TITLE IX—DEPARTMENT OF DEFENSE ORGANIZATION AND
MANAGEMENT
Subtitle A—Goldwater-Nichols Reform

SEC. 901. SENSE OF CONGRESS ON GOLDWATER-NICHOLS
REFORM.

It is the sense of Congress that the following principles should be adhered to in any reform of the Goldwater-Nichols Department of Defense Reorganization Act of 1986:

(1) Civilian control of the military and the civilian chain of command must be preserved.

(2) The role of the Chairman of the Joint Chiefs of Staff in providing independent military advice, as the principal military advisor to the President and the Secretary of Defense, must be preserved.

(3) Any changes to the Goldwater-Nichols Act of 1986 should be rooted in a clear identification and understanding of the issues and the objectives and ramifications of any changes.

(4) Any changes to the Goldwater-Nichols Act of 1986 should enhance the capabilities of the United States Armed Forces.
(5) Each Geographical Unified Command has its own distinct area of emphasis and expertise, as well as requirements and responsibilities. Combining Northern Command and Southern Command, or combining European Command and Africa Command, would severely degrade mission effectiveness, but would provide only marginal increased efficiency. Additionally, consolidating Geographic Unified Commands would cause unacceptable risk to both global strategic influence as well as regional capability, and would exacerbate already significant capacity challenges.

(6) The emphasis on strategy and planning in the Goldwater-Nichols Act must be sustained.

(7) Complex security challenges will become increasingly transregional, multi-domain, and multi-functional.

(8) Therefore, the Department of Defense, including streamlined headquarters staffs, must be more agile and adaptive.

SEC. 926. REFORM OF NATIONAL SECURITY COUNCIL.

(a) FINDINGS.—Congress finds the following:

(1) The National Security Council has increasingly micromanaged military operations and centralized decisionmaking within the staff of the National Security Council. The size of the staff has contributed this problem.

(2) As stated by former Secretary of Defense Robert M. Gates, “It was the operational micromanagement that drove me nuts of White House and [National Security Council] staffers calling senior commanders out in the field and asking them
questions, second guessing commanders”, and by another former Secretary of Defense Leon Panetta, “[B]ecause of that centralization of that authority at the White House, there are too few voices being heard in terms of the ability to make decisions and that includes members of the cabinet.”.

(3) Gates stated, “You have 25 people working on a single military problem... They are going to be doing things they shouldn’t be doing,” and Panetta noted, “The National Security Council has grown enormously, which means you have a lot more staff people running around at the White House on these foreign policy issues.”.

(4) Press reports indicate that National Security Council micromanagement has included selecting targets in ongoing military operations, specifying detailed parameters and limitations on military operations, and managing military planning and the execution of plans.

(5) As stated in section 101(a) of the National Security Act of 1947 (50 U.S.C. 3021(a)), the “function of the Council shall be to advise the President with respect to the integration of domestic, foreign, and military policies relating to the national security so as to enable the military services and the
other departments and agencies of the Government to cooperate more effectively in matters involving the national security”.

(6) As stated in the November 1961 staff reports and recommendations on “Organizing for National Security” submitted to the Committee on Government Operations of the Senate by the Subcommittee on National Policy Machinery, “The Council is an interagency committee: It can inform, debate, review, adjust, and validate... The Council is not a decisionmaking body; it does not itself make policy. It serves only in an advisory capacity to the President, helping him arrive at decisions which he alone can make.”.

(7) As noted in the 1987 Report of the President’s Special Review Board (commonly known as the “Tower Commission Report”), “As a general matter, the [National Security Council] staff should not engage in the implementation of policy or the conduct of operations. This compromises their oversight role and usurps the responsibilities of the departments and agencies.”.

(8) As noted in the “Addendum on Structure and Process Analyses: Volume II – Executive Office of the President,” accompanying the February 2001
U.S. Commission on National Security/21st Century
(commonly known as the “Hart-Rudman Commis-
sion”), “[T]he degree to which the [National Secu-
rity Council] gets involved in operational issues
raises a question of congressional oversight. Today
there is limited congressional oversight of the [Na-
tional Security Council]... Assigning the [National
Security Council] greater operational responsibility
would likely result in calls for more congressional
oversight and legislative control...”.

(9) According to analysis from the Brookings
Institution’s National Security Council Project, the
size of the National Security Council staff from the
early 1960s to the mid-1990s remained consistently
under 60 personnel. Since then, it has grown signifi-
cantly in size.

(10) As former National Security Advisor,
Zbigniew Brzezinski, wrote in “The NSC’s Midlife
Crisis” in Foreign Policy, Winter 1987–1988,
“There is no magic number, but it would appear
that for successful strategic planning and policy co-
ordination 30-40 senior staff members are probably
adequate. However, to ensure effective supervision
over policy implementation as well, the size of the
staff should be somewhat larger. An optimal figure
for the senior staff probably would be about 50 sen-
ior staff members.”.

(b) SENSE OF CONGRESS.—It is the sense of Con-
gress that—

(1) the function of the National Security Coun-
cil, consistent with the National Security Act of
1947 (50 U.S.C. 3001 et seq.), is to advise the
President as an independent honest broker on na-
tional security matters, to coordinate national secu-

rity activities across departments and agencies, and
to make recommendations to the President regard-
ing national security objectives and policy, and the
size of the staff of the National Security Council
should be appropriately aligned to this function;

(2) the President is entitled to privacy in the
Office of the President and to a confidential rela-
tionship with the National Security Advisor and the
National Security Council; and

(3) however, a National Security Council, en-
abled by a large staff, that assumes a central policy-
making or operational role is no longer advisory and
should be publicly accountable to the American peo-

ple through Senate confirmation of its leadership
and the activities of the Council subject to direct
oversight by Congress.
(c) Amendments to National Security Act of 1947.—Section 101 of the National Security Act of 1947 (50 U.S.C. 3021), is amended—

(1) in subsection (a)—

(A) in paragraph (5), by striking “and”;

(B) in paragraph (6), by striking the period at the end and inserting “; and”; and

(C) by adding after paragraph (6) the following new paragraph:

“(7) the Assistant to the President for National Security Affairs.”;

(2) in subsection (c), by striking “shall receive compensation at the rate of $10,000 a year.” and inserting “shall report to, and be under the general supervision of, the Assistant to the President for National Security Affairs.”;

(3) by redesignating subsections (d) through (l) as subsections (e) through (m), respectively; and

(4) by inserting after subsection (c) the following new subsection:

“(d)(1)(A) Except as provided by subparagraph (B), the Assistant to the President for National Security Affairs shall be appointed by the President.

“(B) If the staff of the Council exceeds 100 covered employees at any point during a term of the President,
and for the duration of such term (without regard to any changes to the number of such covered employees), the Assistant to the President for National Security Affairs shall be appointed by the President, by and with the advice and consent of the Senate.

“(2)(A) Beginning on the date on which the staff of the Council exceeds 100 covered employees, the person appointed as the Assistant under paragraph (1)(A), the person nominated by the President to be appointed the Assistant under paragraph (1)(B), or any other person designated by the President to serve as the Assistant in an acting capacity, may serve in an acting capacity for no longer than 210 days.

“(B) If the person nominated by the President to be appointed the Assistant under paragraph (1)(B) is rejected by the Senate, withdrawn, or returned to the President by the Senate, the President shall nominate another person and the person serving as the acting Assistant may continue to serve—

“(i) until the second nomination is confirmed;

or

“(ii) for no more than 210 days after the second nomination is rejected, withdrawn, or returned.
“(3) The President shall notify Congress in writing not more than seven days after the date on which the staff of the Council exceeds 100 covered employees.

“(4) In this subsection, the term ‘covered employees’ means each of the following officers and employees (counted without regard to full-time equivalent basis):

“(A) Officers and employees occupying a position funded by the Executive Office of the President performing a function of the Council.

“(B) Officers, employees, and members of the Armed Forces from any department, agency, or independent establishment of the executive branch of the Government that are on detail to the Council performing a function of the Council.”.

SEC. 1089. SENSE OF CONGRESS REGARDING CONNECTICUT’S SUBMARINE CENTURY.

(a) FINDINGS.—Congress makes the following findings:

(1) On March 2, 1867, Congress enacted a naval appropriations Act that authorized the Secretary of the Navy to “receive and accept a deed of gift, when offered by the State of Connecticut, of a tract of land with not less than one mile of shore front on the Thames River near New London, Connecticut, to be held by the United States for naval purposes”.

(2) The people of Connecticut and the towns and cities in the southeastern region of Connecticut subsequently gifted land to establish a military installation to fulfill the Nation’s need for a naval facility on the Atlantic coast.

(3) On April 11, 1868, the Navy accepted the deed of gift of land from Connecticut to establish a naval yard and storage depot along the eastern shore of the Thames River in Groton, Connecticut.
(4) Between 1868 and 1912, the New London Navy Yard supported a diverse range of missions, including berthing inactive Civil War era ironclad warships and serving as a coaling station for refueling naval ships traveling in New England waters.

(5) Congress rejected the Navy’s proposal to close New London Navy Yard in 1912, following an impassioned effort by Congressman Edwin W. Higginson, who stated that “this action proposed is not only unjust but unreasonable and unsound as a military proposition”.

(6) The outbreak of World War I and the enemy use of submarines to sink allied military and civilian ships in the Atlantic sparked a new focus on developing submarine capabilities in the United States.

(7) October 18, 1915, marked the arrival at the New London Navy Yard of the submarines G–1, G–2, and G–4 under the care of the tender U.S.S. OZARK, soon followed by the arrival of submarines E–1, D–1, and D–3 under the care of the tender U.S.S. TONOPAH, and on November 1, 1915, the arrival of the first ship built as a submarine tender, the U.S.S. FULTON (AS–1).

(9) In the 100 years since the arrival of the first submarines to the base, Naval Submarine Base New London has grown to occupy more than 680 acres along the east side of the Thames River, with more than 160 major facilities, 15 nuclear submarines, and more than 70 tenant commands and activities, including the Submarine Learning Center, Naval Submarine School, the Naval Submarine Medical Research Laboratory, the Naval Undersea Medical Institute, and the newly established Undersea Warfighting Development Center.

(10) In addition to being the site of the first submarine base in the United States, Connecticut was home to the foremost submarine manufacturers of the time, the Lake Torpedo Boat Company in Bridgeport and the Electric Boat Company in Groton, which later became General Dynamics Electric Boat.

(11) General Dynamics Electric Boat, its talented workforce, and its Connecticut-based and nationwide network of suppliers have delivered more
than 200 submarines from its current location in Groton, Connecticut, including the first nuclear-powered submarine, the U.S.S. NAUTILUS (SSN 571), and nearly half of the nuclear submarines ever built by the United States.

(12) The Submarine Force Library and Museum, located adjacent to Naval Submarine Base New London in Groton, Connecticut, is the only submarine museum operated by the United States Navy and today serves as the primary repository for artifacts, documents, and photographs relating to the bold and courageous history of the Submarine Force and highlights as its core exhibit the Historic Ship NAUTILUS (SSN 571) following her retirement from service.

(13) Reflecting the close ties between Connecticut and the Navy that began with the gift of land that established the base, the State of Connecticut has set aside $40,000,000 in funding for critical infrastructure investments to support the mission of the base, including construction of a new dive locker building, expansion of the Submarine Learning Center, and modernization of energy infrastructure.
(14) On September 29, 2015, Connecticut Governor Dannel Malloy designated October 2015 through October 2016 as Connecticut’s Submarine Century, a year-long observance that celebrates 100 years of submarine activity in Connecticut, including the Town of Groton’s distinctation as the Submarine Capital of the World, to coincide with the centennial anniversary of the establishment of Naval Submarine Base New London and the Naval Submarine School.

(15) Whereas Naval Submarine Base New London still proudly proclaims its motto of “The First and Finest”.

(16) Congressman Higgins’ statement before Congress in 1912 that “Connecticut stands ready, as she always has, to bear her part of the burdens of the national defense” remains true today.

(b) SENSE OF CONGRESS.—Congress—

(1) commends the longstanding dedication and contribution to the Navy and submarine force by the people of Connecticut, both through the initial deed of gift that established what would become Naval Submarine Base New London and through their on-going commitment to support the mission of the base and the Navy personnel assigned to it;
(2) honors the submariners who have trained and served at Naval Submarine Base New London throughout its history in support of the Nation’s security and undersea superiority;

(3) recognizes the contribution of the industry and workforce of Connecticut in designing, building, and sustaining the Navy’s submarine fleet; and

(4) encourages the recognition of Connecticut’s Submarine Century by Congress, the Navy, and the American people by honoring the contribution of the people of Connecticut to the defense of the United States and the important role of the submarine force in safeguarding the security of the United States for more than a century.

SEC. 1091. SENSE OF CONGRESS REGARDING THE REPORT-

(a) FINDINGS.—Congress makes the following findings:

(1) On December 6, 1941—one day before the attack on Pearl Harbor—the War Department established Tyndall Field as an Army Air Force gunnery school in Panama City, Florida.

(2) Tyndall Field was named in honor of native Floridian Lieutenant Francis B. Tyndall, who received the U.S. Air Force flying ace designation for his service in the First World War.

(3) Tyndall Field became an important center for aerial gunnery training during the Second World War, hosting training missions using aircraft including A–33, 0–47, AT-6, Martin B-26 Marauders, and B–17 bombers.

(4) On January 13, 1948, Tyndall Field became Tyndall Air Force Base and was an active site for air training and defense throughout the Cold War.

(5) Tyndall AFB is now home to the First Air Force as well as the 325th Fighter Wing Headquarters and their F–22 Raptors.
(6) The 325th Fighter Wing has been instrumental to national security at such crucial junctures as the Cuban Missile Crisis, throughout the Cold War, and more recently in intercepting unidentified aircraft and supporting anti-smuggling efforts.

(7) On July 20, 1945, the Navy Mine Countermeasure Station was established in Panama City.

(8) The Navy Mine Countermeasure Station developed into the Naval Support Activity Panama City (NSAPC), which has faithfully carried out its mission since its inception and continues to support the crucial efforts and important research of tenant command organizations such as the Naval Surface Warfare Center: Panama City Division (NSWC PCD) and the Navy Experimental Diving Unit (NEDU).

(9) Research performed at NSWC PCD has been integral to equipping the Navy with the personnel and technology necessary to maintaining its status as the world’s greatest and most technologically advanced.

(10) NSWC PCD’s newest facility, the Littoral Warfare Research Facility, is one of the Navy’s major research, development, test, and evaluation laboratories and where standards for weapons inte-
gration on Littoral Combat Ships are often developed.

(11) NEDU is a global hub of research, development, and testing for undersea operations.

(12) During the Second World War, the Wainwright Shipyard in Panama City built over 100 vessels for the war effort and employed over 15,000 people.

(13) Panama City’s shipbuilding legacy continues as home to one of today’s most prolific domestic shipbuilders, Eastern Shipbuilding.

(14) The Department of Defense is the largest employer in Panama City, where many of the residents and their relatives have proudly served in the Armed Forces for generations.

(b) SENSE OF CONGRESS.—Congress—

SEC. 1099A. FINDINGS.

Congress makes the following findings:

(1) United States Naval Station, Guantanamo Bay, Cuba, has been a strategic military asset critical to the defense of the United States and the maintenance of regional security for more than a century.

(2) The United States continues to exercise control over the area of United States Naval Station, Guantanamo Bay, Cuba, pursuant to the Guantanamo Lease Agreements, which were initiated and concluded pursuant to an Act of Congress.

(3) Senior United States military leaders have consistently voiced strong support for maintaining United States Naval Station, Guantanamo Bay, Cuba, noting its strategic value for military basing and logistics, disaster relief, humanitarian work, terrorist detention, and counter-narcotics purposes.

(4) On February 29, 2016, Secretary of Defense Ashton B. Carter, discussing United States Naval Station, Guantanamo Bay, Cuba, stated that “it’s a strategic location, we’ve had it for a long time, it’s important to us and we intend to hold onto it”.

(5) On March 12, 2015, Commander of United States Southern Command, General John Kelly, tes-
ified that the United States facilities at Naval Sta-
tion Guantanamo Bay “are indispensable to the De-
partments of Defense, Homeland Security, and
State’s operational and contingency plans. . . . As
the only permanent U.S. military base in Latin
America and the Caribbean, its location provides
persistent U.S. presence and immediate access to the
region, as well as supporting a layered defense to se-
cure the air and maritime approaches to the United
States”.

(6) In testimony before Congress in 2012, then-
Commander of United States Southern Command,
General Douglas Fraser, stated that “the strategic
capability provided by U.S. Naval Station Guanta-
namo Bay remains essential for executing national
priorities throughout the Caribbean, Latin America,
and South America”.

(7) Following a 1991 coup in Haiti that
prompted a mass exodus of people by boat, United
States Naval Station, Guantanamo Bay, Cuba, pro-
vided a location for temporary housing and the or-
derly adjudication of asylum claims outside of the
continental United States.

(8) In 2010, United States Naval Station,
Guantanamo Bay, Cuba, was a critical hub for the
provision of humanitarian disaster relief following the devastating earthquakes in Haiti.

(9) The United States presence at United States Naval Station, Guantanamo Bay, Cuba, has its origins in Acts of Congress undertaken pursuant to the powers of Congress expressly enumerated in the Constitution of the United States.

(10) By joint resolution approved on April 20, 1898, Congress “directed and empowered” the President “to use the entire land and naval forces of the United States” as necessary to ensure that the Government of Spain “relinquish its authority and government in the island of Cuba, and withdraw its land and naval forces from Cuba and Cuban waters”.

(11) Congress declared war against Spain on April 25, 1898, which lasted until December 10, 1898, when the United States and Spain signed the Treaty of Paris, in which Spain relinquished all claims of sovereignty over Cuba, and United States governance of Cuba was established.

(12) Nearly three years later, in the Act of March 2, 1901 (Chapter 803; 31 Stat. 898), Congress granted the President the authority to return “the government and control of the island of Cuba
to its people” subject to several express conditions
including, in article VII of the Act of March 2, 1901, the sale or lease by Cuba to the United States
of lands necessary for naval stations.

(13) Pursuant to the authority granted by article VII of the Act of March 2, 1901, the United States negotiated the Guantanamo Lease Agreements, which specified the area of, and United States jurisdiction and control over, what became United States Naval Station, Guantanamo Bay, Cuba.

(14) On October 2, 1903, when approving the Lease to the United States by the Government of Cuba of Certain Areas of Land and Water for Naval or Coaling Stations, signed in Havana on July 2, 1903, President Theodore Roosevelt cited the Act of March 2, 1901, as providing his authority to do so: “I, Theodore Roosevelt, President of the United States of America, having seen and considered the foregoing lease, do hereby approve the same, by virtue of the authority conferred by the seventh of the provisions defining the relations which are to exist between the United States and Cuba, contained in the Act of Congress approved March 2, 1901, entitled ‘An Act making appropriation for the support
of the Army for the fiscal year ending June 30, 1902.’”

(15) Obtaining United States naval station rights in Cuba was an express condition of the authority that Congress gave the President to return control and governance of Cuba to the people of Cuba. In exercising that authority and concluding the Guantanamo Lease Agreements, President Theodore Roosevelt recognized the source of that authority as the Act of March 2, 1901.

(16) The Treaty of Relations between the United States of America and the Republic of Cuba, signed at Washington, May 29, 1934, did not supersede, abrogate, or modify the Guantanamo Lease Agreements, but noted that the stipulations of those agreements “shall continue in effect” until the United States and Cuba agree to modify them.

(17) The Constitution of the United States expressly grants to Congress the power to provide for the common defense of the United States, the power to provide and maintain a Navy, and the power “to dispose of and make all needful Rules and Regulations respecting the Territory or other Property belonging to the United States”.

tained in the Guantanamo Lease Agreements, or to impair
or abandon the jurisdiction and control of the United

“(c) Termination.—An assignment under this section may, at any time and for any reason, be terminated by the Department of Defense or the private-sector organization concerned.

SEC. 1215. SENSE OF CONGRESS ON UNITED STATES POLICY AND STRATEGY IN AFGHANISTAN.

(a) FINDINGS.—Congress finds the following:

(1) The United States continues to have vital national security interests in ensuring that Afghanistan is a stable, sovereign country.

(2) President Obama signed a Strategic Partnership Agreement and a Bilateral Security Agreement with the President of the Islamic Republic of Afghanistan, which commits the United States to the long-term security of, and defense cooperation with, the Government of Afghanistan and designates Afghanistan as a “major non-NATO ally”.

(3) The unity government in Afghanistan, led by President Ghani and Chief Executive Abdullah, should be applauded for their continued leadership and commitment to Afghanistan’s stability and security.

(4) Stability and security in Afghanistan reinforces stability and security in the region.

(6) The President’s current policy is to draw down from 9,800 to 5,500 United States troops by
January 1, 2017. As the recent commander in Afghanistan, General John Campbell, testified to the Senate Armed Services Committee, “the 5,500 [U.S. troops] plan was developed primarily around counterterrorism. There’s very limited train-advise-and-assist...in those numbers. To continue to build on the Afghan Security Forces, the gaps and seams in aviation, logistics, intelligence...we’d have to make some adjustments to that number.”

(7) The President’s policy of limiting the number of United States troops that the commander can employ in Afghanistan is hindering the effectiveness of the United States mission therein.

(8) Further, at the current policy of 9,800 United States troops, the new commander of Operation Resolute Support in Afghanistan, General John “Mick” Nicholson, agreed in testimony with the Senate Armed Services Committee that the security situation in Afghanistan has been deteriorating rather than improving.

(9) General John Campbell also stated “...Afghan shortfalls will persist beyond 2016. Capability gaps still exist in fixed and rotary-wing aviation, combined arms operations, intelligence collection and dissemination, and maintenance.”
(10) General John Campbell further stated “I have the authority to protect coalition members against any insurgents. . .to attack the Taliban just because they’re Taliban, I do not have that authority.”.

(11) The Taliban have made territorial gains and are holding terrain in key geographic areas in Afghanistan, including in Helmand Province.

(12) The Taliban held the city of Kunduz, Afghanistan, which is the first time the Taliban have held a major city in Afghanistan in 14 years.

(13) The Haqqani Network, a designated foreign terrorist organization aligned with the Taliban, is the most lethal group on the battlefield in Afghanistan, and continues to provide safe haven to al-Qaeda.

(14) The Islamic State of Iraq and the Levant (ISIL) has established an affiliate in Afghanistan.

(15) Since the death of the Taliban’s leader, Mullah Mohammad Omar, and the ascendance of Mullah Akhtar Mansoor and Saraj Haqqani, head of the Haqqani Network, to Taliban leadership, the Taliban have not engaged in political reconciliation negotiations with the Government of Afghanistan.
(16) The President has the statutory, legal authority to strike the Taliban and the Haqqani Network.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the President should authorize at least 9,800 United States troops to continue the train, advise, and assist and counterterrorism missions in Afghanistan after 2016;

(2) the President should provide the United States commander in Afghanistan with the authority to unilaterally strike the Taliban and the Haqqani Network;

(3) the President should provide additional resources to strike the Islamic State of Iraq and the Levant (ISIL) in Afghanistan;

(4) the President should provide the United States commander in Afghanistan the authority to conduct the train, advise, and assist mission below the corps level of the Afghan National Defense and Security Forces (ANDSF);

(5) the United States should provide United States Armed Forces lift and close air support to ANDSF units until the ANDSF has a fully capable,
organic lift and close air support capability and ca-

(6) the United States should provide monetary
and advisory support for 352,000 ANDSF personnel
and 30,000 Afghan Local Police, including intel-
ligence, surveillance, and reconnaissance support,
through 2018;

(7) it should continue to be a top priority to
provide United States Armed Forces deployed to Af-
ghanistan with necessary medical, force protection,
and combat search and rescue support; and

(8) United States military personnel who are
tasked with the mission of providing combat search
and rescue support, casualty evacuation, and medical
support should not be counted as part of any force
management level limitation on the number of
United States ground forces in Afghanistan.

SEC. 1218. SENSE OF CONGRESS RELATING TO DR. SHAKIL AFRIDI.

(a) FINDINGS.—Congress finds the following:

(1) The attacks of September 11, 2001, killed approximately 3,000 people, most of whom were Americans, but also included hundreds of individuals with foreign citi-enzships, nearly 350 New York Fire Department personnel, and about 50 law enforce-ment officers.

(2) Downed United Airlines flight 93 was re-portedly intended, under the control of the al-Qaeda high-jackers, to crash into the White House or the Capitol in an attempt to kill the President of the United States or Members of the United States Con-gress.

(3) The September 11, 2001, attacks were largely planned and carried out by the al-Qaeda ter-rorist network led by Osama bin Laden and his dep-uty Ayman al Zawahiri, after which Osama bin Laden enjoyed safe haven in Pakistan from where he continued to plot deadly attacks against the United States and the world.

(4) The United States has obligated nearly $30 billion between 2002 and 2014 in United States tax-payer money for security and economic aid to Paki-stan.
(5) The United States very generously and swiftly responded to the 2005 Kashmir Earthquake in Pakistan with more than $200 million in emergency aid and the support of several United States military aircraft, approximately 1,000 United States military personnel, including medical specialists, thousands of tents, blankets, water containers and a variety of other emergency equipment.

(6) The United States again generously and swiftly contributed approximately $150 million in emergency aid to Pakistan following the 2010 Pakistan flood, in addition to the service of nearly twenty United States military helicopters, their flight crews, and other resources to assist the Pakistan Army’s relief efforts.

(7) The United States continues to work tirelessly to support Pakistan’s economic development, including millions of dollars allocated towards the development of Pakistan’s energy infrastructure, health services and education system.

(8) The United States and Pakistan continue to have many critical shared interests, both economic and security related, which could be the foundation for a positive and mutually beneficial partnership.
(9) Dr. Shakil Afridi, a Pakistani physician, is a hero to whom the people of the United States, Pakistan and the world owe a debt of gratitude for his help in finally locating Osama bin Laden before more innocent American, Pakistani and other lives were lost to this terrorist leader.

(10) Pakistan, the United States and the international community had failed for nearly 10 years following attacks of September 11, 2001, to locate and bring Osama bin Laden, who continued to kill innocent civilians in the Middle East, Asia, Europe, Africa and the United States, to justice without the help of Dr. Afridi.

(11) The Government of Pakistan’s imprisonment of Dr. Afridi presents a serious and growing impediment to the United States’ bilateral relations with Pakistan.

(12) The Government of Pakistan has leveled and allowed baseless charges against Dr. Afridi in a politically motivated, spurious legal process.

(13) Dr. Afridi is currently imprisoned by the Government of Pakistan, a deplorable and unconscionable situation which calls into question Pakistan’s actual commitment to countering terrorism
and undermines the notion that Pakistan is a true ally in the struggle against terrorism.

(b) SENSE OF CONGRESS.—It is the sense of Congress that Dr. Shakil Afridi is an international hero and that the Government of Pakistan should release him immediately from prison.

SEC. 1226. SENSE OF CONGRESS CONDEMNING CON-
TINUING ATTACKS ON MEDICAL FACILITIES
IN SYRIA.

(a) FINDINGS.—Congress finds the following:

(1) Attacks intentionally targeting civilians,
medical personnel, or medical facilities constitute
grave violations of international humanitarian law.

(2) In Syria, schools, markets, and hospitals
are routinely destroyed in attacks and medical pro-
viders routinely targeted for attacks.
(3) Physicians for Human Rights has documented at least 350 airstrikes against medical facilities and the deaths of over 700 medical personnel in Syria since 2011.

(4) So far in May 2016, there have been at least six attacks on medical facilities in the city of Aleppo alone in less than a week killing dozens, including the last pediatrician still working in Aleppo.

(5) These attacks seriously hinder access to medical care and are compounded by ongoing efforts by the Syrian regime to block or limit humanitarian aid to Syrians.

(6) Secretary of State John Kerry has condemned these attacks arguing, “there is no justification for this horrific violence that targets civilians or medical facilities or first responders no matter who it is, whether it’s a member of the opposition retaliating or the regime in its brutality against the civilians which has continued for five years.”

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the Department of Defense and all other appropriate United States Government agencies should continue to strongly condemn and call for an immediate end to attacks on medical facilities and
medical providers in Syria and work to ensure that
doctors can do their job and provide care to the
those in need;

(2) humanitarian crises in Syria and Iraq, exac-
erbated by targeted attacks on medical facilities,
personnel, and schools, threaten the achievement of
United States goals in the region, such as destroying
and dismantling the Islamic State in Iraq and the
Levant (ISIL) and peace and stability in the region,
including Syria;

(3) the United States and international commu-
nity should do more to support medical professionals
and medical nonprofit organizations working in
Syria, at great risk to their personal well-being, to
treat the ill and infirm and ensure some level of
medical care for Syrians; and

(4) the Department of Defense is strongly en-
couraged to support, where appropriate, other ap-
propriate United States Government agencies and
entities engaged in meeting urgent and increasing
humanitarian and medical needs in Syria, especially
in areas where medical facilities and providers have
been targeted by the Syrian regime, ISIL, or Al-
Qaeda.
SEC. 1227. UNITED NATIONS PROCESSING CENTER IN ERBIL, IRAQI KURDISTAN, TO ASSIST INTERNATIONALLY-DISPLACED COMMUNITIES.

The President shall instruct the United States Permanent Representative to the United Nations to use the voice and vote of the United States at the United Nations to seek the establishment of a United Nations processing center in Erbil, Iraqi Kurdistan, to assist internationally-displaced communities.

SEC. 1228. SENSE OF CONGRESS ON BUSINESS PRACTICES OF THE ISLAMIC STATE OF IRAQ AND SYRIA (ISIS).

(a) FINDINGS.—Congress finds the following:

(1) For nearly two years, the Islamic State of Iraq and Syria (ISIS) has capitalized on established oil production facilities throughout Iraq and Syria in order to fund its jihadist operations globally.

(2) Oil production and sale represent the largest and most vulnerable income factors for ISIS.

(3) In 2015, ISIS oil sales brought in over $400,000,000 to prop up the terror group’s operations world-wide.

(4) ISIS has executed a robust recruitment scheme to staff and operate the oil facilities within the group’s control and maintained smuggling routes for the sale of that oil.
(5) Further disrupting ISIS oil production and sale structures would be minimally invasive but would effectively curtail the terror group’s ability to self-finance.

(b) Sense of Congress.—It is the sense of Congress that the United States should focus all necessary efforts in the Middle East to disrupt the financing of the Islamic State of Iraq and Syria (ISIS) through oil production and sale.

SEC. 1229. PROHIBITION ON TRANSFER OF MAN-PORTABLE AIR DEFENSE SYSTEMS TO ANY ENTITY IN SYRIA.

None of the funds authorized to be appropriated by this Act or otherwise made available for the Department of Defense for fiscal year 2017 may be obligated or expended to transfer or facilitate the transfer of man-portable air defense systems (MANPADS) to any entity in Syria.

with United States national security, with covered state parties, excluding the Russian Federation.

(e) NOTICE.—

(1) IN GENERAL.—Not later than 14 days after the completion of an observation flight over the United States, the Secretary of Defense, jointly with the Secretary of Energy, the Secretary of Homeland Security, the Director of the Federal Bureau of Investigation, and the Director of National Intelligence, shall notify the appropriate congressional committees of such flight.

(A) The Director of National Intelligence and the Director of the National Geospatial-Intelligence Agency jointly submit to the appropriate congressional committees a report on the following:

(i) Whether it is possible, consistent with United States national security interests, to provide enhanced access to United States commercial imagery or other United States capabilities, consistent with the protection of sources and methods and United States national security, to covered state parties that is qualitatively similar to that derived by flights over the territory of the United States or over the territory of a covered state party under the Open Skies Treaty, on a more timely basis.

(ii) What the cost would be to provide enhanced access to such commercial imagery or other capabilities as compared to the current imagery sharing through the Open Skies Treaty.
(iii) Whether any new agreements would be needed to provide enhanced access to such commercial imagery or other capabilities and what would be required to obtain such agreements.

(iv) Whether transitioning to such commercial imagery or other capabilities from the current imagery sharing through the Open Skies Treaty would reduce opportunities by the Russian Federation to exceed imagery limits and reduce utility for Russian intelligence collection against the United States or covered state parties.

SEC. 1234. STATEMENT OF POLICY ON UNITED STATES FORCES IN EUROPE TO REASSURE UNITED STATES PARTNERS AND ALLIES AND DETER AGGRESSION BY THE GOVERNMENT OF THE RUSSIAN FEDERATION.

(a) FINDINGS.—Congress makes the following findings:

(1) The Russian Federation, under the leadership of President Vladimir Putin, continues to demonstrate its intent to expand its sphere of influence and limit Western influence both regionally and globally.

(2) In March 2016, at a House Armed Services Committee hearing discussing worldwide threats, Major General James Marrs, Director for Intelligence in the Joint Staff stated, “principally, what we are seeing in Russia...is just a breadth of capabilities from strategic systems to anti access area denial to even, I would say, a growing adeptness at operating sort of just short of traditional military conflict that is posing a significant challenge in the future”.

(3) In July 2015, Chairman of the Joint Chiefs of Staff, General Joseph Dunford, testified to the Senate Armed Services Committee, that “Russia presents the greatest threat to our national secu-
rity”. In November 2015, Secretary of Defense, Ashton Carter, discussed the need for “adapting our operational posture and contingency plans. . .to deter Russia’s aggression”.

(4) In February 2016, the Rand Corporation released its report, “Reinforcing Deterrence on NATO’s Eastern Flank”, concluding that at a maximum it would take Russian forces approximately 60 hours to reach the capitals of Estonia and Latvia, exhibiting the challenge to North Atlantic Treaty Organization (NATO) member countries of successfully defending such territory with its current posture and capability.

(5) In February 2016, the Center for Strategic and International Studies released its report, “Evaluating U.S. Army Force Posture in Europe”, calling for increased pre-positioned sets of United States military equipment, increased rotational forces and associated enablers, increased logistics capabilities, and increased investment in combating unconventional warfare methods in Europe.

(6) In February 2016, the National Commission on the Future of the Army released its findings and recommendations, which included Recommendation 14 calling for stationing an Armored Brigade
Combat Team Forward in Europe and Recommendation 15 calling for the conversion of Army Europe Aviation Headquarters to a warfighting mission command.

(7) In the National Defense Authorization Act for Fiscal Year 2015 (Public Law 114–92) and the National Defense Authorization Act for Fiscal Year 2016 (Public Law 113–291), Congress authorized approximately $1,800,000,000 for the European Reassurance Initiative to reassure allies through expanded United States military presence in Europe through rotational deployments of United States troops, bilateral and multilateral exercises, improved infrastructure, increased pre-positioned United States military equipment, and building partnership capacity.

(8) The budget of the President for fiscal year 2017 submitted to Congress under section 1105(a) of title 31, United States Code, includes $3,420,000,000 for the European Reassurance Initiative to begin the transition from primarily reassuring United States partners and allies to deterring the Russian Federation.

(9) The request encompasses a large increase of conventional resources, including additional rota-
tional deployments of United States troops and pre-
positioning an Armored Brigade Combat Team’s
worth of equipment into Europe.

(10) The request also includes increased fund-
ing for unconventional warfare resources, including
cyber and special operations forces, as well as for in-
telligence and indicators and warning.

(b) STATEMENT OF POLICY.—

States to reassure United States partners and allies
in Europe and to work with United States partners
and allies to deter aggression by the Government of
the Russian Federation in order to enhance regional

(2) CONDUCT OF POLICY.—The policy described
in paragraph (1) shall, among other things, be car-
rried out through a comprehensive defense strategy
and guidance to outline the future path of defense

(A) use and expansion of conventional
methods, including increased United States
presence, pre-positioning of United States mili-
tary equipment, increased infrastructure, and
building partnership capacity in Europe;
(B) emphasis on developing capabilities for countering unconventional methods of warfare, including cyber warfare, economic warfare, information operations, and intelligence operations; and

(a) FINDINGS.—Congress finds the following:

(1) President Obama, during his announcement of the European Phased Adaptive Approach on September 17, 2009, stated, “This approach is based on an assessment of the Iranian missile threat,” and “the best way to responsibly advance our security and the security of our allies is to deploy a missile defense system that best responds to the threats we face and that utilizes technology that is both proven and cost-effective.”.

(2) The 2010 Ballistic Missile Defense review stated that “The [European] Phased Adaptive Approach utilizes existing and proven capabilities to meet current threats and then will improve upon these capabilities over time by integrating new technology.”.

(3) Secretary of Defense Leon Panetta, during a speech in Brussels on October 5, 2011, stated, “The United States is fully committed to building a missile defense capability for the full coverage and protection of all our NATO European populations,
their territory and their forces against the growing threat posed by ballistic missiles.”.

(4) Secretary of Defense Chuck Hagel, during a press conference on March 15, 2013, stated, “The missile deployments the United States is making in phases one through three of the European Phased Adaptive Approach, including sites in Romania and Poland, will still be able to provide coverage of all European NATO territory as planned by 2018.”.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the United States is committed to the defense of deployed members of the Armed Forces of the United States and to the defense of the European allies of the United States by increasing the ballistic missile defense capability of the North Atlantic Treaty Organization (in this section referred to as “NATO”);

(2) phase 2 of the European Phased Adaptive Approach will provide NATO with a substantial increase in ballistic missile defense capability since NATO declared Interim Ballistic Missile Defense Capability at the Chicago Summit in 2012, and such phase consists of—

(A) Aegis Ashore in Romania;
(B) four Aegis ballistic missile defense ca-

cable ships homeported at Rota, Spain; and 

(C) a more capable SM–3 interceptor; 

(3) NATO is moving forward with the mod-

ermination of the defense capabilities of NATO that 
is responsive to 21st century threats to the territory 
and populations of member states of NATO; 

(4) the member states of NATO recognize the 

importance of this contribution, which sends a clear 
signal that NATO will not allow potential adver-
saries to threaten the use of ballistic missile strikes 
to coerce NATO or deter NATO from responding to 
aggression against the interests of NATO; and 

(5) phase 2 of the European Phased Adaptive 

Approach is ready for 24-hour-a-day, seven-day-a-

week operation, with proven military systems and 

command and control capability, and should be so 
declared at the July 2016 NATO Summit in War-
saw, Poland.

“(b) Definitions.—In this chapter:

“(1) The term ‘modular open system approach’ means, with respect to a major defense acquisition program, an integrated business and technical strategy that—

“(B) is subjected to verification to ensure major system interfaces comply with, if available and suitable, widely supported and consensus-based standards;

“(C) uses a system architecture that allows severable major system components at the appropriate level to be incrementally added, removed, or replaced throughout the life cycle of a major system platform to afford opportunities
for enhanced competition and innovation while yielding—

“(i) significant cost savings or avoidance;

“(ii) schedule reduction;

“(iii) opportunities for technical upgrades;

“(iv) increased interoperability; or

“(v) other benefits during the sustainment phase of a major weapon system; and

“(D) complies with the technical data rights set forth in section 2320 of this title.

“(A) means a high level subsystem or assembly, including hardware, software, or an integrated assembly of both, that can be mounted or installed on a major system platform through well-defined major system interfaces; and
“(B) includes a subsystem or assembly that is likely to have additional capability requirements, is likely to change because of evolving technology or threat, is needed for interoperability, facilitates incremental deployment of capabilities, or is expected to be replaced by another major system component.

“(4) The term ‘major system interface’ means a shared boundary between a major system platform and a major system component or between major system components, defined by various physical, logical, and functional characteristics, such as electrical, mechanical, fluidic, optical, radio frequency, data, networking, or software elements.

“(2) for requirements that are expected to evolve, the minimum acceptable capability that is necessary for initial operating capability of the major defense acquisition program.

“(b) Analysis of Alternatives.—The Director of Cost Assessment and Performance Evaluation, in formulating study guidance for analyses of alternatives for major defense acquisition programs and performing such analyses under section 139a(d)(4) of this title, shall en-
sure that any such analysis for a major defense acquisition
program includes consideration of evolutionary acquisi-

under section 2431a of this title shall—

“(1) clearly describe the modular open system
approach to be used for the program;

“(2) differentiate between the major system
platform and major system components being devel-
oped under the program, as well as major system
components developed outside the program that will
be integrated into the major defense acquisition pro-
gram;

“(3) clearly describe the evolution of major sys-
tem components that are anticipated to be added,
removed, or replaced in subsequent increments;

“(4) identify additional major system compo-
nents that may be added later in the life cycle of the
major system platform; and

“(5) clearly describe how intellectual property
and related issues, such as technical data
deliverables, that are necessary to support a modular
open system approach, will be addressed.
“(d) Request for Proposals.—The milestone decision authority for a major defense acquisition program that uses a modular open system approach shall ensure that a request for proposals for the development or production phases of the program shall describe the modular open system approach and the minimum set of major system components that must be included in the design of the major defense acquisition program.

“(e) Milestone B.—A major defense acquisition program may not receive Milestone B approval under section 2366b of this title until the milestone decision authority determines in writing that—

“(1) in the case of a program that uses a modular open system approach—

“(A) the program incorporates clearly defined major system interfaces between the major system platform and major system components and between major system components;

“(B) such major system interfaces are consistent with the widely supported and consensus-based standards that exist at the time of the milestone decision, unless such standards are unavailable or unsuitable for particular major system interfaces; and
“(C) the Government has arranged to obtain appropriate and necessary intellectual property rights with respect to such major system interfaces upon completion of the development of the major system platform; or

“(2) in the case of a program that does not use a modular open system approach, that the use of a modular open system approach is not practicable.

§ 2446c. Requirements relating to availability of major system interfaces and support for modular open system approach

“The Secretary of each military department shall—

“(1) coordinate with the other military departments, the defense agencies, defense and other private sector entities, national standards-setting organizations, and, when appropriate, with elements of the intelligence community with respect to the specification, identification, development, and maintenance of major system interfaces and standards for use in major system platforms, where practicable;

“(2) ensure that major system interfaces incorporate commercial standards and other widely supported consensus-based standards that are validated, published, and maintained by recognized standards organizations to the maximum extent practicable;
“(3) ensure that sufficient systems engineering and development expertise and resources are available to support the use of a modular open system approach in requirements development and acquisition program planning;

“(4) ensure that necessary planning, programming, and budgeting resources are provided to specify, identify, develop, and sustain the modular open system approach, associated major system interfaces, and any additional program activities necessary to sustain innovation and interoperability; and

2447f. Definition of weapon system component.

§ 2447a. Technology development in the acquisition of major weapon systems

“Technology shall be developed in a major defense acquisition program that is initiated after January 1, 2019, only if the milestone decision authority for the program determines with a high degree of confidence that such development will not delay the fielding target of the program. If the milestone decision authority does not make such determination for a major system component being developed under the program, the milestone decision authority shall ensure that technology related to the major system component shall be sufficiently matured separate from the major defense acquisition program using the prototyping authorities of this section or other authorities, as appropriate.
§ 2447b. Weapon system component or technology prototype projects: display of budget information

“(a) Requirements for budget display.—In the defense budget materials for any fiscal year after fiscal year 2017, the Secretary of Defense shall, with respect to advanced component development and prototype activities (within the research, development, test, and evaluation budget), set forth the amounts requested for each of the following:

“(1) Acquisition programs of record.

“(2) Development, prototyping, and experimentation of weapon system components or other technologies separate from acquisition programs of record.

“(3) Other budget line items as determined by the Secretary of Defense.

“(b) Additional requirements.—For purposes of subsection (a)(2), the amounts requested for development, prototyping, and experimentation of weapon system components or other technologies shall be—

scheduling and fielding goals for such component ca-

“(c) FUNCTIONS.—The functions of each oversight
board are as follows:

“(1) To issue a strategic plan every three years
that prioritizes the capability and weapon system
component portfolio areas for conducting prototype
projects, based on assessments of high priority
warfighter needs, capability gaps on existing major
weapon systems, opportunities to incrementally inte-
grate new components into major weapon systems,
and technologies that are expected to be sufficiently
mature to prototype within three years.

“(2) To annually recommend funding levels for
weapon system component or technology develop-
ment and prototype projects across capability or
weapon system component portfolios.

“(3) To annually recommend to the service ac-
quision executive of the military department con-

nology development and prototype projects, subject
to the requirements and limitations in section 2447d
of this title.

“(4) To ensure projects are managed by experts
within the Department of Defense who are knowl-
edgeable in research, development, test, and evaluation and who are aware of opportunities for incremental deployment of component capabilities and other technologies to major weapon systems or directly to support warfighting capabilities.

“(5) To ensure projects are conducted in a manner that allows for appropriate experimentation and technology risk.

“(6) To ensure necessary technical, contracting, and financial management resources are available to support each project.

“(7) To submit to the congressional defense committees a semiannual notification that includes the following:

“(A) A description of each weapon system component or technology prototype project initiated during the preceding six months, including an explanation of each project and its required funding.

“(B) A description of the results achieved from weapon system component prototype and technology projects completed and tested during the preceding six months.
§ 2447d. Requirements and limitations for weapon system component or technology prototype projects

(a) LIMITATION ON Prototype Project DURATION.—A prototype project shall be completed within three years of its initiation.

(b) MERIT-BASED SELECTION Process.—A prototype project shall be selected by the service acquisition executive of the military department concerned through a merit-based selection process that identifies the most promising and cost-effective prototypes that address a high priority warfighter need and are expected to be successfully demonstrated in a relevant environment.

(c) TYPE OF TRANSACTION.—Prototype projects shall be funded through contracts, cooperative agreements, or other transactions.

(d) FUNDING LIMIT.—(1) Each prototype project may not exceed a total amount of $10,000,000 (based on fiscal year 2017 constant dollars), unless—

(A) the Secretary of the military department, or the Secretary’s designee, approves a larger amount of funding for the project, not to exceed $50,000,000; and

(B) the Secretary, or the Secretary’s designee, submits to the congressional defense committees,
within 30 days after approval of such funding for
the project, a notification that includes—

“(ii) expected funding for the project; and
“(iii) a statement of the anticipated out-

come of the project.
“(2) The Secretary of Defense may adjust the

cessful weapon system component or
technology prototypes
“(a) Selection of Rapid Fielding Project for
Production.—A weapon system component or tech-
nology rapid fielding project may be selected by the service
acquisition executive of the military department concerned
for a follow-on production contract or other transaction
without the use of competitive procedures, notwith-
standing the requirements of section 2304 of this title,
if—
“(1) a rapid fielding project addresses a high
priority warfighter need;
“(2) competitive procedures were used for the
selection of parties for participation in the rapid
fielding project;

“(3) the participants in the project successfully
completed the project provided for in the trans-
action; and

“(4) a prototype of the system to be procured
in the rapid fielding project was demonstrated in a
relevant environment.

“(b) SPECIAL TRANSFER AUTHORITY.—(1) The Sec-
retary of a military department may, as specified in ad-
advance by appropriations Acts, transfer funds that remain
available for obligation in procurement appropriation ac-
counts of the military department to fund the low-rate ini-
tial production of the rapid fielding project until required
funding for full-rate production can be submitted and ap-
proved through the regular budget process of the Depart-
ment of Defense.

“(2) The funds transferred under this subsection to
fund the low-rate initial production of a rapid fielding
project shall be for a period not to exceed two years, the
amount for such period may not exceed $50,000,000, and

“§ 2448b. Independent technical risk assessments

“(a) IN GENERAL.—With respect to a major defense acquisition program, the Under Secretary of Defense for Acquisition, Technology, and Logistics shall—

“(1) before any decision to grant Milestone A approval for the program pursuant to section 2366a of this title, identify critical technologies that need to be matured in the program; and

“(2) before any decision to grant Milestone B approval for the program pursuant to section 2366b
of this title, any decision to enter into low-rate ini-
tial production or full-rate production, or at any
other time considered appropriate by the Under Sec-
retary, conduct or approve an independent technical

retary of the military department concerned shall ensure
that the program capability document supporting a Mile-
stone B or subsequent milestone for a major defense ac-

quirements Oversight Council for approval until the Chief
of the armed force concerned determines in writing that
the requirements in the document are necessary and real-
istic in relation to the program cost and fielding targets
established under section 2448a(a) of this title.
“(b) Compliance With Targets Before Milestone B Approval.—A major defense acquisition program may not receive Milestone B approval until the milestone decision authority for the program determines in writing that the estimated program acquisition unit cost and the estimated date for initial operational capability for the baseline description for the program (established under section 2435) do not exceed the program cost and fielding targets established under section 2448a(a) of this title. If such estimated cost is higher than the program cost target or if such estimated date is later than the fielding target, the milestone decision authority may request that the Secretary of Defense increase the program cost target or delay the fielding target, as applicable.”.

(b) Effective Date.—Subchapter III of chapter 144B of title 10, United States Code, as added by subsection (a), shall apply with respect to major defense acquisition programs that reach Milestone A after October 1, 2016.

TITLE XVIII—MATTERS RELATING TO SMALL BUSINESS PROCUREMENT

Subtitle A—Improving Transparency and Clarity for Small Businesses

SEC. 1801. PLAIN LANGUAGE REWRITE OF REQUIREMENTS FOR SMALL BUSINESS PROCUREMENTS.

Section 15(a) of the Small Business Act (15 U.S.C. 644(a)) is amended to read as follows:

“(a) SMALL BUSINESS PROCUREMENTS.—

“(1) IN GENERAL.—For purposes of this Act, small business concerns shall receive any award or contract if such award or contract is, in the determination of the Administrator and the contracting agency, in the interest of—

“(A) maintaining or mobilizing the full productive capacity of the United States;

“(B) war or national defense programs; or

“(C) assuring that a fair proportion of the total purchase and contracts for goods and services of the Government in each industry category (as described under paragraph (2)) are awarded to small business concerns.

“(2) INDUSTRY CATEGORY DEFINED.—
“(A) IN GENERAL.—In this subsection, the term ‘industry category’ means a discrete group of similar goods and services, as determined by the Administrator in accordance with the North American Industry Classification System codes used to establish small business size standards, except that the Administrator shall limit an industry category to a greater extent than provided under the North American Industry Classification codes if the Administrator receives evidence indicating that further segmentation of the industry category is warranted—

“(i) due to special capital equipment needs;

“(ii) due to special labor requirements;

“(iii) due to special geographic requirements, except as provided in subparagraph (B);

“(iv) due to unique Federal buying patterns or requirements; or

“(v) to recognize a new industry.

“(B) EXCEPTION FOR GEOGRAPHIC REQUIREMENTS.—The Administrator may not fur-
ther segment an industry category based on geographic requirements unless—

“(i) the Government typically designates the geographic area where work for contracts for goods or services is to be performed;

“(ii) Government purchases comprise the major portion of the entire domestic market for such goods or services; and

“(iii) it is unreasonable to expect competition from business concerns located outside of the general geographic area due to the fixed location of facilities, high mobilization costs, or similar economic factors.

“(3) Determinations with respect to awards or contracts.—Determinations made pursuant to paragraph (1) may be made for individual awards or contracts, any part of an award or contract or task order, or for classes of awards or contracts or task orders.

“(4) Increasing prime contracting opportunities for small business concerns.—

“(A) Description of covered proposed procurements.—The requirements of
this paragraph shall apply to a proposed procure-
ment that includes in its statement of work
goods or services currently being supplied or
performed by a small business concern and, as
determined by the Administrator—

“(i) is in a quantity or of an esti-
mated dollar value which makes the par-
ticipation of a small business concern as a
prime contractor unlikely;

“(ii) in the case of a proposed pro-
curement for construction, if such pro-
posed procurement seeks to bundle or con-
solidate discrete construction projects; or

“(iii) is a solicitation that involves an
unnecessary or unjustified bundling of con-
tact requirements.

“(B) NOTICE TO PROCUREMENT CENTER

representatives.—With respect to proposed
procurements described in subparagraph (A), at
least 30 days before issuing a solicitation and
concurrent with other processing steps required
before issuing the solicitation, the contracting
agency shall provide a copy of the proposed pro-
curement to the procurement center representa-
tive of the contracting agency (as described in
subsection (l)) along with a statement explain-
ing—

“(i) why the proposed procurement cannot be divided into reasonably small lots (not less than economic production runs) to permit offers on quantities less than the total requirement;

“(ii) why delivery schedules cannot be established on a realistic basis that will encourage the participation of small business concerns in a manner consistent with the actual requirements of the Government;

“(iii) why the proposed procurement cannot be offered to increase the likelihood of the participation of small business concerns;

“(iv) in the case of a proposed procurement for construction, why the proposed procurement cannot be offered as separate discrete projects; or

“(v) why the agency has determined that the bundling of contract requirements is necessary and justified.

“(C) Alternatives to increase prime contracting opportunities for small
BUSINESS CONCERNS.—If the procurement center representative believes that the proposed procurement will make the participation of small business concerns as prime contractors unlikely, the procurement center representative, within 15 days after receiving the statement described in subparagraph (B), shall recommend to the contracting agency alternative procurement methods for increasing prime contracting opportunities for small business concerns.

“(D) FAILURE TO AGREE ON AN ALTERNATIVE PROCUREMENT METHOD.—If the procurement center representative and the contracting agency fail to agree on an alternative procurement method, the Administrator shall submit the matter to the head of the appropriate department or agency for a determination.

“(5) CONTRACTS FOR SALE OF GOVERNMENT PROPERTY.—With respect to a contract for the sale of Government property, small business concerns shall receive any such contract if, in the determination of the Administrator and the disposal agency, the award of such contract is in the interest of assuring that a fair proportion of the total sales of
Government property be made to small business concerns.

“(6) Sale of electrical power or other property.—Nothing in this subsection shall be construed to change any preferences or priorities established by law with respect to the sale of electrical power or other property by the Federal Government.

“(7) Costs exceeding fair market price.—A contract may not be awarded under this subsection if the cost of the contract to the awarding agency exceeds a fair market price.”.

(B) by adding at the end the following new subclauses:

“(V) that were purchased by another entity after the initial contract was awarded and as a result of the purchase, would no longer be deemed
to be small business concerns for purposes of the initial contract; and

“(VI) that were awarded using a procurement method that restricted competition to small business concerns owned and controlled by service-disabled veterans, qualified HUBZone small business concerns, small business concerns owned and controlled by socially and economically disadvantaged individuals, small business concerns owned and controlled by women, or a subset of any such concerns;”;

(2) in clause (ii)—

(A) in subclause (IV), by striking “and” at the end; and

(B) by adding at the end the following new subclauses:

(2) Contents.—The report required under paragraph (1) shall include the following information:

(A) A description of the real property controlled by the Navy on Guam which the Navy has transferred to the control of Guam after January 20, 2011, or which the Navy plans to transfer to the control of Guam, as well as a description of the specific legal authority under
which the Navy has transferred or will transfer each such property.

(B) The methodology and process the Navy will use to determine the total number of acres of real property that the Navy will transfer or has transferred to the control of Guam as part of the “net negative” policy, and the date on which the Navy will transfer or has transferred control of any such property.

(C) A description of the real property controlled by the Navy on Guam which the Navy plans to retain under its control and the reasons for retaining such property, including a detailed explanation of the reasons for retaining any such property which has not been developed or for which no development has been proposed under the current installation master plans for major military installations (as described in section 2864 of title 10, United States Code).

(3) Exclusion of certain property.—In preparing and submitting the report under this subsection, the Secretary may not take into account any real property which has been identified prior to January 20, 2011, as property to be transferred to the Government of Guam under the Guam Excess
Lands Act (Public Law 103–339) or the Guam

(iii) improvements in the capabilities to detect, quantify, and assess the viability of aquatic nuisance species at the concentrations under consideration;

(iv) the impact of ballast water treatment technology on water quality; and
(v) the costs, cost-effectiveness, and impacts of—

(I) a revised ballast water performance standard, including the potential impacts on shipping, trade, and other uses of the aquatic environment; and

(II) maintaining the existing ballast water performance standard, including the potential impacts on water-related infrastructure, recreation, propagation of native fish, shellfish, and wildlife, and other uses of navigable waters.

(C) LOWER REVISED PERFORMANCE STANDARD.—

(i) IN GENERAL.—If the Secretary, in consultation with the Administrator, determines, on the basis of the feasibility review and after an opportunity for a public hearing, that no ballast water treatment technology can be certified under section 3605 to comply with the revised ballast water performance standard under paragraph (1), the Secretary shall require the use of
the treatment technology that achieves the performance levels of the best treatment technology available.

(ii) Implementation deadline.—If the Secretary, in consultation with the Administrator, determines that the treatment technology under clause (i) cannot be implemented before the implementation deadline under paragraph (3) with respect to a class of vessels, the Secretary shall extend the implementation deadline for that class of vessels for not more than 36 months.

(iii) Compliance.—If the implementation deadline under paragraph (3) is extended, the Secretary shall recommend action to ensure compliance with the extended implementation deadline under clause (ii).

(D) Higher revised performance standard.—

(i) In general.—If the Secretary, in consultation with the Administrator, determines that ballast water treatment technology exists that exceeds the revised ballast water performance standard under
paragraph (1) with respect to a class of vessels, the Secretary shall revise the ballast water performance standard for that class of vessels to incorporate the higher performance standard.

(ii) IMPLEMENTATION DEADLINE.—If the Secretary, in consultation with the Administrator, determines that the treatment technology under clause (i) can be implemented before the implementation deadline under paragraph (3) with respect to a class of vessels, the Secretary shall accelerate the implementation deadline for that class of vessels. If the implementation deadline under paragraph (3) is accelerated, the Secretary shall provide not less than 24 months notice before the accelerated deadline takes effect.

(3) IMPLEMENTATION DEADLINE.—The revised ballast water performance standard under paragraph (1) shall apply to a vessel beginning on the date of the first drydocking of the vessel on or after January 1, 2022, but not later than December 31, 2024.

(4) REVISED PERFORMANCE STANDARD COMPLIANCE DEADLINES.—
(A) In general.—The Secretary may es-
establish a compliance deadline for compliance by
a vessel (or a class, type, or size of vessel) with
a revised ballast water performance standard
under this subsection.

(B) Process for granting extensions.—In issuing regulations under this sub-
section, the Secretary shall establish a process
for an owner or operator to submit a petition
to the Secretary for an extension of a compli-
ance deadline with respect to the vessel of the
owner or operator.

(C) Period of extensions.—An exten-
sion issued under subparagraph (B) may—

(i) apply for a period of not to exceed

18 months from the date of the applicable
deadline under subparagraph (A); and

(ii) be renewable for an additional pe-

rior of not to exceed 18 months.

(D) Factors.—In issuing a compliance
deadline or reviewing a petition under this
paragraph, the Secretary shall consider, with
respect to the ability of an owner or operator to
meet a compliance deadline, the following fac-
tors:
(i) Whether the treatment technology
to be installed is available in sufficient
quantities to meet the compliance deadline.

(ii) Whether there is sufficient ship-
yard or other installation facility capacity.

(iii) Whether there is sufficient avail-
ability of engineering and design resources.

(iv) Vessel characteristics, such as en-
geine room size, layout, or a lack of in-
stalled piping.

(v) Electric power generating capacity
aboard the vessel.

(vi) Safety of the vessel and crew.

(E) CONSIDERATION OF PETITIONS.—

(i) DETERMINATIONS.—The Secretary
shall approve or deny a petition for an ex-
tension of a compliance deadline submitted
by an owner or operator under this para-
graph.

(ii) DEADLINE.—If the Secretary does
not approve or deny a petition referred to
in clause (i) on or before the last day of
the 90-day period beginning on the date of
submission of the petition, the petition
shall be deemed approved.
(c) Future Revisions of Vessel Incidental Discharge Standards; Decennial Reviews.—

(1) Revised Ballast Water Performance Standards.—The Secretary, in consultation with the Administrator, shall complete a review, 10 years after the issuance of a final rule under subsection (b) and every 10 years thereafter, to determine whether further revision of the ballast water performance standard would result in a scientifically demonstrable and substantial reduction in the risk of the introduction or establishment of aquatic nuisance species.

(2) Revised Standards for Discharges Other Than Ballast Water.—The Secretary, in consultation with the Administrator, may include in a decennial review under this subsection best management practices for discharges covered by subsection (a)(2). The Secretary shall initiate a rule-making to revise 1 or more best management practices for such discharges after a decennial review if the Secretary, in consultation with the Administrator, determines that revising 1 or more of such practices would substantially reduce the impacts on navigable waters of discharges incidental to the normal operation of a vessel other than ballast water.
(3) CONSIDERATIONS.—In conducting a review under paragraph (1), the Secretary, the Administrator, and the heads of other appropriate Federal agencies as determined by the Secretary, shall consider the criteria under subsection (b)(2)(B).

(4) REVISION AFTER DECENNIAL REVIEW.—The Secretary shall initiate a rulemaking to revise the current ballast water performance standard after a decennial review if the Secretary, in consultation with the Administrator, determines that revising the current ballast water performance standard would result in a scientifically demonstrable and substantial reduction in the risk of the introduction or establishment of aquatic nuisance species.

SEC. 3605. TREATMENT TECHNOLOGY CERTIFICATION.

(a) Certification Required.—Beginning 60 days after the date that the requirements for testing protocols are issued under subsection (i), no manufacturer of a ballast water treatment technology shall sell, offer for sale, or introduce or deliver for introduction into interstate commerce, or import into the United States for sale or resale, a ballast water treatment technology for a vessel unless the treatment technology has been certified under this section.

(b) Certification Process.—
(1) EVALUATION.—Upon application of a manufacturer, the Secretary shall evaluate a ballast water treatment technology with respect to—

(A) the effectiveness of the treatment technology in achieving the current ballast water performance standard when installed on a vessel (or a class, type, or size of vessel);

(B) the compatibility with vessel design and operations;

(C) the effect of the treatment technology on vessel safety;

(D) the impact on the environment;

(E) the cost effectiveness; and

(F) any other criteria the Secretary considers appropriate.

(2) APPROVAL.—If after an evaluation under paragraph (1) the Secretary determines that the treatment technology meets the criteria, the Secretary may certify the treatment technology for use on a vessel (or a class, type, or size of vessel).

(3) SUSPENSION AND REVOCATION.—The Secretary shall establish, by regulation, a process to suspend or revoke a certification issued under this section.

(e) CERTIFICATION CONDITIONS.—
(1) IMPOSITION OF CONDITIONS.—In certifying a ballast water treatment technology under this section, the Secretary, in consultation with the Administrator, may impose any condition on the subsequent installation, use, or maintenance of the treatment technology onboard a vessel as is necessary for—

(A) the safety of the vessel, the crew of the vessel, and any passengers aboard the vessel;

(B) the protection of the environment; or

(C) the effective operation of the treatment technology.

(2) FAILURE TO COMPLY.—The failure of an owner or operator to comply with a condition imposed under paragraph (1) shall be considered a violation of this section.

(d) PERIOD FOR USE OF INSTALLED TREATMENT EQUIPMENT.—Notwithstanding anything to the contrary in this title or any other provision of law, the Secretary shall allow a vessel on which a system is installed and operated to meet a ballast water performance standard under this title to continue to use that system, notwithstanding any revision of a ballast water performance standard occurring after the system is ordered or installed
1 until the expiration of the service life of the system, as
2 determined by the Secretary, so long as the system—
3 (1) is maintained in proper working condition;
4 and
5 (2) is maintained and used in accordance with
6 the manufacturer’s specifications and any treatment
7 technology certification conditions imposed by the
8 Secretary under this section.
9 (e) Certificates of Type Approval for the
10 Treatment Technology.—
11 (1) Issuance.—If the Secretary approves a
12 ballast water treatment technology for certification
13 under subsection (b), the Secretary shall issue a cer-
14 tificate of type approval for the treatment technology
15 to the manufacturer in such form and manner as the
16 Secretary determines appropriate.
17 (2) Certification Conditions.—A certificate
18 of type approval issued under paragraph (1) shall
19 specify each condition imposed by the Secretary
20 under subsection (e).
21 (3) Owners and Operators.—A manufac-
22 turer that receives a certificate of type approval for
23 the treatment technology under this subsection shall
24 provide a copy of the certificate to each owner and
operator of a vessel on which the treatment technology is installed.

(f) INSPECTIONS.—An owner or operator who receives a copy of a certificate under subsection (e)(3) shall retain a copy of the certificate onboard the vessel and make the copy of the certificate available for inspection at all times while the owner or operator is utilizing the treatment technology.

(g) BIOCIDES.—The Secretary may not approve a ballast water treatment technology under subsection (b) if—

(1) it uses a biocide or generates a biocide that is a pesticide, as defined in section 2 of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136), unless the biocide is registered under that Act or the Secretary, in consultation with Administrator, has approved the use of the biocide in such treatment technology; or

(2) it uses or generates a biocide the discharge of which causes or contributes to a violation of a water quality standard under section 303 of the Federal Water Pollution Control Act (33 U.S.C. 1313).

(h) PROHIBITION.—
(1) IN GENERAL.—Except as provided in paragraph (2), the use of a ballast water treatment technology by an owner or operator of a vessel shall not satisfy the requirements of this title unless it has been approved by the Secretary under subsection (b).

(2)Exceptions.—

(A) Coast Guard shipboard technology evaluation program.—An owner or operator may use a ballast water treatment technology that has not been certified by the Secretary to comply with the requirements of this section if the technology is being evaluated under the Coast Guard Shipboard Technology Evaluation Program.

(B) Ballast water treatment technologies certified by foreign entities.—An owner or operator may use a ballast water treatment technology that has not been certified by the Secretary to comply with the requirements of this section if the technology has been certified by a foreign entity and the certification demonstrates performance and safety of the treatment technology equivalent to the require-
ments of this section, as determined by the Secretary.

(i) Testing Protocols.—Not later than 180 days after the date of enactment of this Act, the Administrator, in consultation with the Secretary, shall issue requirements for land-based and shipboard testing protocols or criteria for—

(1) certifying the performance of each ballast water treatment technology under this section; and

(2) certifying laboratories to evaluate such treatment technologies.

SEC. 3606. EXEMPTIONS.

(a) In General.—No permit shall be required or prohibition enforced under any other provision of law for, nor shall any standards regarding a discharge incidental to the normal operation of a vessel under this title apply to—

(6) any discharge into navigable waters from a vessel that is necessary to secure the safety of the vessel or human life, or to suppress a fire onboard the vessel or at a shoreside facility; or

(7) a vessel of the armed forces of a foreign nation when engaged in noncommercial service.

(b) BALLAST WATER DISCHARGES.—No permit shall be required or prohibition enforced under any other provi-
sion of law for, nor shall any ballast water performance standards under this title apply to—

(1) a ballast water discharge incidental to the normal operation of a vessel determined by the Sec-
retary to—

(A) operate exclusively within a geographi-
cally limited area;

(B) take up and discharge ballast water exclusively within 1 Captain of the Port Zone established by the Coast Guard, unless the Sec-
retary determines such discharge poses a sub-
stantial risk of introduction or establishment of an aquatic nuisance species;

(C) operate pursuant to a geographic re-
striction issued as a condition under section 3309 of title 46, United States Code, or an equivalent restriction issued by the country of registration of the vessel; or

(2) a ballast water discharge incidental to the normal operation of a vessel consisting entirely of water suitable for human consumption; or
(3) a ballast water discharge incidental to the normal operation of a vessel in an alternative compliance program established pursuant to section 3607.

(c) Vessels With Permanent Ballast Water.—No permit shall be required or prohibition enforced under any other provision of law for, nor shall any ballast water performance standard under this title apply to, a vessel that carries all of its permanent ballast water in sealed tanks that are not subject to discharge.

(d) Vessels of the Armed Forces.—Nothing in this title shall be construed to apply to the following vessels:

(1) A vessel owned or operated by the Department of Defense (other than a time-chartered or voyage-chartered vessel).

(2) A vessel of the Coast Guard, as designated by the Secretary of the department in which the Coast Guard is operating.

SEC. 3607. ALTERNATIVE COMPLIANCE PROGRAM.

(a) In General.—The Secretary, in consultation with the Administrator, may promulgate regulations establishing 1 or more compliance programs as an alternative to ballast water management regulations issued under section 3604 for a vessel that—
(1) has a maximum ballast water capacity of
less than 8 cubic meters;

(2) is less than 3 years from the end of the use-
ful life of the vessel, as determined by the Secretary;
or

(3) discharges ballast water into a facility for
the reception of ballast water that meets standards
promulgated by the Administrator, in consultation
with the Secretary.

(b) PROMULGATION OF FACILITY STANDARDS.—Not
later than 1 year after the date of enactment of this Act,
the Administrator, in consultation with the Secretary,
shall promulgate standards for—

(1) the reception of ballast water from a vessel
into a reception facility; and

(2) the disposal or treatment of the ballast
water under paragraph (1).

SEC. 3608. JUDICIAL REVIEW.

(a) IN GENERAL.—An interested person may file a
petition for review of a final regulation promulgated under
this title in the United States Court of Appeals for the
District of Columbia Circuit.

(b) DEADLINE.—A petition shall be filed not later
than 120 days after the date that notice of the promulga-
tion appears in the Federal Register.
(c) EXCEPTION.—Notwithstanding subsection (b), a petition that is based solely on grounds that arise after the deadline to file a petition under subsection (b) has passed may be filed not later than 120 days after the date that the grounds first arise.

SEC. 3609. EFFECT ON STATE AUTHORITY.

(a) IN GENERAL.—No State or political subdivision thereof may adopt or enforce any statute or regulation of the State or political subdivision with respect to a discharge incidental to the normal operation of a vessel after the date of enactment of this Act.

(b) SAVINGS CLAUSE.—Notwithstanding subsection (a), a State or political subdivision thereof may enforce a statute or regulation of the State or political subdivision with respect to ballast water discharges incidental to the normal operation of a vessel that specifies a ballast water performance standard that is more stringent than the ballast water performance standard under section 3604(a)(1)(A) and is in effect on the date of enactment of this Act if the Secretary, after consultation with the Administrator and any other Federal department or agency the Secretary considers appropriate, makes a determination that—
(1) compliance with any performance standard specified in the statute or regulation can in fact be achieved and detected;

(2) the technology and systems necessary to comply with the statute or regulation are commercially available; and

(3) the statute or regulation is consistent with obligations under relevant international treaties or agreements to which the United States is a party.

(c) Petition Process.—

(1) Submission.—The Governor of a State seeking to enforce a statute or regulation under subsection (b) shall submit a petition requesting the Secretary to review the statute or regulation.

(2) Contents; Deadline.—A petition shall—

(A) be accompanied by the scientific and technical information on which the petition is based; and

SEC. 3610. APPLICATION WITH OTHER STATUTES.

Notwithstanding any other provision of law, this title shall be the exclusive statutory authority for regulation by the Federal Government of discharges incidental to the normal operation of a vessel to which this title applies. Except as provided under section 3604(a)(1)(A), any regulation in effect on the date immediately preceding the effective date of this Act relating to any permitting requirement for or prohibition on discharges incidental to the normal operation of a vessel to which this title applies shall be deemed to be a regulation issued pursuant to the authority of this title and shall remain in full force and effect unless or until superseded by new regulations issued hereunder.

DIVISION D—FUNDING TABLES

SEC. 4001. AUTHORIZATION OF AMOUNTS IN FUNDING TABLES.

(a) IN GENERAL.—Whenever a funding table in this division specifies a dollar amount authorized for a project, program, or activity, the obligation and expenditure of the specified dollar amount for the project, program, or activity is hereby authorized, subject to the availability of appropriations.

(b) MERIT-BASED DECISIONS.—A decision to commit, obligate, or expend funds with or to a specific entity
on the basis of a dollar amount authorized pursuant to subsection (a) shall—

(1) be based on merit-based selection procedures in accordance with the requirements of sections 2304(k) and 2374 of title 10, United States Code, or on competitive procedures; and

(2) comply with other applicable provisions of law.

(e) RELATIONSHIP TO TRANSFER AND PROGRAMMING AUTHORITY.—An amount specified in the funding tables in this division may be transferred or reprogrammed under a transfer or reprogramming authority provided by another provision of this Act or by other law. The transfer or reprogramming of an amount specified in such funding tables shall not count against a ceiling on such transfers or reprogrammings under section 1001 or section 1522 of this Act or any other provision of law, unless such transfer or reprogramming would move funds between appropriation accounts.

(d) APPLICABILITY TO CLASSIFIED ANNEX.—This section applies to any classified annex that accompanies this Act.

(e) ORAL AND WRITTEN COMMUNICATIONS.—No oral or written communication concerning any amount
specified in the funding tables in this division shall super-

1

cede the requirements of this section.
