

114TH CONGRESS
2D SESSION

H. RES. 940

Expressing support for designation of December 3, 2016, as the “National Day of 3D Printing”.

IN THE HOUSE OF REPRESENTATIVES

DECEMBER 2, 2016

Mr. FOSTER (for himself and Mr. TAKANO) submitted the following resolution; which was referred to the Committee on Energy and Commerce

RESOLUTION

Expressing support for designation of December 3, 2016, as the “National Day of 3D Printing”.

Whereas additive manufacturing, also known as 3D printing, is a process by which digital 3D design data is used to build up a component in layers by depositing material;

Whereas 3D printing creates an object layer by layer, greatly reducing waste and increasing efficiency compared to traditional manufacturing techniques;

Whereas 3D printing has grown exponentially over the last several years;

Whereas the United States is a world leader in advanced manufacturing, and has a history of design innovation;

Whereas public-private partnerships that promote advanced manufacturing, such as the Digital Manufacturing and

Design Innovation Institute and other Manufacturing Innovation Institutes, will develop enhanced digital capabilities to design and test new products and reduce costs in manufacturing processes across a variety of industries;

Whereas 3D printing has widespread applications in home construction, home goods production, biotechnology, the automotive sector, aerospace, medicine, consumer electronics, and defense;

Whereas 3D printing has the potential to reshape manufacturing in the United States, by decreasing the cost of producing goods for small businesses and local manufacturers;

Whereas innovation will be increased, as 3D printing reduces the time required for product development and market launch; and

Whereas, December 3, 2016, would be an appropriate date to designate as the “National Day of 3D Printing”: Now, therefore, be it

1 *Resolved*, That the House of Representatives—

2 (1) supports the designation of the “National
3 Day of 3D Printing”;

4 (2) recognizes the economic impact of 3D print-
5 ing and the positive implications of 3D printing for
6 the United States advanced manufacturing sector;
7 and

8 (3) encourages the promotion and celebration of
9 3D printing technology.
