

much more revenue than was guaranteed at planting.

According to the Congressional Budget Office, my amendment would have saved at least \$7.7 billion over the next 10 years, and possibly even much more in years with a severe drought, such as the \$6 billion last year. This amendment was endorsed by the Citizens Against Government Waste, Americans for Tax Reform, the National Taxpayers Union, Heritage Action, Taxpayers for Common Sense, and a slew of other fiscally conservative organizations, as well as the Environmental Working Group.

Professor Bruce Babcock, a professor from Iowa State University who helped invent revenue coverage in the mid-1990s, has said:

Crop insurance is not an insurance program. It's a social program.

And, he says, because of how American agriculture works, it's a social program that helps the biggest agribusinesses the most.

My amendment even got a tacit enforcement from the Farm Bureau because they realized this subsidy has now become too lucrative and too excessive. But the agribusiness lobby was afraid of my amendment and kept it from even being presented on the floor because they were almost certain it would pass.

Mr. Speaker, we have to make changes in the future so too much tax money will not go to Cadillac crop insurance programs.

COAL

The SPEAKER pro tempore. The Chair recognizes the gentleman from Pennsylvania (Mr. MURPHY) for 5 minutes.

Mr. MURPHY of Pennsylvania. Mr. Speaker, in May, more than 130 employees at PBS Coals in Somerset County, Pennsylvania, were laid off. It was the third round of layoffs by the company in less than a year. The men and women of PBS Coals joined more than 5,000 coal miners who lost their jobs in 2012.

With his announcements of "Cap-and-Trade: The Sequel," the President recently declared not just a war on coal but a war on jobs. It won't just be coal miners who lose their jobs or boilermakers who no longer are building and maintaining power plants, but also thousands of laborers, electricians, operating engineers, steamfitters, welders, plumbers, carpenters, machinists, and railroad workers will be out of work—real people, real faces, real families. They'll join the 130 at a Joy Mining factory in Millersburg, Kentucky, who were laid off in March; in Peoria, Illinois, the hundreds of boilermakers at a Komatsu equipment factory who were let go; and, in Erie, Pennsylvania, where GE is laying off 950 workers at its locomotive plants because less coal means less work for the railroads.

These men and women are out of work because, at the country's 600 coal

plants, more than 20 percent of all coal-fired units are being shut down in part due to EPA regulations. And that was before the President's speech on Tuesday announcing new global warming regulations. Now, more families will be out of work and struggling to get by. These are American families trying to pay off mortgages, car loans, put their children through school. Real Americans who sweated and toiled, all in hopes that the next generation of their children would climb higher towards the American Dream.

The President's new coal regulations will come at a cost of \$184 billion and 180,000 fewer jobs each year in mining, transportation, manufacturing, and power generation. As coal energy is cut off, it means higher electric bills. Families will spend \$400 more each year on their energy bill. That's on top of the \$2,000 more each year they pay for gasoline. And higher energy bills means higher manufacturing costs, hurting our steel industry even more as it struggles to compete in world markets.

We should be modernizing, not shutting down these coal-powered plants. We can burn coal cleanly. Since 1970, coal has tripled in its use. Meanwhile, sulfur dioxide emissions are down 56 percent and nitrous oxide is down 38 percent. Mercury emissions in the U.S. dropped roughly 60 percent since the 1950s.

Let's bring back the campaign promise made by President Obama for clean coal and use the talent of our scientists and engineers and our tradesmen for better technology.

This week, families throughout America were startled when a top Obama science adviser was quoted in The New York Times saying, "A war on coal is exactly what's needed."

But this is not just a war on coal. It's a war on the American worker and their family. These families want high-paying jobs and lower energy bills. They want doors to open, not to have them slam in their faces. They do not want Washington to surrender American jobs to foreign manufacturers. These fathers, these mothers, and these children will not surrender. They are waking up and saying, Stop the war on our jobs. And they are not going to sit back quietly much longer.

AMERICAN ENERGY

The SPEAKER pro tempore. The Chair recognizes the gentleman from South Carolina (Mr. MULVANEY) for 5 minutes.

Mr. MULVANEY. I come before you today to talk a little bit about energy. Later on today, we'll be talking more about the Offshore Energy and Jobs Act, part of the Republican Party's all-of-the-above energy program. It's a good opportunity for us to talk about various different things in energy.

I was home, Mr. Speaker, a couple of weeks ago going through one of my manufacturing facilities in my district, and I asked some of the folks who were

working there what we could do here to help create more American manufacturing jobs. And I was struck by the answer. The answer was very clear. They said, Keep our energy costs down.

They also talked about regulation. They also talked about health care. They talked about a lot of the things we hear all over the place. But the first thing that they mentioned to me, which was to keep energy costs down, was very interesting.

I said, Why is it so important? They make rolled rings, they do heavy manufacturing. It's a metal foundry. And they said that not only does lower energy keep their costs of materials down and make them more competitive in the world, but lower energy also keeps their cost of operations down, which makes them more competitive in the rest of the world, and, obviously, kept the cost to their employees down of simply getting back and forth to work.

Low energy costs were the best thing we could do for this heavy manufacturer back in South Carolina. I think that's very instructive to us, Mr. Speaker, when it comes to answering the question of what we're doing for jobs. We're here today to talk about not just energy but about jobs.

One of the big pieces to our all-of-the-above proposal is the Keystone pipeline. Many people have heard about it. I want to talk for a few minutes about it today.

One of the biggest objections the President made to it originally when it came out was environmental; and many people saw this map from Alberta, Canada, down to the Gulf of Mexico, in which the administration very prominently featured that this went through a large aquifer with a name that I cannot pronounce, in all seriousness. The administration wanted to draw attention to the fact that, Oh, my goodness, this pipeline went through this aquifer and it was going to poison the drinking water in all these Midwestern States and wasn't that a terrible thing. This is the map the administration wanted all of us to see.

□ 1110

This is the map of the real world. This is the map that shows where these pipelines already function and function extraordinarily well. There are pipelines all over the central part of this country, all over this aquifer already, without any harm to any person. Aquifers usually are several hundred feet deep and pipelines are 10 or 20 feet deep. We have the ability, we have the know-how, to do this safely and soundly. We've been doing it for over a century in this country. There are no environmental risks to going in this particular location through this particular aquifer. We know how to do it, and we know how to do it well.

Now we hear a new objection, Mr. Speaker. We hear an objection that the administration doesn't want to backslide. I heard an interview today where

a Democrat activist used that word six or eight times in about 2 minutes—didn't want to backslide on carbon, that we couldn't do this pipeline because it would encourage additional use of gasoline. It would make gas cheaper and that would be bad because we would use more of it. That's the administration's current position.

It's absolutely absurd. If you go to Canada, if you go to where the oil sands are, to where this raw material is, who will you see? You'll see the Chinese. If we don't use this oil, if we do not refine this oil, if we do not take advantage of this particular natural resource that is right across our border, the Chinese will; and it will be used in a fashion that would offend the sensibilities of most of the people who care about the environment.

I've been to China. I remember landing at the runway and not being able to see the end of the runway out of the window because the pollution was so bad. That is how this material is going to be used if we allow it to go overseas.

We have the ability now to keep this material in this country. We have the ability now to help keep our energy prices down. We have the ability now to help keep Americans at work and put additional Americans back to work. And to the extent we keep it out of the hands of the Chinese where there are no rules on how they use this material, we actually have a chance to help the environment.

The Keystone pipeline keeps energy prices down, puts American people back to work, and protects our environment. It is absolutely absurd that it hasn't been approved already, Mr. Speaker, and it needs to be approved now.

IN REMEMBRANCE OF THE 150TH ANNIVERSARY OF THE BATTLE OF GETTYSBURG

The SPEAKER pro tempore. The Chair recognizes the gentleman from Pennsylvania (Mr. PERRY) for 5 minutes.

Mr. PERRY. Thank you, Mr. Speaker.

I speak today of the forthcoming sesquicentennial recognizing three bloody days that will forever remain emblazoned on our hearts. The battle of Gettysburg was a pivotal turning point in the American Civil War, one of the single most defining moments in American history and one that united the Nation and restored peace and prosperity to our great land.

Therefore, be it known as we recollect and observe the horrific and critical events that took place in July 1863 that the memory of these brave souls who sacrificed their lives is kept alive through the tireless efforts of the National Park Service and the work of countless organizations.

The Sons of the Union Veterans of the Civil War, Allied Orders of the Grand Army of the Republic, the Military Order of the Loyal Legions of the

United States, along with the Sons of Confederate Veterans, United Daughters of the Confederacy and other Confederate heritage organizations honor all of the brave warriors lost on the fields of Gettysburg. These organizations work together tirelessly to preserve the hallowed ground upon which these Americans—our brothers and sisters—fought, bled, and perished.

For as long as there is breath in our chests and light in our eyes, we the people of these United States shall keep alive the memory of our ancestors and maintain the peace paid for with their sacrifice during the merciless 4 years of our Nation's history.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess until noon today.

Accordingly (at 11 o'clock and 13 minutes a.m.), the House stood in recess.

□ 1200

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at noon.

PRAYER

Chaplain Angel Berrios, 308th Military Intelligence Battalion, Fort Meade, Maryland, offered the following prayer:

Our Father in Heaven, we take time at this moment to acknowledge Your presence with us here in this congressional Chamber. We realize that without You, all our efforts are futile to make good and right decisions for the people of the United States. Your word says that not a sparrow falls to the ground without You being fully aware, so indeed we are convinced of the truth that You govern in the affairs of men.

Divine Holy Spirit, make Yourself real to us by revealing truth about every issue that will be discussed on the floor today. Truth is powerful. Truth is necessary. And truth will bring true liberty of which our country has so long experienced. I rebuke the deceits of darkness that would attempt to deter us from true truth, which is Your holy word.

I ask these things according to Your will; therefore, no doubt You hear this prayer. In Your holy name I pray.

Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER. Will the gentleman from New Jersey (Mr. PAYNE) come for-

ward and lead the House in the Pledge of Allegiance.

Mr. PAYNE led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

WELCOMING CHAPLAIN ANGEL BERRIOS

The SPEAKER. Without objection, the gentleman from Maryland (Mr. RUPPERSBERGER) is recognized for 1 minute.

There was no objection.

Mr. RUPPERSBERGER. Mr. Speaker, I am proud to introduce and to welcome to Washington U.S. Army Chaplain Angel Berrios, who is currently stationed at Fort Meade, located in the Second Congressional District of Maryland.

Chaplain Berrios, a captain in the U.S. Army, has been an ordained minister with the Assemblies of God for 24 years. For nearly two decades, he served as a full-time evangelist ministering in 47 countries and 47 States. Chaplain Berrios then joined the Army and was assigned to the 3rd Squadron of the 3rd Armored Cavalry Regiment at Fort Hood.

He was deployed to southern Iraq during operation New Dawn and provided a church in the desert for 850 fellow American soldiers. In addition to regular services and Bible study, Chaplain Berrios counsels soldiers struggling with day-to-day life in a war zone.

His ministry earned him a Bronze Star. His father, a Vietnam veteran, also served in the Army for 20 years.

We welcome Chaplain Berrios and his guests today. I wish to thank him for his many years of service to his community and his country.

I'm honored to call Chaplain Berrios a constituent, and I offer thanks on behalf of this entire body for his delivery of the opening prayer today.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. WEBSTER of Florida). The Chair will entertain 15 further requests for 1-minute speeches on each side of the aisle.

IMPRISONMENT FOR TAX TARGETING OF AMERICANS ACT OF 2013

(Mr. SAM JOHNSON of Texas asked and was given permission to address the House for 1 minute.)

Mr. SAM JOHNSON. Mr. Speaker, I rise today on behalf of my constituents in the Third Congressional District of Texas to introduce the Imprisonment for Tax Targeting of Americans Act of 2013.

On May 10, the IRS admitted to targeting conservative groups. Worse, our broken Tax Code does not make jail
