“(a) Suspension of registration of a facility.—If the Food and Drug Administration determines that a cosmetic formulation or cosmetic product manufactured, processed, packed, or held by a registered facility has a reasonable probability of causing serious adverse health consequences or death to humans, and there is reason to believe that other formulations or products manufactured, processed, packed, or held by the facility may be similarly affected because of a failure affecting multiple products in that facility, the Food and Drug Administration may suspend the registration of a facility.

“(b) Suspension of cosmetic ingredient statement.—If the Food and Drug Administration determines that a cosmetic product manufactured in a registered facility has a reasonable probability of causing serious adverse health consequences or death to humans, the Food and Drug Administration may suspend the cosmetic ingredient statement of that product.

The Food and Drug Administration may modify such list under subsection (c).

“(ii) CONSIDERATIONS.—The determination of which ingredients or functional ingredients will be reviewed in a given year shall be publicized in annual reports to Congress and the public, in accordance with section 618, and subject to consultation as provided for in clause (iii). The review of any cosmetic ingredient or non-functional constituent shall commence with
a public announcement by the Food and
Drug Administration and the opening of a
docket as required under paragraph (2).

“(iii) CONSULTATION.—The Food and
Drug Administration shall establish a Cos-
metics Safety Advisory Committee, which
shall include equal numbers of individuals

on other matters pertaining to cosmetic
safety.
“(4) COMMENT PERIOD.—As part of the annual reporting to Congress and the public under section 618, the Food and Drug Administration shall solicit public comment on which cosmetic ingredients or non-functional constituents on the list are of greatest interest to be reviewed next for early review and which additional cosmetic ingredients or non-functional constituents should be added to the list. “(d) DETERMINATION ON SAFETY.—

“(1) INITIAL PROPOSED ADMINISTRATIVE ORDER.—Following consideration of data and comments to the public docket and any other information before the Food and Drug Administration, the Food and Drug Administration shall determine whether there is adequate evidence to make an initial finding on the safety of the ingredient or non-functional constituent. If the Food and Drug Administration determines that there is adequate evidence, the Food and Drug Administration shall issue a proposed administrative order and shall post such order on the Internet website of the Food and Drug Administration, notwithstanding subchapter II of chapter 5 of title 5, United States Code.

“(2) PUBLIC COMMENT.—Upon publication of the proposed administrative order described in paragraph (1), the Food and Drug Administration shall open a docket for the submission of public comment. The Food and Drug Administration shall provide 30
days for public comment following publication of the proposed administrative order.

“(3) **Final Administrative Order.**—Following the public comment period described in paragraph (2) and consideration of comments to the public docket and any other information before the Food and Drug Administration, the Food and Drug Administration shall determine whether there is adequate evidence to make a final finding on the safety of the ingredient or non-functional constituent. If the Food and Drug Administration determines that there is adequate evidence, the Food and Drug Administration shall issue a final administrative order and shall post such order on the Internet website of the Food and Drug Administration, notwithstanding subchapter II of chapter 5 of title 5, United States Code.

“(4) **Determinations.**—In the proposed administrative order or the final administrative order, as applicable, the Food and Drug Administration shall make a determination that the ingredient or non-functional constituent is—

“(A) safe in cosmetic products under specified conditions of use or tolerances;
“(B) safe in cosmetic products without the need for specified conditions of use or tolerances; or

“(C) not safe in cosmetic products.

“(5) CONDITIONS OF USE AND TOLERANCES.—

An order under paragraph (4)(A) shall include such conditions on the use of an ingredient or such tolerances on the presence of a non-functional constituent as are necessary for the safety of cosmetic products containing such ingredient or non-functional constituent, including—

“(A) limits on the amount or concentration of the ingredient or non-functional constituent that may be present in a cosmetic product, including limits in products intended for children and other vulnerable populations, and limits on use near the eye or mucosal membranes;

“(B) warnings that are necessary or appropriate under section 614, including warnings related to use by children, pregnant women, populations with high exposure to the ingredient (such as workers who are exposed through production practices or handling of final products), or other vulnerable populations, to help ensure
safe use of cosmetic products containing the ingredient or non-functional constituent; and

“(C) such other conditions as are necessary for the safety of cosmetic products containing such ingredient or non-functional constituent.

“(6) PUBLIC NOTICE.—A final order under this subsection shall set forth the determination of the Food and Drug Administration on safety, any conditions of use or tolerances under subparagraph (A) or (B) of paragraph (4) and a summary of the valid scientific evidence supporting the finding. The order shall be effective upon its publication on the Internet website of the Food and Drug Administration and shall be considered final agency action.

“(e) ORDER.—If the Food and Drug Administration issues a final administrative order under subparagraph (A) or (C) of subsection (d)(4), the Food and Drug Administration shall, at the same time as publication of the notice under subsection (d)(6), publish a proposed order identifying dates by which use of the ingredient or non-functional constituent in cosmetic products shall comply with the final administrative order, and provide 60 days for public comment, including comment on whether compliance is feasible within the proposed dates. After consid-
erring comments on the proposed order, the Food and Drug Administration shall publish in the Federal Register a final order.

“(f) Modification of an Order.—An order issued under subsection (d) or (e) may be modified or revoked by the Food and Drug Administration on the initiative of the Food and Drug Administration or in response to a petition.

“(g) Inadequate Evidence.—

“(1) Notice; Extension.—If the Food and Drug Administration determines that the available data and information are not adequate to make a proposed or final determination regarding safety under subsection (d)(4), with respect to a cosmetic ingredient or non-functional constituent, the Food and Drug Administration shall—

“(A) publish such finding on the Internet website of the Food and Drug Administration not later than 90 days after the close of the relevant comment period for the ingredient or non-functional constituent under subsection (a)(2), in the case of a proposed order, or subsection (d)(2), in the case of a final order; and

“(B)(i) include a notice providing interested persons an additional 30 days from the
notice date to provide additional data and information; and

“(ii) if, after the 30-day period under clause (i), the Food and Drug Administration determines that additional safety substantiation with respect to such ingredient or non-functional constituent is necessary to make a safety determination, include a notice specifying an additional time period, not to exceed 18 months from the notice date, and plan to obtain such data and information.

“(2) Determination; order.—

“(A) Inadequate data and information.—If the Food and Drug Administration determines, after considering any additional data and information submitted under paragraph (1)(B), that the available data and information still are not adequate to make a determination regarding safety under subsection (d)(4), the Food and Drug Administration shall, within 90 days of the close of the additional time period provided under paragraph (1)(B), issue a proposed order or a final administrative order—
“(i) making a determination that the ingredient or non-functional constituent has not been shown to be safe in cosmetic products; and

“(ii) explaining why the available data and information are not adequate to assess the safety of the ingredient or non-functional constituent.

“(B) ADEQUATE DATA AND INFORMATION.—If the Food and Drug Administration determines, after considering any additional data and information submitted under paragraph (1)(B), that the available data and information are adequate to make a determination regarding safety under subsection (d)(4), the Food and Drug Administration shall, within 180 days of the close of the comment period, issue a proposed order, followed by a final order, on such cosmetic ingredient or non-functional constituent, in accordance with such subsection.

“(h) SAFETY ASSESSMENT.—

“(1) IN GENERAL.—In assessing the safety of an ingredient or non-functional constituent, the Food and Drug Administration shall consider wheth-
er there is adequate evidence to support a reasonable

certainty among competent scientists that the ingre-
dient is not harmful under the recommended or sug-
gested conditions of use or customary or usual use,
or that a non-functional constituent is not harmful
under the recommended or suggested tolerance levels
or the level at which it is customarily or usually
present. The Food and Drug Administration may
not consider an ingredient or non-functional con-
stituent harmful solely because it can cause minor
adverse health reactions, such as minor transient al-
lergic reactions or minor transient skin irritations,
in some users.

“(2) FACTORS.—In assessing the safety of an
ingredient or non-functional constituent, the Food
and Drug Administration shall consider, among
other relevant factors, the following:

“(A) The probable human exposure to the
ingredient or non-functional constituent from
expected use in cosmetics.

“(B) The probable cumulative and aggre-
gate effect in humans of relevant exposure to
the ingredient or non-functional constituent or
to any chemically or pharmacologically related
substances from use in cosmetics or other prod-
ucts with similar routes of exposure under recom-
ommended or suggested conditions of use or
their customary use, to the extent adequate
data is available for analysis. In appropriate
cases, the Food and Drug Administration may
consider available information on the total expo-
sure to an ingredient or non-functional con-
stituent from all sources.

“(C) Whether warnings or recommenda-
tions in a product label, as part of any condi-
tions of use or tolerances imposed by the Food
and Drug Administration, would be necessary
and appropriate to help ensure the safety of the
ingredient or non-functional constituent.

“(3) DATA AND INFORMATION.—

“(A) REQUIRED INFORMATION.—A deter-
mination that an ingredient or non-functional
constituent is safe in cosmetics shall be based
upon adequate evidence submitted or otherwise
known to the Food and Drug Administration,
which shall include full reports of all available
studies, published or unpublished, that are ade-
quately designed to show whether the ingredient
or non-functional constituent is safe. Such stud-
ies may include in vitro and in silico studies
and epidemiological studies, biomonitoring studies, and studies focused on various points during the lifespan of the subject, that use scientifically valid methodology.

“(B) ADDITIONAL RELEVANT INFORMATION.—The Food and Drug Administration shall consider any other relevant information related to the safety of the ingredient or non-functional constituent, including—

“(i) adverse event reports;

“(ii) findings and information from State, Federal, national, and international entities and other bodies composed of scientific and medical experts;

“(iii) if the ingredient or non-functional constituent is lawfully used or present in other products regulated by the Food and Drug Administration, the scientific basis for such use; and

“(iv) experience with the ingredient or non-functional constituent in products that are distributed in the United States or in other countries, if such experience is well-documented and has resulted in substantial
human exposure to the ingredient or non-
functional constituent over time.”

product is safe for the use recommended or sug-

finished product is safe.

“(2) NEW INFORMATION.—If new information
relevant to the determination becomes available, the
responsible person shall promptly update the deter-

other scientific information;

“(ii) scientific information raises cred-
ible and relevant questions about the safe-
ty of the product or any of its ingredients;

“(iii) the responsible person has not
made the determination required under
subsection (a), or such determination is
not supported by adequate evidence; or

“(iv) one or more of the criteria to es-

of safety in subsection (b) has not been
satisfied;

“(B) the Food and Drug Administration,
an expert regulatory body, or an expert body

an ingredient in the product to be unsafe under
the conditions of use of the product; or

“(C) the Food and Drug Administration
concludes that submission of the records will
serve the public health or otherwise enable the
Food and Drug Administration to fulfill the
cosmetic safety purposes of this section.

“(g) GUIDANCE AND REGULATIONS.—

“(1) IN GENERAL.—The Food and Drug Ad-
ministration shall issue guidance describing the evi-
dence necessary to support a determination under
subsection (a), and may, by regulation, establish ex-

Food and Drug Administration determines that such
exemptions are supported by adequate evidence and
would have no adverse effect on public health.

Administration shall, after consultation with the
Small Business Administration and small businesses
that manufacture cosmetics, provide additional guid-

Drug Administration shall further specify the
contents of the annual electronic report by reg-

“(5) No adverse events to report.—The Food and Drug Administration shall provide an option as part of the electronic registration process for the responsible person to indicate if such responsible person had no adverse events to report over the previous year. With respect to a responsible person who received no adverse event reports for a year, the annual adverse event report requirement may be met by indicating no such events on the annual registration form.

“(e) Limitation with respect to adverse event reports.—The submission of an adverse event report in compliance with subsection (a) shall not constitute an admission that the cosmetic involved caused or contributed to the adverse event.

“(f) Contact information.—The label of a cosmetic shall bear the domestic telephone number or elec-
tronic contact information, and it is encouraged that the label include both the telephone number and electronic contact information, through which the responsible person may receive a report of an adverse event.

treated as a trade secret and confidential information by
the State.

“(e) LIMITATIONS.—This section shall not be con-

“SEC. 613. MANDATORY RECALL AUTHORITY.

“(a) VOLUNTARY PROCEDURES.—If the Food and

“(ii) to exempt a warehouse-based third party logistics provider from being the subject of a mandatory recall order.

“(3) DETERMINATION TO LIMIT AREAS AFFECTED.—If the Food and Drug Administration requires a responsible person to cease distribution under paragraph (1)(A) of a cosmetic, the Food and Drug Administration may limit the size of the geographic area and the markets affected by such cessation if such limitation would not compromise the public health.

“(e) HEARING ON ORDER.—The Food and Drug Administration shall provide the responsible party subject to an order under subsection (b) with an opportunity for an
informal hearing, to be held as soon as possible, but not
later than 2 days after the issuance of the order, on the

been, distributed; and

“(B) that includes, at a minimum—
