RESOLUTION

Expressing the sense of the House of Representatives that

domestic oil and gas resources are critical to our Nation's security and economy and the Secretary of the Interior should take immediate action to streamline the shallow and deepwater permitting process.

Whereas the Gulf of Mexico produces about 30 percent of oil in the United States and 10 percent of natural gas in the United States;

Whereas, on May 30, 2010, the Department of the Interior enacted a deepwater moratorium which lasted until October 12, 2010;

Whereas more than 400,000 jobs across the Gulf Coast are tied to the offshore drilling industry;

Whereas, in 2009, the offshore drilling industry accounted for \$70,000,000,000 in economic value and provided about \$20,000,000,000 in revenue to Federal, State, and local governments through royalties, bonuses, and tax collections;

Whereas the National Commission on the BP Deepwater Horizon Oil Spill and Offshore Drilling recognized the importance of the industry in a report, stating, "the development of offshore energy resources contributes substantially to local economies, supporting businesses small and large and employing tens of thousands of workers";

Whereas the Department of the Interior has issued only 37 new shallow water permits since the shallow water moratorium was lifted and only 1 new permit for deepwater exploration; and

Whereas, as a result of the de facto moratorium, at least 12 rigs (shallow and deepwater) have departed the Gulf of Mexico, and more are expected to follow: Now, therefore, be it

1 *Resolved*, That it is the sense of the House of Rep-
2 representatives that—

3 (1) the Nation’s economy and security depends
4 upon full and immediate restoration of shallow and
5 deepwater drilling operations in the Gulf of Mexico;

6 (2) the long-term economic health of the State
7 of Alaska depends upon the responsible development
8 of the oil and natural gas reserves of the Beaufort
9 and Chukchi Seas; and

10 (3) the Secretary of the Interior should—

11 (A) streamline the review and appropriate
12 approval of applications for both shallow and
13 deepwater drilling permits in the Outer Conti-
14 nental Shelf;

15 (B) take immediate action to provide the
16 shallow and deepwater industry with a com-
17 pleted sample application which meets all of the
18 new safety and environmental regulations for
19 use as a template;

20 (C) provide written guidance and clarifica-
21 tion to applicants regarding new safety require-
22 ments; and

- 1 (D) provide permit applicants with timely
- 2 and detailed explanations on any areas of a per-
- 3 mit which do not satisfy new requirements.
