3 **SEC. 2. FINDINGS.**

4 Congress makes the following findings:

5 (1) Academically gifted and talented students
 6 make up an estimated 6 to 10 percent of the pre-
 7 kindergarten through grade 12 student population,
 8 totaling between 3,000,000 and 6,000,000 students.

9 (2) There is a growing excellence gap at the
 10 highest levels of achievement between the perform-

1 ance of subgroups of students, particularly between
2 the performance of students who are African-Amer-
3 ican or Hispanic and the performance of White stu-
4 dents, and between low-income students compared to
5 their more advantaged peers, on statewide assess-
6 ments and on the National Assessment of Edu-
7 cational Progress.

8 (3) Advanced students in the United States lag
9 behind the performance of similar students in other
10 countries, which puts the Nation at a competitive
11 disadvantage.

12 (4) Gifted and talented students, and high-abil-
13 ity students who have not been formally identified
14 for gifted education services, require modifications to
15 the general education curriculum to fully meet their
16 potential.

17 (5) Effective assessment and instruction of gift-
18 ed and talented students requires educators to have
19 specialized knowledge and skills.

20 (6) Ninety percent of teachers nationwide want
21 more professional development focused on the skills
22 necessary for teaching advanced students.

23 (7) Interventions and strategies that have been
24 demonstrated to be successful with gifted and tal-

1 ented students can be modified to improve the
2 achievement of all students.

3 (8) The availability of gifted education pro-
4 grams and services to students who require such
5 services is unequal and often relies solely on local re-
6 sources and leadership, leaving many high-ability
7 students from rural areas or who are English lan-
8 guage learners or Hispanic, African-American, or
9 Native American, among others, without access to
10 appropriate services.

11 (9) There are an estimated 360,000 students in
12 the United States who are both gifted and have a
13 disability. These “twice exceptional” children present
14 special challenges because their disability often
15 masks their academic potential or their academic
16 strengths may mask their disability, resulting in a
17 lack of services and supports for this student popu-
18 lation.

19 (10) The development and dissemination of re-
20 search and national data on gifted and talented stu-
21 dents is necessary to—

22 (A) guide evidence-based classroom prac-
23 tices vital to meeting the unique needs of this
24 population of students; and

1 (B) contribute to the decisionmaking of
2 educators, families, and policymakers.

3 **SEC. 3. REFERENCES.**

4 Except as otherwise expressly provided, whenever in
5 this Act an amendment or repeal is expressed in terms
6 of an amendment to, or repeal of, a section or other provi-
7 sion, the reference shall be considered to be made to a
8 section or other provision of the Elementary and Sec-
9 ondary Education Act of 1965 (20 U.S.C. 6301 et seq.).
