3 **SEC. 2. FINDINGS.**

4 Congress makes the following findings:

5 (1) Fish and wildlife are important natural re-
 6 sources of the United States. They belong to all citi-
 7 zens, and are managed in perpetuity by State and
 8 Federal conservation agencies, often with significant
 9 assistance from universities, zoos, aquariums, and
 10 nonprofit and non-governmental organizations.

11 (2) Wildlife and zoological veterinarians are the
 12 primary source of essential health care for wild ani-
 13 mals in their natural habitat and in captivity in fa-
 14 cilities such as zoos, wildlife refuges, breeding re-
 15 serves, and aquariums.

1 (3) Wildlife and zoological veterinarians have
2 the resources and expertise necessary to help re-
3 spond to environmental disasters and address short-
4 term and long-term impacts on wildlife and their
5 habitats. Wildlife and zoological veterinarians have
6 proven to be essential to the rescue and rehabilita-
7 tion efforts in the Gulf of Mexico region following
8 the Deepwater Horizon oil spill that began on April
9 20, 2010.

10 (4) According to the Department of the Inte-
11 rior, wildlife disease expertise and resources are crit-
12 ical to protecting both human and animal life.

13 (5) Wildlife veterinarians have been actively in-
14 volved in preventing, detecting, and responding to
15 such important exotic, dangerous, and zoonotic dis-
16 eases as anthrax, avian influenza, brucellosis, tuber-
17 culosis, West Nile virus, SARS, chronic wasting dis-
18 ease, and foot and mouth disease.

19 (6) Globalization, climate change, and wildlife
20 habitat loss and alteration, along with a growing
21 interface among humans, livestock, and wildlife have
22 increased the threat posed by emerging infectious
23 diseases to humans, domestic animals, and wildlife.

24 (7) According to the February 2009 report by
25 the Government Accountability Office entitled “Vet-

1 erinarian Workforce: Actions Are Needed to Ensure
2 Sufficient Capacity for Protecting Public and Ani-
3 mal Health”, the Nation is facing a growing short-
4 age of veterinarians, and the Federal Government
5 may not have the necessary veterinarian workforce
6 to control pandemic and large-scale outbreaks of dis-
7 ease.

8 (8) There is a shortage of positions for wildlife
9 and zoological veterinarians at the State, Federal,
10 nonprofit, and university levels due to inadequate
11 funding. According to the American Veterinary Med-
12 ical Association (“AVMA”), less than one percent of
13 AVMA members identify themselves as wildlife or
14 zoological veterinarians.

15 (9) According to the AVMA, a growing number
16 of students enter veterinary schools with an interest
17 in wildlife or zoological veterinary medicine, but
18 choose different fields of study and practice due to
19 the small number of positions available for wildlife
20 and zoological veterinarians upon graduation.

21 (10) Veterinary students face large educational
22 debt upon graduation. According to the AVMA,
23 graduating student loan debt averaged \$142,613 in
24 2011, a 6.5 percent increase from 2010.

1 (11) According to the American Association of
2 Wildlife Veterinarians (“AAWV”) and National As-
3 sociation of Federal Veterinarians (“NAFV”), sala-
4 ries for wildlife and zoological veterinarians are rel-
5 atively low compared to the average salaries of vet-
6 erinarians in companion animal medicine. Lower sal-
7 aries, combined with high educational debt and the
8 small number of positions available in wildlife and
9 zoological veterinary medicine, discourage students
10 from pursuing careers in wildlife or zoological veteri-
11 nary medicine.

12 (12) According to the AAWV and NAFV, most
13 schools and colleges of veterinary medicine lack both
14 a comprehensive curriculum and sufficient numbers
15 of formal educational programs specializing in wild-
16 life or zoological veterinary medicine to adequately
17 prepare graduates for a competitive workplace.

18 (13) According to the AVMA, while some train-
19 ing opportunities exist for aspiring wildlife and zoo-
20 logical veterinarians, such opportunities are not
21 available each year, pay low salaries or stipends, if
22 any, and are highly competitive.

23 **SEC. 3. PURPOSES.**

24 The purposes of this Act are—

1 (1) to create new funded positions for wildlife
2 and zoological veterinarians;

3 (2) to limit the amount of educational debt for
4 veterinary medicine students while providing incen-
5 tives to study and practice wildlife or zoological vet-
6 erinary medicine;

7 (3) to help schools and colleges of veterinary
8 medicine develop or improve pilot curricula special-
9 izing in wildlife and zoological veterinary medicine;
10 and

11 (4) to expand the number of training programs
12 in wildlife or zoological veterinary medicine for vet-

7 the conservation and management of wildlife or
8 zoological populations; and

9 (D) how the wildlife or veterinary institu-
10 tion will use funds awarded under a grant.

11 (b) AWARD.—The Secretary shall establish proce-
12 dures to ensure that, under this section, proposals are rig-
13 orously reviewed and grants are competitively awarded
14 based on such considerations as the Secretary may deter-

5 a wildlife or zoological veterinarian.

6 (B) LIMITATIONS.—Payments on behalf of
7 an eligible individual under this section shall
8 not exceed, for each year of service under sub-
9 section (c)(2)(B)(i)—

3 (c) AWARD.—

4 (1) IN GENERAL.—No scholarship shall be

12 (1) IN GENERAL.—Subject to the limitation in
13 paragraph (2), in determining the amount of a
14 scholarship, the Secretary shall consider factors in-
15 cluding—

16 (A) the degree that the eligible student is
17 pursuing or plans to pursue;

18 (B) educational costs;

19 (C) the financial need of the eligible stu-
20 dent;

21 (D) the extent to which such determination
22 affects the ability of the Secretary to maximize
23 the number of scholarships that can be provided

1 (E) the extent to which such determination
2 provides an incentive to serve as a wildlife or
