

they came earlier this week to the World War II Memorial to see the memorial that was built in their honor, and they're faced with Obamacades blocking off that memorial. I'm glad they stared it down, they didn't blink, and they took that memorial.

Mr. President, tear down those Obamacades. Let our veterans into the World War II Memorial.

FIGHTING ON BEHALF OF THIS GREAT COUNTRY

The SPEAKER pro tempore. The Chair recognizes the gentleman from North Carolina (Mr. MEADOWS) for 5 minutes.

Mr. MEADOWS. Mr. Speaker, I come here today to speak from the heart of a true story that's happening really right now in my district. It's a story of an innkeeper, Bruce O'Connell, who's operated the Pisgah Inn since 1979. It's an inn on the Blue Ridge Parkway, and that inn has been operated really at no cost to the Federal Government for years and years and years. In fact, as he operates it, he sends money to the Federal Government. So this government shutdown shouldn't have anything to do with the Pisgah Inn. The Blue Ridge Parkway is open for business. It continues to allow cars to go both ways on the parkway. But yet what we see is under the direction of this administration, the edict has come out to close the inn down.

Yesterday, they had to close it down at 6 clock. So I got a call this morning from Bruce, and he says Congressman MEADOWS, I just want to let you know that I'm going to open my inn back up.

Now I expected to hear all kinds of just heartfelt hurt and concern from Bruce. But what he said is that you're fighting for the right thing. You're fighting for our future. You're fighting for our children. You're fighting for our grandchildren. And I'm going to open back up knowing that the cost of this particular thing may cost me a business that I've had for many, many years. But you know, Congressman MEADOWS, it is the right thing to do, that we must stand together and fight. We must make sure that what we do is, our voice is heard. So I want to say thank you to a patriot who is willing, at great cost to himself, stand and fight for what he knows is right.

And I'm going to close with this because this fight is not a new story. On the back of the Delaware quarter is a horse and rider. Many people think it's Paul Revere, but indeed it is not. It is an unknown or little-known patriot by the name of Caesar Rodney. His statue is in this very building. It's on the back of a quarter commemorating what he did because, actually, he got on a horse when the founding of our Nation was there, he got on a horse and rode through the night, through driving storms, to arrive in Philadelphia to cast the deciding vote that created this great country.

Now why do I share this story? Because across his face was a green scarf

that covered a cancer that could be best operated on back in England. So he knew that by signing that document, he potentially was signing his death warrant.

It is that kind of patriotism, Mr. Speaker, that we are seeing day in and day out. It is exemplified by the men and women across this country—World War II veterans who have come in and crossed a barricade. They fought, and many patriots died, for the cause of freedom. And I just want to say thank you to the patriots across this great land that are standing up to fight on behalf of this great country.

FUNDING NATIONAL INSTITUTES OF HEALTH

The SPEAKER pro tempore. The Chair recognizes the gentleman from Washington (Mr. McDERMOTT) for 4½ minutes.

Mr. McDERMOTT. Mr. Speaker, as we have this debate over opening the government, I want to talk about an agency that people are not thinking about.

The National Institutes of Health started in 1887 in one room, the Public Health Service Hospital in Staten Island, New York. It was modeled on something that the Germans had been doing for a number of years that was called the Laboratory of Hygiene.

In 1891, it came to D.C.

In 1901, they built the first building. The appropriation was \$35,000. It was for the investigation of infectious and contagious diseases.

In 1912 in St. Louis, 12 kids died when they got a diphtheria vaccine that was contaminated with tetanus. At that point, they decided they would pass the Biological Control Act, and that was given to the Institutes of Health. Joseph Goldberger, a doctor, discovered the cause of the pellagra, which was a scourge of the South in this country, a dietary deficiency because of bad diet. That came from the Institutes of Health.

In 1930, a Senator from Louisiana by the name of Ramsdell started the National Institute, one, the National Institute of Health. It was to give fellowships to physicians to study problems in the health care system. That situation went on from that day to this day.

Now they tried to do it in the private sector. After the First World War and all of the problems of chemical warfare, the Congress said let the private sector figure out how to do it, and they couldn't do it. They couldn't find anybody to finance it, and so they came and established the National Institute of Health in the government.

In 1937, they added the National Institute of Cancer. And in 1938, they built the first building up in Bethesda, Building 6.

Now until the Second World War, they discovered and worked on various things, and then the war came, and they spent an enormous amount of effort trying to figure out the health

problems of this country. People don't realize, 43 percent of the people who were inducted or brought forward to be inducted into the Army were rejected because they were unfit physically. The National Institutes of Health went to work on that. There were a whole variety of issues—diet, teeth, syphilis, all kinds of things that were not being done in this society, and they did the initial research on that.

In 1946 after the war, they decided we've got to expand this thing and they began creating new Institutes of Health. One was arthritis and metabolic diseases. That's where we started working on diabetes. Then they did allergy and infectious disease, which is what went on to deal with AIDS.

In 1970, there were 15 Institutes of Health. Today, there are 27. All over this country in every university and everywhere you look, there are scientists and physicians who are submitting grants to the Institutes of Health on issues that affect all of us. It has been the practice until very recently that one out of five of them is accepted. One is good, four are not so good. We're going to pick the one that's good and put our effort there. We are down at the point where we are now doing 6 out of 100; 6 out of 100. This country that boasts about our health care system is killing it by this kind of bill, by squeezing the National Institutes of Health to death.

Mr. Speaker, bring out a clean bill and let's start up the National Institutes of Health.

RECESS

The SPEAKER pro tempore. Pursuant to clause 12(a) of rule I, the Chair declares the House in recess until noon today.

Accordingly (at 11 o'clock and 49 minutes a.m.), the House stood in recess.

□ 1200

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at noon.

PRAYER

Reverend Dr. Barry Black, Chaplain of the United States Senate, Washington, D.C., offered the following prayer:

Eternal God, today, give our lawmakers the wisdom to do what is right, led by You instead of political expediency.

Forgive them for the blunders they have committed, infusing them with the courage to admit and correct mistakes.

Lord, illuminate their minds so that they will find a solution to the current impasse, embracing Your purposes and doing Your will.

Continue to sustain our law enforcement agents and first responders, inspiring us to emulate their patriotism
