To authorize appropriations for fiscal year 2015 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,
SECTION 1. SHORT TITLE; FINDINGS.

(a) SHORT TITLE.—This Act may be cited as the “Carl Levin National Defense Authorization Act for Fiscal Year 2015”.

(b) FINDINGS.—Congress makes the following findings:

(1) Senator Carl Levin of Michigan was elected a member of the United States Senate on November 7, 1978, for a full term beginning January 3, 1979. He has served continuously in the Senate since that date, and was appointed as a member of the Committee on Armed Services in January 1979. He has served on the Committee on Armed Services since that date, a period of nearly 36 years.

(3) Senator Levin first served as chairman of the Committee on Armed Services of the United
States Senate for a period of the 107th Congress, and has remained chairman since the 110th Congress began in 2007. He has exercised extraordinary leadership as either the chairman or ranking minority member of the committee since the start of the 105th Congress in 1997.

(4) Each year, for the past 52 years, the Committee on Armed Services has reliably passed an annual defense authorization act, and this will be the 36th that Senator Levin has had a role in. In his capacity as member, ranking member, and chairman, he has been an advocate for a strong national defense, and has made lasting contributions to the security of our Nation.

(5) It is altogether fitting and proper that this Act, the last annual authorization act for the national defense that Senator Levin manages in and for the United States Senate as chairman of the Committee on Armed Services, be named in his honor, as provided in subsection (a).

"(6) The Secretary may make the certification under paragraph (3) notwithstanding the fact that one or more of the conditions of such certification are not met, if the Secretary determines that, due to exceptional circumstances, proceeding with a multiyear contract under this section is in the best interest of the Department of
Defense and the Secretary provides the basis for such determination with the certification.

(a) Authority to Transfer Authorizations.—

(1) Authority.—Upon determination by the Secretary of Defense that such action is necessary in
the national interest, the Secretary may transfer amounts of authorizations made available to the Department of Defense in this division for fiscal year 2015 between any such authorizations for that fiscal year (or any subdivisions thereof). Amounts of authorizations so transferred shall be merged with and be available for the same purposes as the authorization to which transferred.

SEC. 1003. SENSE OF SENATE ON SEQUESTRATION.

(a) FINDINGS.—The Senate makes the following findings:

(1) The budget of the President for fiscal year 2015, as submitted to Congress pursuant to section 1105 of title 31, United States Code, provides for significant reductions to the military force structure and in military compensation over the course of the future-years defense program, including proposals to restrict pay raises for members of the Armed Forces below the rate of inflation, freeze pay for general and flag officers, reduce the growth of housing allowances by requiring members of the Armed Forces to pay 5 percent out-of-pocket for housing costs, reduce appropriated fund subsidies to the defense commissaries, make significant changes to benefits under the TRICARE program, reduce the end
strength of the Army by more than 60,000, retire
the A–10 and U–2 aircraft of the Air Force, inac-
tivate half of the cruiser fleet of the Navy, and re-
duce the size of the helicopter fleet of the Army by
25 percent and terminate the Ground Combat Vehi-
cle program of the Army.

(2) These proposed reductions are the result of
the budget caps enacted by Congress in the Budget
Control Act of 2011 and reaffirmed (with some re-
lib for fiscal years 2014 and 2015) in the Bipar-
tisan Budget Act of 2014, which cut more than
$900,000,000,000 from the planned Department of
Defense budget over a period of ten years. Under
these budget caps, the Department of Defense budg-
et is unchanged from the funding level in fiscal
years 2013 and 2014, and remains more than
$30,000,000,000 below the funding provided to the
Department in fiscal years 2010, 2011, and 2012.
In inflation-adjusted terms, the drop is even greater,
with a reduction of $75,000,000,000 since fiscal
year 2010 and virtually no projected growth in infla-
tion-adjusted dollars through the balance of the fu-
ture-years defense program.

(3) If the budget caps remain unchanged for
fiscal year 2016 and beyond, the Department of De-
fense will be required to make even deeper cuts, in-
cluding an additional reduction of 60,000 in the end
strength of the Army, the retirement of the entire
KC–10 tanker aircraft fleet and the Global Hawk
Block 40 fleet, reduced purchases of Joint Strike
Fighters and unmanned aerial vehicles, the inactiva-
tion of additional naval vessels, reduced purchases of
destroyers, and the elimination of an aircraft carrier
and a carrier air wing. Senior civilian and military
leaders of the Department of Defense have testified
that if these additional reductions are carried out,
the United States Armed Forces will not be able to
carry out the National Defense Strategy.

(4) The budget of the President for fiscal year
2015 proposes to add $115,000,000,000 to the
budget caps of the Department of Defense for the
four fiscal years starting in fiscal year 2016 in order
to avoid the need to make the additional cuts de-
scribed in paragraph (3). The budget proposes to
add an equal amount to the budget caps for the non-
defense agencies of the Federal Government in order
to ensure that such agencies can continue to meet
their obligation to protect and promote public safety,
health, education, justice, transportation, the envi-
ronment, and other domestic needs.
(b) Sense of Senate.—It is the sense of the Senate that—

(1) leaving the budget caps described in subsection (a)(2) for fiscal year 2016 and beyond unchanged would require cuts that would seriously undermine the ability of the Department of Defense to carry out its national security mission and reduce the ability of other Federal Government agencies to adequately address non-defense priorities; and

(2) Congress should avoid these adverse impacts to the national interests of the United States by enacting deficit-neutral legislation to increase the budget caps, offset by a bipartisan comprehensive package.

(c) EXTENSION OF AUTHORITY TO ACCEPT CERTAIN EQUIPMENT.—Subsection (d)(1) of such section 1531 (127 Stat. 938; 10 U.S.C. 2302 note) is amended by striking “prior Acts” and inserting “Acts enacted before the date of the enactment of the Carl Levin National Defense Authorization Act for Fiscal Year 2015”.

SEC. 1524. AFGHANISTAN INFRASTRUCTURE FUND.

No amounts authorized to be appropriated by this Act may be available for, or used for purposes of, the Afghanistan Infrastructure Fund.

SEC. 1525. SENSE OF CONGRESS REGARDING COUNTER-IMPROVISED EXPLOSIVE DEVICES.

It is the sense of Congress that—
(1) counter-improvised explosive device tactics, techniques, and procedures used in Iraq and Afghanistan have produced important lessons learned and enduring technology critical to mitigating the devastating effects of improvised explosive devices, which have been the leading cause of combat casualties;

(2) without the preservation of knowledge about counter-improvised explosive devices, the United States Government could fail to take advantage of the lessons and investments of counter-improvised explosive device operations to enhance warfighter readiness; and

(3) the Department of Defense should to the extent appropriate retain in the military departments a knowledge base relating to counter-improvised explosive device operations.

SEC. 1605. SENSE OF CONGRESS ON DETERRENCE AND DE-
FENSE POSTURE OF THE NORTH ATLANTIC
TREATY ORGANIZATION.

It is the sense of Congress that the United States
reaffirms and remains committed to the policies enumer-
ated in the Deterrence and Defense Posture Review of the
North Atlantic Treaty Organization, dated May 20, 2012,
including the following statements:

(1) “The greatest responsibility of the Alliance
is to protect and defend our territory and our popu-
lations against attack, as set out in Article 5 of the
Washington Treaty. The Alliance does not consider
any country to be its adversary. However, no one
should doubt NATO's resolve if the security of any
of its members were to be threatened. NATO will
ensure that it maintains the full range of capabilities
necessary to deter and defend against any threat to
the safety and security of our populations, wherever
it should arise. Allies' goal is to bolster deterrence
as a core element of our collective defense and con-
tribute to the indivisible security of the Alliance.”.

(2) “Nuclear weapons are a core component of
NATO's overall capabilities for deterrence and de-
fense alongside conventional and missile defense
forces. The review has shown that the Alliance’s nu-
clear force posture currently meets the criteria for
an effective deterrence and defense posture.”.

(3) “The circumstances in which any use of nu-
clear weapons might have to be contemplated are ex-
tremely remote. As long as nuclear weapons exist,
NATO will remain a nuclear alliance. The supreme
guarantee of the security of the Allies is provided by
the strategic nuclear forces of the Alliance, particu-
larly those of the United States; the independent
strategic forces of the United Kingdom and France,
which have a deterrent role of their own, contribute
to the overall deterrence and security of the Allies.”.
(4) “NATO must have the full range of capabilities necessary to deter and defend against threats to the safety of its populations and the security of its territory, which is the Alliance’s greatest responsibility.”.

(5) “NATO is committed to maintaining an appropriate mix of nuclear, conventional, and missile defense capabilities for deterrence and defense to fulfill its commitments as set out in the Strategic Concept. These capabilities, underpinned by NATO’s Integrated Command Structure, offer the strongest guarantee of the Alliance’s security and will ensure that it is able to respond to a variety of challenges and unpredictable contingencies in a highly complex and evolving international security environment.”.

Subtitle B—Missile Defense Programs

SEC. 1611. HOMELAND BALLISTIC MISSILE DEFENSE.

(a) FINDINGS.—Congress makes the following findings:

(1) The United States has deployed the Ground-based Midecourse Defense (GMD) system, with 30 Ground-Based Interceptors (GBIs) currently in Alaska and California, for defense of the United States homeland against the threat of limited bal-
listic missile attack from nations such as North Korea and Iran.

(2) The system has experienced several flight test failures since 2010 involving the deployed Capability Enhancement-I and Capability Enhancement-II Exo-atmospheric Kill Vehicles (EKVs), and the Missile Defense Agency plans to conduct an intercept flight test in the summer of 2014 to demonstrate corrections to the kill vehicles.

(3) The Department of Defense is taking, and planning to take, numerous actions to improve United States homeland ballistic missile defense capabilities over the next decade to keep pace with evolving ballistic missile threats, including the following key actions:

(A) Deployment of 14 additional Ground-Based Interceptors in Alaska by the end of 2017.

(B) Improvement of the sensor network that supports homeland ballistic missile defense, including deployment of a new Long-Range Discriminating Radar in Alaska.

(C) Investment in improvements to the discrimination capabilities needed to improve the
operational effectiveness and efficiency of the homeland ballistic missile defense system.

(D) Re-design of the Exo-atmospheric Kill Vehicle to increase significantly its performance, reliability, cost-effectiveness, and affordability.

(E) Design and development of a Next Generation Exo-atmospheric Kill Vehicle that will incorporate new technologies and the potential for defeating multiple threat objects with individual interceptors.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) it is a national priority to defend the United States homeland against the threat of limited ballistic missile attack from North Korea and Iran;

(2) although the currently deployed Ground-based Midcourse Defense system provides protection of the entire United States homeland, including the East Coast, against the threat of limited ballistic missile attack from North Korea and Iran, this capability needs to be improved to meet evolving ballistic missile threats;

(3) the initial step in this process of improvement is to correct the problems that caused the
flight test failures with the current kill vehicles, and
to improve the reliability of the deployed Ground-
Based Interceptor fleet;

(4) as indicated by senior Department of De-
fense officials, investments to enhance homeland de-
fense sensor and discrimination capabilities are es-
sential to improve the operational effectiveness and
shot doctrine of the Ground-based Midcourse De-
fense system;

(5) given limitations with the currently deployed
Exo-atmospheric Kill Vehicles, it is important to re-
design the Exo-atmospheric Kill Vehicle using a rig-
orous acquisition approach, including realistic test-
ing, that can achieve a demonstrated capability as
soon as practicable using sound acquisition prin-
ciples and practices; and

(6) in order to stay ahead of evolving ballistic
missile threats, the Department should design the
Next Generation Exo-atmospheric Kill Vehicle to
take full advantage of improvements in sensors, dis-
 crimination, kill assessment, battle management,
and command and control, including the potential to
engage multiple objects.

(c) REPORT REQUIRED.—
(1) **IN GENERAL.**—Not later than 180 days after the date of the enactment of this Act, the Secretary of Defense shall submit to the congressional defense committees a report setting forth the status of current and planned efforts to improve the homeland ballistic missile defense capability of the United States.

(2) **ELEMENTS.**—The report required under paragraph (1) shall include the following:

(A) A description of the status of efforts to correct the problems that caused the flight test failures of the Capability Enhancement-I and Capability Enhancement-II Exo-atmospheric Kill Vehicles.

(B) A description of the status of efforts to field the additional 14 Ground-Based Interceptors planned for deployment at Fort Greely, Alaska, including the status of the refurbishment of Missile Field 1 at Fort Greely, and the operational impact of the additional interceptors.

(C) A description of the plans and progress toward improving the capability, reliability, and availability of fielded Ground-Based Interceptors, including progress toward improving the

(D) A description of the planned improvements to homeland ballistic missile defense sensor and discrimination capabilities, including an assessment of the expected operational benefits of such improvements to homeland ballistic missile defense.

(E) A description of the plans and efforts to redesign, develop, test, and field the Exo-atmospheric Kill Vehicle for the Ground-based Midcourse Defense system, and an explanation of its expected improvements in capability, cost-effectiveness, reliability, maintainability, and producibility.

(F) A description of the plans for developing, testing, and fielding the Next Generation Exo-atmospheric Kill Vehicle, and an explanation of how the anticipated capabilities are intended to help keep pace with evolving ballistic missile threats.

(G) Any other matters the Secretary considers appropriate.
(3) FORM.—The report required under para-
graph (1) shall be submitted in unclassified form,
but may include a classified annex.

SEC. 1612. REGIONAL BALLISTIC MISSILE DEFENSE.

(a) SENSE OF CONGRESS.—It is the sense of Con-
gress that—

(1) the regional ballistic missile capabilities of
countries such as Iran and North Korea pose a seri-
ous and growing threat to United States forward de-
ployed forces, allies, and partner countries;

(2) given this growing threat, it is a high pri-
ority for the United States to develop, test, and de-
ploy effective regional missile defense capabilities to
provide the commanders of the geographic combat-
ant commands with capabilities to meet their oper-
ational requirements, and for United States allies
and partners to improve their regional missile de-
fense capabilities;

(3) the United States and its North Atlantic
Treaty Organization (NATO) partners should con-
tinue the development, testing, and implementation
of Phases 2 and 3 of the European Phased Adaptive
Approach, to defend United States forward deployed
forces, allies, and partners in the North Atlantic
Treaty Organization in Europe against the growing regional missile capability of Iran;

(4) the United States should continue efforts to improve regional missile defense capabilities in the Middle East, including its close cooperation with Israel and its efforts with countries of the Gulf Cooperation Council, in order to improve regional security against the growing regional missile capabilities of Iran; and

(5) the United States should continue to work closely with its allies in Asia, particularly Japan, South Korea, and Australia, to improve regional missile defense capabilities against the growing threat of North Korean ballistic missiles.

(b) REPORT REQUIRED.—Not later than 180 days after the date of the enactment of this Act, the Secretary of Defense shall submit to the congressional defense committees a report setting forth the status and progress of efforts to improve United States regional missile defense capabilities in Europe, the Middle East, and in the Asia-Pacific region, including efforts and cooperation by allies and partner countries.

(e) ELEMENTS.—The report required in subsection (b) shall include the following:
(1) A description of the status of implementation of the European Phased Adaptive Approach, including the status of efforts to develop, test, and deploy the capabilities planned for Phases 2 and 3 of the European Phased Adaptive Approach.

(2) A description of the status of efforts to improve the regional missile defense capabilities of the United States and the Gulf Cooperation Council countries in the Middle East against regional missile threats from Iran, including progress toward, and benefits of, multilateral cooperation and data sharing among the Gulf Cooperation Council countries for multilateral integrated air and missile defense against threats from Iran.

(3) A description of the progress of the United States and its allies in the Asia-Pacific region, particularly Japan, South Korea, and Australia, to improve regional missile defense capabilities against missile threats from North Korea.

(4) A description of the degree of coordination among the commanders of the geographic combatant commands for integrated missile defense planning and operations, including obstacles and opportunities to improving such coordination and integrated capabilities.
(5) A description of the phased and adaptive elements of United States regional missile defense approaches tailored to the specific regional requirements in the areas of responsibility of the United States Central Command and the United States Pacific Command, including the role of missile defense capabilities of United States allies and partners in each region.

(6) A summary of the regional missile defense risk assessment and priorities of the commanders of the geographic combatant commands.

(7) Such other matters as the Secretary considers appropriate.

(d) FORM.—The report required by subsection (b) shall be submitted in unclassified form, but may include a classified annex.

SEC. 1613. AVAILABILITY OF FUNDS FOR MISSILE DEFENSE PROGRAMS OF ISRAEL.

(a) IN GENERAL.—Except as otherwise provided in this section, of the funds authorized to be appropriated for fiscal year 2015 by section 201 for research, development, test, and evaluation, Defense-wide, and available for the Missile Defense Agency, $350,900,000 may be provided to the Government of Israel to procure the Iron Dome short-range rocket defense system as specified in
the funding table in section 4201, including for co-production of Iron Dome parts and components in the United States by United States industry.

(b) Availability of Amounts for Higher Priority Missile Defense Programs.—If the Government of Israel determines that it is a higher priority for its national security, of the amount authorized under subsection (a), up to $175,000,000 may be used for the following cooperative missile defense programs:

(1) The Arrow System Improvement Program.

(2) The Arrow-3 Upper Tier interceptor development program.

(3) The David’s Sling short-range ballistic missile defense system.

(c) Conditions.—

(1) Iron Dome.—Amounts authorized in subsection (a) to produce the Iron Dome short-range rocket defense program shall be available subject to the terms, conditions, and co-production targets specified for fiscal year 2015 in the “Agreement Between the Department of Defense of the United States of America and the Ministry of Defense of the State of Israel Concerning Iron Dome Defense System Procurement,” signed on March 5, 2014.
(2) Other missile defense programs.—If the Government of Israel decides to use amounts authorized in subsection (a) for the cooperative missile defense programs identified in subsection (b), amounts for such cooperative missile defense programs shall be subject to the terms and conditions of the joint United States-Israel Project Agreements governing the management and execution of these cooperative programs.

SEC. 1614. ACQUISITION PLAN FOR RE-DESIGNED EXO-ATMOSPHERIC KILL VEHICLE.

(a) Sense of Congress.—It is the sense of Congress that—

(1) the existing models of the Exo-atmospheric Kill Vehicle of the Ground-based Midcourse Defense system are prototype designs that were developed and deployed without robust and rigorous acquisition practices;

(2) consequently, the deployed models of the Exo-atmospheric Kill Vehicle have experienced flight test failures since 2010, and have not demonstrated the degree of reliability, robustness, cost-effectiveness, or performance that are desirable;

(3) the Exo-atmospheric Kill Vehicle for the Ground-based Midcourse Defense system needs to be
re-designed to improve substantially its performance
and reliability; and

(4) in order to avoid repeating the problems
with the designs of the Exo-atmospheric Kill Vehicle,
the Department of Defense should follow a robust
and rigorous acquisition plan for the design, develop-
ment, and testing of the re-designed Exo-atmos-
pheric Kill Vehicle.

(b) ACQUISITION PLAN REQUIRED.—The Secretary
of Defense shall develop a robust acquisition plan for the
re-design of the Exo-atmospheric Kill Vehicle of the
Ground-based Midcourse Defense system that includes
rigorous elements for system engineering, design, integra-
tion, development, testing, and evaluation.

(c) OBJECTIVES.—The objectives of the acquisition
plan required by subsection (b) shall be to ensure that the
re-designed Exo-atmospheric Kill Vehicle is operationally
effective, reliable, producible, cost-effective, maintainable,
and testable.

(d) APPROVAL OF ACQUISITION PLAN REQUIRED.—
The acquisition plan required by subsection (b) shall be
subject to approval by the Under Secretary of Defense for
Acquisition, Technology, and Logistics.

(e) TESTING REQUIRED.—Prior to operational de-
ployment of the re-designed Exo-atmospheric Kill Vehicle,
the Secretary shall ensure that it has demonstrated, through successful, operationally realistic flight testing, a high probability of working in an operationally effective manner and that it has the ability to accomplish its intended mission.

(f) REPORT REQUIRED.—Not later than 60 days after the date on which the Under Secretary of Defense for Acquisition, Technology, and Logistics approves of the acquisition plan under subsection (d), the Director of the Missile Defense Agency shall submit to the congressional defense committees a report describing the acquisition plan and the manner in which it will meet the objectives described in subsection (c).

SEC. 1615. TESTING AND ASSESSMENT OF MISSILE DEFENSE SYSTEMS PRIOR TO PRODUCTION AND DEPLOYMENT.

(a) FINDINGS.—Congress makes the following findings:

(1) The initial acquisition approach to the Ground-based Midcourse Defense system did not follow standard acquisition practices, including the “fly before you buy” approach of adequately testing and demonstrating the performance of major defense systems before final production and deployment.
(2) Consequently, the Ground-based Midcourse Defense system was deployed in 2004 without any intercept flight tests of the production interceptor and kill vehicle, and was fielded with a prototype experimental design kill vehicle that had not been fully engineered, developed, or tested.

(3) In July 2013, the Ground-based Midcourse Defense system had a flight test failure with the initially-deployed Capability Enhancement-I Kill Vehicle because the kill vehicle failed to separate from the booster.

(4) The upgraded Capability Enhancement-II Kill Vehicle was deployed starting in 2008, prior to any successful intercept flight tests, and it has not had any successful intercept flights test as of May 2014.

(5) As a result of this highly concurrent acquisition approach, the Ground-based Midcourse Defense system has had a variety of kill vehicle problems that have caused several flight test failures since 2010, which have required more than $1,300,000,000 and four years of effort to correct.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—
(1) it is a high priority that United States ballistic missile defense systems should work in an operationally effective and cost-effective manner;

(2) prior to making final production decisions for and prior to operational deployment of such systems, the United States should conduct operationally realistic intercept flight testing, which should create sufficiently challenging operational conditions to establish confidence that such systems will work in an operationally effective and cost-effective manner when needed; and

(3) in order to achieve these objectives, and to avoid post-production and post-deployment problems like those encountered with the Ground-based Midcourse Defense system, it is essential for the Department of Defense to follow a “fly before you buy” approach to adequately test and assess the elements of the Ballistic Missile Defense System before final production decisions or operational deployment.

(c) SUCCESSFUL TESTING REQUIRED PRIOR TO FINAL PRODUCTION OR OPERATIONAL DEPLOYMENT.—Prior to making a final production decision for, and prior to the operational deployment of, a new or substantially upgraded interceptor or weapon system of the Ballistic
Missile Defense System, the Secretary of Defense shall ensure that—

1. sufficient and operationally realistic testing of the system is conducted to assess the performance of the system in order to inform a final production decision or an operational deployment decision; and

2. the results of such testing have demonstrated a high probability that the interceptor or weapon system will work in an operationally effective manner and has the ability to accomplish its intended mission.

(d) DIRECTOR OF OPERATIONAL TEST AND EVALUATION ASSESSMENT.—Prior to any final production decision or operational deployment described in subsection (c), the Director of Operational Test and Evaluation shall—

1. provide to the Secretary the assessment of the Director, based on the available test data, of the sufficiency, adequacy, and results of the testing of such system, including an assessment of whether the system will be sufficiently effective, suitable, and survivable when needed; and

2. provide to the congressional defense committees a written summary of that assessment.
Subtitle C—Space Activities

(d) REPORT.—

(1) IN GENERAL.—Not later than March 31, 2015, the Secretary shall, in consultation with the Director, submit a report on the strategy relating to space control and space superiority required by subsection (a) to—

(A) the Committee on Armed Services and the Select Committee on Intelligence of the Senate; and

(B) the Committee on Armed Services and the Permanent Select Committee on Intelligence of the House of Representatives.

(2) FORM OF REPORT.—The report required by paragraph (1) shall be submitted in classified form with an unclassified summary.
SEC. 1622. ALLOCATION OF FUNDS FOR THE SPACE SECURITY AND DEFENSE PROGRAM; REPORT ON SPACE CONTROL.

(a) Allocation of Funds.—Of the funds authorized to be appropriated by this Act or any other Act and made available for the Space Security and Defense Program (PE# 0603830F), a preponderance of such funds shall be allocated to the development of offensive space control and active defensive strategies.

(b) Statement With Respect to Allocation.—The Secretary of Defense shall include, in the budget justification materials submitted to Congress in support of the budget of the Department of Defense for a fiscal year (as submitted with the budget of the President under section 1105(a) of title 31, United States Code), a statement with respect to whether the budget of the Department allocates funds for the Space Security and Defense Program as required by subsection (a).

(c) Report.—Not later than 180 days after the date of the enactment of this Act, the Secretary shall submit to Congress a report that contains the following:

(1) An updated integrated capabilities document for offensive space control.

(2) A concept of operations for the defense of critical national security space assets in all orbital regimes.
(3) An assessment of the effectiveness of existing deterrence strategies.

SEC. 1623. PROHIBITION ON CONTRACTING WITH RUSSIAN SUPPLIERS OF CRITICAL SPACE LAUNCH SUPPLIES FOR THE EVOLVED EXPENDABLE LAUNCH VEHICLE PROGRAM.

(a) IN GENERAL.—The Secretary of Defense may not enter into or renew a contract, on or after the date of the enactment of this Act, for the procurement of property or services for space launch activities under the Evolved Expendable Launch Vehicle program from any person if that person purchases supplies critical for space launch activities covered by the contract from a Russian entity.

(b) WAIVER.—The Secretary may waive the prohibition under subsection (a) with respect to a contract for the procurement of property or services for space launch activities if the Secretary determines, and certifies to the congressional defense committees not later than 30 days before the waiver takes effect, that—

(1) the waiver is necessary for the national security interests of the United States; and

(2) the space launch services and capabilities covered by the contract could not be obtained at a fair and reasonable price without the purchase of
supplies critical for space launch activities from a
Russian entity.

(c) RUSSIAN ENTITY DEFINED.—In this section, the
term "Russian entity" means an entity organized under
the laws of the Russian Federation or otherwise subject
to the jurisdiction of the Russian Federation.

SEC. 1624. ASSESSMENT OF EVOLVED EXPENDABLE
LAUNCH VEHICLE PROGRAM.

Not later than March 31, 2015, the Comptroller Gen-
eral of the United States shall submit to the congressional
defense committees a report on the Evolved Expendable
Launch Vehicle program that includes an assessment of
the advisability of the Secretary of Defense requiring,
when selecting launch providers for the program using
competitive procedures as described in section 2304 of
title 10, United States Code, that new entrant launch pro-
viders or incumbent launch providers establish or maintain
business systems that comply with the data requirements
and cost accounting standards of the Department of De-
fense, including certified cost or price data.

SEC. 1625. REPORT ON RELIANCE OF EVOLVED EXPEND-
ABLE LAUNCH VEHICLE PROGRAM ON FOR-
EIGN MANUFACTURERS.

Not later than 180 days after the date of the enact-
ment of this Act, the Comptroller General of the United
States shall submit to the congressional defense committees a report on the risks to the Evolved Expendable Launch Vehicle program of reliance on foreign manufacturers that includes the following:

(1) An assessment of the degree to which the Air Force, through its contractors and subcontractors, relies on foreign manufacturers for supplies necessary for any qualified or certified provider of the Evolved Expendable Launch Vehicle.

(2) An assessment of the extent to which such reliance subjects the Evolved Expendable Launch Vehicle program to—

(A) supply chain disruption relating to geopolitical events or other reasons;

(B) introduction of counterfeit parts;

(C) limited price transparency; and

(D) other areas of risk identified by the Comptroller General.

(3) Recommendations for measures the Air Force could take to mitigate the risks to the Evolved Expendable Launch Vehicle program of reliance on foreign manufacturers and a cost-benefit analysis for each such recommendation.
SEC. 1626. AVAILABILITY OF ADDITIONAL ROCKET CORES

PURSUANT TO COMPETITIVE PROCEDURES.

(a) In General.—Relative to the number of rocket cores for which space launch providers may submit bids or competitive proposals under competitive procedures pursuant to the fiscal year 2015 National Security Space Launch Procurement Forecast, the Secretary of Defense shall—

(1) in fiscal year 2015, increase by one the number of such cores for which such providers may submit bids or competitive proposals; and

(2) for fiscal years 2015 through 2017, increase by one (in addition to the core referred to in paragraph (1)) the number of such cores for which such providers may submit bids or competitive proposals, unless the Secretary—

(A) determines that there is no practicable way to increase the number of such cores for which such providers may submit bids or competitive proposals and remain in compliance with the requirements of the firm fixed price contract for 36 rocket engine cores over the 5 fiscal years beginning with fiscal year 2013; and
(B) not later than 45 days after making that determination, submits to the congres-
sional defense committees—

(i) a certification that there is no practicable way to increase the number of such cores for which such providers may submit bids or competitive proposals and remain in compliance with the require-

(a) FINDINGS.—Congress makes the following findings:

(1) The Department of Defense and the security of the United States depend on the United States commercial space imaging industry for mapping, intelligence, battle damage assessment, coalition warfare, and humanitarian relief.

(2) The Department of Defense could benefit from the relaxation of the current limits on the resolution of the imagery that the United States commercial space imaging industry is permitted to sell because the industry will respond to larger market opportunities by increasing the quantity of spacecraft and the quality and diversity of the imagery and imagery-derived products the industry provides.

(3) The Department of Defense has a need to protect some places and events from the collection and sale of high-resolution imagery. That need could
be met through existing licensing and contractual authorities that either permit the government to exercise direct control of specific collection tasking and image dissemination or to restrict collection.

(4) Instead of using the approach described in paragraph (3), the United States commercial space imaging industry has been prohibited from selling imagery over the vast majority of the planet where there are no national security sensitivities.

(5) Limits on the resolution of commercial space imaging have been relaxed somewhat in the past, but only when the United States commercial space imaging industry has faced competition from foreign providers of such imaging.

(b) SENSE OF THE SENATE.—It is the sense of the Senate that—

(1) the Secretary of Defense should support relaxation, as soon as practicable, of panchromatic, spectral, and infrared imagery resolution limits so that the United States commercial space imaging industry may promptly begin—

(A) to attract investment in new satellite capabilities;

(B) to design and build new satellites; and
(C) to create new processing capabilities, business strategies, and marketing capacity; and 

(2) the Under Secretary of Defense for Policy should provide a recommendation to Congress by April 1, 2015, on the design and development of a flexible and dynamic capability to control the collection and sale of commercial space imagery to protect national security.
