

the most severe. It is critical that we maintain support for the charitable food system and funding for SNAP.

I have been a strong supporter of SNAP in Congress to help those who are food insecure during their time of need. Our office works closely with the Houston Food Bank, the largest in the Country, and the Texas Food Bank Network to help end hunger in America.

#### HONORING LARRY POWELL

### HON. DEVIN NUNES

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, June 19, 2013*

Mr. NUNES. Mr. Speaker, I rise today alongside my colleagues, Representatives COSTA and VALADAO, to honor the accomplishments of outgoing Fresno County Superintendent of Schools Larry Powell, who has dedicated forty-three years to public education in the Sanger Unified, Fresno Unified, and Central Unified school districts.

Mr. Powell began his career in education with a B.A. in Political Science from California State University Fresno and later received his M.A. in Educational Administration from Fresno Pacific University. He was named Superintendent of the Year in 2003 by the Association of California Administrators Region 9 and received the prestigious designation of "Top Dog" in 2007 from California State University Fresno.

A dedicated public servant, Mr. Powell has served on the boards of numerous community and educational organizations, including the California County Superintendents Educational Services Association, Break the Barriers, the Sequoia Council of the Boy Scouts, the Fresno Sports Council, the Fresno Athletic Hall of Fame, the Economic Development Corporation, the Fresno Compact, SALT-Fresno, the Highway City Development Corporation, the School Employers Association of California, CSUF President's Commission on Education, and Rachel's Challenge.

Characteristic of his courage and determination, Mr. Powell was diagnosed with Polio as an infant but overcame all challenges, became a champion wrestler and coach, and has shared his inspirational story in over 1,600 speeches nationwide. He lives by the message that the only things you cannot do are the things you do not attempt.

Mr. Speaker, we commend and applaud Larry Powell for his dedicated career in public education and congratulate him on a well-deserved retirement.

#### REINTRODUCING DUWAMISH TRIBAL RECOGNITION ACT

### HON. JIM McDERMOTT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, June 19, 2013*

Mr. McDERMOTT. Mr. Speaker, I rise today to reintroduce the Duwamish Tribal Recognition Act affecting the indigenous people of metropolitan Seattle. Nearly 150 years after the Duwamish Tribe signed the Point Elliott Treaty in 1855, they are still seeking federal recognition, which was granted to them in

2001 but denied under dubious circumstances eight months later.

On March 22, 2013, U.S. District Judge John Coughenour vacated the September 2001 denial of the Duwamish Tribe's recognition by George W. Bush administration officials in the Interior Department. As Judge Coughenour stated, "plaintiffs should not be left to wonder why one administration thought their petition should be considered under both sets of rules, but a second did not." I agree.

This issue of Duwamish recognition has been pending for so long that the Interior Department's rules for federal recognition of tribes have changed from the original regulations set in 1978 to those that were revised in 1994. There is significant evidence to support Duwamish recognition that is not in current record, which was filed 20 years ago.

I have asked the new Secretary of the Interior Sally Jewell to look into this matter. Meanwhile, this bill would provide federal recognition to the Duwamish Tribe.

I urge my colleagues to support this measure. Thank you.

#### RECOGNIZING ENTERPRISES OF WASHINGTON STATE AND THE ABILITYONE PROGRAM

### HON. DEREK KILMER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, June 19, 2013*

Mr. KILMER. Mr. Speaker, I rise today to recognize Skookum Contract Services and the AbilityOne Program. AbilityOne partners with over 600 non-profit agencies across the United States to provide services and sell products to the U.S. government. AbilityOne and Skookum empower people with disabilities by providing training and job placement services that help disabled folks in our region achieve gainful employment. Organizations like Skookum employ nearly 40,000 disabled Americans.

I applaud the work of these organizations to offer skills training and opportunities for people that are blind or have significant disabilities. By directly matching employers with well-qualified employees with disabilities, AbilityOne is helping employers address their workforce needs and creating opportunities that help people with disabilities become more productive and self-reliant.

In Washington State, Skookum partners with the Naval Bremerton Hospital and Jefferson County General Hospital to provide house-keeping services and ensure that hospitals are clean and sanitary for patients, doctors, and health care workers. In addition, they contract with Joint Base Lewis-McChord and Naval Base Kitsap to provide fleet management, janitorial, and grounds maintenance. Last year, I had the opportunity to see firsthand the important work of Skookum and their employees through visiting some of their work sites and can attest to the quality of their work. The agency also provides several other services to the community including warehouse and distribution, sanitation, and recycling services. "Skookum" is a Chinook word that means stronger or well-made in a better or unique way. The products that come out of Skookum demonstrate how effectively their employees are able to craft unique, high quality items.

Mr. Speaker, our community is a better place because of the work of Skookum employees. I commend the work of Jeff Dolven, the President and CEO of Skookum, and his staff in helping to uplift the disabled community and place them in meaningful employment that brings this region together. I applaud the work of Skookum employees in providing several meaningful services to the people of Washington State. I am pleased today to recognize this extraordinary service today in the United States Congress.

#### RECOGNIZING JORGE ARIAS ON THE OCCASION OF HIS RETIREMENT FROM FAIRFAX COUNTY

### HON. GERALD E. CONNOLLY

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, June 19, 2013*

Mr. CONNOLLY. Mr. Speaker, I rise to recognize and commend Jorge Arias, the famous mosquito hunter of Fairfax County, on the occasion of his retirement after a decorated career in the field of medical entomology, which culminated in his 10-year tenure as the Supervisor of the Fairfax County Health Department's Disease Carrying Insects Program.

When most people hear the familiar buzz of a fly or mosquito, their natural instinct is to swat them away or reach for the repellent. Not Jorge. He welcomes the pests of summer with open, exposed arms, inviting them to creep, crawl, and chomp on him. It is that passion which made him an easy selection when Fairfax County was looking to start its insects program in 2003.

Clearly the feeling was mutual. In a 2006 profile in The Washington Post, Jorge said at the time, "I thought, 'Oh my lord, this is heaven.' I get to play with mosquitoes!" It is that zeal for entomology that has made Jorge a respected expert in international circles. Along the way he has suffered multiple infections, mentored countless students in the field of biology, and even had several bugs named in his honor.

Jorge is a native Virginian, born in Charlottesville. He was the son of a doctor and survived polio as a young child growing up in Panama. He went to college thinking he would follow in his father's footsteps, but that changed once he sat down for his first entomology class. Some people claim to have been "bitten by the bug" when describing their career choice. For Jorge, it was quite literal. He was known for offer himself up in "live bait" experiments, sitting out in the rain forests for hours unprotected. He became so close to his subjects that he could identify the species of fly or mosquito feasting on him even in the dark. He has dedicated not only his career, but his very health, to the study of insects. Through the years, he has survived bouts with multiple diseases, including malaria and, remarkably, hepatitis.

He received a Bachelor of Arts and Master of Science degrees in biology from Whittier College in California, and he went on to receive his doctorate of philosophy in medical entomology from the University of California Riverside. From there, he and his wife, Kathy, joined the Peace Corps. They were posted in Brazil, where Jorge helped found graduate degree programs in entomology. He later pursued research activities in Brazil, Panama,
