

child's career path takes them through a 4-year college. It is necessary to provide opportunities for them to learn skills to apply for a job either right after graduation or through further certification.

Career technical education teaches general employment skills and teaches skills required in specific occupations or careers. It can provide young people with confidence to focus on a career path.

Many occupations taught at vocational schools are in high demand, such as nursing, business administration, culinary arts, automotive maintenance, software programming, and engineering technology.

Our labor market is evolving and placing greater emphasis on high-tech skills. To ensure vocational training keeps pace with these changes, we should encourage private industries to partner with vocational schools to identify emerging job markets and have students trained to fill these jobs.

By investing in career technical education we can ensure that more Americans have secure career opportunities after graduation.

END THE TAX ON U.S. OLYMPIC CHAMPIONS

(Mr. MESSER asked and was given permission to address the House for 1 minute.)

Mr. MESSER. Madam Speaker, there is almost nothing Uncle Sam won't tax. You get hit at the grocery store, the gas pump, and your paycheck. You even get taxed when you die.

Now, as the eyes of the world are on Sochi, Uncle Sam's eyes are on yet another way to collect: U.S. Olympians.

Believe it or not, our men and women who bring home the gold, silver, or bronze are taxed on the value of the medals they earn and their minimal winnings while representing our country on the world stage. That is not okay.

Competing on the U.S. Olympic team is an achievement that should be celebrated, not taxed. That is why I have cosponsored the Tax Exemptions for American Medalists Act. It prevents Olympic athletes from paying taxes on their winnings. Our Federal Government shouldn't penalize them for performing at their best.

We need broad-based tax reform. In the meantime, I encourage my colleagues to support the TEAM Act and end this undue tax on our Olympians.

THE END OF SNOW

(Mr. HUFFMAN asked and was given permission to address the House for 1 minute.)

Mr. HUFFMAN. Madam Speaker, there was a deeply troubling story this Sunday in The New York Times, entitled, "The End of Snow."

Like all of you, I have been cheering on our Olympians in Sochi, particu-

larly in the snow-related events. But as this article notes, climate change is threatening the very concept of Winter Olympics and snow sports in general.

Current models project a 7-degree rise in global temperatures by the year 2100, leaving winters drier and our mountains bare of snow. Of the 19 cities that have hosted Winter Olympics, only 10 might still be cold enough by 2050 to host them again.

Warmer winters and less snow will be disastrous to the United States' \$66 billion ski industry. Until this weekend, California had just 12 percent of its average snowpack. Thankfully, it snowed in the Sierras, bringing some needed relief.

But one snowstorm in California and another on the east coast does not solve our bigger, long-term climate crisis. Climate change will impact our lives in every way. Let's get to work. Let's reduce greenhouse gases and prevent the worst impacts of climate change.

THE TRAIN WRECK OF OBAMACARE

(Mr. HARRIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HARRIS. Madam Speaker, the train wreck of the President's health care reform just continues.

This week, there have been two developments: the first one, the CBO announcing their study that shows that 2½ million full-time equivalents—that is, jobs—will be eliminated from the economy by ObamaCare; and yesterday, the President finally recognized that ObamaCare, in fact, destroys jobs and will delay the bill's mandate to buy insurance, but only for corporations, not for hardworking American families.

Madam Speaker, you don't get to keep your policy. You don't get to keep your doctor. Now you don't get to keep your job. America deserves better.

TWIN PRIME NUMBERS

(Mr. MCNERNEY asked and was given permission to address the House for 1 minute.)

Mr. MCNERNEY. Madam Speaker, I would like to talk about twin prime numbers. Twin primes are two prime numbers separated by a single number, like 11 and 13, or 17 and 19. The question is, Are there an infinite number of twin primes? It was the general consensus of the mathematical community until just recently that that question was beyond the capability of our current mathematical community.

However, there have been some stunning advances on this problem in the last few years. In particular, last May, with the help of an online collaborative project, mathematicians pioneered new methods for addressing this problem with a huge breakthrough from Tom Zhang at the University of New Hamp-

shire. We now know that there are an infinite number of prime number pairs separated by amounts smaller than 270.

While the twin prime problem itself is still unsolved, mathematicians are hopeful that this year they can reduce the separation from 270 to less than 100.

SUPPORT FOR THE A-10 AND CLOSE AIR SUPPORT

(Mrs. HARTZLER asked and was given permission to address the House for 1 minute.)

Mrs. HARTZLER. Madam Speaker, I rise today in strong support of the A-10 and close air support for our warfighters.

Hundreds of brave Americans are alive today because of the performance of the A-10 in Iraq and Afghanistan. I agree with Army Chief of Staff General Raymond Odierno, who said in an SASC hearing, "The A-10 is the best close air support platform we have today." Even Air Force Chief of Staff General Mark Welsh has said the A-10 "is the best airplane in the world at what it does."

The Air Force should not retire the A-10 before its replacement reaches full operational capability. Otherwise, it will result in a close air support gap that will put our ground troops at increased risk.

There is no greater responsibility than ensuring our men and women in uniform have the support they need to accomplish their missions and return home safely. Premature divestment of the A-10 by the Air Force would create a dangerous close air support capability gap that could unnecessarily endanger American servicemembers in future conflicts.

FAIR MINIMUM WAGE ACT

(Mr. CICILLINE asked and was given permission to address the House for 1 minute.)

Mr. CICILLINE. Madam Speaker, I rise today in support of raising the minimum wage and passing H.R. 1010, the Fair Minimum Wage Act, which would give approximately 28 million Americans an overdue pay raise, promote economic growth, and strengthen the middle class.

In America, if you work hard and play by the rules, you should be able to provide for your family and provide them with a decent quality of life. But for about 4.6 million Americans living in poverty, this is not the case.

It has been 5 years since those working for the minimum wage have seen an increase in the minimum wage and, according to one study, the minimum wage today is worth \$2 less than in 1968. This is shameful, and we have the responsibility to address growing income inequality by increasing the minimum wage immediately.

Unfortunately, some of my colleagues on the other side of the aisle oppose this commonsense legislation, arguing that it will hurt jobs. But as
