety, both from electrical and fire hazards, but there's a lot more to do. So the report that you're asking about should be out within 4 weeks. We have actually three reports. One is on Sergeant Maseth's death, the other is on the other 17 elec-

trical accidents, and the third one is on electrical status and safety in Afghanistan.

Senator HAGAN. Do you feel that it is more secure today than it was in recent past?

Mr. HEDDELL. We see improvements, Senator Hagan, but there's still a long way to go. I personally visited the building in the Radwaniyah Palace Complex where Sergeant Maseth died. I looked at the shower. I went up on the roof to see where the generator was that had not been properly grounded, and the reason I point that out is because it was made clear to me that this is a tremendous challenge for our commanders. These are buildings that were in existence before 2003. They were wired using different electrical codes and standards than we use in this country, and so we are in a very dangerous, very hazardous environment, but commanders are taking steps to conduct inspections. In one case in Afghanistan they bought containers to house 300 troops because they were in hazardous housing at the time. It's a hazardous environment no matter how you look at it, but I think it has certainly improved over the last 6 to 9 months.

Senator HAGAN. It's definitely hazardous, but you certainly hope nobody is electrocuted while taking a shower, obviously.

Mr. HEDDELL. Of course we hope that, but we still have a ways to go to give assurance to this committee or to anyone that our troops are 100 percent safe from those kinds of hazards.

Senator HAGAN. I'm sure you'll get right on that.

Mr. HEDDELL. Yes, ma'am.

Senator HAGAN. Thank you.

Chairman LEVIN. Thank you Senator Hagan.

Senator Begich.

Senator BEGICH. Thank you very much, Mr. Chairman. I appreciate the opportunity to ask you all a few questions, and I do want to echo the comments by the other Senators that thank you for your willingness to serve, but also thank you to the families and the support team that you have to support you through this process as well as in your service. Thank you for doing that.

My questions are for Dr. Gilmore. I just want to read something from your testimony just to reiterate a point to make sure it's still consistent here, and let me just read it if I could. Modeling and simulation can contribute to the assessment of system performance, particularly to explore the full range system operations or live open air testing would be unsafe or impractical. Model simulation is also useful as a tool to help plan the test program. However, model simulation should be utilized to compliment rather than replace operational testing in a realistic environment. Additionally, sufficient operational testing should still be performed to adequately validate and accredit any models used. Assuming that was in your written testimony, you still agree with that.

Dr. GILMORE. Yes, sir.

Senator BEGICH. Acknowledge that?

Dr. GILMORE. I wouldn't have written it if I didn't think it was correct.

Senator BEGICH. I just wanted to make sure. I appreciate the Chairman's question regarding operational testing, especially on the ground-based, Ground Missile Defense (GMD) System. The rea-

son I wanted to restate that, and again I appreciate the chairman's question because you emphasized the point operational testing is important in order to make any system reliable. In regards to the GMD System, from the information in the discussions that we've had with the Missile Defense Agency the briefings that we have had, based on the budget and what they're proposing in 4 years, the actual live testing will cease, and they will move to simulation as the way they believe, or at least they've stated to us that they will maintain readiness and reliability, but that seems inconsistent with your comments, the two should compliment each other. Can you comment on that?

Dr. GILMORE. I'm not aware of the specifics of this plan they're developing, and I hadn't heard of what you just said, but I would reiterate that modeling and simulation are important as a compliment to actual testing.

In the case of the GMD system, it's clear that modeling and simulation will be needed because live testing isn't going to be able to explore all of the potential modes of operation of the system in the real world. But again, those models and those simulations have to be verified, validated, and accredited by using operational tests that explore as much of that environment as is possible.

Senator BEGICH. I appreciate that because, to be frank with you, I think anyone who comes in front of this committee have brought up the GMD System, and simulation by itself. Modeling you've re-confirmed it is not the only way you do testing or the only way you consider reliability but to compliment each other, and you have emphasized it again.

Let me ask, in your advanced questions you state rigorous testing and robust program flight testing, ground testing should be conducted on the GMD System. How do you describe that, because right now they have planned two missiles, two tests a year, and the question that I have is that enough? If it's enough, is it because we have limitations in the capacity to do the testing beyond two per year, or is the system just designed to do no more than two. That's adequate for testing of this system to ensure it's reliability, and improving its efficiency which I know I was in Fairbanks about 10 days ago or so with Secretary Gates reviewing the GMD, and he made the comment that he believes the system is fairly accurate, but robust testing is necessary. So how do you define robust testing?

Dr. GILMORE. Robust testing is the testing that's needed to provide operators with a high confidence that they understand what the system will do and will not do, and exactly what that means is something that I would expect to be involved in if I'm confirmed in the context of GMD. But there needs to be a sufficient number of tests, open air tests, live tests as well as the use of verified, validated, and accredited models in order to generate high confidence that if you use the system, you understand what it will do. If you rely on it, that's an appropriate thing to do.

Senator BEGICH. If I can just probe a little bit further. You may not be able to answer this right now, and maybe a little more time might give you some thought on it. Is two tests a year, live tests adequate?

Dr. GILMORE. That is obviously something that I would look into.

Senator BEGICH. Okay.

Dr. GILMORE. There would be a total number of tests that are required, accomplished over what ever period of time they can be accomplished over. I think that another ingredient here is what's realistic in terms of accomplishing testing given the problems that they've had, particularly with the targets. But to look at what the total number of tests are that would be required, and to determine what a reasonable schedule is for conducting those tests given the situation that exists with respect to the targets program as well as all the other ingredients that flow into the test program, is something I would obviously be very involved in if I were confirmed.

Senator BEGICH. I appreciate that. Let me ask one more, and I apologize to the other two. Maybe you appreciate that I'm not asking you questions, I don't know.

How will you, if appointed to this position, again OT&E is very important to the systems that we have. How will you deal with the conflicts that might occur when a budget constraint is put on you in regards to testing? From your experience, professionalism, and knowledge of the necessity of testing, live testing is important to ensure the reliability of the systems. How will you deal with that conflict internally?

Dr. GILMORE. I would inform the Under Secretary for Acquisition, the Secretary, and Congress in testimony if it was requested what my view was regarding the adequacy of the test program, and what budget constraints would mean with regard to the adequacy of the test program.

Senator BEGICH. I appreciate that. I know sometimes as a former mayor and executive, we always had folks as we moved up the budgets and got to Home B, Home B was its own world and decided certain things, and then something would pop and operationally sometimes it would not be exactly what the operational people would want. So I appreciate your candor there, and I'm looking forward to your confirmation, but also as we deal with the GMD how do we ensure that we continually have the robust testing and inventory. My concern is that based on the current budget we have been presented, that robust testing will be very limited because of the production line and the budget constraints that are now in place with regards to additional missiles that will be utilized for testing. So I look forward to your candor in that arena in committee or in meetings, and so again thank you for your willingness to answer the questions.

To the other two I have no questions for you, so you are relieved of any list I might have created while I was sitting here thinking, but thank you very much for your testimony. I appreciate your candor.

Chairman LEVIN. Thank you, Senator Begich, and if you have second thoughts about questions for the other two witnesses, you can provide those for the record so you don't leave them out. I know they have a sense of loss of not being asked questions by any of us.

Senator Burriss.

Senator BURRIS. Thank you, Mr. Chairman. I express my sentiments as well as my colleagues to these three distinguished Americans who are willing to serve. Certainly I express my thanks to

their families for going along with them and serving, and to Mr. Heddell who is currently in the position as Acting IG.

Are any of you other gentleman familiar with the responsibility, Mr. Lemnios or Dr. Gilmore that you're going into now, or do you have any experience in the position that you're going to right now?

Mr. LEMNIOS. Senator Burris, I certainly don't have any experience in the position. I certainly have had discussions with the former DDR&E, and many technology leaders across the defense science and technology activities.

Senator BURRIS. What have you been doing? Are you still in your current position now, or in are you in limbo now waiting to get confirmed?

Mr. LEMNIOS. Senator, I'm currently the Chief Technology Officer of MIT Lincoln Laboratory. We are a federally funded research and development (R&D) center, and in that role I interact with many universities, including the University of Michigan.

Senator BURRIS. How about the University of Illinois (Uoff)?

Mr. LEMNIOS. The Uoff. I know Uoff very well.

Senator BURRIS. Your colleague to the right has also attended the Uoff in Springfield.

How about you, Dr. Gilmore?

Dr. GILMORE. No, I have not served in this position before, but I believe that my previous experience in government and the things that I have done, and my technical training prepares me well for it. Yes, I agree it will be a very challenging position.

Senator BURRIS. Mr. Heddell, you're currently in the position now as Acting IG. So how long have you been in that role, for over a year? You didn't come up for confirmation in the previous administration, or what was the circumstances surrounding that?

Mr. HEDDELL. The previous IG, who was Senate confirmed, left that position unexpectedly. This was on July 13, and I became the Acting IG on July 14 to serve in an interim capacity, and during that process I was asked to consider staying longer in that position.

Senator BURRIS. Mr. Lemnios, could you explain to me in terms of the research and engineering are you overseeing outsourcing contracts with universities and all the research, or do you have a staff that's also doing the research and the engineering over these weapons systems? Just give me a brief explanation of how that works.

Mr. LEMNIOS. Sir, in my current position, or if confirmed?

Senator BURRIS. If confirmed.

Mr. LEMNIOS. Sir, as DDR&E, my critical role would be to work technology strategy across DOD, to identify those key areas where the department needs to strengthen and drive its technology strategies and technology efforts.

Senator BURRIS. Excuse me. You're saying that the various Services have their own research laboratories going with research military personnel, or outside contracting personnel?

Mr. LEMNIOS. I've seen combinations of both. Some examples include the Naval Research Laboratory not too far from here, which include certainly government employees as well as some contractors on site. The Air Force Wright Patterson Laboratory, which again include many government researchers and outside contractors.

Senator BURRIS. So all those people there would report to you, is that correct?

Mr. LEMNIOS. Sir, the laboratories report up through the Service structure, and the DDR&E establishes a technology portfolio across the department in concert with a service executive across the department.

Senator BURRIS. Is there any outside contracting that is done? Do you have to oversee, award any contract for this project, or would the DOD be taking bids on that?

Mr. LEMNIOS. Senator, my understanding is that the DDR&E is a direct source selection authority for those contracts, but there would certainly be activities across the department that rely upon the technical strategies that we put in place.

Senator BURRIS. To your knowledge there are contracts that are awarded, but you would not have jurisdiction or interest over those contracts?

Mr. LEMNIOS. I wouldn't have direct jurisdiction, direct source selection authority.

Senator BURRIS. Same to you, Dr. Gilmore, in terms of tests and evaluation. Do you know whether or not the testing is done primarily with military and staff personnel, or are the weapons systems and all other various devices awarded out for testing to those contract awards?

Dr. GILMORE. Operational testing is done in an operationally realistic environment by government personnel using people who would actually have to use the equipment in the field.

Senator BURRIS. I'm sorry?

Dr. GILMORE. The testing that is done, the operational testing, is done by government personnel using government facilities and using military people, the military people who would actually have to use the equipment in the field. Otherwise, it would not be operationally realistic.

Senator BURRIS. So you're not using outside contracts for operational testing?

Dr. GILMORE. Not for operational testing.

Senator BURRIS. Thank you very much, Mr. Chairman. I appreciate it.

Chairman LEVIN. Thank you very much, Senator Burriss.

Just another question or two for you, Mr. Lemnios. First we worked hard to increase the department's participation in the development of new energy technologies as well as making the department an early adopter of new technology such as solar cells, biofuels, and hybrid engines. What is your view of the role that DOD should play in energy research and the adoption of new energy technologies?

Mr. LEMNIOS. Senator, there are broad challenges across the department and elsewhere to quickly draw innovations that are coming out of the private sector and out of the research community into problem sets that the department could quickly adapt. I've seen early examples of this that have worked very well. The Army recently completed with the DDR&E a challenge problem that brought many small businesses together to try to identify new technologies for providing power to the dismounted soldier in very small form factor. This would have an enormous impact in the lo-

gistic supply in providing power for soldiers without increased weight. The private sector has a big role in this area, and I think one of the ways that the department can leverage this is to strengthen those interactions with the private sector. Certainly the National Aeronautics and Space Administration Research Laboratories, in particular the laboratory in Cleveland has a strong research base in solar and high performance energy systems. The department should and, in fact does, couple with these other laboratories.

Chairman LEVIN. The DOD labs are precious resources for us. One of those world class labs or facilities is the Tank Automotive Command Research, Development, and Engineering Center (TARDEC) outside of Detroit. The vehicle R&D for military is focused at that facility. It's part of the tank and automotive command Detroit arsenal. I'd like to get you up there to visit, and a good time to do that would be soon after your confirmation. We expect to be breaking ground on the new energy lab that is going to be opening up at TARDEC, but this is where our military vehicles and research are developed. Where energy for them is researched and new energy sources tested, and your reference to working with the private sector—there's a real synergy between the military vehicle research and the research on commercial vehicles in the private sector nearby. The General Motors tech center is nearby. Ford's research facility, Chrysler's research facility, and there's a lot of joint development of technologies going on, not just between TARDEC and those three entities and those three institutions, but also a lot of other places around Michigan and the country that they work with. So, we will be trying after you're confirmed to get you up there for that particular important moment when that energy lab has the ground broken or for some other purpose. I assume that getting back to Michigan would be something you would look forward to.

Mr. LEMNIOS. Sir, I would, and I would also point out that I visited TARDEC about a month ago, we're building a robotics activity through TARDEC as an implementer. I previously stated that, earlier in my career, I had spent a lot of time at the Ford research laboratories in Dearborn. I know that facility very well, so I look forward to that.

Chairman LEVIN. That would be great.

Any other questions we have. Senator Burris all set?

Senator BURRIS. All set.

Chairman LEVIN. Okay. We will excuse you. We thank again you and your families, your support teams for getting you here, supporting you in the future which they will be called upon to do, and we congratulate you. We look forward to a speedy confirmation. Thank you all.

We'll now move to our second panel of nominees. First, Dennis McCarthy retired as Lieutenant General in 2005 after a distinguished career in the Marine Corp Reserves. Since that time he has served as Executive Director of the Reserve Officers Association (ROA) of the United States. If confirmed, General McCarthy will play a leading role in addressing the challenges and stresses facing the National Guard and Reserves at a time when we're rely-

ing heavily on our Reserve elements to support ongoing military operations in Iraq and Afghanistan.

Jamie Morin is a Michigan native who graduated from the University of Detroit (UofD) Jesuit High School before leaving Michigan to attend such lesser institutions as Yale, Georgetown, London School of Economics. It was all downhill from UofD I know. He served since 2003 as a professional staff member on the Senate Budget Committee where he has been the committee's lead analyst for the Defense Intelligence and Foreign Affairs Budgets. We know him best for his role in helping to enforce the budget rules.

When our bill is on the Senate floor, we're not going to hold that against you, I want you to know, Dr. Morin.

Dr. MORIN. Thank you.

Chairman LEVIN. We will miss the patience, and the good humor, and the thoughtfulness that Jamie has always shown in working with us, but we're confident that DOD is going to benefit in equal measure from your service.

Daniel Ginsberg has served as a legislative assistant to Senator Patrick Leahy, as we've heard, since 1999. He has assisted Senator Leahy in his work on the Defense Appropriation Subcommittee, and is co-chair of the Senate National Guard Caucus. Some of us still remember that before joining Senator Leahy, Danny served as a research assistant here in the Senate Armed Services Committee. I believe also that he is a music critic, and I have a hunch that if some of the people whom you've written critical reviews about had a chance to vote on your confirmation that you might not be confirmed.

Mr. GINSBERG. I'm glad some of them don't have a vote, Sir.

Chairman LEVIN. Classical music buff, that is something which is a relevant addition to your vitae I want you to know.

I congratulate all of the witnesses on their nominations. We look forward to your testimony, and when we call upon you you'll be free if you have family members with you to introduce them. Let me start before I call on you for any opening statements to ask you the standard questions which some of you have heard before.

Have you adhered to the applicable laws and regulations governing conflicts of interest?

General MCCARTHY. Yes.

Dr. MORIN. Yes.

Mr. GINSBERG. Yes.

Chairman LEVIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

Dr. MORIN. No.

Mr. GINSBERG. No.

General MCCARTHY. No.

Chairman LEVIN. Will you ensure that your staff complies with deadlines established for requested communications including questions for the record and hearings?

Dr. MORIN. Yes.

Mr. GINSBERG. Yes.

General MCCARTHY. Yes.

Chairman LEVIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

Dr. MORIN. Yes.

Mr. GINSBERG. Yes.

General MCCARTHY. Yes.

Chairman LEVIN. Will those witnesses be protected from reprisal for their testimony or briefings?

Dr. MORIN. Yes.

Mr. GINSBERG. Yes.

General MCCARTHY. Yes.

Chairman LEVIN. Do you agree if confirmed to appear and testify upon request before this committee?

Dr. MORIN. Yes.

Mr. GINSBERG. Yes.

General MCCARTHY. Yes.

Chairman LEVIN. Do you agree to provide documents including copies of electronic forms of communication in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Dr. MORIN. Yes.

Mr. GINSBERG. Yes.

General MCCARTHY. Yes.

Chairman LEVIN. Thank you, and I think General McCarthy we're going to start with you.

**STATEMENT OF LT. GEN. DENNIS M. MCCARTHY, USMC (RET.),
NOMINEE TO BE ASSISTANT SECRETARY OF DEFENSE FOR
RESERVE AFFAIRS**

General MCCARTHY. Thank you, Mr. Chairman. I would say to Senator McCain and to all the members of the committee it goes without saying that I'm honored and humbled to be sitting here this morning. I'm extremely appreciative of the confidence the President has expressed by nominating me to be an Assistant Secretary of Defense for Reserve Affairs, and now to the Secretary of Defense for supporting that nomination.

When I took off my uniform in 2005, I did not expect ever to be in this position again, but I will tell you without hesitation that I'm extremely pleased that I may have another opportunity to serve. It's especially meaningful to me to have that opportunity come in the area of Reserve Affairs. Not only has much of my military service been connected with the Reserve components, but my wife Rosemary and I are the proud parents of two Reserve component families.

Our son Sean is a captain in the Ohio National Guard. He and his wife Theresa and their three children live the life of the citizen warrior in Columbus, OH, where Sean is also an Assistant County Prosecutor.

Our son Michael is a Major in the Marine Corp Reserve. After a number of years on active duty he left to attend law school, and he's now working on Capitol Hill for a year as a legislative fellow, but in short order he and his wife Brittany will be living back in Ohio balancing their time between their commitments to the civilian community and his to the Marine Corps. Having lived that life myself, and watching these two great families live it today is all

the inspiration I will need to focus my energies on the demands and opportunities of this office if I'm confirmed.

I'm very thankful to have Rosemary, Sean, Michael, and Brittany here with me today. Theresa is at home in Columbus doing what the mother of three young children has to do.

As the committee knows very well, the All-Volunteer Force could not have fought the sustained combat of the last 8 years without the augmentation and reinforcement of over 700,000 men and women of the National Guard and Reserve. If the Senate sees fit to confirm me, I'll commit myself entirely to the service of those great men and women, to their families, and their employers, and to all those who will follow them. Again, I thank you and I will do my best to respond to your questions.

Chairman LEVIN. Thank you so much, General. Next I think we'll call on you, Jamie. Dr. Morin.

STATEMENT OF DR. JAMES M. MORIN, NOMINEE TO BE ASSISTANT SECRETARY OF THE AIR FORCE FOR FINANCIAL MANAGEMENT AND COMPTROLLER

Dr. MORIN. Thank you, Chairman Levin. I'm delighted to be here before the Armed Services Committee today, and I would ask if I could give you a full statement for the record, and compress it.

Chairman LEVIN. That would be fine, thank you. It will be made part of the record.

Dr. MORIN. Thank you for the opportunity to appear. I'm grateful for the confidence that President Obama has placed in me by nominating me for this position as Assistant Secretary and Chief Financial Officer for the Air Force. It's a real challenge, and it will require the work and support of my family and friends. I'm grateful to have here today my mother, Bridget Morin and my son Liam, and I'm also very grateful for the support and love of my wife Megan who has lived the life of the Senate staff spouse, the sort of unpredictable schedule and challenges that poses, and has balanced that with her own career in public service.

Chairman LEVIN. I tell my wife the spouse life is a glamorous life. She laughs every time I try it.

Dr. MORIN. I haven't had much luck with that either, sir. I also want to thank Senator Conrad for the very generous, overly generous introduction he offered this morning. I can promise the committee that if I am confirmed I will seek to follow his example as a very faithful steward of the taxpayer's resources.

Chairman LEVIN. There is no better example that I know of.

Dr. MORIN. As a participant in a minor level in the defense budgeting process, and as a former scholar of the defense budgeting process, I deeply understand the challenges that DOD faces both in matching resources to the many claimants, and also building financial systems and business systems that adequately take care of the taxpayer's resources.

Senator McCain said this morning, and I'll take this as a charge, that business as usual is not acceptable. I believe that very firmly. The department has a goal of achieving a clean audit opinion by 2017. Even though that is, in many people's estimations and many expert's estimation, perhaps unachievable. It is not satisfactory for the public to have that sort of level of responsiveness. So I will take

this responsibility very seriously if I'm confirmed, and I look forward to a rich dialogue with the committee, this committee that I've had such pleasure working with and have such respect for. Thank you.

[The prepared statement of Dr. Morin follows:]

PREPARED STATEMENT BY DR. JAMIE MORIN

Chairman Levin, Senator McCain, members of the Armed Services Committee—I am delighted to come before the committee today as the President's nominee for Assistant Secretary of the Air Force for Financial Management. Thank you for the opportunity to appear.

I am grateful for the confidence that President Obama has shown in me by nominating me to be the Air Force's Chief Financial Officer, as well as the support of Secretaries Gates and Donley. If your committee and the Senate consent, I would be honored to serve in that position.

I also wanted to thank Senator Conrad for his introduction today. He has been a tremendous mentor. I will always be grateful for his willingness to pluck me from the halls of academia and give me the opportunity to work for the Budget Committee for the last 6 years. I can promise the Armed Services Committee that if confirmed, I will seek to follow Senator Conrad's example as a careful steward of the taxpayer's resources.

I am glad to have family members here to support me today. My 4-year-old son, Liam, is in the audience today, along with my mother Bridget Morin, who was able to come in from Michigan to be here. I appreciate their love and support.

I especially want to thank my wife, Megan, who has put up with the uncertainty and chaotic schedule that comes with a spouse working in the Senate while pursuing her own demanding career in public service.

The responsibilities of the Air Force Comptroller are serious ones. As a former scholar of the defense budget process, I am well aware of the challenges the Comptroller faces in developing the budget during a time when our troops are in harm's way and the Nation faces huge deficits. Like almost all of the Department of Defense, the Air Force has a challenging road ahead, providing Congress and the Nation with a clean accounting for taxpayer funds.

If I am confirmed as Air Force Comptroller, my top priority will be to ensure that our Airmen get the resources they need while also improving the Air Force's financial management to protect the taxpayers hard-earned dollars. Only by improving the transparency and fidelity of the Department's financial processes can we ensure that senior leadership can make the best possible decisions about prioritization among military requirements.

Additionally, if I am confirmed I am committed to working closely with Congress to make sure that our military needs are clearly articulated and that the defense committees have all the information they need to exercise their role in authorizing and appropriating funds for Air Force activities. As someone who studied the role of Congress in the defense budget process as an academic and now a minor participant for the last several years, I have a real appreciation for the role of this committee and Congress as a whole.

In closing, I would like to again thank President Obama, Secretary Gates, and Secretary Donley for selecting me. If confirmed, I will make every effort to live up to the confidence they have placed in me.

Chairman LEVIN. Thank you so much, Dr. Morin.
Mr. Ginsberg.

STATEMENT OF DANIEL B. GINSBERG, NOMINEE TO BE ASSISTANT SECRETARY OF THE AIR FORCE FOR MANPOWER AND RESERVE AFFAIRS

Mr. GINSBERG. Thank you, Mr. Chairman, Ranking Member McCain, and members of the committee. I have a full statement that I would ask to be included in the record.

Chairman LEVIN. It will be.

Mr. GINSBERG. It is a deep honor for me to sit before you as President Obama's nominee to serve as the Assistant Secretary of the Air Force for Manpower and Reserve Affairs. One of my most

significant early work experiences was to serve on the committee staff during the chairmanship of former Senator Sam Nunn, who is one of my great mentors and heroes. I have seen what a critical role the committee plays in caring for our men and women in uniform.

I would like to introduce my lovely wife Jessica Rose, and my wonderful parents Jerry and Mona Ginsberg. I owe them a debt of gratitude I can never repay. I also thank my mother-in-law Marilyn Coleman and my sister-in-law Jennifer Rose for being here.

Thank you, Senator Leahy for that extremely kind introduction. It has been a great privilege to assist you in your work as a tireless champion for Vermont and the men and women of the National Guard. When it comes to Guard issues, Senator Leahy and Senator Bond have been true partners, and I would like to express my gratitude to Senator Bond and his staff, particularly James Pitchford and Mike DeBois for their professionalism, generosity, and friendship.

Recently I was fortunate enough to be able to travel with Senator Leahy to Kuwait, Iraq, and Afghanistan. We saw many incredible airmen and many other servicemembers working long hours in challenging and dangerous conditions. If confirmed, I will work with the Air Force team to insure that the Air Force's policies are worthy of our airmen whether from the Guard, the Reserve, or the Active Force. I thank you for the opportunity to appear before you today, and I look forward to your questions.

[The prepared statement of Mr. Ginsberg follows:]

PREPARED STATEMENT BY DANIEL GINSBERG

Thank you Chairman Levin, Ranking Member McCain, and members of the committee. It is a deep honor for me to sit before you as President Obama's nominee to serve as the Assistant Secretary of the Air Force for Manpower and Reserve Affairs. I am humbled by the opportunity to work with this committee and serve in the civilian leadership of the United States Air Force under the direction of the President, Secretary of Defense Robert Gates, and Air Force Secretary Michael Donley.

One of the most formative experiences of my professional life was to serve on this committee's staff under then-Chairman Sam Nunn. In that time, I saw first-hand Senator Nunn's and the committee's abiding commitment to our soldiers, sailors, marines, and airmen. That dedication translated into far-reaching pay and benefit initiatives that have helped maintain the fundamental strength of the Armed Forces—its people.

Thank you, Senator Leahy, for that extremely kind introduction. It has been a great privilege to assist you in your work as a tireless champion for Vermont and—in your leadership role as the co-chair with Senator Bond of the Senate's National Guard Caucus—a stalwart supporter of the Citizen-Soldiers and Citizen-Airmen of the Guard. It has been a singular and unforgettable experience to be able to play a supporting role in your efforts to help strengthen this critical component of the Total Force.

Senator Leahy and Senator Bond have been partners at every turn, and I would like to express my gratitude to Senator Bond and his staff—particularly James Pitchford and Mike Dubois—for their professionalism, generosity and friendship.

I would also like the committee to know the debt of gratitude that I owe to my lovely wife Jessica Rose, who is with us today. I am grateful that my parents Jerry and Rona have flown up from Atlanta to be here. In my younger years they indulged my utter fascination with military aviation and, later, my desire to work in the defense policy realm. I also thank my mother-in-law Marilyn Coleman and my sister-in-law Jennifer Rose for making the effort to be here.

Over the Memorial Day Congressional Recess, I was fortunate to be able to travel with Senators Leahy, Warner, and Whitehouse to Kuwait, Iraq, Afghanistan and

Pakistan. We saw so many incredible airmen, and all of our uniformed men and women, working long hours in the most challenging conditions to carry out Coalition military operations. The members of the United States Air Force are investing every ounce of their will, their skill, and their energy. For every one of these dedicated professionals, there are loved ones who are waiting and sacrificing at home.

This committee knows, and I assure you that I know, that the Air Force's unequaled and indispensable asset is its people. If confirmed as the Assistant Secretary of the Air Force for Manpower and Reserve Affairs, I will work with the entire Air Force team to help ensure that policies and practices of the Air Force are worthy of our airmen's efforts. I will also remain committed to the ability of the National Guard and the Air Reserves to bring their specialized capabilities to bear in any situation.

I look forward to working with this committee, which has helped shape the Department of Defense into the world's premiere defense organization. I thank you for the opportunity to appear before you today and look forward to having the chance to serve with and for the proud men and women of the United States Air Force.

Chairman LEVIN. Thank you so much. We'll try 8 minute rounds for questioning.

First, General McCarthy, let me ask you about the recommendations of the commission on the National Guard and Reserves. They determined that Reserve component personnel are called upon to serve in 29 different duty statuses, which are confusing and frustrating to Reserve component personnel and to their commanders. The commission recommended a reduction of the number of duty statuses from the current 29 to 2. Do you have an assessment of that recommendation?

General MCCARTHY. Yes, sir, I do. I concur entirely with the recommendation that 29 is way too many. I'm not quite sure I would go down to two, but I believe that the number of duty status or pay statuses can be very sharply reduced, and I know the Department is working on that right now, and I'll continue to support those efforts.

Chairman LEVIN. The commission also made a number of recommendations to improve the healthcare benefits available to Reserve component members and their families in order to recognize its importance as an element of an enhanced compact with employers of Reserve component members. Can you give us your thoughts about that proposal to improve the healthcare benefits for National Guard and Reserve personnel and their families?

General MCCARTHY. Again, Senator, I think that is a very supportable recommendation primarily because we need to enhance the continuity of medical care so that families when the servicemember moves on and off of active duty don't have a break from the healthcare providers, and I believe we can do that. I think steps have already been made. I think there are further steps that can be made, and I look forward to working on that.

Chairman LEVIN. General, you've served with distinction as the Executive Director of the ROA for the past few years. Now you're going to, when confirmed, owe your dedication to the DOD and to the taxpayers and that may put you in an unusual situation where you might have to instead of advocating for the ROA. You may need to be actually declining to support a recommendation of theirs or other organizations that represent the Guard and Reserve. Are you going to have difficulty doing that? Are you up to it?

General MCCARTHY. Sir, I'm up to it. I think people who know me know I'm a person who speaks and acts his mind. In this office,

my mind will be that of the Secretary, the administration, and DOD.

Chairman LEVIN. Thank you. Now, Dr. Morin, you're going to be in a position where we're going to have some extraordinarily difficult budget decisions to make. You're used to that, so you're probably a perfect fit for where you're going. The Government Accountability Office (GAO) reported earlier this year that cost overruns on the Department's 97 largest acquisition programs alone total almost \$300 billion over the original program estimates, and Air Force programs account for a significant share of those overruns. What steps can you envision to deal with this kind of problem?

Dr. MORIN. Well, Senator, I think there's a couple sets of steps that you can take. One, if I'm confirmed, would be in dealing with the programs that currently exist. The second would be in dealing with the new programs that are developing and being base-lined. On the first category the challenge, as I understand it, a Comptroller faces in dealing with acquisition programs is first and foremost providing stability to those programs in the face of all of the unending pressures for late breaking changes in order to yield savings for what end up being more urgent priorities, and that's a managerial challenge. I do know that Secretary Donley and General Schwartz have been very articulate in their focus on restoring acquisition excellence in the Air Force, and that they have made clear in the conversations that I've had with them, frankly both in my current job and as I've talked to them about potentially coming onboard at the Air Force, that they want to do better. So my job would be to support the Air Force corporate process and that budget decisionmaking to provide the maximum stability. The second set is going forward as new programs are developed, baselined, and the cost estimating role, which this committee made a big focus on in the Weapons System Acquisition Reform Bill, is part of the financial management function. I would intend, if confirmed, to place significant importance and significant focus on building the skills of the Air Force cost estimation team. The Acquisition Workforce Development Fund is already, as I understand it, paying significant dividends in terms of better training and expanding the size of that workforce. But also, empowering those cost estimators, encouraging the best possible communication between the Air Force cost estimators and the Office of the Secretary of Defense (OSD), because I think that dialogue is critical, getting those multiple views, and the independence that this committee places so much importance on. So I would work to facilitate that process if I was confirmed and empower the people there.

Chairman LEVIN. A major headache is the one that you just addressed which we seek to address in that reform legislation that was just passed and signed, is the financial management problems, the effort to obtain a clean financial statement. Any thoughts on how you're going to tackle that issue? You make reference to it, I think in terms of what the goal is to achieve it, but any thoughts on how to move towards that goal?

Dr. MORIN. Yes, sir. Let me start by saying I take the GAO's reports and recommendation on this very seriously. I found their work to be excellent in my time on Capitol Hill. I would work closely with them and pay very careful heed to their analysis and their

high risk series. My understanding is that Secretary Hale is making a complete review of the Financial Improvement and Audit Readiness (FIAR) Plan, the FIAR plan, and that he is looking at making some changes in the strategy underlying that plan in order to create stronger incentives by focusing the audit deliverables on products which will most improve the overall immediate financial management of the Department. So not just working our way one by one through line items or elements of the financial statements, but picking the highest impact ones that will most improve the day-to-day financial management. I think that's great from an incentive perspective because that gives the senior leadership of the department immediate practical deliverables that help them do their job, and audit readiness is the law. We're behind schedule, but having those day-to-day managerial incentives I think will help it to rise higher and higher on the Department priority list.

Chairman LEVIN. Thank you.

Senator BURRIS.

Senator BURRIS. Thank you, Mr. Chairman. To our distinguished panel I also extend to you my congratulations for your willingness to continue in government service and to your families I also extend my thanks and the American people are grateful for your service. General McCarthy, I think I have one of your reservists that just joined my staff, a young man by the name of James Freeman, and he wanted to make sure that I stood here and gave you a tough time. I don't think I'll do that.

General MCCARTHY. Thank you, sir.

Senator BURRIS. But we're very fond of the young man, and he speaks very highly of you. To the whole panel, I would just like to know for my own information we're now in the month of June, when did you get the nomination from the President? Could you each tell me what date you were nominated, and how long the process has been for you to get to this point?

General MCCARTHY. Senator, although there were a number of discussions, I believe my nomination was actually made on the first of June.

Senator BURRIS. The first of June, okay.

How about you, Dr. Morin?

Dr. MORIN. Senator, as I recall it was May 11. I couldn't swear to that.

Senator BURRIS. Okay, and you, Mr. Ginsberg?

Mr. GINSBERG. I can't swear to the date either, Senator, but it was a similar time to General McCarthy, a few weeks ago.

Senator BURRIS. How has the process been? Have you all completed all your documentation, and how many forms have you filled out, do you want to answer that?

General MCCARTHY. Speaking for myself, it's a lot of forms, and whether they've all been filled out properly remains to be seen.

Chairman LEVIN. There's a real test for Dr. Morin, by the way, as the Comptroller. Do you know precisely how many forms you filed out?

Dr. MORIN. Senator, at the Budget Committee we historically round to the nearest tenth of a billion, so I can tell you it was zero-tenths of a billion.

Senator BURRIS. To Dr. Morin, my understanding of the Comptroller is limited, you have to give me some background. I read your response to the questionnaires in terms of financial management and comptroller for the Air Force, would you also be putting together the budgeting process for that, or would you just be overseeing the spending process?

Dr. MORIN. The Assistant Secretary for Financial Management has responsibility over both. The responsibility in the budget formulation process is as the principal staff assistant to the secretary in the budget formation. The day-to-day budget formation and development process is the responsibility of one of the three Deputy Assistant Secretaries that works for the Assistant Secretary for Financial Management, and that's traditionally a military officer serving in a civilian secretariat job, so that would be one of the direct reports to my office if I was confirmed.

Senator BURRIS. Do you have an understanding of how this would work? Will you actually be preparing any of the financial records and looking at the financial statements for the Air Force in conjunction to preparing documents that would be audited by GAO, or how do you perceive that as working?

Dr. MORIN. Yes, sir. I would sign the financial statements. Another one of the three Deputy Assistant Secretaries under the financial management functional organization is the financial operations, and that is a large group of people that handles the actual accounting which is also decentralized among many units. Ultimately, the responsibility both for setting the policies and for asserting the validity of what we put on paper would fall to me if I was confirmed.

Senator BURRIS. As a freshman Senator, I'm trying to get my arms around how that financial system works because I'm a former State Comptroller.

Dr. MORIN. Yes, sir.

Senator BURRIS. Many years ago, when I was president of the National Association of State Auditors, Controllers and Treasurers we were definitely concerned not only about our states, but our Federal Government was making financial expenditures and oversight of financial expenditures, and we came up with a concept that the current auditor general for GAO, I'm sorry, current comptroller for GAO would become what we call an auditor general, and then we would have a comptroller general that would oversee all the department's financial records and statements. We compromised with them and a comptroller would be put in the Office of Management and Budget (OMB) and another comptroller then placed in the bigger agencies. Do you know in DOD I would assume there is a comptroller for the whole department, is that correct?

Dr. MORIN. Yes, sir. There's the Under Secretary of Defense Comptroller, the Honorable Robert Hale—

Senator BURRIS. Okay.

Dr. MORIN.—confirmed by this committee a few months ago, he is the Comptroller and Chief Financial Officer of DOD. He sets the broad policies for the department, and then each of the individual Military Services has an assistant secretary for financial management who serves as the Comptroller for that department.

Senator BURRIS. Do you report in to him? Do you create statements to turn into the combined statement reporting for DOD?

Dr. MORIN. Yes in an ultimate sense. DOD, the OSD rolls up the Service reports, and rolls up the reports from the independent defense agencies and some of the other activities, TRICARE, many other agencies all have their own individual financial statements, and those are rolled up into the OSD level reports, but both the Services and the OSD submit their reports individually to OMB and to Congress.

Senator BURRIS. So your statements go in separately, individually you said?

Dr. MORIN. They go in both individually and as part of the combined product.

Senator BURRIS. Okay. Do you know whether any of those statements, and maybe this is a bad word in the Federal Government, but in State government it has to be in accordance with generally accepted accounting principles. Do you all use the Governmental Audit Principles (GAP) standard here?

Dr. MORIN. OMB circular A123 sets GAP, and the principles are not exactly the same.

Senator BURRIS. Not auditing standards, financial.

Dr. MORIN. Yes, and we do not apply precisely the generally accepted accounting principles of the private sector, but there is a parallel generally accepted governmental accounting principles.

Senator BURRIS. What you want to do and when you want to do it.

Dr. MORIN. Well, the Comptroller General at GAO has a great deal of influence in setting those standards, and standards are set by OMB for the executive agencies. The details of how much flexibility there are in those standards I can't comment on yet. I just don't know.

Senator BURRIS. My time is up. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator Burriss.

Mr. Ginsberg just a few questions for you. Two of the issues that you're going to be faced with immediately are the problems of sexual assaults of servicemembers. It's a huge issue. It continues to be a huge issue. Rather than to press you now for your assessment of the problem, I would just ask that you make a commitment to address this issue as one of your first orders of business.

Mr. GINSBERG. Absolutely, Senator. My understanding is that Air Force does take this issue very seriously.

Chairman LEVIN. They do.

Mr. GINSBERG. Yes.

Chairman LEVIN. It's essential that they do so. Second is suicide prevention. We have a growing number of suicides in all of the Services including the Air Force. Suicides in the Active Duty Air Force, Air National Guard, Air Force Reserve increased from 37 to 44 from 2007 to 2008, and I would make the same request, the same point relative to suicides.

Mr. GINSBERG. Absolutely, Senator. Again a very serious issue.

Chairman LEVIN. In your response to advance policy questions, Mr. Ginsberg, you indicated that the most critical shortcoming in the Air Force is wounded warrior care and retaining wounded air-

men on active duty who want to remain on active duty to ensure that they can continue to be productive members of the Air Force.

Do you have any thoughts as to how you're going to address that?

Mr. GINSBERG. Senator, my understanding is the Air Force has a very deep commitment of taking care of its wounded warriors. They have a very good program that matches wounded warriors with oversight personnel. In terms of how to keep them engaged, keep them in the Service if that's what they desire, it's a matter of close attention. Again, making sure that there are personnel who are assigned to oversee their recovery so that they can fulfill their full potential given their state and given their health condition. Again, I think it's a matter of assigning personnel, assigning manpower, assigning people to be involved. One of the things I'd love to do is look at whether there are any policies that are needed, whether there are so many cases across the Services that there might be some kind of regulation or guidance that needs to be issued. I would, of course, do that working, if confirmed, with the entire Air Force team and with the Secretary, of course.

Chairman LEVIN. When Senator Burriss asked you when your nominations came here, I think he was perhaps surprised, and perhaps some members of our audience were surprised by the speed with which we've handled your nominations. He did not ask you how long it took to get your nominations, which would probably be an embarrassing question for you to answer because that takes often an unseemly length of time, but we're very proud of the speed with which we handle nominations, yours being good examples of it. That's tremendous staff work that takes on the part of our staff. Both the majority and Republican staff do a phenomenal job with nominations, and we don't often have an opportunity to express appreciation publically for them to them for that service, but since Senator Burriss asked the question, that triggered that possibility.

We are again grateful to you for your service in the past, for your service in the future. We're going to move these nominations, all six of them as quickly as we can. That depends on our being able to get together a quorum, and that usually takes a little while to put that in place, and then for the Senate to act which usually can be done fairly quickly. So it is surely hopeful that these nominations will be acted upon by the Senate within the matter of a week or two.

We thank your families for their support, and particularly want to single out your son, Dr. Morin, Liam. I understand he is 4 years old, is that correct? He has just been absolutely superb.

Dr. MORIN. Thank you, Senator.

Chairman LEVIN. I have a grandson who is a little older than that, and I'm sure when my grandson was four, he would have done an equally superlative job of looking interested in what his father had to say, and at being extraordinarily patient with this process. His grandmother, who I think is smiling absolutely mightily here, my wife is a grandmother as well, and I can just imagine her sitting there with her grandson, our grandson, during this process how proud she must be of you and him.

Do you have other children may I ask?

Dr. MORIN. Liam is my only.

Chairman LEVIN. Liam is your only.

Dr. MORIN. He has the blessing of being the first grandchild on both sides of the family.

Chairman LEVIN. I can see the look in the grandma's eyes how proud she is of both of you.

Thank you all. Thank your families. We'll stand adjourned.

[Whereupon, at 11:14 a.m., the committee adjourned.]

[Prepared questions submitted to Gordon S. Heddell by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Based on your experience as the acting Inspector General (IG) for the Department of Defense (DOD), do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. At this time, I do not know of the need for any modifications to the Goldwater-Nichols Act. It has led to enhanced jointness, increased readiness, and created a higher standard of warfighting efficiency. However, if confirmed I will notify Congress if the Office of Inspector General identifies the need for modifications to the act.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. Please see response above.

QUALIFICATIONS

Question. Section 3 of the Inspector General Act of 1978 provides that IGs shall be appointed on the basis of their "integrity and demonstrated ability in accounting, auditing, financial analysis, law, management analysis, public administration, or investigations."

What background and experience do you possess that you believe qualifies you to perform the duties of the DOD IG, particularly in the area of oversight, audit and investigation?

Answer. I have 8 years of experience as an IG and was responsible for the conduct of audits and investigations related to matters at the Department of Labor. I have extensive experience as an investigator with the United States Secret Service. Additionally, I have been serving as the acting IG for DOD since July 2008 and am responsible for the conduct of audits, evaluations, and investigations related to matters at the DOD.

Question. Do you believe that there are any steps that you need to take to enhance your expertise to perform these duties?

Answer. I believe that learning is a life long and continuing process. I learned a great deal during my tenure as Inspector General at the Department Labor. I will take those 8 years of experience and build upon them as the IG of DOD, if confirmed.

Question. Based on your background and experience, are there any changes that you would recommend with respect to the current organization or responsibilities of the DOD IG?

Answer. Since arriving at the DOD IG in July 2008, I've recognized the need to make certain adjustments to the organization as well as a need for additional resources. Those include an establishment of an Office of Professional Responsibility, a Deputy IG for Administrative Investigations, and the Ombudsman. If confirmed, I will continue to assess the current organizational alignment and will make further changes, as needed.

RELATIONSHIPS

Question. If confirmed, what would your working relationship be with: The Secretary of Defense.

Answer. Section 8(c) of the IG Act of 1978, as amended (the IG Act) states that the IG shall “be the principal adviser to the Secretary of Defense for matters relating to the prevention and detection of fraud, waste, and abuse in the programs and operations of the Department”

If confirmed, I will continue to consult directly with the Secretary of Defense as necessary and appropriate, especially with respect to matters governed by section 8(b)(1) of the IG Act. I will seek to maintain a strong and effective relationship with the Secretary that enables me to carry out my statutory duties with the independence required under the IG Act, while enabling the Secretary to exercise his statutory supervisory authority.

Question. The Deputy Secretary of Defense.

Answer. Section 3(a) of the IG Act states that “each IG shall report to and be under the general supervision of the head of the establishment involved or, to the extent such authority is delegated, the officer next in rank below such head.” DOD Directive 5106.01, dated April 13, 2006, states that “the IG of the DOD shall report to and be under the general supervision of the Secretary of Defense and the Deputy Secretary of Defense. . . .” Accordingly, if confirmed, my relationship with the Deputy Secretary of Defense will be similar to my relationship with the Secretary of Defense.

Question. The Under Secretary of Defense (Comptroller/Chief Financial Officer) (USD(C/CFO)).

Answer. If confirmed, I will continue to work with the USD(C/CFO) to formulate the IG’s portion of the annual President’s budget for submission to Office of the Secretary of Defense (OSD) and Office of Management and Budget (OMB), as well as request required resources to conduct the IG’s mission. I will work with the USD(C/CFO) on areas of concern within the financial management arena which the IG has identified as a major management challenge for the Department. I will conduct and supervise audits and investigations relating to the programs and operations of the establishment in order to promote economy, efficiency, and effectiveness.

Question. The Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)).

Answer. The office of the DOD IG has also identified acquisition processes and contract management as a major management challenge for DOD. It is therefore essential for the IG to maintain an effective working relationship with the USD(AT&L). If confirmed, I anticipate working closely with the Under Secretary concerning the allocation of IG resources in the acquisition area, and how best to implement audit recommendations pertaining to acquisition processes. As IG, I would also recommend policies, in coordination with the USD(AT&L) and the USD(Comptroller), to ensure that audit oversight of contractor activities and financial management are coordinated and carried out in an efficient manner to prevent duplication.

Question. The Assistant Secretaries of Defense.

Answer. We have and will continue to work with the various Assistant Secretaries of Defense in managing challenges faced by the Department, as outlined in our Semiannual Report to Congress. For example, recent interactions have involved the Assistant Secretary of Defense (Health Affairs) pertaining to our work on TRICARE fraud.

Question. The General Counsel of DOD.

Answer. If confirmed, I will continue to work with the General Counsel of DOD who serves as the Chief Legal Officer of DOD.

Effective September 23, 2008, an Office of General Counsel within the Office of Inspector General was established outside of the authority, direction and control of the General Counsel of DOD. The establishment of this independent Office of Counsel ensures that the IG receives independent legal advice and is in accordance with the provisions of the National Defense Authorization Act of 2009 and the IG Reform Act of 2008.

Question. The Director of Operational Test and Evaluation (DOT&E).

Answer. The IG and the DOT&E have a common interest in ensuring that equipment and weapons systems allocated to the warfighter perform effectively and as planned. If confirmed, I would expect to consult as appropriate with the Director concerning the initiation of oversight efforts in these areas.

Question. The Director of Cost Assessment and Program Evaluation.

Answer. The IG and the Director of Cost Assessment and Program Evaluation will have a common interest in ensuring that acquisitions made by the Department un-

dergo cost assessments and program evaluations. I will seek to establish a cooperative working relationship with this new office.

Question. The IGs of the Military Departments, Defense Agencies, and the Joint Staff.

Answer. Section 8(c)(2) of the IG Act states that the IG of DOD “shall . . . initiate, conduct, and supervise such audits and investigations in the DOD (including the military departments) as the IG considers appropriate. . .” Section 8(c)(9) adds that the IG “shall . . . give particular regard to the activities of the internal audit, inspection, and investigative units of the military departments with a view toward avoiding duplication and ensuring effective coordination and cooperation. . .”

If confirmed, I will ensure that the DOD IG continues to coordinate and avoid duplicative efforts. The DOD oversight community uses internal coordination mechanisms to deconflict potential duplicative efforts. In addition, DOD directives govern certain programs in which the IGs of the military departments participate.

Question. The IGs of subordinate commands.

Answer. My relationship with the IGs of subordinate commands will be based on the IG role described above in part I. If confirmed, I will work closely with the other DOD IGs to carry out applicable policies and guidance; avoid duplication, overlapping, and gaps; and work to build a strong team.

Question. The Criminal Investigative Services of the Military Departments.

Answer. Under the IG Act, the IG has the authority to initiate, conduct, and supervise criminal investigations relating to any and all programs and operations of the DOD. In addition, the IG is statutorily authorized to develop policy, monitor and evaluate program performance, and provide guidance regarding all criminal investigative programs within the Department. The DOD IG works frequently in close coordination with the Military Criminal Investigative Organizations (MCIOs) on joint investigations.

If confirmed, I will continue to work closely with each of the MCIOs to ensure that investigative resources are used effectively.

Question. The Audit Agencies of the Military Departments

Answer. Section 4(a) of the IG Act establishes broad jurisdiction for the IG to conduct audits and investigations within DOD, and section 8(c)(2) states that the IG “shall . . . initiate, conduct, and supervise such audits and investigations in the DOD (including the military departments) as the IG considers appropriate.”

If confirmed, I will continue to work with the audit agencies of the military departments.

Question. The Defense Contract Audit Agency (DCAA).

Answer. If confirmed, I will continue to work with DCAA, as prescribed in the IG Act. Although DCAA reports to the Under Secretary of Defense (Comptroller), it operates under audit policies established by the IG.

Question. The Defense Acquisition Regulatory Council.

Answer. The DOD IG regularly provides comments to the Defense Acquisition Regulatory Council on proposed changes to the Defense Federal Acquisition System and also recommends changes as a result of DOD IG work.

If confirmed, I would expect to continue these practices.

Question. The Director of Defense Procurement and Acquisition Policy.

Answer. The Director of Defense Procurement and Acquisition Policy is responsible for oversight of a large segment of the Defense Department’s acquisition and contracting operations and, accordingly, is a major recipient of reports provided by the IG. If confirmed, I would expect to continue the current practice of working with the Director.

Question. The Comptroller General and the Government Accountability Office (GAO).

Answer. The DOD IG works very closely with the Comptroller General and the GAO to coordinate planned and ongoing audits and inspections to avoid any duplication of efforts. The DOD IG GAO liaison office serves as the central liaison between GAO and DOD management during GAO reviews of DOD programs and activities.

If confirmed, I would work to maintain these cooperative relationship with the Comptroller General and GAO.

Question. The Special IG for Iraq Reconstruction (SIGIR).

Answer. The DOD IG has supported the operations of the SIGIR and its predecessor, the Coalition Provisional Authority IG. In accordance with the IG Act and Public Law 108–106, title 3, section 3001(f)(4), the DOD IG coordinates activities with the SIGIR as well as other oversight community members, to avoid duplicating oversight efforts and to minimize disruption to military operations. The DOD IG scope of oversight authority encompasses all DOD funded operations and activities in Iraq and elsewhere. The SIGIR focuses his oversight effort only on funds designated for Iraq reconstruction. If confirmed, and in keeping with the IG Act, I will

work to ensure that the DOD IG collaborates effectively with the SIGIR to ensure that we protect the public expenditures in Iraq for which we have oversight.

Question. The Special Inspector General for Afghanistan Reconstruction (SIGAR).

Answer. The DOD IG scope of oversight authority encompasses all DOD funded operations and activities in Afghanistan and elsewhere. The SIGAR focuses his oversight effort only on funds designated for Afghanistan reconstruction. If confirmed, and in keeping with the IG Act, I will continue to ensure that the DOD IG collaborates effectively with the SIGAR to ensure that we protect the public expenditures in Afghanistan for which we have oversight.

Question. The Commission on Wartime Contracting in Iraq and Afghanistan.

Answer. Since its inception, we have worked with the Commission in support of its mission. We have briefed the Commission and its staff and, recently, the Principal Deputy IG testified at the initial hearing held by the Commission. We are providing the Commission copies of reports that address contracting issues in Southwest Asia. We plan to initiate a review of construction of the new Kabul compound in response to a recent Commission request.

Question. The President's Council on Integrity and Efficiency (PCIE).

Answer. On October 14, 2008, the President signed Public Law 110-409, which established the Council of Inspectors General on Integrity and Efficiency (CIGIE), replacing the PCIE. In my role as Acting IG, I am a member of the Executive Council, serve as the chair of the IT committee, and am a member of the Audit Committee. If confirmed, I plan to continue to be a very active participant in the CIGIE

Question. The Defense Council on Integrity and Efficiency (DCIE).

Answer. Sections 2 and 3 of the DCIE Charter state that, in accordance with section 2(2) of the IG Act, the DOD IG, who is the DCIE Chairman, is responsible to provide "leadership and coordination and recommend policies for activities designed (A) to promote economy, efficiency, and effectiveness in the administration of, and (B) to prevent and detect fraud and abuse in such programs and operations." If confirmed, I would organize meetings with the established members of the DCIE to discuss issues of common interest and reinforce close working relationships within the DOD oversight community.

Question. The OMB.

Answer. If confirmed, I will work with the Deputy Director for Management of the OMB, who is the Chairperson of the CIGIE.

MAJOR CHALLENGES, PROBLEMS AND PRIORITIES

Question. In your view, what are the major challenges and problems facing the next DOD IG?

Answer. We have challenges related to both our workforce and the complexity of our work. Among the human capital challenges are the retirement of experienced senior leadership and developing succession planning and retention within a highly competitive environment for the audit professionals. Further challenges are identified in our Semiannual Report to Congress and some of those challenges involve conducting audits and investigations in a combat environment as well as oversight involving highly technical subjects, such as weapons acquisitions and cyber security.

Question. If you are confirmed, what plans do you have for addressing these challenges and problems?

Answer. If confirmed, I will continue to focus on the IG strategic human capital plan which among other goals, addresses succession planning and leadership development. I will focus audit, investigative, and inspection efforts on the challenges identified in the Semiannual Report, recognizing the complexity of some of those challenges. I will also work with senior DOD officials and Congress to identify emerging issues that the Department faces.

Question. If you are confirmed, what broad priorities would you establish in terms of issues which must be addressed by the DOD IG?

Answer. Promoting efficiency and preventing fraud in defense acquisitions is obviously a high priority—as well as effective support for the men and women of our armed services and the operations in Iraq and Afghanistan. I will also ensure that the IG pursues aggressive oversight of contracting issues. If confirmed, I look forward to consulting with senior officials of the DOD and with Congress, in establishing broad priorities.

Question. If you are confirmed, what changes, if any, would you expect to make in the organization, structure, and staffing of the Office of IG?

Answer. Since arriving at the DOD IG in July 2008, I've recognized the need to make certain adjustments to the organization as well as a need for additional resources. Those include an establishment of an Office of Professional Responsibility, a Deputy IG for Administrative Investigations, and an Ombudsman.

Question. If confirmed, I will continue to assess the current organizational alignment and will make further changes, as needed.

DUTIES

Question. What is your understanding of the duties and functions of the DOD IG?
 Answer. The duties and functions of the DOD IG are those specified in sections 3, 4, and 8 of the IG Act. Additional duties and responsibilities of the IG are specified in DOD Directive No. 5106.01, which was signed by the Deputy Secretary of Defense on April 13, 2006.

By statute, the IG conducts and supervises audits and investigations relating to the programs and operations of DOD. The IG also provides leadership and coordination, and recommends policy, for activities designed to: (1) promote economy, efficiency, and effectiveness in the administration of DOD programs and operations; and (2) combat fraud, waste, and abuse. In addition, the IG is responsible for keeping both the Secretary of Defense and Congress fully and currently informed about problems and deficiencies in defense programs, the need for corrective action, and the status of such action.

Question. Assuming you are confirmed, what duties and functions do you expect that the Secretary of Defense would prescribe for you?

Answer. The Secretary of Defense has prescribed the duties and functions of the IG in two DOD publications: DOD Directive 5100.1, "Functions of the Department of Defense and Its Major Components," and DOD Directive 5106.01, "Inspector General of the Department of Defense." These publications delineate that the IG DOD provides staff assistance and advice in accordance with the responsibilities specified in the IG Act. Significantly, these publications reinforce that the IG remains an independent and objective unit within DOD. If confirmed, I will consult directly with the Secretary to identify specific areas of concern and emphasis.

Question. Section 2 of the IG Act of 1978 states that its purpose is to create independent and objective units to conduct and supervise audits and investigations; to provide leadership and coordination and recommend policies designed to promote economy, efficiency, and effectiveness; to prevent and detect fraud and abuse; and to provide a means for keeping Congress and agency heads fully and currently informed about problems and deficiencies relating to the administration of programs and operations and the necessity for and progress of corrective action.

Question. Are you committed to maintaining the independence of the DOD IG, as set forth in the IG statute?

Answer. If confirmed, I will maintain the independence of the IG consistent with the provisions of the IG Act.

Question. Are you committed to keeping the Committee on Armed Services "fully and currently informed," and, if so, what steps will you take, if confirmed, to ensure that this responsibility is carried out?

Answer. Yes. If confirmed, in accordance with section 2(3) of the IG Act, I will remain committed to keeping the Committee on Armed Services "fully and currently informed about problems and deficiencies relating to the administration of such programs and operations and the necessity for and progress of corrective action." I will do so through the dissemination of IG products such as the Semiannual Report to Congress and audit reports. In addition, I will provide briefings for Members and staff, and testimony at hearings, when requested, with the intent of maintaining a close relationship.

Question. Section 3 of the IG Act of 1978 provides that the head of an agency, shall exercise "general supervision" over an IG, but shall not "prevent or prohibit the IG from initiating, carrying out, or completing any audit or investigation, or from issuing any subpoena during the course of any audit or investigation."

Question. What is your understanding of the supervisory authority of the Secretary of Defense over the DOD IG with respect to audits and investigations, in view of the independence provided by sections 2 and 3?

Answer. Section 2 of the IG Act creates independent and objective units . . . to provide a means for keeping the head of the establishment and Congress fully and currently informed about problems and deficiencies relating to the administration of such programs and operations and the necessity for and progress of corrective action.

Section 3 states that each IG shall report to and be under the general supervision of the head of the establishment involved or, to the extent such authority is delegated, to the office next in rank below such head, but shall not report, or be subject to supervision by, any other officer of such establishment. Moreover, neither the head of the establishment nor the office next in rank shall prevent or prohibit the

IG from initiating, carrying out, or completing any audit or investigation, or from issuing any subpoena during the course of any audit or investigation.

Question. If confirmed, what action would you take if a senior official of the Department sought to prevent you from “initiating, carrying out, or completing” any audit or investigation within the jurisdiction of the Office of the DOD IG?

Answer. If the action was taken outside the authority of the Secretary of Defense in section 8 of the IG Act, I would notify the Secretary and request his assistance in ensuring compliance with the IG Act by the senior official involved. Failure to resolve the issue, would, in my view, constitute a “particularly serious or flagrant problem, abuse, or deficiency” under section 5(d) of the IG Act. Under this section, the IG is required to report the matter to the head of the establishment, who is then required to transmit the IG’s report to Congress within 7 days.

Question. Section 8 of the IG Act of 1978 states that the DOD IG shall be under the authority, direction, and control of the Secretary of Defense with respect to certain audits or investigations which require access to information concerning sensitive operational plans, intelligence matters, counterintelligence matters, ongoing criminal investigations by other administrative units of DOD related to national security, or other matters, the disclosure of which, would constitute a serious threat to national security. What is your understanding of the procedures in place to effect the authority and control of the Secretary of Defense over matters delineated in section 8 of the act?

Answer. To my knowledge the procedure in place is to follow the IG Act. Under 8(b)(1) or 8(b)(2) of the IG Act, the Secretary has the “authority to stop any investigation, audit, or issuance of subpoenas, if the Secretary determines that such a prohibition is necessary to preserve the national security interests of the United States.” I am informed that this provision has never been exercised. However, in the event that the Secretary exercises this authority, I would submit an appropriate statement within 30 days to this committee and other appropriate committees of Congress, as required under section 8(b)(3).

Question. What is your understanding of the extent to which the IG has, as a matter of practice, initiated and conducted audits or investigations covered by section 8 differently from other audits or investigations?

Answer. It is my understanding that the practice of the DOD IG with respect to the initiation and conduct of audits and investigations covered by section 8 is the same as for other audits and investigations.

Question. What changes, if any, do you believe are needed in the practices of the DOD IG for initiating and conducting audits or investigations covered by section 8?

Answer. None to my knowledge.

Question. Sections 4 and 8 of the IG Act of 1978 set forth various duties and responsibilities of IGs beyond the conduct of audits and investigations.

What is your understanding of the supervisory authority exercised by the Secretary of Defense with regard to these issues?

Answer. Beyond the conduct of audits and investigations, section 4 of the IG Act directs the IG to “review existing and proposed legislation and regulations” and make related recommendations in semiannual reports; recommend policies to promote economy and efficiency in the administration of Department programs and operations, and to prevent and detect fraud and abuse; keep the Secretary of Defense and Congress fully and currently informed about fraud and other serious problems, abuses, and deficiencies; recommend corrective actions for such problems, abuses, and deficiencies; and report on the progress made in implementing such corrective actions. Section 8(c)(1) adds that the IG shall “be the principal advisor to the Secretary of Defense for matters relating to the preventing and detection of fraud, waste, and abuse in the programs and operations of the Department.” The duties and responsibilities specified in sections 4 and 8 come within the general supervisory authority of the Secretary of Defense established under section 3(a).

INDEPENDENCE

Question. The DOD IG must ensure that the independence of the Office of the IG is maintained, that investigations are unbiased, particularly those involving senior military and civilian officials, and promptly and thoroughly completed, and that the highest standards of ethical conduct are maintained.

Under what circumstances, if any, do you believe it would be appropriate for the DOD IG to consult with officials in the OSD (or other DOD officials outside the Office of the IG) before issuing a report, regarding the findings and recommendations in the report?

Answer. In regards to audits and inspections, it is the current practice for the IG to offer officials in the OSD, or other DOD officials, an opportunity to comment be-

fore issuing a report to ensure that the information in the report is factually accurate and to resolve or acknowledge disagreements on conclusions, findings, and recommendations. However, for criminal investigations, it is not appropriate to discuss the results of ongoing investigations.

Question. To the extent that you believe such consultation is appropriate, what steps, if any, do you believe the IG should take to keep a record of the consultation and record the results in the text of the report?

Answer. I believe it is necessary to consult with all parties to gather the facts to develop findings and recommendations. The facts that are relevant should be included in the text of the report, and that a written record of all interviews and consultations are maintained in the working papers. The procedures are in place to redact certain information from reports in the appropriate circumstances.

Question. Under what circumstances, if any, do you believe it would be appropriate for senior officials to request that the DOD IG not investigate or review a particular matter?

Answer. Under section 8 of the IG Act, the Secretary of Defense has the authority to prohibit the IG from initiating, carrying out, or completing any audit or investigation. That authority may be exercised when the audit or investigation requires access to information concerning: sensitive operational plans, intelligence matters, counterintelligence matters, ongoing criminal investigations by other administrative units of DOD related to national security, or other matters the disclosure of which would constitute a serious threat to national security. As noted previously, the Secretary of Defense has never exercised his authority under section 8.

Question. Under what circumstances, if any, do you believe it would be appropriate for senior officials to request that the DOD IG not issue a report on a particular matter?

Answer. No one has the authority to ask the DOD IG not to issue a report on a particular matter unless it is the Secretary of Defense, under the provisions delineated in section 8.

Question. Under what circumstances, if any, do you believe it would be appropriate for senior officials to request that the DOD IG alter findings, recommendations, or other pertinent material in a report on a particular matter?

Answer. In the course of conducting audits and inspections, the IG practice is to offer officials in the OSD, or other DOD officials, an opportunity to comment before issuing a report to ensure that the information in the report is factually accurate and to resolve or acknowledge disagreements on conclusions, findings, and recommendations. Additionally, in cases where an administrative investigation substantiates allegations involving a senior DOD official, the senior official is given an opportunity to comment on findings and conclusions as part of fairness and due process. Those comments may request that we alter our findings and are considered before we issue a final report. However, for criminal investigations, it is not appropriate to discuss the results of ongoing investigations. The final decision on the content of reports rests with the IG.

Question. If confirmed, how would you react to a request, which you believed to be inappropriate, to not investigate a particular matter, not issue a report on a particular matter, or alter findings, recommendations, or other pertinent material in a report on a particular matter?

Answer. With respect to the initiation or completion of an audit or investigation, if the request was inappropriate and made outside the authority of the Secretary of Defense in section 8 of the IG Act, I would reject the proposal. If and when necessary, I would notify the Secretary and request his assistance in ensuring compliance with the IG Act by the senior official involved.

Failure to resolve the issue, would, in my view, constitute a “particularly serious or flagrant problem, abuse or deficiency” under section 5(d) of the IG Act. Under this section, the IG is required to report the matter to the head of the establishment, who is then required to transmit the IG’s report to Congress.

CONGRESSIONAL REQUESTS

Question. The Office of IG frequently receives requests from congressional committees and Members of Congress for audits and investigation of matters of public interest.

What is your understanding of the manner in which the Office of IG handles such requests?

Answer. The DOD IG receives many requests from congressional committees and Members of Congress for oversight reviews, but adheres to the same principles of independence in responding to those requests.

Question. If confirmed, will you ensure that the Office of IG continues to respond to congressional requests for audits or investigations in a manner consistent with past practice?

Answer. Yes.

Question. Under what circumstances, if any, do you believe it would be appropriate for the Office of the IG to redact the contents of any information contained in a report it provides to Congress?

Answer. Consistent with the Freedom of Information Act and Privacy Act, it is the practice of the DOD IG to provide unredacted copies of reports to oversight committees of Congress. Additional releases, including those to the public, are redacted in accordance with applicable laws.

Question. In recent years, a number of audits and investigations conducted by the DOD IG in response to congressional requests have taken excessively long periods of time to complete. In some cases, the individuals who have been the subject of such investigations have left office by the time the DOD IG has completed its work.

What is your view of the timeliness and responsiveness of the DOD IG's recent work in response to congressional requests?

Answer. In some very important respects we have not been timely. We are, however, striving to improve our timeliness and responsiveness to congressional requests. Recent examples of timely and responsive work in response to congressional requests include our work regarding testing requirements for body armor and the cost, oversight, and impact of congressional earmarks. If confirmed, I will continue to improve on the timeliness of our responses to congressional requests.

Question. What steps, if any, would you take, if confirmed, to ensure the timeliness and responsiveness of such audits and investigations?

Answer. If confirmed, I will ensure that we continue to improve interaction with congressional members and staff to better define and scope reviews that are responsive and have realistic timelines. I have already initiated actions to improve the timeliness of key audits and investigations and have plans to do more in that regard.

SENIOR OFFICIAL INVESTIGATIONS

Question. The Office of the DOD IG plays a key role in the investigation of allegations of misconduct by senior officers and civilian employees of DOD. The Committee on Armed Services has a particular interest in investigations concerning senior officials who are subject to Senate confirmation, and relies upon the DOD IG, as well as the OSD, to ensure that these investigations are accurate, complete, and accomplished in a timely manner.

If confirmed, what steps will you take to ensure that the investigations relating to senior officials are completed in a timely and thorough manner and that the results of investigations are promptly provided to this committee?

Answer. If confirmed, I will continue efforts I began over the past months to increase staffing significantly in the DOD IG senior official investigations unit to improve the timeliness of investigative work. I am in the process of substantially increasing the authorized number of positions in our senior investigation unit and am convinced that we will be able to recruit highly capable individuals to these positions under the new National Security Personnel System (NSPS) pay setting guidelines. I will further ensure that investigations relating to senior officials who are subject to Senate confirmation are promptly provided to the committee.

Question. Do you believe that the current allocation of responsibilities between the DOD IG and the IGs of the military departments is appropriate to ensure fair and impartial investigations?

Answer. If confirmed, I will ensure that the current allocation of responsibilities between the DOD IG and the IGs of the military departments is appropriate to ensure fair and impartial investigations. Currently, the DOD IG assumes investigative jurisdiction in any senior official case where allegations cross service lines or where the Service IG may encounter an impediment to independence or be perceived as having such an impediment.

Question. What additional steps, if any, do you think the DOD IG should take to ensure that investigations carried out by the IGs of the military departments are accurate and complete?

Answer. If confirmed, I will increase both the frequency and the breadth of interaction between my office and the IGs of the military departments. In doing so, I would hope to enhance both the relationship and the information that is provided by the military IGs. I will ensure the reports of investigation completed by the military department IGs continue to receive a vigorous oversight review for independence, thoroughness, and accuracy. I will not hesitate to assume investigative juris-

diction over cases where appropriate; particularly if the subject of the allegations is a political appointee, outranks the Service IG, or the allegations cross service lines. Additionally, when deficiencies are identified in a report of investigation, I will direct my staff to complete any additional work to ensure timely resolution of the case, while maximizing the independence of the ultimate conclusions.

Question. At what point in an investigation and under what criteria would you initiate action to ensure that a “flag,” or suspension on favorable personnel action, is placed on a military officer?

Answer. If confirmed, I will ensure that all senior officials who are under investigation or inquiry are properly reported to the Service IG to ensure they are “flagged” and not eligible for any favorable actions. In cases where an officer is pending nomination for promotion or reassignment, I will also notify the Under Secretary of Defense (Personnel and Readiness) so that that nomination may be placed on hold pending outcome of the investigation.

Upon receipt of any allegation involving a senior official, my office conducts a review of the complaint to determine if the allegations are credible, if the alleged conduct violated an established standard, and if there is sufficient information to conduct a focused inquiry. If these questions are affirmatively answered, we will open an investigation and notify appropriate authorities.

RESOURCES AND AUTHORITIES OF THE DOD IG’S OFFICE AND INVESTIGATORS

Question. Do you believe that the DOD IG’s office has sufficient resources (in personnel and dollars) to carry out its audit and investigative responsibilities?

Answer. If confirmed, I will attempt to ensure that the DOD IG’s office has sufficient resources to carry out its audit and investigative responsibilities.

I believe that the growth in DOD budget and contracts over the last several years, coupled with the complex operating environment in wartime, has placed the Department at increased risk for fraud waste, and abuse. Providing adequate oversight is a key element in mitigating this increased risk. The resource requirements to provide such oversight have been addressed in our March 31, 2008, report, “Department of Defense Inspector General Growth Plan for Increasing Audit and Investigative Capabilities, Fiscal Years 2008–2015.” If confirmed, I will continue to work to ensure that the DOD IG’s office has sufficient resources to carry out its oversight responsibilities.

Question. If confirmed, will you communicate any concerns that you may have about the adequacy of resources available to the Office of IG to Congress and this committee?

Answer. If confirmed, I will continue to communicate my concerns regarding the adequacy of our resource requirements.

Question. Some Federal agencies have reacted to limited IG resources by using contractors to perform some audit and investigative functions.

What is your understanding of the DOD IG’s role in determining whether the use of contractor resources to perform audit or investigative functions is appropriate?

Answer. For the audit function, the IG Act, section 4(b)(1)(B) establishes the authority of each IG to establish guidelines for determining when it shall be appropriate to use non-Federal auditors. In addition, section 4(b)(1)(C) of the IG Act states that the IG shall take appropriate steps to ensure that any work performed by non-Federal auditors complies with the standards established by the Comptroller General.

With regard to the criminal investigative function, it is considered inherently governmental and therefore contractors do not perform such functions.

Question. Under what circumstances, if any, do you believe that the use of contractor resources to perform such functions would be appropriate?

Answer. There is specific guidance in DOD Directive 7600.2 on when it is permissible to use contractor resources to perform audit functions. It specifically permits DOD components to contract for audit services when applicable expertise is unavailable, if augmentation of the audit staff is necessary to execute the annual audit plan, or because temporary audit assistance is required to meet audit reporting requirements mandated by Public Law or DOD regulation. However, the directive includes an approval process to ensure the appropriate use of non-Federal auditors and that they comply with the Government Auditing Standards issued by the Comptroller General of the United States.

Question. In recent years, the DOD IG has sought and obtained increased authority to issue subpoenas, carry weapons, and make arrests.

Do you believe that the authorities of the Office of IG and its agents are adequate in these areas, or would you recommend further changes in the law?

Answer. The DOD IG supports the National Procurement Fraud Task Force Legislation Committee June 2008 White Paper proposals to improve prosecution and adjudication of procurement crimes. The proposals to expand the authority of Inspectors General, to include expanded subpoena authority, will provide the IG community additional tools to conduct investigations and audits.

CIVILIAN PERSONNEL MANAGEMENT

Question. The DOD IG's office has operated under the NSPS since 2007.

If confirmed, how would you assess the effectiveness of NSPS in creating an accountable personnel system within the DOD IG's office?

Answer. Since the Defense Business Board is currently conducting an assessment to determine the overall effectiveness of NSPS, I am very interested in the results of the Board's review. While I agree with the overall concept of pay for performance, I am interested in finding out more about the system design and its impact on fairness and equity. The Board's assessment of the system should provide critical information as we plan our own review of our effectiveness in implementing NSPS throughout the DOD IG. We are entering our third year under NSPS and I believe that after this performance cycle, we will have enough information and trend data to conduct a comprehensive review of NSPS and determine its effectiveness as an integrated and accountable personnel system within the DOD IG. Therefore, if confirmed, I plan to direct such an internal review.

Currently, members of my staff are conducting a barrier analysis to determine if there are any implementation factors that lead to different outcomes for any of a broad spectrum of employee groups and categories. I am also keenly aware that there are trials and errors associated with the implementation of any new system and I want to ensure that we minimize the negative impact on our workforce; so we are continuously assessing and taking advantage of lessons learned.

Question. What experience have you had with personnel systems other than the general schedule and the senior executive service?

Answer. While my personal experience is limited to the General Schedule, I have a team of human resource professionals who have extensive experience with other personnel systems. I regularly confer with these professionals to ensure that as we implement the provisions under NSPS, we do so with a focus on fairness and equity, and a vision of improving both individual and organizational performance.

Question. What, in your opinion, are the strengths and weaknesses of alternative systems which link pay with performance?

Answer. As previously stated, I agree with pay for performance in concept. Those who perform the best should see rewards through higher pay. To achieve this result, it is imperative that performance management systems and the pay systems be linked in a way that is clearly transparent and easily understood by employees. Pay for performance systems work best where individual performance is valued and accurately measured. If implemented well, these systems reward and encourage superior performance. If not implemented well, these systems can discourage teamwork and can inadvertently de-link pay from performance if the system can be manipulated or the system design is flawed.

DOD FINANCIAL ACCOUNTING AND AUDITS

Question. The performance of mandatory statutory duties, such as the performance of financial audits, has consumed a growing share of the resources of the IG's office, crowding out other important audit priorities.

What is your view of the relative priority of financial audits, and the resources that should be devoted to such audits?

Answer. Financial audits will continue to be a high priority consistent with the President's Initiatives, the Secretary of Defense's top priorities, the Chief Financial Officers Act of 1990, and the Federal Financial Management Improvement Act of 1994. It is my understanding that the IG has received sufficient resources to conduct financial statement audits under the current departmental approach. However, as the Department improves audit readiness and the requirements for financial statement audits increase, a reevaluation may be necessary. If confirmed, I will work with the Department and Congress to ensure that the appropriate level of resources continues to be dedicated to financial audits. I will also seek to ensure that resources committed to financial audits do not come at the expense of other audit priorities.

Question. What is your view of the requirements of section 1008 of the National Defense Authorization Act for Fiscal Year 2002, regarding resources directed to the audit of financial statements?

Answer. Section 1008 directs the IG to significantly reduce the level of audit work when the Department has asserted that the financial statements are not reliable and do not meet accounting standards. This allows the IG flexibility to redirect audit resources to other areas within the Department. If confirmed, I will continue to work with the Department and Congress to ensure that the appropriate level of resources is dedicated to audit the Department's financial statements. As the level of audit readiness increases across the Department, we will focus more audit resources on those financial statements.

Question. Do you see any need for legislative changes to give the IG greater flexibility to target audit resources?

Answer. If confirmed, I will work with the Department and Congress to assess whether legislation in this area is appropriate.

Question. What is your view of the role of the DOD IG in evaluating and contributing to improvements made in the Department's financial management processes?

Answer. The role of the DOD IG is to serve as a catalyst for improvements in the Department's financial management processes. That role should be consistent with the Department's top priorities, and statutory requirements. If confirmed, I will ensure that the DOD IG continues this vital function.

OVERSIGHT OF ACQUISITION PROGRAMS

Question. Problems with procurement, acquisition, and the ability of the Department and the military departments to effectively oversee acquisition programs have called into question the capability of existing DOD oversight mechanisms.

What role, if any, do you believe the Office of the IG should play in achieving acquisition reform?

Answer. The role of the DOD IG is to serve as a catalyst for improvements in the Department's acquisition processes and contract management. That role should be consistent with the President's Initiatives, the Department's top priorities, and statutory requirements. If confirmed, I will ensure that the DOD IG continues this vital function.

Question. Over the last 15 years, the DOD IG has gone from having one auditor for every \$500 million on contract by DOD to one auditor for every \$2 billion on contract.

Do you believe that the DOD IG has the resources it needs to conduct effective oversight over the Department's acquisition programs?

Answer. If confirmed, conducting effective oversight over the Department's acquisition programs will be one of my top priorities in the IG office. The men and women of our Armed Forces, and our Nation's taxpayers, have a right to expect that the funds appropriated by Congress for defense acquisitions are being utilized with cost-efficiency and integrity.

Based on the information made available to me thus far, I am concerned that the audit resources of the IG have not kept pace with the growth in contract expenditures for defense acquisitions. I am also concerned that the current trend, if unchecked, will significantly increase the risk of fraud, waste, and abuse in acquisition programs. Therefore, if I am confirmed, it will be vital for the IG, the Department, and Congress to work together in a timely way to assess whether the IG has adequate resources to conduct this essential oversight.

Question. The DOD IG has played an important role in advising DOD and Congress on the sufficiency of management controls in the Department's acquisition programs and the impact that legislative and regulatory proposals could have on such management controls.

How do you see the DOD IG's role in this area?

Answer. The DOD IG has an important role in helping the Department to effectively and efficiently manage acquisition resources dedicated to the support of the Department's mission, and in accounting for the management of those resources to the taxpayer. If confirmed, I will ensure that the DOD IG continues its important advisory role.

OVERSIGHT OF DOD ACTIVITIES IN IRAQ AND AFGHANISTAN

Question. What is your understanding of the responsibilities and activities of the Office of the DOD IG in investigating and preventing fraud, waste, and abuse in the course of DOD operations in Iraq and Afghanistan?

Answer. The DOD IG has, in accordance with its legislatively mandated mission, conducted audits aimed at identifying and preventing fraud, waste, and abuse of funds appropriated to the DOD for its operations in Iraq and Afghanistan. In theater, we are looking at the planning and execution of contracts in support of the operations of coalition forces. The purpose of these reviews is to determine that the

forces are receiving the right equipment and support to conduct successful operations. We are also looking at the accountability of equipment provided to coalition forces, contractors, and the Iraq and Afghan security forces. Additionally, audits are also being conducted in the continental United States (CONUS) on contracts awarded and funds expended in the United States that provide significant resources to support the warfighter, for military services materiel and equipment, and for other purposes in Iraq, Afghanistan, and in Southwest Asia.

The Defense Criminal Investigative Service (DCIS), the law enforcement arm of the DOD IG, and its military criminal investigative counterparts, in particular the U.S. Army Criminal Investigative Command (Army CID), investigate major frauds, corruption, thefts, and other compromises of DOD assets in Afghanistan, Iraq, and other countries in that theater. Currently, 13 DCIS agents and one administrative specialist are deployed to Iraq, Afghanistan, and Kuwait, collocated with Army CID, to conduct operations and investigations that primarily involve procurement fraud and public corruption. In addition, the DCIS European office and DCIS CONUS offices, along with the investigative partners (e.g., FBI), continue to investigate Iraq-related matters and travel into theater to conduct investigative operations, such as gathering evidence and conducting interviews, when crimes are reported. However, the bulk of DCIS's investigative activities occur in CONUS where corporate headquarters of DOD contractors, key evidence, and Department of Justice prosecutorial support are located.

Also, DCIS is a participant in the International Contract Corruption Task Force, a formalized partnership between Federal agencies to investigate and prosecute cases of contract fraud and public corruption related to U.S. spending in Iraq. The Task Force has established a Joint Operations Center specifically to formally coordinate investigations and develop a criminal intelligence capability to successfully prosecute fraud. DCIS has dedicated a special agent to the Joint Operations Center on a full-time basis.

If confirmed, and in keeping with the IG Act, I will ensure that the DOD IG continues to focus oversight efforts to investigate and prevent fraud, waste, and abuse of U.S.-provided resources for reconstruction and other purposes in Southwest Asia.

Question. If confirmed, what changes, if any, would you plan to make to the DOD IG's oversight activities in Iraq and Afghanistan?

Answer. If confirmed, I would ensure that DOD IG activities in Southwest Asia remain a top priority. I will also assess the current level of oversight to ensure that adequate resources are being devoted to this mission and that those resources are being allocated appropriately.

Question. If confirmed, what would be your goals with respect to the oversight, audit, and investigation of ongoing U.S. activities in Iraq and Afghanistan?

Answer. If confirmed, it is my goal to ensure that the oversight provided by the DOD IG of ongoing DOD activities in Iraq and Afghanistan is consistent with the responsibilities in the IG Act and is sufficient to provide assurance to Congress, the Secretary of Defense, and to both the American taxpayer and the warfighter that funds supporting DOD activities are expended appropriately and effectively.

Question. The SIGIR and the SIGAR have jurisdiction over contracts for the reconstruction of Iraq and Afghanistan. However, the SIGIR and the SIGAR do not have jurisdiction over contracts to support our troops in Iraq and Afghanistan.

What role do you believe the DOD IG should play in the oversight, audit and investigation of such contracts?

Answer. The DOD IG office should play an active role in ensuring stewardship of taxpayers' dollars and effective contract support for our troops through diligent oversight of the contracting function. This would include audits, inspections, and investigations, as required. Also, we chair the Southwest Asia Joint Planning Group, which is a forum for oversight agencies to coordinate audit efforts in Southwest Asia.

Question. Do you believe that a significant on-the-ground presence in Iraq is necessary to perform this role?

Answer. The DOD IG has expanded its presence in Southwest Asia, from 16 permanent positions in September 2008 to 30 permanent positions in June 2009, with plans to add an additional 6 permanent positions, for a total of 36. We now have offices in Iraq, Afghanistan, Kuwait, and Qatar. As the draw down in U.S. troops in Iraq proceeds, we must continually assess personnel needs based on the nature and scope of DOD operations and adjust our on-the-ground presence as appropriate.

Question. What is the relationship of the DOD IG to the SIGIR and the SIGAR?

Answer. See responses to "Q." and "R." under the previous section regarding "Relationships."

OVERSIGHT OF MEDICAL FUNCTIONS, INCLUDING OUTPATIENT ADMINISTRATION AND
HEALTH CARE FRAUD

Question. Reports of medical cases from military treatment facilities involving tragic outcomes and allegations of medical malpractice have raised questions about the adequacy of existing reporting, investigatory, and readiness systems within the Defense Health Program and military treatment facilities. The ability of those outside the military medical system to fairly evaluate individual cases and overall quality of care is affected by such factors as the tort claim laws and adversarial litigation against the United States, reliance on privileges from the release of documents and information associated with such litigation and separate quality assurance systems, patient privacy requirements, and concern about the reputations of individual providers. In 2007, deficiencies in the housing and administration of severely injured soldiers and Marines in a medical hold status at Walter Reed Army Medical Center raised questions about the adequacy of oversight into the care of outpatients and members involved in the disability evaluation system. In 2008, a Federal judge found that DOD's health care program had been cheated out of \$100 million due to payment of fraudulent health care claims in the Philippines.

Do you have any views about the role the DOD IG should play in improving visibility into and objective assessments of the quality of care provided through the military medical system?

Answer. I believe the DOD IG has a major role to play in ensuring that the military servicemembers and their dependents should receive the health care they and their families have a right to expect. Accordingly, the DOD IG has identified healthcare as a major management challenge in the most recent DOD Agency Financial Report as well as the last DOD IG Semiannual Report to Congress. In particular, we noted that the frequency and duration of military deployments further stresses the military health system in both the active and Reserve components. If confirmed, I will ensure that the DOD IG continues to provide the independent review and oversight necessary of the military health system. Oversight is needed in several areas including cost containment, quality of care, access to care, and medical readiness.

The DOD IG audit component plays a defined role in quality areas. By defined, I mean that the audit component focuses on processes that affect or are indicators of quality of care without directly evaluating the professional opinion of health care providers. However, DOD IG auditors are involved in issues such as credentialing of medical staff, the reporting of adverse medical events, patient safety, and utilization management that improve systemic effectiveness and increase the visibility of quality of care. In addition, much of the DOD IGs work on cost, access, and readiness also impacts medical quality. For example, work in the medical fraud area will help free up resources that can be used to provide needed health care and will help ensure that qualified physicians are providing care to DOD beneficiaries. Additionally, audits of medical equipment used to support operations in Southwest Asia and healthcare provided by military treatment facilities to contractors in Southwest Asia will assist the network supporting our combat medical system and identify additional resources that will allow for more efficient care to our wounded warriors.

As Acting IG, I have directed the expansion of the DOD IG's coverage of healthcare quality issues. Our Inspections and Special Plans and Operations groups bring a focus on health care quality issues. For example our inspections staff has looked at issues to improve the transition from the Military Health System to the Department of Veterans' Affairs (VA) system. DOD and VA should be working hand-in-hand to ensure that the transition between the DOD and VA health care systems is seamless. DOD should work with VA to ensure that the best possible treatment and care continues for veterans throughout recovery and in some cases, throughout the life of the veteran.

Question. What resources and expertise does the DOD IG currently have—or lack—to play a more prominent role in assessing the performance of health care providers, including identifying and preventing health care fraud against the DOD?

Answer. We have limited resources in our audit and investigative components that address health care fraud. Accordingly, we have leveraged our resources and have jointly worked with the Office of the U.S. Attorney, Western District of Wisconsin, on the \$100 million Philippine healthcare fraud case that resulted in a successful prosecution. To help maintain our expertise, a number of the audit staff have become Certified Fraud Examiners. DCIS possesses significant expertise in the investigation of health care fraud. Prior to September 11, 2001, DCIS devoted greater resources to these types of investigations. Currently, health care fraud investigations comprise about 9 percent of the 1800+ DCIS cases in our inventory. I recognize the importance of protecting America's warfighters and families from poor quality

of care and fraudulent activity and I remain committed to pursuing these audits and investigations.

INTELLIGENCE

Question. What is the role of the DOD IG with regard to intelligence activities within DOD?

Answer. The IG, through the Deputy IG for Intelligence, has responsibility for oversight of DOD intelligence activities and components as identified in DOD Directive 5240.01, "DOD Intelligence Activities," dated August 27, 2007. These include all DOD components conducting intelligence activities, including the National Security Agency/Central Security Service, the Defense Intelligence Agency, the military department intelligence and counterintelligence activities, and other intelligence and counterintelligence organizations, staffs, and offices, or elements thereof, when used for foreign intelligence or counterintelligence purposes.

Other organizations and components under the IG's oversight not specifically identified in DOD Directive 5240.01 include the Office of the Under Secretary of Defense for Intelligence (USD(I)), the National Reconnaissance Office, and the National Geospatial-Intelligence Agency. Responsibilities and functions of the IG as outlined in DOD Directive 5106.01, "Inspector General of the Department of Defense," include the responsibility to audit, evaluate, monitor, and review the programs, policies, procedures, and functions of the DOD Intelligence Community to ensure that intelligence resources are properly managed. The DOD IG performs an oversight and coordination role through the Joint Intelligence Coordination Working Group (JIOCG). The JIOCG is a DOD working group chaired by the Deputy Inspector General for Intelligence and includes representatives from the Service audit agencies, military department IGs, and the IGs of the Defense Intelligence Agencies. The primary goal of the JIOCG is to avoid duplication of effort and enhance coordination and cooperation among IGs and Auditors General inside the DOD, and promote information-sharing among IGs whose functions include audits, inspections, evaluations, or investigations of their respective departments and agencies.

Question. What is the relationship of the DOD IG to the Special Assistant to the Secretary of Defense for Intelligence Oversight?

Answer. DOD Directive 5106.01 requires that intelligence-related actions be coordinated, as appropriate, with the Assistant to the Secretary of Defense (Intelligence Oversight) (ATSD(IO)) to determine respective areas of responsibility in accordance with DOD Directive 5148.11, "Assistant to the Secretary of Defense for Intelligence Oversight," dated May 21, 2004. (DOD Directive 5148.11 contains similar language for the ATSD(IO) to coordinate with the IG, as appropriate.) I am advised that the ATSD(IO) is a charter member of the JIOCG, and that the IG has a long history of coordination and cooperation with the ATSD(IO).

Question. What is the relationship of the DOD IG to the IG of the Office of the Director of National Intelligence (DNI)?

Answer. The DOD IG's primary relationship with the DNI IG involves participation in the Intelligence Community (IC) IG Forum. The IC IG Forum promotes information-sharing among the IGs of the departments and agencies of the IC whose functions include audits, inspections/evaluations, or investigations of their respective departments and agencies. The IC IG Forum also strives to avoid duplication of effort and enhance effective coordination and cooperation among IC IGs. The DNI IG chairs the IC IG Forum.

In addition to the IC IG Forum relationship, the DOD IG participates in various projects and initiatives undertaken by the DNI IG. The DNI IG also coordinates with the Office of the Deputy IG for Intelligence on all ongoing projects relating to DOD organizations and activities. The DNI IG is an Ex-Officio member of the JIOCG.

Question. What is the role of the DOD IG with respect to detainee matters?

Answer. The DOD IG has statutory responsibility for oversight that extends to oversight of detainee and interrogation matters. Consistent with that responsibility, the IG issued two final reports regarding detainee abuse.

Question. What is the role of the DOD IG with respect to interrogation matters?

Answer. Please see my answer to the previous question.

INVESTIGATION INTO ALLEGATIONS INVOLVING DOD PUBLIC AFFAIRS OUTREACH PROGRAM

Question. On January 14, 2009, the Office of the IG issued a report on its examination of allegations involving the DOD public affairs outreach program. On May 5, 2009, the report was withdrawn, due to inaccuracies in data and methodology, and insufficient evidence to support the findings of the report.

What was your role in the issuance and withdrawal of this report?

Answer. Shortly after the report was issued on January 14, 2009, I became aware of inaccuracies in the data concerning Retired Military Analyst (RMA) relationships with Defense contractors that appeared in Appendix K and elsewhere in the report. The discovery of those inaccuracies resulted in my decision to initiate an independent internal review of the report and its supporting documentation.

The report was reviewed by two DOD IG components, the Office of the Assistant IG for Audit Policy and Oversight (APO), and the Quality Assurance, Policy and Electronic Documentation Division from the Office of Auditing. The APO review dated May 1, 2009, and the Auditing review of April 29, 2009, both came to the same conclusions and determined that the evidence compiled was insufficient to support the findings and conclusions of the report. As a result, both recommended that the report be withdrawn.

I concurred with those recommendations and on May 5, 2009, directed that the report be withdrawn.

Question. What is your assessment of the problems that led to the withdrawal of this report?

Answer. The internal reviews concluded that the report did not meet accepted quality standards for an IG work product. They found that the methodology used to examine the relationships of RMAs with Defense contractors such as searches of public websites would not reasonably yield evidence needed to address the issue that the outreach program conveyed some financial advantage to RMAs who participated in the program. Additionally, the reviews noted that the findings relied, in part, on a body of testimonial evidence that was insufficient or inconclusive. In particular, former senior DOD officials who devised and managed the outreach program refused requests for an interview. Furthermore, the judgmental sample of RMAs interviewed was too small—7 out of 70 RMAs—to allow that testimonial evidence to be used to support conclusions.

Question. In your view, are the problems that led to the withdrawal of this report unique to a single investigation, or are they symptomatic of broader problems in the Office of the IG?

Answer. I believe the circumstances involved in this report are unique. In this particular case, the group responsible for conducting this review was comprised of personnel from different DOD IG departments. As a result, competing priorities and lack of clearly defined procedures and objectives resulted in a product that, based upon internal review, did not meet accepted quality standards.

Question. What steps have you taken to address these problems, in your capacity as Acting IG? What additional steps do you plan to take, if confirmed?

Answer. Recommendations contained in the internal reviews will be implemented by the Assistant IG for Inspections and Evaluations to include the:

- Development and establishment of formal internal quality controls for ensuring report accuracy prior to draft report issuance;
- Development and establishment of written policies and procedures for internal controls of the inspection and evaluation process and work, in order to provide reasonable assurance of conformance with the PCIE/Executive Council on Integrity and Efficiency Quality Standards for Inspections, January 2005, the “Blue Book.”

I also directed on May 28, 2009, a Special Administrative Review that is being headed by the Deputy IG for Intelligence. That review will examine a variety of issues, such as:

- Can findings be made regarding the structure and policies that governed the Public Affairs Outreach Program and the type of access given to RMAs?
- Can judgments be made, or are there lessons learned, regarding the establishment of a similar program in the future?

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the IG of DOD?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

DEPARTMENT OF DEFENSE INSPECTOR GENERAL RESOURCING

1. Senator MCCAIN. Mr. Heddell, do you believe that the Department of Defense (DOD) Inspector General's (IG) office has sufficient resources—in qualified personnel and funding—to carry out its investigative and auditing functions?

Mr. HEDDELL. The resource requirements to carry out our oversight functions are addressed in the DOD IG March 31, 2008, report, "DOD IG Growth Plan for Increasing Audit and Investigative Capabilities, Fiscal Years 2008–2015."

The growth in DOD budget and contracts over the last several years, coupled with the complex operating environment in wartime, has placed the Department at increased risk for fraud waste, and abuse. Providing adequate oversight is a key element in mitigating this increased risk, and the personnel and funding levels identified in our growth plan were formulated with this in mind.

We have received support from both the Congress and the Department in resourcing the growth plan. The increase in resources in fiscal year 2008 and fiscal year 2009 has allowed us to increase personnel; establish new offices to meet mission requirements; and expand our permanent presence in Southwest Asia. If confirmed, I will continue to work to ensure that the DOD IG's office has sufficient resources to carry out its oversight responsibilities.

2. Senator MCCAIN. Mr. Heddell, what do you consider to be the major challenges you will face, if confirmed, in ensuring that the IG's office is fully capable of timely performing its responsibilities?

Mr. HEDDELL. The DOD IG faces significant challenges related to both our workforce and the complexity of our work. Among the human capital challenges are the retirement of experienced senior leadership and developing succession planning and retention within a highly competitive environment for the audit professionals. Further challenges are identified in our Semiannual Report to Congress and some of those challenges involve conducting audits and investigations in a combat environment as well as oversight involving highly technical subjects, such as weapons acquisitions and cyber security.

As Acting IG, I initiated the development of a Human Capital Strategic Plan which has as its goals to develop: (1) world class leaders, (2) a mission ready workforce that is fully engaged, (3) a culture that positively impacts the public trust, and (4) integrated talent management. Strategy Development Teams have been established and charged with developing, and monitoring the implementation of, strategies that support the achievement of the agency's human capital goals.

I am also concerned that we allocate resources appropriately. In this regard, I recently directed an increase in the staff that conducts senior official investigations, military reprisal investigations, and civilian reprisal investigations from their current level of 35 to 57 personnel.

In some very important respects we have not been timely in responding to requests from Congress and the Department. If confirmed, I will ensure that we continue to improve interaction with congressional members and staff to better define and scope reviews that are responsive and have realistic timelines.

FINANCIAL AUDITING IN THE DEPARTMENT OF DEFENSE

3. Senator MCCAIN. Mr. Heddell, in April 2009, the head of the Financial Improvement and Audit Readiness (FIAR) Plan indicated that it took a total of 300 auditors to complete the audit of the Army Corps of Engineers. There were 200 auditors on site at one time. An audit of the Defense Information Systems Agency required 67 people. Given that the Army Corps of Engineers has \$54 billion in as-

sets and liabilities, it is unimaginable how many auditors it will take to complete an audit of DOD with a total of \$3.8 trillion in assets and liabilities. The head of the FIAR Plan was a former audit partner at Price Waterhouse Coopers, and she believes that DOD Office of the IG (DOD OIG) doesn't have the capability or audit expertise to conduct an audit of the entire DOD. What is the current capability of your audit staff in performing a financial audit for DOD?

Mr. HEDDELL. The DOD IG currently has the expertise and capacity with the assistance of independent public accountants (IPA) firms to audit those segments of DOD whose financial statements are audit ready. The audit-ready segments include the USACE and two trust fund accounts that represent approximately 38 percent of the assets and liabilities reported on the DOD Agency-wide Financial Statements. The USACE audit was conducted with the assistance of an IPA firm and DOD IG provided the oversight required by audit standards and issued the audit opinion. The financial statement audits of the Military Trust Fund and Medicare Eligible Retiree Health Care Fund are both contracted with IPA firms and overseen by DOD OIG. However, given the wide range of audit responsibilities we currently have, the sheer number of auditors that would be needed to audit the financial statements of the entire Department precludes the DOD IG from conducting these audits without contractor assistance. Based on the FIAR plan estimates, current audit efforts, and known future audits, we estimate that by the year 2018, we may need at least 1,400 auditors (DOD IG auditors and IPA auditors) to audit the financial statements of the entire Department. This estimate does not include other audits of smaller components not tracked by the FIAR. Currently, the Defense Business Operations Directorate of the DOD OIG has approximately 300 auditors on staff, not nearly the number needed for the audits included in the FIAR. We recognized this issue in fiscal year 2003 and determined at that point the DOD IG would need to contract IPA firms to complete this work. Since fiscal year 2005, we have been effectively utilizing this approach and providing the necessary oversight to the IPA firms to meet audit standards.

4. Senator MCCAIN. Mr. Heddell, to what extent is the DOD OIG staffed with people who have sufficient experience in performing financial audits?

Mr. HEDDELL. DOD IG does have the necessary experience to conduct financial statement audits. In developing our audit approach in 2003, the DOD IG realized it would take both government auditors with extensive knowledge of DOD's complex financial management operations and numerous IPA firms with financial statement expertise to audit the DOD Financial Statements. The issue we are confronted with is the volume of auditors needed to complete these large-scale audits within Congressionally-mandated timeframes. Even if we were to decide today that we should hire additional auditors to complete these audits, there would not be a sufficient pool of experienced auditors to pull from. The best option is for the DOD IG to hire and oversee IPA firms to complete these audits. This option gives us not only the flexibility of expanding and contracting the workforce based on demand, but also allows the DOD IG to maintain responsibility over the audit work that is being done so all of that work can eventually be rolled into a DOD Agency-Wide opinion.

5. Senator MCCAIN. Mr. Heddell, what is your long-term plan for staff in that regard, i.e., to what extent does the OIG intend to ramp up its auditing capability by the 2017 deadline?

Mr. HEDDELL. The DOD IG each year reviews its financial statement audit strategy including the progress that DOD is making to improve its financial management and move toward auditability. DOD IG recognizes the financial statements are by-products of having well defined financial management processes and procedures. Continued improvements in DOD financial management including enhanced internal controls and processes will ultimately lead to DOD producing financial information that is reliable and statements that are auditable. At this time, DOD IG is devoting a significant portion of its resources to auditing various internal controls and financial processes in the Military Department's and a few agencies. These audits provide an in-depth review of the entity's financial operations and allow us to make recommendations that, once fully implemented, will significantly improve DOD financial management. As DOD implements our recommendations and further improves its financial management operations, the Department will become more auditable. Consequently, the DOD IG will shift its resources to auditing the financial statement rather than focusing on the processes that produced the financial statements. The DOD IG has a growth plan that will increase the staff by 34. That plan, if funded, will allow us to grow as needed to support the large contracting effort.

6. Senator MCCAIN. Mr. Heddell, within a reasonably foreseeable period, will the DOD OIG be capable of conducting the audit for DOD or would DOD be better served by having independent external auditors conduct the audit?

Mr. HEDDELL. The current plan for the DOD IG does not include the DOD IG conducting the DOD Agency-wide financial statement audit without contracting with multiple IPA firms. Our experience has shown that using IPA firms to perform much of the financial statement audit work under DOD IG oversight is an efficient and effective way of accomplishing this challenging task. The current DOD IG strategy is for our auditors to oversee multiple IPA firms that would conduct the various financial statement audits making up the DOD Agency-wide financial statement audit. This approach allows us to use our current and forecasted audit resources to audit the DOD financial statements and meet our other mission requirements efficiently and effectively.

HEALTH CARE FRAUD

7. Senator MCCAIN. Mr. Heddell, you indicated in your response to the committee's advance policy questions that you were involved in investigating the recent case involving \$100 million in fraudulent claims against the TRICARE program in the Philippines. What is your assessment of the extent of potential fraud and abuse on the Department's \$47 billion a year health care program?

Mr. HEDDELL. The Defense Criminal Investigative Service (DCIS), the criminal investigative arm of DOD OIG, conducted the referenced investigation. As a result of DCIS' efforts, Health Visions Corporation was ordered to liquidate assets and pay over \$101 million in fines and penalties. Thomas Lutz, Health Vision's chief executive officer, was sentenced to 60 months incarceration and was ordered to pay fines in excess of \$99 million. At present time, this criminal judgment represents the single largest TRICARE-related recovery in the history of the Department of Justice (DOJ).

It is difficult to estimate the extent to which fraud and abuse impact the Department's health care program; however, Americans spend more than \$1 trillion each year on health care, and according to the Federal Bureau of Investigations (FBI), 3 to 10 percent of total public and private health care program expenditures consist of fraudulent billings (FBI Financial Crimes Report to the Public, Fiscal Year 2007).

If confirmed as IG, I will continue to dedicate resources to countering fraud, waste, and abuse impacting the TRICARE system.

8. Senator MCCAIN. Mr. Heddell, is this an issue that has received appropriate management attention within the Department and if not, what would you propose to do differently if confirmed as the IG?

Mr. HEDDELL. As previously mentioned, Audit and Investigative components within the DOD IG devote resources to counter fraud that impacts the TRICARE program. IG representatives continue to work closely with TRICARE's Management Activity to strengthen program controls in an attempt to significantly reduce waste and abuse.

Additionally, representatives from the DOD IG and the DOJ continue to work closely with the Assistant Secretary of Defense for Health Affairs in an attempt to strengthen TRICARE program controls.

DOD management is focused on the challenge of delivering improved health care while attempting to control costs. Preventing and detecting the impact of health care fraud on the TRICARE system will continue to be a major part of this challenge. If confirmed as IG, I will make every effort to ensure the DOD IG is capable of meeting this significant challenge.

[The nomination reference of Gordon S. Heddell follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
June 1, 2009.

Ordered. That the following nomination be referred to the Committee on Armed Services:

Gordon S. Heddell, of the District of Columbia, to be Inspector General, Department of Defense, vice Claude M. Kicklighter, resigned.

[The biographical sketch of Gordon S. Heddell, which was transmitted to the committee at the time the nomination was referred, follows:]

SUMMARY OF QUALIFICATIONS

Over 8 years experience as a Presidentially appointed, Senate confirmed Inspector General leading Inspector General offices of two Cabinet level departments within the Executive branch. Proven record of excellence in leading and implementing programs to make government more open, transparent and accountable. Over 27 years of experience in executive level management positions; became a member of the Senior Executive Service in 1991.

EXPERIENCE

Acting Inspector General, Department of Defense, 2008 – present

- Manage the audit, investigative, and inspections activities in the largest Federal office of Inspector General with a workforce of over 1,600 and a yearly budget of \$268 million.
- Provide oversight to prevent fraud, waste and abuse in the over \$600 billion appropriated to the Department of Defense. • Leader in the Inspector general community as a member of the Executive Council of the Council of Inspectors General for Integrity and Efficiency (CIGIE) and Chair of the CIGIE Committee on Information Technology. • Direct oversight efforts that helped to achieve \$1 billion in monetary benefits, \$450 million in Investigative recoveries (FY 2008). • Communicate the results of oversight efforts to the Secretary and Deputy Secretary of Defense and other senior DoD civilian and military leaders as well as to the Congress.

Inspector General, Department of Labor, 2001– present

- Direct audits, evaluations, and investigations to promote the effectiveness, efficiency, economy and integrity of all Department of Labor (DOL) programs. • Manages oversight efforts that, since 2001, have identified over \$593 million in questioned costs; achieved \$1.5 billion in Investigative recoveries; resulted in 3,180 convictions. • Successfully led Investigative efforts to combat labor racketeering in the workplace and fraud against the Foreign Labor Certification program. • Led audit efforts to identify weaknesses in the oversight of the Mine Safety and Health Administration and ensure miner safety.

United States Secret Service

Assistant Director, Office of Inspection, Senior Executive Service (SES) III, 1998– 2001; Deputy Assistant Director, Office of Inspection, 1989–1991

- Managerial oversight for Internal affairs investigations and office inspections worldwide.
- Assess the quality of management, the effectiveness of operations and the adherence to policies, regulations and procedures within field offices and divisions of the Secret Service.
- Managerial oversight for investigations of a highly sensitive nature involving employee misconduct, and investigations and surveys involving the role of the Secret Service in major criminal cases.

Special Agent in Charge, Vice Presidential Protective Division, SES III, 1995–1998;

Deputy Special Agent in Charge, Vice Presidential Protective Division, SES III, 1993–1995

- Managed the physical protection of the Vice President of the U.S. and his family. • Daily

interaction with the Vice President, his family, and other high-ranking U.S. officials and foreign government representatives. • Responsible for many classified and sensitive security enhancements at the Vice Presidential Residence Complex and USSS Command Center.

- Directed the design and implementation of security measures needed for major Presidential and Vice Presidential events to include Inaugurations, Economic Summits, United Nations Anniversaries, and International Olympic events.
- Directed the implementation of security measures at locations where a significant hostile foreign military or terrorist threat existed.
- Traveled extensively outside the United States, conducting sensitive negotiations with senior foreign government and military officials in a variety of countries to include Russia, China, Israel, Egypt, and Japan.

Deputy Assistant Director, Office of Training, SES III, 1991-1993

- Principal executive responsible for the curriculum, methodology and content of training programs for over 4,800 Secret Service employees.
- Managed budget allocation, on-going master plan design, renovation, and utilization and program justification for the Service's 493 acre, multi-million dollar, state-of-the-art training academy.

Assistant Special Agent In Charge, Philadelphia Field Office, 1987-1989

Assistant to the Special Agent In Charge, Washington Field Office, 1985-1987

Assistant Special Agent In Charge, Office of Administration, 1982-1985

Special Agent, 1971-1982

Chief Warrant Officer, U.S. Army Helicopter Pilot, 1966-1970

MAJOR ACCOMPLISHMENTS

- Presidential Meritorious Rank Award (1997)
- Numerous Outstanding Performance Awards
- Selected as one of five most outstanding graduates in the 80 year history of Festus, MO Public High School (1996)
 - Woodrow Wilson Public Service Fellow (1994 - 2000)
- Creator of major partnerships with two inner city Washington, D.C. public Schools (1993 - 1998)
 - Directed the study to identify and procure the Secret Service's first high capacity semiautomatic 9mm handgun
 - Administrative Coordinator for the Summer Olympics in Los Angeles, CA (1984)
 - Graduated "First" in Treasury Federal Law Enforcement Training Academy Class (1971)

EDUCATION AND TRAINING

University of Missouri, B.A., Political Science
 University of Illinois, M.A. Legal Studies
 The Wharton School, University of PA, Effective Executive (1989)
 The Brookings Institute, Executive Seminars in Practical Leadership and the U.S. Economy
 Executive Excellence, and Understanding Business Policy and Operations (1985 - 1989)
 University of Maryland, Center for Creative Leadership, extensive Law Enforcement, Public Safety,
 and Management Development Training (1971 - present)

References available upon request

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Gordon S. Heddell in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Gordon S. Heddell (nicknames: Gar, Gordie).

2. **Position to which nominated:**

Inspector General, Office of Inspector General, Department of Defense.

3. **Date of nomination:**

June 1, 2009.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

August 13, 1943; St. Louis, MO.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Married (but separated) to Jana K. (West) Heddell.

7. **Names and ages of children:**

Kerri E. Dudley, 33; Anthony S. Heddell, 30; Gordon W. Heddell, 28; Katie A. Heddell, 23.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.

University of Illinois (formerly Sangamon State University), Springfield, Illinois, Masters Degree, 1975.

University of Missouri, 1961-1965 and 1970-1971, BA Political Science.

Forest Park Community College, St Louis, MO, 1965-1966.

Washington University, St Louis, MO, 1965-1966.

Festus R-6 Public High School, Festus, MO, 1957-1961.

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Acting Inspector General, Office of Inspector General, U.S. Department of Defense, Arlington, VA, July 2008-Present.

Inspector General, Office of Inspector General, U.S. Department of Labor, Washington, DC, 2001-Present.

Assistant Director, Office of Inspection, U.S. Secret Service, Washington, DC, 1998-December 2000.

Entered U.S. Secret Service in September 1971.

10. **Government experience:** List any advisory, consultative, honorary, or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Positions with the U.S. Secret Service:

Special Agent in Charge, Vice Presidential Protective Division, 1995–1998.

Deputy Special Agent in Charge, Vice Presidential Protective Division, 1993–1995.

Deputy Assistant Director, Office of Training, 1991–1993.

Deputy Assistant Director, Office of Inspection, 1989–1991.

Assistant Special Agent in Charge, Philadelphia Field Office, 1987–1989.

Assistant to Special Agent in Charge, Washington Field Office, 1985–1987.

Assistant Special Agent in Charge, Office of Administration, 1982–1985.

Senior Special Agent, Liaison Division, 1981–1982.

Senior Special Agent, Vice Presidential Protective Division, 1976–1981.

Special Agent, Springfield Field Office, 1971–1976.

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Professional: International Association of Chiefs of Police, Office held (none), 1990–2006 (intermittent).

Civic and Charitable: Created active partnership with Dunbar High School and Deal Junior High School to Assist Washington, DC, Inner city public schools, 1993–1998, Office held (none)

Fraternal: Delta Upsilon Fraternity, Office Held (Vice President) 1964–1965, Member: 1962–Present.

Alumni Association: University of Illinois, Springfield, IL, Office held (None), 1980–Present (Intermittent).

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

None.

14. **Honors and Awards:** List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

Presidential Meritorious Rank Award (1997).

Woodrow Wilson Public Service Fellow (1994–2000).

Numerous Outstanding Annual Performance Ratings—U.S. Secret Service.

Graduated “First” in Treasury Federal Law Enforcement Training Academy Class (1971).

United States Army: Awarded Aviator Wings, Good Conduct Medal and Army Commendation Medal.

Outstanding Graduate Award—Festus High School (1996).

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

Journal of Public Inquiry, Editor in Chief, July 2008–Present (a publication of the Inspectors General of the United States); article in Journal (c) 2004 regarding labor racketeering and organized crime.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

As the acting Department of Defense Inspector General:

Speeches:

“All Hands Audit Employee Meeting” in the Doubletree Hotel, Arlington, VA, on October 14, 2008.
 Fiscal Law Course at Wallace Theater, Fort Belvoir, VA, on January 13, 2009.
 National Conference Center, Lansdowne, VA, January 26, 2009.
 Emil Kabban’s promotion ceremony, February 27, 2009.
 Colonel Donald F. Thompson retirement ceremony on March 2, 2009.
 Closing Remarks: Combatant Command and Joint IG Course at Fort Belvoir, VA, March 27, 2009.
 COCOM IG Conference on March 30, 2009.
 DOD IG employees at the Annual Awards Ceremony, May 7, 2009.
 Opening remarks at the Legion of Merit Award Ceremony for LTC John Taylor, May 28, 2009.
 Defense Acquisition University, June 2, 2009.
 Retirement ceremony of Thomas F. Gimble, June 3, 2009.

Hearing Statements:

Gordon S. Heddell Acting Inspector General Department of Defense before the Subcommittee on Defense Committee on Appropriations United States House of Representatives on “Department of Defense Outsourcing February 26, 2008.
 Gordon S. Heddell Acting Inspector General Department of Defense before the Senate Homeland Security and Governmental Affairs Committee on Expediency Versus Integrity: Do Assembly Line Audits at the Defense Contract Audit Agency Waste Taxpayer Dollars? September 9, 2008.
 Gordon S. Heddell Acting Inspector General Department of Defense before the House Oversight and Government Reform Committee on “Maintenance of Electrical Systems in Facilities Occupied by Military and Contractor Personnel in Iraq”, July 30, 2008.
 Gordon S. Heddell Acting Inspector General Department of Defense before the Senate Appropriations Committee on “The effectiveness of U.S. efforts to combat corruption, waste, fraud, and abuse in Iraq”, July 23, 2008.
 Gordon Heddell Acting Inspector General Department of Defense before the Domestic Policy Subcommittee of the Oversight and Government Reform Committee on “DOD’s experience with Circular A-76 competitions and the specific context of the A-76 competition which privatized Military Retired and Annuitant Pay functions, July 16, 2008.

As the Department of Labor Inspector General:

Speeches:

Los Angeles Audit Managers Conference, April 15, 2004.
 Awards Dinner—Monday, May 17, 2004.
 Managers Conference Philadelphia, PA, May 17, 2004.
 OLRFI All Hands Meeting, San Diego, CA, July 12, 2004.
 Managers Conference Phoenix, AZ, August 3, 2005, Leadership Accomplishments Dinner
 Closing Remarks Managers Conference, August 2005.
 Association of Government Accountants Philadelphia, PA, November 16, 2005.
 Welcoming Remarks by Gordon Heddell Inspector General, U.S. Department of Labor to PCIE, 2005.
 IG Forum at the National Academy of Public Administration, January 2006.
 AGA Speech, February 2, 2006.
 African-American History, February 27, 2006.
 Closing Remarks by Department of Labor Inspector General Gordon S. Heddell Inspectors General Symposium: Federal Employees’ Compensation Act (FECA) Program Building a Coordinated Approach to the IG Community’s FECA-Related Work, Wednesday, March 22, 2006.
 Managers Conference, Dallas Leadership Accomplishments Dinner, May 8, 2006.
 Opening Remarks, Gordon S. Heddell Inspector General OIG Leadership and Training Conference Dallas, TX, May 8, 2006.
 Managers Conference, August 2006.
 Steven Law Farewell Reception, 2007.
 Andrews Trucking Indictment, February 2007.
 Gordon S. Heddell Inspector General Managers’ Conference Washington, DC, Leadership Accomplishments Reception, May 19, 2008.
 Gordon S. Heddell Inspector General Managers Conference Washington, DC, May 20, 2008.
 Briefing to the PCIE.
 Peer Review Update and Training.

Speech, University of Illinois.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify before any duly constituted committee of the Senate? Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

GORDON S. HEDDELL.

This 8th day of June, 2009.

[The nomination of Gordon S. Heddell was reported to the Senate by Chairman Levin on June 18, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on July 10, 2009.]

[Prepared questions submitted to Dr. J. Michael Gilmore by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DUTIES

Question. What is your understanding of the duties and functions of the Director of Operational Test and Evaluation (DOT&E)?

Answer. In my view, the principal responsibility of the DOT&E is to ensure that the weapons and protective systems our men and women in the Military Services must depend on will work in combat. I believe every director must regard that responsibility as a special trust they assume.

More specifically, the duties of the DOT&E are covered by statute. I understand that, if confirmed, I would serve as the principal advisor to the Secretary of Defense and Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)) for all operational test and evaluation (T&E) within the Department.

I would formulate and implement policy for operational T&E and provide oversight of the operational testing of major defense programs, major automated information systems and other systems as I designate. I would be required to provide Congress an Annual Report summarizing operational T&E activities that includes comments and recommendations on operational T&E resources, facilities, and funding. In addition to the Annual Report, I would provide Beyond Low Rate Initial Production Reports, Early Fielding Reports for systems that are urgently needed and deployed before completion of initial operational testing, live-fire Reports, an Annual Report on Ballistic Missile Defense (BMD) and respond to requests from Congress. My duties would include responsibility for prescribing policies and procedures for the conduct of live-fire T&E and for monitoring, reviewing, and reporting on all operational and live-fire T&E within the Department. I would also be responsible for coordinating joint operational testing. I would review and provide recommendations to the Secretary of Defense on all budgetary and financial matters relating to operational and live-fire T&E, including test facilities. In recent years, the authorities of the DOT&E have been expanded to allow the assessment of the Ballistic Missile Defense System (BMDS), the testing of Information Assurance vulnerabilities, and oversight of Body Armor and other critical Force Protection equipment being provided to our deployed forces.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. I have 24 years of experience working with and for defense industry, the Defense Department, and the Congressional Budget Office (CBO) analyzing the key drivers of operational effectiveness and costs of defense programs. This experience, as well as my education and training in science and engineering, give me the requisite perspective and skills to provide Congress and the Secretary of Defense factual, accurate assessments of the operational testing and evaluation of our weapons systems, as well as objective recommendations derived from those assessments. Furthermore, my experiences with the Defense Department's Cost and Analysis Improvement Group and the CBO have given me a strong appreciation of the value of independent, objective analysis and reporting.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the DOT&E? If so, what are they?

Answer. If confirmed, I would increase my familiarity with the capabilities and limitations of the T&E infrastructure within the Department of Defense (DOD) and with the many programs that DOT&E oversees. I would establish productive and cooperative relationships with the USD(AT&L), the new Director, Developmental Test and Evaluation (D,DT&E), the new Director, Systems Engineering, the Director of Defense Research and Engineering (D,DR&E), the Director, Cost Analysis and Program Evaluation, the Director, Test Resource Management Center (TRMC), the Military Departments' Operational Test Agencies and the Service Acquisition Executives. I would visit test facilities and witness the conduct of operational testing and live-fire testing to increase my understanding of the complexities and difficulties inherent in conducting testing. I would work with the test community, the acquisition community, the Joint Staff, and the combatant commanders to help ensure effective and suitable weapons systems are provided as quickly as possible to the warfighter.

Question. Assuming you are confirmed, what duties and functions do you expect that the Secretary of Defense will assign to you?

Answer. If confirmed, I expect Secretary Gates would assign me all of the duties, functions, and responsibilities currently mandated by law and specified in the Department's directives for the position of DOT&E.

MAJOR CHALLENGES

Question. In your view, what are the major challenges that will confront the DOT&E?

Answer. I believe there are at least three important challenges that the DOT&E currently faces. First, the office must continue to strengthen the relationships it has established with rapid fielding organizations. Strong relationships with these organizations will enable DOT&E to provide oversight of and advice on testing that helps—not hinders—the fulfillment of their objectives to provide immediate help to our soldiers, sailors, marines, and airmen in the field. Second, to implement the Weapons System Acquisition Reform Act of 2009, DOT&E must establish a productive relationship with the new D,DT&E to assure that office is effective and robust. Third, DOT&E must help assure that adequate resources—both personnel and modern infrastructure—are available to the testing community to support the goals of the Reform Act, including its provisions regarding organizational conflicts of interest (OCIs).

Question. If confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I would review the results of the oversight that DOT&E has conducted of rapid fielding organizations and make adjustments to it, as necessary, in consultation with each organization's leadership. The extent to which DOT&E's oversight has improved each organization's ability to accurately and quickly characterize both the strengths and weaknesses of the capabilities they field will be key to determining any changes that may be needed. I would work with the D,DT&E to develop the practices that will institutionalize the Department's new policy for conducting integrated developmental and operational testing—that effort should provide a natural mechanism for ensuring that office is effective and robust. Finally, I would work with the USD(AT&L), the Under Secretary for Personnel and Readiness, the D,DT&E, the Director of the Test Resources Management Center, and the Director of Cost Assessment and Program Evaluation to assess resource needs for T&E as part of the development of the Future Years Defense Program (FYDP).

Question. What do you consider to be the most serious problems in the performance of the functions of the DOT&E?

Answer. The assessments that DOT&E prepares and the test planning in which it participates can be accomplished only if requirements for systems are realistic, relevant, and testable. A recent Defense Science Board Report identified deficient program requirements and inadequate systems engineering plans as major contributors to poor acquisition performance. Getting the requirements right and starting with a good systems engineering plan that is executable are essential for successful development and testing. Although DOT&E has implemented initiatives in this area, more should be done.

Question. If confirmed, what management actions and time lines would you establish to address these problems?

Answer. If confirmed, I plan to engage early in the requirements and acquisition processes to address the above issues. Early on, I would meet with the Joint Staff and the new Director, Systems Engineering to assess current practices and develop appropriate recommendations for change.

RELATIONSHIPS

Question. If confirmed, how will you work with the following:

- The Secretary of Defense.
- The Deputy Secretary of Defense.
- The Under Secretary of Defense for Acquisition, Technology, and Logistics.
- The Under Secretary of Defense for Personnel and Readiness.
- The Director of Defense Research and Engineering.
- The Assistant Secretary of Defense for Networks and Information Integration.
- The Inspector General of the Department of Defense.
- The General Counsel of the Department of Defense.
- The Service and Agency officials responsible for major acquisition programs.
- The Directors of the Services' Test and Evaluation organizations.
- The Joint Requirements Oversight Council.
- The Director of the Defense Test Resource Management Center.
- The Director of Developmental Test and Evaluation.
- The Director of the Joint Improvised Explosive Device Defeat Office.
- The Assistant Secretary of Defense for Health Affairs.

Answer. The Director's relationship with many of the foregoing individuals is described or defined in regulation or policy documents. If confirmed, I intend to follow those descriptions and develop strong working relationships with all these officials. Particular examples of how I would work with selected individuals include the following: To help implement the Weapon System Acquisition Reform Act of 2009, as well as to develop practices that institutionalize the conduct of integrated developmental and operational testing, I anticipate that I would be working particularly closely with the USD(AT&L), the new D,DT&E, the executives of the Service acquisition organizations, and the commanders of the Operational Test Agencies. I would also work with these individuals, as well as the Director of the Defense TRMC, the Director for Cost Assessment and Program Evaluation, the Under Secretary for Personnel and Readiness, and the Deputy Secretary of Defense, to assess resource needs for operational T&E during development of the FYDP. I would work with the Director of Cost Assessment and Program Evaluation to provide data on system reliability, availability, and maintainability, and any other data derived from operational testing needed to assist in the preparation of life-cycle cost estimates for ac-

quisition programs. I would work with the Director of the Joint Improvised Explosive Device Defeat Office to assist in conducting rapid testing confirming the effectiveness of concepts and systems for use in ongoing operations.

INDEPENDENCE AND OBJECTIVITY

Question. Congress established the position of DOT&E as an independent and objective evaluator of the performance of major systems. Report language accompanying the National Defense Authorization Act for Fiscal Year 1984 (P. L. 98-94), which was codified as section 139 of title 10, U.S.C., states that "the Director [is] to be independent of other DOD officials below the Secretary of Defense" and "not circumscribed in any way by other officials in carrying out his duties." In describing the Director's duties, the report also noted an expectation that the Director "safeguard the integrity of operational testing and evaluation in general and with respect to specific major defense acquisition programs."

Can you assure the committee that, if confirmed, you will be independent and objective in your evaluations, and that you will provide your candid assessment of Major Defense Acquisition Programs to Congress?

Answer. Yes. I believe the credibility and effectiveness of the organization depends upon both independence and objectivity. If confirmed, I assure you that I will be independent and objective in my evaluations and that I will provide candid assessments of the oversight I conduct to Congress.

Question. In your view, does the DOT&E have the necessary authorities under sections 139 and 2399 of title 10, U.S.C., and applicable departmental regulations to carry out the duties prescribed?

Answer. Yes.

Question. Section 2399 of title 10, U.S.C., establishes certain requirements regarding the impartiality of contractor testing personnel and contracted for advisory and assistance services utilized with regard to the T&E of a system. What is your view of these requirements?

Answer. I fully support the need for impartiality of testing personnel. Section 2399 bars personnel employed by a contractor involved in development or production of a system, from participating in the operational testing of that system. Further, it prevents such personnel from advising or providing assistance services, including planning and subsequent data analysis, for the operational testing and evaluation. The participation of contractors is only appropriate if they are specifically intended to be part of the long-term system support structure. Section 2399 allows for this exception. In my view, section 2399 allows the flexibility to properly structure operational testing and also properly provides for impartial contracted advisory and assistance service.

Question. How will you maintain independence from the often conflicting goals of the acquisition community and the mandates for necessary operational testing?

Answer. The DOT&E authorities and responsibilities for operational T&E and live-fire T&E set out in Title 10 USC, including direct reporting of assessments to Congress and the Secretary of Defense, are key to the office's ability to maintain its independence. If confirmed I will faithfully meet those requirements. Maintaining DOT&E as an independent organization with an independent budget is also essential.

TEST AND EVALUATION FUNDING

Question. Concern over long-term support for and viability of the Department's test ranges and facilities led to creation of the Defense TRMC in 2002 and a requirement for direct funding of T&E facilities.

In your view, how are these changes working to address funding and sustainability concerns at the department's test ranges and bases?

Answer. I do not now have insight to accurately evaluate how well these changes are working. I am aware, however, that the TRMC is responsible for determining the adequacy of the Service investment budgets for T&E infrastructure. I understand that the Director of the TRMC has generally, but not always, certified the adequacy of those budgets. The services have the responsibility within the Department's planning, programming, budgeting, and execution system to provide funding for T&E facilities. I understand that proposals have been made in the past to change where the budgeting authority resides. If confirmed, I will explore the need for additional changes in the methods the Department uses for managing its T&E facilities.

Question. Do you believe that the Department's T&E capabilities, including infrastructure and workforce, are adequately funded?

Answer. I do not now have sufficient insight into the details of the T&E budgets and current and projected needs for conducting T&E to make an informed assessment of the adequacy of current funding. I am concerned, however, that historical budget and policy trends, and increasing demands for testing, may have caused shortfalls in testing resources relative to needs. If confirmed, I would examine this issue carefully and work within the Department's planning, programming, budgeting, and execution system to assess the adequacy of funding for T&E and to develop alternatives for consideration as part of the preparation of the FYDP.

Question. Do you believe that the Department's T&E capabilities, including infrastructure and workforce, are adequate to perform the full range of T&E responsibilities of DOD weapons systems and equipment?

Answer. The DOT&E fiscal year 2008 Annual Report suggests that further investment is necessary to modernize T&E capabilities. More generally, I am concerned that historical budget and policy trends, and increasing demands for testing, may result in shortfalls in testing capabilities relative to needs. If confirmed, I would work within the Department's planning, programming, budgeting, and execution system to assess the adequacy of T&E capabilities and to develop alternatives for consideration as part of the preparation of the FYDP.

Question. What are your views about the importance of accurately projecting future test facility resource requirements and budgeting for these needs?

Answer. In my view, T&E needs should be accurately reflected in the TRMC's DOD Strategic Plan for T&E Resources. If confirmed, I will work to ensure early involvement of DOT&E in identifying these needs for inclusion in that Strategic Plan, and later in the T&E strategies and Master Plans prepared for individual programs. Accurately defining these resources is essential in ensuring a program is executable at inception. Such projections also support and justify Service planning, programming, and budgeting for T&E assets and are needed by DOT&E and other members of the test community in developing program alternatives for consideration during preparation of the FYDP.

Question. How will the sufficiency of investments in test resources and workforces be factored into your assessments and review of proposed test plans and schedules for acquisition programs?

Answer. If confirmed, I would ensure that adequate test resourcing was always a consideration in every test program and any shortfalls are identified in test documentation. My approval of Test and Evaluation Master Plans (TEMP) and Test Plans would be contingent upon the availability of adequate test resources. Should a test resource shortfall impose unacceptable limitations on test adequacy, I would ensure it was corrected or would objectively report on the inability to adequately test the system.

Question. How do you plan to evaluate and improve the operational testing workforce in DOD especially in light of the growing numbers of new technologies embedded in weapon systems and the desire to speed the acquisition and deployment of systems to the battlefield?

Answer. If confirmed, I will work with the Director, TRMC, and the Component Operational Test Agencies to evaluate workforce issues, including the adequacy of the size of the operational testing workforce and the skills resident in its members. Based on the results of that evaluation, I would make recommendations for consideration within the Department's planning, programming, budgeting, and execution system.

OFFICE OF THE DIRECTOR OF OPERATIONAL TEST AND EVALUATION

Question. How would you assess the adequacy of resources provided to the Office of the DOT&E given the missions and responsibilities of the office?

Answer. I am aware DOT&E has added personnel in response to its increasing workload. If confirmed, I would review the total responsibilities of the office in light of the recent acquisition reform legislation—including its provisions regarding OCIs—and the Secretary's direction to speed fielding of critical equipment to the combat forces. After this review, if additional personnel and funding are needed, I would work within the Department's planning, programming, budgeting, and execution system to address those needs.

Question. In your view, does the DOT&E have sufficient support from federally-funded research and development centers (FFRDCs) and other contractors to support designated missions?

Answer. I have not had the opportunity to familiarize myself with any deficiencies or other problems that DOT&E may be experiencing with contractor support. However, I understand from DOT&E's annual reports that its workload has been increasing. For example, the Secretary has delegated to DOT&E responsibility to pro-

vide oversight of the testing of critical equipment, such as body armor, being provided to our forces currently deployed in the field. The potential for increased workload within DOT&E to implement the Department's revised policies for integrated developmental and operational testing also exists because those policies require DOT&E to be involved earlier and more substantively in planning and monitoring testing. If confirmed, I will review DOT&E's current and projected workloads in each of its functional areas to determine if shortfalls in manpower exist that could be filled either by contractor support or government personnel. If shortfalls exist, I would consider whether additional contractor support would be the best method to fill them and what type of contractor support would be appropriate. However, with the consolidation of the Defense industrial base since the Cold War, I understand it has become increasingly difficult to identify contractors without either real or perceived OCIs.

Additionally, the provisions of the Weapon Systems Acquisition Reform Act regarding OCIs (which I strongly support) could make identifying such contractors even more difficult, requiring greater reliance on either government personnel or FFRDCs. Thus, in deciding on the best method to fill support shortfalls, I would need to consider the extent to which the manpower ceilings currently imposed by law on FFRDCs and increasing demand for using that constrained set of resources might limit the availability of FFRDC support to DOT&E.

Question. In your view, does the DOT&E's current workforce represent the correct mix between government and contractor personnel?

Answer. The Secretary has decided that the Department should increase its use of government personnel providing in-house expertise and rely less on contractors. Moreover, I understand the need for DOT&E to deal appropriately with real or perceived OCIs, which also affects the mix of government and contractor personnel appropriate for use by the office. If confirmed, I will review the balance among DOT&E's government personnel and its use of contractors and FFRDCs, in the context of the office's future workload, its need to deal appropriately with OCIs, and its need to have in-house, government expertise.

Question. Does the DOT&E need any special personnel authorities, such as those available to Defense Advanced Research Project Agency (DARPA), medical personnel, service academies, or defense laboratories, to attract, recruit, and retain the workforce needed to perform designated missions?

Answer. I am unaware of any special personnel authorities needed by DOT&E at this time. If confirmed, I will consider the potential need for such authorities in conjunction with reviewing DOT&E's needs for both contractor support and government personnel.

OPERATIONAL AND DEVELOPMENTAL TESTING

Question. What are your views on the appropriate point in concept development of a new acquisition program for incorporation of T&E planning and integration of testing requirements?

Answer. The T&E community should be involved with both the requirements community and the system developers during early stages of the Materiel Solution Analysis to develop an evaluation strategy that can be reflected in the request for proposals. These relationships should continue during technology development, with emphasis shifting to evaluation of competitive prototypes, refinement of T&E strategies, and review of technology readiness assessments. During this phase, detailed T&E activities should be planned, resourced, and documented in a TEMP that is reviewed and approved by both the USD(AT&L) and DOT&E.

Question. What steps, if any, do you believe the Department should take to ensure that testing takes place early enough in the program cycle to identify and fix problems before it becomes prohibitively time-consuming and expensive to do so?

Answer. If confirmed, I look forward to working with the acquisition community—in particular the new D,DT&E—to develop the practices needed to institutionalize the Department's guidance to conduct integrated operational and developmental testing. Conducting integrated testing as early as possible will foster earlier discovery and learning, and less costly correction of the deficiencies that are discovered. I also believe that implementing the provision in the Weapon Systems Acquisition Reform Act of 2009 requiring the D,DR&E to work with the D,DT&E to demonstrate technology readiness prior to making major program commitments (that is, before Milestone B) will reduce risks. If confirmed, I will seek opportunities to work with those two officials to assist them in developing the practices needed to implement the act's provision, including incorporating operational realism in testing conducted prior to Milestone B.

Question. Acquisition programs continue to complete developmental testing satisfactorily, but perform poorly on operational testing suggesting that developmental testing lacks sufficient rigor or realism to adequately characterize the technical performance of a system under test.

What are your views on the current relationship between developmental and operational testing?

Answer. Recent changes to testing policy require Integrated Testing, which is the collaborative planning and execution of testing, with independent evaluation of test data. I believe that with Integrated Testing, the operational test community can help add rigor and operational realism to developmental T&E. This will help make developmental testing a period of discovery and operational testing a period of confirmation.

Question. Do you believe there is value in involving the operational T&E community in providing input into developmental testing and, if so, at what point should that process begin?

Answer. I see tremendous value in involving the operational T&E community in both developmental testing and requirements generation. I applaud the recent Integrated Testing efforts the Department has initiated to make testing as seamless as possible throughout the acquisition process. It is my understanding that DOT&E played a key role in this initiative. The operational T&E community should help make early testing as realistic as possible, allowing identification and correction of deficiencies earlier in the design process when those deficiencies are less expensive to correct.

Question. When is it appropriate for developmental and operational testing to be combined?

Answer. It is appropriate to combine developmental and operational testing when the objectives of both evaluations can be reasonably met. This may provide shared data at a reduced cost and on a shorter schedule.

ADAPTATION OF T&E TO EVOLVING ACQUISITION STRATEGIES

Question. If confirmed, how would you propose to achieve an appropriate balance between the desire to reduce acquisition cycle times and the need to perform adequate testing and evaluation?

Answer. It is my understanding the time consumed by operational testing is usually only a small percentage of the overall acquisition cycle time. Program delays in readying for operational testing usually are much longer than the time frame of the operational test itself. Because operational testing occurs near the end of the acquisition cycle, there can be great pressure to rush such tests. I feel that the early involvement of operational testers can contribute to reducing cycle time by identifying issues early in the development cycle when the problems can be solved with less impact on the program and at less cost.

Question. What requirements and criteria would you propose to ensure an effective T&E program is established for an evolutionary acquisition program?

Answer. An evolutionary acquisition strategy requires a T&E process incorporating a distinct set of testable objectives for each phase of the evolutionary program. If the system resulting from completion of a phase will be used in the field, those objectives should be related directly and clearly to how operators will use it; that is, to operational requirements. In my view, it is very important that the progress achieved in completing each phase of an evolutionary acquisition program (or, for that matter, of any program) be judged based upon rigorous testing incorporating appropriate operational realism, not dictated by a pre-set schedule. If a system that results from the completion of a particular evolutionary phase is to be deployed for use in the field, it should undergo operational testing and live-fire testing and evaluation before it is produced and fielded in large quantities. An evolutionary T&E process recognizes the results of developmental and operational testing conducted for previous spirals can be incorporated in testing subsequent spirals, as appropriate, thereby potentially reducing the time and effort needed to test later spirals. Thus, it is important that provisions be made for archiving data resulting from testing each spiral to allow for that data's re-use.

Question. Recent equipment problems have brought to light potential testing deficiencies resulting from the fielding of systems that fell below the thresholds established for oversight by the DOT&E. In many cases, such as with body armor, helmets, vehicle armor kits, and ammunition, the materiel involved is crucial to the everyday mission effectiveness and survivability of our military forces.

If confirmed, how would you ensure that critical equipment being fielded is effective, safe, and suitable for our military to take into combat?

Answer. Title 10, via delegation from the Secretary of Defense, now gives the DOT&E authority to designate any program for live-fire T&E oversight. I understand that DOT&E is working with the Services to compile a list of critical equipment programs that should be made subject to oversight under this authority. If confirmed, I would complete the compilation of this list and exercise oversight over the programs on it to assure critical equipment is adequately tested and objectively evaluated for effectiveness, suitability, and survivability. I would provide my independent assessments of those tests to Congress and the Department's leadership in a timely manner. The equipment's safety would be a key criterion determining my assessment of its suitability. I would periodically review the list of programs placed on this list for completeness and continued need for DOT&E oversight and adjust the list, as appropriate.

Question. What are your views on the testing and evaluation of systems under spiral development?

Answer. I view the needs for effective T&E of systems under spiral development as similar to those for effective T&E of an evolutionary acquisition program. It is important that systems under spiral development have an early T&E strategy and complementary T&E processes that identify a distinct set of testable objectives for each spiral. Each spiral can then be tested against those objectives and progress in development, including whether the program should proceed to the next "spiral," determined using the results of those tests. As in all programs, testing of systems under spiral development should incorporate as much operational realism as soon as possible in a robust developmental testing program. If a system that results from the completion of a particular "spiral" of development is to be deployed for use in the field, it should undergo appropriate operational testing and live-fire testing and evaluation before it is produced and fielded in large quantities. The results of developmental (and any operational testing) conducted for previous spirals can be incorporated in testing subsequent spirals, as appropriate, potentially reducing the time and effort required for testing later spirals. Thus, it is important that provisions be made for archiving data resulting from testing each spiral to allow for that data's re-use.

Question. Do you believe that follow-on operational testing and evaluation should be required for each program spiral?

Answer. In my view, the significance of the changes made to a system's capability should determine the need for follow-on operational testing and live-fire testing. Substantial enhancements in combat capability would require follow-on operational testing and assessment. If follow-on testing is conducted, it should take advantage of data collected from testing done for previous spirals, as appropriate.

Question. How should Service and Agency test organizations project future resource requirements given the uncertainty of testing demand given urgent operational needs and rapid fielding and development initiatives?

Answer. The Services should integrate resource requirements for T&E into their projected program plans for rapid fielding and development initiatives. Because resource demands may change rapidly and unexpectedly as the size and character of ongoing operations evolves, the Services will need to re-evaluate their plans on a continual basis. Accomplishing these re-evaluations will require close consultation among operators, developers, and the Service Operational Test Agencies. If confirmed, I will help facilitate this consultation.

Question. How will you improve the oversight that the DOT&E has over the activities of the Joint Improvised Explosive Device Defeat Office, the Intelligence, Surveillance, and Reconnaissance Task Force, and other rapid fielding organizations?

Answer. I regard DOT&E involvement in assisting these organizations as a high priority. I believe that DOT&E must provide early advice to and conduct continual consultation with these organizations to provide oversight that helps—not hinders—the fulfillment of their objectives. I understand that DOT&E has established interfaces with these organizations and is using those interfaces to oversee their testing activities. If I am confirmed, I will review the results of that oversight and make adjustments to it, as necessary, in consultation with each organization's leadership. The extent to which DOT&E's oversight has improved each organization's ability to accurately and quickly characterize both the strengths and weaknesses of the capabilities they field will be key to determining any changes that may be needed.

COMBINATION OF TESTING WITH TRAINING EXERCISES

Question. Some hold the view that the most representative operational testing would be to allow operational forces to conduct training exercises with the system under evaluation.

In your view, should testing be combined with scheduled training exercises for efficiency and effectiveness?

Answer. I believe that testing should be combined with scheduled training exercises in selected instances when it is feasible and when careful, advance planning can and has been conducted. Combined testing and training events can benefit testing through the presence of more realistic friendly and threat forces conducting operations in a broader, more varied context than would otherwise be the case in standalone testing. This additional realism can be used to simultaneously exercise modes of equipment operation that might not be possible or would be difficult to arrange on test ranges. For example, testing combined with joint force training exercises can offer unique opportunities to discover interoperability problems. Live, virtual, and constructive environments should all offer opportunities for combined testing and training.

Question. What are the barriers, if any, to doing so?

Answer. There may be differences in the needs and goals of the testing and training communities that prevent both groups from achieving their objectives with a single event. Synchronizing schedules can be a problem, as training events are usually scheduled well in advance, and test events, although scheduled in advance, have a history of slippage due to development delays. I understand that the test community often requires that data be collected using methods not normally associated with a training exercise; in some cases those methods could be disruptive to achieving training objectives. Combining testing and training can also introduce the need to train military personnel from the field who are participating in an exercise to operate the new equipment under development to be tested while using tactics they are unfamiliar with. This can increase the cost and complexity of planning and execution for both the testing and training communities.

Question. How can training and testing ranges be used more jointly and efficiently?

Answer. My review of publicly available DOT&E reports indicates that the Services frequently share the use of test ranges and other testing and evaluation infrastructure. Additionally, those reports indicate that testing is often conducted on ranges that are also utilized for training. I also understand that there is increasing competition for the use of both types of ranges. This trend, in conjunction with the concerns expressed in DOT&E's annual reports regarding shortfalls in both capability and capacity at the Department's testing ranges, indicates that more efficient, joint use of both types of ranges is needed whether or not additional resources are provided to modernize these ranges. If confirmed, I will work with the Service Operational Test Agencies and the Joint Staff to determine how test and training ranges can be used more efficiently and jointly and make appropriate recommendations.

"SYSTEM OF SYSTEMS" TESTING

Question. What inherent challenges exist for operational testing with regard to DOD programs that are a part of an overall "system of systems"?

Answer. The large number of individual components of a "system of systems" and the wide span of military capabilities those components provide pose challenges to operational testing. For example, the Army's Future Combat Systems (FCS) program was to be composed of 14 individual systems (ranging from manned ground vehicles to robotic vehicles to unmanned aerial systems) linked together by an information network. Considering the network, a realistic operational test would exercise all the potential linkages among all fourteen systems simultaneously. The information flow across the linkages would be realistic only if it were as large as would be expected if all fourteen elements were deployed and operating in numbers consistent with their employment in a brigade combat team. Testing would need to incorporate the network interruptions, dynamic establishment and dis-establishment of communications links, and other complications expected during combat in complex terrain. Adding consideration of the testing needs for other elements of FCS indicates that realistic operational testing of this "system of systems" would present unprecedented challenges in test planning, assembly of equipment, training of operators, simultaneous presentation of the multiple, disparate threats needed to stress each FCS element, and simultaneous collection of multiple flows of data. The use of modeling and simulation might mitigate these challenges somewhat (the development and verification of the simulations would also be complex), but would not eliminate them. These challenges are present in testing the BMDS and any other "system of systems."

Question. How should a "system of systems" be tested to assess the effectiveness of the whole system?

Answer. Constraints on the environments that can be created in test ranges will probably require that operational testing of systems of systems comprise a combination of “open air” testing of the system’s components on ranges—alone and in combination—in conjunction with modeling and simulation. Careful planning of “open-air” tests will be required so that selected aspects of the performance of individual components can be demonstrated and all the data needed to verify, validate, and accredit the models to be used is collected. The combination of open-air testing and modeling should be constructed to stress and exercise all the system’s components under the full set of operational conditions to be expected. According to recent testimony to Congress by DOT&E, this is the approach that the Director of the Missile Defense Agency (MDA) is attempting to use in planning the testing conducted on the BMDS “System of Systems.”

TESTING OF INFORMATION SYSTEMS

Question. What are the major unique challenges to the testing of information systems?

Answer. I believe the major challenges to testing information systems can be grouped into three areas: interoperability, information assurance, and sustainment. The overwhelming majority of the Department’s information systems are expected to exchange information, or network, with a variety of other systems. Development and testing of systems that can all be simultaneously evolving poses configuration management challenges. For example, a data link system may have to operate with an aircraft’s mission computer and display systems as well as with the decision and display systems in command centers ashore or afloat. Second, realistic information assurance testing must account for the rapidly maturing and the ever-changing cyber threat. Even with a modular architecture, introduction of new software code can potentially introduce new system vulnerabilities. Third, the rapid pace at which industry has upgraded the commercial hardware and software that underpin DOD systems, challenges the Department’s ability to successfully integrate, test, and field updates.

Question. What role do you believe DOT&E should play in testing of major automated information systems and other enterprise information systems?

Answer. I believe that DOT&E should continue to exercise oversight of the testing of major automated information systems and enterprise information systems to help ensure that users are delivered the systems they need to accomplish their missions around the world. DOT&E should ensure that these systems are operationally effective and suitable when operated by typical users in an operationally realistic environment. Among other considerations, this means that testing should exercise under realistic loading all the linkages among these systems expected in operational use. According to DOT&E’s annual reports, testing of linkages between new and legacy systems under realistic loads has a history of revealing unanticipated problems; thus, this testing should be accomplished as early as possible in the development of these systems.

Question. Are you satisfied with the Department’s capabilities to test and evaluate information systems, including embedded software?

Answer. I have not had the opportunity to carefully review all of the Department’s capabilities to test and evaluate information systems. If confirmed, I will review this area carefully to ensure adequate testing and evaluation is being performed.

Question. What role, if any, should commercial sector testing play in the Department’s testing and evaluation of commercial information systems that are being modified to support defense needs?

Answer. I believe that commercial sector testing can make a significant contribution in the overall T&E process. The use of third party commercial testing could be particularly useful in development, where it might offer test resources that are not available within the Department.

Question. Recent defense authorization legislation provided the DOT&E with oversight responsibility for information assurance (IA) evaluations of fielded systems. There has reportedly been an increased focus on IA as an evaluation issue for systems on the operational T&E oversight list and a group of acquisition programs have been identified for an expanded review of the adequacy of IA evaluation planning.

Does the T&E community of the Department possess adequate expertise, staffing, and funding to carry out its IA responsibilities?

Answer. I currently do not have sufficient insight into the information assurance capabilities of the T&E community to provide an accurate and objective assessment of the adequacy of those capabilities. I am concerned, however, that the same trends in funding and policy that led Secretary Gates to direct that additional government

civilian employees be hired might have adversely affected the government's T&E workforce overall, as well as in this particular area. The adequacy of the Department's expertise and staffing in information assurance is of particular concern to me because of the competition for people with these skills across the government, as well as in the private sector. If confirmed, I will examine this issue carefully in order to make an informed assessment and recommendation.

Question. What are the major challenges that you see in operational testing of information assurance systems?

Answer. My impression is that there are two related challenges in the operational testing of information assurance for both development and fielded systems. For systems in development, a key challenge is to adequately emulate the operational environment in a secure test facility so that developers can assess the system's performance when it is exposed to realistic, sophisticated threats. For fielded systems, significant operational and security challenges arise in portraying realistic threats against live systems on networks being used for operational and training missions.

LIVE-FIRE TESTING

Question. The live-fire testing program is a statutory requirement to assess the vulnerability and survivability of platforms, while also assessing the lethality of weapons against the required target sets.

Do you believe that the Department's current live-fire testing program is accomplishing its purpose?

Answer. I believe so. The recent testing of the Mobile Gun System, mine resistant ambush protected (MRAP) vehicles, and Body Armor overseen, assessed, and independently reported by DOT&E illustrate the value of robust live-fire testing. DOT&E reports also indicate live-fire testing plays an important role in assessing a system's overall effectiveness and suitability.

Question. What are the major challenges facing the live-fire testing program?

Answer. I believe that conducting adequate testing early enough to improve a system's design without the need for costly changes and retrofits is a key challenge for both operational testing, as well as live-fire testing. Specific examples of challenges related to live-fire testing of which I am aware appear in the DOT&E annual report. That report expresses a concern with the elimination of vulnerability reduction features on the Joint Strike Fighter made to reduce weight during trade space analysis conducted on the aircraft's systems. If this reaction to weight growth in aircraft design foreshadows a more widespread trend, it would be extremely troubling. Similarly, I understand that full-ship shock trials of Navy ships are increasingly constrained by environmental considerations.

Question. What is the Department's role, if any, in the research, development, and acquisition process with respect to live-fire testing for Preliminary Design Model tests, First Article Tests, and Lot Acceptance Tests?

Answer. The Department's role in these tests normally associated with Personal Protection Equipment varies by the nature of the test. Preliminary Design Model tests, typically utilized to screen viable systems before making contract awards, are a responsibility of the acquisition or program manager. In my view, First Article Testing is inherently governmental, as it qualifies a design and leads to full rate production contracts and fielding of equipment. The authorities contained in 2009 National Defense Authorization Act enable the Department to exercise oversight of this testing in a manner similar to the DOT&E authorities for operational testing. Lot Acceptance Testing is in many respects an extension of First Article Testing, in that it supports the acquisition of specific lots of the design qualified in First Article Testing. In my view, government oversight of these tests should focus on ensuring that common standards are used to conduct them.

Question. Is live-fire testing to determine if weapons systems, vehicles, or personal protective equipment meets military and contract specifications for procurement an inherently governmental function, a function that can be outsourced, or a function that can use a mix of government and commercial facilities?

Answer. I believe testing that leads to production decisions is inherently governmental and should be conducted by the Services at government facilities. This is the norm and typically a requirement for all major acquisition programs. This fundamental practice should also be applied to critical personal equipment such as body armor and helmets. The Services must be provided sufficient resources to conduct this level of testing. I note the recent Army policy letter that requires all body armor testing to be conducted by their operational test agency. This is a reasonable policy and does allow for the use of commercial facilities if needed for subsequent lot testing. I agree with the recent report by the defense Inspector General that doc-

umented the need for adequate government oversight if testing is conducted at commercial facilities.

MODELING AND SIMULATION

Question. Advances in modeling and simulation have provided an opportunity to streamline the testing process, saving time and expense.

What do you believe to be the proper balance between modeling and simulation and actual testing of the developed product?

Answer. Modeling and Simulation (M&S) can contribute to the assessment of system performance, particularly to explore the full range of system operation where live, "open-air" testing would be unsafe or is impractical. M&S is also useful as a tool to help plan the test program. However, M&S should be utilized to complement, rather than replace, operational testing in a realistic environment. Additionally, sufficient operational testing should still be performed to adequately validate and accredit any models used. This is often the greatest challenge.

Question. Are there areas in modeling and simulation that need to be advanced in order to improve its utility as a tool for operational and developmental testing?

Answer. I am not aware of any specific areas at this time. However, if I am confirmed I will review the use of modeling and simulation in operational testing and make recommendations for improvements to the testing community, as appropriate.

T&E SCIENCE AND TECHNOLOGY

Question. What are your views on the appropriate level of investment in the science and technology (S&T) of testing?

Answer. I believe strongly in the need for a robust S&T effort to support T&E. This effort should be a part of and consistent with the overall S&T investment strategy of the Department.

Question. What mechanisms will you employ to ensure the S&T portfolio is responsive to the Department's future test instrumentation needs?

Answer. If confirmed, I look forward to working with the USD(AT&L) and his subordinate organizations, such as the Director of the TRMC, to ensure that the projects funded in the S&T portfolio support the Department's future instrumentation needs. I am particularly interested in assuring that the S&T program supports the development and fielding of embedded instrumentation that can be used by testers, trainers, and operator maintainers. Therefore, I would work with AT&L to develop alternatives that provide adequate resources for the associated S&T activities as part of the development of the FYDP.

Question. What areas should the Department's S&T program be investing in to improve the quality of current and future testing capabilities?

Answer. The emerging concepts the Department is pursuing involving urban operations, directed energy, chem-bio, chemical weapons effects, hypersonics, netcentric systems, and unmanned/autonomous systems will all likely require advances in test range instrumentation and other capabilities for conducting both developmental and operational testing. The need for these advances may already be included in the TRMC's strategic plan for the Department's T&E resources. If confirmed, I would work closely with the Director of TRMC in this area.

OPERATIONAL TEST AGENCIES

Question. Operational Test Agencies (OTAs) are tasked with conducting independent operational testing and evaluation of acquisition programs. Recent demands on these organizations have increased to meet rapid acquisition initiatives, to demonstrate joint and advanced concept technology programs, and to evaluate information assurance, information operations, and joint T&E requirements.

In your view, are these agencies sufficiently staffed to perform the required functions?

Answer. I am not aware of any specific staffing shortfalls at this time. I am concerned, however, that the long-term trends that caused Secretary Gates to direct that the government workforce be increased, in conjunction with increasing workload, may have created shortfalls. If confirmed, this is an area that I will explore in greater detail.

Question. How would you propose to arbitrate shortfalls between program managers' limited funding and OTAs independent test requirements?

Answer. Title 10 and DOD Directives require DOT&E to assess the adequacy of operational testing. Service leadership retains the responsibility to ensure programs are managed and funded to meet testing requirements. If confirmed, I will only approve TEMPs and test plans that are executable within available resources.

Question. Do you have any concerns about the independence of the OTAs?

Answer. There will always likely be concerns regarding the independence of the OTAs. If confirmed, I will be vigilant to protect their independence. I believe that the OTAs should report to the top of their Service leadership, independent of the Service acquisition organizations.

Question. Should policies and procedures of the OTAs be standardized across DOD?

Answer. Each of the component OTAs has processes for the conduct of OT&E that are tailored to their organizational construct and the kinds of systems they must evaluate. As long as these processes lead to robust operational T&Es, I do not believe DOT&E should dictate standard processes that may limit component flexibility. I do, however, believe the capability to develop, test, train, and experiment with complex systems in a Joint operational environment needs improvement. If confirmed, I will work with the combatant commands, Joint Forces Command, Service Leadership, and the component OTAs to improve our abilities to test and evaluate in a realistic joint operational environment and make appropriate recommendations for any changes needed in policies and procedures.

BALLISTIC MISSILE DEFENSE

Question. The United States is developing and fielding a BMDS that is intended to defend the United States, its allies, and friends against rogue nation ballistic missiles of all ranges in an operationally effective and cost-effective manner.

Can you assure the committee that, if confirmed, you will evaluate the testing of the BMDS, and that you will make a determination of whether the system and its elements that are tested are effective, survivable, and suitable for combat?

Answer. Yes. DOT&E provides an annual report covering all DOD oversight programs, including the BMDS, as well as a separate annual assessment report of the BMDS to Congress. If confirmed, I will continue to assess BMDS system operational effectiveness, suitability, and survivability and test adequacy in these reports.

Question. If you determine that such testing and evaluation is not adequate, or does not demonstrate that the BMDS or its elements are effective and suitable, or survivable, will you inform Congress of that determination?

Answer. Yes. If confirmed, I will provide my frank and objective assessments of test adequacy and BMDS system and element effectiveness, suitability, and survivability.

Question. According to title 10, U.S.C., Major Defense Acquisition Programs are required to complete Initial OT&E before proceeding beyond low-rate initial production. This is to ensure that weapons systems work effectively before they are produced in large numbers and at great expense. DOD had previously exempted the BMDS from this requirement, saying that there will be only one BMDS, and thus no question of proceeding beyond low-rate initial production. There were also no plans or requirements for operational test and valuation of the BMDS or its elements.

Do you believe that any BMDS we deploy should be operationally effective, suitable, and survivable?

Answer. Yes. I believe that the MDA and operational test community should demonstrate through rigorous testing and verified, validated, and accredited modeling and simulation, that the elements to be deployed are operationally effective, suitable, and survivable.

Question. Do you believe that the BMDS and its elements should undergo operational T&E?

Answer. Yes. As with all major defense acquisition programs, I believe that the BMDS and its elements should undergo operational T&E to demonstrate its capabilities. This is particularly true given the strategic importance of the BMDS. Independent operational testing should be included in the overall program and should occur once the incremental development of a given element or group of elements has been completed.

Question. What do you believe is the appropriate role for the office of the DOT&E in providing an independent and objective assessment of the operational effectiveness, suitability, and survivability of the BMDS?

Answer. I believe it is the role of DOT&E to ensure adequate test planning, oversee the conduct of testing in accordance with approved test plans, independently assess the operational effectiveness, suitability, and survivability of the BMDS using all relevant and appropriate test data, and report our findings to the congressional defense committees and the Secretary of Defense.

MASTER TEST PLAN FOR BMDS

Testing and evaluation of Major Defense Acquisition Programs is normally implemented according to a TEMP, which must be approved by the DOT&E. However, this has not been the case for the Ballistic Missile Defense System or its elements.

Do you believe that the T&E of the BMDS and its elements should be implemented according to a TEMP, or its equivalent, and that this plan should include such features as goals and objectives, methodologies, criteria for evaluation, planned infrastructure, and schedule?

Answer. Yes. Historically, well-prepared and resourced TEMPs have not only promoted disciplined testing of the Department's acquisition programs but also fostered successful assessments of operational effectiveness, suitability, and survivability. In 2002, the Secretary of Defense relieved the MDA from the requirement to produce a TEMP for the BMDS. Instead, the Agency has produced a similar document known as an Integrated Master Test Plan (IMTP). It is my understanding that Agency's IMTP does contain such features as goals and objectives, methodologies, criteria for evaluation, planned infrastructure, and schedule.

GROUND-BASED MIDCOURSE DEFENSE

Question. Concerning the Ground-based Midcourse Defense (GMD) system, the DOT&E annual report for 2008 states that, "GMD flight testing to date will not support a high degree of confidence in its limited capabilities."

Do you agree that our objective should be to have a high degree of confidence in the capabilities of the GMD system, and do you believe that our T&E program for the GMD system should be designed and implemented to provide a high degree of confidence in the system?

Answer. Yes. I believe that it is essential that operational decisionmakers have the greatest possible understanding of the capabilities and limitations of the GMD system, as well as the entire BMDS. In particular, those decisionmakers need high confidence in the accuracy of the performance estimates that underpin the determination of those capabilities and limitations.

Question. Do you agree that it is essential to conduct testing of the GMD system that will allow the validation, verification, and accreditation of the models and simulations necessary to predict and understand the performance of the system?

Answer. Yes. Modeling and simulation, anchored by a robust program of flight and ground testing, and exercised over the battlespace using operationally realistic threat, mission scenario, and environmental models, is necessary to develop high confidence assessments.

Question. The January 2009 DOT&E "2008 Assessment of the BMDS" states that, for the GMD system, "all intercepts have occurred within a small portion of the threat battlespace and under nearly the same intercept conditions." It also reports that the GMD system "has not demonstrated interceptor performance in a salvo defense (multiple interceptors against a single target) or in a multiple simultaneous engagement (multiple interceptors against multiple targets) in a flight test."

Do you agree that flight testing for the GMD system needs to be rigorous and operationally realistic, in order to demonstrate capability in a more representative portion of the possible operational conditions?

Answer. Yes. I believe there should be robust, operationally-realistic testing of, not only the GMD, but all the constituent elements of the BMDS, so that we fully understand the systems' capabilities and limitations. The modeling and simulation used to evaluate the full capabilities of the BMDS must be verified and validated before the BMDS OTA Team can accredit it for use in assessing BMDS performance. The flight test program must be carefully designed to collect the required performance data that can then be used to verify and validate the models and simulations.

Question. Do you agree that the system testing should include such operationally realistic features as salvo testing, multiple simultaneous engagement testing, and an intercept test using the Cobra Dane radar as the operational sensor, if possible?

Answer. Yes. I support previous DOT&E recommendations and testimony to the Defense Committees that the MDA should perform salvo testing and multiple simultaneous engagement testing of the GMD. I also support the proposal to conduct a GMD intercept test using the Cobra Dane radar as the operational sensor; however, I understand General O'Reilly has testified that there are unique challenges associated with the need to conduct such a test from within or nearly adjacent to the Russian Flight Information Region. If an intercept test is not feasible, alternatives, such as a target fly-by, should be investigated.

MEDICAL TECHNOLOGIES

Question. What role should the DOT&E play in the testing and evaluation of medical technologies such as combat casualty care technologies, drugs, vaccines, and other medical technologies before their operational use by DOD?

Answer. I understand DOT&E has been overseeing the operational T&E of automated information systems that support medical care delivery, such as the Composite Health Care System, the Armed Forces Health Longitudinal Technology Application, and the Theater Medical Information Program. I believe that this is an appropriate role. On the other hand, medical technologies such as combat casualty care technologies, drugs, and vaccines are highly specialized and clinical in nature. The T&E of these medical technologies is probably better suited for specially trained medical professionals with expertise in this area. I am not aware that DOT&E has this expertise.

ENCROACHMENT AND ENVIRONMENTAL ISSUES.

Question. As is the case with military training, DOD T&E efforts can be hampered by encroachment and constrained by environmental regulations, both on land and at sea.

To what extent do you believe encroachment and environmental requirements on and around T&E ranges are affecting the quality and quantity of DOD's T&E programs?

Answer. I understand the importance of these issues. Based on the recent DOT&E Annual Reports and other reports to Congress, it appears that the Department has been able to conduct its test operations adequately while making compensating adjustments to address environmental issues where necessary. However, those reports also raise concerns regarding limitations that testing is experiencing due to encroachment and other related problems. If confirmed, I will monitor this area carefully.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information. Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the DOT&E?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[The nomination reference of Dr. J. Michael Gilmore follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
June 1, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

J. Michael Gilmore of Virginia, to be Director of Operational Test and Evaluation, vice Charles E. McQueary.

[The biographical sketch of Dr. J. Michael Gilmore, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF DR. J. MICHAEL GILMORE

Dr. Gilmore has served most recently as the Assistant Director for National Security within the Congressional Budget Office (CBO). In that capacity he was responsible for CBO's National Security Division, which performs analyses of major policy and program issues in national defense, international affairs, and veterans affairs.

His previous government employment includes serving within the career Senior Executive Service in the Office of the Secretary of Defense, first as leader of a division performing independent cost analyses of defense acquisition programs, and later as the Deputy Director for General Purpose Programs within the Office of Program Analysis and Evaluation (PA&E). In the latter position, Dr. Gilmore was responsible for developing, formulating, and implementing Secretary of Defense policies on all aspects of Department of Defense general purpose programs, including analyzing the operational effectiveness and costs of U.S. conventional military forces and supporting programs.

Dr. Gilmore also served within PA&E as an analyst for command, control, and communications programs, as well as missile defense programs. Prior to his government service, Dr. Gilmore worked as a Defense Department contractor, analyzing the effectiveness of missile defense and command and control programs for the McDonnell Douglas Corporation and later at Falcon Associates in McLean, VA. Dr. Gilmore has also worked as a scientist conducting research on fusion energy at Lawrence Livermore National Laboratory.

He holds a Ph.D. and M.S. in nuclear engineering from the University of Wisconsin and a B.Sc. in physics from the Massachusetts Institute of Technology.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Dr. J. Michael Gilmore in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
James Michael Gilmore.
2. **Position to which nominated:**
Director, Operational Test and Evaluation.

3. Date of nomination:

June 1, 2009.

4. Address: (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. Date and place of birth:

September 24, 1954; Richmond, VA.

6. Marital Status: (Include maiden name of wife or husband's name.)

Married to Ai-Chi Liu.

7. Names and ages of children:

Christopher Kenneth Gilmore, born June 6, 1988.

8. Education: List secondary and higher education institutions, dates attended, degree received, and date degree granted.

09/1976–12/1980, University of Wisconsin-Madison, Ph.D. in Nuclear Engineering, 12/80.

09/1972–05/1976, Massachusetts Institute of Technology, B.Sc. in Physics, 05/1976.

09/1968–06/1972, Salem Senior High School (Salem, OH), Diploma, 06/1972.

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

09/2001–Present: Assistant Director for National Security, Congressional Budget Office, Second and D Streets SW, Washington, DC.

11/1994–09/2001: Deputy Director for General Purpose Programs, Office of the Director, Program Analysis and Evaluation, Office of the Secretary of Defense, 1800 Defense Pentagon, Washington, DC.

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

01/1993–11/1994: Division Director, Office of Deputy Director for Resource Analysis, Office of the Director, Program Analysis and Evaluation, Office of the Secretary of Defense, 1800 Defense Pentagon, Washington, DC.

05/1990–01/1993: Operations Analyst, Office of the Deputy Director for Strategic Programs, Office of the Director, Program Analysis and Evaluation, Office of the Secretary of Defense, 1800 Defense Pentagon, Washington, DC.

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

None.

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

None.

14. Honors and Awards: List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

Presidential Rank Award—Meritorious Executive in 1998.

Secretary of Defense Medal for Meritorious Civilian Service in 1996.

Secretary of Defense Medal for Distinguished Civilian Service in 2001.

15. Published writings: List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

A.A. Mirin, S.P. Auerbach, R.H. Cohen, J.M. Gilmore, L.D. Pearlstein and M.E. Rensink, "Radial Transport Calculations for Tandem Mirrors," Nucl. Fusion 23 (1983), 703.

S.P. Auerbach, R.H. Cohen, J.M. Gilmore, A.A. Mirin and M.E. Rensink, "Plasma Transport Caused by Ion-Neutral Atom Collisions-I. Slab Model," Nucl. Fusion 24 (1984), 1251.

"Federal Budget Trends and the Outlook for the Defense Program" in Defense Strategy and Forces: Setting Future Directions, Proceedings of the Ruger Workshop, 13–15 November 2007, Naval War College, Newport, RI.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

I have delivered no formal speeches, however I have participated in a number of panel discussions and have given presentations and briefings regarding defense programs and budgets. I have also testified before congressional committees regarding CBO's work on defense issues. Below is a list of my testimony before Congress and Commissions:

"CBO Testimony: The 2009 Future Years Defense Program: Implications and Alternatives," Hearing before the Committee on the Budget, U.S. House of Representatives, February 4, 2009.

"CBO Testimony: The Navy's 2008 Shipbuilding Plan and Key Ship Programs," Hearings before the Subcommittee on Seapower and Expeditionary Forces, Committee on Armed Services, U.S. House of Representatives, July 24, 2007.

"CBO Testimony: The Navy's DD(X) Destroyer Program," Hearings before the Subcommittee on Projection Forces, Committee on Armed Services, U.S. House of Representatives, July 19, 2005.

"CBO Testimony: Issues That Affect the Readiness of the Army National Guard and Army Reserve," Hearing before the Commission on the National Guard and Reserves, May 16, 2007.

"CBO Testimony: The Army's Future Combat Systems Program," Hearings before the Subcommittee on Tactical Air and Land Forces, Committee on Armed Services, U.S. House of Representatives, April 4, 2006.

"CBO Testimony: Potential Costs of the Navy's 2006 Shipbuilding Plan," Hearings before the Subcommittee on Projection Forces, Committee on Armed Services, U.S. House of Representatives, March 30, 2006.

"CBO Testimony: Estimating the Costs of Military Operations in Iraq," Hearing before the Committee on the Budget, United States Senate, February 6, 2007.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

J. MICHAEL GILMORE.

This 8th day of June, 2009.

[The nomination of Dr. J. Michael Gilmore was reported to the Senate by Chairman Levin on August 4, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on September 21, 2009.]

[Prepared questions submitted to Zachary J. Lemnios by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DUTIES

Question. What is your understanding of the duties and functions of the Director of Defense Research and Engineering (DDR&E)?

Answer. The DDR&E is the principal staff advisor to the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)) and to the Secretary and Deputy Secretary of Defense for Research and Engineering matters. The DDR&E serves as the Chief Technology Officer (CTO) for the Department of Defense (DOD).

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. I have over 30 years of professional experience as an engineer. During my career, I have served in both industry and government, and am currently in an academic laboratory. I have also served on many Defense Science Boards and other advisory committees. If confirmed, I believe that my background and experience will enable me to discharge the DDR&E's responsibility to develop technologies that enhance the operational capabilities required by our armed forces.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the DDR&E?

Answer. I believe that I have the necessary background, skills, and ability to perform the duties of the DDR&E.

Question. Assuming you are confirmed, what duties and functions do you expect that the Secretary of Defense will assign to you?

Answer. If confirmed, I expect the Secretary to assign me duties and functions commensurate with those of a CTO, and any others as he may deem appropriate.

RELATIONSHIPS

Question. Section 139a of title 10, U.S.C., and DOD Directive 5134.3 discuss the responsibilities and functions of the DDR&E. Other sections of law and traditional practice also establish important relationships outside the chain of command. Please describe your understanding of the relationship of the DDR&E with the following:

The Deputy Secretary of Defense.

Answer. If confirmed, I will work closely with the Deputy Secretary to provide advice and assistance commensurate with the role of a CTO, including rapidly transitioning technology to the field, prioritizing science and technology (S&T) investment funding levels, and enhancing current and future military capabilities.

Question. The Under Secretary of Defense for Acquisition, Technology, and Logistics.

Answer. The DDR&E is subject to the authority, direction, and control of the USD(AT&L). If confirmed, I expect to provide the Office of USD(AT&L) with technology insight and leadership across the research and engineering community.

Question. The Under Secretary of Defense for Intelligence.

Answer. If confirmed, I will work to foster a close working relationship with the Under Secretary of Defense for Intelligence to ensure our research and engineering needs are synchronized across the Department. I believe intelligence on potential adversary capabilities is important for sharing among the defense programs.

Question. The Under Secretary of Defense (Comptroller/Chief Financial Officer) (USD(C/CFO)).

Answer. If confirmed, I will work closely with the USD(C/CFO) to ensure investment in research and engineering meets the overall priorities of the Department.

Question. The Under Secretary of Defense for Personnel and Readiness.

Answer. If confirmed, I will work to foster a close working relationship with the Under Secretary of Defense for Personnel and Readiness to ensure the current and future research and engineering workforce priorities are balanced across the Department, and to ensure that technologies necessary for the readiness of our forces are in the DOD portfolio.

Question. The Service Secretaries.

Answer. If confirmed, I will work to foster a close working relationship with the Service Secretaries to ensure their research and engineering priorities and technology investments are supporting the overall Department goals and are in balance.

Question. The Service Acquisition Executives.

Answer. Research and Engineering is the first step in the overall acquisition process, so I view the Service Acquisition Executives as a primary customer of defense research and engineering. If confirmed, I will work closely with the Service Acquisition Executives on research and engineering matters to provide technology leverage for their missions.

Question. The Service Science and Technology Executives.

Answer. The Service S&T Executives are responsible for developing and executing the programs for their respective Service. If confirmed, I intend to provide technical insight and work closely with them to ensure the overall DOD S&T investment is coordinated and provides the best possible payoff for taxpayer investment.

Question. The Directors of Department of Defense Laboratories and Research Centers.

Answer. If confirmed, I intend to work closely with the Directors of Defense Laboratories and Research Centers to provide them with the necessary resources to deliver technology in support of DOD needs. I also believe it is the responsibility of the DDR&E to establish standards for lab performance.

Question. The Director of the Defense Advanced Research Projects Agency (DARPA).

Answer. If confirmed, I will work closely with the Director of DARPA to ensure that DARPA continues to open new technical fields and create new technologies that have a profound impact on national security.

Question. The Director of the Defense Threat Reduction Agency.

Answer. If confirmed, I will work with the Director of the Defense Threat Reduction Agency on research and engineering matters pertaining to weapons of mass destruction.

Question. The Joint Staff.

Answer. Research and Engineering provides new operational capability options to the warfighter. I view the Joint Staff as another primary customer of research and engineering products. If confirmed, I will work closely with the Joint Staff on issues relating to research and engineering with the goal of understanding the requirements process and specific capability needs in order to ensure our warfighters are affordably equipped with superior warfighting capabilities.

Question. The Director, Defense Test Resource Management Center.

Answer. If confirmed, I will work with the Director, Defense Test Resource Management Center to consider technology options and alternate procedures for enhancing the test and evaluation of DOD systems.

Question. The Director, Operational Test and Evaluation (OT&E).

Answer. If confirmed, I will work with the Director, OT&E to consider technology options and alternate procedures for enhancing the test and evaluation of DOD systems.

Question. The Director of the Joint Improvised Explosive Device Defeat Office.

Answer. If confirmed, I will work with the Director of the Joint Improvised Explosive Device Defeat Office to identify technical and system solutions for defeating current threats and countering future anticipated threats.

Question. The Assistant Director of Defense for Networks and Information Integration.

Answer. If confirmed, I will work closely with the Assistant Director of Defense for Networks and Information Integration to ensure enhanced communication and network capabilities and cyber protection.

Question. The Director of the Business Transformation Agency.

Answer. If confirmed, I will work with the Director of the Business Transformation Agency on issues regarding research and engineering business practices and efficiencies.

Question. The Director of the White House Office of Science and Technology Policy.

Answer. If confirmed, I will work closely with the Director of the White House Office of Science and Technology Policy to ensure DOD research and engineering goals and priorities are aligned with the administration's goals and priorities.

MAJOR CHALLENGES

Question. In your view, what are the major challenges that will confront the DDR&E?

Answer. The first major challenge is to preserve the technological edge of current U.S. forces, by extending the capabilities of our warfighting systems—through better intelligence, greater speed, longer range, higher precision, and more effectiveness. The second major challenge is to identify breakthrough capabilities, allowing the U.S. to leapfrog potential adversaries. Finally, the third major challenge is to provide a hedge against an uncertain future via a set of scientific and engineering options that provide technological depth to U.S. capabilities and deterrence against strategic surprise.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I will develop plans that address these challenges by enhancing the capability of defense S&T to deliver to the warfighter and to the American taxpayer technologies and systems that provide increased agility or the ability to adapt to changing applications and environments, the ability to scale flexibly with demand, and the ability to react faster than adversaries with minimal support and logistics infrastructure.

Question. What do you consider to be the most serious problems in the performance of the functions of the Office of the DDR&E?

Answer. I do not believe I can fairly answer this question from my current vantage point.

Question. If confirmed, what management actions and time lines would you establish to address these problems?

Answer. I do not believe I can fairly answer this question from my current vantage point, but if confirmed, I will develop a plan to assess any problems that may exist and then implement actions to correct them.

PRIORITIES

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed by the DDR&E?

Answer. If confirmed, I will work with the USD(AT&L) and the Joint Chiefs of Staff to more fully understand the technology opportunities and needs of the warfighter and Department Acquisition Programs. In general, I would expect the priorities would be consistent with the priorities defined by Defense Secretary Gates in the last two budget cycles. Last year, the Secretary specifically directed an increase in spending for Defense Basic Research, and has indicated this remains a priority. I would expect the other broad priorities would be consistent with the three priorities laid out by the Secretary in his April 2009 budget rollout speech. In that speech, the Secretary said DOD would:

1. Take care of our people.
2. Develop capabilities to fight today's war and prepare for future wars.
3. Reform the way we acquire weapons systems.

If confirmed, I would expect my priorities to be consistent with these broad priorities of Secretary Gates.

Question. What defense technologies do you consider the highest priorities for development in order to enhance DOD's ability to prosecute its designated missions?

Answer. In general, I believe it is difficult to provide a single list of technologies that have "highest priority." It has been my experience that an effective S&T program balances near and long term activities and balances incremental change with revolutionary technologies. The highest priorities should develop or deliver a capability advantage for our deployed forces. During my two tours at DARPA, I saw significant technologies such as the internet, unmanned aerial vehicles, stealth, and others emerge from DOD investments in advanced technologies. Prospectively, I believe we should understand where the state-of-the-art is in science, and understand how to apply these technologies, and create opportunities through investment.

Question. What will be your strategy for developing these technologies in a manner to support needed defense capabilities in a timely and cost effective way?

Answer. If confirmed, I will look at all available strategies and evaluate them against the constraints of being timely and cost effective.

INVESTMENT IN SCIENCE AND TECHNOLOGY

Question. If confirmed, what metrics will you use to assess the size and portfolio of investments made under the defense S&T program?

Answer. Determining a sufficient level of S&T investment is not a precise science; rather, it is a strategic decision. The goal should be to fund S&T at a level adequate to ensure the technological superiority of our armed forces. A strong S&T program is required to provide options for responding to a full range of military challenges both today, and into the future.

Question. What role should the DDR&E play in the detailed development and coordination of service and agency S&T investment strategies, programs, and budgets?

Answer. Each Service and agency has a responsibility to plan, program, and execute S&T programs to meet their specific component's needs. The DDR&E should provide investment and management guidance that integrates Service and agency efforts to provide a full spectrum of DOD capabilities. Each of the Services' and agencies' S&T programs should leverage and complement each others' efforts.

Question. What, in your view, is the role and value of S&T programs in meeting the Department's transformation goals and in countering irregular, catastrophic, traditional, and disruptive threats?

Answer. The Department's investment in S&T develops the technological foundation necessary for our modernization effort, and fosters the development of "leap ahead" technologies that produce transformational capabilities on our terms. DOD must continue to invest broadly in defense-relevant technologies as a hedge against technological surprise and as a counter to future threats.

Question. Are there any S&T areas that you view as underfunded by the Department?

Answer. I do not know of any S&T areas that are underfunded. If confirmed, I will perform an assessment of the entire DOD S&T portfolio, and make an assessment at that time.

Question. In your judgment, will the funding levels in these areas affect the Department's ability to meet the threats of the future?

Answer. I am not aware of any specific science or technology areas that are underfunded.

Question. Do you feel that the Department's current S&T investment strategy strikes the appropriate balance between funding innovative, disruptive technologies and addressing near-term operational needs and military requirements?

Answer. A strong S&T program is required to provide options for responding to a full range of military challenges both today, and into the future. DOD must continue to invest broadly in defense-relevant technologies and strive for a balance between high-risk/high-payoff, disruptive technologies, and technologies that address near term operational needs. I know that the Department is making investments in both these areas and, if confirmed, I will make an assessment of the balance.

BASIC RESEARCH

Question. A 2005 National Academy of Sciences study entitled Assessment of Department of Defense Basic Research noted that "the need for discovery from basic research does not end once a specific use is identified, but continues through applied research, development, and operations stages. . . . DOD should view basic research, applied research, and development as continuing activities occurring in parallel, with numerous supporting connections throughout the process. . . . Senior DOD management should support long-term exploration and discovery and communicate this understanding to its research managers."

Given the continuing nature of basic research and the broad implications and applications of discovery-focused and innovation-focused sciences, what criteria would you use, if confirmed, to measure the success of these programs and investments?

Answer. The potential rewards of basic research are generally long-term, and hence short-term quantitative metrics are difficult to apply effectively. If confirmed, I will evaluate success on the quality of the researchers and the research we are able to attract to our programs, and how DOD-sponsored research guides, influences, and is influenced by the scientific and engineering fields in which it invests. With the input of the universities, laboratories, and independent expert panels, I expect to establish guidance in scientific priorities for the Department's basic research activities.

Question. If confirmed, how would you determine whether there is an adequate investment in basic research to develop the capabilities the Department will need in 2020?

Answer. It is not easy to accurately gauge the adequacy of investment in basic research, given the uncertainty of the results and its long term nature. However, because of basic research's amply demonstrated transformative potential in the Nation's warfighting capabilities, I believe that the DOD should remain a major contributor to the Nation's basic science activities. This is consistent with the stated policy of Secretary Gates to strengthen Defense Basic Research.

Question. The National Academies study also found that "A recent trend in basic research emphasis within DOD has led to a reduced effort in unfettered exploration, which historically has been a critical enabler of the most important breakthroughs in military capabilities."

If confirmed, what steps, if any, will you take to address this concern?

Answer. If confirmed, I will direct the Director of Under Secretary of Defense (Laboratories and Basic Sciences) to study and report to me on the state of scientific exploration under DOD basic research, and if the flexibility of scientific research has been unduly hampered.

Question. The JASON 2008 study "S&T for National Security" observed that:

- "DOD is not adhering to its own definition of basic research in its use of 6.1 funds"
- "Basic research funding is not exploited to seed inventions and discoveries that can shape the future. . ."

- “The portfolio balance of DOD basic research is generally not critically reviewed by independent, technically knowledgeable individuals”

Have you reviewed the findings of the JASON study?

Answer. I have read the JASON study, but if confirmed, I plan to review it in detail against the broad context of basic research across the Department.

Question. If confirmed, what steps, if any, will you take to address the concerns raised by the JASON review?

Answer. I believe in the importance of basic research to the DOD mission and if confirmed, I will carefully review the JASON study and other related studies to assess the program.

CHIEF TECHNOLOGY OFFICER

Question. If confirmed, as DDR&E, you will be the CTO of DOD.

What do you see as the role of the CTO of DOD?

Answer. The role of the CTO of the Department is defined in the DDR&E charter. The charter defines the role of the DDR&E as the Principal Staff Assistant to the USD(AT&L) and the Secretary on all technical matters. The DDR&E should provide guidance to shape the DOD S&T program and to develop technology options for the Department. The CTO should also contribute significantly to ensuring that major acquisition programs are conducted with acceptable technological risk.

Question. What lessons have you learned as CTO of Massachusetts Institute of Technology (MIT) Lincoln Laboratory that will enhance your ability to serve as CTO of DOD?

Answer. My lessons as the CTO at Lincoln Lab highlighted the importance of building partnerships and alliances. If confirmed, I will attempt to apply my lessons learned to the DOD.

Question. What authorities do you currently possess as CTO of MIT Lincoln Laboratory that you find most useful in exercising your responsibilities as CTO?

Answer. My open access to the MIT leadership and the tremendous collaboration across the MIT technical community has opened new technical frontiers and rapidly transitioned key ideas from research to end use.

Question. Do you believe you will have those same authorities if confirmed as DDR&E?

Answer. Yes, I believe the same authorities will exist as DDR&E.

TECHNOLOGY READINESS ASSESSMENT PROCESS

Question. Have you participated in or observed the development of Technology Readiness Assessments (TRAs) to support Milestone Decisions for defense acquisition programs?

Answer. I have not yet had the opportunity to participate or observe any TRAs.

Question. What is your assessment of the value, strengths, and weaknesses of the current process?

Answer. My current understanding of TRAs is that they offer substantial value from cost, schedule, and performance perspectives by causing the DOD acquisition process to confront technology maturity issues in a rigorous and timely fashion. Among the greatest strengths of the DOD TRA process are its focus on independent review teams of technology experts, and the requirement for hard evidence to prove technology readiness ratings. Another strength of the process is standardization throughout the military components, through the DOD TRA Deskbook and frequent DOD-wide training and workshops. I believe, consistent with the Weapons Systems Acquisition Reform Act of 2009, that the process could be strengthened by adding greater emphasis on system integration issues.

Question. Would you recommend any changes to the processes used for the assessment of technological maturity and integration risk of critical technology elements?

Answer. Before recommending any changes to the current process, I believe I would need to observe and participate (as a reviewer) in the DOD TRA process. If confirmed, I intend to do so.

Question. Are you satisfied that the DDR&E is properly staffed and resourced to support decisionmakers in complying with the technology certification and assessment requirements that are its responsibility?

Answer. From my current vantage point, I am unable to make this determination.

Question. What changes, if any, would you anticipate making, if confirmed, in this process as a result of the enactment of the Weapon Systems Acquisition Reform Act of 2009?

Answer. If confirmed, I will carefully consider changes that may be needed. I believe it is likely that the requirement to conduct “periodic” reviews of technology maturity, the addition of integration risk, and the requirement to conduct assessments

in consultation with the Director of Developmental Test and Evaluation (D,DT&E) will lead to changes in the current process.

COORDINATION OF DEFENSE S&T WITH OTHER AGENCIES

Question. Do you believe the mechanisms of coordination between Federal civilian agencies and the Department are adequate to ensure that the military can best leverage the advances of agencies such as:

National Science Foundation on defense needs for basic science, especially in social sciences?

Answer. From my current vantage point, I am unable to definitively make this determination, but, adequate coordination and collaboration processes appear to exist. If confirmed, I will ensure that dialogue with the Department and the National Science Foundation is open and transparent.

Question. National Aeronautics and Space Administration (NASA) on hypersonics and other space research and the viability and availability of testing facilities?

Answer. From my current vantage point, I am unable to definitively make this determination, but adequate coordination and collaboration processes appear to exist. If confirmed, I will ensure that dialogue with the Department and NASA is open and transparent.

Question. National Institutes of Health (NIH) on areas in which military medical research and vaccine development overlap with civilian medical needs?

Answer. From my current vantage point, I am unable to definitively make this determination, but adequate coordination and collaboration processes appear to exist. If confirmed, I will ensure that dialogue with the Department and NIH is open and transparent.

Question. Intelligence Community in setting defense research priorities to prepare for future threat environments?

Answer. From my current vantage point, I am unable to definitively make this determination, but adequate coordination and collaboration processes appear to exist. If confirmed, I will ensure that dialogue with the Department and the Intelligence Community is open and transparent.

Question. Department of Homeland Security on homeland defense and national security-related science?

Answer. From my current vantage point, I am unable to definitively make this determination, but adequate coordination and collaboration processes appear to exist. If confirmed, I will ensure that dialogue with the Department and Department of Homeland Security is open and transparent.

Question. If confirmed, how would you work with other Federal agencies and the Office of S&T Policy to improve coordination?

Answer. From my current vantage point, I am unable to definitively make this determination, but adequate coordination and collaboration processes appear to exist. If confirmed, I will ensure that dialogue with other Federal agencies and the Office of S&T Policy is open and transparent.

TECHNOLOGY STRATEGY

Question. What weaknesses, if any, do you see in the current Defense S&T strategic planning process?

Answer. I do not have enough insight into the internal DOD Strategic planning process to judge this activity.

Question. What do you believe are the key attributes for a good strategic plan that can be effectively utilized for programming and budgeting purposes?

Answer. I believe a good strategic plan should be simple, clear, realistic, and widely disseminated. Additionally, a strategic plan should be linked to higher goals and provide guidance for subordinate organizations.

Question. If confirmed, how would you work to ensure that strategic plans are utilized during the budget planning and programming process?

Answer. Before recommending how I would do this, I need to participate in the DOD budget planning and programming process and will do so if confirmed.

TECHNOLOGY TRANSITION

Question. The Department's efforts to quickly transition technologies to the warfighter have yielded important results in the last few years. The Department's fiscal year 2010 budget proposes increases across a spectrum of technology transition programs. Challenges remain, however, in successfully transitioning new technologies into existing programs of record, fielded systems, and major weapons systems and platforms.

What challenges exist in technology transition within the Department?

Answer. Based on my experience, lack of funding flexibility and the extended timelines of DOD requirements and budget processes are challenges to technology transition. Successful transition requires an appropriately mature technology, a user need, an insertion window in the program of record, and budgeted resources for implementation. This alignment is hard to achieve and maintain, and the gap between S&T and acquisition often needs bridge funding in the execution year.

Question. What would you do, if confirmed, to address these challenges?

Answer. If confirmed, I will review the mechanisms and processes that are in place and determine if improvements are needed.

Question. What is the role of the DDR&E in facilitating communication between technical communities, acquisition personnel, and end users to speed technology transition?

Answer. I believe one key factor to successful technology transition is early engagement. If confirmed, I will foster relationships among these communities by understanding the needs of the warfighter and by interpreting those needs in a manner that allows the acquisition system to respond.

Question. Do you believe that we need to change the manner in which we fund technology transition in DOD? If so, what changes would you recommend?

Answer. I am aware that the 2009 National Defense Authorization Act mandates the Department to develop an assessment of various technology transition programs within DOD, and that an assessment is being performed by the DDR&E staff. If confirmed, I will ensure that the assessment goals meet the intent of the language, and that appropriate action is taken to balance our technology transition portfolio with the needs of the warfighter.

SYSTEMS ENGINEERING AND PROTOTYPING

Question. Do you feel that DOD has sufficient systems engineering expertise in its current workforce or contractor base?

Answer. I am aware that some aspects of prior acquisition reform initiatives may have removed technical capability from the government workforce and delegated them to the contractor base.

Question. What changes do you anticipate will be made in the Department's systems engineering organization and practices as a result of the enactment of the Weapon Systems Acquisition Reform Act of 2009?

Answer. The Weapon Systems Acquisition Reform Act of 2009 identifies a key role for systems engineering in the acquisition process. I believe there will be opportunities to strengthen systems engineering in response to this act.

Question. What is the value of competitive prototyping in increasing the success of DOD acquisition efforts?

Answer. I regard prototyping as a critical path to enhanced technology development and reduced technical risk. Through competitive prototyping we should be able to achieve more predictable cost, schedule and performance outcomes leading to increased success with our DOD acquisition programs.

Question. What impact do you expect the Weapon Systems Acquisition Reform Act of 2009 to have on competitive prototyping efforts by DOD?

Answer. I expect the Weapon Systems Acquisition Reform Act of 2009 to have a positive impact by adding significant authority to the DOD's competitive prototyping policy. The competitive prototyping clarification, combined with the systems engineering emphasis provided by the legislation, offer the opportunity to identify, scope, resource and execute the pre-milestone B activities collaboratively between the requirements and the acquisition communities to develop the data required to fully inform the milestone B.

Question. If confirmed, how will you work to increase the amount of systems engineering projects and competitive prototyping efforts that are undertaken by DOD and its contractor base?

Answer. If confirmed, I will facilitate communication between the S&T community and the systems engineering community to engage with programs early in the acquisition lifecycle, and work to ensure maturity and integration issues of critical technologies are fully addressed.

VENTURE CAPITAL STRATEGIES

Question. In recent years, some components of DOD have attempted to follow the lead of the intelligence community by using venture capital firms to make investments in developing technologies.

What role do you believe that venture capital firms should play in DOD's investments in developing technologies, including in the Small Business Innovation Research (SBIR) program?

Answer. Venture capital firms can provide access to innovative companies that might not normally gain exposure to DOD. If confirmed, I will explore opportunities within DOD guidelines to capitalize on the ability of venture capital firms to reach companies to identify technology solutions of interest to DOD within legal authorities.

Question. What advantages and disadvantages do you see in the use of venture capital strategies?

Answer. The advantage of venture capital strategies is that they provide windows to companies that are not traditional DOD partners. The disadvantage to venture capital strategies is that small firms are not often fully cognizant of government practices.

Question. When DOD does decide to use venture capital strategies, what steps do you believe the Department should take to ensure that DOD funds are invested in technologies and companies that properly reflect national defense priorities, avoid the potential for conflicts of interest by industry partners, and ensure that the Department's investments are not diluted?

Answer. I believe before investing in a venture capital opportunity, the project should be reviewed to ensure it will meet a military requirement and is not duplicating the work that is already being supported through other programs. The review should include the full participation of interested parties and potential users within DOD.

Question. What other strategies do you intend to employ, if confirmed, to ensure that the nation's most innovative companies work on DOD research and engineering programs?

Answer. If confirmed, I will conduct a review of existing mechanisms that allow innovative companies to work with DOD and identify any obstacles that prevent innovative companies from working with DOD.

INTERNATIONAL RESEARCH COOPERATION

Question. In your view, how should increased globalization of defense technology affect DOD's research and technology development and investment strategy?

Answer. The increased globalization of defense technology impacts the DOD on several levels. First, the intellectual capital advantage the U.S. once enjoyed is being eroded as other nations' R&D investments increase. The U.S. no longer enjoys a monopoly in some technologies. Finally, the non-U.S. science and engineering labor force continues to expand at a greater rate than that of the U.S. Because technology is becoming a global commodity, I believe the Department should look to expand, within policy guidelines, international S&T awareness. If confirmed, I will work towards that goal.

Question. What is your assessment of the value of cooperative research and development programs with international partners?

Answer. From my current vantage point, I understand the value of cooperative research and development with international partners. This value needs to be balanced with national security factors to maximize research and development output without security risk. If confirmed, I will review international cooperative agreements in this light.

Question. In your view, what are the obstacles to more effective international cooperation, and, if confirmed, how would you address those obstacles?

Answer. From my current vantage point, I am unable to assess obstacles to more effective international cooperation, but if confirmed, I will work hard to balance the benefits of international cooperation, which I believe exist, with the risks, and take appropriate action.

Question. How will increased international technology cooperation affect our domestic defense industrial base?

Answer. My experience has shown me that a case-by-case assessment of the impact of any proposed international technology cooperation includes the impact on the domestic industrial base.

Question. How should DOD monitor and assess the research capabilities of our global partners and competitors, and of the global commercial sector?

Answer. I am aware all of the Services have offices around the globe to assess the research capabilities of our global partners. Since global technology is important, if confirmed, I will examine the output of these offices and take steps to strengthen their capability if needed.

TEST AND EVALUATION

Question. What are your views on the adequacy and effectiveness of the Department's development and OT&E activities?

Answer. From my current vantage point, I am not able to comprehensively assess the adequacy of the Department's developmental or OT&E activities. I do know that a properly defined test plan should improve technology development, and, if confirmed, I would be responsible as CTO for demonstrations, and would review test plans accordingly.

Question. What changes do you anticipate will be made in the Department's developmental testing organization and capabilities as a result of the enactment of the Weapon Systems Acquisition Reform Act of 2009?

Answer. From my reading of the Weapons Systems Acquisition Reform Act of 2009, I understand that the statute requires creation of a position entitled D,DT&E. Since such a position does not currently exist, I believe the new statute will drive change to D,DT&E.

Question. What modifications would you recommend to the test and evaluation processes in DOD to more efficiently and quickly develop and deliver operationally effective and suitable technologies to the warfighter?

Answer. I believe it is important that equipment and technology acquired by the Department be subject to robust Systems Engineering, comprehensive Developmental Test and Evaluation, and realistic OT&E. If confirmed, I would enforce the provision of the Weapons Systems Acquisition Reform Act of 2009 that addresses the technology maturity issue through the activities of the DDR&E, in consultation with the D,DTE.

SMALL BUSINESS ISSUES

Question. If confirmed, how would you work to ensure that the SBIR program serves a useful purpose in meeting the Department's research goals?

Answer. The DOD SBIR program represents a substantial augmentation to the Department's core tech base research funds. SBIR research topics and contracts should support DOD priority needs, and be complementary to core research investments. If confirmed, I will review the current DDR&E process for coordinating the SBIR program and will work to ensure that this process yields a valuable contribution to the Department's research investments.

Question. What guidance or direction do you consider necessary regarding transition of the research results of SBIR programs to major weapons systems and equipment?

Answer. If confirmed, I will work with the DOD Office of Small Business Programs, and other appropriate offices, to develop mechanisms to improve the visibility of SBIR technologies to major weapons programs, as well as with the Services SBIR program managers to make sure the SBIR research is as relevant as possible.

Question. What emphasis would you place, if confirmed, on participation by the acquisition community in setting research priorities for the SBIR and in accepting new solutions into existing programs of record?

Answer. I do not know the current process for balancing SBIR priorities, but I believe that acquisition programs should be a source of SBIR research topics, and should be an interested and willing customer for SBIR products. Topics for new SBIR competitions should be informed by acquisition community needs and shortcomings. If confirmed, I will encourage Service Acquisition Executives to play a vigorous role in developing new SBIR research topics, and in fostering adoption of mature SBIR technologies into programs of record.

Question. In your judgment, are modifications needed to the Department's SBIR program to ensure it meets the Department's goals and is updated to support research costs of the small business community?

Answer. In general, I believe that the Department is best served by an SBIR program that enables contracts in each SBIR phase to be properly scaled for anticipated costs of the intended research, and that the size limit on SBIR-eligible firms should be strictly applied so as to encourage maximum participation by small firms. If confirmed, I will examine the SBIR program in more detail to determine if modifications are needed.

DEFENSE LABORATORIES

Question. What is your overall assessment as to the technical capabilities and quality of Defense laboratories relative to their Department of Energy, FFRDC, industry, academic and foreign peers?

Answer. I believe that a robust and rigorous S&T program, which includes high-performing DOD laboratories, is important to our national security. The DOD laboratories provide a unique and dedicated array of capabilities for the military. The DOD labs, working in partnership with other agency and university laboratories, have historically played a major role in our military's technology superiority. How-

ever, based on recent assessments, there may be a need for improvement. If confirmed, I will place a priority on examining our Defense laboratories and workforce. We will study comparisons between the Department of Energy national laboratories, NASA research centers, the National Institute of Standards and Technology, as well as universities and industry. If necessary improvements are identified, a plan will be developed for their implementation.

Question. What are your views on the most effective management approach for personnel at these facilities?

Answer. The ability of the DOD laboratories to support the Department's missions through research and technology development is important for our national security. The keys to a productive laboratory are its workforce and providing a state-of-the-art technical environment in which scientists and engineers have the opportunity to develop innovative concepts. Providing laboratory directors flexibility in their ability to hire, train, and retain a talented technical workforce and providing them with facilities conducive to scientific discovery are essential. If confirmed, I will study which management practices have yielded good results and work towards expanding their use.

Question. A review of defense laboratories operations shows various deficits in personnel management, infrastructure renewal, physical plant recapitalization rate, support services adequacy, etc. Some analyses have indicated that these deficiencies result from excessive centralized control.

Do you support significantly increased delegation of operating authority to the lab director?

Answer. I believe in aligning responsibility at the lowest possible level needed to execute. Consequently, I support, in principle, delegating increased operating authority to laboratory directors. If confirmed, I will direct the Deputy Under Secretary of Defense for Laboratories and Basic Sciences (USD(LABS)) to review personnel management, infrastructure recapitalization, and other lab issues, and provide recommendations to address identified problems. I will then work towards developing the necessary authorities for lab directors based upon these recommendations.

Question. If confirmed, what steps, if any, will you take to improve the quality, technical capabilities, and mission performance of the Defense laboratories?

Answer. The first step to take towards improving any enterprise is to assess objectively the current state of the enterprise. Before delineating specific steps to take to improve the DOD labs, if confirmed, I would take steps to fairly assess their quality, technical capabilities, and so forth. In general, I believe the labs are a critical element in addressing identified warfighting capability needs, both current and future, as well as developing technology to meet potential threats in the future. I believe it is important to preserve this capability.

Question. Would you support transitioning certain laboratory capabilities into Federally-Funded Research and Development Centers or Government Owned-Contractor Operated facilities?

Answer. If confirmed, I will ask the Deputy USD(LABS) to study these options, and provide recommendations.

LABORATORY PERSONNEL MANAGEMENT

Question. The Department's research and development laboratories perform unique functions in serving national security missions and do not readily fit into the general operational management structure. The JASON study observed that "civilian career paths in the DOD research labs and program management are not competitive to other opportunities in attracting outstanding young scientists and retaining the best people." Congress has enacted legislation granting special authorities to the Secretary of Defense for flexible management and personnel demonstration experiments at the laboratories and has exempted the demonstration laboratories from inclusion in the National Security Personnel System until 2012.

Would you support making the laboratories' exemption from NSPS permanent and enabling them to make full use of the flexibilities inherent in the laboratory demonstration program's enabling statutes?

Answer. Based on recent news articles, I believe DOD is currently assessing the implementation of NSPS and is also assessing flexible hiring authorities. The result of that assessment would be a factor in any decisions about further implementation of lab management.

Question. What particular workforce challenges does the Office of the DDR&E have?

Answer. A technically skilled and competent workforce is essential to the success of technology development and acquisition programs. Attracting, hiring, training,

and retaining a technical workforce is a pressing challenge facing many organizations. If confirmed, I would take steps to attract and retain the best possible personnel. Such steps include but are not limited to ensuring effective outreach programs to students, offering competitive salaries to employees, training personnel to ensure they maintain their skills, and providing an environment which stimulates innovative thinking and risk taking.

Question. If confirmed, how will you go about making the resource assessment required by section 104(b) of the Weapon Systems Acquisition Reform Act of 2009?

Answer. If confirmed, I will ask my Director of Plans and Programs to work with the Deputy USD(LABS), the Director of the Test Resource Management Center, and the Deputy Under Secretary of Defense for Acquisition and Technology to develop an analytical estimate of the resources required.

TECHNICAL AND ACQUISITION WORKFORCE ISSUES

Question. In your view, does the Department have adequate technical expertise within the government workforce to execute its designated acquisition and technical development missions?

Answer. Based on my current vantage point, any assessment of the adequacy of the DOD technical workforce would be an opinion, not an analytical assessment. Because of the importance of people to the technical product, I believe such an assessment needs to be based on hard facts and data. If confirmed, I would require the DDR&E staff to develop the data needed for an analytical assessment before providing an opinion or taking any actions.

Question. What efforts will you undertake, if confirmed, to improve the technical capabilities of DOD in critical areas, such as systems engineering, information assurance, social and cultural sciences, and software engineering?

Answer. I am aware that the DDR&E is responsible for the overall Department's Science, Technology, Engineering, and Mathematics (STEM) education oversight. If confirmed, I would first review existing programs to assess adequacy of the technical workforce, then seek to adjust the programs designed to develop new scientists and engineers to match the supply to the demand.

DEFENSE SCIENCE BOARD STUDY ON THE ROLES AND AUTHORITIES OF THE DIRECTOR OF DEFENSE RESEARCH AND ENGINEERING

Question. Have you reviewed the report of the 2005 Defense Science Board Task Force on the Roles and Authorities of the DDR&E?

Answer. I have read the 2005 Defense Science Board Task Force on the Roles and Authorities of the DDR&E.

Question. If so, what are your views of this report and, if confirmed, how would you plan to utilize the findings of the Defense Science Board Task Force?

Answer. If confirmed, I will review the report in detail to determine which recommendations remain relevant, and work with leadership of DOD on determining what findings and recommendations should be implemented and how best to implement these recommendations.

DEFENSE ADVANCED RESEARCH PROJECTS AGENCY

Question. What is your view of the appropriate relationship between the DDR&E and the Director of DARPA?

Answer. The Director of DARPA reports to the DDR&E per DOD Directive 5134 and I have no reason to believe that changes should be made to this relationship.

Question. What do you believe is the proper research mission for DARPA?

Answer. DARPA has a long and storied history of being an engine of innovation for the U.S. DARPA's ability in being able to tackle some of the most difficult problems facing the DOD, and apply very innovative solutions is unique. I believe the proper role for DARPA is to conduct the high-risk, high-payoff research for the Department, and to share that work with the Services and others within the government.

Question. What adjustments do you expect to make, if confirmed, to the current style of DARPA research program management and investment strategy?

Answer. If confirmed, I intend to work closely with DARPA, as well as the Services, to provide a balanced technology approach for the Department. If confirmed, I will closely examine the current DARPA and Service management processes to determine if adjustments are required, and if they are, how to provide the best possible, but balanced product to meet current and future needs of DOD.

Question. What do you believe are the key characteristics of an effective DARPA Director?

Answer. I believe the DARPA Director should have the skills to effectively communicate the value of the DARPA product, have an ability to build teams outside of DARPA, and finally, be infused with a spirit that does not accept that something cannot be done.

Question. What, in your view, is the appropriate relationship between DARPA and the Service S&T programs?

Answer. The appropriate relationship between DARPA and the Services should be complementary. DARPA pushes the far side to develop the big leap-ahead advances, while the Service S&T programs draw upon these technological advancements to develop products. Any S&T program that does not balance these two forces is, I believe, suboptimal. If confirmed, I will work to maintain this balance.

Question. What, in your view, is the appropriate relationship between DARPA and the Service laboratories?

Answer. The laboratories and DARPA are partners in developing technology solutions for the warfighter.

SCIENCE, TECHNOLOGY, ENGINEERING, AND MATHEMATICS EDUCATION

Question. Do you believe that DOD specifically and the Nation as a whole is facing a crisis in STEM education?

Answer. Based on recent blue ribbon studies and my own experience, I believe both the DOD and the Nation have a challenge in STEM education, and our ability to educate, train, and retain students and workers in the STEM fields. This is a particular challenge for DOD, which manages a large part of the Federal science and engineering workforce and 35,000 at the DOD laboratories.

Question. In your view, how will this affect DOD's ability to prosecute its missions?

Answer. The ability of the Department in carrying its missions depends on an educated and talented STEM workforce; consequently, if confirmed, maintaining STEM personnel will be important to me.

Question. What role do you think DOD should play in supporting STEM education?

Answer. I believe the Department should be actively engaged at all levels across the STEM education continuum—pre-college through graduate—and, more importantly, work with the Office of S&T Policy, the National Science Foundation and other Federal components involved in national security, to generate a “whole of government” approach to workforce development.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information. Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the DDR&E?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[The nomination reference of Zachary J. Lemnios follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
May 18, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Zachary J. Lemnios, of Massachusetts, to be Director of Defense Research and Engineering, vice John J. Young, Jr.

[The biographical sketch of Zachary J. Lemnios, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF ZACHARY J. LEMNIOS

Zachary J. Lemnios is Chief Technology Officer at the Massachusetts Institute of Technology (MIT) Lincoln Laboratory. He is responsible for coordinating technology strategy across the laboratory and for establishing and growing strategic external relationships to support current and future laboratory missions. These strategic technology efforts include collaboration with MIT Campus to develop and leverage research projects in support of defense and related activities. He is a member of the Director's Office Staff and Laboratory Steering Committee.

At Lincoln Laboratory, Mr. Lemnios has served as Assistant Division Head of the Solid State Division, a member of the Senior Management Council, and co-chair of the New Technology Initiatives Board. As a Senior Staff member in the Solid State Division, he led efforts to develop novel system applications for a broad range of materials including CMOS/SOI, SiC, GaN, AlGaIn and GaAs. He also developed and inserted advanced microelectronics technology into performance-driven Department of Defense (DOD) applications.

During 2003–2005, Mr. Lemnios was Director of the Defense Advanced Research Projects Agency (DARPA) Microsystems Technology Office, responsible for developing and implementing the strategic vision and technical plans for the office and for transitioning those elements to the DOD. From April 2002 to July 2003, he was the Deputy Director of the Information Processing Technology Office, where he was instrumental in developing and launching a new DARPA direction in cognitive systems.

Prior to joining Lincoln Laboratory, Mr. Lemnios was Assistant Director of the Electronics Technology Office, also at DARPA, and led the development and insertion of advanced microelectronics into many DOD systems. In addition to launching national research initiatives in advanced microelectronics, he sponsored the development of the first 250 nm CMOS/bulk and SOI manufacturing technology base. His further support of wideband and high linearity analog-to-digital converters resulted in key system insertions for critical DOD applications.

Within industry, Mr. Lemnios has held various positions at Hughes Aircraft Company, Westinghouse Electric Corporation, and Ford Microelectronics, Inc. He has served on numerous DOD, industry, and academic committees, including various Defense Science Board studies, the DARPA Information Science and Technology Study Group, and the DARPA Defense Science Research Council.

He holds a BSEE degree from the University of Michigan and an MSEE degree from Washington University in St. Louis, and attended the Harvard Kennedy School of Government Program for Senior Executives in National and International Security. He is also a Senior Member of the IEEE, has authored over 40 papers, holds 4 patents, and has been awarded the Office of the Secretary of Defense Medal for Exceptional Public Service.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Zachary J. Lemnios in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Zachary J. Lemnios.

2. **Position to which nominated:**
Director, Defense Research and Engineering.

3. **Date of nomination:**
May 18, 2009.

4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**
February 21, 1955; Cambridge, MA.

6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Stephanie Bicoulis.

7. **Names and ages of children:**
Melanie, 29; Grace, 26; Sarah, 24; Jon, 22.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.
University of Michigan, 1972-1976, Bachelor of Science in Electrical Engineering
Washington University in Saint Louis, MO, 1977-1979, Masters of Science in Electrical Engineering.

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

08/06 to present, Special Government Employee, Defense Advanced Research Projects Agency.

08/06 to present, Chief Technology Officer, MIT Lincoln Laboratory, Lexington, MA.

03/05 to 08/06, Assistant Head, Solid State Division, MIT Lincoln Laboratory, Lexington, MA.

06/03 to 03/05, Director, Microsystems Technology Office, Defense Advanced Research Project Agency, Arlington, VA.

04/02 to 06/03, Deputy Director, Information Processing Technology Office, Defense Advanced Research Project Agency, Arlington, VA.

03/97 to 04/02, Senior Staff, MIT Lincoln Laboratory, Lexington, MA.

10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Defense Science Board Study Participant, 2006 to present.

DARPA Defense Science Research Council, Red Team, 2008 to present.

DARPA Information Science and Technology, Red Team, 2008 to present.

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

I am a Senior Member of the Institute of Electronic and Electronics Engineers (IEEE).

I am currently serving as Parish Council President for the Hellenic Orthodox Association, Inc. This is the nonprofit corporation that was established to operate the St. Nicholas Greek Orthodox Church of Lexington, MA.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

None.

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

February 2005 - Awarded Office of Secretary of Defense Medal for Exceptional Public Service.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

See Attachment 1.

[Attachment retained in the committee's executive files.]

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

Z. Lemnios, "Creating Capability Surprise," Keynote Speaker for NDIA/DOD Science & Engineering Technology Conference/DOD Tech Exposition, Charleston, SC, April 2009 (included in attachment).

[Attachment retained in the committee's executive files.]

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

ZACHARY J. LEMNIOS.

This 8th day of May, 2009.

[The nomination of Zachary J. Lemnios was reported to the Senate by Chairman Levin on June 18, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on June 19, 2009.]

[Prepared questions submitted to Lt. Gen. Dennis M. McCarthy, USMC (Ret.), by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions? Answer. Yes. I believe the act can be made even more valuable.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. Expand application of the act to more Reserve component personnel, and ensure that educational opportunities are available to enable Reserve component personnel to meet applicable requirements.

DUTIES

Question. Section 138 of title 10, U.S.C., provides that the Assistant Secretary of Defense for Reserve Affairs shall have "as his principal duty the overall supervision of Reserve component affairs of the Department of Defense (DOD)."

If confirmed, what duties do you expect that the Secretary of Defense will prescribe for you?

Answer.

(1) Travel widely to meet with Citizen Warriors, their families and employers to ensure I can provide an accurate assessment of the state of this important triad.

(2) Be an advocate for the effective use and long-term sustainment of the Reserve components.

(3) Meet with combatant commanders and other gaining force commanders to ensure I understand their views of the effectiveness of Reserve component policy and funding to meet their requirements.

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. Forty-one years total Marine Corps service; command and staff assignments in both Active and Reserve units; service as a traditional reservist, balancing employment, family, and military demands; service as a Reserve component chief; service as the Marine component commander of U.S. Northern Command (NORTHCOM); service on the Reserve Forces Policy Board; leadership of the Reserve Officers Association of the United States; a wealth of friendships and relationships with people both in and out of uniform who are interested in the success of the National Guard and Reserves.

Question. What actions will you take to enhance your ability to perform the duties of the Assistant Secretary of Defense for Reserve Affairs?

Answer.

(1) Ensure that I understand the intent of the Secretary of Defense;

(2) keep the Deputy Secretary of Defense and the Under Secretary of Defense (USD) for Personnel and Readiness fully informed in whatever ways they require;

(3) maintain close personal contact with both military and civilian stakeholders to keep up my situational awareness of the status and capabilities of the Reserve components; and

(4) make every effort to ensure that the Office of the Assistant Secretary of Defense Reserve Affairs (OSD(RA)) team understands my intent and is empowered to take appropriate action.

Question. In carrying out these duties, what would be your relationship with the following officials:

The Secretary of Defense.

Answer. Since this position reports directly to the USD Personnel and Readiness, my relationship would be through the USD to the Secretary of Defense. I'm sure there will be "other duties as assigned" and I will carry them out to the best of my ability.

Question. The Deputy Secretary of Defense.

Answer. The same will hold true for Deputy Secretary Lynn.

Question. The Under Secretary of Defense for Personnel and Readiness.

Answer. I intend to work within whatever framework is established by the Under Secretary. I will encourage a transparent information flow both in and out.

Question. The Principal Deputy Under Secretary of Defense for Personnel and Readiness .

Answer. I intend to have a collegial relationship with the Principal Deputy Under Secretary of Defense and support his/her efforts to support the USD, even though this position is not in the reporting chain.

Question. The Assistant Secretary of Defense for Homeland Defense and Americas' Security Affairs.

Answer. A key partner. Developing a collaborative relationship with Assistant Secretary Stockton will be an immediate priority if I am confirmed.

Question. The General Counsel of DOD.

Answer. I intend to seek his advice, concurrence, and counsel on matters that fall under the purview of that office.

Question. The combatant commanders, particularly the Commander, NORTHCOM.

Answer. I view them as "customers" whose principal interest regarding the Reserve component is having capable Reserve component forces when and where they are needed. I would seek to leverage my prior service with both NORTHCOM and U.S. Joint Forces Command to meet their needs.

Question. The Assistant Secretaries in the military departments responsible for Reserve matters.

Answer. As I understand it, the office has an open communication with the Assistant Secretaries at all levels. I would certainly continue to encourage that.

Question. The Chief of the National Guard Bureau (NGB).

Answer. A key partner. OSD(RA) must provide service that enhances his ability to provide forces as required, and to sustain those forces. It is essential that I understand his needs and that I effectively communicate the Secretary of Defense's intent to him.

Question. The Chiefs of Reserves of each of the Services.

Answer. Same as Chief, NGB.

Question. The Assistants to the Chairman of the Joint Chiefs of Staff for Guard and Reserve Matters.

Answer. Achieve an open and transparent relationship in order to leverage their insights into the Chairman's thinking and the status of Joint Staff initiatives.

Question. The Reserve Forces Policy Board.

Answer. Achieve a collaborative relationship that reinforces the Board's ability to fulfill its role as an independent information resource for the Secretary on matters and issues assigned by him to the Board.

MAJOR CHALLENGES

Question. In your view, what are the major challenges confronting the next Assistant Secretary of Defense for Reserve Affairs?

Answer. I believe that our country is in an era of persistent conflict that requires our military forces to fulfill a broad range of missions. Success in this struggle will continue to require the contributions of Reserve component forces, which provide operational capabilities and strategic depth to meet U.S. defense requirements across the full spectrum of conflict. A key challenge, from my perspective, is to sustain the Reserve component as an integral part of the All-Volunteer Total Force.

Question. If confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I intend to work with all interested and affected parties in working toward successful solutions. I anticipate focusing on maintaining a balance for servicemembers among Military Service, families, and employers. I expect to emphasize the continuum of service as a means to sustain the All-Volunteer Force with flexible service options that are attractive to a broad population. It is my perspective that the implementation of the Department's utilization rules that govern the frequency and duration of activations provides predictability for servicemembers and effectively manage the expectations of our servicemembers, their families, and employers.

Question. What do you consider to be the most serious problems in the performance of the functions of the Assistant Secretary of Defense for Reserve Affairs?

Answer. If confirmed, I would have to take the time to ascertain what if any problems there are. It would be presumptuous of me to make a judgment one way or the other. My predecessor, Tom Hall, is a great leader and probably left me an outstanding organization. It is, however, safe to say that effective communication up and down the chain of command is an ongoing challenge for every organization. If confirmed, I will work hard on that issue.

Question. If confirmed, what management actions and time lines would you establish to address these problems?

Answer. I won't know until I get my marching orders from the Secretary, the Deputy, and the Under Secretary, and until I've had some time to meet the people in OSD(RA).

RECRUITING AND RETENTION

Question. Some have expressed concern that use of the Reserve component as an operational force and the current mobilization of Reserve component members for lengthy deployments will have an adverse effect on recruiting and retention in the Reserve components.

If confirmed, what actions will you take to enhance recruiting and retention of experienced members of the Reserve components?

Answer. All of the recent figures I have seen indicate that overall recruiting and retention goals are being met. OSD(RA) should support effective implementation of currently successful efforts that enhance recruiting and promote retention. Supporting families and enhancing partnerships with employers are two of the most effective, albeit indirect, ways to influence retention because they can reduce home and job stress.

Question. Historically, the Reserve components have successfully recruited prior service personnel as they leave active duty. With the increased retention of Active-Duty Forces, the pool of prior service personnel available to the Reserve components is shrinking. Additionally, servicemembers who have been deployed multiple times may be less interested in continuing service in the Reserve components because of the potential for mobilization and additional deployment.

If confirmed, what actions will you take to assist the recruiting efforts of the Reserve components?

Answer. Primarily, I will listen to the Reserve Chiefs and their leaders to ensure I understand what they need to succeed in these areas. I also believe that OSD(RA) can be a "think-tank" for new ideas and approaches. For example, changes in the over-all mix of prior service and non-prior service personnel may indicate that new programs are required to provide noncommissioned officers, warrant officers, and company grade officers in some components. OSD(RA) should support service experimentation efforts to address new challenges that emerge in this era of persistent conflict.

MEDICAL PERSONNEL RECRUITING AND RETENTION

Question. Much of the medical infrastructure for DOD is in the Reserve components. DOD has significant shortages in critically needed medical personnel in both the Active and Reserve components. The committee is concerned that growing medical support requirements will compound the already serious challenges faced in recruitment and retention of medical, dental, nurse, and behavioral health personnel.

If confirmed, will you undertake a comprehensive review of the medical support requirements in the Reserve components and the sufficiency of plans to meet recruiting and retention goals in these specialties?

Answer. I will continue to support the joint, collaborative effort, known as the Medical Recruiting and Retention Working Group, co-led by Personnel and Readiness leaders from Reserve Affairs, Military Personnel Policy and Health Affairs. Their charter is to review and evaluate total force (Active and Reserve) health professions personnel recruitment and retention policies, programs and procedures with an eye toward optimizing tri-service, multi-component cooperation in meeting recruiting and retention requirements.

Question. What legislative and policy initiatives, including greater involvement personnel in recruiting and enhanced bonuses and special pays, do you think may be necessary to ensure that the Reserve components can continue to meet medical support requirements?

Answer. The National Defense Authorization Act for Fiscal Year 2008 included the consolidation of special and incentive pay authorities. The consolidation provides the Department with the increased flexibilities needed to better target recruiting

and retention dollars to specific skills, and enables the Department to more effectively and efficiently manage our personnel. At OSD(RA) they have begun the adaptive planning process for transitioning the bonuses and special pays that meet all the Reserve components' health professions long-term recruiting and retention needs.

USE OF GUARD AND RESERVES

Question. Today's total force concept relies heavily on National Guard and Reserve Forces for both day-to-day and contingency operations. The role of the Reserves is so integral in the total force that military operations involving major, extended missions are required to include Reserve participation. Members of the National Guard and Reserve Forces are performing more and more duties that have been traditionally performed by active duty forces. The Commission on the National Guard and Reserves concluded that "for the foreseeable future, there is no reasonable alternative to the Nation's continuing increased reliance on its Reserve components for missions at home and abroad, as part of an operational force."

In your view, is such extensive use of National Guard and Reserve personnel for duties that have historically been performed by members of the Active components the best use of Reserve component personnel?

Answer. Yes. My experience tells me that the vast majority of Reserve component personnel will rise to meet any challenge, if they are provided the resources to succeed in the field and the supportive services to care for their families and provide employment security. Every member of the National Guard and Reserve serving today has made a conscious decision to do so, knowing full well the demands their service would entail.

Question. If confirmed, what actions will you take to enhance the support of civilian employers of members of the Guard and Reserves?

Answer.

- (1) Expand the Army Reserve's current employer partnership initiative to a joint service program;
- (2) support the National Committee for Employer Support of Guard and Reserves and Defense Advisory Board for Employer Support in expanding their efforts to make themselves more relevant and responsive to both employers and employees;
- (3) use all means available to gauge the level of satisfaction and support for the Operational Reserve by private and public sector employers;
- (4) maintain close liaison with the Department of Labor on issues pertaining to the Uniform Servicemembers Employment and Re-employment Rights Act and the Family and Medical Leave Act;
- (5) review existing policies and programs in the areas of healthcare, family support, and veterans assistance to streamline the transition of Reserve component members between periods of military service and employment; and
- (6) strive to act as a channel of communications between DOD and employers regarding Reserve component employment issues.

HOMELAND DEFENSE AND HOMELAND SECURITY

Question. What do you see as the appropriate role of the National Guard and Reserves in homeland defense and homeland security?

Answer. I believe that homeland defense and homeland security is a Total Force responsibility. However, experience has shown that the Nation needs to focus on better use of the extensive competencies and capabilities of the National Guard and Reserves in support of priority missions. If confirmed, I will update my understanding of the roles, missions, and capabilities of the National Guard and the Reserves and will work to ensure that they have the equipment, training, and personnel to accomplish their missions, both at home and abroad. As stated earlier, I intend to work collaboratively with the Assistant Secretary for Homeland Defense and to support the Commander, NORTHCOM, as directed by the Secretary of Defense.

MOBILIZATION AND DEMOBILIZATION OF NATIONAL GUARD AND RESERVES

Question. In the aftermath of the attacks of September 11, 2001, the National Guard and Reserves have experienced their largest and most sustained employment since World War II. Numerous problems arose in the planning and procedures for mobilization and demobilization, e.g., inadequate health screening and medical readiness monitoring errors caused by antiquated pay systems, limited transition assist-

ance programs upon demobilization, and lack of access to members of the Individual Ready Reserve (IRR). Reserve force management policies and systems have been characterized as “inefficient and rigid” and readiness levels have been adversely affected by equipment stay-behind, cross-leveling, and reset policies.

What is your assessment of advances made in improving Reserve component mobilization and demobilization procedures, and in what areas do problems still exist?

Answer. It is my understanding that advances have been made in increasing the alert and notification times prior to mobilization. This provides predictability to servicemembers, their families and employers. Additionally, this allows the units identified for mobilization to receive increased funding for training and readiness. Servicemembers receive TRICARE medical benefits in advance of mobilization, increasing their fitness for duty and reducing the time to mobilize. The standardization of procedures at home station allows the mobilization station to certify deployment readiness. Pay systems and duty statuses still suffer from antiquated divisions between Active and Reserve components and need improvement.

Question. What do you consider to be the most significant enduring changes to the administration of the Reserve components aimed at ensuring their readiness for future mobilization requirements?

Answer. It is my understanding that one of the most significant enduring changes is the implementation of Service force generation plans that enables units to train and deploy on a more predictable time line.

Question. Do you see a need to modify current statutory authorities for the mobilization of members of the National Guard and Reserves?

Answer. I am not currently aware of any need for changes in these authorities. If confirmed, I intend to study this issue.

Question. Do you agree that National Guard and Reserve personnel should be mobilized to augment civilians deployed to Afghanistan?

Answer. The Department currently has Reserve component members deployed in Provincial Reconstruction Teams and Army National Guard volunteers in Agriculture Development Teams. It is my understanding that the Department of State and United States Agency for International Development have had contact with DOD in their efforts to fill requirements in Afghanistan. Should they require DOD capacity, I have been told that the Secretary has directed the Under Secretary of Defense for Personnel and Readiness to identify civilian employees capable of deploying to Afghanistan in support of U.S. Government initiatives; and should available DOD civilian employees not meet immediate needs, we will work to identify members of the Reserve components available for voluntary deployment, on military orders and in uniform, to fill the requirement.

Question. Do you believe that Reserve personnel should be subject to involuntary call to active duty to respond to national or manmade disasters and other emergencies?

Answer. Homeland Defense and Defense Support to Civil Authorities are Total Force missions. I believe a change to the law would have to occur to allow this. If I am confirmed I will look into all the ramifications involved.

LESSONS LEARNED

Question. What do you believe are the major personnel lessons learned from Operation Enduring Freedom (OEF) and Operation Iraqi Freedom (OIF) which you would seek to address if confirmed?

Answer.

- (1) The advisability of adopting a “train-mobilize-deploy” strategy that increases the flexibility of Reserve component forces, but puts greater emphasis on pre-mobilization readiness in all areas;
- (2) the importance of maintaining unit integrity wherever possible to permit Reserve component units to mobilize, deploy, and return as whole units with their own leaders;
- (3) the critical importance of permitting units to maintain their unit integrity and resume normal activities (including training) as soon as possible after returning from combat;
- (4) the critical importance of fielding modern equipment to units to train with before mobilization. The Services must find ways to “horizontally field” some amount of the most modern equipment to Reserve component units for training prior to mobilization. A “train-mobilize-deploy” force cannot see modern equipment for the first time after mobilization.

OPERATIONAL AND PERSONNEL TEMPO

Question. Current DOD policy is that Reserve component members should have 5 years of dwell time for each year they are mobilized.

What is your view of the achievability of this goal? What measures must be taken to be able to achieve it in 5 years or less?

Answer. I believe the 1 to 5 dwell-time ratio is achievable and progress is being made toward that goal. We must ensure that continuing efforts to rebalance Active and Reserve component units in high-demand/low-supply capabilities are completed and set the conditions to comply with the Department's 1-year involuntary mobilization policy.

Question. In your view, how will shifting resources from Iraq to Afghanistan affect dwell-time ratios?

Answer. I am not currently knowledgeable about specifics on this shift. My goal would be to continue policies that support the attainment of the 1 to 5 dwell goal for all Reserve components.

Question. How will the end of the use of stop-loss affect dwell-time ratios?

Answer. I do not expect the end of stop-loss to have an effect on dwell-time ratios due to the small number of servicemembers affected.

Question. What measures are being taken to respond to operational requirements for low-density/high-demand units and personnel whose skills are found primarily in the Reserve components, e.g., civil affairs, medical personnel, and truck drivers?

Answer. I am told the Services are expanding capacity in selected areas, continuing to rebalance the Active component/Reserve component mix where appropriate, and using joint solutions.

Question. In your judgment, what would be the impact on the current rates of operations and personnel tempo of assigning principal responsibility for support to civil authorities for consequence management of natural, domestic disasters to Reserve component forces?

Answer. I am not sufficiently well informed to express a judgment. However, I believe that we need to guard against "double-counting" units. Given the current operations tempo, a unit assigned principal responsibility for support to civil authorities could not be expected to respond to an overseas deployment mission within the same timelines as a unit not so assigned.

STRESS ON FAMILIES

Question. National Guard and Reserve families have been under great stress since 2001 as a result of multiple and lengthy deployments in OIF and OEF.

In your view, what are the key indicators of the stress on Reserve component families at this time?

Answer. Our Reserve component families do have stress . . . this is a part of life and certainly part of military service. More than ever before we are working to understand and manage these stresses. There are particular indicators of stress on our reservist families that we must stay aware of and among others these include:

- (1) Readiness—how prepared are families to support their military member's service?
- (2) Satisfaction . . . how satisfied is the family with being part of their particular Service?
- (3) Stress . . . What is their reported level of stress?
- (4) Retention . . . What is the family's attitude toward their member staying in the Service?

These key indicators of the stress on our families and how they are coping are monitored every 6 months by excellent surveys by the Defense Manpower Data Center.

Question. If confirmed, what will you do to address these key indicators?

Answer. OSD(RA) should emphasize two key essentials of support for our families:

1. Reasonable and predictable deployments and dwell-time ratios
2. Effective means to deliver support information and resources. Additionally, enhancing employer-employee partnerships will mitigate a key source of stress—concern about employment security.

Question. What do you consider to be the most important family readiness issues in the National Guard and Reserves?

Answer.

- (1) Providing as much predictability as possible;
- (2) effectively communicating between the unit and all family members;
- (3) effectively educating family members about their benefits and about the predictable consequences of military service;

- (4) providing supportive services;
- (5) providing employment security; and
- (6) ensuring that the Nation realizes that families are essential to military success.

Question. If confirmed, how would you ensure support for Reserve component families, particularly those who do not reside near an active-duty military installation, related to mobilization, deployment, and family readiness?

Answer.

- (1) Ensure I understand the Reserve component chiefs' requirements and support them as much as I can;
- (2) continue to support Military OneSource;
- (3) continue to support the Yellow Ribbon program; and
- (4) get as much personal feed-back as possible from Reserve component families to enable me to assess the effectiveness of existing programs, and consider new ones.

Question. If confirmed, what additional steps would you take to ensure that family readiness needs, including child care, are addressed and adequately resourced?

Answer. This is another area where we must not become "installation minded." Rather, we must continually reach out to community partners such as the National Association of Child Care Resource and Referral Agencies. Other resources are well developed and developing by the Department of Veterans Affairs (VA) and the State Directors of VA, as well as the Governors and the resources they provide to their citizens.

I also believe we need to increasingly emphasize the one-stop approach to resources that has developed through Military OneSource. This clearinghouse of information and resources needs to become a household name to all Reserve families. We will continue to increasingly encourage its use by Reserve families in order to link them to the broad array of support services in the areas where they are located. We must identify where there are service gaps in communities and build community capacity.

STOP-LOSS

Question. How will DOD implement the Secretary of Defense's recent direction to end the use of stop-loss without eroding unit manning and unit cohesion?

Answer. I expect the Department to maintain our unit manning and unit cohesion through our existing assignment procedures and increasing use of incentive pay to stabilize units prior to deployment.

The U.S. Army is the only remaining component that utilizes stop-loss to meet manning shortfalls. In order to implement the Secretary of Defense's guidance to end the use of stop-loss, U.S. Army has set deadlines for the termination of the program. Active Army units deploying on or after January 1, 2010, will not be subject to stop-loss policies. Army Reserve units deploying on or after August 1, 2009, and Army National Guard units deploying on or after September 1, 2009, will not be subject to stop-loss policies.

Incentive programs such as Deployment Extension Incentive Pay for soldiers assigned to deploying units that do not have sufficient obligated service remaining will be used to meet manning requirements.

Question. What is your understanding of the risk the Army must absorb to end reliance on stop-loss, and what criteria would you apply in creating financial incentives for soldiers to extend on active duty for deployments?

Answer. I believe the Army can manage without stop-loss through the use of incentives and other personnel management policies.

INDIVIDUAL READY RESERVE

Question. DOD established a policy in 2005 mandating the discharge of officers in the IRR who are beyond their military service obligations (MSO) unless the officer positively elects to remain in the IRR. Meanwhile, the Commission on the National Guard and Reserves has found that accessing the IRR as a viable source of manpower for the war has been problematic and that using the IRR as a solution for unit manning is a failed concept.

What are your views on the proper role of the IRR in force management planning?

Answer. The IRR provides the Military Services with depth in force management planning in both operational and strategic roles. This pool of pre-trained individuals can, if actively managed, significantly enhance a Service's flexibility to surge as force requirements dictate.

Question. If confirmed, what changes, if any, do you foresee making to the IRR recall policy?

Answer. IRR recall policy is a Service option, utilized as manpower requirements necessitate. I am not presently aware of a need for DOD to significantly affect the Services IRR recall policy or process.

Question. What are your views about policies affecting continued service by officer and enlisted personnel in the Reserve components who have fulfilled their MSO?

Answer. The established DOD policy is a necessary force management tool. Officers and enlisted who have fulfilled their MSO should be evaluated by their respective Services for mobilization potential. Officers shall be advised to resign, request transfer to the Standby Reserve, or actively participate in the Reserves. Enlisted shall also be required to participate or be denied reenlistment. Leveraged technology and enhanced training opportunities will improve readiness for those who remain active participants.

Question. What is your assessment of the adequacy of the system in place for members in the IRR receiving orders to active duty to request a delay or exemption for that activation, including the procedures in place for appealing the decision on that request?

Answer. My understanding is the current system of delay/exemption has worked well. I do not anticipate making significant changes unless circumstances dramatically change.

Army IRR mobilizations were capped at 6,500 in January 2004. Marine Corps IRR mobilizations were capped at 2,500 in August 2006. No more than 6,500 soldiers or 2,500 marines can be on orders at any one time.

Question. What is your assessment of the value of the IRR to the All-Volunteer Force?

Answer. The IRR is fundamental to the All-Volunteer Force and an important manpower asset. The nation needs a strategic, as well as an Operational Reserve. The IRR provides the primary source of pre-trained individual manpower for the Strategic Reserve.

MEDICAL AND DENTAL READINESS OF NATIONAL GUARD AND RESERVE PERSONNEL

Question. Medical and dental readiness of Reserve component personnel has been an issue of significant concern to the committee, and shortfalls that have been identified have indicated a need for improved policy oversight and accountability.

If confirmed, how would you seek to clarify and coordinate reporting on the medical and dental readiness of the Reserves?

Answer. I would review the medical and dental readiness programs across the Services, to include command emphasis that is a cornerstone for success. Success of medical and dental readiness is based on three factors: (1) accurate reporting of readiness statistics; (2) fixing minor medical and dental problems; and (3) command emphasis to ensure timely evaluation of members. An electronic readiness record for the Reserve component is vital to this process and linkages must be made with the Active component systems for efficiency and continuity. Additionally, incentives should be in place to motivate members to maintain readiness, a challenge that cannot be accomplished without a commitment from the Services' leadership. To succeed in improving medical and dental readiness reporting, policies must include standardized reporting capabilities with emphasis placed on command accountability for unit readiness.

Question. How would you improve upon the ability to produce a healthy and fit Reserve component?

Answer. Recognizing the value of preventative health practices and providing individuals access and incentives to participate in such practices are the cornerstones for a healthy and fit Reserve component. Encouraging members to maintain optimal health, implementing policies that enable them to do so, and authorizing leadership to provide the means to enforce such policies is critical to a lifetime of fitness for our operational Reserve Forces.

HEALTH CARE FOR RESERVISTS

Question. Members of the Reserve and National Guard who are ordered to active duty for more than 30 days are eligible for the same health care and dental benefits under TRICARE as other active duty servicemembers.

What are your views on the adequacy of Reserve health care?

Answer. Great strides have been made towards the improvement of health care across the Reserve components. TRICARE Reserve Select (TRS) is now available to the Selected Reserve and their families, the exception being those members who are eligible for the Federal Employee Health Benefits Plan. This, however, has not re-

solved all of the health problems our Reserve and Guard members face during their continuum of service. There are gaps in care for those members who have service-connected illness or injuries that are not diagnosed until their TRICARE eligibility has expired. There are also gaps in health care for IRR who are mobilized or volunteer for service. This group is not currently eligible for TRICARE plans other than dental when not on active duty orders, yet they are expected to maintain their medical and dental readiness in order to be eligible to participate.

Question. Do you have any suggestions for improving continuity of care for Reserve members and their families?

Answer. Since the inception of the Total Force and now an Operational Reserve, the fragmented health care system has impacted not only our members, but also their families. Many continuity of care gaps have been bridged through the expansion of TRS, but gaps still remain. Selected Reserve members and their families now have the option of a continuum of care through the TRICARE network as long as the member participates in the Selected Reserve. Members of the IRR and their families do not have this option. We need to look at the feasibility of somehow filling this gap in coverage for the small group of IRR members who actively participate.

We must expedite in the development of an electronic health record to provide adequate care for our Reserve component members. This record should follow the members from enlistment through retirement with a mechanism for transferring the information to the Veterans Administration for follow on care.

We must also look for ways to expand the number of health care providers who will accept TRICARE.

Question. TRS authorizes members of the Selected Reserve and their families to use TRICARE Standard military health care program at a subsidized rate when they are not on active duty.

What is your assessment of TRS?

Answer. TRS, established in 2005, has been enhanced to provide nearly universal coverage to most members of the selected Reserve. Yet studies have shown that the number of uninsured reservists has not significantly changed. Further, there is no evidence that the increase in health care coverage has improved medical readiness or had an effect on recruiting and retention. So far, very few Reserve members have enrolled in TRS—less than 4 percent of those eligible.

At the beginning of January 2009, the monthly premiums for TRS were significantly reduced, dropping from \$81 to \$47.51 for single coverage and from \$253 to \$180.17 for family coverage. It remains to be seen whether this reduction in premiums will have a significant impact on the number of members electing to purchase TRS. However, I understand the enrollment in TRS continues to increase, so this change seems to be helping. We need to evaluate how to leverage this valuable program to improve the health and readiness status of our Reserve component members. I believe we need to do a better job of educating leaders about TRS so they can better inform their troops.

Question. Will TRS enhance recruiting for the Reserve components?

Answer. What we have seen with TRS is that it has not been successfully used as either a recruiting or retention tool. I understand that the enrollment rate has been steadily increasing, especially since the premiums were reduced significantly in January. Rather than discount the value of TRS as a recruiting or retention tool, we need to re-evaluate TRS in the current economic light. With the high rates of unemployment and the increase in the number of uninsured in the general population, TRS may be regarded as a tangible incentive to a prospective recruit and may provide an affordable continuum of health for the member who might otherwise consider separating. We need to re-energize a communication plan to educate our members and potential members about the value of TRS for our members and their families. We should also explore the best ways to use TRS in connection with our efforts to collaborate more effectively with employers.

NATIONAL GUARD ORGANIZATION, EQUIPMENT, AND READINESS

Question. Legislative proposals introduced in recent years and recommendations of the Commission on the National Guard and Reserves have proposed numerous changes to the roles and responsibilities of the National Guard and Reserves. Several of the proposed changes have been implemented, and numerous others are under consideration.

How do you assess the changes in the roles, mission, and authorities of the Chief of the NGB and the Army and Air National Guard?

Answer. Positive. The 2008 DOD directive codified the organization, management, responsibilities and function, relationships and authorities of the Chief, NGB. As

this new relationship matures, I am sure this will enhance the effectiveness of the Department.

Question. In your view, do the current Army and Air Force processes for planning, programming, and budgeting sufficiently address the requirements of the Army and Air National Guard?

Answer. I am not sufficiently well informed to answer this question.

Question. What is the appropriate role of the Chief of the NGB in this regard?

Answer. The role of the Chief, NGB is that of advisor to the Secretary of the Army and Secretary of the Air Force in addition to the combatant commanders. This should ensure that the Chief, NGB is well positioned to fully engage in the program-planning-budgeting system process to identify NGB and National Guard requirements.

RESERVE FORCES POLICY BOARD

Question. What is your view of the appropriate role, function, and membership of the Reserve Forces Policy Board (RFPB)?

Answer. I believe the Secretary's recent report to Congress regarding the RFPB laid out an extremely effective proposal for organizing and utilizing the RFPB.

EMPLOYMENT OF FULL-TIME SUPPORT PERSONNEL

Question. Active Guard and Reserve personnel providing full time support are not authorized to perform State active duty missions even in emergencies or disaster situations. On occasion, this can deny an important resource, e.g., aviation capability, to a State Governor in need of assistance.

Do you think that, as a matter of policy, Active Guard and Reserve members should be prohibited in all cases from performing State active duty missions?

Answer. If the law prohibits Active Guard and Reserve personnel providing full-time support from performing State active duty missions even in emergencies or disaster situations, I would expect the DOD to follow the law.

Question. Under what circumstances, if any, do you believe such use should be authorized?

Answer. If confirmed, I would look forward to examining this issue more closely and, if appropriate, providing the Under Secretary of Defense for Personnel and Readiness and the Secretary of Defense with recommendations for change.

QUADRENNIAL REVIEW OF MILITARY COMPENSATION

Question. Last year, the Department completed work on the 10th Quadrennial Review of Military Compensation (QRMC), releasing Volume I of its report in February 2008 and Volume II in July 2008. Among other recommendations, the QRMC proposes a new defined benefit retirement plan that more resembles the benefits available under the Federal Employee Retirement System than the current military retirement benefit.

What is your assessment of the QRMC recommendations, particularly the proposed new defined retirement plan?

Answer. While similar proposals were entertained by the Defense Advisory Committee on Military Compensation (DACMC), my concern is that any proposed retirement alternative replicates the experience mix of personnel in the current system and the desired career lengths determined by the RC force management plans.

Question. What recommendations, if any, would you propose that Congress implement?

Answer. If Congress chooses to consider the QRMC's recommendations for a defined benefit and contribution retirement plan, it should also agree to conduct the QRMC-proposed multiyear demonstration project prior to force-wide implementation, in order to reduce the uncertainties and risks associated with a transition to a new retirement system.

Question. Are the pay and benefits for Reserve personnel appropriate for the types of service they provide?

Answer. Although we have seen significant enhancements in military pay and benefits in the past 7 years, I plan to continue ongoing efforts to achieve equity in Reserve compensation.

Question. If confirmed, would you recommend any changes to Reserve personnel compensation policies and statutes?

Answer. A few perceived inequities are still a matter of concern for certain Reserve component members. I will conduct a close review of certain basic allowances and reimbursements. The actions Congress has taken with regard to Reserve retirement have been positive.

GI BILL BENEFITS

Question. Last year, Congress passed the Post-September 11 Veterans Educational Assistance Act that created enhanced educational benefits for service-members who have served at least 90 days on active duty since September 11. The maximum benefit would roughly cover the cost of a college education at any public university in the country.

What is your assessment of the effect of this act on recruiting and retention in the Reserve components?

Answer. I believe it is too early to assess the post-September 11 effects on recruiting and retention, but I will be closely monitoring its implementation and corresponding RC enrollment.

Question. What is your understanding of the sufficiency of the implementation plan for the transferability provisions contained in the act?

Answer. I understand that the implementation of the transferability provisions of the post-September 11 GI Bill have been coordinated within the DOD and are in the final stages of interagency coordination. Also, the proposed policies and procedures have been furnished to the field and fleet and DOD expect the final results to mirror those provisions. The Reserve components have been integral in the development of these policies and are poised to implement.

Question. Montgomery G.I. Bill educational benefits for members of the Selected Reserve under chapter 1606 of title 10, U.S.C., are an important recruiting and retention incentive. However, the level of the monthly benefit has not risen proportionately over time with that of Montgomery G.I. Bill benefits payable to eligible veterans under chapter 30 of title 38, U.S.C.

What is your view of the adequacy of the current monthly benefit levels under the Selected Reserve Montgomery G.I. Bill?

Answer. Educational assistance benefits under chapter 1606—the Montgomery G.I. Bill-Selected Reserve—have not kept pace with the rising cost of college education; in 2008 the monthly benefit level of \$317 covered only 22 percent of tuition, fees, room and board.

Question. Would you recommend any changes to this program?

Answer. I believe that an increase in the monthly benefit is necessary to maintain the attractiveness of the Montgomery G.I. Bill-Selected Reserve as a force management tool.

SCIENCE AND TECHNOLOGY ACADEMIES REINFORCING BASIC AVIATION AND SPACE EXPLORATION (STARBASE) PROGRAM

Question. The DOD STARBASE program is an effective community outreach program that operates under the oversight of the Assistant Secretary of Defense for Reserve Affairs. The goal of the DOD STARBASE program is to raise the interest and improve the knowledge and skills of at-risk youth in math, science, and technology by exposing them to the technological environment and positive role models found at military bases and installations. It currently operates at 54 locations throughout the United States.

What are your views about the STARBASE Program?

Answer. The President has taken a position to make math and science education a national priority. The program supports this effort. I have had an opportunity to read the DOD STARBASE Program Annual Report and agree with my predecessor that “the strength of the program lies in the three-way partnership between the military, the local communities and the school districts. . . . In the end, the success of the program depends on the student experience and the quality instruction delivered by DOD STARBASE Program staff and military volunteers.” General Renuart, Commander, North American Aerospace Defense Command and NORTHCOM stated “The partnership among local military installations, school districts, and the surrounding communities created by participation in the DOD STARBASE Program ensures all are valued and equal stakeholders in the education of our children and that we are all accountable for the product: well-educated, articulate young men and women who are ready to take on the environment they will see in their future.”

Question. Do you believe that Guard and Reserve personnel should be involved in the STARBASE program?

Answer. Yes, because the students benefit by becoming exposed to our military culture which values knowledge, opportunity, and diversity. In the report, General Renuart also stated that military personnel get the chance to act as a role model, to teach responsibility and leadership, and to shape the lives of these young students. In addition, exposing the students to our wonderful role models, they become embraced to core values like service, integrity, and pursuit of excellence.

Question. Do you believe that it is appropriate to fund this program through the DOD budget?

Answer. Yes, for the reasons stated in my answers to the previous questions. Furthermore, in the report General Chilton, Commander of U.S. Strategic Command, stated that DOD STARBASE is a DOD program that provides opportunities where young students can learn, pursue their dreams, and make them come true. Students get to see and do, experiencing first hand the wonders of learning, and get them interested in science, technology, math and engineering.

NATIONAL GUARD YOUTH CHALLENGE PROGRAM

Question. In 1993, the National Guard, as part of their community mission, established the Youth Challenge Program to help at-risk youth improve their life skills, education levels, and employment potential. In 1998, the Federal share of funding for this program was reduced to 75 percent, with a subsequent annual decrease of 5 percent each year through 2001, so that the Federal share is now 60 percent. Advocates for Youth Challenge have urged that the Federal Government fund 100 percent of the costs during the first 2 years of operation of a State program and restoration of the 75 percent Federal and 25 percent State cost sharing after 2 years in order to increase the number of youths who are able to participate and to facilitate more states offering programs.

Question. What are your views about the National Guard Youth Challenge Program?

Answer. The President has taken a position to address the high school dropout crisis. General McKinley, Chief of the NGB, acknowledged that the National Guard Youth Challenge Program helps address this dropout crisis. It has been reported that over 84,700 students have successfully graduated from the program, with 80 percent earning their high school diploma or general education degree. On average, 26 percent go on to college, 25 percent enter the military, and the remainder join the work force in career jobs. A longitudinal study conducted by MDRC reported that the early results of their evaluation suggests that partway through the cadets Youth Challenge experience, they are better positioned to move forward in their transition to adulthood.

Question. Do you believe this Program should be funded through the DOD budget, or through some other means?

Answer. The National Guard Youth Challenge Program should be funded and managed by the DOD and the NGB because of the strong military linkage which is a key element to the program's success.

Question. What is your recommendation regarding the appropriate level of Federal (versus State) funding of this program?

Answer. The change to the Federal share is appropriate and similar to other cost share requirements. In addition, reducing the State cost share burden would make the continued viability of the National Guard Youth Challenge Program more likely during these economic conditions.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes, I agree.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Assistant Secretary of Defense for Reserve Affairs?

Answer. Yes, I agree.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided in a timely manner to this committee and its staff and other appropriate committees?

Answer. Yes, I agree.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes, I agree.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

STRESS ON RESERVE COMPONENT FAMILIES

1. Senator MCCAIN. Lieutenant General McCarthy, you discussed key indicators of stress on reservists' families in your responses to the committee's advance policy questions. You stated that efforts are being made to understand and manage these stresses. What do you consider to be the most significant indicators of stress as a result of deployments?

General MCCARTHY. I am responding with a personal opinion, rather than a professional one, because I am not trained in this area. The most obvious indicators of family stress seem to me to be: changes in overall divorce rates; increase in incidents of domestic discord; declines in school performance by the children of Reserve component members; and increase in suicides involving Reserve component family members. Again, speaking as someone without training in sociology and related fields, precisely assessing these issues would seem very difficult unless one had baseline measurements that were drawn at some period shortly before partial mobilization began in 2001.

2. Senator MCCAIN. Lieutenant General McCarthy, please elaborate on the surveys that are being conducted and how accurate you consider them to be and what actions you will take, if confirmed, to gauge the well-being of Reserves and their families.

General MCCARTHY. If confirmed, I will rely heavily on professional collection and analysis of data by agencies such as the Defense Manpower Data Center. Its "2008 Survey of Spouse Perceptions of Deployment Support" was the primary study to which I referred in my previous responses. However, I also believe strongly in listening to troops, their commanders and family members in attempting to assess their morale and level of satisfaction. As Secretary Gates has said, there is no substitute for first-hand contact with our forces and their families.

APPLICATION OF GOLDWATER-NICHOLS ACT TO RESERVISTS

3. Senator MCCAIN. Lieutenant General McCarthy, you have expressed the view that the requirements of the Goldwater-Nichols Act should be expanded to apply to more reservists and that greater educational opportunities need to be made available to reservists and guardsmen. Please explain your thinking in this regard.

General MCCARTHY. (a) I generally concur with the recommendations of the Commission on National Guard and Reserves in this area, and I believe Secretary Gates' directive on implementing these recommendations is the correct way ahead. (b) The active component was significantly improved by the original congressional mandates for joint education and qualification. The Reserve component will be similarly improved if those mandates are extended to the Reserve components in an achievable manner. (c) Extending the requirement for Reserve component personnel to become "joint qualified" will require expansion and improvement of the way "joint" education is delivered. DOD should be authorized to make greater use of distance learning in this area for both Active and Reserve component personnel. Doing so will increase accessibility, and I believe it can be done without reducing the quality of the educational experience. Assessment and calculation of "joint service credit" will also require some adjustment to comport with the reality of Reserve component assignment and service patterns.

4. Senator MCCAIN. Lieutenant General McCarthy, where are the deficiencies today, and what do you consider to be the most pressing changes that should be made?

General MCCARTHY. As stated above, I believe accessibility to joint education, and opportunities for Reserve component personnel to serve in joint assignments should both be expanded.

5. Senator MCCAIN. Lieutenant General McCarthy, while there are many calls today for greater opportunities for Reserve and Guard personnel to serve in senior leadership positions, I have concerns about the adequacy of general officer development in the Guard and Reserve and whether the Services and the Office of the Secretary of Defense can predictably produce a pool of officers with the necessary experience and qualifications to assume the most senior command and staff positions. Can you comment on your experience and on what steps should be taken?

General MCCARTHY. I am confident that the talented men and women who serve as flag and general officers in the Reserve components will rise to meet any challenge. Given the education, training and experience, they will match the development of their age and grade peers in the active component. We need a human capital strategy that views the most senior officer and enlisted personnel as “talent resources” to be used where they can best contribute to national defense and security, without regard to the component from which they are drawn.

TRICARE FOR RESERVES

6. Senator MCCAIN. Lieutenant General McCarthy, there has been a recent surge in enrollment in the program created by Congress to allow reservists in a non-active status and their families to enroll in the TRICARE program. Has this program met the goals of improving retention in the Reserves as well as improving continuity of health care services and if not, how would you seek to improve it, if confirmed, as Assistant Secretary?

General MCCARTHY. I have been told that, at present, retention in all services within the Reserve component is meeting desired levels. I am sure that TRICARE Reserve Select (TRS) is one factor in a Reserve component member’s decision to remain in uniform. How much any one factor influences such a complex decision probably cannot be stated with absolute certainty. TRS does contribute significantly to “continuity of health care” in that it enables the family of a servicemember to remain in the same healthcare network whether the sponsor is on or off active duty. I believe we still need to improve the awareness of servicemembers and their families about how TRS works. I also believe we should look for ways to expand the network of health care providers who will accept TRICARE, and that we should find a cost-effective way to extend TRS to members of the Individual Ready Reserve. Lastly, I believe we should engage in discussions with the Nation’s employers to find out whether TRS can be one element of a “win-win” relationship between them and their Reserve component employees.

[The nomination reference of Lt. Gen. Dennis M. McCarthy, USMC (Ret.), follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
June 1, 2009.

Ordered. That the following nomination be referred to the Committee on Armed Services:

Dennis M. McCarthy, of Ohio, to be an Assistant Secretary of Defense, vice Thomas Forrest Hall.

[The biographical sketch of Lt. Gen. Dennis M. McCarthy, USMC (Ret.), which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF LT. GEN. DENNIS M. MCCARTHY, USMC, (RET.)

Since 2005, Dennis McCarthy has been Executive Director of the Reserve Officers Association of the United States. This 67,000 member organization is chartered by Congress to “support and promote . . . a military policy for the United States that will provide adequate national security.” He has written extensively on Reserve and National Guard issues, and worked closely with the Commission on National Guard and Reserves and other groups studying Reserve component policy.

Lieutenant General McCarthy began his military service in combat in Vietnam, and remained on active duty until 1978. He then served as an infantry officer in the “traditional Reserve,” and was recalled to active duty for Operations Desert Shield/Desert Storm and on several subsequent occasions.

During the course of his career in uniform, he commanded eight different Marine or joint organizations for more than 160 months. Among these commands was the 3rd Marine Division where he was the first Reserve General Officer to command an active duty Marine Division.

He also served as a senior staff officer in a number of Marine headquarters and unified commands. He served on the Secretary of Defense Reserve Forces Policy Board. During Operations Desert Shield and Desert Storm he was recalled to active duty to lead significant pre-deployment training programs at the Marine Corps Air Ground Combat Center at Twentynine Palms, CA. He was Vice Director of Operations at the Atlantic Command during parts of Southwest Asia Operations Desert Thunder I and II, Operation Desert Fox and during U.S. operations in Kosovo. He was Atlantic Command's Director of Operations and Plans in that campaign's immediate aftermath.

He assumed command of Marine Forces Reserve in June 2001 and led the Force throughout the first 4 years of what would become the largest mobilization of Reserves in Marine Corps history. General McCarthy is a graduate of St. Ignatius High School in Cleveland, the University of Dayton, and the Capital University Law School. While serving as a traditional reservist from 1978 to 1999, he practiced law in Columbus, OH, as a civil litigator. He was also actively involved in legal education as a lecturer and adjunct faculty member.

Since his retirement from the Marine Corps, General McCarthy has served on several corporate boards, and is a "Leader in Residence" at the Franklin University Leadership Center in Columbus, OH.

He has been married for almost 42 years to Rosemary Bednorz McCarthy of St. Paul, MN, and Springfield, OH. They have two sons, both of whom are military officers (one in the Army National Guard and one in the Marine Corps Reserve) and three grand children. Mrs. McCarthy is widely recognized as a leader and innovator in developing and supporting family readiness programs for the Marine Corps and its Reserve.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Lt. Gen. Dennis M. McCarthy, USMC (Ret.), in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Dennis M. McCarthy.
2. **Position to which nominated:**
Assistant Secretary of Defense for Reserve Affairs.
3. **Date of nomination:**
June 1, 2009.
4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. Date and place of birth:

February 1, 1945; Cleveland, OH.

6. Marital Status: (Include maiden name of wife or husband's name.)

Married to Rosemary Bednorz McCarthy.

7. Names and ages of children:

Sean V. McCarthy, 40; Michael D. McCarthy, 33.

8. Education: List secondary and higher education institutions, dates attended, degree received, and date degree granted.

St. Ignatius High School (Cleveland) 1959–1963; Diploma (1963).

University of Dayton (Ohio) 1963–1967; BA (1967).

Capital University Law School (Ohio) 1972–1975; JD (1975).

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

1988–2000, McCarthy, Palmer Volkema and Thomas, Co. LPA (Partner).

1999–2001, U.S. Marine Corps (Director, Reserve Affairs Division, HQMC).

2001–2005, U.S. Marine Corps (Commander, Marine Forces Reserve and Marine Forces North).

2005–present, Reserve Officers Association (Executive Director).

2006–present, Medifast Incorporated (Indep. Director and Vice Chairman of the Board).

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

1967–2005, USMC.

1997–2001, Reserve Forces Policy Board, Department of Defense.

11. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

Reserve Officers Association (Executive Director).

Rivada Networks LLC (Board Member).

Medifast Inc. (Board Member).

Smoothie Sailing LLC, Franklin University Leadership Center (consultant).

12. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Reserve Officers Association (Life Member).

Marine Corps Reserve Association (Life Member).

Ohio State Bar Association.

Columbus Bar Association.

Franklin University Leadership Center.

13. Political affiliations and activities:

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

None.

14. Honors and awards: List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

Military: DSM, JSSM, MSM, NCM (with V), CAR, unit and campaign decorations.

ROA Minuteman Hall of Fame.

Ohio Academy of Trial Lawyers Distinguished Service Award.

15. Published writings: List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

"The Officer" ROA Editorials (10/year) since August 2005.

"Continuum of Service," Joint Forces Quarterly, Vol 36, (Quarter 1, 2005).

"A Continuum of Service," Armed Forces Journal (September 2008).

“We need another ‘Greatest Generation,’” Naval Institute Proceedings (March 2004).

“Combat Arms Warrant Officers,” Marine Corps Gazette (June 2008).

“Commander’s Intent,” Marine Corps Gazette (est. Sept. 2001).

Numerous legal articles and book chapters, all published before 1999.

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

Reserve Officers Association Testimony: “Fiscal Year 2009 Reserve Component Budget” Hearing before the Subcommittee on Defense Appropriations, Appropriations Committee, U.S. Senate, June 4, 2008.

Reserve Officers Association Testimony: “Fiscal Year 2008 Reserve Component Budget” Hearing before the Subcommittee on Defense Appropriations, Appropriations Committee, U.S. Senate, May 16, 2007.

Reserve Officers Association Testimony: “The Reserve Components of our Armed Forces” Hearing before the Subcommittee on Defense Appropriations, Appropriations Committee, U.S. Senate, May 24, 2006.

Reserve Officers Association Testimony: “TRICARE” before the Subcommittee on Military Personnel, Senate Armed Services Committee, U.S. Senate, March 14, 2006.

United States Marine Corps Reserve Commander, Marine Forces Reserve Testimony: “Reserve Matters” before the Subcommittee on Personnel, Senate Armed Services Committee, U.S. Senate, 13 April 2005.

United States Marine Corps Reserve Commander, Marine Forces Reserve Testimony: “Fiscal Year 2005 National Guard & Reserve Budget” before the Subcommittee on Defense Appropriations, Appropriations Committee, U.S. Senate, April 7, 2004.

United States Marine Corps Reserve Commander, Marine Forces Reserve Testimony: “Reserve Component Transformation and Relieving the Stress on the Reserve Component” before the Subcommittee on Total Force, House Armed Services Committee, U.S. House of Representatives, March 31, 2004.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

DENNIS M. MCCARTHY.

This 10th day of June, 2009.

[The nomination of Lt. Gen. Dennis M. McCarthy, USMC (Ret.), was reported to the Senate by Chairman Levin on June 24, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on June 25, 2009.]

[Prepared questions submitted to Dr. Jamie M. Morin by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delin-

eated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the military departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. I am familiar with the history of the Goldwater-Nichols Act and strongly support its intent. The Act has been extremely successful to date, and has also benefited over the years from periodic incremental changes to reflect lessons learned and the changing world situation.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. At present, I do not see any needs for modifications. If I am confirmed and I identify areas that I believe merit changes, I will propose those changes through the established process.

DUTIES OF THE ASSISTANT SECRETARY OF THE AIR FORCE (FINANCIAL MANAGEMENT)

Question. What is your understanding of the duties and functions of the Assistant Secretary of the Air Force (Financial Management)?

Answer. It is my understanding that the Assistant Secretary of the Air Force (Financial Management) is principally responsible for the exercise of the comptroller-ship functions of the Air Force, including all financial management functions. Additionally, this individual is responsible for all financial management activities and operations of the Air Force and advising the Secretary of the Air Force on financial management.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. For the last 6 years, I have served as the senior defense analyst at the Senate Budget Committee, with lead responsibility for the committee's work on the defense, foreign affairs, and intelligence budgets. Budget Committee Chairman Senator Kent Conrad has been particularly interested in Air Force matters, and directed me to devote particular effort to reviewing the Air Force budget request. This experience has familiarized me with many Air Force programs and has also allowed me to get to know many of the senior Air Force leaders, both civilian and military. Additionally, given the committee's interest in overall Federal spending and financial management, I have been exposed to many of the financial management challenges which exist throughout the Department of Defense (DOD). Earlier in my career, I worked as an economist and strategy consultant. I have also held fellowships from various public policy and defense think tanks and spent 4 months during graduate school working in the Office of the Secretary of Defense.

My academic preparation includes a Ph.D. in political science, where I focused my research on congressional involvement in the defense budgeting process, as well as an M.Sc. in public administration. My training included econometric methods and similar rigorous quantitative work that will help me oversee the Air Force's economics and cost estimation operations, if I am confirmed. These specialized graduate studies complement my undergraduate work in national security policy.

Question. Do you believe that there are any actions that you need to take to enhance your ability to perform the duties of the Assistant Secretary of the Air Force (Financial Management)?

Answer. Although I have some insight into Air Force financial operations, if confirmed I will need to develop a much deeper understanding of the operational challenges facing the Air Force financial management organization, particularly when it comes to information technology development and audit readiness projects. As a general matter, I believe strongly in the need for managers to understand the operational processes of their organizations, so if confirmed I would intend to devote a portion of my time to familiarizing myself with those processes.

RELATIONSHIPS

Question. What is your understanding of the relationship between the Assistant Secretary of the Air Force (Financial Management) and each of the following?

The Secretary of the Air Force.

Answer. It is my understanding that the Assistant Secretary of the Air Force (Financial Management) is the principal advisor to the Secretary of the Air Force on financial management matters and performs other duties as the Secretary may prescribe.

Question. The Under Secretary of the Air Force.

Answer. It is my understanding that the Assistant Secretary of the Air Force (Financial Management) is also the principal advisor to the Under Secretary of the Air Force on financial management matters and performs other duties as the Under Secretary may prescribe.

Question. The other Assistant Secretaries of the Air Force.

Answer. It is my understanding that the Assistant Secretary (Financial Management) works closely with the other Assistant Secretaries of the Air Force by providing advice and input on financial matters, as well as financial management policy leadership, guidance, implementation and coordination, as appropriate.

Question. The General Counsel of the Air Force.

Answer. It is my understanding that the Assistant Secretary of the Air Force (Financial Management) has a close working relationship with the General Counsel of the Air Force and Air Force fiscal counsels to assure an understanding of any and all legal implications in Air Force financial matters and compliance with the appropriate rules and regulations.

Question. The Director of the Air Force Business Transformation Office.

Answer. It is my understanding that the Assistant Secretary of the Air Force (Financial Management) works with the Air Force Chief Management Officer and Air Force Business Transformation Office (BTO) in support of their business transformation initiatives. These initiatives align with the mission of the Business Transformation Agency (BTA) of executing enterprise level business transformation for DOD.

Question. The Under Secretary of Defense (Comptroller).

Answer. It is my understanding that the Assistant Secretary of the Air Force (Financial Management) works closely with the Under Secretary of Defense (Comptroller) in the development and execution of financial, budgetary, and fiscal policies as they relate to the Air Force.

Question. The Deputy Chief Management Officer of DOD.

Answer. It is my understanding that the Assistant Secretary of the Air Force (Financial Management) would support the Deputy Chief Management Officer of DOD in close coordination with the Air Force Chief Management Officer in their responsibilities to manage the business operations of the Department as they relate to and support the business operations of the Air Force.

Question. The Director of the BTA.

Answer. It is my understanding that the Assistant Secretary of the Air Force (Financial Management) works with the Director of the BTA to accomplish the BTO mission of executing enterprise level business transformation.

Question. The Assistant Secretary of Defense for Networks and Information Integration/Chief Information Officer.

Answer. It is my understanding that the Assistant Secretary of the Air Force (Financial Management) works closely with the Assistant Secretary of Defense (Networks and Information Integration) to ensure that Department of the Air Force's diverse and extensive information technology systems are properly managed and resourced to accommodate and perform the full spectrum of financial management functions and reporting which is required to achieve the Air Force's financial management reporting goals.

Question. The Director, Office of Program Analysis and Evaluation.

Answer. It is my understanding that the Assistant Secretary of the Air Force (Financial Management) would work with the Director, Program Analysis and Evaluation to ensure the program priorities of the Air Force are well understood and thorough Air Force program reviews are conducted within the framework of the Planning, Programming, Budgeting, and Execution process and timetables. Additionally, the Assistant Secretary of the Air Force (Financial Management) works closely with the Deputy Chief of Staff for Strategic Plans and Programs to convey and communicate the results to Air Force leadership, and ensures the results of the program reviews are in line with overall DOD strategy.

Question. The Chief of Staff of the Air Force.

Answer. It is my understanding that the Assistant Secretary of the Air Force (Financial Management) would work closely with the Chief of Staff to provide support required in order to execute his duties and responsibilities to achieve the overall mission of the Air Force.

Question. The Assistant Secretaries for Financial Management of the Army and the Navy.

Answer. It is my understanding that the Assistant Secretary of the Air Force (Financial Management) works closely with the Assistant Secretaries of the Army and Navy in the area of financial management in an effort to facilitate integrated and coordinated decisionmaking at all levels and achieve the strongest cooperation between the Services possible. A cordial and productive working relationship with

these colleagues and the Under Secretary of Defense (Comptroller) is essential to successfully supporting the efforts of the Secretary of Defense.

MAJOR CHALLENGES

Question. In your view, what are the major challenges that will confront the Assistant Secretary of the Air Force (Financial Management)?

Answer. In my opinion, the primary challenge the Assistant Secretary of the Air Force (Financial Management) will face is the need to help develop and implement a balanced Air Force budget at a time when our Nation faces a serious fiscal situation and must provide the resources needed to meet wartime requirements. Improving the transparency and fidelity of the Department's financial processes is essential to ensure that senior leadership can make the best possible decisions about prioritization among military requirements.

Question. Assuming you are confirmed, what plans do you have to address these challenges?

Answer. If confirmed, I will work closely with the Air Force senior leadership to develop workable budgets which rebalance Air Force programs to address our Nation's commitment to our uniformed servicemembers, provide the capabilities needed in the wars we are fighting today, and prepare for the uncertain conflicts of the future.

Additionally, I will work with Air Force and DOD leadership to enhance our efforts to improve business processes and systems, and will seek to ensure that the Air Force can recruit, train, and retain a work force that can meet defense financial management needs into the 21st century. I will play an active role in the Air Force's part of the Financial Improvement and Audit Readiness (FIAR) and Enterprise Transition Plan (ETP) programs and will provide aggressive leadership and support for my staff in these critical efforts.

PRIORITIES

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed by the Assistant Secretary of the Air Force (Financial Management)?

Answer. The Secretary and Chief of Staff of the Air Force have indicated that their top five priorities are to reinvigorate the Air Force nuclear enterprise, to partner with the joint and coalition team in winning today's fight, to develop and care for airmen and families, to modernize equipment, organizations, and training, and to recapture acquisition excellence. If confirmed, my intention would be to work within the Air Force corporate process to ensure that these priorities are appropriately resourced. Within the Financial Management organization itself, I would intend to focus on three main priorities: improving the transparency and fidelity of the Department's financial processes in order to provide senior leaders with a clearer picture of the Air Force's fiscal situation, developing and empowering financial management professionals across the Air Force, and enhancing Air Force cost estimation capabilities as part of the Department's commitment to improving the defense acquisition processes.

CIVILIAN AND MILITARY ROLES IN THE AIR FORCE BUDGET PROCESS

Question. What is your understanding of the division of responsibility between the Assistant Secretary of the Air Force (Financial Management) and the senior military officer (the Director, Air Force Budget) responsible for budget matters in the Air Force Financial Management office in making program and budget decisions, including the preparation of the Air Force Program Objective Memorandum, the annual budget submission, and the Future Years Defense Program (FYDP)?

Answer. It is my understanding that the Assistant Secretary of the Air Force (Financial Management) has the responsibility and authority for all budget matters within the Air Force. The Deputy Assistant Secretary for Budget, the senior military officer responsible for Air Force budget matters in the Financial Management office, reports directly to the Assistant Secretary of the Air Force (Financial Management). As the primary advisor to the Assistant Secretary on program and budget issues, the Deputy Assistant for Budget is responsible for the formulation, justification and execution of the Air Force budget, including the preparation of the Air Force Program Objective Memorandum and the FYDP.

FINANCIAL MANAGEMENT AND ACCOUNTABILITY

Question. DOD's financial management deficiencies have been the subject of many audit reports over the past 10 or more years. Despite numerous strategies and attempts at efficiencies, problems with financial management and data continue.

What do you consider to be the top financial management issues that must be addressed by the Department of the Air Force?

Answer. The most recent Air Force financial statements include 3 pages of discussion of material weaknesses or significant deficiencies in General Fund financial reporting. Many audit reports confirm these weaknesses. Continued improvement in business processes and operations is the top priority, followed by continued improvements in business systems (though some critical business systems are joint) and addressing the organizational culture to embrace and support these system and process improvements.

Question. If confirmed, how would you plan to ensure that progress is made toward improved financial management in the Air Force?

Answer. If confirmed, my initial plan to ensure financial management progress continues would be to: evaluate, support and enhance the Air Force efforts to improve business processes and operations (including to support the Air Force's compliance with the FIAR and ETP programs); communicate the benefits of process and systems improvements; enhance training and education across the financial management spectrum; and work with other parts of the Department to benefit from best practices and exploit synergies.

Question. If confirmed, what private business practices, if any, would you advocate for adoption by DOD and the Department of the Air Force?

Answer. Although DOD and the Department of the Air Force are different from the private sector in their mission and in many operational aspects, there are certainly a number of financial and management practices which are similar to the private sector and could benefit from best practices being used elsewhere. If confirmed, I would encourage the sharing of best practices with the other Services, agencies, and departments in the Federal Government, but would also strongly advocate awareness and adoption of private sector practices where the Air Force would benefit from emulating them.

Question. What are the most important performance measurements you would use, if confirmed, to evaluate changes in the Air Force's financial operations to determine if its plans and initiatives are being implemented as intended and anticipated results are being achieved?

Answer. Performance metrics play a significant role in the success of any financial operation. I am not sufficiently familiar with the current financial performance metrics to judge whether they are fully appropriate. If confirmed, I will work to understand and manage the current financial performance metrics the Air Force is employing and also will work with the Under Secretary of Defense (Comptroller) to ensure the financial performance metrics the Air Force uses in the future will support the financial operations success of both DOD and the Department of the Air Force.

Question. The Business Transformation Agency (BTA) was established in DOD to strengthen management of its business systems modernization effort.

What is your understanding of the mission of this agency and how its mission affects the responsibilities of the Assistant Secretary of the Air Force (Financial Management)?

Answer. It is my understanding that the mission of the BTA is to be responsible for executing enterprise level business transformation and that it therefore works with the functional leaders and components to accomplish its mission. Given the stated mission of the BTA and the tiered accountability approach to execution, it is my understanding that the Assistant Secretary of the Air Force (Financial Management) will be allowed the flexibility to direct the requirements for the Air Force financial management mission, while continuously coordinating and integrating with the BTA to ensure meeting enterprise level mission requirements as well.

Question. What is your understanding of the role of the Assistant Secretary of the Air Force (Financial Management) in providing the Air Force's views to the Agency, or participating in the decisionmaking process of the agency, on issues of concern to the Air Force?

Answer. It is my understanding that the implementation of BTA mission within DOD divides governance and accountability for business modernization initiatives between Military Services and the Secretary of Defense. The Assistant Secretary of the Air Force (Financial Management) continuously coordinates and integrates with the BTA to ensure the BTA is aware of the ongoing Air Force issues, as well as to understand the challenges and issues at the enterprise level.

Question. Section 904 of the National Defense Authorization Act for Fiscal Year 2008 designated the Under Secretary of the Air Force as the Chief Management Officer of the Air Force. Section 908 of the National Defense Authorization Act for Fiscal Year 2009 required the establishment of a Business Transformation Office (BTO) within the Air Force to assist the Chief Management Officer in carrying out his duties.

If confirmed, what would your role be in the Department's business modernization effort?

Answer. If confirmed, I believe my role as the Assistant Secretary of the Air Force (Financial Management) would be to work closely with the Air Force BTO and the Air Force Chief Management Office to ensure Air Force financial management mission and requirements are coordinated and integrated with the enterprise business operations, plans, and modernization efforts of both the Air Force and DOD.

Question. What is your understanding of the relative responsibilities of the Chief Management Officer, the Air Force BTO, and the Assistant Secretary of the Air Force (Financial Management) in Air Force business systems modernization and improvements in financial management?

Answer. Public Law 110-417, section 908 required the Secretary of the Air Force to establish a BTO to develop and implement a business transformation plan with measurable performance goals and objectives to achieve an integrated management system for the business operations of the Air Force. If confirmed as the Assistant Secretary of the Air Force (Financial Management), I would work closely to coordinate and integrate the requirements of the financial management mission within this framework and to support the Air Force Chief Management Officer and BTO in the accomplishment of their business transformation responsibilities.

Question. Do you believe the organizational structure of the Department of the Air Force is properly aligned to bring about business systems modernization and improvements in the financial management of the Air Force?

Answer. At this point, I am not sufficiently familiar with how the specifics of the Air Force's organizational structure affect efforts at the business systems modernization and desired improvements in the financial management of the Air Force. As with any large, complex organization the Air Force has multiple stakeholders with sometimes competing equities in any business system or process modernization effort.

Question. If not, how do you believe the Department should be restructured to more effectively address these issues?

Answer. At this point, I do not have a sufficient understanding of how the Air Force organizational structure affects these modernization efforts to make recommendations. If confirmed, I would work to assess whether the current organizational structure of the Air Force is properly aligned to accomplish business systems modernization and improvements in Air Force financial management. If I identify shortfalls, I would intend to raise them with the Chief Management Officer and the BTO in order to develop a consensus on any necessary restructuring.

Question. Section 2222 of title 10, U.S.C., requires DOD to develop a Business Enterprise Architecture and Transition Plan to ensure that the Department's business systems are capable of providing timely, accurate, and reliable information, including financial information, on which to base management decisions. The Department also prepares an annual FIAR plan aimed at correcting deficiencies in DOD's financial management and ability to receive an unqualified "clean" audit. Section 376 of the National Defense Authorization Act for Fiscal Year 2006 required that the FIAR plan be systematically tied to the actions undertaken and planned pursuant to section 2222.

If confirmed, what role would you expect to play in the formulation of the Air Force's contribution to the Business Enterprise Architecture and Transition Plan and the FIAR plan?

Answer. If confirmed, I expect to work closely with the Air Force Chief Management Officer and BTO to continuously coordinate and integrate Air Force financial management requirements with the Business Enterprise Architecture and Transition Plan to ensure they are linked and consistently executed with the FIAR Plan.

Question. What steps would you take, if confirmed, to ensure that the Air Force's contribution to the FIAR plan is systematically tied to actions undertaken and planned in accordance with section 2222?

Answer. If confirmed, I would work closely with the Office of the Under Secretary of Defense (Comptroller) to ensure Air Force FIAR initiatives are closely coordinated and integrated with the FIAR Plan and Business Enterprise Architecture and Transition Plan to ensure we focus on the business and financial information needed to manage the department and the Air Force.

Question. The Comptroller General has testified that DOD should fix its financial management systems before it tries to develop auditable financial statements. He explained that: "Given the size, complexity, and deeply ingrained nature of the financial management problems facing DOD, heroic end-of-the-year efforts relied on by some agencies to develop auditable financial statement balances are not feasible at DOD. Instead, a sustained focus on the underlying problems impeding the development of reliable financial data throughout the Department will be necessary and is the best course of action."

Do you agree with this statement?

Answer. I agree with the judgment of former Comptroller General David Walker that a focus on financial systems and underlying problems standing in the way of reliable financial data must take precedence. Additionally, I believe that the complex interdependency between department-wide, Service-level, and other financial systems means that a "big bang" type approach to auditability is unlikely to succeed.

Question. What steps need to be taken in the Air Force to achieve the goal stated by the Comptroller General?

Answer. In general, compliance with the FIAR and ETP programs (as they relate to the Air Force) are going to be significant contributors to achieve the goals the Comptroller General is proposing.

LEASING MAJOR WEAPON SYSTEMS

Question. What is your opinion of leasing versus buying major capital equipment?

Answer. In both the private sector and the Federal Government both options have value, but the best choice is strictly contingent upon the financial and operational variables involved, and each situation is unique. The Federal Government's lower cost of capital will often tip the balance against leasing major capital equipment in cases where the government anticipates an enduring need for the items in question. However, decisions have to be made on a case-by-case basis. If confirmed, I will ensure that the Air Force adheres to OMB guidance and pursues the option that most benefits the taxpayer.

Question. Is leasing a viable and cost-effective option for procuring Department of the Air Force equipment, and if so, in what situations?

Answer. If I am confirmed, I would intend to investigate the specifics of any major leasing proposal before consulting with the functional experts and this Committee to arrive at a financial management recommendation on the option which is the highest, best and most proper use of the taxpayer's dollars.

INCREMENTAL FUNDING

Question. Both the executive and legislative branches have traditionally followed a policy of full funding for major capital purchases such as aircraft.

What is your view of the incremental funding of major capital investments?

Answer. As I understand it, the Office of Management and Budget has long had a policy that programs be fully funded upfront. I believe that the full funding principle is appropriate as a matter of policy. It protects the taxpayer and helps to ensure the government does not waste resources on projects that cannot be supported in future years. There may, however, be limited circumstances in which it is appropriate to waive that policy or find workarounds such as phasing of projects in order to best serve the interests of the Air Force and the taxpayer.

SUPPLEMENTAL FUNDING AND ANNUAL BUDGETING

Question. Since September 11, 2001, DOD has paid for much of the cost of ongoing military operations through supplemental appropriations. The fiscal year 2010 budget includes a full-year request for overseas contingency operations.

What are your views regarding the use of supplemental appropriations to fund the cost of ongoing military operations?

Answer. As a congressional staffer, I was active in efforts to reduce DOD's reliance on supplemental appropriations for expenses that could reasonably be anticipated. My personal view is that the Department should include predictable costs in the base budget request to the maximum extent possible. At times, the dynamic nature of these operations will surely require short notice requests for funding, but this should be the exception, not the norm. Where supplementals are needed, their negative aspects can be minimized by subjecting them to a level of scrutiny similar to that applied to regular budgets, within the time constraints imposed by operational needs.

Choices about how to request the funding for overseas contingency operations will be made by the President through OMB. Ultimately the decision about how to pro-

vide this funding will be made by Congress. If confirmed, I will work with the Air Force, Department leadership and Congress to support the presentation of the budget in which ever fashion is chosen.

AUTHORIZATION FOR NATIONAL DEFENSE PROGRAMS

Question. Do you believe that an authorization pursuant to section 114 of Title 10, U.S.C., is necessary before funds for operations and maintenance, procurement, research and development, and military construction may be made available for obligation by DOD?

Answer. Yes. I recognize situations do occur where funds have been appropriated but not authorized in the Department, and it is my understanding it is the Department's practice to work with all the oversight committees to communicate and resolve these situations. If confirmed, I will work closely with the oversight committees to achieve a resolution of the situation, if it arises, and will respect the views and rights of the committees.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Assistant Secretary of the Air Force (Financial Management)?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee of Congress, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTION SUBMITTED BY SENATOR JOHN MCCAIN

SUPPLEMENTAL FUNDING AND ANNUAL BUDGETING

1. Senator MCCAIN. Dr. Morin, what are your views about the feasibility of elimination of wartime supplemental appropriations?

Dr. MORIN. My personal view is that the Department should include predictable contingency costs in the base budget request to the maximum extent possible. Doing so should help reduce the frequency and the size of any future supplemental appropriations requests. At times, the dynamic nature of overseas contingency operations could certainly require short-notice requests for funding, but this should be the exception, not the norm.

QUESTION SUBMITTED BY SENATOR JOHN THUNE

AIR FORCE FINANCIAL SERVICE CENTER

2. Senator THUNE. Dr. Morin, the Air Force Financial Service Center opened in 2007 at Ellsworth Air Force Base. The Air Force is leading the way when it comes to financial transformation to serve our Nation's airmen. Not only is the Center important to South Dakota, but it also provides the Air Force with a vital service. The Center currently employs over 500 people and, in this fiscal year alone, the Financial Service Center has processed close to a half a million Air Force pay and travel documents. Are you familiar with the Air Force Financial Service Center and do you support the Air Force financial service transformation efforts that are being undertaken at Ellsworth Air Force Base?

Dr. MORIN. Yes, I am familiar with the Air Force Financial Services Center and I support the effort to modernize the provision of financial services in the Air Force. The success of the financial service transformation effort would increase efficiency and yield significant savings. If confirmed, I will ensure Financial Services within the Air Force continues to support our Nation's airmen.

[The nomination reference of Dr. Jamie M. Morin follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
May 11, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Jamie Michael Morin, of Michigan, to be an Assistant Secretary of the Air Force, vice John H. Gibson, resigned.

[The biographical sketch of Dr. Jamie M. Morin, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF DR. JAMIE M. MORIN

Since 2003, Jamie Morin has been a member of the professional staff of the U.S. Senate Committee on the Budget. In this capacity, he has served as the committee's lead analyst for the defense, intelligence, and foreign affairs budgets, responsible for drafting the relevant sections of the congressional budget resolution and advising the Senate on enforcement of budget rules. Additionally, he advises Budget Committee Chairman Kent Conrad on the full range of national security issues.

Dr. Morin has previously worked in the Office of the Secretary of Defense and as an economic development strategist with the firm J.E. Austin Associates, where he performed contract research for the US Agency for International Development. He has held in-residence fellowships at the University of Virginia's Miller Center for Public Affairs and at the Center for Strategic and Budgetary Assessments, where he conducted research for the Pentagon's Office of Net Assessment. He also served as a policy advisor on President-elect Obama's defense transition team.

Dr. Morin received a Ph.D. in Political Science from Yale, an M.Sc. in public administration and public policy from the London School of Economics, and a B.S. in Foreign Service from Georgetown. His academic research focused on U.S. national security policy, particularly the role of Congress in defense budgeting and policy making.

A native of Michigan, Dr. Morin currently lives with his wife and son in Washington, DC.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial and other information of the nominee. The form executed by Dr. Jamie M. Morin in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Jamie Michael Morin.

2. **Position to which nominated:**
Assistant Secretary of the Air Force for Financial Management and Comptroller.

3. **Date of nomination:**
May 11, 2009.

4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**
May 23, 1975; Southfield, MI.

6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Megan Anne Baker-Morin.

7. **Names and ages of children:**
William (Liam) Morin, 4.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.

Yale University, 1998-2003:
Ph.D. in Political Science, 2003.
M.Phil. in Political Science, 2001.
M.A. in Political Science, 2001.

London School of Economics, 1997-1998, M.Sc. in Public Administration and Public Policy, 1998.

Georgetown University School of Foreign Service, 1993-1996, B.S.F.S in International Security and Diplomacy, 1996.

University of Detroit Jesuit High School 1989-1993, High School Diploma, 1993.

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Senior Defense Analyst, U.S. Senate Committee on the Budget, Washington DC (July 2003 to present).

National Fellow in Public Affairs, Miller Center for Public Affairs, University of Virginia, Charlottesville, VA (July 2002 to July 2003).

Various Teaching Fellowships in International Relations and American Politics, Yale University Department of Political Science, New Haven, CT (January 1999 to June 2002).

Visiting Fellow, Center for Strategic and Budgetary Assessments, Washington DC (June 2001 to September 2001).

Economist and Strategy Specialist, J.E. Austin Associates (international economic development consultancy), Arlington, VA (May 2000 to September 2000; previously worked for this firm from October 1995 to September 1997).

Intern (GS-9), Office of the Secretary of Defense (Directorate of Requirements, Plans, and Counterproliferation Policy), Arlington VA (June 1999 to September 1999).

10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

As a visiting fellow at the Center for Strategic and Budgetary Assessments, I assisted with research and writing of a study for the Department of Defense's Office of Net Assessment on the British Royal Navy's response to technological change during the late 19th and early 20th centuries.

As a consultant with J.E. Austin Associates, I supported several USAID economic development projects, primarily related to private sector and agricultural development in African and Latin American countries.

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

Member of Yale, Georgetown, and University of Detroit Jesuit High School alumni associations.

Member of National Military Family Association.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

Volunteer advisor on defense budget policy, Obama for America, 2007-2008.

Volunteer, Virginia Campaign for Change, November 2008.

Volunteer, Jim Webb for Senate, November 2006.

Volunteer, John Kerry for President, November 2004.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

\$250 - Barack Obama (General Election), October 22, 2008

\$200 - Barack Obama (Primary), July 9, 2008

\$200 - Barack Obama (Primary), January 8, 2008 (estimated).

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals, and any other special recognitions for outstanding service or achievements.

Dirksen Center - Congressional Research Award (2003)

Miller Center (UVA) - National Fellow in Public Affairs (2002-2003)

Yale University - Yale University Fellowship (1998-2002), Dissertation Fellowship (2002-2003)

Smith-Richardson Foundation - Research Fellowship (2001, 2002)

Nominated by students for the Yale College Teaching Prize (1999)

DACOR Bacon House Foundation - Tutthill Fellowship (1997)

Krogh Scholar, Georgetown University School of Foreign Service (1995-1996)

Eagle Scout, Boy Scouts of America (1992)

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

Squaring the Pentagon: The Politics of Post-Cold War Defense Retrenchment, Ph.D. Dissertation, Yale University Department of Political Science, (2003).

"The Politics of Post-Cold War Defense Retrenchment," Paper presented to the NewFaces in International Security Conference, Triangle Institute for Security Studies, (2003).

"Did Congress Shape America's Post-Cold War Defense? Measuring the Politics of Budgetary Retrenchment," Paper presented to the American Political Science Association's 2003 annual conference.

"Explaining the Shape of the Post-Cold War U.S. Military," Paper presented to the Miller Center Fellows Conference, (May 2003).

"Congressional Assertion in Defense Budgeting During Retrenchment," Presentation to the Miller Center Fellows Kick-off Conference (2002).

“Comment on Josef Joffe’s ‘Who’s Afraid of Mr. Big,’” The National Interest (Fall 2001).

“European Economic and Monetary Union and Trans-Atlantic Security Relations,” International Security Review (London, RUSI: 1999).

“EMU and U.S. Troops in Europe,” Royal United Services Institute Newsbrief (London, RUSI: April 1998).

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

None.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

JAMIE M. MORIN.

This 15th day of May, 2009.

[The nomination of Dr. Jamie M. Morin was reported to the Senate by Chairman Levin on June 18, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on June 19, 2009.]

[Prepared questions submitted to Daniel B. Ginsberg by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. The Department of Defense (DOD), working with Congress, should continually assess the law in light of improving capabilities, evolving threats, and changing organizational dynamics. There have been legislative initiatives from Congress in recent years to clarify the role of the National Guard in DOD’s organization but I am currently unaware of any reason to fundamentally amend Goldwater-Nichols. If confirmed, I will have an opportunity to assess whether the challenges posed by today’s security environment require broad amendments to the legislation with a view to continuing the objectives of defense reform.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. At this time, I am unaware of any reason to fundamentally amend the Goldwater-Nichols Act. If I am confirmed and I identify areas that I believe merit changes, I will propose those changes through the established process.

DUTIES

Question. Section 8016 of title 10, U.S.C., provides that the Assistant Secretary of the Air Force for Manpower and Reserve Affairs shall have "as his principal duty the overall supervision of manpower and Reserve component affairs of the Department of the Air Force."

If confirmed, what duties do you expect that the Secretary of the Air Force will prescribe for you?

Answer. The principle duties of the Assistant Secretary of the Air Force are to support the tasks assigned by the Secretary of the Air Force. These duties include providing guidance, direction, and oversight for Air Force military and civilian manpower/personnel programs; medical readiness and health care; plus Reserve component affairs. The Assistant Secretary is also responsible for oversight of the operation of the Air Force Review Board Agency and its component board.

Question. What actions will you take to enhance your ability to perform the duties of the Assistant Secretary of the Air Force for Manpower and Reserve Affairs?

Answer. If confirmed, I look forward to immersing myself into the Air Force's mission, organizations and its people, to maximize the duties expected of me and to support the Total Force. I will work hard to understand the Air Force's challenges and the resources necessary to sustain yet continue to transform the Total Force. To that end I will seek advice and counsel from the many and diverse stakeholders dedicated to the success of the Air Force.

Question. In carrying out these duties, what would be your relationship with the following officials:

The Secretary of the Air Force.

Answer. If confirmed, I will meet and communicate with the Secretary of the Air Force on a regular and as required basis. I will provide him with my honest assessment and advice and support him in the implementation of his decisions and policy.

Question. The Under Secretary of the Air Force.

Answer. If confirmed, I will work closely with the Under Secretary and communicate on a regular basis.

Question. The other Assistant Secretaries of the Air Force

Answer. If confirmed, I will establish and maintain close and professional relationships with each of the Assistant Secretaries and seek to foster an environment of cooperative teamwork, working together on the day-to-day management and long-range planning needs of the Air Force.

Question. The General Counsel of the Air Force.

Answer. The Air Force General Counsel has a significant role to play in virtually all policy decisions in the Air Force. If confirmed, I expect to have a strong relationship with The General Counsel to provide consistent and sound legal advice.

Question. The Inspector General of the Air Force.

Answer. If confirmed, I will establish and maintain a close and professional relationship with the Inspector General as this office has an important role in inquiring and reporting on matters that are the cornerstone of our readiness (such as efficiency, training, discipline, and morale).

Question. The Chief of Legislative Liaison of the Department of the Air Force.

Answer. If confirmed, I will establish and maintain a close and professional relationship with the Director of Legislative Liaison who plays an integral role in ensuring that the Air Force maintains positive relations with Congress and coordinates the Air Force's legislative strategy.

Question. The Under Secretary of Defense for Personnel and Readiness.

Answer. If confirmed, I plan to foster a harmonious working relationship with all my civilian contemporaries in the Office of the Secretary of Defense (OSD). I will communicate openly and directly with the Under Secretary of Defense for Personnel and Readiness in articulating the views of the Department of the Air Force.

Question. The Principal Deputy Under Secretary of Defense for Personnel and Readiness.

Answer. If confirmed, I would expect to establish the same harmonious relationship that I intend to establish with the Under Secretary of Defense for Personnel and Readiness.

Question. The Chief of Staff of the Air Force.

Answer. The Chief of Staff of the Air Force, except as otherwise prescribed by law, performs his duties under the authority, direction and control of the Secretary of the Air Force and is directly responsible to the Secretary. If confirmed, I would, as the senior civilian charged with policy decision for manpower and Reserve affairs work hand in hand with the Chief of Staff to carry out the duties prescribed by the Secretary of the Air Force.

Question. The Deputy Chief of Staff of the Air Force for Manpower and Reserve Affairs.

Answer. Much of the day-to-day operations involving Air Force personnel are actually handled by the staff members of the Deputy Chief of Staff for Manpower, Personnel, and Services. As such, this office implements the policies approved by the Office of the Secretary of the Air Force. I understand that the Secretary of the Air Force has clarified that relationship through recent revisions to mission directives.

Question. The Surgeon General of the Air Force.

Answer. If confirmed, it will be my priority to ensure that our airmen continue to receive quality medical support. I will work closely with the Surgeon General of the Air Force to ensure the Air Force medical system supports a medically ready force.

Question. The Judge Advocate General of the Air Force.

Answer. I expect to establish a relationship with the Judge Advocate General of the Air Force as the Air Force's senior military legal counsel and senior leader of the Air Force Judge Advocate Corps.

Question. The Chief, National Guard Bureau.

Answer. I have a history of working successfully with the National Guard Bureau on a range of issues. If confirmed, I expect to maintain a close working relationship with the Chief on matters relating to the National Guard and the Air National Guard. It will be my priority to ensure that our National Guard meets requirements whether in Federal or State status.

Question. The Director of the Air National Guard.

Answer. The Air National Guard is one of the two Air Reserve components with which, if confirmed, I expect to be in close, constant communication. I understand Air National Guard issues and challenges well and know that the Reserve components are key to Air Force mission success.

Question. The Chief of Air Force Reserve.

Answer. If confirmed, I expect that my relationship to the Chief of Air Force Reserve to be virtually identical to that of the Director of the Air National Guard. However, because the Air Force Reserve is limited to the Federal mission, I would expect some differences in challenges and issues.

Question. The Reserve Forces Policy Board (RFPB).

Answer. I understand that the RFPB is the principal policy adviser to the Secretary of Defense on matters relating to the Reserve components. If confirmed, I will be a member of the RFPB. I will use that role to ensure that the Air Force communicates its Reserve component issues and priorities with the other Service RFPB members and the Secretary of Defense.

Question. The Air Force Reserve Forces Policy Committee.

Answer. The Air Force Reserve Forces Policy Committee advises the Secretary of the Air Force on major policy matters directly affecting the Reserve components and the mobilization preparedness of the Air Force. If confirmed, I will fully support the Air Force Reserve Forces Policy Committee in its statutory role and provide such other support as directed by the Secretary of the Air Force.

Question. Airmen and their families.

Answer. Ultimately, the individual airmen and their families will determine whether the Air Force is successful in any endeavor. If confirmed, I will devote the necessary energies to improving the policies, processes, and programs under my purview that will ensure our airmen mission success and the quality of life they deserve.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. The United States Air Force and our Airmen have remained a lifelong concern, personally, intellectually, and professionally. I have spent more than a decade working directly on military personnel, readiness, and Reserve issues in the United States Senate, which has constitutionally derived oversight responsibilities over DOD. With the Senate Armed Services Committee during the chairmanship of Sam Nunn of Georgia, I saw how Congress made providing for the men and women in uniform a paramount concern to the basic functioning and strength of the armed services. As an adviser on defense, veterans, and national security to Senator Patrick Leahy of Vermont, I directly assisted the Senator in his role as a senior member of the Defense Appropriations Subcommittee and as cochair of the Senate's National Guard Caucus, which has worked successfully to pass far-reaching legislation to improve the benefits, equipment, and organization of the reserves, including the Air National Guard and the Air Reserves. I provided direct support and helped coordi-

nate—among others—efforts to provide affordable health insurance to members of the Select Reserve, provide more uniform housing allowances, and improve the Department's ability to carry out domestic operations in support of civilian authorities. I have recently traveled with Senator Leahy to Kuwait, Iraq, and Afghanistan saw first-hand some of the contributions and challenges facing our deployed U.S. airmen.

Second, military personnel policy, the relationship between the military and its civilian leadership, and the historical development of the Air Force has been a special focus of my education, whether in my undergraduate studies at the University of Michigan and the London School of Economics or in my graduate work at the Johns Hopkins Nitze School of Advanced International Studies and the University of Chicago. Finally, the United States Air Force has been a lifelong interest to me. Before my eyesight deteriorated and my interests and goals evolved, I dreamed of flying the F-15 Eagle, the Air Force's longtime, main air superiority fighter. In my childhood and teen years, I read about the Service intensely, visited many U.S. Air Force bases across the globe, and took private pilot lessons to begin to build basic flying skills.

MAJOR CHALLENGES

Question. In your view, what are the major challenges confronting the next Assistant Secretary of the Air Force for Manpower and Reserve Affairs?

Answer. I believe the Air Force's ability to prevail in current operations and to sustain global commitments is critical. The Air Force must balance the employment of the Regular forces with those of the Guard and Reserve. If confirmed, I will lead and partner on efforts to formulate policies that will help facilitate our airmen's ability to provide a continuum of service.

Family support programs are more important than ever in light of continued deployments and the related stress, both on the members of the armed services and their families. I understand the Air Force is establishing a first class Wounded Warrior program to provide high standards of care in a compassionate and supportive way.

Question. If confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I would be honored to do all that I can to work with the rest of the Department and the Department of Veterans Affairs (VA) to promote a high standard of care for our Wounded Warriors and to ensure our families receive the support they require.

ACTIVE-DUTY END STRENGTH

Question. The Air Force has requested an active-duty end strength of 331,700 for fiscal year 2010—an increase of about 15,000 from last year's authorization. This follows several years of declining Air Force end strength.

What is your view of the required Air Force active-duty end strength?

Answer. The 331,700 active-duty end strength should allow the Air Force to fund its most pressing requirements, such as robusting its nuclear forces as well as supporting new and emerging missions. If confirmed, I look forward to reviewing and assessing the Air Force end strength requirement.

OFFICER MANAGEMENT ISSUES

Question. As the Assistant Secretary of the Air Force for Manpower and Reserve Affairs you would have significant responsibilities with regard to officer management policies, the promotion system, and recommending officers for nomination to positions of authority and responsibility.

If confirmed, what changes, if any, would you make to the officer management system?

Answer. It's well known that the Air Force has an exceptionally talented and highly trained officer corps supporting not only the mission of the Air Force but also the joint warfighting mission as well. If confirmed, I look forward to reviewing officer management processes and policies to ensure the optimal development of the officer corps.

Question. Do you believe the current Air Force procedures and practices for reviewing the records of officers pending nomination by the President are sufficient to ensure the Secretary of the Air Force, the Secretary of Defense, and the President can make informed decisions?

Answer. Based on my conversations with the Service, I believe that Air Force officer promotion procedures are sufficient and ensure the Air Force selects only the best qualified officers for promotion. Should I be confirmed, I will ensure the promotion selection procedures continue to be sufficiently rigorous to ensure officers

meet the statutory requirement of exemplary conduct both before and after the convening of a promotion selection board.

Question. In your view, are these procedures and practices fair and reasonable for the officers involved?

Answer. It is my understanding that the Air Force's promotion system is fair and reasonable for all eligible officers. Officers are considered based on a "whole-person" concept that gives ultimate consideration to their demonstrated potential to serve in the next higher grade. If confirmed, I will continuously monitor board processes to ensure fairness and legal compliance.

GENERAL AND FLAG OFFICER NOMINATIONS

Question. Under DOD Instruction 1320.4, adverse and alleged adverse information pertaining to general and flag officers must be evaluated by senior leaders in the Services and in OSD prior to nomination.

If confirmed, what role would you play in the officer promotion system, particularly in reviewing general and flag officer nominations?

Answer. The Secretary of the Air Force is directly involved in the General Officer nomination process working with the Chief of Staff. If confirmed, I look forward to working with senior Air Force leadership to execute the duties of the office of the Assistant Secretary for Manpower and Reserve Affairs.

Question. What is your assessment of the ability of the Services to timely document credible information of an adverse nature for evaluation by promotion selection boards and military and civilian leaders?

Answer. While I have not made a complete assessment, it is my understanding that under current Department of the Air Force practice, the adverse information presented to promotion selection boards is culled from numerous Air Force organizations that maintain relevant data, and generally has been found to be accurate and timely. Certainly, if confirmed, this will be a key area to explore.

Question. If confirmed, what steps will you take to ensure that only the best qualified officers are nominated for promotion to general and flag officer rank?

Answer. As previously stated, the Secretary of the Air Force works directly with the Chief of Staff on this matter, however, if requested by the Secretary, I stand ready to advise, if confirmed.

TECHNICAL TRAINING OF GENERAL OFFICERS

Question. In your view, do a sufficient number of Air Force general officers have advanced training and degrees in scientific and technical disciplines?

Answer. At this time I cannot answer definitively, however, if confirmed, I will engage and advise where necessary.

Question. Are the career paths for officers with technical skills appropriate to ensure that the Air Force can execute complex acquisition programs, adapt to a rapidly changing technological threat environment, and make informed investment decisions on DOD and Air Force resources?

Answer. I have been informed that the Air Force carefully manages its officer corps to the appropriate level of adaptability and technical expertise relevant to each career field. I also understand that the Air Force is presently studying its Acquisition Corps to insure career paths for officers provide them with the technical skills and experiences to take on the responsibilities of our complex acquisition programs. If confirmed, I look forward to the results.

Question. What actions would you take, if confirmed, to ensure that Air Force officers can capably perform these missions?

Answer. As I mentioned, the Air Force is in the process of studying its Acquisition Corps to ensure that the Air Force better develop our officers to meet our Acquisition requirements at the general officer level. If confirmed, I look forward to engaging with the Assistant Secretary for Acquisition to rectify any deficiencies.

MEDICAL PERSONNEL RECRUITING AND RETENTION

Question. The Air Force is facing significant shortages in critically needed medical personnel in both the Active and Reserve components. The committee is concerned that despite authorizing large bonuses for critically short medical specialties, serious challenges remain in recruitment and retention of medical, dental, nurse, and behavioral health personnel.

If confirmed, will you undertake a comprehensive review of the medical support requirements for the Air Force and the sufficiency of the plans to meet recruiting and retention goals in these specialties?

Answer. I appreciate the committee's concerns regarding this issue, and if confirmed, I pledge to consider this matter with the seriousness it requires. Medical

support is critical to the success of our All-Volunteer Force, and I intend to pay special attention to the Air Force's medical personnel requirements. Recruiting and retention of healthcare professionals is challenging in all areas of the country at this time, and the Air Force is experiencing shortages in several medical specialties and disciplines. However, even during these challenging times, I am pleased to note that Air Force continues to attract and produce world-class physicians, dentists, nurses, and medics.

Question. What legislative and policy initiatives, including increased involvement of Air Force medical personnel in medical recruiting and bonuses and special pays, do you think may be necessary to ensure that the Air Force can continue to meet medical support requirements?

Answer. If confirmed, I plan to review the Air Force's programs for recruiting and retaining military and civilian medical personnel. I will also work closely with the Air Force Surgeon General and the Deputy Chief of Staff for Manpower, Personnel, and Services to evaluate requirements and support ongoing programs and develop initiatives to enhance the Air Force's ability to recruit and retain health care providers and support personnel with the requisite critical skills. Should legislative or policy changes be required, I will work with the Secretary of the Air Force, other Air Force leaders, the leadership of DOD, and Congress to bring them to fruition.

LESSONS LEARNED

Question. What do you believe are the major Air Force personnel lessons learned from Operation Enduring Freedom (OEF) and Operation Iraqi Freedom (OIF) which you would seek to address if confirmed as Assistant Secretary of the Air Force for Manpower and Reserve Affairs?

Answer. From what I have observed, two major themes stand out from lessons derived from OEF and OIF:

In interviews, senior leaders expressed the view they could not distinguish between Active, Guard, and Reserve Forces. We need to maintain a "total force" by sustaining equal training and inspection standards, and recognizing the contribution of the Reserve component by improving health, education, pay and retirement benefits for our airmen when they return home.

Airmen supporting OEF and OIF from continental United States locations are providing critical space and cyberspace capabilities to overseas forces. These airmen are seeing substantial increases in mission requirements with no proportional increase in manning, which is putting great strain on the force. The Air Force must recruit, train, support, and retain these highly skilled individuals to fulfill these vital missions.

If confirmed, I will continuously monitor and seek out other lessons learned and apply them to the personnel challenges and complexities of our contingency operations.

TRICARE FEE INCREASES FOR MILITARY RETIREES

Question. Secretary Gates recently told officers at the Air War College that "health care is eating the (Defense) Department alive."

How do you interpret this statement and do you agree with the Secretary's assessment?

Answer. As I understand it, healthcare costs in DOD and the civilian sector have increased disproportionately due to many factors. I believe that over the past 10 years, the Air Force worked diligently to streamline medical infrastructure and capitalize on advancements in the field of medicine. This resulted in rightsizing many of our facilities without compromising care provided to our airmen and their families. The Air Force currently leverages strategic partnerships with civilian trauma centers, university medical centers, Veterans Affairs, and other DOD facilities to provide quality care and the broadest range of clinical opportunities for our entire medical team. If confirmed, I will optimize the use of our assets and those of our partners to ensure the greatest return on our investments.

Question. What is your view of the need for increased beneficiary payments in reducing overall health care costs to the Department?

Answer. I am advised that costs have grown due to many factors including increased utilization by a mobilized Reserve component force, expansion of benefits to support basic healthcare needs of severely wounded and their families, increased retiree healthcare utilization, healthcare inflation, and the same TRICARE premiums for the past 10 years. I believe that a sound medical benefit program directly impacts the retention of airmen and their families. If confirmed, I will support a DOD review of the current beneficiary payment structure to ensure that future benefit costs are sustainable.

Question. What other reforms in infrastructure, benefits, or benefit management, if any, do you think should be examined in order to control the costs of military health care?

Answer. Military health care is critical to our force and if confirmed, I will study this issue further and work with the other Services and DOD to determine the best structure for the future.

PERSONNEL AND ENTITLEMENT COSTS

Question. In addition to health care costs, personnel, and related entitlement spending continues to soar and is becoming an ever increasing portion of the DOD budget.

If confirmed, what actions will you take to control the rise in personnel costs and entitlement spending?

Answer. If confirmed, I will work closely with our finance community to strike a balance between appropriate personnel costs and military pay or benefits.

Question. If confirmed, what actions will you take to avoid a requirement for massive end-of-year reprogramming to cover personnel costs?

Answer. As is the case with regard to change in any large organization, military personnel changes take time to execute and implement throughout the force. In order to avoid unnecessary changes, if confirmed, I will work closely within the Air Force and with DOD to accurately project requirements, and will then monitor execution, strength, and incentives, to ensure the Air Force remains in balance.

FAMILY READINESS

Question. If confirmed, how would you address family readiness needs in light of global rebasing, base realignment and closure, and continuing deployments for both Active and Reserve component Air Force personnel?

Answer. To use a quote from Air Force Chief of Staff General Schwartz, "We are committed to ensuring that we not only address the needs of the military member, but recognize the fact that families make sacrifices, too. It's this larger acknowledgment of a sense of community, a sense of family—that the United States Air Force isn't just machines, it's people, it's families."

In that spirit, if confirmed, I will continue to identify and address the needs of the Total Force and the Total Family with deliberate attention directed toward the ongoing improvement in the quality of their environment.

Question. If confirmed, how would you ensure support for Reserve component families, particularly those who do not reside near an active-duty military installation, related to mobilization, deployment, and family readiness?

Answer. Family readiness is a very important issue to me. Geographically separated families are entitled to all of the programs and services necessary to enhance and maintain their family readiness. Standardized programs across the Air Force benefit both Active and Reserve components. The Yellow Ribbon Reintegration program can also play an important role in helping relieve some of the stresses that grow out of military service and frequent deployments. That being said, if confirmed, I will address and bridge any gaps that may exist for the Total Force and will continue to focus on providing child care and youth program options for geographically separated airmen and their families.

Question. In your view, what progress has been made, and what actions need to be taken in the Air Force to provide increased employment opportunities for military spouses?

Answer. I understand that the Air Force has made continuing progress in addressing the needs of military spouses. If confirmed, I will continue to pursue the initiatives that have been established and develop new initiatives as needed, to benefit military families.

Question. If confirmed, what additional steps would you take to ensure that family readiness needs, including child care, are addressed and adequately resourced?

Answer. If confirmed, I would continue to support childcare space growth and recapitalization. I would provide support for expanded childcare aid subsidy programs and work to increase the availability of childcare for the Air National Guard and Air Force Reserve. I would also review the ability to expand childcare options for families with children who have special needs (respite care).

QUALITY OF LIFE

Question. In May 2004, DOD published its first Quadrennial Quality of Life Review, which articulated a compact with military families on the importance of key quality of life factors, such as family support, child care, education, health care, and morale, welfare, and recreation services.

How do you perceive the relationship between quality of life improvements and your own top priorities for military recruitment and retention?

Answer. I understand that the Air Force prides itself on its commitment to quality of life, a strong point in recruiting and retention efforts. If confirmed, I will continue to make quality of life a priority in the Air Force, just as I have worked in the past to promote quality of life in the Reserve components.

Question. If confirmed, what further enhancements to military quality of life would you make a priority, and how do you envision working with the other Services, combatant commanders, family advocacy groups, and Congress to achieve them?

Answer. If confirmed, I will continue to work with family advocacy groups and all of the Air Force quality of life providers in their transformation efforts aimed at improving airmen and their families' quality of service. Additionally, joint basing has forced all of the armed services to work together to find ways to improve the delivery of quality of life to our troops and their families. Fortunately, there is support both from Congress and the President, who are committed to taking care of military families.

SUPPORT FOR THE SINGLE AIRMAN

Question. While the percentage of married servicemembers has steadily increased, a substantial portion, especially young servicemembers, are single.

What are the unique support needs of single airmen, especially those returning from combat?

Answer. It is my understanding that the needs of single airmen differ from those of the married airmen. Recognizing those differences led to the development of programs and services that targeted the single airman and their parents, siblings and significant others and their ability to stay connected.

Question. If confirmed, what would you do to address these needs?

Answer. It is my understanding that support programs for single airmen are being reviewed and improved, with determinations as to what will be kept, altered and appropriately discontinued to better meet the needs of single airmen. If confirmed, I will review these programs designed to improve the quality of life for all airmen—Active and Reserve component, single and married, with a view toward ensuring that these programs are effective in meeting the specific needs of each group.

NATIONAL SECURITY PERSONNEL SYSTEM

Question. Section 1106 of the National Defense Authorization Act for Fiscal Year 2008 restored the collective bargaining rights of civilian employees included in the National Security Personnel System (NSPS) established by DOD pursuant to section 9902 of title 5, U.S.C. Under section 1106, the Department retains the authority to establish a new performance management system (including pay for performance) and streamlined practices for hiring and promotion of civilian employees. Senior DOD officials have stated that they do not intend to expand NSPS to include employees in bargaining units that are represented by employee unions.

What is your view of the NSPS, as currently constituted?

Answer. I understand that the key features of NSPS (i.e. flexible civilian compensation, staffing, classification, and performance management systems) were designed to provide effective management of a mission-oriented and results-driven civilian workforce that is vital to the success of DOD missions. I understand that DOD and the Office of Personnel Management (OPM) are conducting a comprehensive evaluation of the NSPS system. If confirmed, I look forward to seeing the results of DOD and OPM's comprehensive evaluation of NSPS in order to work toward addressing any identified concerns.

Question. Do you support the pay-for-performance approach adopted for civilian employees in the NSPS?

Answer. As a general principle, I support pay-for-performance; an employee's compensation should be based on contribution to mission. If confirmed, I look forward to seeing the results of DOD and OPM's comprehensive evaluation of NSPS in order to work toward addressing any identified concerns.

Question. Do you believe that the Department needs streamlined authority for hiring and promotion of civilian employees to meet its human capital needs?

Answer. I am advised that the Department is challenged in meeting increased civilian labor requirements in critical occupations and developing human capital strategies to respond to these challenges. It is my understanding that there are situations where specialized hiring authorities are required in order to provide sufficient qualified applicants to meet mission needs. If confirmed, I will review creative and active use of available authorities and will explore the need for and use of direct

and expedited hiring authorities to assist in achieving the Department's human capital objectives.

Question. In your view, is it viable in the long run for the DOD to maintain two separate systems (NSPS and the General Schedule) for its civilian employees?

Answer. It is my understanding that DOD has a number of other personnel systems, such as Defense Civilian Intelligence Personnel System. If confirmed, I will work with DOD and OPM to assess the appropriate number and types of personnel systems for effective and efficient personnel management.

Question. What changes, if any, would you recommend to the NSPS authorizing legislation? What changes, if any, would you recommend to the NSPS regulations?

Answer. It is my understanding that DOD, in conjunction with OPM, is conducting a comprehensive evaluation of NSPS, as currently implemented. If confirmed, I would seek to ensure that the Air Force participates fully in this evaluation. Depending on the outcome of this evaluation, legislation and/or policy changes may be appropriate to ensure that NSPS is on track to achieve its full potential.

BALANCE BETWEEN CIVILIAN EMPLOYEES AND CONTRACTOR EMPLOYEES

Question. In recent years, DOD and the Air Force have become increasingly reliant on services provided by contractors. Over the past 8 years, DOD's civilian workforce has remained essentially unchanged in size. Over the same period, the DOD's spending on contract services has more than doubled, with the estimated number of contractor employees working for the Department increasing from an estimated 730,000 in fiscal year 2000 to an estimated 1,550,000 in fiscal year 2007. As a result of the explosive growth in service contracts, contractors now play an integral role in the performance of functions that were once performed exclusively by government employees, including the management and oversight of weapons programs, the development of policies, the development of public relations strategies, and even the collection and analysis of intelligence. In many cases, contractor employees work in the same offices, serve on the same projects and task forces, and perform many of the same functions as Federal employees.

Question. Do you believe that the current balance between civilian employees and contractor employees is in the best interests of the Air Force? In your view, has the Air Force become too reliant on contractors to perform its basic functions?

Answer. I agree with President Obama's government contracting memorandum of March 4, 2009, directing the Federal Government to ensure that functions that are inherently governmental in nature are not outsourced. If confirmed, I would work with the Secretary of the Air Force, and leaders across the Air Force to assess this matter so as to ensure compliance with the law and with the President's policy.

Question. Do you believe that the current extensive use of personal services contracts is in the best interests of the Air Force?

Answer. As I understand it, the Federal Acquisition Regulation restricts the use of personal services contracts. If confirmed, I would work with the Secretary of the Air Force, and leaders across the Air Force to ensure compliance with applicable law and policy.

Question. Do you believe that the Air Force should undertake a comprehensive reappraisal of "inherently governmental functions" and other critical government functions, and how they are performed?

Answer. I support fully the principles and policies set forth in President Obama's memorandum of March 4, 2009. That memorandum directs the Office of Management and Budget, in coordination with the Secretary of Defense, among others, to "develop and issue by July 1, 2009, Government-wide guidance to assist branch agencies in reviewing, and creating processes for ongoing review of, existing contracts in order to identify contracts that are wasteful, inefficient, or not otherwise likely to meet the agency's needs and to formulate appropriate corrective action in a timely manner." I believe that any such review must include a review of inherently governmental functions and other critical government functions and how they are performed. If confirmed, I will support any such review and corrective action, particularly as it relates to matters under the purview of the Office of the Assistant Secretary of the Air Force for Manpower and Reserve Affairs.

Question. If confirmed, will you work with other appropriate officials in the Air Force to address these issues?

Answer. If confirmed, I will work collaboratively with other Air Force officials to ensure these matters are addressed in the best interest of the Air Force and DOD.

Question. One reason for the explosive growth in DOD's contractor workforce has been the continuing limitation placed on the number of civilian employees of DOD. Rather than saving money as intended, this limitation has shifted all growth to contractor employees.

Would you agree that the balance between civilian employees and contractor employees in performing Air Force functions should be determined by the best interests of the Air Force and not by artificial constraints on the number of civilian employees?

Answer. Yes, I agree.

Question. If confirmed, will you work to remove any artificial constraints placed on the size of the Air Force's civilian workforce, so that the Air Force can hire the number of employees most appropriate to accomplish its mission?

Answer. If confirmed, I would support all efforts to ensure compliance with the law, and if modifications are determined to be necessary, to work with Congress as necessary.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. Numerous cases of sexual misconduct involving servicemembers in Iraq, Kuwait, and Afghanistan have been reported over the last several years. Many victims and their advocates contend that they were victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate military treatment. They asserted that the Military Services have failed to respond appropriately by providing basic services, including medical attention and criminal investigation of their charges.

What is your understanding of the resources and programs the Air Force has in place in deployed locations to offer victims of sexual assaults the medical, psychological, and legal help that they need?

Answer. I am aware of recent congressional testimony on this matter and understand that the Air Force goes to great lengths to ensure appropriate levels of support are available to our deployed Airmen. I understand that the Air Force deploys a fully trained Sexual Assault Response Coordinator (SARC) to each of our Air Expeditionary Wings and is posturing to support an additional location. While deployed, it is vital to have a robust sexual assault training and awareness program to ensure all personnel, regardless of military branch, know that the SARC is there to support them. I understand the Air Force's SARCs must complete a mandatory training before they can assume the role and responsibility. Combined with strong base leadership support, SARCs provide a 24/7 response capability. Responsibilities include conducting weekly in-processing briefings to newly arrived personnel and monthly case management team meetings to review ongoing cases. Air Force SARCs also address process improvements with representatives from Medical, Office of Special Investigations, Security Forces and Judge Advocate and Chaplain communities and provide outreach and prevention programs across their installation and supported Geographically Separated Units. If confirmed, I will continue to study this matter in greater depth with a view to ensuring that the Air Force continues to take appropriate steps to aid victims of sexual assault, both in garrison and in deployed locations.

Question. What is your view of the steps the Air Force has taken to prevent additional sexual assaults at home stations as well as deployed locations?

Answer. In my opinion, the Air Force has taken several extremely important steps in its campaign to prevent sexual assaults both at home station and deployed locations. For instance, I have learned that from the beginning of the Air Force's institutional program in 2005, prevention approaches have been included with our awareness and response efforts. Most prominent has been the inclusion of bystander awareness and how each Airman has a role in preventing sexual assaults. Part of the Air Force's continuous improvement to our training has been a long-term project to develop specific bystander intervention training modules for men, women, and leaders. If confirmed, I will continue these vital initiatives and assess whether additional steps should be taken.

Question. What is your view of the adequacy of the training and resources the Air Force has in place to investigate and respond to allegations of sexual assault?

Answer. I have been informed that from the time when the Sexual Assault Prevention and Response (SAPR) Program was created just 3 years ago, the Air Force believes they have implemented a sound response capability at the installation level. Since 2006, all airmen entering Basic training and all precommissioning programs are educated about sexual assault, their reporting options, and how to seek assistance if they have been a victim of this crime. Education and training courses have been designed and are ready to implement across the Air Force this year to reach airmen throughout their time in the Air Force regardless of the length of their service. If confirmed, I will assess whether additional steps should be taken to support victims and hold offenders accountable.

Question. Do you consider the Air Force's current sexual assault policies and procedures, particularly those on confidential, or restricted, reporting, to be effective?

Answer. Since the Air Force's program formally launched in 2005, I understand great progress has been made in policies and procedures, however, if confirmed, I will work with knowledgeable professionals to assess and ensure the continuation of such progress.

Question. What problems, if any, are you aware of in the manner in which the restricted reporting procedures have been put into effect?

Answer. While not extensively familiar with restrictive reporting problems, we must always be aware of what victims are experiencing and recognize that many will not report for a multitude of reasons. Many of those barriers are similar to what civilian victims endure who have no association with the military, as well as, some very unique challenges to those who are in the military. If I am confirmed, I will constantly engage to determine whether improvements are needed in the area of restrictive reporting.

Question. If confirmed, what actions would you take to ensure senior management level direction and oversight of Departmental efforts on sexual assault prevention and response?

Answer. If confirmed, I will have an active role in the oversight and implementation of the Air Force's SAPR Program. I'm committed to creating a culture of zero-tolerance regarding the crime of sexual assault. I recognize the importance of sustained partnerships with DOD, and with national subject matter experts and advocacy groups to get it right.

UNITED STATES AIR FORCE ACADEMY

Question. What is your assessment of the policies and procedures, including the frequency and use of surveys, at the United States Air Force Academy to prevent and respond appropriately to sexual assaults and sexual harassment and to ensure essential oversight?

Answer. I understand the Academy has institutionalized a comprehensive program of both prevention and response to sexual assault and sexual harassment, and that surveys are a necessary and important part of that program. I am not familiar exactly with the extent to which surveys are currently used at the Academy. If confirmed I will ensure vigilant oversight of this critical issue and, if necessary, adjust policies and resources.

Question. What is your assessment of the policies and procedures at the United States Air Force Academy to ensure religious tolerance and respect?

Answer. It is critical that one consistent set of guidelines that are fair to everyone be applied equally across the board because the Air Force Academy cannot be an institution unto itself but must be part of the larger Air Force. If confirmed, I expect the Air Force Academy to remain in full compliance with OSD and Air Force-wide policy.

RELIGIOUS GUIDELINES

Question. What is your understanding of current policies and programs of DOD and the Department of the Air Force regarding religious practices in the military?

Answer. It is my understanding that the Air Force has supported policies of religious tolerance and mutual respect. If confirmed, I would continue the Air Force's commitment to upholding the Constitutional tenets of the "free exercise" and "establishment" clauses, and review policies as necessary to assure continued compliance with the First Amendment.

Question. Do these policies accommodate, where appropriate, religious practices that require adherents to wear particular articles of religious significance?

Answer. Like other religious practices, I would expect that the principles of "free exercise" would be balanced against the interests of the Air Force in standardized uniform wear. If confirmed, I will review these policies, as required.

Question. In your view, do these policies accommodate the free exercise of religion and other beliefs without impinging on those who have different beliefs, including no religious belief?

Answer. I have not had an opportunity to review in depth the Air Force's policies regarding free exercise of religion and other beliefs. If confirmed, I will study this issue to determine if changes in policy are necessary.

Question. In your opinion, do existing Air Force policies and practices regarding public prayers offered by military chaplains in a variety of formal and informal settings strike the proper balance between a chaplain's ability to pray in accordance with his or her religious beliefs and the rights of other servicemembers with different beliefs, including no religious beliefs?

Answer. I understand that chaplains are not compelled to offer prayers that are inconsistent with their faith, but are expected to remain sensitive to the pluralistic Air Force and society they serve. In my opinion, such an approach strikes an appropriate balance given the diversity of religious views in the Air Force. If confirmed, I am willing to study this issue further to determine if changes in policy are necessary.

SUICIDE PREVENTION

Question. The committee is concerned about the increasing rate of suicides in all of the Services.

In your view, what is the cause of this increase in suicides in the Air Force?

Answer. I understand the Air Force has experienced an upward trend in suicides in 2008 compared to 2007. I believe that deployments and heavy operational tempo place a heavy strain on airmen and their families. If confirmed, I will aggressively work with other Air Force leaders, DOD and outside agencies to give this our full attention.

Question. What is your assessment of the Air Force's response to this increase in suicides?

Answer. It is my understanding that Air Force leadership has aggressively responded to the increase in suicides. The Air Force continues to look at many successful initiatives to build on an established Suicide Prevention Program. In my view, the Air Force has a benchmark program that we can continue to improve on to provide a comprehensive and collaborative approach to enhancing the psychological health and resiliency of airmen. If confirmed, I will fully support and build upon the Air Force Suicide Prevention Program.

Question. What is your assessment of the adequacy of Air Force programs in place to reduce or eliminate the incidence of suicides in the Air Force?

Answer. While one suicide is too many, I believe the Air Force Suicide Prevention Program has been an effective program. The program engages leadership at all levels; incorporates suicide prevention into Air Force education and training programs; utilizes recurrent mental health screening; and fosters a cross-functional approach to enhance our "Wingman" culture and strengthen the psychological health and resiliency of airmen.

FOREIGN LANGUAGE PROFICIENCY

Question. A Foreign Language Transformation Roadmap announced by DOD on March 30, 2005 directed a series of actions aimed at transforming the Department's foreign language capabilities, to include revision of policy and doctrine, building a capabilities based requirements process, and enhancing foreign language capability for both military and civilian personnel. More recently, Congress authorized incentive pay for members of precommissioning programs to study critical foreign languages.

In your view, what should be the priorities of the Federal Government to expanding the foreign language skills of civilian and military personnel and improving coordination of foreign language programs and activities among the Federal agencies?

Answer. In my view, our Nation's current and future involvement in overseas contingency operations will rely heavily on both foreign language skills and cultural knowledge. I recommend that all Federal agencies develop and incentivize organic foreign language capability within their respective organizations. These skills will allow us to strengthen and multiply our forces' capabilities across the full operational spectrum.

Question. If confirmed, what steps would you take to identify foreign language requirements, and to design military and civilian personnel policies and programs to fill those gaps?

Answer. I have been advised that the Air Force is currently participating in a DOD-directed, Joint Chiefs of Staff-led Capabilities Based Assessment; this joint effort is tasked to address the issue of foreign language requirements and the shortfalls we currently have in the Department. If confirmed, I would continue to assess and monitor this process and impact Air Force policy to ensure that we best utilize our resources to make up the shortfalls and continue to grow this high-demand capability within in the Air Force for the benefit of the Nation's defense.

Question. What is your assessment of an appropriate time frame within which results can be realized in this critical area?

Answer. I have been advised that the Air Force is in compliance with the requirements outlined in the Defense Language Transformation Roadmap (DLTR) and we are in close coordination with the Defense Language Office in the preparation of goals and action plans for the next phase of the DLTR which will provide a more

focused approach to build out foreign language capability. If confirmed I will continue to monitor compliance and closely coordinate with necessary agencies throughout DOD.

LEGISLATIVE FELLOWSHIP PROGRAM

Question. Each year, the Services assign mid-career officers to the offices of Members of Congress under the Legislative Fellows Program. Upon completion of their legislative fellowships, officers are required to be assigned to follow-on positions in their Services in which they effectively use the experience and knowledge they gained during their fellowships.

What is the total number of Air Force personnel currently assigned as legislative fellows, and what grades are these officers in?

Answer. I have been told that for academic year 2008–2009, the Air Force has 35 participants in the Air Force Legislative Fellowship Program. They have 32 officers in the O–4 grade and three DOD civilians in the Pay Band 2/GS–12/13 range attending.

For academic year 2009–2010, the Air Force has 36 individuals projected to start in July 2009. All military members are in the grade of O–4 (28 are active duty officers, 2 are Air National Guard members, and 2 are Air Force reservists). The remaining four are DOD civilians, again in Pay Band 2/GS–12/13. Describe how the Air Force selects individual officers for participation in its legislative fellows program.

As I understand the process, the Air Force Personnel Center advertises for nominations during the annual Intermediate and Senior Developmental Education selection process. Air Force Legislative Fellows are initially recommended by their senior Air Force leadership and then vectored by their Air Force Developmental Team to the Air Force Developmental Education Designation Board for selection.

Civilian Fellows meet an internal Civilian Developmental Education Board from which they are selected and forwarded to the Developmental Education Designation Board.

Question. What is your assessment of the value of the Legislative Fellows program to the Air Force and the utilization of officers who have served as legislative fellows?

Answer. I am familiar with the Air Force Legislative Fellows program and many other agency programs from my time spent on the Hill. I'm an advocate of these fellows programs as they provide participants a comprehensive understanding of the complexities of legislative operations and Congress's role in the process of government as a whole. As a development opportunity for our Airmen, fellowships enable first-hand understanding of legislative branch functions and how congressional decisions affecting Federal agencies' programs are made. This exposure provides participants the opportunity to learn how legislation is crafted, as well as enabling a fundamental understanding of the legislative role in military requirements and procurement. This is an experience that will serve these officers well as they progress into senior leadership roles. If confirmed I look forward to working with the Air Force personnel community to ensure optimum utilization of the Fellows' recent experience with Congress.

DEFENSE INTEGRATED MILITARY HUMAN RESOURCES SYSTEM

Question. The Department and the Services have been moving toward adoption of Defense Integrated Military Human Resources System (DIMHRS) as a cross-service, fully integrated personnel and pay system. Under the proposed timeline, the Army is the first in line to launch DIMHRS, with the Air Force to follow. Recent reports indicate technical difficulties will postpone the Army's launch date.

What is the status of the Air Force's implementation of DIMHRS? What is your assessment of the need for an integrated, cross-service personnel and pay system?

Answer. I understand that DOD is in the process of transitioning the core DIMHRS software to the Services for completion of tailored operational systems. The Air Force is establishing an acquisition program office to complete the solution, and will use the core software to the maximum extent practical and if confirmed, will aggressively engage to ensure fielding of the system.

Question. What is your understanding of the Air Force's evaluation of the adequacy of DIMHRS and other alternative personnel management systems for the Air Force?

Answer. If confirmed, I will carefully evaluate the adequacy of DIMHRS and other alternative personnel management systems for the Air Force?

Question. If confirmed, what changes, if any, would you recommend to the implementation schedule and process currently in place?

Answer. If confirmed, I would review the assessment and implementation plan to ensure it reflects best practices and is supported by a solid business case. If I discover deficiencies in the plan, I will make appropriate recommendations, after cross-Service coordination.

GI BILL BENEFITS

Question. Last year, Congress passed the Post-September 11 Veterans Educational Assistance Act that created enhanced educational benefits for servicemembers who have served at least 90 days on active duty since September 11. The maximum benefit would roughly cover the cost of a college education at any public university in the country.

What is your assessment of the effect of the act on recruiting and retention of servicemembers?

Answer. I understand the GI Bill has always been a positive recruiting and retention tool and I expect the post-September 11 GI Bill to continue this legacy. I believe it is too soon to have empirical data regarding the exact effect the new GI Bill has on recruiting, but there are stories from the field that the new GI Bill is a major point of discussion for potential recruits and is a major recruiting incentive. In addition to the revised education benefits, I believe the revised eligibility and transferability will have a positive effect on morale in general.

If I am confirmed I will share any empirical data regarding the effect of the post-September 11 GI Bill on recruiting, retention, and morale with this committee.

Question. What is your evaluation of the sufficiency of the implementation plan for the transferability provisions contained in the act?

Answer. I have been informed that the Air Force is working closely with DOD on the implementation of this new program and that DOD will publish its implementing policies in the near future. If confirmed, I will continue to ensure a close working relationship with DOD and our Sister Services so that the program is well-executed and consistent with Air Force policy.

AIR NATIONAL GUARD

Question. The Commission on the National Guard and Reserves (CNGR) issued its report in January 2008, and since then the Department has been engaged in evaluating and implementing the Commission's recommendations.

What do you consider to be the most important recommendations of the Commission relating to the National Guard, and which recommendations, in your view, should receive the highest priority for implementation?

Answer. The CNGR report in 2008 provided 95 recommendations for change. I believe the CNGR did a remarkable job of examining the issues of the Reserve components. Every recommendation provides a level of importance within its own right. There are themes that remain consistent throughout the report. These include transforming the Guard and Reserve with the means to become an Operational Reserve of the 21st century with the effective implementation of a continuum of service for its members. Generically, this core concept provides for Reserve component changes in training, equipping, career progression, family and member benefits, and employer support.

Question. In your view, would it facilitate integration of Active and Reserve components if the Director of the Air National Guard was dual-hatted with responsibilities under the Chief of Staff of the Air Force?

Answer. The Director of the Air National Guard reports to the Chief of the National Guard Bureau (CNGB). Under current DOD Directive, the CNGB serves as the principal advisor to the Secretary of the Air Force, and the Chief of Staff of the Air Force, on matters relating to the Air National Guard. As I understand it, dual-hatting the Director of the Air National Guard would be contrary to current DOD Directives and the National Guard Bureau Charter.

Question. With respect to the wearing of the military uniform, under what circumstances should personnel of the National Guard be authorized to wear their Air Force uniforms?

Answer. Present and retired members of the Air National Guard should wear the Air Force uniform on occasions and under circumstances prescribed by current Air Force and Air National Guard Instructions.

Question. Do you believe that Air National Guard personnel should be allowed to wear their uniforms at political rallies or events related to advancing legislation of interest? If so, under what circumstances?

Answer. Air National Guard members should only wear the Air Force uniform as prescribed by current Air Force regulations and supplemented by Air National Guard Instructions.

Question. From an organizational and force management perspective, what goals do you hope to accomplish with respect to the Air National Guard if you are confirmed?

Answer. If confirmed, I will work to support the needs of the Air Reserve components as part of the totally integrated Air Force through policy oversight of human resources and Reserve component programs.

MOBILIZATION AND DEMOBILIZATION OF NATIONAL GUARD AND RESERVES

Question. In the aftermath of the attacks of September 11, 2001, the National Guard and Reserves have experienced their largest and most sustained employment since World War II. Numerous problems arose in the planning and procedures for mobilization and demobilization, e.g., inadequate health screening and medical readiness, monitoring, antiquated pay systems, limited transition assistance programs upon demobilization, and lack of access to members of the Individual Ready Reserve. Reserve Force management policies and systems have been characterized in the past as "inefficient and rigid" and readiness levels have been adversely affected by equipment stay-behind, cross-leveling, and reset policies.

What is your assessment of advances made in improving Air Force Reserve component mobilization and demobilization procedures, and in what areas do problems still exist?

Answer. It is too early for me to make an assessment of the problems that may exist in the mobilization and demobilization process. From the outside looking in, the Air Force seems to do very well with the way it employs the Reserve components.

Question. What do you consider to be the most significant enduring changes to the administration of the Reserve components aimed at ensuring their readiness for future mobilization requirements?

Answer. The Air Force's Total Force approach resourcing and training the Reserve components goes a long way to ensuring their readiness for mobilization and air expeditionary force participation.

Question. Do you see a need to modify current statutory authorities for the mobilization of members of the Air National Guard and Air Force Reserves?

Answer. At this point, based on my limited knowledge, I feel current statutory authorities are sufficient to support mobilization requirements. If confirmed, I will be in a better position to assess whether to recommend changes to applicable law and policy.

Question. Do you agree that Air National Guard and Air Force Reserve personnel should be mobilized to augment civilians deployed to Afghanistan?

Answer. Yes, I believe that National Guard and Reserve component personnel bring skills and experience that can be used to augment other executive branch agencies.

MEDICAL AND DENTAL READINESS OF AIR NATIONAL GUARD AND AIR FORCE RESERVE PERSONNEL

Question. Medical and dental readiness of Reserve component personnel has been an issue of significant concern to the committee, and shortfalls that have been identified have indicated a need for improved policy oversight and accountability.

If confirmed, how would you seek to clarify and coordinate reporting on the medical and dental readiness of the Reserves?

Answer. First, let me say that I am extremely proud of our Reserve component servicemembers and their service to our Nation during this time of war and transformation. Based upon what I have seen of the Air Reserve components, this has not been an issue that prevents their contribution to the Total Force. However, if confirmed I will assess the effectiveness of reporting on the medical and dental readiness and to evaluate the need for policy changes and increased oversight.

Question. How would you improve upon the Air Force's ability to produce a healthy and fit Reserve component?

Answer. At present, the Air Reserve components maintain the same level of fitness as the Regular Air Force. These standards have served them well and, if confirmed, I hope to work with the Air Force to ensure our Reserve components remain healthy and fit.

NATIONAL GUARD ORGANIZATION, EQUIPMENT, AND READINESS

Question. Legislative proposals introduced in recent years and recommendations of the CNGR have proposed numerous changes to the roles and responsibilities of the National Guard and Reserves. Several of the proposed changes have been implemented, and numerous others are under consideration.

How do you assess the changes in the roles, mission, and authorities of the CNGB and the Air National Guard?

Answer. From my perspective, the changes to the roles, mission and authorities of the CNGB elevates the National Guard to a level of visibility needed to ensure it is properly equipped and resourced to carry out its dual-role mission.

Question. In your view, do the current Air Force processes for planning, programming, and budgeting sufficiently address the requirements of the Air National Guard? What is the appropriate role of the CNGB in this regard?

Answer. I have not had sufficient time to examine the Air Force processes for planning, programming and budgeting, nor, am I aware of how the CNGB interacts within this process. If confirmed, I look forward to engaging in this process to ensure our Air Reserve components are properly equipped and resourced to carry out their missions and responsibilities.

SYSTEMS AND SUPPORT FOR WOUNDED AIRMEN

Question. Wounded soldiers from OEF and OIF deserve the highest priority from the Air Force for support services, healing and recuperation, rehabilitation, evaluation for return to duty, successful transition from active duty if required, and continuing support beyond retirement or discharge.

In your view, what were the most critical shortcomings in warrior care since 2001?

Answer. From my understanding, the Air Force has been doing an outstanding job caring for our wounded airmen since 2001. The most critical shortcoming that I have been advised on is retaining individuals who wished to remain on active duty and providing policy to ensure they could continue to be productive members of the Service. If confirmed, it will be my distinct honor and privilege to do all I can to continue to promote the highest standard of lifelong care for our Wounded Warriors.

Question. What is your assessment of the effectiveness of the Air Force's response?

Answer. I have been advised that the Air Force has taken great action in addressing this issue and made retention, if possible, a priority. The biggest shortcoming facing the Air Force in the near future is reintegration into civilian communities if retention is not possible especially for those with non-visible wounds of war such as traumatic brain injury or post-traumatic stress disorder. Employment for our wounded warriors outside of the Air Force is not just a Service issue but an American issue. The Air Force must continue to work through civilian hiring policies to hire wounded veterans when qualified, partner with organizations like the National Chamber of Commerce for local placement with business, and other helping organizations.

If confirmed, I will assess the effectiveness of the Air Force's response and continue to work with Congress to ensure our warriors and their survivors receive the highest possible care and support.

Question. If confirmed, are there additional strategies and resources that you would pursue to increase the Air Force's support for wounded soldiers, and to monitor their progress in returning to duty or to civilian life?

Answer. If confirmed, I will continuously assess the efficiency and appropriateness of the Air Force's Warrior and Survivor Care Program and implement strategies and seek additional resources as appropriate to ensure the Air Force meets the needs of our wounded airmen.

Question. Studies following the revelations at Walter Reed point to the need to reform the DOD disability evaluation system. What is your assessment of the need to streamline and improve the Air Force's disability evaluation system?

Answer. I am informed that beginning November 26, 2007, the Army started to test a revamped physical disability evaluation program at Walter Reed Army Medical Center, streamlining the process used to determine soldiers' fitness for service or eligibility for military and veterans' benefits. I am advised that key features of this pilot program include a single medical examination and a single-sourced disability rating. It is my understanding that the Department of VA conducts a single comprehensive exam and will rate all medical conditions. The military departments accept the Department of VA rating for all medical conditions determined unfitting for continued military service unless the condition involves noncompliance, misconduct, or a non-service aggravated medical condition which existed prior to service. Based on the limited information I have so far, I believe the process does need to be improved. If confirmed, I will work to this end with stakeholders in the Air Force as well as with experts in the DOD and the Department of VA.

Question. If confirmed, how will you address any need for change?

Answer. If I am confirmed, I will listen to the information presented by the experts in this area and study the process myself. After becoming fully informed on the issues, I would work with the stakeholders in the Air Force and appropriate personnel in both the DOD and the Department of VA to determine what areas should be changed and how best to accomplish those changes.

QUADRENNIAL REVIEW OF MILITARY COMPENSATION

Question. The Department completed work last year on the 10th Quadrennial Review of Military Compensation (QRMC), releasing Volume I of its report in February 2008 and Volume II in July 2008. Among other recommendations, the QRMC proposes a new defined benefit retirement plan that more resembles the benefits available under the Federal Employee Retirement System than the current military retirement benefit; increasing TRICARE fees for retirees; and the adoption of dependent care and flexible spending accounts for servicemembers.

What is your assessment of the QRMC recommendations, particularly the proposed new defined retirement plan?

Answer. Reductions in current entitlements and benefits could impact future recruiting and retention efforts. Proposed changes in military retirement entitlements and benefits must be thoroughly reviewed to fully understand these impacts. If I am confirmed, I will be mindful that our military forces, who are often called upon to fight under extremely arduous conditions, should receive deserving pay and entitlements.

Question. Which recommendations, if any, would you propose that Congress implement?

Answer. I believe that any proposed action on the earlier QRMC recommendation will require thorough review and analysis to understand the impact. At this time, I do not have a specific proposal for implementation of any change.

MANAGEMENT AND DEVELOPMENT OF THE SENIOR EXECUTIVE SERVICE

Question. The transformation of the Armed Forces has brought with it an increasing realization of the importance of efficient and forward-thinking management of civilian senior executives.

What is your vision for the management and development of the Air Force civilian senior executive workforce, especially in the critically important areas of acquisition, financial management, and the scientific and technical fields?

Answer. I am told that the Air Force believes that deliberate management of this diverse population is of preeminent importance. They also feel that development of our senior executives—and those who one day will become senior executives—is equally important. The Air Force is committed to providing opportunities—educational and experiential—to enhance leadership skills for all executives, including those in the acquisition, financial management and scientific and technical fields. If confirmed, I will continue this vision, ensuring deliberate management and development of the Air Force senior executive workforce.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes, I do.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Assistant Secretary of the Air Force for Manpower and Reserve Affairs?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided in a timely manner to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

POLITICAL ACTIVITY BY MILITARY PERSONNEL IN UNIFORM

1. Senator MCCAIN. Mr. Ginsberg, in 2005, Senators Bond and Leahy conducted a political rally across the street from the Senate Russell Building in connection with their introduction of their National Guard Empowerment Act. Approximately 30 Air and Army National Guard general officers in uniform participated in that rally as proponents and advocates for the legislation. Do you think it is permissible—or good policy—for military personnel to participate in the political process while wearing their military uniforms?

Mr. GINSBERG. Sir, though Senator Leahy and Senator Bond organized and announced this as a news conference and not as a political rally, I do believe it is neither permissible nor good policy for military personnel to participate in a political process while wearing their military uniforms. In fact, Department of Defense guidance states that members should not wear the military uniform when participating in public speeches, interviews, picket lines, marches, or any public rallies, or in any public demonstration when the Air Force sanction of the cause for which the activity is conducted may be implied.

2. Senator MCCAIN. Mr. Ginsberg, with respect to members of the National Guard, reservists, and Active-Duty members, do you think that under any circumstances they should be authorized to wear their uniforms while demonstrating in favor of legislation?

Mr. GINSBERG. Sir, no I do not. Service policy for both Army and Air Force is consistent in prohibiting wearing of the uniform by anyone participating in the furtherance of political activities or interests that result in an inference of official sponsorship. Regardless of duty status, this policy applies to National Guard, Reserve, and active duty airmen. I believe that this is sound policy and should be continued.

3. Senator MCCAIN. Mr. Ginsberg, do you think that is consistent with a politically neutral military?

Mr. GINSBERG. My previous answers with respect to military members not wearing uniforms when participating in public speeches, interviews, picket lines, etc. is consistent with a politically neutral military.

TRICARE FOR RESERVES

4. Senator MCCAIN. Mr. Ginsberg, the Senate recently adopted a resolution which Senator Levin and I, along with Senators Ben Nelson and Graham, co-sponsored recommending that 2009 be recognized as the Year of the Military Family. Where are the gaps in support for military families, and what would you do, if confirmed, to close those gaps within the United States Air Force?

Mr. GINSBERG. I am familiar with the testimony given by Ms. Eliza Nesmith, a member of the Air Force's Deputy Chief of Staff for Manpower, Personnel and Services staff, given earlier this month with respect to gaps in support of military families. I understand the gaps to include not having a clear understanding of the processes through which child and family adjustment is enhanced or hindered; not having a clear understanding of how multiple deployments influence families; and not having a clear understanding of how deploying through the National Guard/Reserve versus Active Duty can affect adjustment. I look forward to working with senior Air Force and DOD leadership to bridge these and any other gaps that may exist for the Total Force, if confirmed.

PERSONNEL REDUCTIONS IN THE AIR FORCE

5. Senator MCCAIN. Mr. Ginsberg, the President's budget request for fiscal year 2010 includes funding for an Active-Duty end strength of 331,700 airmen. Although this represents an increase of almost 16,000 over previous plans to shrink to 316,000 personnel, there are still concerns being expressed about the stress on airmen, particularly in aircraft maintenance and base support functions. Yet, the halt in the reduction of end strength in fiscal year 2010 is proposed to allow the Air Force to provide manpower for new and emerging missions as opposed to backfilling the shortages in existing operational capabilities. If confirmed, will you immediately assess the effect of manpower distribution among Air Force specialty codes for main-

tenance and base support and report back to this committee with the results of your review?

Mr. GINSBERG. The 331,700 active duty end strength should allow the Air Force to fund its most pressing requirements. As I understand it, the Deputy Chief of Staff for Manpower, Personnel and Services, along with the Chief of the Staff of the Air Force have already identified and began assessing the effect of manpower distribution among Air Force specialty codes to include maintenance and base support, and I will eagerly join in the assessment to produce a workable and long lasting solution. If confirmed, upon completion of my review, I will report back to the committee with my assessment.

6. Senator MCCAIN. Mr. Ginsberg, how will you assess the health and readiness of the force as Air Force personnel are asked to do more with less people?

Mr. GINSBERG. If confirmed, I will work with the Deputy Chief of Staff for Manpower, Personnel and Services, Chief of the Air Force Reserves, the Director of the Air National Guard, and the Air Force Surgeon General to assess the health and readiness of the force. I am told that tools currently exist such as readiness reports and climate assessments and will work to identify where the largest "health and readiness" gaps exist and direct my focus on those, if confirmed.

[The nomination reference of Daniel B. Ginsberg follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
June 2, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Daniel B. Ginsberg of the District of Columbia, to be an Assistant Secretary of the Air Force, vice Craig W. Duehring.

[The biographical sketch of Daniel B. Ginsberg, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH BY DANIEL GINSBERG

Daniel Ginsberg is the Senior Defense Policy Advisor to U.S. Senator Patrick Leahy of Vermont. Serving as a legislative assistant to the senior Senator from Vermont since 1999, Mr. Ginsberg assists Senator Leahy with his work as a top member of the U.S. Senate Defense Appropriations Subcommittee and as the co-chair of the U.S. Senate National Guard Caucus.

Prior to this, Mr. Ginsberg served on the staff of U.S. Senate Committee on Armed Services during the chairmanship of U.S. Senator Sam Nunn of Georgia. He has held various research positions at the RAND Corporation, the International Institute for Strategic Studies, and the Center for Strategic and Budgetary Assessments. He has also completed internships at the U.S. Senate Permanent Subcommittee on Investigations, the United States Mission to the North Atlantic Treaty Organization, the Office of the Assistant Secretary of Defense (Public Affairs), and Senator Nunn's Atlanta Office.

Mr. Ginsberg is a 1995 graduate of the University of Michigan, including a year abroad at the London School of Economics where he completed the General Course. He earned an M.A. in international economics and strategic studies in 1998 from the Johns Hopkins University's Nitze School of Advanced International Studies. From 1998 to 1999, he undertook a year-long fellowship at the University of Chicago, carrying studies with the Department of Political Science and the Committee on Social Thought.

Mr. Ginsberg was born in West Lafayette, IN, and raised in Dunwoody, GA, an Atlanta suburb. He currently lives in Washington, DC with his wife Jessica Rose.

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details

the biographical, financial, and other information of the nominee. The form executed by Daniel B. Ginsberg in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Daniel Brian Ginsberg (sometimes known as Danny Ginsberg).

2. **Position to which nominated:**

Assistant Secretary of the Air Force for Manpower and Reserve Affairs.

3. **Date of nomination:**

June 2, 2009.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

March 13, 1974; West Lafayette, IN.

6. **Marital Status:** (Include maiden name of wife or husband's name.)

Married to Jessica L. Rose.

7. **Names and ages of children:**

None.

8. **Education:** List secondary and higher education institutions, dates attended, degree received, and date degree granted.

University of Chicago, 09/98-05/99, fellowship, no degree

Johns Hopkins University School of Advanced International Studies, 09/96-05/98, M.A., 05/98.

London School of Economics, 10/94-05/95, General Course, year abroad, no degree.

University of Michigan, 09/92-12/95, B.A., 12/95.

Dumwoody High School, Atlanta, GA, 09/89-06/92, high school diploma, 06/92.

9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Senior Defense Policy Advisor, Office of U.S. Senator Patrick Leahy, Washington, DC, 11/99-present.

Research Fellow and Consultant, RAND, Washington, DC, 04/99-11/99.

10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Research Assistant, U.S. Senate Committee on Armed Services, Washington, DC, 05/93-08/93, 05/94-08/94, and 01/96-10/96.

Intern, U.S. Mission to NATO, Brussels, Belgium, 05/95-08/95.

Intern, U.S. Senate Permanent Subcommittee on Investigations, Washington, DC, 05/92–08/92.

Intern, Office of the Assistant Secretary of Defense for Public Affairs, Washington, DC, 06/91.

Intern, Office of U.S. Senator Sam Nunn, Atlanta, GA, 10/90–05/91 and 09/91–05/92.

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.

None.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.

None.

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

09/2004, John Kerry for President, \$100.

09/2008, Obama for America, \$2,000.

10/2008, Obama for America, \$195.

14. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

National Guard Association Patrick Henry Award, 2003.

The Military Coalition Freedom Award, 2003.

The Enlisted Association of the National Guard Militia Award, 2002.

The Reserve Officers Association Appreciation Award, 2001.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

From September 2002 through April 2009, I have written articles on classical music and opera (concert reviews, feature pieces, and interviews) for the Washington Post and a few other publications, including the Washington City Paper and Bloomberg News. I have never accepted any payment for these articles, following Senate rules on outside writing and speaking. None of the articles related in any way to the Department of Defense, the U.S. Government, or politics. I have severed my relationship with the Washington Post and no longer write music reviews or carry out any music journalism activities. Attached is a full listing of articles that I have had published.

[Witness responded and information is retained in the committee's executive files.]

16. **Speeches:** Provide the committee with two copies of any formal speeches you have delivered during the last 5 years which you have copies of and are on topics relevant to the position for which you have been nominated.

I have given no formal speeches. Based off general notes, I have given extemporaneous remarks on several military and defense related topics at workshops and conferences.

17. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to respond to requests to appear and testify before any duly constituted committee of the Senate?

Yes.

[The nominee responded to the questions in Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–F are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

DANIEL B. GINSBERG.

This 3rd day of June, 2009.

[The nomination of Daniel B. Ginsberg was reported to the Senate by Chairman Levin on June 24, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on July 6, 2009.]

**NOMINATIONS OF GEN. JAMES E. CART-
WRIGHT, USMC, FOR REAPPOINTMENT TO
THE GRADE OF GENERAL AND REAPPOINT-
MENT AS THE VICE CHAIRMAN OF THE
JOINT CHIEFS OF STAFF; AND ADM ROB-
ERT F. WILLARD, USN, FOR REAPPOINT-
MENT TO THE GRADE OF ADMIRAL AND TO
BE COMMANDER, UNITED STATES PACIFIC
COMMAND**

THURSDAY, JULY 9, 2009

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:33 a.m. in room SD-106, Dirksen Senate Office Building, Senator Carl Levin (chairman) presiding.

Committee members present: Senators Levin, Lieberman, Akaka, Bill Nelson, Ben Nelson, Webb, Udall, Hagan, Begich, Burris, McCain, Inhofe, Chambliss, and Thune.

Also present: Senator Inouye.

Committee staff members present: Richard D. DeBobes, staff director; and Leah C. Brewer, nominations and hearings clerk.

Majority staff members present: Madelyn R. Creedon, counsel; Richard W. Fieldhouse, professional staff member; Creighton Greene, professional staff member; Jessica L. Kingston, research assistant; Gerald J. Leeling, counsel; William G.P. Monahan, counsel; Russell L. Shaffer, counsel; and William K. Sutey, professional staff member.

Minority staff members present: Joseph W. Bowab, Republican staff director; Adam J. Barker, professional staff member; Daniel A. Lerner, professional staff member; Lucien L. Niemeyer, professional staff member; Diana G. Tabler, professional staff member; Richard F. Walsh, minority counsel; and Dana W. White, professional staff member.

Staff assistants present: Kevin A. Cronin and Breon N. Wells.

Committee members' assistants present: James Tuite, assistant to Senator Byrd; Christopher Griffin, assistant to Senator Lieberman; Nick Ikeda, assistant to Senator Akaka; Christopher Caple, assistant to Senator Bill Nelson; Ann Premer, assistant to Senator Ben Nelson; Patrick Hayes, assistant to Senator Bayh; Gordon I. Peterson, assistant to Senator Webb; Jennifer Barrett,

assistant to Senator Udall; Roger Pena, assistant to Senator Hagan; Lindsay Young, assistant to Senator Begich; Gerald Thomas, assistant to Senator Burris; Lenwood Landrum and Sandra Luff, assistants to Senator Sessions; Clyde A. Taylor, IV, assistant to Senator Chambliss; Jason Van Beek, assistant to Senator Thune; Brian W. Walsh, assistant to Senator Martinez; and Chip Kennett, assistant to Senator Collins.

OPENING STATEMENT OF SENATOR CARL LEVIN, CHAIRMAN

Chairman LEVIN. Good morning, everybody.

This morning, the committee meets to consider the nominations for two very significant military positions. General James Cartwright, United States Marine Corps, has been nominated for a second term as Vice Chairman of the Joint Chiefs of Staff; and Admiral Robert Willard, United States Navy, has been nominated to be the Commander of U.S. Pacific Command (PACOM).

On behalf of the committee, I want to thank you both for decades of service to this country and for your willingness to continue to serve. The country appreciates—and this committee reflects that appreciation—the sacrifices that you and your families have made along the way.

The support that our military families provide is critical, and we want to do all that we can to support them. Both of you have your family members with you today, and when it comes your time to give your opening statements, we would welcome your introducing family members.

Before I give my opening statement, Chairman Daniel Inouye is with us this morning to make an introduction. Given his incredible schedule, I am going to call on him before I complete my opening statement.

It is great to have you with us always, Danny. Senator Inouye?

STATEMENT OF HON. DANIEL K. INOUE, U.S. SENATOR FROM THE STATE OF HAWAII

Senator INOUE. Thank you very much, Mr. Chairman, Senator McCain, and distinguished members of the committee.

I am pleased and honored to be here this morning to introduce Admiral Robert F. Willard, nominee for the position of Commander of the U.S. Pacific Command.

I commend this wise decision to designate Admiral Willard as our next PACOM Commander. His invaluable experience as current Commander of the U.S. Pacific Fleet will serve him well as he leads our Nation's oldest and largest command.

He is a graduate of the U.S. Naval Academy, an F-14 aviator, operations officer, and executive officer of the Navy Fighter Weapons School known as "Top Gun." He has commanded the Screaming Eagles, the amphibious flagship USS *Tripoli*, and the aircraft carrier USS *Abraham Lincoln*.

His experiences in the Pacific area of responsibility and his thorough knowledge and understanding of the region's history would be a tremendous asset to anyone that might assume the helm at PACOM. Commanding U.S. Naval Forces in the Pacific has given him tremendous exposure to the challenges and rewards that face our military in that area of the world.

Because of Admiral Willard's firm grasp of the history of the Asia-Pacific region, he understands the geopolitical dynamics at work, which confront the United States. The PACOM Commander's watchful eye over such an expansive area cannot be accomplished alone, and this enforces cooperation between U.S. military forces and those of our friends in the region.

I have had the honor and pleasure of working with Admiral Willard during his tenure as Commander of U.S. Pacific Fleet on very important issues that face our Navy in the Pacific Ocean. The Admiral and I have discussed the value of Pearl Harbor, the shipyard, the Pacific Missile Range on a number of occasions. This intimate knowledge of Hawaii's importance to our national defense is in part why Hawaii will be welcoming the first of its new *Virginia*-class submarines, the USS *Hawaii*, later this month.

Mr. Chairman, December 7, 1941, is a distant memory for most Americans. On that quiet Sunday morning, Hawaii's strategic importance was impressed on this Nation by an attack on our military forces on the island of Oahu and propelled our Nation into the 20th century's second world war.

Despite time and technological advances, the significance of Hawaii's location in the Pacific has not changed, and it is still essential to the defense of all Americans and our allies in this region. There are many challenges and opportunities for the United States in the Asia-Pacific region. I have complete faith in Admiral Willard's ability to lead PACOM.

It is essential our military have its most capable leaders at the helm to guide us through this difficult time. Mr. Chairman and members of the committee, I am confident Admiral Willard's leadership will benefit all of our forces in the Pacific and ensure our national security.

Thank you very much.

Chairman LEVIN. Thank you so much, Senator Inouye. It is always great to have you here. It is a very meaningful introduction, and I know Admiral Willard is most appreciative as well.

These nominees are going to face a host of challenges. General Cartwright is going to continue to serve as our country's second-highest ranking military officer, carrying out the Nation's military priorities and playing a major role in the Department of Defense's (DOD) acquisition process. General Cartwright is also responsible for making sure that the needs of the combatant commanders are addressed in a timely fashion—that they have what they need to carry out their missions when they need it.

General Cartwright, I first would like to take this opportunity to thank you for your candor, your accessibility over the past few years, and to let you know that all of us appreciate your willingness to meet with both members and staff of this committee and have so many significant and serious discussions over those years on a number of issues.

Admiral Willard will assume command of PACOM at a time of increasing tensions with North Korea and as a result of a continuing series of provocative North Korean actions and a major repositioning of U.S. forces within the Pacific Rim.

Both of our nominees will lead our military in meeting the challenges of preventing the spread of weapons of mass destruction

(WMD), dealing with stateless terrorism, ethnic conflict, and violent religious extremism. General Cartwright will face these challenges globally, Admiral Willard in a region with a particularly troublesome history of proliferation.

In addition to your responsibilities to act as needed in the absence of the Chairman of the Joint Chiefs, General Cartwright, you have important responsibilities in the context of acquisition, nuclear, space, cyber security, and ballistic missile defense (BMD) matters.

It is the responsibility of the Joint Requirements Oversight Council (JROC) which you chair, to identify the requirements of military commanders and to see that the acquisition process meets these requirements. An additional responsibility of yours is to co-chair with the Deputy Secretary of Defense, the Deputy's Advisory Working Group. This group makes the key decisions as to the Department's resources and what major investments will be made.

Between those two groups, the JROC and the Deputy's Advisory Working Group, you have the opportunity to shape, through the investment decisions, the long-term capabilities of the Department and the Military Services. Your experience in this capacity—General, given that experience, we will be interested in hearing from you as to how the changes in the Defense Acquisition Reform Act which Congress recently passed might assist you in improving the acquisition process.

We also would be interested, General, in your thoughts on the opportunities for future U.S.-Russian military cooperation, including missile defense, in light of the recently completed meetings between President Obama and Russian President Dmitry Medvedev.

Admiral Willard, you have had extensive experience in the Pacific, having served as Commander of Carrier Group Five, the Commander of the U.S. 7th Fleet, as well as a tour of duty as Deputy Commander of the U.S. Pacific Fleet and now as the Commander of the U.S. Pacific Fleet.

With that considerable regional experience and your many other impressive accomplishments in the Navy, you bring a strong background for assignment as the Commander of PACOM.

Admiral, we would be interested in your assessment of the situation on the Korean peninsula and the current efforts to track ships suspected of carrying illicit cargo to and from North Korea in violation of the United Nations (U.N.) Security Council resolutions. We would be interested also in our military relations with China and how you see that relationship evolving.

We look forward to hearing from our witnesses this morning. We thank them again for their service.

I now call upon Senator McCain for his opening remarks.

STATEMENT OF SENATOR JOHN MCCAIN

Senator MCCAIN. Thank you very much, Senator Levin.

Mr. Chairman, I join you in welcoming General Cartwright and Admiral Willard and congratulating them on their nominations. I thank each of them and their families for their service.

General Cartwright, you have demonstrated an extraordinary understanding of the global posture the United States must main-

tain in this area of constantly changing threats, and I believe that you are well-qualified for a second term as Vice Chairman.

I would like to echo the words of Senator Levin. You have been very candid and forthcoming with the members of this committee and with the two of us, and it is much appreciated on many of the difficult issues that we face. I applauded your comments last March about DOD's acquisition strategy, which you underscored that we must devote our procurement dollars to weapon systems that address the most likely threats instead of what some consider to be the most dangerous.

This was certainly borne out later in Secretary Gates' recommendations, and I agree with your premise that our weapon systems must impose greater cost on our potential and current enemies than they do on us. I hope you and we in Congress will be able to adhere to this philosophy in the days ahead.

With the recent launch of the major coalition operation in southern Afghanistan, I look forward to hearing more about how we intend to proceed in that theater. Success in Afghanistan requires that we employ troop levels appropriate to the mission we are asking our military to carry out. As a result, it is vital that the commanders on the ground are free, and perceive they are free, to request the forces they conclude are necessary.

General Cartwright, I hope to hear from you precisely the degree of freedom that General McChrystal will have to request troops and resources and how that fits into recent reports suggesting the administration was preemptively counseling against higher force levels.

General Cartwright, one of the most—and I will talk about this more later—extraordinary articles I have seen in my many years of service appeared in the Washington Post, where apparently a reporter for the Washington Post was brought into a meeting in Afghanistan by General Jim Jones, the National Security Advisor, with the military. At that time, according to this article, General Jones said there would be no additional troops under any circumstances.

I will be interested in hearing about how that jives with the supposed delay in a decision for an additional 10,000 troops that at that time the President had "delayed" the decision on. I must say, I have never seen such a scenario where a reporter is brought into a briefing between the President's National Security Advisor and our military commanders in the field.

With the President just concluding a round of talks with his Russian counterpart on arms control, our national strategic capabilities, including missile defense, are currently at center stage. I have previously advocated for significant reductions in nuclear arsenals and for other steps that would reduce the risk that nuclear weapons would ever be used.

I look forward to hearing your thoughts on the target numbers of warheads and delivery vehicles announced this week, and on what the implications of such reductions might be for the urgent need to invest in the modernization of both the stockpile and the complex-wide intellectual and physical infrastructure needs.

With respect to the planned European-based missile defense system in Poland and the Czech Republic, I am concerned that there

is a perception, one that has been strengthened by the testimony of administration officials before this committee, that the United States is preparing to back away, even abandon commitments made to these countries during the past administration. I believe it is essential in the future that we keep faith with our close allies in Poland and the Czech Republic.

Admiral Willard, you have an outstanding record of joint and naval service, and you are well-qualified to assume responsibilities of PACOM Commander. The importance of the theater, economically and from a strategic security standpoint, can't be overstated, and there are a number of short- and long-term challenges facing the United States in the Asia-Pacific region.

North Korea continues its variety of belligerent actions with the firing of missiles over the weekend and new reports of a possible Pyongyang-directed cyber attack on the United States and South Korea. I look forward to hearing about how PACOM intends to enforce the latest U.N. Security Council resolution banning North Korea's transit at sea of nuclear and missile technologies and what the limits are to that enforcement.

In addition, I hope to hear your thoughts on Japanese reaction to any changes in our nuclear posture, including arms reduction carried out through the Strategic Arms Reduction Treaty (START), and about evolving Chinese naval capabilities and the value of military-to-military exchanges with China.

Again, I thank our nominees and their families for their service.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you very much, Senator McCain.

General Cartwright?

STATEMENT OF GEN. JAMES E. CARTWRIGHT, USMC, NOMINEE FOR THE POSITION OF VICE CHAIRMAN OF THE JOINT CHIEFS OF STAFF

General CARTWRIGHT. Thank you, Chairman Levin and Senator McCain, for this opportunity to appear today.

I believe the support of loved ones reinforces our servicemembers' ability to serve this Nation. This has been especially true for me. So, it is with great pleasure that I have the opportunity to introduce my wife, Sandee, who is able to be with me this morning, along with our daughter Jayme and her husband, Chris—both members of the Defense Intelligence Agency (DIA).

Our other daughter, Billee, is awaiting the return of her husband, who is on his fourth overseas tour. He is a member of the second battalion of the 19 Special Forces Group of the West Virginia National Guard. We are waiting in the next couple of days to welcome him home.

I am grateful for all that they have done and what they have meant to me throughout my service.

Over the last nearly 2 years, I have had the privilege of working with the members of this committee on many vital issues, helping to shape the force, meet the wide variety of challenges our Nation faces. If confirmed, I look forward to continuing our efforts in support of the Nation.

I stand ready for your questions.

Chairman LEVIN. Thank you, General.

Admiral Willard?

**STATEMENT OF ADM ROBERT F. WILLARD, USN, NOMINEE TO
BE COMMANDER, U.S. PACIFIC COMMAND**

Admiral WILLARD. Thank you, Chairman Levin, Senator McCain. I would like to thank the committee for scheduling this hearing during such a busy time in Washington, DC.

I would like to thank the Secretary of Defense and President Obama for their confidence in my service to have put forward this nomination.

I would like to thank Senator Inouye for his very kind introduction and for his enduring support to our military throughout the world and especially in Hawaii.

I am deeply honored to be considered for this command, and I think I appreciate the vital importance of the Asia-Pacific region to this Nation.

If I have one best attribute in pursuing this command, she is sitting behind me. My wife, Donna, pinned these wings on 35 years ago, and since then, she has devoted herself to the spouses and families of our military. Along the way, she raised three wonderful children—Jennifer, Bryan, and Mark—who, in turn, have given us three wonderful grandchildren to enjoy.

I would like to also introduce Donna's brother, who is here today, Mike Yelverton, a senior executive in DIA; his wife, Anita; and son Rudy.

I very much look forward to opportunities, if confirmed, to work with this committee. I thank this committee for their devotion to our uniformed men and women throughout the country. Sir, I look forward to your questions.

Chairman LEVIN. Thank you very much, Admiral.

Let me ask both of you these questions.

Senator INOUE. May I be excused?

Chairman LEVIN. Oh, of course. I am sorry. Senator, I should have given you that formal welcome and farewell before. Thank you for coming.

These are the standard questions we ask of nominees. Have you adhered to applicable laws and regulations governing conflicts of interest?

[Both witnesses answered in the affirmative.]

Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

[Both witnesses answered in the negative.]

Will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

[Both witnesses answered in the affirmative.]

Will you cooperate in providing witnesses and briefers in response to congressional requests?

[Both witnesses answered in the affirmative.]

Will those witnesses be protected from reprisal for their testimony or briefings?

[Both witnesses answered in the affirmative.]

Do you agree, if confirmed, to appear and testify upon request before this committee?

[Both witnesses answered in the affirmative.]

Do you agree to give your personal views when asked before this committee to do so, even if those views differ from the administration in power?

[Both witnesses answered in the affirmative.]

Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

[Both witnesses answered in the affirmative.]

Thank you.

Let us try an 8-minute first round today.

General Cartwright, there was a Joint Understanding issued by President Obama and President Medvedev on Monday indicating that the target range of deployed strategic nuclear weapons is in a range of 1,500 to 1,675. The current range under the Moscow Treaty is 1,700 to 2,200. Now that understanding also indicates that each party determines for itself the composition and structure of its strategic offensive arms.

From a military requirements perspective, General, are you comfortable with those new ranges?

General CARTWRIGHT. I am, Senator.

Chairman LEVIN. Could you tell us briefly from a military perspective why is the ability to determine composition and structure important, and does this flexibility allow for greater reductions in both warheads and delivery systems?

General CARTWRIGHT. The key here for the United States is, at these levels, we will be able to preserve the triad. So the Intercontinental Ballistic Missile side of the force, which is our responsive side of the force, is maintained. The survivable element of our force, which is borne out in the submarines and the sea-launched ballistic missiles, is maintained, and we are able to maintain the bombers.

Bringing those numbers down to 1,500 to 1,675 keeps us in that range and allows us to preserve that triad, which I believe is important at this stage of the negotiations. Bringing down the warheads and then bringing down the delivery vehicles gives us that triad and balance, when added into what we are now calling the new triad with BMD, gives the Nation the protections that it will need as we move to the future.

Chairman LEVIN. Thank you.

General, Secretary Gates indicated on April 6 that the President's budget request relative to missile defense shifts the focus of our missile defense program to place more emphasis on theater missile defense capabilities to defend our forward deployed forces and allies against the many existing short- and medium-range missiles that we face today and also to place greater emphasis on the development and the testing of the longer range missile defense. Do you support that approach of the administration?

General CARTWRIGHT. I do, Senator. It is key from my perspective, one, that the threats that we are actually facing today is the proliferation of the short- and medium-range ballistic missiles, which are the theater threat. We have had a very good test pro-

gram with the elements of that part of the missile defense capability, which are premiered by the Standard Missile 3, which goes with the Aegis system aboard ship.

The Terminal High Altitude Area Defense (THAAD), which is the most recent addition, gives us a little more of an area defense capability, and Patriot, which gives us a point defense capability, point defense being to protect a base or a station or something like that.

Having these capabilities and deploying and focusing on getting these capabilities deployed is going to contribute to the stability within the region. So in areas like PACOM, we will be able to defend both the area of the country and the point at the critical infrastructure, bases, et cetera, for us.

Chairman LEVIN. Relative to the question of possible missile defense cooperation, do you agree with President Obama that missile defense cooperation with Russia would serve our mutual security interests, could enhance our security against potential missile threats from nations like Iran not only by preventing Iran from seeking and gaining any psychological advantage if they obtain nuclear weapons and missiles, but also sending a very clear signal to Iran that the United States and Russia are going to work together in that effort?

General CARTWRIGHT. Senator, I believe that multilateral approaches to missile defense in general are to our advantage, number one. Number two, any ability to cooperate on the missile defense with the Russians is highly leveraging for us, both in the message it sends in a political or diplomatic form and in the capabilities that they can bring to the table that we might be able to incorporate into the system.

Chairman LEVIN. Would the North Atlantic Treaty Organization (NATO) support that effort of ours to work together with Russia against that kind of an Iranian threat?

General CARTWRIGHT. I won't speak for all of NATO, but all of the members, my counterparts that I talk to, support that effort.

Chairman LEVIN. General, we asked you a pre-hearing question relative to the F-22 production. You indicated that you support the administration's request that we limit that production.

Can you tell us if, in fact, you do agree to stop F-22 production at 187 aircraft and whether or not there have been studies conducted by the Office of the Secretary of Defense (OSD) that found that the 187 figure was adequate to confront future opponents who have robust air-to-air capabilities and whether there has also been a Joint Staff study assessing the sufficiency and the proficiency of a buy of 187 F-22 aircraft?

General CARTWRIGHT. Senator, I was probably one of the more vocal and ardent supporters for the termination of the F-22 production. The reason is twofold.

First, there is a study in the Joint Staff that we just completed and partnered with the Air Force on that, number one, said that proliferating within the United States military fifth generation fighters to all three Services was going to be more significant than having them based solidly in just one Service because of the way we deploy and because of the diversity of our deployment. So that is point number one.

Point number two is in the production of the F-35 Joint Strike Fighter, the first aircraft variant will support the Air Force replacement of their F-16s and F-15s. It is a very capable aircraft. It is 10 years newer in advancement in avionics and capabilities in comparison to the F-22. It is a better, more rounded capable fighter. That is point number one.

Point number two is the second variant which is the variant that goes to the Marine Corps. The Marine Corps made a conscious decision to forgo buying the F-18 E/F in order to wait for the F-35. So the F-35 variant that has the vertical/short takeoff and landing capability, which goes to the Marine Corps is number two coming off the line.

The third variant coming off of the line is the Navy variant, the carrier-suitable variant.

Another thing that weighed heavily certainly in my calculus was the input of the combatant commanders, and one of the highest issues of concern from the combatant commanders is our ability to conduct electronic warfare. That electronic warfare is carried onboard the F-18. Looking at the lines that we would have in hot production, number one priority was to get fifth generation fighters to all of the Services. Number two priority was to ensure that we had a hot production line in case there was a problem, and number three was to have that hot production line producing F-18 Gulfs, which support the electronic warfare fight.

Those issues stacked up to a solid position, at least on my part, that it was time to terminate the F-22. It is a good airplane. It is a fifth generation fighter. But we needed to proliferate those fifth generation fighters to all of the Services, and we needed to ensure that we were capable of continuing to produce aircraft for the electronic warfare capability, and that was in the F-18. In the F-18, we can also produce front-line fighters that are more than capable of addressing any threat that we will face for the next 5 to 10 years.

Chairman LEVIN. Thank you, General.

Senator McCain.

Senator McCAIN. Thank you, Mr. Chairman.

Again, I want to thank the nominees for their service. You both are outstanding examples of service to the Nation, and we are very proud to have you serve in positions of great responsibility.

General Cartwright, I would like to return to what I was talking about in my opening statement and this Washington Post article, where apparently a reporter was in a meeting with General Jones and military commanders. During a briefing, General Nicholson said he was "a little light," more than hinting he could use more forces, probably thousands more. "We don't have enough force to go everywhere," Nicholson said.

Then General Jones basically told him, he said, "How do you think Obama might look at this?" Jones asked, "How do you think he might feel?"

Then Jones went on, after all those additional troops, if there were new requests for force now, the President would quite likely have a "Whiskey Tango Foxtrot moment." Jones finally went on to say with great emphasis to the group of Iraq veterans, said Af-

ghanistan is not Iraq. “We are not going to build that empire again,” he said flatly.

That empire succeeded where the previous strategy had failed. I guess my question to you, General Cartwright, and I may be asking the wrong person, does General McChrystal have the latitude to request additional forces and materiel that he may need to prevail in Afghanistan, or is this a clear signal to the military that “we are not going to build that empire again”?

General CARTWRIGHT. Senator, let me address it in two ways. One, I wasn’t in the conversation, but the first would be that we have a new commander. We have a strategy that we have just stood up. Less than half of the forces associated with that strategy have been deployed.

We are in the midst of building the infrastructure to receive them, but most of them, the Marines being the first, and they have closed. Next comes the Strykers. But they will close toward the end of this summer.

General McChrystal is doing an assessment right now of the force strengths and the capabilities he needs in order to in-place this new strategy. When he comes back to the Pentagon with that assessment, which I would expect will be toward the end of this month to middle of August, we will take a look at what he has now, what he believes he needs to win this fight—and that is why we are there is to win this fight—and we will look any request associated with increase in forces.

I will not be bashful about articulating those needs if it is appropriate. We will look at that in the context of what has deployed and what is yet to come so that we understand the difference between his assessment of what he actually has today versus what it is we are going to deploy.

But I think at the heart of your question, no commander will be told, at least—if confirmed—by me, to not submit what he believes he needs or she believes she needs to win the fight.

Senator MCCAIN. I don’t want to belabor it. But he says that if there were new requests for force now, the President would quite likely have a Whiskey Tango Foxtrot moment. That sends a clear message at least to the military in that room, I would think. I certainly know that if I were there, I would get it.

I think you would agree, General, the reason why we succeeded in this counterinsurgency in Iraq is because we had sufficient forces to provide an environment of security, so economic, political, and all the other aspects of a free and open society could develop. Without the security environment, I think we proved in the earlier years in Iraq, it doesn’t succeed.

Is there still a pending decision on the part of the President that 10,000 additional troops may be needed?

General CARTWRIGHT. The decision on the additional 10,000 that was made by the previous commander in front of this change in strategy was tabled at that time, and we all agreed—we all being the commanders—that was appropriate at the time to deploy the forces that we really felt we need for the strategy we really felt could win.

Implementing that, we will go back. General McChrystal will have the opportunity to look, he won’t have to look in the context

of 10,000. He will look in the context of what he believes he needs to win, and he will articulate that. We will look at that in the context of what we have yet to deploy in the force, and if there are mismatches, either in strategy or in force structure, we will articulate those.

Senator McCAIN. Thank you.

Admiral Willard, I would like to talk about North Korea and the U.N. Security Council resolution. If a North Korean ship vessel like the Kang Nam last month leaves port and is delivering illicit weapons to an unfriendly port such as Burma, which we believed at the time was the case, what action can the United States military take?

Admiral WILLARD. Senator, the Security Council Resolution 1874 provides for member nations to conduct inspections on the high seas if the flag nation consents to those inspections should we have reason to believe that the ship is carrying illicit materials, as you suggest. So it is a consensual search that is authorized by the Security Council.

Senator McCAIN. If the North Korean ship refuses to grant that consent, then what happens?

Admiral WILLARD. The flag nation is compelled by the security resolution to direct that ship into the next convenient port, and the Security Council resolution then calls for all nations that might take receipt of that ship in their territorial water to conduct the search.

Senator McCAIN. If that ship decides to continue on to its destination, which may be the port very likely if it is carrying illicit weapons to an unfriendly port, do we have any way of forcing them to change course, or do they just arrive at that port?

Admiral WILLARD. The Security Council resolution then calls for the flag nation to communicate the failure of that ship to adhere to the Security Council resolution call for search, to report that back to the Security Council itself. The resolution does not authorize nonconsensual search of those ships.

Senator McCAIN. I hesitate to ask you what you think the likelihood of a North Korean vessel carrying illicit weapons would be to either allow boarding or to proceed to a port of our choice. It seems to me that it is understandable that the U.N. Security Council, given China and Russia's behavior, would not enact meaningful sanctions. But I certainly don't view this stance in Resolution 1874 as having any impact whatsoever on North Korean behavior.

Admiral, what level of concern should we have about these continued tests and launches? Recently, I believe seven short-range missiles were launched. I have seen pictures recently of the Dear Leader, and he looks like he is certainly not in great health, as published reports.

What is your assessment of North Korea's behavior, and do you have any thoughts as to what might happen in the next few months or years in regards to North Korea?

Admiral WILLARD. Senator McCain, I think we are rightly concerned about the situation in North Korea. I think it is a mystery to me and I think to most who spend a lot of time assessing North Korean behavior as to what is behind this particular round of

provocations by the leadership there. But a confluence of events has occurred that may be contributing to it.

His ill health and the issue of succession is certainly part of this calculus, perhaps the change in administration in South Korea and the relations that have been affected as a result of that, the change in our administration, the continued association with the Six Party Talks, and the trends that the North Koreans were seeing there. So, many things may be contributing to this round of provocations and the messages that he is perhaps attempting to send.

As you suggest, they launched a series of short- and medium-range ballistic missiles in a demonstration last week and, as we are all aware, a Taepodong 2 missile some weeks ago.

We continue to posture for these and rely on our whole of government and the international community to continue to attempt to ascertain North Korea's intent, to try and control their behavior. In the meantime, we rely on our deterrent level of effort on the peninsula with the Republic of Korea Government, the deterrence that is affected by our alliance with Japan, I think, and our overall posture in the region to effectively contain the behavior to within what is tolerable.

But I think to your point that we should be concerned about North Korea and continue to be vigilant in watching over their behavior and prepare to defend against a provocation should he follow up one of his threats.

Senator MCCAIN. Thank you very much. Thank you to the witnesses.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator McCain.

Senator Lieberman.

Senator LIEBERMAN. Thank you, Mr. Chairman.

Thanks to both of you. You are really extraordinarily well-qualified for the positions that the President has nominated you for. Our country is lucky to have you in service.

General Cartwright, I know from conversations we have had that you share the concerns that I and many members of this committee have about the stress on the United States Army as a result of its active deployment to Iraq and Afghanistan particularly and the impact that has on dwell time, on the soldiers, and on their families.

I am very pleased that our committee, in the mark-up of the National Defense Authorization Act for next year, has increased the end strength of the Army authorized by 30,000 for 2011 and 2012. Without going into the details, it was done for those years, one forward, for budgetary reasons, even though there is no money attached to it.

It seems to me that with the increased deployments, including the possibility of additional deployments to Afghanistan as you have just discussed with Senator McCain, and the methodical drawdown from Iraq, that the period of great pressure on the Army will actually be in 2010. I have been contemplating introducing an amendment on the floor when our bill comes up next week to include 2010 as a year in which that increase of 30,000 from 547,000 to 577,000 can begin.

As you and I know, the Secretary of Defense has waiver authority to nonetheless increase 3 percent those in service in the Army.

I wanted to ask you how you react to the current stress on the Army and whether the Department would view with favor the idea of extending this 30,000 increase authority to 2010 as an amendment to the bill next week?

General CARTWRIGHT. Senator, we have talked a little bit about this. The challenge that is introduced is that the drawdown in Iraq really starts in 2010 in significant numbers and gets us down to around 50,000 to 35,000 around the end of August in 2010.

Senator LIEBERMAN. Right.

General CARTWRIGHT. Assuming that we stay on a glide slope, that drawdown is pretty steep. In other words, the forces are staying there into 2010 for the majority of those that are there.

The growth in Afghanistan began this year, and so there is not a separation of the two. For the Marine Corps, for the most part, they disengaged from Iraq and they have moved to Afghanistan. The stress is not as significant on the Marines.

Senator LIEBERMAN. Right.

General CARTWRIGHT. The work that we have done inside the Department, particularly with the Army, says there is that period of 2010 and 2011 in particular where the stress is going to be there. During 2010, because of execution. During 2011, because of coming back, refilling, and trying to retrofit, you are going to have stress on the Army in a significant way. At the same time, the Army is trying to get out of the stop-loss construct. All of these things are occurring in 2010 and 2011.

We have looked at this. We have worked in a range from about 15,000 to 30,000. We believe the character of that activity should be temporary in nature, very clearly.

Senator LIEBERMAN. I agree.

General CARTWRIGHT. I believe the Army is on the same sheet of music, and so what we are trying to understand is where are the resources to do it. But we believe there is a case for something between about 15,000 and 25,000. Thirty thousand would give us the range in which to work to allow us to do that.

Resourcing is going to be a challenge, but I believe inside of the Department that we believe we will find that money if it is necessary to find it internally to do that. We would like the help probably. But again, we have to make a decision inside the Department. We have to work that through. But the case for the additional forces is clearly there.

Senator LIEBERMAN. I really appreciate that answer, and I am sure that everybody in the Army and their families particularly will appreciate it. I look forward to working with you in the next few days to determine whether an amendment to the bill to cover 2010 will be helpful to the Department in trying to achieve that increase in end strength in a timely fashion.

General CARTWRIGHT. Thank you, sir.

Senator LIEBERMAN. Thank you.

General, another question, on a very different subject. Our committee, in its wisdom, decided to cut the President's request for 28 UH-1Y Huey helicopters. I know that the recommendation of the President and the Department was based on a need to support our marines who are at the front lines in Afghanistan because they can

operate in the high altitudes and hot temperatures there. That is, these Hueys can.

I want to ask you, because we may be involved on the floor again in an attempt to restore funding for that procurement, what your response would be, and do you see operational risks if we fail to restore that money for the Hueys?

General CARTWRIGHT. Senator, I support the President's budget. I believe that those helicopters are, in fact, critical. We have had significant press about challenges that the forces have had with civilian casualties. Until now, we have had ground forces, maneuver forces, but we have not had the full complement of supporting arms, particularly in artillery and in attack helicopters.

Bringing combat aviation brigades and bringing in the marines who bring in their organic air with them has started to fill that in. I would take note of the Marine campaign that is currently ongoing that in that campaign, in all the frontage that they have covered, we have not had civilian casualties because we have had our Cobras and because we have had our artillery, and that is important.

That helicopter for the Marine Corps is their most lethal weapon. They are the most effective in the battlefield, particularly in the counterinsurgency arena. They are effective in built-up urban areas and in compounds because they can be discreet. The value of those helicopters is significant.

Senator LIEBERMAN. I appreciate your answer, and we will probably try to act on it next week.

Now I have a very different question. In your prepared responses, General Cartwright, to the questions that the staff asked you and the committee did leading up to the hearing, I thought you had a quite remarkable statement about what is happening in Iran now: "We are concerned that the growing strength of Iran's Islamic Revolutionary Guard Corps (IRGC) over Iranian politics will result in the militarization of Iranian foreign policy. Nonetheless, we do not project any significant changes to Iran's overall foreign policy objectives. However, should the political unrest continue, it is possible that Iran could attempt to create an incident or other crisis that would draw its population's attention away from internal strife and towards a perceived common threat."

I thought those were very thoughtful comments and very important for us to consider, and I want to ask you to just comment, extend a little bit on those remarks in two regards. One is the extent to which the growing role of the IRGC may lead to a militarization of Iranian foreign policy. The second, of course, is the extent to which the Iranian Government, therefore, may look for an international incident as a way to suppress the prominence of the political dissent inside the country.

General CARTWRIGHT. Senator, my comments were really based on the premise that when confronted with internal unrest, a tactic is to look external to a common foe that can be portrayed and, therefore, create a uniting activity within the country.

Tied with the activities that we have seen particularly in the Gulf now that the IRGC is controlling the waters rather than the Iranian navy and that they have shown a proclivity to be aggressive in their behavior, that we could find ourselves in a generated military incident which would have significant overtones in our

ability to work any kind of diplomatic approach to Iran or any kind of Iranian reach-out to the rest of the world.

That is where I personally am most concerned that our opportunity right now in the change of our administrations, in the wake of their elections may be short-circuited. I would see that as a significantly difficult issue for the region. It would create instability within the region.

Senator LIEBERMAN. I thank you. That is to me a very important insight and one I think all of us should keep in mind.

Thank you very much.

Chairman LEVIN. Thank you, Senator Lieberman.

Senator Inhofe.

Senator INHOFE. Thank you, Mr. Chairman.

First of all, I am looking forward to supporting both of you in your confirmations.

One of the problems that we have, we sit at this table and we listen to you guys who are experts and know a lot more about it than we do, that from administration to administration changes when the circumstances don't always change.

When you were talking about leading the effort to stop the F-22 at the 187, I can remember sitting up here when they were talking about 750 F-22s. I remember the number 480. Then there was an agreement last year that 243 was the figure that was a "must" figure. I am not asking, just it appears to be that way. The same thing is true in the Future Combat Systems (FCS) and other platforms, and it is true also in missile defense.

Now our President said that the need for action, talking about North Korea's missile launch, not just here in the U.N. Security Council, but in our determination to prevent the spread of these weapons. Despite this, they recommended a reduction of 16 percent cut in the missile defense budget by \$1.4 billion. Including some of the systems that we have looked at, the airborne laser that we really think is necessary when you look at the three phases of capabilities that we want to have—the multi-kill vehicle, the ground-based interceptors (GBIs).

Of course, I think you know that goes right back to my first statement that you hear these figures, and I can remember when it was 54. We had to have 54, and that was going to be the one. Then it went down to 44. I know that Senator Begich has an amendment to try to restore the 44. I will be supporting him on that. I think it is the right thing.

But with these changes, do you really feel that we are in a position to adequately move forward in our missile defense system? The technology is there. We are looking at it. We, at least I have, sitting at this table here have been convinced that we need to have all these in the boost phase, the midcourse, and the terminal phase, that we have to have all this capability.

I would like to have each one of you respond. Are you really happy with where we are right now, or is that driven mostly by budget?

General CARTWRIGHT. Let me go ahead and initiate. It is not driven by budget. I think that we would have made these decisions with additional resources or without them. For the GBI and the midcourse phase, 44 is the number that we currently have under

contract. The intent is to put 30 of them in the ground. Fourteen of them would be used to update configurations of missiles in older configurations based on the lessons that we have learned in testing thus far.

Fifteen with the additional radars and systems that we now have deployed that have been integrated into the system allows us to move from either three or four missiles in the GBI per incoming reentry vehicles to two in a construct of shoot-look-shoot.

So in a construct of 2, that means that we could take on basically 15 simultaneous inbound threats from a rogue nation. Neither country that we consider a rogue nation right now, Iran and North Korea, have the capability yet demonstrated to launch one successful missile towards the United States and reach it, number one.

Number two, the opportunity to get to 15 that would be armed and able to come to the United States is several years off. So that gives us a point to look at.

With respect to the GBI, we have two decisions that are yet to be made that may drive us to build additional GBIs. The first is a decision about the European site, and the second is a decision that needs to be made about the testing protocols for aging as the system ages out in its life.

This is testing that you do to ensure that the system is still good and valid 5 years down the road, 6 years down the road, et cetera.

The other piece that I would add, and I will close off very quickly, Senator, is that the terminal side of this equation with THAAD, with PAC-3, and with SM-3 has performed significantly better than anybody would have envisioned.

Senator INHOFE. I understand that. My concern has been in the boost phase, but we are running out of time here.

I did want to get into another area, and that is the age. We look at the Bradley fighting vehicle, and we look at the Abrams as 1970s technology, and even before, the Paladin, even before that, maybe 1950s or World War II technology. General Eric Shinseki and others have come in here and talked about our ground capabilities and that we need to have a transformation, and we have gone through several of these. The last one being, of course, FCS, and a lot of that is being terminated.

We haven't heard, at least I haven't heard, of anything really specific about what the next recommendation is going to be. I understand in August they are going to come up with something. So rather than to answer a question about that, I would like you to give me as much information as you can as to what we could consider.

It bothers me, and I have said this before several times, that when our guys and gals go out there, there is an assumption that they have the best of equipment. In many cases, they don't. Certainly in our Paladin capability, there are some five countries, including South Africa, that make a better one than we have. That is where I want to go with this thing to make sure that we have the very best of everything.

Is there anything you would like to share with us in terms of where we are now, General Cartwright, in our modernization program concerning that type of capability?

General CARTWRIGHT. I am going back to the FCS and where you opened your comment, Senator, but I would tend to agree with what I think you have said, which is that the vehicle that is of most concern to me for modernization is the Bradley. It is aging, and it also is significantly underpowered for the task that it has.

I believe, and I won't foreshadow the Army's analysis, but that is where we will focus on FCS initially from a vehicle standpoint.

Senator INHOFE. Thank you very much.

Admiral, you talked and responded to Senator McCain concerning North Korea and some of the capabilities up there. I have reason to question our own intelligence in terms of what the capability is there. I can remember in 1998, and you remember this, too, that we made a request as to when North Korea would have this motor stage capability. In fact, it was August 24, 1998.

The response, and I think that was consistent with our National Intelligence Estimate, was between 5 and 10 years. Seven days later on August 30, they fired one.

How confident are you in our intelligence on the capabilities of North Korea?

Admiral WILLARD. Increasingly confident over time. We have been looking at this country for 50 years. We pay a lot of attention to what goes on in North Korea. To your point, there have been miscalculations at times when North Korea has been particularly covert in some of their activities.

I think as illustrated in the most recent launch sequences that have occurred, the intelligence associated with those launch sequences has been quite good.

Senator INHOFE. Okay. My time has expired. But for the record, I would like to have each of you respond to my three favorite programs—the Train and Equip 1206, 1207 International Military Education and Training program, and Combatant Commander Incentive Fund—as to the value that you see in those programs.

Thank you, Mr. Chairman.

Admiral WILLARD. Will do.

[The information referred to follows:]

General CARTWRIGHT. Building foreign partner capacity is a fundamental cornerstone of our security strategy and will remain so for decades. Moreover, the focus of our partnership strategy is preventative in nature. By helping partners solve problems before they become crises we can reduce requirements for major military interventions and enhance the security of the United States and that of our allies.

We have made significant progress in this area over the past several years, but the U.S. Government must continue to increase its efforts to build the capacity of foreign partners to counter terrorism and promote stability. Our struggle against violent extremists requires that we work with sovereign countries with whom we are not at war. Through careful investment, we can help shape the environment to reduce requirements for major U.S. interventions and their attendant costs. Foreign partners can also leverage knowledge of language, culture, and the enemy in ways that U.S. military forces cannot. Use of partner forces also denies the enemy the ability to use the specter of major U.S. deployments in foreign territory to build ideological support for terrorism and as a recruiting tool. Finally, working with partners, we can help create layers of offense and defense that are difficult to build or sustain unilaterally.

The programs you have mentioned, 1206/1207/1208, Combatant Commander Incentive Fund, and International Military Education and Training, are some of the most important tools the U.S. Government has to build the capacity of foreign partners. They are flexible, responsive, and strategically targeted to get the most leverage on the dollar. I hear frequently from each of our combatant commanders just how critical and effective these programs are, and how important dependable au-

thority and funding is to development and execution of theater security cooperation plans.

These programs are managed collaboratively, by ambassadors and combatant commanders, and by the Departments of State and Defense. This requirement for joint formulation and approval of programs has significantly improved interagency cooperation and effectiveness—bringing State, U.S. Agency for International Development (USAID), and DOD together in applying a strategic “3D” lens to country assistance—both in the field and in Washington. The different perspective each organization brings helps the U.S. Government look at country assistance holistically and place country-specific requirements in a broader regional and global context.

Finally, Senator Inhofe, your personal leadership in Congress was essential to the creation and continuation of many of these critical programs. I want to express my personal thanks, and that of all of our combatant commanders, for your leadership. There is no question that we have an enduring requirement for these programs and we will greatly appreciate your support for them in fiscal year 2010 and beyond.

Admiral WILLARD. I believe these programs are critical to our strategy of building our partner nations’ capacities in order to contribute to the overall security and stability in the region. It is important to note that these programs are developed in close cooperation with our country teams in the region. If confirmed, I would continue this process.

1. International Military Education and Training (IMET) Funding

I have seen IMET programs work effectively in Indonesia, Bangladesh, Malaysia, and India. These programs provide an excellent opportunity to train and influence the professional development of partner-nation military officers. Specific education and training enables their contributions as effective peacekeeping forces, enhances their understanding of maritime security and domain awareness, and supports defense and acquisition reform.

An often unheralded benefit from IMET funded military education is its long-term effect on personal relationships among foreign officer alumni. IMET’s participants often go on to assume senior leadership positions in their militaries and governments (approximately 40 percent of regional Chiefs of Defense and 15 percent of Ministers of Defense have participated in IMET courses). In my experience, these leaders are universally proud of their IMET experiences and are keenly aware of regional counterparts who were their classmates.

2. 1206 Funding

1206 funding has been very effective in building partner-nation capacity to combat terrorism in Southeast Asia. The most recent successes have been in the Tri-Border Region (Malaysia, Indonesia, Philippines). The funds are providing training and equipment to enhance maritime domain awareness, maritime security, and counterterrorism skills. 1206 funding for radars, small boats, radios, and command and control enhancements is helping to limit the mobility and operational capabilities of violent extremist organizations in the region.

3. 1207 Funding

1207 funding in Bangladesh and Sri Lanka has been used to enhance community policing and security frameworks to support stabilization and reconstruction efforts in addition to ongoing counterterrorism activities.

4. 1208 Funding

1208 funding continues to enhance special operations support to the Armed Forces of the Philippines (AFP) in Operation Enduring Freedom-Philippines and Joint Special Operations Task Force-Philippines. In each case, 1208 funded programs are credited with enabling the AFP to more effectively suppress violent extremist organizations in the Southern Philippines.

5. Combatant Commander Incentive Fund (CCIF)

CCIF funding was an enabler in the highly successful ASEAN Regional Forum (ARF) Voluntary Demonstration of Response (VDR) exercise; a civilian-led, military-supported project, co-hosted by the U.S. and Philippine Governments. The VDR demonstrated the ability of ARF member-nations to provide humanitarian assistance and respond to natural disasters.

Each of these authorities enables the U.S. Pacific Command to build partner capacity in the region. If confirmed, I will continue to leverage these various funding authorities to address emerging and urgent requirements. I look forward to expanding their application into other important partner-nations, such as Cambodia, Maldives, and Thailand.

These programs (IMET, 1206, 1207, 1208, and CCIF) should be made permanent and funded through multi-years to provide stability and permit long-range planning that will facilitate a more effective and strategic approach to addressing regional challenges. The multi-year authority provided last year has allowed us to work with our country teams in a deliberate planning process instead of hasty end-of-fiscal-year crisis planning. Single year authorization/funding has resulted in missed opportunities and constrained our ability to more effectively shape, influence, and address regional challenges.

Chairman LEVIN. Thank you, Senator Inhofe.

By the way, it was entered last night that our bill will be first up on the floor on Monday. I think we all know about that. But in case any of us don't, we can be ready to go on Monday as soon as we come in, which is good news.

Senator Akaka.

Senator AKAKA. Thank you very much, Mr. Chairman.

I want to add my welcome to our military leaders and thank you and the ranking member for holding this hearing.

I also want to add my welcome to the families of the General and Admiral as well and also to thank both of you for the many years of dedicated service you have given to our country.

Admiral Willard, again, thank you for stopping by, and it was great to catch up with you. Knowing you out there in the Pacific, you have shown outstanding leadership as Commander of the U.S. Pacific Fleet in Hawaii, and I want to congratulate you and your wife, Donna, on your nomination to become the Commander of PACOM.

Also congratulations to General Cartwright, Sandee, and the family as well.

General, Secretary Gates recently ordered the creation of a new military Cyber Command, and I am asking this question because of your comment about the fifth generation of weaponry and equipment. As DOD stands up this new organization, we must provide our troops with resources that they need to defend our networks in a timely manner.

General, in March 2009, you stated, "The current method of procurement for information technology (IT) is so slow that by the time software systems are purchased, they are out of date."

General, what is DOD doing to meet these challenges in the timely procurement of IT products?

General CARTWRIGHT. Senator, I appreciate the opportunity to respond to that question and to the quote. We have worked hard over the last 2 years both on the requirements and the acquisition side of the house to speed up and move IT programs of record in a fashion that is more appropriate for Moore's Law rather than an industrial construct.

Up until now, we had been using the same process we would build an aircraft carrier for to buy 1,000 lines of code, and it was just not serving us well. It is not a difference in the law. It is a difference in how we approach the risk calculus for what it is we are doing and how we manage that risk in the acquisition process and the requirements process.

By adjusting that calculus, particularly with our combat support agency, the National Security Agency, we have been able to accelerate our ability to buy cutting-edge, competitive software and

hardware for the IT enterprise that we operate in a way that has advantaged the warfighter.

We are seeing that advantage play out every day in Iraq and Afghanistan, what we have been able to do because we have not changed the law. We have not even changed the interpretation. But what we have done is change the risk calculus that we are willing to bear for these IT systems and produce them in a timely fashion. I think that has helped us.

Senator AKAKA. General, I am encouraged by the additional funding in the defense budget for wounded warrior care. I am asking this as chairman of the Veterans' Affairs Committee. I have been working on what I am calling a seamless transition, and it shows our continued commitment to servicemembers that we will take care of them as well as their families, and we need to continue this into their civilian life as well.

How would you assess the approach across the Services to care for our wounded, ill, and injured servicemembers and their families?

General CARTWRIGHT. We have learned many lessons. We have been the benefactor of an incredible amount of leverage that was brought to bear by the Veterans Affairs side of the equation and the DOD side of the equation partnering to get at this issue that you are talking about, a seamless transition.

I believe our greatest challenge as we move to the future has to do with those unseen wounds, so to speak, the wounds of stress, the wounds of injury, traumatic to the brain, that we still have a significant amount of work to do between our two agencies, Veterans Affairs and DOD, to ensure that that transition and that care is appropriate and that those who suffer these wounds have an opportunity to heal and reenter into either the military or the civilian sector in a way that is appropriate and commensurate with their abilities.

Senator AKAKA. Thank you.

Admiral, Hawaii is the only State where U.S. Northern Command (NORTHCOM) is not responsible for its homeland security. For Hawaii, the responsibility goes to PACOM.

What is your understanding of PACOM's homeland security responsibility and its relationship with NORTHCOM?

Admiral WILLARD. Thank you, Senator Akaka.

As you have already stated, PACOM has homeland defense responsibilities for Hawaii, also for our territories throughout the Asia-Pacific region. NORTHCOM is, in fact, the supported commander for homeland defense to include BMD of the mainland United States and Alaska.

PACOM conducts its defense of Hawaii and defense of territories within the region through a coordinated structure that is very much married to NORTHCOM and its responsibilities, Strategic Command (STRATCOM) and the support that it provides globally in that regard, and across all of the components that contribute to our homeland defense.

We have a task force commander assigned in Hawaii for purposes of homeland defense. I am confident that the approach is the correct one. The relationships, while we continue to learn to refine those relationships, are solid and maturing. If confirmed, I will look

forward to the defense of that region and the responsibilities that PACOM bears in that regard.

Senator AKAKA. Thank you very much. My time has expired.

Chairman LEVIN. Thank you, Senator Akaka.

Senator Thune.

Senator THUNE. Thank you, Mr. Chairman.

Admiral, General, thank you for your great service to our country and your willingness to continue to serve and that of your families, who also sacrifice mightily for our freedoms, and we appreciate that very much.

General Cartwright, the Nuclear Posture Review (NPR) is ongoing within DOD, and yet this week, we have a commitment on additional strategic warhead and delivery vehicle reductions. My question is that it appears that we have already determined the future of U.S. nuclear posture and in some ways preempted the NPR.

Isn't that putting the cart before the horse? Shouldn't the strategy be derived from the NPR and informed by that, as opposed to the other way around?

General CARTWRIGHT. Senator, I appreciate the opportunity. We prioritized in the NPR and the Quadrennial Defense Review (QDR) the activities and the analysis that would be necessary to support the timelines associated with the START negotiations, or the follow-on START negotiations.

So the combatant commands, the Joint Staff, OSD, all worked very hard at the analysis that gave us ranges that we could operate in associated with the structure that would be appropriate for those ranges of operationally deployed weapons and then the strategically deployed delivery vehicles. I feel very comfortable that analysis has served us well.

What remains in the NPR then is how this all integrates with the general purpose forces in things like missile defense, cyber, et cetera. But I am very comfortable that we prioritized that analysis at the front end in order to support these negotiations.

Senator THUNE. Let me ask you about something that was said last month in front of the House Foreign Affairs Committee by Keith Payne, who is a member of the Congressional Commission on the Strategic Posture of the United States. He testified that a post-START arms agreement that significantly reduces the number of strategic delivery vehicles below 1,600 is good for the Russians and bad for the Americans.

Specifically, he testified that Russian strategic launchers will drop from approximately 680 today to about half that number simply as a result of aging systems and Russia's slow pace of modernization. So that in order to meet the launcher reduction commitment, the United States will need to make real cuts to existing systems while the Russians need only continue down their current path and that the United States will be giving up something for nothing in return.

I have an additional concern that by significantly reducing our strategic delivery vehicles, we may lose the bomber leg of our nuclear triad. My question is, do you agree with the commitment to reduce our strategic delivery vehicles to somewhere in the range of 500 to 1,100 systems, and in your view, at what point in this range

between that 500 and 1,100 would the delivery vehicle reductions necessitate making our nuclear triad into a dyad?

General CARTWRIGHT. Senator, I think there are two pieces here. The first is that there are a substantial number of delivery vehicles associated with the United States that don't deliver anymore. We still count the Peacekeeper silos. We still count about 50 of the Minuteman silos that were decommissioned. We have a large number of bombers that have been cut up and are sitting in Davis-Monthan Air Force Base but are still counted against us. The B-1s are still counted against us.

So part of what we need to do when we have this dialogue is to ensure that the assumptions of what we are counting from are correct. Our first objective is to get what we are calling the shadows out of the calculus so that the number that we are talking about is a real number and we all know what they are. That is point number one.

If we did that, that would bring us down substantially in what we are credited with having as delivery vehicles. If we go down in the range, I believe that the range at which we would if we assumed away all the phantoms, then we get down to a range somewhere in the 850 to 900 before we would have to start to cut any real delivery systems.

When we get into that range, and that is what drove the range is that from about 1,100 down to about 500—500 being principally where the Russians would like to be, 1,100 being principally where we would like to be—now the negotiation starts. I would be very concerned if we got down below those levels about mid-point, and I certainly would like to have seen those ranges be closer, but that is a negotiation, and we have to work our way through that negotiation as we go forward.

I will certainly express my military best judgment to the leadership if we start to get into a range that I would believe would endanger prematurely the concept of the triad.

Senator THUNE. You have said in previous testimony, in response to a question that I had asked, General, before this committee that the Nation does need a new bomber. In your opinion, should that new bomber be nuclear capable?

General CARTWRIGHT. The Nation will need a nuclear-capable bomber. Whether it is the same as a general purpose force activity bomber that we build in the future, whether it is a different variant, or whether we use existing platforms like the B-2 to carry us further into the future is something the analysis will have to tell us.

But I believe that a strategic range, air-breathing vehicle is going to be necessary as far out into the future as I am willing to trust my crystal ball.

Senator THUNE. Do you also believe that we ought to retain the bomber leg of the triad?

General CARTWRIGHT. I do.

Senator THUNE. Admiral, earlier this year during a hearing on current and future worldwide threats, Lieutenant General Michael Maples, who is the Director of the DIA, said that "China, from an air defense standpoint, has developed a very modern, layered air defense capability and depth and is seeking additional air defense

capabilities that will project even out to a range of 400 kilometers. It significantly affects potential U.S. operations in that region.”

In an article published in the *Foreign Affairs Journal* in January 2009, Secretary Gates wrote, “The Chinese improved air defenses, coupled with investments in other asymmetric capabilities such as cyber warfare, anti-satellite warfare, and anti-ship weaponry, all threaten our ability to project power in the Pacific and will require us to rely on long-range, over-the-horizon systems such as the next-generation bomber.”

Admiral, my question is, do you agree with Secretary Gates’ and Lieutenant General Maples’ assessment of China’s anti-access capabilities. As the nominee to be combatant commander responsible for the Pacific theater, how important is it to you that the Air Force field a new long-range bomber in the 2018 timeframe that is capable of penetrating these advanced defenses?

Admiral WILLARD. Senator, we lay down our long-range bombers today in the theater for their deterrent effect. The flexibility of having a long-range bomber capability is very important, I think, to the region, particularly given anti-access capabilities that we see in development there.

To your point, there will come a time when certainly the follow-on bomber will be required. Whether it is 2018, I think, will be determined as a result of the analysis ongoing in the QDR and the NPR, to General Cartwright’s previous statement.

Senator THUNE. Do you agree with the assessment of China’s anti-access capabilities, though?

Admiral WILLARD. I do.

Senator THUNE. Okay. Do you think that bomber, when it is fielded, should be nuclear capable?

Admiral WILLARD. I do.

Senator THUNE. Thank you, Mr. Chairman.

Thank you, gentlemen, very much.

Chairman LEVIN. Thank you, Senator Thune.

Senator Hagan.

Senator HAGAN. Thank you, Mr. Chairman.

I just wanted to once again thank both of you for your service to our country. You are certainly outstanding individuals, and I look forward to your confirmation.

I also want to welcome the families because I think it is so important to have the family members standing with you and to be here at this hearing.

General Cartwright, I did have a couple of questions concerning what is going on in the Helmand Province right now, and I know that the ongoing offensive led by Brigadier General Nicholson, who is the Commander of the 2nd Marine Expeditionary Brigade from Camp Lejeune, is implementing the Department’s shift to protect the Afghan civilians.

Obviously, protecting the Afghan civilians is critical because what we don’t want to happen is for the Taliban to frame our operations as a war against the Afghan Pashtuns, which comprise about 42 percent of the Afghani population, which is some of the same ethnicity as the Taliban.

My hope is that the Marines can hold the areas inside the Helmand Province long enough for civil-military reconstruction ef-

forts to enable the Afghan Government to begin administering the basic services there. Can you give me your thoughts on the latest NATO and U.S. force offensive currently in the Helmand Province?

General CARTWRIGHT. Senator, I think you have framed it very well. The intent here is a shift in strategy to a more counterinsurgency-type strategy of clear, hold, and then build. We have been in the Helmand Province before with Marines and other forces and done clearing actions. The challenge is that when we finish the clearing actions, we return to our bases and the local population takes the brunt of the punishment after we leave.

What is fundamentally different in this campaign is that as the Marines move through along with their Afghan counterparts, we are leaving forces behind in the villages and the towns to protect those villages and towns and hold that area. The hold part of this is the key, and the additional force has allowed us to do that.

What we are seeing in response, number one, I had already alluded to the fact that our approach here is to win their hearts and minds, and we can't do that by having unnecessary civilian casualties. We have had very good luck in avoiding civilian casualties as we have done the clearing operations thus far.

It doesn't mean that we won't have casualties as we move forward. This is going to be a very deadly fight. But the fact that we are able to hold has clearly made a difference in the village elders, in the residents of those towns.

I believe personally that one of our key metrics for success will be over the next few months to see whether or not there is a shift in the attitude of the local residents. If they start supporting us with intelligence, with the giving of their own sons and daughters in the fight, and that they see there is more value in being able to produce crops rather than warriors and that they can be sustained in that type of a lifestyle, then we will have an opportunity to turn the corner.

But I think those are key metrics that we have to watch as the Marines move into Helmand and followed by the Strykers as they move on their flank.

Senator HAGAN. I think one of the key points is the use of the civilians, too, in helping them maintain those crops.

General CARTWRIGHT. Right.

Senator HAGAN. I understand that we are slow in getting the civilian numbers up and going, and obviously, it has to be secure in order to do that. But I believe, too, there are some other countries in the region that could perhaps help with that aspect of it. Once again, security would be first and foremost.

Can you give me your thoughts on civilians and utilizing civilians in some of the other neighboring countries?

General CARTWRIGHT. In the hold, the quicker that we can transition to some sort of a livelihood and stability that gives the local residents the opportunity to make a living and be advantaged by the conditions is key.

Our ability to bring civilians in and surge those civilians from the United States, from various organizations, the agriculture side, from the land grant colleges and things like that, right now has not moved at a pace that probably we would like it to. We would like

to see them move faster, but we are working as hard as we can with our partners in the Department of State to make that happen.

But I do believe also that particularly from the agriculture side of the house, local soil, local customs, how you graze, how you raise crops, et cetera, how you move them to market, the neighbors to Afghanistan have incredible expertise in that area and apparently, in my discussions at least, are very willing to give that expertise and to mentor and to bring in some of that agribusiness-type expertise that is unique to the area. I think we have to take advantage of that.

Senator HAGAN. Any idea how we are going to begin that process?

General CARTWRIGHT. We are going to reach out and start a dialogue as quickly as we can. What we are trying to understand from the military standpoint is how quickly we are going to be able to get a hold phase, but we don't want a gap after that hold phase. This has to be something that happens very quickly.

Senator HAGAN. Thank you.

Admiral Willard, I have a question on China. China has terminated the military-to-military interaction with the United States due to the weapon sales that we have authorized to Taiwan after the Olympics. As the commander in that region, how do you plan on interacting with China to accomplish mutual objectives given the communication constraints, and what types of multilateral defense symposiums will you be able to attend that will assist in bridging this effort?

Admiral WILLARD. Thank you, Senator Hagan.

The military-to-military dialogue with China has just in recent weeks recommenced, beginning with an international fleet review that was held in China. It is measured steps clearly, but we are seeking to improve the military-to-military engagement over time.

As you point out, China in the past has suspended military-to-military discussions, and they will have a vote in the future as well. I think it is incumbent, first, on both nations to realize the value, the benefit of military-to-military dialogue and to sustain it. I think that, for China, is going to be an evolutionary process in itself.

I think everyone collectively desires to see China emerge as a constructive partner and a constructive partner in regional security certainly. We think that the military-to-military dialogue to discuss the areas of common interest that we have with China, as well as to discuss the areas in which we disagree, is an important venue against all the diplomatic and other efforts that our Nation currently has invested in China as a nation.

If confirmed, I will look forward to seeking to determine new venues in which to engage the Chinese military. To your question regarding the conferences and so forth, there are a myriad of conferences in which the United States and China collectively attend.

I have had opportunities in the Western Pacific Naval Symposium, in larger conference settings in Singapore and so forth to engage with my Chinese counterparts on occasion. We have pretty consistently visited one another as well. I look forward to all the opportunities that present themselves.

Senator HAGAN. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Hagan.
Senator Begich.

Senator BEGICH. Thank you, Mr. Chairman.

Thank you, both of you, for your willingness to serve and obviously to your families that will be with you and serving with you in their own way. Thank you very much for your willingness.

I have a couple of questions. They will be a little varied. I am going to follow up on a little bit of Senator Hagan's comments here in just a minute. General, you had commented in regards to Senator Inhofe's questions regarding missile defense, and one of the comments you had mentioned was the ratio of 2 for every 1, 15 all at once type of shot effort.

Can you tell me is it that assuming that all 30 missiles are in place, that all 30 are operational at all times? Because the ratio bases that on that assumption, and I am not sure that is the right assumption, but maybe you could add to that?

General CARTWRIGHT. Senator, what we are endeavoring to do, again, we have 44 missiles under contract. The first priority for the 14 above the 30 is to bring the 30 that are in the ground to a common configuration that represents the knowledge that we have gained from all of the testing. Then the intent would be to keep 30 in the ground.

Now we will do maintenance on those assets. So on any given day, likely there are not 30 in battery. But with any kind of warning, we would bring 30 up to speed and be ready based on the threat that we assessed had been detected.

Senator BEGICH. Okay. In the best condition with the warning, there would be 30 available. In a shoot-look-shoot scenario, that would give you the ability to counter just with the midcourse 15 simultaneous launches. It is at that point that we start to say now when you are dealing with 15 simultaneous launches, are you dealing with a rogue threat anymore? There is a policy discussion that needs to occur if the belief is that the system should be developed beyond what we would call a rogue state capability.

Senator BEGICH. In your document or the work you are doing now, I know there is the ballistic missile study that is going on, part of that study is that question, to some extent?

General CARTWRIGHT. It is to some extent. It is also in the sufficiency side of the equation, what is appropriate for regional defenses, how many weapons do we need there against what threats and in what configuration, and how much of that feeds the defense of the Homeland?

One of the keys that we are looking at in this assessment is we have in the technology side, on what we could call the test and modeling side of the house, demonstrated a capability particularly for the SM-3 missile to be able to intercept in the ascent phase.

If we bring that to bear, then what is the right balance across all three phases for both Homeland and for regional defenses? That is what we will be asking in the BMD review is do we have that equation right?

Senator BEGICH. You made a comment, I want you to expand on it; and you made a comment, it also depends on what happens with the European sites.

General CARTWRIGHT. Yes.

Senator BEGICH. Can you expand a little bit and what you mean by that?

General CARTWRIGHT. There are two priorities that we have set for the European site. One is a regional defense capability to protect the nations, and the second is a redundant capability that would assist in protecting the United States or the Homeland.

We have, I think, upwards right now of 40 different architectural laydowns that we believe in some measure would address both the Homeland issue and the regional issue. The question is which of those make the most sense?

You are looking at Homeland. You are looking at regional. You are also looking at stability in the region. You run those three metrics against these alternatives and start to narrow in on what kind of an architecture best suits the defense of the region, the defense of the Homeland, and the regional stability.

Senator BEGICH. Very good. How do you define testing, and let me stick to the long range if I can. How do you define what is the proper type of testing that should occur with the long-range system?

General CARTWRIGHT. Right. We have nominally now, if we stay with the 44 number, 14 missiles that are available to test, both the aerodynamic or performance margins of the missile so we know what exactly it does. Also to test the interceptor itself and its ability to discriminate, the sensor grid, and then the command and control.

There are three elements. There is the weapon and the delivery system, there is the sensor grid, and there is the command and control. In order to start to test that against situations in the extreme like 15 simultaneous launches, we are going to have to go and do some testing that we haven't done, which is multi-shot engagements against or simultaneous shot engagements against multiple targets. That testing needs to be done.

Senator BEGICH. If I can interrupt for a second? Do you consider that live testing, not virtual?

General CARTWRIGHT. That is correct. We will do both.

Senator BEGICH. You will do both.

General CARTWRIGHT. But the missiles are for the live testing.

The second is that the age life of these missiles—let us just nominally say it is 25 years. Over that period, in order to be confident of that number, we need to do what is called age testing. Each year, we will sample out of a missile that is in a silo, take it, bring it to a test facility and fire it live, and ensure that it can, in fact, do what it is supposed to do.

There is going to need to be a population of missiles to support that. Part of the review that we are doing this year is to determine what that sampling quantity needs to be, and we will have to provide those missiles.

So you have two unknown variables. What is the configuration of the European capability, and what is the number of missiles associated with both the current testing and the future aging testing that we will need in order to perform through the entire life of the missile system?

Senator BEGICH. In our authorization bill that will be up Monday, we have some language in there specifically talking about a

testing plan. I don't know if you have had a chance to look at that language, but the idea was some of this discussion we are having now is to formalize it so we have a better understanding of the law, how this testing will occur, what will be the impact, and do you feel comfortable in developing a plan that can be shared with this committee maybe in this forum or another forum?

General CARTWRIGHT. Yes, sir.

Senator BEGICH. Okay. This question you may not want to answer, but let me now shift if I can real quick because it was an interesting statement you made, and that is we are there to win and be successful.

This is the question. How do you define in Afghanistan—that is what I am focused on right now, a win in Afghanistan? I know that is a difficult question because a lot of aspects, and Senator Hagan, Senator Udall, and a few of us just came back from the Afghanistan region. Just how do you define a win?

General CARTWRIGHT. The lack of presence of ungoverned and unmanaged WMD should they exist, that they have to be eliminated or put under control. In this case, there are no weapons.

Senator BEGICH. There are none. Correct.

General CARTWRIGHT. The absence and the control of terrorists who would export their terrorism globally. Then the presence of a governance system that could discover and deter the first two.

Senator BEGICH. Admiral, we had a great conversation yesterday. I appreciate all your commentary yesterday with me.

My last question, if you could have a crystal ball in Afghanistan, based on the resource allocation that you now are seeing move in there, what you have heard a little bit today on some of the concerns or issues we have on resource allocation, how would you measure that in time?

General CARTWRIGHT. I think that there is a subjective side of this. The enemy clearly has a vote in this activity. The first two I believe that we have reasonably under control. Governance gives us the opportunity to put in place a structure that would control either the reemergence of terrorists or the potential for WMD.

The question then is how much can we do to bolster this government and give it the opportunity to provide basic services, justice, and rule of law in a construct that would advantage the country and at the same time protect its neighbors and the rest of the globe from any kind of reemergence of terrorism?

It is a subjective judgment. I believe that whatever government comes out of Afghanistan as we move forward with success, it will probably not look like our government. They have thousands of years of a type of government that is associated with the tribes and with the clans. But if they can come to some mesh between the local governance and the central governance in a way that allows them to move forward and provide services, that that will be our vision of success.

Senator BEGICH. Thank you very much, Mr. Chairman.

Thank you both.

Chairman LEVIN. Thank you, Senator Begich.

Senator Chambliss.

Senator CHAMBLISS. Thank you, Mr. Chairman.

Gentlemen, I had the opportunity to visit with both of you. Thank you for your continued service. Thank you for your leadership.

General Cartwright, I noted that earlier today, you had some comments relative to the F-22, which are not new. Your opinion on this has been out there for some time. But I note that it is not in accord with what we are hearing from a number of other folks within the military.

Can you tell me, in your opinion, what is the military requirement for the number of F-22s that are called for?

General CARTWRIGHT. The military requirement right now is associated with the strategy that we are laying out in the QDR, and it is a departure from the two major theater war (MTW) construct that we have adhered to in the past and in which this aircraft grew up. It grew up in that construct of two MTWs, and both of them being of a peer competitor quality.

The strategy that we are moving towards is one that is acknowledging of the fact that we are not in that type of conflict, that the more likely conflicts are going to be similar to the ones that we are in in Iraq and Afghanistan, but that we do need to have a capability against a major peer competitor and that we believe that the sizing construct demands that we have fifth generation fighters across all three Services rather than just one and that the number of those fighters probably does not need to be sufficient to take on two simultaneous peer competitors, that we don't see that as the likely. We see that as the extreme.

Senator CHAMBLISS. What is the military requirement for the number of F-22s?

General CARTWRIGHT. The military requirement is 187.

Senator CHAMBLISS. Now you realize that is contrary to the opinion of the Chief of Staff of the Air Force, General Norton Schwartz?

General CARTWRIGHT. I do not realize that. He has sat down in several meetings with me, certainly in the tank with the chiefs. That has been the number that he has espoused.

Senator CHAMBLISS. General, I just have to tell you it is in writing. It is on the record in this committee, as well as public statements in news conferences and speeches by General Schwartz, that the military requirement is 243.

You realize that your statement at 187 is contrary to the written statement and the opinion of the Chief of Air Combat Command, General John Corley?

General CARTWRIGHT. I realize that General Corley, General Schwartz, and I have spoken about that, was speaking in terms of the two MTW construct.

Senator CHAMBLISS. You realize that there is also a difference of opinion between the head of the National Guard, General Harry Wyatt, and you with respect to the number that are needed?

General CARTWRIGHT. I do, after reading his comments in the paper today.

Senator CHAMBLISS. You also, I am sure, are aware the General Richard Hawley, a former Commander of Air Combat Command, says that not only are 243 needed, but 381 is the military requirement. Is that correct? Do you understand that?

General CARTWRIGHT. I understand that, and I am providing you with my best military advice.

Senator CHAMBLISS. My point is that there is obviously disagreement in the military about what this number ought to be. Now every one of the individuals I mentioned—General Schwartz, General Corley, General Wyatt, General Hawley—base their opinion on studies that have been done. As you and I well know, there are any number of studies that have been done over the years.

They base their opinion based on studies that have been done. Can you tell me one study that has been done that says that the military requirement is 187?

General CARTWRIGHT. We just finished an Air Force study that brings it in at the 187 level. But it does not look in isolation at a single aircraft.

Senator CHAMBLISS. Has that been published?

General CARTWRIGHT. It looks at the fleet of aircraft and our capability in addition to aircraft, to all of the other capabilities that the military brings forward.

Senator CHAMBLISS. Has that study been published?

General CARTWRIGHT. Let me find out and provide it to you if it has not been provided.

[The information referred to follows:]

This report is a joint staff report that is classified and is retained in committee files.

There is no Air Force-only study that I'm aware of that determines 187 F-22s are sufficient to meet the national military strategy.

- All the Services, including the Air Force, participated in the Joint Staff-led Operational Availability-08 (OA-08) assessment.
- OA-08 was conducted from the spring of 2007 through May 2008.
- The purpose of OA-08 was to assess the sufficiency of the Joint Force to execute operational constructs articulated in the national defense strategy, and to assess how best to apply the current planned force against a range of scenarios. OA-08 was not primarily a force sizing study intended to determine the required force size to execute the national military strategy.
- While OA-08 did conclude that 187 F-22s were sufficient, OA-08 also included assumptions that, if incorrect, could change the outcome related to the number of F-22s required.

Senator CHAMBLISS. Okay. But that Air Force study would be contrary to the opinion of the Chief of Staff of the Air Force if that is the case.

In your news conference that you held back on April 7, you talked about movement toward unmanned aerial vehicles (UAVs), which I agree with. I think the UAV, the Predator, and its counterparts are needed. We need to provide more of those. Is there any UAV in production today that has stealth capability?

General CARTWRIGHT. I think that we would have to take that to a different forum, Senator.

Senator CHAMBLISS. Okay. Is there a UAV that has the capability of penetrating any theater where the sophisticated surface-to-air missiles that are in the hands of any number of countries around the world today?

General CARTWRIGHT. I think we would have to take that to a classified forum, sir.

Senator CHAMBLISS. Okay. Does the F-22 have that capability?

General CARTWRIGHT. It does, sir.

Senator CHAMBLISS. You also talk about that we need to move more quickly to the F-35. You mentioned the fact that in that April 7th news conference that the F-35 has had its problems and has been expensive. My understanding is that most of those problems are behind us at this point.

But you go on to say that with the F-35s that we are going to buy ahead of the final tests being concluded, that we are going to have to retrofit the F-35, and that is pretty common, is it not, to have to retrofit a weapon system as different capabilities are found and different problems are found?

General CARTWRIGHT. I believe over half of the F-22 aircraft will have to be retrofitted.

Senator CHAMBLISS. That is not unusual. If we did it with the F-15, the F-16, and we will have to do it with the F-35. Now how expensive is that F-35 going to be per copy?

General CARTWRIGHT. I would have to go back and get you exact numbers. I wouldn't want to give you a swag, sir. Let me provide that to you.

[The information referred to follows:]

The average unit flyaway cost for an F-35A aircraft, based on total procurement of 1,763 aircraft, is \$85 million (TY\$).

Senator CHAMBLISS. Okay. Can you tell us also, and you may have to look this up, but how expensive is that F-35 going to be once it is retrofitted?

General CARTWRIGHT. That would be a harder question because we don't know what issues we will find in fielding and test.

Senator CHAMBLISS. Again, you make my point, General. We have a known quantity with the F-22. If you just divide the number of F-35s that we are going to procure by the dollars that have been requested by the Pentagon, the cost of the current F-35 is comparable to the cost of a current F-22.

We have a known quantity. We know that its capabilities are greater than the F-35, and it is a little mystifying to me why there seems to be continued opposition coming out of the Pentagon.

But I thank you for your comments, and again thank both of you for your service.

General CARTWRIGHT. Thank you, Senator.

Senator CHAMBLISS. Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Chambliss.

Senator Nelson.

Senator BEN NELSON. Thank you, Mr. Chairman.

Thank you to both of you for your service and to your families for being here. We appreciate very much your continued service in new positions. I look forward to your confirmations.

General Cartwright, in response to the advance policy questions, you stated that one of the three challenges you would face and a continued priority as the Vice Chief is the emergence of cyber threats against private citizens, the commercial sector, and national security. You stated that in addressing this challenge, you would support the standup of the recently announced Cyber Command and the development of capabilities and protocols necessary to defend the Nation's interests and protect the rights that define our way of life under the Constitution.

Can you speak to the support that will be necessary for you to provide to STRATCOM in standing up this subunified command and how you can help and what kind of support would be necessary to encourage STRATCOM's role in addressing and developing the capabilities that are required in this subcommand.

General CARTWRIGHT. Senator, as you say, in the command relationship, STRATCOM is the combatant command responsible for cyber. They will have a subunified command, which we are calling right now Cyber Command, that will be responsible for the day-to-day work associated with cyber in all the areas that you just highlighted.

Senator BEN NELSON. Both offensive and defensive?

General CARTWRIGHT. Both offensive and defensive and will support STRATCOM, who will then integrate that capability across the broad range of capabilities of both the general purpose and strategic forces.

STRATCOM's role is still very significant in this activity, but what we have now is somebody who is dedicated with all of the resources, the intelligence, the linguists, the technical expertise, and intellectual capital and equipment to be able to wage this war at the strategic level, at the operational level, and at the tactical level.

That war is the defense of our networks both from a standpoint of national security and from a standpoint of our ability to do business, which is at the heart of what this cyber capability brings to this Nation, a global reach for its business and its engagement.

We have, through the auspices of STRATCOM, now significantly expanded the basic training for each of the Services so that we can get what we will call cyber warriors into the system and start to grow them. We have expanded the schools at the technical level, the senior levels. In other words, we have done significant work in the structure of what it will take to support each of the combatant commands and what will have to be forward staged and what will have to be held back and how those forces get presented by each of the Service cyber commands.

All of that work is ongoing. The next due-out that we have is really from STRATCOM, which is an integrated roadmap of how this command will go to its initial operating capability and then to its final operating capability, the resources necessary and the capabilities that they must demonstrate before we are comfortable that they are ready to reach those stages. That is the next due-out.

Senator BEN NELSON. Those resources will be made available? Because it is one thing to give the responsibility, another thing to give it with the resources in order to be able to achieve it.

General CARTWRIGHT. Senator, if confirmed, I will work my best at that issue.

Senator BEN NELSON. In that regard, and as a former Commander of STRATCOM, in setting up a global command or going beyond a subunified command to a combatant command, if cyber is pulled from STRATCOM, how will the mission be integrated so that the two combatant commands are able to structurally work together?

General CARTWRIGHT. Senator, and you know this from my time at STRATCOM, but at each step of the way with this cyber capability that we are trying to build to defend the Nation, from its in-

ception, we started—and there were those who wanted a stand-alone combatant command, some that wanted a subunified. We started with a functional component because we needed to crawl a little bit.

We are now moving to a subunified command, and it is because we believe we have matured in our understanding of what it is we need to be able to do. There is still more work to be done in that area.

My personal opinion on this is that a stand-alone, functional command that would be cyber only has the potential like what I believe was a challenge for Space Command, that it would become disconnected from the warfighter and then would not be as readily integrated into the warfight and the scheme of maneuver and planning. My position has been that I believe, at least until something fundamentally changes, it is most appropriate for this command to be at the subunified level and that STRATCOM offers us the venue to integrate it with general purpose forces.

Senator BEN NELSON. I appreciate your thoughts in that regard. Without your background, I still share your conclusions.

Admiral, we spoke recently, and I appreciate very much your having come in. The concerns that I have right now with North Korea are obvious because of the same concerns we all share. We have also concluded that perhaps the best pressure point on North Korea can come from China, diplomatic and otherwise, to deal with North Korea's interests in continuing to terrorize the neighborhood and threaten globally.

In connection with what is going on in China today with the Uighurs and the turmoil and unrest that even brought President Hu Jintao back to China to try to provide leadership there, is China distracted to the point where we can't get their attention, in your opinion, to deal with North Korea now because they can't handle two issues at once?

That is sometimes very distracting to anyone. But it is particularly distracting to them right now. It is a tough question.

Admiral WILLARD. Yes, it is. I can't account for President Hu and his ability to multitask. I think that China is a very complex country. Obviously, they have a great deal of influence that is growing regionally and internationally, and at the same time, they have internal pressures that are extraordinary, as illustrated in their most recent crisis internally.

We certainly see the need to leverage China, their leadership, their government in terms of influencing North Korea. In the past, they have at times demonstrated that, more or less.

We believe that right now we are in a period where North Korea's provocations, as you suggest, are not in the region's interest, nor are they in the People's Republic of China's (PRC) interest. We believe that we are in a period of opportunity now where Chinese leadership can and should exert their influence, to the extent that they have it, over North Korean leadership in order to bring the current situation of provocations under control.

Senator BEN NELSON. The Dear Leader is behaving like a young tot without the benefit of having a babysitter nearby. One would hope that the PRC would focus on this and recognize that it is a

threat not only to the near region, but on a broader basis in an intercontinental capacity as well.

I would hope that we could get their attention and have it focused on that, and I hope in your new command, that will be part of what you can express in terms with the relationship that you will develop with the Chinese military. We can perhaps deal with it as well at the State Department level, but I think the military certainly needs to be brought into the picture as well.

Admiral WILLARD. If confirmed, I look forward to sharing those views. Thank you, Senator.

Senator BEN NELSON. Thanks to both of you.

Thank you, Mr. Chairman.

Chairman LEVIN. Thank you, Senator Nelson.

I just have a few additional questions.

Admiral, one of the most important missions assigned to the Department is the responsibility to recover missing servicemembers and to identify the remains that are recovered, and the principal agency involved in recovering and identifying those remains is the Joint Prisoners of War/Missing in Action Accounting Command (JPAC), which is under the parent command of PACOM.

You indicated, I believe, in your answers that one of the recurring challenges for JPAC is the shortage of scientific personnel to increase the number of identifications of remains that have already been recovered. I am wondering if you could just briefly comment on that and whether you would support increasing the number of scientific personnel and whether that can be done fairly easily? Is that just a matter of resources, or are there other problems?

Admiral WILLARD. Thank you, sir.

There is a backlog, as you are aware, in terms of the scientific effort that is ongoing to identify remains that JPAC has, in fact, collected over time. It is currently our most advanced scientific endeavor, I believe, in the world in regard to identifying remains such as they are in their work.

I think resourcing is part of this answer. I think being able to access that level of scientific expertise and the availability of scientists of that caliber to perform this nature of work is the other dimension. If confirmed, I will look forward to understanding fully the resourcing requirements for JPAC in order that they can advance this capability as far as we possibly can as a Nation and ensure that both our resourcing is communicated correctly, as well as the needs to be able to access the type of expertise that is so unique to this organization.

Chairman LEVIN. Okay. Thank you.

Of course, we would invite you to let the committee know of any shortfalls that we can make up for.

Admiral WILLARD. Yes, sir. I would be happy to.

Chairman LEVIN. General, back to the F-22 for a moment. You have given us your view in terms of the requirement. Is your view shared by the Joint Chiefs?

General CARTWRIGHT. It is, sir.

Chairman LEVIN. Was that issue the subject of significant discussion by the Joint Chiefs?

General CARTWRIGHT. It was. In the tank, we have gone through this several times.

Chairman LEVIN. You are going to make available the study that you made reference to, to the full committee. There was a second study that I referred to, I believe?

General CARTWRIGHT. I think the one I referred to just now is the Air Force study, and we will get that.

Chairman LEVIN. There was a second study that I can't remember the exact name of, but—

General CARTWRIGHT. We will work with you to get it.

Chairman LEVIN. The Joint Staff study? I think it was a Joint Staff study. If you could also make that available to us? Do we already have that study? I don't think we have that. If you could dig that out for us, we would appreciate that as well.

[The information referred to follows:]

[Deleted.]

Chairman LEVIN. General, on Monday, the Washington Post referred to an analysis of missile defense options for Europe, and that analysis was written by a Stanford physicist named Dean Wilkening. The article said that in his analysis, which had been provided to the administration, there are a number of options for missile defense in Europe that might provide a better missile defense, better defensive coverage of Europe against a potential long-range Iranian missile than the proposed deployment of a system in Poland and the Czech Republic.

Are you familiar with that study?

General CARTWRIGHT. I am not familiar with that study, but I am familiar with a range of options that we believe have the potential to be more effective. As I said earlier, the key here is to find the best options that give us both the regional defense and the defense of the Homeland.

Chairman LEVIN. In looking at that, are we keeping all of our options open? Are we looking at all of the available possibilities?

General CARTWRIGHT. Yes, sir. I think we are in the neighborhood, as I said, of over 40 options right now that we are starting to narrow down on.

Chairman LEVIN. General, Senator Lieberman and 14 members of this committee, including myself, wrote the President in May, urging him to declare higher end strength target levels for the Afghan National Army and the Afghan National Police than the current target of 134,000 soldiers and 82,000 police personnel.

I understand that the Afghan police target has now been raised, but that the level—I particularly focus on the army—remains inadequate in terms of what I think most people believe the needs are going to be in Afghanistan for Afghan troops. I don't know why General Jones made the comment he did. That has already been explored. But I want to focus on the size of the Afghan army.

We had a brigadier general by the name of Larry Jacobson, who said the other day that the fact of the matter is we don't have enough Afghan forces and that we need more or he would like more is his exact word in Helmand Province.

Is this a subject of major consideration and deliberation among the chiefs?

General CARTWRIGHT. It is, Senator. I think we all believe that there needs to be more Afghan forces, in particular Afghan Na-

tional Army capability. We also believe, based on the assessments that we have done thus far, that there is the capacity to recruit and train more, particularly as we add the 4th of the 82nd to help us in the training throughput.

We have combined a current assessment that is ongoing of the Afghan national security force with large with General McChrystal's assessment. We expect that assessment to come in at the same time that General McChrystal delivers his assessment.

Chairman LEVIN. The McChrystal assessment is on our troop level and the Afghan national troop level?

General CARTWRIGHT. Yes, sir. We have asked them to be combined.

Chairman LEVIN. All right. We have heard different arguments or positions about why we can't move faster. We have heard that the problem is the shortfall of Afghan leadership in the army. It is the training of those leaders. We have heard there are not enough mentors there yet. We have heard there is an equipment issue.

But I think everybody agrees that you have in the Afghan army a motivated army. They are motivated against the enemy and are willing to undertake their own lives and put their own lives on the line.

This is not a question of a lack of motivation on the part of the Afghans. We are all very anxious to do whatever we can to prod this issue along.

General CARTWRIGHT. I think you are right, Senator. One thing we are not going to have to teach them how to do is fight. But we are going to have to work on command, control, organization, and leadership. Building the noncommissioned officer cadre, building the officer cadre is going to be part of the work, and we believe adding the 4th of the 82nd out there to do that work is going to help us get the throughput.

Chairman LEVIN. Finally, just one question about Pakistan. I think that in terms of recent events that the Pakistan army is showing a much greater willingness to take on the enemy for their own sake, not because we are asking them or we are paying them, but because from their national security perspective, it is in their interest.

I don't know how much that has been transmitted to the Pakistan people. I know it is transmitted through interviews in the London papers, but that is not the same as the president and the head of the army in Pakistan transmitting that to the Pakistani people themselves. I am trying to find out the degree to which the statements that they have made recently reflect that or are made publicly in Pakistan.

But another thing which has troubled me is that we are constantly criticized for the attacks by our UAVs inside Pakistan. Yesterday or the day before, we got a number of very high-level targets. There were civilian casualties, which obviously are to be minimized and regretted.

But when we knock out high-level targets, terrorist targets, Taliban targets that are out to destroy the Government of Pakistan, the least we can expect, I believe, from the Pakistan Government is silence. They politically don't have it inside themselves to

tell the Pakistan people why we are doing it and that they are aware of it. They don't have that kind of political steel in their backbone. I have been in politics long enough to understand that. I don't condone it. I don't like it. But I at least can understand.

What I can't understand and do not accept is the attacks on us, the criticism of us, because what that does is undermine the effort. They are creating, not us, every time they attack us as being foreign occupiers—or not occupiers, but foreigners attacking their sovereign soil, they are creating another generation that are after us instead of after the terrorists.

I just want to let you know I would welcome any comment that you might have. I want to let you know because you will have contacts with the Pakistani leadership. I have expressed this directly to their President, to the Chief of Staff of the Army. It affects my own view as to whether we should be providing support to Pakistan.

I am willing to support the Pakistan Government and to try to get them some economic wherewithal to address all the issues they have so that they are the ones that are supporting their people's needs. I am for providing that.

I believe that they have the same goal we do, at least their recent actions suggest they do, which is that it is in their security interest to go after the fanatics and the terrorists. I got that, and if that is real and is sustained, that is somewhat reassuring.

But what I don't have yet is assurance that their statements publicly, their rhetoric about the need for them to go after the terrorists serves their national interest. I am not sure that is done internally yet in terms of their rhetoric, and I sure as heck deeply object to their criticism of us for using attacks by UAVs, which they obviously acquiesce, condone, and accept or else we wouldn't be doing them.

I know we also have a vote on, and I don't want to cut short an answer if you are just dying to give us an answer on this. [Laughter.]

But I don't need an answer. I would welcome it if you feel that you want to. But I just want to express that to you.

General CARTWRIGHT. I think just one short comment, Senator, because I think you have captured the issue.

Inside the military, our ability to work with our counterparts, at my level, I know my counterparts from school. But our lieutenant colonels, majors, and captains don't because we had that hiatus. So, bringing them back into our schools and building trust, which is what we are trying to do, will help us, I think, in the perception management here of what our role could be to assist them.

Every nation is proud, and I understand that, but every nation also can use friends. We have to work on this some way, but we also have to have the help of their central government to do that. They can undermine this in a way that is very damaging to both sides if we are not careful.

Chairman LEVIN. General, Admiral, thank you for your service. Thank you for being here today. Thank your families for us, those who are here within earshot and those who aren't. Good luck to your son-in-law getting home.

General CARTWRIGHT. Thank you.

Chairman LEVIN. When is he due?

General CARTWRIGHT. Hopefully in the next 2 weeks.

Chairman LEVIN. Two weeks. We know how much you are looking forward to it. You can embrace him for all of us.

General CARTWRIGHT. Thank you, sir.

Chairman LEVIN. Thank you both.

Admiral WILLARD. Thank you, Mr. Chairman.

Chairman LEVIN. The hearing is adjourned.

[Whereupon, at 11:39 a.m., the committee adjourned.]

[Prepared questions submitted to Gen. James E. Cartwright, USMC, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. On two previous occasions you have answered the committee's policy questions on the reforms brought about by the Goldwater-Nichols action, the last time being in connection with your first nomination to be Vice Chairman of the Joint Chiefs of Staff.

Has your view of the importance, implementation, and practice of these reforms changed since you testified before the committee at your most recent confirmation hearing?

Answer. No. The Goldwater-Nichols reforms have clearly strengthened the warfighting and operational capabilities of our combatant commands (COCOMs) and our Nation.

Question. In your previous response to a question concerning whether you saw a need for modifications of Goldwater-Nichols in light of the changing environment, you indicated that there are a series of ongoing reviews of Goldwater-Nichols and that you would study these reviews, if confirmed.

In light of your experience as Vice Chairman and your study of the reviews do you see any need for modifications to Goldwater-Nichols? If so, what areas do you believe it might be appropriate to address in these modifications?

Answer. The reviews of Goldwater-Nichols have been completed and the required modifications incorporated into how the Department manages joint officers.

During the past 2 years, the joint officer management process has built on the strong foundation established by the Goldwater-Nichols Act with a flexible structure to meet the ever-changing landscape characterized by today's military environment. The new Joint Qualification System is more responsive to the warfighters in multi-Service, multi-national, and interagency operations and produces fully qualified and inherently joint officers to meet the needs of our great Nation. Our emphasis will continue to focus on assigning high quality officers to joint assignments and ensuring they receive a joint experience that produces experts in joint matters. As we continue to advance jointness, joint officer management will continue to evolve. As we evolve, we may find some areas of the law that may require some future modification. However, at this time, I believe we have the necessary tools.

DUTIES

Question. What recommendations, if any, do you have for changes in the duties and functions of the Vice Chairman of the Joint Chiefs of Staff as set forth in section 154 of title 10, U.S.C., and in regulations of the Department of Defense (DOD) pertaining to functions of the Vice Chairman of the Joint Chiefs of Staff?

Answer. None at this time.

Question. Based on your previous experience as Commander, U.S. Strategic Command, and your current experience as the Vice Chairman of the Joint Chiefs, what recommendations, if any, do you have for changes in chapter 6 of title 10, U.S.C., as it pertains to the powers and duties of combatant commanders?

Answer. None at this time.

RELATIONSHIPS

Question. Please describe your understanding of the relationship of the Vice Chairman of the Joint Chiefs of Staff to the following officials:

The Secretary of Defense.

Answer. As a member of the Joint Chiefs of Staff, the Vice Chairman performs the duties prescribed for him as a member of the Joint Chiefs of Staff and such other duties as may be prescribed by the Chairman with the approval of the Secretary of Defense.

Additionally, in the absence or disability of the Chairman, the Vice Chairman acts as the Chairman and performs the duties of the Chairman until a successor is appointed or until the absence or disability ceases. These duties include serving as the principal military advisor to the President, the National Security Council, and the Secretary of Defense.

As a member of the Joint Chiefs of Staff, the Vice Chairman may submit advice or opinions to the Chairman in disagreement with, or in addition to, the advice presented by the Chairman to the President, the National Security Council, or the Secretary of Defense. The Chairman submits such opinion or advice at the same time he delivers his own.

The Vice Chairman, as a member of the Joint Chiefs of Staff, may also individually or collectively, in his capacity as a military advisor, provide the Secretary of Defense advice upon the Secretary's request.

Question. The Deputy Secretary of Defense.

Answer. Under existing directives, the Deputy Secretary of Defense has been delegated full power and authority to act for the Secretary of Defense on any matters upon which the Secretary is authorized to act. As such, the relationship of the Vice Chairman with the Deputy Secretary is similar to that with the Secretary. In addition, the Vice Chairman co-chairs the Deputies Advisory Working Group with the Deputy Secretary of Defense to work key resources and management issues for DOD.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The Vice Chairman performs the duties prescribed for him as a member of the Joint Chiefs of Staff and such other duties as prescribed by the Chairman with the approval of the Secretary of Defense. When there is a vacancy in the office of the Chairman, or during the absence or disability of the Chairman, the Vice Chairman acts as Chairman and performs the duties of the Chairman until a successor is appointed or the absence or disability ceases. If confirmed, I look forward to sustaining a close and effective working relationship with the Chairman.

Question. The Under Secretaries of Defense.

Answer. Title 10, U.S.C., and current DOD directives establish the Under Secretaries of Defense as the principal staff assistants and advisors to the Secretary regarding matters related to their functional areas. Within their areas, Under Secretaries exercise policy and oversight functions. They may issue instructions and directive type memoranda that implement policy approved by the Secretary. These instructions and directives are applicable to all DOD components. In carrying out their responsibilities, and when directed by the President and Secretary of Defense, communications from the Under Secretaries to commanders of the unified and specified commands are transmitted through the Chairman of the Joint Chiefs of Staff. If confirmed, I will work closely with the Under Secretaries.

Question. The Assistant Secretaries of Defense.

Answer. With the exception of the Assistant Secretaries of Defense for Public Affairs, Legislative Affairs, and for Networks and Information Integration, all Assistant Secretaries of Defense are subordinate to one of the Under Secretaries of Defense. In carrying out their responsibilities, and when directed by the President and Secretary of Defense, communications from the Under Secretaries to commanders of the unified and specified commands are transmitted through the Chairman of the Joint Chiefs of Staff. If confirmed, I will work closely with the Assistant Secretaries in a manner similar to that described above for the Under Secretaries.

Question. The Secretaries of the Military Departments.

Answer. Title 10, U.S.C., section 165 provides that, subject to the authority, direction and control of the Secretary of Defense, and subject to the authority of the combatant commanders, the secretaries of military departments are responsible for administration and support of forces that are assigned to unified and specified commands.

The Chairman, or Vice Chairman when directed or when acting as the Chairman, advises the Secretary of Defense on the extent to which program recommendations and budget proposals of the military department conform with priorities in strategic plans and with the priorities established for requirements of the COCOMs.

Question. The Chiefs of Staff of the Services.

Answer. As a result of the Goldwater-Nichols Act, the Service Chiefs are no longer involved in the operational chain of command. With respect to title 10 responsibilities, they serve two significant roles. First and foremost, they are responsible for the organization, training, and equipping of their respective Services. Without the

full support and cooperation of the Service Chiefs, no combatant commander can be ensured of the preparedness of their assigned forces for missions directed by the Secretary of Defense and the President.

Second, as members of the Joint Chiefs of Staff, the Chiefs are advisors to the Chairman and the Secretary of Defense as the senior uniformed leaders of their respective Services. If confirmed, I will work closely with the Service Chiefs and their Vice Chiefs to fulfill warfighting and operational requirements.

Question. The Combatant Commanders.

Answer. The combatant commanders fight our wars and conduct military operations around the world. The Chairman provides a vital link between the combatant commanders and other elements of DOD, and as directed by the President, serves as the means of communication between the combatant commanders and the President or Secretary of Defense. When the Vice Chairman is performing the Chairman's duties in the latter's absence, he relates to the combatant commanders as if he were the Chairman.

Question. The Special Assistant to the President/Deputy National Security Advisor for Iraq and Afghanistan.

Answer. Because the Special Assistant to the President/Deputy National Security Advisor for Iraq and Afghanistan is an officer serving in an agency outside DOD, the Vice Chairman of the Joint Chiefs of Staff communicates to that official through the Secretary of Defense.

Question. The Under Secretary of Energy for Nuclear Security.

Answer. The Vice Chairman of the Joint Chiefs of Staff is a member of the Nuclear Weapons Council along with the Under Secretary of Energy for Nuclear Security. In this capacity, we will work together to oversee and coordinate the Nation's nuclear weapons policies to include the safety, security, and control issues for existing weapons and proposed new weapons programs.

MAJOR CHALLENGES AND PROBLEMS

Question. What are the major challenges that you have faced in your first term as Vice Chairman of the Joint Chiefs of Staff?

Answer. First, supporting the ongoing war against violent extremism. Second, ensuring COCOMs are better represented in the requirements, acquisition, and resourcing processes. Third, ensuring needs of the COCOMs are realized in a timely affordable fashion.

Question. What new challenges do you expect to face if you are confirmed for a second term?

Answer. First, the transition of our warfighting forces in support of the Nation's priority effort in Afghanistan. Second, we face the threat of a diminishing deterrence capability able to address the nexus of weapons of mass destruction (WMD) and violent extremism. Third, the emergence of cyber threats against private citizens, the commercial sector, and national security.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I will first work to ensure our forces have the resources and capabilities to enable them to prevail in Afghanistan. Second, I will work with the COCOMs, OSD, and our interagency partners to develop the capabilities necessary to deter both the extremists that seek WMD and those who would either proliferate these weapons or who are ineffective in safeguarding these weapons. Third, I will support the stand-up of the recently announced Cyber Command and the development of capabilities and protocols necessary to defend the Nation's interests and protect the rights that define our way of life under the Constitution.

JOINT REQUIREMENTS OVERSIGHT COUNCIL

Question. As the Vice Chairman of the Joint Chiefs of Staff, you are now, and if confirmed, you would continue to be, the chairman of the Joint Requirements Oversight Council (JROC). The JROC has the responsibility to review and validate Service requirements.

What is your view of the modifications to the JROC process made by the Weapon Systems Acquisition Reform Act of 2009?

Answer. My basic goal, if confirmed, would be to enhance the voice of the customer [COCOM] in the requirements process. We are supportive of the overall goal of the changes mandated by the Reform Act. Many of the JROC process changes codified improvements we incorporated into our procedures over the last few years.

Question. What additional steps do you believe that Congress or the Department should take to ensure that trade-offs between cost, schedule, and performance objec-

tives for major weapon systems are made at an appropriately early point in the acquisition process?

Answer. I do not believe any additional congressional action is necessary at this point. The Joint Capabilities Integration and Development System process, working in concert with the acquisition and programming processes, ensures there is an assessment of tradeoffs between cost, schedule, and performance throughout the lifecycle of a program. Recent changes to these processes, some codified in the 2009 Acquisition Reform Act, should be allowed to mature for a period of time before we make any additional modifications.

Question. Are there any other recommendations that you would make to modify JROC or its authority or the requirements process?

Answer. In today's environment, JROC needs to be as responsive as possible to warfighter needs. JROC should represent the combatant commanders' interests, Service interests, as well as the Office of the Secretary of Defense. I would recommend changes to the extent possible be codified in Department level directives. Currently, the VCJCS sits as the Chairman of JROC as a delegated authority from the CJCS. Among the changes I would advocate are, the VCJCS should be designated as Chairman of JROC. He should have the authority to delegate, when appropriate, requirements decisionmaking authority to the commander of a functional COCOM for specific capabilities or a portfolio of capabilities. I would also invest the Chairman of JROC with the authority to make the final decision on requirements after having heard and reviewed the membership positions of the members of the council.

Question. How would you assess the effectiveness of JROC in the DOD acquisition process?

Answer. I believe JROC is an effective partner with OSD in the acquisition process. We have tracked closely with OSD as the DOD acquisition process has been recently modified and have made changes to the requirements process to ensure we maintain our alignment. Through participation in many common forums, such as the Defense Acquisition Board and the Deputy's Advisory Working Group, we are able to identify any disconnects early and make the necessary course corrections. We also closely track program performance through development.

Question. What is your vision for the role and priorities of JROC in the future?

Answer. The priority for JROC now and in the future will be to understand and be responsive to the needs of the combatant commanders. To that end, JROC will continue to focus on meeting the urgent capability needs of today's warfighter while also working with the combatant commanders to define the capabilities required for the future force.

Question. What changes, if any, would you recommend in the membership of the JROC?

Answer. Currently the COCOMs are invited to participate as advisors to JROC at their discretion. I would like to see COCOM, OSD(P), OSD(AT&L), and OSD(C) participation formalized by including them as members of JROC to ensure JROC clearly understands the warfighter's concerns and issues before decisions are made. In order to ensure warfighter requirements are understood and consistent in translations to solutions, I also recommend OSD(P), OSD(AT&L), and OSD(C) be permanent members.

Question. Do you believe the JROC process is sufficient to understand and identify where there are opportunities for multi-Service collaboration or where programs could or should be modified to take advantage of related acquisition programs?

Answer. We can always improve but generally JROC is effective in ensuring collaboration among the Services. The Services participate throughout the requirements vetting process. One new initiative is to use COCOM defined and prioritized attributes through the Senior Warfighter Forums (SWarF) process to balance cross Service programs.

Question. What principles guide your approach to inviting and helping ensure the sufficient participation of other such stakeholders in JROC?

Answer. I view JROC as an open, collaborative forum where we solicit input and advice from any organization with a stake in the requirements being validated.

ACQUISITION REFORM AND ACQUISITION MANAGEMENT

Question. What is your view of the changes made by the Weapon Systems Acquisition Reform Act of 2010?

Answer. I fully support the changes made in the Acquisition Reform Act and am working to implement any necessary changes to the requirements process.

Question. What role have you played, and do you expect to play, if confirmed, in the implementation of that Act?

Answer. As the Chairman of JROC, I am working to implement any changes to the requirements process necessary to support implementation of the act.

Question. What role, if any, do you believe JROC should play in the oversight and management of acquisition programs after requirements have been established?

Answer. I believe JROC should continue to monitor the execution of acquisition programs to identify potential areas where requirements may be driving cost growth and schedule delays. To that end, we have established a trip-wire process to bring programs experiencing cost growth or excessive delays back to JROC for review. During these reviews, we consider performance trades to mitigate further growth in cost and delays in schedule.

Question. Do you see a need for any change in the role of the Chairman or the Vice Chairman of the Joint Chiefs of Staff in the requirements determination, resource allocation, or acquisition management processes?

Answer. No. I believe these roles are well-defined and effective in providing coherent integration between the three processes.

Question. What is your view of the role played by configuration steering boards in preventing cost growth due to requirements creep?

Answer. I think that the configuration steering boards are still maturing, but can provide meaningful advice to the milestone decision authority on areas where requirements imposed by acquisition officials could be adjusted to prevent cost growth and schedule slips.

Question. What do you see as the proper relationship between configuration steering boards and JROC in managing requirements for acquisition programs?

Answer. When a configuration steering board recommends adjusting requirements to prevent or mitigate cost growth or schedule delays, the requirements community should weigh the recommendations and provide clear guidance in support of the recommendations as appropriate. If there are concerns, the concerns should be presented to the board in a timely fashion.

Question. What is your view of the Nunn-McCurdy requirements for major defense acquisition programs that fail to meet cost, schedule, and performance objectives?

Answer. The Nunn-McCurdy certification requirements force the Department to perform a fundamental reassessment of a program and to decide to either restructure it or terminate it. From a JROC perspective, it is appropriate to ask the warfighter to revalidate the program's essentiality and requirements. In 2007, JROC established a trip-wire process to bring troubled programs back to JROC for a review and to consider performance trade-offs to mitigate further cost growth and/or schedule delays before the program faced a Nunn-McCurdy review.

Question. What do you see as the proper relationship between JROC and those charged with implementing the Nunn-McCurdy requirements?

Answer. The role of JROC as the military advisor to the milestone decision authority is appropriate when assessing Nunn-McCurdy breaches.

Question. There have been a number of studies in the past several years that have recommended a variety of changes in the way that the acquisition programs are managed.

What is your view of these studies and which recommendations, if any, has JROC implemented?

Answer. JROC views the studies as providing valuable insight and recommendations to improve the requirements process and improve its linkage to the acquisition and programming processes. We have implemented many recommendations to streamline the requirements process, enhance the engagement of the combatant commanders in validating joint warfighter needs, and to critically assess cost, schedule, and performance.

Question. Do you see any need to make any changes to the Joint Capabilities Integration and Development (JCIDS) process?

Answer. We've just completed a major update to the JCIDS process and will continue to evaluate the need for further changes. This included changes to align the JCIDS process with the recent changes to the DOD acquisition process. But more importantly we streamlined the process to reduce non-value added administration and improve visibility and access for all stakeholders.

NUCLEAR WEAPONS COUNCIL

Question. If confirmed for a second term as Vice Chairman of the Joint Chiefs of Staff, you would continue to serve as a member of the Nuclear Weapons Council (NWC).

What would your priorities be for the NWC?

Answer. If confirmed, I look forward to continuing my membership on the NWC as Vice Chairman of the Joint Chiefs of Staff.

My priorities will continue to focus on ensuring a safe, secure, and reliable nuclear weapons stockpile that can meet the current and future national security interests of the United States; and developing stockpile options, including warhead and infrastructure modernization, that support the President's objectives and future arms control commitments.

I look forward to working with Congress to address these challenges to ensure we meet our national security requirements while assuring our allies with a secure, credible, and modern nuclear arsenal.

Question. What changes, if any, would you recommend to the organization, structure, or function of the NWC?

Answer. I support the current initiative to include the Chief of Naval Operations and the Chief of Staff of the Air Force as members of the NWC.

Question. What role is the NWC playing or should it play in the ongoing negotiations for a follow-on to the Strategic Arms Control Treaty?

Answer. As a body, the NWC does not play an active role in the follow-on Strategic Arms Control Treaty negotiations. However, the NWC itself is aware of ongoing negotiations efforts and is working closely with key leaders in both the negotiating and NPR teams.

Question. What role is the NWC playing or should it play in the ongoing deliberations on the NPR?

Answer. The NWC is aware and providing input to the NPR deliberations and will play an important role in implementing the policy recommendations that result from the NPR's effort.

DISTRIBUTION OF GENERAL AND FLAG OFFICERS

Question. At the request of the Secretary of Defense, Congress included a provision in the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009 that designated up to 324 general and flag officer positions as joint duty assignments that are excluded from the limitation on the number of general and flag officers in each Service, and specified the minimum number of officers required to serve in these positions for each Service. The provision also reduced the number of general and flag officers authorized to serve on Active Duty in each Service. Implementation of this provision was delayed until 1 year after the Secretary of Defense submits a report on the proposed implementation of the provision, which took place in June 2009.

What is your view of the merits of this provision?

Answer. The provision does not reduce the number of general and flag officers authorized to serve on Active Duty. Implementation of this provision will support the objectives of the Goldwater-Nichols Act by creating a duty assignment statutory framework that allows the Secretary of Defense to reimburse the Services for participation in joint with general and flag officer authorizations. Importantly, the joint pool recognizes in-Service general and flag officer requirements to accomplish the mission organize, train, and equip are separate from joint general/flag officer requirements.

Question. In your view, what impact will implementation of this provision have on joint officer assignments?

Answer. The joint pool will increase competition for these senior joint duty assignments. The legislation provides incentives for the Military Services to nominate their best officers, from both their Active Duty and Reserve components, thereby accelerating the competencies required for our Nation to continue to address the challenges that confront our forces. As proposed, the distribution of senior joint authorizations among the Military Services with a specified minimum distribution for each Service expands the number of positions open to nomination by all four Services.

Question. In your opinion, should implementation of this provision be delayed until June 2010, 1 year from the date the Secretary submitted the required report?

Answer. The Department is requesting enactment of conforming legislation in the Department's 2010 legislative package. This provides the Department the flexibility to rapidly meet emerging joint requirements.

REBALANCING FORCES

Question. In a memorandum of July 9, 2003, the Secretary of Defense directed action by the Services, the Joint Staff, and the Office of the Secretary of Defense aimed at achieving better balance in the capabilities of the Active and Reserve components. The Secretary noted that the Department "needs to promote judicious and prudent use of the Reserve components with force rebalancing initiatives that re-

duce strain through the efficient application of manpower and technological solution based on a disciplined force requirements process.”

What progress has been made in achieving the Secretary’s vision?

Answer. Much progress has been made but much work still lies ahead of us. As examples of progress made I would highlight:

1. Access to our National Guard and Reserve Forces has allowed the level of engagement we have been able to support in Operation Iraqi Freedom (OIF)/Operation Enduring Freedom (OEF).
2. The integration of National Guard, Reserve, and Active Forces in our first Chemical, Biological, Radiological, Nuclear, and Explosive Consequence Management Response Force has given our Nation a much needed capability to assist our civil authorities as we respond to homeland situations.

Question. What do you consider to be the biggest continuing obstacles to achieving the goals that the Secretary of Defense has set forth in his memorandum?

Answer. Our biggest challenge in achieving the Secretary of Defense’s goals is to determine the optimal balance of capabilities in Active component and Reserve component based on a complex and changing operational environment. As an example in the QDR, we are working to determine how to get the most capacity out of our rotary wing forces. A key aspect of this work is the balance between Active and Guard/Reserve Forces including expectations of our Guard/Reserve personnel regarding access.

MENTAL HEALTH ISSUES

Question. The final report of the DOD Task Force on Mental Health issued in June 2007 found evidence that the stigma associated with mental illness represents a “critical failure” in the military, preventing individuals from seeking needed care. The report states, “Every military leader bears responsibility for addressing stigma; leaders who fail to do so reduce the effectiveness of the servicemembers they lead.” In light of increasing suicide rates in each of the Services and servicemembers diagnosed with post-traumatic stress, it is more important than ever to ensure that servicemembers and their families have access to mental health care and that the stigma associated with seeking such care is eliminated.

If confirmed, what actions would you take to address the stigma associated with mental illness in the military?

Answer. The stigma associated with mental health illness is an issue in both the civilian community and the military. I consider the elimination of mental health stigma to be a leadership issue, not a health issue. I support the Chairman’s determination to change our culture and I assure you this is a top priority for me as well. If confirmed, I intend to provide strong leadership to ensure that we overcome this impediment and expect leaders at every level to follow suit.

The Chairman chartered a task force of subject matter experts from across the Joint Staff to develop a Campaign Plan for Warrior and Survivor Care. The Campaign Plan specifically addresses these issues. The Task Force, in partnership with the National Defense University and the Defense Centers of Excellence for Psychological Health and Traumatic Brain Injury, is facilitating the development of a psychological health leader education program for all National Defense University schools. We continue to actively seek out senior military leaders who have received psychological health care and gone on to excel in their careers, and use these leaders to mentor our leaders of the future. I will continue to include this topic as a priority in each of my interactions with servicemembers and families, and actively encourage other leaders to address the issue across our spectrum of senior leader engagement opportunities.

We have started to address this issue within other areas of DOD as well. The Services have implemented multiple initiatives to build resilience, prevent adverse effects of combat stress, and provide increased access to mental health services, including initiatives such as embedding mental health personnel in our deploying units and performing post-deployment health assessments and reassessments.

In response to the 2007 Mental Health Task Force report, DOD developed an action plan to address over 365 recommendations from the Mental Health Task Force report as well as several other reports. We continue implementation of the action plan, and updates are provided to Congress each fall. I will continue to work closely with Congress, our military leaders, Veterans Affairs, and other Federal and civilian organizations to see that our servicemembers’ and families’ psychological health and mental health issues are addressed.

Question. What is your view of the need for revision to military policies on command notification when servicemembers seek mental health care?

Answer. Because of the known connection between these policies and the issue of stigma that we currently face, I believe that all policies for command notification should be closely examined for their true association with military readiness and safety. Without question, when military readiness and safety are not adversely impacted, policies which mandate command notification should be changed.

Secretary Gates' recent announcement that the military security clearance process will no longer include questions about mental health care history is a significant step in attempting to remove the stigma of receiving mental health care among military members, particularly in a time of war when combat stress is impacting many of our servicemembers.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. Numerous cases of sexual misconduct involving military personnel in Iraq, Kuwait, and Afghanistan have been reported over the last several years. Many victims and their advocates contend that they were victimized twice: first by attackers in their own ranks and then by unresponsive or inadequate military treatment. They assert that the command failed to respond appropriately by providing basic services, including medical attention and criminal investigation of their charges.

What role, if any, should the Joint Staff have in monitoring progress within the Military Services and the COCOMs' areas of responsibility (AOR) in order to ensure enforcement of a "zero tolerance" policy relating to sexual assaults?

Answer. As a member of the DOD Sexual Assault Advisory Council, it is important that the Joint Staff continues to partner with OSD, the Military Services, and the COCOMs to assess the requirements and effectiveness of policies and procedures in place to enforce the "zero tolerance" policy. This is the appropriate forum to monitor progress and provide senior leader oversight.

The Joint Staff works closely with the COCOMs during the development of operational plans and personnel policy guidance to ensure the prevention and response to incidents of sexual assault is addressed.

Question. What reporting requirements or other forms of oversight by Service leaders do you think are necessary to ensure that the goals of sexual assault prevention and response policies are achieved?

Answer. Currently reports are submitted through Service channels. The fielding of the new DOD sexual assault information database will improve communication protocols to better track victims services, case management and disposition, and identify trends and areas requiring additional emphasis.

The new database will also provide combatant commanders oversight of sexual assaults that occur in their AOR.

Question. What is your understanding of the resources and programs in place in deployed locations to offer victims of sexual assault the medical, psychological, and legal help that they need?

Answer. There is a 24/7 response capability in deployed areas. The Services have primary responsibility to ensure sexual assault response personnel in deployed locations (Sexual Assault Response Coordinators (SARCs), Victim Advocates, medical and mental health providers, criminal investigation and legal personnel) are well-trained to support victims and investigate and respond to allegations of sexual assault. If resources are not readily available where the alleged incident occurred, victims are transported to a facility where there is appropriate victim advocate support, medical and psychological care (regardless of Service), and investigative/legal support.

I am aware that a number of recommendations were made to CENTCOM in the DOD Fiscal Year 2008 Report on Sexual Assault in the Military, released in March. These included deploying SARCs and Victim Advocates and outfitting larger field hospitals with sexual assault forensic examination kits for evidence collection. Initial, independent Service responses to these recommendations may have created areas where duplicative support structures exist. In these instances, opportunities may exist to better pool and employ resources to optimize coverage and improve response.

Also, the Defense Task Force on Sexual Assault in the Military Services is currently evaluating how effectively the Services are implementing DOD sexual assault policy and procedures. They interviewed key sexual assault responders currently deployed in Afghanistan, including chaplains, counselors, medical and legal personnel, and Criminal Investigations Division agents regarding how they handle cases of sexual assault. In addition, the Task Force has surveyed SARCs and Victim Advocates in Afghanistan regarding the level of resources and support they have, and regarding the effectiveness of restricted reporting in the deployed environment. Their find-

ings and recommendations will be reported to the Secretary of Defense later this year.

Commanders at all levels must remain committed to eliminating sexual assault within our forces by sustaining robust prevention and response policies; by providing thorough and effective training to all assigned servicemembers, by identifying and eliminating barriers to reporting; and by ensuring care is available and accessible.

Question. What is your view of steps the Services have taken to prevent sexual assaults in deployed locations?

Answer. The Services are implementing procedures and processes to meet the challenges of preventing and responding to incidents of sexual assault in the deployed areas. All servicemembers and first responders receive sexual assault and sexual harassment prevention training prior to deployment. The use of the internet and media are effective tools in keeping deployed personnel informed and trained in prevention techniques. Coordination among Service sexual assault response personnel has improved support to victims in the operational environment and provides additional resources to conduct additional training, if needed.

Question. What is your view of the adequacy of the training and resources the Services have in place to investigate and respond to allegations of sexual assault?

Answer. The Services are responsible for training sexual assault response personnel to ensure they are well-trained to investigate and respond to allegations of sexual assault. This includes the investigative resources in deployed areas. However, as you may imagine, the combat environment and deployed operations are very dynamic. The investigative resources are often strained by other mission requirements. Access to resources may be complicated by remoteness of locations, availability of transportation to and from those areas, or the level of ongoing operations. I believe the DOD training network in place now prepares them and investigators to handle sexual assault cases in a caring, responsive, and professional manner. Our ability to respond and support victims is paramount.

Question. Allocating more funding and resources to the program to adequately implement all the program requirements will improve response capability.

Do you consider the current sexual assault policies and procedures, particularly those on confidential or restricted reporting, to be effective?

Answer. I believe current policies and procedures have improved care to victims of sexual assault; however, restricted reporting limits a commander's ability to support the victim, investigate, and/or hold alleged offenders accountable.

Restricted reporting has been effective (original intent—to allow a sexual assault victim to confidentially receive medical treatment and counseling without triggering the official investigation process). Although the use of restricted or confidential reporting doesn't allow a commander to investigate alleged assaults, it does allow a sexual assault victim to confidentially receive medical treatment and counseling without triggering the official investigation process. Since restricted reporting was implemented in fiscal year 2005, 406 restricted reports converted to unrestricted reports which allowed commanders to conduct appropriate investigations.

Unrestricted reporting supports a sexual assault victim who desires medical treatment counseling but also provides for official investigation of his or her allegations within existing administrative reporting channels (such as their chain of command, law enforcement, or through the SARC).

As our military members' confidence in the reporting and investigative policies and procedures improve, I believe more alleged offenders can be held accountable. The greatest effect still lies in preventive measures and eliminating sexual assaults.

Question. What problems, if any, are you aware of regarding the manner in which the confidential reporting procedures have been put into effect?

Answer. Privacy for restricted and unrestricted reporting becomes a challenge in a deployed environment and remote locations where units are small communities where accountability of personnel is a critical task for units. In deployed areas confidential reporting becomes more difficult for the victim to reach out to the SARC or a victim advocate because of the need to keep track of all personnel movements within the theater and that support resources may not be collocated with the victim. The joint deployed environment could present additional difficulties in case management, delivering care, and tracking services due to differences among Service programs. It is my understanding that the DOD Sexual Assault Prevention and Response Office is working to field a Joint Sexual Assault Database to improve our ability to communicate between the Services. The database is currently projected for fielding in 2010.

Question. If confirmed, what actions would you take to ensure senior level direction and oversight of efforts to prevent and respond to sexual assault?

Answer. I am currently the only military representative on the DOD Sexual Assault Advisory Council. I think the addition of the Service Vice Chiefs will add to the effectiveness of this senior body and help to ensure the policies and procedures are executable in the operational environment. This is an area of interest for the Joint Chiefs and combatant commanders.

COMMISSION ON NATIONAL GUARD AND RESERVES

Question. In a March 1, 2007, report to Congress, the Commission on the National Guard and Reserves recommended, among other things, that the Chief of the National Guard Bureau should not be a member of the Joint Chiefs. The grade of the Chief of the National Guard Bureau has since been increased to general, as recommended by this Commission.

What is your view about making the Chief of the National Guard Bureau a member of the Joint Chiefs of Staff? What is your rationale for this opinion?

Answer. The idea of making the Chief of the National Guard Bureau (CNGB) a member of the Joint Chiefs of Staff has been debated for quite some time. The Commission on the National Guard and Reserves (CNGR), in fact, took a very detailed look at the concept and recommended that the CNGB not be a member of JCS. DOD concurred with the CNGR recommendation in 2006. I also believe that CNGB should not be a member of the Joint Chiefs of Staff. The Joint Chiefs of Staff consists of the Chairman, Vice Chairman, and the Chiefs of Staff for the armed services. The National Guard is a component of the armed services and is represented on the Joint Chiefs of Staff by the Chiefs of Staff of the Army and the Air Force. A separate representation of a portion of the Reserve components from a portion of the Services would be inappropriate, confusing, and in my view divisive of a total force. As a four star general officer, the CNGB is already participating in all appropriate Joint Chiefs of Staff tank sessions and discussions concerning issues which fall under the purview of our National Guard. This is similar to the methodology used to include the Commandant of the U.S. Coast Guard when specific Coast Guard equities are involved.

Question. In its final report, issued January 31, 2008, the Commission made a number of findings and recommendations on increasing the capabilities and responsibilities of the National Guard and Reserves in the Homeland. The Commission concluded "DOD must improve its capabilities and readiness to play a primary role in the response to major catastrophes that incapacitate civilian government over a wide geographic area. This is a responsibility that is equal in priority to its combat responsibilities." In response to a request for his assessment of the final report of the Commission, Admiral Mullen responded on April 21, 2008: "I have some concern with the Commission's ideas on enhancing the Defense Department's role in the Homeland. While the Reserve component civil support requirements are important, they should not be of equal importance to DOD combat responsibilities."

What is your view of the Commission's assertion that the Department's role in response to major catastrophes should be equal in priority to its combat responsibilities?

Answer. I agree with the Chairman's position that DOD should not have statutory or policy directives that elevate civil support to the same level as combat responsibilities. The Department has taken—and continues to take—seriously its responsibility to provide support for civil authorities. Codification of civil support for domestic events as a core competency could unintentionally impede other Federal departments and agencies in the fulfillment of their own unique statutory responsibilities. Such codification would also erode DOD's ability to perform its statutory responsibility.

Question. In its March report to Congress, the Commission also recommended that DOD "develop protocols that allow Governors to direct the efforts of Federal military assets responding to an emergency such as a natural disaster." In its final report (January 31, 2008), the Commission reemphasized the importance of this recommendation.

In the statement of managers accompanying the National Defense Authorization Act for Fiscal Year 2008, the conferees urged the Secretary of Defense "to address the nature of command relationships under which troops will operate during particular contingencies and ensure, as recommended by the Commission on the National Guard and Reserves, that necessary agreements are entered into as soon as practicable." In the statement of managers accompanying the Duncan Hunter National Defense Authorization Act for Fiscal Year 2009, the conferees stated: "DOD should engage with the community of Governors to work out an understanding of unity of effort during domestic terrorist events and public emergencies."

In your view, should Governors have tactical control over military forces, including those in a title 10, U.S.C., Active status, operating in their State? What is your rationale for this opinion?

Answer. I do not believe Governors require the ability to exert tactical control over all military forces operating within their State when they are providing military support to civil authorities. Governors already have the authority to exert tactical control over National Guard forces in a State Active Duty or title 32 status. Furthermore, Governors have the ability to request the assistance of Federal forces in response to terrorist acts and/or public domestic emergencies when the Governor believes such assistance is necessary. Available forces for such events will be placed under tactical control of the designated Joint Task Force Commander or under operational control of the Commander, NORTHCOM. The designated Commander working with the Governor and the State's Adjutant General will be able to provide the necessary support to restore order, save lives, and secure property as the situation dictates.

This operational construct was developed in accordance with title 10, U.S.C., and I believe that the procedures and relationships that have been put in place since Hurricane Katrina will enhance the unity of effort between Governors and the Federal forces that provide support when requested to assist in responding to acts of terrorism or natural catastrophes.

DWELL TIME

Question. Dwell time goals still are not being met for either the Active or Reserve components, and recent testimony suggests that dwell time will not improve appreciably over the next 12 to 18 months.

In your view, what can be done to increase dwell time for both Active and Reserve component members, and when will these improvements be seen?

Answer. The current programmed growth in capabilities needed to support ongoing operations, as well as the planned reduction in force levels in the OIF campaign, will lead to improved dwell ratios in both Active and Reserve components. As operational demand changes, we will continue to assess the impact to dwell time and make appropriate adjustments.

Question. Would additional Army end strength in 2010 or 2011 improve dwell time ratios and reduce stress on the force?

Answer. Realizing any increase in end strength requires time before operational capability is realized, additional Army end strength in 2010 or 2011 would not provide immediate relief from the current stress on the force. The Department will continue to assess each Service's end strength in light of operational demand and the National Military Strategy.

END STRENGTH OF ACTIVE-DUTY FORCES

Question. In light of the manpower demands of OEF and OIF, what level of Active-Duty personnel (by Service) do you believe is required for current and anticipated missions?

Answer. Both the Army and Marine Corps are growing to 547,000 in fiscal year 2012 and 202,000 in fiscal year 2011, respectively. We continue to assess requirements of the Active-Duty Force as we draw down in OIF and increase our operational presence in OEF. This area is undergoing rigorous review as part of the QDR where we plan to include these recommendations in the President's fiscal year 2011 budget.

MILITARY WOMEN IN COMBAT

Question. The issue of the appropriate role of women in the Armed Forces is a matter of continuing interest to Congress and the American public.

What is your assessment of the performance of women in the Armed Forces, particularly given the combat experiences of our military, since the last major review of the assignment policy for women in 1994?

Answer. Women in our Armed Forces continue to make tremendous contributions to our national defense. They are an integral part of the force and are proven performers in the operational environment and under fire. It is important to understand that DOD policies do not contemplate women being assigned exclusively to positions immune from threats endemic to a combat theater. In fact, women are assigned to units and positions that may necessitate combat actions—actions for which they are fully prepared to respond and to succeed.

Question. Does DOD have sufficient flexibility under current law to make changes to assignment policy for women when needed?

Answer. The current law provides the Department sufficient flexibility to make changes to the assignment policy.

Question. Do you believe any changes in the current policy are needed?

Answer. Not at this time. DOD policy and practices are reviewed on an ongoing basis to ensure compliance and effective use of manpower.

DEFENSE INTEGRATED MILITARY HUMAN RESOURCES SYSTEM

Question. The Department and the Services have expended great time, effort, and resources towards the development of the Defense Integrated Military Human Resources System (DIMHRS) as a cross-Service, fully integrated personnel and pay system. Achieving a joint, interoperable system was, and continues to be viewed, as a priority; however, the goals of the DIMHRS program have not been achieved. Recent reports indicate technical difficulties will postpone the Army's implementation date and that the Air Force, Navy, and Marine Corps all question the requirement that they adopt the current version of DIMHRS.

What is the status of DOD, and Service by Service, implementation of DIMHRS?

Answer. DIMHRS entered acquisition breach in January 2009. DIMHRS was certified by the Department for continued development of core requirements for each Service to develop as a separate system with a common data warehouse to capture information. The Department, the Services, and the Joint Staff are developing a business case and costing data for several courses of action on how to proceed with DIMHRS development.

Question. What is your current assessment of the need for, and feasibility of, an integrated, cross-Service personnel and pay system?

Answer. I believe the requirement to develop an integrated pay and personnel system is still valid. The need for cross-Service support has not diminished. I will continue to monitor the development efforts and provide advice as needed.

Question. If confirmed, what changes, if any, would you recommend to the implementation schedule and process currently in place?

Answer. Implementation schedules sometimes put unrealistic expectations for process completion ahead of providing a usable product. I would want to ensure the governance bodies of the DIMHRS implementation understand the value of balancing schedules with developing requirements of a viable DIMHRS product.

WOUNDED WARRIORS

Question. In congressional testimony on the fiscal year 2010 budget request, Admiral Mullen has stated that there is, "no higher duty for this Nation, or for those of us in leadership positions, than to care for those who sacrificed so much and who must now face lives forever changed by wounds both seen and unseen." The Chairman has taken an active role in advocating for services and support to the wounded and their families, including those suffering from post-traumatic stress disorder and other mental health conditions.

What is your assessment of the progress made to date by the Department and the Services to improve the care, management, and transition of seriously ill and injured servicemembers and their families?

Answer. We have made great strides since 2004 with respect to treating the seriously wounded. We have gone from having a situation where families had a hard time finding anyone to help manage their problems to a point where families complain that there are too many people and too many voices. We are in the midst of consolidating our many processes through coordinated efforts with our VA partners and the Senior Oversight Committee.

Question. What are the strengths upon which continued progress should be made?

Answer. I believe the greatest strength of the responses thus far has come from the involvement of senior leaders taking full ownership of the problem. At first look, people assumed this was a "medical" problem. Being wounded certainly requires medical care but it also requires personnel actions and transportation of families and pay actions and lots of other things that do not involve the skilled hands of doctors or nurses. The Chairman and I recognize the critical role of line leadership on this issue and every Service program we have today places line leaders in the center of the response.

DEFENSE READINESS REPORTING SYSTEM

Question. In June 2002, the Department issued a directive to replace the current readiness reporting system, yet that replacement is yet to be fully operational.

What challenges still remain in the transition from the Global Status of Resources and Training System (GSORTS) to the Defense Readiness Reporting System (DRRS)

and what is the plan to fully implement DRRS? Have any delays or obstacles been attributed to technological maturity or changing requirements?

Answer. To date, DRRS has developed a capability that enables reporting units to assess their designed and assigned mission readiness, articulated in terms of mission essential tasks. However, additional DRRS development and fielding challenges remain. Specifically, DRRS continues development efforts to replicate those readiness indicators that are migrating from legacy systems to DRRS. Additionally, current efforts are underway to ensure adequate tools are available for each of the Services to report GSORTS data directly into DRRS. Once developed, rigorous functional, interoperability, and operational testing will be necessary to ensure a seamless transition and integration with the Department's command and control systems. According to the DRRS Implementation Office's latest schedule, this testing will be complete in fiscal year 2011. When both capabilities-based MET assessments and resource-based GSORTS data are available in the DRRS we can move toward full implementation. I don't believe any delays or obstacles can be attributed to technological maturity of changing requirements.

Question. The Government Accountability Office (GAO) has reported that significant shortfalls remain in the implementation of DRRS, stability of requirements, adequacy of testing, and overall management and oversight of the program. What is your view on their findings?

Answer. Over the past 2 years, the Joint Staff has provided periodic updates on DRRS development. Those staff updates touched on some of the points you raise in your question. Though I have not read the draft GAO report firsthand, it is my sense that GAO's findings on DRRS are likely consistent with my staff updates. That said, we've added rigor to the DRRS governance process to improve the DRRS deliverables and timeliness, and will explore the report for additional program improvement recommendations.

Question. With respect to DRRS development and implementation, to what extent has the office of the Under Secretary of Defense for Personnel and Readiness worked or coordinated with the Director of Defense Research and Engineering and the Assistant Secretary of Defense (Networks and Information Integration)?

Answer. The DRRS Directive (7730.65) assigned USD(P&R) responsibilities for developing, fielding, and funding of the program. I don't have specific insight into the extent of which they have worked or coordinated outside of ASD(NII) participation as a member of the governance process established in fiscal year 2008.

AIR FORCE TACTICAL AVIATION

Question. General John Corley, USAF, Commander of the Air Force's Air Combat Command, has been quoted as saying, "In my opinion, a fleet of 187 F-22s puts execution of our current national military strategy at high risk in the near- to mid-term."

In your personal and professional opinion, does having a fleet of only 187 F-22s put execution of our current national military strategy at high risk in the near- to mid-term?

Answer. No. Overall, the operational risk of having the planned fleet of combat coded F-22s is acceptable. Strategically, it is important to develop proper capability and risk balance while continuing to maintain our technological edge. The Department is striving to have the right capability and risk balance established with our legacy aircraft, fifth generation capability, and unmanned aerial systems.

Question. Do you personally support the Secretary's decision to end production at 187 planned aircraft?

Answer. Yes.

Question. General Corley is also quoted as saying, "To my knowledge, there are no studies that demonstrate 187 F-22s are adequate to support our national military strategy."

Are there any studies or analyses supporting the decision by the Secretary of Defense to halt F-22 production at 187 aircraft?

Answer. Yes. OSD conducted a Joint Air Dominance Study that found the F-22 programmed buy of 187 aircraft was adequate to confront future opponents with robust air-to-air capabilities. The key insight from the analysis was the importance of providing the Air Force, Navy, and Marine Corps with fifth generation capabilities rather than concentrating fifth generation capabilities in one military Service. Additionally, the Joint Staff OA-08 study assessed the sufficiency/proficiency of the F-22 programmed buy. In OA-08, F-22 peak MCO and Steady State demands were found to be sufficiently covered with a total buy of 187.

Question. If there are no studies or analyses, what was the basis of the Secretary's decision?

Answer. Not applicable.

Question. If there are no studies or analyses, what is the basis of your personal and professional position on the appropriate size of the F-22 fleet?

Answer. Not applicable.

IRAQ

Question. What is your assessment of the current situation facing the United States in Iraq, particularly as the withdrawal from urban areas is completed?

Answer. We are on track as we execute a responsible drawdown from Iraq. U.S. and Iraqi officials continue to conduct joint engagements which enhance stability, promote reconstruction, improve transparency, advance regional engagements, and lay the foundation for a diversified, growing economy. We are gradually building the capability and capacity of the Iraqi security forces, and they are stepping into the lead. Our withdrawal from urban areas in Iraq, while continuing to provide training and advice to the Iraqi security forces, demonstrates our commitment to the Security Agreement, and promotes a sovereign, stable, and increasingly self-reliant Iraq. The security situation remains fragile, but Iraqi leaders across all political sects have shown their determination to avoid reverting back to ethno-sectarian violence to resolve disputes.

Question. What do you consider to be the most significant mistakes the United States made in Iraq? Which of these do you believe are still having an impact? Is there anything to be done now to mitigate such impact?

Answer. While I wouldn't refer to this as a mistake, I believe the United States was overly optimistic in gauging how quickly various Iraqi political sects would choose to seek political solutions to problems, rather than choosing violence. We did not anticipate that the collapse of the Saddam regime would lead to an insurgency, and we were slow to recognize the insurgency when it came. I also believe that no one in the U.S. Government could have envisioned just how badly Iraq's infrastructure and its economy had deteriorated. The lack of essential services, health care, viable employment, and internationally compliant law enforcement mechanisms all helped to fuel the insurgency in Iraq.

Our role is to increase the capacity of the Iraqi Government to deal with these issues effectively. Working with the Iraqis, we are effectively defeating insurgent elements attempting to destabilize Iraq. Both General Odierno and Ambassador Hill are heavily engaged in continuing the slow but steady progress. I feel our continued support to Iraq based on the security agreement and President's strategy is the right policy.

Question. What do you believe are the most important steps that the United States needs to take in Iraq to prepare for the end of the combat mission by the end of August 2010 and the withdrawal of all U.S. forces by the end of 2011?

Answer. Per the President's plan, we seek an Iraq that is sovereign, stable, and self-reliant; an Iraqi Government that is just, representative, and accountable; neither a safe haven for, nor sponsor of terrorism; integrated into the global economy; and a long-term partner contributing to regional peace and security. The United States must continue to focus efforts on those sectors most critical to achieving these objectives to solidify the hard-fought gains we have achieved thus far.

On the security front, we must continue to develop the capability and capacity of the Iraqi Ministries of Defense and Interior and assist the Iraqis in developing and fielding the logistics, fire support, intelligence, and other key enablers they will need to be successful in 2012 and beyond. We also need to continue the political reconciliation and economic progress that will be the true foundation of stability.

Question. What do you believe are the prospects for Iraqi political leaders to manage the changes associated with the U.S. withdrawal from urban areas?

Answer. I believe the prospects are good. The Iraqi security forces have continued to improve in their capabilities, and concurrently, the people of Iraq are more confident in the security conditions in their neighborhoods. If you had asked me just 1 year ago if we would see a provincial election cycle which was relatively violence free, which was judged to be credible and fair by the United Nations, and which all political parties in Iraq recognized as fair, I would have expressed serious doubts. While not without incident, all 14 provinces which held elections successfully seated their new provincial councils and governors. We will continue to assist the political leadership to continue their efforts toward reconciliation, and develop provincial governments which are efficient and representative of all the people.

Question. What do you believe are the most important steps that the United States needs to take in Iraq?

Answer. In the near-term, while we recognize that security has improved greatly in Iraq, there are significant milestones on the horizon that are critical steps in our

drawdown. Most notably, successful and legitimate national elections early next year and the subsequent seating of the new government is a critical step in our drawdown plan. Other critical steps to maintaining stability include the central government's capacity to govern effectively and provide essential services, continued GOI commitment to national reconciliation and accommodation (e.g., the Sons of Iraq program), and establishing a solid foundation for the rule of law.

Question. What is your assessment of the capability of Iraqi security forces today? What support in your view will the United States need to provide in the future and over what period of time?

Answer. I concur with General Odierno's assessment that based on current conditions, the ISF are ready to handle responsibilities for security in the cities and urban areas.

Operational readiness continues to improve for both the Ministry of Defense forces as well as the Ministry of Interior. With U.S. assistance in the development and fielding of key enablers, I believe the ISF will be capable of handling internal security, to include counter-insurgency operations, by the time U.S. forces depart in 2012.

Question. What considerations will be factored into a decision regarding whether (and if so, what kind and how much) U.S. military equipment currently in Iraq should be left behind for use by the Iraqi Army?

Answer. Any decision to leave U.S. military equipment currently in Iraq behind for use by the Iraqi security forces will be based a number of factors, including (but not limited to):

- Whether or not the particular item is essential to establishing the Iraqis' ability to defend against internal threats by December 2011.
- The ability to meet the particular requirement through more traditional military assistance mechanisms.
- Whether or not the equipment is deemed excess by the Service that owns it.
- The desire of the Iraqis to have the equipment.
- The ability of the Iraqis to maintain the equipment if it is provided to them.
- The replacement cost to the Services.
- The impact on Services' ability to reset and reposture the forces for current and future global commitments.
- The cost to return particular equipment to the United States and refurbish it compared to its fair market value and remaining useful life.
- Production lead times for new equipment.
- If no other options are feasible, whether or not specific items are so critical to Iraqi security forces' success that it is in the national interest of the United States to provided it to the Iraqis, even if the Services do not declare it as excess (I recognize that the authority for Secretary Gates to do this does not yet exist).

Question. As conventional forces are drawn down in Iraq, the requirement for Special Operations Forces is likely to remain the same or even increase, for the foreseeable future. Special Operations Forces, however, rely heavily on their conventional counterparts for many support and enabling functions including airlift, medical evacuation, resupply, and intelligence, surveillance, and reconnaissance.

What is being done to make sure Special Operations Forces in Iraq are being adequately supported as the drawdown progresses?

Answer. Special Operations Forces continue to play an important role in Iraq. The Joint Staff, Commander of CENTCOM, Commander of Special Operations Command, and Commanders in Iraq will ensure that Special Operations Forces are properly supported as conventional forces are drawn down in accordance with the security agreement and the President's direction. We have coordinated closely with the Iraqi Security Special Forces following the Security Agreement, and we anticipate this close working relationship will continue, to the mutual benefit of both our forces as well as the Government of Iraq. As we do so, we will carefully balance scarce enablers between Iraq and Afghanistan.

AFGHANISTAN

Question. In your view, what are the greatest challenges that U.S. forces face in implementing the administration's strategy for Afghanistan and Pakistan?

Answer. U.S. forces face numerous, complex, challenges in implementing the administration's strategy for Afghanistan and Pakistan: a resilient Taliban insurgency, increasing levels of violence, lack of governance capability, persistent corruption, lack of development in key areas, a porous border between Afghanistan and Paki-

stan, illicit narcotics, and malign influences from other countries. Taken together, these threats to regional stability increase the level of difficulty in implementing the administration's strategy. However, the potential reemergence of al Qaeda or other extremist safe havens in Afghanistan and Pakistan are critical threats to our national security and to our allies, which make it all the more important that the administration's strategy is supported and implemented.

Question. What is your assessment of the long-term prospects for Afghan military forces to effectively provide security throughout Afghanistan?

Answer. The Afghan National Security Forces (ANSF) today (approximately 90,000 Afghan National Army (ANA) and 82,000 Afghan National Police (ANP)) is not of sufficient size to provide long-term security and stability for the people of Afghanistan. I believe the current authorized ANSF force levels (134,000 ANA and 96,800 ANP) should be reviewed on a periodic basis to ensure they are sufficient to support the country-wide security needs.

Question. Do you believe that the current end strength targets of 134,000 for the ANA and 96,800 for the ANP are sufficient or should those end strength targets be increased?

Answer. I believe the current authorized ANSF force levels (134,000 ANA and 96,800 ANP) should be reviewed on a periodic basis to ensure they are sufficient to support the country-wide security needs.

There are two ongoing studies that will help inform our recommendations and decisions regarding the future size and capabilities of the ANSF. The European Community (EC) has commissioned a study, expected to be complete in mid-summer 2009, to assess the required capabilities of the Afghan National Police. The Secretary of Defense also directed a detailed analysis, led by CENTCOM and the Joint Staff, be conducted in order to help us make informed recommendations on options for future end-strength and capabilities for both the ANA and the ANP. This study with assessed courses-of-action is due back to the Secretary on July 29, 2009. If confirmed, I will use the results of both of these studies to make recommendations on the future size and capabilities of the ANSF.

Question. What in your view are the major challenges for accelerating the growth of the ANSF, and how would you recommend addressing these challenges, if confirmed?

Answer. The greatest international community challenge to accelerating the growth of the ANSF is the requirement for mentors for these forces. The greatest Afghan challenge is the development of leadership for the expanded force.

The President's decision in March to deploy the 4/82 Brigade Combat Team (BCT) to provide additional mentors for the ANSF will allow us to meet our ANA embedded training team requirements for the 134,000 Army and will significantly increase the number of ANP police mentor teams. U.S. Counterinsurgency BCTs are also assuming responsibility for police mentors in districts within their battlespace. We must continue to encourage our North Atlantic Treaty Organization (NATO) partners to provide these district mentors in order to build synergy for security within the battlespace and increase the number of districts with police mentor coverage. I also recommend encouraging NATO to use the proposed NTM-A as an opportunity to enhance its training and mentoring of the ANP.

Expanding the leadership capacity of the ANSF requires training and experience and both the ANA and ANP have leadership development programs in place. However, we must also recognize that leader development requires time and we must balance the pressing need for additional growth and progress in leadership with this reality in order to build forces that are self-sustaining over the long-term.

Question. What should be the role of the ANA in preventing cross-border attacks by extremist militants from Pakistan into Afghanistan?

Answer. The Afghan Border Police (ABP) have primary responsibility for border security. The ANA provides direct support and support in depth to the ABP. Operational Coordination Centers (OCCs) are currently being established at the regional and provincial levels to improve information sharing and synchronization of efforts.

Preventing all incursions is difficult due to the length and porous nature of the border. However, practical cooperation between Afghan, Pakistani, and international forces improves border security. Effective military operations along the Afghanistan-Pakistan border areas are key to disrupt and eventually deny safe havens to al Qaeda and the Taliban from which to launch these incursions.

ISAF and USFOR-A must continue to enhance the practical cooperation between ANSF, Pakistani military, and international forces and increase the effectiveness of our counterinsurgency operations. Border and Joint Coordination Centers, regular tripartite engagements at all levels, and counterinsurgency training of Afghan and Pakistani forces are key to these efforts.

Question. NATO has agreed to the establishment of a three-star command within the International Security Assistance Force (ISAF) command structure to oversee the day-to-day execution of the conflict.

What is your assessment of the current U.S. and ISAF command structures in Afghanistan and what changes, if any, do you support to those command structures?

Answer. General McChrystal has proposed a new combined and joint command that would direct the operations of the five regional commands. We are currently in the process of developing the proposed structure for this command with our NATO allies.

General McChrystal and his staff are conducting an initial assessment and his recommendations will more specifically address the proposed operational command and any other structural changes.

Question. Given the challenges that the topography of Afghanistan presents to operations, what are the unique challenges for which the United States needs new or modified equipment?

Answer. The varying topography in Afghanistan limits freedom of movement for U.S. and coalition forces throughout the country which in turn affects movement of personnel and logistical resupply. The current influx of Strykers and additional fixed and rotary-wing assets into Regional Command (RC) South will improve freedom of movement within RC South and southern portions of RCs East and West but will have a limited impact on logistical support.

The U.S. and coalition partners need a more robust capability to counter improvised explosive devices (IEDs). The employment of Mine Resistant Ambush Protected (MRAP) vehicles, uparmored Highly Mobile Multi Wheeled Vehicle (HWMV), equivalent uparmored vehicles, and Route Clearance companies will improve survivability against IED attacks but the limited terrain clearance and power on these vehicles also limits their capability to traverse rugged terrain. Additional armored vehicles and Route Clearance companies will improve the number of IED finds and personnel survivability during IED attacks.

The U.S. military is investing in improvements to air-delivery capabilities. Austere operating locations throughout Afghanistan do not support normal logistical resupply via surface or air movement. The United States needs an improved air-delivery capability and is accomplishing this by leveraging new technology on existing equipment in order to improve reliability and accuracy of fielded systems. Because of the topography, these improved systems are a critical requirement needed to meet the increasing logistical demands in Afghanistan.

Question. In your view are there adequate intelligence, surveillance, and reconnaissance (ISR) assets available to support requirements in Afghanistan?

Answer. It is our assessment that there are not enough ISR assets to support requirements in Afghanistan and those requirements are growing.

There is a growing requirement for manned and unmanned aerial assets in Afghanistan used to support the NSC strategy and COMISAF's priority intelligence requirements. When employed effectively, these ISR assets are a combat-multiplier for U.S. and allied forces and are able to cue additional platforms for precise intelligence collection. Additionally, the data collected by these systems requires a large amount of processing which must be shared among ISAF, NATO, and other partners including Afghanistan and Pakistan.

Question. What steps do you believe coalition forces and the international community need to take in the near-term to improve the lives of the Afghan people?

Answer. We need to reassure the people of Afghanistan that coalition forces and the international community are committed to helping them develop their country on a long-term basis. In the near-term, we are focused on providing security to the population which will allow us to progress in implementing development projects and building greater governance capacity in the long term.

Question. News reports indicate that Afghan resentment over civilian deaths resulting from U.S. counterterrorism operations and U.S. or NATO airstrikes continues to grow.

What steps, if any, do you believe ought to be undertaken to address the issue of civilian deaths in Afghanistan?

Answer. In addition to the tragic loss of life, I and all the leadership are acutely aware of the negative repercussions resulting from civilian casualties. Any time an innocent person is killed our mission becomes harder and our men and women in Afghanistan fully understand this. We have procedures in place which seek to make every effort possible to avoid civilian casualties because our purpose is to protect the population. However, we are fighting an enemy who conducts operations specifically designed to produce casualties that can be attributed to coalition forces. As such, General McChrystal, as part of his initial assessment, is reviewing all tactical directives as they relate to avoiding civilian casualties.

Question. From your perspective, what are the top lessons learned from our experience in Iraq and how would you apply these lessons in Afghanistan and future conflicts?

Answer. It is important to realize that each conflict is different and you must apply strategies based on the current fight as it relates to the situation on the ground. Having said that I believe one of the greatest lessons learned from Iraq that can be applied to all conflicts is the multi-faceted approach to problem solving and issue resolution. Bringing together the best and brightest from across the spectrum of military, U.S. Government agencies and departments, as well as the leaders of industry, provides for the whole-of-government approach that when applied in concert with each other is very effective and dynamic.

PAKISTAN

Question. Administration officials have said that “no improvement” is possible in Afghanistan without progress in Pakistan, or that you can’t succeed in Afghanistan without “solving” Pakistan.

What in your view is the linkage between progress in Afghanistan and developments in Pakistan? Do you agree that the United States should be cautious about tying Afghanistan’s future too closely to developments in Pakistan?

Answer. Afghanistan and Pakistan stability are inextricably linked as extremist threats transcend regional boundaries. The strategy we have for Afghanistan and Pakistan is regionally focused in recognition of the fact that what happens in one country affects the other. Clearly, addressing extremist safe havens and cross border activities into Afghanistan from Pakistan is essential to success in Afghanistan. While we continue to enhance our bilateral relationship with each country based on its own merits we cannot ignore the historical, geographic, and economic ties between the two countries or the current security situation by de-linking Afghanistan’s future from developments in Pakistan.

Question. What is your assessment of Pakistan’s commitment to confront the threat posed by al Qaeda, the Taliban, and other militant extremists in its western territory?

Answer. Pakistan’s leaders recognize that extremist groups pose a great threat to Pakistan’s national security. However, Pakistan must take sustained action, including engaging extremist groups within its borders and following operations with humanitarian assistance, in order to mitigate this threat. Recent operations in the North West Frontier Province are a promising start, and we are watching closely to see whether these operations are sustained and continued effectively into other extremist areas in western Pakistan. U.S. leaders engage regularly with the Government of Pakistan to convey both our concern about these threats and our political support and we are augmenting their efforts through military and economic assistance.

Question. Do you agree that in order for U.S. military assistance to Pakistan to be effective, Pakistan’s leadership must make it clear to the Pakistani people that confronting the threat posed by al Qaeda, the Taliban, and other militant extremists is essential for the sake of Pakistan’s own security interests?

Answer. Indications from Pakistan senior leadership and outside observers are that Pakistan’s military operations along the border currently have support of the Pakistani population as the Pakistani people are becoming increasingly aware of the threat posed by militant extremists. Clearly, it is important for the Government of Pakistan and the Pakistan military to have support of the population for these operations, and without it U.S. military assistance could not be as effectively employed. We also understand that the population needs to see a whole-of-government approach to the problems Pakistan faces or support for the government and military operations could erode. Our broad assistance efforts support this by not only improving Pakistan’s military/security capabilities, but also assisting the Government of Pakistan to improve education, agriculture, job creation and long-term economic development, as well as governance, in order to improve the lives of the Pakistani people.

Question. The Intelligence Community assesses that Pakistan’s Federally Administered Tribal Areas along the border with Afghanistan provide a safe haven for al Qaeda and other extremists supporting the Taliban led insurgency in Afghanistan.

In your view, should the Pakistan Government be doing more to prevent these cross border incursions, particularly across the border between Baluchistan, Pakistan, and Kandahar Afghanistan?

Answer. The Pakistan Government and security forces face many challenges along the border including rugged terrain and isolated regions, lack of capacity and capability for conducting counterinsurgency and border operations, as well as a popu-

lation in this region that has historically been autonomous and independent from central rule. U.S. senior military and government leadership continually engage with Pakistani counterparts on the importance of preventing cross-border activities and on ways that U.S./coalition, Afghanistan, and Pakistan can work together to improve border security. We have seen improvements in this cooperation though we have not yet achieved the level of effectiveness we need to reduce extremists' abilities to cross into Afghanistan and conduct operations.

Question. What is your assessment of the current level of cooperation between Afghanistan and Pakistan in confronting the threat of militant extremists in the border region?

Answer. The relationship between the Governments of Afghanistan and Pakistan has improved significantly from just a few years ago and the leadership of both countries continues to engage in discussion and broadening the relationship and cooperation. This cooperation also occurs at the lower levels through border coordination and other activities to meet the extremist threats in the border region. There is more that can be done and the United States continually works to facilitate and improve the cooperation between these two countries and with the coalition on the Afghanistan side of the border.

JOINT IMPROVISED EXPLOSIVE DEVICE DEFEAT ORGANIZATION

Question. The Department has taken inconsistent positions on the disposition of ad hoc, but critical, entities created to respond to the urgent needs of combat forces in Iraq and Afghanistan. The Secretary of Defense has recently stated in testimony before the Senate Appropriations Committee, Subcommittee on Defense, that the ISR task force should be phased out, while at the same time, the Department has decided to institutionalize Joint Improvised Explosive Device Defeat Organization (JIEDDO). Some have expressed concern about the possible hasty demise of the ISR task force, and others have expressed concern about the premature decision to make JIEDDO permanent. While the JIEDDO reports to the Deputy Secretary of Defense, the Office of the Joint Chiefs of Staff plays an active role in reviewing and validating urgent operational needs emerging from Iraq and Afghanistan.

What are your views of JIEDDO and its role within the Department and within the Department's process for responding to urgent operational needs?

Answer. The JIEDDO is effective in its mission to lead, advocate, and coordinate the Department's C-IED efforts in support of combatant commanders. They are a highly valued capability that continues to demonstrate the agility to respond quickly to urgent operational needs by providing essential material and nonmaterial solutions to counter known, newly deployed, and emerging IED threats.

Question. What are your views of the criteria the Department is using to determine which institutions should become permanent and which should not, and to demonstrate how these criteria are being consistently applied across organizations?

Answer. Organizations are often created in response to shortfalls identified by combatant commanders. There are several venues, including Senior Warfighter Forums and Deputies Advisory Working Groups (DAWG), to review and make recommendations to the Department leadership as to whether an organization should become permanent. In the case of JIEDDO, the C-IED SWarF and the DAWG concluded that the nature of the IED threat and continued combatant commanders' need for rapid solutions necessitated an enduring organization with the agility to rapidly respond to changing urgent operational needs. I will recommend the ISR Task Force be included until such time as warfighter needs can be met by such programs.

COUNTERNARCOTICS

Question. Recently, senior U.S. Government officials have indicated that the United States will begin to increase alternative crop development, public information, and interdiction programs, rather than continuing or expanding ongoing eradication efforts. This has been viewed as a u-turn of the U.S. counternarcotics strategy in Afghanistan and has been greeted with skepticism from some senior Afghan officials.

What is your view of this ongoing change in strategy?

Answer. I understand the U.S. Government's intent to rebalance its counternarcotics strategy and I support this effort because I don't think that crop eradication alone is the right approach. I believe we need a multi-pronged approach that targets laboratories, traffickers and movement of drugs, and facilitators at the same time we work to provide alternative income opportunities for farmers.

Question. What is your assessment of the eradication policy the United States has pursued in recent years?

Answer. The efforts of the U.S. Government to support and fund the Afghan Government's eradication efforts have shown little success. The funding and energy for eradication programs should be redistributed to other counternarcotics activities that have proven far more successful such as interdiction, public information, and alternative development.

Question. Do you believe that this shift in policy is adequately resourced?

Answer. If the resources dedicated to the elimination pillar of the U.S. counternarcotics strategy were redistributed to interdiction, rule of law, public information, and alternative development this would be a step in the right direction. However, General McChrystal is currently conducting an initial assessment for the Secretary of Defense, and I would defer to the outcome of his assessment to determine if the shift in counternarcotics policy is adequately resourced.

Question. What role do you believe DOD will play in each component of the new strategy?

Answer. The same roles will be played by DOD in the four pillars that do not involve poppy elimination: public information, interdiction, alternative development, and rule of law. DOD currently supports the poppy elimination pillar through the development, training, and deployment of the Counternarcotics Infantry Kandak (CNIK), and provides in-extremis support to poppy eradication activities when insurgents use violence to react to eradication missions. If U.S. Government support to Afghan Government eradication activities ends, the CNIK will be reintegrated into the ANA and in-extremis support to Afghan Government eradication efforts will have to be reviewed on its contribution to the counterinsurgency mission.

A nexus exists between narcotics and the insurgency as well as corruption and criminality. Recent decisions by the NATO Defense Ministers and the Secretary of Defense, at the request of the Afghan Government, provided the guidance and authorities for both ISAF forces and the U.S. military to target the trafficking and production of narcotics where the nexus exists. Additionally, the recent change to DOD's international counternarcotics policy enabled more robust support and integration of capabilities with civilian law enforcement agencies operating in Afghanistan.

COUNTERDRUG OPERATIONS

Question. DOD expends more than \$1 billion per year in the fight against illegal narcotics trafficking. For much of the last 2 decades, the fight against illegal narcotics has taken place within the Western Hemisphere, but in recent years, counternarcotics operations have expanded to Afghanistan, West Africa, and Asia. U.S. commanders in Afghanistan have identified success against narcotics traffickers as fundamental to the success of their mission to root out the Taliban and al Qaeda. Despite this expanding focus to other parts of the globe and the focus of U.S. commanders in Afghanistan, the Department often views counternarcotics operations as the job of Federal law enforcement agencies.

Please discuss your views of the DOD's counternarcotics mission and the tension that exists within the Department about the proper role of the military.

Answer. DOD is the lead Federal agency for the detection and monitoring of aerial and maritime transit of illegal drugs into the United States (title 10, U.S.C. 124). We play a valuable role in support of the counterdrug activities of Federal, State, local, and international partner law enforcement agencies through entities such as Joint Task Force-North, a component of U.S. Northern Command located in El Paso, TX; Joint Interagency Task Force-South located in Key West, FL; Joint Interagency Task Force-West located in Hawaii. DOD is a full partner in numerous interagency counterdrug and intelligence and operational "fusion centers" located throughout the country including the El Paso Intelligence Center and the Office of National Drug Control Policy's High Intensity Drug Trafficking Areas. In addition, DOD supports 54 State and territorial counterdrug task forces through the National Guard's Counterdrug Governors State Plans (32 U.S.C. 112). The focus of these 2,600 National Guard soldiers and airmen is to leverage DOD resources and unique capabilities and to act as catalysts to better coordinate State and local law enforcement efforts with those of the Federal Government in attacking both the supply and demand for illicit drugs in our Homeland.

I do not believe there is tension within the Department about the proper role of the military. DOD has a responsibility to ensure our military members support interagency activities that adhere to constitutional and legal restrictions, add measurable value to our whole-of-government counterdrug efforts, and enhance the readiness of our military and civilian members.

COLOMBIA

Question. What changes, if any, would you recommend for the role of the U.S. military in Colombia?

Our relationship is maturing from patron to partner, and Colombian gains against illegally armed groups approach “irreversibility” (the point at which illegally armed groups are controllable by the police rather than the Armed Forces). Nonetheless, I would not, at this time, recommend a role change for the U.S. military in Colombia. Rather, we must continue to vigorously apply U.S. resources, to include high demand/low density assets that fill critical capability gaps, while further enabling the development of military institutions that will strengthen a nascent strategic partner. DOD’s security assistance effort will remain completely synchronized with the U.S. Ambassador’s Colombia Strategic Development Initiative.

What is your assessment of the progress achieved by the Colombian armed forces in confronting the threat of narcoterrorism?

Answer. The Colombian armed forces successes against narco-terrorists under the Uribe Administration are unquestionably significant, with tens of thousands of paramilitaries demobilized, the National Liberation Army no longer a relevant threat, and the Revolutionary Armed Forces of Colombia reduced by nearly 50 percent. However, although approaching the tipping point of “irreversibility,” more progress is required. Our security assistance must not stop at the 10-yard line, but rather ensure the Colombians cross the proverbial goal line.

IRAN

Question. What options do you believe are available to the United States to counter Iran’s growing influence in the Middle East region?

Answer. Clearly, Iran an important, yet troubling, regional actors with regard to Iraq, Afghanistan, Lebanon, Gaza, and the remainder of the broader Middle East region. We fully support the administration’s current approach of attempting to initiate engagement with Iran, essentially offering an unclenched fist. Should Iran choose to not accept these overtures, I believe it will be necessary to deliberately increase pressure in a carefully executed progression that includes a broad spectrum of partners. I also believe that our efforts at engagement only increase the likelihood that our partners will increase their pressure in concert. This increased pressure must begin with diplomatic and economic initiatives with regard to Iran, to include U.N. actions (both sanctions and financial measures), regional initiatives, and other forms of international pressure.

We also fully support the Department of State’s Gulf Security Dialogue (GSD) initiative to reassure our regional partners, including military aspects such as capacity building, border security, missile defense, and proliferation security initiatives. The GSD seeks to reassure our regional partners of U.S. commitment, change Iran’s strategic calculus, and stop Iranian nuclear proliferation and sponsorship of terrorist organizations. The GSD seeks to bolster the capabilities of our regional partners (with the United States and others) to deter and defend against conventional and unconventional threats. It includes arms sales and other forms of assistance to include improving port security and protecting the key energy infrastructure of our regional partners and allies.

Question. Do you believe that a protracted deployment of U.S. troops in Iraq or Afghanistan could strengthen Iran’s influence in the region?

Answer. The size and duration of U.S. and coalition force deployments are dependent on a number of factors, principally focused on the progress of security, development, and governance within those two countries. Moreover, we have clear guidance on conducting a responsible drawdown from Iraq, which is executing on time. While our presence in Iraq and Afghanistan is not oriented towards Iran, the surest way to ensure Iran’s influence in the region is measured and positive is to enable capable and confident states within the entire region, including Iraq and Afghanistan.

Question. In your view, does Iran pose a near-term threat to the United States by way of either its missile program or its nuclear program?

Answer. Open source reporting indicates that the U.S. Government does not expect Iran to have a nuclear weapons capability until mid to next decade (2010 to 2015). Open source reporting indicates that Israel assesses that Iran could have a weapon by late 2009. Iran does have the capability with their arsenal of short-, medium-, and intermediate-range ballistic missiles to threaten U.S. friends and allies in the region. Their multiple recent weapons tests and successful launch of a satellite earlier this year are indications of their advances in missile technology.

While these programs will not threaten the Homeland in the near-term, acquisition of nuclear weapons and missile delivery capabilities will embolden Iran to fur-

ther threaten U.S. and partner interests in the region. These threats include Iranian use of proxies in Afghanistan, Lebanon, Palestinian territories, on the African continent, and even in the tri-border region of South America for example. Ultimately, these capabilities could directly threaten the United States.

Question. If you believe either of these programs pose a near-term threat, what in your view are the best ways to address such a threat?

Answer. As I stated earlier, we want to continue to support the current diplomatic initiatives with regard to Iran, to include U.N. actions, regional initiatives, financial measures, and other international pressure. We encourage Iran to fulfill its responsibility with regard to international agreements to the Nonproliferation Treaty and the additional protocol. (Background: The Nonproliferation Treaty is an international treaty signed in 1968 to limit the spread of nuclear weapons. Iran is a signatory.)

Question. Other than nuclear or missile programs, what are your concerns, if any, about Iran?

Answer. Malicious Iranian activities throughout the region include the use of proxies to extend Iranian influence into sovereign nations by providing weapons, technology, training, and finance. We are concerned Iran's activities will negatively impact stability and potentially impact the regional economy. It is important to maintain and strengthen our relationships with our regional partners and allies by continuing to build their security capacity. We will continue to work in close coordination with all applicable U.S. Government departments to ensure our policies toward Iran assume a regional approach.

Question. What concerns, if any, does the election related unrest in Iran raise from a military perspective?

Answer. We are concerned that the growing strength of Iran's Islamic Revolutionary Guard Corps over Iranian politics will result in the militarization of Iranian foreign policy. Nonetheless, we do not project any significant changes to Iran's overall foreign policy objectives. However, should the political unrest continue, it is possible that Iran could attempt to create an incident or other crisis that would draw its population's attention away from internal strife and towards a perceived common threat. Our forces are acutely sensitive to the need to avoid such an incident or crisis.

STRATEGIC COMMUNICATIONS

Question. Over the past few years, DOD has funded a growing number of counterterrorism and counterradicalization strategic communications programs. DOD does not have a separate budget outlining its strategic communication activities, but the GAO reports that DOD "spent hundreds of millions of dollars each year" to support its information operations outreach activities, including recent initiatives funded by the JIEDDO and geographic COCOMs. Many of these ongoing programs are in support of operations in Iraq and Afghanistan, but Military Information Support Teams from United States Special Operations Command are also deploying to United States embassies in countries of particular interest around the globe to bolster the efforts of the Department of State and the U.S. Agency for International Development (USAID).

What are your views on DOD's strategic communications role and its integration into overall U.S. foreign policy objectives?

Answer. Strategic communication—the process of orchestrating our actions, images, and words to achieve U.S. objectives—is a critical component of DOD's activities in support of national security. However, the Department of State is the designated lead for U.S. Government strategic communication efforts, and in conjunction with the National Security Council, identifies the key national objectives for strategic communication engagement. DOD strategic communications efforts support these national priorities. We believe they have been particularly effective in Iraq, and we are determined to improve our efforts in Afghanistan. It's my view that U.S. foreign policy goals are best accomplished through whole-of-government efforts focused on engaging and listening to target audiences, then acting and communicating those actions in a manner that promotes our shared interests with the world. Strategic communication is vital in ensuring that our Department's activities support these higher-level policy objectives.

Question. What is your view of the apparently expanded role of the U.S. military in supporting U.S. strategic communications programs led by the State Department and the USAID in countries other than Iraq and Afghanistan?

Answer. I believe this is a good news story that highlights our emphasis on security, diplomacy, and development. DOD has a long history of providing support to the Department of State and USAID programs worldwide and will continue to sup-

port country teams and the interagency wherever and whenever appropriate. I'm satisfied with the expanded role but need to emphasize that a whole-of-government approach is required for the programs that we support and DOD's resources are not limitless. Nevertheless, we do have significant resources and capabilities which reinforce and enhance State's and USAID's efforts. These resources and capabilities, together with the personnel who have the skill sets, are critical to our programs led by the State Department and USAID as part of the national strategic objectives for any particular country or region.

U.S. RELATIONS WITH RUSSIA

Question. U.S. relations with Russia, although strained over a variety of issues, have recently improved in some areas. If confirmed, do you believe that there are any opportunities to improve relations through military-to-military programs, or other actions that you would recommend be taken?

Answer. President Obama is establishing a positive working relationship with Russian President Medvedev, which contributes immensely toward resetting our relations with Russia. This will afford us excellent opportunities to make headway in the realm of military cooperation. Both sides realize that the military-to-military relationship is a pivotal and stabilizing element to the broader bilateral security relationship. CJCS and the Russian Chief of Defense signed a Military Work Plan during the 6-7 July Presidential Summit in Moscow which contains events that will allow us to construct a more robust working relationship. We have agreed with our Russian counterparts to focus our exercise and training Work Plan on areas of cooperation to include counterpiracy operations, combating terrorism, missile defense, search and rescue, and maintaining peace in unstable regions. In addition, we seek to establish direct counterpart relationships between the Joint Staff and Russian General Staff that can facilitate issue mitigation.

Question. You have testified before this committee and spoken on the potential for missile defense cooperation with Russia. What are the first steps that could be taken in this area?

Answer. I believe there is great potential to cooperate with Russia on missile defense. I would not want to speculate at this time on what specific cooperative programs our countries could develop, as we currently have an internal governmental review on missile defense underway and our consultations with the Russians are in the developmental stage. I can envision that opportunities to cooperate on missile defense could begin with more detailed transparency, information exchanges, and exercises.

Over the past 3 months, the United States and Russia have discussed opportunities to increase transparency through the exchange of ballistic missile warning information. The Joint Data Exchange Center (JDEC) was conceived as a way for both countries to work together to reduce risk of a false attack warning. A JDEC Memorandum of Agreement, originally signed in June 2000 by former Presidents Clinton and Putin, pledged to establish a joint operations center to be manned by both Russian and U.S. officers.

In May of this year, Ambassador Steve Mull led a U.S. delegation to Moscow and expressed our desire to implement the JDEC agreement as an important step towards greater cooperation. We are hopeful the final details will be addressed between our two nations within the coming months so we can move forward.

Continuation of exercises such as the U.S.-Russian Missile Defense Cooperation Program would be a reasonable expectation, though I do not expect that it would resume this year. This program began in 1996 and has resulted in six major U.S.-Russian Federation exercises being conducted during the last 12 years in both the United States and in Russia. Since U.S. and Russian Federation experts last met in July 2007, the U.S. delegation has also continued to work on developing a U.S.-Russian Federation wargame to be hosted in the United States. This wargame was developed with the concept of working issues related to a simulated U.N. agreement to support a friendly nation under missile threat from a neighboring possible hostile country. The wargame was for U.S. and Russian Federation forces to work the deployment, employment, and sustainment of their missile defense forces in this simulated theater. Such cooperative projects have proven to be very constructive to our mutual security objectives and could represent the initial stages of what could be done.

Question. In your view, what are the specific actions that could be taken in other areas such as space and where would additional cooperation be beneficial?

Answer. DOD has worked closely with the State Department to engage the Russian Federation in the United Nations Committee on the Peaceful Uses of Outer Space (COPUOS). Efforts focus on initiatives we term "Transparency and Con-

fidence Building Measures” or TCBMs. TCBMs attempt to preserve the space environment and ensure safe and responsible operations for the benefit of all space-faring nations. With Russian support, an agreement was reached within the past few years in the COPUOS on “Space Debris Mitigation Guidelines”. These voluntary measures will reduce the amount of debris created by newly launched satellites and boosters, significantly increasing space flight safety.

The United States and Russia have also been engaged in cooperative civil space applications in human and robotic space flight, space science, space applications and technologies, and the monitoring of the global environment. Cooperation between the Russian Federal Space Agency and NASA is especially close with regard to the resupply, operations, and maintenance of the International Space Station. This cooperation will become even more critical in the coming years with the stand-down of the shuttle fleet.

As we move forward, the Department continues to explore opportunities for cooperation in space. This issue is a specific focus area to be addressed as part of the congressionally-directed Space Posture Review.

Question. Recent NATO exercises in Georgia and upcoming Russian regional exercises have continued the high level of tension. In your view, what steps should the U.S. military take to train and supply Georgia, without further escalating tensions between Georgia and Russia?

Answer. Like Russia, the United States engages in military exercises and security cooperation with a broad range of allies and partners in order to enhance our abilities to cooperate in operational missions and to support their aspirations to become contributing members to Euro-Atlantic security. These are also necessary and prudent courses of action to address the myriad security challenges we and our allies face in the foreseeable future. That said, we are committed to regional peace and stability and will continue to emphasize transparency and enhanced communication in our military cooperation efforts with both Russia and Georgia. We are also grateful that Georgia has offered to participate in the International Assistance Force in Afghanistan.

BUILDING PARTNER CAPACITY

Question. In the past few years, Congress has provided DOD a number of temporary authorities to provide security assistance to partner nations. These include the global train and equip authority (section 1206) and the security and stabilization assistance authority (section 1207).

What should be our strategic objectives in building the capacities of partner nations?

Answer. Building foreign partner capacity is fundamental to our security strategy and will remain so for decades. Its most immediate impact is to enable many of our partners to counter extremist groups that threaten their stability and that may present a direct threat to the United States. It is critical to support and enable our partnerships with other U.S. Government agencies and key allies and friends abroad in order to improve policy, planning, and execution of national and homeland security missions. It also reinforces with our partners the notion of civilian control of the military.

Question. What is your assessment of these temporary capacity-building authorities, in particular section 1206 and section 1207?

Answer. We are grateful for these authorities, and there are countless examples of their effectiveness. Although created in response to particular contingencies, these programs have proven useful in putting the U.S. Government on a stronger, more flexible security footing. They remain an absolutely vital tool cited by combatant commanders, and I hear repeatedly from them how important dependable authority and funding is for them to be able to adequately plan their theater security cooperation activities. Specifically these authorities:

- Save lives and reduce stress on our forces by helping partners solve problems before they become crises requiring U.S. military interventions.
- Create networks of partners. The United States does not have sufficient military forces to deny terrorists sanctuary everywhere in the world; nor will we ever. So we must rely on partners; help build their capacity; and help create networks of partners working together to counterterrorism. It takes networks to defeat networks.
- Capitalize on partner capabilities. If properly trained and equipped, foreign forces can be more effective than U.S. forces because they know the language, politics, and human terrain.

- Reduce U.S. footprint. Large U.S. military footprints abroad can be used by the enemy as a recruiting tool. Capable foreign forces can alleviate large U.S. footprints.
- Reduce terrorist capability. The United States is at peace with many countries where terrorists enjoy sanctuary, so we must work with and through them to reduce terrorist capability.

Question. What should be the relationship of the global train and equip authority to other security assistance authorities, such as DOD counternarcotics assistance and State Department foreign assistance and foreign military financing?

Answer. The authorities mentioned above all contribute to national security through building partner capacity, each with its own unique benefits and applications. We fully intend to apply these programs as designed.

Secretary Gates has been a strong and vocal proponent of DOD's authorities for building partnership capacity. Because Congress requires the Secretary of State and Secretary of Defense to jointly formulate and implement projects, both 1206 and 1207 have served as instruments of interagency cooperation—bringing State, USAID, and DOD together in applying a strategic, “3D” lens to country assistance. The different perspective each organization brings helps the U.S. Government look at country assistance holistically and place country-specific requirements in a broader regional and global context. As such, I see an enduring need for a flexible, responsive program that requires all “3Ds” to craft innovative country assistance programs designed to prevent or respond to crises.

INTEGRATION OF SPACE PROGRAMS

Question. What is your view on the need to institute a more integrated approach to both the military and intelligence sides of the space community?

Answer. I agree strongly with the need to integrate military and intelligence space capabilities. Members of both communities participate in a number of joint bodies; we are jointly developing programs, and at senior levels have very integral relationships. However, when the needs of either diverge to the extent that solutions impose impractical cost on the government, consideration should be given to potential independent complimentary solutions.

Question. The Air Force is also working on space programs with civilian agencies and there may be the opportunity or the need for additional cooperative programs. The National Polar-orbiting Operational Environmental Satellite System (NPOESS) program is the subject of a very critical review that fundamentally questions whether cooperation is workable.

What are your views on the future of interagency space programs?

Answer. I support interagency space programs as we continue to look for efficiencies. We must be pragmatic about finding common ground that will allow all stakeholders to affordably reach a good enough solution.

SPACE PROGRAM MANAGEMENT

Question. In many instances the military and intelligence space programs have experienced technical, budget, and schedule difficulties. In some instances these difficulties can be traced to problems with establishing realistic, clear, requirements and then maintaining control over the integrity of the requirements once established.

How in your view can or should the space systems requirements process be improved?

Answer. While encouraged by the improvements that have been made to space system requirements and acquisition process over the last several years, the space systems requirement process could be further improved with additional collaboration and coordination between the JROC and the DNI's Intelligence Resources Board. This would result in increased vigilance and scrutiny of the space requirements process. Additionally, where appropriate, adoption of commercial practices could help reduce the requirements approval time.

Question. In many circumstances space programs take many years from conception to launch. The result is that the technology in the satellites is significantly outdated by the time the satellites are launched and operational, which in turn, can lead to a decision to terminate a program early, and look to a newer technology. This vicious cycle results in significantly increased costs for space systems as sunk costs are never fully amortized.

How in your view can this cycle be addressed?

Answer. This cycle can be addressed by reducing the complexity of spacecraft and lift vehicles, designing smaller, lighter single-purpose satellites rather than complex multi-purpose satellites which must be suboptimized to perform a variety of mis-

sions, by adopting commercial practices to streamline the design and manufacturing process and by pursuing a “block build” strategy that allows for infusion of new technology as programs progress.

OPERATIONALLY RESPONSIVE SPACE

Question. Do you support the concept of operationally responsive small satellites and what do you see as the most promising opportunities for small satellites?

Answer. Yes. The concept can rapidly provide space capabilities to the emergent or near-term needs of the warfighter in a rapidly changing environment. This will enable the warfighter to integrate space capabilities when and where needed to produce the desired effect.

PROMPT GLOBAL STRIKE

Question. As Commander, U.S. Strategic Command, you made development of a conventional, non-nuclear, prompt global strike capability a priority, and you have carried that priority into your current position.

What is your vision of the capability that should be developed for prompt global strike and the types of targets that would underpin the need to develop the capability?

Answer. The capability should be one that provides for prompt execution, precise targeting, lethal conventional effects, and sufficient range to hold time-sensitive or inaccessible targets at risk, from U.S. operating locations. Prompt global strike should also serve as an alternative to comparable nuclear weapons, particularly where the use of nuclear weapons would be inappropriate.

CURRENT NUCLEAR WEAPONS STOCKPILE

Question. In your view is the current nuclear weapons stockpile safe, secure, and reliable?

Answer. Yes. As part of the 2008 annual report to the President on stockpile assessments, the directors of the national laboratories and the Commander, U.S. Strategic Command reported on the safety, reliability, performance, and military effectiveness of the nuclear weapons stockpile. They are confident the nuclear stockpile is not only safe but will perform as intended. I share their opinion, however we must now begin the investment necessary to ensure the same levels of safety, security, and reliability in the future.

Question. As Commander of U.S. Strategic Command, and now as a member of the Nuclear Weapons Council, you work closely with the National Nuclear Security Administration and its stockpile stewardship program.

What, in your view, are the longer-term stockpile stewardship goals and what are the key elements that should be addressed from a DOD perspective?

Answer. Without a doubt, the key to sustaining our nuclear weapons capabilities is to gradually replace our existing legacy warheads with modernized warheads of comparable capability with greater safety, security, and reliability. Additionally, modernized warheads should be less sensitive to manufacturing tolerances or to aging of materials. To do this, we must begin now to transform the supporting nuclear weapons research, development, and manufacturing infrastructure.

Question. In your view, is the stockpile stewardship program providing the tools to ensure the safety, reliability, and security of the nuclear weapons stockpile without testing, and if not, what tools are needed?

Answer. To date, the stockpile stewardship activities have enabled us to maintain a safe, reliable, and secure stockpile without testing. However, confidence in the overall reliability and military effectiveness of the nuclear stockpile continues to decline due to aging, the accumulated effects of weapon changes, and discoveries of various anomalies in the weapons. As I stated earlier, we need to invest in modernizing both our infrastructure and the stockpile. Consistent with the recommendation from the Strategic Posture Commission, we can best manage risk in ensuring the surety of the stockpile for the future by applying a spectrum of options that includes warhead refurbishment, warhead component reuse, and warhead replacement. Refurbishment alone remains an important near-term option but is insufficient to manage our long-term risk. While a mid-term reuse strategy can enable limited improvements in reliability and surety, replacement allows for the greatest flexibility in achieving the required reliability and surety characteristics for the future. However, we must have a fully responsive research, development, and production complex that allows warhead replacement in order to achieve these surety and reliability gains.

REDUCTIONS IN NUCLEAR WEAPONS

Question. The President has made a commitment with Russian President Medvedev to bilaterally reduce the number of operationally deployed nuclear warheads.

Do you believe reductions in the total number of warheads, both reserve and operationally deployed, are feasible?

Answer. The United States has made a commitment to reduce nuclear weapons and their role in our national security strategy, and to strengthen our nonproliferation treaties. The military supports these commitments. So long as DOD and DOE are able to take the necessary actions to ensure that the nuclear arsenal we keep remains safe, secure, and effective, then reductions are possible within mutually agreed limitations.

Question. Do you believe reductions in the total number of START accountable delivery systems could also be reduced in a bilateral context?

Answer. Yes.

Question. If your answer to the two questions above is yes, how should capabilities and requirements be evaluated to identify which warheads and delivery systems could be retired and dismantled?

Answer. The NPR is currently underway and will analyze and make recommendations to senior leaders as to the appropriate nuclear weapons mix and force structure necessary to carry out the nuclear mission within our national security strategy.

As directed by Congress, the NPR is a comprehensive review of:

- (1) The role of nuclear forces in U.S. military strategy, planning, and programming.
- (2) The policy requirements and objectives for the United States to maintain a safe, reliable, and credible nuclear deterrence posture.
- (3) The relationship among U.S. nuclear deterrence policy, targeting strategy, and arms control objectives.
- (4) The role that missile defense capabilities and conventional strike forces play in determining the role and size of nuclear forces.
- (5) The levels and composition of the nuclear delivery systems that will be required for implementing the U.S. national and military strategy, including any plans for replacing or modifying existing systems.
- (6) The nuclear weapons complex that will be required for implementing the U.S. national and military strategy, including any plans to modernize or modify the complex.
- (7) The active and inactive nuclear weapons stockpile that will be required for implementing the U.S. national and military strategy, including any plans for replacing or modifying the warheads.

UNITED NATIONS CONVENTION ON THE LAW OF THE SEA

Question. Do you support U.S. accession to the United Nations Convention on the Law of the Sea?

Answer. I strongly support the U.S. accession to the United Nations Convention on Law of the Sea. The United States is the only permanent member of the U.N. Security Council and the only Arctic nation not a party to the Convention. With 157 nations party to the Convention, we are one of very few non-party nations, together with North Korea, Iran, Syria, and Venezuela.

The Convention codifies navigational rights and freedoms that are essential to the global mobility of U.S. Armed Forces and the sustainment of combat forces overseas. Moreover, the Convention codifies the right of warships to seize pirates and pirate vessels, the right of warships to approach and visit commercial vessels, the right to lay and maintain submarine cables (such as internet cables) on foreign continental shelves, and the sovereign immunity of warships and public vessels. Joining the Convention now allows us to "lock in" these rights and freedoms and puts us in the best position to protect them against encroachment from foreign coastal states.

Question. How would you answer the critics of the Convention who assert that accession is not in the national security interests of the United States?

Answer. Our nonparty status is currently having a negative impact on the national security interests of the United States. It creates a seam in combined operations, denies us a "seat at the table" when the parties interpret or seek to amend the Convention, and requires us to rely on customary international law as the legal basis for our activities in and above the maritime domain. It is adversely affecting our ability to expand the Proliferation Security Initiative, and our ability to effectively counter the People's Republic of China's sea denial strategy in the East and South

China Seas, which is based on a distorted interpretation of the Convention. In contrast, accession to the Convention, the bedrock legal instrument for maintaining order in the maritime domain, will support our security strategy of building and sustaining a coalition of nations dedicated to the rule of law. Nothing in the Convention undermines our ability to conduct military operations; rather, the provisions of the Convention reinforce our international mobility, operational flexibility, and optimize the protection of our national security interests.

TREATMENT OF DETAINEES

Question. The Constitution, laws, and treaty obligations of the United States prohibit the torture or cruel, inhuman, or degrading treatment or punishment of persons held in U.S. custody.

If confirmed, will you take steps to ensure that all relevant DOD directives, regulations, policies, practices, and procedures applicable to U.S. forces fully comply with the requirements of section 1403 and with Common Article 3 of the Geneva Conventions?

Answer. Yes, I will. The U.S. military is firmly committed to the proper safeguarding and care of detainees in our custody. We will ensure that our policies, practices, and procedures are in accordance with domestic law and our obligations under international law and the Geneva Conventions.

Question. Do you support the standards for detainee treatment specified in the Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the DOD Detainee Program, dated September 5, 2006?

Answer. Yes. I do support the standards outlined in the documents you quote and I will ensure that we continue to operate a safe, humane, legal, transparent, and professional enemy combatant detention operation that adheres to our obligations under U.S. and international law, and reflects the highest standards and values of the American people.

BALLISTIC MISSILE DEFENSE

Question. Secretary Gates has stated on a number of occasions that he believes there is potential for cooperation between the United States and Russia on missile defense, and Russia has suggested the idea of sharing early warning and surveillance data from its Garbarla radar in Azerbaijan, and its Armavir radar in southern Russia.

What do you believe is the potential for U.S.-Russian cooperation on missile defense, and are there steps you believe we should explore with Russia?

Answer. The United States is committed to working with Russia on a range of issues, including missile defense. Our experts are exploring cooperative opportunities that would complement our missile defense architecture. The radars Secretary Gates mentions would provide helpful information for early ballistic missile warning detection in the event of an Iranian missile attack. The Department will continue to work towards identifying areas where cooperation is mutually beneficial for both countries as part of the congressionally-directed Ballistic Missile Defense Review.

Question. With the fiscal year 2010 budget request, Secretary Gates has refocused the Department's missile defense program on effective theater missile defenses to protect our forward deployed forces, allies, and friends against existing short- and medium-range missile threats from nations like North Korea and Iran. The budget request would provide \$900 million in increased funding for more of the Terminal High Altitude Area Defense (THAAD) and Standard Missiles-3 interceptors, and more Aegis Ballistic Missile Defense (BMD) ships.

Do you agree with Secretary Gates' decision to increase the focus on effective theater missile defenses to defend our forces against existing regional (short- and medium-range) missile threats from nations like North Korea and Iran?

Answer. Yes. Our forces are increasingly threatened by shorter-range ballistic missiles and the proliferation of dangerous technologies among rogue regimes and non-state actors. In addition, states like Iran and North Korea continue development of longer-range ballistic missiles with which to coerce the United States and our allies and friends.

Question. The administration is considering a number of options for possible missile defense in Europe against a potential future Iranian missile threat, including the previously proposed deployment of missile defense capabilities in Poland and the Czech Republic.

From a technical standpoint, do you believe there are a number of options for a missile defense in Europe, and do you believe a land-based Standard Missile-3 interceptor could provide a useful capability against future Iranian missile threats, both to Europe and potentially to the United States?

Answer. Yes. I believe there are a number of technical alternatives for missile defense architectures in Europe. Land- and sea-based SM-3 interceptors, along with the necessary sensors and warning from both ground and space, could be key components of an alternative technical architecture.

Question. The fiscal year 2010 budget request for the Missile Defense Agency includes an initiative to develop the capability to intercept ballistic missiles early in their flight, sometimes referred to as the "ascent phase." This initiative would use the Standard Missile-3 interceptor and existing and near-term sensors. If this capability is successful, it could permit the United States to intercept long-range missiles from nations like North Korea well before the Ground-based Midcourse Defense (GMD) system would have to be used to defend the Nation.

What is your view of the potential value of an ascent-phase capability?

Answer. An early-intercept capability would improve defense of theater areas and the Homeland, and we are considering options for that potential capability. This defense capability would allow more intercept opportunities and potentially conserve interceptors by allowing more shoot-look-shoot vice salvo engagements. As a hedge against evolving future threats, destroying threat missile early in flight reduces the effectiveness of countermeasures.

Question. As the Vice Chairman of JCS, you are a member of the Missile Defense Executive Board, as well as the Chairman of the JROC. This gives you a unique perspective on the oversight and management of the Ballistic Missile Defense System (BMDS), including its requirements component.

Are there additional steps that you believe would make the BMDS more responsive to the operational needs of the combatant commanders, and are there additional steps that you believe would improve the requirements process for missile defense?

Answer. No. The additional steps needed to ensure the BMDS aligns more closely with the needs of the operational warfighter were addressed in the development of the BMDS Life Cycle Management Process. This process, used to influence the fiscal year 2010 budget and the fiscal year 2011 review, is on track to fully guide fiscal year 2012 budget inputs.

FUTURE OF NATO

Question. In your view, what existing or new missions should be the focus of NATO's strategic efforts over the next 5 years?

Answer. In my opinion, NATO should concentrate its strategic efforts first and foremost on Afghanistan. This will require continuing emphasis on sustaining and increasing the "whole of the international community" approach required for success. Strategic outreach, engagement, and cooperation with the international community, to include the European Union and the United Nations, and other appropriate organizations will be critical in the upcoming years.

I believe that other strategic priorities for NATO include: the move to deterrent presence in Kosovo; consolidating gains and further capacity-building in Iraqi security forces through the NATO Training Mission-Iraq (NTM-I); and counterpiracy efforts in the Horn of Africa. This latter mission is closely linked to NATO support to the African Union, which can address some of the root causes of piracy. For all of these strategic efforts, the same "whole of the international community" approach should continue to be applied, as NATO military forces alone cannot provide a long-term, lasting solution.

Question. In your view, how should NATO proceed on the issue of further enlargement of the alliance over the next 5 years?

Answer. That is a political question that will have to be answered by the President and Congress for the United States and by the governments of the other 27 NATO nations.

Question. Are you satisfied with the progress of NATO member nations, particularly new member nations, in transforming their militaries, acquiring advanced capabilities, and enhancing their interoperability with the United States and other NATO member nations? Where do you see room for improvement?

Answer. Yes. While allied progress in these three areas varies from nation to nation, each nation is continuing, within its own means and capabilities, to make progress. Much of this progress is driven by the increasing demands of the many ongoing NATO-led operations, particularly the operation in Afghanistan. The participation of the alliance and of each of its individual member states over the past 6 years in ISAF is producing forces that are increasingly more deployable and sustainable, has led to the development of enhanced alliance capabilities, and has significantly improved the interoperability between not only U.S. and other allied forces, but also between the 28 NATO nations and the 14 other partner nations par-

ticipating in this operation. The new NATO nations, while typically very constrained financially, have appeared very eager to transform their militaries, and have typically been very supportive of our operations in Afghanistan.

Despite the alliance's accomplishments, I believe that NATO needs to continue to develop its capability to respond to new threats and challenges such as cyber warfare and counterpiracy, and to enhance further its ability to work in a comprehensive manner with other international organizations, such as the European Union, the United Nations, the World Bank, as well as nongovernmental organizations to address and respond to these new threats and existing challenges, such as those we face in Afghanistan and Iraq.

Question. What steps, if any, could or should NATO take, in your view, to reduce tensions with Russia?

Answer. NATO should continue to use the NATO-Russia Council (NRC) as the primary mechanism for Russian and allied consultation, consensus-building, cooperation, joint decision and joint action, and as the forum for dialogue with Russia on all issues—where they agree and disagree—with a view towards resolving problems and building practical cooperation. In fact, the NRC Foreign Ministers met in Greece on 27 June, where among other things they identified common security interests, such as the stabilization of Afghanistan, arms control, the nonproliferation of WMD and their means of delivery, crisis management, counterterrorism, counter-narcotics, and counterpiracy. As long as no events occur that would again increase tensions, I see NATO-Russian relations maintaining a positive trajectory.

SPECIAL OPERATIONS COMMAND

Question. The Command of U.S. Special Operations Command (SOCOM) recently submitted a number of proposals to the Office of the Secretary of Defense designed to improve the coordination between SOCOM and the Services related to personnel management issues, including assignment, promotion, compensation, and retention of Special Operations Forces. Included in these proposals was a modification of section 167 of title 10, U.S.C., that would change the role of the SOCOM Commander from “monitoring” the readiness of special operations personnel to “coordinating” with the Services on personnel and manpower management policies that directly affect Special Operations Forces.

Do you support the proposed change to section 167 of title 10, U.S.C., to give the Commander of SOCOM greater influence on personnel management decisions and policies related to Special Operations Forces? Please provide rationale for your position.

Answer. The Service Chiefs, SOCOM Commander, and I had a detailed discussion on this topic last week. It is my recommendation that a change to “coordinating” with the Services better accomplishes the desired amount of participation in the various manpower processes sought by the SOCOM Commander in order to ensure the readiness of the Special Forces. This change may be effected as either a directive change or a statutory change.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if reconfirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

Answer. Yes.

Question. Do you agree, if reconfirmed, to appear before this committee, or designated members of this committee, and provide information, subject to the appropriate and necessary security protection, with respect to your responsibilities as the Vice Chairman of the Joint Chiefs of Staff?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

NUCLEAR STOCKPILE MODERNIZATION

1. Senator MCCAIN. General Cartwright, in a January 2009 Foreign Affairs Journal article, Secretary Gates outlined his argument for “Reprogramming the Pentagon for a New Age.” Secretary Gates maintained that “even though the days of hair-trigger superpower confrontation are over, as long as other nations possess the boomb and the means to deliver it, the United States must maintain a credible strategic deterrent.” He outlined the steps he had taken within the Department of Defense (DOD), but highlighted that “Congress needs to do its part by funding the Reliable Replacement Warhead (RRW) program—for safety, for security, and for a more reliable deterrent.” Given the administration has formally terminated the RRW program, how do you assess the current state and future modernization needs of our stockpile?

General CARTWRIGHT. As part of the 2008 annual report to the President on stockpile assessments, the directors of the national laboratories and the Commander, U.S. Strategic Command (STRATCOM) reported on the safety, reliability, performance, and military effectiveness of the nuclear weapons stockpile. They concluded that the current stockpile is safe and, with manageable exceptions, reliable and militarily effective. I share their opinion. Still, the risks to our stockpile are increasing. To mitigate these risks, it is vital that we continue efforts to implement a warhead modernization strategy and continue to pursue transformation of the nuclear weapons complex.

2. Senator MCCAIN. General Cartwright, is our current deterrent sustainable without a modernization plan?

General CARTWRIGHT. Not for the long term. A responsive infrastructure, including human capital expertise, is an essential element in maintaining a credible deterrent. The key to sustaining our nuclear weapons capability is a modernization strategy that can provide diversity down to the component level in our nuclear deterrent, improves safety and security features, and assures long-term confidence in the reliability of the stockpile without nuclear testing.

3. Senator MCCAIN. General Cartwright, do you believe that any ratification of the Strategic Arms Reduction Treaty (START) must be preceded by plans for a new redesigned and more reliable warhead?

General CARTWRIGHT. I have stated (for the record), both as the Commander, STRATCOM, and as the Vice Chairman of the Joint Chiefs of Staff, that it is imperative that we begin now to recapitalize our nuclear weapons infrastructure in a manner that will allow us to modernize our nuclear deterrent.

4. Senator MCCAIN. General Cartwright, what about the Comprehensive Test Ban Treaty (CTBT)?

General CARTWRIGHT. The Department, through the Nuclear Posture Review (NPR), is assessing and prioritizing nuclear deterrence requirements to ensure the U.S. nuclear forces continue to be safe, secure, and effective. A fundamental component of the NPR is a technical review that is considering a full range of options for modernizing the U.S. stockpile. While the NPR will not be complete for sometime, it is important to note that the results will be used to guide major nuclear treaty ratification efforts such as START and CTBT. At this juncture it is premature to characterize the potential risks and rewards of CTBT.

5. Senator MCCAIN. General Cartwright, earlier this week President Obama and Russian President Medvedev signed a Joint Understanding to commit the United States and Russia to reduce their strategic warheads to a range of 1,500 to 1,675. Conversely, 10 months ago, a joint DOD and Department of Energy (DOE) report on “National Security and Nuclear Weapons in the 21st Century” stated that that a “force of 1,700 to 2,200 operationally deployed strategic nuclear warheads is sufficient to meet U.S. strategic requirements.” I feel strongly that we should reduce our nuclear forces to the lowest we judge necessary; however, I ask what has changed over the last 10 months to conclude that 1,500 to 1,675 is the new sufficient range? If we were modernizing and making the stockpile more safe, secure, and reliable

that would be one thing, but given our current course and without the next NPR, I am interested in hearing the rationals for why 1,500 to 1,675 is sufficient not only today, but if it will be a sufficient range in the future without plans for modernization.

General CARTWRIGHT. The NPR conducted detailed analysis which concluded a reduction in operationally deployed strategic nuclear warheads to a level of 1,500 to 1,675 would be sufficient to meet U.S. strategic requirements for similarly constrained Russian forces. However, the key to sustaining our nuclear weapons capability is a modernization strategy that can provide diversity down to the component level in our nuclear deterrent, improves safety and security features, and assures long-term confidence in the reliability of the stockpile without nuclear testing.

EUROPEAN MISSILE DEFENSE SITE

6. Senator MCCAIN. General Cartwright, with respect to the planned European-based missile defense system in Poland and the Czech Republic, I am concerned that there is a perception that we are backing away from the commitments we made during the past administration. Russia has been insistent on linking planned missile defenses in Europe to START. Given the joint statement released by President Obama and President Medvedev earlier this week which cited little to no agreement on missile defense, the question still remains how we will fulfill our commitments to our European allies. What steps are being taken to ensure that we are not going to break faith with Poland and the Czech Republic?

General CARTWRIGHT. We have assured Poland and the Czech Republic, in addition to our other NATO allies, that as we proceed with our missile defense review we will consult with them. The U.S. Government has been clear in its position that the direction we take on missile defense will not come at the expense of our allies, recognizing the bold decisions they took in joining our initial European missile defense effort. Furthermore, during last year's signing process of Missile Defense Agreements, joint Declarations on Strategic Cooperation were promulgated with both Poland and the Czech Republic which help us focus and enhance our already close security ties.

QUESTIONS SUBMITTED BY SENATOR JEFF SESSIONS

GROUND-BASED INTERCEPTORS

7. Senator SESSIONS. General Cartwright, the Missile Defense Agency (MDA) fiscal year 2010 budget request suggests that the production line for Ground-based Interceptors (GBIs) will terminate sometime in 2012 or 2013 after completing 44 interceptors. During our missile defense hearing on June 16, you indicated that the Department likely will need more than 44 GBIs to continue flight tests for the purpose of maintaining the reliability of the Ground-based Midcourse Defense System and for the missile defense site in Europe. General O'Reilly recently indicated that at least 10 additional GBIs, above the 44, will be required for stockpile reliability testing. Recognizing the potential costs to shut down and restart the GBI production line to produce the additional missiles, beyond the 44 that will be required, when does the administration plan to make a decision regarding the GBI production line?

General CARTWRIGHT. Industry is currently under contract to manufacture GBIs. While completion of deliveries will occur in fiscal year 2012, there are third and fourth tier suppliers that have completed delivery of subassemblies. An assessment is being conducted by the MDA, industry, and the Defense Contract Management Agency (DCMA) to determine which suppliers are critical and identify approaches to mitigate need for requalification, minimizing restart costs for potential future Interceptor buys. Planning for GBI lifecycle support through 2032 and beyond continues. Results of this assessment will be factored into the fiscal year 2010 MDA program plan and the fiscal year 2011 budget request.

8. Senator SESSIONS. General Cartwright, do you have an idea of the additional costs associated with restarting the GBI production line?

General CARTWRIGHT. Industry is under contract to manufacture GBIs. While completion of deliveries will occur in fiscal year 2012, there are third and fourth tier suppliers that have completed delivery of subassemblies. An assessment is being conducted by the MDA, industry, and the DCMA to determine which suppliers are critical and identify approaches to mitigate need for requalification, minimizing restart costs for potential future Interceptor buys. Planning for GBI lifecycle support

through 2032 and beyond continues. Results of this assessment will be factored into the fiscal year 2010 MDA program plan and the fiscal year 2011 budget request.

9. Senator SESSIONS. General Cartwright, what are the costs in fiscal year 2010 and fiscal year 2011 to keep the production line warm?

General CARTWRIGHT. In the current plan, the production line will be manufacturing GBIs through fiscal year 2012. This production, along with GBI refurbishment, will keep tier 1 and tier 2 manufacturing lines warm until fiscal year 2014. There are currently tier 3 and tier 4 GBI suppliers that have completed delivery of subassemblies. However, additional funding for the GBI vendor base beyond what is requested in fiscal year 2010 would be premature given the ongoing Ballistic Missile Defense Review (BMDR). Results of the BMDR will assist in the determination to purchase additional GBIs. Those decisions, based on input from the BMDR analysis, will be addressed in the fiscal year 2011 and beyond budget requests.

10. Senator SESSIONS. General Cartwright, if these costs are less than the costs associated with a break in production, doesn't it make sense to bear these costs starting in fiscal year 2010?

General CARTWRIGHT. Additional funding for the GBI vendor base beyond what is requested in the fiscal year 2010 request would be premature given the ongoing BMDR. Results of the BMDR will assist in the determination to purchase additional GBIs and will be addressed in the fiscal year 2011 and beyond budget requests.

11. Senator SESSIONS. General Cartwright, what impact would a break in production have on the vendors?

General CARTWRIGHT. An assessment is being conducted by the MDA, industry, and the DCMA to determine which suppliers are critical and identify approaches to mitigate need for requalification, minimizing restart costs for potential future Interceptor buys. Planning continues for GBI lifecycle support through 2032 and beyond. Results of this assessment will be factored into the fiscal year 2010 MDA program plan and the fiscal year 2011 budget request.

12. Senator SESSIONS. General Cartwright, what will the impact of a break in the production line have on the MDA's ability to obtain certified parts?

General CARTWRIGHT. MDA does not anticipate an impact on its ability to obtain certified parts. Through the assessment being conducted by MDA, industry, and DCMA, critical vendors and supply bases will be identified and mitigation approaches will be developed.

13. Senator SESSIONS. General Cartwright, what impact would the break in the production line have on the overall readiness of the GBIs?

General CARTWRIGHT. A break in GBI manufacturing will not affect the overall readiness of the GBI fleet. Focused effort will be placed on the 30 GBIs to ensure they remain operationally ready to meet the warfighter's needs through operational inventory refresh, Interceptor refurbishment, and stockpile reliability initiatives.

START

14. Senator SESSIONS. General Cartwright, the July 6 Joint Understanding commits the United States and Russia to reduce their strategic warheads to a range of 1,500 to 1,675, and their strategic delivery vehicles to a range of 500 to 1,100. We currently deploy about 2,200 warheads on about 800 to 900 strategic delivery vehicles. Keeping in mind that the Strategic Posture Commission concluded that the United States could make reductions "if this were done while also preserving the resilience and survivability of U.S. Forces," what is your view on the force structure implications of the low-end of the limits now being discussed with the Russians (i.e., 1,500 warheads and 500 delivery vehicles)?

General CARTWRIGHT. If we are successful in creating an environment for a world without nuclear weapons, as President Obama emphasized in his Prague speech earlier this year, then eventually, we should be able to achieve force structure numbers closer to the low-end limits range being discussed with the Russians, and beyond. The keys to success in achieving lower numbers will be linked to our ability to recapitalize our nuclear weapons complex, implement a modernization strategy, and integrate the full spectrum of military capabilities into our calculus.

15. Senator SESSIONS. General Cartwright, at what number of strategic delivery vehicles do we start having serious implications for our ability to field a survivable

force of Intercontinental Ballistic Missiles (ICBMs), ballistic missile submarines, and strategic bombers?

General CARTWRIGHT. The NPR has produced initial analyses with strategic delivery vehicle numbers we find stable at START Follow-On numbers with a similarly constrained Russian force. However, more analysis needs to be done. Once complete, we will have a better understanding of the capability investments necessary to sustain a survivable and credible nuclear deterrence force.

16. Senator SESSIONS. General Cartwright, what are the implications of lower levels of strategic delivery vehicles for assuring our allies with the nuclear umbrella and dissuading China and other nations from building up to our levels?

General CARTWRIGHT. Without question, we need to maintain enough strategic delivery vehicles to assure allies and friends, while discouraging competition with nations like China and others. We must also focus on expanded deterrence capabilities like missile defense, Prompt Global Strike, and others if we are going to provide the President with a broad set of credible deterrence and response options across the threat spectrum.

NUCLEAR MODERNIZATION

17. Senator SESSIONS. General Cartwright, I have repeatedly made the case to the Secretary of Defense, the Deputy Secretary of Defense, and others that the START arms control track must be accompanied by a nuclear modernization track (warheads, nuclear weapons complex, and delivery systems). Do you think this is understood by the administration?

General CARTWRIGHT. Yes. The President has made it clear that as long as we live in a world that has nuclear weapons, the United States will maintain a safe, secure, and effective arsenal to deter adversaries and assure allies. I believe the President understands the problems and issues associated with the current nuclear arsenal and supporting infrastructure. This is why we are working very closely with DOE and the National Nuclear Security Administration to ensure adequate resourcing and modernization activities are accounted for in the upcoming President's budget request for fiscal year 2011 and fiscal year 2012 budget submissions.

18. Senator SESSIONS. General Cartwright, will there be a modernization package to accompany START ratification this fall?

General CARTWRIGHT. I completely agree with the statement Secretary Gates made last October at his Carnegie Endowment speech, when he said, "there is absolutely no way we can maintain a credible deterrent and reduce the number of weapons in our stockpile without either resorting to testing our stockpile or pursuing a modernization program." Investment in modernization is required now, independent of the START Follow-on ratification process, to ensure the long-term credibility of our deterrent force.

EUROPEAN MISSILE DEFENSE SITE

19. Senator SESSIONS. General Cartwright, in April 2009, the National Air and Space Intelligence Center at Wright Patterson Air Force Base released their report on the Ballistic and Cruise Missile Threat. In it they state, "with sufficient assistance, Iran could develop and test an ICBM capable of reaching the United States by 2015." Many experts agree that Iran has received material support from North Korea in the past. Given this estimate and the North Korea-Iran linkage, wouldn't you agree that it underscores the importance of moving ahead with a European missile defense site?

General CARTWRIGHT. This is a growing concern of ours and definitely gets a lot of attention in the Pentagon. As you are aware, our current missile defenses are able to protect the United States from the potential threat you describe, but that is not the case for our allies and friends in Europe and U.S. forces and their families stationed there. The current review of missile defense in Europe is examining the European site plan and alternatives in order to determine how to best defeat the threat while fielding capabilities that are affordable and effective. Whichever path is chosen, it will need to provide for a layered architecture and be complementary to NATO missile defense efforts.

20. Senator SESSIONS. General Cartwright, the North Atlantic Treaty Organization (NATO) affirmed its support for U.S. plans to field 10 GBIs in Poland and a missile tracking radar in the Czech Republic at the April 2008 Bucharest Summit,

when it “recognize[d] the substantial contribution to the protection of allies from long-range ballistic missiles to be provided by the planned deployment of European-based United States missile defense assets.” Has NATO changed its view about the value of U.S. plans to field missile defense capabilities in Poland and the Czech Republic?

General CARTWRIGHT. NATO has not changed its view and I think it is important to highlight what NATO has stated on missile defense in recent summits. During the 2009 summit in Strasbourg/Kehl, NATO reaffirmed what was said at the 2008 summit in Bucharest: “Ballistic missile proliferation poses an increasing threat to allies’ forces, territory, and populations, and that missile defence forms part of a broader response to counter this threat.” The declaration further states that NATO “recognizes the substantial contribution to the protection of allies from long-range ballistic missiles to be provided by the planned deployment of European-based United States missile defence assets.”

21. Senator SESSIONS. General Cartwright, what would be the implications for U.S.-allied relations if we were to abandon this project?

General CARTWRIGHT. There is no single answer to the question because each ally will likely have its own perspectives. We were pleased that NATO reaffirmed its position on missile defense during the April 2009 Summit of Heads of State and Government at Strasbourg/Kehl. We remain adamant that whichever decision is taken, it will not come at the expense of our relationships with allies. This is why we believe consultations with allies are important to ensure their views are known to us and critical to the transparency and confidence building we are establishing with Russia.

22. Senator SESSIONS. General Cartwright, some have suggested that instead of GBI, the United States might deploy SM-3 missiles, either on ships or land, to protect Europe against the Iranian ballistic missile. Unfortunately, the SM-3 cannot protect the United States against long-range Iranian threats, as could GBIs deployed in Poland. Why wouldn’t we want to deploy a missile defense system in Europe that can provide protection for both Europe and the United States against Iranian long-range ballistic missile threats?

General CARTWRIGHT. As part of the current U.S. review of plans for missile defense in Europe, we are looking at alternatives that will best defeat the threat, are affordable, and are proven. GBI, sea-based SM-3, and other capabilities not yet programmed are part of the alternatives under review. Whatever alternative is chosen, the capabilities must be both scalable and flexible, and will need to provide for a layered architecture in which each part will contribute to intercept of the threat and ultimately provide protection for Europe and the United States against the Iranian long-range ballistic missile threat.

[The nomination reference of Gen. James E. Cartwright, USMC, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
April 20, 2009.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for reappointment as the Vice Chairman of the Joint Chiefs of Staff and appointment to the grade of indicated while assigned to a position of importance and responsibility under title 10, U.S.C., sections 601 and 154:

To be General

Gen. James E. Cartwright, 5961.

[The biographical sketch of Gen. James E. Cartwright, USMC, which was transmitted to the committee at the time the nomination was referred, follows:]

RESUME OF CAREER SERVICE FOR GEN. JAMES E. CARTWRIGHT, USMC

Vice Chairman of the Joint Chiefs of Staff:

Assigned: 3 Aug 07/Projected Rotation: 30 Sep 09

Date of Rank:

1 Sep 04

Date of Birth:

22 Sep 49

Date Commissioned:

12 Nov 71

MRD:

1 Jul 12

Education/Qualifications:

University of Iowa, BS, 1971

Naval War College, MA, 1991

The Basic School (Non-Res), 1977

Air Command and Staff College, 1986

U.S. Naval War College, 1991

CAPSTONE, 1997

Joint Flag Officer Warfighting Course, 2000

Naval Aviator

Commands:

Commander, U.S. Strategic Command (Gen: Jul 04–Aug 07)

Commanding General, 1st Marine Aircraft Wing (MajGen: Aug 00–Apr 02)

Deputy Commander, Marine Forces Atlantic (BGen: Aug 99–Jul 00)

Commanding Officer, Marine Aircraft Group-31 (Col: May 94–May 96)

Commanding Officer, VMFA-232 (LtCol: May 92–Dec 92)

Commanding Officer, Marine Aviation Logistics Squadron-12 (LtCol: May 89–Jul 90)

Joint Assignments:

Director, J-8, Joint Staff (LtGen: May 02–Jun 04)

Special Assistant to Director, J-8; Deputy Director for Force Structure, Requirements, Joint Staff (Col/BGen: Jun 96–Jul 99)

Service Staff Assignments:

Deputy Branch Head, Aviation Plans & Policies, Aviation Department (Col: Jan 93–May 94)

Assistant Operations Officer, Marine Aircraft Group-24 (LtCol: Jun 91–Apr 92)

Deputy Assistant PM (F/A-18), Naval Air Systems Command (LtCol: Jun 86–May 89)

[The Committee on Armed Services requires certain senior military officers as determined by the committee, to complete a form that details the biographical, financial, and other information of the nominee. The form executed by Gen. James E. Cartwright, USMC, in connection with his nomination follows:]

UNITED STATES SENATE

COMMITTEE ON ARMED SERVICES

Room SR-228

Washington, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in committee offices for public inspection prior to the hearings and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
James E. Cartwright.
2. **Position to which nominated:**
Vice Chairman of the Joint Chiefs of Staff.
3. **Date of nomination:**
20 April 2009.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
September 22, 1949; Rockford, IL.
6. **Marital Status:** (Include maiden name of wife or husband's name.)
Married to Sandra K. Cartwright (maiden name: Waltz).
7. **Names and ages of children:**
Billee Ann Bennett, 35.
Jayme Rowland, 29.
8. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.
None.
9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational, or other institution.
None.
10. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable, and other organizations.
None.
11. **Honors and awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.
None.
12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?
Yes.
13. **Personal views:** Do you agree, when asked before any duly constituted committee of Congress, to give your personal views, even if those views differ from the administration in power?
Yes.

[The nominee responded to the questions in Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–E are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

GEN. JAMES E. CARTWRIGHT, USMC.

This 14th day of April, 2009.

[The nomination of Gen. James E. Cartwright, USMC, was reported to the Senate by Chairman Levin on July 29, 2009, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on July 31, 2009.]

[Prepared questions submitted to ADM Robert F. Willard, USN, by Chairman Levin prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the special operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and the chain of command by clearly delineating the combatant commanders' responsibilities and authorities and the role of the Chairman of the Joint Chiefs of Staff. These reforms have also vastly improved cooperation between the Services and the combatant commanders, among other things, in joint training and education and in the execution of military operations.

As former Director, Force Structure, Resources and Assessment (J8) on the Joint Staff and Vice Chief of Naval Operations, and now as Commander, U.S. Pacific Fleet, you have witnessed the effect of these reforms from both the joint and service perspective.

Based on your experience, what is your assessment of these reforms?

Answer. Goldwater-Nichols was landmark legislation that led to dramatic improvements in operational effectiveness, unity of effort, and civilian oversight. It has created a generation of military leaders who are experienced with operating in a coordinated and joint, multi-service environment.

Question. Do you see a need to modify any Goldwater-Nichols provisions? If so, what modifications are appropriate?

Answer. At this time, I do not see any need to modify the Goldwater-Nichols Act.

DUTIES

Question. What is your understanding of the duties and functions of the Commander, U.S. Pacific Command (PACOM)?

Answer. The Commander, PACOM is responsible for deterring attacks against the United States and its territories, possessions, and bases, to protect Americans and American interests and, in the event that deterrence fails, to win its Nation's wars. The Commander is also responsible for expanding security cooperation with our allies, partners, and friends across the Asia-Pacific region.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. Thirty-six years of military experience, culminating in command of U.S. Pacific Fleet, have prepared me for assuming command of PACOM.

By serving as the 34th Vice Chief of Naval Operations, and twice as a flag officer on the Joint Staff, I gained invaluable insight into the administrative processes that underpin an effective Department of Defense (DOD), as well as a profound understanding of joint processes, interagency cooperation, and the whole-of-government approach.

My Joint Staff experience is complemented by my joint operational experience as a four-star Joint Task Force Commander and as the Joint Maritime Component Commander for two Operational Plans.

Additionally, I have gained extensive regional (Asia-Pacific) experience while serving as the Commander of U.S. Pacific Fleet in Pearl Harbor, HI, as Commander, Carrier Group 5 aboard USS *Kitty Hawk* (CV 63) in Yokosuka, Japan, and as Commander, U.S. 7th Fleet, also in Yokosuka, Japan.

Finally, I'd offer that my wife, Donna, adds immensely to my qualifications. She is a remarkable representative of the U.S. Armed Forces, and an exceptional ambassador for our great Nation. She has performed magnificently during our tenure at U.S. Pacific Fleet and I'm confident her strength, character, patriotism, and regional experience will continue to be a significant addition to my qualifications for Commander, PACOM.

Question. Do you believe that there are any steps that you need to take to enhance your expertise to perform the duties of the Commander of PACOM?

Answer. If confirmed, I intend to take every opportunity to enhance my knowledge of our relationships with our allies and partners across the Pacific. I look forward to engaging with senior leaders within DOD, the Department of State, and military and civilian leaders throughout the Asia-Pacific region in order to improve my understanding of U.S. interests in the region.

RELATIONSHIPS

Question. If confirmed, what will be your command relationship with: The Secretary of Defense.

Answer. The Commander, PACOM, performs his duties under the authority, direction, and control of the Secretary of Defense. He is directly responsible to the Secretary of Defense for the ability of the Command to carry out its missions.

Question. The Deputy Secretary of Defense.

Answer. The Deputy Secretary of Defense performs duties as directed by the Secretary and performs the duties of the Secretary in his absence. The Commander, PACOM, ensures the Deputy has the information necessary to perform these duties and coordinates with him on major issues.

Question. The Under Secretary of Defense for Policy.

Answer. Under secretaries are key advocates for combatant commands' requirements. The Commander, PACOM, coordinates and exchanges information with the Under Secretary of Defense for Policy on strategic policy issues involving the Asia-Pacific region.

Question. The Under Secretary of Defense for Intelligence.

Answer. The Commander, PACOM, coordinates and exchanges information with the Under Secretary of Defense for Intelligence as needed to set and meet the Command's intelligence requirements.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The Chairman functions under the authority, direction, and control of the National Command Authority. The Chairman transmits communications between the National Command Authority and the PACOM Commander and oversees the activities of the PACOM Commander as directed by the Secretary of Defense. As the principal military advisor to the President and the Secretary of Defense, the chairman is a key conduit between the combatant commander, interagency, and Service Chiefs.

The PACOM Commander keeps the Chairman informed on significant issues regarding the PACOM Area of Responsibility (AOR). The Commander directly communicates with the Chairman of the Joint Chiefs of Staff on a regular basis.

Question. The Service Secretaries.

Answer. The Service Secretaries are responsible for the administration and support of forces assigned to combatant commands. The Commander, PACOM coordinates with the secretaries to ensure that requirements to organize, train, and equip PACOM forces are met.

Question. The Service Chiefs.

Answer. The Commander, PACOM, communicates and exchanges information with the Service Chiefs to support their responsibility for organizing, training, and equipping forces. Successful execution of PACOM's mission responsibilities requires coordination with the Service Chiefs. Like the Chairman, the Service Chiefs are valuable sources of judgment and advice for combatant commanders.

Question. The other combatant commanders.

Answer. The Commander, PACOM, maintains close relationships with the other combatant commanders. These relationships, which are critical to the execution of our National Military Strategy, are characterized by mutual support, frequent contact, and productive exchanges of information on key issues.

Question. Commander U.S. Forces Korea/Combined Forces Command.

Answer. As a subordinate unified commander, the Commander, U.S. Forces Korea receives missions and functions from Commander, PACOM. I recognize his role as Commander, Combined Forces Command and will fully support his actions in that sensitive and demanding role.

Question. The Assistant Secretary of Defense for Asian and Pacific Security Affairs.

Answer. The Commander, PACOM maintains a close relationship with the Assistant Secretary of Defense for Asian and Pacific Security Affairs. This relationship ensures close coordination of U.S. policy within the Office of the Secretary of Defense (OSD) and the Interagency.

Question. The Deputy Assistant Secretary of Defense for Prisoner of War/Missing Personnel.

Answer. The Commander, PACOM, coordinates and exchanges information with the Deputy Assistant Secretary of Defense for POW/Missing Personnel Affairs on strategic policy issues involving the POW/Missing in Action (MIA) accounting mission worldwide and personnel recovery requirements in the Asia-Pacific region.

MAJOR CHALLENGES AND PROBLEMS

Question. In your view, what are the major challenges that will confront the next Commander, PACOM?

Answer. I believe there are three major challenges in the Pacific AOR. First, China's extensive military buildup and modernization are creating uncertainty in the region at large. Second, North Korea's conventional military, weapons of mass destruction (WMD), and proliferation activities are a threat to regional security. Finally, maintaining and strengthening our alliances and partnerships are critical to the stability in the region.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. We must continue to mature our military-to-military relationship with China. In so doing, we reduce the chance of miscalculation, increase mutual understanding, and encourage cooperation in areas of common concern.

We will support whole-of-nation approaches to ensure a peaceful, secure, and prosperous future for the Korean Peninsula. Our forward military presence on the Peninsula assures South Korea and deters aggression by North Korea.

We must remain committed to strengthening our alliances and partnerships in the region; such as through the provisions of DPRI with Japan and the transfer of wartime operational control (OPCON) from the United States to the Republic of Korea (ROK) in 2012.

Question. If confirmed, what priorities would you establish in terms of the issues which must be addressed by Commander, PACOM?

Answer. Maintaining a credible deterrent and military presence will be my top priority and is the single best way for PACOM to contribute to a secure and stable region.

With regard to China, the strategy is one of careful, measured military engagement with the Government of China and the PLA, pressing for transparency while also sustaining our military capabilities to fulfill our defense commitments in the region.

With regard to North Korea, we will work with the Department of State and regional partners to press North Korea to meet its commitments—including denuclearization—as agreed to during the Six Party Talks, while maintaining the capability to deter potential North Korea military threats and countering proliferation activities.

In order to sustain the realignment and transformation processes already underway, we need to review progress constantly and resolve challenges in the bilateral relations with both Japan and South Korea.

We must build upon existing bilateral relationships to pursue more multilateral cooperation in the areas of counterterrorism, maritime security, and humanitarian assistance/disaster response.

HOMELAND DEFENSE

Question. What is your understanding of the role and responsibility of PACOM in homeland defense?

Answer. PACOM responsibility is to deter attacks against the Homeland as early and as far away as possible, defend the PACOM domestic AOR, and work with and provide support to civil authorities when requested. Additionally, PACOM's homeland defense plan complements and is integrated with planning for the ongoing overseas contingency operations; combating WMD, homeland security, and other relevant activities.

Question. What is your understanding of how PACOM and U.S. Northern Command (NORTHCOM) work together to ensure that their overlapping missions in this region do not create seams that might be exploited by our adversaries and how this process might be improved?

Answer. In September 2008, Commander, PACOM and Commander, NORTHCOM signed a Command Arrangement Agreement that "establishes procedures and delineates responsibilities" between the two commands. This agreement also prescribes employment of PACOM forces in support of NORTHCOM missions as well as the control of PACOM forces operating in NORTHCOM's Areas of Responsibility (AOR). In my experience, this agreement between combatant commands has been highly ef-

fective. If confirmed, I intend to continue the close working relationship between the two commands.

Question. How could PACOM forces and expertise contribute to more effective homeland defense capabilities?

Answer. PACOM's military and intelligence activities in the western approaches to the continental United States contribute to the Nation's active, layered defense and enhance situational awareness. A layered defense deterring attacks far from our shores, gathering actionable intelligence through initiatives such as enhanced maritime domain awareness, exercising and training our forces alongside those of our allies and partners across the Asia-Pacific region—is the surest means for PACOM to contribute to the defense of our Homeland.

FORCE POSTURE IN THE U.S. PACIFIC COMMAND AREA OF OPERATIONS
