

On behalf of the people of California, whom Detective Davis served so bravely, I extend my gratitude and deepest sympathies to his wife, Jessica; daughters Angelique and Samantha; stepchildren Ivey and Chayse; mother Deborah; brother Jason; and grandparents Bob and Joan.

We are forever indebted to him for his courage and sacrifice, and he will be deeply missed.●

REMEMBERING DANNY P. OLIVER

● Mrs. BOXER. Madam President, I ask my colleagues to join me in honoring the life of Sacramento County Sheriff's Deputy Danny Oliver, an experienced peace officer, dedicated public servant, and beloved son, husband and father who was tragically killed in the line of duty on October 24, 2014.

Danny Oliver was born on February 9, 1967, and grew up in the Del Paso Heights neighborhood of Sacramento. Both his father's career as a firefighter and his own experiences growing up in a high-crime neighborhood helped shape Danny Oliver's commitment to strengthening his community through public service. After graduating from the Sheriff's Academy at the top of his class, Danny joined the Sacramento County Sheriff's Department in 1999.

During his 15-year career with the Department, Deputy Oliver worked in the main jail, patrol, and most recently as a member of the Problem Oriented Policing, P.O.P., team, working closely with the community to reduce crime and improve public safety. Deputy Oliver knew that this job came with great personal risk. He understood it required a unique ability to gain the trust of local leaders and residents. As Deputy Oliver's colleagues and family recall so admiringly, he excelled at it all—arriving to work an hour early, answering every email, and attending countless community meetings in the neighborhoods he worked so diligently to protect.

Deputy Oliver's partner in life was his loving wife of 25 years, Susan Oliver. While Danny attended the Sherriff's Academy, Susan worked two jobs to support their family so her husband could follow his dream. Together they raised two beautiful daughters, Melissa and Jenny. The family enjoyed spending time together and traveling, making many happy memories before Danny's life was so senselessly and tragically cut short.

On behalf of the people of California, whom Deputy Oliver served so bravely, I extend my gratitude and deepest sympathies to Susan, Melissa, Jenny, and Danny's parents, Bill and Jeri Oliver.

We are forever indebted to him for his courage and sacrifice, and he will be deeply missed.●

REMEMBERING MARTIN LITTON

● Mrs. BOXER. Madam President, I ask my colleagues to join me in honoring the memory of Martin Litton, a leg-

endary conservationist and great outdoorsman who died on November 30 at the age of 97.

Clyde Martin Litton was born in Los Angeles on February 13, 1917. As an English major at UCLA, he met his future wife, Esther, and became a conservation activist—forming a student group that kept roads out of California's wildlands. After graduating in 1939, he worked as the publicist for an Arizona dude ranch and as a tour guide at the Los Angeles Times. When war broke out, he joined the Army Air Corps and became a glider pilot flying missions behind enemy lines. In gentler times, he piloted his own plane and loved taking environmental and political leaders for wild rides into the wild.

After the war, Martin returned to the Times as a freelance writer, filing stories and photos from long backpacking trips with his wife and young family. He later worked at Sunset magazine, first as travel editor and later as senior editor.

In 1952, David Brower, the first executive director of the Sierra Club—which had hitherto been a hiking and outdoors group with little involvement in public policy—enlisted Litton to help him fight the Bureau of Reclamation's plan to build two dams at Dinosaur National Monument, and the group successfully lobbied Congress to scuttle the plan by 1956. That battle helped transform the Sierra Club into the powerful national advocacy organization we know today, with Litton supporting the Club's activism as a member of the national board from 1964 to 1972.

Along with his good friend Brower, Litton is widely recognized as one of the founders of the modern environmental movement. Brower called Martin his "environmental conscience" because he never compromised his principles as he led the conservation movement to some of its greatest victories. With his eloquent writing, beautiful photographs, and fiery rhetoric, he inspired the efforts to keep dams out of the Grand Canyon, a ski resort out of the Sierras' pristine Mineral King Valley, and logging out of the Giant Sequoia National Monument. He was instrumental in the creation of Redwood National Park in 1968; 2 years later, dissatisfied with the park's boundaries, he led the successful fight to protect an additional 48,000 acres.

A longtime oarsman and whitewater enthusiast, Litton also started a company in 1971 to take tourists through his beloved Grand Canyon in small wooden boats. He maintained an active role in Grand Canyon Dories and at 87 became the oldest person ever to pilot a boat through the Canyon.

A fierce and determined defender of our nation's wildlands, Martin Litton was a force of nature—and a force for the preservation of nature. On behalf of the people of California, who have benefitted so much from his life work, I send my deepest gratitude and condolences to his beloved wife, Esther; chil-

dren John, Donald, Kathleen, and Helen; five grandchildren and four great-grandchildren. Martin's memory and legacy will live on with everyone who loves America's priceless natural heritage, which he did so much to preserve and protect.●

RECOGNIZING LOWCOUNTRY STUDENTS

● Mr. SCOTT. Madam President, I wish to commend the hard work and achievement of a team of students and their teacher in my State of South Carolina.

I believe that education, and especially STEM education, is a key to success, and I am thrilled to see students across my State and our Nation creating original research to compete for the honor of having their experiments performed in space by the Student Spaceflights Experiments Program.

This year, this team of Lowcountry students and teachers collaborated on an extraordinary experiment design to test the formation of tin whiskers in lead-free solder in space flight. With tin whisker formation causing failures in devices ranging from space satellites to pacemakers, the students chose an important and relevant topic for their work.

Rachel Lindbergh, a senior at the Palmetto Scholars Academy, Gabriel Voigt, a sophomore at Bishop England High School, and Joseph Garvey, a sophomore at Palmetto Scholars Academy, came together with their teacher facilitator Kelly Voigt and put in a tremendous number of hours to create an excellent research project design.

The team's experiment will be launched into space as part of the Student Spaceflight Experiments Program Mission 6 to the International Space Station.

I am very proud of their work, and hope that it will serve as an example for all students that if you work hard and follow your passion, there is no telling where it may lead you.●

TRIBUTE TO LOREN DUKE ABDALLA

● Mr. THUNE. Madam President, today I wish to honor the heroic service of Loren Duke Abdalla, a member of the Yankton Sioux Tribe and the great grandson of the great Chief Running Bull. Corporal Abdalla, better known as "Duke", is a brave Marine who fought courageously in the Pacific Theater of World War II, earning the Purple Heart.

Duke enlisted into the U.S. Marine Corps in October of 1943. After finishing his basic training at the age of 18, he was sent to the island of New Caledonia before being assigned to Pavuvu Island alongside the First Marine Division, 1st Regiment, 1st Battalion, A Company, 1st Platoon. Shortly after his training on Pavuvu Island, Duke's regiment was given orders to invade the Island of Peleliu on September 15, 1944.

His regiment worked its way toward Bloody Nose Ridge, where they became surrounded on three sides and suffered heavy casualties. Despite persistent enemy fire, receiving shrapnel wounds in both of his legs, and blasts blowing out both his ear drums, Duke fought hard through the 6-day battle. In the end, Duke was one of only 29 survivors of his battalion. He received the Purple Heart and was promoted to corporal for his heroic efforts and leadership at Peleliu.

After recovering from his numerous injuries, Duke resumed Active Duty and rejoined his brothers in arms in the Battle of Okinawa. A Company, 1st and 3rd platoons were tasked with advancing on enemy positions, and Duke was assigned 3rd squad leader of the 1st platoon. On May 5, 1945, 2nd Squad Leader CPL John Brady was burned by a phosphorous grenade. Under heavy fire, Duke threw CPL Brady over his shoulder and carried him to safety. Duke then swiftly returned to the frontline and proceeded to engage a series of six enemy machine gun nests. Duke was the only member of his 12-person team to reach the fourth nest, and he continued moving forward and removed the last two nests by himself. His actions permitted the First Marine Division to safely advance up the ridge.

While many Americans were honored for their courageous actions that day and throughout the campaign, Duke's heroic actions have largely gone unrecognized. I stand here today and ask that Duke's selfless and brave actions be acknowledged and not soon forgotten. Duke received an honorable discharge from the United States Marine Corps on February 28, 1947, ending a military career that undoubtedly factored into American successes in the Pacific Theater.

Duke is most deserving of recognition for his exemplary bravery in the face of great danger and for putting the concerns of others always before his own. His selfless acts saved the lives of his colleagues and helped to secure American victory in that great war. Our Nation will always be grateful for Duke's dedicated service, and as thankful citizens, we must never take for granted the courage displayed by heroes like Corporal Loren Duke Abdalla.●

REMEMBERING BRET KNAPP

● Mr. UDALL of New Mexico. Mr. President, in New Mexico we are very proud to be the home of Los Alamos National Laboratory. LANL employs some of the finest scientists and researchers in the world. Each day, these brilliant public servants go to work and make vital contributions to our national security and to cutting-edge scientific and innovative advances.

The dedicated men and women of LANL are a credit to my State and to our Nation. It is with regret that I rise today to remember Bret Knapp, a valued member of the LANL team, who passed away last month.

Mr. Knapp received his B.A. in mechanical engineering at the California Polytechnic State University and his M.S. in mechanical engineering at the University of California, Davis.

In a career that spanned over three decades, Mr. Knapp demonstrated valued expertise and leadership. His commitment to excellence was a defining element of his career, and, even as we mourn his passing, we are grateful for his service.

Over the years, Mr. Knapp established an outstanding reputation for programmatic achievements, as well as for technical depth, honest and open communication, and fostering a strong sense of partnership and collaboration. He was the principal associate director for the weapons program at LANL, which plays a crucial role in supporting our country's defense, energy, and environmental needs. He also served as acting director at the Lawrence Livermore National Laboratory.

Among his many accomplishments at LANL, Bret Knapp integrated the planning and execution of the stockpile stewardship program, which is a critical mission for the Nation. He received the NNSA Defense Program Individual Award for Excellence in 2000 and two NNSA Defense Program Awards for Excellence in 1998 and 1999.

Those are, of course, the public and well-deserved accolades of an exemplary career. But for those who worked closely with Bret Knapp, they recall an inspiring colleague, a good friend, and someone who will be greatly missed.

I offer my sincere condolences to Mr. Knapp's wife Sheryl and their sons, Trevor and Cameron. I hope that, for all of Bret Knapp's friends and family, your memories of his life will offer a measure of comfort now in your loss.●

MESSAGES FROM THE HOUSE

At 11:16 a.m., a message from the House of Representatives, delivered by Mrs. Cole, one of its reading clerks, announced that the House agrees to the amendment of the Senate to the bill (H.R. 2640) to amend the Wild and Scenic Rivers Act to adjust the Crooked River boundary, to provide water certainty for the City of Prineville, Oregon, and for other purposes.

The message also announced that the House agrees to the amendment of the Senate to the bill (H.R. 3329) to enhance the ability of community financial institutions to foster economic growth and serve their communities, boost small businesses, increase individual savings, and for other purposes.

The message further announced that the House has passed the following bills, without amendment:

S. 1353. An act to provide for an ongoing, voluntary public-private partnership to improve cybersecurity, and to strengthen cybersecurity research and development, workforce development and education, and public awareness and preparedness, and for other purposes.

S.1474. An act to amend the Violence Against Women Reauthorization Act of 2013

to repeal a special rule for the State of Alaska, and for other purposes.

The message also announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 5859. An act to impose sanctions with respect to the Russian Federation, to provide additional assistance to Ukraine, and for other purposes.

At 1:00 p.m., a message from the House of Representatives, delivered by Mrs. Cole, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 2591. An act to amend certain provisions of the FAA Modernization and Reform Act of 2012.

H.R. 5699. An act to authorize the Secretary of the Interior to acquire approximately 44 acres of land in Martinez, California, and for other purposes.

H.R. 5803. An act to require the Secretary of the Interior to assemble a team of technical, policy, and financial experts to address the energy needs of the insular areas of the United States and the Freely Associated States through the development of energy action plans aimed at promoting access to affordable, reliable energy, including increasing use of indigenous clean-energy resources, and for other purposes.

At 5:13 p.m., a message from the House of Representatives, delivered by Mrs. Cole, one of its reading clerks, announced that the House has passed the following bills, without amendment:

S. 2338. An act to reauthorize the United States Anti-Doping Agency, and for other purposes.

S. 3008. An act to extend temporarily the extended period of protection for members of uniformed services relating to mortgages, mortgage foreclosure, and eviction, and for other purposes.

The message further announced that the House agrees to the amendment of the Senate to the text of the bill (H.R. 2952) to require the Secretary of Homeland Security to assess the cybersecurity workforce of the Department of Homeland Security and develop a comprehensive workforce strategy, and for other purposes, with an amendment to the title.

The message also announced that the House agrees to the amendment of the Senate to the bill (H.R. 4007) to recodify and reauthorize the Chemical Facility Anti-Terrorism Standards Program.

The message further announced that pursuant to section 1238(b)(3) of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (22 U.S.C. 7002), amended by division P of the Consolidated Appropriations Resolution, 2003 (22 U.S.C. 6901), the Minority Leader reappoints the following member on the part of the House of Representatives to the United States-China Economic and Security Review Commission: Mr. Michael Wessel of Falls Church, Virginia.

The message also announced that pursuant to section 3(b) of the Public Safety Officer Medal of Valor Act of 2001 (42 U.S.C. 15202), the Minority
