

Committee be discharged from further consideration of S. Res. 508 and the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the resolution by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 508) recognizing June 2010 as National Hereditary Hemorrhagic Telangiectasia (HHT) month established to increase awareness of HHT, which is a complex genetic blood vessel disorder that affects approximately 70,000 people in the United States.

There being no objection, the Senate proceeded to consider the resolution.

Mr. DURBIN. Mr. President, I ask unanimous consent the resolution be agreed to, the preamble be agreed to, the motions to reconsider be laid upon the table, with no intervening action or debate, and that any statements relating to the resolution be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. 508) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 508

Whereas, according to the HHT Foundation International, Hereditary Hemorrhagic Telangiectasia (HHT), also referred to as Osler-Weber-Rendu Syndrome, is a long-neglected national health problem that affects approximately 70,000 (1 in 5,000) people in the United States and 1,200,000 people worldwide;

Whereas HHT is an autosomal dominant, uncommon complex genetic blood vessel disorder, characterized by telangiectases and artery-vein malformations that occurs in major organs including the lungs, brain, and liver, as well as the nasal mucosa, mouth, gastrointestinal tract, and skin of the face and hands;

Whereas left untreated, HHT can result in considerable morbidity and mortality and lead to acute and chronic health problems or sudden death;

Whereas according to the HHT Foundation International, 20 percent of those with HHT, regardless of age, suffer death and disability;

Whereas according to the HHT Foundation International, due to widespread lack of knowledge of the disorder among medical professionals, approximately 90 percent of the HHT population has not yet been diagnosed and is at risk for death or disability due to sudden rupture of the blood vessels in major organs in the body;

Whereas the HHT Foundation International estimates that 20 to 40 percent of complications and sudden death due to these "vascular time bombs" are preventable;

Whereas patients with HHT frequently receive fragmented care from practitioners who focus on 1 organ of the body, having little knowledge about involvement in other organs or the interrelation of the syndrome systemically;

Whereas HHT is associated with serious consequences if not treated early, yet the condition is amenable to early identification and diagnosis with suitable tests, and there are acceptable treatments available in already-established facilities such as the 8 HHT Treatment Centers of Excellence in the United States; and

Whereas adequate Federal funding is needed for education, outreach, and research to

prevent death and disability, improve outcomes, reduce costs, and increase the quality of life for people living with HHT: Now, therefore, be it

Resolved, That the Senate—

(1) recognizes the need to pursue research to find better treatments, and eventually, a cure for HHT;

(2) recognizes and supports the HHT Foundation International as the only advocacy organization in the United States working to find a cure for HHT while saving the lives and improving the well-being of individuals and families affected by HHT through research, outreach, education, and support;

(3) supports the designation of June 2010 as National Hereditary Hemorrhagic Telangiectasia (HHT) month, to increase awareness of HHT;

(4) acknowledges the need to identify the approximately 90 percent of the HHT population that has not yet been diagnosed and is at risk for death or disability due to sudden rupture of the blood vessels in major organs in the body;

(5) recognizes the importance of comprehensive care centers in providing complete care and treatment for each patient with HHT;

(6) recognizes that stroke, lung, and brain hemorrhages can be prevented through early diagnosis, screening, and treatment of HHT;

(7) recognizes severe hemorrhages in the nose and gastrointestinal tract can be controlled through intervention, and that heart failure can be managed through proper diagnosis of HHT and treatments;

(8) recognizes that a leading medical and academic institution estimated that \$6,600,000,000 of 1-time health care costs can be saved through aggressive management of HHT in the at-risk population; and

(9) encourages the people of the United States and interested groups to observe and support the month through appropriate programs and activities that promote public awareness of HHT and potential treatments for it.

NATIONAL BRAIN TUMOR
AWARENESS MONTH

Mr. DURBIN. Mr. President, I ask unanimous consent the Judiciary Committee be discharged from further consideration and the Senate proceed to S. Res. 537.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the resolution by title.

The assistant legislative clerk read as follows:

A resolution (S. Res. 537) designating May 2010 as "National Brain Tumor Awareness Month."

There being no objection, the Senate proceeded to consider the resolution.

Mr. DURBIN. Mr. President, I ask unanimous consent the resolution be agreed to, the preamble be agreed to, and the motions to reconsider be laid upon the table.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 537) was agreed to.

The preamble was agreed to.

The resolution, with its preamble, reads as follows:

S. RES. 537

Whereas 62,000 Americans are diagnosed with a primary brain tumor each year and

150,000 more are diagnosed with a metastatic brain tumor that results from cancer spreading from another part of the body to the brain;

Whereas brain tumors are the leading cause of death from solid tumors in children under the age of 20 and are the third leading cause of death from cancer in young adults ages between the ages of 20 and 39;

Whereas brain tumors may be malignant or benign, but can be life-threatening in either case;

Whereas 612,000 Americans have been diagnosed and are living with a brain tumor;

Whereas the treatment of brain tumors is complicated by the fact that more than 120 different types of brain tumors exist;

Whereas the treatment of brain tumors presents significant challenges because of—

(1) the location of brain tumors in an enclosed bony canal;

(2) the difficulty of delivering treatment across the blood-brain barrier;

(3) the obstacles to complete surgical removal of the tumors; and

(4) the serious edema that results when the blood-brain barrier is disrupted;

Whereas brain tumors have been described as a disease that affects the essence of "self";

Whereas brain tumor research is supported by a number of private nonprofit research foundations and by institutes at the National Institutes of Health, including the National Cancer Institute and the National Institute for Neurological Disorders and Stroke;

Whereas important advances have been made in understanding brain tumors, including the genetic characterization of glioblastoma multiforme, 1 of the deadliest forms of brain tumor;

Whereas advances in basic research may fuel the research and development of new treatments;

Whereas daunting obstacles still remain to the development of new treatments, and no strategies for the screening or early detection of brain tumors exist;

Whereas a need for greater public awareness of brain tumors exists, including awareness of the difficulties associated with research on brain tumors and the opportunities for advances in brain tumor research and treatment; and

Whereas May, when brain tumor advocates nationwide unite in awareness, outreach, and advocacy activities, would be an appropriate month to recognize as National Brain Tumor Awareness Month: Now, therefore, be it

Resolved, That the Senate—

(1) designates May 2010 as "National Brain Tumor Awareness Month";

(2) encourages increased awareness of brain tumors to honor those individuals who have lost their lives to brain tumors, as well as those individuals who are living with brain tumors;

(3) supports efforts to develop better treatments for brain tumors that will improve the quality of life and their long-term prognosis of those individuals diagnosed with a brain tumor;

(4) expresses the support of the Senate for those individuals who are battling brain tumors, as well as the families, friends, and caregivers of those individuals; and

(5) urges a collaborative public-private approach to brain tumor research as the best means of advancing basic knowledge of, and treatments for, brain tumors.

NATIONAL SMALL BUSINESS
WEEK

Mr. DURBIN. Mr. President, I ask unanimous consent that the Senate
