Mr. HARKIN, from the Committee on Health, Education, Labor, and Pensions, submitted the following

R E P O R T

together with

ADDITIONAL VIEWS

[To accompany S. 3578]

The Committee on Health, Education, Labor, and Pensions, reported an original bill (S. 3578) to amend the Elementary and Secondary Education Act of 1965, having considered the same, reports favorably thereon and recommends that the bill (as amended) do pass.

I. PURPOSE, NEED FOR LEGISLATION, AND GOALS OF REAUTHORIZATION

The purpose of the Elementary and Secondary Education Reauthorization Act (ESERA) is to update, improve and streamline programs under the Elementary and Secondary Education Act of 1965 (ESEA) for the next 5 years. ESERA represents the Federal Government’s continued commitment to K–12 education, while continuing to advance the fundamental goals of ESEA.

Equity in education has long been promoted by federally directed desegregation; by ESEA, that focused resources on schools serving disadvantaged students; by the Head Start Act; and the Individuals with Disabilities Education Act, that provides special education and services to meet the learning needs of children with disabilities.

The Reagan administration’s “Nation at Risk” report identified a “rising tide of mediocrity” and launched a standards-based reform
movement. In 1994, Congress passed the Goals 2000: Educate America Act and the Improving America’s Schools Act (IASA), which updated ESEA to focus on accountability for school improvement. Then, in 2001, Congress passed the No Child Left Behind Act (NCLB), which added new accountability requirements in pursuit of ESEA’s historic mission of supporting equitable access to education. For the first time, ESEA held schools truly accountable for ensuring that all students—including poor students, minority students, students with disabilities, and English learners—would reach the same State academic standards.

Our challenge today is to build on the remarkable record of partnership among Federal, State and local governments by redesigning ESEA for a new era—retaining the commitment to educating all children to high standards, while overhauling elements of the law that have proven ineffective.

Unfortunately, far too many of our Nation’s students enter kindergarten ill-prepared to succeed, fall farther and farther behind as the years go on, and eventually drop out of school. The achievement gaps that NCLB’s reporting requirements revealed have allowed us to accurately identify the stratum of poorly performing schools that fail to educate our students year after year, and years of research have identified turnaround strategies that can work for these schools.

NCLB was often criticized for focusing only on academic proficiency in reading and math, with many arguing that the curriculum was narrowed in schools to focus on those subjects. An unfortunate side effect of the static measures used by NCLB was the focus many teachers and school leaders placed on the children on the cusp of proficiency, thus reducing instructional support for those students lagging far behind and those charging ahead.

ESERA targets Federal intervention to the poorest performing schools in each State. The bill aims for a Federal role that is more focused, but also more effective. Most importantly, it sets a goal of ensuring that all students are college- and career-ready when they graduate from high school. It does this by focusing on teaching and learning, not unnecessary testing and sanctioning. It eliminates the Federal one-size-fits-all approach and replaces it with State-designed accountability systems. ESERA allows these State-designed accountability systems to measure the academic growth of each child, and to include assessments in other subjects when measuring the performance of students.

ESERA consolidates dozens of small programs into larger, more comprehensive grant programs to help leverage better teaching and learning. These new programs—such as high school reform; literacy; STEM; and successful, safe and healthy students—will be more focused to support better results and leverage more improvements, while also providing greater flexibility to parents, schools, and States to adopt the best approach to improving the education of their children.

Education reform cannot succeed without well-trained and effective teachers and principals. The bill continues, in title II, part A, to support evidence-based approaches, encourage States and local educational agencies (LEAs) to strengthen transitions from early learning and improves the distribution of effective teachers. ESERA also authorizes the Teacher Incentive Fund (TIF) for the
first time, which will help States implement performance-based pay and develop next-generation teacher and principal evaluation systems.

ESERA maintains and improves programs to improve the achievement of special populations, including American Indian students, English learners, neglected and delinquent children, children in foster care, and homeless students. The bill also supports students with disabilities as they participate in the general education experience and work to attain college- and career-readiness alongside their peers.

Responding to research showing the importance of school readiness and the importance of successful transitions throughout a child’s educational career, ESERA strengthens connections between schools and early learning programs.

The Federal Government provides only a small fraction of overall funding for elementary and secondary education in the United States. But the Federal Government must insist that, whatever the level of its investment in education, it receive the highest return possible with evidence of improved student achievement, especially among disadvantaged children.

II. LEGISLATIVE HISTORY AND COMMITTEE ACTION

III. EXPLANATION OF LEGISLATION AND COMMITTEE VIEWS

Title I: Ensuring College- and Career-Readiness for All Students

The committee bill updates the law to reflect what has been learned in the decade since the No Child Left Behind Act (NCLB) was enacted, while maintaining the essential accountability elements under that iteration of the law.

STATE PLAN AND STATE AND LOCAL REQUIREMENTS

Requirements for college- and career-ready standards

The committee bill makes college- and career-readiness for all students a central goal. A child’s education should lead to success in post-secondary education and the workforce: By 2014 it is projected that 75 percent of new jobs in America will require a post-secondary degree, and a college graduate today is projected to make 77 percent more per hour than a worker with only a high school diploma.

The committee bill describes, in section 1111(a)(1)(A)(ii), three options for States to use to ensure that academic standards are “college- and career-ready”: Alignment with credit-bearing coursework at public institutions of higher education, alignment with career and technical education standards, and appropriate career skills. States must implement content standards in reading or language arts and mathematics by December 31, 2013, and adopt academic achievement standards by the beginning of the 2015–16 school year.

The committee bill protects States’ rights in defining academic content and achievement standards, while also ensuring that States are setting high academic expectations for all students. Thus, section 1111(a)(1)(A)(vi) maintains current law, under which States cannot be required to submit academic content or achievement standards to the Secretary for review, but must nonetheless “demonstrate” to the Secretary as part of their title I plans that their academic content and achievement standards are aligned with the expectations of college- and career-readiness. The committee expects that peer review and Secretarial approval of State plans will continue to be a safeguard that ensures States are maintaining high expectations for all students as they fulfill the purposes of the act.

The committee understands that the Secretary of Education will continue to review evidence submitted by the States related to the quality of their academic standards. The Department of Education has released guidance to States in the past that details the evidence that can be submitted and the committee intends for this practice to continue as States adopt college- and career-ready standards.
The committee intends for the term “appropriate career skills” in section 1111(a)(1)(A)(ii)(III) to encompass higher-order thinking skills, including but not limited to the ability to apply knowledge to new situations, think critically, problem solve, communicate orally and in writing, exhibit creativity, and innovate, as well as digital literacy and the ability to use workplace technology effectively. These are essential skills for students to develop in order to succeed after graduation from high school. These are also the skills that will enable graduates to succeed in private-sector training environments that account for most post-secondary training in the United States.

Alternate academic achievement standards for students with the most significant cognitive disabilities

It is the intent of the committee to ensure that all students are held to the highest possible standards in order to be prepared for entry into post-secondary education and careers. The committee recognizes, with section 1111(a)(1)(D), that general education standards are not appropriate for a very small percentage of students with the most significant cognitive disabilities. This group of students comprises less than 1 percent of the overall student population. The committee’s intent is to ensure that a parallel, challenging, appropriate, and aligned set of standards are available for this group of students. The committee also intends for students with disabilities who do not have the most severe cognitive disabilities to be held to the general education standards with the supports, accessibility, and accommodations they need to achieve such standards. This includes students with learning disabilities, mild and moderate intellectual disabilities and multiple disabilities that include cognitive disabilities.

English language proficiency standards

The committee bill requires States to adopt high-quality English language proficiency (ELP) standards by December 31, 2014. States must also demonstrate that the standards are aligned with the State’s academic content standards in reading or language arts; ensure proficiency in English for each of the domains of speaking, listening, reading, and writing; address the different proficiency levels of English learners; and ensure that the ELP standards are updated, not later than 1 year after the State adopts any new academic content standards in reading or language arts.

Academic assessments

As States transition to college- and career-ready standards, States are required under section 1111(a)(2) to implement assessments aligned to those standards. Current assessments are unlikely to accurately measure the knowledge and skills needed to succeed in the globally competitive economy. To address the need for new assessments aligned to college- and career-ready standards, many States have joined together to develop higher quality assessments. The committee bill requires that statewide assessments continue to be administered annually in reading or language arts and math for grades 3 through 8, and at least once during grades 10 through 12. Statewide assessments must continue to be administered in science at least once during grades 3 through 5, 6 through
The committee agrees with the States that the next generation of statewide assessments must align with college- and career-ready standards and thus measure the knowledge, skills, and competencies students need to succeed in the 21st century. These assessments should involve multiple measures of student academic achievement, including measures that assess higher-order thinking skills and understanding and should be capable of measuring student academic growth.

The committee bill includes language to allow States to use multiple assessments over the course of the year to measure student knowledge, so long as the scores from these assessments culminate in a score equivalent to that of a single summative assessment.

The committee adopted an amendment that was offered by Senator Franken that allows States to develop computer adaptive assessments that measure, at a minimum, whether each student is meeting or exceeding the on-track level of performance for the State academic content standards for the student’s grade level. A State may measure the student’s level of performance in the grades above or below the student’s grade level, which may include students’ growth at such levels, so long as grade-level items are used for determining if a student is on track for college- and career-readiness.

A common and recurring criticism of NCLB is that it has led to too much student testing. The committee bill maintains current law and continues to require only one annual assessment in both reading or English language arts and mathematics and a science assessment in each grade span. To address this criticism, this bill requires States to regularly analyze assessment and accommodations practice and use, and to eliminate duplicative assessments identified by such analyses. With this data, the committee intends for States and LEAs to use this data to accurately determine the source of required assessments and to find the opportunities to reduce the testing load on schools, teachers and students.

The committee sees significant value in providing additional transparency in reporting. Thus the committee adopted an amendment offered by Senator Murray regarding cross-tabulation that requires States to make publicly available performance and graduation rate data for every combination of two of the subgroups described in subsection (a)(2)(B)(ix), such that data for all permutations of two subgroups will be reported. States may, but will not be required to, cross-tabulate performance data for permutations of three or more subgroups.

Alternate assessments for students with the most significant cognitive disabilities

The committee has provided States with the option, in section 1111(a)(2)(E), to create alternate assessments to measure the progress of students with the most significant cognitive disabilities on alternate academic achievement standards. It is the intent of the committee that no more than 1 percent of all students in a LEA and no more than 1 percent of the students in the State would be assessed using alternate assessments.
Assessing English learners

States must include in the academic assessment of reading or language arts (using tests written in English) any student who has attended school in the United States (not including Puerto Rico) for 3 or more consecutive school years. A LEA may, on an individual basis assess such students identified as English learners in a language other than English for no more than 2 years, if such student has not yet reached a level of English language proficiency sufficient to yield valid and reliable information on what such a student knows and can do on reading or language arts tests written in English. Continuation of these policies will provide the information needed to determine if English learners are college- and career-ready.

State parent and family engagement plan

The committee believes there is great value in the involvement of parents in their children’s education. The committee bill (section 1111(c)) strengthens current law by expanding such involvement to appropriate family members. This shift is intended to acknowledge the role that non-custodial family members play in the life of a child. States are required to develop a statewide parent and family engagement strategy, which must prioritize increasing engagement in high-need LEAs and schools. States are responsible for ensuring coordination of parent and family engagement activities across the State, including between the State and the State Advisory Council on Early Childhood Education and Care described in the Head Start Act and, as applicable, between the State and the Parent and Family Information and Resource Center described in title IV, as well as among the Federal, State, and local levels. The committee is particularly interested in coordination between States and State Advisory Councils on Early Childhood Education and Care, as alignment of these activities is a key leverage point for increasing school readiness among young children. Finally, States must provide technical assistance and professional development to high-need LEAs regarding parent and family engagement.

Federal parameters for state-designed accountability systems

The committee recognizes that accountability systems that are more tailored to the needs and strengths of States and LEAs may be more successful at leveraging improvements in student achievement than the one-size-fits-all approach of the No Child Left Behind Act. However it is important that in designing these systems certain principles are maintained. The committee bill includes Federal parameters for State-designed accountability systems that offer flexibility while requiring States to set expectations for progress towards student college- and career-readiness. States must make annual determinations to identify schools, beyond the schools identified by the requirements of section 1116, that need interventions and supports to meet those expectations of progress. The committee expects that the peer review process for State-designed accountability systems as part of title I plans will ensure that States demonstrate how they will meet each of these requirements as part of a robust approach to accountability.
The committee wants to underscore the flexibility explained in current Department of Education guidance for school districts to fund additional school improvement supports and interventions in low-performing title I schools beyond the requirements of the revised School Accountability and Improvement System in section 1116.

Growth

The No Child Left Behind Act made clear that annual student achievement growth is as critical to understanding school success as is a measure of the status of student achievement. The committee understands that it is often easier to maintain a high level of student achievement among students arriving with significant skills and knowledge and receiving significant support outside of school than it is to substantially improve the performance of students with significant academic deficits. The committee recognizes that one of the most important flexibilities in this reauthorization bill is the opportunity for each State to include growth in addition to status when measuring student achievement and creating accountability systems.

The committee recognizes that growth is not an end to itself and that, in measuring growth, it is critical to ensure a trajectory for a student to actually attain college- and career-readiness within a certain number of years. This concept of “growth to standard” and not growth normed against expectations of “similar students” is the only growth approach allowable within the committee bill parameters for accountability systems. States that wish to include growth in their accountability systems must propose, as part of their title I plans, how they intend to measure such growth and how many years they will allow for students to reach the level of on track to college- and career-readiness in order to count such students as having achieved sufficient growth. The bill also requires those States that choose to use growth in their accountability systems to expect growth for those students already on track to college- and career-readiness.

In addition to allowing States to include measures of individual student growth in calculating school success, the committee bill allows States to use measures of school gains in determining which schools are persistently low achieving. For example, a school that falls into the bottom 5 percent of schools in a State because it only has 45 percent of students on track to college- and career-readiness (which may include measures of sufficient individual student growth), may have made enormous gains in recent years. If the school only had 25 percent of students on track to college- and career-readiness 2 years ago it may not be wise to remove a principal or replace the staff responsible for such gains. Because the bill allows States to take those significant school gains into account when determining persistently low-achieving schools, that school would not likely be placed on the list of persistently low-achieving schools. In this way, the committee recognizes the importance of both student growth and school gains and encourages States to use such concepts in designing their accountability systems.
Multi-tier systems of support

The committee encourages States and LEAs to develop and adopt the use of multi-tier systems of supports (MTSS) for students. These are comprehensive systems of differentiated supports that include evidenced-based instruction, universal screening, progress monitoring, formative assessments, and research-based interventions matched to student needs upon which educational decision-making using student data can occur. The committee also encourages the use of the principles of universal design for learning (UDL) and school-wide positive behavioral interventions and supports (PBIS) to create positive conditions for learning.

State reservation for school improvement

To build State and LEA capacity for turning around low-performing schools, this bill allows the flexibility for States to continue to reserve up to 4 percent of their title I, part A, funds to carry out State and LEA responsibilities under section 1116. Ninety-five percent of the reserved amount must be used to carry out school improvement, either through subgrants or, with an LEA’s agreement, directly by the State.

Persistently low-achieving schools

ESERA ends adequate yearly progress (AYP) and shifts to focus Federal turnaround requirements on a more manageable set of schools that face the most significant challenges, defined as persistently low-achieving schools. Specifically, persistently low-achieving schools are defined as those schools that States identify in the bottom 5 percent of overall performance and those with the most significant achievement gaps between student subgroups. The bill requires States to identify the lowest-achieving 5 percent of non-high schools and the lowest-achieving 5 percent of high schools (including high schools with a graduation rate of less than 60 percent). Schools must be identified based on student achievement and, at the high school level, graduation rates. States may use the most recent year of data or the most recent 2- or 3-year average in making such determinations. LEAs must notify parents if their child’s school is identified as a persistently low-achieving school. States must compile the list of persistently low-achieving schools and make it publicly available. Schools that are identified as persistently low-achieving have a 5-year period for turnaround.

The bill does provide some flexibility for States with high levels of performance across all schools to not identify persistently low-achieving schools. States may apply to the Secretary for a waiver of the requirements for persistently low-achieving schools if they determine that all schools are performing at a satisfactory level based on student achievement and, at the high school level, graduation rates.

This bill envisions LEAs playing a critical role in setting supporting conditions for persistently low-achieving schools to improve. LEAs must conduct a needs analysis for each identified school. LEAs must collaborate with parents, the community, teachers and other school personnel, and may work with an external partner to determine which school strategies to implement in each identified school. LEAs must also implement a series of policies and practices to help these schools succeed, such as providing school staff with
professional development based on the needs analysis, conducting regular teacher and principal evaluations, and providing time for collaboration among instructional staff.

LEAs are also required to provide instructional staff with timely access to student data and to use such data to implement a research-based instructional program that analyzes student progress and performance and includes appropriate interventions for students. Recognizing that some elementary schools may be low-performing because students enter kindergarten below grade level and may have trouble catching up, the bill requires that, in the case of an elementary school with kindergarten entry, the needs analysis specifically measure school readiness. If school readiness is an issue, the LEA and school must coordinate with appropriate early childhood education programs and develop a plan to improve or expand early childhood options.

Persistently low-achieving schools cannot improve in isolation, and LEAs must provide the supports needed for success. These requirements reflect the best practices of those LEAs across the country that are working on their own and with partners to improve the lowest-performing schools.

Public school choice

The committee approved an amendment at mark-up offered by Senator Alexander that requires LEAs to provide students enrolled in persistently low-achieving schools with the option of transferring to another public school operated by the LEA, unless such an option is prohibited by State law. LEAs must provide this option not later than 3 months before the first day of the school year following identification. LEAs must also give priority to the lowest achieving children from low-income families.

Transferring students must be enrolled in classes and other activities in the same manner as all other children at the public school. LEAs must allow a child who transfers to another public school to remain in that school until the child has completed the highest grade in such school.

School improvement strategies

The committee is sensitive to complaints about the prescriptive nature of the accountability provisions in the No Child Left Behind Act. The committee also recognizes that the strict one-size-fits-all approach that was represented by AYP provisions have not led to improvement in many identified schools, particularly as the number of identified schools increase as the 2014 proficiency deadline approaches. To address these concerns, the committee bill focuses the federally prescribed interventions on persistently low-achieving schools in each State. The committee believes these schools are in need of significant change because many of them have been failing to improve student achievement for decades. To improve student achievement in schools identified as persistently low-achieving, the committee bill requires LEAs to implement an evidenced based turnaround strategy in each identified school. To address many of the concerns the committee has heard about requiring specific models, including those models currently in place under guidance for the School Improvement Grant (SIG) program, the bill provides LEAs multiple models from which to select, including flexibility for
rural LEAs. It also adds a set of LEA-level requirements to make the success of the strategies more likely.

Transformation strategy

The transformation strategy requires LEAs to replace the principal (if the principal has served in that role for more than 2 years) with a principal who has a record of success in increasing student achievement, or with a principal who is specially trained in turning around low-performing schools. This element is shared with the strategic-staffing and turnaround models. The committee believes that staff working in schools that have been identified as persistently low-achieving must be committed to implementation of the transformation strategy. Therefore, under this strategy, existing instructional and school leadership staff must reapply for their positions, and all instructional and school leadership staff hiring must be done at the school through mutual consent for at least the duration of the 5-year turnaround period. The term “mutual consent” means a process through which the principal or hiring team and the instructional staff member or school leadership staff member agree to the placement at a school. The principal or hiring team must be permitted to select instructional and school leadership staff for the school from an unrestricted pool of internal and external candidates based on an assessment of the qualifications of the individual candidates.

Strategic staffing strategy

As in the transformation and turnaround models, the strategic staffing strategy requires LEAs to replace the principal if s/he has served more than 2 years and allows the principal to staff the school with a turnaround team of her/his choosing. This approach recognizes the importance of having a core team of dedicated professionals who are bought into the leadership and strategy and will work together to see it through. The model is based in part on an approach that has demonstrated some success in the Charlotte-Mecklenburg school LEA in North Carolina.

Turnaround strategy

This strategy also recognizes the importance of human capital in turning around persistently low-achieving schools. As in the transformation and strategic staffing models, it requires that the school replace the principal (if the principal has served in that role for more than 2 years) with a principal who has demonstrated a record of success in increasing student achievement or is specially trained in turning around low-performing schools. It also requires that all of the teachers in the school be screened and that not more than 65 percent be retained.

Whole school reform strategy

The whole school reform strategy requires the implementation of an evidence-based strategy that ensures whole school reform. It must include a partnership with a strategy developer offering a school reform program that has demonstrated at least a moderate level of evidence, as shown by more than one well-designed or well-implemented experimental or quasi-experimental study, that the program will have a statistically significant effect on student out-
comes. The committee expects the Department of Education to determine which strategies meet these requirements, which could include use of the What Works Clearinghouse. The committee recognizes that a limited number of models have achieved this level of evidence, but hopes that strategy developers will begin to undertake the evaluation necessary for their reforms to qualify.

Restart strategy

Under the restart strategy, schools may convert to a charter, innovative, or magnet school. The committee believes that providing LEAs with the opportunity to convert a persistently low-achieving school to a magnet school or to create a new, innovative school, particularly in States that do not have charter school laws, provides additional flexibility to LEAs. In fact, schools in Lansing, Michigan, Cambridge, Massachusetts, Fort Meyers, Florida, and Clark County, Nevada have improved performance in struggling schools by converting those schools into magnet schools. Schools that are converted to charter schools must work in partnership with a nonprofit charter school operator, a nonprofit charter management organization, or a nonprofit education management organization that has a demonstrated record of improving student achievement for students similar to those served by the school.

The committee recognizes that restarting a school is disruptive for students enrolled in the school that is being converted and believes LEAs must prioritize the learning needs of the students in these schools. Therefore, LEAs that implement the restart strategy must ensure that the new school serves the same grade levels as the original school and enrolls any former student of the original school who wishes to attend. Additional students would be admitted by a random lottery system if more students apply for admission than can be accommodated.

School closure strategy

The school closure strategy requires LEAs to close the persistently low-achieving school and enroll the students in other schools, which may include charter schools that are within reasonable proximity to the closed school. The committee expects LEAs to enroll these students in high-performing schools not schools slightly better than the closed school.

Department of Education-approved strategy

The committee adopted an amendment offered by Senator Alexander to allow States to offer an additional school improvement strategy for identified schools that has been approved by the Department of Education. The committee expects the Department of Education to approve only comprehensive evidence-based models that include a combination of key elements. The committee’s intent is that this model cannot be used for the provision of private-school vouchers.

*Improvement in persistently low-achieving schools*

The committee recognizes that some persistently low-achieving schools will improve at a faster rate than others. States may want the flexibility to shift resources among schools during the identification period. Therefore, this bill provides that at any time during
the 5-year period, schools that have improved sufficiently would not continue to be identified by the State as a persistently low-achieving school. These schools may continue to receive such grant funds as are necessary for the full period of the grant so that these improvements can be sustained.

However, the committee believes that schools that are reclassified as persistently low-achieving after the 5-year period must implement the restart or school-closure strategy to ensure significant change in governance.

_School improvement funds_

The committee bill continues to support persistently low-achieving schools from two different sources—authorization of the School Improvement Grant (SIG) program and the required 4-percent set aside from title I, part A, funds at the State level for technical assistance and support for LEAs. Entities that may receive grant funds from the SIG include a State, a LEA that receives funds under this part and serves at least one eligible school, a consortium of such LEAs, or an educational service agency that serves at least one LEA.

States that receive school improvement funds must use 95 percent of these funds to carry out school improvement activities for eligible schools by either (1) awarding subgrants, on a competitive basis, to eligible entities for these activities; or (2) if the State chooses and the LEA agrees, directly providing the activities to the eligible school and LEA, or arranging for other entities to provide such activities to the school. Subgrants are awarded for a 5-year period.

LEAs must meet certain key conditions in order to receive funds. They must demonstrate that they have:

- adopted human-resource policies that prioritize the recruitment, retention, and placement of effective staff in eligible schools;
- ensured that eligible schools have access to resources to implement the school improvement strategies described above;
- identified opportunities to reduce duplication, increase efficiency, and assist eligible schools in complying with reporting requirements of State and Federal programs;
- facilitated alignment and coordination between early childhood education and care programs and services serving students who will attend eligible schools that are elementary schools; and
- developed an early warning indicator system that monitors school-level data, and alerts the eligible school when a student indicates slowed progress toward high school graduation, so that the school can provide appropriate student interventions.

Regarding the early warning indicator system, research has shown that before actually dropping out, most students at risk send strong “signals” that they are having trouble in school. One study found that almost half of dropouts sent “warning signals” as early as sixth grade. These signals can be found in standard data that LEAs keep on their students.

States may withhold funds from schools for the final 2-year period if they have not made progress on “leading indicators.” This new definition of “leading indicators” highlights the importance of
academic indicators (other than test scores) and school climate issues. Tracking leading indicators is important because improving student outcomes and closing achievement gaps takes time, and these data can therefore serve as intermediate measures of school improvement before the results show up in indicators like student test scores.

Achievement gap schools

The committee believes that it is important for States and LEAs to maintain a focus on subgroup accountability. Therefore, the bill requires that States identify the 5 percent of high schools and 5 percent of non-high schools that have the largest achievement gap among subgroups or the lowest performance by subgroups. Schools must be identified based on student achievement and, at the high school level, graduation rates. States may use the most recent year of data or the 2- or 3-year average. To ensure that LEAs are targeting their efforts appropriately, achievement gap schools cannot include schools identified as persistently low-achieving.

Because the student subgroups with the greatest gaps and that are furthest behind will differ from school to school, this bill does not prescribe specific interventions for the achievement gap schools. Instead, LEAs should select the appropriate intervention based on the needs of the population(s) farthest behind. LEAs are required, however, to implement a measurable, data-driven correction plan in each identified school. To increase transparency, LEAs must notify parents if their child’s school is identified as an achievement gap school.

The committee believes it is reasonable to expect a narrowing of any identified achievement gap within a 3-year period. Therefore, this bill puts additional pressure on LEAs that have not seen improvements by making any LEA with an achievement gap school that has been identified for 3 consecutive years ineligible for any priority, preference or special consideration for any grant, subgrant or other ESEA-funded program.

Blue Ribbon Schools

The committee believes that it is important for States to have the opportunity to identify and reward schools that are top performers. This bill allows States to identify Blue Ribbon Schools as the top 5 percent of the State’s public elementary schools and secondary schools based on the percentage of students who are on track to college- and career-readiness for English or language arts, and mathematics and, in the case of high schools, the school’s graduation rate. States must also look at the performance of student subgroups and, if the State chooses to measure student growth, the percentage of students attaining growth, and school gains. Schools identified as persistently low-achieving schools and achievement gap schools cannot be identified as Blue Ribbon Schools. States may reserve up to ½ percent of their title I, part A, funds to distribute rewards, on a competitive basis, to LEAs that serve one or more Blue Ribbon Schools so that the LEA may provide awards to such schools.

In addition to the possible financial reward, States must provide Blue Ribbon Schools with increased autonomy over the school’s budget, staffing, and time, and allow each Blue Ribbon School to
have flexibility in the use of any funds provided to the school under this act for any purpose allowed under this act, consistent with civil rights laws. LEAs must agree to use the award funds to improve student achievement and provide technical assistance to the lowest-achieving schools in the State that have characteristics similar to the Blue Ribbon School.

**PARENT AND FAMILY ENGAGEMENT**

The committee bill envisions several key changes to the provisions of section 1118, relating to parent and family engagement. The lens of current law is expanded to encompass family members, in addition to parents and those who act in loco parentis. This change is intended to acknowledge the role that non-custodial family members play in the life of a child, and to encourage LEAs to strategically engage these adults. The bill includes requirements for LEAs to collaborate with community-based organizations, employers, and other entities in the development and implementation of parent and family engagement strategies, and for parent and family engagement compacts to describe outreach to community stakeholders. These changes recognize research on the critical role that non-custodial family members, mentors, and other caring adults can play in the positive development of children, and especially children from low-income and minority communities.

**HIGHLY QUALIFIED TEACHER DEFINITION**

This bill includes a revised definition of a highly qualified teacher which codifies existing flexibility for certain types of teachers so that LEAs can effectively staff their schools. The definition incorporates existing regulations that make clear that a teacher enrolled in an alternate route to certification program is considered highly qualified, as long as the teacher has passed the State subject matter certification or licensure test; is making satisfactory progress towards obtaining full certification within 3 years; and is participating in a high-quality, State-approved teacher preparation program.

The definition also provides flexibility for teachers in rural areas who teach multiple subjects, allowing them to be considered highly qualified if they have met the definition for at least one core academic subject and becomes highly qualified in the additional subjects within 3 years. The definition clarifies that a science teacher who holds a broad field science or an individual field science certification or licensure can be deemed by the State as highly qualified. The definition also aligns the definition of a highly qualified special education teacher with the definition included in the Individuals with Disabilities Education Act (IDEA).

The committee adopted two amendments offered by Senator Murkowski, regarding the highly qualified teacher requirements. The first creates a special rule for small, rural, and remote schools so that teachers in these schools are permitted to meet the highly qualified teacher requirement through distance learning and team teaching. The off-site teacher must be highly qualified in the subject being taught, be responsible for 50 percent of direct instruction, monitoring student progress, and assigning students’ grades. The on-site teacher must be highly qualified in at least one other
subject, must be present in the classroom throughout the period of
distance learning, and must provide instructional support.

The second amendment by Senator Murkowski exempts the fol-
lowing teachers from meeting the highly qualified teacher defini-
tion:

• A teacher of Native American, Alaska Native, or Native
Hawaiian language or culture, whether the teacher is teaching
on a permanent, part-time, or occasional basis; and
• A teacher who is a Native elder or other authority on
American Indian, Alaska Native, or Native Hawaiian history
who provides instruction in such subject, whether on a periodic
or one-time basis.

The amendment also allows States to decide whether to require
a local tribe or tribal organization to certify the competence of the
language, culture, or history teacher.

The committee adopted an amendment offered by Senator Hagan
concerning the highly qualified teacher definition. The amendment
allows States to deem a teacher to be highly qualified if the teacher
is a participant in an exchange visitor program.

Finally, the committee signals its strong belief that teacher effec-
tiveness is paramount by allowing States to deem teachers with
high ratings under a rigorous teacher evaluation system to be con-
sidered highly qualified. The bill also allows States to waive the
highly qualified teacher requirements for current teachers if the
State can demonstrate that it has fully implemented a teacher and
principal evaluation system that is consistent with TIF parameters.

FISCAL REQUIREMENTS AND COMPARABILITY

The original intent of title I was to provide additional resources
to States and LEAs for the education of disadvantaged children. In
order to meet that intent, the law has required State and local
funds be spent comparably between title I and non-title I schools,
so that Federal dollars are supplementary.

However, the LEAs largest expenditure, actual teacher salaries,
have been excluded from calculations of comparability. The com-
mittee recognizes that the current practice of using average teacher
salary allows LEAs to meet the current Federal requirement for
comparability without actually spending State and local funds com-
parably between title I and non-title I schools. The effect of this
longstanding “comparability loophole” is that title I dollars are
often spent contrary to their intended purpose of providing supple-
mental funds.

The committee recognizes that there is research that indicates
significant disparities in spending between title I and non-title I
schools. The committee’s intent in section 1120 is to ensure title I
dollars are provided to schools with concentrated poverty as a sup-
plement to a comparable allocation of State and local funds. This
will ensure that taxpayer dollars serve the students for whom they
are intended. In addition, the accounting of real per-pupil expendi-
tures will increase transparency about the allocation of resources.
The committee expects this data will be accessible to parents, tax-
payers, LEAs, States and policymakers at all levels of government.
Recognizing that States and LEAs will need time to put the ap-
propriate fiscal mechanisms and data systems in place for school level
expenditures and other data to be reported accurately, LEAs will
not be required to comply with these changes until the 2015–16 school year.

The committee adopted an amendment offered by Senator Franken that clarifies that in closing the comparability loophole, the committee's intent is not to require LEAs to transfer school personnel in order to comply. The comparability provisions require that title I schools do not have fewer total State and local resources than the average of non-title I schools in a LEA. LEAs must consider all resources, not just salaries.

COORDINATION REQUIREMENTS

Similar to current law, the committee bill encourages LEAs to coordinate with early childhood education and care programs and providers, including Head Start agencies and providers of services under Part C of IDEA, on a variety of matters. Activities identified include transfer of records, with parental consent, from early childhood education and care programs to local schools; ongoing communication between early childhood education and care program staff and school staff for the purpose of ensuring developmentally appropriate instruction and shared expectations; joint training opportunities for early childhood education and care program staff and school staff; the development of transition procedures to improve school readiness for children; and parent-education efforts that help parents of young children understand the expectations of and services offered by the school in which their child will enroll.

EQUITABLE DISTRIBUTION

Current law requires LEAs and States to have an equitable distribution of teachers as a condition of receiving title I funds. The committee bill continues this requirement but provides more clarity on the data States and LEAs must collect and report to be in compliance with this requirement. Specifically, this bill requires that LEAs collect and report to the State on how teachers are distributed across schools for each quartile of schools in the State based on school poverty level and for high-minority schools and low-minority schools. LEAs must report on the distribution based on the following teacher characteristics: whether teachers are highly qualified; are inexperienced; have completed their teacher preparation program; are not teaching in the subject or field for which they are certified or licensed; and, where applicable, whether they are in the highest or lowest rating category based on a teacher evaluation system that meets the requirements laid out in title II, part C, the TIF program. States must then report this data, aggregated at the State level, to the Secretary. The State must also report on the percentage and distribution of teachers across the State based on at least two of these teacher characteristics or an index of these characteristics. States and LEAs are allowed to compile an index based on the data so that they may focus on one measure for reporting and compliance.

Research shows that teachers are the most important in-school factor driving student achievement. The committee believes that LEAs should do all they can to use data to address any inequities between schools. The committee strongly believes that LEAs should be most concerned with the distribution of effective teachers across schools so that all children have access to high quality instruction.
To that end, this bill takes steps to encourage States to move in the direction of developing rigorous teacher evaluation systems that measure teacher effectiveness. Title II, part C, the Teacher Incentive Fund provides competitive grant funds to States and LEAs that are working to develop such systems. The Race to the Top program also includes a teacher evaluation component if the Secretary elects to focus the competition in any given year on increasing the access of children from low-income families to highly rated teachers and school leaders. Finally, title II, part A, specifies that States and LEAs that want to use these funds for teacher evaluation must have systems in place that meet the requirements of TIF.

EDUCATION TECHNOLOGY

It is the committee’s view that the development and implementation of education technology programs and activities continue to be important allowable uses of title I funds. While technology can never replace effective teachers, the committee believes that educational technology can help provide: differentiated instruction and personalized learning to meet each student’s unique needs; engaging and updated content; timely information that educators can use to improve instruction and decisionmaking; enhanced parental engagement through the provision of online information; and access to courses often not otherwise available.

Therefore, the committee supports States, LEAs, and schools that choose to use title I program funds for technology and digital learning to best meet title I program goals and requirements.

HIGH SCHOOLS IN TITLE I, PART A

Persistently low-achieving schools

The committee recognizes that students of color are four times more likely than white students to attend a high school with a graduation rate under 60 percent. However, under the No Child Left Behind Act, approximately 40 percent of these high schools made adequately yearly progress. The committee bill addresses this disparity by classifying high schools with graduation rates under 60 percent as persistently low achieving in order to ensure that these schools undergo reform.

Lowest achieving 5 percent of high schools with poverty rates of at least 50 percent

The committee recognizes that, according to the Department of Education, only 10 percent of title I funds are allocated to high schools. For high schools, the bill uses a poverty rate of 50 percent as opposed to whether or not the school receives funding under title I, part A, in determining the school’s classification as a persistently low-achieving school because relatively few high schools receive such funding.

Allocation of funds within LEAs

High schools serve nearly one-quarter of low-income students. Local educational agencies are currently permitted to use one of several methods for calculating the percentage of students living in low-income families in allocating title I, part A funds, and 87 percent of LEAs use the percentage of students eligible for free or re-
duced-price lunch. Secondary school students are less likely than elementary school students to participate in the free or reduced-price lunch program. For example, a recent analysis found that for the 2008–9 school year, an average of 49 percent of students in public elementary schools received free or reduced-price school lunches, compared to 44 percent of students attending middle schools, and 36 percent of students attending high schools.

To derive a more accurate percentage of students in low-income families within secondary schools, guidance issued by the Department of Education allows LEAs to calculate this percentage using a “feeder pattern.” A feeder pattern takes the average poverty rate of the elementary schools that feed into the middle or high school, and applies that average to the middle school or high school. The committee recognizes the importance of ensuring the most accurate calculation of the percentage of secondary school students living in low-income families. To that end the committee bill requires LEAs to use the higher of the feeder pattern calculation or one of several other calculations in identifying eligible school attendance areas, ranking eligible school attendance areas, and determining allocations of title I, part A, funds.

Recognizing that the percentage of students from low-income families in high schools may be lower than the percentage of low-income students in feeder elementary and middle schools, the committee bill requires LEAs to rank eligible school attendance areas according to the percentage of students in low income families, a requirement carried over from the No Child Left Behind Act. The committee bill continues to require that schools that will first be served are elementary and middle schools with a percentage of students in low income families of at least 75 percent, and adds a provision to rank high schools with a percentage of students in low-income families of at least 50 percent. Such schools will be served in rank order. Provisions were included so that LEAs are held harmless and are not required to reduce the amount of funding provided to elementary schools and middle schools for the fiscal year preceding the data of enactment of the bill in order to provide funding to high schools.

Graduation rate calculations

Under the No Child Left Behind Act, the Government Accountability Office reported the use by States of a myriad of graduation rate calculations that made it difficult to get an accurate calculation of the percentage of students graduating from high school on time. In 2008, the Department of Education addressed this issue by requiring a consistent, accurate calculation of graduation rates (34 CFR 200.19(b)). The committee bill codifies and strengthens these regulations. Specifically, States and LEAs will calculate the percentage of students graduating from high school in 4 years, a calculation known as the “four-year adjusted cohort graduation rate.” They will also calculate the “cumulative graduation rate,” which gives credit to high schools graduating students, particularly students with disabilities, in more than 4 years. The committee recognizes the importance of calculating the cumulative graduation rate in LEAs drop-out prevention and recovery efforts. The committee believes that graduation rates are an important factor that should
be given significant weight in State accountability plans that are developed and utilized subsequent to the passage of this law.

**TITLE I, PART B: PATHWAYS TO COLLEGE**

**Subpart 1: Secondary school reform**

The committee recognizes that in today’s increasingly global economy, it is critical that students graduate from high school prepared and ready to succeed in college and the workforce. Unfortunately, many of our Nation’s high school students do not graduate on time or do not graduate at all. Additionally, low-income and minority students graduate at significantly lower rates than their peers. The Pathways to College Program would support the implementation of innovative and effective secondary school reforms both LEA-wide and in high schools with graduation rates below 75 percent that do not receive SIG funds. The bill requires grant applicants to implement reform strategies in the feeder middle schools serving these high schools because the committee recognizes that many of the issues facing at-risk youth begin in middle school.

The committee recognizes that some local educational agencies allow all students in a LEA the choice between which public high school they wish to attend upon matriculating from an elementary or middle school. In the case where a majority of the students at an elementary school or middle school do not go on to attend any single high school in the LEA, the committee intends for the definition of “feeder middle school” to be interpreted as an elementary or secondary school where a cumulative majority of students in the school go on to attend any of the eligible secondary schools in the LEA.

At markup, the committee adopted an amendment offered by Senator Hagan that requires recipients of Secondary School Reform Grants that offer dual-enrollment coursework to offer such coursework free of charge to low-income students.

**Subpart 2: Accelerated Learning**

The committee bill maintains support for Advanced Placement (AP) and International Baccalaureate (IB), while also providing more options for States and LEAs in achieving the goals of access to college-level coursework for low-income students. Changes to the definition of an AP or IB examination would allow States and localities the option to choose another evidence-based program model that increases student access to rigorous courses in core academic subjects, is benchmarked to college readiness, provides aligned end-of-course assessments, and includes educator resources to improve instruction.

The committee bill incorporates language enacted by Congress in the America COMPETES Act of 2007 and maintained in the reauthorization of that act in 2010. With these provisions, Congress has already acknowledged much advancement from evidence-based program models showing large increases in academic success for students who had access to rigorous high school core courses benchmarked to college readiness. The language in the committee bill is intended to provide more students with the opportunity for achieving college-readiness through rigorous courses than is provided in current law.
Title II: Supporting Excellent Teachers and Principals

TEACHER AND PRINCIPAL TRAINING AND RECRUITING FUND

Teachers

The bill makes several important changes to title II, part A, which has historically been used by LEAs for professional development and to provide for more teachers. States and LEAs may continue to use their funds for professional development, but this bill includes a definition of professional development that will drive better investments in this area. By including a tighter definition, this bill will help ensure that Federal funds will be expended on professional development that will improve teaching practice and student learning.

This bill also sets parameters on how LEAs may use these funds for class-size reduction. If LEAs choose to use funds to hire additional teachers to reduce class sizes, these teachers must teach in the early grades (kindergarten to third) and class sizes must be reduced to a size where the research shows that students will benefit.

The largest and most rigorous class size study, the Tennessee Student Teacher Achievement Ratio or STAR experiment, demonstrated that reducing class sizes in kindergarten through third grade to between 13 and 17 students led to statistically significant student achievement gains, and that these gains were more pronounced for minority and economically disadvantaged students. Follow-up studies showed that these gains persisted for students who had attended smaller classes.

The committee also recognizes the significance of high quality mentoring for new teachers and principals. Title II, part A, includes a definition to ensure that funds spent for this purpose will support strong mentoring programs and practices in the field. Mentoring is essential to retaining teachers as their decisions to remain in teaching are often impacted by the quality of the support teachers receive in their first years. And, as teacher evaluation systems continue to develop, LEAs can focus their efforts on retaining top performers.

This bill also moves the national conversation from a focus on teacher qualifications to teacher effectiveness. For this first time, teacher evaluation is included as one of the high-impact activities that States and LEAs may fund using title II dollars. States and LEAs that use these funds to support teacher and principal evaluation must have in place or develop rigorous teacher and principal evaluation systems that are consistent with the requirements laid out in TIF, which include regular observation, providing feedback to teachers and using student achievement in the evaluation. The committee recognizes that this is the first step in redirecting the Federal focus to teacher effectiveness and anticipates that in future authorizations, the committee may be able to go further in this direction as States and LEAs continue to make progress in this area and more is learned about high-quality teacher and principal evaluation.

This bill also recognizes the importance of equity and ensuring that students have access to effective teachers. States and LEAs are encouraged to use their title II, part A, funds to address any
inequities that may exist in the distribution of teachers based on their qualifications and, where available, on their effectiveness.

This bill streamlines the list of allowable activities in title II, part A, intentionally limiting them to those that are likely to have the greatest impact on teaching and learning. These activities include establishing beginning teacher induction programs, creating career ladders, increasing teacher capacity to evaluate student work, and recruiting teachers for high-need schools and subject areas—including through financial incentives.

The committee also intends that States and LEAs have the flexibility to identify their local teaching and learning needs and use Federal funds accordingly. In keeping with this intent, high-need subjects such as “mathematics” and “science” may be defined to include other STEM-related subjects, such as computer science, engineering and other related subjects.

The committee adopted an amendment offered by Senator Bennett that would allow participating States to set aside 1 percent of their title II, part A, funds to support the creation and oversight of teacher and principal training academies. These academies will be rigorously selective in who they admit, emphasize clinical training methods to prepare teachers and principals, and tie graduation to improving student academic achievement. In return for accepting this accountability, academies will be free from burdensome, input-based regulations. States will be required to establish a special entity to oversee teacher and principal training academies that has the authority to shut down low-performing programs.

**Principals**

Historically, States and LEAs have used very little of their title II, part A, funds to support the professional development or training of principals. This bill requires States to spend between 2 and 5 percent of funds to improve the performance and distribution of high-quality principals. States may use their funds to recruit and prepare principals, as well as train and support them, and provide compensation or other incentives to attract them to high-need schools.

In recognition of the importance of school leadership, the committee also includes support for principals as one of the activities that LEAs may direct their title II–A funds towards. Effective principals are critical to attracting and retaining effective teachers in schools, particularly those serving the most disadvantaged students. LEAs need to do as much as possible to get strong leaders into these schools, and Federal funds can help in this regard.

**Funding**

The committee adopted an amendment offered by Senator Burr that changed the title II, part A, funding formula by eliminating a “hold harmless” provision so that States that have grown in population and have more poor children will receive more funds.

**Education technology**

The committee maintains that professional development about and through technology is helpful in meeting the goal of college- and career-readiness. Therefore, the committee encourages States, LEAs, schools, and other entities involved in the preparation and
professional development of educators to ensure teachers and administrators have the knowledge and skills to effectively use technology and digital resources to improve teaching, learning, and administration.

**Principal Pathways program**

Research shows that school leadership is second only to teacher quality among school-related factors that influence student achievement. And while teacher quality has the greatest impact, principal quality determines whether schools can attract and retain effective teachers.

For these reasons, the committee adopted an amendment that was offered by Senator Franken to create the Principal Pathways program as subpart 5 of part A, to recruit, train and support principals in schools that are high-need, persistently low-achieving, achievement gap, or rural schools. This program replaces the current school leadership program. The Principal Pathways program improves upon current law by focusing on recruitment and training practices that have been demonstrated to strengthen school leadership.

The new program improves the rigor of the application process for school leadership grants. There is a priority for entities that have a record of success of preparing principals who go on to improve student outcomes in eligible schools. In addition, the program increases the accountability of grantees for achieving results. Grantees will compete to renew their grants and scale up their efforts based on their record of improving student outcomes. Grantees will also use data on the performance of their programs for continuous improvement.

The committee also recognizes that it is essential to build the leadership capacity necessary to turn around persistently low-achieving schools. The program will establish a school turnaround leadership academy with a focus on recruitment, training, placement and support of leaders specifically focused on turning around persistently low-achieving schools and dissemination of research and information on effective school turnaround leadership.

**TEACHER PATHWAYS TO THE CLASSROOM**

Title II, part B of the committee bill replaces the Transitions to Teaching program, which was targeted at programs preparing alternate route teachers, with the Teacher Pathways to the Classroom program, which is focused not on how teachers enter the classroom, but whether they are effective in teaching students. The most recent research indicates that the pathways to the classroom—whether it be a traditional, alternate route or residency model—is not predictive of the teachers’ success in the classroom; what matters is the quality of the preparation program. Indeed, a 2009 randomized study by Mathematica Policy Research found no statistically significant difference in performance between students of teachers prepared through alternate routes compared to those prepared through traditional routes to teaching.

Given this research, the committee believes that Federal funding should be provided to teacher preparation programs based on the quality of the teaching candidates it produces, as opposed to the characteristics of the teaching program itself. The competitive
grant program in this bill allows high-performing teacher preparation programs to compete for Federal funding to recruit and train new teachers in high-need subjects and fields to teach in high-need schools. High-quality traditional route programs will be able to compete on equal footing with alternate route programs with proven records of success, such as Teach for America and the Teaching Fellows programs operated by The New Teacher Project, as well as teacher residency programs with a strong record of producing candidates that increase student achievement.

**Teacher of high-need subjects**

The committee intends, in section 2201(b)(2), that State and LEAs have the flexibility to identify their local teaching and learning needs and use Federal funds accordingly. In defining mathematics and science as high-need subjects, the committee intends to include other STEM-related subjects, such as computer science, engineering and other related subjects.

**TEACHER INCENTIVE FUND PROGRAM**

The committee bill authorizes the Teacher Incentive Fund (TIF), a program that was first authorized in 2006 through title V, part D of the Departments of Labor, Health and Human Services, and Education, and Related Agencies Appropriations Act, but makes important changes to the program. The TIF program currently provides grants to States and LEAs to develop or improve performance-based compensation systems for teachers and principals. As an authorized program in ESEA, TIF will require that grantees also develop or improve rigorous, transparent and fair teacher and principal evaluation systems.

The committee strongly believes that the TIF program, as a competitive grant program, can lead the way in driving improvements in teacher and principal evaluation across States and LEAs. The Federal focus has shifted from qualifications to effectiveness, and the TIF program has been expanded to include teacher and principal evaluation accordingly to reflect this new and critical focus. Improving teacher and principal evaluation systems is the key to improving teaching practice and student learning and can be linked back to teacher preparation programs so that LEAs can make better decisions about which programs they partner with to hire teachers.

Grantees must develop teacher and principal evaluation systems based on a set of limited, but critical, parameters. These evaluation systems must provide meaningful feedback to teachers and principals; establish multiple categories of teacher and principal performance; evaluate teachers regularly using multiple measures; inform decisions about professional development; be regularly reviewed to ensure that the evaluations provide meaningful differentiation; and evaluators must be trained. The committee believes that, given the nascent state of evolution of teacher evaluation policy and practice, it is appropriate at this time to focus on using it to inform professional development, not personnel decisions. The committee is concerned first and foremost with encouraging States and LEAs to develop robust teacher evaluation systems that provide accurate information about teacher performance and guide improvement. The committee believes that requiring States and LEAs
to use this information for personnel decisions is premature and may result in some “gaming” of the system if there is too much pressure on it in its early stages of development.

The bill also specifies that, for teachers, evaluation systems must be based in significant part on student achievement; include observations of classroom teaching; and may include other measures of student achievement and teacher performance. For principals, evaluations must be based in significant part on student achievement and student outcomes (e.g., high school graduation rates); evidence of strong instructional leadership and support to teachers and other staff; and may include other measures of principal performance, such as parent and family engagement.

The committee believes strongly that incentivizing States and LEAs to implement rigorous teacher and principal evaluation systems tied to professional development is one of the most important policies in this bill that will improve teaching and school leadership across the country and lead to better student outcomes.

The committee also believes that the requirement in title II–A that States and LEAs that choose to use these funds for evaluation must meet the evaluation parameters laid out in TIF is significant. These parameters are critical to rigorous teacher and principal evaluation systems, and the Federal Government must promote alignment to these parameters not only in competitive grant programs like TIF but also, to the extent possible, in formula programs like title II, part A.

Title III: Language Instruction and Academic Content Instruction for English Learners and Immigrant Students

The changes reflected in title III are designed to better leverage funds to supplement the use of evidenced-based programs and practices, including professional development, to support the acquisition of English and the ability for English learners to graduate college- and career-ready. Key reforms include updating the formula used to allocate resources to more accurately provide resources to the school and LEAs serving English learners; requiring States to maintain existing investments in educational supports for English learners; and calling attention to long-term English learners to ensure that underserved students receive additional instructional supports. In order to allow for better service delivery to students at all levels of English proficiency, States and LEAs are encouraged to continue to monitor the progress of English learners throughout their school careers, including early childhood education and care settings and recognize the developmental nature of second language acquisition.

States are no longer required to assess progress according to established annual measurable achievement objectives, but they are still responsible for ensuring that English learners attain English proficiency and find ways to demonstrate such proficiency in core academic subjects.

This title also authorizes national projects, including partnerships to support the pursuit of advanced degrees for individuals and in fields that will support improved quality and increased access to programs designed to support the learning and development of English learners. It is the intent of these strategies to support capacity building efforts to identify and better disseminate effective
strategies for supporting the learning and development of English learners.

Title IV: Supporting Successful, Well-Rounded Students

IMPROVING LITERACY INSTRUCTION AND STUDENT ACHIEVEMENT

While reading remains one of the core academic subjects tested by States and LEAs, the committee is concerned that effective comprehensive literacy instruction is often not implemented well at both the State and local levels. Literacy is the cornerstone of all learning, and a literacy-rich environment is important for academic success. As such, it is the committee's desire to provide assistance for the meaningful implementation of effective literacy instruction articulated across the grades and across the curriculum. Data show that adequate reading and writing skills are correlated with on-time high school graduation. Yet data also show that only half of all 12th graders are ready for college level reading, with only 21 percent of African-American students prepared to read and write at a post-secondary level. To address these concerns, the committee believes the comprehensive birth to grade 12 approach and specific grade span targeting within the Improving Literacy Instruction and Student Achievement program will improve literacy instruction and thus increase college- and career-readiness and graduation rates for all students.

The new Improving Literacy Instruction and Student Achievement program responds to the clear need for literacy instruction and high quality support for students at all ages, development and grade levels. This legislation provides for high-quality literacy instruction that will help States strengthen the literacy skills of all students from birth through high school. The committee bill includes planning and implementation grants to States to implement comprehensive literacy instruction programs for children from birth to grade 12.

Grants to support local comprehensive literacy programs will be distributed to States by formula if the appropriation for this program exceeds $500 million (below this amount, grants are awarded to States competitively). States will then competitively distribute funds to LEAs and early childhood education providers. Funds will also be used to support State Literacy Leadership Teams to develop comprehensive, statewide strategies for improving literacy. States and LEAs will also be required to provide high-quality, research-based professional development opportunities for educators, including job-embedded support from literacy coaches. Overall States and LEAs will be supporting evidence-based practices to improve literacy and writing, including targeting students reading and writing below grade level.

Today, more than 6 million of America's middle and high school students are struggling readers. Therefore, this program not only focuses on literacy development in early childhood education and care programs and through the elementary grades, resources are also made available to middle- and high-school teachers to ensure they have the skills, knowledge, and support necessary to recognize and respond to the literacy needs of all students.

Additionally, the committee would like to clarify that eligible entities that receive subgrants in support of birth through kinder-
garten entry literacy may utilize funding to provide targeted instruction for children whose early literacy skills are below the appropriate age or developmental level as demonstrated by a screening assessment.

IMPROVING SCIENCE, TECHNOLOGY, ENGINEERING, AND MATH INSTRUCTION AND STUDENT ACHIEVEMENT

To ensure future competitiveness in the global economy, America requires a workforce highly skilled in science, technology, engineering and mathematics (STEM). Yet, our education efforts in these critical areas lag behind those of other advanced nations. The committee bill includes a new Improving Science, Technology, Engineering, and Math Instruction and Student Achievement program as part B of title IV that will improve student academic achievement in STEM by:

- Getting students engaged and excited about STEM subjects through high-quality instruction, opportunities to participate in STEM competitions, and exposure to STEM careers;
- Helping more students access high-quality STEM courses and learning opportunities;
- Improving the quality and effectiveness of classroom instruction by recruiting, training, and supporting excellent STEM teachers and providing robust tools and supports for students and teachers; and
- Closing student achievement gaps and preparing more students to be on track to college- and career-readiness and success in STEM subjects.

Grants will be distributed to States (alone or in partnership with other States, non-profit entities, institutions of higher education or educational service agencies) by formula if the annual appropriation exceeds $500 million; below this amount, grants will be awarded to States competitively.

The committee recognizes STEM education as a national priority in the country's elementary and secondary education system. For the purposes of this title, the committee would like to clarify that "STEM education" encompasses science, technology, engineering and mathematics as well as other academic subjects, such as computer science, that build on these disciplines, are important to scientific discovery, business and industry and that States identify as part of the State analysis required by section 4204(b)(1).

The committee recognizes the importance of increasing access for students who are members of groups underrepresented in STEM and requires that States describe how grant activities will increase access for such students. It is the intent of the committee that students who are members of underrepresented groups would include female students, minority students, students who are English language learners, children with disabilities, and students from low-income families.

IMPROVING ACCESS TO A WELL-ROUNDED EDUCATION

Current Federal approaches to enriching the curriculum have been in the form of separate, uncoordinated discretionary grant programs for individual academic subjects that had significant benefits for a relatively small number of LEAs that were able to successfully compete for funding. But these single-subject competitive
programs did not leverage broader change in State and local policies and practices in ways that considered all academic subjects offered, as a whole. Therefore, the committee adopted an amendment offered by Senator Casey to create the Increasing Access to a Well-Rounded Education program. This program will require applicants to provide access to a well-rounded curriculum by giving grants to States, in partnership with LEAs, educational service agencies, and non-profit organizations, to increase the access of low-income students to a well-rounded education. The grants will be distributed by formula when appropriations for the program reach $500 million, and will be awarded competitively below that. The committee bill eliminates a number of programs that promote instruction in a variety of subjects, including Arts in Education, Civics, Teaching American History, Economics Education, and the Foreign Language Assistance Program. This program will allow States to continue to build teacher capacity and increase the access of low-income students to a well-rounded education, including in the arts, physical education, financial literacy, health education, foreign languages, civics, history, and environmental literacy.

SUCCESSFUL, SAFE, AND HEALTHY STUDENTS

The committee believes that children should attend schools that are safe, drug-free and that foster positive learning environments. As such, the committee bill authorizes the Successful, Safe, and Healthy Students program as part D of title IV, which will advance student achievement and positive child and youth development by promoting student health and wellness, preventing bullying and harassment, violence, and drug use, and fostering a positive school climate. States receiving grants must establish a statewide physical education requirement, and require all LEAs to put in place anti-bullying and harassment policies.

To support positive conditions for learning, States will receive funding to implement programs to promote student health, fitness, and mental health, and to prevent drug abuse and school violence. To support data-driven prevention and foster student success, the committee bill authorizes a minimum of $30 million for formula grants to help all States develop or enhance systems that will give local leaders the information they need to improve the conditions for learning in their schools and communities.

These data systems will provide to each State the support necessary to measure the conditions for learning in each school. Resources will also be available for grants to LEAs to establish policies and activities to improve the conditions for learning in each of their schools. This legislation gives States and LEAs the resources and opportunities to create safe, healthy schools that will enhance the academic achievement of students.

It is the committee’s intent that the Successful, Safe and Healthy Students program will advance student achievement and promote the physical, mental, and emotional health of students throughout the Nation. Grants could support activities that reduce violence in schools, prevent bullying and harassment, help students make responsible choices about drugs, tobacco, and alcohol, and create positive school environments.

It is the committee’s intent that grant funds provided by the Successful, Safe and Healthy Students program support the creation of
the essential conditions for learning in schools, including adequate physical activity, positive mental health, and safe environments. Those conditions include physical and emotional safety for both students and school personnel and promote positive character development in our youth. Schools with the essential conditions for learning also provide for opportunities for good nutrition, and are free of violence, harassment, and bullying. These schools are free of weapons and prevent the use and abuse of drugs and alcohol. The committee understands that students experience violence in many forms, including dating violence. It is the intention of the committee that funds allocated for violence prevention activities could include activities to reduce incidences of dating violence between students.

21ST CENTURY COMMUNITY LEARNING CENTERS

The committee recognizes that students, particularly those who are furthest behind, benefit from more time for learning. Programs that significantly increase the total number of hours in a regular school schedule can lead to gains in student academic achievement. Yet American students spend about 30 percent less time in school than students in other leading nations. Students in China, Japan, and South Korea who attend school 40 days more on average than American students significantly outperform American students in math and science.

As such, the committee bill gives eligible applicants the authority to apply for grants to fund (1) activities currently allowed under the program (before-school, after-school, and summer-learning programs); (2) school-based extended learning programs that are optional or for targeted groups of students; or (3) a redesign and expansion of the school day, week or year, for all students across all grades, to creatively integrate academic and enrichment strategies. The bill expands the current uses of the program to include expanded learning time because the committee believes that it is a separate, but related concept, in that the goal is to extend, rather than supplement learning time.

Additionally, the committee believes that evaluation data will yield valuable information on the models and their implementation. While the committee supported Senator Whitehouse’s amendment to prohibit the U.S. Department of Education from prioritizing one model over the other, it emphasizes that this should not be construed to prohibit the Department from providing best practice information and technical assistance under the 21st Century Community Learning Centers program.

The committee believes that strong partnerships between schools and the community are an important aspect of this program. To make partnerships between community-based organizations and LEAs most effective, the committee believes partnerships between local education agencies, schools and community-based organizations should be marked by active collaboration, including the appropriate sharing of relevant student data among the schools and organizations, and any partnering entities, while complying with applicable laws relating to privacy and confidentiality. Additionally, while the committee supported Senator Whitehouse’s amendment to clarify that either the LEA or the community partner could be the lead applicant and fiscal agent, the committee believes that
public agencies are important partners and suitable lead applicants and fiscal agents and intends to rectify this omission.

Finally, it is the committee’s intent that funds provided under this section can be used for high quality mentoring activities. Mentoring programs based on scientifically valid research have shown to be a cost-effective strategy for improving academic performance, reducing dropout rates, preventing substance abuse, and promoting mental health and self-esteem.

PROMISE NEIGHBORHOODS

The committee believes, by authorizing the Promise Neighborhoods program, that communities can leverage Federal funds to design and implement a comprehensive pipeline of existing educational and community supports that fits their community’s unique strengths and responds to their unique needs, with the goal of ensuring college- and career-readiness for all children in the neighborhood.

The committee bill requires grantees to combine high-quality education with community- and family-based supports, coordinating a continuum of services from birth through college to career. Research demonstrates that young people are more likely to succeed in school when their comprehensive needs are met. The committee’s Promise Neighborhoods program would require grantees to provide high-quality early learning programs, effective family and community engagement, and better services for special populations; to leverage public and private sector support; and to coordinate the services and resources of local nonprofits, schools, health centers, universities, and foundations. It authorizes 5 year, renewable grants to ensure that communities scale up their services and support a new generation of educated workers.

Promise Neighborhoods Partnership Grants

The Partnership Grants program is intended to support grantees as they build continuums of care and is modeled after Harlem Children’s Zone (HCZ) in New York City. The HCZ began as a single-block pilot in the 1990s and has since expanded to 96 blocks, covering most of Harlem. Today HCZ operates two charter schools and leverages a wide range of public, nonprofit, and philanthropic funds to provide wrap-around services to over 10,000 youth and about the same number of adults each year. The committee recognizes that, although HCZ has been successful, Federal funds and direction were not the cause. To replicate this work in other eligible neighborhoods will require local community leaders to combine available Federal resources with private, State, and local funding. Thus, the program includes a significant matching-funds requirement.

As they offer pipeline services, as defined in the committee bill, the committee anticipates a wide range of working arrangements in the Promise Neighborhoods Partnerships Grants in subpart 1, with different roles and responsibilities carried out by community-based organizations (CBOs) and LEAs in different applications, though all eligible entities must include an LEA in partnership with at least one nonprofit. The requirement for partnership in application exists because: (1) the performance metrics for the program are intended to span the full continuum of care; (2) the education-reform aspects of the Promise Neighborhoods program can
be carried out most effectively with local schools as a willing partner.

The services grantees would coordinate are all directed toward giving all children in the neighborhood the skills they need to succeed in school, college, and careers. Grantees can use funds to coordinate existing services including:

- pre-natal education and support for expectant parents;
- high-quality childhood education and care and education opportunities, including by strengthening the early care workforce in the neighborhood and improving data systems;
- high-quality schools and before- and after-school programs;
- support for the transition to elementary school, between elementary school and middle school, and from middle school to high school;
- family and community supports;
- college- and career-readiness activities, such as help with the college admissions process; and

However, the committee does not intend for grantees to be required to track or provide assistance to participants throughout their careers.

Subpart 2: Promise School Grants

The Promise School Grants described in subpart 2 are intended to support partnerships as they create continuums of care revolving around schools in poor communities. As with the Partnership Grants, the committee anticipates a wide range of working arrangements in the Promise School Grants. These are school-centered grants, though the number of schools initially included in the applicant’s plan will vary consistent with the requirement to provide sufficient size and scope to serve the entire neighborhood. The extent to which pipeline services will be located in or provided at the school may also vary, especially in the case of applications led by charter schools that are their own LEA. However, the committee intends for Promise School grantees to ensure the sustainability of the programs they offer and consider ways to expand the area served over time. The committee anticipates that LEAs leading Promise School applications will have a successful record of partnership with CBOs; other Federal, State, and local agencies; and local employers or philanthropies. The committee encourages LEAs applying for Promise School grants to see them as an opportunity for transformation rooted in a distressed neighborhood that may catalyze partnerships and systemic reform throughout the LEA.

Performance metrics

The committee bill requires the Secretary to establish performance metrics for both grant programs. The committee intends for any such metrics to span the continuum of care, from prenatal care and parent education to college entry and retention; to hold grantees accountable for successful transitions, such as by tracking rates of kindergarten readiness or through the use of early warning indicators in the middle grades; and to encompass measures of community partnership and family engagement, such as the percent of parents and family members who participate in school events or the number of local businesses engaged by partnerships.
The committee, in authorizing Promise Neighborhoods, recognizes that many communities struggle to align resources to create the pipeline services envisioned under this program, but believes that successful examples—such as HCZ or the hundreds of community schools located around the Nation provide guidance on successful implementations and can be instructive to other communities as they consider applying for these grants. As such, great emphasis is placed on applicants seeking and securing non-Federal and non-public funds in applying for this grant, as well as a full accounting of the services that already exist that can be aligned with grantee goals. The Federal investment should not be viewed as the driver of the services envisioned under this program, but a contributor and catalyst for communities to take stock of their existing resources and deploy them in a coherent, comprehensive way.

PARENT AND FAMILY INFORMATION AND RESOURCE CENTERS

Renamed Parent and Family Information and Resource Centers (PFIRCs) to acknowledge the role that both parents and non-custodial family members play in supporting children’s educational progress, the committee bill narrows the program’s goals and functions to supporting States. PFIRCs are also required to help support the community of practice related to effective parent and family engagement strategies, and to work, to a lesser extent, with LEAs, schools, parents, family members, and community members. The bill requires PFIRCs to engage in a selection of high-impact activities, such as supporting States as they work with high-need LEAs to improve their local parent and family engagement plans, providing parent institutes or other leadership training for low-income families, and coordinating parent and family engagement strategies statewide. Grantees also must now meet performance goals to receive continued funding and be eligible for future competitions.

It is the committee’s intent that, while applications for grants from consortia consisting of nonprofit organizations (including statewide organizations) and State or LEAs are welcome, the nonprofit organization is to serve as the fiscal agent.

PROGRAMS OF NATIONAL SIGNIFICANCE

The committee notes that while many programs in this act are targeted at the State level, certain national providers can also play a role by employing an infrastructure that reaches across State lines. The committee bill authorizes grants to State, LEAs, institutions of higher education, or other public and private non-profit agencies, organizations, and institutions to carry out programs to increase students’ college- and career-readiness, to improve instruction, and to invest in activities that improve student achievement in a variety of domains and subjects. The committee notes that, in the past, award recipients with similar capabilities as those sought under the Programs of National Significance have been funded through congressionally directed, earmarked spending. The Program of National Significance’s funds are not an opportunity for these traditionally specified groups to continue dedicated funding, but an opportunity for other groups of similar missions and capabilities to apply and receive funding through the competitive process.
Title V: Promoting Informed Parental Choice and Innovative Programs

RACE TO THE TOP

The committee believes that the Race to the Top program, part A of title V, has shown promising results in bringing State and local leaders together to address education reforms. To build upon this promise and build toward meaningful reform, this act authorizes a new competitive grant program to incentivize comprehensive reforms and innovative strategies that are designed to lead to improved academic achievement for all students. Each year that funds are available, the Secretary will choose at least one priority from among the following critical educational goals for each competition:

- increasing the access of children from low-income families to highly rated teachers and school leaders, including by developing and implementing a teacher and principal evaluation system;
- strengthening the availability and use of high-quality and timely data to improve instructional practices, policies, and student outcomes;
- implementing college- and career-ready academic standards and strategies that translate such standards into classroom practice;
- turning around the schools served by the lowest performing schools;
- supporting successful conditions for the creation, expansion, and replication of high-performing public and autonomous charter schools that serve students from low-income families;
- providing equitable resources to high-poverty schools; and
- improving school readiness by increasing access of children from low-income families to high-quality early learning programs and creating an integrated system of high-quality early learning programs and services.

As with the funding priorities, the Secretary will also choose what entities will be eligible for each year’s competition. Eligible entities may include States, high-need LEAs and consortia of either, on the basis of their record of innovation and reform, the quality of their plan, and evidence of collaboration, among others. The application review and selection process must be equitable and transparent, and priority will be granted to rural high-need LEAs or consortia, as well as any eligible entity that provides a full-day, full-year kindergarten program to all kindergarten students, or to all kindergarten students from low-income families. The duration of the grants will be up to 4 years and continued funding will be conditional upon the grantees’ demonstrated progress in implementing their plans for reaching the performance targets and their objectives on time.

The committee believes that Race to the Top applications from States and consortia of States must be signed by each State’s Governor, the State’s chief school officer, and the president of the State board of education (if applicable). For any grant competition with the goal of improving early childhood education and care, States and consortia of States can award subgrants only to public or private nonprofit agencies and organizations; however, it is the committee’s intent that any public or private early childhood education
program, as defined in the Higher Education Opportunity Act (P.L. 110–315), is eligible to receive funds from such subgrants for activities consistent with any purpose included in the eligible entity’s plan described in section 5104(a)(3).

INVESTING IN INNOVATION

The Investing in Innovation program, part B of title V, was initially authorized under the American Recovery and Reinvestment Act. In codifying and building upon the program, the committee recognizes the importance of expanding the implementation of, and investment in, innovative practices with a demonstrated impact on improving student achievement, closing achievement gaps, increasing high school graduation rates, improving teacher and school leader effectiveness, or improving school readiness. In including a set-aside for rural LEAs the committee recognizes the unique needs of such LEAs and intends to ensure the development of innovative practices targeted toward their needs.

PUBLIC CHARTER SCHOOLS

The Federal charter schools program, part D of title V, has been an instrumental complement to the State and local development of innovative and successful public school models across the Nation. In this act, the program is updated to reflect lessons learned since the last reauthorization and to address the overwhelming demand, as evidenced by growing waiting lists, for the expansion and replication of high-performing charter schools. The program provides 85 percent of funding for the charter school grants and 15 percent for charter school facilities.

The committee believes that Federal charter school dollars should fund high-performing charter schools, ensuring that scarce resources support schools that raise student academic achievement. With a focus on improving the quality of the sector and investing in proven models of success, the charter school grants program will support the creation, expansion, and replication of high-performing charter schools through competitive grants to States, LEAs, authorizers, and charter management organizations.

The definition of a “high-performing charter school” requires applicants to have goals that are higher (new schools) or results that are significantly higher (existing schools) than demographically similar schools in the State for all students and for subgroups of students in student academic achievement and growth, consistent with section 1111, and in the case of a high school, graduation rates and college enrollment and persistence. The definition also requires such charter schools to have similar or higher student retention rates. A minimum of 65 percent of funds available for the charter school grants must be awarded to States. It is the committee’s belief that States are ultimately responsible for authorizing charter schools and, as the recipient of the Charter Schools Program funds, still provide the innovative approaches to chartering that can inform best practices in other States. Grants will be awarded for an initial period of 3 years, and may be renewed for an additional 2 years if the grantee is making satisfactory progress in meeting the grant’s objectives.

To ensure that limited Federal resources are targeted to charter schools with a commitment to, or a record of, strong academic re-
sults, the reauthorized program requires high goals of student academic achievement for all student subgroups and meaningful community outreach to parents and families. It also incentivizes sound State policies for supporting charter schools but also for overseeing, monitoring and holding them accountable; promotes strong performance-based authorizing policies that are transparent and effective in closing down unsuccessful schools, and ensures that charter schools ensure equitable access to, and effectively serve the needs of, students with disabilities and English Learners. Priority will be granted to applicants that propose to serve students from low-income families.

The legislation establishes rigorous application requirements and selection criteria, with an emphasis on authorizing. For example, the selection process must examine the applicant’s record of closing low-performing charter schools and the State’s requirements for, and enforcement of, high-quality standards for charter school authors, including standards for rigorous and periodic reviews. Priority is given to States that ensure that all charters get a thorough review at least every 5 years.

The committee encourages the enrollment of students with disabilities and English language learners in charter schools and, recognizing the under-enrollment of such students in charter schools nationally, seeks to ensure that charter schools are accessible to all students on an equitable basis. To this end, the legislation includes critical provisions so students with disabilities and English learners are served effectively by charter schools. In addition to subgroup performance contract goals, the legislation requires all applicants to describe how they will ensure that each charter school provides equitable access and effectively serves the needs of all students, including children with disabilities and English learners, and implements outreach and recruitment practices that include families of such students. In addition, the selection process must examine the quality of the application for supporting charter schools, through such activities as technical assistance, to improve student academic achievement and growth for each subgroup and to promote effective outreach to, and recruitment of, students with disabilities and English learners, and their parents and families.

The legislation also requires that grantees provide support and technical assistance in effectively serving the needs of students with disabilities and English learners, implement outreach and recruitment practices that include their families of students who are children with disabilities and English learners, and directly, or through a partnership with a nonprofit, develop and implement parent, family, and student information, outreach, and recruitment programs to provide information and support to parents, families, and students about the public school choice options available to them. Overall, this legislation reflects the committee’s commitment that students with disabilities and English language learners have equal access to high-performing charter schools.

The charter school facilities program will support eligible entities to improve access to facilities and facilities financing for high-performing charter schools and assist them in addressing the cost of acquiring, constructing, and renovating facilities. Eligible entities include States, LEAs, nonprofit organizations, State financing authorities, or a consortium of such entities. Competitive grants will
be made for innovative facilities financing programs, including credit enhancement, open-facilities-access programs, making available renovated or adapted space, leveraging State and local facilities funding, and State per-pupil facilities aid programs. At least 65 percent of the funds must be expended for credit enhancement grants.

Title VI: Promoting Flexibility; Rural Education

The committee recognizes the Federal Government’s declining capacity to maintain historically high levels of education funding. It further recognizes the challenges LEAs face in using the current Federal funding for their own unique, LEA-specific needs with specific requirements under each Federal formula grant program. ESERA builds upon the current law transferability provisions allowing LEAs to transfer as much as 100 percent of funding between ESERA formula grant programs. The committee maintains current law restrictions on moving funding out of certain formula funds, but updated to place restrictions on moving funds out of titles I, III, VII, or VIII.

The committee, recognizing the continued unique challenges facing rural LEAs reauthorizes the Rural Education Achievement Program (REAP), with changes. Since the 2000 Decennial Census, improvements have been made to the geocoding technology necessary to more accurately determine which areas are rural and which areas are urban based upon proximity to metropolitan areas, rather than on population figures alone. Technological advancements as well as further work in accurately determining rural areas of the country by the Office of Management and Budget (OMB) provides greater confidence to the committee that rural education program funds will be better targeted and focused on truly rural areas, far from urban and metropolitan fringes.

Of significance, the committee updated the locale codes to 33 (territory 35 miles away from an urban cluster), 41 (Census territory that is less than or equal to 5 miles from an urbanized area, as well as rural territory that is less than or equal to 2.5 miles from an urban cluster), 42 (Census territory that is more than 5 miles but less than or equal to 25 miles from an urbanized area, and rural territory that is more than 2.5 miles but less than or equal to 10 miles from an urban cluster), and 43 (Census rural territory that is more than 25 miles from an urbanized area and is almost more than 10 miles from an urban cluster).

Further, the committee provided flexibility for LEAs that qualify both for the Rural Low-Income Schools (RLIS) and Small Rural School Achievement (SRSA) programs by providing LEAs the option of choosing the program for which they would prefer to receive funding.

Title VII: Indian, Native Hawaiian, and Alaska Native Education

The changes reflected in title VII of the committee bill are designed to better focus the use of funds on programs and activities that meet the unique cultural, language, and educational needs of American Indian students to ensure that such students graduate college- and career-ready.
Key reforms included in this reauthorization include additional flexibility to enable tribes and tribal educational agencies more authority over the education and development of Native students; a focus on the provision of high quality early childhood education and care services to ensure that children begin school ready to learn and recognition of the critical role tribal leaders can play in the education and development of Native students.

This title authorizes the use of funds to support the preservation, reclamation and restoration of Native languages, acknowledging the role that these practices can have in supporting the academic achievement and also directs the Secretary of Education and the Director of the Bureau of Indian Education to conduct a study to improve collaboration among these two entities to better support the provision of educational services to tribes and Native students. Recognizing the challenges facing Native students and communities, it is the committee's intent that these improvements strengthen collaboration between the Department of Education and the Bureau of Indian Education in ways that recognize and preserve tribal sovereignty and that support student achievement and development.

Improvements made to Part B are designed to better focus the Native Hawaiian Education Council's efforts on addressing the education and workforce needs of Native Hawaiian students through redesigning the composition of the Native Hawaiian Education Council and refocusing its purpose to ensure proper coordination of educational and related services and programs available to Native Hawaiian students.

The committee adopted an amendment offered by Senator Murkowski to part C that is designed to leverage existing assets in Alaska to improve academic achievement as well as college- and career-readiness.

Title VIII: Impact Aid

ESERA makes significant changes to the Impact Aid program. First, the committee removed the overly complicated “highest and best uses” standard for identifying and then calculating the tax assessment classifications of taxable adjacent property. In exchange, the committee supports a simplified calculation based upon the total taxable value of property within the local education agency by then multiplying that value by the federally impacted acreage.

The committee also added language to support the transition of consolidated LEAs related to their eligibility for the Impact Aid program.

Finally, the committee adds language within section 8010 requiring the Secretary of Education to pay LEAs the full amount that the agency is eligible to receive for a fiscal year by September 30th of the following fiscal year for which the payment is based.

Title IX: General Provisions

DEFINITIONS

ESERA contains several new definitions, the most notable of which are discussed below.

The committee bill modifies the definition of “Advanced Placement or International Baccalaureate” to provide potentially more
options for States and LEAs in achieving the goals of college- and career-readiness by allowing them to choose another evidence-based program model. The committee bill incorporates language enacted by Congress in the America COMPETES Act of 2007 and maintained in the reauthorization of that act in 2010 [Sec. 6122(1)(B)]. With these provisions, Congress has already acknowledged much advancement from evidence-based program models showing large increases in academic success for students who had access to rigorous high school core courses benchmarked to college readiness.

The updated definition of a “Charter School” requires charter schools to have independent governance and significant autonomy in the areas of management, personnel, budget, schedule, and instructional program; allows charter schools to provide early childhood education and care or adult education; requires charter schools to comply with Title II of the Americans with Disabilities Act of 1990; provides an exception to the lottery requirement under the restart strategy and school closure strategy under section 1116(c)(6)(B); requires charter schools to comply instead of just agreeing to comply with the same Federal and State audit requirements as do other elementary schools; and requires a charter school to have a performance contract that uses school-wide and subgroup student academic achievement and growth, consistent with section 1111, as a primary factor in decisions about the renewal or revocation of the charter, and describes the obligations and responsibilities of the charter school and the charter school authorizer, as well as the autonomy granted to the charter school.

The committee has established the new term “Conditions for Learning”, which describes school factors that advance student achievement and positive child and youth development. This bill-wide definition allows for a more cross-cutting use of the term.

The committee renamed “Family Literacy Services”, “Family Literacy Activities”, and also added a new subparagraph that acknowledges the link between parents receiving family literacy instruction and their capacity for supporting their children’s learning needs. The committee also added a definition of “Family Member,” used in sections 1111 and 1118 and part G of title IV to acknowledge the important role that noncustodial family members and other caring adults (whether mentors, tutors, afterschool providers, or other community members involved in education) play in the lives of children.

The committee bill creates a new bill-wide definition for “High-Need Local Education Agency” as a number of programs in the bill require a focus on students attending schools in these LEAs. This definition uses population and poverty as determining factors. The term is currently only defined in Title II of ESEA in the Teacher and Principal Training program (based on poverty and teachers in certain subjects) and in the Educational Technology program (based on poverty and need for technology.)

The committee renamed “Pupil Services Personnel” “Specialized Instructional Support Personnel” and expanded the definition to include school nurses. In doing so, the committee wishes to recognize the critical link to school success that school nurses play for many students.
UNSAFE SCHOOL CHOICE OPTION

The committee has amended the Unsafe School Choice Policy. The previous reauthorization of this act required each State to identify “persistently dangerous” schools, as defined by the State, and allow students attending such schools to transfer to a school determined as “safe” by the State. The committee holds that, though well-intentioned, the “persistently dangerous” designation did not result in increases in school safety. Rather, in many cases it created disincentives for schools to accurately report data on violent criminal incidents. The committee has eliminated the “persistently dangerous” designation, while maintaining a provision allowing students who become victims of violent criminal offenses to transfer to a “safe” school, and including a new provision allowing students who are threatened with a violent criminal offense to do the same. This change empowers students and families to make educational choices based on their own experiences of school safety, and removes disincentives for schools to accurately report violent incident data.

EVALUATION AUTHORITY

The committee intends for all authorized programs under this act to be evaluated in a rigorous manner through the Institute of Education Science under the guidance of the Director and in consultation with the appropriate programmatic staff in the Department of Education. The committee recognizes evaluation of programs intended to serve a broad range of students as comprehensively as possible is sometimes in conflict with the most rigorous methodologies for determining program effectiveness. The committee’s intent in setting aside funds for evaluation, under the evaluation authority in part F of title IX, is to create program evaluations designed to allow for conclusions to be made regarding the programs’ effectiveness and whether the investment of limited Federal dollars is still merited for programs that have not met program expectations. While experimental and quasi-experimental designs are preferred, the committee recognizes that those designs are sometimes impractical and alternatives need to be used. The committee’s intent is for the Director of the Institute of Education Science to conduct program evaluations with the strongest possible design to provide researchers and policymakers with reliable and valid information upon which future decisions can be made regarding the effectiveness of the programs under this act.

Title X: Commission on Effective Regulation and Assessment Systems for Public Schools

The committee adopted an amendment offered by Senator Bennet to establish a Commission on Effective Regulation and Assessment Systems for Public Schools. The Commission will: (1) examine the regulatory requirements on elementary and secondary education at the Federal, State, and local levels; (2) make recommendations on how to align and improve requirements in such regulations; (3) examine the quality and purpose of current requirements; and (4) make recommendations to improve and align assessment systems to provide meaningful information and improve student achievement, teacher performance, and innovation.
Title XI: Amendments to Other Laws & Miscellaneous Provisions

HOMELESS EDUCATION (MCKINNEY-VENTO HOMELESS ASSISTANCE ACT)

The committee recognizes the unique challenges to academic achievement faced by the growing population of homeless students. In the 2009–10 school year, public schools enrolled 939,903 homeless children and youth—a 38 percent increase since the 2006–07 school year. The McKinney-Vento Homeless Education Reauthorization Act of 2011, Title X of ESERA, helps these vulnerable children and youth become college- and career-ready by removing barriers to their identification, enrollment, attendance, and success in school. The amendments build on current law to enhance school stability and access to educational opportunities. The committee acknowledges the special difficulties of unaccompanied homeless youth, who struggle to obtain an education without a parent or a home. The bill includes provisions to ensure that these youth are enrolled in school, able to earn credits, and informed of their status as independent students for financial aid. Young children who are homeless also face unique barriers to accessing early childhood programs; the committee adopted provisions to ensure that these children are identified and prioritized for enrollment in public preschool programs. Further, to ensure uninterrupted education, the committee clarified that, in the case of a dispute, homeless children and youth must remain enrolled in school until the final resolution of the dispute.

Amendments to title I, part A, make permissible the use of title I funds for transportation to assist homeless children and youth to stay in their school of origin, thus providing greater flexibility to LEAs on how title I reservations for homeless students may be spent.

ARPA–ED

The committee adopted an amendment offered by Senator Bennet to establish the Advanced Research Projects Agency—Education (ARPA–ED). The entity is modeled after the Defense Advanced Research Projects Agency (DARPA), which makes investments in high-risk, high-return research and development (R&D). It is the committee’s belief that ARPA–ED will have a similar capability to accelerate transformative innovation in education and learning.

IV. REGULATORY IMPACT STATEMENT

The committee has determined there will be reduced demands upon States, local educational agencies, and other recipients of ESEA funds, due largely to the more targeted accountability features and reduced number of programs contained in the Elementary and Secondary Education Reauthorization Act (ESERA).

ESERA requires States to adopt college- and career-ready academic content standards, and assessments tied to those standards. Many States have already undertaken this work. ESERA maintains the No Child Left Behind (NCLB) Act’s requirement that all public school students in grades 3 through 8 be tested annually in mathematics and reading. ESERA also maintains requirements
that States participate in annual State assessments under the National Assessment of Educational Progress (NAEP) in 4th and 8th grade mathematics and reading and issue annual report cards that include assessment and student achievement information.

With regard to the title I accountability system, ESERA limits federally prescribed interventions to the lowest performing 5 percent of schools in a State, and an additional 5 percent of schools with large subgroup achievement gaps. In contrast, NCLB required interventions in all schools that were not making adequate yearly progress.

In general, recipients of ESEA funds will be expected to use those funds on programs which have proven to be effective in improving student achievement and performance and in meeting other program objectives. The committee believes that it is appropriate to demand results and accountability in exchange for Federal investments in programs authorized under the Elementary and Secondary Education Act. However, in this reauthorization the committee has sought to target Federal mandates to those areas that the implementation of NCLB has shown are effective.

Finally, ESERA cuts the number of programs in ESEA and consolidates many into broader program authorities. This program consolidation is expected to reduce the administrative time and expense involved in developing, processing, and awarding separate grants—and to result in funding applicants with more capacity to efficiently and effectively carry out grant activities. ESERA also maintains the authority for small, rural school districts to combine funds from several separate formula grant programs and apply these funds toward local initiatives designed to improve student achievement.

V. APPLICATION OF LAW TO THE LEGISLATIVE BRANCH

The committee bill reauthorizes and amends the Elementary and Secondary Education Act of 1965 to continue programs primarily offering assistance to States and local educational agencies on behalf of elementary and secondary school students and teachers and, as such, has no application to the legislative branch.

VI. COST ESTIMATE

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,

Hon. Tom Harkin,
Chairman, Committee on Health, Education, Labor, and Pensions,
U.S. Senate, Washington, DC.

Dear Mr. Chairman: The Congressional Budget Office has prepared the enclosed revised cost estimate for the Elementary and Secondary Education Reauthorization Act of 2011. This estimate supersedes the cost estimate transmitted on January 4, 2012. In that earlier estimate, CBO failed to identify a private-sector mandate contained in the bill. This revised estimate corrects that error. However, there is no change in the estimated cost of the bill to the Federal Government.
If you wish further details on this estimate, we will be pleased to provide them. The CBO staff contact is Justin Humphrey.

Sincerely,

DOUGLAS W. ELMENDORF,
Director.

Enclosure.

S. 3578—Elementary and Secondary Education Reauthorization Act of 2011

Summary: The bill would amend and reauthorize most programs in the Elementary and Secondary Education Act of 1965 (the ESEA, commonly referred to, in its most recently reauthorized form, as No Child Left Behind). The underlying authorizations for all of those programs have expired, although most have been reauthorized annually through appropriations legislation. For almost all of the programs, the bill would authorize the appropriation of such sums as may be necessary for fiscal years 2012 through 2016. (These authorizations would automatically be extended 1 year through 2017, under the General Education Provisions Act.) The bill also would amend and reauthorize the McKinney-Vento Homeless Assistance Act.

CBO estimates that implementing the bill would have discretionary costs of $97.0 billion over the 2012–16 period, assuming the appropriation of the necessary amounts. Those costs reflect spending from newly authorized funding of $25.6 billion in 2012, rising to $26.5 billion in 2016. The Congress recently cleared the Consolidated Appropriations Act, 2012, however, including funding totaling about $25 billion in the current year for activities similar to those that would be authorized by this bill. Thus, implementing the bill would require only small additional funding for the current year.

Enacting the bill also would increase direct spending by $8 million over the 2012–21 period; therefore, pay-as-you-go procedures apply. Enacting the bill would not affect revenues.

The bill contains no intergovernmental mandates as defined in the Unfunded Mandates Reform Act (UMRA) and would impose no costs on State, local, or tribal governments. Those governments would benefit from grants authorized in the bill for elementary and secondary education. Any costs associated with those grants would be incurred voluntarily as a result of complying with conditions of Federal assistance.

The bill would impose a private-sector mandate, as defined in UMRA, on parents and guardians of unaccompanied youth by shielding schools from liability that might result from enrolling unaccompanied youth without parental or guardian consent. CBO expects that the costs of the mandate would not exceed the annual threshold established in UMRA for private-sector mandates ($146 million in 2012, adjusted annually for inflation).

Estimated cost to the Federal Government: The estimated budgetary impact of the bill is shown in the following table. The costs of this legislation fall within budget functions 050 (national defense) and 500 (education, training, employment, and social services).

Basis of estimate: Unless otherwise noted, the bill would authorize the appropriation of such sums as may be necessary for each of fiscal years 2012 through 2016 for programs discussed below. Those authorizations would automatically be extended 1 year, through 2017, under the General Education Provisions Act.) Estimated authorization levels are based on the funding levels for 2011 for the same or similar programs or, for some new programs the level of funding proposed in the President’s fiscal year 2012 budget request. For this estimate, CBO assumes that the bill will be enacted in the spring of 2012, that Congress will appropriate the estimated amounts, and that spending will follow historical patterns.
Direct spending

The bill would amend the definition of a highly qualified teacher and the measurement used to determine the level of poverty in school districts. The Department of Education uses both of those definitions to determine eligibility for both forgiveness of Federal student loan debt for teachers and the TEACH Grant program. Expanding those definitions would increase eligibility for both programs. CBO estimates that those changes would increase direct spending by a negligible amount in the TEACH Grant program and by $8 million in the Federal Student loan programs over the 2011–21 period.

Spending subject to appropriation

On the basis of appropriations provided in 2011 for existing programs and requested funding proposed by the President for new programs, CBO estimates that fully funding authorizations in this bill would require appropriations $25.6 billion to $26.5 billion a year over the period of authorization (2012–17). In comparison, funding for existing or similar activities in 2011 and 2012 totaled more than $25 billion in each year. As a result, most of the funding that the bill would authorize for fiscal year 2012 has already been appropriated in the Consolidated Appropriations Act, 2012.

Title I—Improving the Academic Achievement of the Disadvantaged. Title I of the bill would reauthorize funding for most programs in title I of the Elementary and secondary Education act as well as create new grant programs designed to support secondary school reform. CBO estimates that implementing this title would require $16.1 billion in funding for fiscal year 2012 and would lead to discretionary costs of $61.3 billion over the 2012–16 period, assuming the appropriation of the estimated amounts. The bill would authorize the appropriation of the following amounts:

• Part A—Improving Basic Programs Operated by Local Educational Agencies. Part A would reauthorize funding for grants to local education agencies, school improvement grants, various assessments of education progress, and administrative support. CBO estimates the authorization of appropriations would total $15.6 billion for all of part A and about $14.5 billion for grants to local educational agencies in fiscal year 2012 and similar amounts (with adjustments for anticipated inflation) in subsequent years. Implementing those provisions would cost $59.3 billion over the 2012–16 period. The bulk of the spending, $55.1 billion, would be for grants to local education agencies. Funding for grants for local education agencies totaled about $14.5 billion in fiscal years 2011 and 2012.
  • Part B—Pathways to College. Part B would create a new set of grant programs to encourage school districts to implement strategies in secondary schools to prepare students for colleges and careers. The bill also would expand the program that currently supports grants to Advanced Placement programs to include International Baccalaureate programs. CBO estimates that this part would authorize the appropriation of almost $90 million for fiscal year 2012 and additional amounts in subsequent years. We estimate that implementing those provisions would cost about $300 million over the 2012–16 period.
  • Part C—Education of Migratory Children. Part C would make changes to programs that support the education of children of mi-
grant workers. CBO estimates the bill would authorize the appropriation of almost $400 million in fiscal year 2012, leading to estimated discretionary spending of $1.5 billion over the 2012–16 period. Funding for the education of children of migrants totaled almost $400 million in fiscal years 2011 and 2012.

- **Part D—Prevention and Intervention Programs for Children and Youth Who are Neglected, Delinquent, or At-Risk.** Part D would reauthorize programs that support the education of at-risk children. CBO estimates the bill would authorize the appropriation of approximately $50 million in fiscal year 2012. Implementing Part D would cost about $200 million over the 2012–16 period. Funding totaled almost $50 million for at-risk children for fiscal years 2011 and 2012.

- **Part E—Educational Stability of Children in Foster Care.** Part E would require that State education agencies that receive funding under this title coordinate with the responsible agencies when children in foster care programs move to different school attendance areas. CBO estimates that Part E would have no impact on Federal spending.

Title II—Supporting Excellent Teachers and Principles. Title II would reauthorize grant programs designed to support teacher training and improvement. CBO estimates that the bill would authorize the appropriation of $3.2 billion for those activities in fiscal year 2012 and $16.5 billion over the 2012–16 period. We estimate that fully funding those activities would cost $11.5 billion over the 2012–16 period, assuming the appropriation of the estimated amounts.

- **Part A—Continuous Improvement and Support for Teachers and Principles.** Part A would reauthorize the State grant program for improving teacher quality. CBO estimates the bill would authorize the appropriation of $2.5 billion for those grants for fiscal year 2012, and that outlays would total $9.0 billion over the 2012–16 period. Funding for those grants totaled about $2.5 billion in fiscal years 2011 and 2012.

- **Part B—Teacher Pathways to the Classroom.** Under part B, the bill would authorize funding for grants between partnerships of institutions of higher education and State or local education agencies to support the recruitment and retention of teachers in high-need subjects at high-need schools. Those new grants would replace and existing program that provides grants specifically for mathematics and science partnerships, which received $175 million in funding for fiscal year 2011. CBO estimates this provision would have discretionary costs of more than $600 million over the 2012–16 period.

- **Part C—Teacher Incentive Fund Program.** Part C would reauthorize the Teacher Incentive Fund, which supports grants to local educational agencies and other organizations to develop and implement performance-based teacher and principal compensation systems in high-need schools. CBO estimates that this provision would authorize the appropriation of about $400 million for fiscal year 2012 and have discretionary costs of $1.5 billion over the

2012–16 period. The Teacher Incentive Fund received almost $400 million in fiscal year 2011 and $300 million in fiscal year 2012.

- **Part D—Achievement Through Technology and Innovation.** Additionally, part D would revise the current formula grants for the Enhancing Education Through Technology program with competitive and formula grants to improve teaching and learning through technology. CBO estimates that implementing this provision would cost about $400 million over the 2012–16 period. No funding was provided for part D in fiscal year 2011. In fiscal year 2010, education technology programs included under Part D of this legislation received $100 million.

- **Additional Changes.** The bill also would make additional changes to programs currently in Title II of the ESEA. For example, it would move the Ready to Learn program to Title IV of the ESEA and would permanently reauthorize the Troops to Teachers program and move it under the auspices of the Department of Defense. CBO estimates reauthorizing the Troops to Teachers program would have discretionary costs of almost $90 million over the 2012–16 period.

Title III—Language Instruction for English Learners and Immigrant Students. The bill would make few changes to title III, which provides support for teaching of the English language to English learners and recent immigrants. CBO estimates the bill would authorize the appropriation of almost $750 million for grants to States and other activities in 2012 and $3.8 billion over the 2012–16 period. Implementing this title would cost about $2.6 billion over the 2012–16 period, assuming the appropriation of the estimated amounts. Those programs received more than $730 million in fiscal years 2011 and 2012.

Title IV—Supporting Successful, Well-Rounded Students. Title IV would authorize funding for various grant programs designed to improve literacy and math and science instruction. It would also support measures to improve the health and safety of students. CBO estimates this title would authorize the appropriation of approximately $2.4 billion in fiscal year 2012 and $12.3 billion over the 2012–16 period. Implementing title IV would cost $8.6 billion over the 2012–16 period, assuming the appropriation of the estimated amounts.

- **Part A—Improving Literacy Instruction and Student Achievement.** Part A would authorize grants to support activities designed to increase literacy for individuals from birth through the end of high school. CBO estimates that spending on literacy would total $1.4 billion over the 2012–16 period.

- **Part B—Improving Science, Technology, Engineering, and Mathematics Instruction and Student Achievement.** Part B of the bill would authorize grants to States to increase access to science, technology, engineering, and mathematics and to provide professional development for teachers. CBO estimates that implementing part B would have discretionary costs of about $600 million over the 2012–16 period.

- **Part C—Increasing Access to a Well-Rounded Education.** Part C would authorize grants to local education agencies to support ac-

The Consolidated Appropriations Act, 2010 (P.L. 111–117) authorized Promise Neighborhood grants under the authority granted in the ESEA in Subpart I, of Part D, of Title V, Fund for the Improvement of Education—Programs of National Significance.

- **Part D—Successful, Safe, and Health Students.** Part D would authorize a new grant program to promote student physical and mental health and well-being and to prevent violence and substance abuse, similar to activities funded by State grants for safe and drug-free schools under current law. CBO estimates that those grants would cost about $1 billion over the 2012–16 period.

- **Part E—21st Century Community Learning Centers.** Part E would reauthorize the grants for 21st Century Community Learning Centers, which support before- and after-school and summer school programs. CBO estimates this provision would authorize the appropriation of $1.2 billion for fiscal year 2012 and would lead to discretionary costs of $4.2 billion over the 2012–16 period. This program received approximately $1.2 billion in each of fiscal years 2011 and 2012.

- **Part F—Promise Neighborhoods.** Part F would reauthorize Promise Neighborhood grants which go to organizations to provide family and community services and comprehensive education reforms in high-need areas. CBO estimates that spending for Part F over the 2012–16 period would total $500 million.

- **Additional Programs.** Parts G, H, and I would reauthorize Parent and Family Information and Resource Centers, the Ready to Learn program, and Programs of National Significance. CBO estimates that the total fiscal year 2012 authorization of appropriations for those programs would be $130 million and total spending for fiscal years 2012 through 2016 would be almost $500 million.

**Title V—Promoting Innovation.** CBO estimates that title V would authorize the appropriation of approximately $1.3 billion in fiscal year 2012 and $6.6 billion over the 2012–16 period. Implementing title V would cost about $4.5 billion over the 2012–16 period, assuming the appropriation of the estimated amounts for:

- **Race to the Top and Investing in Innovation.** Parts A and B would authorize funding for the Race to the Top and Investing in Innovation programs, both created in the American Recovery and Reinvestment Act (Public Law 111–5). Those competitive grants programs are designed to encourage educational innovation and reform at the State and local levels. CBO estimates that the bill would authorize the appropriation of about $700 million for Race to the Top and about $150 million for Investing in Innovation for fiscal year 2012. Implementing those two programs would total approximately $2.5 billion and about $540 million over the 2012–16 period, respectively. Together, those programs received approximately $850 million in fiscal year 2011 and $700 million in 2012.

- **Magnet Schools, Charter Schools and Public School Choice.** Parts C, D, and E would also reauthorize funding for Magnet Schools Assistance, Charter School Grants, and Voluntary Public School Choice. CBO estimates that the bill would authorize the appropriation of approximately $400 million for fiscal year 2012 and would have total discretionary costs of about $1.5 billion over the

2012–16 period for those programs. Those programs received $380 million in fiscal year 2011 and slightly less in 2012.

Title VI—Promoting Flexibility; Rural Education. Title VI would reauthorize the rural education achievement programs, which provide grants to assist rural school districts in improving teaching and learning outcomes. CBO estimates the bill would authorize the appropriation of $177 million in spending for fiscal year 2012 and approximately $900 million over the 2012–16 period. Implementing this title would have discretionary costs of roughly $600 million over the 2012–16 period, assuming the appropriation of the estimated amounts. Funding for rural education totaled nearly $200 million in each of fiscal years 2011 and 2012. The authorizations of appropriations for national and State evaluations in title VI under current law would be moved to title I. The bill also would amend the rules regarding the transferability of funds among different Federal grant programs for entities that meet certain criteria.

Title VII—Indian, Native Hawaiian, and Alaska Native Education. Title VII would reauthorize grant programs for Native Americans and Hawaiians and for Alaska Natives. The bill would amend current law to authorize the repair and renovation of public schools that serve higher concentrations of Native Hawaiian students. CBO estimates the bill would authorize the appropriation of about $250 million for fiscal year 2012 and $1.3 billion over the 2012–16 period. Implementing this title would cost almost $990 million over the 2012–16 period, assuming the appropriation of the estimated amounts. Funding for those grants totaled $190 million in fiscal years 2011 and 2012.

Title VIII—Impact Aid. Title VIII would reauthorize the impact aid programs, which provide funding to assist local education agencies (LEAs) affected by the activities of the Federal Government, such as those on a military base or Indian reservation. CBO estimates that title VIII would authorize approximately $1.3 billion in fiscal year 2012 and $6.6 billion over the 2012–16 period. We estimate that fully funding this title would result in discretionary costs of $6.4 billion over the 2012–16 period, assuming the appropriation of the estimated amounts. The bulk of this spending, about $6.0 billion over the 2012–16 period, would be for basic support payments to LEAs to assist in the education of federally connected children. The additional $400 million would be used to construct and maintain schools that educate federally connected children. Impact aid programs received approximately $1.3 billion in each of fiscal years 2011 and 2012.

Title X—Committee on Effective Regulation and Assessment of Systems for Public Schools. Title X would require the Secretary of Education to establish a commission to examine Federal, State, and local regulations that affect elementary and secondary education. CBO estimates that this provision would authorize the appropriation of $1 million in each year.

Title XI—Amendments to Other Laws; Miscellaneous Provisions. Subpart I of title XI would reauthorize the McKinney-Vento Homeless Assistance Act, which authorizes grants to States to assist in the education of homeless children. The bill would authorize the appropriation of such sums as may be necessary for fiscal years 2012 through 2018. (This authorization would automatically be ex-
tended 1 year through 2019 under the General Education Provisions Act.) CBO estimates that this subpart would authorize the appropriations of almost $70 million for fiscal year 2012 and have discretionary costs of about $240 million for the 2012–16 period. Support for the education of homeless children totaled $65 million for fiscal year 2011.

Subpart II would amend the Department of Education Organization Act to create an agency within the Department of Education responsible for the research and development of educational technology to improve student achievement. Funding from the Investing in Innovation program, authorized in title IV, would be reserved to support this agency. CBO estimates that this provision would authorize the appropriation of $50 million in fiscal year 2012 and would cost almost $200 million over the 2012–16 period.

Pay-As-You-Go considerations: The Statutory Pay-As-You-Go Act of 2010 establishes budget-reporting and enforcement procedures for legislation affecting direct spending or revenues. The net changes in outlays under the Elementary and Secondary Education Reauthorization Act of 2011 that are subject to those pay-as-you-go procedures are shown in the following table.

Estimated impact on state, local and tribal governments: The bill contains no intergovernmental mandates as defined in UMRA and would impose no costs on State, local, or tribal governments. Those governments would benefit from grants authorized in the bill for elementary and secondary education. Any costs associated with those grants would be incurred voluntarily as a result of complying with conditions of Federal assistance. While most of the new grant conditions come in the form of new reporting requirements, some would require State education agencies (SEAs) and local education agencies (LEAs) to either reallocate spending among schools or increase overall State and local support for particular schools.

As a condition of aid, the bill would require LEAs, beginning in the 2015–16 school year, to ensure that total State and local per-pupil spending in schools that are eligible for basic program grants targeted at disadvantaged students (title I) is at least as much as the average of total State and local per-pupil spending in schools that do not qualify for title I funding. Under current law, and LEA may certify that services among title I funded schools and other schools are comparable through written assurances that policies are implemented to ensure school equivalence. The law does not, however, require those assurances to demonstrate equivalence of per-pupil expenditures.

Information from the Department of Education indicates that about 28 percent of title I school districts would not meet the com-
parable expenditure requirement in the absence of enacting this bill. To comply with the bill's requirement, those school districts, mostly large ones, would have to either increase overall per-pupil spending to ensure equity in expenditures or shift money from higher spending, non-title-I schools to lower-spending, title I schools. The department concluded that costs would vary among districts but that the average cost of compliance would be modest in comparison to overall school-level expenditures.

In addition, the bill would require SEAs receiving part A grants under title I to work with child welfare agencies to develop plans to ensure that foster care children are allowed to remain in their school of origin for the remainder of the school year. LEAs would be required to implement the plans. If a child is transferred to a new school, the school would have to ensure that enrollment is immediate and records and credits are transferred. In addition, SEAs would have to enter into agreements with foster care agencies to ensure that foster care maintenance payments are used to help pay for transporting children in foster care to their schools of origin. The bill also would require LEAs to designate an individual point of contact to oversee the implementation of the LEA requirements. Most LEAs and SEAs are already complying with similar conditions under the Fostering Connections to Success and Increasing Adoptions Act of 2008 (Public Law 110–351) and other similar laws, so only the agencies not meeting those conditions would incur additional costs.

The costs of other new conditions in the bill, mostly reporting requirements, would probably be offset by additional Federal funding.

Estimated impact on the private sector: The bill would shield schools from liability that might result from enrolling unaccompanied youth without parental or guardian consent. The bill would impose a private-sector mandate, as defined in UMRA, on parents and guardians of unaccompanied youth to the extent that they would be denied an existing right to compensation. However, such claims are very rare, and no damages have been awarded for such claims in the past 10 years. Therefore, CBO expects that the costs of the mandate would not exceed the annual threshold established in UMRA for private-sector mandates ($146 million in 2012, adjusted annually for inflation).

Previous CBO estimate: This cost estimate for the Elementary and Secondary Education Act of 2011 supersedes the cost estimated transmitted on January 4, 2012, for the bill as ordered reported by the Senate Committee on Health, Education, Labor, and Pensions on October 20, 2011. CBO has updated the cost estimate to reflect the private-sector mandate that was omitted in the January 4 estimate. The estimated costs of implementing the bill remain unchanged.

Estimate approved by: Peter H. Fontaine, Assistance Director for Budget Analysis.
VI. SECTION-BY-SECTION ANALYSIS

Title I: Ensuring College and Career Readiness for All Students
Part A—Improving the Academic Achievement of the Disadvantaged

Section 1002 amends sections 1002 through 1004 of ESEA as follows:

Sec. 1002 [State Administration and State Accountability and Support]
Sec. 1002(b) [Accountability and Support] describes the amounts and methods that States may distribute to local educational agencies for school improvement.
Sec. 1002(b)(1) [Accountability and Support] describes that each State may reserve 4 percent of the amount the State receives to carry out paragraph (2) and to carry out the State and local educational agency responsibilities under sections 1116.
Sec. 1002(b)(2)(A–B) [Uses] states that of the amount reserved under paragraph (1) for any fiscal year, the State educational agency shall distribute not less than 90 percent of that amount to local educational agencies for activities required under section 1116; or may, with the approval of the local educational agency, directly provide for such activities.
Sec. 1002(b)(3)(A–C) [Priority] provides that the State educational agency shall, when allocating such funds, give priority to local educational agencies that serve the lowest achieving schools, demonstrate the greatest need for such funds, and demonstrate the strongest commitment to ensuring that such funds are used to enable the lowest achieving schools to improve student achievement and outcomes.
Sec. 1002(b)(4)(A–B) [Unused Funds] requires that if the State educational agency determines that unused funds are available then such funds shall be distributed to local educational agencies in accordance with (A) the relative allocations the State educational agency made to those agencies for that fiscal year under subpart 2 of part A or (B) section 1126(c).
Sec. 1002(b)(5) [Special Rule] requires that the amount of funds reserved by the State educational agency under this subsection in any fiscal year shall not decrease the amount of funds each local educational agency receives under subpart 2 below the amount received by such local educational agency for the preceding fiscal year.
Sec. 1002(b)(6) [Reporting] provides that each State educational agency shall make publicly available a list of schools that have received funds or services pursuant to this subsection and the percentage of students from each such school from families with incomes below the poverty line.

Sections 1111–1119 amend the below ESEA sections as follows:

Sec. 1111 [State and Local Requirements]
Sec. 1111(a) [Academic Standards, Academic Assessments, and Accountability Requirements] describes the requirements States must meet in order to receive a grant under this section.
Sec. 1111(a)(1)(A)(i–vi) [College- and Career-Ready Aligned Standards for Reading or Language Arts and Mathematics] requires that (i) States adopt college- and career-ready academic con-
tent standards in reading or language arts, and math by December 31, 2013 and adopt college- and career-ready student academic achievement standards in reading or language arts and mathematics by the beginning of the 2015–16 school year. States are required to (ii) align standards with academic coursework at public institutions of higher education in the State, relevant State career and technical standards, and appropriate career skills and (iii) apply such standards to all public school students in the State. States shall also (iv) adopt academic achievement standards that are aligned with the State’s content standards and establish a minimum of three levels of performance (basic, on-track, and advanced). (v) Each of these requirements may be met by an individual State or through a consortium with other States. Consistent with current law, (vi) States are not required to submit either set of standards to the Secretary for review or approval.

Sec. 1111(a)(1)(B)(i–iii) [Science Standards] requires States to (i) demonstrate that content and student academic achievement standards in science that align with academic coursework at State public institutes of higher learning, relevant State career and technical education standards, and appropriate career skills are adopted by December 31, 2013. (ii) States are not required to submit science standards to the Secretary and (iii) may choose to use these standards as part of the State’s accountability system.

Sec. 1111(a)(1)(C) [Standards for Other Subjects] allows a State that adopts academic content and student academic achievement standards in subjects other than those listed above to use those standards as part of the State’s accountability system.

Sec. 1111(a)(1)(D)(i–ii) [Alternate standards for students with the most significant cognitive disabilities] allows the State to develop alternate academic achievement standards in any subject, through a documented and validated process, for the students with the most significant cognitive disabilities. Such standards may be included in the State’s accountability system as long as (i) the decision about which students should be measured against these standards is made separately for each student in each subject assessed and (ii) the standards are aligned with State academic content standards, provide access to the general curriculum, and reflect professional judgment as to the highest possible standards achievable by a student.

Sec. 1111(a)(1)(E)(i–iv) [English Language Proficiency Standards] requires that a State adopt high-quality English language proficiency standards by December 31, 2014. Such standards shall be (i) aligned with the State’s academic content standards in reading or language arts, (ii) ensure proficiency in English speaking, listening, reading, and writing, (iii) address the levels of proficiency of English learners, and (iv) are updated within 1 year after the State adopts any new academic content standards.

Sec. 1111(a)(1)(F) [No Federal Control] clarifies that nothing in Section 1111(a) will authorize the Federal Government to mandate, direct, or control a State’s academic content or student academic achievement standards.

Sec. 1111(a)(1)(G) [Existing Standards] states that nothing in section 1111(a) will prohibit a State from revising any standard adopted under this section before, on, or after the date of enactment of ESERA.
Sec. 1111(a)(2)(A)(i)(I–V) [Academic Assessments] requires that the State educational agency adopt and implement statewide assessments in reading or language arts and mathematics by the beginning of the 2015–16 school year that include assessments annually for grades 3 through 8 and at least once during grades 10 through 12. Similar to requirements in current law these assessments must be (I) aligned with State’s academic content standards, (II) and administered to all public school students in the State, and (III) measure individual academic achievement. (IV) If a State elects to measure individual academic growth as described in subsection (b)(1)(B), the State may measure whether students are making adequate student growth. (V) States may administer such assessments through a single summative assessment each year or through multiple statewide assessments during the course of the year, as long as the State can demonstrate to the Secretary’s satisfaction that the results of the multiple assessments provide a summative score that measures the student’s college- and career-readiness in reading or language arts and mathematics.

Sec. 1111(a)(2)(A)(ii)(I–III) [State Assessments-Science] requires that the State educational agency adopt and implement statewide assessments in science by the beginning of the 2015–16 school year. Assessments must be administered not less than once during each of the grade spans 3 through 5, 6 through 9, and 10 through 12 and shall measure (I) student achievement relative to the State’s science student academic achievement standards, (II) individual academic achievement, and (III) if a State elects to measure individual academic growth as described in subsection (b)(1)(B), whether students are making adequate student growth.

Sec. 1111(a)(2)(A)(iii–iv) [Additional Requirements] requires that the State include English language proficiency assessments and any alternate assessments described in subparagraphs (D) and (E), respectively into the statewide assessment. Additionally, at the discretion of the State, a State may measure the proficiency of students in the other academic subjects for which the State has adopted academic content standards and student academic achievement standards under paragraph (1)(C).

Sec. 1111(a)(2)(B)(i–xiv) [Requirements for Assessments] stipulates a number of requirements for assessments described in this section. Assessments shall (i) be used to measure the achievement of all students; (ii) be used for purposes for which they are valid and reliable and be consistent with relevant, nationally recognized professional and technical standards; (iii) be used only if evidence is provided to the Secretary to show that the assessments are of adequate technical quality and meet the requirements under this act; (iv) include multiple measures of student academic achievement, including measures of higher-order thinking skills and understanding; (vii) include students who have attended schools in a local educational agency for a full academic year but have not attended a single school for a full academic year; (viii) produce individual, understandable, and uniform student interpretive and descriptive reports, which include test scores or other information on the attainment of performance standards, in a language that parents can understand; (ix) enable results to be disaggregated by gender, by major racial and ethnic group, by English language proficiency status, by migrant status, by students with disabilities,
and by economically disadvantaged status, unless disaggregation would result in revealing personally identifiable information about an individual student; (x) be consistent with widely accepted professional testing standards and objectively measure academic achievement, knowledge, and skills; (xi) not evaluate or assess personal or family beliefs and attitudes or disclose personally identifiable information; (xii) enable itemized score analyses to be produced and reported to LEA and schools; (xiii) produce achievement and other data that can be used to inform determinations of teacher and principal effectiveness for purposes of evaluation and development; and (xiv) be administered to not less than 95 percent of all students, and not less than 95 percent of each subgroup (gender, by each major racial and ethnic group, by English proficiency status, by migrant status, by status as a student with a disability, and by economically disadvantaged status) who are enrolled in the school. (v) In addition, States shall provide for the participation of all students, including students with disabilities and English learners. However, the State may exempt any English learner at the lowest levels of English proficiency from the reading or language arts assessment for not more than 2 years following the student’s first enrollment in a school in the United States. (vi) Reading or language arts assessments shall be written in English for students who have attended school in the United States for 3 or more consecutive years unless the local educational agency, on a case-by-case basis, determines that assessments in another language would yield more accurate and reliable information. In such situations students may be assessed in a language other than English for up to 2 additional years.

Sec. 1111(a)(2)(C) [Languages of Assessments] requires that the State identify the languages other than English that are present in the participating student population and indicate in their plan under subsection (b), the languages for which yearly student academic assessments included in the State’s accountability system under paragraph (3) are not available and are needed. The State shall make every effort to develop assessments in those languages and may request assistance from the Secretary to create these assessments. If requested, the Secretary shall assist with the identification of appropriate assessments, but shall not mandate a specific academic assessment or mode of instruction.

Sec. 1111(a)(2)(D)(i–ii) [Assessments of English Language Proficiency] requires that each State’s assessment of English language proficiency (i) will provide for the annual assessment of English proficiency of all English learners in the schools served by the State educational agency by the beginning of the 2015–16 school year; (ii) be aligned with the State’s English language proficiency standards, be designed to measure student progress toward English language proficiency, and reflect the academic language that is required for success on the State’s academic assessments.

Sec. 1111(a)(2)(E)(i–vii) [Alternate Assessments for Students with the Most Significant Cognitive Disabilities] allows a State to provide alternate assessments that are aligned with alternate academic achievement standards for students with the most significant cognitive disabilities. To utilize alternate assessments a State shall: (i) establish and monitor the implementation of clear and appropriate guidelines for individualized education program teams to
apply in determining, on a subject-by-subject basis, when a child’s significant cognitive disability justifies assessment based on alternate standards; (ii) ensures the parents of the students taking alternate assessments are informed that their child will be measured against alternate standards and whether participation in the alternate assessment precludes the student from completing the requirements for a regular high school diploma; (iii) provides evidence that students with the most significant cognitive disabilities are, to the extent practicable, included in the general curriculum and in assessments aligned with such curriculum; (iv) certifies that the State’s regular academic assessments are accessible to students with all forms of disabilities through the provision of reasonable adaptations and valid and reliable accommodations that produce valid results; (v) develops and disseminates information to promote the use of reasonable adaptations and accommodations to increase the number of students with the most significant cognitive disabilities participating in grade-level academic instruction and corresponding assessments; (vi) takes steps to ensure that regular and special education teachers and other appropriate staff know how to administer assessments, including how to make appropriate use of reasonable adaptations accommodations for such assessments; and (vii) requires separate determinations about whether a student should be assessed using an alternate assessment for each subject assessed.

Sec. 1111(a)(2)(F)(i–ii) [Adaptive Assessments] allows the State to develop and administer computer adaptive assessments as the assessments required under subparagraph (A). If a State develops and administers a computer adaptive test, the assessment shall measure (i) whether each student is meeting or exceeding the on-track level of performance for the State academic content standards for the student’s grade level. An adaptive assessment (I) may measure the student’s level of performance in the grades above or below the student’s grade level and (II) may be used to measure student growth using assessment items above or below grade level, including to determine if a student is attaining growth in accordance with clauses (i) and (ii) of subsection (b)(1)(B). (ii) This section will not be interpreted to require that all students taking the computer adaptive assessment be administered the same assessment items.

Sec. 1111(a)(2)(G) [Reducing Duplicative Assessment] requires the State to include in the State plan under subsection (b) a description of how the State will regularly analyze assessment and accommodations practice and use, and reduce duplicative assessment.

Sec. 1111(a)(3) [State-Designed Accountability Systems] describes the creation, management, and planning requirements for State-designed accountability systems.

Sec. 1111(a)(3)(A)(i–vii) [Accountability System] requires States to develop and implement a single, statewide accountability system by the beginning of the 2013–14 school year that (i) annually measures and reports on the achievement of students in all public schools in the State on the assessments and the graduation rates of all high schools in the State; (ii) expects continuous improvement of all public schools in the State in outcomes of all students and subgroups (gender, by each major racial and ethnic group, by English proficiency status, by migrant status, by status as a stu-
dent with a disability, and by economically disadvantaged status); (iii) annually identifies schools and local educational agencies that need supports and interventions to prepare college- and career-ready students; (iv) provides for the improvement of all schools that are not identified under section 1116(b) but are low-performing or have low-performing subgroups; (v) develops the capacity of local educational agencies and schools to effectively educate students and continuously improve; (vi) recognizes and replicates the practices of local educational agencies and schools that are successful in effecting significant student achievement or student academic growth; and (vii) meets the requirements of section 1116.

Sec. 1111(a)(3)(B) [Subjects Covered] requires that the State shall include in the accountability system the subjects of reading or language arts and mathematics, and may include any other subject for which the State has adopted academic content standards, student academic achievement standards, and assessments.

Sec. 1111(a)(3)(C) [Accountability for Charter Schools] requires that the accountability provisions under this act shall be overseen for public charter schools in accordance with State charter school law.

Sec. 1111(a)(3)(D) [Students with the Most Significant Cognitive Disabilities] requires that the number of students with the most significant cognitive disabilities taking alternate assessments for the accountability purposes of this section, section 1116 and section 1117, not exceed 1 percent of the number of all students in the State.

Sec. 1111(a)(4) [Transition Provisions] directs the Secretary to take any necessary steps to ensure for an orderly transition between the accountability system required by the No Child Left Behind Act and the new accountability system required under this act.

Sec. 1111(a)(5) [Voluntary Partnerships] allows a State to enter into a partnership with one or more other States to develop and implement the required academic assessments, academic content standards, and student academic achievement standards.

Sec. 1111(b) [State Plans] describes the requirements for State plans.

Sec. 1111(b)(1)(A–J) [In General] requires any State desiring a grant under this part to submit a plan to the Secretary that (A) demonstrates the State’s compliance with this section; (B) demonstrates how the State will measure student growth if they choose to use student growth as a measure of academic progress and college and career readiness; (C) coordinates with the State plans required by other programs under this act, the Individuals with Disabilities Education Act, the Carl D. Perkins Career and Technical Education Act of 2006, the Head Start Act, the Child Care and Development Block Grant Act of 1990, and the Adult Education and Family Literacy Act; (D) provides an assurance that the State will continue to administer the academic assessments required by the No Child Left Behind Act until the State has implemented the assessments required under subsection (a)(2); (E) provides an assurance that the State will participate in the biennial State academic assessments of grade 4 and grade 8 reading and mathematics under the National Assessment of Educational Progress if the Secretary pays the costs of administering such assessments; (F) de-
scribes the State accountability system under subsection (a)(3) and section 1117 (if the State chooses to carry out section 1117); (G) describes the process the State will utilize to review local educational agency plans submitted pursuant to section 1112, including the parent and family engagement plan described in section 1118; (H) describes the support the State will provide to local educational agencies for the education of homeless children and youths, and how such support is consistent with the requirements of subtitle B of title VII of the McKinney-Vento Homeless Assistance Act; (I) describes how the State has involved the committee of practitioners established under section 1603(b) in developing the plan and monitoring its implementation; (J) describes how the State educational agency will coordinate with the State Advisory Council on Early Childhood Education and Care, as appropriate; (K) describes how the State and State educational agency will comply with the requirements of section 1501, and the State's plan to ensure such compliance; (L) describes how, beginning not later than 1 year after the date of enactment of the ESERA, (i) the State educational agency will provide for the equitable distribution of teachers in the State within local educational agencies and (ii) the State will report to the Secretary the percentage and distribution of teachers in the State for each quartile of schools based on school poverty level, for high-minority schools, and for low-minority schools; (M) describes how the State will annually submit to the Secretary, for each quartile of schools in the State based on school poverty level and for high-minority schools and low-minority schools in the State, data on the percentage and distribution of the following categories of teachers: (i) teachers who are not classified as highly qualified teachers; (ii) teachers who are inexperienced; (iii) teachers who have not completed a teacher preparation program; (iv) teachers who are not teaching in the subject or field for which the teacher is certified or licensed; (v) where applicable, teachers who are in the highest or lowest rating categories of a teacher evaluation system that is consistent with section 2301(b)(4).

Sec. 1111(b)(2) [Comprehensive Plan] provides that each State plan may be submitted as part of the comprehensive plan under section 9302.

Sec. 1111(b)(3)(A–B) [Duration of the Plan] requires that each State plan shall (A) remain in effect for the duration of the State's participation in title I, part A and be periodically reviewed and revised as necessary by the State to reflect changes in strategies and programs. The State plan shall (B) be resubmitted to the Secretary if a State makes significant changes to its plan, but the Secretary may approve or disapprove changes without peer-review or a hearing process.

Sec. 1111(b)(4)(A)(i–viii) [Peer Review and Secretarial Approval] requires that the Secretary: (i) establish a peer review process that maximizes collaboration with each State to assist in the review of State plans; (ii) appoint to the peer review process expert individuals, who are geographically diverse, representative of all stakeholders, and are familiar with education standards, assessments, and accountability, the needs of persistently low-achieving schools, and the needs of disadvantaged students and other educational needs of students; (iii) ensure the peer review process provides timely and publicly available feedback; (iv) does not decline ap-
proval of a State plan before offering the State an opportunity to revise the plan and providing technical assistance to States and providing a hearing upon request; (v) have the authority to disapprove a State plan for not meeting the requirements of this part, and the ability to deny a State plan that was recommended by the peer review panel by making available written findings of the cause for such disapproval; (vi) approve a State plan within 120 days after its submission, unless the Secretary determines that the plan does not meet the requirements of this section; (vii) immediately notify the State in writing if their plan does not meet the requirements of this subsection and include the reasons for such determination; (viii) does not have the authority to require a State, as a condition of plan approval, to include or delete one or more specific elements of the State's academic content standards or to use specific academic assessment instruments or items.

Sec. 1111(b)(4)(B) [State Revisions] requires that a State plan be revised by the State educational agency if necessary to satisfy the requirements of this section.

Sec. 1111(c) [Parent and Family Engagement] describes what the State must include in its State plans to show how it will strengthen engagement of parents and families in education.

Sec. 1111(c)(1)(A–F) [Statewide Parent and Family Engagement Strategy] requires that the parent and family engagement plan demonstrate how the State plans to increase and improve the engagement of parents and family members in education throughout the State, through the implementation and replication of evidence-based or promising practices and strategies, in order to increase student academic achievement and college- and career-readiness, provide parents and family members with the skills and opportunities necessary to become full partners in their child’s education, improve child development, strengthen relationships and partnerships between school personnel and parents and family members, improve the ability of local educational agencies and schools to increase the participation of parents and family members, and focus activities on high-need local educational agencies and high-need schools.

Sec. 1111(c)(2)(A–B) [Coordination; Collection; Dissemination] requires that the parent and family engagement plan describe how the State will ensure maximum coordination and minimum duplication of efforts among Federal, State and local programs, the State Advisory Councils on Early Childhood Education and Care, the parent and family information and resource centers established under part G of title IV, and appropriate non-Federal entities. The State shall also collect and disseminate best practices and research on parent and family engagement strategies to local educational agencies, institutions of higher education, and other organizations with a demonstrated record of success in increasing family engagement in education.

Sec. 1111(c)(3)(A–C) [Technical Assistance, Training, and Capacity-Building] requires that the State parent and family engagement plan describe the evidence-based technical assistance, professional development, or other capacity-building strategies that the State will provide to high-need local educational agencies and high-need schools including those identified under section 1116.
Sec. 1111(c)(4) [Leveraging Resources] provides that each State plan may include a description of how the State will leverage resources of employers, business leaders, philanthropic and non-profit organizations, and other community members committed to improving student achievement and development to increase and strengthen parent and family engagement.

Sec. 1111(d) [Annual State Report Cards]

Sec. 1111(d)(1) [In General] requires that a State that receives a grant under this part prepare and disseminate an annual report card for each public elementary school and secondary school in the State, each local educational agency in the State, and the State as a whole.

Sec. 1111(d)(2)(A–D) [Requirements for All Report Cards] requires that all school, local education agency, and State report cards be uniform, concise, easily understandable, and accessible. Report cards must be made available on the Internet and a copy of a school's report card must be provided to the parents of each student enrolled in the school each year.

Sec. 1111(d)(3)(A–D) [Required Student Information for School Report Cards] requires that specific information be included on each school report card. (1) Specifically each report card must include (A) a clear and concise description of the State's accountability system; (B) information on student achievement, in the aggregate and disaggregated by the subgroups described in subsection (a)(2)(B)(ix), (i) at each proficiency level on the State academic assessments that are included in the State's accountability system under subsection (a)(3), (ii) the percentage of students who do not take the State academic assessments, (iii) the most recent 3-year trend in student achievement in each subject area, and for each grade level, for such assessments, (iv) a comparison of the school's student academic assessment data to the State average for each tested subject, (v) if used by the State information on student growth measures, (vi) the number and percentages of students with the most significant cognitive disabilities that take the alternate assessment, (vii) the number of students who are English learners, and the performance of such students on the State's English language proficiency assessments, and (viii) for each high school information on student graduation rates, the rate of enrollment at institutions of higher education and the rate of student remediation. Each report card must also include (C) the school's categorization, if applicable, in the State school accountability and improvement system under section 1116 and (D) the most recently available academic achievement results in grades 4 and 8 of the State's students on the National Assessment of Educational Progress in reading and mathematics.

Sec. 1111(d)(4)(A–F) [Optional Information] provides that a State may include in each school report card other information such as (A) the percentage of students passing examinations related to coursework acceptable for postsecondary credit at institutions of higher education, (B) the average class size, by grade, (C) the incidence of school violence, bullying, drug abuse, alcohol abuse, student suspensions, student detentions, and student expulsions, (D) indicators of school climate, (E) student attendance, and (F) school readiness of students in kindergarten.
Sec. 1111(d)(5)(A–C) [Local Educational Agency and State Report Cards] requires that each local educational agency report card and State report card required under paragraph (1) include the data described in clauses (i) through (viii) of paragraph (3)(B) for the local educational agency or State as a whole and disaggregated by the subgroups described in subsection (a)(2)(B)(ix); and (B) may include any optional information described in paragraph (4). Sec. 1113(a)(5)(B)(i–ii) [Low-Income Families in Secondary Schools] includes new language to allow for the measuring of students in low-income families in secondary schools either by the calculation used for all other schools that is described in (A) or through the use of a feeder pattern described in subparagraph (C).
Sec. 1113(a)(5)(C) [Feeder Pattern] establishes that in this part, the term “feeder pattern” means an accurate estimate of the number of students in low-income families in a secondary school that is calculated by applying the average percentage of students in low-income families of the elementary school attendance areas as calculated under subparagraph (A) that feed into the secondary school.

Sec. 1113(a)(8) [Reservation for Early Childhood Education and Care] provides a new provision that allows a local educational agency to reserve funds made available to carry out this section for early childhood education and care in eligible school attendance areas before making allocations to high schools in eligible school attendance areas.

This could include (i) funding the liaison designated in the McKinney-Vento Homeless Assistance Act, (ii) providing transportation pursuant to section 722(g)(1)(J)(iii) of such act, (iii) providing services to preschool-aged homeless children and homeless secondary school students, (iv) providing support services to homeless children and youths in shelters and other locations where they may live, and (v) removing barriers to homeless children and youths’ enrollment, attendance, retention, and success in school.

Sec. 1113(c)(3)(C)(i–ii) [Amount Reserved] provides that the amount of funds reserved under subparagraph (A) be determined by an assessment of the needs of homeless children and youths in the local educational agency. Such needs assessment shall include the following: (i) information related to child, youth, and family homelessness in the local educational agency and (ii) the number of homeless children and youths reported by the local educational agency to the State educational agency under section 722(f)(3) of the McKinney-Vento Homeless Assistance Act for the previous school year.

Sec. 1114 [Schoolwide Programs]

Sec. 1114(a)(1) [In General] adds language to current law that allows funds provided under this part to be used to support activities that address needs identified through the comprehensive needs as-

It also establishes that a local educational agency shall demonstrate that the methodology it uses to allocate State and local funds to each school receiving funds under this part ensures the school receives all of the State and local funds the school would otherwise receive if it were not receiving funds under this part. Finally, it states that 1120A(b) does not apply to schools operating schoolwide programs under this section.

Sec. 1114(a)(3)(B) [Requirements] is amended to strike requirements that cannot be waived by the Secretary. These requirements include services to private school children, maintenance of effort, comparability of services, uses of Federal funds to supplement not supplant non-Federal funds, or the distribution of funds to State educational agencies or local educational agencies that apply to the receipt of funds from such programs.

A State must include in its definition of achievement gap schools: the 5 percent of public high schools in the State, and the 5 percent of public elementary schools and secondary schools in the State that are not high schools, that have the largest achievement gap among any of the categories of students described in subparagraph (B), or that have the lowest performance by students in such categories in the State, with respect to (i) being on track to career- and college-readiness and, (ii) in the case of high schools, the graduation rate.

Sec. 1116(b)(1)(B) [Subgroups of Students] The categories of students must be disaggregated by each major racial and ethnic group, by English proficiency status, by status as a child with a disability, and by economically disadvantaged status.

Sec. 1116(b)(2)(A–B) [State and Local Improvement Strategies] requires the local educational agency to develop and implement, for each achievement gap school, a measurable and data-driven correction plan to improve the performance of low-achieving subgroups in the school. Any local educational agency serving an achievement gap school that has been identified as such for more than 3 consecutive years shall not be eligible for any priority, preference, or special consideration for any grant, subgrant or other program funded under this act.

Sec. 1116(c) [Persistently Low-Achieving Schools]

Sec. 1116(c)(1)(A)(i–ii) [Lowest-achieving Schools in the State] requires, beginning in the 2013–14 school year, that each State annually determine the lowest-achieving schools in the State, which shall include (i) the lowest-achieving 5 percent of public high
schools, and the lowest-achieving 5 percent of public elementary schools and secondary schools that are not high schools. This determination shall be based on (I) student performance on the State academic assessments in reading or language arts and math, including student absolute performance and, if applicable, growth and (II) graduation rates. High schools that have less than a 60 percent graduation rate are considered low-achieving. If the State chooses, (III) it may include (aa) schoolwide gains and (bb) absolute student performance or growth on other statewide assessments.

Sec. 1116(c)(1)(B)(i–ii) [Data Rule] specifies that when identifying the lowest-achieving schools, the State shall (i) use data for the most recent year or (ii) average data for the most recent 2-to 3-year period.

Sec. 1116(c)(1)(D)(i–iv) [List of Targeted Low-Achieving Schools] requires States to annually (i) compile a list of the schools identified as the State’s lowest-achieving schools that (I) receive assistance under this part, (II) are public high schools for which 50 percent or more of each school’s students are from low-income families or (III) are public high schools that have less than a 60 percent graduation rate. Further, the State is required to (ii) submit the list to the Secretary, (iii) distribute the list to the local educational agencies, elementary schools, and secondary schools in the State, and (iv) make the list publicly available.

Sec. 1116(c)(2)(A) [Identification as Persistently Low-Achieving] provides that for the 2013–14 school year, each State shall identify schools for the preceding school year that meet the qualifications described in (D) as persistently low-achieving schools. For the 2014–15 school year, and each subsequent school year, each school that has been on the list for the 2 preceding consecutive school years shall be identified as a persistently low-achieving school.

Sec. 1116(c)(2)(B) [5-year Period] provides that each school identified as persistently low-achieving shall be so identified for the 5-year period following the identification.

Sec. 1116(c)(3) [State Waiver] provides that the State may apply to the Secretary to waive the requirements of this section for a school that is performing at a satisfactory level but which would otherwise be considered to be a persistently low-achieving school.

Sec. 1116(c)(4) [Needs Analysis] requires that local education agencies conduct a data-driven analysis of each identified persistently low-achieving school identified to determine the most appropriate school improvement strategies to improve student performance. The needs analysis will include (A) a diagnostic review of data related to students and instructional staff, (B) an analysis of school governance, curriculum, instruction, student supports, conditions for learning, and parent and family engagement practices relative to the needs of the student population, and (C) the resources, which may include community-based supports and early childhood education and care, available at the school, local educational agency, and community levels.

Sec. 1116(c)(5)(A–B) [State and Local Responsibilities] requires local educational agencies, under supervision of the State, to carry out many requirements related to identifying persistently low-
achieving schools. The local educational agency shall: (1) establish a process for selecting an improvement strategy; (2) select and implement an improvement strategy; (3) develop a budget; (4) select and implement a school improvement strategy at the school; (5) monitor the effectiveness of the implementation of the improvement plan; (6) select turnaround partners; (7) align other government resources with the improvement strategy; (8) provide the school with operational flexibility; (9) collect and use data on an ongoing basis to adjust the improvement strategy; (10) provide an assurance that the strategy addresses the needs of all students; (11) take steps to sustain successful reforms; and (12) provide technical assistance and other supports to ensure effective implementation of the school improvement strategy.

Sec. 1116(c)(6)(C) [State as Local Educational Agency] allows a State to take over a persistently low-achieving school and act as the local educational agency if permitted by State law.

Sec. 1116(c)(6)(B) [Strategies] requires the local educational agency to identify a school improvement strategy for each identified persistently low-achieving school from among the strategies described in (i–vi).

The strategy shall include a partnership with a strategy developer offering a school reform program based on at least a moderate level of evidence that the program will have a statistically significant effect on student outcomes, which includes more than one well-designed or well-implemented experimental or quasi-experimental study.

Sec. 1116(c)(6)(B)(v)(I–II) [Restart Strategy] requires that a local educational agency implementing the Restart Strategy choose from two approaches. Sec. 1302 amends section 1302 with technical amendments.

Sec. 1303 amends section 1303 as follows:

Sec. 1303(a) [State Allocations] changes the allocation formula to provide that the amount awarded to each State (other than Puerto Rico) for each fiscal year must be an amount equal to the product of: (1) the sum of the average number of identified eligible migratory children aged 3 through 21, residing in the State, based on data for the preceding 3 years and the number of identified eligible migratory children, age 3 through 21, who received services under this part in summer or intersession programs provided by the State during the previous year; and (2) 40 percent of the average per-pupil expenditure in the State (but not be less than 32 percent, or more than 48 percent) of the average per-pupil expenditure in the United States.

Sec. 1303(b) [Hold Harmless] states that for fiscal years 2011 through 2013 that States will be held harmless from changes to the allocation formula at a rate of 90 percent reduce of their allocation for the previous year.

Sec. 1303(c) [Allocation to Puerto Rico] provides that Puerto Rico's allocation is the amount determined by multiplying the number of children who would be counted under subsection (g) by the product of the percentage which the average per-pupil expenditure in the Commonwealth of Puerto Rico is of the lowest average per-pupil expenditure of any of the 50 States (but not less than 85 percent); and 32 percent of the average per-pupil expenditure in the United States.

Provides that the Secretary must: (1) use the most recent information that most accurately reflects the actual number of migratory children; (2) develop and implement a procedure for monitoring the accuracy of such information, if such a procedure does not create barriers to the families of migratory children who are eligible for services; and (3) update and implement the procedure, to more accurately reflect the cost factors for different types of summer and intersession program designs.

Sec. 1303(g) [Nonparticipating States] provides a mechanism for determining the allocation for a State that did not receive an allocation for the previous fiscal year or that has been participating for less than 3 consecutive years. In that case, the Secretary must calculate the State's number of identified migratory children aged 3 through 21 by using the most recent data available that identifies
the migratory children residing in the State until data is available to calculate the 3-year average number of such children.

*Section 1304 amends section 1304 as follows:*

Sec. 1304(d) [Priority for Services] requires that in providing services with funds received under this part, each recipient of such funds must give priority to migratory children who have made a move within the previous 1-year period and who: (1) are failing, or most at risk of failing, to meet the State college- and career-ready academic content standards and student academic achievement standards adopted under section 1111(a)(1); and (2) have dropped out of school, or most at risk of failing, to meet the State's challenging State academic content standards and challenging State student academic achievement standards, and whose education has been interrupted during the regular school year.

Sec. 1304(e) [Continuation of Services] states that notwithstanding any other provision of this part: (1) a child who ceases to be a migratory child during a school term must be eligible for services until the end of such term; (2) a child who is no longer a migratory child may continue to receive services for 1 additional school year, but only if comparable services are not available through other programs; and (3) students who were eligible for services in secondary school may continue to be served through credit accrual programs until graduation.

assessments, diagnostic assessments, and formative assessments of
reading and writing authorized under this part shall not be con-

law of a State.

Part E—21st Century Community Learning Centers

Section 4106 amends part E of title IV, as redesignated, as follows:

Sec. 4501 [Purpose; Definitions] is amended in subsection (a)
with technical amendments and with two additional purposes as
follows: (3) increase the number of hours in the traditional school
day, week, or year; and (4) comprehensively redesign and imple-
ment an expanded school day, school week or school year schedule
for all students in a high-need school. Subsection (b) amends the
definition of “community learning center” to include providing ex-
panded learning time programs and initiatives and redefines an
“eligible entity” for the program as one or more high-need local
educational agency in partnership with one or more nonprofit orga-
nizations with a record of success in providing programming con-
sistent with the program. Rural local educational agencies that
cannot find partner organizations in geographic proximity or of
good quality may receive a waiver from the State educational agen-
cy.

Sec. 4502 [Allotments to States] maintains the reservation for
national activities and for payments to outlying areas. (b) As in
current law, remaining funds under the part are allotted to States
using the title I–A formula with States allowed to use 2 percent of
their allotment for administrative costs and 3 percent for State ac-
tivities. (c) State activities have been expanded to include profes-
sional development; activities necessary to align services provided
with State academic standards; and coordination with other Fed-
eral, State, and local programs.

Sec. 4503 [State Application] (a) describes minimum require-
ments that States must submit in an application for funds to the
Secretary. While current law is largely maintained, changes in-
clude: (4) States must now describe the grant competition it will
hold to select eligible entities; (5) States are required to provide
awards of sufficient size and scope to support allowable activities;
(7) States must assist eligible entities in coordinating their funds
with other funding streams; (8) Awards to eligible entities are now for 3 years, with an extension of 2 additional years pending positive outcomes (rather than the current law 3–5 years); (11) States must now affirm that the application was developed in consultation with officials overseeing expanded and learning time and summer learning initiatives; (12) State needs assessments must now take into account the availability of expanded learning time; and (13) States must now describe how they will evaluate grantees, including benchmarks used. (b–f) Consistent with current law, State applications submitted to the Secretary in a timely manner will be deemed approved, and can only be disapproved after a hearing process.

Sec. 4504 [Local Competitive Grant Program] describes the application that eligible entities must submit to the State. New elements of the local application include: (A) a description of the expanded learning time or summer learning opportunities the eligible entity will offer; (B) how activities will help keep students on track to college and career readiness; (E) an explanation of how the program will offer students aligned academic instruction and enrichment activities; (H) a description of the eligible entity's capacity to implement the program; and (J) a description of the education and training activities that teachers and program staff have received. The (d) permissive local match is eliminated. The (f) duration of awards is amended to allow an additional period of up to 2 years of the grant if the eligible entity is achieving outcomes of the grant. This section also includes (g) new priorities for the State to consider in awarding grants, including those that are based on strong research evidence, propose to serve the highest percentage of students from low-income families, demonstrate strong partnerships, and provide matching funds (with a scaling match that rises to 30 percent of the third year of the grant, and 40 percent for each subsequent year). It specifies that the Department of Education cannot show preference for, or provide direction about whether communities use these grant funds expanded learning time or afterschool programs.

Sec. 4505 [Local Activities] is amended by (a) adding high-quality expanded learning time programs as a new allowable local activity and (b) describes new performance indicators for the grant, which the State must collect and report to the Secretary. The performance indicators include: the average time added to the school day, school week, or school year; student participation and attendance rates for the programs; and student achievement in core academic subjects and high school graduation rates, as applicable, for students who participate in such programs.

Part F—Promise Neighborhoods

Section 4107 amends title IV by inserting after part E the following:

Sec. 4601 [Short Title] states that this part may be cited as the Promise Neighborhoods Act of 2011.

Sec. 4602 [Purpose] states that the purpose of this part is to improve the academic outcomes, from school readiness to college entry and success, for children living in the Nation’s most distressed neighborhoods, by using data-driven programs and existing resources to provide those children with access to a community-based
continuum of high-quality services that address all the needs of such children from birth to college and career.

Sec. 4603 [Definitions] defines the following terms: “college and career readiness”, “community of practice”, “expanded learning time”, “family and student supports”, “integrated student supports”, “neighborhood”, and “pipeline services”.

Sec. 4611 [Program Authorized] includes the following subsections: (a) establishes Promise Neighborhoods Partnership Grants as a competitive grant program and requires that the Secretary award grants of sufficient size and scope to allow grantees to carry out the purposes of the part; (b) specifies that grants are for a period of 5 years, and may be renewed once; (c) conditions funding after the third year upon the grantee meeting the performance metrics for the grant under sec. 4616(a); (d) requires grantees to provide matching funds of at least 100 percent of the grant amount; and (e) allows the Secretary to waive or reduce the match requirement in cases of significant financial hardship.

Sec. 4612 [Eligible Entities] states that eligible entities for the Partnership Grants include at least one nonprofit entity in partnership with not less than one high-need local educational agency. The partnership may also include any of the following entities: (1) a charter school funded by the Bureau of Indian Education that is not a local educational agency, except that such school shall not be the fiscal agent for the eligible entity partnership; (2) an institution of higher education; (3) the office of a chief elected official of a unit of local government; and (4) an Indian tribe or tribal organization.

Sec. 4613(a) [Application Requirements] describes the application eligible entities must complete to apply for Promise Neighborhoods Partnership grants.

Sec. 4613(b) [Contents of Application] requires applicants to describe in detail their plan to significantly improve the academic outcomes of children living in the neighborhood, by providing a continuum of services and supports that addresses the needs of children in the neighborhood, as identified by a needs analysis and supported by evidence-based practices. Applicants must establish performance goals, consistent with the performance metrics of the program established by the Secretary and including plans to expand the number of children served over time. Applicants must also include a detailed description of the services to be offered and the data they will collect.

Sec. 4613(c) [Memorandum of Understanding] requires each eligible entity to provide a preliminary memorandum of understanding with all partners in the grant.

Sec. 4614 [Use of Funds] states that grantees must use funds to implement the pipeline services they propose in the application—they must spend 80 percent of their funds on these services—and to continuously improve and evaluate the program.

Sec. 4615 [Report and Publicly Available Data] states that the grantees must report data to the Secretary on how many children are served; which pipeline services they access; and the success the program has in areas, such as narrowing achievement gaps, ensuring school readiness, and increasing high-school graduation and college entry rates. Grantees must make this report available to the public.
Sec. 4616 [Accountability] states that the Secretary must establish performance metrics for the grant that will be used in the evaluation of the grant conducted under the authority contained in section 9601.

Sec. 4621 [Program Authorized] includes subsection (a)(1), that establishes Promise Neighborhoods School Grants as a competitive grant program, and (a)(2), that requires that the Secretary award grants of sufficient size and scope to allow grantees to carry out the purposes of the part. Subsection (b) specifies that grants are for a period of 5 years, and may be renewed. Continued funding after the third year is dependent on the grantee meeting the performance metrics for the grant under sec. 4616(a). The Secretary must provide to the Education Council a copy of each grant or contract application submitted under this subpart. Sec. 7206 also requires each entity that receives a grant under this subpart to submit to the Secretary an annual report that determines the extent to which activities carried out with funds provided under this subpart are effective in improving the educational achievement of Native Hawaiian students. As a part of the information reported, each entity that receives a grant under this subpart shall provide data, using information from the most recent year for which data are available, on the academic achievement of the Native Hawaiian students the entity serves, as measured by the State assessments required under section 1111(a), the high school graduation and college-going rates of those students, and such other measures as the Secretary may prescribe.

Sec. 7306 [Definitions] defines the following terms: “Alaska Native” and “Alaska Native organization”.

Title VIII: Impact Aid

Section 8001–8008 amends the below ESEA sections as follows:

Sec. 8001 [Purpose] specifies that the purpose of the program is to provide financial assistance to local educational agencies to assist in the provision of services to federally connected children to help them meet college- and career-ready State academic content and student academic achievement standards.

Section 8002 [Payments Relating to Federal Acquisition of Real Property]

Sec. 8002(b) [Amount] provides that in calculating the amount that a local educational agency is eligible to receive for a fiscal year, the Secretary must apply the current levied real property tax rate for current expenditures levied by fiscally independent local educational agencies, or imputed for fiscally dependent local educational agencies, to the current annually determined estimated taxable value of the acquired Federal property. In determining the total taxable value of such acquired Federal property for fiscal year 2011 and each succeeding fiscal year, the Secretary must: (1) first determine the total taxable value for the purpose of levying property tax for school purposes for current expenditures of real property located within the boundaries of the local educational agency; (2) then determine the per acre value of the eligible Federal property by dividing the total taxable value by the difference between the total acres located within the boundaries of the local educational agency and the number of Federal acres eligible under this section; and (3) then multiply the per acre value by the number of eligible Federal acres. When two or more local educational agencies share eligible Federal property, a local educational agency can ask the Secretary to calculate the per acre value of each local educational agency and apply the average of these per acre values to the acres of the Federal property in that agency.

Sec. 8002(g) [Former Districts] provides that for fiscal year 2006 and all succeeding fiscal years, if an eligible local educational agency is formed at any time after 1938 by the consolidation of two or more former school districts, the local educational agency can choose to have the Secretary determine its eligibility and any amount for which it is eligible for any fiscal year on the basis of one or more of those former districts, as designated by the local educational agency. Eligible local educational agencies include: (1) any local educational agency that, for fiscal year 1994 or any preceding fiscal year, applied, and was determined to be eligible under Public Law 81–874; or (2) a local educational agency formed by the
consolidation of two or more districts, at least one of which was eligible for assistance for the fiscal year proceeding the year of consolidation, if (a) for fiscal years 2006 through 2011, the local educational agency had notified the Secretary of the designation not later than 30 days after the enactment of this act; and (b) for fiscal year 2012, and any subsequent fiscal year, the local educational agency includes the designation in its application.

Sec. 8002(h) [Payments with Respect to Fiscal Years in Which Insufficient Funds are Appropriated] requires the Secretary to first make a foundation payment to each local educational agency that was eligible to receive a payment for fiscal year 2007. The amount of this payment must be equal to 90 percent of the payment the local educational agency received in 2006. If the amount appropriated for the Impact Aid program is insufficient to pay the full amount for all eligible local educational agencies for the fiscal year, then the Secretary must ratably reduce the payment. From the amount that is left over, the Secretary must make payments to each local educational agency that the Secretary determines eligible for a payment for a fiscal year after 2007, for the fiscal year for which such agency was determined eligible for the payment. The amount of the local educational agency’s foundation payment must be equal to its foundation payment for the first fiscal year for any succeeding fiscal year. For local educational agencies determined to be eligible after 2007, the payment must be calculated by:

(i) calculating the local educational agency’s maximum payment;
(ii) calculating the percentage that the amount appropriated for the Impact Aid program for the most recent fiscal year for which the Secretary has completed making payments is of the total maximum payments for that fiscal year for all local educational agencies eligible for a payment relating to Federal acquisition of real property and multiply the agency’s maximum payment by that percentage; and
(iii) multiplying the amount by 90 percent. From any funds remaining after making all foundation payments for the fiscal year involved, the Secretary must make a payment to each local educational agency that received a foundation payment in an amount that bears the same relation to the remainder as a percentage share determined for the local educational agency bears to the percentage share for all local educational agencies eligible to receive a payment for the fiscal year involved, except that data from the most current fiscal year must be used.

Sec. 8002(i) [Special Payments] specifies, for fiscal years in which insufficient funds are appropriated, that the calculation of the foundation payment for a local educational agency that meets the requirements below must be equal to 90 percent of the payment received in fiscal year 2005, for fiscal year 2011 and each succeeding fiscal year. Impacted districts are those that: (A) received a payment for fiscal year 1996; (B) serve a school district that contains all or a portion of U.S. military academy; (C) serves a school district in which at least 60 percent of the real property is federally owned; and (D) demonstrate to the Secretary that the per-pupil revenue derived from local sources is not less than that revenue for the preceding fiscal year.

Sec. 8002(m) [Records] allows the Secretary to base a determination of eligibility on original records (including reproductions of those records) documenting the assessed value of real property,
preparing a legally authorized official as of the time of the Fed-
eral acquisition, or other records that the Secretary determines to
be appropriate and reliable, including Federal agency records or
local historical records.

Section 8003 [Payments for Eligible Federally Connected Chil-
dren]

Sec. 8003(a)(1) [Computation of Payment—In General] specifies
that for the purpose of computing the amount an agency is eligible
to receive as a basic support payment for its federally connected
children or for students with disabilities, the Secretary must deter-
mine the number of federally connected children who were in aver-
age daily attendance (including children enrolled in a State that
has an open enrollment policy, but not including children enrolled
in a distance learning program who are not residing within the
agencies geographic boundaries.

Sec. 8003(a)(4) [Computation of Payment—Military Installation
and Indian Housing Undergoing Renovation or Rebuilding] counts
children as federally connected even if they did not reside on Fed-
eral property because said property was undergoing renovation or
rebuilding, or was authorized for demolition. It specifies that chil-
dren can only be counted for 4 years.

Sec. 8003(a)(5) [Computation of Payment—Military “Build to
Lease” Program Housing] requires the Secretary, in computing the
amount of payment for a local educational agency for federally con-
ected children, to consider children residing in housing initially
acquired or constructed under the “Build to Lease” program, or
under lease of off-base property to reside on Federal property.

Sec. 8003(b)(2)(B) [Eligibility for Heavily Impacted Local Edu-
cational Agencies] provides that a heavily impacted local edu-
cational agency is eligible to receive a basic support payment if it:
(1) is a local educational agency whose boundaries are the same as
a Federal military installation, or whose boundaries are the same
as island property designated by the Secretary of the Interior to be
property that is held in trust by the Federal Government, and that
has no taxing authority; (2) is a local educational agency that (A)
has an enrollment of federally connected children that constitutes
a percentage of the total student enrollment of the agency that is
not less than 45 percent; (B) has a per-pupil expenditure that is
less than (i) for an agency that has a total student enrollment of
500 or more students, 125 percent of the average per-pupil expendi-
ture of the State in which the agency is located; or (ii) for an agen-
cy that has a total student enrollment of less than 500 students,150 percent of the average per-pupil expenditure of the State in
which the agency is located; (C) is an agency that (i) has a tax
rate for general fund purposes that is not less than 95 percent of
the average tax rate for general fund purposes of comparable local
educational agencies in the State; or (ii) was eligible to receive a
payment under this subsection for fiscal year 2012 and is located
in a State that by State law has eliminated ad valorem tax as a
revenue source for local educational agencies; or (D) has an enroll-
ment of children described in subsection (a)(1) that constitutes a
percentage of the total student enrollment of the agency which is
not less than 30 percent, and has a tax rate for general fund pur-
poses which is not less than 125 percent of the average tax rate for general fund purposes for comparable local educational agencies in the State; or (3) is a local educational agency that has a total student enrollment of not less than 25,000 students, of which not less than 50 percent are children federally connected and not less than 5,500 of such children resided on Federal property with a parent employed on Federal property within the local educational agency’s school district boundaries or resided on Federal property with a parent who is on active duty. Generally, a heavily impacted local educational agency that met these requirements is ineligible to receive a basic support payment if the agency fails to meet the requirements for the subsequent fiscal year except that it will continue to receive a basic support payment for the fiscal year for which the ineligibility determination is made. However, a local educational agency with an enrollment of federally connected children that is at least 35 percent of total enrollment and that was also eligible in 2001 retains its eligibility. A local educational agency that is eligible for basic support payments, but whose tax rate for general fund purposes falls below 95 percent of the average tax rate for general fund purposes of local educational agencies in the State for 2 consecutive years loses its eligibility. A heavily impacted local educational agency that becomes ineligible for at least 1 fiscal year can resume eligibility for a basic support payment for a subsequent fiscal year if it meets the requirements. However, it cannot receive a payment until the fiscal year after the eligibility determination. For the first fiscal year for which a heavily impacted local educational agency applies for a basic support payment, or with respect to the first fiscal year for which a heavily impacted local educational agency applies for a basic support payment after becoming ineligible for 1 or more preceding fiscal years, the agency must apply for the payment at least 1 year prior to the start of that first fiscal year.

Sec. 8003(b)(2)(C) [Maximum Amount for Heavily Impacted Local Educational Agencies] provides that the maximum amount that a heavily impacted local educational agency is eligible to receive for any fiscal year is the sum of the total weighted student units, multiplied by the greater of (1) four-fifths of the average per-pupil expenditure of the State in which the local educational agency is located for the third fiscal year preceding the fiscal year for which the determination is made; or (2) four-fifths of the average per-pupil expenditure of all of the States for the third fiscal year preceding the fiscal year for which the determination is made. The section also creates special calculations for certain local educational agencies, including those with large and small numbers of certain eligible children.

Sec. 8003(b)(2)(D) [Maximum Amount for Large Heavily Impacted Local Educational Agencies] provides that the maximum amount that a heavily impacted local educational agency is eligible to receive for any fiscal year must be determined using the formula for the maximum amount of basic support payments. For purposes of calculating the maximum amount, this section specifies that the factor used in determining the weighted student units is 1.35. It defines a heavily impacted local educational agency as a local educational agency that has a total student enrollment of not less than 25,000 students, of which not less than 50 percent are federally
connected and not less than 5,500 of such children reside on Federal property with a parent that is either employed on Federal property or on active duty.

Sec. 8003(b)(2)(E) [Data] requires the Secretary to use student, revenue, expenditure, and tax data from the third fiscal year preceding the fiscal year for which the local educational agency is applying for assistance.

Sec. 8003(b)(2)(G) [Eligibility for Heavily Impacted Local Educational Agencies Affected by Privatization of Military Housing] deems eligible for payment, heavily impacted local educational agencies who are ineligible due to conversion of military housing units to private housing, or as the direct result of base realignment and closure or modularization as determined by the Secretary of Defense, force structure change, or force relocation.

Sec. 8003(b)(3)(B) [Learning Opportunity Threshold] requires the Secretary to disregard children in distance learning programs who do not reside within the geographic boundaries of the local educational agency from its total enrollment when calculating the agency’s learning opportunity threshold percentage.

Sec. 8003(b)(3)(D) [Ratable Distribution] sets a formula the Secretary must use for each fiscal year in which there are insufficient funds to make the total payments for federally connected children, but for which the funds appropriated exceed the amount required to pay each local educational agency 100 percent of the local educational agency’s learning opportunity threshold payment.

Sec. 8003(b)(3)(H) [Special Rule] requires the Secretary to deem each local educational agency that received a fiscal year 2009 basic support payment for heavily impacted local educational agencies under this paragraph as eligible to receive a basic support payment for heavily impacted local educational agencies under this paragraph for each of fiscal 2010, 2011, and 2012 and make payments for each of those years.

Sec. 8003(b)(3)(I) [Continued Eligibility for a Heavily Impacted Local Educational Agency Entering Into] specifies that, for any fiscal year, a heavily impacted local educational agency that received a basic support payment under this paragraph as eligible to receive a basic support payment for heavily impacted local educational agencies under this paragraph for the fiscal year prior to the fiscal year for which the local educational agency entered into an intergovernmental cooperative agreement with a State educational agency must remain eligible to receive a basic support payment under this paragraph for the duration of the intergovernmental cooperative agreement, but in no case for more than 5 years.

Sec. 8003(c) [Prior Year Data] provides an exception to the requirement that calculations for distribution of payments for federally connected children be based on prior year data.

Sec. 8003(e) [Hold Harmless] requires the Secretary to pay local educational agencies, in 2012, 90 percent of the basic support payment it received in 2011, in 2013, 85 percent of the basic support payment it received in 2012, and in 2014, 80 percent of the basic support payment it received in 2013.

Section 8007 [Construction]

Sec. 8007(a) [Construction Payments Authorized] authorizes construction payments to each local educational agency that receives a basic support payment for federally connected children for that fiscal year. The local educational agency must also meet one of the
following requirements: (1) the number of children who are feder-
ally connected because they resided on Indian lands for the pre-
ceding school year constituted at least 50 percent of the total stu-
dent enrollment in the schools of the agency during the preceding
school year; (2) the number of children who are federally connected
because they (a) lived on Federal property and had a parent on act-
ive-duty or (b) did not live on Federal property, but had a parent
on active duty, for the preceding school year constituted at least 50
percent of the total student enrollment in the schools of the agency
during the preceding school year; or (3) the agency is heavily im-
pacted or has lost eligibility but is receiving a basic support pay-
ment for the year in which the eligibility determination is made.

Section 8010 [Federal Administration]

Sec. 8010(d) [Timely Payments] requires the Secretary to pay a
local educational agency the full amount that the agency is eligible
to receive (or, if applicable, the amount that is available to pay the
agency) for a fiscal year by September 30 of the second fiscal year
following the fiscal year for which the amount has been appro-
priated if the local educational agency submits the necessary infor-
mation to the Secretary not later than 1 calendar year following
the fiscal year in which the amount has been appropriated.

Section 8013 [Definitions] changes the definition of “Armed
Forces” to include the Coast Guard.

VIII. ADDITIONAL VIEWS

ADDITIONAL VIEWS OF SENATORS BURR, ISAKSON, HATCH, MCCAIN, AND ROBERTS

Since its inception, the Elementary and Secondary Education Act (ESEA) of 1965 has prioritized the most disadvantaged students in our society by providing a basic level of financial support for schools serving communities of low-income families and students. Throughout the years since, however, previous Congresses and Administrations have strayed from this basic—albeit central—tenet of the Federal Government’s efforts in education, supporting an ever-expanding and unfocused Federal role that has failed to raise student achievement and only further frustrated innovation in the States. Ultimately, this increasingly Federal approach toward our Nation’s schools has endangered the mission of ESEA and the students it was supposed to serve.

Indeed, passage of the No Child Left Behind Act of 2001, although well-intentioned, ushered in a new era of larger Federal mandates, ballooning Federal education spending, and complex accountability requirements that have done little to address student academic achievement, creating a compliance nature in States more focused on adhering to Federal rules than on instruction. Admittedly, the history of these misguided efforts is bipartisan, with both Republicans and Democrats supporting an ever-increasing Federal role. But after decades of Federal expansion with little to show for it, now is the right time to signal a fundamental shift in the future of Federal education policy back to lessened Federal involvement and greater flexibility for State and local governments, schools, teachers, and parents. Educating our Nation’s students is a State and local responsibility that cannot be successfully managed from Washington, DC, leading us to believe the overall Federal approach needs to be rethought. This proposed reauthorization, in our view, fails to initiate that fundamental shift.

ESERA 2011

Since the last ESEA reauthorization over 10 years ago, much has changed in the States and the schools they serve. Committee Republicans support the efforts of States to raise their own academic content standards and update accountability systems as many have through the efforts of the National Governors Association (NGA) and the Council of Chief State School Officers (CCSSO). To the extent States are taking the lead in identifying opportunities to improve their standards and assessments and make reforms to their own accountability systems, we applaud these State-led efforts. With that said we firmly reject attempts—however lightly tried in ESERA 2011 or more directly through the Administration’s Race to the Top competition—to prod States toward the Common Core
Standards Initiative. In our view, Federal legislation and policy should remain silent on this issue, even if in the form of nudges or inducements.

Unfortunately, rather than returning accountability for educating students to local decisionmakers, this legislation continues to make decisions in Washington that would be better managed by the States. Although this bill would eliminate onerous mandates on adequate yearly progress (AYP) and annual measurable objectives (AMOs), it makes the wrong exchange for that freedom by mandating a focus on the bottom 5 percent of low-performing schools while also maintaining focus on “achievement gap schools”, those in which the largest disparities between subgroups exists.

Further, ESERA 2011 injects Washington-defined school turnaround strategies that would mandate how many teachers would need to be dismissed, how many years would be too long before a principal would need to be dismissed, and—in a clear illustration of how misguided this one-size-fits-all approach truly is—actually give States cover to keep persistently low-performing schools open for several years without ever improving. We believe one-size-fits-all school turnaround models cannot be so thoughtfully constructed to successfully manage thousands of unique schools across the country without being either overly prescriptive or the result of a lowest-common denominator compromise from Washington. Ultimately, the tough business of school turnaround efforts will require hard decisions and designs made by locals with the support of parents and teachers free of Washington micromanagement.

PROGRAMS AND SPENDING

Finally, ESERA 2011 purports to eliminate or consolidate 39 Federal education programs, which in the view of the Minority is deceptive marketing at best. ESERA 2011 creates new programs while disguising old ones, failing to recognize the continued rapid expansion of the U.S. Department of Education, the absence of evident return for our continued spending, and the dire condition of the Federal purse. Specifically, this legislation eliminates several programs that lack any connection to academic achievement or had not been funded in years and then touts these eliminations as an achievement toward reining in spending. Moreover, ESERA 2011 claims to eliminate subject-specific programs but creates new superprograms to simply continue those activities with even more Federal controls and mandates than its antecedent programs. We believe this is a shell game that only continues Federal spending blithely, all while claiming belt tightening.

As if this disingenuous attempt at program consolidation through phantom cuts were not enough, the committee also further adds (partly through amendments during the October 20, 2011, Executive Session) to the list of categorical programs new, expensive additions such as Promise Neighborhoods, Race to the Top, Investing in Innovation (i3), the Advanced Research Projects Agency—Education (ARPA–ED), Well-Rounded curriculum spending, and teacher and principal recruitment programs. It is appalling that the committee has prioritized the spending of hundreds of millions to billions of Federal dollars for these new, untested programs when
our priority should be direct spending for the most disadvantaged students in our Nation, through title I formula funds.

COMMITTEE PROCESS

Federal education legislation has always enjoyed broad bipartisan support because, despite deep policy differences amongst interested parties, previous Congresses and Administrations have prioritized a cooperative, bipartisan process with the intent of improving education in our Nation. This reauthorization departs from this history on several counts.

In the midst of ongoing HELP Committee work, on September 23, 2011—a mere 3 weeks before the HELP Committee would hold executive session on ESEA legislation—President Obama and the U.S. Department of Education issued State-level waivers to NCLB’s most central provisions. While some aspects of these waivers clearly are appropriate (i.e., relief from adequate yearly progress (AYP)) others are not (i.e., requirements for teacher and principal evaluations) and run afoul of the clear intent of section 9401 of the ESEA (P.L. 107–110) providing statutory relief for States without mention of Federally mandated strings or requirements on that relief. The waiver authority provided by the Administration requires college- and career-ready expectations; State-developed differentiated recognition, accountability, and support; effective instruction and leadership requirements; and reduced duplication and burden. Whole cloth revisions such as these to No Child Left Behind are within Congress’ purview as a co-equal branch of government, not the Administration’s alone.

Adding these waiver requirements raises serious questions about the legality of the Administration’s waivers and furthermore limits its credibility amongst the States. Though some States have applied for waivers because of the hope of relief from the onerous and outdated provisions of No Child Left Behind, other States have declined to apply, citing the temporary nature of the waivers and the inability to comply for internal, State reasons. These issues would easily be overcome with a fully legislated congressional reauthorization, as opposed to waivers, by virtue of the representation of each State in Congress and the value of the legislative process. Setting these concerns aside, the Administration remained disengaged in congressional attempts to reauthorize the law, taking its own approach that in our view hurts the prospects of a true reauthorization without the leadership of the President.

Perhaps as a result of the hurried atmosphere created by President Obama’s insistence on waivers, the Majority also unnecessarily rushed the committee to the original October 19 (subsequently rescheduled for the following day), 2011 Executive Session. Despite assertions by the Majority that adequate time was given for review of a draft that spanned nearly 900 pages and the to-the-letter adherence to committee rules, this bare minimum, de minimus approach to reauthorizing legislation as important as K–12 Federal education policy is clearly inappropriate for the full discourse this legislation deserves. As a result, several prominent education advocacy groups representing teachers, principals and school board members wrote a letter to the Majority urging postponement of the executive session for fear the process was moving too quick-
These pleas, along with the objections of members of the Minority, were ignored by the Majority for reasons still unapparent.

CONCLUSION

Supporters of ESERA 2011 claim their bill takes the approach of rejecting No Child Left Behind’s heavy Federal prescription, agreeing that current Federal law stifles innovation on the ground, all while replacing it with its own version of heavy Federal prescription and mandates. If this legislation becomes law, the Federal Government will continue the business of telling States and locals how to intervene in their schools, continue spending at levels that are unsustainable, and lock out the flexibility necessary for teaching the diverse nature of students our Nation presents.

Committee Republicans believe now is the time to right size the Federal role in education and empower States and local communities to take back control of education in their local schools. This legislation undermines the central tenets of why the Federal Government initiated its involvement in education in 1965, which is to promote equity in funding to the most disadvantaged students in our Nation with their more affluent peers while maintaining the local control that made American schools the envy of the world. This legislation would further remove the Federal Government from these central tenets and, as a result, should not become law.
ADDITIONAL VIEWS OF SENATOR MURKOWSKI

I agree with my Minority colleagues that the No Child Left Behind Act (NCLB) created more one-size-fits-all Federal mandates and, in too many schools, a culture of compliance that overshadowed effective, innovative instruction. I disagree, however, that there has been little improvement in academic achievement since the enactment of NCLB. In many schools, the academic achievement of low-income, minority, and special needs students has increased and achievement gaps have decreased. Schools have used the data generated by the Adequate Yearly Progress system to improve instructional practices and professional development. NCLB also gave educators, parents, and taxpayers the information they needed to leverage changes that had long been needed.

I had hoped that the Senate Health, Education, Labor, and Pensions Committee would have taken this opportunity to restore an appropriate balance in the roles played by Federal, State, and local governments, schools, teachers, and parents. Unfortunately, the Elementary and Secondary Education Reauthorization Act (ESERA) failed to successfully combine strong accountability for taxpayers' funds and our children's future with greater opportunity for States to design accountability systems that work for their students.

I support this legislation's focus on college- and career-ready standards (which I believe should be crafted by States rather than mandated by the Federal Government). I support the continued focus on the groups of students who tend to be most academically at risk. I agree that including student growth in the measure of a school's success is a crucial improvement. I also agree that recognition of high-performing schools is long overdue.

I strongly disagree, however, with ESERA's focus on only the bottom 5 percent of low-performing schools and only the very largest disparities between subgroups. Under ESERA 2011, the lack of achievement of students with disabilities, minorities and other subgroups of students could be masked and again ignored. That is unacceptable.

I agree with my Minority colleagues that the school turnaround strategies included in this legislation ignore the realities in many areas of our Nation, especially in challenging communities in both urban and rural America. Teacher and principal turnover is the problem in too many of our schools—especially in rural States like Alaska. Yet, this bill requires principals to be fired despite having no control over the factors that impact student learning, such as staffing and professional development. The bill requires teachers who are happy to build their lives in challenging communities to be fired, rather than focusing on helping them to improve their instructional practices. According to the best advice of some of our Nation's most effective education leaders, none of these turnaround models will encourage innovative, smart, successful educators to take jobs in our most challenging schools. While the legislation does allow the Department to approve a State-designed strategy, States' experiences with the Department's offer of waivers informs us that this model is more likely to extend Federal micromanagement in the decisions of our local schools instead of reduce it.

Some of my colleagues believe that the Federal Government has no role in education. Others believe that the Federal Government should limit the Federal role to funding title I as a block grant and
allow States to determine whether schools are effective or not. I believe that the Federal Government does have a role in assisting our Nation’s children to be prepared for the future. I believe we must maintain the commitment made in 1965 to our Nation’s disadvantaged students by supporting programs that have resulted in student gains, and that while we must give States more authority to innovate, the Federal Government should demand that our schools meet the needs of each and every student.

This is especially true in regard to our Nation’s first peoples. Tragically, this committee missed an important opportunity to take on one of the most complicated and important educational issues of the day—the role of America’s indigenous first peoples in the education of their children. Over the course of our Nation’s history since the ratification of our Constitution, the U.S. government has had a government-to-government relationship with Indian tribes. Over the past decade, the increasing desire for self-determination among our American Indian, Alaska Native, and Native Hawaiian populations who believe they should have greater responsibility for the success of their children has gained strength. Yet, the Majority chose not to be informed by these facts or even engage in a discussion about the role of Native Americans in their own children’s education. This committee must examine how ESEA can more effectively serve our Nation’s first peoples. Yet the only mention of Native Americans remains relegated to Title VII, Indian Education where it has always been—a segregated afterthought. This is not acceptable.

I also agree with my Minority colleagues that the process by which ESERA was brought to the committee’s consideration was deeply flawed. The Senate HELP Committee has a long history of resolving complex and controversial issues in a fully bipartisan, fully inclusive manner. The Senate HELP Committee has, in the past, represented the best traditions of the U.S. Senate. This reauthorization departs from this history on several counts.

This legislation was drafted by Senators Harkin and Enzi alone. This nearly 900–page bill was presented to committee members on October 11, 2011. In the 1 week between the bill’s unveiling and the Executive Session, no substantive, bipartisan negotiation was permitted. Chairman Harkin provided committee members just 1 week to review the legislation, evaluate its impact on their individual States and communities, and engage National and constituent stakeholders. I agree with my Minority colleagues, and—truth to tell, many of my Majority colleagues—that this hurried approach was inappropriate. The final product reflects the lack of informed and careful consideration that this committee has given to every previous major reauthorization in recent history. I am also deeply dismayed that the Chairman chose to hold a hearing to take testimony on the strengths and weaknesses of ESERA after the bill was passed out of committee.

I am hopeful that with the start of the 113th Congress, this committee will start over and, through a fully bipartisan and inclusive process, build legislation that will work in both the urban and rural corners of our Nation and that will work for parents, educators, taxpayers and students alike.

(2) Exception.—If the sum of the amounts appropriated for parts A, C, and D of this title is equal to or greater than $14,000,000,000, then the reservation described in [(subsection (a)(1))paragraph (1)(A)] shall not exceed 1 percent of the amount the State would receive, if $14,000,000,000 were allocated among the States for parts A, C, and D of this title.
(b) Accountability and Support.—
(1) In General.—Each State may reserve not more than 4 percent of the amount the State receives under subpart 2 of part A to carry out paragraph (2) and to carry out the State and local educational agency responsibilities under section 1116, which may include carrying out a statewide system of technical assistance and support for local educational agencies.
(2) Uses.—Of the amount reserved under paragraph (1) for any fiscal year, the State educational agency—
(A) shall use not less than 90 percent of that amount by allocating such sums directly to local educational agencies for activities required under section 1116; or
(B) may, with the approval of the local educational agency, directly provide for such activities or arrange for their provision through other entities such as educational service agencies.
(3) Priority.—The State educational agency, in allocating funds to local educational agencies under this subsection, shall give priority to local educational agencies that—
(A) serve the lowest-achieving schools, including schools identified under subsection (b) or (c) of section 1116;
(B) demonstrate the greatest need for such funds; and
(C) demonstrate the strongest commitment to ensuring that such funds are used to enable the lowest-achieving schools to improve student achievement and outcomes.
(4) Unused Funds.—If, after consultation with local educational agencies in the State, the State educational agency determines that the amount of funds reserved to carry out this subsection is greater than the amount needed to provide the assistance described in this subsection, the State educational agency shall allocate the excess amount to local educational agencies in accordance with—
(A) the relative allocations the State educational agency made to those agencies for that fiscal year under subpart 2 of part A; or
(B) section 1126(c).
(5) Special Rule.—Notwithstanding any other provision of this subsection, the amount of funds reserved by the State educational agency under this subsection in any fiscal year shall not decrease the amount of funds each local educational agency receives under subpart 2 of part A below the amount received by such local educational agency under such subpart for the preceding fiscal year.
(6) **REPORTING.**—Each State educational agency shall make publicly available a list of those schools that have received funds or services pursuant to this subsection and the percentage of students from each such school from families with incomes below the poverty line.

PART A—IMPROVING BASIC PROGRAMS OPERATED BY LOCAL EDUCATIONAL AGENCIES

Subpart 1—Basic Program Requirements

(a) **PLANS REQUIRED.**—

(1) **IN GENERAL.**—For any State desiring to receive a grant under this part, the State educational agency shall submit to the Secretary a plan, developed by the State educational agency, in consultation with local educational agencies, teachers, principals, pupil services personnel, administrators (including administrators of programs described in other parts of this title), other staff, and parents, that satisfies the requirements of this section and that is coordinated with other programs under this Act, the Individuals with Disabilities Education Act, the Carl D. Perkins Career and Technical Education Act of 2006, the Head Start Act, the Adult Education and Family Literacy Act, and the McKinney-Vento Homeless Assistance Act.

(2) **CONSOLIDATED PLAN.**—A State plan submitted under paragraph (1) may be submitted as part of a consolidated plan under section 9302.

(b) **ACADEMIC STANDARDS, ACADEMIC ASSESSMENTS, AND ACCOUNTABILITY.**—

(1) **CHALLENGING ACADEMIC STANDARDS.**—

(A) **IN GENERAL.**—Each State plan shall demonstrate that the State has adopted challenging academic content standards and challenging student academic achievement standards that will be used by the State, its local educational agencies, and its schools to carry out this part, except that a State shall not be required to submit such standards to the Secretary.

(B) **SAME STANDARDS.**—The academic standards required by subparagraph (A) shall be the same academic standards that the State applies to all schools and children in the State.

(C) **SUBJECTS.**—The State shall have such academic standards for all public elementary school and secondary school children, including children served under this part, in subjects determined by the State, but including at least mathematics, reading or language arts, and (beginning in the 2005–2006 school year) science, which shall include the same knowledge, skills, and levels of achievement expected of all children.

(D) **CHALLENGING ACADEMIC STANDARDS.**—Standards under this paragraph shall include—
(i) challenging academic content standards in academic subjects that—
   (I) specify what children are expected to know and be able to do;
   (II) contain coherent and rigorous content; and
   (III) encourage the teaching of advanced skills; and

(ii) challenging student academic achievement standards that—
   (I) are aligned with the State’s academic content standards;
   (II) describe two levels of high achievement (proficient and advanced) that determine how well children are mastering the material in the State academic content standards; and
   (III) describe a third level of achievement (basic) to provide complete information about the progress of the lower-achieving children toward mastering the proficient and advanced levels of achievement.

(E) INFORMATION.—For the subjects in which students will be served under this part, but for which a State is not required by subparagraphs (A), (B), and (C) to develop, and has not otherwise developed, such academic standards, the State plan shall describe a strategy for ensuring that students are taught the same knowledge and skills in such subjects and held to the same expectations as are all children.

(F) EXISTING STANDARDS.—Nothing in this part shall prohibit a State from revising, consistent with this section, any standard adopted under this part before or after the date of enactment of the No Child Left Behind Act of 2001.
(iii) include sanctions and rewards, such as bonuses and recognition, the State will use to hold local educational agencies and public elementary schools and secondary schools accountable for student achievement and for ensuring that they make adequate yearly progress in accordance with the State’s definition under subparagraphs (B) and (C).

(B) ADEQUATE YEARLY PROGRESS.—Each State plan shall demonstrate, based on academic assessments described in paragraph (3), and in accordance with this paragraph, what constitutes adequate yearly progress of the State, and of all public elementary schools, secondary schools, and local educational agencies in the State, toward enabling all public elementary school and secondary school students to meet the State’s student academic achievement standards, while working toward the goal of narrowing the achievement gaps in the State, local educational agencies, and schools.

(C) DEFINITION.—“Adequate yearly progress” shall be defined by the State in a manner that—

(i) applies the same high standards of academic achievement to all public elementary school and secondary school students in the State;

(ii) is statistically valid and reliable;

(iii) results in continuous and substantial academic improvement for all students;

(iv) measures the progress of public elementary schools, secondary schools and local educational agencies and the State based primarily on the academic assessments described in paragraph (3);

(v) includes separate measurable annual objectives for continuous and substantial improvement for each of the following:

(I) The achievement of all public elementary school and secondary school students.

(II) The achievement of—

(aa) economically disadvantaged students;

(bb) students from major racial and ethnic groups;

(cc) students with disabilities; and

(dd) students with limited English proficiency;

except that disaggregation of data under subclause (II) shall not be required in a case in which the number of students in a category is insufficient to yield statistically reliable information or the results would reveal personally identifiable information about an individual student;

(vi) in accordance with subparagraph (D), includes graduation rates for public secondary school students (defined as the percentage of students who graduate from secondary school with a regular diploma in the standard number of years) and at least one other aca-
ademic indicator, as determined by the State for all public elementary school students; and

(vii) in accordance with subparagraph (D), at the State's discretion, may also include other academic indicators, as determined by the State for all public school students, measured separately for each group described in clause (v), such as achievement on additional State or locally administered assessments, decreases in grade-to-grade retention rates, attendance rates, and changes in the percentages of students completing gifted and talented, advanced placement, and college preparatory courses.

(D) REQUIREMENTS FOR OTHER INDICATORS.—In carrying out subparagraph (C)(vi) and (vii), the State—

(i) shall ensure that the indicators described in those provisions are valid and reliable, and are consistent with relevant, nationally recognized professional and technical standards, if any; and

(ii) except as provided in subparagraph (I)(i), may not use those indicators to reduce the number of, or change, the schools that would otherwise be subject to school improvement, corrective action, or restructuring under section 1116 if those additional indicators were not used, but may use them to identify additional schools for school improvement or in need of corrective action or restructuring.

(E) STARTING POINT.—Each State, using data for the 2001–2002 school year, shall establish the starting point for measuring, under subparagraphs (G) and (H), the percentage of students meeting or exceeding the State's proficient level of academic achievement on the State assessments under paragraph (3) and pursuant to the timeline described in subparagraph (F). The starting point shall be, at a minimum, based on the higher of the percentage of students at the proficient level who are in—

(i) the State's lowest achieving group of students described in subparagraph (C)(v)(II); or

(ii) the school at the 20th percentile in the State, based on enrollment, among all schools ranked by the percentage of students at the proficient level.

(F) TIMELINE.—Each State shall establish a timeline for adequate yearly progress. The timeline shall ensure that not later than 12 years after the end of the 2001–2002 school year, all students in each group described in subparagraph (C)(v) will meet or exceed the State's proficient level of academic achievement on the State assessments under paragraph (3).

(G) MEASURABLE OBJECTIVES.—Each State shall establish statewide annual measurable objectives, pursuant to subparagraph (C)(v), for meeting the requirements of this paragraph, and which—

(i) shall be set separately for the assessments of mathematics and reading or language arts under subsection (a)(3);
(ii) shall be the same for all schools and local educational agencies in the State;
   (iii) shall identify a single minimum percentage of students who are required to meet or exceed the proficient level on the academic assessments that applies separately to each group of students described in subparagraph (C)(v);
   (iv) shall ensure that all students will meet or exceed the State's proficient level of academic achievement on the State assessments within the State's timeline under subparagraph (F); and
   (v) may be the same for more than 1 year, subject to the requirements of subparagraph (H).

(H) INTERMEDIATE GOALS FOR ANNUAL YEARLY PROGRESS.—Each State shall establish intermediate goals for meeting the requirements, including the measurable objectives in subparagraph (G), of this paragraph and that shall—
   (i) increase in equal increments over the period covered by the State's timeline under subparagraph (F);
   (ii) provide for the first increase to occur in not more than 2 years; and
   (iii) provide for each following increase to occur in not more than 3 years.

(I) ANNUAL IMPROVEMENT FOR SCHOOLS.—Each year, for a school to make adequate yearly progress under this paragraph—
   (i) each group of students described in subparagraph (C)(v) must meet or exceed the objectives set by the State under subparagraph (G), except that if any group described in subparagraph (C)(v) does not meet those objectives in any particular year, the school shall be considered to have made adequate yearly progress if the percentage of students in that group who did not meet or exceed the proficient level of academic achievement on the State assessments under paragraph (3) for that year decreased by 10 percent of that percentage from the preceding school year and that group made progress on one or more of the academic indicators described in subparagraph (C)(vi) or (vii); and
   (ii) not less than 95 percent of each group of students described in subparagraph (C)(v) who are enrolled in the school are required to take the assessments, consistent with paragraph (3)(C)(xi) and with accommodations, guidelines, and alternative assessments provided in the same manner as those provided under section 612(a)(16)(A) of the Individuals with Disabilities Education Act and paragraph (3), on which adequate yearly progress is based (except that the 95 percent requirement described in this clause shall not apply in a case in which the number of students in a category is insufficient to yield statistically
reliable information or the results would reveal personally identifiable information about an individual student).

(j) **Uniform Averaging Procedure.**—For the purpose of determining whether schools are making adequate yearly progress, the State may establish a uniform procedure for averaging data which includes one or more of the following:

(i) The State may average data from the school year for which the determination is made with data from one or two school years immediately preceding that school year.

(ii) Until the assessments described in paragraph (3) are administered in such manner and time to allow for the implementation of the uniform procedure for averaging data described in clause (i), the State may use the academic assessments that were required under paragraph (3) as that paragraph was in effect on the day preceding the date of enactment of the No Child Left Behind Act of 2001, provided that nothing in this clause shall be construed to undermine or delay the determination of adequate yearly progress, the requirements of section 1116, or the implementation of assessments under this section.

(iii) The State may use data across grades in a school.

(k) **Accountability for Charter Schools.**—The accountability provisions under this Act shall be overseen for charter schools in accordance with State charter school law.

(3) **Academic Assessments.**—

(A) **In General.**—Each State plan shall demonstrate that the State educational agency, in consultation with local educational agencies, has implemented a set of high-quality, yearly student academic assessments that include, at a minimum, academic assessments in mathematics, reading or language arts, and science that will be used as the primary means of determining the yearly performance of the State and of each local educational agency and school in the State in enabling all children to meet the State's challenging student academic achievement standards, except that no State shall be required to meet the requirements of this part relating to science assessments until the beginning of the 2007–2008 school year.

(B) **Use of Assessments.**—Each State educational agency may incorporate the data from the assessments under this paragraph into a State-developed longitudinal data system that links student test scores, length of enrollment, and graduation records over time.

(C) **Requirements.**—Such assessments shall—

(i) be the same academic assessments used to measure the achievement of all children;

(ii) be aligned with the State's challenging academic content and student academic achievement standards;
standards, and provide coherent information about student attainment of such standards;

(iii) be used for purposes for which such assessments are valid and reliable, and be consistent with relevant, nationally recognized professional and technical standards;

(iv) be used only if the State educational agency provides to the Secretary evidence from the test publisher or other relevant sources that the assessments used are of adequate technical quality for each purpose required under this Act and are consistent with the requirements of this section, and such evidence is made public by the Secretary upon request;

(v)(I) except as otherwise provided for grades 3 through 8 under clause vii, measure the proficiency of students in, at a minimum, mathematics and reading or language arts, and be administered not less than once during—

(aa) grades 3 through 5;

(bb) grades 6 through 9; and

(cc) grades 10 through 12;

(II) beginning not later than school year 2007–2008, measure the proficiency of all students in science and be administered not less than one time during—

(aa) grades 3 through 5;

(bb) grades 6 through 9; and

(cc) grades 10 through 12;

(vi) involve multiple up-to-date measures of student academic achievement, including measures that assess higher-order thinking skills and understanding;

(vii) beginning not later than school year 2005–2006, measure the achievement of students against the challenging State academic content and student academic achievement standards in each of grades 3 through 8 in, at a minimum, mathematics, and reading or language arts, except that the Secretary may provide the State an additional year if the State demonstrates that exceptional or uncontrollable circumstances, such as a natural disaster or a precipitous and unforeseen decline in the financial resources of the State, prevented full implementation of the academic assessments by that deadline and that the State will complete implementation within the additional 1-year period;

(viii) at the discretion of the State, measure the proficiency of students in academic subjects not described in clauses (v), (vi), (vii) in which the State has adopted challenging academic content and academic achievement standards;

(ix) provide for—

(I) the participation in such assessments of all students;
[(II) the reasonable adaptations and accommodations for students with disabilities (as defined under section 602(3) of the Individuals with Disabilities Education Act) necessary to measure the academic achievement of such students relative to State academic content and State student academic achievement standards; and

[(III) the inclusion of limited English proficient students, who shall be assessed in a valid and reliable manner and provided reasonable accommodations on assessments administered to such students under this paragraph, including, to the extent practicable, assessments in the language and form most likely to yield accurate data on what such students know and can do in academic content areas, until such students have achieved English language proficiency as determined under paragraph (7);

[(x) notwithstanding subclause (III), the academic assessment (using tests written in English) of reading or language arts of any student who has attended school in the United States (not including Puerto Rico) for three or more consecutive school years, except that if the local educational agency determines, on a case-by-case individual basis, that academic assessments in another language or form would likely yield more accurate and reliable information on what such student knows and can do, the local educational agency may make a determination to assess such student in the appropriate language other than English for a period that does not exceed two additional consecutive years, provided that such student has not yet reached a level of English language proficiency sufficient to yield valid and reliable information on what such student knows and can do on tests (written in English) of reading or language arts;

[(xi) include students who have attended schools in a local educational agency for a full academic year but have not attended a single school for a full academic year, except that the performance of students who have attended more than 1 school in the local educational agency in any academic year shall be used only in determining the progress of the local educational agency;

[(xii) produce individual student interpretive, descriptive, and diagnostic reports, consistent with clause (iii) that allow parents, teachers, and principals to understand and address the specific academic needs of students, and include information regarding achievement on academic assessments aligned with State academic achievement standards, and that are provided to parents, teachers, and principals, as soon as is practicably possible after the assessment is given, in an understandable and uniform format, and
to the extent practicable, in a language that parents can understand;

(xiii) enable results to be disaggregated within each State, local educational agency, and school by gender, by each major racial and ethnic group, by English proficiency status, by migrant status, by students with disabilities as compared to nondisabled students, and by economically disadvantaged students as compared to students who are not economically disadvantaged, except that, in the case of a local educational agency or a school, such disaggregation shall not be required in a case in which the number of students in a category is insufficient to yield statistically reliable information or the results would reveal personally identifiable information about an individual student;

(xiv) be consistent with widely accepted professional testing standards, objectively measure academic achievement, knowledge, and skills, and be tests that do not evaluate or assess personal or family beliefs and attitudes, or publicly disclose personally identifiable information; and

(xv) enable itemized score analyses to be produced and reported, consistent with clause (iii), to local educational agencies and schools, so that parents, teachers, principals, and administrators can interpret and address the specific academic needs of students as indicated by the students’ achievement on assessment items.

(D) DEFERRAL.—A State may defer the commencement, or suspend the administration, but not cease the development, of the assessments described in this paragraph, that were not required prior to the date of enactment of the No Child Left Behind Act of 2001, for 1 year for each year for which the amount appropriated for grants under section 6113(a)(2) is less than—

(i) $370,000,000 for fiscal year 2002;
(ii) $380,000,000 for fiscal year 2003;
(iii) $390,000,000 for fiscal year 2004; and
(iv) $400,000,000 for fiscal years 2005 through 2007.

(4) SPECIAL RULE.—Academic assessment measures in addition to those in paragraph (3) that do not meet the requirements of such paragraph may be included in the assessment under paragraph (3) as additional measures, but may not be used in lieu of the academic assessments required under paragraph (3). Such additional assessment measures may not be used to reduce the number of or change, the schools that would otherwise be subject to school improvement, corrective action, or restructuring under section 1116 if such additional indicators were not used, but may be used to identify additional schools for school improvement or in need of corrective action or restructuring except as provided in paragraph (2)(I)(i).

(5) STATE AUTHORITY.—If a State educational agency provides evidence, which is satisfactory to the Secretary, that nei-
ther the State educational agency nor any other State government official, agency, or entity has sufficient authority, under State law, to adopt curriculum content and student academic achievement standards, and academic assessments aligned with such academic standards, which will be applicable to all students enrolled in the State’s public elementary schools and secondary schools, then the State educational agency may meet the requirements of this subsection by—

(A) adopting academic standards and academic assessments that meet the requirements of this subsection, on a statewide basis, and limiting their applicability to students served under this part; or

(B) adopting and implementing policies that ensure that each local educational agency in the State that receives grants under this part will adopt curriculum content and student academic achievement standards, and academic assessments aligned with such standards, which—

(i) meet all of the criteria in this subsection and any regulations regarding such standards and assessments that the Secretary may publish; and

(ii) are applicable to all students served by each such local educational agency.

(6) LANGUAGE ASSESSMENTS.—Each State plan shall identify the languages other than English that are present in the participating student population and indicate the languages for which yearly student academic assessments are not available and are needed. The State shall make every effort to develop such assessments and may request assistance from the Secretary if linguistically accessible academic assessment measures are needed. Upon request, the Secretary shall assist with the identification of appropriate academic assessment measures in the needed languages, but shall not mandate a specific academic assessment or mode of instruction.

(7) ACADEMIC ASSESSMENTS OF ENGLISH LANGUAGE PROFICIENCY.—Each State plan shall demonstrate that local educational agencies in the State will, beginning not later than school year 2002–2003, provide for an annual assessment of English proficiency (measuring students’ oral language, reading, and writing skills in English) of all students with limited English proficiency in the schools served by the State educational agency, except that the Secretary may provide the State 1 additional year if the State demonstrates that exceptional or uncontrollable circumstances, such as a natural disaster or a precipitous and unforeseen decline in the financial resources of the State, prevented full implementation of this paragraph by that deadline and that the State will complete implementation within the additional 1-year period.

(8) REQUIREMENT.—Each State plan shall describe—

(A) how the State educational agency will assist each local educational agency and school affected by the State plan to develop the capacity to comply with each of the requirements of sections 1112(c)(1)(D), 1114(b), and 1115(c) that is applicable to such agency or school;
[(B) how the State educational agency will assist each local educational agency and school affected by the State plan to provide additional educational assistance to individual students assessed as needing help to achieve the State's challenging academic achievement standards;

[(C) the specific steps the State educational agency will take to ensure that both schoolwide programs and targeted assistance schools provide instruction by highly qualified instructional staff as required by sections 1114(b)(1)(C) and 1115(c)(1)(E), including steps that the State educational agency will take to ensure that poor and minority children are not taught at higher rates than other children by inexperienced, unqualified, or out-of-field teachers, and the measures that the State educational agency will use to evaluate and publicly report the progress of the State educational agency with respect to such steps;

[(D) an assurance that the State educational agency will assist local educational agencies in developing or identifying high-quality effective curricula aligned with State academic achievement standards and how the State educational agency will disseminate such curricula to each local educational agency and school within the State; and

[(E) such other factors the State educational agency determines appropriate to provide students an opportunity to achieve the knowledge and skills described in the challenging academic content standards adopted by the State.

[(9) FACTORS AFFECTING STUDENT ACHIEVEMENT. — Each State plan shall include an assurance that the State educational agency will coordinate and collaborate, to the extent feasible and necessary as determined by the State educational agency, with agencies providing services to children, youth, and families, with respect to local educational agencies within the State that are identified under section 1116 and that request assistance with addressing major factors that have significantly affected the academic achievement of students in the local educational agency or schools served by such agency.

[(10) USE OF ACADEMIC ASSESSMENT RESULTS TO IMPROVE STUDENT ACADEMIC ACHIEVEMENT. — Each State plan shall describe how the State educational agency will ensure that the results of the State assessments described in paragraph (3)—

[(A) will be promptly provided to local educational agencies, schools, and teachers in a manner that is clear and easy to understand, but not later than before the beginning of the next school year; and

[(B) be used by those local educational agencies, schools, and teachers to improve the educational achievement of individual students.

[(c) OTHER PROVISIONS TO SUPPORT TEACHING AND LEARNING. — Each State plan shall contain assurances that—

[(1) the State educational agency will meet the requirements of subsection (h)(1) and, beginning with the 2002–2003 school year, will produce the annual State report cards described in such subsection, except that the Secretary may provide the State educational agency 1 additional year if the State edu-
cational agency demonstrates that exceptional or uncontrollable circumstances, such as a natural disaster or a precipitous and unforeseen decline in the financial resources of the State, prevented full implementation of this paragraph by that deadline and that the State will complete implementation within the additional 1-year period;

I(2) the State will, beginning in school year 2002–2003, participate in biennial State academic assessments of 4th and 8th grade reading and mathematics under the National Assessment of Educational Progress carried out under section 303(b)(2) of the National Assessment of Educational Progress Authorization Act if the Secretary pays the costs of administering such assessments;

I(3) the State educational agency, in consultation with the Governor, will include, as a component of the State plan, a plan to carry out the responsibilities of the State under sections 1116 and 1117, including carrying out the State educational agency's statewide system of technical assistance and support for local educational agencies;

I(4) the State educational agency will work with other agencies, including educational service agencies or other local consortia, and institutions to provide technical assistance to local educational agencies and schools, including technical assistance in providing professional development under section 1119, technical assistance under section 1117, and technical assistance relating to parental involvement under section 1118;

I(5)(A) where educational service agencies exist, the State educational agency will consider providing professional development and technical assistance through such agencies; and

I(5)(B) where educational service agencies do not exist, the State educational agency will consider providing professional development and technical assistance through other cooperative agreements such as through a consortium of local educational agencies;

I(6) the State educational agency will notify local educational agencies and the public of the content and student academic achievement standards and academic assessments developed under this section, and of the authority to operate schoolwide programs, and will fulfill the State educational agency’s responsibilities regarding local educational agency improvement and school improvement under section 1116, including such corrective actions as are necessary;

I(7) the State educational agency will provide the least restrictive and burdensome regulations for local educational agencies and individual schools participating in a program assisted under this part;

I(8) the State educational agency will inform the Secretary and the public of how Federal laws, if at all, hinder the ability of States to hold local educational agencies and schools accountable for student academic achievement;

I(9) the State educational agency will encourage schools to consolidate funds from other Federal, State, and local sources for schoolwide reform in schoolwide programs under section 1114;
[10] the State educational agency will modify or eliminate State fiscal and accounting barriers so that schools can easily consolidate funds from other Federal, State, and local sources for schoolwide programs under section 1114;

[11] the State educational agency has involved the committee of practitioners established under section 1903(b) in developing the plan and monitoring its implementation;

[12] the State educational agency will inform local educational agencies in the State of the local educational agency’s authority to transfer funds under title VI, to obtain waivers under part D of title IX, and, if the State is an Ed-Flex Partnerships State, to obtain waivers under the Education Flexibility Partnership Act of 1999;

[13] the State educational agency will coordinate activities funded under this part with other Federal activities as appropriate; and

[14] the State educational agency will encourage local educational agencies and individual schools participating in a program assisted under this part to offer family literacy services (using funds under this part), if the agency or school determines that a substantial number of students served under this part by the agency or school have parents who do not have a secondary school diploma or its recognized equivalent or who have low levels of literacy.

(d) PARENTAL INVOLVEMENT.—Each State plan shall describe how the State educational agency will support the collection and dissemination to local educational agencies and schools of effective parental involvement practices. Such practices shall—

[1] be based on the most current research that meets the highest professional and technical standards, on effective parental involvement that fosters achievement to high standards for all children; and

[2] be geared toward lowering barriers to greater participation by parents in school planning, review, and improvement experienced.

(e) PEER REVIEW AND SECRETARIAL APPROVAL.—

(1) SECRETARIAL DUTIES.—The Secretary shall—

[A] establish a peer-review process to assist in the review of State plans;

[B] appoint individuals to the peer-review process who are representative of parents, teachers, State educational agencies, and local educational agencies, and who are familiar with educational standards, assessments, accountability, the needs of low-performing schools, and other educational needs of students;

[C] approve a State plan within 120 days of its submission unless the Secretary determines that the plan does not meet the requirements of this section;

[D] if the Secretary determines that the State plan does not meet the requirements of subsection (a), (b), or (c), immediately notify the State of such determination and the reasons for such determination;

[E] not decline to approve a State’s plan before—
(i) offering the State an opportunity to revise its plan;
(ii) providing technical assistance in order to assist the State to meet the requirements of subsections (a), (b), and (c); and
(iii) providing a hearing; and
(F) have the authority to disapprove a State plan for not meeting the requirements of this part, but shall not have the authority to require a State, as a condition of approval of the State plan, to include in, or delete from, such plan one or more specific elements of the State’s academic content standards or to use specific academic assessment instruments or items.

(2) State revisions.—A State plan shall be revised by the State educational agency if it is necessary to satisfy the requirements of this section.

(f) Duration of the Plan.—
(1) In general.—Each State plan shall—
(A) remain in effect for the duration of the State’s participation under this part; and
(B) be periodically reviewed and revised as necessary by the State educational agency to reflect changes in the State’s strategies and programs under this part.

(2) Additional information.—If significant changes are made to a State’s plan, such as the adoption of new State academic content standards and State student achievement standards, new academic assessments, or a new definition of adequate yearly progress, such information shall be submitted to the Secretary.

(g) Penalties.—
(1) Failure to meet deadlines enacted in 1994.—
(A) In general.—If a State fails to meet the deadlines established by the Improving America’s Schools Act of 1994 (or under any waiver granted by the Secretary or under any compliance agreement with the Secretary) for demonstrating that the State has in place challenging academic content standards and student achievement standards, and a system for measuring and monitoring adequate yearly progress, the Secretary shall withhold 25 percent of the funds that would otherwise be available to the State for State administration and activities under this part in each year until the Secretary determines that the State meets those requirements.

(B) No extension.—Notwithstanding any other provision of law, 90 days after the date of enactment of the No Child Left Behind Act of 2001 the Secretary shall not grant any additional waivers of, or enter into any additional compliance agreements to extend, the deadlines described in subparagraph (A) for any State.

(2) Failure to meet requirements enacted in 2001.—If a State fails to meet any of the requirements of this section, other than the requirements described in paragraph (1), then the Secretary may withhold funds for State administration
under this part until the Secretary determines that the State has fulfilled those requirements.

(h) REPORTS.—

(1) ANNUAL STATE REPORT CARD.—

(A) IN GENERAL.—Not later than the beginning of the 2002–2003 school year, unless the State has received a 1-year extension pursuant to subsection (c)(1), a State that receives assistance under this part shall prepare and disseminate an annual State report card.

(B) IMPLEMENTATION.—The State report card shall be—

(i) concise; and

(ii) presented in an understandable and uniform format and, to the extent practicable, provided in a language that the parents can understand.

(C) REQUIRED INFORMATION.—The State shall include in its annual State report card—

(aa) be administered through a single summative assessment each year; or

(bb) be administered through multiple statewide assessments during the course of the year if the State can demonstrate to the Secretary's satisfaction that the results of these multiple assessments, taken in their totality, provide a summative score that provides valid and reliable information on whether students are on track to college and career readiness in reading or language arts, and mathematics;

(ii) include statewide assessments in science, not less than once during each of the grade spans of grades 3 through 5, 6 through 9, and 10 through 12, that measure—

(I) student achievement relative to the State's science student academic achievement standards under paragraph (1)(B);

(iv) involve multiple measures of student academic achievement, including measures that assess higher-order thinking skills and understanding;

(v) provide for—

(vi) notwithstanding clause (v)(IV), include the academic assessment (using tests written in English) of reading or language arts of any student who has attended school in the United States (not including Puerto Rico) for 3 or more consecutive school years, except that, if the local educational agency determines, on a case-by-case individual basis, that academic assessments in another language or form would likely yield more accurate and reliable information on what such student knows and can do, the local educational agency may make a determination to assess such student in the appropriate language other than English for a period that does not exceed 2 additional consecutive years, if such student has not yet reached a level of English language proficiency sufficient to yield valid and reliable information on what such student knows and can do on tests (written in English) of reading or language arts;
(vii) include students who have attended schools in a local educational agency for a full academic year but have not attended a single school for a full academic year;
(viii) produce individual student interpretive, descriptive, and diagnostic reports that allow parents, teachers, and principals to understand and address the specific academic needs of students and include information regarding achievement on the academic assessments aligned with State academic achievement standards, and that are provided to parents, teachers, and principals—

(xi) not evaluate or assess personal or family beliefs and attitudes or publicly disclose personally identifiable information;

(xii) enable itemized score analyses to be produced and reported, consistent with clause (ii), to local educational agencies and schools, so that parents, teachers, principals, and administrators can interpret and address the specific academic needs of students as indicated by the students' achievement on assessment items;

(xiii) produce student achievement and other student data that can be used to inform determinations of individual principal and teacher effectiveness for purposes of evaluation and for determining the needs of principals and teachers for professional development and support; and

(xiv) consistent with paragraph (3)(D), be administered to not less than 95 percent of all students, and not less than 95 percent of each subgroup of students described in clause (ix), who are enrolled in the school.

(C) LANGUAGES OF ASSESSMENTS.—The State shall identify the languages other than English that are present in the participating student population in the State and indicate, in the State’s plan under subsection (b), the languages for which yearly student academic assessments included in the State’s accountability system under paragraph (3) are not available and are needed. The State shall make every
effort to develop assessments in such languages and may request assistance from the Secretary if linguistically accessible academic assessments are needed. Upon request, the Secretary shall assist with the identification of appropriate academic assessments in such languages, but shall not mandate a specific academic assessment or mode of instruction.

(D) ASSESSMENTS OF ENGLISH LANGUAGE PROFICIENCY.—

(i) IN GENERAL.—Each State plan shall demonstrate that local educational agencies in the State will, not later than the beginning of the 2015–2016 school year, provide for the annual assessment of English language proficiency of all English learners in the schools served by the State educational agency.

(E) ALTERNATE ASSESSMENTS FOR STUDENTS WITH THE MOST SIGNIFICANT COGNITIVE DISABILITIES.—A State may provide alternate assessments that are aligned with alternate academic achievement standards described in paragraph (1)(D) for students with the most significant cognitive disabilities, if the State—

(i) establishes and monitors implementation of clear and appropriate guidelines for individualized education program teams (as defined in section 614(d)(1)(B) of the Individuals with Disabilities Education Act) to apply in determining, on a subject-by-subject basis, when a child’s significant cognitive disability justifies assessment based on alternate academic achievement standards;

(ii) ensures that parents of the students whom the State plans to assess using alternate assessments are involved in the decision that their child’s academic achievement will be measured against alternate academic achievement standards, consistent with section 614(d)(1)(A)(vi)(bb) of the Individuals with Disabilities Education Act, and are informed whether participation in such assessment may preclude the student from completing the requirements for a regular secondary school diploma, as determined by the State;

(iii) provides evidence that students with the most significant cognitive disabilities are, to the maximum extent practicable, included in the general curriculum and in assessments aligned with such curriculum, as described in section 601(c)(5)(A) of the Individuals with Disabilities Education Act;

(v) develops, disseminates information about, makes available, and promotes the use of reasonable adaptations and valid and reliable accommodations to increase the number of students with the most significant cognitive disabilities participating in grade-level academic instruction and assessments that are aligned with grade-level academic standards, and promotes the use of appropriate accommodations to increase the number of students with the most significant cognitive disabilities who are tested against grade-level academic achievement standards;

(vi) takes steps to ensure that regular and special education teachers and other appropriate staff know how to administer assessments, including how to make appropriate use of reasonable adaptations and valid and reliable accommodations for such assessments, for students with the most significant cognitive disabilities; and

(vii) requires separate determinations about whether a student should be assessed using an alternate assessment for each subject assessed.

(F) ADAPTIVE ASSESSMENTS.—A State may develop and administer computer adaptive assessments as the assessments required under subparagraph (A). If a State develops and administers a computer adaptive assessment for such purposes, the assessment shall meet the requirements of this paragraph, except as follows:

(i) Notwithstanding subparagraph (A)(i)(I), the assessment shall measure, at a minimum, whether each student is meeting or exceeding the on-track level of performance for the State academic content standards for the student's grade level, and, if the State chooses—

(I) may measure the student's level of performance in the grades above or below the student's grade level; and

(II) may be used to measure student growth using assessment items above and below grade level, including for purposes of determining if a student is attaining growth in accordance with clauses (i) and (ii) of subsection (b)(1)(B), as applicable.

(ii) Subparagraph (B)(i) shall not be interpreted to require that all students taking the computer adaptive assessment be administered the same assessment items.
(G) **REDUCING DUPLICATIVE ASSESSMENT.**—The State shall include, in the State plan under subsection (b), a description of how the State will regularly analyze assessment and accommodations practice and use, and reduce duplicative assessment.

(vii) meets the requirements of section 1116.

(B) **SUBJECTS COVERED.**—The State shall include in the accountability system the subjects of reading or language arts and mathematics and may include any other subject that the State chooses through its State plan, if the State has adopted academic content standards and student academic achievement standards under paragraph (1)(C) and assessments under paragraph (2)(B) for the subject.

(C) **ACCOUNTABILITY FOR CHARTER SCHOOLS.**—The accountability provisions under this Act shall be overseen for public charter schools in accordance with State charter school law.

(D) **STUDENTS WITH THE MOST SIGNIFICANT COGNITIVE DISABILITIES.**—In determining the percentage of students who are on track to college and career readiness or, if ap-
applicable, attaining growth in accordance with clauses (i) and (ii) of subsection (b)(1)(B), for a subject for any purpose under this section or section 1116 or 1117, a State educational agency may include, for all schools in the State, the performance of the State’s students with the most significant cognitive disabilities on alternate assessments as described in paragraph (2)(E) in the subjects included in the State’s accountability system, if the total number of those students in all grades assessed and for each subject in the accountability system who are on track to college and career readiness, according to those alternate assessments, does not exceed 1 percent of all students in the State in the grades assessed in each subject.

(4) TRANSITION PROVISIONS.—The Secretary shall take such steps as are necessary to provide for the orderly transition between the accountability systems required under section 1111(b)(2), as such section was in effect on the day before the date of enactment of the Elementary and Secondary Education Reauthorization Act of 2011, and the new accountability systems required under this subsection.

(2) to help such children and youth—

(A) with their transition into American society; and

(B) meet the same challenging State academic content and student academic achievement standards as all children are expected to meet.

For any fiscal year, a State educational agency may reserve not more than 1.5 percent (2 percent if the State educational agency distributes funds received under this subpart to local educational agencies on a competitive basis) of the amount allotted to such agency under section 3244 to pay the costs of performing such agency's administrative functions under this subpart.

Whenever the Secretary, after providing reasonable notice and opportunity for a hearing to any State educational agency, finds that there is a failure to comply with a requirement of any provision of this subpart, the Secretary shall notify that agency that further payments will not be made to the agency under this subpart or, in the discretion of the Secretary, that the State educational agency shall not make further payments under this subpart to specified local educational agencies whose actions cause or are involved in such failure until the Secretary is satisfied that there is
no longer any such failure to comply. Until the Secretary is so satisfied, no further payments shall be made to the State educational agency under this subpart, or payments by the State educational agency under this subpart shall be limited to local educational agencies whose actions did not cause or were not involved in the failure, as the case may be.

(a) Payments.—The Secretary shall, in accordance with the provisions of this section, make payments to State educational agencies for each of the fiscal years 2002 through 2008 for the purpose set forth in section 3241.

(2) Eligible local educational agencies.—A local educational agency referred to in paragraph (1) is a local educational agency for which the sum of the number of immigrant children and youth who are enrolled in public elementary schools or secondary schools under the jurisdiction of such agency, and in nonpublic elementary schools or secondary schools within the district served by such agency, during the fiscal year for which the payments are to be made under this subpart, is equal to at least—

(c) Determinations of number of children and youth.—

(1) In general.—Determinations by the Secretary under this section for any period with respect to the number of immigrant children and youth shall be made on the basis of data or estimates provided to the Secretary by each State educational agency in accordance with criteria established by the Secretary, unless the Secretary determines, after notice and opportunity for a hearing to the affected State educational agency, that such data or estimates are clearly erroneous.

(2) Special rule.—No such determination with respect to the number of immigrant children and youth shall operate because of an underestimate or overestimate to deprive any State educational agency of the allotment under this section that such State would otherwise have received had such determination been made on the basis of accurate data.

(d) Reallocation.—
(1) IN GENERAL.—Whenever the Secretary determines that any amount of a payment made to a State under this subpart for a fiscal year will not be used by such State for carrying out the purpose for which the payment was made, the Secretary shall make such amount available for carrying out such purpose to one or more other States to the extent the Secretary determines that such other States will be able to use such additional amount for carrying out such purpose.

(2) FISCAL YEAR.—Any amount made available to a State from any appropriation for a fiscal year in accordance with paragraph (1) shall, for purposes of this subpart, be regarded as part of such State’s payment (as determined under subsection (b)) for such year, but shall remain available until the end of the succeeding fiscal year.

(e) RESERVATION OF FUNDS.—

(1) IN GENERAL.—Notwithstanding any other provision of this subpart, if the amount appropriated to carry out this subpart exceeds $50,000,000 for a fiscal year, a State educational agency may reserve not more than 20 percent of such agency’s payment under this subpart for such year to award grants, on a competitive basis, to local educational agencies within the State as follows:

(a) SUBMISSION.—No State educational agency shall receive any payment under this subpart for any fiscal year unless such agency submits an application to the Secretary at such time, in such manner, and containing or accompanied by such information, as the Secretary may reasonably require. (2) provide assurances that payments under this subpart will be used for purposes set forth in sections 3241 and 3247, including a description of how local educational agencies receiving funds under this subpart will use such funds to meet such purposes and will coordinate with entities carrying out other programs and activities assisted under this Act, and other Acts as appropriate;

(3) provide an assurance that local educational agencies receiving funds under this subpart will coordinate the use of such funds with entities carrying out programs and activities assisted under part A of title I;

(4) provide assurances that such payments, with the exception of payments reserved under section 3244(e), will be distributed among local educational agencies within that State on the basis of the number of immigrant children and youth counted with respect to each such local educational agency under section 3244(b)(1);

(5) provide assurances that the State educational agency will not finally disapprove in whole or in part any application for funds received under this subpart without first affording the local educational agency submitting an application for such funds reasonable notice and opportunity for a hearing;

(6) provide for making such reports as the Secretary may reasonably require to perform the Secretary's functions under this subpart;

(7) provide assurances—

(A) that to the extent consistent with the number of immigrant children and youth enrolled in the nonpublic elementary schools or secondary schools within the district served by a local educational agency, such agency, after consultation with appropriate officials of such schools, shall provide for the benefit of such children and youth secular, neutral, and nonideological services, materials, and equipment necessary for the education of such children and youth;

(B) that the control of funds provided under this subpart for any materials or equipment, or property repaired, remodeled, or constructed with those funds shall be in a public agency for the uses and purpose provided in this subpart, and a public agency shall administer such funds and property; and

(C) that the provision of services pursuant to this paragraph shall be provided by employees of a public agency or through contract by such public agency with a person, association, agency, or corporation who or which, in the provision of such services, is independent of such nonpublic elementary school or secondary school and of any religious organization, and such employment or contract shall be under the control and supervision of such public agency, and the funds provided under this paragraph shall not be commingled with State or local funds;

(8) provide that funds reserved under section 3244(e) be awarded on a competitive basis based on merit and need in accordance with such section; and
provide an assurance that the State educational agency and local educational agencies in the State receiving funds under this subpart will comply with the requirements of section 1120(b).

(a) Notification of Amount.—The Secretary, not later than June 1 of each year, shall notify each State educational agency that has an application approved under section 3245 of the amount of such agency's allotment under section 3244 for the succeeding year.

(b) Services to Immigrant Children and Youth Enrolled in Nonpublic Schools.—If by reason of any provision of law a local educational agency is prohibited from providing educational services for immigrant children and youth enrolled in nonpublic elementary schools and secondary schools, as required by section 3245(a)(7), or if the Secretary determines that a local educational agency has substantially failed or is unwilling to provide for the participation on an equitable basis of such children and youth enrolled in such schools, the Secretary may waive such requirement and shall arrange for the provision of services, subject to the requirements of this subpart, to such children and youth. Such waivers shall be subject to consultation, withholding, notice, and judicial review requirements in accordance with the provisions of title I.

Whenever the Secretary, after providing reasonable notice and opportunity for a hearing to any State educational agency, finds that there is a failure to comply with a requirement of any provision of this subpart, the Secretary shall notify that agency that further payments will not be made to the agency under this subpart or, in the discretion of the Secretary, that the State educational agency shall not make further payments under this subpart to specified local educational agencies whose actions cause or are involved in such failure until the Secretary is satisfied that there is no longer any such failure to comply. Until the Secretary is so satisfied, no further payments shall be made to the State educational agency under this subpart, or payments by the State educational agency under this subpart shall be limited to local educational
agencies whose actions did not cause or were not involved in the failure, as the case may be.

(2) SPECIAL RULE.—No such determination with respect to the number of immigrant children and youth shall operate because of an underestimate or overestimate to deprive any State educational agency of the allotment under this section that such State would otherwise have received had such determination been made on the basis of accurate data.

(d) REALLOTTMENT.—

(1) IN GENERAL.—Whenever the Secretary determines that any amount of a payment made to a State under this subpart for a fiscal year will not be used by such State for carrying out the purpose for which the payment was made, the Secretary

(4) provide assurances that such payments, with the exception of payments reserved under section 3244(e), will be distributed among local educational agencies within that State on the basis of the number of immigrant children and youth counted with respect to each such local educational agency under section 3244(b)(1);

(5) provide assurances that the State educational agency will not finally disapprove in whole or in part any application for funds received under this subpart without first affording the local educational agency submitting an application for such funds reasonable notice and opportunity for a hearing;

(6) provide for making such reports as the Secretary may reasonably require to perform the Secretary's functions under this subpart;

(7) provide assurances—

(A) that to the extent consistent with the number of immigrant children and youth enrolled in the nonpublic elementary schools or secondary schools within the district served by a local educational agency, such agency, after consultation with appropriate officials of such schools, shall provide for the benefit of such children and youth secular, neutral, and nonideological services, materials, and equipment necessary for the education of such children and youth;

(B) that the control of funds provided under this subpart for any materials or equipment, or property repaired, remodeled, or constructed with those funds shall be in a public agency for the uses and purpose provided in this subpart, and a public agency shall administer such funds and property; and

(C) that the provision of services pursuant to this paragraph shall be provided by employees of a public agency or through contract by such public agency with a person, association, agency, or corporation who or which, in the provision of such services, is independent of such nonpublic elementary school or secondary school and of any religious organization, and such employment or contract shall be under the control and supervision of such public agency, and the funds provided under this paragraph shall not be commingled with State or local funds;

(8) provide that funds reserved under section 3244(e) be awarded on a competitive basis based on merit and need in accordance with such section; and

(a) NOTIFICATION OF AMOUNT.—The Secretary, not later than June 1 of each year, shall notify each State educational agency that has an application approved under section 3245 of the amount of such agency's allotment under section 3244 for the succeeding year.

(b) SERVICES TO IMMIGRANT CHILDREN AND YOUTH ENROLLED IN NONPUBLIC SCHOOLS.—If by reason of any provision of law a local educational agency is prohibited from providing educational services for immigrant children and youth enrolled in nonpublic elementary schools and secondary schools, as required by section 3245(a)(7), or if the Secretary determines that a local educational agency has substantially failed or is unwilling to provide for the participation on an equitable basis of such children and youth enrolled in such schools, the Secretary may waive such requirement and shall arrange for the provision of services, subject to the requirements of this subpart, to such children and youth. Such waivers shall be subject to consultation, withholding, notice, and judicial review requirements in accordance with the provisions of title I.

[PART A—INNOVATIVE PROGRAMS]

(a) PURPOSES.—The purposes of this part are the following:

(4) To meet the educational needs of all students, including at-risk youth.

(5) To develop and implement education programs to improve school, student, and teacher performance, including professional development activities and class size reduction programs.

(b) STATE AND LOCAL RESPONSIBILITY.—The State educational agency shall bear the basic responsibility for the administration of funds made available under this part, but it is the intent of Congress that the responsibility be carried out with a minimum of paperwork and that the responsibility for the design and implementation of programs assisted under this part be mainly that of local educational agencies, school superintendents and principals, and classroom teachers and supporting personnel, because local educational agencies and individuals have the most direct contact with students and are most likely to be able to design programs to meet the educational needs of students in their own school districts.

[Subpart 1—State and Local Programs]

(a) IN GENERAL.—From the sums appropriated to carry out this part for each fiscal year and not reserved under subsection (b), the
Secretary shall allot, and make available in accordance with this part, to each State educational agency an amount that bears the same ratio to such sums as the school-age population of the State bears to the school-age population of all States, except that no State shall receive less than an amount equal to one-half of 1 percent of such sums.

(b) RESERVATION.—From the sums appropriated to carry out this part for each fiscal year, the Secretary shall reserve not more than 1 percent for payments to the outlying areas, to be allotted in accordance with their respective needs for assistance under this part.

(a) DISTRIBUTION RULE.—

(1) ALLOCATION OF BASE AMOUNTS.—From the amount made available to a State educational agency under this part for a fiscal year, the State educational agency shall distribute, to local educational agencies within the State, an amount that is not less than 85 percent of the amount made available to the State educational agency under this part for fiscal year 2002, according to the relative enrollments in public and in private nonprofit schools within the jurisdictions of such local educational agencies, adjusted, in accordance with criteria approved by the Secretary, to provide higher per-pupil allocations to local educational agencies that have the greatest numbers or percentages of children whose education imposes a higher-than-average cost per child, such as—

(A) children living in areas with high concentrations of economically disadvantaged families;

(B) children from economically disadvantaged families; and

(C) children living in sparsely populated areas.

(2) ALLOCATION OF INCREASED AMOUNTS.—From the amount made available to a State educational agency under this part for a fiscal year that exceeds the amount made available to the agency under this part for fiscal year 2002, the State educational agency shall distribute 100 percent (or, in the case of a State educational agency receiving a minimum allotment under section 5111(a), not less than 50 percent, notwithstanding subsection (b)) to local educational agencies within the State, on the same basis as the State educational agency distributes amounts under paragraph (1).

(b) LIMITATIONS AND REQUIREMENTS.—Not more than 15 percent of funds made available under section 5111 for State programs under this part for any fiscal year may be used for State administration under section 5121.

(B) the number of children enrolled in private nonprofit schools that participated in programs assisted under this
part, for the fiscal year preceding the fiscal year for which
the determination is made.

(2) Rule of Construction.—Nothing in this subsection
shall diminish the responsibility of each local educational agen-
cy to contact, on an annual basis, appropriate officials from pri-
ivate nonprofit schools within the areas served by such agencies
in order to determine whether such schools desire that their
children participate in programs assisted under this part.

(3) Adjustments.—

(A) State Criteria.—Relative enrollments calculated
under subsection (a)(1) shall be adjusted, in accordance
with criteria approved by the Secretary under subpara-
graph (B), to provide higher per-pupil allocations only to
local educational agencies that serve the greatest numbers or
percentages of—

(i) children living in areas with high concentrations
of economically disadvantaged families;

(ii) children from economically disadvantaged fami-
lies; or

(iii) children living in sparsely populated areas.

(B) Review of Criteria.—The Secretary shall review
criteria submitted by a State educational agency for ad-
justing allocations under paragraph (1) and shall approve
such criteria only if the Secretary determines that such
criteria are reasonably calculated to produce an adjusted
allocation that reflects the relative needs of the State's
local educational agencies based on the factors set forth in
subparagraph (A).

(d) Payment of Allocations.—

(1) Distribution.—From the funds paid to a State edu-
cational agency under this subpart for a fiscal year, the State
educational agency shall distribute to each eligible local edu-
cational agency that has submitted an application as required
by section 5133 the amount of such local educational agency's
allocation, as determined under subsection (a).

(A) Use.—Additional funds resulting from higher per-
pupil allocations provided to a local educational agency on
the basis of adjusted enrollments of children described in
subsection (a)(1) may, in the discretion of the local edu-

services for children enrolled in public schools and private
nonprofit schools in direct proportion to the number of
children described in subsection (a)(1) and enrolled in such
schools within the area served by the local educational
agency.

(B) Allocation.—In any fiscal year, any local edu-
cational agency that elects to allocate such additional
funds in the manner described in subparagraph (A) shall
allocate all additional funds to schools within the area
served by the local educational agency in such manner.

(C) Rule of Construction.—Subparagraphs (A) and
(B) may not be construed to require any school to limit the
use of the additional funds described in subparagraph (A)

(a) IN GENERAL.—Except as provided in subsection (b), a State educational agency is entitled to receive its full allotment of funds under this part for any fiscal year only if the Secretary determines that either the combined fiscal effort per student or the aggregate expenditures within the State, with respect to the provision of free public education for the fiscal year preceding the fiscal year for which the determination is made, was not less than 90 percent of such combined fiscal effort or aggregate expenditures for the second fiscal year preceding the fiscal year for which the determination is made.

(b) REDUCTION OF FUNDS.—The Secretary shall reduce the amount of the allotment of funds under this part in any fiscal year in the exact proportion by which the State educational agency fails to meet the requirements of subsection (a) by falling below 90 percent of the fiscal effort per student or aggregate expenditures (using the measure most favorable to the State educational agency), and no such lesser amount shall be used for computing the effort or expenditures required under paragraph (1) for subsequent years.

(c) Waiver.—The Secretary may waive, for 1 fiscal year only, the requirements of this section, if the Secretary determines that such a waiver would be equitable due to exceptional or uncontrolable circumstances, such as a natural disaster or a precipitous and unforeseen decline in the financial resources of the State educational agency.

(a) PARTICIPATION ON EQUIitable BASIS.—

(1) IN GENERAL.—To the extent consistent with the number of children in the school district of a local educational agency that is eligible to receive funds under this part, or that serves the area in which a program assisted under this part is located, who are enrolled in private nonprofit elementary schools and secondary schools, or, with respect to instructional or personnel training programs funded by the State educational agency from funds made available for State educational agency
use, the local educational agency, after consultation with appropriate private school officials—

(2) OTHER PROVISIONS FOR SERVICES.—If no program is carried out under paragraph (1) in the school district of a local educational agency, the State educational agency shall make arrangements, such as through contracts with nonprofit agencies or organizations, under which children in private schools in the district are provided with services and materials to the same extent as would have occurred if the local educational agency had received funds under this part.

(3) APPLICATION OF REQUIREMENTS.—The requirements of this section relating to the participation of children, teachers, and other personnel serving such children shall apply to programs carried out under this part by a State educational agency or local educational agency, whether directly or through grants to, or contracts with, other public or private agencies, institutions, or organizations.

(1) IN GENERAL.—Expenditures for programs under subsection (a) shall be equal (consistent with the number of children to be served) to expenditures for programs under this part for children enrolled in the public schools of the local educational agency.

(2) CONCENTRATED PROGRAMS.—Taking into account the needs of the individual children and other factors that relate to the expenditures referred to in paragraph (1), and when funds available to a local educational agency under this part are used to concentrate programs on a particular group, attendance area, or grade or age level, children enrolled in private schools who are included within the group, attendance area, or grade or age level selected for such concentration shall, after consultation with the appropriate private school officials, be assured equitable participation in the purposes and benefits of such programs.

(c) ADMINISTRATIVE REQUIREMENTS.—

(1) FUNDS AND PROPERTY.—The control of funds provided under this part, and title to materials, equipment, and property repaired, remodeled, or constructed with such funds, shall
be in a public agency for the uses and purposes provided in this part, and a public agency shall administer such funds and property.

The funds provided under this part shall not be commingled with State or local funds.

(d) Waiver.—

(1) State Prohibition.—If a State educational agency or local educational agency is prohibited, by reason of any provision of law, from providing for the participation in programs of children enrolled in private elementary schools and secondary schools as required by subsections (a) through (c), the Secretary shall waive such requirements for the agency involved and shall arrange for the provision of services to such children through arrangements that shall be subject to the requirements of this section.

(2) Failure to Comply.—If the Secretary determines that a State educational agency or a local educational agency has substantially failed, or is unwilling, to provide for the participation on an equitable basis of children enrolled in private elementary schools and secondary schools as required by subsections (a) through (c), the Secretary may waive such requirements and shall arrange for the provision of services to such children through arrangements that shall be subject to the requirements of this section.

(e) Withholding of Allotment or Allocation.—Pending final resolution of any investigation or complaint that could result in a waiver under subsection (d)(1) or (d)(2), the Secretary may withhold from the allotment or allocation of the affected State educational agency or local educational agency the amount estimated by the Secretary to be necessary to pay the cost of services to be provided by the Secretary under such subsection.

(f) Duration of Determination.—Any determination by the Secretary under this section shall continue in effect until the Secretary determines that there will no longer be any failure or inability on the part of the State educational agency or local educational agency to meet the requirements of subsections (a) through (c).

(h) Review of Determination.—

(1) Written Objections.—The Secretary shall not take any final action under this section until the State educational agency and the local educational agency affected by such action have had an opportunity, for not less than 45 days after receiv-
ing written notice thereof, to submit written objections and to appear before the Secretary or the Secretary's designee to show cause why that action should not be taken.

(2) Court Action.—If a State educational agency or local educational agency is dissatisfied with the Secretary's final action after a proceeding under paragraph (1), such agency may, not later than 60 days after notice of such action, file with the United States court of appeals for the circuit in which such State is located a petition for review of that action. A copy of the petition shall be transmitted by the clerk of the court to the Secretary. The Secretary thereupon shall file in the court the record of the proceedings on which the Secretary based the action, as provided in section 2112 of title 28, United States Code.

The court, for good cause shown, may remand the case to the Secretary to take further evidence and the Secretary may make new or modified findings of fact and may modify the Secretary's previous action, and shall file in the court the record of the further proceedings. Such new or modified findings of fact shall likewise be conclusive, if supported by substantial evidence.

(4) Court Review.—Upon the filing of a petition under paragraph (2), the court shall have jurisdiction to affirm the action of the Secretary or to set such action aside, in whole or in part. The judgment of the court shall be subject to review by the Supreme Court upon certiorari or certification, as provided in section 1254 of title 28, United States Code.

(i) Prior Determination.—Any bypass determination by the Secretary under title VI (as such title was in effect on the day preceding the date of enactment of the No Child Left Behind Act of 2001) shall, to the extent consistent with the purposes of this part, apply to programs under this part.

(a) Technical Assistance.—The Secretary, upon request, shall provide technical assistance to State educational agencies and local educational agencies under this part.

(b) Rulemaking.—The Secretary shall issue regulations under this part only to the extent that such regulations are necessary to ensure that there is compliance with the specific requirements and assurances required by this part.

[Subpart 12—Educational, Cultural, Apprenticeship, and Exchange Programs for Alaska Natives, Native Hawaiians, and Their Historical Whaling and Trading Partners in Massachusetts]

[This subpart may be cited as the “Alaska Native and Native Hawaiian Education Through Cultural and Historical Organizations Act”.]

(a) FINDINGS.—Congress finds the following:

(1) Alaska Natives and Native Hawaiians have been linked for over 200 years to the coastal towns of Salem, Massachusetts, and New Bedford, Massachusetts, through the China trade from Salem and whaling voyages from New Bedford.

(2) Nineteenth-century trading ships sailed from Salem, Massachusetts, around Cape Horn of South America, and up the Northwest coast of the United States to Alaska, where their crews traded with Alaska Native people for furs, and then went on to Hawaii to trade for sandalwood with Native Hawaiians before going on to China.
During the 19th century, over 2,000 whaling voyages sailed out of New Bedford, Massachusetts to the Arctic region of Alaska, and joined Alaska Natives from Barrow, Alaska and other areas in the Arctic region in subsistence whaling activities.

Many New Bedford whaling voyages continued on to Hawaii, where they joined Native Hawaiians from the neighboring islands.

From those commercial and whaling voyages, a rich cultural exchange and strong trading relationships developed among the three peoples involved.

In the past decades, awareness of the historical trading, cultural, and whaling links has faded among Alaska Natives, Native Hawaiians, and the people of the continental United States.

In 2000, the Alaska Native Heritage Center in Alaska, the Bishop Museum in Hawaii, and the Peabody-Essex Museum in Massachusetts initiated the New Trade Winds project to use 21st-century technology, including the Internet, to educate students and their parents about historic and contemporary cultural and trading ties that continue to link the diverse cultures of the peoples involved.

The New Bedford Whaling Museum, in partnership with the New Bedford Whaling National Historical Park, has developed a cultural exchange and educational program with the Inupiat Heritage Center in Barrow, Alaska to bring together the children, parents, and elders from the Arctic region of Alaska with children and families of Massachusetts to learn about their historical ties and about each other's contemporary cultures.

Within the fast-growing cultural sector, meaningful educational and career opportunities based on traditional relationships exist for Alaska Natives, Native Hawaiians, and low-income youth in Massachusetts.

Cultural institutions can provide practical, culturally relevant, education-related internship and apprentice programs, such as the Museum Action Corps at the Peabody-Essex Museum and similar programs at the New Bedford Oceanarium and other institutions, to prepare youths and their families for careers in the cultural sector.

The resources of the institutions described in paragraphs (7) and (8) provide unique opportunities for illustrating and interpreting the contributions of Alaska Natives, Native Hawaiians, the whaling industry, and the China trade to the economic, social, and environmental history of the United States, for educating students and their parents, and for providing opportunities for internships and apprenticeships leading to careers with cultural institutions.

The purposes of this subpart are the following:

To authorize and develop innovative culturally-based educational programs and cultural exchanges to assist Alaska Natives, Native Hawaiians, and children and families of Massachusetts linked by history and tradition to Alaska and Hawaii to learn about shared culture and traditions.
To authorize and develop internship and apprentice programs to assist Alaska Natives, Native Hawaiians, and children and families of Massachusetts linked by history and tradition with Alaska and Hawaii to prepare for careers with cultural institutions.

To supplement programs and authorities in the area of education to further the objectives of this subpart.

To authorize and develop cultural and educational programs relating to any Federally recognized Indian tribe in Mississippi.

(1) since the enactment of title IX of the Education Amendments of 1972, women and girls have made strides in educational achievement and in their ability to avail themselves of educational opportunities;

(2) because of funding provided under the Women’s Educational Equity Act of 2001, more curricula, training, and other educational materials concerning educational equity for women and girls are available for national dissemination;

(3) teaching and learning practices in the United States are frequently inequitable as such practices relate to women and girls, for example—

(A) sexual harassment, particularly that experienced by girls, undermines the ability of schools to provide a safe and equitable learning or workplace environment;

(B) classroom textbooks and other educational materials do not sufficiently reflect the experiences, achievements, or concerns of women and, in most cases, are not written by women or persons of color;

(C) girls do not take as many mathematics and science courses as boys, girls lose confidence in their mathematics and science ability as girls move through adolescence, and there are few women role models in the sciences; and

(D) pregnant and parenting teenagers are at high risk for dropping out of school and existing dropout prevention programs do not adequately address the needs of such teenagers;

(4) efforts to improve the quality of public education also must include efforts to ensure equal access to quality education programs for all women and girls;

(5) Federal support should address not only research and development of innovative model curricula and teaching and learning strategies to promote gender equity, but should also assist schools and local communities implement gender equitable practices;

(6) Federal assistance for gender equity must be tied to systemic reform, involve collaborative efforts to implement effective gender practices at the local level, and encourage parental participation; and

(7) excellence in education, high educational achievements and standards, and the full participation of women and girls in American society, cannot be achieved without educational equity for women and girls.

It is the purpose of this subpart—
(1) to promote gender equity in education in the United States;
(2) to provide financial assistance to enable educational agencies and institutions to meet the requirements of title IX of the Educational Amendments of 1972; and
(3) to promote equity in education for women and girls who suffer from multiple forms of discrimination based on sex, race, ethnic origin, limited English proficiency, disability, or age.

PART B—[NATIVE HAWAIIAN EDUCATION; ALASKA NATIVE EDUCATION]

Subpart 1—Native Hawaiian Education

SEC. 7201. SHORT TITLE.

This [part] subpart may be cited as the “Native Hawaiian Education Act”.

Congress finds the following:

(1) Native Hawaiians are a distinct and unique indigenous people with a historical continuity to the original inhabitants of the Hawaiian archipelago, whose society was organized as a nation and internationally recognized as a nation by the United States, Britain, France, and Japan, as evidenced by treaties governing friendship, commerce, and navigation.

(2) At the time of the arrival of the first nonindigenous people in Hawaii in 1778, the Native Hawaiian people lived in a highly organized, self-sufficient subsistence social system based on a communal land tenure system with a sophisticated language, culture, and religion.

(3) A unified monarchical government of the Hawaiian Islands was established in 1810 under Kamehameha I, the first King of Hawaii.

(4) From 1826 until 1893, the United States recognized the sovereignty and independence of the Kingdom of Hawaii, which was established in 1810 under Kamehameha I, extended full and complete diplomatic recognition to the Kingdom of Hawaii, and entered into treaties and conventions with the Kingdom of Hawaii to govern friendship, commerce and navigation in 1826, 1842, 1849, 1875, and 1887.

(5) In 1893, the sovereign, independent, internationally recognized, and indigenous government of Hawaii, the Kingdom of Hawaii, was overthrown by a small group of non-Hawaiians,
including United States citizens, who were assisted in their efforts by the United States Minister, a United States naval representative, and armed naval forces of the United States. Because of the participation of United States agents and citizens in the overthrow of the Kingdom of Hawaii, in 1993 the United States apologized to Native Hawaiians for the overthrow and the deprivation of the rights of Native Hawaiians to self-determination through Public Law 103–150 (107 Stat. 1510).

(6) In 1898, the joint resolution entitled “Joint Resolution to provide for annexing the Hawaiian Islands to the United States”, approved July 7, 1898 (30 Stat. 750), ceded absolute title of all lands held by the Republic of Hawaii, including the government and crown lands of the former Kingdom of Hawaii, to the United States, but mandated that revenue generated from the lands be used “solely for the benefit of the inhabitants of the Hawaiian Islands for educational and other public purposes”.

(7) By 1919, the Native Hawaiian population had declined from an estimated 1,000,000 in 1778 to an alarming 22,600, and in recognition of this severe decline, Congress enacted the Hawaiian Homes Commission Act, 1920 (42 Stat. 108), which designated approximately 200,000 acres of ceded public lands for homesteading by Native Hawaiians.

(8) Through the enactment of the Hawaiian Homes Commission Act, 1920, Congress affirmed the special relationship between the United States and the Native Hawaiians, which was described by then Secretary of the Interior Franklin K. Lane, who said: “One thing that impressed me . . . was the fact that the natives of the island who are our wards, I should say, and for whom in a sense we are trustees, are falling off rapidly in numbers and many of them are in poverty.”

(9) In 1938, Congress again acknowledged the unique status of the Hawaiian people by including in the Act of June 20, 1938 (52 Stat. 781, chapter 530; 16 U.S.C. 391b, 391b–1, 392b, 392c, 396, 396a), a provision to lease lands within the National Parks extension to Native Hawaiians and to permit fishing in the area “only by native Hawaiian residents of said area or of adjacent villages and by visitors under their guidance.”.

(10) Under the Act entitled “An Act to provide for the admission of the State of Hawaii into the Union”, approved March 18, 1959 (73 Stat. 4), the United States transferred responsibility for the administration of the Hawaiian Home Lands to the State of Hawaii but reaffirmed the trust relationship between the United States and the Hawaiian people by retaining the exclusive power to enforce the trust, including the power to approve land exchanges and amendments to such Act affecting the rights of beneficiaries under such Act.

(11) In 1959, under the Act entitled “An Act to provide for the admission of the State of Hawaii into the Union”, the United States also ceded to the State of Hawaii title to the public lands formerly held by the United States, but mandated that such lands be held by the State “in public trust” and reaffirmed the special relationship that existed between the United States and the Hawaiian people by retaining the legal
responsibility to enforce the public trust responsibility of the State of Hawaii for the betterment of the conditions of Native Hawaiians, as defined in section 201(a) of the Hawaiian Homes Commission Act, 1920.

(12) The United States has recognized and reaffirmed that—

(A) Native Hawaiians have a cultural, historic, and land-based link to the indigenous people who exercised sovereignty over the Hawaiian Islands, and that group has never relinquished its claims to sovereignty or its sovereign lands;

(B) Congress does not extend services to Native Hawaiians because of their race, but because of their unique status as the indigenous people of a once sovereign nation as to whom the United States has established a trust relationship;

(C) Congress has also delegated broad authority to administer a portion of the Federal trust responsibility to the State of Hawaii;

(D) the political status of Native Hawaiians is comparable to that of American Indians and Alaska Natives; and

(E) the aboriginal, indigenous people of the United States have—

(i) a continuing right to autonomy in their internal affairs; and

(ii) an ongoing right of self-determination and self-governance that has never been extinguished.

(13) The political relationship between the United States and the Native Hawaiian people has been recognized and reaffirmed by the United States, as evidenced by the inclusion of Native Hawaiians in—

(A) the Native American Programs Act of 1974 (42 U.S.C. 2991 et seq.);

(B) the American Indian Religious Freedom Act (42 U.S.C. 1996);

(C) the National Museum of the American Indian Act (20 U.S.C. 80q et seq.);

(D) the Native American Graves Protection and Repatriation Act (25 U.S.C. 3001 et seq.);

(E) the National Historic Preservation Act (16 U.S.C. 470 et seq.);

(F) the Native American Languages Act (25 U.S.C. 2901 et seq.);

(G) the American Indian, Alaska Native, and Native Hawaiian Culture and Art Development Act (20 U.S.C. 4401 et seq.);

(H) the Workforce Investment Act of 1998 (29 U.S.C. 2801 et seq.); and

(I) the Older Americans Act of 1965 (42 U.S.C. 3001 et seq.).

(14) In 1981, Congress instructed the Office of Education to submit to Congress a comprehensive report on Native Hawaiian education. The report, entitled the "Native Hawaiian Edu-
cational Assessment Project”, was released in 1983 and documented that Native Hawaiians scored below parity with regard to national norms on standardized achievement tests, were disproportionately represented in many negative social and physical statistics indicative of special educational needs, and had educational needs that were related to their unique cultural situation, such as different learning styles and low self-image.

(15) In recognition of the educational needs of Native Hawaiians, in 1988, Congress enacted title IV of the Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988 (102 Stat. 130) to authorize and develop supplemental educational programs to address the unique conditions of Native Hawaiians.

(16) In 1993, the Kamehameha Schools Bishop Estate released a 10-year update of findings of the Native Hawaiian Educational Assessment Project, which found that despite the successes of the programs established under title IV of the Augustus F. Hawkins-Robert T. Stafford Elementary and Secondary School Improvement Amendments of 1988, many of the same educational needs still existed for Native Hawaiians. Subsequent reports by the Kamehameha Schools Bishop Estate and other organizations have generally confirmed those findings. For example—

(A) educational risk factors continue to start even before birth for many Native Hawaiian children, including—
   (i) late or no prenatal care;
   (ii) high rates of births by Native Hawaiian women who are unmarried; and
   (iii) high rates of births to teenage parents;

(B) Native Hawaiian students continue to begin their school experience lagging behind other students in terms of readiness factors such as vocabulary test scores;

(C) Native Hawaiian students continue to score below national norms on standardized education achievement tests at all grade levels;

(D) both public and private schools continue to show a pattern of lower percentages of Native Hawaiian students in the uppermost achievement levels and in gifted and talented programs;

(E) Native Hawaiian students continue to be overrepresented among students qualifying for special education programs provided to students with learning disabilities, mild intellectual disabilities, emotional impairment, and other such disabilities;

(F) Native Hawaiians continue to be underrepresented in institutions of higher education and among adults who have completed four or more years of college;

(G) Native Hawaiians continue to be disproportionately represented in many negative social and physical statistics indicative of special educational needs, as demonstrated by the fact that—
   (i) Native Hawaiian students are more likely to be retained in grade level and to be excessively absent in secondary school;
[ii] Native Hawaiian students have the highest rates of drug and alcohol use in the State of Hawaii; and

[iii] Native Hawaiian children continue to be disproportionately victimized by child abuse and neglect; and

(H) Native Hawaiians now comprise over 23 percent of the students served by the State of Hawaii Department of Education, and there are and will continue to be geographically rural, isolated areas with a high Native Hawaiian population density.

(17) In the 1998 National Assessment of Educational Progress, Hawaiian fourth-graders ranked 39th among groups of students from 39 States in reading. Given that Hawaiian students rank among the lowest groups of students nationally in reading, and that Native Hawaiian students rank the lowest among Hawaiian students in reading, it is imperative that greater focus be placed on beginning reading and early education and literacy in Hawaii.

(18) The findings described in paragraphs (16) and (17) are inconsistent with the high rates of literacy and integration of traditional culture and Western education historically achieved by Native Hawaiians through a Hawaiian language-based public school system established in 1840 by Kamehameha III.

(19) Following the overthrow of the Kingdom of Hawaii in 1893, Hawaiian medium schools were banned. After annexation, throughout the territorial and statehood period of Hawaii, and until 1986, use of the Hawaiian language as an instructional medium in education in public schools was declared unlawful. The declaration caused incalculable harm to a culture that placed a very high value on the power of language, as exemplified in the traditional saying: “I ka ʻōlelo nō ke ola; I ka ʻōlelo nō ka make. In the language rests life; In the language rests death.”

(20) Despite the consequences of over 100 years of non-indigenous influence, the Native Hawaiian people are determined to preserve, develop, and transmit to future generations their ancestral territory and their cultural identity in accordance with their own spiritual and traditional beliefs, customs, practices, language, and social institutions.

(21) The State of Hawaii, in the constitution and statutes of the State of Hawaii—

(A) reaffirms and protects the unique right of the Native Hawaiian people to practice and perpetuate their culture and religious customs, beliefs, practices, and language;

(B) recognizes the traditional language of the Native Hawaiian people as an official language of the State of Hawaii, which may be used as the language of instruction for all subjects and grades in the public school system; and

(C) promotes the study of the Hawaiian culture, language, and history by providing a Hawaiian education program and using community expertise as a suitable and essential means to further the program.]

Subsequent reports by the Kamehameha Schools Bishop Estate and other organizations have generally confirmed those findings. For example—

(A) Native Hawaiian students continue to begin their school experience lagging behind other students in terms of readiness factors such as vocabulary test scores;

(5) Native Hawaiian students served by the State of Hawaii Department of Education has risen from 20 percent in 1980 to 26 percent in 2008, and there are and will continue to be geographically rural, isolated areas with a high Native Hawaiian population density.

(6) Despite the consequences of more than 100 years of non-indigenous influence, the Native Hawaiian people are determined to preserve, develop, and transmit to future generations their ancestral territory and their cultural identity in accordance with their own spiritual and traditional beliefs, customs, practices, language, and social institutions.

SEC. 7301. SHORT TITLE.

This subpart may be cited as the “Alaska Native Educational Equity, Support, and Assistance Act”.

SEC. 7302. FINDINGS.

Congress finds the following:

(1) The attainment of educational success is critical to the betterment of the conditions, long-term well-being, and preservation of the culture and languages of Alaska Natives.

(2) It is the policy of the Federal Government to encourage the maximum participation by Alaska Natives in the planning and the management of Alaska Native education programs and to support efforts developed by and undertaken within the Alaska Native community to improve educational opportunity for all students.
Alaska Native children enter and exit school with serious educational handicaps. The educational achievement of Alaska Native children is far below national norms. Native performance on standardized tests is low, Native student dropout rates are high, Natives are significantly underrepresented among holders of baccalaureate degrees in the State of Alaska, and Alaska Natives are more likely than other Alaskans to be without access to employment. As a result, Native students are being denied their opportunity to become full participants in society and an entire generation is being condemned to an underclass status and a life of limited choices.

The programs and activities authorized in this subpart are essential if educational handicaps are to be overcome. The sheer magnitude of the geographic and other barriers to be overcome in delivering educational services in rural Alaska and Alaska villages should be addressed through the development and implementation of innovative, model programs in a variety of areas.

Alaska Native children should be afforded the opportunity to begin their formal education on a par with their non-Native peers. The Federal Government should lend support to efforts developed by and undertaken within the Alaska Native community to improve educational opportunity for all students.

In 1983, pursuant to Public Law 98–63, Alaska ceased to receive educational funding from the Bureau of Indian Affairs.

(C) INSUFFICIENT APPROPRIATIONS.—If the amount appropriated under section 8014(a)(3(aa)(1) is insufficient to pay the full amount determined under this paragraph for all eligible local educational agencies for the fiscal year, then the Secretary shall ratably reduce the payment to each local educational agency under this paragraph.

(B) AMOUNT.—The amount of a payment under subparagraph (A) for a local educational agency shall be determined as follows:
(i) Calculate the difference between the amount appropriated to carry out this section for fiscal year 1995 and the total amount of foundation payments made under paragraph (1) for the fiscal year.

(ii) Determine the percentage share for each local educational agency described in subparagraph (A) by dividing the assessed value of the Federal property of the local educational agency for fiscal year 1995 determined in accordance with subsection (b)(3), by the total eligible national assessed value of the eligible Federal property of all such local educational agencies for fiscal year 1995, as so determined.

(iii) Multiply the percentage share described in clause (ii) for the local educational agency by the amount determined under clause (i).

(A) the Secretary shall make a payment to each local educational agency that received a foundation payment under paragraph (1) for the fiscal year involved in an amount that bears the same relation to 25 percent of the remainder as the amount the local educational agency received under paragraph (1) for the fiscal year involved bears to the amount all local educational agencies received under paragraph (1) for the fiscal year involved; and

(B) the Secretary shall make a payment to each local educational agency that is eligible to receive a payment under this section for the fiscal year involved in an amount that bears the same relation to 75 percent of the remainder as a percentage share determined for the local educational agency (by dividing the maximum amount that the agency is eligible to receive under subsection (b) by the total of the maximum amounts for all such agencies) bears to the percentage share determined (in the same manner) for all local educational agencies eligible to receive a payment under this section for the fiscal year involved, except that, for the purpose of calculating a local educational agency's maximum amount under subsection (b), data from the most current fiscal year shall be used.

(B) SECOND AND SUCCEEDING YEARS.—For any succeeding fiscal year after the first fiscal year that a local educational agency receives a foundation payment under subparagraph (A), the amount of the local educational agency's foundation payment under this paragraph for such succeeding fiscal year shall be equal to the local educational agency's foundation payment under this paragraph for the first fiscal year.

(C) AMOUNTS.—The amount of a payment under subparagraph (A) for a local educational agency shall be determined as follows:

(i) Calculate the local educational agency's maximum payment under subsection (b).

(ii) Calculate the percentage that the amount appropriated under section 3(aa)(1) for the most recent fiscal year for which the Secretary has completed making payments under this section is of the total maximum payments for such fiscal year for all local educational agencies eligible for a payment under subsection (b) and multiply the agency's maximum payment by such percentage.

(iii) Multiply the amount determined under clause (ii) by 90 percent.

(3) REMAINING FUNDS.—From any funds remaining after making payments under paragraphs (1) and (2) for the fiscal year involved, the Secretary shall make a payment to each local educational agency that received a foundation payment under paragraph (1) or (2), or subsection (i)(1), for the fiscal year involved in an amount that bears the same relation to the remainder as a percentage share determined for the local educational agency (by dividing the maximum amount that the agency is eligible to receive under subsection (b) by the total of the maximum amounts for all such agencies) bears to the percentage share determined (in the same manner) for all local educational agencies eligible to receive a payment under this section for the fiscal year involved, except that, for the purpose of calculating a local educational agency's maximum amount under subsection (b), data from the most current fiscal year shall be used.

(i) SPECIAL PAYMENTS.—

(II) CALCULATIONS FOR LOCAL EDUCATIONAL AGENCIES WITH SMALL NUMBERS OF ELIGIBLE CHILDREN.—For a local educational agency that has an enrollment of 100 or fewer children described in subsection (a)(1), the Secretary shall calculate the total number of weighted student units for purposes of subsection (a)(2) by multiplying the number of such children by a factor of 1.75.

(III) CALCULATIONS FOR CERTAIN OTHER LOCAL EDUCATIONAL AGENCIES.—For a local educational agency that does not qualify under paragraph (2)(B)(i)(I) and has an enrollment of more than 100 but not more than 1,000 children described in subsection (a)(1), the Secretary shall calculate the total number of weighted student units for purposes of subsection (a)(2) by multiplying the number of such children by a factor of 1.25.

(ii) For purposes of calculating the maximum amount described in clause (i), the factor used in determining the weighted student units under subsection (a)(2) with respect to children described in subparagraphs (A) and (B) of subsection (a)(1) shall be 1.35.

(F) Data.—For purposes of providing assistance under this paragraph the Secretary—

(i) shall use student, revenue, expenditure, and tax data from the third fiscal year preceding the fiscal year for which the local educational agency is applying for assistance under this paragraph; and

(I) a percentage, the denominator of which is the difference between the maximum payment amount computed under paragraph (1) or (2) (as the case may be) for all local educational agencies and the
amount of the threshold payment (as calculated under subparagraphs (B) and (C)) of all local educational agencies, and the numerator of which is the aggregate amount of the excess sums; by

(II) the difference between the maximum payment amount computed under paragraph (1) or (2) (as the case may be) for the agency and the amount of the threshold payment as calculated under subparagraphs (B) and (C) for the agency.

(ii) INSUFFICIENT PAYMENTS.—For each fiscal year described in subparagraph (A) for which the sums appropriated under section 3(aa)(2) are insufficient to pay each local educational agency all of the local educational agency’s threshold payment described in clause (i), the Secretary shall ratably reduce the payment to each local educational agency under this paragraph.

TITLE VII—EDUCATION, TRAINING, AND COMMUNITY SERVICES PROGRAMS

Subtitle A—Adult Education for the Homeless

* * * * * * *

Subtitle B—Education for Homeless Children and Youths

[SEC. 721. STATEMENT OF POLICY.]

The following is the policy of the Congress:

(1) Each State educational agency shall ensure that each child of a homeless individual and each homeless youth has equal access to the same free, appropriate public education, including a public preschool education, as provided to other children and youths.

(2) In any State that has a compulsory residency requirement as a component of the State’s compulsory school attendance laws or other laws, regulations, practices, or policies that may act as a barrier to the enrollment, attendance, or success in school of homeless children and youths, the State will review and undertake steps to revise such laws, regulations, practices, or policies to ensure that homeless children and youths are afforded the same free, appropriate public education as provided to other children and youths.

(3) Homelessness alone is not sufficient reason to separate students from the mainstream school environment.

(4) Homeless children and youths should have access to the education and other services that such children and youths need to ensure that such children and youths have an opportunity to meet the same challenging State student academic achievement standards to which all students are held.

[SEC. 722. 42 U.S.C. 11432 GRANTS FOR STATE AND LOCAL ACTIVITIES FOR THE EDUCATION OF HOMELESS CHILDREN AND YOUTHS.]

funds under paragraph (2) and uses funds to carry out section 724(d) and (h), as the amount allocated under section 1122 of the Elementary and Secondary Education Act of 1965 to the State for that year bears to the total amount allocated under section 1122 of such Act to all States for that year, except that no State shall receive less than the greater of—

(i) $150,000;

(ii) one-fourth of 1 percent of the amount appropriated under section 726 for that year; or

(iii) the amount such State received under this section for fiscal year 2001.

(B) If there are insufficient funds in a fiscal year to allot to each State the minimum amount under subparagraph (A), the Secretary shall ratably reduce the allotments to all States based on the proportionate share that each State received under this subsection for the preceding fiscal year.

(2) Reservations.—(A) The Secretary is authorized to reserve 0.1 percent of the amount appropriated for each fiscal year under section 726 to be allocated by the Secretary among the United States Virgin Islands, Guam, American Samoa, and the Commonwealth of the Northern Mariana Islands, according to their respective need for assistance under this subtitle, as determined by the Secretary.

(B)(i) The Secretary shall transfer 1 percent of the amount appropriated for each fiscal year under section 726 to the Department of the Interior for programs for Indian students served by schools funded by the Secretary of the Interior, as determined under the Indian Self-Determination and Education Assistance Act (25 U.S.C. 450 et seq.), that are consistent with the purposes of the programs described in this subtitle.
