‘‘SEC. 2336. INTERGOVERNMENTAL SUPPORT AGREEMENTS WITH STATE AND LOCAL GOVERNMENTS.

‘‘(a) AGREEMENTS AUTHORIZED.—Chapter 137 of title 10, United States Code, is amended by adding at the end the following new section:

‘‘SEC. 3136. REPORT ON FEASIBILITY, COST, AND ADVISABILITY OF REUSING PITS IN NUCLEAR WARHEADS.

(a) FINDINGS.—Congress makes the following findings:

(1) A key concept of the proposed inter prompts pit strategy of the National Nuclear Security Administration is to reuse existing pits to supplement the 20 to 30 pits per year that the Administration asserts may be manufactured at Los Alamos National Laboratory, given extensive modifications to current facilities.

(2) Dr. Charles McMillan, director of the Laboratory for Defense Nuclear Nonproliferation Research, testified before Congress on April 18, 2012, that ‘‘the extensive work required to convert these concepts into systems that could be certified to be safe...’’, the statement which shows that ‘‘we must do the scientific work to further understand the effects of aging and to provide modern safety, safety that starts (in a sensitive) high explosive systems. If we choose this path, it will require an investment over the next 5 to 10 years.’’.

(3) Pit lifetime is another critical aspect of the proposed inter prompts pit strategy. The National Nuclear Security Administration has confidence that pits will last up to...
100 years. Yet, Dr. Siegfried Hecker, former director of Los Alamos National Laboratory and a leading plutonium metallurgist, was quoted on July 17, 2012, as saying, “We have never demonstrated that these pits last 50, 60, 80 or 100 years as some people claim.”

(4) Regarding the performance of older pits, the 2007 report by the private scientific advisory group known as JASON suggested that “there must be a more detailed understanding of the different types of dynamic strengths involved in the weapons codes, and then a more complete understanding of how these strengths vary with aging through relevant experimental and theoretical work. This is fundamentally difficult...New experiments should be carried out on both naturally and artificially aged [plutonium].”

(b) Not later than 60 days after the date of the enactment of this Act, the Secretary of Energy and the Secretary of Defense shall jointly submit to the congressional defense committees a report on the feasibility, cost, and advisability of reusing pits in nuclear warheads that includes the following:

(1) An assessment of the technical work and experimentation that needs to be done to determine whether or not pit reuse is likely to lead to a strategy that leads to the certification of the safety, security, and reliability of nuclear warheads using those pits and the schedule and cost for that work and experimentation.

(2) A description of the criteria that must be met to determine whether nuclear warheads that reuse pits can be certified as safe, secure, and reliable and an assessment of the results of those experiments.

(3) An assessment of the extent to which pursuing pit reuse increases the cost and complexity of life extension programs and programs funding by the National Nuclear Security Administration and the extent of pursuing pit reuse on the safety, security, and reliability of nuclear warheads.

(4) An assessment of the extent to which pursuing pit reuse, as opposed to manufacturing new pits, limits the incorporation of enhanced safety and security features into life extension programs and limits improvements to the performance margin in such programs.

(5) A description of the technical process for and cost of—

(A) requalifying an existing pit for reuse with a weapon for which it was designed; and

(B) requalifying an existing pit for reuse with a weapon for which it was not designed.

(6) An assessment of the extent which the Nuclear Weapons Council has reviewed the processes described in paragraph (4) and the results of any such reviews.

(7) An explanation for the difference between the assessment of the National Nuclear Security Administration with respect to the lifetime of pits and the assessment of Dr. Siegfried Hecker described in subsection (a)(3).

(8) An assessment of the extent to which the lifetime of pits and the assessment of Dr. Siegfried Hecker described in subsection (a)(3).

(9) An assessment of the work that has been done by the national security laboratories of the Department of Energy or by other entities with respect to pit aging since 2007 and what work remains.

(10) An assessment of the anticipated level of confidence of the Secretary of Energy and the Secretary of Defense with respect to experiments to artificially age plutonium and any concerns that there may be differences between natural and artificial aging of plutonium.

(11) An assessment of experiments that have been performed to understand the performance of older pits across the full stockpile of nuclear warheads, including in highly dynamic environments, and the results of those experiments.

(12) A statement of the military requirement for pit production to have a responsive infrastructure capable of rapidly identifying technical or geopolitical strategic surprises.

Mr. BROWN of Massachusetts (for himself and Mr. KERRY) submitted an amendment intended to be S. 3254, to authorize appropriations for fiscal year 2013 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes; which was ordered to lie on the table; as follows:

(1) The United States security strategy in Afghanistan, as established by the President and reaffirmed at the North Atlantic Treaty Organization Conference in Brussels in November 2012, prioritizes a process of ‘irreversible transition’ of security responsibility from the International Security Assistance Force (ISAF) to the Afghanistan National Security Forces (ANSF) by the end of 2014, and the training of ‘sufficient and capable’ Afghan National Security Forces by the Afghan Government through the assistance of international donors.

(2) As a key part of the strategy in Afghanistan, North Atlantic Treaty Organization/International Security Assistance Force (NATO/ISAF) forces have conducted partnered combat and training operations with the Afghanistan National Security Forces. In the course of these operations, as of November 13, 2012, there have been at least 60 deaths and 80 non-fatal casualties from insider attacks conducted by members of the Afghanistan National Security Forces or insurgent infiltrators in Afghanistan in 2012. These attacks account for 16 percent of coalition casualties in 2012, and more than 16 times greater than the percentage of casualties caused by such attacks in 2008 and earlier.

(3) In September 2012, in a media interview, General John Allen, Commander of North Atlantic Treaty Organization/International Security Assistance Force (NATO/ISAF) forces, stated that insider attacks in Afghanistan, stated that ‘we’re willing to sacrifice a lot for this campaign, but we’re not willing to be the last one to die’. In response to the question on insider attacks in Afghanistan,

(ec) ELEMENTS.—The report required by subsection (b) shall include the following:

(1) A description of the nature and proximate causes of the attacks described in subsection (b), including the following:

(A) An estimate of the number of such attacks on United States, Afghanistan, and coalition military personnel since January 1, 2007.

(B) An estimate of the number of United States, Afghanistan, and coalition personnel killed or wounded in such attacks.

(C) The circumstances or conditions that may have influenced such attacks.

(D) An assessment of the threat posed by infiltration, and a best assessment of the extent of infiltration by insurgents into the Afghan National Security Forces.

(E) A description of trends in the prevalence of such attacks, including where such attacks occur, the political and ethnic affiliation of attackers, and the targets of attackers.

(F) A description of the restrictions and other actions taken by the United States and North Atlantic Treaty Organization/International Security Assistance Force forces to protect military and civilian personnel from future insider attacks, including measures in predeployment training.

(G) An assessment of the impact of the insider attacks in Afghanistan in 2012 on the overall transition strategy in Afghanistan and its prospects for success, including an assessment how such insider attacks impact—

(1) partner operations between North Atlantic Treaty Organization/International Security Assistance Force forces and Afghan National Security Forces;

(2) training programs for the Afghanistan National Security Forces, including proposed training activities during the post-2014 training mission for the Afghanistan National Security Forces;

(3) United States Special Forces training of the Afghan and its interaction into the Afghan National Security Forces; and

(4) the willingness of North Atlantic Treaty Organization/International Security Assistance Force forces to maintain forces in Afghanistan or commit to the post-2014 training mission for the Afghanistan National Security Forces.

(2) An assessment of the impact that a reduction in training and partnering would have on the independent capabilities of the Afghanistan National Security Forces, and whether the training of the Afghanistan National Security Forces should remain a key component of the United States and North Atlantic Treaty Organization forces in Afghanistan.

(d) UNCLASSIFIED EXECUTIVE SUMMARY.—The report submitted under subsection (c) shall include an unclassified summary of the contents of the report in unclassified form.

At the end of title D of this Act, add the following:

SEC. 1248. STRATEGY FOR PROMOTING THE SECURITY OF JUVENILE WOMEN AND GIRLS DURING THE SECURITY TRANSITION PROCESS.

(a) Findings.—Congress makes the following findings:

(1) According to the Department of Defense’s April 2012 Report on Progress Toward Security and Stability in Afghanistan, the security of juvenile women and girls during the security transition process will be significant.

(2) According to the April 2012 Report, “U.S. and coalition forces will continue to degrade the Taliban-led insurgency in
order to provide time and space to increase the capacity of the Afghan National Security Forces and the Afghan Government so they can assume full responsibility for Afghani
stan’s security by the end of 2014.”
(B) “Transition to Afghan security lead
began in July 2011 and transition to full Af
ghan security responsibility will be complete
counting the Afghan National Police.”
(C) “The security of the Afghan people and the stability of the government are used to judge provincial readiness to move to each successive stage of transition implementa
tion.”
(D) For each area designated for transition, a transition implementation plan is de
veloped by the government of Afghanistan, NATO, and ISAF and submitted to the Afghan-NATO Inteqal Board (JANIB). JANIB is also responsible for recommending areas to enter and exit the transition process.
(2) According to a 2002 study on Women, Peace and Security submitted by the Secret-
ary-General of the United Nations pursuant to Security Council resolution 1325 (2000), “the suspension of or restriction on women’s enjoyment of their human rights” can act as an early-warning indicator of im-
pending or renewed conflict. In Afghanistan, restrictions on mobility and other rights can signal the presence of extremist or insurg
ent elements in a community.
(3) The security of Afghan women and girls in areas undergoing security transitions will be an important gauge of the transition strategy’s success. Indicators by which to measure women’s security include the mobil
ity of women and girls, the participation of women in local government bodies, the rate of school attendance for girls, women’s ac
cess to government services, and the preva
lence of violence against women.
(4) Maintaining and improving physical se
curity for Afghan women and girls through
out the country is critical in order for women and girls to take advantage of opportuni ties in education, commerce, politics, and other areas of public life, which in turn is essential for the future stability and pros
perity of Afghanistan.
(5) Women who serve as public officials at all levels of the Government of Afghanistan face security threats to their personal se curity and that of their families. Many female officials have been the victims of violent crimes, but they are generally not afforded official protection by the Government of Af
ghanistan or security forces.
(6) Protecting the security and human rights of Afghan women and girls requires the involvement of Afghan men and women. Through education about the important ben
efits of women’s full participation in social, economic, and political life, male officials and soldiers can play a particu larly important role in supporting and pro
tecting women and girls.
(7) The Chicago Summit Declaration issued by NATO states: “As the Afghan National Police further develop and professionalize, they will evolve towards a sustain able, credible, and accountable civilian law enforcement force that will shoulder the main responsibility for domestic security. This force should be capable of providing pol
icing services to the Afghan population as part of the broader Afghan rule of law sys
tem.”
(8) Women face significant barriers to full participation in the ANA and ANP, including a lack of security forces that work environ
ment and the lack of separate facilities de
signated for female personnel.
(9) As of September 2012, female recruit
ment for the Afghan National Security For
ces are far below published targets, as follows:

(A) Approximately 1,700 women serve in the Afghan National Security Forces, or less than half of one percent of the total force.
(B) In 2010, President Hamid Karzai an
nounced that 5,000 Afghan National Police
women in the Afghan National Police, or ap
proximately 3 percent of the force, by 2014. Currently, there are approximately 1,370 women in the ANP, or 0.87 percent of the po
lice force.
(C) Approximately 350 women currently serve in the Afghan National Army, rep
resenting approximately 3 percent of new ANA recruits who are female.
(D) Male security personnel often do not respond to threats or incidences of violence against women, particularly at the local level. They largely lack the training and understand ing needed to respond appropriately and effectively to situations involving women. According to the Department of De
fense’s April 2012 Report on Progress Toward Security and Stability in Afghanistan:
(A) The Afghan Ministry of Defense “lacks the command, control, procedures, and execution to promote opportunity and fair and respectful treatment of women in the force.”
(B) The Afghan Ministry of Interior “faces significant challenges in fully integrating and protecting women in the ANP workforce, especially among operational units at the provincial and district levels.”
(C) In the Afghan National Police, “Many Provincial Headquarters Commanders do not accept policewomen, as they prefer male candidates and lack adequate facilities to support females.”
(D) “While women are greatly needed to support police efforts and combat cultural impediments, weak recruitment, and uneven application of policies hinder signifi
cant progress.”
(E) “Although stronger documentation, implementation, and enforcement of poli
cies, procedures, and guidance to better inte grate women will help, time will be needed to change the cultural mores that form the basis of many of the current impediments.”
(11) The United States, the North Amer
ican Treaty Organization, and United States coalition partners have made firm commit
ments to support the human rights of the women and girls of Afghanistan, as evi
denced by the following:
(A) According to the United States Na
tional Action Plan on Women, Peace and Se
curity, “integrating women and gender con
cerns across U.S. assistance programs, helps promote democratic governance and long-term stability,” which are key United States strategic goals in Afghanistan.
(B) The National Action Plan also states that “the engagement and protection of women as agents of peace and stability will be central to United States efforts to pro
mote peace, security, and resolve conflict, and rebuild societies.” This policy applies to United States Government efforts in Afghanistan, where addressing the security vulnerabilities of Afghan women and girls during the period of security tran
sition is an essential step toward long-term stability.
(C) The Chicago Summit Declaration issued by NATO in May 2012 states: “We em
phasize the importance of full participation of all Afghan women in the reconstruction, reconciliation and nation building processes in Afghanistan and the need to respect the institutional arrangements protecting their rights. We remain committed to the imple
mentation of Security Council Resolution (UNSCR) 1325 on women, peace and security. We recognize also the need for the protection of children from the damaging effects of armed conflict as re
quired in relevant UNSCRs.”
(12) The Strategic Partnership Agreement signed between the United States and Af
ghanistan by President Obama and President Karzai in June 2012 states, “Consistent with its Constitution and international obliga
tions, the Government of Afghanistan shall ensure and advance the essential role of women in society, so that they may fully enjoy their economic, social, political, civil and cultural rights.”
(b) STRATEGY TO PROMOTE SECURITY OF AF
GAN WOMEN.

tion Action Plan on Women, Peace and Se
curity, “integrating women and gender con
cerns across U.S. assistance programs, helps promote democratic governance and long-term stability,” which are key United States strategic goals in Afghanistan.
(iii) Assessing the quality and consistency of this action across regional commands; and as-
sees of women’s security conditions during the transition period.
(iv) With Afghan partners, coali
tion partners, and relevant United States Government departments and agencies to take concrete action to support women’s rights and security in cases of deterioration in women’s security conditions during the transition period.
(B) A strategy to increase gender aware
ness and responsiveness among Afghan Na
tional Security Forces and Afghan police per
sonnel, including the following actions:
(i) Working with Afghan and coalition partners to utilize training curricula and materials that address the human rights of women and girls, appropriate re
sponses to threats against women and girls, and appropriate behavior toward female col
leagues and members of the community; as
sessment of this training through regional commands; and assess
ing the quality and consistency of this training across regional commands; and as
sees of women’s security conditions during the transition period.
(ii) With national and local ANA and ANP leaders to develop and utilize en
forcement and accountability mechanisms that address the human rights of women and girls, appropriate re
sponses to threats against women and girls, and appropriate behavior toward female col
leagues and members of the community; as
sessment of these mechanisms through regional commands; and assess
ing the quality and consistency of this training through regional commands; and as
sees of women’s security conditions during the transition period.
(3) The Secretary of Defense shall report on the strategy to the Appropriations Com
mittee and other appropriate congressional committees not later than 90 days after the submission of the strategy required under paragraph (1).

TITLE XV—AUDIT OF DEPARTMENT OF DEFENSE FINANCIAL STATEMENTS

SEC. 1801. SHORT TITLE.

This title may be cited as the “Audit the Pentagon Act of 2012.”

SEC. 1802. FINDINGS.

Congress makes the following findings:

(1) Section 9 of Article I of the Constitution of the United States requires all agencies of the Federal Government, including the Department of Defense, to be responsible to the people for the expenditure of all public money.

(2) Section 3515 of title 31, United States Code, requires the agencies of the Federal Government, including the Department of Defense, to develop financial management systems that are consistent with the financial management systems of other Federal agencies and that will result in reliable, accurate, and timely financial information that can be audited.

(3) The Federal Financial Management Improvement Act of 1996 (31 U.S.C. 3512 note) requires financial systems acquired by the Federal Government, including the Department of Defense, to be developed with the goal of making such systems capable of producing timely, reliable, and accurate financial information that is validated for audit.

(4) The financial management of the Department of Defense has been on the “High-Risk” list of Government Accountability Office, which means that the Department is not consistently able to “control costs; ensure basic accountability; anticipate future costs and claims on the budget; measure performance; maintain funds control; [and] prevent and detect fraud, waste, and abuse.”

(5) The National Defense Authorization Act for Fiscal Year 2002 (Public Law 107–107) requires the Secretary of Defense to report to Congress on the reliability of the financial statements of the Department of Defense, to minimize resources spent on producing unreliable financial statements, and to use these resources to improve financial management policies, procedures, and internal controls.

(6) In 2005, the Department of Defense created a Financial Improvement and Audit Readiness (FIAR) Plan, overseen by a directorate within the Department of Defense, to improve or establish financial management processes and business practices that will result in reliable, timely, and complete financial statements that can be audited.

(7) The National Defense Authorization Act for Fiscal Year 2010 (Public Law 111–84) requires regular audit of the Financial Improvement and Audit Readiness Plan described in paragraph (6), and codifies as a statutory requirement the goal of the Department of Defense to achieve full audit readiness by the end of fiscal year 2013.

(8) In a September 2010 hearing of the Senate, the Government Accountability Office stated that past expenditures by the Department of Defense of $5,800,000,000 to improve financial information, and billions of dollars for new information technology systems for that purpose, may not suffice to achieve full audit readiness of the financial statement of the Department of Defense.

(9) The National Defense Authorization Act for Fiscal Year 2011 (Public Law 112–81) directed the Government Accountability Office to prepare a report on the adequacy of the Financial Improvement and Audit Readiness Plan, including the adequacy of the Department’s financial systems, the reliability of its financial representations, and the extent to which the Department has achieved the goals of the Plan.

SEC. 110. SENSE OF CONGRESS REGARDING SPECTRUM REALLOCATION.

It is the sense of Congress that—

(1) the Nation’s mobile communications industry is a significant economic engine, by one estimate or indirectly supporting 3,800,000 jobs, or 2.6 percent of all United States employment, contributing $195,500,000,000 to the United States gross domestic product, accounting for 3,800,000 jobs, or 2.6 percent of all United States employment, contributing

(2) while wireless carriers are continually implementing more efficient technologies and techniques to maximize their existing spectrum capacity, there is a pressing need for additional spectrum for commercial mobile broadband services, with one report predicting that global mobile data traffic will increase 18-fold between 2011 and 2016 at a compound annual growth rate of 78 percent, reaching 10.8 exabytes per month by 2016;

(3) as the Nation faces the current spectrum shortage, consideration should be given to both the supply of spectrum for licensed networks and for unlicensed devices;

(4) while this additional demand can be met in part by reallocating spectrum from existing non-governmental uses, the reallocation of Federal Government spectrum for commercial use must also be part of the solution according to the Federal Accountability Office study, the percentage of the most highly valued spectrum, that below 3700 MHz, used exclusively or primarily by the Federal Government is approximately 39 percent to 57 percent with exclusive Government use accounting for 18 percent of the total amount below 3700 MHz;

(5) existing law ensures that Federal operations are not harmed as a result of a reallocation of spectrum for commercial use, including the new establishment of the Spectrum Reorganization Fund to reimburse Federal users for the costs of planning and implementing relocation and, with respect to spectrum vacated by the Department of Defense, certification by the Secretaries of Defense and Commerce and the Chairman of the Joint Chiefs of Staff that replacement spectrum provides comparable technical characteristics to restore essential military capability;

(6) wherever possible, Federal Government spectrum identified for commercial use should be reallocated from such use;

(7) commercial users should only be required to share spectrum with government users in the event that shared spectrum is being cleared by Federal users or in limited exclusion zones where relocation of existing Federal uses is not feasible, or where it is determined that sharing will not significantly impair use of the spectrum for broadband services;

(8) among existing Federal Government bands, the spectrum between 1755–1780 MHz is particularly well-suited for reallocation to commercial use because it is identified inter-nationally for commercial mobile services and is used for that purpose throughout most of the world and because it is immediately adjacent to existing domestic wireless spectrum and would seamlessly integrate into the current mobile broadband spectrum portfolio allowing for more immediate equipment development and deployment;

(9) the Department of Defense should prepare a long term plan in consultation with relevant agencies and private sector stakeholders to determine equitable outcomes for the Nation in using spectrum that balances the private sector’s demand for spectrum with national security needs;

(10) in most cases Federal operations can and should be relocated from this band, possibly except for a limited subset of operations in rural areas where a Federal Government station cannot be relocated without jeopardizing essential military capability;

(11) auctioning this band on a paired basis with the band between 2155–2180 MHz that was designated for auction under the Middle Class Tax Relief Act of 2012 would permit alignment with existing services, facilitate faster deployment of services, maximize efficient use of the spectrum, and sell more desirable frequencies than if the 1755–1780 MHz were auctioned by itself;

(12) the President should therefore expedi-tiously direct Federal users on the 1755–1780 MHz band to prepare, not later than May 31, 2013, a relocation plan that includes the costs of relocating from this band; and

(13) the Federal Communications Commission should reallocate the commercial use and auction it on a paired basis with the band between 2155–2180 MHz.

SEC. 1246. SENSE OF THE SENATE ON THE ISRAELI IRON DOME DEFENSIVE WEAPON SYSTEM.

(a) FINDINGS.—The Senate makes the following findings:

(1) The citizens of Israel have suffered under a continual barrage of missiles, rockets, and mortar shells from the Hamas-controlled Gaza Strip.

(2) Hamas has been designated by the Secretary of State as a Foreign Terrorist Organization.

(3) Hamas and other terrorist groups in Gaza have routinely used human shields and launched rockets from civilian areas.

(4) Israel has gone to extraordinary lengths to avoid Palestinian civilian casualties, including aborting attacks on military targets because of the presence of civilians, alerting civilians to leave areas of potential conflict, and allowing the importation of medical and other supplies into Gaza.

(5) Israel faces additional rocket and missile threats from Lebanon and Syria.

(6) The Government of Iran has supplied Hamas with advanced longer range missiles such as the Fajar-5.

(7) Hamas has deployed these weapons to be fired from within their own civilian popula-tion centers.

(8) The Government of Israel, taking seriously the threat of short range rockets and mortars, designed, developed, and produced the Iron Dome system to address these threats.

(9) The Iron Dome system has successfully intercepted hundreds of rockets targeting population centers in Israel.

(10) The Iron Dome system has maintained a success rate of close to 90 percent.

(11) The Government of Israel currently maintains 5 Iron Dome batteries, a number insufficient to protect all of Israel.

(12) It appears that approximately 10 additional Iron Dome batteries are needed to protect all of Israel.

(13) The United States Government, recognizing the threat to Israeli citizens and de-fenses, has approved funding to assist the Government of Israel in procuring Iron Dome batteries.

(14) Israel maintains a significant inventory of Iron Dome batteries which has been reduced due to attacks from Gaza.

(15) Israel used a significant number of precision-guided munitions in order to destroy military targets while minimizing civilian casualties in its recent defensive effort in Gaza.

(16) President Barack Obama has expressed his intention to seek additional funding for Iron Dome and other United States-Israel missile defense systems.

(b) SENSE OF THE SENATE.—The Senate—

(1) expresses its support for the security of our ally and strategic partner, Israel;

(2) fully supports Israel’s right to defend itself against acts of terrorism;

(3) sympathizes with and mourns the families of Israelis who have come under the indiscriminate rocket fire from Hamas-controlled Gaza.

(4) recognizes the exceptional success of the Iron Dome Missile Defense system in defending the population of Israel;

(5) desires to help ensure that Israel has the capability to defend itself against terrorist attacks, including through the acquisition of additional Iron Dome batteries and interceptors; and

(6) urges the Departments of Defense and State to explore with their Israeli counterparts and alert the Senate of any needs the
Israeli Defense Force may have for additional Iron Dome batteries, interceptors, or other equipment depleted during the current conflict.
