

the House for 1 minute and to revise and extend his remarks.)

Mr. RICE of South Carolina. Mr. Speaker, I just wanted to read a couple of the letters that have come into my office about the new health care law.

I'm a senior citizen working part time. I can no longer see my doctor of 14 years. I know of other people getting their hours cut and not being able to find a job, and they don't know what their health care will be.

The next one:

We have 24 employees and have been in business since 1982. We currently pay 100 percent of the premium health care insurance for our employees. After discussing this with our health care provider, we've determined that when ObamaCare is put in place, we will no longer be able to provide health care insurance.

The next one:

Higher premiums, higher deductibles, less coverage.

Next:

I have been paying insurance to Blue Cross/Blue Shield for 25 years now. A month and a half ago, I got a letter in the mailbox, saying, I am losing my coverage due to the Obama health care law. I thought Mr. Obama promised no one had to change insurance companies. Mr. Obama has told a lie, and there's no other way to say it.

Next one:

My insurance company is dropping my business. So much for being able to keep your insurance if you want to. Not. A small business owner like me is—up a creek.

Well, that's not exactly what he said.

THE SPEAKER pro tempore. Members are reminded to refrain from engaging in personalities toward the President.

#### OPEN UP THE GOVERNMENT

(Mr. MORAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MORAN. Mr. Speaker, the public has been witness to extraordinary divisiveness between the Republicans and Democrats in this House. But I think it's important that the public bear in mind that we have a law that was passed, passed substantially in the House and the Senate—granted, it was primarily by Democrats, of course. But it was signed by the President. And then we had a Presidential election. A major issue was the Affordable Care Act. That's why it was called ObamaCare. And President Obama won by 5 million votes, Mr. Speaker.

Now, Mr. Speaker, the issue is the funding of the Federal Government. Virtually all the Democrats voted to fund the government. Virtually all of the other side, Mr. Speaker, voted not to.

So now, for the Republican majority to come up and try to open up different agencies, suggesting that we don't want to do that—they're the ones that

closed them, Mr. Speaker. We're the ones that voted to keep them open. What we want to do is to open up the government. And if we do it in bits and pieces, we create more dissension within the Federal workforce. We shouldn't do that. The American public deserves better from us.

#### CELEBRATING NATIONAL MANUFACTURING DAY

The SPEAKER pro tempore. Under the Speaker's announced policy of January 3, 2013, the gentleman from Ohio (Mr. RYAN) is recognized for 60 minutes as the designee of the minority leader.

Mr. RYAN of Ohio. Mr. Speaker, I appreciate the opportunity to be here to do a Special Order.

We are here, and I am here as a co-chair of the House Manufacturing Caucus, to celebrate and recognize National Manufacturing Day. We know there are a lot of divisive issues being talked about here in the Nation's Capitol. But I think one issue, as we start to lay some groundwork for what the world looks like after we shake this virus that's happening here in Washington, D.C., I think manufacturing, advanced manufacturing, additive manufacturing, three-dimensional printing, and all of the issues that surround rebuilding the United States of America, can happen. And we have an obligation, I think, as we have arguments about the issues of the day, also to lay that seed corn, that long-term investment in strategies that will help our country grow.

We have a group of men and women, Members of Congress here this evening, that would like to speak on that. And I would like to work quickly through that list. First, I would like to yield to the gentleman from Massachusetts. Congressman KENNEDY, coming from New England, coming from Massachusetts, which obviously is a huge manufacturing State with a long history of manufacturing, beginning with the early stages of our country.

Mr. KENNEDY. To my colleague from Ohio (Mr. RYAN), the chairman of the House Manufacturing Caucus, I want to thank you for organizing this and for your leadership on this issue.

On October 1, just 2 days ago, the Institute for Supply Management reported the manufacturing index rose in September for the fourth straight month to a reading of 56.2. Any reading above 50 indicates growth, and it's the highest level we've seen since April of 2011.

Now a couple of monthly statistics about manufacturing: In 2011, manufacturing contributed over \$1.8 trillion to the Nation's economy and accounted for 47 percent of all U.S. exports. For every \$1 that we spend in manufacturing, another \$1.48 is added to the economy, the highest multiplier effect of any economic sector. Nine percent of the workforce, more than 11 million Americans, are employed in manufacturing. And two-thirds of the U.S. pri-

vate sector investment in research and development occurs in the manufacturing sector.

The value and potential for future growth in manufacturing in Massachusetts is a perfect example. The industry continues to be a critical segment of our economy. Yes, in the downturn, we were hurt. But what's remarkable is that the persistence and ingenuity of the manufacturing industry statewide continues to rank above the national average in terms of the concentration of manufacturing employment.

And after years of decline, in 2011, the total number of manufacturing firms actually increased. This means that companies and industries like aerospace, electronics, computers, pharmaceuticals, they're central to the success of the Massachusetts manufacturing economy. It's why I believe in advanced manufacturing in that it promises future growth, and it's essential to the public-private partnerships that are going to innovate and are going to be needed to commercialize and bring new products to market.

That's why I'm proud to have written and introduced the Revitalize American Manufacturing and Innovation Act, RAMIA, of 2013, along with my Republican colleague TOM REED of New York, the fellow cochairman with you, Mr. Chairman.

The bill is designed to bring industry, universities and community colleges, Federal agencies, and State and local governments all under one roof to accelerate manufacturing innovation. It establishes public-private sectors for manufacturing innovation that will help bridge the gap between basic research and development and commercialization of novel technologies.

The centers will serve as a regional hub of manufacturing excellence and will provide access to cutting-edge capabilities and equipment, creating an unparalleled environment to educate and train the next generation of our workforce.

And as we've seen, Mr. Chairman, we've seen this model work right there in your hometown of Youngstown, Ohio, the area that you represent. There are great advancements that we have seen in additive manufacturing in 3-D printing.

Our bill is locally driven manufacturing policy that addresses the disconnect between research, commercialization, and workforce training. We've seen that back in my district in communities like Taunton, Fall River, and Attleboro, where industrial manufacturing and manufacturing has been and can be a key to economic development in the future. That's why I support this industry. That is why I am proud to support this bill. And I thank you for the opportunity to speak this evening.

Mr. RYAN of Ohio. I thank the gentleman. And I would also like to thank him for his leadership on that particular bill. We do have the National Additive Manufacturing Institute in
