NOMINATION OF HONORABLE ASHTON B. CARTER TO BE SECRETARY OF DEFENSE

WEDNESDAY, FEBRUARY 4, 2015

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:28 a.m., in room SD-G50, Dirksen Senate Office Building, Senator John McCain (chairman) presiding.

Committee members present: Senators McCain, Inhofe, Sessions, Wicker, Ayotte, Fischer, Cotton, Rounds, Ernst, Tillis, Sullivan, Lee, Graham, Cruz, Reed, Nelson, McCaskill, Manchin, Shaheen, Gillibrand, Blumenthal, Donnelly, Hirono, Kaine, King, and Heinrich.

Also present: Senator Lieberman.

OPENING STATEMENT OF SENATOR JOHN MCCAIN, CHAIRMAN

Chairman MCCAIN. Good morning. The committee meets this morning to consider the nomination of Dr. Ashton B. Carter to be the Secretary of Defense, and there are standard questions that by committee rule that I would put forth to Dr. Carter at this time.

Dr. Carter, in order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communication of information. Have you adhered to applicable laws and regulations governing conflicts of interest?

Dr. CARTER. I have.

Chairman MCCAIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

Dr. CARTER. No.

Chairman MCCAIN. Will you ensure that your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Dr. CARTER. I will.

Chairman MCCAIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

Dr. CARTER. Yes.

Chairman MCCAIN. Will those witnesses be protected from reprisal for their testimony or briefings?

Dr. CARTER. They will.

Chairman MCCAIN. Do you agree, if confirmed, to appear and testify upon request before this committee?

Dr. CARTER. Yes.

Chairman MCCAIN. Do you agree to provide documents, including copies of electronic forms of communications, in a timely manner when requested by a duly constituted committee or to consult with the committee regarding the basis for any good-faith delay or denial in providing such documents?

Dr. CARTER. Yes.

[Pause.]

Chairman MCCAIN. That concludes our routine questions that we ask of the nominees.

Before the committee proceeds to the business before us today, on behalf of all members of the committee, we would like to extend our deepest condolences to the family of the brave Jordanian pilot brutally murdered at the hands of ISIL [the Islamic State of Iraq and the Levant]. Together with his family, the Jordanian armed forces, and the people of Jordan, we mourn the loss of a hero that has galvanized the Nation and the world.

I hope this heinous crime finally leads us to put in place what thus far has been lacking, a comprehensive strategy to achieve the President's stated goal to degrade and destroy ISIL. Let there be no doubt, we still do not have a viable strategy to counter ISIL. If you are not winning in war, you are losing.

America has no greater ally in the fight against terrorism than Jordan, and as we made clear to King Abdullah in our meeting yesterday. This committee's immediate concern is to ensure Jordan has all the equipment and resources necessary to continue taking the fight directly to ISIL. Many of us on this committee will be sending a letter to the administration on this urgent issue of concern, and we invite all of our fellow committee members to join us on that letter.

I think there was a consensus on both sides yesterday after the meeting with King Abdullah that we would send a letter out this morning. That letter will be distributed to the members for your perusal and signature so we can get that letter out as soon as possible, and I thank all members of the committee for their cooperation.

I would also like to add that if legislation is required in order to achieve the goals that King Abdullah articulated to us yesterday as absolutely necessary to defend his nation, we will be considering that legislation as well as soon as possible, and I thank all members.

The Senate Armed Services Committee meets today to consider the nomination of Dr. Ashton B. Carter to be Secretary of Defense. At the outset, I would like to express my sincere gratitude to Chuck Hagel for his years of service as an infantry sergeant in Vietnam, as a United States Senator from Nebraska, and as our Nation's 24th Secretary of Defense.

Chuck Hagel is a patriot and honorable public servant, and during his leadership of the Pentagon, the men and women of our armed services have had a true ally who always put their interests first. This committee wishes Chuck the best in his future endeavors.

Dr. Carter, even in the best of times, the position for which you have been nominated is one of the most challenging in Government. I would like to thank your wife, Stephanie, and your chil-

dren, Will and Ava, for being here today and for loaning you to our Nation in service once again.

Dr. Carter is one of America's most respected and experienced defense professionals. He has served as assistant Secretary of Defense for Global Strategic Affairs; Under Secretary of Defense for Acquisition, Technology, and Logistics; and most recently as Deputy Secretary of Defense. In these positions, I have known him and members of the committee have known him to be an honest, hard-working, and committed public servant.

I have had the opportunity to work together with Dr. Carter on several issues of shared concern, especially trying to reform the defense acquisition system, improving financial management of the Department of Defense [DOD], and rolling back sequestration. On these and other issues facing the Nation, we all look forward to having you as our partner once more, Dr. Carter.

But I must candidly express concern about the task that awaits you if confirmed and the influence you would have on some of the most critical national security issues facing our Nation. Two of your predecessors, Secretary Robert Gates and Secretary Leon Panetta, have severely criticized White House micromanagement of the Defense Department and over-centralization of foreign and defense policy.

According to numerous news reports, Secretary Hagel experienced similar frustrations with the insular and indecisive White House national security team over issues ranging from ISIL to Ukraine, detention policy to sequestration. Dr. Carter, I sincerely hope the President who nominated you will empower you to lead and contribute to the fullest extent of your abilities because at a time of multiplying threats to our security, America needs a strong Secretary of Defense now more than ever.

America is confronted today with a diverse and complex range of national security challenges. Iran is on the march. In Iraq, Syria, Yemen, and elsewhere across the Middle East, ISIL continues to expand its influence and control of territory, as the new Director of the Defense Intelligence Agency recently testified to Congress.

A revisionist Russia and a rising China each, in their own ways, present challenges to the liberal international order as we have known it since the end of World War II, a system that cherishes the rule of law, maintains free markets and free trade, and relegates wars of aggression to their rightful place in the bloody past.

Amid the present upheaval and conflict, American disengagement can only produce more turmoil and increase in the chance of large-scale American interventions at greater cost in blood and treasure. That is why we need a coherent national security strategy incorporating all elements of America's national power to sustain and defend the international order that has produced and extended security, prosperity, and liberty across the globe.

But crafting a reality-based national security strategy is simply impossible under the mindless mechanism of sequestration. Despite the growing array of complex threats to our security, we are on track to cut \$1 trillion out of America's defense budget by 2021. Readiness is falling across the Services, and morale is falling right along with it.

Army and Marine Corps end strength is dropping dangerously low. The Air Force is the oldest and smallest it has ever seen. The Navy's fleet is shrinking to pre-World War I levels. Last week, each of our Service Chiefs testified before this committee that American lives are being put at risk due to sequestration.

Sequestration represents a failure to meet our most basic constitutional responsibility to provide for the common defense. America's military can no longer be held hostage to domestic political disputes, totally separated from the reality of the threats we face.

More than 3 years after the passage of the Budget Control Act, it is time to put an end to this senseless policy. Rolling back sequestration is necessary to provide our military the strategy-driven budget necessary to confront the threats we face. But it will never be enough without reforming how the Department procures major weapon systems.

Many of our military's challenges today are the results of years of mistakes and wasted resources. For example, over here, the Army's Future Combat System was initially estimated to be a \$92 billion project to modernize into a cohesive network new Army vehicles and radios. But it more than doubled its price to \$200 billion without ever getting off the ground.

Secretary Gates and Congress wisely canceled Future Combat Systems, but only after spending \$20 billion with nothing to show for it.

Between these four systems—Future Combat Systems, expeditionary fighting vehicle, Comanche helicopter, and the VH-71 presidential helicopter—we spent \$40 billion with nothing to show for it. That is \$40 billion of training and equipment our military doesn't have today to confront the threats we face.

The problem continues today. The cost of the evolved expendable launch vehicle has exploded from around \$100 million per launch to \$400 million per launch over the last 15 years after the Air Force allowed years of sole-source contracts while, especially over the last few months, actively keeping out any other companies from competing. Hopefully, this year, we will see the Air Force certify a new entrant, and this competition can finally bring down costs and end our reliance on Russian rocket engines.

Like many programs that preceded it, LCS [the littoral combat ship's] cost overruns followed predictably from a chronic lack of planning from its very outset in three key areas: undefined requirements, unrealistic initial cost estimates, and unreliable assessments of technological and integrated risk.

The *Gerald Ford*-class nuclear aircraft carrier was originally supposed to cost \$10.5 billion. It will now cost \$12.9 billion, a \$2.4 billion increase, and we have no assurance such increases will not plague the follow-on ships. This is unacceptable.

The F-35 Joint Strike Fighter was originally estimated to cost around \$220 billion to research and engineer and build 2,800 airplanes. Now we are going to spend more than \$330 billion, a 50 percent increase, to buy 400 fewer airplanes.

Even more astounding than the amount of money squandered and wasted is the fact that in each of the weapon systems cases I have mentioned, no individual has been held responsible for these massive cost overruns and egregious acquisition failures, and the

result has been the slow degradation of America's defense technological advantage, which we will lose altogether if we persist with business as usual in our acquisition policies. This must change. It will be a priority for this committee and for me personally to change it.

Dr. Carter, I look to you as a partner in all of these endeavors. If confirmed, I hope you will provide independent leadership and work closely with Congress on the issues that matter most: crafting a coherent national security strategy to meet today's threats, rolling back sequestration, continuing to reform the defense acquisition process, modernizing our military compensation system, and many others.

I thank you deeply for your willingness to serve once again, and I look forward to your testimony today.

Senator Reed?

STATEMENT OF SENATOR JACK REED

Senator REED. Thank you very much, Mr. Chairman.

Let me join you in extending our condolences to the family of the brave Jordanian pilot and to the people of Jordan.

Let me welcome Dr. Carter and thank him for his willingness to once again serve the Nation.

I also want to welcome Stephanie and Ava and Will and thank them for their sacrifice and service to the Nation.

Let me also recognize my colleague and friend, Joe Lieberman. Thank you, Senator, for being here today.

Dr. Carter is the former Deputy Secretary of Defense and Under Secretary for Acquisition, Technology, and Logistics. You are uniquely qualified to lead the Department of Defense at a time when, as Henry Kissinger said last week here, the United States has not faced a more diverse and complex array of crises since the end of the second world war.

If confirmed as Secretary of Defense, you will be advising the President, leading the Defense Department, and working with our allies on a staggering number of complex international challenges to our National interests.

Iran. While the Secretary of Defense is not a party to the negotiations relating to Iran's nuclear program, the Secretary will undoubtedly be responsible for any number of potential contingencies relating to the consequences of different outcomes of these negotiations. In the event of a breakdown in the negotiations, the consequences could alter the face of the region for generations and generations.

ISIL. ISIL's depraved and violent campaign in Iraq and Syria to establish an extremist caliphate threatens to erase borders, destabilize the region, and create a breeding ground for foreign fighters willing to return to the West to carry out attacks against United States interests. The Department must provide critical leadership in a coalition effort that includes Arab and Muslim states to degrade and defeat ISIL while being careful to ensure that the United States does not end up owning the conflict in Syria and elsewhere.

Afghanistan. The hard-won gains of the past decade are significant but remain fragile. With Afghan security, the Afghan forces

are taking over responsibility for combating the Taliban and securing Afghanistan. However, United States forces, with our coalition partners, must transition to a more limited mission of training and assisting the Afghan forces and conducting counterterrorism operations. Yet it remains to be seen whether conditions on the ground in Afghanistan will improve sufficiently by the end of 2016 to warrant the pace of further reductions under the current plan.

Ukraine. Russia's aggression against Ukraine challenges order and progress in Europe. In the past few days, separatists in Eastern Ukraine with substantial Russian equipment, training, and leadership have abandoned any pretext of a ceasefire and launched a broad offensive against Ukrainian forces. The United States must determine how to best support the Ukrainian forces and people in defending their country.

Cyber. For years now, we have devoted significant attention to the looming and complex challenge of cyber warfare. The attack on the Sony Corporation of America, however, was an important respects a watershed event that should stimulate fresh critical thinking.

This attack demonstrates that a relatively small and weak rogue nation can reach across the ocean to cause extensive destruction of a U.S.-based economic target and very nearly succeed in suppression of freedom of expression through cyberspace. The real and manifest advantages of the offense over the defense in cyber warfare that enabled a militarily inferior nation to strike successfully against the Homeland is a new and worrisome factor for national security.

These issues are only a few of the external challenges facing the Defense Department, but there are also significant internal challenges that must be addressed.

Sequestration. Last week before this committee, General Mattis said, "No foe in the field can wreak such havoc on our security that mindless sequestration is achieving today." General Odierno informed this committee that only one third of Army brigades are ready to fight. General Welsh testified that less than 50 percent of our combat squadrons are fully combat ready.

Sequestration threatens not only our national security, but risks damage to our public safety, health, transportation, education, and the environment. While the Department manages through these difficult fiscal realities, Congress must find a balanced and bipartisan solution and repeal sequestration.

Rising costs. The chairman has alluded to this very succinctly and very directly. Even without sequestration, the Defense Department would have to tackle rising costs, including personnel costs, which consume a third of the Defense Department's budget.

Yesterday, this committee heard the testimony of the Military Compensation and Retirement Committee. Their recommendations are far reaching and would fundamentally change military personnel benefits. But these recommendations must be carefully considered because changes must occur to ensure the Department can properly train and equip its fighting men and women.

The other major cost driver in the Defense Department is acquisition, and while the Department has implemented significant acquisition reforms—many under your leadership—defense acquisi-

tion still takes too long and costs too much. We can and we should do more to streamline and improve the system.

Finally, but most importantly, if confirmed as Secretary of Defense, you will be leading 1.3 million Active Duty military, 820,000 Reserve and Guard, and 773,000 civilians. They are tired and overtaxed from a decade of war and years of fiscal uncertainty.

They are wrestling with the same issues as civilian society, issues like sexual assault and suicide. Yet they committed to protecting this Nation and remain the finest force in the world.

Dr. Carter, I look forward to discussing these and other issues with you and thank you for your service.

Chairman MCCAIN. Thank you, Senator Reed.

I note the presence of our beloved friend and former colleague, a member of this committee since the Coolidge administration, and we are very happy to have him here this morning, our beloved friend Joe Lieberman.

Senator Lieberman?

**STATEMENT OF HONORABLE JOSEPH I. LIEBERMAN, FORMER
U.S. SENATOR FROM CONNECTICUT**

Senator LIEBERMAN. Thanks, Mr. Chairman, and it was a great comfort to me when I arrived during the Coolidge administration to find that you had already been here several years.

[Laughter.]

Senator LIEBERMAN. I must say I am delighted to be here, and it is really somewhat sentimental for me to be here. I appreciate very much the opportunity.

It is a privilege for me to appear before the Senate Armed Services Committee today to introduce Dr. Ash Carter. This is not the first time I have had this privilege. In fact, it is the third time.

The first was on March 26, 2009, when Ash was nominated to be Under Secretary of Defense for Acquisition, Technology, and Logistics. Second was on September 13, 2011, when he was nominated to be Deputy Secretary of Defense.

Today, I suppose I could say I don't think I have ever been so pleased to be asked to repeat myself as I am honored to have been by Ash Carter to introduce him to you as President Obama's nominee to be the 25th Secretary of Defense of the United States of America.

Ash Carter graduated from Yale College summa cum laude with a unique combination of majors, physics and medieval history. During his time as a Rhodes Scholar at Oxford, he temporarily resolved the question, which was on everyone's mind, I am sure, about whether he was primarily a historian or physicist. He earned a doctorate at Oxford in theoretical physics.

Nevertheless, to confound observers and prognosticators, he went on to become the Chair of the International and Global Affairs faculty at Harvard at the John F. Kennedy School of Government and Co-Director of the Preventive Defense Project at the Kennedy School's Belfer Center.

Mr. Chairman, Senator Reed, it would really be hard to find someone to serve as Secretary of Defense who combines as much practical Pentagon experience with so deep a background in national security policy as Ash Carter. The fact that you have con-

vened this morning to consider his nomination means that the talents and abilities of a brilliant and extraordinary strategic thinker and public servant and administrator can again be put to use for our Nation.

It also means, as you have said, that Ash Carter has again chosen, with the support of his wife and family, to answer the call to duty to serve our country. Over the past 30 years, Dr. Carter has worked directly or indirectly for virtually every Secretary of Defense, no matter the political party of the Secretary. He knows the department he has been asked to lead very well and, therefore, can begin leading it on day one.

From 1993 to 1996, Ash served as the assistant Secretary of Defense for International Security Policy. During that time, he worked on the landmark Nunn-Lugar Arms Control Program, and I got to know him when we traveled together with Secretary of Defense Bill Perry and Senators Nunn and Lugar to the former Soviet Union to observe them destroying nuclear submarines and dismantling missiles and missile sites as part of Nunn-Lugar.

I think we actually bonded personally at one dinner hosted by the high command of the Russian military in which I believe it is accurate to say that Ash and I were the only two members of the American delegation to keep up with the vodka toasts of friendship with our Russian colleagues.

[Laughter.]

Senator LIEBERMAN. When I think back to those days and you think of what is happening in Russia today and what Russia is doing outside its borders, those memories are really quite poignant. Too much has changed for the worse.

But in thinking about introducing Ash today, he has done so much. It is important to note that he spearheaded some developments during that period of time, particularly the removal of nuclear weapons from Ukraine, Kazakhstan, and Belarus, which, needless to say, have and continue to make our world a lot safer than it would otherwise be.

Speaking of travel, Ash had the good judgment, Mr. Chairman, to come with us several times to the Munich Security Conference. I must say watching him there, I was impressed by the range and depth of his relationships with the top level of particularly military, but also foreign policy leaders of our European allies in NATO [the North Atlantic Treaty Organization].

I would say, and I would guess that members of the committee would agree, that Ash Carter's most important contributions during his past Pentagon service have been in American lives saved on the battlefield. He was the driving force in providing 6,500 MRAP [mine-resistant ambush protected] vehicles to our troops in Afghanistan in record time, an action that saved many lives and gave our troops the confidence that there was someone in Washington who was working for them.

Ash Carter's fierce dedication to our warfighters is well known and I think will be one of his greatest legacies. More broadly, the improvements he brought about in the Pentagon acquisitions process show his mastery of this complex and critical field and will make him an excellent partner for you, Mr. Chairman, in the con-

tinuing work that I know you, Senator Reed, and this committee want to do to improve defense procurement.

Dr. Carter's service on boards and commissions includes the Defense Science Board, the Defense Policy Board, the Secretary of State's International Security Advisory Board, and the Congressional Commission on the Strategic Posture of the United States.

Ash Carter has been accurately described as a man for all seasons, a man of enormous talents and experiences. It is also true that he has made choices in his life about how he has used his talents and experiences. He has chosen to go where his intellect, his values, and his patriotism have called him.

We are fortunate, indeed, that President Obama has nominated Dr. Carter to be our next Secretary of Defense. If I may say so, the President is fortunate that he will have so experienced a leader at the Pentagon and so wise an adviser in the inner counsels of this administration. All of which explains why I am so truly honored to introduce Ashton Carter to this great committee at this time.

Thank you.

Chairman MCCAIN. Thank you. Thank you very much, Senator Lieberman. We are always glad to have you here, and if you would like to take a seat on the dais, we welcome it.

Dr. Carter, welcome.

**STATEMENT OF HONORABLE ASHTON B. CARTER, NOMINEE
TO BE SECRETARY OF DEFENSE**

Dr. CARTER. Thank you, Mr. Chairman, Ranking Member Reed, all the distinguished members of this committee. Thank you all. Thank you for inviting me to appear before you as President Obama's nominee to be Secretary of Defense.

I am honored by his trust and confidence and also by the prospect of serving once again the troops and the country that I love so much.

If confirmed, I will take the office of Secretary of Defense after one of our Nation's most honorable and conscientious public servants, Chuck Hagel. I worked for Secretary Hagel, and I have known him for decades, though not over all of the many decades he served our country.

Among the many traits I admire in Secretary Hagel is the tireless care with which he carried out the most solemn duty of a Secretary of Defense, which is to the relatively few brave young men and women who defend the rest of us.

I also thank Senator Lieberman for his warm and generous introduction—as he noted, it is not the first time he has done so—but especially for his service to this body and to the Nation over many years. Thank you, sir.

My perfect wife, Stephanie, and wonderful children, Will and Ava, are behind me, as they always are every day, and I thank them.

The President frequently notes that America has the greatest fighting force the world has ever known. To the men and women of the Department of Defense who make it so and to this committee, which watches over them, I pledge that if I am confirmed as Secretary of Defense to keep faith with the dedication that brought them into service, to ensure that their training and equip-

ment are as superb as they are; that the well-being, safety, and dignity of each of them and their families is fostered and respected; and that decisions about when and where they are sent into harm's way are made with the greatest reflection and care.

The principal reason that Stephanie and I made a U-turn in our life to accept the offer of nomination is our respect and devotion to them.

To the chairman, members of the committee, I will be brief, if confirmed as Secretary of Defense, my responsibilities would be to protect America and its friends and allies in a turbulent and dangerous world. At the same time, I never lose sight of the fact the United States remains the strongest, most resilient, and most influential nation on earth.

We do, indeed, have the finest fighting force the world has ever known. We have an innovative economy that has long set the pace for the rest of the world. Our country has friends and allies in every corner of the world, and our adversaries have few. This is clear testimony to the appeal of our values, our principles, and our leadership.

All this makes me proud and hopeful and determined to grab hold of the bright opportunities in front of us, as well as to counter the very real dangers we face. These dangers, as the chairman has noted, include continuing turmoil in the Middle East and North Africa and the malignant and savage terrorism emanating from it; an ongoing war in Afghanistan; the reversion to old-style security thinking in parts of Europe; the longstanding tensions from the past and the rapid changes in Asia, and the continuing need for the stabilizing role of the United States in that region, which is so important to the future; the continuing imperative to counter the spread or use of weapons of mass destruction; and new dangers in new domains like cyber, as noted by Senator Reed.

Strategy. Strategy needs to keep all these problems in perspective and to craft lasting approaches to each of them.

I have promised President Obama that if I am confirmed I will furnish him my most candid strategic advice. In formulating that advice, I intend to confer widely among civilian and military leaders, including on this committee, experts, and foreign partners. When the President makes a decision, I will also ensure that the Department of Defense implements it with its long-admired excellence.

I will also ensure that the President receives candid professional military advice. This is not only consonant with the law, as written in this very committee, but with good sense, since our military leaders possess wide and deep experience and expertise.

The law also prescribes the chain of command, and if I am confirmed as Secretary of Defense, I will be a stickler for the chain of command.

I would also like to say a word about the defense budget. Mr. Chairman, members of the committee, I very much hope that we can find a way together out of the wilderness of sequester. Sequester is risky to our defense. It introduces turbulence and uncertainty that are wasteful, and it conveys a misleadingly diminished picture of our power in the eyes of friends and foes alike.

I am not familiar with the details of the 2016 budget submitted just a couple days ago, and if confirmed, I will come back here for a full posture hearing to discuss them. But I strongly support the President's request for relief from sequester caps in 2016 and through the Future Year Defense Plan.

If confirmed, I will do my part to assist the President in working with Congress to resolve the overall issues of the country's fiscal future, of which the defense budget is a part. But I cannot suggest support and stability for the defense budget without at the same time frankly noting that not every defense dollar is spent as well as it should be.

The taxpayer cannot comprehend it, let alone support the defense budget, when they read, as the chairman has noted, of cost overruns, lack of accounting and accountability, needless overhead, and the like. This must stop.

Every company, State, and city in the country has had to lean itself out in recent years, and it should be no different for the Pentagon. In this matter I know I am echoing Chairman McCain, Senator Reed, and this committee, which has long called for and taken concrete action on reform of acquisition and other parts of the defense enterprise in the Weapon System Acquisition Reform Act of 2009 and, before that, dating back to the Packard Commission and the Goldwater-Nichols Act.

I began my own career in defense in connection with the implementation of the Packard Commission's recommendations. The issues and solutions change over time, as technology and industry change. They extend from acquisition, which was highlighted by the chairman, in programs like Future Combat Systems and the presidential helicopter, which I canceled—I signed the cancellation orders for in 2009—to the *Ford* aircraft carrier, which Senator McCain also noted, which was not satisfactorily solved and still not, its overruns. I agree with the chairman in that regard. We have a lot of work to do.

The issues and solutions for acquisition reform change over time, as technology and industry change, as I noted. They extend from acquisition—and this is important—to all other parts of the defense budget—force size, compensation, and training, as well as equipment.

If confirmed as Secretary of Defense, I pledge to make needed change in the Pentagon, but also to seek support from Congress because I know that in the end, Congress holds the power of the purse. I look forward to partnership with this committee in what can be a period of historic advance.

Mr. Chairman, Senator Reed, members of the committee, thank you. Thank you for giving me the opportunity to come before you. If confirmed, I will seek out your thoughts, perspectives, and combat experiences to help me do the best job.

Thank you.

[The prepared statement of Dr. Carter follows:]

PREPARED STATEMENT BY HONORABLE ASHTON B. CARTER

Chairman McCain, Ranking Member Reed, and distinguished members of the committee, thank you for inviting me to appear before you as President Obama's nominee to be Secretary of Defense. I am honored by his trust and confidence, and

also by the prospect of serving once again the troops and the country that I love so much.

If confirmed, I will take the office of Secretary of Defense after one of our Nation's most honorable and conscientious public servants, Chuck Hagel. I worked for Secretary Hagel and have known him for decades, though not over all of the many decades he has served our country. Among the many traits I admire in Secretary Hagel is the tireless care with which he carried out the most solemn duty of a Secretary of Defense, which is to the relatively few brave young men and women who defend the rest of us.

I also thank Senator Lieberman for his warm and generous introduction—this is not the first time he has done so—and also for his service to this body and to the Nation.

My perfect wife Stephanie and wonderful children Will and Ava are behind me, as they always are, every day. I thank them.

The President frequently notes that America has the greatest fighting force the world has ever known. To the men and women of the Department of Defense who make it so, and to this committee which also watches over them: I pledge if I am confirmed as Secretary of Defense to keep faith with the dedication that brought them into service, to ensure that their training and equipment are as superb as they are, that the well-being, safety, and dignity of each of them and their families is fostered and respected, and that decisions about when and where they are sent into harm's way are made with the greatest reflection and care. The principal reason that Stephanie and I made a U-turn in our life to accept the offer of nomination is our respect and devotion to them.

Mr. Chairman and members of the committee, I will be brief.

If confirmed as Secretary of Defense, my responsibilities would be to protect America and its friends and allies in a turbulent and dangerous world. At the same time, I never lose sight of the fact that the United States remains the strongest, most resilient, and most influential Nation on the face of the earth. We do indeed have the finest fighting force the world has ever known. We have an innovative economy that has long set the pace for the rest of the world. Our country has friends and allies in every corner of the world, and our adversaries have few: this is clear testimony to the appeal of our values, our principles, and our leadership. All this makes me proud and hopeful, and determined to grab hold of the bright opportunities in front of us as well as to counter the very real dangers we face.

These dangers include continuing turmoil in the Middle East and North Africa, and terrorism emanating from it; an ongoing war in Afghanistan; the reversion to old-style security thinking in parts of Europe; the longstanding tensions from the past and the rapid changes in Asia, and the continuing need for the stabilizing role of the United States in a region so important to the future; the continuing imperative to counter the spread or use of weapons of mass destruction; and new dangers in new domains like cyber. Strategy needs to keep all these problems in perspective and to craft lasting approaches to each of them. I have promised President Obama that if I am confirmed, I will furnish him my most candid strategic advice. In formulating that advice, I intend to confer widely among civilian and military leaders, experts and foreign partners. When the President makes a decision, I will also ensure that the Department of Defense implements it with its long-admired excellence. I will also ensure that the President receives candid professional military advice. This is not only consonant with the law as written in this very committee, but with good sense, since our military leaders possess wide and deep experience and expertise. The law also prescribes the chain of command, and if I am confirmed as Secretary of Defense I will be a stickler for the chain of command.

I'd also like to say a word about the defense budget. Mr. Chairman and members of the committee: I very much hope that we can find a way together out of the wilderness of sequester. Sequester is risky to our defense, it introduces turbulence and uncertainty that are wasteful, and it conveys a misleadingly diminished picture of our power in the eyes of friends and foes alike. I am not familiar with the details of the fiscal year 2016 budget submitted a few days ago, and if confirmed I will come back here for a full posture hearing to discuss them. But I strongly support the President's request for relief from the sequester caps in fiscal year 2016 and through the future year defense plan. If confirmed, I will do my part to assist the President in working with Congress to resolve the overall issues of the country's fiscal future of which the defense budget is a part.

But I cannot suggest support and stability for the defense budget without at the same time frankly noting that not every defense dollar is spent as well as it should be. The taxpayer cannot comprehend, let alone support the defense budget, when they read of cost overruns, lack of accounting and accountability, needless overhead, and the like. This must stop. Every company, State, and city in the country has had

to lean itself out in recent years, and it should be no different for the Pentagon. In this matter I am echoing Chairman McCain, Senator Reed, and this committee which has long called for, and taken concrete action on, reform of acquisition and other parts of the defense enterprise, in the Weapons Systems Acquisition Reform Act of 2009 and before that, dating back to the Packard Commission and Goldwater-Nichols. I began my own career in defense in connection with the implementation of the Packard Commission's recommendations. The issues and solutions change over time, as technology and industry change. They extend from acquisition to all the other parts of the defense budget—force size, compensation, and training as well as equipment. If confirmed as Secretary of Defense, I pledge to make needed change in the Pentagon, but also to seek support from Congress, because in the end I know that Congress holds the power of the purse. I look forward to partnership with this committee in what can be a period of historic advance.

Mr. Chairman, Senator Reed, and members of the committee, thank you for giving me the opportunity to come before you. If confirmed, I will seek out your thoughts, perspectives, and combat experiences to help me do the best job.

Chairman MCCAIN. Thank you very much, Dr. Carter.

We will have multiple rounds, but we will have short ones, 5 minutes, because that will give more opportunity for members to ask questions.

In about an hour, Dr. Carter needs a short break. As we all know, he is recovering from recent surgery. So we will take a break then for as long as you need, and we will go into this afternoon so that all members are able to ask sufficiently the questions that they have.

To start with, Dr. Carter, members of this committee met with King Abdullah yesterday. He made a graphic statement about needing some weapons and the difficulties he is having with those, and we will be signing a letter this morning. As I said, it may require some legislation.

But are you aware of the problems that Jordanians are having with acquiring some of the weapons that they need?

Dr. CARTER. I am not, Mr. Chairman. I learned of them this morning as well. If I am confirmed, I definitely want to find out what they are and resolve them because we need partners on the ground to beat ISIL, and the Jordanian people have clearly reacted the way that encourages us to support them in combating what is really a savage and nasty enemy.

Chairman MCCAIN. Thank you.

Last week, General Mattis was before this committee. He said in Afghanistan, we need to consider if we are asking the same outcome there as we saw last summer in Iraq, should we pull out all our troops on the administration's proposed timeline, and the gains achieved at great cost against our enemy in Afghanistan are reversible.

General Keane said all we accomplished in Afghanistan will be at risk as it was in Iraq if the troops are pulled out not based on the conditions on the ground. How can we not learn the obvious and painful lessons from Iraq?

Do you have a position on the withdrawal from Iraq? Do you believe that it should be calendar based as it is now, or should we be looking at the conditions on the ground to base those decisions?

Dr. CARTER. Mr. Chairman, thank you and also thank you for your consideration about the back. I appreciate that.

The campaign in Afghanistan has been close to my heart for all the time that I have been associated with the Department of Defense. I have been there a number of times. I think that success

is possible there but, as you indicate, requires the United States to continue its campaign and finish the job.

I understand we have a plan. The President has a plan. I support that plan. At the same time, it is a plan. If I am confirmed and I ascertain, as the years ago by, that we need to change that plan, I will recommend those changes to the President.

Chairman MCCAIN. All I can say is it is not a matter of years. It is a matter of weeks, actually, because one of the major withdrawals is going to start this coming June. I hope that you will assess that as quickly and as carefully as possible.

In his testimony to the committee this week, Dr. Kissinger said, "In the Middle East, a multiple of evils are unfolding simultaneously. Iran has exploited this turmoil to pursue positions of power within other countries." Do you agree with that?

Dr. CARTER. Yes, I do.

Chairman MCCAIN. Do you believe that we need to have a strategy to combat ISIL and the continued successes in many respects that they are achieving?

Dr. CARTER. Absolutely.

Chairman MCCAIN. Do you believe we have a strategy at this time?

Dr. CARTER. I believe I understand our strategy at this time, Mr. Chairman. I also have the intention, again if confirmed, to make it my first priority to go there, to talk to our leaders, military leaders there, to confer with you—

Chairman MCCAIN. What do you understand the strategy to be?

Dr. CARTER.—and to—I think the strategy connects ends and means, and our ends with respect to ISIL needs to be its lasting defeat. I say "lasting" because it is important that when they get defeated, they stay defeated. That is why it is important that we have those on the ground there who will ensure that they stay defeated once defeated.

It is different on the two sides of the border. It is one enemy, but it is two different contexts. Mr. Chairman, in Iraq, the force that will keep them defeated is the Iraqi security forces. That is our strategy is to strengthen them and to make them that force.

On the Syrian side, not to take too long about it, we are trying to build the force that will keep them defeated, and that is going to be a combination of moderate Syrian forces and regional forces.

Chairman MCCAIN. It doesn't sound like a strategy to me, but maybe we can flesh out your goals. It sounds like a series of goals to me. Do you believe we should be supplying arms, defensive arms to Ukrainians?

Dr. CARTER. I very much incline in that direction, Mr. Chairman, because I think we need to support the Ukrainians in defending themselves. The nature of those arms I can't say right now because I haven't conferred with our military leaders or Ukrainian leaders. But I incline in the direction of providing them with arms, including, to get to what I am sure your question is, lethal arms.

Chairman MCCAIN. Thank you very much, Dr. Carter.

Senator Reed?

Senator REED. Thank you very much, Mr. Chairman.

One way to evolve a strategy is to first look at the threat. The Middle East, do you believe the most immediate threat there to United States interests and to the region is ISIL?

Dr. CARTER. I hesitate to say ISIL only because in the back of my mind is Iran as well. I think that we have two immediate substantial dangers in the Middle East. One is ISIL, and one is Iran.

Senator REED. In terms of our current military operations, they are clearly directed at ISIL.

Dr. CARTER. That is true.

Senator REED. Is that the appropriate response at this moment to the threats in the region?

Dr. CARTER. It is.

Senator REED. As you point out, there are two theaters. One is Iraq, where we have more traction, and the other is Syria. You would think in terms of responding to the threat that our actions or our vigorous support of the current Iraqi Government is appropriate in responding to this ISIL threat?

Dr. CARTER. It is appropriate. As I said, whether and how to improve it will be my first job if I am confirmed as Secretary of Defense.

Senator REED. One of the issues, particularly with respect to Iraq, is that not only improvement, as you suggest in your comments, the long-term defeat of ISIL rests not just on military operations, but on political arrangements and what we have witnessed in Iraq particularly was a political arrangement that conscientiously and deliberately degraded the Sunni population, at least that is their perception, and gave rise.

Would you acknowledge that part of our strategy has to be constituting an Iraqi Government that is perceived by its own people as being a bit fairer and inclusive?

Dr. CARTER. Absolutely. That is what the previous Government of Iraq did not do, and that was instrumental in their military collapse.

Senator REED. One of the issues that complicates—and you pointed out in terms of around being a strategic issue for the United States in the region is their relative influence in Iraq and throughout the region was enhanced over the last several years by the government in Iraq, by the Maliki Government. Is that accurate?

Dr. CARTER. That is accurate, yes.

Senator REED. We are now in a position of trying to essentially contain the regional ambitions of the Iranians and kinetically defeat the Sunni radical Islamists. Is that the strategy?

Dr. CARTER. Yes, that sounds right.

Senator REED. You understand that, and that, to you, is a coherent strategy?

Dr. CARTER. It is, yes.

Senator REED. Now that means that you are prioritizing or the Administration is prioritizing these actions you have talked about and building over time a capability in Syria. In terms of using your scarce resources in addressing the most serious threats, is that a coherent response in your mind?

Dr. CARTER. I think it is the beginning of a strategic response. I think that, as I noted, on the Syrian side of the border, the as-

sembling of the force that is going to keep ISIL defeated there, we are in an early stage of trying to build that force. We are participating in the building of that force, but I think it is fair to say that we are in an earlier stage there.

On the Iraqi side, we have the existing Iraqi security forces.

Senator REED. Let me—

Dr. CARTER. Senator Reed?

Senator REED. Please.

Dr. CARTER. If I can just note one other thing? It may be something I missed in your line of questioning.

There is an issue looming over this, which is the role of Iran in the whole region, which is why I pointed that out at the beginning. That is a serious complication.

Senator REED. I agree. Let me turn to the issue of Ukraine, which the chairman raised the issue of providing weapon systems to defend or allow the Ukrainians to defend themselves. But weapon systems have to be clearly differentiated from a commitment of American military personnel. Would that be a clear line of demarcation that you would draw?

Dr. CARTER. Excuse me. I was suggesting the provision of equipment to the Ukrainian military, yes.

Senator REED. Thank you very much, Dr. Carter, for your service.

Mr. Chairman, thank you.

Chairman MCCAIN. Senator Wicker?

Senator WICKER. Thank you very much.

Thank you for your testimony, Dr. Carter. I look forward to supporting your confirmation and look forward to working with you.

At a point some 2 or 3 years ago, the Pentagon, along with the Administration, made a decision to rebalance to the Asia Pacific. I want to ask you about that.

Would you agree that our challenges with regard to an expansionist Russian agenda, the situation in Eastern Europe, and other areas near the former Soviet Union have become more challenging, and that also our challenges in the Middle East are more problematic now than when the decision was made to pivot to the Asia Pacific?

Dr. CARTER. You are absolutely right. The issues in the Middle East and in Ukraine have developed since we first formulated that rebalance. That is true.

Senator WICKER. Tell me this, how do you understand, as a prospective Secretary of Defense, the rebalancing to the Asia Pacific will actually work? Can we afford to move resources from Europe and the Middle East to the Asia Pacific, given the circumstances that we see today in 2015?

Dr. CARTER. Thank you. Thank you for that question.

The rebalance to the Asia-Pacific region, as the term goes, is in my eyes a commitment to continue the pivotal American military role in the Asia-Pacific theater, which has kept peace and stability there for decades now.

It has been that American underwritten peace and stability in a region where there are still many historical animosities and unhealed wounds of the past, it is that stability underwritten by the United States that has allowed the Japanese miracle, then the

South Korean miracle, then the Southeast Asian miracle, and today the Chinese and Indian miracle. It is thanks to us that that environment has been created.

In a sentence, I think the rebalance is a commitment to keep that going. Now you ask can we do that and keep our commitments in the Middle East and to Europe at the same time? My view is that we can and must. Let me say why that is possible.

I think that while ISIL and events in Ukraine are terribly important in their own regard and require a lot of attention and take a lot of attention. They are on the television. They are in the headlines and so forth. The Asia Pacific is not.

We have to remember that half the population of the world and half of its economy is in that region, and our military presence there, the naval presence, the air presence, our allies and partnerships finding new allies, building new partnerships, conducting exercises, those things can be done at the same time that we are doing what we need to do in Ukraine and that we are doing what we need to do in Iraq and Syria. I think the world needs to know the United States can do more than one thing at once and we can keep our commitments there.

Senator WICKER. Is it going to be necessary to move resources from the Middle East and from concern over Europe and Russia to the Asia Pacific, to move resources? Sounds like you are proposing a continuation of longstanding, ongoing policy.

Dr. CARTER. It is a longstanding, ongoing policy. But to keep the American military predominance in the Asia Pacific requires us continually to modernize and add to what we have there. We are adding ships. We are adding electronic warfare. That is, we are improving our forces qualitatively. We are investing in them.

A new bomber, which is, importantly, intended for that theater, which I think is very important. We are buying new capabilities that won't necessarily have a role in the Middle East or in NATO but are principally designed for that theater, and I think we need to keep those investments going.

Senator WICKER. You don't advocate a diminishment of the resources we are spending with regard to the Middle East or Russia and Europe at this point, do you?

Dr. CARTER. No. I think we need to keep our investments going. When it comes to day-to-day deployments—I don't want to get into too much detail here, but I am sure you know this. When it comes to day-to-day deployments and the location of ships and so forth, we do move back and forth between the Gulf and the Pacific, and so there is some tradeoff there on a day-to-day basis.

But in terms of our fundamental investments in new capabilities and remaining ahead of any other military opponent, including in Asia, and in building and strengthening our alliances with Japan, with South Korea, with the Philippines, with Australia, with Thailand, and new partnerships with other countries like India, we need to keep all that going. It is an important part of the world.

Senator WICKER. Thank you, sir.

Chairman MCCAIN. Senator Donnelly?

Senator DONNELLY. Thank you, Mr. Chairman.

Thank you and your family.

I also want to thank Secretary Hagel for his service as Secretary of Defense and to our Nation. He took the point in Vietnam. He took the point for our Defense Department, and we are grateful for what he has done.

I was privileged to travel with some other senators recently to the Middle East, and we talked to a number of the Nations there. I just want to make sure that in your mind, do you believe when we look at ISIL our goal should be to eliminate them on a permanent basis?

Dr. CARTER. Yes, I do.

Senator DONNELLY. One of my concerns is time. What I mean by that is when you look at the map of where they were a year ago, where they are now, they have substantially grown.

We have windows that we are working in. When we look at our plan, I am concerned about how when you look at the depth and the size of our plan that what it really does, they have 30,000. We are talking hundreds. It gives them time to grow even more, and you worry about a tipping point where X crosses Y, and they become much more difficult.

What kind of time plan are you looking at to get movement on this?

Dr. CARTER. I think it is important to strike back at ISIL as we are doing from the air, but to begin to retake territory as soon as we can build the forces on the ground, which will be local forces that are capable of sustaining defeat when we have achieved defeat in a given location.

I hope that in coming months, and again, I am not in a position to have any special information about this or talk to our commanders or so forth. But it is my understanding that in coming months, the Iraqi security forces, assisted by us, will begin to take back territory from ISIL.

I think you are right that it is important to get that territory back soon because you don't want them to settle in, and you don't want the population to settle in to having ISIL to rule them in their barbaric way.

Senator DONNELLY. When we talked to the king yesterday and to others in the region, what they said is we are not asking you to fight our battle, but we need you as a partner, shoulder to shoulder, to help us train, to help us plan, to help us implement. Is that what you see our ground role as?

Dr. CARTER. Yes, I think exactly right. You are referring to the assistance we provide to the Jordanians, if I understand the question? Absolutely.

Senator DONNELLY. Right. And to the other nations that are looking at the same thing.

Dr. CARTER. That is right.

Senator DONNELLY. Switching themes a little bit, one of the things we had testimony on yesterday was in regards to DOD and the VA [Department of Veterans Affairs] with drug formularies. We lost 479 young men and women to suicide in 2013 who were in the military. We lost 132 in combat. We don't want to lose any more.

Part of what General Chiarelli was telling us is that with the drug formularies, it causes dramatic change for those who are coming off and going into the VA. All of a sudden, they look up, they

are being forced on different drugs and stuff. As Secretary of Defense, are there things you can do to help us with that?

Dr. CARTER. I think there definitely are and must be. I think the relationship between the Department of Defense and the Department of Veterans Affairs has to be a relationship like this because it is one soldier. They cross the boundary from one to the other when they move and become a veteran, but it is one soldier.

I am familiar, or that is I remember from years back when I was in the Department, of this question of the different formularies. DOD calls a drug one thing, and VA calls it another thing, and they have one set of dosages, and the other a different set.

We have to get these together. It is one patient. It is one soldier.

Senator DONNELLY. They get lost in the shuffle.

Dr. CARTER. Exactly.

Senator DONNELLY. It is at a most critical time to them personally, and so your absolute commitment to that, and I know it is, is going to be critical.

I wanted to ask you one other thing, as I am starting to get a little short on time. That is your expertise in the nuclear area, and I was wondering if you are familiar with a report issued by Madelyn Creedon [Assistant Secretary of Defense for Global Security Affairs] and Rear Admiral Peter J. Fanta [Joint Chiefs of Staff]? They did a Department-wide nuclear enterprise review. It is classified, but it is very sobering.

I just want to make sure that—I didn't know if you had seen it yet. If you have, will you take ownership of the issue and ensure its findings are addressed?

Dr. CARTER. Thank you, Senator.

I have not had access to that particular report. But with respect to the nuclear enterprise, I have a long history in that regard and am a strong believer in a safe, secure, and reliable nuclear arsenal for the United States. That encompasses both the nuclear weapons themselves and the delivery systems of the Department of Defense and the command and control systems for it.

I can well understand if they are calling attention to the enduring need to make that a priority. That is another thing that is not in the newspapers every day. Thank God, nuclear weapons being used aren't in the newspapers every day. But it is a bedrock of our security, and we can never forget that.

Continuing quality and excellence in the nuclear enterprise is very important. I am committed to that.

Senator DONNELLY. Thank you.

Chairman MCCAIN. Senator Ayotte?

Senator AYOTTE. I want to thank the chairman.

I want to thank you, Dr. Carter, for all your service to the Nation and your willingness to serve again.

I would like to ask you about according to the Director of National Intelligence [DNI], we know that at least 107 terrorists who were formerly detained at Guantanamo and then released have been confirmed of reengaging in terrorism. In fact, an additional 77 are also suspected of that. In fact, we know that public reports tell us that at least two Guantanamo detainees have also joined ISIL.

What I would like to ask you, number one, there were reports that Secretary Hagel said that he was under pressure to increase

the pace of transfers of Guantanamo detainees by the Administration. As you know, the statute says that you, as the incoming Secretary of Defense, will have to make the determination, and there is a whole set of factors. In particular, you have to determine that actions that have been or are planned to be taken will substantially mitigate the risk of such an individual engaging or reengaging in any terrorist or other hostile activity that threatens the United States or United States persons or our interests or I would assume our allies as well.

I would ask you, Secretary Carter—soon to be Secretary Carter, thank you. But I would ask you to tell us and to make a commitment to this committee that you will not succumb to any pressure by this administration to increase the pace of transfers from Guantanamo. Will you commit to that?

Dr. CARTER. Absolutely, Senator.

Senator AYOTTE. I would also ask you to commit to this committee that you will take with the utmost seriousness because we had General Mattis before the committee the other day, and he expressed deep concern over the notion that one of our men and women in uniform could confront a terrorist that we had previously captured and the implications to them, that you will commit to this committee and to all of us that you will not allow the release of someone that you think could reengage in terrorism so that our men and women in uniform will be confronted with them again.

Dr. CARTER. I do, Senator. I understand my responsibilities under that statute, and as in everything else I do, I will play it absolutely straight.

Senator AYOTTE. We appreciate that. That is very important because we have seen an accelerated release of detainees. As you know, there have been public reports about one of the Taliban Five reengaging in terrorist activity. This is something that I think is of utmost importance.

The last thing that one of our men and women in uniform should confront is a terrorist that we had previously captured, and I know you agree with me on that.

Dr. CARTER. Yes.

Senator AYOTTE. I wanted to follow up on the aid to Ukraine, and I really appreciate the comments that you made that you are inclined to support lethal aid to Ukraine. When we met in my office, you had told me that you were actually there and involved in the signing of the Budapest memorandum in 1994. Is that right?

Dr. CARTER. That is right.

Senator AYOTTE. As you look at what is happening in Ukraine and having been there for the signing of that memorandum, what are the implications given that the Ukrainians gave up their nuclear weapons in return for the assurances not only from the United States of America, but Russia, who has clearly violated blatantly the Budapest memorandum, if we don't support Ukraine, given that we do not want more nuclear proliferation around the world? I would assume that it would send the wrong message if you give up your nuclear weapons and we don't provide you at least defensive weapons, why would any country give up their nuclear weapons again?

Could you tell me what you think about the violation of that memorandum and the significance of it?

Dr. CARTER. Thank you, Senator.

It is a clear violation. I was there. I remember when that agreement was signed in Budapest in 1994. As I think Senator Lieberman said, I ran the Nunn-Lugar program during that period, and I was in Ukraine the day the last nuclear weapon rode across the border from Ukraine into Russia.

That agreement provided for Russia to respect the territorial integrity of Ukraine, which it has obviously not done, and that was part of the climate and context in which the Ukrainians agreed to give up nuclear weapons in the first place. By the way, the United States took on a commitment in the very same agreement to respect, but also assure, as the phrase goes, the ability of Ukraine to find its own way as an independent country.

That is at stake today, and that is why I think I think that we need to provide support to the Ukrainian government as they try to maintain a position—find their own way in Europe.

Senator AYOTTE. Thank you. My time is up, but I also think it is very important that we also buttress our NATO support for the Baltics as well in all of this.

Thank you.

Chairman MCCAIN. Thank you, Gillibrand?

Senator GILLIBRAND. Thank you, Mr. Chairman.

Welcome, Dr. Carter.

As we met prior to this testimony, we covered a few issues, and I am going to submit questions for the record since we won't be able to cover all of them. They include military sexual assault, issues concerning combat integration, military compensation, cyber, Iran, and Syria. I will send those so you can answer them in due course.

Specifically, let us focus a little bit on the military sexual assault issue, which you know I am very passionate about trying to solve this scourge. One of the concerns I have is that last year we had 20,000 cases of sexual assault and unwanted sexual contact within the military, and I would like your view as to whether you believe that level of sexual assault today is still the good order and discipline we would want from our Services?

Dr. CARTER. No, Senator. It is not. You used the word "passion". I have the same passion you do. This problem of sexual assault is something that persists in our military. It is widespread in our society, but it is particularly offensive in the military community because the military ethos is one of honor and trust. You have to trust the person who is, so to speak, in the foxhole next to you. These are violations of honor and trust.

Also in military life, we put people in positions, we put them in situations of austere deployment, of a situation where the hierarchy of military life is a necessity in battle, and these also provide opportunities, this context, military context for predators. It is more offensive in military life even than in civilian life, and we have to root it out.

I know that many members of this committee, but you especially, Senator, have led in that regard, and I am grateful for the

thoughts and, frankly, for keeping the heat on. If I am confirmed, I will feel that heat, and I will understand it and be with it.

Senator GILLIBRAND. The one statistic I was particularly concerned about, the most recent report is that of all those who were willing to report the assault openly were retaliated against. Sixty-two percent of those who reported these crimes were retaliated against, experienced some form of retaliation.

I am highly concerned that the military is still failing in living up to their zero tolerance policy. Do you agree?

Dr. CARTER. I do agree that retaliation is a dimension of the problem that, to me at least, is becoming increasingly apparent. This is a problem, if I may say, and you know this because you have worked so hard on it, but that the more we dig into it, the more dimensions of it we come to understand.

I think the idea that victims are retaliated against not only by the hierarchy above them, but by their peers is something that is unacceptable that we have to combat also. The survey that you referred to indicated that that is widespread, and we need to get at that.

Senator GILLIBRAND. I understand from your testimony that you place a premium on the chain of command, and I fully understand that for combat situations the chain of command is not only essential, but necessary in every respect. I would like you to, though, consider all options for how you can reform the military justice system, to actually professionalize it, make it more effective.

When our allies have reformed their military justice system to guarantee more civil liberties and to professionalize it and to take out biases, they have not seen diminution in the ability to train troops, to instill good order and discipline within the troops, and to do their jobs.

I would ask you that you would keep an open mind to look at all possible solutions for improving our criminal justice system within the military.

Dr. CARTER. I will.

Senator GILLIBRAND. Thank you.

Another concern that I have is in terms of the issue of how we can create opportunities for women in combat. One of the issues that I have looked at is how are each of the Services being able to open those positions, opening all positions to women in combat. Because, as you know, in order to become promoted within the military, oftentimes combat missions are required and having certain roles that require combat is required for promotion.

Are you committed to allowing women to serve in all positions and to gender neutral standards for each of the Services?

Dr. CARTER. I am certainly committed to gender neutral standards. What I do know is this, that the Services are examining whether there are any positions in the military that should not be open to women.

I strongly incline toward opening them all to women, but I am also respectful of the circumstances and of professional military judgment in this regard. I have not been involved in those studies. If I am confirmed, I would want to confer with our own leaders in the Department of Defense, with you and others who have thought carefully about that problem, and try to come to a view.

Senator GILLIBRAND. Thank you.

Thank you, Mr. Chairman.

Chairman MCCAIN. Senator Ernst?

Senator ERNST. Thank you, Dr. Carter, for being here today.

Thank you, Mr. Chairman.

Also, Senator Lieberman, thank you for joining us today.

As we sat down in my office the other day, one thing that, hopefully, was very clear to you was my passion for the National Guard and the Army Reserves and all Reserve members, actually. We have spent a considerable amount of time talking in this forum about sequestration and the effects on our Services, not just our Active Duty Forces, but also those that serve as wonderful “week-end warriors”.

I would love for you to please address the panel and just talk to us and explain to us those impacts that you have seen regarding sequestration and how it has impacted those Reserve and National Guard forces, please.

Dr. CARTER. Thank you, Senator. By the way, thank you for your own service. I appreciate it.

I begin by saying we owe a great debt of gratitude to the Guard and Reserve for what they have done over the last 12–13 years. I know this from the time I was in the Department of Defense previously and the wars in Iraq and Afghanistan were at their peak. We couldn’t have sustained the tempo of combat in those two locations without the contributions of the Reserve component of our military.

If there was ever a time when their value was made clear, it has been in the last 10 to 12 years. They are impacted, as every other part of the Defense Department is, by sequester. That is the terrible thing about sequester. It hits everybody, and it hits them hard, and it hits them soon, which means that we don’t have time to adjust.

I think the Guard and Reserve component have borne the impact of sequester as all the rest of the departments have, sad to say.

Senator ERNST. Thank you for that. I appreciate that.

If confirmed, we do have a number of rising threats that we see all around the world and specifically in the Middle East right now. Considering those threats, with many new possible deployments coming up, then, if confirmed, how do we ensure that our Guard and Reserve units then maintain their ability to reinforce our Active Duty component as effectively as they have in the past dozen years? How do we ensure that they are being supported?

Dr. CARTER. Thank you for that, and that is the key issue, as you well know.

I think that the Reserve component forces need to be as prepared to go into action, if they are called to go into action, as any Active Duty element. You never want to send anybody into harm’s way on behalf of the United States who hasn’t had the training and isn’t fully prepared and isn’t adequately equipped to do the job.

I think it is important that the Guard and Reserve are at a state of readiness that is commensurate with the need we have for them. One other thing I will add is that they also, not incidentally at all, very importantly, play a role in responding to disasters in our own

country. That is another important and, by the way, also amply demonstrated in recent years attribute of having them.

Both for defensive or to civil authorities and for deployment in a national security emergency, they need to be fully ready when we need them.

Senator ERNST. Thank you much, Dr. Carter.

Thank you, Mr. Chairman.

Chairman MCCAIN. Senator Manchin?

Senator MANCHIN. Thank you, Mr. Chairman.

Dr. Carter, thank you so much for, first of all, all the service you have given. Having such an esteemed senator introducing you, that shows your intelligence there. Next of all, willing to serve at this most difficult time. I appreciate all of that because I know how difficult it is.

We had an unusual day yesterday, and we got to speak to King Abdullah. Without revealing too much about it, I am sure that you have been briefed on that. But the bottom line was this. We are all concerned, I think, and our chairman has taken the lead on this, how we are going to accelerate what we do and what we think in this committee of quick we can get necessary military equipment to the people willing to fight, and the Jordanians are willing to fight.

About the red tape, I just couldn't believe what I heard yesterday, all the red tape that they have to go through to get something on the front lines to help them defend themselves. I didn't hear so much they need our combat troops. They need our expertise and our people in the right places to make sure we are efficient.

They just need the weapons to do the job. Do you have thoughts on that or how you can help us on that and break through this gridlock?

Dr. CARTER. I do. I don't know what you heard, but I could well believe what you heard because I have a long experience of frustration with getting equipment to the warfighter—our warfighters, never mind partner warfighters—on time. This is an element that is important when we talk about acquisition reform. The cost control is very important, but also getting things done.

When I was working on the wars in Afghanistan and Iraq, it was, even for Americans, assistance to our own forces way too much red tape stood in the way. You had to constantly try to cut through that.

I guess in the context of the Jordanian circumstance, which I am not familiar with. I am sure you know more about it on the committee than I would as a nominee, but I do read the newspapers, and I understand the need. I can well believe that it is slower than King Abdullah finds acceptable and that you and I would find acceptable.

I guess all I can say is if I am confirmed as Secretary of Defense, this is one I am pretty familiar with, and I would work to get those things out there the way we did MRAPs.

Senator MANCHIN. It seems like the greatest challenge is coming out of the State Department, and we are going to help them work on that, I think. The chairman is committed to that, and the ranking member and all of us are on the same page. This is not a par-

tisan thing. This is basically an American thing we want to get done.

If I can go to that, basically, in the auditing, I am very concerned about the cost of our military and if it is being spent efficiently. There is not a person in West Virginia, not a person in the country that won't sacrifice for a person in uniform. Not one.

They will give up something. They will pay more taxes. They will do whatever you ask them. But we have to make sure we are spending it wisely, and I think that our chairman has been very diligent on this for many, many years. I am concerned.

I am also concerned, we don't touch on this, is the size of the staff. If you look at the size of the staff and how they double and quadruple, and every time we get a new change, the staff, and we don't talk about that. We just talk about our readiness and having people be able to perform. But no one is checking the staff sizes, and I am told from people on top, they don't need these sizes. But no one can get rid of them.

Put them back where they are needed. Also using our Guard and Reserves, but the staff size, that is something you will have oversight on?

Dr. CARTER. It absolutely will. I agree with you. We need acquisition reform, but we need to reform lots of other things, too. Overhead, headquarters staffs, lots of parts of the Department, for just the reason you say.

Senator MANCHIN. Let me tell you why the audit is so important and why I am so committed to having an audit of the Defense Department. I think we can help you help yourself of the institution.

The reason I say that is there is a lot of things that you are doing that sometimes you don't ask for, you don't want. There is equipment being sent your way. There are things being produced in different parts of the country just because of who we are, and we want to make sure that our people are getting the jobs.

I agree to that, but I can tell you if there is something we are building in West Virginia you don't need, I will be the first to go and tell them we are going to find something else to do. Because we are not going to force you to buy something you don't need or don't want. I think we all have to bite the bullet there, but we have to look at this, and we won't know unless we have an audit.

I would hope that you are committed to helping us get that audit and a complete transparency of what is going on. Also the contractors, I have been here 4 years, and I cannot get an accurate count of how many contractors that we have and what branches.

Dr. CARTER. Thank you.

I am committed on the audit front. I understand what you are saying about contractors and agree with that as well, and I appreciate what you say about us working together to make sure that we buy what we need and that we buy it well.

Senator MANCHIN. Thank you, sir.

Chairman MCCAIN. We will have Senator Sullivan, and then we will take a break after that. How long do you need?

Dr. CARTER. Ten, 15 minutes.

Chairman MCCAIN. Fifteen minutes, and then after that, the next questioners would be Senator Heinrich and then Senator Fischer, and then Senator Shaheen would be in line for the next

questioners after a 15-minute break. The committee will stand in recess for 15 minutes after Senator Sullivan is finished with his questions.

Senator SULLIVAN. Thank you, Mr. Chairman.

Dr. Carter, I want to thank you for your service and particularly, and you point out, your family, your wife and kids. I know how much they go through in these hearings. Sometimes it is tougher on them than it is on the nominee. I want to thank them as well.

I wanted to start with just a little history and geography. In 1935, General Billy Mitchell, often referred to as the father of the Air Force, was testifying in front of Congress. He said that, "I believe that in the future, whoever holds blank—this place—will hold the world. It is the most important strategic place in the world. It is the most central place in the world for aircraft, and that is true either of Europe, Asia, or North America."

Do you know what place General Mitchell was referring to in his testimony in 1935?

Dr. CARTER. I think, Senator, it was Alaska.

Senator SULLIVAN. Correct. It was Alaska.

[Laughter.]

Senator SULLIVAN. Do you agree with General Mitchell?

Dr. CARTER. I do. I would point out that one proof of what he said, I suppose, is that your State is home to one of our principal missile defense batteries, and the reason for that is that it is kind of on the way to and from a lot of bad places.

Senator SULLIVAN. I look forward to hosting you in Alaska soon to show you why General Mitchell was correct. But I want to get actually to, if confirmed—

Chairman MCCAIN. Excuse me. Senator Reed says maybe that is why he was court-martialed.

[Laughter.]

Senator SULLIVAN. I think he may have had a drinking problem, but I am not sure. His strategic assessment was still very correct.

A tough part of your job is as a member of the President's Cabinet. It is also a critically important part of the job, if confirmed, is leveling with this committee. You are showing your kind of straightforward approach, which I think is great, but also with the American people. I think we all recognize there are challenges, but in some ways when the President is talking to the American people, his views seem to differ.

Let me give you a few examples. In his State of the Union, he painted a what I would consider a benign, almost delusional view of the world environment, with quotes like "The shadow of crisis is past." "We are stopping ISIL's advance." "We are opposing Russian aggression." "We have halted the progress of Iran's nuclear program." These are all quotes from the President to the American people.

Do you agree with his assessment in these areas?

Dr. CARTER. I think that if I am confirmed as Secretary of Defense, I am going to be confronting some of the most challenging problems that we have had in our national security in a very long time. My intention and my obligation will be to help our President and help our country confront those problems and provide the advice to the President that will help him deal with, though we have

many efforts and many successes because we are in the indispensable Nation in this world, we have many challenges.

I think my role for him, if confirmed, is to help him work through these challenges.

Senator SULLIVAN. But again, just in terms of straightforward approach, you have been watching the international environment. Do you agree with what the President was saying and telling the American people?

I think it is critical that he level, that you level, the Administration levels with the American people on our challenges. I will give you another example. He is talking about ending combat operations in Afghanistan, and yet we are going to maintain a robust CT [counterterrorism] presence, which I think is important.

But a robust CT presence is not ending combat operations. Do you agree with what the President was saying in his State of the Union on some of these specific quotes that I mentioned?

Dr. CARTER. I certainly agree with the President's overall thrust and—

Senator SULLIVAN. That we have a benign world environment right now?

Dr. CARTER. I would say the world continues to pose serious challenges to international order and that the United States is indispensable to the solution of those challenges is what I would say.

Senator SULLIVAN. Let me ask one final question. In the hearings the last 3 weeks that the chairman has had, which have been, I think, a great education for all of us, again, for the American people. I think there was consensus that we certainly need to work on all instruments of American power to integrate those as part of a national strategy to address what I think are significant challenges that the President has not laid out.

One of these instruments that we didn't have 10 years ago, but there was common agreement on is energy and being once again the world's energy superpower in terms of producing oil and gas and renewables. Last week, the President took over 20 million acres of some of the most prospective lands in America for oil and gas development off the table.

Do you agree that having energy and using that to help our national security is important? Would you agree that taking such huge areas of land off the table, billions, potentially billions of barrels of oil, trillions of cubic feet of natural gas, do you think that helps or undermines America's national security?

Dr. CARTER. I certainly think energy security is an important part of national security, and I am incredibly encouraged by the progress that the United States has made in developing new resources, both oil and gas in recent years. I think it is showing up in terms of our economy, and also it is showing up geopolitically.

With respect to the particular issue you raise, Senator, I am simply not knowledgeable about it and can't give you a knowledgeable answer.

Senator SULLIVAN. Okay. I think those kind of actions undermine our national security significantly.

Dr. CARTER. I understand.

Chairman MCCAIN. The committee will stand in recess for 15 minutes and then reconvene. The next questioners will be Senator Heinrich, Senator Fischer, and Senator Shaheen.

[Whereupon, at 10:57 a.m., the committee recessed, to reconvene at 11:19 a.m., the same day.]

Chairman MCCAIN. The committee will reconvene, and we will recognize Senator Heinrich.

Senator HEINRICH. Thank you, Mr. Chairman.

Welcome back, Dr. Carter. It has certainly been a pleasure to work with you, and I just want to say it is really refreshing to work with someone in this potential position who has both your technical background and your ability to work with people across the Services and with Congress. You seem to balance those things remarkably well, speaking as an engineer who struggles with that myself sometimes.

If I remember right, I believe you served as staff director for the Congressional Commission on the Strategic Posture of the U.S. that released its report back in 2009, when I was sitting on the House Armed Services Committee. I think that report made some very important strategic recommendations.

In particular, I thought the idea that Los Alamos, Livermore, Sandia, should be designated as national security rather than nuclear weapons laboratories was a very important recognition of how the threat environment that we face in the world today has changed.

In addition, one of the things the commission recommended was that the President issue an executive order formally assigning the Secretaries of Defense and Energy, State, Homeland Security, and the DNI joint responsibility for the health of these laboratories, and you and I discussed this a little bit when we met in my office recently.

I wanted to ask you, based on a recommendation from the Strategic Posture Commission, what sort of joint responsibility do you believe that the Department of Defense should have for our National labs?

Dr. CARTER. Thank you, Senator.

I recall our conversation, and you are right. I was executive director of the so-called Perry Schlesinger Commission, which did make the recommendation you pointed to.

The National Laboratories, the so-called National Laboratories of the Department of Energy actually are national laboratories. I know this because when I worked in the Department of Defense as acquisition executive, we used them a lot. We asked them to do things because of their technical excellence.

Those laboratories that were founded to serve the nuclear arsenal of the United States and continue to do so now do lots of other things for national security—for the Department of Defense, for the Intelligence Community, for the law enforcement community, the Homeland security community. I think they call it “work for others”.

Senator HEINRICH. Exactly.

Dr. CARTER. Which means other than the Department of Energy. But it is important, and it was certainly valuable to the Depart-

ment of Defense when I was there to be able to get that kind of technical excellence.

Senator HEINRICH. I think one of the challenges has been that originally work for others didn't really exist at the National Labs. They were solely nuclear enterprises. As that has become a larger and larger percentage of what they do, it has been more challenging to sort of feed the underlying foundational aspects of the lab, the overhead and other things.

What I would hope is that if you are confirmed, and I certainly hope that you are, that I can count being able to work with you to figure out if there is not a way we can formalize that responsibility for the health of DOD and the other agencies I mentioned, as well as for the long-term health of those national security laboratories?

Dr. CARTER. I understand. If I am confirmed, I look forward to working with you on exactly that. I understand.

Senator HEINRICH. I want to move back to Ukraine for a minute, and we heard earlier about the issue of providing additional defensive military equipment to the Ukrainians. We have also heard a lot of testimony in recent weeks emphasizing the importance of deterring additional Russian aggression in the Baltics—in Estonia, Latvia, and Lithuania—particularly by continuing to position more NATO troops and equipment in those places.

I just wanted to get your sense for are we doing enough in that region to deter additional Russian aggression in the Baltics?

Dr. CARTER. Thank you.

I think it is very important that we do deter Russian aggression in the Baltics. The Baltic states are part of NATO, after all. It is a pretty big deal.

But to answer your specific question, are we doing enough? I am familiar with what we are doing. I have not been in a position to discuss it with our commanders there or any of the European leaders and so forth. That is something that I would, if I were confirmed, be a very early priority to see whether we are, in fact, doing enough.

I know we are doing things. We are rotating forces in there to serve as a warning and a tripwire that NATO really is there, and I certainly support doing that. But everything we are doing I am probably not aware of, and what more we can do I have not investigated, but I promise if I am confirmed, I would. It is very important.

Senator HEINRICH. Thank you very much, Dr. Carter.

Chairman MCCAIN. Senator Cotton?

Senator COTTON. Thank you, Mr. Chairman.

Dr. Carter, thank you for being here today. Thank you for your service to our country.

Yesterday, we saw the Islamic State burn alive the pilot of one of our key allies. In recent months, they have buried women and children alive. They have crucified Christians. They have beheaded Americans and citizens of our allies.

The leaders of the Islamic State, the ones who direct and in some cases commit these atrocities, have critical knowledge that we need to stop them. They know where hostages are being held. They have information that would allow us to go after the Islamic State's fi-

nancial support. They know where other senior leaders are. In short, they have a lot of intelligence value.

If American forces were to capture one of these leaders, say, Abu Bakr al-Baghdadi, or one of his senior lieutenants, would you recommend that the President send him to Guantanamo Bay so he could be fully interrogated for intelligence value?

Dr. CARTER. I would certainly recommend that he be interrogated for his full intelligence value. It would be a legal determination about where he ended up and so forth. But I think it is important that we get that intelligence value if we do capture people like al-Baghdadi.

Senator COTTON. Would you recommend that he stay in American custody or that he be transferred to the custody of an ally?

Dr. CARTER. As I sit here right now, I don't know enough to answer that question. That would be a legal determination about his ultimate disposition. I think the key from a Secretary of Defense's point of view, prospective Secretary of Defense's point of view would be let us get that intelligence.

Senator COTTON. Would you want to see him transferred into the United States mainland, given his Miranda rights or otherwise put in an Article III Federal court?

Dr. CARTER. Again, I don't know enough to know what the ultimate disposition would be appropriate. I do know that it would be important to interrogate that individual. Whatever the ultimate disposition or legal process was, it should make provision for interrogation.

Senator COTTON. Thank you.

I want to move to the recommendations of the National Defense Panel [NDP] for the overall military budget. The National Defense Panel, as you know, is a bipartisan and congressionally mandated panel that reviewed the 2014 QDR [Quadrennial Defense Review].

That panel stated, "Congress and the President should repeal the Budget Control Act immediately and return as soon as possible to at least the funding baseline proposed in Bob Gates' FY [fiscal year] 2012 defense budget." The panel went on to note that while even that amount would likely be inadequate, it represents "the minimum required to reverse course and set the military on a more stable footing".

Do you concur with the National Defense Panel's recommendation that Bob Gates' fiscal year 2012 recommendation for the coming fiscal year is the minimum funding baseline needed for the Department of Defense?

Dr. CARTER. The 2012 baseline, just to make sure I understand correctly, would have removed \$500 billion from the defense plan at that time. A sequester would have removed twice that.

I don't know what the National Defense Panel said, but I would say that if what they were saying was that the sequester level was unacceptable and that the level that Secretary Gates recommended was the one that they supported, I actually supported that, too, and continue to think that sequester is a bad idea.

I am familiar with the results of the National Defense Panel and its membership, which is very distinguished.

Senator COTTON. To be exact, Secretary Gates' fiscal year 2012 budget said in fiscal year 2016, the budget should be \$610 billion.

At sequester levels, it would be just under \$500 billion. I believe the President recommended approximately \$535 billion. This would be another \$70 billion plus that the defense panel recommends for the coming year.

Dr. CARTER. I see what you are saying. Yes. That is absolutely right, and I think the Defense Department budget has been under pressure now for the last 3 or 4 years in a way that I experienced the effects of firsthand, and they are damaging. That is one of the reasons why I want to get back on track to getting enough money for defense by getting rid of sequester.

Senator COTTON. While \$535 billion or some congressional number in that neighborhood might be better than \$500 billion, you think \$610 billion, as recommended by that panel, is the minimum necessary to put our military back on the right course?

Dr. CARTER. I wouldn't say it is the minimum necessary to get us back on the right course. We are obviously not going to get that amount of funding. But I can tell you that the Department of Defense can make good use of the funding the President has requested.

I will say one other thing. If I am Secretary of Defense, I would like to see more spending on defense. I am very open about that. I want to get rid of sequester, and I would like to see us spend more on defense.

I think that—and this may have been what the NDP was getting at, we are having to accept risk in the execution of our strategy as a result of our funding problems which I would rather see us not accept.

Senator COTTON. Thank you.

Chairman MCCAIN. Senator Shaheen?

Senator SHAHEEN. Thank you, Mr. Chairman.

Thank you, Dr. Carter, for your past service to this country and for your willingness to continue to serve.

I want to talk a little bit about the proliferation of nuclear weapons. I remember being at the Kennedy School when you gave a very compelling presentation that showed retiring or dismantling some of the weapons through the Nunn-Lugar program. I continue to believe that this is one of the most serious dangers we face, both in the United States and in the world, particularly with terrorists like the Islamic State who seem to be willing to do anything to achieve their ends.

I wonder if you could talk a little bit about how to balance the need to address nuclear weapons and material that is still out there with the effort of DOD to modernize our weapon systems and where you see the priorities are and what we need to do to address that?

Dr. CARTER. Thank you, Senator.

I think we need to do both and can do more in the way of securing fissile materials and the other wherewithal of nuclear weapons and also biological weapons and other weapons of mass destruction around the world. I also believe that the United States needs a safe, secure, and reliable nuclear deterrent.

Because as much as we would like to see nuclear weapons and other weapons of mass destruction rid from the earth, that doesn't look like it is something that is going to happen soon. It is impor-

tant that the American deterrent that we provide to our own country but also to friends and allies who rely upon them is safe, secure, and reliable. I think we need to do both and can do both.

Senator SHAHEEN. You wrote an article last year for Foreign Affairs, entitled "Running the Pentagon Right: How to Get the Troops What They Need," and you talked about two lessons from Iraq and Afghanistan. First, that the Pentagon was not prepared to fight a nontraditional enemy and, second, that the length of those wars was underestimated, and there was little incentive to pursue acquisitions tailored to the specific fights.

Can you talk about how, as Secretary of Defense, you would avoid repeating those mistakes of the past two wars?

Dr. CARTER. Yes, thank you, and this is something that I have a lot of passion about, which is why I wrote that. The experience that I had all too often in trying to support Iraq and Afghanistan as the acquisition executive was that when the troops said they needed something, the response of the bureaucracy tended to be, "Oh, we have one of those. We are making one of those. We have one in progress. It will be finished in 10 years."

Incredibly, that is, in essence, the response that would come back from the bureaucracy. We all recognize immediately that that is nonsensical because they needed that equipment, counter-IED [improvised explosive device] equipment, vehicles. They needed it now, not 10 and 15 years from now.

Our acquisition system got in the habit, and I think the chairman was referring to this earlier because it is a driver of cost, but also this problem, got in the habit during the Cold War of doing things very slowly. With the Soviet Union, we always had plenty of time. There was the Soviet Union. It was the Cold War. It would go on for a long time.

We would have programs that extended over 10 and 15 years. You can't do that when you are in the middle of a war, and people are dying and success depends upon your acting more quickly. I obviously feel passionately about that. I think anybody who observed that bureaucratic tendency would have the same attitude I did, and we have to turn faster as a military.

It is one thing when you are in war, when you are in competition with other countries that are using the global technology base to advance their own military. If we are going to continue to be the best military in the world, we can't make steps in 15-year increments. We have to turn faster than that. I think that is the larger meaning, and the meaning going forward, the lesson, to use your word, of that experience.

Senator SHAHEEN. My time is almost over. But you and others here today have talked about the importance of procurement reform. I assume that that will be a top priority when you go back to the Department, as it has been in the past?

Dr. CARTER. It would. If I am confirmed, absolutely.

Senator SHAHEEN. Thank you very much.

Dr. CARTER. Thank you.

Chairman MCCAIN. Senator Inhofe?

Senator INHOFE. Thank you, Mr. Chairman.

Dr. Carter, I apologize for not having been here, and I don't want to ask something that has been asked over and over again. We have a conflicting meeting that is taking place right now.

Everyone who has appeared before this committee has talked about the mismatch that is out there, unprecedented mismatch, and I am talking about all the Service Chiefs. I am talking about the old-timers. You know, as you know, we had George Shultz, Henry Kissinger, and Madeleine Albright. All of them searched their memories and could not find a time in our history when we had the level of threats that we are faced with today and the limited resources we have.

That is the mismatch that they are talking about with the things all over the world I mean that are taking place right now. Do you agree with that?

Let me restate that. In the years that you have had such a variety of experience, do you ever remember a time like this?

Dr. CARTER. I think we are in a time where the number and severity of the risks is not something I have seen before in my life.

Senator INHOFE. Yes. Even the President, after what happened yesterday, I am sure, is not talking about junior varsity anymore. We know that we have a really serious problem with ISIL. We have been talking about the fact that they are building a militia, and we now have seen the brutality and what they are capable of.

I would like to have a stronger response from the President when the disaster took place yesterday. I fail to see a strategy in terms of dealing with ISIL, with that force that is over there. Do you see a strategy, and where will you be on this?

Dr. CARTER. Thank you.

I can describe what I believe to be the strategy, and just to revert to what you said at the beginning, when I started my career in defense, it was a simpler world. There was one big problem, which was the Cold War and nuclear disaster.

Senator INHOFE. Those were the good old days.

Dr. CARTER. To get to your point, I assume that this is what your other witnesses were saying, it is a much more complicated world, much more many faceted and many more problems and issues for the United States to take on. At the same time, I believe we are up to it and that we are capable of surmounting all these problems.

With respect to the strategy for ISIL, I would describe it in the following way. Strategy is about connecting ends and means, and the end here is the defeat of ISIL and the sustained or lasting defeat of ISIL. To achieve that lasting defeat of ISIL, we are trying to rebuild the morale and power of the Iraqi military and the confidence of its government in a multi-sectarian approach so that we don't revisit the Maliki experience, which led to the disintegration of the Iraqi security forces.

On that side of the border, the lasting defeat will be made lasting by an Iraqi security forces and associated forces in Iraq that are rebuilt.

One enemy, two locations. To get to the other location, Syria, I believe the approach there similarly needs to be to inflict a lasting defeat. In order to do that, we need a partner, and we are trying to build that partner in terms of a moderate Syrian force and local forces from the region that can, with our air power and other kinds

of assistance, inflict defeat on ISIL and then make it a lasting defeat.

That is how I would characterize what I see. I am obviously not in the counsels of Government, but that is what I infer.

Senator INHOFE. Yes, and I appreciate that very much. Dr. Carter, when you were in my office, we talked about having just returned from Ukraine and also Lithuania. When I first walked in, Senator Heinrich was talking about Lithuania, Estonia, and that area. Their concern was that all of our attention seemed to be in that part of the world, concentrated on Ukraine.

It is true. I happened to be there when they had their election. For the first time in 96 years, they don't have a Communist in their parliament in Ukraine. We have that problem at the same time as the others you are addressing, and what do you think about our European strength as it is right now?

Are we adequate? Are we becoming inadequate?

Dr. CARTER. I think that our strength in Europe is our alliance with NATO and the political solidarity that that represents, which is very important when it comes to the Baltic states, and also the response in Ukraine, which, while not a NATO nation, is certainly a European nation, and European unity is an important part of that. So one of our strengths is that.

Another strength, of course, is our military strength. There I understand that we are adding forces, rotational forces to the Baltic states as a presence there, as a deterrent to any Russian kind of adventurism on the part of Russia in those states. I certainly support that, and if I am confirmed, I would want to look into what more we can do to do that.

I would also say I wish the European states—and many Secretary of Defenses have said this over the years—were investing more in their own defense.

Senator INHOFE. Lastly, I am out of time, but for the record, if you would submit this for the record to me. In the event we are able to get the perpetrator of the horrible crime that took place, would you examine the expeditionary legal complex that we have as a place to do our interrogation?

I heard your response to the first question, but will you at least consider that?

Dr. CARTER. Sure. I will learn more and respond.

[The information referred to follows:]

The appropriate disposition for a detainee is determined on the basis of all the facts and circumstances, including the national security interests of the United States and its allies and partners, and the conduct the detainee has engaged in, consistent with U.S. domestic law and international law. Depending on the circumstances, detainees may be prosecuted in the United States, detained in their home countries, or detained in a third country. The Department makes assessments regarding the appropriate disposition of detainees on a case-by-case basis.

Chairman MCCAIN. Senator Hirono?

Senator HIRONO. Thank you, Mr. Chairman.

Thank you, Dr. Carter.

And thank Senator Lieberman for your continuing presence at this hearing.

Dr. Carter, I appreciate your acknowledging at this hearing the importance of and the seriousness of sexual assault in the military, and in response to questions that have been submitted to you, you

have said that you would take a personal role in addressing the prevention and dealing with this scourge in a much better way. I will have a continuing interest in seeing how you do in that regard.

I also agree with you that the security of our country is very much dependent, I would say, on maintaining the stability in the Asia-Pacific area. Of course, we need to continue our commitment to the rebalance and at the same time be able to deal with the instability in other parts of the world.

Now President Obama recently visited India and announced a series of bilateral agreements with Prime Minister Modi. Can you talk briefly about the future of the United States-India relationship in the context of our rebalance commitment?

Dr. CARTER. Thank you, Senator.

The rebalance is a rebalance not only within Asia—I mean to Asia, to the Asia-Pacific area, but within it. Our historic focus has been East Asia, and I think that your question points to the importance to pay greater attention to South Asia as well.

India is, in my view, destined to be a strategic partner of the United States. It is a large democracy, shares a lot of our political values and values of pluralism. I think that destiny will bring us together, but I am for hastening that.

In the military-to-military area and the defense cooperation and technology cooperation areas, I think there is a great deal that we can do with India. If I am confirmed, I would take a strong interest in doing that.

Senator HIRONO. Thank you.

Do you view U.S. energy security as a vital component to our overall national security and clearly on the military side? What role, if any, do you believe that the Department of Defense has in supporting efforts to increase U.S. energy security?

Dr. CARTER. I think energy security is an important part of national security, and the Defense Department does play a role, not a central role, but a role in energy security. I think every dollar we spend of the defense budget we need to be able to justify on defense grounds, and we make some investments in energy technology because they pay off for the defense budget and for the soldier.

We make investments in batteries, for example, solar cells, insulation, buildings, making them more energy efficient so we can save money. In some ways, the Department of Defense, like other large institutions in the country, is investing in energy efficiency in the future. I think that is an important thing to do.

Senator HIRONO. DOD is the largest user of energy in the Federal Government.

Regarding acquisitions, with your experience in the defense acquisition process, including the time in which you led the Acquisition, Technology, and Logistics Directorate at the Pentagon, as you review our DOD acquisition program with its various cost overruns, delays, et cetera, which others have noted, including the chairman, what would be your first priority to improve the acquisition process?

For example, would you look at the kind of contracts that we enter into? Training, requirements, process—what would be your first priority to improve in that area?

Dr. CARTER. All of those are important. To take the point you made about contract structure, contracts are a way of providing incentives to industry, to control costs and meet schedule. That is an important part of negotiating a strategy.

To get to your other suggestion, in order to negotiate those contracts well, we need people on the Government side who are capable, who understand acquisition and who understand industry. I am in favor of reintroducing to the acquisition system the role of the customer, which is the chiefs of the military services. I think that has been a proposal made by others with which I associate myself.

There is no one silver bullet. There are many things that we need to do to improve acquisition.

Senator HIRONO. Thank you.

Chairman MCCAIN. Senator Fischer?

Senator FISCHER. Thank you, Mr. Chairman.

Thank you, Dr. Carter, for your service and your willingness to continue that service to our country.

I appreciated our frank conversation that we had in my office the other day and look forward to many more in the future. In that conversation and today also, you talk about the deterrence, our nuclear deterrence in this country as being the bedrock of our defense. I appreciate your views on that, and I agree with your views.

We also talked about modernization and the importance of modernization and how as a country we need to step forward and really see that through if we are going to continue to enjoy the security that we have as a country. Thank you for your comments on that.

In 2013, you led the Strategic Choices and Management Review, and in that review, one of the decisions was to reduce major headquarters' budgets by 20 percent by 2019. That plan was required in our NDAA [National Defense Authorization Act] in fiscal year 2014. But the GAO [Government Accountability Office] has issued several reports that really cast doubt on if that is going to take place and even if we have an accurate picture on what the full resources currently are that are devoted to that headquarters staff.

A couple questions here. Will you, if confirmed, maintain the goal of that 20 percent reduction in headquarters budget and staff? How are you going to accomplish it if we don't have any idea of what those numbers are?

Dr. CARTER. I certainly think it is important to diminish headquarters staff and other forms of overhead. I think the 20 percent goal was a sound one.

I do not know where it stands in terms of implementation now. If I am confirmed, I will get back to that and try to meet that goal because we just have to get rid of the overhead here so that we can spend the dollars we have on the warfighter, which is what it is all about.

Senator FISCHER. Have you seen the GAO report questioning if those numbers are even out there, if they are even available? If you believe that, how are you going to get the numbers?

Dr. CARTER. I have not seen that GAO report, but I, if I am confirmed, will find out where the Department stands in terms of implementing that goal and, if they are off track, try to get them back on track because I think it is a good goal.

Senator FISCHER. Do you think now is the time that we should look at elevating cyber to its own command, or even with the commission that we had yesterday, there is a recommendation in that commission for a joint readiness command. When we look at overhead and administrative costs, what would be your initial response to those that are promoting ideas for additional commands?

Dr. CARTER. I am all for paying much more attention to cyber and think we need to do that. But the creation of new commands and new headquarters in this budgetary environment is something I think we need to look at very closely and very cautiously.

Senator FISCHER. As you know, our chairman, Senator McCain, is interested, as we all are, in gaining more knowledge about the information sharing with regards to our cybersecurity threats. That is one area that I believe has broad support. We know there is support not just from members of this committee and members of Congress, but also the President has discussed the need for information sharing on those cybersecurity threats.

I agree that information sharing and better defense is a first step. But do you think that we can achieve relative cybersecurity simply by improving those defenses, or do we need to perhaps go on the offense and impose more I guess you would say visible costs with regards to our actions on cybersecurity?

Dr. CARTER. I think both are important. We need to improve our defenses, but we also need to improve our abilities to respond. Those responses can be in cyberspace or in other ways, but certainly they should include the option to respond in cyberspace.

Senator FISCHER. The option to respond, would you say that would include demonstrating that we have the capability to do so? Is that part of our deterrence when it comes to protecting our country, our agencies, and private businesses when it comes to cyber attacks?

Dr. CARTER. I agree with you. I think deterrence requires that a potential aggressor know that you have the capability to respond, and they obviously can't know all the details of that or they may be able to counter your response. But they certainly should know that you can respond.

Senator FISCHER. And would respond, if necessary?

Dr. CARTER. And would respond, absolutely.

Senator FISCHER. Thank you, Dr. Carter.

Thank you, Mr. Chairman.

Chairman MCCAIN. Senator McCaskill?

Senator MCCASKILL. Thank you.

So many questions, so little time. I want to associate myself with the remarks of the chairman about the weapon systems. You are in a special position because you have been in the weeds, so to speak, on all of this in your previous position, and we worked together on wartime contracting reforms, which now are in the statutes. I know that you will be aggressive about making sure that all of those provisions are adhered to.

I also want to address a question to you for the record on the murky line of responsibility on the building of infrastructure during contingencies in theater while we are fighting. I think what we have learned in Iraq and Afghanistan through the special inspector general's reports is that this line of passing back and forth respon-

sibility for building roads, building highways, building grids, building health centers, building water systems, building power plants between USAID [United States Agency for International Development] and DOD has made it very difficult for us to really hold everyone accountable that needs to be accountable for dramatic failures.

On that note, I wanted to specifically talk about special inspector general's reports. Last week, I learned that for the first time in 6 years, the special inspector general's reports as to the way we are accomplishing our mission in Afghanistan for training and equipping the Afghan National Security Forces and Afghan police was going to be classified by General Campbell. This had never been done before.

Those reports are essential to robust oversight. I kicked up dust last week about it, and on Monday, it was announced that General Campbell was evidently reversing his decision in some regard. I want to ask your commitment to make sure that throughout the chain of command, there is an understanding that the decision to classify is a very precarious decision because if you don't do it when it needs to be done, it is a problem. But if you overclassify, it removes the ability of us and the taxpayers to hold the military accountable.

I wanted to bring that up to you and ask you for your commitment in that regard.

Dr. CARTER. I give that commitment.

Senator MCCASKILL. I also wanted to briefly talk about sexual assault in the military. The report that came out in December, while it still shows work to be done, I think it is important that on the record we talk about the success that we have had.

Reporting is up. We have gone from 1 in 10 victims coming forward to 1 in 4 in a matter of a few years. Incidence is down. Importantly, restricted reporting is up.

Maybe the most important information in that report that hasn't gotten a lot of cover is that in anonymous surveys and focus groups with victims, more than two-thirds of the victims said they had complete confidence in their commanders and how they are handling these crimes and that they feel that their privacy is being respected and that they are being supported. That is huge, and I wanted to point that out because I do think we are making progress.

But on retaliation, that same report, as Senator Gillibrand pointed out, we still have a 62 percent rate of retaliation. If you look at the report, you realize it is not retaliation by the convening authority, by the command that is making the decision as to whether or not to go to general court martial. Rather, it is peer and low-level command that is causing the problem.

In our reforms, we made retaliation a crime. We expect to get a report on how many instances that crime has, in fact, been pursued within the military justice system. The reforms, obviously, just went into place a relatively short time ago.

What do you plan on doing in connection with this retaliation problem and with this new crime within the military justice system to pursue it?

Dr. CARTER. Thank you, and thank you for everything you have done. I have, from the outside looking in, observed and admired the ideas and the energy and the commitment you have shown to getting rid of this scourge of sexual assault, and so, first of all, thank you for that.

With respect to retaliation, that is one of the dimensions that I think the report you cite uncovered as very prevalent. I think the 62 percent of victims were reporting experiencing retaliation. As you say, not so much—although not to the exclusion of, but not so much from the chain of command as from peers and subordinates.

You are right. This is a crime, and its prevalence suggests that we are not doing everything we can, that we need to do to root out that crime.

If I am confirmed, you can count that I am attentive to this issue of retaliation and determined to do something about it, and I will look forward to working with you if I am confirmed.

Senator MCCASKILL. Thank you very much, Dr. Carter. I look forward to working with you.

Chairman MCCAIN. Senator Lee?

Senator LEE. Thank you very much, Dr. Carter.

It is a pleasure to have you here. I appreciate your willingness to be considered for this position. I appreciated the visit we had in my office the other day, and you have certainly proven yourself as someone who knows a lot about the Department of Defense, having served at its highest levels as Deputy Secretary in the past.

I want to talk about a few things. First, let us talk about the F-35 for a minute. The F-35 is an amazing system, with units at Hill Air Force Base that are set to be hosting the F-35 starting this fall. It is a program, however, that has been marred by some delays and some cost overruns, as you know.

As the Department of Defense looks at acquiring other new weapon systems and equipment to make sure that we maintain our technological advantage over our adversaries, I think it is important not only to work time and cost efficiencies in acquisition into the equation for such programs, but also to integrate that with logistics and maintenance processes that are absolutely essential to make sure that we get our money's worth.

With a program like the F-35, the biggest single expenses through the lifecycle isn't just acquiring it. It is also maintaining it and making sure that we get our money's worth out of it.

Given that the Department of Defense has been reforming the acquisitions process in various ways for decades, what would you do differently not only to improve that process, but to make sure that acquisitions and development and logistics are all aligned in a way that increases the lifecycle and increases the efficiency and utility of these various weapon systems?

Dr. CARTER. Thank you, Senator.

It is exactly as you say. The lion's share of the cost of any weapon system is not in buying it, but in having it. Which is why, to get to the F-35 example that you cite, the longstanding battle to control cost in the Joint Strike Fighter program, which I have been part of but is still ongoing and has to go on as long as that program is in existence—it is not perfect yet, it is a long way from that—has to extend into the sustainment phase of the aircraft.

We have worked on cost control in development. We have worked on cost control in the production of the aircraft, and we need to work on cost control in sustainment as well, exactly as you say.

Senator LEE. Thank you. Thank you, and I appreciate your thought on that especially because your experience gives you a real strong ability to appreciate the nuances involved there.

General John Kelly, the commander of SOUTHCOM [United States Southern Command], called last year's border crisis an existential threat to the United States. Do you think that our inability to adequately enforce security at our borders does present a security threat to the United States, including a security threat that could involve the possibility of terrorists entering into our country without our knowledge?

Dr. CARTER. I think control of our borders is an important part of national security, yes.

Senator LEE. That is something that you would continue to watch out for, if confirmed at this position?

Dr. CARTER. Absolutely.

Senator LEE. It was reported on February 2nd, just a few days ago, that Iran successfully placed another satellite into orbit using a two-stage rocket. Do you think that continued development of Iranian ballistic missile technology presents a threat to the United States, and if so, what do you think we ought to do about it?

Dr. CARTER. I do. I think it is a threat not only to the United States, but friends and allies in the region, and it is just one of the things that Iran is doing that is dangerous.

With respect to ballistic missiles that could threaten the United States, I think that is one of the reasons why we need to keep our missile defenses, and especially our ICBM [intercontinental ballistic missile] defenses, current, capable, and large enough in size to deal with both a prospective Iranian threat and the also very real North Korean ICBM threat.

Senator LEE. Thank you.

As has been noted in several capacities that you have had within the Department of Defense, including most recently as the Deputy Secretary, you have had to confront the issue of sequestration. Now many of us, including myself, did not want sequestration to hit. I voted against the Budget Control Act in part because I didn't think that we ought to be putting this burden disproportionately on the Department of Defense as we were.

None of us wanted the super committee to not come up with a solution even after that happened, and many of us hoped that it wouldn't come to that. Of course, it did.

One of the lessons that I think we learned from 2 years ago is that while it is good to hope for the best, we also have to prepare for the worst. What can you do to make sure that we are not caught flatfooted and that we are ready for anything that we have to confront on that issue?

Dr. CARTER. We need to continue to adapt our plans to the resources we are given. My own view is that we have made adaptations over the last few years to our strategy to accommodate the budget squeeze that are getting to the limits of what it is safe to do, and that is why I really want to see an end to sequester.

We need to do more to spend the defense dollar better, and I am all for that as well. But it is also basically the truth that we are getting to the point where we have bent the strategy, as the phrase goes, and I don't think it is safe to keep bending it.

Senator LEE. Thank you. I see my time has expired.

Thank you, Mr. Chairman.

Chairman MCCAIN. Senator Kaine, but before Senator Kaine, I would like to announce that we will break after Senator Kaine and then Senator Graham. There is a vote at 2:30 p.m. We will reconvene at 2:45 p.m. for the benefit of the few remaining Senators and any second round that any member wants. We appreciate your patience, Dr. Carter.

Senator Kaine?

Senator Kaine. Thank you, Mr. Chairman. Thank you, Dr. Carter, for your strong testimony today.

The chair and the ranking member in their opening comments put the issues on the table, and I want to just focus on two of them, the elimination of ISIL and Afghanistan. Senator Donnelly asked if the elimination of ISIL should be the goal. We all had the experience, as Foreign Relations Committee and SASC [Senate Armed Services Committee] members yesterday, of visiting with King Abdullah at a very emotional and difficult time.

I was struck by something he said to us. He said, look, we need you desperately. However, this is a fight that is the region's fight. If we are not willing to stand up against extremism in the region, there is no amount of outside forces, as powerful as they can be, who will be able to beat this fight. He really took ownership of it in a way that I thought was pretty courageous.

Do you think it is possible for the United States military to eliminate ISIL on our own or even with other Western nations if the region doesn't go all in to combat the homegrown jihadism that is exemplified in its most brutal form by ISIL?

Dr. CARTER. We have to have regional partners because we have to make sure that the defeat inflicted upon ISIL is a lasting defeat, and for that, there needs to be conditions created where ISIL is now occupying territory that don't make it a breeding ground for victory for that kind of, what is the right word, malignant and vicious kind of terrorism.

The United States involvement is, I believe, essential. It is necessary, but it is not sufficient to have lasting victory.

Senator Kaine. I would share your view, necessary, essential, not sufficient. It is still my hope that the White House will send to us a draft authorization for use of military force. I think after the President's comments in the State of the Union, that seems more likely. I don't think this is a war that can be waged in perpetuity, without Congress weighing in and putting our thumbprint on the mission and saying that if we are going to ask people to risk their lives in the mission, Congress is going to debate and vote and authorize it.

If we have that debate about the American role, one of the things that I think is notable if, in fact, the region has to go all in against the ISIL threat, so far 80 percent of the airstrikes that have been carried out against ISIL have been United States flown.

Jordan has been rock solid in doing a lot of airstrikes. But the other nations in the region that seem to be directly threatened by ISIL, much more directly even than we are threatened by ISIL, I think have really not, other than being associated with the coalition, I don't think they have really stepped forward in showing—and been willing to show that they are going all in against this threat, which should be an existential one. I think that is going to be the subject of some significant debate if we get into a discussion on authorization.

Now second, Dr. Carter, on Afghanistan, I completely agree with Senator McCain, the chairman's point in his opening. I really hope we have a conditions-based strategy and not a calendar-based strategy.

Now I think it is okay to have a plan, and you indicated a plan is a plan. You can adjust the plan based on the current reality.

Senator King and I were in Afghanistan in October and talked with General Campbell, and it seemed like after those discussions, the White House did adjust the plan once already. There were some ideas about the way U.S. forces would be used in calendar year 2015 that after hearing from General Campbell and others, I think the White House adjusted the authorities granted to U.S. troops during this calendar year, and I think that was a conditions-based decision, which was good.

But I worry for the same reason that you do. We have, at the expense of blood and treasure, achieved a lot in Afghanistan. The Nation's life expectancy has gone from 44 to 61 in 10 years.

My back of the envelope math, I always say 30 million people living on an average 17 years longer, that is 510 million years of human life. That seems like a pretty good ROI [return on investment] to me, for as painful as it has been, for as expensive as it has been. Why would we want to go backward?

I think in Afghanistan that what we heard when we were there was also a little bit of the Iraq worry. Wow, they have taken their eye off the ball before because of things in Iraq and pulled resources away and that this is the perception in Afghanistan. Maybe this is getting ready to happen again, as significant a threat as ISIL is and that we need to be at it.

In Afghanistan, they are a little bit nervous that the ISIL threat will pull our attention away and that we could lose these gains. I hope in your capacity in this new role, as you dig into the plan, as you dig into the daily conditions, that we will make the right decision about how to keep the progress that we have gained in Afghanistan and that we won't let a day on the calendar be the determinant of our policy.

Thank you, Mr. Chairman.

Chairman MCCAIN. Do you want to respond to that, Doctor?

Dr. CARTER. Two thousand one hundred and six Americans, servicemembers have lost their lives in Afghanistan. Afghanistan was the place from which the 9/11 attacks emanated, and so I think finishing the job there is very important.

I have been part of that war in my previous time in the Department. It was what I woke up to every morning, and so I am very committed to success there. We have adjusted what we have been doing continuously as we went along.

I don't have anything to add to what you said, except to remind that the Afghan security forces are what we increasingly have trained to provide security on Afghan territory. They are going to need support after 2016.

In the President's budget, about which I will appear before you in a few weeks, I understand that there is, if my memory serves, \$3.8 billion requested for the Afghan security forces that carries through the end of 2016. Then a question will arise, are we going to stick with them, the Afghan security forces?

It is not just about troops, American troops. It is about the overall commitment so that the Afghan security forces can keep the peace there after 2016.

Chairman MCCAIN. Senator Graham?

Senator GRAHAM. Thank you.

The idea of Joe Lieberman introducing you is a risky proposition, but we will see how that turns out.

[Laughter.]

Bottom line, do you agree with the following statement? The only reason 3,000 Americans died on 9/11 is that the radical Islamists who attacked us could not find a way to kill more of us?

Dr. CARTER. That is probably true.

Senator GRAHAM. If they could, they would?

Dr. CARTER. That is my guess.

Senator GRAHAM. Yes, I don't think it is a guess. I think it is a fact. Do you think ISIL represents a threat to our Homeland?

Dr. CARTER. I do.

Senator GRAHAM. They say they want to attack us. There is no reason to believe they are kidding, right?

Dr. CARTER. I agree.

Senator GRAHAM. The head of ISIL was in Camp Bucca, and he said, "I will see you in New York," when he was released.

Dr. CARTER. Right.

Senator GRAHAM. Everything they have said they would do, they have done. One of the things they want to do is hit us. I couldn't agree more with Senator Kaine about a regional buy-in. If you don't get that, the structural problems really don't change.

But it is just not about the region. The reason I am worried about ISIL is because I think they want to hit us. They have the best platform I have seen since 9/11 in Syria and Iraq to attack the United States. They hold a large territory. They are rich. They have a lot of crazy people under their control, and they mean it when they say they want to hit us, and I want to make sure they don't.

Do you think al-Nusra wants to hit us?

Dr. CARTER. I do.

Senator GRAHAM. They recruited a guy from Florida who was a suicide bomber I think in Syria. He came back to Florida before he actually became a suicide bomber. They are trying to hit us, too.

Do you think AQAP [al-Qaeda in the Arabian Peninsula] wants to hit us?

Dr. CARTER. Very definitely.

Senator GRAHAM. Very definitely. They are the people that hit us in Paris.

Do you think the Iranians have to believe that a military option is on the table during these nuclear negotiations?

Dr. CARTER. Absolutely.

Senator GRAHAM. If they don't, we are making a huge mistake, right?

Dr. CARTER. Absolutely.

Senator GRAHAM. Do you think the Russians are being provocative at a time when the world is already in chaos?

Dr. CARTER. Yes.

Senator GRAHAM. Do you think that a cyber Pearl Harbor is a potential threat we face?

Dr. CARTER. Absolutely.

Senator GRAHAM. And we are not ready for it?

Dr. CARTER. I agree with that also.

Senator GRAHAM. Do you think China is intimidating their neighbors?

Dr. CARTER. Certainly trying to.

Senator GRAHAM. Can you tell me in light of all of this, why in the hell would Congress be devastating the military budget? Can you explain that to me because I can't explain it to myself?

Dr. CARTER. No, I can't. No, I can't. As I am a longstanding opponent, I am against sequester.

Senator GRAHAM. Yes. I left out a bunch of threats because I just have 5 minutes. Canada is in good shape, by the way. We appreciate Canada being a good neighbor.

In 2017, the plan on the table now is to have 1,000 troops left in Afghanistan, Kabul based. Do you agree with me, given the conditions that exist in the region, the likelihood of a reemergence of al-Qaeda and other terrorist groups along the Pakistan-Afghan border, we would be wise to have troops outside of Kabul?

Dr. CARTER. That is not the plan now, Senator.

Senator GRAHAM. Can you please tell me why I am wrong? It is the plan to go down to 1,000 by 2017. They increased the number of troops in 2015, but it is the plan. If you are going to be Secretary of Defense, you need to understand the plan. The plan is to go to 1,000.

I think that is beyond unwise. That will destroy our ability to see, hear, and listen to what I think is a reemerging threat along the Afghan-Pakistan border. If I am wrong about the plan, please correct me. This is something you can go home and check out for yourself.

Dr. CARTER. No, I think you are correct—I think you are correct about the plan.

Senator GRAHAM. Yes, that plan needs to change.

Dr. CARTER. That is the understanding I have of the plan.

Senator GRAHAM. If it doesn't, we are incredibly stupid as a nation. I want to withdraw from Afghanistan responsibly. I want lines of defenses over there so they don't come here. Doesn't that make sense?

Dr. CARTER. It does make sense.

Senator GRAHAM. I am glad Afghans are living longer. I am glad that Afghan girls are going to school. I am proud of what we have accomplished. But I am worried about Americans living longer. The reason I want to continue to invest in Afghanistan, the reason I

want to deal with ISIL and al-Nusra and all the other groups is because they are trying to hit us.

Do you agree that the only way you can deter radical Islam—you can't deter it, you have to prevent the attack before it occurs?

Dr. CARTER. Sir, I can't give a simple answer to that.

Senator GRAHAM. They don't mind dying.

Dr. CARTER. I think that a comprehensive counterterrorism strategy begins foremost with defenses but has other dimensions as well in terms of removing the conditions that create safe havens and some of the ability for recruiting of terrorists. It is a complex issue. But protecting ourselves needs to come first.

Senator GRAHAM. I will close with this. To me, it is not complex. The only way you can keep them from coming back here to America is to stay over there, disrupt their operations. Keep them on the run. Do not let them gather strength. Make them poor, on the run, and less entrenched.

I will end with this thought. Syria. How in the world are we going to dislodge ISIL from Syria without a ground component? I agree with Senator Kaine that that ground component has to be regionally based.

We just came back from the region. People want to go in. Saudi Arabia said you could have our army. The Emir of Qatar said we will pay for the war, but you have to deal with Assad.

How can we train up a Free Syrian Army or send any other force into Syria if we don't first deal with the Assad air threat? How in the world could you train somebody to go fight ISIL, and then one day they turn on Assad and not expect him to kill them before they get the capacity to come after him one day? How does this work without dealing with Assad?

Dr. CARTER. Senator, let me say something about that. It is a very important question. The situation in Syria is, as you indicate, more than a problem of ISIL. It is a problem of the Assad regime as well. The forces that we are supporting there have, first and foremost, the job, as we have discussed here this morning, of defeating ISIL.

But I believe that they also need to be creating the conditions for the removal of Assad. That is a much more complex task. I understand that. I am not trying to oversimplify it. But I think that has to be at the end of the road, and if that is what you are pointing to, I completely agree with you.

Chairman MCCAIN. Could I just say you really didn't respond, in all due respect, Dr. Carter, to sending young Syrians in, training them in Saudi Arabia and sending them in to Syria to be barrel bombed by Bashar Assad. The morality of that alone, much less the unworkability of it, is in contradiction to everything the United States ever stood for or fought for.

I hope you will rethink your answer to Senator Graham's question. This idiocy of cooperating with the Iranians and also taking "ISIL first", of which Bashar Assad is the father, is nonsense and, as I say, immoral.

The committee will return at 2:45 p.m., since there is a vote at 2:30 p.m. Members who seek a second round or those members who have not had the opportunity to ask questions will be allowed to at that time. We will stand in recess until 2:45 p.m.

Thank you.

[Whereupon, at 12:23 p.m., the committee recessed, to reconvene at 2:47 p.m., the same day.]

Chairman MCCAIN. Thank you, Dr. Carter, for your patience. As usual, with the efficiency of this well-oiled machine, we have a vote now starting now, so we will be going back and forth.

Senator KING is here, and so I would like to recognize him at this time.

Senator KING?

Senator KING. Thank you, Mr. Chairman.

Dr. Carter, I am going to revisit a little bit of the ground that we covered this morning. But I want to make a suggestion. I would urge that you, upon your assumption of this position, undertake an all-agency review of the policy with regard to the leaving of Afghanistan and talk to General Campbell, the military people, the intelligence people, and the State Department. Because like many of the members here, I am gravely concerned that we will miss an opportunity to preserve what we have gained in Afghanistan.

I was going to say we are in danger of fumbling the ball on the 5-yard line. I think a better example might be we are in danger of throwing a pass when you have Lynch in the backfield on the 1-yard line. But we have gained a lot, and to lose it in the end because of an accelerated departure schedule that doesn't really fit the requirements on the ground I think would be tragic.

We have a partner that wants to work with us now. We have the security forces that are standing up and taking casualties, but they are going to need some additional support, particularly in the authorities under our air system. I would urge you to have such a review and to really be very strong with the White House.

You mentioned that you will be candid. I hope you will be candid to the point of being annoying. What is the worst thing they can do? Appoint you to be Secretary of Defense. Please, I think this is of some urgency.

Number two, in answer to a question, you mentioned that you were inclined to support additional arms to Ukraine. I share that position.

On the other hand, we don't live in a static world, and the danger is we supply arms, Putin sees those arms and matches them and raises us, to some extent. I wondered, with your history of studying geopolitical issues, strategy, and the like, if you could elaborate a little bit on that challenge?

If we could arm the Ukrainians and give them some strategic advantage, I think that would be great. The problem is we can't rely on the Russians not responding in some way, and then you are in an escalation situation. Your thoughts, please?

Dr. CARTER. Thank you, Senator.

I like and remembered, and I think I have used subsequently, your expression "fumbling the ball on the 5-yard line". I was superseded by the Super Bowl metaphor, I understand. But this is a war that we have carried all those yards, and so I will—

Senator KING. With some very substantial progress.

Dr. CARTER. Yes. Very substantial progress. We now have a partner in Ashraf Ghani that is very positive. I promise you I will keep

working at it, keep an open mind, and tell it like I see it, yes, in Afghanistan.

With respect to Ukraine, you raise an excellent question, and I think it is true that in strategy and working on these international problems, you always have to ask yourself not the next step, but what is the step after that? What happens after?

To your question, two observations, Senator. One is that I think that much as I incline in the direction I indicated this morning, the economic and political pressure on Russia has to remain the main center of gravity of our effort at pushing back, and the Europeans are critical to that. European solidarity and NATO solidarity are critical in this regard, as they are to all of European security and to dealing with the problem of Putin.

The other thought that comes to mind is that this is, as I consider what kinds of assistance we may give to the Ukrainian military, one does need to think two and even three steps ahead in this matter. Your point is very well taken, and I thank you.

Senator KING. I would suggest an article in yesterday's Financial Times. It talks about just this issue that I think you would find interesting and informative. I am not expressing a conclusion, but I just think we have to think hard about, as you say, one, two, three, and four steps down the chess game.

A final point, and I am close to out of time. I want to reiterate, I think Senator Shaheen mentioned, the chairman very articulately and forcefully expressed the problem with procurement and money. I am also focused on the problem with procurement and time.

Senator Inhofe had a chart recently from DARPA [Defense Advanced Research Projects Agency] that showed in 1975 it took about the same time to bring a new automobile, a new commercial aircraft, and a military aircraft from concept to operation, about 5 1/2, 6 years. Today, those lines have wildly diverged, and the automobile is down to 2 years. Commercial aircraft is up to about 7, but a military aircraft is up to 23 years.

That just won't do in terms of, you know, we are going to be building obsolete technology. I would urge you, as you focus quite rightfully on cost, to also look at how do we bring these products to market, if you will, or to operability in a shorter time? A, so we can meet the needs of the exigencies of the moment, but also so that we are not getting obsolete technology just because of the lapse of time.

I know you are aware of this. I just urge you to focus on that as well as the cost.

Dr. CARTER. I will do so, and I completely agree with you.

Senator KING. Thank you.

Thank you, Mr. Chairman.

Dr. CARTER. Thank you.

Chairman MCCAIN. Thank you, Senator King.

Dr. Carter, every member of this committee signed a letter to Secretary Hagel and Secretary Kerry concerning this issue that has been raised with you about the Jordanians and the needs that they have. Believe me, every member that met with King Abdullah was deeply moved by the requirements that he has and his inability to do so.

Finally, on the issue of Ukraine, what does it take? Do they have to send in hundreds of more tanks that the Ukrainians have no weapons to defend themselves? There are 4,000 dead now. How many more do you think before we at least do them what seems to be common decency, giving them the ability to defend themselves?

Certainly, Vladimir Putin has gone literally all in, and there is some lessons of history, sir, that of dictators and bullies who have troubles domestically have a history of striking out and being more aggressive in order to divert attention. This is reminiscent of the 1930s to me, and Neville Chamberlain might be proud.

Senator Tillis?

Senator TILLIS. Thank you, Mr. Chairman.

Thank you, Dr. Carter.

First, I think it is very clear with the questions that are being asked today, this hearing really isn't about Ash Carter. I think there is a lot of confidence in your ability, and I think there are few public servants as qualified as you for the nomination. I think you and your family should be very proud.

I appreciate the time that you and I spent in my office. I think that we have already several points of agreement, whether it is acquisition reform, training, or modernization of business practices in the Pentagon. I look forward to working with you on that and making progress.

I also think that defense is an area where you even see in the questions where there seems to be a consistent message from most of the members up here about our concerns with the safety and security of America and the need for us to work together on a bipartisan basis. Because if we don't, we fail the thousands of young men and women who volunteer to defend our freedom.

Before I get to a question, I do want to probably echo in slightly different terms what Senator Sullivan said this morning. There seems to be a disconnect between the reality of the threat that we face right now and the way the President portrays it in many instances, most recently with the State of the Union.

We have Ukraine is ablaze. I think ISIL and al-Qaeda are about as strong as ever. You have Chinese generals talking about maybe wanting to settle some millennial scores with their neighbors in the Pacific Rim.

We have a situation where I think Israel feels abandoned, and I think the prime minister being called a coward by somebody in the White House is unacceptable. We are at a very dangerous time right now, I think. I believe that you said it very well when you said the number and the severity of the threats that we are facing is probably as great as our lifetimes, as any time in our lifetimes.

I believe that you may go into your position maybe in a way to where you can work with people in the White House and the National Security Council to get them to work with you, to help us address, I think, these safety and security problems across the world.

My first question for you also goes back really to the State of the Union, where the President seems to continue to refuse to call the enemy what they are. How can we fight an enemy with an administration that refuses to name them? A President who refuses to

recognize that there is a huge difference between the Muslim religion and the Islamic terrorists that we are facing today?

Do you agree with that strategy, or can you rationalize for me why the President seems to continue that position?

Dr. CARTER. Senator, I agree with you that there is a difference between the Muslim religion and the kind of extremism that leads to terrorism that is the threat and the enemy that we are countering. If I understand the reference you are making, it is to the President's statements of a few days ago, which I interpreted as saying the same thing. Namely, it is important for Americans to make a distinction and show that they know how to make a distinction between the religion of Islam on the one hand and extremists and terrorists on the other.

I don't think, in my judgment, that is to minimize what is one of the motivating ideologies of the enemies we face, which they will say is tied to their Islamic religion. But I don't think that we serve ourselves well as Americans by conflating this kind of barbaric extremism with an entire religion.

Senator TILLIS. I have another question. It really has to do with you in relation to your predecessors.

Do you feel you can break through the barriers that Gates and Panetta seemed to be very frustrated with? You and I talked briefly about the book Secretary Gates wrote. They both seemed to have a great deal of frustration in their time in the position you will be confirmed with the White House national security team and the Pentagon. They left, they seem to have left in part in frustration with that.

I think Senator Gates in his book maybe even called it "amateur hour at the National Security Council". How are you going to be different in relating to the Pentagon and the President's national security team?

Dr. CARTER. I intend to be what I have always been in all the decades I worked in the Department of Defense, which is I will be entirely straight and upfront with the President and make my advice as cogent and as useful to him in making his decisions as I possibly can.

That is what I can do. That is what I have pledged to do. That is what I will do.

Senator TILLIS. Thank you.

Thank you, Mr. Chair.

Senator REED [Presiding]. Thank you.

Senator ROUNDS?

Senator ROUNDS. Thank you, Mr. Chair.

Dr. Carter, I appreciated the opportunity to visit with you last week, and one of the items that we discussed was the need for the long-range strike bomber. In that regard, we discussed the fact that it would probably be, what, 10 years from now before, under the best circumstances, it may be operational. Fair estimate of time?

Dr. CARTER. Yes, although in answering your question, I am mindful of what Senator King said just a few moments ago. I would rather say "as soon as possible".

Senator ROUNDS. I understand. In the meantime, we have challenges that have to be responded to with other existing platforms.

One of which, for conventional purposes, is the B-1B bomber. I think right now we probably have 62 or 63 in our fleet that are operational sometimes.

I am concerned about readiness right now, the mission capabilities of those platforms because those are literally on the front lines as we speak. Because of their capabilities or multiple types of weapons to be delivered out of that same platform, they are being utilized, and they are being worn out.

I think mission capability is somewhere under 50 percent, and I don't have the exact number, but in terms of those platforms. I would like you to talk just a little bit, and I really would like to give you the opportunity to talk about what sequestration has done in terms of mission capability, the need that we have for that platform to get us to the next generation of strike bombers, what your thoughts are on getting back to where we need it, and what the appropriate number of operational aircraft should be?

Dr. CARTER. Thank you, Senator.

You are right. I don't know the specific numbers on the B-1 at the moment. But in general, sequester has hit readiness very hard.

In the Air Force, I know, for example, in the summer of 2013, I remember very vividly the Nellis training range, Air Force's premier training range, closed in the summer. First time in my entire professional life I had ever seen that.

The first victim of sequester has been readiness, and so I can well believe it has affected the B-1, which is an essential part of our arsenal, as you indicate.

Senator ROUNDS. In your role, and I believe that you will be confirmed, what I am looking for is a commitment that these men and women that are literally tasked with keeping these aircraft operational, that they have your full support to get the numbers back up to where they ought to be. Right now they are taking out of the bone pile to literally harvest parts off to keep those aircraft flying today.

There has to be a better way to do it. Then if we are going to continue to do for the next perhaps 10 years, that you have an understanding and a clear commitment that you are going to help them get the parts necessary to keep these aircraft flying.

Dr. CARTER. I have the same understanding you do of the problem, the same commitment you do, and the only thing I would say is it is going to take more than my commitment. It is going to take money also and ultimately relief from sequester to deal with these kind of things. But I see the picture the same way you do.

Senator ROUNDS. But you are prepared to step in and to assist in making sure that those resources are available?

Dr. CARTER. I am.

Senator ROUNDS. Thank you, sir.

Dr. CARTER. Thank you.

Senator ROUNDS. Thank you, sir.

Senator REED. Thank you, Senator Rounds.

We have concluded all the members present with the first round, and I will defer any comments I have until the chairman has a chance. Senator Wicker, you are recognized.

Senator WICKER. Thank you.

How are you feeling, Dr. Carter?

Dr. CARTER. Thank you for asking. I am fine. Appreciate it, sir.
 Senator WICKER. You are doing well, and we appreciate your willingness to serve.

According to NATO guidelines, we ask our NATO allies to devote at least 2 percent of their GDP [gross domestic product] to defense. This has been a stunning failure, actually. Only four countries spent that much in 2013, Estonia, the United States, the United Kingdom, and Greece.

Do you have any ideas about how we can do better in this regard?

Dr. CARTER. Secretaries of Defense that I have served for almost as long as I can remember have pleaded with the Europeans to spend more on their own defense, our NATO allies. With very few exceptions, those pleas have not been fully heeded.

One doesn't wish adversity on anyone, but one would hope that when they look at Russia, when they look at the Charlie Hebdo incidents and so forth, that the European public will come to share the view that they need to be part of their own defense and continue to play the role that Europe has always played, of being a partner with the United States in keeping peace and order around the world.

I regret that they are not spending as much as they used to. Again, I don't wish adversity upon anyone, but I hope that what they see around them reminds everyone you don't get this stuff for free. Security doesn't come for free. You have to pay for it.

Senator WICKER. One would hope. I hope you will, going forward, help us think of perhaps carrots and sticks and incentives to have our allies shoulder their part of the burden.

I was talking, we had a great discussion with General Scowcroft the other day. I asked about what we would do about a Russian invasion or incursion into the Baltics. We are a treaty ally of Ukraine. We were unable to do anything. We were unable to do anything when the Russians moved into Georgia.

But with a NATO ally, it really is different. General Scowcroft mentioned tripwires, stationing troops in the Baltic countries, both from the United States and from our NATO allies. What do you think of that concept? Is it something you have given any thought to, Dr. Carter?

Dr. CARTER. I have, and it is one I support. I believe it is the intention—again, I don't know this. I am not in these deliberations. I think it is the intention behind the rotational introduction of United States and other NATO forces into the Baltic countries, to reinforce deterrence and to reinforce the principle that this is NATO and that Article 5 of the NATO treaty says an attack on one is an attack upon all.

Senator WICKER. Absolutely.

Dr. CARTER. That is a very important principle, and we need to stand behind that and show that we are going to stand behind it. I think that is the meaning of the tripwire concept that General Scowcroft was thinking of.

Senator WICKER. If we don't stand behind our word on that article, then our word really does mean nothing.

Let me ask you this in conclusion. How was Cap Weinberger to work for?

Dr. CARTER. I enjoyed working for him. I was not at a very senior level, but what I did for him was advise him on space, missile defense, nuclear command and control, and the early days in those days of what are called the continuity of government efforts, which still continue. We were just beginning to put them together at that time.

Senator WICKER. What do you think he would say about our defense posture at this point?

Dr. CARTER. Secretary Weinberger was an enormous backer of defense spending and of the defense budget, and he was tireless in explaining the need for an adequate defense. In that respect, he was a lot of fun to work for.

Senator WICKER. Yes, he wouldn't be overly delighted with sequestration and with the current funding level and proposed funding level going forward?

Dr. CARTER. Not at all.

Senator WICKER. Thank you very much. Good luck to you, sir.

Dr. CARTER. Thank you. Thank you, sir.

Senator REED. Senator King?

Senator KING. I went before the vote.

Senator REED. This is the second round, Senator, if you have additional questions.

Senator KING. Oh, I am sorry. I was surprised to get called upon so soon.

Let me go back to the question that we ended with about the timing of weapon systems. You were one of the fathers of the MRAP program, were you not? It seems to me that could be a model for what we are talking about.

Could you share lessons learned in that project that might be applicable to other procurement projects?

Dr. CARTER. Yes, I think you put your finger on it, which when you pointed to the critical variable in a program being its duration. That is important for two reasons, and you indicated this already, Senator, but just to reiterate. Time is money. A 15-year program is going to cost more than a 10-year program, the way we do things. Cost control, it is essential.

But the MRAP example points to something even more important, which is technology changes very quickly. Our enemies change very quickly today, and you don't have to be in a war, which the MRAP example occasions, to understand that we need to be able to turn the corner, add new technology to systems, field new systems more quickly than our opponents are doing the same.

If we have a 15-year timetable and we are competing with any modern economy around the world, the same thing is going to happen to you if you are a commercial company that has a 15-year product cycle. You are going to lose.

I think it is very important not just for cost control, but in order to remain the best military in the world that we turn the technological corner more quickly. The MRAP example and the war's example gave me at least a lot of ideas about how we can do that even in peacetime.

Senator KING. I think part of it is instilling a sense of urgency in all the way up and down the line. I mean, the accomplishments

of this country during World War II under extreme duress in terms of production were astonishing where I live near Bath, Maine.

I can't remember the exact figure, but I think they turned out a destroyer during World War II something like once every 17 days, which is unbelievable. Granted, it was a much simpler machine then than now, and the story of the bombers in World War II is also quite extraordinary.

I think there has to be a sense of urgency. We are if not directly at war, we are certainly close to war footing on a number of fronts, and that should inform. As you pointed out, this isn't the Cold War, where you can do things with a 5-, 10-, or 15-year lead time. Our asymmetric advantage is technology.

If we are unable to deploy that technology on a timely basis, we are basically losing that advantage. I, again, very strongly urge you to follow on that. By the way, Frank Kendall, who is in your office, I think is a star, and I hope you are going to keep him.

Dr. CARTER. I can't resist seconding that emotion. Frank was my Principal Deputy when I was Under Secretary, and we are very lucky to have an acquisition executive like Frank.

Senator KING. My philosophy of leadership, which applies to this case, is hire good people and take credit for what they do. Frank falls into that category.

Second question. How do we get more value out of our allies in terms of support for the work that we are doing? I understand that in many countries of Europe, defense as a share of GDP is actually going down, which it is here, too. But it is going to 2 and less than 2 percent.

Is that part of your mission is to encourage our allies to contribute more to this what is really the common defense?

Dr. CARTER. I think they need to spend more on their own defense because their own defense is also our defense. That is what being an ally is about. I would like to see them carry their full weight of being an ally, and as I indicated earlier, I don't see how any American can be satisfied with the general level of defense spending among our European allies. I think it should be higher.

Senator KING. Finally, and I realize my time is running short, but it seems to me that one of the great strategic challenges of this moment is to enlist Muslim countries and Arab countries in the fight against ISIL. They have to realize, and I think the events of yesterday may be a galvanizing factor, but they have to realize that this has to be their fight.

If it is our fight, that is what ISIL wants. They want this to be the West against Islam. But the fact that they did this horrendous murder yesterday of one of their brothers, of a Sunni Muslim, I hope will be a wakeup call to the Muslim world that they have to deal with these guys most directly. Not simply by holding our coat, but by contributing and being involved on the ground, in the air.

This has to be their fight ultimately. It is not one that we can carry on by ourselves.

Dr. CARTER. Absolutely.

Chairman MCCAIN [Presiding]. Senator Cruz?

Senator CRUZ. Thank you, Mr. Chairman.

Dr. Carter, thank you for joining us. I enjoyed having the opportunity to visit with you in my office.

Dr. CARTER. Thank you. Likewise.

Senator CRUZ. I appreciate your many years of service to our Nation.

Dr. CARTER. Thank you.

Senator CRUZ. I appreciate your willingness to serve in this incredibly important role at a time of great challenges, great threats, and also at a time, unfortunately, when the Defense Department faces significant challenges internally.

I have for some time been critical of the Obama administration's foreign policy, that it has lacked a steady mooring and a focus on the very real national security threats facing the country. I would like to take the opportunity to briefly discuss a few of those threats with you and get your thoughts on them, and I want to start with the threat of Iran acquiring nuclear weapons capability.

In your judgment, what would be the national security implications to the United States if Iran were to acquire nuclear weapons?

Dr. CARTER. Thank you, Senator.

In a phrase, "exceptionally grave," and that is for two reasons. First of all, they might use them. But second, their having them is likely to stimulate yet others to get them. For both those reasons, very grave.

Senator CRUZ. Let us perhaps expand on each of them. What is it about the regime and Iran that poses a significant threat of their actually using nuclear weapons if they had them?

Dr. CARTER. If you take at face value what they say, they have the ambition to wipe off the map other states in the region, namely Israel. They have a long history of behaving in a disruptive way, of supporting terrorism, of trying to undermine other governments of operating around the world.

I think they give abundant evidence that they are not the kind of people you want to have having nuclear weapons.

Senator CRUZ. Would you agree as well that with radical religious extremism, ordinary notions of deterrence and cost-benefit analysis don't always apply?

Dr. CARTER. I am concerned that that is the case with people who are extremists of that kind, yes.

Senator CRUZ. Now, Dr. Carter, you also talked about the threat of nuclear proliferation and in particular the threat that other Middle East countries in response to Iran acquiring nuclear weapons capability would then feel the need themselves to acquire the same. For some decades it has been a matter of pretty widespread public knowledge that the Nation of Israel has nuclear weapons capability.

Yet throughout that time, Israel's Arab neighbors have expressed no burning desire to acquire their own nuclear weapons, apparently because they don't perceive any meaningful threat that Israel would use those weapons in an offensive manner. Yet the Arab neighbors of Iran are reacting qualitatively different to the prospect of Khamenei and the mullahs acquiring nuclear weapons.

They are saying, almost without exception, if Iran acquires those weapons, they would immediately need to get their own. What does that say about the judgment of Saudi Arabia and other countries in the region about the magnitude of the threat posed by Iran?

Dr. CARTER. I think it tends to read for us what we were just saying, namely the prospect of Iran having a nuclear weapon is a pretty fearful matter, and you don't have to be just an American or an Israeli to get that idea.

Senator CRUZ. Would you then agree that the consequences of getting these negotiations wrong that are ongoing or the consequences of these negotiations facilitating and allowing Iran to acquire nuclear weapons capability would be severe, both from the perspective of the Middle East and our allies, but also from the perspective of our own national security?

Dr. CARTER. Yes, the negotiations have precisely the opposite objective.

Senator CRUZ. Let me ask you also briefly about ISIL. How would you characterize our objective right now with regards to ISIL?

Dr. CARTER. To inflict a lasting defeat upon ISIL. I only add the word "lasting" to reinforce the idea that once they are beaten, they need to stay beaten, which means you need to create the conditions in, in this case Iraq and Syria, so that they stay defeated.

Senator CRUZ. Okay. A final question. In your professional judgment, what would be required militarily to destroy or, as you put it, inflict a lasting defeat on ISIL?

Dr. CARTER. Militarily, it would be the dismantlement of their forces and their networks. To get to the point about lastingly, there is a political ingredient of this, which I need to add, which is to have them replaced in Iraq and in Syria with a government that the people want to be part of, and so they don't have to be governed by maniacs and terrorists.

Senator CRUZ. Thank you, Dr. Carter. My time has expired.

Dr. CARTER. Thank you, Senator.

Chairman MCCAIN. Senator Blumenthal?

Senator BLUMENTHAL. Thanks, Mr. Chairman.

Thank you for your longstanding and extraordinarily valuable service to our Nation.

Dr. CARTER. Thank you, Senator.

Senator BLUMENTHAL. I am prepared to overlook your deserting the Kennedy School at Harvard to go to Stanford, and I hope you will let us know if your back requires you to stand up or take a break.

Dr. CARTER. No, I am fine. Thank you for your consideration.

Senator BLUMENTHAL. I will take it out of my time.

I want to begin with a couple of brief questions, and I hope I won't retrace the ground that you have already covered. From the conversations we have had, I assume that you will continue to back the current full support for two submarines a year in the construction of our *Virginia*-class submarines, and the ongoing R&D [research and development] and other programs necessary for the *Ohio*-class?

Dr. CARTER. I will, because undersea superiority is one of our key advantages, and we need to pursue it.

Senator BLUMENTHAL. It is one of those areas where, in a sense, we need to be on a war footing because we need to be prepared and ready, and the surveillance and intelligence functions, as well as

the deterrent capabilities, are essential to our National defense. Am I correct?

Dr. CARTER. Absolutely.

Senator BLUMENTHAL. Let me move to another area that is very close to my heart, and I again want to thank our chairman, Senator McCain, who joined with me in cosponsoring a measure, the Clay Hunt Suicide Prevention Act. Suicide remains a difficult and daunting, horrific problem not only among our veterans—22 every day commit suicide—but also in our Active military.

You and I have talked about this problem. I believe you are very much attuned to it, and I am hopeful that you will continue the military's commitment and the Department of Defense's commitment to providing the mental healthcare that is necessary to help our warriors deal with these invisible wounds and demons that come back from the battlefield with them.

Dr. CARTER. I am attuned to it, and they are our people, and we need to care about them and care for them. Those who are having these kind of thoughts need help.

Senator BLUMENTHAL. On the issue of our veterans who have suffered from post traumatic stress, as again you and I have discussed, your predecessor, Secretary Hagel, worked with me, responded to my urging him to establish a new policy guidance on September 3, 2014, that finally directed proper consideration of post traumatic stress by the Boards for Correction of Military Records when considering upgrade requests.

Post traumatic stress was unknown in the Vietnam and Korean eras, not unknown because it didn't exist, but unknown because it wasn't diagnosed. This new policy gives proper recognition to a medical condition that simply was never diagnosed at the time but may have caused less than honorable discharges.

I hope that, if confirmed, you will ensure full and forceful implementation of this policy and continue outreach, because it is so vitally necessary, outreach to anyone who may be eligible to apply under the new guidelines.

Dr. CARTER. I will. We have learned a lot about that, sadly, in recent years and understand now a lot better that it truly is a malady that we can and need to address.

Yes, and thank you for taking an interest in it, as you have done about the welfare of the troops in so many other ways. In the course of the war, I was always very grateful for your attention to the well-being of the troops.

Thank you.

Senator BLUMENTHAL. Thank you very much. I should probably stop there, but I do have a couple more questions. I really appreciate your kinds words.

On the interoperability of the Department of Defense and the Veterans Administration, I am the ranking member on the Veterans Affairs Committee of the Senate, and I think there has been an ongoing concern, you are aware of it, of the issues relating to the integrated electronic health records, integrated disability evaluation system, treating military sexual trauma, other shared efforts that really involve a gap between these two great departments, each with a vital mission.

I am hoping that you will continue the effort that your predecessor, I think, believed was very important to close that gap and make sure that there really is the kind of connection, the vibrant, vital connection that is important to our troops and then to our veterans.

Dr. CARTER. I recognized that gap, and there is only one soldier. There are two Cabinet departments. One soldier shouldn't have to worry about two Cabinet departments.

Senator BLUMENTHAL. Thank you.

Thanks, Mr. Chairman.

Chairman MCCAIN. Thank you. I would mention to my colleagues we are now into the second round of questioning. In deference to Dr. Carter's health, I would request that we be as succinct as possible, but I want everyone to have a chance to continue questioning, if you are all right, Doctor?

Dr. CARTER. I am, sir. Absolutely.

Chairman MCCAIN. I will forego.

Senator Reed?

Senator REED. I will just pass.

Chairman MCCAIN. All right. Next is Senator Cotton.

Senator COTTON. I would like to discuss the transfer of five Taliban commanders at Guantanamo Bay for Private Bowe Bergdahl. Knowing what we now know about the attempted recidivism of one of those Taliban members, as well as the ongoing investigation into Bowe Bergdahl's conduct in Afghanistan, do you think that it was a correct decision to go forward with that transfer?

Dr. CARTER. First of all, I don't know the circumstances. I have read the newspaper reports, but I don't have any other information about these individuals.

What I do know is this. I wasn't in Government at the time the decision was made, but I have read the letters from all the Joint Chiefs of Staff to Senator Levin on this matter, all of whom express support for the decision. I don't want to speak for any of them, but just speaking for myself, it really boiled down to one thing, which you very much from your own distinguished service understand.

Just to say it, it is that we have for decades and decades and decades gone back decades and decades and decades in time to battlefields to bring home our fallen. It is a sacred duty to bring back our fallen.

That was the motivation that the chiefs cited as motivating their support for the Bergdahl decision. It obviously was a difficult decision to make because of the five people that you now cite. But they supported the decision, and based on what I know about the circumstances as they were known at the time, I would have supported the decision as well.

Senator COTTON. I opposed it then, and I would oppose it now. We didn't leave Bowe Bergdahl behind. The thousands of soldiers who went after him trying to find him who faced enemy fire trying to locate him were not leaving him behind.

You are right that they tell every soldier, sailor, airman, and marine that they won't leave us behind. But that doesn't mean they will trade five stone-cold Taliban killers for us.

When this transfer happened, Congress was not notified as required by the law. Can you assure us that in the future, Congress will always receive advance notification, as required by law, for future releases of Guantanamo prisoners?

Dr. CARTER. I can assure you we will always abide by the law. Absolutely, sir.

Senator COTTON. There have been media reports, most recently from Secretary Hagel himself, that he received White House pressure to sign off on the certification that Guantanamo detainees could be released. There have been reports that Leon Panetta even declined to release these five specific Taliban members at Guantanamo Bay.

Can you talk to us about how you might resist such pressure if you receive it from the White House when it comes to Guantanamo Bay releases?

Dr. CARTER. I sure can. I am going to call it straight. I have an obligation under the law with respect to the risk associated with transfers of detainees, and I intend to discharge that responsibility in a very straight-up way.

Senator COTTON. Shifting to Bowe Bergdahl, my understanding is the investigation is still ongoing into his conduct in Afghanistan. Is that your understanding?

Dr. CARTER. That is my understanding from the newspapers, but I don't have any inside information.

Senator COTTON. If confirmed, can you assure us that that investigation will proceed without unlawful command influence at any level?

Dr. CARTER. Absolutely.

Senator COTTON. I would like to shift briefly to Russia and Ukraine and the implications for the Baltic states. Right now, there is fighting going on in Ukraine, much of it is over the so-called Minsk line where the forces were supposed to be separated since September.

One technique that Russia used in Crimea, then they used in Eastern Ukraine is the so-called "little green men". By most reports, these are Russian special operations forces, who are operating in advance in Crimea and Eastern Ukraine.

If Russia has uniformed soldiers operating on foreign territory without insignia, would that be a violation of the Geneva Conventions?

Dr. CARTER. What it is, I just don't know the international legal answer to the question you are posing, Senator. But what I do know is that is what they have been doing, and I don't know. I think the little green men are part of the big lie, the big Putin lie, where he is clearly violating the sovereignty of a neighboring country and then pretending it isn't him and pretending it isn't Russia.

As far as I understand, it very clearly is Russia. It seems to me that is very important. I don't know the legal part of it, but the common sense answer is he has violated Ukrainian sovereignty.

Senator COTTON. I believe there is a strong case that it would violate the Geneva Conventions to have soldiers operating without insignia. Since you said earlier that you would support putting NATO forces in Estonia, Lithuania, and Latvia, I would say I sup-

port that as well, especially recon forces who might be on the lookout for little green men.

Thank you.

Dr. CARTER. Thank you.

Chairman MCCAIN. Senator Heinrich?

Senator HEINRICH. Thank you, Chairman.

Dr. Carter, you have spoken quite effectively about the need to address runaway costs, needless overhead, waste at DOD. I want to touch on the fiscal impact of operating the Guantanamo detention facility.

Maintaining the prison at Guantanamo is costing American taxpayers almost \$5 billion since it opened in 2002, an average of \$493 million every year for the last 5 years. In fact, in 2014, we spent more than \$3 billion per Guantanamo detainee.

That compares to about \$78,000 per prisoner a year that we use to house hardened criminals in the Florence, Colorado, supermax prison. Do you intend to review the cost effectiveness of continuing to operate the facility at Guantanamo versus placing high-risk detainees that need to continue to be detained in a more fiscally responsible setting?

Dr. CARTER. Senator, I understand the cost numbers that you are citing. They broadly correspond to what I understand. I think the issue that Guantanamo will ultimately boil down to is what do you do with the people at Guantanamo that they need to be incarcerated. If not Gitmo, where are they going to be incarcerated? That is a fundamental question that is a very difficult one.

It is partly a legal one and partly a practical one, and I don't know everything I would need to know about that. But I hope that as time goes on and engaging with members of this committee, many of whom know much more about this subject than I do, that we can discuss what might be done with these people because what is plain as day is that they need to be incarcerated, as you indicated, in a supermax-type place.

Senator HEINRICH. Yes, I appreciate that, and I look forward to working with you on that.

As someone who helped draft the Nunn-Lugar legislation, which I think was one of the high water marks for legislation in the last decades, what is the right approach to preserving that non-proliferation infrastructure in the current environment?

Dr. CARTER. The Nunn-Lugar program, since those days, has moved on to other very important missions. It is less focused on Russia and the states of the former Soviet Union than it once was. It is now focused globally.

It has picked up a big focus on biological weapons, which are also very fearsome weapons, as well as nuclear weapons. It still has a role to play in keeping us safe.

It is one of those ways that the Defense Department can act in its long-term interest to head off threats that were they to occur and materialize would be much more dangerous and much more costly to have to counter than if we can stop them from developing in the first place.

Senator HEINRICH. I appreciate that.

Back in 1995, we had our Nation's first nuclear posture review. At that time, there was some talk about potentially transitioning

to a monad where land-based missiles and bombers might not be utilized.

We have moved away from that, obviously, in recent years to the more traditional triad. What are your thoughts on the nuclear triad today, given today's global security environment? Is that something you intend to continue to look at? Do you think it is meeting the deterrent requirements that we have, and just generally, what are your thoughts on it?

Dr. CARTER. I think it is meeting our deterrent requirements. I think those deterrent requirements are going to be with us as far into the future as I can see, and that is why having a safe, secure, and reliable nuclear arsenal and all the parts of that that are necessitated is a foundational responsibility of the Department of Defense.

It is not in the newspapers every day. It is not, you know, as apparent, I suppose, to many citizens. But it is foundational to our security.

Senator HEINRICH. Thank you, Dr. Carter.

Chairman MCCAIN. Senator Ayotte?

Senator AYOTTE. I want to thank the chair.

I want to thank you, Dr. Carter, for being in such a lengthy hearing and answering so many of our questions. We really appreciate it.

I wanted to follow up on Russia, and specifically in your advance policy questions, you had stated that Russian deployment of weapon systems that violate the INF [Intermediate Range Nuclear Forces] treaty would pose an increased threat to the United States and our allies in Europe and Asia. You have also written that Russia should return to compliance with the INF treaty in a verifiable manner.

I think one of the problem we are facing as we look at the challenges we face, Russia is developing a new mobile nuclear ground-launched cruise missile, which is in direct violation of that 1987 treaty, which was likely in development even during the New START [Strategic Arms Reduction Treaty] negotiations, which not only all the behavior we have seen in Ukraine, but this makes it harder for us to have these types of conversations with Russia and be able to trust anything that they say.

What steps should we be taking in response to Russia's INF violation?

Dr. CARTER. Thank you, Senator.

My answer is not based on any inside information or intelligence information, just to be clear, but it is, I am told, quite clear that Russia has violated the INF treaty. To the question what are we going to do about it? I think you have to remind Russia that this was a two-way street.

That we signed a treaty that said you are not going to do this, and we are not going to do it either. If you don't want to have that treaty, why then you are absolved from your restrictions under that treaty, well, we are, too. What might we do, therefore, in a military sense to respond to this development if it continues on the part of Russia?

I think that there are defensive steps that we can take. There are deterrent steps that we can take, and there are counterforce

steps that we can take. We have military options, too, if they really want to get into this kind of game. Obviously, the judgment behind the INF treaty was that we both be better off if we didn't do this. That is why we agreed.

But these are always two-way streets, and I think they need to be reminded it is a two-way street.

Senator AYOTTE. Thank you. I appreciate that very much, Dr. Carter.

I wanted to follow up on two areas. First, on the Guantanamo Bay discussion, one of the things that I think is important for people to understand is that we are not at the moment talking about transfers. We are talking about releases, and I think that is an important distinction. Something, obviously, as Secretary of Defense, you should be looking at, as we talked about earlier, making sure that people can't be in a position to reengage.

One country in particular I want to ask you about, and that is Yemen. Last year, I had an amendment that passed on a bipartisan basis that would have prohibited transfers to Yemen. The situation has gotten markedly worse since that amendment passed in this committee. It did not get in the final bill.

I have 10 pages of incidents in Yemen, and obviously, the recent issues with the Houthis, the takeover of the government, as well as suicide attacks, et cetera. Do you think it is advisable or would you recommend transferring any of these detainees to Yemen?

Dr. CARTER. That doesn't sound very sensible in the environment in which we are facing ourselves, no.

Senator AYOTTE. I appreciate that. Thank you.

I also wanted to follow up, in our office discussion, we had talked about the A-10. One thing I had asked of you that I hope you will do when you are confirmed, and that is, I have opposed the Air Force's decision to retire the A-10, particularly from what I have heard from our men and women on the ground and the fact that it is the best close-air support platform for our men and women in uniform.

We have heard from the association that represents 3,300 serving, separated, and retired JTACs [joint terminal attack controller]. That is the Tactical Air Control Party Association, and what they have said about the A-10, "We believe that F-15, 16s, and B-1s cannot replicate the CAS [close air support] capabilities of the A-10. And we know from combat experience that the elimination of the A-10 before a viable replacement achieves full operational capability will cost American lives."

I asked you in my office, and I would like you to confirm again that you are willing to sit down with some of our members of this association who, as you know, are the ones on the ground calling in the strikes and working with our men and women in uniform. They work with all of our platforms.

Dr. CARTER. I remember very clearly. I have the letter that you gave me from them, and absolutely, I will.

Senator AYOTTE. Thank you. This is really important.

I have one other follow-up request that you had graciously agreed to in the office as well, and I think that Senator King from Maine will appreciate this as well, and that is that you agreed to

come to New Hampshire. We, of course, at that point will obviously love to show Dr. Carter the Portsmouth Naval Shipyard.

Senator KING. In Maine, you mean? The one in Maine?

[Laughter.]

Senator AYOTTE. Where so many of the wonderful workers are from New Hampshire.

Senator KING. Thank you.

Dr. CARTER. If confirmed, I would look forward to that.

Senator AYOTTE. Thank you, Dr. Carter.

Dr. CARTER. Thank you.

Chairman MCCAIN. It is not necessary, Doctor.

[Laughter.]

Chairman MCCAIN. Senator Ernst?

Senator ERNST. Thank you, Mr. Chair.

Again, thank you, Dr. Carter, for being here today.

As a military, we have moved a very long ways away from using the old compass and map. Many of our systems now are very heavily networked. We rely very much on technology for our weapon systems, for our command and control systems, and that is really our primary tools for achieving dominance over our adversaries on the battlefield.

But what we are seeing now is cybersecurity threat, cyber attacks that are looming out there. A number of countries out there, including Russia, China, North Korea, probably many others, have very sophisticated means of attacking networks. How do you see that impacting our acquisition strategy as we move forward, and how do we best protect our equipment, protect our personnel moving forward?

Dr. CARTER. I think you said it exactly the way I see it. You understand, but perhaps others around the country don't understand that not only is our civilian infrastructure susceptible to cyber attack, but we have to be concerned about our military infrastructure because exactly as you say, there is no point in having planes and ships and armored vehicles in today's world if the network is itself vulnerable.

I think, and I hope I can work together, if I am confirmed, with this committee on improving our cyber defenses, many aspects of cyber. But one is the defense of our own networks in the Department of Defense. That is not where it should be in terms of making them immune to attack by a potential enemy that would impair our own forces engaged with that enemy.

I agree with you entirely.

Senator ERNST. Yes, thank you. We rely on networking so very much, from the simple ordering of a part for a Humvee to targeting enemy on the battlefield. It goes from every level, from your squad level all the way up through the ranks.

Do you have an opinion on this? Just your opinion because it is more than just the military and the Department of Defense and our network security. We could look at attacks to our financial institutions, to our utilities as being a security risk for the United States also.

Do you have an opinion on where the Federal Government should be in regards to protecting our national security interests

versus the privacy of individuals out there that might be using the network?

Dr. CARTER. I do. I have some understanding of that issue, and I would say that the Federal Government does have a role in protecting the country from cyber attack in the same way that it has a role in protecting the country from other kinds of attack. I think it can do a lot more to exercise that responsibility without causing concerns over invasions of people's privacy and so forth.

For example, the Government can share information and knowledge it has collected about threats to private networks with those private parties, provided the proper legal safeguards are provided, which have less to do with privacy than they do with things like antitrust and other aspects that are important.

I think that the Government can sponsor and conduct R&D that improves the tradecraft in network defense for the good of the country. I think there is a lot we can do, and we are not anywhere near where we should be as a country.

I think if we were as unprotected in some other domain that was more familiar to ordinary people, they would be clamoring for us to do more. I think if people fully understand what you understand about how vulnerable we are in cyberspace, they would want us to do more, not in any way that compromised anybody's privacy, but they would want us to be doing a lot more than I believe we are doing now.

Senator ERNST. Thank you. I appreciate that. I think this will continue to be a vexing problem for us moving forward. It is a situation we are dealing with in many of our separate committees. But I do appreciate your opinion very much.

Thank you, Mr. Chair.

Chairman MCCAIN. Senator Sullivan?

Senator SULLIVAN. Dr. Carter, I wanted to go back to the issue of Iran for a moment. Under the chairman's leadership, we have had some tremendous witnesses over the last 3 weeks testifying on strategic challenges and how to think through them.

Dr. Kissinger's testimony in particular was very powerful, and he said, as we kind of struggle with these, "we" collectively in the legislative branch, executive branch, these strategic issues and challenges, that we need to ask ourselves questions. The first one, and I think in his view the most important one, was what do we seek to prevent, no matter how it happens and, if necessary, alone?

I will repeat that. What do we seek to prevent, no matter how we prevent it, and, if necessary, alone? In your view, would preventing Iran from obtaining a nuclear weapon fall into that first category that Dr. Kissinger laid out?

Dr. CARTER. Yes. Yes.

Senator SULLIVAN. Okay. Thank you.

Second, I want to get back to the issue we were talking about a little bit earlier, this issue of kind of being straight up with not only Congress and the American people on our challenges. I think you have been doing that today in your testimony.

Again, I have some doubts that that is happening at the highest levels. The President's mention in his State of the Union referring to 9/11 and then saying "The crisis has passed." I don't think most Americans would agree with that.

But the discussion today about ISIL and you were talking about lasting defeat, it really is actually Islamic extremism and the threat it poses to the United States and our citizens. What, in your view, is the timeline? Because I think this is an issue that really hasn't been discussed.

Some people think that we are going to declare victory next year, 2 years? There have been others who have been saying, no, this is much more like the Cold War. Former CENTCOM [United States Central Command] commander General John Abizaid talked about "the long war".

Where do you see this kind of defeat playing out? If it is going to take a long time, maybe a generation, shouldn't we be preparing the American people for that, as opposed to saying, oh, we are going to defeat ISIL within a year?

Dr. CARTER. I certainly hope that we defeat ISIL quickly, but that won't be a lasting defeat necessarily, unless we have a political dimension to that defeat as well as a military defeat. That won't be the end of terrorism, Islamist extremism's terrorism.

Our experience has been this is a movement that changes and morphs and moves around the world. One would like to hope that at some point its inherent unattractiveness would cause it to burn out, but we can't be confident of that.

Senator SULLIVAN. How do you think we should be thinking about it from a time standpoint?

Dr. CARTER. I think we need to be thinking about terrorism, more generally, as an enduring part of our national security mission. I believe that Secretaries of Defense, many in the future, even if Islamist extremism, which I certainly hope burns itself out at some point, will always be facing the problem of the few against the many.

There are aberrant people out there, and technology in today's world gives smaller and smaller groups of people and even individuals destructive power that they would never have had in previous eras. It is going to be the job of our security authorities—defense, law enforcement, homeland security, and everything—to protect our people against these people, whatever their thinking.

They may not be thinking in the ISIL way. They may have something else on their mind. Or nothing at all on their minds. But I do think it is going to be a continuing part of the human condition and of defending our people.

Senator SULLIVAN. I want to just ask one final question. I think one thing that is going to be very important is to continue a very strong focus on training. Severe, hard training for our troops.

As you know, in periods of drawdown or changes, as a country, historically, we haven't always done this well. We talked about this. When you are an infantry officer in the Marine Corps, you are strongly encouraged to read this book called "This Kind of War". I encourage you or your staff to take a look at it. It is called "a study in unpreparedness," and it shows what happens when you have troops that are not trained.

If confirmed, you are obviously going to have a myriad of responsibilities, pressures on you. I would like to get a commitment that you will keep as certainly one of your top, if not top priorities this issue of training—hard, severe training. Because as you know, the

best way to ultimately take care of the troops is to make sure that they are ready to fight, destroy the enemy, and come home safely.

Can we get that commitment from you?

Dr. CARTER. You absolutely have it. I just would say your authoritativeness on that exact subject is very much appreciated and respected.

Senator SULLIVAN. Thank you.

Chairman MCCAIN. Senator Shaheen?

Senator SHAHEEN. Thank you, Mr. Chairman.

Dr. Carter, I know we are trying to get you out. I will be very brief, but I did want to come back to an issue that you and I had a chance to talk about briefly when you came in to see me, about the importance of our public shipyards and the good work that they do. Senator King, I know Senator Ayotte, and I are all very proud of the Portsmouth Naval Shipyard, and that you were issued an invitation to visit, which I would second.

We would love to have you come up. While you are at it, you can come to Pease Air National Guard Base and see the home of the new KC-46 air refueling tanker, which we are also very proud of.

One of the challenges of sequestration is the impact on not just our men and women serving in uniform, but also on our civilian workforce. Can you talk about the threats that is posed by the uncertainty, especially for the engineers, the scientists, the mathematicians that we are going to need to continue to fill those civilian jobs to keep our shipyards at their highest level of efficiency and production and all of our depots as well?

Dr. CARTER. Yes. Thank you.

I do want to take the opportunity to express my gratitude for what our civilian members of our Department of Defense do. A lot of people have the image of the civilian as a bureaucrat sitting behind a desk somewhere, and that is an issue we also need to get at because there is that, too, and that is costly in headquarters and overhead and so forth.

But most of DOD civilians are not sitting behind a desk. They are actually doing maintenance work and repair work that actually needs to get done. They are not a waste. They are there doing something essential.

I think that sometimes we talk about them as though we don't appreciate them, and I think we do need to appreciate them. Even as we cut down, as I believe we need to do, the overall number of civilians in the Department of Defense, I think you do that by getting rid of the overhead and the unnecessary layers and offices and so forth.

But I don't think anybody ought to be talking about somebody who fixes and maintains an essential piece of equipment. We ought to be giving our thanks to those folks for what they are doing for the country.

Senator SHAHEEN. Are you concerned about the impact that sequestration might have on our ability to continue to maintain those civilian workers who have the backgrounds that we need to continue to do those jobs?

Dr. CARTER. Yes. Because one of the things that sequester does because it hits fast and hard is cause managers in defense to take

away dollars from exactly that kind of work, and it gets back to the readiness issue.

Senator SHAHEEN. Thank you very much.

Thank you, Mr. Chairman.

Chairman MCCAIN. Senator Tillis?

Senator TILLIS. Dr. Carter, sorry I had to step out. I had another committee meeting. If this question has been asked, I apologize.

In your response to some of the written questions submitted to you, there was a concern expressed over the size of our naval fleet and how it has reduced in numbers. In your response, you commented that you can't just look at the absolute number of ships to determine what our capabilities are.

My question for you is what can you share with us that should make us feel okay with some reduction in the fleet, if you believe that that is okay as a long-term position? Secondly, what do you think the long-term plan should be for our naval readiness?

Dr. CARTER. Thank you, Senator.

It is true that, as you say, that you have to look at quality and not just quantity. I mean, that said, I think the Navy's ship-building plan calls for it to increase the number of ships, not to decrease the number of ships. I certainly think that is important.

Our Navy is the paramount navy of the world, and that is one of the things that makes us a global power. It is what allows us to be present when things break somewhere. Whether it be a conflict or a natural disaster, you see the Americans show up first in either case. Why do they do that? One of the ways they do that is through the Navy.

I have a strong interest in maintaining not just the quality, but the quantity as well. Obviously, this gets back to the budget and how many dollars we have. Another reason why we need to have enough dollars.

Senator TILLIS. Thank you.

I have another question and final question. It relates to a report I am expecting the Secretary of the Air Force to submit to Congress, saying that they are going to be pulling out the Air Force assets from Pope Field. You and I touched on this briefly when we met.

I think the result of that is going to be the Army requiring planes to be flown in to support training exercises there. I am more worried about Pope Field, going forward. It looks like the current course and speed, it could wither away, and I think it is an important strategic asset.

Rather than ask you to take a position on this decision, I would like to get your commitment once you are confirmed to meet with me and others who have a concern with this not as a North Carolina issue, but as a perhaps not a good strategic decision. Walk through this and see if either I can be convinced that it is the right decision or you can be convinced it may be something we have to rethink. I would appreciate your commitment to doing that.

Dr. CARTER. Absolutely, you have that.

Senator TILLIS. Thank you.

Thank you, Mr. Chair.

Chairman MCCAIN. I am told that Senator Lee is on his way. Is his staffer here?

[Pause.]

Chairman MCCAIN. From the airport?

Senator TILLIS. Pope Field.

[Laughter.]

Chairman MCCAIN. I just don't think we can hold up the witness. Can I just say we intend to receive as many written questions as necessary by the end of business today. You can review them and have your answers returned so that we can get your confirmation to the floor early next week.

If not, as you know, the week after that, we are in a recess. We will try and get it accomplished.

I heard a door close. Yes, go ahead, Jack.

Senator REED. I just simply want to thank Dr. Carter for his service to the Nation, for his testimony today, and thank the chairman for an extremely thoughtful hearing and a very productive hearing.

Thank you.

Dr. CARTER. Thank you, Senator.

Chairman MCCAIN. I just can't hold the witness any longer.

[Pause.]

Senator TILLIS. Senator McCain, I think he is running around the ante room to this entrance here. I would expect him to pop through in about 10 seconds.

Chairman MCCAIN. Senator Lee, welcome.

Senator LEE. Thank you very much, Mr. Chairman.

You have been very patient today and answered a lot of questions, and I just wanted to talk to you briefly about religious freedom within the military. I think the ability to believe according to one's own belief system and to express those views appropriately is of utmost importance to the morale of all of our service men and women and to their families.

I think it is also something of a pillar of our society, something that we have always expected would be tolerated is a diversity of religious viewpoint and religious expression. Certainly one's religious freedom should never be curtailed merely because one decides to serve one's country in the military.

I was concerned late last year to hear about a situation in the Army in which a chaplain in the course of some suicide prevention training was reprimanded for sharing his faith, talking about how his faith played a really important role in his personal recovery from depression.

My understanding is that he was reprimanded despite the fact that the Army itself, of course, recognizes the importance of spiritual wellness and the importance that faith can play in a person's life in dealing with mental health issues of all kinds and an Army that has affirmed the important role that chaplains tend to play in our armed services.

Congress, of course, has acted several times in recent years to prioritize protection of religious freedom and religious expression within the armed services, respecting the necessity, of course, of maintaining good order and discipline and making sure that those things aren't ever compromised.

What is your view on religious freedom and freedom of religious expression within the military? What will you do, if you are con-

firmed as Secretary, to make sure that those rights are respected and that the obligations imposed by Congress on the military are honored?

Dr. CARTER. I do think it is important, and I don't think there is any inherent conflict between religious freedom and religious expression and good order and discipline. We can have both.

I don't know anything about the particular case you adduced, but that this idea of having both and that they are not in inherent conflict with one another I think is extremely important and one that if I am confirmed in this job, I would want to see to it that no one thought that there was an inherent conflict between those two.

Senator LEE. Thank you. I appreciate that, and I know those who serve us certainly appreciate that as well.

I appreciated what I heard you say earlier. I think it was in connection with a question asked by Senator Ernst regarding the valuable contributions of our National Guard and our Reserve units in combat. I hope that as the Services continue to reassess their force mixture that those sentiments that you expressed very well will continue to be at the forefront of your mind and that you will be conscious of those things.

As I look at the Guard units in my home State of Utah, those Guard units have served us very well, and a lot of our servicemembers who serve in our Guard units have been deployed many, many times just over the last few years. They have served exceptionally well, and I hope you will continue to recognize them, their contributions, and to utilize them appropriately.

Dr. CARTER. I will. You just said it very well. They have really come through for us.

Senator LEE. Thank you very much.

Dr. CARTER. Thank you, sir.

Senator LEE. Thank you, Mr. Chairman. I see my time is rapidly expiring.

Chairman MCCAIN. Thank you.

Doctor, as I mentioned, we will try to ask our members to get in any written questions they have for you by noon tomorrow so that you will have time to return those either before the weekend or just after.

We will see, talk to the Majority Leader to see if we can't get your nomination to the floor so that you can get to work.

We thank you for your patience today and thank you for your appearance and thank you for your willingness to continue to serve this Nation.

Dr. CARTER. Thank you, Mr. Chairman.

Chairman MCCAIN. The hearing is adjourned.

[Whereupon, at 4:09 p.m., the hearing was adjourned.]

[Prepared questions submitted to the Honorable Ashton B. Carter by Chairman McCain prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delin-

eated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions?

Answer. No.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. I do not see a need for modification of any Goldwater-Nichols Act or special operations provisions at this time. The success of our Armed Forces since the enactment of these provisions amply demonstrates that they have served the Department and our Nation well.

DUTIES OF THE SECRETARY OF DEFENSE

Question. Section 113 of title 10, United States Code, provides that the Secretary of Defense is the principal assistant to the President in all matters relating to the Department of Defense (DOD). Subject to the direction of the President, the Secretary of Defense, under section 113, has authority, direction, and control over DOD.

Do you believe there are actions you need to take to enhance your ability to perform the duties of the Secretary of Defense?

Answer. No.

Question. What changes to section 113, if any, would you recommend?

Answer. At this time, I believe that the authorities in section 113 for the position of Secretary of Defense are appropriate.

QUALIFICATIONS

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. I have spent more than 3 decades working on defense and national security issues, both in and out of government. Most recently I served in two senior positions in the Department, including as the Deputy Secretary of Defense and the Under Secretary of Defense for Acquisition, Technology, and Logistics. As Deputy Secretary of Defense I served as the Department's Chief Operating Officer with management over the Department's budget and civilian military personnel. During my tenure as Under Secretary for Acquisition, Technology, and Logistics, I had responsibility for the department's efforts to accelerate the production of urgent operational need such as MRAPs which saved countless lives in Afghanistan, increase the taxpayer's buying power, and strengthen the Nation's defense against emerging threats.

Previously, in the 1990s, I served as the Assistant Secretary of Defense for International Security Policy where I was responsible for a variety of strategic issues. Between my periods of government service I have served in a variety of academic and government advisory roles focused on national security and defense issues.

PRIORITIES

Question. If confirmed, you will confront a range of critical issues relating to threats to national security and ensuring that the Armed Forces are prepared to deal with these threats.

In your view, what are the major challenges confronting the next Secretary of Defense?

Answer. The challenges include preserving and enhancing the finest fighting force in the world and taking care of their families; providing a strategic perspective to the threats and opportunities in the world; and implementing significant reforms that are crucial in a time of budget uncertainty.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I look forward to addressing these challenges by consulting with the civilian and military leadership of the Department, seeking the perspective of our partners, allies and friends, working closely with my interagency partners, seeking the best ideas from outside the government, and working closely with this committee and Congress.

Question. If confirmed, what broad priorities would you establish in terms of issues which must be addressed by the Secretary of Defense?

Answer. The top priorities are to ensure the security of the American people, defend our vital interests, and fight and win our Nation's wars.

CHAIN OF COMMAND

Question. Section 162(b) of title 10, United States Code, provides that the chain of command runs from the President to the Secretary of Defense and from the Secretary of Defense to the combatant commands. Section 163(a) of title 10 further provides that the President may direct communications to combatant commanders be transmitted through the Chairman of the Joint Chiefs of Staff and may assign duties to the Chairman to assist the President and the Secretary of Defense in performing their command function.

Do you believe that these provisions facilitate a clear and effective chain of command?

Answer. My understanding of these laws and my experience leads me to believe that they establish a clear and effective chain of command, which is an essential element to successful military operations.

Question. In your view, do these provisions enhance or degrade civilian control of the military?

Answer. In my view, these provisions significantly enhance civilian control of the military and place the President and the Secretary of Defense in position to best exercise civilian control of the military by occupying the top positions in the military chain of command.

Question. Are there circumstances in which you believe it is appropriate for U.S. military forces to be under the operational command or control of an authority outside the chain of command established under title 10, United States Code?

Answer. I believe that U.S. military forces normally should operate under the chain of command established under title 10. However, today's threats are such that there may be circumstances involving certain sensitive operations where an exception to that chain of command may be appropriate to provide military support to the head of a non-DOD U.S. department or agency. It is my understanding that only the President may approve such an exception, as also provided in section 162 of title 10. If confirmed, I will consider these situations very carefully and provide the President with my best advice regarding where an exception to the established chain of command may be appropriate.

ADVICE OF THE SERVICE CHIEFS AND THE COMBATANT COMMANDERS

Question. Section 151 of title 10, United States Code, provides, in part, that the Chairman of the Joint Chiefs of Staff is the principal military adviser to the President, the National Security Council, and the Secretary of Defense and that if any member of the Joint Chiefs submits to the Chairman advice or an opinion, in disagreement with, or advice or an opinion in addition to, the advice presented by the Chairman, the Chairman shall present that advice or opinion at the same time he provides his own advice to the President, the National Security Council, and the Secretary of Defense. Section 163 of title 10, United States Code, provides that the Chairman of the Joint Chiefs of Staff serves as the spokesman for the combatant commanders, especially on the operational requirements of their commands.

What is your understanding and assessment of the distribution of responsibilities and authorities for providing uniformed professional military judgment, advice, and opinions to the President, National Security Council, and civilian leadership of the Department?

Answer. Based on my understanding of the law and my experience, I believe the distribution of responsibilities and authorities for providing professional military judgment, advice, and opinions is adequate and functioning well.

Question. What changes in law, if any, do you think may be necessary to ensure that the views of the Service Chiefs and of the combatant commanders are presented and considered?

Answer. Based on my understanding of the law, and my experience, I do not recommend any changes to the law.

USE OF MILITARY FORCE

Question. The question as to whether and when U.S. forces should participate in potentially dangerous situations is one of the most important and difficult decisions that the national command authorities have to make. Prior Secretaries of Defense and Chairmen of the Joint Chiefs of Staff have proposed criteria to guide decision-making for such situations.

In your view, what factors should be considered in making recommendations to the President on the use of military force?

Answer. The factors that should be considered are: the necessity of removing a critical threat to the U.S. Homeland and citizens and its allies and friends; the pros-

pects and strategy for achieving lasting success through the use of force; complementary employment, as appropriate, of other instruments of national power; and the assistance as appropriate of allies and partners.

NATIONAL SECURITY BUDGET REDUCTIONS

Question. The 2011 Budget Control Act established discretionary budget caps to realize nearly \$1 trillion in budget savings spending over 10 years. Half of those budget cuts are to national defense discretionary accounts.

Do you believe that defense spending reductions of this magnitude can be accomplished without significant adverse impact on our national security?

Answer. No. During my tenure as Deputy Secretary and Acquisition Executive the Department developed a comprehensive strategy. I said then, and I will reiterate now, that the strategy is not executable under the sequestration-level budget caps of the Budget Control Act.

Question. How would you assess the national military strategy to deal with the changed budget environment?

Answer. Any strategy must continue to protect and advance this Nation's interests, within the resources the Nation is willing to commit to national defense. If confirmed, I will seek a balance between maintaining an agile and ready force to address today's demands while investing in the capabilities we need to address future challenges.

Question. If confirmed, by what standards would you measure the adequacy of DOD funding?

Answer. The measure must be, can the Department meet the security challenges of today, while also investing adequate resources to prepare for future security challenges, both the expected and the unexpected.

Question. If confirmed, and given this era of budget austerity, how will you prioritize the objectives of meeting ongoing operational commitments around the world, re-setting of the force, and investing in the future force?

Answer. There has to be a balance. The Department should have sufficient capacity to deal with the wide range of challenges we face, yet not maintain more capacity than we can afford to modernize and keep ready, given that we also have a responsibility to the force of the future.

READINESS OF THE ARMED FORCES

Question. What is your understanding and assessment of the current readiness of the Armed Forces?

Answer. I believe that readiness has been especially affected by sudden and uncertain budget reductions. Readiness is essential to our security and to ensure troops sent in to conflict are fully prepared. The Service Chiefs testified last week before this committee that there have been some readiness gains over the last year, but that there are still critical readiness deficits in many areas. Any readiness gains over the last year appear to me to be extremely fragile and will certainly reverse without sufficient resources.

Question. What is your understanding and assessment of the Department's readiness reporting and monitoring systems, such as the Defense Readiness Reporting System (DRRS)? In your view, does DRRS provide civilian and military leaders with the information necessary to make informed resource and operational decisions?

Answer. The readiness systems in place provide senior leaders with the information they need to determine which forces are ready to deploy considering a variety of mission criteria. These systems contain current and historical readiness data from the tactical to the strategic level. In my view, the DRRS does provide the necessary information to make informed resource and operational decisions.

Question. If confirmed, what changes, if any, would you propose making to the Department's readiness systems to ensure timely and accurate information is available for decisions on commitment of military forces and to judge the impact of budget conditions on the readiness of the Armed Forces?

Answer. The Department's readiness reporting systems, the DRRS in particular, contain a variety of readiness resourcing and capability data that is useful for senior leaders to gain an understanding of our operational vulnerabilities and shortcomings.

Question. If confirmed, to what key indications and indicators of a "hollow" or unready military will you pay closest attention? What are the most dangerous risks or consequences associated with a "hollow" or unready force in your opinion?

Answer. Key elements of readiness include the quality of our military personnel and the status of their individual training in the military specialties, the manning and training of the units in which they serve to meet the mission essential tasks

they are given, and the availability of their required equipment from basic small arms to major platforms. This individual and unit readiness must be assessed against the requirement of the contingency plans of the combatant commanders. I have always paid considerable attention to these elements and I will continue to do so if confirmed as this is an essential obligation of leaders to the forces we send in harm's way.

AUDIT READINESS

Question. DOD remains unable to achieve a clean financial statement audit. The Department also remains on the Government Accountability Office's list of high risk agencies and management systems for financial management and weapon system acquisition. Although audit-readiness has been a goal of the Department for decades, DOD has repeatedly failed to meet numerous congressionally directed audit-readiness deadlines.

What is your understanding and assessment of the Department's efforts to achieve a clean financial statement audit?

Answer. My understanding of the Department's efforts is that the Department has made progress in the last 5 years following the strategic plan and priorities established early in this Administration. If confirmed, I will get a detailed assessment from my Chief Financial Officer, and hold him responsible and accountable for making auditability one of my top business reform priorities.

Question. Do you believe that the Department is likely to meet the current 2017 statutory objective for ensuring that its financial statements are validated as ready for audit?

Answer. If confirmed, I will be in a better position to inform Congress on the 2017 objective after I have the results of the ongoing military departments' audits.

Question. What is the likelihood that this audit will produce a clean opinion? In your view, how long is it likely to be from the time when the Department certifies its financial statements as "ready for audit" to the time when the Department achieves a clean audit opinion? If confirmed, what specific actions would you propose taking to promote compliance with the statutory objective?

Answer. Experience throughout the government, with agencies that are far smaller and less complex than DOD, demonstrates it takes several years to move from an initial audit to a clean opinion. So I do not think it is realistic to expect that a first year audit of the entire Department will produce a clean opinion. If confirmed, I will continue to make this a high priority and hold our senior leaders, civilian and military, accountable for positive progress towards a clean opinion.

Question. What is your understanding of what the validation of audit readiness means? What steps will the Department go through to validate its financial statements as ready for audit and when will these steps be taken?

Answer. My understanding is that a validation of audit readiness is an independent assessment to ensure key elements required by a financial audit are in fact part of the day-to-day processes and internal controls and can be demonstrated to show they are compliant with accounting standards. If confirmed, I will develop a complete understanding of the department's validation of audit readiness in order to hold the Chief Financial Officer responsible and accountable to monitor key critical path milestones so the Department is ready for audit in fiscal year 2018.

Question. What steps do you believe that Congress and/or the Department should take if the Department fails to meet the statutory objective, given that the current administration will not be in office in 2017?

Answer. If confirmed, I intend to do everything I can to position the Department to comply with the statutory guidance. The Chief Financial Officer should lay out a clear set of interim critical path milestones and ensuring those gates are met. If confirmed, I will ensure that this receives an appropriate priority and that accountability is instilled into the performance appraisals of senior leaders. I believe Congress should continue to provide constructive oversight to ensure full understanding of the Department's direction and progress and to help when applicable.

Question. In your view, what evidence, if any, can we point to today that provides Congress and taxpayers confidence that the Department's resources are being spent appropriately given its inability to pass a financial statement audit?

Answer. The Department continues to meet the mission of defending our country's basic values with a world-class military. It trains and equips our men and women to carry out critical missions to protect us and our allies around the world. While the department currently falls short of having a clean audit of our financial statements, we do receive positive audit opinions on a significant amount of our resources, and there are numerous controls in place to ensure taxpayer resources are spent as intended by the Congress. Independent of auditability, the department has

a detailed track of where the money goes and what it supports. If confirmed, I intend to demonstrate to the taxpayers that DOD is a good steward of our resources and worthy of their confidence.

DEPARTMENT OF DEFENSE AND DEPARTMENT OF VETERANS AFFAIRS COLLABORATION

Question. DOD and Department of Veterans Affairs (VA) have in recent years increased collaboration to support servicemembers as they transition to veteran status. This support includes access to health and mental health care, improved disability evaluation, and coordination of compensation and other benefits.

If confirmed, what would you do to ensure that the DOD and VA fully cooperate with each other to develop simplified processes to achieve seamless transition as servicemembers move to veteran status?

Answer. We must be unwavering in our commitment to our veterans and their families. DOD and the VA continuously collaborate to better support transitioning servicemembers. This effort includes the Transition Assistance Program to ensure our servicemembers receive the skills and tools necessary for a successful transition from Active Duty to civilian life. In addition, I am aware that the two Departments have improved information sharing, such as timely availability of Service Treatment Records to VA and enhanced sharing of health information, and are working toward greater interoperability of their records systems. If confirmed, I will continue to direct those responsible in DOD to work toward a seamless transition from recovery to reintegration or transition for our servicemembers, especially those who are wounded, ill, or injured.

INTEGRATED DISABILITY EVALUATION SYSTEM

Question. The Integrated Disability Evaluation System (IDES) integrates the DOD and VA disability systems to improve and expedite processing of servicemembers through the disability evaluation system. Servicemembers continue, however, to experience lengthy delays getting their disability ratings. Although DOD has shown progress in meeting IDÉS timeliness goals, IDÉS casework remains backlogged in the VA's portion of the system.

What is your assessment of the need to further streamline and improve the IDÉS?

Answer. DOD must continually evaluate its disability evaluation system to identify and implement process improvements. A key initiative underway is the development of a DOD Disability Evaluation System (DES) IT system to provide new capabilities to support end-to-end DES case management—tracking, reporting, and electronic case file transfer. We need to continue to work with VA to ensure our IT systems for evaluating and compensating disabled servicemembers and veterans are interoperable.

Question. If confirmed, how would you work with the VA Secretary to ensure both DOD and VA meet or exceed timeliness goals through each phase of the multi-step disability evaluation process?

Answer. If confirmed, I will continue to engage directly with the Secretary of the VA and at DOD with senior leaders in the Services. I will direct the DOD to collaborate with our VA partners to identify necessary changes and appropriately address them. If confirmed, I will ensure that the DOD maintains an effective joint and integrated disability program.

SEXUAL ASSAULT PREVENTION AND RESPONSE

Question. What is your assessment of the Department's progress on implementing recent legislative changes intended to prevent and respond to sexual assaults in the military?

Answer. First, I want to make clear that I consider sexual assault absolutely and without exception unacceptable. It is reprehensible in any aspect of society but particularly consequential in the military, which must operate quickly with complete trust and delegates so much authority to commanders and where missions often require long deployments in austere environments. I understand the Department is implementing many new provisions of law, mandating many changes in programs and procedures. I am told that implementation of the provisions in the NDAA for fiscal year 2014 is ongoing. I believe DOD needs to do better in its prevention efforts and in responding to the needs of survivors compassionately, quickly and effectively.

My understanding is the Department is also working on the implementation of the relevant Carl Levin and Howard P. "Buck" McKeon NDAA for fiscal year 2015 sections, which were enacted in December 2014. If confirmed, I will personally continue to make this a top priority and continue the collaboration with Members of Congress, which is crucial in identifying issues and crafting solutions.

Question. What is your view of the adequacy of the training and resources the Services have in place to investigate and respond to allegations of sexual assault?

Answer. If confirmed, I will take a personal role in assessing these issues and holding people accountable for outcomes. I am aware that training exists for all servicemembers, at all levels, and it is tailored specifically to resonate within each Service and rank's culture. I will continue to assess the effectiveness of this training, and ensure adjustments are made as necessary. It is my understanding that the investigators in recent years have largely changed from an incident-focused investigation to an offender-focused investigation, which emphasizes that an offender's behavioral history may extend beyond the confines of any one particular incident. I am also aware that the relevant agencies have developed training that helps investigators better understand the impact of trauma on memory. If confirmed, I will ensure that the Department continues to work to refine and improve training.

Question. What is your view of the willingness and ability of the Services, and military commanders in particular, to hold assailants accountable for their acts?

Answer. A top priority of DOD must be to hold assailants appropriately accountable for their acts. This must be carried out by the Services and military commanders.

Question. What is your assessment of the potential impact, if any, of proposals to remove from military commanders' disposition authority over violations of the Uniform Code of Military Justice, including sexual assaults?

Answer. Leaders have offered thoughtful perspectives on both sides of this issue. As a matter of first principle, I believe that the Secretary of Defense and other leaders need to be able to hold everyone in an organization accountable. I understand the Department is concerned that this change could tell commanders that it is not their job to root out the evil of sexual assault. I further understand that a congressionally-mandated independent panel found no evidence that removing commanders from the process would improve accountability of offenders or reporting by victims. If confirmed, I will take a direct personal role in this issue.

Question. What is your assessment of the results of the recently reported survey of military members on the prevalence of sexual assault in the Armed Services?

Answer. The existence of sexual assault within our ranks is deeply disturbing and the conduct is utterly unacceptable. The Department must continue its work to eliminate sexual assault. The incidence of sexual assault and the percentage of victims who are retaliated against or concerned about retaliation remain unacceptably high. I am particularly concerned by the finding that a substantial portion of victims perceived some level of retaliation associated with their sexual assault report, including alienation and other forms of social ostracism from their peers. This destroys good order and discipline and fosters a climate that is inconsistent with the dignity and respect that our servicemembers deserve.

Question. What is the status of the review of the Manual for Courts-Martial directed by Secretary Hagel and when do you anticipate the Department will provide a report on this review to this committee?

Answer. I understand that at Secretary Hagel's direction, the DOD's Military Justice Review Group (MJRG) is conducting a comprehensive review of the military justice system. It is my understanding that the MJRG will issue two reports, one in March 2015 recommending changes to the Uniform Code of Military Justice and one in September 2015 recommending changes to the Manual for Courts-Martial. If confirmed, I anticipate directing the relevant DOD components to review the reports and recommendations for appropriate action, and if necessary, proposed legislation.

Question. Secretary Hagel conducted a weekly oversight review to ensure continued progress on implementing legislative changes intended to combat sexual assault. If confirmed, what actions will you take to ensure senior level direction and oversight of efforts to prevent and respond to sexual assaults?

Answer. If confirmed, my personal involvement will be frequent and regular, which will guide the Department to adapt its sexual assault policies and systems with agility. If confirmed, I plan to continue this personal commitment to eliminating sexual assault in our ranks and restoring victim confidence in our response system. I recognize that it will be critical to work closely with Congress and Service leaders to deliver consistent and effective prevention initiatives to influence behavior with the goal of eliminating the crime of sexual assault across the Department.

Question. What is your assessment of the military's protections against retaliation for reporting sexual assault?

Answer. Based on the recent report to the President, they are not adequate. The report underscores the need to better understand the complex ways in which the retaliation manifests itself, and to ensure that victims of sexual assault have choices in the form of assistance they engage to address this behavior. If confirmed, this effort will be a priority of mine.

Question. What is your assessment of military programs for the prevention of domestic abuse, including spousal rape?

Answer. The Department is committed to addressing the prevention of and response to domestic abuse, including spousal rape, which is a serious public health issue. The Family Advocacy Program (FAP) is a comprehensive Department-wide program that provides victim advocacy and counseling for victims and offender treatment programs. FAP utilizes evidenced-based programs to address domestic abuse, and works in collaboration with Command, medical, legal, and law enforcement to support victims of domestic abuse and child abuse and neglect. FAP collaborates closely with the Sexual Assault Prevention and Response Office and shares best practices on victim assistance.

ROLE OF NATIONAL GUARD AND RESERVES

Question. What is your understanding and assessment of the Reserve components' size and force structure, including mix of capabilities and capacities, to meet the requirements of the 2014 Quadrennial Defense Review (QDR) and the current National Military Strategy?

Answer. The seven Reserve components have proven essential during 13 years of war and natural disasters at home. I understand that questions about the size and makeup of the Active component and Reserve component are currently under consideration as the Department continues to implement the new defense strategy and respond to the current fiscal environment. If confirmed, I will insure that the Military Departments, the Chief of the National Guard Bureau, and the combatant commanders work closely together to determine the most effective mix and makeup of Active, Reserve, and Guard personnel to maximize the value of these organizations in a way that is balanced against needs.

Question. In your view, what is the definition of "operational Reserve" when referring to the Reserve components?

Answer. In my view, the term "operational Reserve" refers to our need to have a Reserve component that is made ready and available to operate in peacetime, in wartime and in support of civil authorities.

Question. What is your understanding and assessment of how the concept of an "operational Reserve" is currently used by the Department for Reserve component sizing, force structure, readiness reporting and evaluation, and resourcing? If confirmed, what changes, if any, would you propose regarding the use of the concept of an "operational Reserve" with respect to the Reserve components?

Answer. The National Guard and Reserve is a critical source of many of the capabilities required in ongoing operations and contingency surge requirements. As an operational Reserve the Reserve component would make certain capabilities available on a continuing basis and others to augment and reinforce the Active components when mobilized over time.

Question. In your view, what are the most significant challenges to the realization of the Reserve component as an "operational Reserve"? If confirmed, what actions would you propose taking, if any, to deal with these challenges?

Answer. In my view, some of the most significant challenges in employing the Total Force are declining resources and the subsequent impacts on the Services' abilities to man, train and equip the Force. If confirmed, I will insure the Service Chiefs, the Chief of the National Guard Bureau and the combatant commanders work together to balance the Total Force.

Question. What is your understanding and assessment of current statutory authorities for the mobilization and utilization of members of the Reserve component? If confirmed, what changes in law would you propose, if any, to make Reserve component mobilization and utilization more efficient and effective or to enhance their ability to perform various national security or domestic support to civil authorities missions?

Answer. Current statutory authorities make the Reserve component an accessible force. If confirmed I will insure the Service Chiefs, the Chief of the National Guard Bureau, and the combatant commanders review lessons learned after over a decade of unprecedented mobilization to determine if changes are needed to make mobilization and utilization of our Reserve component more efficient and effective. Key considerations in this review are early notification for deployments, mobilization lengths, dwell-to-mobilization targets and predictability for the service personnel, families and employers.

ACTIVE DUTY AND RESERVE COMPONENT END STRENGTH

Answer. The Department is implementing its 5-year plan to reduce Active Duty end strengths by over 100,000 servicemembers by 2017, and the Reserve compo-

nents by another 21,000 over the same period. These cuts do not include any additional personnel reductions that could result from sequestration or any agreement to avoid sequestration.

Do you agree with this plan to reduce Active Duty and Reserve component end strengths?

Answer. My understanding is that these planned reductions reflect an effort to balance the capability, capacity, and the readiness impacts of budget reductions with the requirements of the defense strategy.

Question. How will these reductions impact the Armed Forces' ability to meet national defense requirements?

Answer. Fiscal uncertainty and new operational demands driven by unforeseen world events have the potential to jeopardize the Services' ability to both provide ready forces for today's fight and guarantee ready forces for tasked operational plans.

Question. What additional military personnel reductions do you envision if the Department is required to operate under the budget caps for fiscal year 2016 as currently set out in law?

Answer. If sequester returns in 2016, I believe the Services may be compelled to implement additional force structure reductions. The consequences of sequestration have been significant for the Joint Force and its ability to meet our strategic objectives. The Department needs to continually examine the force structure and personnel levels required to meet our national security objectives.

Question. In your view, what tools do the Department and Services need to get down to authorized strengths in the future, and which of these require congressional authorization?

Answer. My understanding is that Congress has supported the Department with the force shaping tools necessary to meet the drawdown under its current plan. However, further budget reductions would make it necessary to revisit the size of all components of the Total Force—Active Duty, Reserve component, DOD civilians, and contractors. Consequently, future assessment may require us to request additional congressional authorization for force shaping tools.

WOMEN IN THE MILITARY

Question. Do you believe that the services are conducting appropriate and objective evaluations to inform decisions on the integration of women into previously closed units and military occupations?

Answer. It is my understanding that the Services and U.S. Special Operations Command have been conducting evaluations in accordance with their respective implementation plans. If confirmed, I will closely monitor their progress and ensure they stay on track and meet the Department's timelines. If I receive requests for exception to policy, I will carefully consider them when the time comes.

Question. In your view, should the Military Selective Service Act be amended to require females to register for possible military service?

Answer. I understand a recent law requires the Department to provide an analysis of the constitutionality of continued application of the Military Selective Service Act to only men.

Question. In your view, and if the Military Selective Service Act is so revised, in a future exigency in which the Nation may need to implement a draft, are there any reasons why qualified males and females should not be subject to the draft?

Answer. Given that the Armed Forces have waged the longest continuous conflict in our history with an All-Volunteer Force, and the fact that most military career fields are now open to women, a review of the military selective service act would be prudent. This is not solely a Defense issue, but rather part of a much broader national discussion.

COSTS OF MEDICAL CARE

Question. What is your assessment of the long-term impact of the Department's rising health care costs on military readiness and overall national security?

Answer. In a constrained fiscal environment, if confirmed, I will seek a balanced approach to control rising health care costs by continuing to drive greater efficiencies within the system and to pursue reasonable health benefit reforms that offers exceptional value to our beneficiaries.

Question. If confirmed, what actions would you take to mitigate the effect of the Department's rising medical costs on DOD's budget top-line while simultaneously implementing programs to improve health outcomes and to enhance the experience of care for all beneficiaries?

Answer. Controlling health care costs is a priority for the Department. In recent years, additional emphasis was placed on achieving savings and efficiencies within the operational environment of the Military Health System (MHS). However, these internal savings initiatives are not enough to curb the projected increase in health care costs for the Department in the coming years. In addition to internal savings, I understand that DOD is trying to reform TRICARE into a more integrated health care system, which is less complex and provides greater choice and value to our beneficiaries.

The Military Compensation and Retirement Modernization Commission report provides another set of proposals that require careful review and consideration. If confirmed, I will work with Congress on all responsible efforts to improve the quality and cost-effectiveness of the health system.

Question. If confirmed, what would you do to create a value-based military health system—a system that creates value for beneficiaries and the Department by ensuring the delivery of quality health care and improving health outcomes for beneficiaries at reasonable costs to beneficiaries and DOD?

Answer. A value-based military health system starts with the department's ability to meet the DOD mission. Unlike civilian healthcare systems, the primary mission of the MHS is to ensure a medically ready force and a medical force that is ready to carry out its wartime mission. The Army, Navy, and Air Force medical services maintain that primary mission through the Military Treatment Facilities (MTFs). The MTFs alone cannot provide the care for all beneficiaries and therefore the TRICARE program is a critical component to the integrated health system.

DEFENSE HEALTH AGENCY

Question. In 2013, as Deputy Secretary of Defense, you signed a DOD directive that chartered a new Defense Health Agency (DHA) to reform the governance and management of the Military Health System.

What efficiencies and related savings have resulted from establishment of the DHA?

Answer. Although it's still in its infancy, the DHA stood up ten shared services and I understand it is reducing performance variation across the MHS. The DHA was critical to facilitating a coordinated implementation of the MHS Review, which focused on access to care, quality, and patient safety. The DHA's focus on business process reengineering is looking to achieve a net savings in such areas as pharmacy operations, health information technology and medical logistics. Another goal is to improve coordination of care in our largest health care markets, now being governed as enhanced multi-service markets.

Question. If confirmed, how would you ensure continued progress towards making the military health system a more efficient health care delivery system while improving health outcomes for beneficiaries?

Answer. The MHS, like most other health care systems in this country, needs to provide efficient, quality health care that is safe and effective, whether delivered on a battlefield or in one of our hospitals. If confirmed, I will direct those responsible to look for ways to improve not only the efficiency and performance of the system, but I will insist that critical medical capabilities are ready to support our warfighters anywhere and anytime.

INTEGRATED ELECTRONIC HEALTH RECORD (EHR)

Question. Last year, DOD published a RFP for a modern EHR with plans to award a contract in 2015 with an estimated total life cycle cost of over \$11 billion.

Considering the many problems the Department has experienced with its existing EHR and its failure to deploy a modern EHR over many years despite strong congressional support, do you have confidence that the Department will finally be successful with this effort?

Answer. I have not had the opportunity to review the program status since leaving the Department, but, if confirmed, I will direct those responsible to keep me fully informed of its status.

Question. If confirmed, what would you do to ensure this procurement comes in on time and on budget without any waste of taxpayers' money?

Answer. I am committed to ensuring that our EHR solution meets the needs of our servicemembers while providing maximum value for the taxpayer. The timely and cost-effective acquisition and deployment of a new, modern EHR system is one of the department's top priorities in the health care area.

Question. If confirmed, how would you work with the VA secretary to ensure DOD and VA will seamlessly share real-time health information electronically?

Answer. If confirmed, I fully intend to personally continue the close collaboration that has been ongoing between the DOD and VA, and will personally engage with Secretary McDonald. Interoperability of our medical records system with theirs will be essential to the success of the EHR solution.

HEALTH CARE QUALITY AND ACCESS TO CARE IN THE MILITARY HEALTH SYSTEM (MHS)

Question. If confirmed, what actions would you take with respect to each of the following:

Eliminating performance variability throughout the MHS;

Answer. I am aware that the MHS Review ordered by Secretary Hagel demonstrated that there is performance variability both among and within our Military Treatment Facilities (MTFs). We need to develop a more robust enterprise-wide capability to establish common performance measures, identify associated standards, monitor performance relative to those standards, and mitigate critical deficiencies. I understand the Department has begun to create these capabilities, and I will make it a priority to oversee their successful implementation.

Question. Improving health outcomes of the Department's beneficiaries in the direct and purchased care components of the MHS;

Answer. If confirmed, I will direct that the MHS has a well-developed performance management system that permits data-driven decisions. Leaders will be held accountable for continuous improvement of outcomes in both the direct and purchased care systems.

Question. Delivering quality health care at lower cost to create value for beneficiaries and the Department; and

Answer. Improved readiness, better care and better health outcomes for our beneficiaries while operating the MHS more efficiently and at lower cost will create better value for those we serve as well as the taxpayers. The MHS should continue the enterprise management reforms to standardize business and clinical processes with a goal to optimize utilization, effectiveness and reduce variability.

Question. Promoting transparency of information that will help beneficiaries become more involved in making their healthcare decisions.

Answer. The department has developed a plan to increase transparency throughout the MHS for beneficiaries and key stakeholders. If confirmed, I will ensure that those directly responsible will review this plan and its implementation to make certain the Department and the MHS has met its obligation to meet the information needs of beneficiaries so that they can make important decisions about their healthcare.

MENTAL HEALTH CARE

Question. If confirmed, what actions would you take to ensure that sufficient mental health resources are available to servicemembers in theater and to servicemembers and families upon return to home station locations with insufficient community-based mental health resources?

Answer. If confirmed, I will support efforts to reduce the stigma associated with seeking mental health care, encourage help-seeking behavior and increase the use of available resources among servicemembers and their families. This would include an integrated approach for ongoing mental health research, prevention, and evidence-based treatment efforts that will continue to allow the Department to provide high-quality, timely mental healthcare services. Finally, I will continue to work with the VA and Department of Health and Human Services to coordinate mental health initiatives on behalf of servicemembers, Veterans and their families.

Question. If confirmed, what would you do to ensure that robust mental health resources are available for Guard and Reserve members and their families?

Answer. If confirmed, I will ensure those directly responsible remain committed to ensuring the Reserve components receive all medical and mental health resources necessary to meet their needs and promote smooth re-integration. This begins with ensuring pre and post-deployment health and mental health assessments with prompt referral for those identified as having needs. Additionally, I will ensure those directly responsible work with the VA leadership to improve processes for "hand-offs" to prevent lapses in services. I will continue to assess the adequacy of family support/re-integration programs that are vital to support servicemembers and their families who are facing mental health problems.

SUICIDE PREVENTION

Question. If confirmed, how would you maintain a strong focus on preventing suicides in the Active and Reserve components and in their families?

Answer. DOD has a strong and longstanding relationship with public and private partners and has recently adopted the National Strategy for Suicide Prevention, which is being integrated into the Department's strategy. If confirmed, I will ensure those directly responsible support all efforts to examine gaps and overlaps in efforts across the Department to ensure we provide the best policies and programs to both prevent suicide and build resilience.

PERSONNEL AND ENTITLEMENT COSTS

Question. What do you believe to be an appropriate percentage of the Department's budget for military personnel costs?

Answer. While military personnel costs have historically been roughly one-third of the Department's overall budget, pegging these costs to a specific percentage of the budget is not a useful metric for managing the force or executing the national defense strategy. The Department must maintain the force at sufficient levels with the right capabilities to meet the national defense strategy. Providing an appropriate pay and benefits package is essential to this task, but compensation and benefit costs must be balanced with readiness and modernization requirements to ensure we maintain the highest quality, ready, and modern military force now and for the future.

Question. If this percentage remains constant as overall defense spending flattens, or even declines in real terms, what would be the impact on the size of the force and the Department's ability to execute the national defense strategy?

Answer. If overall defense spending flattens or declines in real terms, military personnel costs will increase as a percentage of the budget in the short-term and, therefore, require larger reductions to readiness and modernization. In the longer-term, additional force reductions will likely be required to balance the program. The resulting smaller force would create additional risk to meet our security challenges.

Question. In your view, what would be the impact on other areas of the Department's budget if military personnel costs continue to rise while the overall defense budget remains flat, or even declines in real terms?

Answer. If military personnel costs were to continue to rise within a flat budget, consuming ever larger portions of that budget, the Nation will face the prospect of a hollow force—with resulting decreasing capability and readiness and a dwindling technological edge on the battlefield.

Question. What actions do you believe can and should be taken, if any, to control the rise in personnel costs and entitlement spending?

Answer. Personnel costs are a significant portion of the Defense budget. During the past several years the Department engaged in a number of broad-based reviews in search of efficiencies and generated proposals to reduce spending. The Congress, too, created the Military Compensation and Retirement Modernization Commission in search of ways to attract and retain the quality people we need while controlling these personnel and entitlement costs. If confirmed, I will seek ways to keep our current and future force and our defense program in balance within the resources Congress provides.

RECOMMENDATIONS OF THE MILITARY COMPENSATION AND RETIREMENT MODERNIZATION COMMISSION

Question. The National Defense Authorization Act (NDAA) for fiscal year 2013 established a commission to review all elements of the military compensation and retirement systems and to make recommendations to modernize those systems to ensure the long-term viability of the All-Volunteer Force, enable a high quality of life for military families, and to achieve fiscal sustainability for the compensation and retirement systems. That Commission will release its report on January 29, 2015.

If confirmed, what will be your plan to review the report and to provide recommendations to the President?

Answer. I appreciate the difficult task that was presented to the Commission. If confirmed, I intend to carefully review and evaluate the Commission's recommendations on reforming military compensation and retirement.

Question. Will you instruct the Department to take the Commission's recommendations into consideration within the base budget request for fiscal year 2017?

Answer. If confirmed, I would expect the Department to fully consider the recommendations of the Commission in future budgets.

RELIGIOUS ACCOMMODATION IN THE MILITARY

Question. In your view, do DOD policies concerning religious accommodation in the military appropriately accommodate the free exercise of religion and other be-

liefs, including individual expressions of belief, without impinging on those who have different beliefs, including no religious belief?

Answer. The current DOD policies appropriately accommodate the free exercise of religion by all servicemembers. The Department respects, and supports by its policy, the rights of individuals to express their own religious beliefs, including the right to hold no religious beliefs.

Question. Do you agree that the primary role of the chaplaincy is to provide for the free exercise of religion by all servicemembers and that chaplains are sufficiently trained to perform or provide for this constitutional right in today's pluralistic military community? If not, why not?

Answer. The Service Chaplaincies advise and assist commanders in the discharge of their responsibility to provide for the free exercise of religion in the context of military service and to assist commanders in managing Religious Affairs. Chaplains also serve as the principal advisors on all issues regarding the impact of religion on military operations. I believe Military Chaplains should be sufficiently trained to carry out their assigned duties.

Question. Do you believe it is the role of the chaplaincy to provide for the religious and spiritual well-being of all members of the Armed Forces, regardless of their faith beliefs?

Answer. In today's pluralistic military environment, the Chaplaincies of the Military Departments recruit, access, train, and equip chaplains with the knowledge and skill to balance their own faith practices with their role in assisting commanders in providing for the free exercise of religion and spiritual well-being of all servicemembers, including those who may hold different or no religious beliefs.

Question. Do you believe that current policies provide sufficient guidance to chaplains who conduct non-religious command training where attendance is required or encouraged to allow chaplains to discuss their religious faith anecdotally and respectfully in a pluralistic setting to support the training objectives?

Answer. It is my understanding that DOD policies provide sufficient guidance to chaplains concerning respectful incorporation of religious and belief principles that support training objectives in a pluralistic setting. Such policies also protect the right of a chaplain to refuse, without any adverse action, this type of duty if it is contrary to his or her conscience, moral principles or religious beliefs.

STRATEGY

Question. According to the force sizing construct in the 2014 QDR, U.S. forces should be able to "defeat a regional adversary in a large-scale multi-phased campaign, and deny the objectives of—or impose unacceptable costs on—another aggressor in another region."

In your opinion, is the QDR's force sizing construct an adequate approach given the dynamics of the current and projected geostrategic and fiscal environments?

Answer. The 2014 QDR envisioned a complex and variable security environment coupled with fiscal uncertainty. Therefore, it directed the Department to size and shape the Joint Force to respond to a wide range of challenges. At the fiscal year 2015 President's budget level, the force planning construct depicts the challenges that the Department must be prepared to respond to and frames its efforts to deliver agile, technologically advanced forces of sufficient size to defend our Nation and secure our interests globally while preventing America's adversaries from achieving their objectives. However, as underscored in the QDR, the force planning construct cannot be fully resourced at sequestration-level funding, casting significant doubt on the Department's ability to implement its overall defense strategy at that reduced budget level.

Question. In your view, are the services currently adequately sized to meet the requirements of the QDR and current National Military Strategy?

Answer. U.S. forces remain able to prevail in more than one conflict at a time, but at higher levels of risk given the cumulative effects of reduced funding, an uncertain budget process, and unrealized force structure and compensation savings. The force will need to become smaller and more efficient over the next 5 years to offset the costs of gradual modernization and improved readiness. Provided sequestration is avoided, the QDR indicated that the Joint Force will remain able to defeat a regional adversary while denying the objectives of, or imposing unacceptable costs upon, a second aggressor. In addition, the force will remain able to conduct sustained, distributed counterterrorism operations and protect the Homeland. However, the QDR also indicated even in the best case, the margin for error in executing the defense strategy is smaller than it has been in many years and requires close cooperation between the administration and Congress to realize necessary savings in

force structure and compensation reform to ensure that the strategy can be implemented.

Question. If confirmed, how would you propose to manage the risk associated with the demands placed upon the Department by the National Security Strategy, the requirements of the National Military Strategy, the geostrategic environment, U.S. international security commitments, and the availability of military capability in an era of declining resources?

Answer. Risks associated with the demands upon the Department must be managed by striking a balance between force capacity, readiness, and modernization in order to be prepared for an uncertain and complicated future. In some cases, and in line with the 2014 QDR, capacity will be reduced to allow for necessary modernization and readiness. The Department plans to continue several internal measures to manage risk, including developing innovative business practices, capabilities, and operational concepts; revising and updating operational plans; enhancing collaboration with allies and partners; reviewing overseas access and basing agreements; resetting the force after two wars; and striving for efficiencies and compensation reform. A return to Budget Control Act-level funding in fiscal year 2016 would increase risks, prolong readiness recovery, and delay necessary modernization programs.

Question. In your view should we accept higher risk with current strategy, change the strategy, or increase resources to increase or preserve military capability and capacity?

Answer. The Department concluded that the fiscal year 2015 budget, combined with Congressional support for the Department's proposed reforms, will enable our military to execute the current strategy. If sequestration level cuts return in fiscal year 2016 or if we do not gain congressional support for proposed force structure reductions and compensation reforms, we may need to revisit the strategy as updated in the 2012 QDR.

Question. What is your understanding and assessment of excess capacity or capabilities, if any, relative to the National Military Strategy? In your view, if there is excess capacity or capability relative to the strategy should it be reallocated across services to reduce risks in areas for which there are gaps?

Answer. The 2014 QDR assessed that after more than twelve years of conflict and amid ongoing budget reductions, the Joint Force was out of balance with respect to capability, capacity, and readiness. As those wars have come to a close, the Department has sought to return these Services to a sustainable budget level and end strength. Looking forward, the Department, with congressional assistance, needs to continue the process to ensure we deliver agile, technologically advanced, ready forces of sufficient size to defend our Nation and secure our interests while evolving threats and challenges.

DETAINEE TREATMENT POLICY

Question. Do you support the policy set forth in the July 7, 2006, memorandum issued by the Deputy Secretary of Defense stating that all relevant DOD directives, regulations, policies, practices, and procedures must fully comply with Common Article 3 of the Geneva Conventions?

Answer. Yes.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated September 5, 2006?

Answer. Yes.

Question. If confirmed, will you ensure that all DOD policies promulgated and plans implemented related to intelligence interrogations, detainee debriefings, and tactical questioning comply with the Common Article 3 of the Geneva Conventions and the Army Field Manual on Interrogations?

Answer. Yes.

Question. Do you share the view that standards for detainee treatment must be based on the principle of reciprocity, that is, that we must always keep in mind the risk that the manner in which we treat our own detainees may have a direct impact on the manner in which U.S. soldiers, sailors, airmen, or marines are treated, should they be captured in future conflicts?

Answer. Yes.

NATIONAL MILITARY STRATEGY AND STABILITY OPERATIONS

Question. In light of Russia's annexation of Crimea, the growth of the Islamic State of Iraq and the Levant (ISIL) and its control over large areas of Syria and

Iraq, and a more muscular China, do you believe that the current National Security Strategy and National Military Strategy should be updated to more accurately account for a changed global security environment?

Answer. Although it is impossible to predict exactly how challenges will develop, we must continue to reexamine global threats to ensure our resources match the threats and opportunities ahead.

The 2010 National Security Strategy is undergoing a necessary revision, to be released in early 2015. Any revisions should address the challenges to the international order and stability that are posed by Russia's occupation and attempted annexation of Crimea and the growth of ISIL, recognizing that the United States is strongest when it employs all elements of national power to address security threats in a coordinated fashion. The United States welcomes the rise of a prosperous, peaceful, and stable China that respects international law and settles disputes without the threat or use of force. The National Military Strategy should be revised to align with the 2015 National Security Strategy, once it is released.

Question. The January 2012 Defense Strategic Guidance called for U.S. forces to be ready to conduct limited counterinsurgency and other stability operations if required, and to retain and continue to refine the lessons learned, expertise, and specialized capabilities that have been gained over the past 10 years of operations in Iraq and Afghanistan. At the same time, the Strategic Guidance states that, "U.S. forces will no longer be sized to conduct large-scale, prolonged stability operations."

In your view, how should strategic guidance for the DOD manage risk and articulate the types of missions or operations U.S. forces will or will not be expected to execute?

Answer. The Department's strategic guidance documents—especially the QDR and National Military Strategy—need to identify the kind of security environment that we anticipate in the future and seek an appropriate balance between capability, capacity, and readiness. As a full spectrum force and a global leader, the U.S. military should continue to be prepared to execute missions in the national interest across the threat spectrum. A full spectrum, ready and modern Joint Force is the best risk mitigation measure.

Question. In your view, what are the appropriate roles and responsibilities, if any, of DOD and between DOD and other departments and agencies of the Federal Government in the planning and conduct of stability operations?

Answer. Because of its unique capabilities, the Department should support other U.S. Government departments and agencies in the planning and execution of stability operations efforts. History has shown that coordinated and integrated interagency and international efforts are essential to successful stability operations. Under the right circumstances, the Department should conduct stability operations activities to establish security, restore essential services, repair and protect the most critical infrastructure, and deliver humanitarian assistance. As security and public order are established or restored, the Department should transition responsibility to other agencies, foreign governments, or international governmental organizations.

Question. If confirmed, in developing the capabilities necessary for stability operations, what adjustments, if any, would you propose making to prepare U.S. forces to conduct stability operations without detracting from their ability to perform combat missions?

Answer. If confirmed, I would assess the requirements for U.S. forces to conduct stability operations successfully without detracting from or degrading their ability to perform combat missions. After nearly 2 decades of serving in Afghanistan, Iraq, the Balkans, and elsewhere, United States forces have made great strides in their abilities to conduct stability operations under difficult circumstances. If confirmed, I would seek to maintain the stability operations expertise the Department has gained, and ensure that the Military Departments have the mechanisms necessary to expand their capacities when required.

Question. In your view, does the U.S. Government need to define or reallocate responsibilities and authorities among Federal agencies, and establish new procedures to manage stability operations? If so, why?

Answer. Our efforts abroad over the past 13-plus years highlight the importance of collaborative and coordinated planning with interagency and international partners, which is fundamental to the successful management and effectiveness of stability operations. As we have seen in both Iraq and Afghanistan, it takes a robust interagency effort, as well as international participation, to develop institutions that can contribute effectively to peace, security and stability. If confirmed, I would review the Department's policies and procedures with respect to stability operations and make appropriate recommendations to ensure our success, both as a department and as part of the U.S. Government as a whole.

Question. If confirmed, what recommendations would you make, if any, to improve U.S. Government approach to planning, resourcing, and conducting stability operations?

Answer. If confirmed, I would work with other departments and agencies to explore opportunities to integrate and coordinate the full range of available inter-agency stabilization tools and make appropriate recommendations.

STRATEGY IN IRAQ AND SYRIA

Question. On 10 September 2014, President Obama said “Our objective is clear: We will degrade, and ultimately destroy, ISIL through a comprehensive and sustained counterterrorism strategy.”

What criteria do you believe should be used to evaluate whether or how much ISIL is degraded and what is your assessment of the progress to degrade ISIL in Iraq and in Syria?

Answer. The United States is at the beginning of what could be a long campaign to degrade and inflict a lasting defeat on ISIL. DOD’s contributions are one part of a whole-of-government strategy and an effort that includes many of coalition partners to create both the political and military conditions needed for success. Ultimately the Iraqis must offer a national program of reform and reconciliation in order for the Iraqi Security Forces to succeed. The coalition effort must also involve strengthening and working with the Iraqi Security Forces and affiliated Kurdish and tribal elements, who are critical to inflict a lasting defeat of ISIL. If confirmed, I will consult closely with my military commanders, civilian advisors, foreign partners, interagency counterparts and Members of Congress to examine progress and offer my best strategic advice to the President on this complex and vitally important campaign.

Question. Do you believe the strategy against ISIL needs to include both conventional and counterinsurgency elements given that ISIL has demonstrated significant conventional and insurgency capabilities?

Answer. Yes. I believe that a strategy for countering ISIL must bring to bear all elements of national power, including military force as well as diplomatic, intelligence, economic, humanitarian assistance, and other key tools. Many of these tools are important in a counterinsurgency as well as a conventional campaign. If confirmed, I would continue to support a whole-of-government approach.

Question. What does the end state President Obama has declared to be the objective of our operations—“ultimately destroy ISIL”—look like in your opinion?

Answer. I believe that ISIL must no longer be a threat to Iraq, the region, the United States, and our partners.

Question. A large part of the support for ISIL and other extremist groups like al Nusrah by the local Syrian population is based on the fact that these groups pledge to go after President Assad, to remove him from power.

Is removing Assad part of the current United States strategy in Syria? If not, what is your assessment of the impact of not going after Assad on our ability to work with the Syrian population to counter ISIL and other extremist groups like al Nusrah?

Answer. As the President has said, Assad has lost legitimacy and cannot be a part of the long-term future of Syria. However, the most immediate threat to United States national interests is ISIL—and there is no sustainable solution in Syria without addressing the threat of ISIL. If confirmed, I will consult with my military commanders, civilian advisors, interagency partners, foreign counterparts and Members of Congress to formulate by best strategic advice for the President.

Question. The NDAA for fiscal year 2015 authorizes assistance in Iraq to “local security forces with a national security mission” including “tribal security forces or other local security forces.”

How important do you consider arming of the Sunni tribes in Anbar province to degrading ISIL and how do you assess progress to date?

Answer. Political inclusion in Iraq is a key element of countering ISIL in a lasting way. Integrating Sunni tribal fighters into the Iraqi Security Forces and enabling them to combat ISIL is therefore important to ultimately defeating ISIL. I have not been briefed in detail on this effort. If confirmed, I would continue to work with the Department of State, coalition partners, and the Government of Iraq to encourage efforts to arm and integrate Sunni tribal forces into the Iraqi Security Forces to fight ISIL.

AFGHANISTAN STRATEGY

Question. What lessons should we learn from the experience of a calendar-based drawdown of United States troops in Iraq as they apply to executing the drawdown of United States and international troops in Afghanistan?

Answer. Each country has a unique set of underlying governance, security, and cultural circumstances. With the United States-Afghanistan Bilateral Security Agreement in place, and with the support of the Afghan Government, the Department's train, advise, and assist mission with the Afghan security forces is intended to help ensure continued progress in developing Afghanistan's security capabilities and preserve the security gains we have made collectively. Based on what we have learned in Iraq, progress on political reform is key to this effort. I believe that the new government in Kabul will be the biggest driver in whether Afghanistan has a positive future. I welcome that President Ghani has stated that a continued United States and the North Atlantic Treaty Organization (NATO) presence is an important component of his strategy for Afghanistan. That provides a key foundation for the transition to a robust, sustainable security relationship in the future. I am mindful of the new and dynamic global threat environment, and you can be assured that if there are instructive lessons from Iraq or anywhere else that are relevant to Afghanistan, I will always take them into account in the advice I offer to the President.

Question. If confirmed, are there changes you would recommend to the United States strategy in Afghanistan?

Answer. The next 2 years represent an important transition period from more than a decade of war toward an enduring defense relationship with an Afghan partner that is capable of providing for its own security and preventing al Qaeda and other extremists from threatening United States interests. The NATO-led train, advise, and assist mission and the United States counterterrorism mission are cornerstones within our overall strategy that will provide the Afghans an opportunity to make progress on the security situation in Afghanistan, and serve as a balance against terrorist exploitation of Afghan territory. If confirmed, I will continue to seek the advice of our military leadership and partners.

Question. What is your assessment of the progress of the campaign in Afghanistan?

Answer. Over the last 13 years, our campaign in Afghanistan has placed constant pressure on al Qaeda and prevented Afghanistan from being used to launch terrorist attacks against the United States Homeland. The United States Government has supported the Afghan people and protected United States national interests by helping Afghanistan strengthen the capacity of its security forces. The Afghan National Security Forces (ANSF) have continued to progress, and have proven increasingly capable in leading operations and prevailing over insurgents. Although I am encouraged by the positive strides made in Afghanistan, it is clear that much work remains to be done. We must stay engaged with our Afghan partners and support them, as they own the fight. This must be an interagency and international effort – with appropriate funding for the ANSF as well as economic and diplomatic support for the Afghan people.

Question. If reports of ISIL operating in southern Afghanistan are true, and ISIL is fighting with the Taliban, how should that affect the United States strategy for Afghanistan?

Answer. I support the President's strategy to degrade and ultimately destroy ISIL, wherever it may attempt to establish a foothold. I am aware of recent press reporting that ISIL is attempting to recruit militants in Afghanistan and is considering expansion to the region. If confirmed, I will learn more about these developments and will work with the Afghan Government and our coalition partners to address all terrorist threats to United States personnel in Afghanistan and to prevent any terrorist groups from using Afghanistan to threaten the United States and our allies and partners.

Question. If security conditions on the ground in Afghanistan degrade in 2016, would you consider recommending to the President revisions to the size and pace of the drawdown plan announced by the President in order to adequately address those security conditions?

Answer. Yes.

Question. In your opinion, should the authorities granted to the commander of United States forces in Afghanistan take into account the security conditions on the ground faced by United States troops?

Answer. If confirmed as Secretary of Defense, I will take seriously my responsibility to ensure that our commander in Afghanistan has the authority needed to

execute the missions directed by the President effectively, and that these authorities allow U.S. forces to take the appropriate measures to protect themselves.

AFGHANISTAN NATIONAL SECURITY FORCES

Question. What is your assessment of the progress in developing a professional and effective ANSF?

Answer. If confirmed, I will assess this issue firsthand but my assessment has been positive. I will ensure that the Department continues building the ANSF's institutional capabilities, and I will work with our allies and partners to retain critical coalition support to the ANSF where capability gaps remain, particularly in the areas of close air support, intelligence, special operations, sustainment, and Afghan security ministry capacity.

Question. What do you see as the main challenges to building the capacity of the ANSF and, if confirmed, what recommendations, if any, would you make for addressing those challenges?

Answer. I understand that the main challenges to address with the ANSF are fielding and integrating capabilities such as close air support, special operations, and intelligence, surveillance, and reconnaissance; and developing the capacity of the Ministries of Defense and Interior to manage planning, programming, budgeting, logistics, force generation and force sustainment. Corruption and the flow of funding from illicit narcotics is also a significant challenge that requires an international and interagency response. If confirmed, I will assess our progress in helping the ANSF develop these areas and will focus on solutions to identified gaps.

Question. What are the key enablers in security force capabilities that need to continue to be developed to ensure the long term efficacy of the ANSF against the Taliban and other extremists and when do you forecast those capabilities will be in place?

Answer. I understand that the NATO Resolute Support mission places a high priority on developing the ANSF's capability to provide fire support from the air, and on developing organic airborne intelligence, surveillance, and reconnaissance (ISR) capabilities to maintain advantages over the Taliban and other extremists.

Question. Do you support plans for building and sustaining the ANSF at 352,000 personnel?

Answer. Based on the information available to me and given Afghanistan's current security challenges, I support the current authorized level of 352,000 ANSF personnel and will work with Congress to ensure that our efforts to sustain this force are appropriately resourced. If confirmed, I will ensure the Department will continue to work with the Afghan Ministries of Defense and Interior to determine the timing for reducing the ANSF to an appropriate size, given available resources, capabilities, and the magnitude of the threat.

Question. Do you agree that any reductions in the ANSF from this 352,000 level should be based on security conditions in Afghanistan at the time those reductions would be expected to occur?

Answer. Although the security condition on the ground will be a critical factor in determining any future reductions in the ANSF, we must also look closely at the Afghan ability to sustain the ANSF financially. My understanding is that current Resolute Support mission efforts are focused on optimizing the effectiveness of the ANSF force structure while increasing the Afghan capability to sustain that structure. I believe we have an obligation to the Afghan people, our allies, and United States taxpayers, to ensure that the ANSF is a combat-effective, sustainable, and affordable force in the long-term.

RECONCILIATION

Question. In your view, what should be the role of the United States in any reconciliation negotiations with the Afghan Taliban and other insurgent groups?

Answer. The United States supports an Afghan-led political peace process in which all opposition groups, including the Taliban, engage in a dialogue about the future of their country. I believe the United States should continue to support President Ghani's efforts to engage in peace talks, as long as any outcome of reconciliation includes that the Taliban and other armed groups end violence, break ties with al Qaeda, and accept Afghanistan's constitution—including its protections for women and minorities.

Question. What additional steps, if any, should the United States be taking to help advance the reconciliation process?

Answer. President Obama has made clear that an Afghan-led peace and reconciliation process is the surest way to end the violence and ensure lasting stability for Afghanistan and the region. It is my understanding that President Ghani is putting

considerable effort into re-energizing reconciliation and is reaching out to regional partners and the international community to take part in the process. I believe the United States should support these new initiatives and, if confirmed, I look forward to engaging with my Afghan counterparts on how DOD can best support reconciliation efforts.

Question. In your view, what should be the role of Afghanistan's neighbors, in particular Pakistan, in the reconciliation process?

Answer. Afghanistan's neighbors should play constructive and supportive roles in an Afghan-led reconciliation process, since a stable and peaceful Afghanistan will promote long-term stability and prosperity for the entire region. I hope signs of improved Afghanistan-Pakistan relations provide fresh opportunities for Pakistan to reinforce President Ghani's efforts toward peace talks between the Afghan Government and the Taliban.

UNITED STATES STRATEGIC RELATIONSHIP WITH PAKISTAN

Question. What would you consider to be areas of shared strategic interest between the United States and Pakistan?

Answer. Counterterrorism cooperation remains a critical shared strategic interest. Pakistan still faces a real and potent threat from several militant groups within its borders, such as the Pakistani Taliban, responsible for the recent school attack in Peshawar.

We also share Pakistan's strategic interest in improved relations between Islamabad and Kabul. I believe that the United States and Pakistan should continue to work to promote peace and reconciliation in Afghanistan and to improve regional security.

Question. In what areas do you see United States and Pakistani strategic interests diverging?

Answer. It is important that the United States continues to engage with Pakistan in areas where our strategic interests diverge, including the direction of Pakistan's nuclear program and its tolerance of terrorist organizations like the Haqqani Network and Lashkar-e Taiba. In addition to threatening United States forces in Afghanistan, these groups threaten regional security, endanger the prospects of a political settlement in Afghanistan, and undermine Pakistan's own stability. I understand that Pakistan has pledged to target all militant groups operating within its borders, including the Haqqani Network and Lashkar-e Taiba. If confirmed, I will ensure that the Department holds Pakistan to this pledge, and works against actors who are exploiting Pakistani territory to destabilize the region.

Question. If confirmed, what changes, if any, would you recommend for United States relations with Pakistan, particularly in terms of military-to-military relations?

Answer. If confirmed, I would continue to work on improving our relationship with Pakistan by collaborating where our strategic interests converge and engaging where they diverge. Moving forward, I believe it is in the United States' interest to expand counterterrorism cooperation with Pakistan in our fight against al-Qaeda, and to counter any emerging threats. Additionally, I would seek to facilitate cooperation between Afghanistan and Pakistan, and encourage communication between Pakistan and India, as these relationships will continue to be vital to stability in the region.

UNITED STATES ASSISTANCE TO PAKISTAN

Question. Since 2001, the United States has provided significant military assistance to Pakistan. In addition, the United States has provided significant funds to reimburse Pakistan for the costs associated with military operations conducted by Pakistan along the Afghanistan-Pakistan border.

In your view, how effective has the assistance and other support that the United States has provided to Pakistan been in promoting United States interests?

Answer. I understand that since last summer, Pakistani forces have been clearing militants from their strongholds along the Afghanistan-Pakistan border. Pakistan's military has been able to carry out these operations at a more effective pace and scale in part thanks to United States reimbursements for Pakistan's operational expenses. Additionally, I understand United States security assistance programs have provided the Pakistan military with many of the tools necessary to conduct successful operations in this region. Continued U.S. support will remain critical to the success of these efforts.

Question. Do you support conditioning United States assistance and other support to Pakistan on Pakistan's continued cooperation in areas of mutual security interest?

Answer. If confirmed, I will consult within the Department and the United States interagency on how best to incentivize Pakistani action that is in the mutual interest of the United States. The United States and Pakistan do work together on common objectives, and I believe we should carefully examine the impact of conditions on Pakistani cooperation. If confirmed, I will evaluate what additional support would be appropriate from the U.S. Government.

LIBYA

Question. Following the evacuation of the United States Embassy in Tripoli on July 26, 2014, there is no longer an active American presence in the country and the situation in country remains dire.

What role, if any, should the United States have in Libya moving forward?

Answer. The United States has a national security interest in a stable Libya and in preventing its use as a terrorist safe haven. The United States should assist the ongoing United Nations-led political process to bring moderate Libyans into a unity government and bring an end to the conflict—which exacerbates the terrorist threat—and take measures to prevent terrorists from using Libya as a safe haven. When circumstances allow, the United States should once again consider supporting official Libyan security forces and their development.

U.S. MARINE CORPS SUPPORT TO THE STATE DEPARTMENT EMBASSY EVACUATIONS

Question. The Accountability Review Board for Benghazi supported the “State Department’s initiative to request additional marines and expand the Marine Security Guard (MSG) Program—as well as corresponding requirements for staffing and funding. The Board also recommended that the State Department and DOD identify additional flexible MSG structures and request further resources for the Department and DOD to provide more capabilities and capacities at higher risk posts.” The NDAA for fiscal year 2013 authorized up to 1,000 additional marines in the MSG program to provide the additional end strength and resources necessary to support enhanced Marine Corps security at United States embassies, consulates, and other diplomatic facilities.

In your view, should the current arrangements between the Department of State and U.S. Marine Corps be modified?

Answer. I understand that DOD has taken measures to expand the Marine Security Guard (MSG) Program, and has taken the additional step of creating the MSG Security Augmentation Unit, which may be used to provide additional security at diplomatic facilities as threats change. In 2013, the U.S. Marine Corps (USMC) and the Department of State (DOS) signed a new Memorandum of Agreement (MOA) on Marine Security at DoS facilities. I understand that DOD and DOS are reviewing policies, programs, roles, and responsibilities—including the MSG program—to maximize the protection of our overseas diplomatic facilities and personnel, and would support this review if confirmed.

Question. In your view, would it be beneficial to the security of diplomatic facilities, many of which house U.S. military personnel, to have appropriate DOD personnel to assist in the conduct of vulnerability assessments of such facilities?

Answer. Yes. To that end, the Department has directed its Geographic Combatant Commands (GCCs) to conduct planning and coordination with Chiefs of Mission at high-threat, high-risk posts identified by DoS. The GCCs are also directly engaged with the Chiefs of Mission to plan and coordinate response options. Likewise, GCC Security Assessment Teams have deployed to numerous high threat posts such as Baghdad and Sana’a to help Embassy staff with their security and evacuation planning. I would review these issues if confirmed and offer my best recommendation.

AL QAEDA IN THE ARABIAN PENINSULA

Question. What is your assessment of the threat posed by al Qaeda in the Arabian Peninsula (AQAP) to the United States?

Answer. AQAP poses a significant terrorist threat to the United States Homeland and United States interests in the Middle East. Since 2009, AQAP has attempted at least three attacks on the United States, including through the use of sophisticated concealed explosive devices. Additionally, AQAP attack plotting led to the temporary closure of several United States Embassies in the Middle East in August 2013.

Question. What is your assessment of the current United States strategy to counter AQAP, specifically in Yemen?

Answer. Countering AQAP should be a top priority for the U.S. Government. The United States counterterrorism (CT) strategy in Yemen focuses on a mix of partnership activities and limited direct action against those who threaten the United

States. The United States Government, in partnership with its allies and the Yemeni Government, have made a number of important gains against AQAP, including the removal of numerous AQAP leaders and the disruption of plotting against the United States, although AQAP remains resilient and we must maintain our vigilance in addressing this threat. If confirmed I intend to receive a detailed briefing to inform my assessment.

YEMEN

Question. What are United States national security interests in Yemen?

Answer. Our primary national security interest in Yemen is to disrupt, dismantle, and defeat AQAP and eliminate the ungoverned territory that AQAP or any hostile group may seek to exploit to threaten the United States, our regional interests, and those of our partners. We also have an interest in a stable government in Yemen, and support a responsible transition to an inclusive and capable government that helps achieve those objectives.

Question. What is your assessment of United States strategy in Yemen to date?

Answer. I believe that although the United States Government has helped the Yemeni Government build the capabilities of its security forces, the political instability that has long plagued Yemen—particularly in recent weeks—hinders Yemen's ability to respond to the threat posed by AQAP.

Question. What are the implications of recent events in Yemen for United States counterterrorism policy both in Yemen and globally?

Answer. Continued political turbulence in Yemen risks further hindering Yemeni efforts against AQAP and enabling AQAP to continue to plot attacks and recruit operatives in Yemen's ungoverned spaces. AQAP's claim of responsibility for the Charlie Hebdo attack in Paris demonstrates that AQAP continues to pose a threat to the United States and its allies and partners. The political situation in Yemen is difficult and fluid, and it remains to be seen how this will affect our relationship with the Yemeni Government. Nevertheless, I believe the United States should continue to maintain pressure on AQAP by using all necessary means to eliminate terrorist threats to our national security.

NORTH AFRICA

Question. In recent years, there has been a growth of terrorist networks, capabilities, operations, and safe havens throughout North and East Africa, including groups that have the intention to target United States and western interests. In the face of growing instability and threats, the U.S. counterterrorism effort in the region has been described as an "economy of force" effort.

Do you agree with that characterization of the situation in North and East Africa and the United States counterterrorism efforts to combat the related threats?

Answer. I would characterize United States counterterrorism efforts in North and East Africa as working by, with, and through our allies and regional partners. In North Africa, the United States works with allies such as the French and regional partners such as Tunisia, Niger, and Chad. Specifically, DOD has supported their combined operations against groups such as al Qaeda in the Lands of the Islamic Maghreb (AQIM) and al-Murabitun. In East Africa, the United States has continued training, equipping, and enabling the African Union Mission to Somalia troop contributing countries in their efforts to stabilize Somalia and counter the threat posed by al-Shabaab.

Question. What is your assessment of the current U.S. counterterrorism strategy in the region?

Answer. I understand the current United States strategy seeks to prevent and disrupt terrorist plots that threaten United States interests at home and abroad, while helping the Yemeni government build its own CT capabilities to combat AQAP over the long run. I am aware that the United States has removed several key AQAP operatives from the battlefield and disrupted AQAP plots. In 2012, Yemeni forces, with training and advisory support from the Department, succeeded in driving AQAP from large areas of Yemen. However, I believe the turbulent political situation in Yemen will complicate these efforts, and will require adapting the strategy to these changes.

Question. In your view, is the U.S. military allocating adequate resources to effectively address the terrorism threat in the region?

Answer. In my view, given the counterterrorism challenges we face in numerous areas, United States military resources are adequately balanced to meet the many competing counterterrorism requirements in North and East Africa.

Question. General Rodriguez noted in his March 2014 testimony that "North Africa is a significant source of foreign fighters in the current conflict in Syria."

What is your understanding of the foreign fighter flow from North Africa to the conflict in Syria and Iraq?

Answer. I believe foreign fighters pose a threat to the United States, and that this threat is exacerbated by the ongoing political and security instability in Libya. If confirmed, I will focus attention on the foreign fighter flow as the Department works with regional partners in North Africa to address the challenge posed by the terrorist safe haven in Libya and broader counterterrorism issues.

Question. In your view, is it likely that many of these fighters will eventually return home from Syria and Iraq to North Africa and continue their fight against regional governments?

Answer. There is a real possibility that as we address the situation in Syria and Iraq, some of these fighters may choose to return home to North Africa. This could pose a serious challenge for our regional partners. These returning fighters will have the benefit of training and combat experience. It is therefore important that the United States continue its close collaboration on counterterrorism with our partners in North Africa so that they are prepared to respond in the event that the fighters decide to take up arms upon their return.

We must also work closely with the neighbors of Syria and Libya to build up their security capabilities to counter instability and the negative regional impact it could cause. If confirmed, I would ensure that DOD supports the diplomatic efforts to secure a political solution in Libya, work closely with Libya's neighbors to ensure regional stability, and maintain an active and robust counterterrorism presence in the region.

COLLABORATION BETWEEN THE DEFENSE DEPARTMENT AND THE INTELLIGENCE COMMUNITY

Question. Since September 11, 2001, collaboration—both analytical and operational—between DOD and the Intelligence Community has grown increasingly close. On one hand, seamless collaboration is a vital component of effective and rapid responses to non-traditional threats, and bringing together the strengths of the full spectrum of defense and intelligence missions creates opportunities for solutions to complex problems. On the other hand, such collaboration—without effective management and oversight—risks blurring the missions of agencies and individuals that have cultivated distinct strengths or creating redundant lines of effort.

What are your views regarding the appropriate scope of collaboration between DOD and the Intelligence Community?

Answer. Collaboration between DOD and the Intelligence Community (IC) is an essential element for supporting our national security objectives. For example, DOD depends on capabilities provided by the IC to support weapons systems acquisition and to enable military operations. The IC depends on capabilities provided by DOD to support special forces. This collaboration is essential to make progress toward dismantling and strategically defeating al Qaeda, to counter the proliferation of WMD, to defend against space and cyber threats, and to operate in denied areas.

Question. In your view, are there aspects of the current relationship between the Department and the Intelligence Community that should be re-examined or modified?

Answer. I am not aware of any specific areas requiring immediate modification, however, if confirmed, I will look for opportunities to build on the existing strong relationship.

RUSSIA

Question. Crimea was formally annexed when President Putin signed a bill to absorb Crimea into the Russian Federation on March 18, 2014, and Russia continues to fuel instability in eastern Ukraine despite a ceasefire agreed to in September 2014.

How effective do you assess the sanctions of the United States and the European Union have been in deterring additional aggression by Russia?

Answer. United States and European Union sanctions, combined with declining oil prices, have significantly impacted the Russian economy and highlight the consequences of Russia's actions in Ukraine. Unfortunately, despite these costs, Russia has not abided by its commitments in the Minsk agreements and is continuing to foment instability in eastern Ukraine. If confirmed, I would work with U.S. departments and agencies to review and adjust our sanctions regime as appropriate.

Question. In your opinion, what other specific actions has the United States taken that have helped to deter additional Russian aggression in Eastern Europe?

Answer. The United States has taken action, both bilaterally and within the NATO Alliance, with the goal of deterring additional Russian aggression and reas-

sure European Allies. These include the establishment of the European Reassurance Initiative (ERI), which provides an enhanced rotational presence in Europe; support to United States allies and partners in the region; and increased training and exercises. If confirmed, I plan to take a close look at what additional actions we might take to deter Russia and impact Putin's calculus.

Question. In your opinion, what steps have proven or are likely to prove most effective at deterring Russian aggression in Eastern Europe?

Answer. If confirmed, I would take a close look at what actions may have worked best, and what additional actions we might take, to deter Russia from aggression in Eastern Europe.

Question. Do you believe that Moldova and Georgia are at a heightened state of vulnerability given Russian willingness to take aggressive action in Ukraine?

Answer. Yes. Russia has long fomented "frozen conflicts" in Moldova and Georgia in order to limit their freedom of action and hinder their Euro-Atlantic ambitions. Following Russia's actions in Crimea and eastern Ukraine, Moldova and Georgia have increased their efforts to deepen cooperation with the United States and NATO.

Question. Russian tactics in eastern Ukraine have been called "hybrid" and combine hard power with soft power, including elements such as lethal security assistance to separatists, the use of special forces, extensive information operations, withholding energy supplies and economic pressure.

If confirmed, what elements should make up the strategy you would recommend to counter this "hybrid" approach?

Answer. Through the European Reassurance Initiative and the NATO Readiness Action Plan, the United States is supporting our Allies and partners in Eastern Europe with training activities, rotational presence, and capacity-building programs. These efforts focus on making our allies and partners more resistant to asymmetric threats; demonstrating United States resolve to support European and global security; and deterring Russian aggression. If confirmed, I would seek opportunities to support and work with our Allies and partners in creating more activities, training, and exchanges that build their resistance to asymmetric, or hybrid, methods of coercion.

Question. In light of Russia's actions in 2014, what do you believe are appropriate objectives for United States-Russian security relations?

Answer. As I understand the situation, DOD suspended military cooperation with Russia as a result of its occupation and attempted annexation of Crimea. Russia's behavior is inconsistent with that of a responsible, global stakeholder, and I support this response. If confirmed, I would be open to seeking measured avenues that allow more productive engagement with Russia, but only on issues where we have a clear national interest.

NATO ALLIANCE

Question. The reemergence of an aggressive Russia has resulted in NATO developing the Readiness Action Plan that NATO Secretary General Jens Stoltenberg called "the biggest reinforcement of our collective defense since the end of the Cold War." NATO also continues to be central to our coalition operations in Afghanistan and elsewhere, even as many NATO members have significantly reduced their national defense budgets in response to economic and fiscal pressures.

In your view, particularly in light of the Russian Federation's aggression against Ukraine, what are the major strategic objectives of the NATO Alliance in the coming years?

Answer. The greatest responsibility of the Alliance is to protect and defend its territory and populations against attack, as set out in Article 5 of the North Atlantic Treaty. The best way to protect our populations and territories is to cooperate with Alliance partners to deter challenges to our security from emerging; to effectively manage challenges when they do emerge; and to be prepared to mount a strong defense if deterrence fails. When allies feel threatened—as many do as a result of Russia's aggression against Ukraine—it is important for the Alliance to carry out the necessary training, exercises, and planning and to provide visible reassurance to vulnerable Allies in order to reinforce confidence in Article 5 and sustain Alliance solidarity. NATO must also remain prepared to undertake its other "core tasks" of crisis management and cooperative security, drawing on its unique political and military capabilities to prevent and respond to crises and to work with partners and other international organizations to address threats that emanate from outside Alliance territory.

Question. What are the greatest opportunities and challenges that you foresee for NATO in meeting its strategic objectives over the next 5 years?

Answer. NATO's greatest opportunities lie in how it deals with the expanding range of challenges it will face over the next five years. While I cannot predict all the challenges the alliance will face, NATO's ability to respond effectively and with resolve against Russia's aggression; to counter non-state actors that threaten the alliance and its periphery, such as ISIL; and to manage the transition in Afghanistan will be critical over the next 5 years. Managing these myriad challenges will require the political will, solidarity, and adequate defense investment to fulfill the vision of the Wales Summit. Ensuring that happens will be NATO's greatest challenge over the next 5 years.

Question. In light of the reductions in national defense spending by some NATO members, are you concerned that the Alliance will lack critical military capabilities? If so, what steps, if any, would you recommend be taken to address potential shortfalls in Alliance capabilities?

Answer. The United States should be concerned about continued reductions in defense investment by our Allies, particularly the NATO Allies that have been our most reliable partners for managing global security issues. These capabilities can be costly, but we need to ensure that in the future the United States is not the only Ally with such capabilities. That means holding Allies to the Defense Investment Pledge they agreed to at the Wales Summit and working with Allies on defense planning to ensure they maintain the specific capabilities that are needed.

Question. What do you see as the proper role, if any, for NATO in addressing the threat posed by ISIL and in addressing the problem of illegal immigration across the Mediterranean Sea?

Answer. NATO nations have a vested interest in defeating ISIL, both to promote stability in the Middle East and to eliminate the threat posed by ISIL to NATO nations and partners. If confirmed I would work with NATO Allies to appropriately scope our collective efforts. To date, NATO nations have committed forces to counter ISIL under unilateral and multilateral efforts. On illegal Mediterranean immigration, NATO should continue its efforts to share information gained through maritime situational awareness operations. If Allies agree, NATO could also help address regional security crises and instability, or humanitarian crises, which are often associated with displaced populations and flows of refugees.

Question. The concept of defense cooperation between NATO members was emphasized at the NATO summit in Chicago in May 2012.

What areas or projects would you recommend, if confirmed, that NATO nations cooperate in to improve NATO alliance capabilities?

Answer. Cooperation among allies on capabilities is increasingly important in light of the worldwide challenges and the fiscal straits facing allied nations. If confirmed, I would work to ensure allies honor their recent Summit pledge to move toward the two percent defense spending target, which also called for focusing those resources on specific alliance capability needs, such as command and control and joint intelligence, surveillance, and reconnaissance.

Question. Under what conditions, if any, would you envision further enlargement of NATO in the coming years?

Answer. The door to Alliance membership remains open to those European nations deemed ready for membership by the 28 allies. The United States and our allies, through Partnership for Peace and other Partner programs, work with candidates to help prepare for membership, such as through improving military capabilities and interoperability. If confirmed, I would ensure DOD is working both at NATO and bilaterally to ready candidates to be considered for membership.

Question. In your view, is there a continuing requirement for U.S. nuclear weapons to be deployed in NATO countries?

Answer. NATO will remain a nuclear Alliance for as long as nuclear weapons exist. The Alliance's nuclear force is an effective deterrent. Allies reaffirmed this stance at the Wales Summit last September, and I support the conviction that NATO must maintain the full range of capabilities necessary to maintain Alliance security, based on an appropriate mix of nuclear, conventional, and missile defense capabilities.

Question. Turkey continues to be a gateway for foreign fighters proceeding to and from Syria and Iraq.

What steps would you recommend, if confirmed, to encourage Turkey to address this threat?

Answer. The threat posed to the United States and the west by foreign fighters moving in and out of Syria—many of whom transit through Turkey—remains a concern. If confirmed, I would continue to support United States interagency efforts to assist Turkey in disrupting this threat—including strengthening the Department's partnership on this issue with the Turkish military—as well as to assist the source

countries for foreign fighters around the world in doing more to identify and halt potential violent extremists before they travel.

KOSOVO

Question. Approximately 700 United States troops remain in the Balkans as part of the Kosovo Force (KFOR) that first deployed to Kosovo in 1999 and today is comprised of over 4,600 personnel from 30 countries. Spikes in violence in 2011 required the deployment of the NATO operational Reserve Force battalion of approximately 600 soldiers to bolster KFOR and maintain a secure environment. Progress is required in both the military and political realms before further troop reductions can be made.

What major lines of effort do you think are required to further reduce or eliminate United States and NATO presence in Kosovo?

Answer. The key line of effort that will define United States and NATO presence in Kosovo is the continued normalization of relations between Serbia and Kosovo, under the EU facilitated dialogue that led to a normalization agreement in April 2013. A further line of effort is the transition of the Kosovo Security Forces into a Kosovo Armed Force that integrates the various ethnic communities of Kosovo and contributes to the strength of national governing institutions.

Question. In your view, can the European Union play a more significant role in Kosovo?

Answer. The EU plays a significant role in Kosovo as one of the three major guarantors of Kosovo's peace and stability, along with the Kosovo national police and NATO's Kosovo Force. The EU-facilitated political dialogue between Serbia and Kosovo, along with the reforms and concessions the EU requires of Serbia as it seeks EU membership, are major factors contributing to the normalization process between Kosovo and Serbia. This active engagement by the EU has been an essential part of the progress made to date.

SPECIAL OPERATIONS FORCES

Question. The 2006 and 2010 QDRs mandated significant growth in our Special Operations Forces (SOF) and enablers that directly support their operations. The most recent QDR released in 2014 QDR capped this growth at 69,500, approximately 2,500 below the original planned growth.

In light of the increase in terrorist threats worldwide, do you believe the revised end strength for SOF is sufficient to address such threats?

Answer. Since 2001, the Department has continuously examined the U.S. Special Operations Command (SOCOM) force structure to ensure that there are adequate SOF capabilities and capacities to meet the worldwide terrorist threat. The Department has invested in SOF readiness and modernization efforts to meet emerging requirements and to address the needs of the future security environment. If confirmed, I would work closely with my interagency counterparts to develop options for the best use of these capabilities and with those responsible in the department to examine this issue further.

Question. SOFs are heavily reliant on enabling support from the general purpose force.

In light of current fiscal challenges, do you believe sufficient enabling capabilities can be maintained within the general purpose forces and that such capabilities will remain available to SOFs?

Answer. I believe that it is important for our SOFs to receive excellent support from the Services. If confirmed, I would work closely with those responsible in the Department to ensure the Department achieves an appropriate balance.

COMBATING TERRORISM

Question. What is your assessment of the threat posed by al Qaeda and associated forces to the United States Homeland, U.S. interests overseas, and western interests more broadly? Which al Qaeda affiliates and associated forces are of most concern?

Answer. Al Qaeda and its affiliates and adherents continue to pose a significant threat to the United States, its interests, and the interests of our key western allies. The recent attacks in Paris, which have been linked to AQAP demonstrates this fact.

Question. What is your understanding of the Department's role in the U.S. strategy to combat terrorism?

Answer. DOD has a two-fold role in carrying out the President's guidance contained in the 2011 National Strategy for Combating Terrorism. First, the Department's principal function in support of this strategy is to work with key partners around the globe to build their own capacity to take action against terrorist groups

and networks both internally and within their particular regions. Capacity building efforts are part of a broad multi-departmental and multi-agency effort in support of the strategy's long-term goal to advance effective democracies. Second, the Department actively works to prevent terrorist network attacks by collecting and sharing intelligence with key partners, conducting information operations, and, when appropriate, conducting U.S. operations to capture or kill terrorists who pose a continuing, imminent threat to U.S. persons.

Question. Are there steps the Department should take to better coordinate its efforts to combat terrorism with those of other Federal departments and agencies?

Answer. In the decade following the events of September 11, the U.S. Government learned many lessons relating to the value of active cooperation and sharing among the various departments and agencies. DOD has internalized many of these lessons as part of our institutional culture; it routinely coordinates and collaborates with other Federal departments and agencies to combat terrorist networks and threats to U.S. interests. Success in today's complex threat environment requires an inter-agency approach.

Question. In your opinion, how does the fighting between ISIL and al Qaeda for preeminence among terrorist organizations alter the nature or scope of the global security threat as it relates to violent extremists? What elements of our strategy best take advantage of the infighting between major terrorist groups?

Answer. The fighting between ISIL and al Qaeda for preeminence of the global jihadist movement does not significantly alter the scope of the threat posed to the Homeland, our overseas bases, and our deployed personnel. We must remain vigilant against all threats to the United States Homeland, overseas infrastructure, and interests, and we must remain flexible to meet the threat posed by either ISIL or al Qaeda, and potentially other violent groups as necessary. However, there exists the potential that competition between the groups could escalate the threat we face, as each group increases external plotting efforts in an attempt to bolster their credentials within the global jihadist movement.

As opportunities may emerge for the United States to further disrupt their activities. I would direct the Department to monitor these opportunities and recommend steps to address them as needed.

SECTION 1208 OPERATIONS

Question. Section 1208 of the Ronald Reagan NDAA for fiscal year 2005 (Public Law 108-375), as amended by subsequent bills, authorizes the provision of support (including training, funding, and equipment) to regular forces, irregular forces, and individuals supporting or facilitating military operations by U.S. SOFs to combat terrorism.

What is your assessment of this authority?

Answer. It is my understanding that section 1208 authority is an effective tool to support U.S. SOFs conducting counterterrorism operations. If confirmed, I would look for ways to maximize our return on the investments we are able to make in support of partner forces under section 1208 authority.

MASS ATROCITIES PREVENTION

Question. President Obama identified the prevention of mass atrocities and genocide as a core U.S. national security interest, as well as a core moral interest, in August 2011 under Presidential Study Directive 10.

What are your views on the role the United States plays in the prevention of mass atrocities and genocide?

Answer. The United States can help prevent mass atrocities and genocide worldwide. That role is consistent with our values, and is in our national security interest. The military has unique capabilities to counter atrocities; in a recent example, United States air strikes helped protect Yezidi refugees on Mount Sinjar in Iraq. There is more to atrocity prevention than use of military force, however. For example, adequate warning mechanisms and international pressure, including sanctions, can also help prevent atrocities and genocide.

Question. What are your views on the adequacy of the Department's tools and doctrine for contributing to this role?

Answer. I believe the Department has effective tools and doctrine to help deter both mass atrocities and genocide. These tools include providing humanitarian assistance and helping secure territory to protect civilians. If confirmed, I would continue to look for ways to enhance the tools and doctrine available to us in preventing mass atrocities and genocide.

UNITED STATES FORCE POSTURE IN THE ASIA PACIFIC REGION

Question. The Defense Department's January 2012 strategic guidance, "Sustaining U.S. Global Leadership: Priorities for the 21st Century", states that "while the U.S. military will continue to contribute to security globally, *we will of necessity rebalance toward the Asia-Pacific region.*" Likewise, the 2010 report of the QDR states that the United States needs to "sustain and strengthen our Asia-Pacific alliances and partnerships to advance mutual security interests and ensure sustainable peace and security in the region," and that, to accomplish this, DOD "will augment and adapt our forward presence" in the Asia-Pacific region.

What does the "rebalance toward the Asia-Pacific region" mean to you in terms of force structure, capabilities and funding?

Answer. The rebalance to the Asia-Pacific region, as announced by the President, incorporated in the 2012 Defense Strategic Guidance, and reinforced by the 2014 QDR, has resulted in a significant rebalancing of U.S. force structure and capabilities to this region, commensurate with its vital importance to U.S. security interests and global peace and prosperity. As we plan for the future, we will need to prioritize investments in advanced capabilities that are critical for the future operational environment. If confirmed, I will continue to support the ongoing efforts to increase DOD presence in the region and invest in and deploy critical advanced capabilities.

Question. If sequestration cuts move forward as planned beginning in fiscal year 2016, do you feel DOD has adequate resources to implement the January 2012 strategic guidance?

Answer. If we return to sequestration-level cuts in fiscal year 2016, we will face significant risks across the board, and may have to reassess the defense strategy. If confirmed, I look forward to working with Congress to help solve this pressing problem.

Question. What do you see as the United States security priorities in the Asia-Pacific region?

Answer. First and foremost, we must work tirelessly to protect security and stability in the Asia-Pacific region, which is vital to the prosperity of all Pacific nations, including the United States. The United States faces a range of challenges in the Asia-Pacific region, including provocations by the DPRK and the growth of its ballistic missile programs, the emergence of new technologies intended to prevent open access to the air and maritime domain, widespread natural disasters and transnational threats, and territorial disputes.

To address these challenges, I believe the Department must continue to modernize U.S. alliances and partnerships, which provide a critical role in underwriting regional security. The Department should also continue to strengthen our ability to deter threats to the U.S. Homeland and our allies and citizens overseas, enhance United States force posture and capabilities in the region, work with China to encourage greater transparency about how it will use its growing military capabilities; and encourage the peaceful resolution of territorial disputes in accordance with international law.

Question. Do you believe that it is a "necessity" to rebalance the United States military toward the Asia-Pacific region? If so, why?

Answer. Yes. The United States has been—and always will be—a Pacific nation, due to both our geography and our critical interests in the region. The Asia-Pacific region is home to over half of the world's population, half of the world's GDP, and nearly half of the world's trade. It is also home to some of the world's fastest growing economies and largest democracies.

The United States military presence has played a vital role in undergirding peace and stability in the Asia-Pacific region for over 60 years. Our presence deters potential adversaries; protects core principles, such as freedom of the seas and the peaceful resolution of conflicts; and reassures key allies and partners. I believe this presence is critical to the continued security of the region and the future prosperity of the United States and our allies and partners.

Question. Do continuing operations in the Middle East hamper this pivot?

Answer. It is important to continue to advance the force structure changes, new forces station plans, improvements in advanced weapon systems, and other measures that make up the military aspects of the rebalance, as well as to continue the political and economic aspects, even as U.S. forces respond to other global contingencies.

Question. Why, if at all, do you believe it is important for the United States military to maintain and even augment its forward presence in the Asia-Pacific region, and what are the advantages to having a forward presence?

Answer. It is critical for the United States military to evolve its forward presence in the Asia-Pacific region to respond to the changing strategic environment. If con-

confirmed, I will continue ongoing efforts to achieve a more geographically distributed, operationally resilient, and politically sustainable force posture in the Asia-Pacific in order to reassure allies and partners and deter aggressive acts by adversaries. I believe that improving access and presence enables building regional partner capacity that is a force multiplier for U.S. military forces in the event of a contingency or humanitarian crisis in the region.

Question. Secretary Hagel has said that the Army could “broaden its role,” after more than a decade of continuous operations in Iraq and Afghanistan, “by leveraging its current suite of long-range precision-guided missiles, rockets, artillery and air defense systems” to build a modern coastal defense force that could contribute to operations in anti-access/area-denial environments.

Do you concur that U.S. defense policy would be served if the Army were to adopt such a mission? What do you see as possible obstacles to the Army taking on such a mission?

Answer. If confirmed, I would support Army’s ongoing efforts to improve its integrated air and missile defense capabilities. In the coming years, the drawdown in Afghanistan will allow the Army to focus on resetting, to look forward to new missions, and to invest in innovative technologies and concepts of operations that will contribute to the resiliency of the joint force.

Question. Are you confident the Guam Distributed Laydown Plan can be executed at the cost estimate and under the political assumptions previously presented by the Department?

Answer. The Joint Force is developing Guam into a strategic hub for the region. Following the submission of the Guam Master Plan to Congress in July 2014, execution of the Guam program is moving forward. I understand that the new plan is comprehensive, but I am not fully briefed on the updated details at this time. If confirmed, I will direct that efforts continue within the Department to scrutinize costs and program execution, as well as to engage with my Japanese counterparts on their continued contributions.

Question. Do you see value in the Department conducting another East Asia Strategy Report, as was last done in the late 1990s?

Answer. Yes, I believe it is in the Department’s interest to clearly articulate our priorities and security objectives in this vital region of the world. The report required section 1251 of the NDAA for fiscal year 2015 provides the Department with the opportunity to address these issues.

Question. Do you see a need for enhanced United States security engagement in the Indian Ocean, and if so, in what areas and with whom?

Answer. Yes. The Indian Ocean is one of the world’s busiest trade corridors and the United States and our regional partners have a shared interest in ensuring safe and secure access to its maritime routes. As Asian economic growth continues to increase traffic in the Indian Ocean, it will increase the potential for threats in the region, including piracy, extremist attacks, or illegal trafficking. The United States has a strong interest in working with long-time allies and partners such as India and Australia to combat these threats, while also increasing security assistance and military-to-military engagement with other strategically positioned states such as Bangladesh, Sri Lanka, and the Maldives.

CHINA

Question. From your perspective, what effect is China’s expanding economy and growing military having on the region at-large and how does that growth influence the United States security posture in the Asia-Pacific region?

Answer. China’s economic growth can be a positive force in the Asia-Pacific region, and the United States and many countries in the region welcome China’s economic rise. However, China’s increasing military might, in the absence of greater transparency from China, is causing rising concern throughout the region and must be closely watched. China’s military expenditures continue to grow annually at double-digit rates even as China asserts territorial and maritime claims in ways contrary to international norms. These developments are spurring other Asia-Pacific countries to modernize their militaries and causing increased demand in the region for security cooperation with the United States.

The United States should continually evaluate our force posture and capabilities in order to sustain peace and stability in the region. If confirmed, I will work to ensure that the United States remains the preeminent military power in the Asia-Pacific region in order to sustain the conditions that have fostered peace and prosperity.

Question. As China continues to invest in capabilities designed to deter or deny United States military forces seeking to operate in the Western Pacific, are you con-

fidant that the United States is investing in the right programs, posture, and operational concepts to sustain a favorable military balance with China?

Answer. It is necessary for the United States to continue to monitor closely trends in Chinese military modernization, strategy, doctrine, and training, and in concert with allies and partners, to adapt investment programs, posture, and operational concepts to maintain a stable and secure Asia-Pacific security environment and a favorable military balance with China.

Question. What can the United States do, both unilaterally and in coordination with allies and partners, to counter the increasing challenge posed by China in the East and South China Seas?

Answer. As a Pacific nation, the United States has a vested interest in maintaining peace and stability, the free flow of commerce, and freedom of navigation and overflight in the East and South China Seas. United States security presence, including our strong alliances and partnerships, as well as our force posture and capabilities, have protected these interests and helped maintain maritime stability for more than 60 years.

The United States must continue to encourage China to clarify its claims in the South China Sea in accordance with international law. We should also reaffirm our strong commitment to our allies and partners and the need for all parties to develop confidence-building measures that will increase transparency and reduce risk.

If confirmed, I will work to ensure that the United States sustains its ability to deter aggression and coercion and maintain free and open access to the maritime domain in the Asia-Pacific region. To this end, I will continue the Department's efforts to modernize U.S. security alliances and partnerships, enhance U.S. force posture, and update our military capabilities.

Question. United States-China military-to-military dialogue has been strained over the past several years and efforts to establish and maintain mutually beneficial military relations has been hampered by China's propensity for postponing or canceling military engagements in an apparent effort to influence United States actions, although there is some evidence that the relationship is improving.

What is your view of the purpose and relative importance of sustained military-to-military relations with China?

Answer. It is profoundly in the United States' and China's interests that we find ways in the overall relationship, as well as in the military-to-military relationship, to increase cooperation where our interests overlap and to manage our differences where we disagree. In recent years, the Department's sustained and substantive dialogue with the Chinese People's Liberation Army (PLA) has enabled both the United States and China to reduce the risk of misperception and miscalculation, as well as to deepen practical cooperation in areas ranging from humanitarian assistance to military medicine. In addition to making investments that ensure our technological advantages in all domains, the military-to-military relationship is an important component in managing competition.

I believe we should continue to use our military engagement with China to establish deeper cooperation where there is clear, mutual benefit and to enhance dialogues to reduce risk and manage our differences. As the Department continues to develop the military-to-military relationship with China, it will be important to also adapt forces, posture, and operational concepts in cooperation with our allies and partners to maintain a stable and secure Asia-Pacific region.

Question. Do you believe that we should make any changes in the quality or quantity of our military relations with China? If so, what changes would you suggest and, given Chinese resistance to military-to-military dialogue, how would you implement them?

Answer. If confirmed, I would seek to strengthen the United States-China military-to-military relationship in ways that best serve the interests of the United States and our allies and partners. Military-to-military ties are beginning to demonstrate positive outcomes. China is devoting more attention to operational safety and preventing incidents that could seriously harm the overall relationship. If confirmed, I will continue to pursue a sustained, substantive dialogue that aims to reduce risk and manage our differences, while building concrete, practical cooperation in areas of mutual interest.

NORTH KOREA

Question. What is your assessment of the current security situation on the Korean peninsula?

Answer. The United States-ROK alliance continues to be the critical linchpin to deterring North Korean aggression and maintaining stability on the Korean Peninsula.

North Korea remains one of the most intractable security problems for the United States and our allies and partners in the region. North Korea continues to take actions that are destabilizing for the region, including its December 2012 missile launch, February 2013 nuclear test, series of short-range ballistic missile launches in 2014, and its recent cyber-attack against Sony Pictures Entertainment.

The limited information we have on Kim Jong Un, his regime, and North Korea's motivations also add to my concern. Despite the recent signals from both North and South Korea about openness to inter-Korean engagement, the United States should remain vigilant against the strong possibility that North Korea will use brinkmanship and provocations to try to coerce the United States and its allies and partners back into negotiations on its own terms. If confirmed, I will ensure that the United States-ROK Alliance continues to strengthen alliance capabilities to counter North Korea's increasing missile and nuclear threat.

Question. What is your assessment of the threat posed to the United States and its allies by North Korea's ballistic missile and WMD capabilities and the export of those capabilities?

Answer. North Korea's ballistic missile and weapons of mass destruction (WMD) capabilities clearly present a serious and direct threat to United States forces postured in the Asia-Pacific region as well as to our regional allies and partners. These capabilities, although untested at longer ranges, could also pose a direct threat to the United States. Moreover, North Korea's history of proliferation activities amplify the dangers of its asymmetric programs.

If confirmed, I will ensure that we draw upon the full range of our capabilities to protect against, and to respond to, these threats.

Question. In your view, what additional steps should the United States take to defend against the North Korean ballistic missile threat and dissuade North Korea from its continued pursuit of ballistic missile technology and to stop or slow North Korean proliferation of missile and weapons technology to Syria, Iran, and others?

Answer. If confirmed, I will continue efforts to strengthen our strong defense posture against the North Korean ballistic missile threat. This includes supporting our current efforts to increase the number of ground-based interceptors in California and Alaska, enhancing DOD's ability to highlight and disrupt the illicit proliferation networks that North Korea uses, and promoting cooperation with partners to interdict vessels and aircraft suspected of transporting items of proliferation concern.

Question. What is your view on Kim Jong Un's proposal to cease future nuclear tests in exchange for the United States cancelling annual military exercises in 2015 with South Korea?

Answer. I believe the United States annual combined exercises with the Republic of Korea, including Key Resolve and Foal Eagle during the first part of 2015 and Ulchi Freedom Guardian during the summer of 2015, are routine, transparent, and defensive exercises that are meant to strengthen military readiness and Alliance preparedness. There is no equivalence between conducting these exercises and North Korean nuclear tests, which are violations of United Nations Security Council resolutions.

INDIA

Question. What is your view of the current state of the United States-India security relations?

Answer. India and the United States have built a strong strategic partnership. India is an important net provider of security in the region, and a partner on issues ranging from maritime security to humanitarian assistance to broader regional stability. The past decade has been transformative in the United States-India relationship, and we are seeing greater convergence in our interests and concerns than ever before, particularly between our rebalance to Asia and India's "Act East." Strengthening the United States-India defense relationship was a priority for me as Deputy Secretary of Defense and, if confirmed, I will continue to prioritize the steady growth of this relationship.

Defense plays a vital role in United States-India relations, which includes a robust series of military exchanges and exercises, a strong track record on defense trade, and increasingly close consultations on regional security issues. DOD also remains committed to technological cooperation with India through the Defense Technology and Trade Initiative (DTTI), under which the President announced four pathfinder projects, a working group on aircraft carrier cooperation, and the possibility of cooperating on jet engine technology. As Deputy Secretary of Defense, I launched DTTI, now led by Under Secretary Frank Kendall. If confirmed, I will lean-forward to expand DTTI with additional co-production and co-development activities.

Question. If confirmed, what specific priorities would you establish for this relationship?

Answer. If confirmed, I will continue to find ways to strengthen our military-to-military relationship by expanding the scope and complexity of our exercises, and ensure the consistency of our engagement. I will prioritize exchanges at all levels of our military, and encourage frequent high-level visits. I will also build upon the progress achieved under the Defense Technology and Trade Initiative (DTTI). This includes pursuing additional opportunities for co-production/co-development projects, developing the defense trade relationship into increasingly sophisticated areas, and encouraging broader defense S&T engagement with India. Finally, I will continue to look for ways to expand upon our maritime security relationship and identify specific areas for increased cooperation, including in the Asia-Pacific.

Question. What is your assessment of the relationship between India and China and how does that relationship impact the security and stability of the region?

Answer. As with the United States and China, India's relationship with China displays both cooperative and competitive aspects. It is hampered by a trust deficit stemming from China's long-time, close relations with Pakistan; a long-time border dispute; and on-going competition for resources. Efforts to mitigate this mistrust are further complicated by a growing competition for influence in the South and Southeast Asian regions, a trade imbalance in China's favor, and recent Chinese naval activity in the Indian Ocean region.

Despite these factors, the two countries often find common ground in international groupings, such as the BRICS and G20, due to shared interests and a desire to shape the international system to ensure their respective domestic development and economic growth. This cooperation helps to maintain stability in Sino-Indian ties and preclude more overt security competition. The United States, India, and China all have an important role in ensuring the peace and stability of the region and a rules-based order.

DEPARTMENT OF DEFENSE COUNTERNARCOTICS ACTIVITIES

Question. DOD serves as the single lead agency for the detection and monitoring of aerial and maritime foreign shipments of drugs flowing toward the U.S. On an annual basis, DOD's counter narcotics (CN) program expends nearly \$1 billion to support the Department's CN operations, including building the capacity of U.S. Federal, State, and local law enforcement agencies, and certain foreign governments, and providing intelligence support on CN-related matters and a variety of other unique enabling capabilities.

In your view, what is the appropriate role of DOD in counterdrug efforts?

Answer. DOD should continue to play an important role in identifying counter narcotics networks and supporting the interdiction of illicit drugs entering the United States. In addition, DOD should continue to support U.S. law enforcement and partner nations' enforcement capabilities by facilitating training, providing equipment, and improving infrastructure that strengthens their operational reach and their own sustainment capabilities.

Question. Do you believe that the United States broadly, and the U.S. military more narrowly, has been effective in achieving its counterdrug objectives?

Answer. The United States has supported the interdiction of hundreds of tons of illegal drugs by law enforcement personnel annually. The United States has also, through multi-agency efforts, put pressure on major drug trafficking organizations and their leaders. The Department's efforts to build the counter narcotics capacity of partner nations' security forces also contribute to counterdrug objectives by strengthening security institutions and by equipping and training security personnel to disrupt, degrade, and deter drug trafficking networks in both source and transit countries.

Question. In your view, what should be the role of the United States in countering the flow of narcotics to nations other than the United States?

Answer. I believe that the United States, along with other countries, should continue to assist other nations in the fight against drug trafficking by supporting efforts to enhance the capacity of these nations to disrupt and degrade narcotics trafficking networks.

NATIONAL STRATEGY TO COMBAT TRANSNATIONAL ORGANIZED CRIME

Question. Transnational criminal organizations are having a debilitating impact on the ability of our foreign partners to govern their nations and provide opportunities for their people. DOD is by no means the U.S. Government's law enforcement agency, but it does bring unique enabling capabilities to our Nation's Federal law enforcement agencies. The NDAA for fiscal year 2015 expanded several of the De-

partment's primary counterdrug authorities to include "countering transnational organized crime (TOC)" as an approved activity to reflect the increasingly diverse nature of these illicit, global networks.

What is your understanding of the President's strategy to combat transnational criminal organizations?

Answer. The President's Strategy to Combat Transnational Organized Crime recognizes that TOC has expanded in size, scope, and influence over the past 20 years, and now poses a significant and direct threat to national and international security. The Strategy, with amplifying implementation guidance, calls for combatting networks that pose a strategic threat to U.S. interests, and ultimately aims to reduce TOC networks from a national security threat to a manageable public safety problem.

Question. What role, if any, should the Department play in combatting transnational criminal organizations?

Answer. The President's Strategy to Combat Transnational Organized Crime declares TOC a threat to national security, and calls on the U.S. Government to build, balance, and integrate the tools of national power to combat TOC and related threats. Although DOD does not serve as the lead for combatting TOC, it can provide unique and critical support to U.S. law enforcement efforts. Specific DOD capabilities include military intelligence support and counter-threat finance support, training of foreign partners, and detection and monitoring. The expanded authorities provided by Congress in the NDAA for fiscal year 2015 provide additional opportunities for DOD to support efforts to counter illicit networks and to contribute further to the achievement of U.S. Government objectives.

COUNTER THREAT FINANCE

Question. DOD and the Intelligence Community (IC) have begun investing more resources in identifying and tracking the flow of money associated with terrorist networks and illicit trafficking, but the opportunities for tracking and degrading illicit financing flows are not yet matched by the effort and resources devoted to them. Identifying and disrupting key individuals, entities, and facilitation routes enabling the flow of money that supports terrorism, production of IEDs, narco-trafficking, proliferation, and other significant national security threats could have an outsized impact on confronting these threats.

What are your views on the role of DOD in counter threat finance activities?

Answer. Terrorists, drug traffickers, and other adversaries rely heavily on licit and illicit funding sources to support their activities. I believe it is essential to engage all available tools to track and halt the flow of money and to fight our adversaries' ability to access and use global financial networks. Although DOD is not the lead agency for Counter-Threat Finance (CTF), CTF can be important to achieving DOD goals. I am aware that the Department works with other departments, agencies, and partner nations to provide planning, network analysis, and intelligence analysis.

Question. Are you aware of any policy, legal authority, or resource shortfalls that may impair U.S. counter threat finance efforts?

Answer. I understand that the Department has concerns that we do not have enough fidelity on the sources of corruption that can impact our ability to achieve our goals in partner nations and, in non-terrorism cases, there are still difficulties fully sharing relevant information between law enforcement and intelligence entities.

Question. In your view, how should DOD coordinate and interface with other key agencies, including the Department of Treasury and the Intelligence Community, in conducting counter threat finance activities?

Answer. I am aware that DOD works with other U.S. Government departments and agencies, including the Department of the Treasury and the Intelligence Community, on counter-threat finance efforts to limit our adversaries' ability to use global financial networks.

CENTRAL AMERICA AND MEXICO

Question. During a March 13, 2014, Senate Armed Services Committee hearing, General John Kelly, Commander of United States Southern Command, stated that the "unprecedented expansion of criminal networks and violent gangs is impacting citizen security and stability in the region" which has led the United Nations to characterize Latin America "the most unequal and insecure region in the world." Despite this reality and the region's proximity to the U.S. Homeland, DOD efforts in the region have routinely been plagued by resource shortfalls, which have only been exacerbated by sequestration. To this point, General Kelly stated before the

committee: “the severe budget cuts are now reversing the progress and forcing us to accept significant risks. Because of asset shortfalls, we’re unable to get after 74 percent of suspected maritime drug trafficking. I simply sit and watch it go by.” General Kelly went on to state that “the cumulative impact of our reduced engagement won’t be measured in the number of canceled activities and reduced deployments, it will be measured in terms of U.S. influence, leadership, relationships in a part of the world where our engagement has made a real and lasting difference over the decades.”

Do you share General Kelly’s concerns about the impact of DOD resource shortfalls to our operations and security interests in the region?

Answer. Yes.

Question. What are your views on the threats posed by transnational criminal organizations in this region and their impact on U.S. security interests?

Answer. Transnational criminal organizations have become entrenched in places like the Northern Triangle of Central America, where they take advantage of weak government institutions, endemic corruption, large under-governed spaces, and the lack of viable economic opportunities. Many of our partners in the region are challenged to control the influence of transnational criminal organizations, which present a real threat to stability and expose vulnerabilities to the southern approaches to the United States.

Question. What is your assessment of DOD’s role and current activities in Mexico and Central America?

Answer. DOD supports the broader U.S. interagency effort to promote security and stability in the region. The Department’s security cooperation activities in Central America focus on professionalization, respect for human rights, building capacity of local security forces, including maritime, and facilitating internal defense institutional reform efforts that will help those governments plan, resource, and maintain enhanced capabilities. The Department contributes to efforts to help Mexico address internal and transnational security challenges, as well as to support Mexico’s growing regional and international defense leadership role.

Question. What changes, if any, would you propose to DOD’s current role and activities in this region?

Answer. If confirmed, I would direct my team to examine whether there is more DOD could do to support U.S. strategies to address the root causes of insecurity in the region. Steps the U.S. Government can take include supporting efforts to strengthen government institutions and fight corruption, develop infrastructure, address control of under-governed spaces and help diminish criminal organizations. Lasting solutions will require an interagency approach by the United States and will require the United States to cooperate and coordinate with other partners in the region.

CUBA

Question. On December 17, 2014, President Obama announced changes in the diplomatic relationship between the United States and Cuba which includes the easing of several longstanding restrictions.

Would you recommend the establishment of military-to-military engagement between the United States and Cuba? If so, what, if any, prerequisites should there be to their establishment?

Answer. I believe that with the recent efforts to begin normalizing relations with Cuba there is an opportunity to consider carefully whether to expand defense relations. If confirmed, I would examine this issue carefully and work to ensure any military-to-military engagement is nested within a larger, comprehensive U.S. Government engagement strategy.

INTERAGENCY COLLABORATION

Question. The collaboration between U.S. Special Operations Forces, general purpose forces, and other U.S. Government departments and agencies has played a significant role in the success of counterinsurgency and counterterrorism operations in recent years. However, much of this collaboration has been ad hoc in nature.

What do you believe are the most important lessons learned from the collaborative interagency efforts in Afghanistan, Iraq, and elsewhere?

Answer. It is critical to draw lessons learned from Afghanistan and Iraq. A key lesson is that strategy requires a close integration of military, economic, intelligence, and diplomatic elements and the full range of American power. Increased collaboration, transparency, and communications among the interagency are important. If confirmed, I will focus on maintaining and improving these relationships to ensure that interagency collaboration is as effective as possible.

Question. How do you believe these efforts can be improved?

Answer. Given the complexity and scope of the national security challenges we face, a whole-of-government approach is essential to our success in order to harness the full capabilities of all U.S. departments and agencies. We must work with inter-agency partners to evaluate continually the effectiveness of our coordinated efforts and make adjustments where necessary. We must also acknowledge that every tool is not appropriate for every task.

Question. How can the lessons learned in recent years be captured in military doctrine and adopted as “best practices” for future contingency operations?

Answer. We must have a rigorous approach to capturing our lessons learned and including them in our professional military education system and doctrine review process. If confirmed, I would keep these principles in mind as I work with the military departments and the combatant commands to maintain and cultivate enduring and agile partnerships with key departments and agencies across government.

STRATEGIC REVIEWS

Question. What is your understanding and assessment of the DOD processes for analysis, decisionmaking, and reporting results for each of the following strategic reviews:

The Defense Strategy Review (section 118 of title 10, United States Code, as amended by Public Law 113–291);

Answer. The purpose of the QDR is to articulate the Nation’s defense strategy in support of the President’s National Security Strategy. DOD is tasked, per Title 10 U.S.C. Section 118, with conducting a comprehensive examination of the national defense strategy, force structure, force modernization plans, infrastructure, budget plan, and other elements of the defense program and policies with a view toward establishing a defense program for the next 20 years. In my experience, effective QDRs incorporate inputs from various stakeholders, both within and outside the Department, and provide effective guidance to develop U.S. military force structure, plans, and programs.

Question. The National Military Strategy (section 153 of title 10, United States Code);

Answer. The Chairman of the Joint Chiefs of Staff prepares the National Military Strategy (NMS) in order to assist the President and Secretary with unified strategic direction of the Armed Forces. The Chairman uses a robust Joint Strategic Planning System to develop the NMS and biennially submits the strategy to the Armed Services Committees of the House and Senate. The strategy specifies military objectives, strategic and operational missions required to achieve those objectives, and the necessary capabilities to carry out each mission. The NMS also describes the strategic and operational risks associated with accomplishing the strategy.

Question. Global Defense Posture Review (section 2687a of title 10, United States Code); and

Answer. The Global Defense Posture annual report to Congress, authored by the Under Secretary of Defense for Policy in coordination with the Joint Chiefs of Staff, offers an operational view of the Department’s military personnel and facilities, and assesses changes to overseas posture required to meet evolving security environment and strategic priorities outlined in documents such as the QDR. DOD global posture decision-making processes continually review the appropriate mix of deployed and forward stationed U.S. forces, the distribution of enduring locations, and status of international agreements to meet national security requirements. If confirmed, I will ensure this thorough process continues to meet the Congressional intent.

Question. If confirmed, what recommendations would you make, if any, to change title 10, United States Code, and to improve DOD’s processes for analysis, policy formulation, and decision making relative to each review above?

Answer. I have no specific recommendations at this time. If confirmed, I look forward to working with Members of Congress to ensure that these reviews continue serving the needs of both DOD leaders and Congress.

TACTICAL FIGHTER PROGRAMS

Question. Based on the current defense strategy, defense planning scenarios, and force-sizing construct, what are your views on the ability of the Department to meet combatant commander requirements with regard to fighter force capability and capacity now and into the future?

Answer. U.S. fighter forces currently enjoy technical superiority and will continue to contribute to the overall success of our forces. Other nations are making significant investments in modernizing their fighter fleets and in building advanced air

defenses. The U.S. must maintain the ability to control the air space in any current and future operations.

The largest and most costly modernization effort we will face over the next several years is the F-35 Joint Strike Fighter (JSF) program to upgrade our tactical aviation forces to fifth generation technologies.

Question. Based on current and projected threats, what are your views on the continued requirement for and timing of this program?

Answer. While the F-35 program has experienced a number of program delays and other significant acquisition issues, when fielded it will provide a significant edge in the number of high capability aircraft. The 5th generation technology that is the backbone of this system will be required for success in future conflicts.

Question. What is your assessment of whether the restructuring of the JSF program that we have seen over the past several years will be sufficient to avoid having to make major future adjustments in either cost or schedule?

Answer. The restructuring initiated in 2010 put the F-35 program on better footing. However, a program of this scope and importance requires continued aggressive management attention.

Question. Are there any initiatives you would propose to help reduce operating and support costs for the JSF program?

Answer. There are many factors that drive the operating and support costs for a weapons system like the F-35. Aggressive management of these initiatives will be required because the operating and support costs will be a major part of the JSF's overall cost. I understand that the F-35 program is undertaking a number of reliability and maintainability initiatives that are focused on improvement in those areas.

STRATEGIC BOMBER

Question. Secretary Hagel said on January 13, 2015, "I think the Long-Range Strike Bomber is absolutely essential for keeping our deterrent edge."

What are your views on the requirement for this capability, and how to acquire such a platform while providing the best value for the American taxpayer?

Answer. I believe the Department requires global power projection capabilities across the full spectrum of conflict in order to deter and dissuade potential aggressors. To maintain these capabilities, the Air Force requires a new generation of stealthy, long-range strike aircraft that can operate at great distances, carry substantial payloads, and operate in and around contested airspace. If confirmed I will work with the Under Secretary of Defense, Acquisition, Technology and Logistics to ensure that the program will provide best value for the American taxpayer by ensuring the program is based on mature technologies and through program competition across a highly capable industrial base.

NAVY SHIPBUILDING

Question. Today's Navy is at its smallest size in decades and could decline further without additional urgent shipbuilding recapitalization efforts. Over the past several years, successive Chiefs of Naval Operations have concluded that the Navy requires a fleet of at least 306 ships to perform its mission. The Navy's current naval battle force is only 289 ships, and will not be at the 306 level until sometime after 2020.

What are your views regarding the CNO's conclusions about the appropriate size and composition of the fleet, and the adequacy of the Navy's current and projected plans to achieve a fleet with that number of ships?

Answer. A strong and capable Navy is essential to meet our Nation's strategic requirements across the spectrum of operational demands. Therefore the Navy needs a broad set of capabilities among the mix of ships in its inventory. Ship count is only one metric to measure to evaluate fleet effectiveness. If confirmed, I will work with the Secretary of the Navy and the Chief of Naval Operations to ensure that the appropriate force structure requirements are fully identified and supported.

Question. At about that same time (2020) the Navy will need to begin acquiring the *Ohio* Replacement Ballistic Missile Submarines (SSBNs). The new *Ohio* class boats are projected to cost well over \$10 billion per ship and the Navy has publicly indicated it cannot afford to buy both the new SSBNs as well as procure at least nine other ships annually.

Do you believe the Navy can meet its goals for the size of the fleet in the current budget climate particularly in light of the *Ohio* Replacement Program?

Answer. Procurement of the *Ohio* Replacement SSBN, as well as recapitalization of the other elements of the nuclear triad, poses significant resourcing challenges to the DOD. The *Ohio* Replacement Program will present unique constraints on the Navy's shipbuilding plan, particularly if the DOD is required to be funded at the

levels specified in the Budget Control Act (BCA) of 2011. The Secretary of the Navy and the Chief of Naval Operations have stated that recapitalizing our ballistic missile submarine force is the top shipbuilding priority for the Navy and have taken steps to reach the affordability targets of the Ohio Replacement Program. If confirmed, I will work with the Navy and the Congress to manage the impact of this critical endeavor on the rest of the shipbuilding programs and ensure naval forces are structured to meet our national defense needs.

Question. In the 1970s and 1980s, the Nation procured the initial *Ohio* SSBN submarines within the Navy's shipbuilding (SCN) account, do you believe using the SCN is possible for *Ohio* replacement or is a new method needed?

Answer. I believe the important decision is to make the commitment to modernizing the ballistic missile submarine fleet. It is a vital component of our nuclear deterrence strategy. The Department needs adequate resources for modernization in order to ensure we can make the orderly transition to this new generation ballistic missile submarine. Which account it is funded in is of lesser importance. It makes the most sense to include the *Ohio* Replacement in the shipbuilding account, but this is a decision that can be made in the future.

To maintain a Navy fleet with roughly 300 ships would require an annual new construction build rate of about 10 ships per year, assuming ship service lives of 30 years. The fiscal year 2015 President's Budget request included only 7 new construction ships.

Question. Do you believe that the Navy's goal can be achieved without recapitalizing the fleet at a larger rate? If not, will you recommend to the President that he significantly increase funding levels for the Navy to support both:

- (1) buying ships at an annual rate of at least 10 new ships per year; and
- (2) in particular replacing our *Ohio*-class ballistic missile submarines (SSBN)?

Answer. I understand DOD remains committed to sustaining the force structure required to maintain our Nation's security, and that recapitalization of the Nation's sea-based strategic deterrent is critical to this mission. If confirmed, I will work with the Navy to reduce risk in their force structure with particular focus on *Ohio*-class replacement submarines and other high priority ships.

Question. The Navy has in recent years proposed the long-term lay up of CG-7 class cruisers and LSD-41 class amphibious ships in order to achieve manpower cost avoidance savings and stretch out the life of these ship classes in order to defer new build replacement ships. Congress has consistently rejected the Navy's proposal noting the Navy's initial investment of more than \$11.6 billion in the nine CG/LSD ships and the fact these ships are very unlikely to return to service after a lengthy layup approaching 5 years in some cases. Retiring these ships before the end of their planned service life creates unnecessary and unaffordable future shipbuilding requirements.

What are your views on the Navy's proposed plan to lay up in a reduced operating status both CG-47 class and LSD-41 class ships?

Answer. If confirmed, I will work with the Secretary of the Navy and other Department leadership to better understand and assess how the Navy would execute the proposed plan, to ensure that it appropriately balances the needs of current readiness, modernization and future force structure to make the best use of existing assets.

Question. Would you support modernizing these ships within the Navy's SCN account to ensure they can serve out their full service lives?

Answer. The SCN account, like virtually all modernization accounts, is under enormous pressure to finance the shipbuilding program the Nation needs. Difficult tradeoff decisions have been made and will need to be made in the future. It is important that the Congress and the Department find a way to move forward on the appropriate funding.

AIRCRAFT CARRIERS

Question. DOD has repeatedly reaffirmed, despite budget pressures, that the United States is committed to maintaining a fleet of 11 nuclear powered aircraft carriers (CVNs), and maintaining carriers on patrol in the Persian Gulf. Yet, in the Department's fiscal year 2015 budget request only 10 carriers were funded. We also understand carrier deployments have been extended for as long as 9 months. The NDAA for fiscal year 2015 reiterated the statutory requirement for the Department to maintain not less than 11 carriers.

If confirmed as Secretary of Defense will you ensure the Department adheres to the statute requiring that the Navy shall include not less than 11 operational carriers?

Answer. I understand that the Department has reported that if it is forced to operate at sequestration level funding, it would have to seek relief from the 11-carrier requirement.

Question. Can you articulate for this committee your views on the number of CVNs that need to be maintained, and whether naval forward presence, particularly in areas such as the Persian Gulf, should be maintained and can be maintained without an urgent recapitalization of the fleet?

Answer. I understand that a sizable carrier force is required to support our current strategy and provide sufficient carrier strike groups to meet overseas presence requirements. If confirmed, I will work with the Navy to ensure that we resource a sustainable level of presence that continues to support our Nation's strategic goals.

FUTURE ROLE OF THE ARMY

Question. The NDAA for fiscal year 2015 directed the establishment of a National Commission on the Future of the Army to review the size and structure of all three components of the Army: regular Army, U.S. Army Reserve, and Army National Guard. The Commission will also consider and evaluate key policies concerning the make-up, training and the distribution of Guard resources across the states. Additionally, the commission will review the Army's Aviation Restructure Initiative which recommended the transfer of National Guard Apache helicopters to the regular Army. The legislation allows the Army to transfer 48 Apache helicopters in fiscal year 2016.

What are your views regarding the National Commission on the Future of the Army?

Answer. If confirmed, I will fully support the commission as enacted by law.

Question. In your view, what are the key factors in determining the role of the Active and Reserve components in their support of the National Military Strategy?

Answer. In my previous time in the Department I have seen the value of the operational contributions of all components. Their response in crisis has been and will be a Total Force response. The key factor is insuring the Total Force has the appropriate mix to support the requirements to the combatant commanders.

Question. General Raymond Odierno, Chief of Staff of the Army, has stated that the Army will continue to be an indispensable part of the joint force and that there is a synergy that is gained of all the services in order for the military to meet the Nation's needs. He has also said the Army provides more than Brigade Combat Teams—the Army is the largest contributor to SOF's and it provides a broad range of essential services to combatant commanders to include intelligence, surveillance, reconnaissance; air and missile defense; logistical support; and signal communication support.

In your view, what are the most important considerations or criteria for aligning the Army's size, structure, and cost with strategy and resources?

Answer. Our national security requirements are the most important considerations when aligning the Total Army's size, structure, and cost with strategy and resources.

Question. If confirmed, what actions, if any, would you propose to properly align the Army's size and structure with the requirements of security strategies and the likely availability of resources?

Answer. If confirmed, I will review how the Department should align the Army's size and structure to the strategy in the same way that it would align those of any other component of the Joint Force: based on appropriate security environment, examining the demands of the missions that are most relevant to that component, and then determining how best to provide the capabilities required to accomplish those missions. If confirmed, I will work closely with military and civilian leaders to balance maintaining the skills needed to meet our most pressing national security demands within the limits of acceptable risk and within existing resources.

ARMY FORCE STRUCTURE

Question. The Defense Strategic Guidance of January 2012 called for the reduction of Army end strength and force structure over the next 5 years to 490,000 personnel and eight fewer combat brigades. The Army has accelerated these plans and intends to reduce endstrength to 490,000 by the end fiscal year 2015. Additionally, the Army intends to reduce endstrength to 450,000 Active, 315,000 Army National Guard, and 195,000 Army Reserve with even more severe reductions possible. Senior Army and National Guard leadership has testified that the Army will assume medium-to-high risk to meet the requirements of the National Security Strategy at these levels.

In your view, can the Army's Active component end strength be drawn down below the announced and planned reduction to 450,000? If so, what in your view would be the impact on strategic risk, if any, and, in your view would that strategic risk be acceptable or unacceptable?

Answer. If confirmed, I will review the level of funding specified in the Budget Control Act, and the appropriate levels for the total force army. I share the concern by our Army, Army Reserve and the National Guard leaders of the risks inherent in the sequester funding levels.

Question. How do you define the resulting strategic risk?

Answer. A strategic risk would be a lesser ability to support the highest priorities in our national defense strategy.

Question. If confirmed, what size or force structure changes, if any, would you propose for either the Army Reserve or the Army National Guard?

Answer. The Active and Reserve components of the Army must be sized and shaped to support our strategy. The Army National Guard provides critical capabilities to the Governors and States, while also retaining capacity to support vital Federal missions. The Army Reserve is also a key partner with the Active Army and the Army National Guard for Homeland support and warfighting missions. I understand that the Army Commission will examine some of these areas and if confirmed will look forward to their recommendations.

ARMY MODERNIZATION

Question. What is your understanding and assessment of the Army's record with respect to equipment modernization?

Answer. This record is mixed, and I believe it can be improved.

Question. What actions, if any, would you take to ensure that the Army achieves a genuinely stable, achievable, and affordable modernization strategy and program?

Answer. If confirmed, I will review the Army's modernization strategies to ensure that stable and affordable modernization programs are adopted and implemented. I will stress the continued need for Army programs that incorporate practical and realistic development strategies, affordable and technically feasible requirements and sufficient and stable resources.

Question. What is your understanding and assessment, if any, of the Army's capabilities portfolio review process and its current modernization priorities and investment strategy?

Answer. I have not examined any recent changes the Army may have introduced so I am unable to assess the Army's specific processes for reviewing military requirements or establishing modernization priorities.

Question. What actions, if any, would you take to sustain the momentum of these reviews in stabilizing the Army's modernization strategy and priorities?

Answer. If confirmed I will support the Army's efforts to improve its modernization strategy and priorities.

UNFUNDED PRIORITIES

Question. Section 1003 of Public Law 112-239 (NDAA for fiscal year 2013) expressed the sense of Congress with respect to the annual submission by the Service Chiefs and Commander of U.S. Special Operations Command of their critical unfunded priorities that are not included in the President's annual budget request.

If confirmed, will you allow the Service Chiefs and Commander, U.S. Special Operations Command to comply with this sense of Congress?

Answer. Yes.

BALLISTIC MISSILE DEFENSE

Question. The NDAA for fiscal year 2015 expresses the Sense of the Congress that it is a national priority to defend the U.S. Homeland against the threat of limited ballistic missile attack (whether accidental, unauthorized, or deliberate).

Do you concur with Congress on this fundamental point?

Answer. Yes.

Question. Do you support each of the following steps—currently planned by DOD—for improving the capability of the Ground-based Midcourse Defense System to meet evolving ballistic missile threats (if not, please explain why):

(1) Correct the problems associated with recent flight test failures;

Answer. Yes.

(2) Enhance homeland defense sensor and discrimination capabilities;

Answer. Yes.

(3) Redesign the exo-atmospheric kill vehicle, including realistic testing; and

Answer. Yes.

- (4) Design a next generation exo-atmospheric kill vehicle to take full advantage of improvements in sensors, discrimination, kill assessment, battle management, and command and control, including the potential to engage multiple objects?

Answer. Yes.

Question. Forward deployed United States military forces, and our regional allies and partners, face a growing regional ballistic missile threat, especially from nations such as North Korea and Iran. The European Phased Adaptive Approach (EPAA) is intended to provide increasing levels of defensive coverage of NATO Europe against Iranian ballistic missiles, including an Aegis Ashore site in Romania in 2015 and one in Poland in 2018.

Do you agree that it is a priority to defend our forward-deployed forces, our allies, and partners from the threat of regional ballistic missiles?

Answer. Yes. Our deployed forces as well as our allies and partners in the Middle East and in the Asia/Pacific region are within range of hundreds of short- and medium-range ballistic missiles.

I agree that the United States must prioritize capabilities to deter regional adversaries from launching a ballistic missile attack and to defend against such an attack if necessary.

Question. Do you believe that the current phased and adaptive approach to regional missile defense is appropriate to meeting the operational needs of our regional combatant commanders, given the threat and current resource constraints?

Answer. Yes. I understand the current United States policy is to develop regional approaches to ballistic missile defense in Europe, the Middle East, and the Asia-Pacific region that are tailored to the unique deterrence and defense requirements of each region.

I believe that such approaches provide the best option for managing our own high-demand, low-density ballistic missile defense forces and for developing allied and partner ballistic missile defense capacity in support of Combatant Commander requirements.

Question. Do you believe the EPAA schedule is achievable and appropriate for defending NATO Europe against the current and projected threat from Iranian regional ballistic missiles?

Answer. I believe the three phases of the EPAA were constructed to allow the United States to deploy existing or new capabilities in time to meet the projected threat from Iran. If confirmed, I will review the progress on this effort with the Under Secretary of Defense for Acquisition, Technology, and Logistics.

Question. Do you agree that the United States should encourage our regional allies and partners to increase their missile defense capabilities to contribute to regional security and help reduce the burden on U.S. forces and requirements?

Answer. I understand that building international cooperation and seeking appropriate levels of partner contributions are key tenets of our regional ballistic missile defense policy. I also understand that over time we have developed substantive ballistic missile defense relationships with our allies and partners in Europe, the Middle East, and the Asia-Pacific region, which have led to advances in fielding our own capabilities as well as those of our allies and partners.

I view continuing these partnerships as critical to developing effective security architectures that deter and, if necessary, can be used to defend against the threat of ballistic missile attack. Accordingly, if confirmed, I will promote strong bilateral and multilateral ballistic missile defense cooperation in these key regions of U.S. interest.

SPACE

Question. China's test of an anti-satellite weapon in 2007 was a turning point for the United States in its policies and procedure to ensure access to space. As a Nation heavily dependent on space assets for both military and economic advantage, protection of space assets became a U.S. national priority.

Do you agree that space situational awareness and protection of space assets should be a national security priority?

Answer. Yes. Space situational awareness is important to understand and characterize the space environment, detect interference with space systems, and enable timely attribution and response. Equally important is the protection of our space capabilities.

Question. In your view, should China's continued development of space systems inform United States space policy and programs?

Answer. Yes. China is rapidly developing space capabilities of its own that both mirror United States capabilities and could threaten our access and use of space for national security purposes. If confirmed, I will review the Department's efforts to address China's developments in space, and will coordinate closely with other United States departments and agencies.

Question. If confirmed, would you propose any changes to National Security Space Policy and Programs?

Answer. The National Security Space Strategy clearly highlights the growing challenges in the space domain. If confirmed, I will insist on policies, programs, and other measures that ensure U.S. warfighters can continue to depend on having the advantages that space confers.

Question. What role do you believe offensive space control should play in National Security space policy and programs?

Answer. Offensive space control, in addition to other elements of national power, should be carefully considered in protecting our forces from threats posed by an adversary's space-enabled capabilities.

Question. If confirmed, would you commit to reviewing the overall management and coordination of the national security space enterprise?

Answer. Yes. I understand that the Department's recent strategic portfolio review of space highlighted challenges with our overall space posture. If confirmed, I look forward to working with Congress to make adjustments to address those challenges.

Question. What is your view on weapons in space?

Answer. The United States depends upon space capabilities to enable operations in all domains. Other nations are working to challenge those capabilities as well as to field their own. If confirmed, I intend to work with Congress to determine the best way to defend U.S. space systems and to deny those advantages to those who would use space to target U.S. warfighters.

Question. The administration is proposing to free up 500 MHz of spectrum for broadband use, a candidate portion of which includes the band 1755–1850 MHz, which is used heavily by DOD and other national security agencies.

Do you support this initiative?

Answer. Yes.

Question. Do you support section 1602 of P.L. 106–65, which requires the Secretaries of Commerce and Defense and the Chairman of the Joint Chiefs of Staff to certify that any alternative band or bands to be substituted for spectrum currently used by DOD and other national security agencies provide "comparable technical characteristics to restore essential military capability that will be lost as a result of the band of frequencies to be so surrendered"?

Answer. Yes. This provision is necessary to ensure that the Department maintains access to spectrum necessary to operate critical military capabilities. Preserving this provision is essential to the ability of DOD to continue to successfully contribute to the President's broadband goals, especially given the increased focus on spectrum sharing.

Question. If confirmed, how do you intend to comply with section 1602 in light of the 500 Mhz initiative?

Answer. I understand Secretary Hagel recently signed, along with the Chairman of the Joint Chiefs of Staff and the Secretary of Commerce, certification for the 1755–1780 MHz frequency bands that were auctioned as part of the Advanced Wireless Service 3 (AWS-3). I will ensure that any future auctions involving spectrum used by the Department are certified in accordance with P.L. 106–65, section 1062.

Question. Do you intend to insist that DOD be compensated fully for the cost of relocating, if required to do so?

Answer. Yes, I intend to insist that DOD be compensated fully for the cost of relocating, if required to do so in accordance with section 1062.

Question. How do you propose the Department make more efficient use of communications spectrum through leasing of commercial satellites?

Answer. If confirmed, I will work with the Under Secretary of Defense for Acquisition, Technology, and Logistics and the DOD Chief Information Officer to continue to leverage the efforts which the DOD and commercial satellite communications providers are already pursuing to more effectively and efficiently utilize the communications spectrum. Based on that review, I will determine if additional opportunities should be pursued.

Question. Do you support more competition in the launch of DOD payloads?

Answer. I have been, and continue to be, whenever possible, a staunch advocate for competition across all of the Department's acquisition programs. Regarding space launch for national security space (NSS) missions, I fully support competition and, if confirmed, will review provisions for competition of future NSS launch missions.

Question. If confirmed, what steps will you take to encourage new entrants to the medium and heavy lift launch of DOD payloads while balancing affordability, mission assurance, and maintaining the viability of the existing launch provider?

Answer. Mission assurance remains the cornerstone of the Department's approach to space launch for NSS missions. If confirmed, I will encourage competition from new entrants by ensuring the Department has a clear understanding of the certification process and by making every effort to certify all capable new entrants as quickly as possible.

Question. Do you support commercial hosting of DOD payloads and if so how?

Answer. The Department should explore and consider the full range of options. Commercial hosting may help diversify the space architecture, improve mission assurance and potentially reduce costs of U.S. Government space-based capabilities. If confirmed, I will explore the full range of options, including commercial hosting, for providing future space-based capabilities when appropriate.

Question. What is your long-term vision and support for the Space Based Infrared Sensing system?

Answer. I understand the Department is executing a comprehensive Analysis of Alternatives for the SBIRS follow-on capabilities. If confirmed, I will assess the alternatives and recommendations with the objective of affordably providing and assuring critical missile warning and battlespace awareness capabilities.

Question. What is your long term vision and support for the Advanced Extremely High Frequency system?

Answer. I believe that AEHF is a critical component of the Department's Nuclear Command, Control, and Communications (NC3) capability. If confirmed, I will continue to ensure the Department provides the needed NC3 capability for the President.

Question. Do you support splitting the systems sensors up to lower overall cost of the system?

Answer. I support exploring the full range of approaches to reliably and affordably providing space-based capabilities

CYBER DETERRENCE

Question. Do you believe we are deterring and dissuading our adversaries in cyberspace?

Answer. An effective deterrence strategy requires a range of cyber policies and capabilities to affect a state or non-state actors' behavior. In addition to continuing efforts to improve U.S. cyber defenses and cybersecurity capabilities, the United States should continue to respond to cyber-attacks against U.S. interests at a time, in a manner, and in a place of our choosing, using appropriate instruments of U.S. power and in accordance with applicable law. The U.S. Government should continue to combine its cyber and non-cyber capabilities into a comprehensive cyber deterrence strategy. If confirmed, I will do all that I can to contribute to the development and execution of that effort.

Question. Do you agree that, consistent with section 941 of the NDAA for fiscal year 2014, there is a need for an integrated policy to deter adversaries in cyberspace and that the President should promptly provide that policy to Congress as specified in law?

Answer. Deterrence cannot be achieved through cyberspace alone, but requires a multi-faceted effort across the totality of the U.S. Government's instruments of national power, including network defense measures, economic actions, law enforcement actions, defense posture and response capabilities, intelligence, declaratory policy, and the overall resiliency of U.S. networks and systems. If confirmed, I will ensure that DOD is in full compliance with its reporting requirements to this committee and to the Congress as a whole.

Question. What steps do you believe the Department should take to reduce the frequency and severity of cyber intrusions from the Chinese Government?

Answer. This is a serious problem and the Department should continue to take strong actions to address China's use of cyber theft to steal United States companies' confidential business information and proprietary technology. I am aware that the Administration has raised this as an issue of concern with the highest levels of China's government. If China does not take meaningful action to curb this behavior, it will undermine the economic relationship that benefits both our Nations. Such activity undercuts the trust necessary to do business in a globally connected economy. Further, military involvement in such theft raises additional concerns that misunderstandings about China's intentions could result in unintended escalation between our countries. The U.S. Government should continue to use all instruments

of national power, including diplomatic, informational, military, and economic, to prevent and respond to these intrusions.

Question. What agencies should the Department coordinate with in tracking and eliminating cyber threats?

Answer. I believe a whole-of-government approach is required to address the cyber threats we face now and will increasingly face in the future. DOD must continue to work closely with the Department of Homeland Security, the Department of Justice (specifically FBI), and the Intelligence Community, as well as with other Federal partners, to identify, mitigate, and defend against cyber threats.

REPORTING AND SHARING OF INFORMATION ON INTRUSIONS INTO OPERATIONALLY CRITICAL CONTRACTORS

Question. What are your views on the conclusions of the Senate Armed Services Committee's report: Inquiry Into Cyber Intrusions Affecting U.S. Transportation Command Contractors, 113th Congress, 2nd Session?

Answer. Although I have not had the opportunity to fully review the report, I understand that the Senate Armed Services Committee's inquiry into cyber intrusions affecting U.S. Transportation Command contractors contained important findings that the Department takes very seriously. If confirmed, I will work closely with Congress, Departments and Agencies, and the private sector to strengthen the Department's information sharing processes and to protect the Department's ability to execute its mission.

Question. If confirmed, what steps will you take to ensure that the communication gaps that exist between TRANSCOM and the various investigating agencies are closed?

Answer. The Department's ability to execute its mission depends greatly on the integrity of our networks and the networks of our private sector partners. If confirmed, I will work to improve information sharing between the relevant investigative agencies and U.S. Transportation Command.

ACT OF WAR IN CYBER

Question. What do you believe would constitute an act of war in cyberspace?

Answer. Cyber-attacks can affect our critical infrastructure, the national economy, and military operations. I believe that what is termed an act of war should follow the same practice as in other domains, because it is the seriousness, not the means, of an attack that matters most. Whether a particular attack is considered an "act of war," in or out of cyberspace, requires a determination on a case-by-case and fact-specific basis. Malicious cyber activities could result in death, injury or significant destruction, and any such activities would be regarded with the utmost concern and could well be considered "acts of war." An attack does not need to be deemed an "act of war" to require a response.

Question. Does North Korea's attack on the Sony Corporation of America—a costly destructive attack on a United States company—rise to the level of an act of war? If not, why not?

Answer. To my knowledge, the damage caused by this cyber-attack consisted of the deletion of data, the destruction of some Sony network infrastructure, and the unauthorized disclosure of personal information. While serious and deserving of a response, this does not seem to me to rise to the level of an "act of war."

CHINA'S AGGRESSIVE THEFT OF UNITED STATES INTELLECTUAL PROPERTY

Question. A recent report by the National Counterintelligence Executive confirmed the widespread belief that China is engaged in a massive campaign to steal technology, other forms of intellectual property, and business and trade information from the United States through cyberspace. The previous Commander of U.S. Cyber Command has referred to this as the greatest transfer of wealth in history and, along with others, believes this is a serious national security issue.

Do you believe that China's aggressive and massive theft of technology in cyberspace is a threat to national security and economic prosperity?

Answer. Yes. The theft of intellectual property through cyber means is a clear threat to the economic prosperity from which the Nation derives its national security. Our competitive economic advantage and our military technological advantage rest on the innovations of a highly knowledge based U.S. industry. Any nation-state that engages in the theft of our intellectual property through cyber means jeopardizes both our national security and economic prosperity.

Question. The Carl Levin and Howard P. "Buck" McKeon NDAA for fiscal year 2015 authorized the President to impose sanctions, pursuant to the International Emergency Economic Powers Act (50 U.S.C. 1701 et seq.), on persons determined

to knowingly request, engage in, support, facilitate, or benefit from economic or industrial espionage in cyberspace against U.S. persons.

What are your views on the potential impact of this legislation?

Answer. Addressing cyber threats requires a whole of government approach, which coordinates and integrates all the instruments of national power. Cyber legislation is an important part of this effort. If confirmed, I look forward to working closely with Congress on appropriate legislation to address a broad array of cybersecurity issues.

Question. What additional steps do you believe are needed to deter China from such activities in the future?

Answer. We need to continue to use all the instruments of national power to deter this kind of behavior, including diplomatic, financial, network defense, law enforcement, and counterintelligence. I concur in the administration's approach of raising this as an issue of concern at the highest levels of the Chinese government. I also support the State Department's efforts to work with like-minded countries to make China's leadership increasingly aware that elements of their government and military are on the wrong side of an emerging norm of responsible behavior in cyberspace. If confirmed, I will work closely with the Department's interagency partners to explore what additional whole-of-government approaches might help deter this unacceptable behavior.

DOD'S ROLE IN DEFENDING THE NATION FROM CYBER ATTACK

Question. What is your understanding of the role of DOD in defending the Nation from an attack in cyberspace? In what ways is this role distinct from those of the homeland security and law enforcement communities?

Answer. The Defense Department is responsible for defending the Nation from all attacks, including those that occur in cyberspace. DOD is also responsible for defending its own networks against cyber-attacks. DOD plans, coordinates, and conducts cyber operations to ensure the reliable operation of and to defend DOD systems and infrastructure. If directed, DOD can conduct cyber operations to defend the Nation, defend military networks, and support military operations in all domains. If required, DOD may provide support to the private sector and State and local governments.

The Defense Department also works closely with the Department of Homeland Security (DHS) and the Department of Justice (DoJ) in their missions. DHS is the lead agency for protecting, mitigating, and recovering from domestic cyber incidents. DoJ investigates, attributes, disrupts, and prosecutes cybercrimes that fall outside of military jurisdiction and provides domestic response to national security incidents.

NEXT CHALLENGES IN GROWING OPERATIONAL CYBER CAPABILITIES

Question. DOD, in a significant milestone in the maturation of the cyber warfare mission, is successfully organizing and training personnel for units to conduct military operations in cyberspace.

What challenges does the Department face in developing the command and control, operational planning, mapping and situational awareness, battle damage assessment, tools and weapons, and infrastructure capabilities necessary to conduct large-scale operations in cyberspace?

Answer. I understand that DOD is in its third year of building a Cyber Mission Force. This force is intended to defend DOD networks, defend the Nation from cyberattack, and provide full-spectrum cyberspace options for the combatant commands. I am aware of several challenges that should be addressed to ensure the Department can conduct military operations in cyberspace, among them effective command and control, and meeting the challenge of effectively incorporating National Guard teams.

IRAN

Question. Negotiations on the Iran nuclear program have been extended with a deadline now of March 1, 2015, for agreement in concept with 4 months after that to finalize a comprehensive agreement.

What are the elements of a nuclear agreement with Iran that you consider critical to ensuring that it is a "good" deal for U.S. national security interests?

Answer. In my view, a "good" deal is one that resolves the international community's concerns with Iran's nuclear program and prevents it from acquiring a nuclear weapon. The best way to do that is through a comprehensive solution that, when implemented, will ensure that, as a practical matter, Iran cannot acquire a nuclear weapon and that Iran's nuclear program is exclusively and verifiably peaceful. Any deal must effectively cut off the four pathways Iran could take to obtain enough

fissile material for a nuclear weapon including a uranium pathway, through its activities at Natanz and Fordow; a plutonium pathway, through the Arak heavy water reactor; and a potential covert pathway. It must include tight constraints and strict curbs on Iran's nuclear program. And finally, it must require robust monitoring and transparency measures to maximize the international community's ability to detect quickly any attempt by Iran to break out overtly or covertly. Any sanctions relief in exchange should be phased and tied to verifiable actions on Iran's part. Such relief should be structured to be easily reversed so that sanctions could be quickly reimposed if Iran were to break its commitments.

Question. If Iran is allowed to maintain a monitored and limited uranium enrichment program, do you believe that other states in the region will want to develop enrichment programs of their own and what is your rationale for that view?

Answer. Yet another reason to ensure that Iran does not obtain a nuclear weapon is to prevent proliferation in the region. States seeking to develop enrichment programs of their own in pursuit of nuclear weapons would face significant costs, in crippling sanctions and political and diplomatic isolation. The United States has a longstanding framework for providing alternative mechanisms to ensure that states have access to the benefits of civil nuclear energy without the need to pursue enrichment.

Question. With the international community focused on the Iran nuclear negotiations, in your opinion, has there been a neglect of countering Iranian malign activities in the region to include support for Houthis in Yemen, Hamas in the West Bank, and Hezbollah in Lebanon and Syria? How do you think those threats should be addressed?

Answer. Countering Iranian destabilizing activities must be an important priority. Regardless of the outcome of nuclear negotiations, I firmly believe that the United States must also counter these destabilizing regional activities, including Iran's support to terrorists and militant groups. If confirmed, I would work to ensure the Department is focused on these issues.

Question. If the tide of ISIL is pushed back in Iraq and Syria, what, if, any, friction points do you anticipate between United States and Iranian interests in those two countries to come to the forefront? In your opinion, what is the best way to manage those friction points should they emerge?

Answer. In Syria, I believe that Iran's continued support for Assad and instability will cause continued friction between the United States and Iran. The United States has an interest in a stable, united, and inclusive Iraq with support from all of Iraq's communities. I have concerns about the sectarian nature of Iran's activities in Iraq. The United States must continue to make clear to the Iraqi Government that Iran's approach in Iraq undermines the needed political inclusion for all Iraqi communities, which is required to ultimately defeat ISIL.

Question. On March 2012, President Obama said he would "keep all options on the table to prevent a nuclear Iran."

Do you agree with the President's view that "all options should be on the table" to prevent a nuclear Iran?

Answer. Yes. I strongly support the President's view that all options should be on the table to prevent a nuclear Iran.

NUCLEAR WEAPONS AND STOCKPILE STEWARDSHIP

Question. Congress established the Stockpile Stewardship Program with the aim of creating the computational capabilities and experimental tools needed to allow for the continued certification of the nuclear weapons stockpile as safe, secure, and reliable without the need for nuclear weapons testing. The Secretaries of Defense and Energy are statutorily required to certify annually to the Congress the continued safety, security, and reliability of the nuclear weapons stockpile.

As the stockpile continues to age, what do you view as the greatest challenges with respect to assuring the safety, reliability, and security of the stockpile?

Answer. The greatest challenge will be achieving and maintaining the necessary balance among three critical nuclear areas to allow continued certification that our nuclear weapons remain safe, secure, and effective. First, is the capability to continue to provide the science and engineering needed to assess an aging stockpile without underground testing. Second, is maintaining and strengthening the ability to extend the life of the warheads through a program of component refurbishment, replacement or rebuilding. The final area is sustaining and modernizing the aging infrastructure that provides the materials, components, and testing facilities essential for tomorrow's nuclear enterprise.

Question. Do you agree that the full funding of the President's plan for modernizing the nuclear weapons complex, commonly referred to as the 1251 report, is a critical national security priority?

Answer. I support the President's policy of maintaining a safe, secure, and effective nuclear deterrent as long as nuclear weapons exist, and agree that funding the sustainment and modernization plan is a critical national security priority. As indicated in the report prepared pursuant to section 1251 of the NDAA for fiscal year 2010, this includes sustaining and modernizing nuclear weapon delivery platforms, sustaining a safe, secure, and reliable nuclear weapons stockpile, and modernizing the nuclear weapons complex.

Question. Prior to completing this modernization effort, do you believe it would be prudent to consider reductions below New START Treaty limits for either the deployed or non-deployed stockpile of nuclear weapons?

Answer. The President has stated that we can meet our current objectives with a reduced force structure. Any consideration of further nuclear weapon reductions below New START treaty limits should focus on measures that will maintain or strengthen deterrence of potential adversaries, assurance of our allies and partners, and strategic stability.

Question. What role does the Nuclear Weapons Council play in helping to establish key stockpile stewardship goals and modernization objectives?

Answer. I previously chaired the Nuclear Weapons Council (NWC) which facilitates cooperation and coordination, seeks consensus, and sets priorities between the two departments (DOD and Department of Energy), as they fulfill their dual-agency responsibilities for nuclear weapons stockpile management. The NWC works toward jointly agreed to priorities and strategies for weapon life extension programs, stockpile stewardship, and infrastructure modernization objectives. The NWC priorities and strategies in turn provide requirements for both departments to formulate budgets and develop implementing plans to achieve our Nation's goals of a safe, secure and effective stockpile.

Question. Do you support a more active role of the Office of Cost Analysis and Program Evaluation (CAPE) in ensuring the programs within the Department of Energy and the National Nuclear Security Administration are appropriately tailored for the best investment of funds possible to achieve a safe, effective and reliable nuclear weapons stockpile?

Answer. Yes.

CURRENT NUCLEAR FORCES

Question. Section 1052 of the NDAA for fiscal year 2014 established a "Council on Oversight of the National Leadership Command, Control and Communications System". You have had a long and active history in this area of DOD.

What do you see as the most pressing challenges in nuclear command, control, and communications from a policy and acquisition perspective?

Answer. Nuclear command and control must be an enduring priority of which one challenge is to sustain existing capabilities until new, modernized capabilities can be fielded. Another challenge is providing an assured, survivable, and enduring nuclear command, control and communications (NC3) system that takes advantage of the technological advances of modern communication capabilities while at the same time is secure and hardened against attacks ranging from cyber to the most severe kinetic attacks.

Question. What do you see as the most pressing challenges in overall national leadership communications from a policy and acquisition perspective?

Answer. One challenge is to sustain existing capabilities until new, modernized capabilities can be fielded. Another challenge is providing an assured, survivable and enduring communications capability that allows senior defense advisors to communicate with the President, the combatant commands and strategic allies during normal day-to-day operations and during national crises from a fixed, mobile or airborne location. The ability to provide our national leadership secure, reliable voice, video and data communications is a critical capability.

Question. Will you actively support section 1052 and in an ex officio capacity attend meetings when possible?

Answer. Yes.

Question. In 2014, Secretary Hagel has conducted an assessment of the state of nuclear deterrence operations of DOD.

Do you agree with its findings?

Answer. If confirmed, I intend to receive a full briefing about this important assessment.

Question. Will you actively support the findings and their implementation?

Answer. I look forward to fully reviewing these findings, if confirmed, and taking appropriate steps to ensure the U.S. maintains the capability to carry out the nuclear deterrent mission.

NUCLEAR MODERNIZATION

Question. The President's June 2013 Nuclear Employment Strategy affirmed that the United States will maintain a nuclear triad, noting that "Retaining all three TRIAD legs will best maintain strategic stability at reasonable cost, while hedging against potential technical problems or vulnerabilities."

Some commentators suggest it will be financially challenging for the current and future administrations to fulfill nuclear modernization commitments over the next 10 to 20 years. Yet, as Deputy Secretary of Defense, you noted in August 2013, "nuclear weapons . . . are not a big swinger in our budget. That's just a fact."

Do you share Secretary Hagel's view that our nuclear deterrent "is DOD's highest priority mission?"

Answer. Yes.

Question. Will you provide us your commitment to ensure that DOD, working closely with the Department of Energy, will make every effort to invest what is needed to modernize each leg of the nuclear triad, and to address the recent recommendations of the DOD Nuclear Enterprise Review?

Answer. Yes.

RUSSIAN VIOLATION OF THE 1987 INF TREATY

Question. During testimony before the House Armed Services Committee on December 10, 2014, Principal Deputy Under Secretary of Defense for Policy, Brian McKeon, told the panel that "if Russia does not return to compliance, our end will be to ensure that Russia gains no significant military advantage from its violation."

In your view, what are the consequences for U.S. national security of Russia's actions in violation of its obligations under the INF Treaty?

Answer. I believe that the Intermediate-range Nuclear Forces (INF) Treaty contributes to the national security of the United States and its allies and partners. I also believe the INF Treaty contributes to Russian national security. Russian deployment of weapon systems that violate the INF Treaty would pose an increased threat to the United States and our allies in Europe and Asia.

Question. What military advantage, if any, did Russia gain by acting in violation of its INF obligations?

Answer. We must ensure that Russia does not gain a military advantage. Russia should return to compliance with the INF Treaty in a verifiable manner.

Question. What do you believe would be appropriate responses for the United States to take in order to: (1) convince Russia to return to compliance with the INF Treaty, or (2) ensure that United States national security is maintained if Russia does not return to compliance?

Answer. The United States should consider a comprehensive strategy of diplomatic, economic, and military responses that address both of these goals. Russia's continued disregard for its international obligations and lack of meaningful engagement on this particular issue require the United States to take actions to protect its interests and security as well as those of its allies and partners. United States efforts should continue to remind Russia why the United States and Russia signed this treaty in the first place and be designed to bring Russia back into verified compliance with its obligations. I believe that any United States responses should be designed to make the United States and our allies and partners more secure by negating any advantage Russia might gain from deploying an INF-prohibited system.

The range of options we should look at from the Defense Department could include active defenses to counter intermediate-range ground-launched cruise missiles; counterforce capabilities to prevent intermediate-range ground-launched cruise missile attacks; and countervailing strike capabilities to enhance U.S. or allied forces. U.S. responses must make clear to Russia that if it does not return to compliance our responses will make them less secure than they are today.

Question. How long do you believe we should wait to see if Russia returns to compliance?

Answer. I support the current efforts focusing on convincing Russia to return to verifiable compliance and preserving the viability of the INF Treaty, which I believe continues to serve U.S. and allied interests. Such efforts must be allowed to produce the desired effect. If Russia does not return to verifiable compliance, I support a path that ensures that Russia gains no significant military advantage from its violation of its INF Treaty obligations.

Question. What does Russia's INF violation suggest to you about the role of nuclear weapons in Russian national security strategy?

Answer. Russia's INF Treaty violation is consistent with its strategy of relying on nuclear weapons to offset United States and NATO conventional military superiority.

MEDICAL COUNTERMEASURES INITIATIVE (MCM)

Question. The administration has produced an interagency strategy for the advanced development and manufacture of medical countermeasures (MCM) to defend against pandemic influenza and biological warfare threats. In this strategy, DOD will be responsible for the rapid development and manufacture of medical countermeasures to protect U.S. Armed Forces and DOD personnel.

Do you support this interagency strategy and the MCM Initiative and, if confirmed, would you plan to implement them?

Answer. Yes.

DEFENSE ACQUISITION REFORM

Question. The Weapon Systems Acquisition Reform Act of 2009 (WSARA) was designed to ensure that new defense acquisition programs start on a sound footing, to avoid the high cost of fixing problems late in the acquisition process.

What are your views regarding WSARA since its implementation in 2009?

Answer. In my view, WSARA enacted a number of steps to improve weapons system acquisition, which has contributed to improving trends in the Department's acquisition performance.

Question. If confirmed, how would you improve all three aspects of the acquisition process requirements, acquisition, and budgeting?

Answer. In my judgment, more should be done to link and streamline these three processes and, if confirmed, I look forward to working closely with those responsible in the department and the committees to drive the necessary improvements. All three must be closely coordinated as the problems and the resulting solutions change over time. This is not a static system and we must all remain open to continuous improvement. In the requirements area we need to insure they are feasible and disciplined and not subject to constant change and that we don't initiate programs that are unaffordable. As we move into the acquisition phase, we need to push to field the initial system within five years and avoid delays by constantly adding capabilities that could be done thru block improvements later. Time is money. We must incentivize industry to control costs and likewise incentivize the government acquisition workforce to do the same. Those responsible for budgeting, particularly the Service Chiefs, need to be engaged in all three processes. And we should strengthen accountability in all phases and at all levels.

Question. If confirmed, how would you improve acquisition accountability?

Answer. As before, more can be done here as well. There are two basic challenges in improving accountability. First is an overly complex acquisition system that distributes authority across too many offices and individuals; and second, assignment policies in the government rotate senior program managers and officials too frequently. If confirmed, I will engage our department leaders in addressing these challenges and also work with the Congress to both obtain your ideas and to push thru the required fixes. We must also insure our industry partners achieve this increased level of accountability.

Question. Do you believe that the current investment budget for major systems is affordable given increasing historic cost growth in major systems, costs of current operations, and asset recapitalization?

Answer. The constrained budget environment facing the Department puts enormous pressure on the Department to continually strive to control costs and reexamine all areas of the budget for affordability. Even before the passage of the Budget Control Act of 2011 I strongly believed that unacceptable cost growth in individual programs had to be reversed. If confirmed, in addition to the improvements I cited in earlier answers, I will insure the Department ensures programs are affordable to buy and operate, and that programs are managed so as to stay affordable as they progress through the life cycle.

Question. If confirmed, how do you plan to address this issue and guard against the potential impact of weapon systems cost growth?

Answer. If confirmed, I would emphasize the need for continuous improvement addressing the challenges identified earlier as well as ensuring all aspects of WSARA and the Department's ongoing work with the Better Buying Power initiatives continue to be implemented as broadly as possible. I would welcome the opportunity

for the Department to work with Congress where new legislative measures, or relief from existing legislative constraints, would improve acquisition performance.

RELIABILITY OF WEAPONS SYSTEMS

Question. The Department's process for procuring major weapons systems places insufficient emphasis on reliability and maintainability and, therefore, produces systems that are increasingly costly to operate and sustain. Given that these ownership costs comprise most of a given weapons systems' overall lifecycle cost, these increased costs could undermine considerably the Department's "buying power."

How would you ensure that the defense acquisition system produces more reliable weapons systems?

Answer. I recognize that a strong emphasis on reliability is critical to achieving affordability. A disciplined approach to life cycle reliability in acquisition policy must continue and we need to use sustainment affordability caps when appropriate. If confirmed, I will ensure that our acquisition programs address reliability and maintainability through appropriate requirements and sound engineering practices at each stage of a weapon system's development.

Question. If confirmed, what measures would you recommend the Department take to drive down sustainment costs?

Answer. It is important to influence system designs that address key drivers of sustainment costs early in the development process, and to have program managers include sound sustainment strategies early in a system's life cycle. The Department has established sustainment affordability caps under the Better Buying Power initiatives to drive that process with its Program Managers.

If confirmed, I will emphasize those elements in our acquisition programs such as requirements, design, contracting strategies, and sustainment strategies which drive down sustainment costs.

EXCESSIVE CONCURRENCY IN MAJOR DEFENSE ACQUISITION PROGRAMS

Question. Major defense acquisition programs (MDAPs) and major automated information systems have experienced excessive cost-growth and schedule delays. In some instances, this appears to be the result of excessive concurrency between development and production. It also appears that the Department lacks the ability to identify, price, and therefore effectively manage program risk, (e.g., technological, developmental, integration, and manufacturing risk)

What specific changes need to be made in the acquisition system to ensure the delivery of MDAPs and major information systems on time and on budget?

Answer. Comprehensive changes in acquisition practice have been made in recent years via WSARA and BBP. But more needs to be done, and the measures needed will change over time as technology, industry, and budgets change. Skilled and experienced acquisition professionals, reduction of paperwork and overhead, and effective contract incentives are enduring keys to cost and schedule control.

Managing concurrency and other program risks is a fundamental challenge of acquisition program management. The department needs to ensure its acquisition professionals have the experience, tools, and good judgment needed to make data-driven decisions appropriate to the risks they face leading these programs in order to properly plan programs.

SERVICES CONTRACTING

Question. Over the last decade, the Department has become progressively more reliant upon contractors to perform functions that were once performed exclusively by government employees. As a result, contractors now play an integral role in areas as diverse as the management and oversight of weapons programs, the development of personnel policies, and the collection and analysis of intelligence. In many cases, contractor employees work in the same offices, serve on the same projects and task forces, and perform many of the same functions as DOD employees.

In your view, has DOD become too reliant on contractors to support the basic functions of the Department?

Answer. I believe DOD must manage its total force of military, civilian, and contractor personnel in a way that avoids inappropriate or excessive reliance on contractor support for basic Department functions.

Question. Do you believe that DOD has become too dependent on contractor support for military operations?

Answer. Based on my experience, I do not believe the Department is too reliant on contractor support for military operations.

Question. What risks do you see in the Department's reliance on such contractor support? What steps do you believe the Department should take to mitigate such risk?

Answer. Over-reliance on contractor support may lead to an unbalanced total force that sub-optimizes the civilian and military contribution, a loss of government-held corporate knowledge, and the potential for contractors inappropriately exercising authority in performance of inherently governmental functions or those closely associated with inherently governmental functions.

Active management of the total force is necessary to mitigate these risks. Decisions on how to cost-effectively meet requirements should take into account the management of all three components of the total force.

Question. Do you believe the Department is appropriately organized and staffed to effectively manage contractors on the battlefield?

Answer. The Office of the Secretary of Defense, in concert with the Chairman of the Joint Chiefs of Staff, has issued guidance on roles and responsibilities for planning for and managing contractors on the battlefield. I believe that investments made in the Department's acquisition workforce, as well as the implementation of recommendations made by the Commission on Wartime Contracting and the GAO, have improved the Department's ability effectively to plan for and manage contractors on the battlefield. I believe that the combatant commanders recognize that contractors are their responsibility as part of the total force.

Question. What steps if any do you believe the Department should take to improve its management of contractors on the battlefield?

Answer. I believe appropriate requirements definition and increased oversight are critical to improve management of contractors on the battlefield. The heightened focus on services acquisition reinforces this with proper planning, management, training, and oversight tools.

EFFICIENCY IN DEPARTMENT OPERATIONS

Question. In your view, what latitude must be given to the Joint Chiefs to enact cost-saving reforms?

Answer. The Military Service Chiefs of Staff already have broad latitude to develop, propose and implement cost-saving measures across the spectrum of doctrine, organizational structure, and personnel to and with their Military Department Secretaries, the Combatant Commands, and the Secretary of Defense. I will continue to encourage them to bring forward cost-saving reform ideas even if those ideas challenge the current structures and arrangements of the Department as a whole. As in the past, I value the Chiefs' unswerving focus on the essential missions of the Department, and the perspectives that motivation brings.

Question. Do you support the administration's request for the authority to conduct additional Base Realignment and Closures (BRAC) to eliminate unneeded facilities?

Answer. Yes.

Question. If so, what would be your priorities in carrying out a round of BRAC?

Answer. Should Congress authorize the Department to carry out another BRAC round, I would direct it to focus on efficiency and consolidation rather than transformation. BRAC 2005 was skewed by the fact that a large number of its recommendations were focused on transformation, had high upfront costs, and were never expected to yield savings. However, those recommendations that were focused on efficiency had impressive payback and accounted for a small portion of the costs—much like the 1993 and 1995 rounds. If confirmed, this is the approach I would direct the Department to adopt.

UNIFIED COMMAND PLAN

Question. There has been much discussion about streamlining the current Unified Command Plan.

What are your views on the ability of the current Unified Command structure to address emerging global, regional and ethnic threats and the potential need to reduce the number of the geographic commands or their staffs to help reduce overhead costs?

Answer. In my view, the current Unified Command structure is quite capable of addressing a range of emerging threats and challenges. Effective United States responses to such varied challenges as the Islamic State in Iraq and the Levant, and Ebola, demonstrate the flexibility of the current structure. However, the Department periodically reviews the Unified Command Plan to ensure its structure is optimized for emerging threats and challenges. As such a review is underway now; it would be premature to speculate on the types of changes that will be reflected in its final recommendations on the structure.

Question. What is your opinion of the critique that geographic combatant commands have made U.S. foreign policy “too militarized”?

Answer. I am sensitive to this critique, but understand that some degree of tension is inevitable in the pursuit of U.S. foreign policy objectives. As long as the United States maintains forward presence around the world, we will continue to rely on our military leadership to build meaningful relationships with their counterparts. These relationships are essential to our continued forward presence in peacetime, building partner capacity with key allies and partners, and to our ability to secure access in the event of a contingency, from humanitarian assistance and disaster relief to combat operations. Provided our activities are well coordinated with other stakeholders within the U.S. foreign policy establishment, there is no reason why both military and other foreign service professionals cannot contribute to the same U.S. objectives.

Question. What is your understanding and assessment of the current Unified Command Plan? In your view, is there a need to undertake a major reevaluation toward modification of the current Unified Command Plan? If so, explain why?

Answer. The Unified Command Plan establishes the combatant commands’ missions, responsibilities, and geographic areas of responsibility (when applicable). In my view, the established, periodic review cycle of the Unified Command Plan should be maintained.

Question. In your view, are there opportunities for greater effectiveness and efficiencies in the consolidation of the roles and responsibilities two or more current geographic combatant commands, such as U.S. Northern Command and U.S. Southern Command? If not, please explain why.

Answer. The Department reviews the Unified Command Plan periodically to ensure its structure is optimized for emerging threats and challenges, and for effective and efficient distribution of roles and responsibilities among combatant commands. Such a review is underway now; it would be premature to speculate on the types of changes that will be reflected in the final structure.

PROLIFERATION OF JOINT TASK FORCES

Question. There is a trend of continued proliferation of task forces, including joint task forces, in support of geographic combatant and functional commands. Some of these joint headquarters are temporary or for a short duration, but others evolve into enduring long term and larger force structure.

What is your understanding and assessment of DOD’s policy guidance for oversight of the number, scope of operational responsibility and authority and duration of joint task forces?

Answer. I understand that the Department’s policy guidance for oversight of joint task forces that support combatant commands is established and exercised through the global force management process. Through this process, combatant commanders request authorities and forces to support their operational requirements and the Chairman of the Joint Chiefs of Staff evaluates such requests and makes recommendations to the Secretary of Defense. I have been away from the department for some time and therefore unable to make a specific assessment of the current policy and guidance.

Question. If confirmed, what would be your plan to evaluate and manage task forces?

Answer. If confirmed, I would remain committed to the best use of resources in the pursuit of the department’s priorities and objectives and would scrutinize recommendations to standup and/or continue support for enduring joint task forces.

TEST AND EVALUATION (T&E)

Question. If confirmed, will you make it a priority to ensure that the Department as a whole and each of the Services specifically maintains its testing organizations, infrastructure, and budgets at levels adequate to address both our current and future acquisition needs?

Answer. I recognize the critical role that test and evaluation provides to the acquisition process.

Question. A natural tension exists between major program objectives to reduce cost and schedule and the T&E objective to ensure performance meets specifications and requirements.

What is your assessment of the appropriate balance between the desire to reduce acquisition cycle times and the need to perform adequate testing?

Answer. I don’t believe these objectives are necessarily incompatible. Adequate testing prior to committing to production is essential to discover performance problems that can take even more time and money to rectify before proceeding.

Question. Under what circumstances, if any, do you believe we should procure weapon systems and equipment that has not been demonstrated through test and evaluation to be operationally effective, suitable, and survivable?

Answer. It may be necessary to field a system prior to operational testing in cases where it is necessary to fill a critical capability gap identified in ongoing operations. Even then, testing should be accomplished to ensure basic operational performance and system safety.

Question. Congress established the position of Director of Operational Test and Evaluation to serve as an independent voice on matters relating to operational testing of weapons systems. As established, the Director has a unique and direct relationship with Congress, consistent with the statutory independence of the office.

Do you support the continued ability of the Director of Operational Test and Evaluation's to speak freely and independently with the Congress?

Answer. Yes.

FUNDING FOR SCIENCE AND TECHNOLOGY (S&T) INVESTMENTS

Question. Do you support increasing DOD's S&T investments?

Answer. I support investment in S&T to develop and deliver near-term capabilities and maintain long-term options for the Department. However, the investment in S&T must be balanced with modernization, operational, and personnel accounts within the Department.

Question. How will you assess whether the science and technology investment portfolio is adequate to meet the current and future needs of the Department?

Answer. If confirmed, I would work closely with the Chairman of the Joint Chiefs, the Secretaries of the Military Departments, the Under Secretary of Defense for Acquisition, Technology, and Logistics, and others to assess the adequacy of the science and technology portfolio to provide the most affordable military advantage to our warfighters.

Question. What specific technological areas should the Defense Department prioritize for investment in order to develop next generation operational capabilities?

Answer. If confirmed, I will review changes to the investment portfolio that have occurred since I left, and I will prioritize efforts to provide substantial capability advances or those that impose disproportionate cost to adversaries.

Question. Given limited resources, what technological areas can be de-emphasized in order to free resources to support priority areas?

Answer. If confirmed, I would work with the Under Secretary of Defense for Acquisition, Technology, and Logistics, to review the entire investment portfolio in R&D and if required adjust the investment, to favor new, unique capabilities that could provide an operational advantage to our forces. Technologies that can be obtained from commercial sources should be de-emphasized for S&T investments by the Department.

Question. Are you satisfied with the quality of the DOD research, laboratory, and engineering workforce and infrastructure, especially relative to its industry and academic peers, and global competitors? How do you plan to maintain that quality in the future?

Answer. The subject of DOD laboratory quality, both for personnel and infrastructure, has been studied over the past several decades. Scientists and engineers play a very important role in our overall national security and accessing and retaining top talent is a priority for the DOD. If confirmed, I will support the Under Secretary of Defense for Acquisition, Technology, and Logistics in his efforts to assess the current quality of our science and engineering workforce, and determine what changes, if any, are needed to maintain the proper quality.

Question. What specific goals will you set for the recently announced Defense Innovation Initiative? What metrics will you use to assess the success of this initiative?

Answer. I understand the Defense Innovation Initiative is pursuing creative ways to sustain and advance our military dominance in the 21st century. If confirmed, I will review this initiative in detail and if necessary work with Deputy Secretary Work to refine goals and metrics.

DEFENSE INDUSTRIAL BASE

Question. The latest QDR addressed the need for strengthening the defense industrial base. Specifically, it said: "America's security and prosperity are increasingly linked with the health of our technology and industrial bases. In order to maintain our strategic advantage well into the future, the Department requires a consistent, realistic, and long-term strategy for shaping the structure and capabilities of the de-

fense technology and industrial bases—a strategy that better accounts for the rapid evolution of commercial technology, as well as the unique requirements of ongoing conflicts.”

What is your understanding and assessment of the current state of the U.S. defense industry?

Answer. The Department relies on an industrial base that is now far more global, commercial, and financially-complex than ever before. I am concerned about what impacts further defense budget cuts would have on the ability of the industrial base, particularly small firms, to provide the broad range of products and services that the Department and our Nation need. While only a small fraction of our industrial base capabilities may be at risk, in some key industrial capabilities vital to our future national security the United States is in danger of losing essential domestic sources, or going down to a single qualified source.

Question. Do you support further consolidation of the U.S. defense industry?

Answer. I support the review of each proposed merger, acquisition, and teaming arrangement on its particular merits, in the context of each individual market and the changing dynamics of that market. I believe the government must be alert for consolidations that eliminate competition or cause market distortions that are not in the Department’s best interest.

Question. What is your position on foreign investment in the U.S. defense sector?

Answer. Foreign investment can play an important role in maintaining the vitality of the U.S. defense sector through capital injection, the introduction of innovative technologies, and facilitating interoperability with our coalition partners. However, foreign investment can also expose the U.S. defense sector to a number of risks associated with supply assurance, product integrity, and technology transfer. Therefore, I support policies that encourage foreign investment when it is consistent with the national security interests of the United States.

Question. If confirmed, what steps if any do you believe DOD should take to most effectively and efficiently manage risk and ensure the continued health of the U.S. defense industrial base?

Answer. If confirmed, I will ensure that the Department proactively monitors the defense industrial base to identify risks and mitigate those risks when necessary. During my time as the Under Secretary of Defense, Acquisition, Technology, and Logistics and the Deputy Secretary, the Department took steps to improve and preserve competition in defense procurements, and I would support the creation or continuation of competitive opportunities.

RESET AND RECONSTITUTION FUNDING

Question. The Department has a substantial backlog of maintenance availabilities due to the high tempo and demand of more than a decade of combat operations. Senior DOD officials have testified that they will require 2–3 years of additional funding to restore readiness through reset and reconstitution of their equipment and personnel.

Do you agree with the assessment that the DOD will need 2–3 years of additional funding for reset and reconstitution?

Answer. I understand that the cumulative effect of more than a decade of war has placed a significant strain on the Department’s reset and reconstitution requirements. The current level and diversity of global operations has added to this strain and must be part of the reset calculus. If confirmed, I would review the reset and reconstitution funding and assumptions.

Question. If confirmed, how will you balance maintenance and reset requirements with fiscal realities and future risk in developing your budget request?

Answer. Maintenance and reset of DOD’s current equipment would be a priority for me in order to restore and preserve long-term readiness. . If confirmed, I would work with the Chairman of the Joint Chiefs, the Secretaries of the Military Departments, and others to assess the appropriate balance of resources and risk.

OPERATIONAL ENERGY

Question. The Assistant Secretary of Defense for Operational Energy Plans and Programs published a policy that any alternative drop-in replacement fuel procured for DOD-wide use and distribution within the Class III (Bulk) supply chain must compete with petroleum products and any awards will be based on the ability to meet requirements at the best value to the government, including cost.

What is your view of this policy?

Answer. This policy was issued while I was Deputy Secretary, and I believe it is the right approach, and it is consistent with section 316 of NDAA for fiscal year 2015. As the Department allocates limited resources to ensure warfighting capa-

bility, it should only buy large volumes of alternative fuels when they are cost-competitive with petroleum products.

Question. What is your assessment of section 526 of the Energy Independence and Security Act of 2007 and how it should apply to military operations of DOD?

Answer. My understanding is that section 526 prevents Federal agencies from entering into contracts to procure alternative or synthetic fuels that have higher greenhouse gas emissions than conventional petroleum. This provision has not restricted the Department from purchasing the bulk fuel needed to support worldwide military operations.

Question. Considering the potential of further cuts to Defense budgets and the importance of energy security, do you believe DOD should jointly invest with other government agencies in the construction of a commercial biofuels refinery?

Answer. Over the long-term, I believe the Nation will benefit from a competitive, domestic renewable fuels industry, and, as a major consumer of liquid fuels, the Department would benefit from such competition. I am aware the DOD has partnered with the Departments of Energy and Agriculture and the private sector to accelerate the development of cost-competitive advanced alternative fuels for both the military and commercial transportation sectors but I am not current on how those partnerships are performing.

Question. If confirmed, what priorities would you establish for Defense investments in and deployment of energy technologies?

Answer. Consistent with the need to increase military capabilities, reduce risk, and mitigate costs through our use and management of both operational and facility energy, I would prioritize improvements to both operational effectiveness and efficiency—improving the energy performance of aircraft, ships, ground vehicles, and military bases; reducing the vulnerability of our energy supply chains; and diversifying the kinds of energy used by the Department.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of the Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of the Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as Secretary of Defense?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JOHN MCCAIN

U.S. SECURITY COMMITMENT TO TAIWAN

1. Senator MCCAIN. Dr. Carter, the Taiwan Relations Act and the Six Assurances form the cornerstone of United States-Taiwan relations and affirms our commitment to maintain Taiwan's self-defense capability. How do you and the administration plan to continue to implement our policy under this framework?

Dr. CARTER. I am firmly committed to maintaining Taiwan's self-defense capability, consistent with our one-China policy, which is based on the three joint United States-China communiqués and the Taiwan Relations Act. This is a policy that has endured across multiple Administrations of both Republicans and Democrats, and has served as an important element of our approach to the Asia-Pacific region for more than thirty-five years.

Consistent with the provisions of the Taiwan Relations Act, the Department of Defense should continue to evaluate Taiwan's defense needs and provide defense ar-

titles and services necessary to enable Taiwan to maintain a sufficient self-defense capability. The United States should also maintain the capacity to resist any resort to force or coercion that would jeopardize the security, or the social and economic system, of the people of Taiwan. If confirmed, I will ensure that the Department continues to work closely with our partners on Taiwan, and with Congress, to fulfill these obligations and thereby support the maintenance of peace and stability in the Taiwan Strait.

2. Senator MCCAIN. Dr. Carter, what do you believe should be the priorities for United States military assistance to Taiwan?

Dr. CARTER. I believe the Department should prioritize continuing to assist Taiwan's effort to incorporate asymmetric concepts and capabilities into its defense. The United States should encourage Taiwan to prioritize investments in infrastructure and weapon systems that are survivable, and able to capitalize on Taiwan's natural advantages. Furthermore, I believe the Department should continue to focus on defense cooperation in support of Taiwan's transformation to a volunteer force, assisting it improve doctrine, training, and readiness. The Department of Defense should work with Taiwan to support its defense transformation and identify procurement priorities that enable it to deter aggression, resist coercion and maintain stability across the Taiwan Strait.

CHINESE MILITARY COERCION

3. Senator MCCAIN. Dr. Carter, over the last several years, China has engaged in coercive diplomacy to achieve its political and territorial aims in the East and South China Seas. The administration has responded with efforts to build partner capacity and strengthen regional institutions, but this will take years if not decades to bear fruit. Beyond private diplomacy with the Chinese, which appears to be insufficient, what steps do you believe we should take to deter Chinese assertiveness in the short- and medium-term?

Dr. CARTER. The United States has a strong interest in maintaining peace and stability, the free flow of commerce, and the freedom of navigation and overflight in the East and South China Seas. In addition to diplomacy to resolve territorial disputes peacefully and in accordance with international law, the United States should deter assertiveness in the region with a robust force posture, sustained presence, and commitment to building the capacity of its partners and allies. The United States also should encourage China to be more transparent about how it will use its growing military capabilities. The United States should also continue to modernize and strengthen its security alliances with Australia, Japan, the Republic of Korea, Philippines, and Thailand. The United States should also deepen relationships with and among its partners in South and Southeast Asia to build capacity and reduce vulnerabilities. If confirmed, I will continue to prioritize our investments in posture, presence, and partnership capacity in the Asia-Pacific region to deter aggression and underwrite peace and stability.

4. Senator MCCAIN. Dr. Carter, do you share the view that China's actions have violated United States national interests in the Freedom of Navigation, the free flow of commerce and the peaceful settlement of disputes in accordance with international law?

Dr. CARTER. The United States has a longstanding national interest in preserving the freedom of navigation, and in the peaceful settlement of disputes in accordance with international law. I am concerned that recent Chinese actions, including its unilateral and uncoordinated announcement of an Air Defense Identification Zone (ADIZ) that overlapped the previous existing ADIZ in the East China Sea, its unilateral promulgation of fishing regulations covering much of the South China Sea, its pursuit of land reclamation activities in the South China Sea, and its use of economic pressure on other claimants, has raised regional tensions and complicated efforts to peacefully manage and resolve territorial disputes. The United States should remain committed to the preservation of the freedom of navigation, and all the other rights provided under international law. If confirmed, I would carry forward that commitment, and I would work to ensure that disputes are addressed in a manner that both reflects that commitment and that serves the goal of resolving disputes peacefully. This approach would apply to my dealings with China and with all other countries.

QUESTIONS SUBMITTED BY SENATOR JAMES M. INHOFE

NATIONAL SECURITY RESOURCE MISMATCH

5. Senator INHOFE. Dr. Carter, what is your assessment of our force structure and readiness given the current and expanding global security environment?

Dr. CARTER. The Joint Force has been engaged in uninterrupted warfare for over 13 years, while the changing security environment has generated greater demand for forces across the globe. The 2014 Quadrennial Defense Review assessed that the future security environment will continue to be volatile and dynamic. The high tempo of operations, coupled with constrained resources and disruptive budget actions that led to reduced readiness and force structure pressures in recent years, has challenged the Services in their efforts to reconstitute full-spectrum readiness. If sequestration returns in FY 2016 and beyond, the Department's readiness could deteriorate even further.

6. Senator INHOFE. Dr. Carter, if confirmed, how do you plan to shape our military to ensure we can deter and/or defeat today's and tomorrow's threats?

Dr. CARTER. The Department must rebalance the Joint Force to ensure it remains modern, capable, and ready for today's requirements and an uncertain future. The 2014 QDR outlined specific steps for the Department to take to adapt, reshape, and rebalance our military in order to sharpen our ability to address threats across the spectrum, from ongoing terrorism challenges to potential nation-state adversaries with a full range of technologically advanced capabilities. If confirmed, I will actively guide the Department's efforts to achieve the right balance of capability, capacity, and readiness in the Joint Force to address today's threats while setting the foundation to meet future challenges.

MILITARY COMPENSATION AND RETIREMENT MODERNIZATION COMMISSION REPORT

7. Senator INHOFE. Dr. Carter, what are your thoughts on maintaining an All-Volunteer Force and how these recommendations could impact retention and recruiting?

Dr. CARTER. The All-Volunteer force has successfully supported our national security requirements particularly during the last 13 plus years of combat. I am aware the White House and the Department's senior civilian and military leadership are examining each of the Commission's specific proposals in detail. If confirmed, I will review the Commission's recommendations and the Department's analysis and provide my views to the President as required in the legislation. I will ensure that the Department's review focuses on the potential impact the Commission's recommendations could have on the long-term viability of the All-Volunteer Force, of which recruiting and retention are essential elements. I look forward to working with the Committee on these issues.

8. Senator INHOFE. Dr. Carter, if confirmed, how would you ensure we will not break faith with the men and women who serve in uniform and their families?

Dr. CARTER. The men and women of our uniformed force and their families deserve our respect and commitment. If confirmed, I will ensure the Department's detailed review and my input to the President on the specific proposals of the Commission provides for their needs. I am mindful of our obligations to both the current force as well as the future force and I am committed to ensuring that any change to the retirement system will retain the option to "grandfather" currently serving members.

9. Senator INHOFE. Dr. Carter, if confirmed, what direction will you give your team regarding the Office of the Secretary of Defense's (OSD) assessment due in April?

Dr. CARTER. If confirmed, I will direct the Department to carefully review and evaluate the Commission's recommendations to ensure they sustain the All-Volunteer Force, provide the benefits to our servicemembers that are required, and achieve fiscal sustainability. I look forward to working with the Committee in this regard.

ISLAMIC STATE STRATEGY

10. Senator INHOFE. Dr. Carter, if confirmed, would you recommend placing boots-on-the-ground to Congress and the administration to deal with the Islamic State of Iraq and Syria (ISIS)/Islamic State of Iraq and the Levant (ISIL) threat, if required?

Dr. CARTER. If confirmed, I would, in close consultation with our senior military leaders, provide the President with my best strategic advice as to how to most effec-

tively counter the ISIL threat. In formulating my advice, I will not hesitate to consider all options.

GUANTANAMO BAY NAVAL BASE

11. Senator INHOFE. Dr. Carter, if confirmed, how much risk would you accept to American lives when considering releasing detainees from Guantanamo Bay Naval Base (GTMO)?

Dr. CARTER. Congress has set a clear standard for the Secretary of Defense, and I will follow it faithfully if confirmed. I will not, and cannot, approve a transfer unless I determine that actions have been, or will be taken, to substantially mitigate the risk of the detainee engaging in terrorist or other hostile activity that threatens the United States. The law also requires that the Secretary of Defense determines it is in the national security interest to approve the transfer. If confirmed, I will take this obligation seriously and closely examine every proposed transfer to ensure that these conditions are met.

12. Senator INHOFE. Dr. Carter, what is your position with regard to the President's policy of trying detainees in civilian courts versus military commissions?

Dr. CARTER. I understand the Administration's policy to be that the determination of whether to try detainees in civilian courts versus military commissions is made on a case-by-case basis. If confirmed, I will support this policy and make my recommendation based on the circumstances of a particular case, in consultation with my senior military, legal, and other advisors.

MILITARY LENDING ACT

13. Senator INHOFE. Dr. Carter, the Department of Defense (DOD) has proposed draft regulations, under the Military Lending Act (MLA), to require lenders to verify against DOD's own database the military status of customers. Currently, such verification is voluntary by lenders, used to verify a customer's claim to military status. Under the proposed regulation, lenders would be required to verify military status whether claimed by the customer or not. What plans are in place to ensure that DOD's database will be able to handle the great increase in inquiries so that it is available at all times and that it is accurate so that credit-worthy customers—both military and non-military—will not be held up from getting timely access to loans for which they qualify?

Dr. CARTER. I am not fully informed on this issue at this time, and am reluctant to express an opinion on this matter until I have more information. If confirmed, I will ensure those responsible for this area provide me with the required information so I can provide you the thoughtful response you deserve.

14. Senator INHOFE. Dr. Carter, when Congress passed the MLA in October 2006, it was targeting certain loans, such as payday loans, tax refund anticipation loans, military installment loans, and car title loans, based on DOD's August 2006 study, "Report on Predatory Lending Practices Directed at Members of the Armed Forces and Their Dependents." DOD adopted implementing regulations that covered the loans identified in its report. In its current proposal, DOD cites evidence and data that payday loans and title loans are being designed to circumvent the regulations and are harming our military personnel and their families. In such circumstances, it makes sense to adjust the regulations. What is the evidence of harm or circumvention behind the elements of the proposal that would reach beyond those predatory loans to mainstream products, such as credit cards, student loans, car refinance loans, and other such loans offered by banks and credit unions that are not affected by current MLA regulations?

Dr. CARTER. I am not familiar with the details of this issue at this time, and am reluctant to express an opinion on this matter until I have more information. I am committed to ensuring the Department is vigilant in guarding its servicemembers against unfair and predatory lending practices that could harm them or their families. If confirmed, I will ensure those responsible for this area provide me with the required information so I can address any issues. The Department clearly has an interest in helping to protect servicemembers from fraudulent lending practices.

15. Senator INHOFE. Dr. Carter, DOD, in its proposed new regulations to the MLA, indicates that it wants credit cards to continue to be available to military personnel and their spouses. To what extent has DOD conducted an analysis as to whether the terms of its proposed new Military Annual Percentage Rate—which is different from the Annual Percentage Rate calculations for non-military families—will restrict the access to credit cards by military personnel and their spouses?

Dr. CARTER. I am not familiar with the specific details of the proposed regulation at this time. I am committed to ensuring the Department is vigilant in guarding its servicemembers against unfair and predatory lending practices that could harm them or their families. If confirmed, I will ensure that the Department has an appropriate analysis of the impacts of any such regulations.

TAIWAN

16. Senator INHOFE. Dr. Carter, Taiwan is currently planning to develop its Indigenous Defense Submarines (IDS) program. What is your opinion and position on Taiwan's IDS program?

Dr. CARTER. I understand that Taiwan's Indigenous Defense Submarine (IDS) program is a recent concept put forward by Taiwan's Navy to design and build a submarine domestically. Taiwan has publicly requested international support for its program, but to my knowledge, it is still in the process of developing a basic design and determining what the submarine's missions or desired capabilities would be. If confirmed, I will direct DOD to continue to consult closely with Taiwan on this matter, and will assess the program as it progresses.

17. Senator INHOFE. Dr. Carter, what can the administration do to assist Taiwan in improving its undersea self-defense warfare capability?

Dr. CARTER. Consistent with the Taiwan Relations Act, the administration can assist Taiwan by evaluating the projected threat from China, consulting closely with Congress, and providing recommendations on defense articles and services appropriate for Taiwan, particularly in the undersea domain.

I am aware that the Department has identified a number of areas where Taiwan could invest in asymmetric, innovative capabilities to improve its ability to operate in the undersea domain. For example, the Department has recently delivered P-3C long-range patrol aircraft to Taiwan. The Department has also provided support to Taiwan's capabilities for using sea mines, which are particularly cost effective defensive weapons.

If confirmed, I will ensure that DOD continues to work with Taiwan as develops its requirements to determine what support the Department could provide.

18. Senator INHOFE. Dr. Carter, the Taiwan Relations Act of 1979 indicates that to provide Taiwan with arms of a defensive character is the policy of the United States. How do you and DOD under your leadership plan to continue to implement the U.S. policy under the Act?

Dr. CARTER. I am firmly committed to maintaining Taiwan's self-defense capability, consistent with our one-China policy, which is based on the three joint United States-China communiqués and the Taiwan Relations Act. I believe the Department should continually evaluate, assess, and review Taiwan's defense needs, while also providing defense articles and services necessary to enable Taiwan to deter threats. The United States should also maintain the capacity to resist any resort to force or coercion that would jeopardize the security, or the social and economic system, of the people of Taiwan. If confirmed, I will ensure that the Department will continue to work closely with our partners on Taiwan to bolster their military preparedness, sustain the credibility of Taiwan's deterrent, and support military modernization efforts.

19. Senator INHOFE. Dr. Carter, how do you define the priorities for United States military assistance to Taiwan?

Dr. CARTER. I define priorities for United States military assistance to Taiwan based on an evaluation and assessment of its requirements to maintain a credible defense and deterrent. Taiwan faces a much larger adversary who is spending 14 times more on defense. Because of the growing military threat, the Department's should encourage and continue to assist Taiwan in its effort to incorporate asymmetric concepts and capabilities into its defense. As Taiwan transitions to a volunteer force, the Department should also help Taiwan improve its doctrine, training, reserves, and readiness.

 QUESTIONS SUBMITTED BY SENATOR ROGER F. WICKER

HUMANITARIAN OPERATIONS IN KURDISTAN REGION OF IRAQ

20. Senator WICKER. Dr. Carter, what more can DOD do to support humanitarian operations and assistance in the Kurdistan region?

Dr. CARTER. DOD should support humanitarian operations when the Department has a unique capability to contribute to the U.S. Government's response. If confirmed, I will assess humanitarian operations and assistance in the Kurdistan region, and will ensure that the Department is poised to consider options to support the Administration's whole-of-government effort to provide humanitarian assistance to the Kurdistan region.

21. Senator WICKER. Dr. Carter, if confirmed, will you return to this committee with additional options on how DOD can assist the nearly 1.6 million refugees and internally displaced persons (IDP) currently located in the Kurdistan region?

Dr. CARTER. Yes.

MILITARY BENEFITS

22. Senator WICKER. Dr. Carter, defense commissaries are an integral part of life for deployed troops. Recently, the Defense Commissary Agency (DECA) initiated an acquisition strategy to transition delivery of produce to the Asia-Pacific region that eliminates the current second destination transportation policy and moves to an Free on Board (FOB)-destination model. According to detailed market study, this transition threatens the availability, quality, and price of the food available at overseas commissaries. Last year, your predecessor testified to this committee that there would be no cuts to overseas commissary benefits, yet DECA has acknowledged that this move will increase costs to patrons. Is it your position that commissary costs should rise for deployed troops in the Asia-Pacific region?

Dr. CARTER. I understand that the Department is looking at how to make the defense commissary system more efficient and effective. If confirmed, I will look for ways to achieve these goals for the commissaries while remaining mindful of the impact on their customers who are our service personnel active and retired and their families both at home and deployed.

23. Senator WICKER. Dr. Carter, should this policy transition be delayed while a study mandated in the Fiscal Year 2015 National Defense Authorization Act (NDAA) studies the cost impacts to our troops of this proposal?

Dr. CARTER. If confirmed, I will review the current status and determine if such a delay would be warranted.

TAIWAN

24. Senator WICKER. Dr. Carter, United States policy towards Taiwan is governed by the Taiwan Relations Act. This important legislation forms the legal basis for United States military sales to Taiwan, which should be determined based on Taiwan's defensive needs. In light of the People's Republic of China's naval modernization and growing cross strait military imbalance, is it critical that we continue to implement this longstanding commitment?

Dr. CARTER. Yes.

25. Senator WICKER. Dr. Carter, what will be your priorities in terms of military assistance to Taiwan?

Dr. CARTER. The Department should continue to focus on defense cooperation in support of Taiwan's transformation to a volunteer force, assisting it improve doctrine, training, and readiness. Further, the Department should also work with Taiwan to support its defense transformation and identify procurement priorities that enable it to deter aggression, resist coercion and maintain stability across the Taiwan Strait.

26. Senator WICKER. Dr. Carter, Taiwan currently operates four diesel submarines, two of which were acquired from the U.S. Navy former Guppy II-class vessels delivered in 1973. Taiwan has expressed strong interest in acquiring modern defensive diesel submarines, and in an effort to boost their asymmetric undersea capabilities, they recently announced plans to kick off the IDS program. Do you believe it is in our interest for Taiwan to acquire new submarines? If so, what can we do to assist Taiwan?

Dr. CARTER. I understand that Taiwan's Indigenous Defense Submarine (IDS) program is a recent concept put forward by Taiwan's Navy to design and build a submarine domestically. I also understand that Taiwan is still in the process of developing a basic design and determining what the submarine's missions or desired capabilities would be. If confirmed, I will direct DOD to consult closely with Taiwan on its efforts to boost its asymmetric undersea capabilities, and assess what support would be appropriate.

NORTH ATLANTIC TREATY ORGANIZATION

27. Senator WICKER. Dr. Carter, the United States has faced tremendous difficulty in the past rallying consensus and participation by our North Atlantic Treaty Organization (NATO) allies in Afghanistan. Collective action is inherently complex. Consensus-building often results in delayed military action. How difficult will it be to achieve consensus at NATO on next steps against ISIL?

Dr. CARTER. I believe the United States and NATO have a shared interest in defeating ISIL. I understand that NATO leaders affirmed at the September 2014 NATO Summit that NATO would cooperate in several areas through the NATO-Iraq partnership, and explore NATO roles to coordinate humanitarian assistance and to share information and intelligence. If confirmed, I will seek to build on this cooperation, assess obstacles to achieving greater consensus, and work closely with our NATO Allies to address the common threat of ISIL.

28. Senator WICKER. Dr. Carter, each member of NATO has its own unique geopolitical, economic, and energy interests. As such, what is your assessment of where Russia's invasion of Ukraine stands as a test-case for NATO's effectiveness and relevancy in a post-9/11 world?

Dr. CARTER. Although NATO does not have a formal treaty obligation to Ukraine, NATO's response to Russia's aggressive actions have shown the shared commitment of NATO to promote its shared values and to enlarge the zone of peace, security, and stability in Europe. If confirmed, I will work with NATO to reassure our Allies and respond to the challenge from Russia.

29. Senator WICKER. Dr. Carter, what approach would you suggest for the so-called "grey" states that are not in NATO but are intent on resisting Russian hegemonic advances such as Ukraine and Moldova?

Dr. CARTER. I reject the notion that Russia should be afforded a "sphere of influence." If confirmed, I will continue to encourage United States partners, such as Moldova, Georgia, and Ukraine, to build their security capacity and military interoperability with NATO.

30. Senator WICKER. Dr. Carter, according to NATO guidelines, member countries should spend at least 2 percent of their Gross Domestic Product (GDP) on defense. Only four countries spent that much in 2013: Estonia, Greece, the United States, and the United Kingdom. Are there any carrots and sticks we can use to encourage all members of the alliance to make the necessary investments toward their national security?

Dr. CARTER. At the September Wales Summit, the Allies pledged to increase defense investment. If confirmed, I will work personally to encourage all Allies to meet that pledge. I would underscore the shared threats NATO members face, and the critical need to continue to invest in defense capabilities to strengthen the Alliance. I would urge Allies with larger economies to invest in military capabilities that that can be used to impose costs on any opponent with minimal cost and risk to Alliance forces. For Allies with smaller economies, I would encourage them to invest in capabilities that are needed by the Alliance, and in which they may have a comparative advantage.

COMBATANT COMMANDER REQUIREMENTS FOR INTELLIGENCE, SURVEILLANCE, AND RECONNAISSANCE

31. Senator WICKER. Dr. Carter, our combatant commanders are demanding increasing amounts of Intelligence, Surveillance, and Reconnaissance (ISR), and emphasizing persistence surveillance. That persistence comes at significant cost, and in certain regions of the world many ISR needs are going unmet. Further, most of the U.S. manned and unmanned aerial assets have durations of 8 to 24 hours, making long range/long endurance capability extremely difficult if not impossible in many theaters of operation.

I am aware that in June 2014, United States Africa Command (AFRICOM) issued a Joint Emerging Operational Needs Statement for long endurance ISR (AF-0005) ISR. It is my understanding a Joint Requirements Oversight Council (JROC) Memorandum of December 22, 2014, acknowledged the capability gaps outlined in the Joint Emergent Operational Needs (JEON) as valid and tasked the Battlespace Awareness group to consider solutions and report back by April 30, 2015.

Recent press reports reveal that the Air Force is managing a program known as Orion unmanned aerial system (UAS), which has proven significant endurance capability far beyond currently available air assets. Orion was selected in 2009 as a Joint Capability Technology Demonstration (JCTD), a process in which several of

the combatant commands voted for Orion. This result was reflected in the President's Budget under the MAGIC (Medium Altitude Global ISR and Communication) program within Air Force Research, Development, Test, and Evaluation (RDT&E).

If confirmed, will you direct DOD to brief the appropriate Congressional committees on DOD's plans to continue Orion platform development and speed operational test and evaluation of such a platform in order to meet urgent, and rapidly growing, combatant command requirements for additional long range/long endurance ISR capability?

Dr. CARTER. The Department has invested significant resources over the past decade to meet critical intelligence, surveillance and reconnaissance needs through Quick Reaction Capabilities, Joint Urgent Operational Needs and flexible, responsive, programs of record. If confirmed, I will ensure the appropriate congressional committees are briefed on combatant command requirements, and the broad spectrum of both airborne and space-based ISR assets, including ORION, to provide long-range/long-endurance ISR capability.

SYRIA

32. Senator WICKER. Dr. Carter, it is my understanding that the Free Syrian Army utilizes a secure mobile wireless network known as the Free Syria Network for communications purposes. I also understand that DOD and agencies within the Intelligence Community may have utilized this system to successfully communicate with the leadership of the Free Syrian Army. If confirmed, will you direct the appropriate entity within DOD to brief the appropriate Congressional committees on the efficacy of the Free Syria Network and, if appropriate, DOD's plans to protect, and potentially expand and enhance, this critical communications tool for the Free Syrian Army?

Dr. CARTER. If confirmed, I will support briefings to appropriate congressional committees on the details of the Department of Defense's train-and-equip program in Syria to include those aspects outlined in your question.

SEAPOWER

33. Senator WICKER. Dr. Carter, I have the honor of serving as Chairman of the Seapower Subcommittee of the Senate Armed Services Committee this Congress. Should you be confirmed, I look forward to working with you on Navy and Marine Corps priorities during the months to come.

In fiscal year 2013, the Navy implemented numerous cuts in response to sequestration. This included cancellation of five ship deployments and the delayed deployment of a carrier strike group to the Middle East. Since 2013, we've witnessed the rise of ISIL, the deteriorating situation in Yemen, Russia's aggression in Eastern Europe, and a belligerent North Korea. The world is more dangerous today than it was in 2013.

What is your view on how sequestration would threaten the Navy and Marine Corps' ability to decisively project power abroad?

Dr. CARTER. The Seapower Subcommittee has a long and productive history in providing for a strong Navy and Marine Corps. If confirmed, I look forward to working with you as Chairman of the Subcommittee and the other members of the Subcommittee in furtherance of this goal. A return to sequestration could have a serious effect on the Navy's and Marine Corps' ability to project power. Both Services could become smaller, less ready, and less modern. The shipbuilding industrial base, a critical component of sea power, could suffer, and deployments would be borne by a smaller Marine Corps, which could be stretched thin.

34. Senator WICKER. Dr. Carter, what is your assessment of the impact sequestration would have on our amphibious forces and our Navy and Marine Corps' ability to execute DOD's pivot to Asia-Pacific?

Dr. CARTER. A return to sequestration could negatively affect the Navy and Marine Corps' ability to support DOD's rebalance to the Asia-Pacific region. Both services could necessarily be smaller, less ready, and less modern, resulting in fewer forces available to support operations in this vital region. These forces are a key component of our forward regional presence in support of our allies and partners.

35. Senator WICKER. Dr. Carter, certain sectors of the defense industry—such as shipbuilding—are extremely capital intensive. Our fiscally constrained environment threatens to close production lines that would take years to restart. Given your prior experience as Under Secretary of Defense for Acquisition, Technology and Logistics, what is your vision on how best to maintain the vitality of the industrial base given our current budget environment?

Dr. CARTER. A healthy industrial base is critically important to the Department's long-term success. The keys to maintaining the world's finest fighting force are high-quality people who have constant and realistic training and are equipped with cutting-edge technology. The Department must be prepared to act if key parts of the industrial base are threatened. If confirmed, I will ensure that the Department actively monitors the industrial base to identify risks and to preserve critical capabilities.

WALTER REED DISPOSITION

36. Senator WICKER. Dr. Carter, the NDAA for fiscal year 2015 identified 13.2 acres, including the American Institute of Pathology building, of the former Walter Reed Army hospital site that would be ideal for medical research purposes. The Senate Armed Services Committee and I continue to believe that it is in the best interest of the taxpayer to convey this building to a research institution, especially when one considers the millions of dollars spent in recent years to update and renovate the facility, as well as the future economic impact of medical innovation.

Unfortunately, I learned this week that—despite a letter I received from the Secretary of the Army stating the Army's intent to expeditiously transfer the land to a children's research facility—the parcel of land at Walter Reed may be transferred to the State Department. It would be an incredible waste of taxpayer dollars to allow the State Department to spend tens of millions of dollars to tear down a world class research building, which is ready for a new tenant immediately, in order to build an undefined, unplanned foreign embassy at some undetermined date in the future.

What are your views as to how the land should be dispersed?

Dr. CARTER. I do not have sufficient information to answer this question at this time. It is my understanding that the Department has been working this matter with the State Department, public health advocates including Children's Hospital, and the District of Columbia. If confirmed, I will ensure that effort is concluded without unreasonable delay, consistent with the requirements of the legislation.

37. Senator WICKER. Dr. Carter, if confirmed, will you direct DOD to provide the Senate Armed Services Committee and other appropriate Congressional committees with an explanation as to the holdup of the Walter Reed land transfer to a medical research entity?

Dr. CARTER. If confirmed, I will ensure the appropriate congressional committees are provided with the Department's plans and the timing for the disposition of Walter Reed, including any transfer to a medical research entity.

QUESTIONS SUBMITTED BY SENATOR KELLY AYOTTE

MILITARY HOUSING AT CAMP HUMPHREYS, KOREA

38. Senator AYOTTE. Dr. Carter, United States Forces in Korea are engaged in a massive realignment that will result in the consolidation of U.S. Forces onto fewer, larger installations. One such installation is United States Army Garrison Camp Humphreys. I am concerned about reports of the potential housing shortage at Camp Humphreys that could result in both long bus rides for children attending new schools on post, and a failure to meet the Commanding General's goal for 40 percent of accompanied families to live on-post.

I have received information that suggests despite the fact that some current housing facilities are slated for demolition, there is no final agreement for on-post family housing because DOD has not approved a special on-post Overseas Housing Allowance District despite the inclusion of this districting in the solicitation for bids.

I understand that in your last tour in the Pentagon you were involved in the family housing situation at Camp Humphreys. If my information is correct, do you know why the on-post housing contract is still delayed?

Dr. CARTER. I am very aware of the importance of Camp Humphreys to our posture on the Korean Peninsula. At this time, I am not familiar with the current status of the on-post housing contract at Camp Humphreys, including why it may have been delayed. If confirmed, I will review this matter and take appropriate action and ensure you get a prompt answer to your question.

39. Senator AYOTTE. Dr. Carter, will you provide your assurance that soldiers and their families will have the on-post housing they deserve as the military relocates to Camp Humphreys?

Dr. CARTER. If confirmed, I will work to ensure the on-post housing at Camp Humphreys meets operational requirements and provides quality residences for as many of our soldiers and their families as possible.

40. Senator AYOTTE. Dr. Carter, do you know whether a contract has been awarded for the construction of on-post housing at Camp Humphreys? If so, has construction begun? If not, why not?

Dr. CARTER. I am not privy to the construction schedules at this time. If confirmed, I will review the Department's plan for meeting Camp Humphrey's on-base housing requirements and ensure you receive full and timely answers to your questions.

DEPARTMENT OF DEFENSE BUDGET

41. Senator AYOTTE. Dr. Carter, if the President's Budget Request for DOD is funded at the \$499 billion level mandated by the congressional budget caps instead of the \$585 billion requested, what will be the breakdown of cuts to each Service by program, project, and activity (PPA)?

Dr. CARTER. Should Congress appropriate the Department's full FY 2016 request while failing to amend the Budget Control Act (BCA), my understanding is that the mechanical sequestration process would then cut any funding provided above the BCA caps in a mindless across-the-board fashion. I further understand that the Department is preparing a report to the Congress on those potential impacts. The only discretion in that event would be how the President exercised his authority to exempt the military personnel accounts from those across-the-board cuts.

Should the Congress chose to appropriate only the amount allowed by the BCA for FY2016, the Congress would make its own decisions on how to reduce the Department's budget. My hope is that we would not face this alternative but, if we do, that those actions would be taken in consultation with the Department.

AFGHANISTAN

42. Senator AYOTTE. Dr. Carter, in the advance policy questions, you were asked if you would consider recommending to the President revisions to the size and pace of the drawdown in Afghanistan if the security conditions on the ground deteriorate in 2016. You answered yes. What specific conditions on the ground in Afghanistan would cause you to recommend to the President a change to the size and pace of the drawdown?

Dr. CARTER. Should security conditions in Afghanistan degrade such that the efficacy of the United States strategy is in doubt, or result in a significant increase in risk to our people there, I would consult with my senior military and civilian advisors and provide my best strategic advice to the President about the need for any changes to the size or pace of the drawdown.

READINESS DEFICITS

43. Senator AYOTTE. Dr. Carter, in your responses to the advance policy questions, you write that there "are still critical readiness deficits in many areas." Based on your prior service in DOD and your preparation for this hearing, can you provide more details on those readiness deficits?

Dr. CARTER. It is my understanding that the Services are working to rebuild core skill sets and reorient their manning, training and equipping processes in order to broaden their readiness profile after years of operational commitments in Iraq and Afghanistan and elsewhere. Their progress to date does not undo the loss of full-spectrum readiness across the Department. These institutional readiness deficits took years to create, were exacerbated by the sequester level funding and, as such, will take years to remedy. Their progress to date has not reversed the loss of full-spectrum readiness across the department affecting all services and all force elements.

OHIO REPLACEMENT PROGRAM

44. Senator AYOTTE. Dr. Carter, the Chief of Naval Operations has testified that maintaining a safe, secure, and effective nuclear deterrent is his number one priority. The Navy will be challenged to recapitalize our ballistic missile submarines, known as the *Ohio* Replacement Program, within historic levels of shipbuilding funding. What is your position on the importance of the *Ohio* Replacement Program and how DOD should fund it?

Dr. CARTER. The *Ohio* Replacement Program is a vital component of our nuclear deterrence strategy. The *Ohio* Replacement Program will present challenges to the

Navy's shipbuilding plan, particularly in the years after 2020. The Department needs adequate resources for modernization in order to insure we can make the transition to the new generation ballistic missile submarine. Which account it is funded in is of lesser importance. It makes the most sense to include the *Ohio* replacement in the shipbuilding account but this is a decision that can be made in the future. If confirmed, I will work within the Department and with the Congress to explore options to address this challenge.

SEXUAL ASSAULT

45. Senator AYOTTE. Dr. Carter, over the last 3 years, numerous provisions have been enacted to reform the military justice system and to improve the armed services' ability to combat sexual assault. If confirmed, will you commit to ensuring the timely, full, and robust implementation of all sexual assault provisions in previous years' NDAAAs?

Dr. CARTER. Yes. If confirmed, I plan to continue the Department's efforts to effectively implement each provision. I recognize that it is critical to work closely with Congress, so that legislative efforts and the Department's initiatives are consistent and complement each other.

AUDITING THE PENTAGON

46. Senator AYOTTE. Dr. Carter, ensuring DOD achieves full auditability has been a major priority of mine since coming to the Senate. Every dollar wasted is a dollar we don't have to provide our troops with the training and equipment they need to protect themselves and accomplish their missions. However, the Pentagon's audit timeline and structure continue to evolve and experience delays. If you are confirmed, do you commit that you will make achieving audit milestones and objectives a major priority?

Dr. CARTER. If confirmed, I will make this a high priority and hold our senior leaders, civilian and military, accountable for making progress towards a clean opinion. DOD must demonstrate that internal controls are in place to prevent waste and provide a level of confidence to the taxpayers that we are good stewards of their funds. I understand that the Department is following the audit strategy it has outlined to the Congress. If confirmed, I intend to keep Congress apprised of the Department's progress.

47. Senator AYOTTE. Dr. Carter, do you commit to achieve current timelines for auditability?

Dr. CARTER. Yes. I am committed to the current timelines for getting the Department under audit. Keeping this initiative on track is an important priority. If confirmed, I will stress to the Department's senior military and civilian leaders, to including the Secretaries of Military Departments and defense agency heads, the importance of meeting our obligations on auditability.

QUESTIONS SUBMITTED BY SENATOR TOM COTTON

RUSSIA INTERMEDIATE-RANGE NUCLEAR FORCES TREATY

48. Senator COTTON. Dr. Carter, as you are no doubt aware, last year the United States State Department in its annual Arms Control Compliance Report stated that Russia had violated the terms of Intermediate-Range Nuclear Forces (INF) Treaty. As a member of the Senate Select Committee on Intelligence, I've reviewed the evidence and Russia is clearly in violation.

Earlier this year, before the House Armed Services Committee, the Principal Deputy Under Secretary of Defense for Policy, Brian McKeon, stated that DOD was considering responding to the violation by developing and deploying increased defensive capabilities to counter the non-compliant missile, counter-force capabilities to prevent cruise missile attacks; and counter-vailing strike capabilities. Do you agree with Secretary McKeon? Isn't this the minimum we should be doing?

Dr. CARTER. The United States goal should be to convince Russia to return to compliance with the INF Treaty in a verifiable manner. If Russia refuses to return to compliance, the United States should prevent Russia from achieving a military advantage from its violation. Potential military responses are a critical component of a strategy directed towards convincing Russia to return to compliance with the INF Treaty or, if Russia does not return, denying it significant military advantage from violating the Treaty.

I agree that DOD should consider a range of options, including active defenses to counter intermediate-range ground-launched cruise missiles; counterforce capa-

bilities to prevent intermediate-range ground-launched cruise missile attacks; and countervailing strike capabilities to enhance U.S. or allied forces. U.S. responses must make clear to Russia that if it does not return to compliance our responses will make them less secure than they are today.

49. Senator COTTON. Dr. Carter, General Breedlove, the United States European Command (EUCOM) Commander stated last year that "A weapon capability that violates the INF that is introduced into the greater European land mass is absolutely a tool that will have to be dealt with. It can't go unanswered." Do you agree?
Dr. CARTER. Yes.

RUSSIA OPEN SKIES TREATY

50. Senator COTTON. Dr. Carter, I am a member of the Senate Select Committee on Intelligence in addition to this committee. I have become concerned with Russian misuse of the Open Skies Treaty. Have you reviewed any of the assessments of this treaty and its potential national security implications?

Dr. CARTER. I have not had the opportunity to familiarize myself with the assessments to which you refer.

51. Senator COTTON. Dr. Carter, are you aware that the Commander of EUCOM non-concurred last summer when the administration sought to approve the use of a new sensor over Europe but the Commander's concerns were ignored and the sensor was approved anyway?

Dr. CARTER. No, I am not aware of the situation you mentioned.

52. Senator COTTON. Dr. Carter, would you please commit to promptly reviewing the assessments of the commanders of United States Strategic Command (STRATCOM), EUCOM, and United States Northern Command (NORTHCOM) as to the Open Skies Treaty and let me know, within the next 2 weeks, if you agree or disagree with their assessments of the potential harms to our European allies and the United States?

Dr. CARTER. If confirmed, I would ensure a prompt review is conducted of any concerns expressed by combatant commanders regarding the Open Skies Treaty.

QUESTIONS SUBMITTED BY SENATOR DAN SULLIVAN

STRATEGIC LOCATION OF ALASKA

53. Senator SULLIVAN. Dr. Carter, in a week or two, the Army will be conducting force reduction and realignment listening sessions across country. Two of these sessions will be conducted in Alaska; one on Joint Base Elmendorf-Richardson and the other Fort Wainwright. Given our strategic shift to the Asia-Pacific and a renewed focus on the Arctic, do you believe that the forces in Alaska are uniquely suited to help address strategic needs in our Pacific Pivot and new Arctic Strategy?

Dr. CARTER. Yes, United States forces in Alaska play a critical role in our posture in the Asia-Pacific region.

54. Senator SULLIVAN. Dr. Carter, can I have your assurance that decisions are not made to eliminate units which are best positioned to quickly and effectively respond to threats in the Pacific Region in strategically important places like Alaska?

Dr. CARTER. Any changes to United States force posture need to ensure that the United States can continue to quickly and effectively respond to threats in the Pacific Region.

55. Senator SULLIVAN. Dr. Carter, should the Army decide to eliminate one or both brigade combat teams (BCT) in Alaska, how do you expect Kim Jong-un to react to this news?

Dr. CARTER. An important purpose of United States force posture in the Pacific Region is to deter aggression on the Korean Peninsula. That should be clear to the government of the DPRK.

56. Senator SULLIVAN. Dr. Carter, how would Vladimir Putin view it?

Dr. CARTER. An important purpose of our posture in the Asia Pacific region is to deter aggression by any power, including Russia.

57. Senator SULLIVAN. Dr. Carter, how about our friends and partners like Japan, Korea, and Singapore, how would they interpret it?

Dr. CARTER. An important purpose of our posture is also to assure our friends and partners, such as Japan, Korea, and Singapore, that the United States is fully committed to the security of the Asia-Pacific region.

RUSSIAN ARCTIC ACTIONS AND LACK OF UNITED STATES ACTION

58. Senator SULLIVAN. Dr. Carter, recent news articles have reported increased Russian involvement in the Arctic. This involvement, which some have called the militarization of the Arctic, includes creation of a new Arctic Command, the construction of as many as 13 new airfields and 10 air-defense radar stations, an increase in Russian Long-Range Air Patrols, continued investment in the world's largest ice-breaker fleet, and the recent activation of an Arctic Brigade. Additionally, Russia has made several large territorial claims into the Arctic, including the expressed desire to expand its Arctic borders by more than 460,000 square miles. Meanwhile DOD has issued a 16-page Arctic Strategy; just 13 pages if you don't count the cover, the forward, and the 1-page map. How are we not falling behind in the Arctic?

Dr. CARTER. The U.S. approach to the Arctic should support our core objectives to ensure security and promote defense cooperation. If confirmed, I will direct our combatant commanders and Services to regularly review the security environment to ensure the U.S. is investing in required capabilities in a timely manner.

59. Senator SULLIVAN. Dr. Carter, what is your 50-year vision for the Arctic?

Dr. CARTER. My 50-year vision is for an Arctic region that remains stable and free of conflict, where nations continue to act responsibly in a spirit of trust and cooperation, and where economic and energy resources are developed in a sustainable manner that respects both the fragile environment and the interests and cultures of indigenous peoples. Although the Arctic Ocean may be ice-free for several months during the summer by 2065, it will still be ice-bound during the long, dark polar winter. If confirmed, I will work with my interagency partners to support the work of the Arctic Council during the upcoming U.S. Chairmanship to lay the foundation for addressing the enduring challenges to human and environmental safety and security in the region.

60. Senator SULLIVAN. Dr. Carter, what resources do we need as a Nation to effectively project power into the Arctic Region?

Dr. CARTER. To effectively project power into the Arctic Region, the United States needs to maintain the aircraft necessary to patrol our skies and respond to Russian long-range aviation when our sovereignty is challenged. Given that the Arctic is frozen much of the year, submarines are also vital to our power projection capability. DOD is able to accomplish its mission against existing threats in current Arctic conditions with its current capabilities. At some point in the future, the United States will also need ships capable of operating in the marginal ice zone or near ice in the summer months when the Arctic is accessible. If confirmed, I will continue to assess those needs to determine what resources the U.S. requires.

ARCTIC COLLABORATION

61. Senator SULLIVAN. Dr. Carter, besides our participation on the Arctic council, how can we more effectively collaborate with Arctic nations?

Dr. CARTER. The United States can work to advance its defense and security partnerships with partners in the Arctic through engagement in international venues such as the International Maritime Organization, where a Polar Code for Arctic shipping is under development, and the new Coast Guard Arctic Forum. The U.S. can also seek to enhance research and academic collaboration through institutions like the new Coast Guard Center for Arctic Study and Policy, and the International Arctic Research Center at the University of Alaska Fairbanks. The United States should continue to work with its Arctic partners through the Northern Chiefs of Defense Conference to bolster security and defense cooperation. The U.S. can also seek additional opportunities for business collaboration through the new industry-led Arctic Economic Council. Finally, the United States can also take a leadership role in promoting the rules that underpin the freedom of the seas and provide legal certainty on the world's oceans, including exercising internationally recognized navigation and overflight rights in the Arctic Ocean, as appropriate.

62. Senator SULLIVAN. Dr. Carter, how can we improve military-to-military relations with our Arctic friends and partners?

Dr. CARTER. The U.S. can improve military-to-military relations with its Arctic friends and partners by working with them to confront the same challenges the

United States faces: Arctic operations are expensive and can be dangerous for military forces that are unprepared for the austere operating environment.

For example, the United States can participate in Arctic search and rescue exercises in collaboration with the Coast Guards and Navies of other Arctic friends and partners. A combination of at-sea interaction and in-port engagements that address common challenges such as communications, situational awareness, and cold weather operations can improve interoperability and strengthen military-to-military relationships. Another avenue to improve military-to-military relations is through collaborative Arctic research with organizations. Finally, militaries should continue to exchange concerns and lessons learned in forums such as the Arctic Security Forces Roundtable, and through joint exercises.

ARMY ROLE IN ASIA

63. Senator SULLIVAN. Dr. Carter, last year at the annual Association of the U.S. Army conference, Secretary Hagel has said that the Army could “broaden its role,” after more than a decade of continuous operations in Iraq and Afghanistan, “by leveraging its current suite of long-range precision-guided missiles, rockets, artillery, and air defense systems” to build a modern coastal defense force that could contribute to operations in anti-access/area-denial environments. Do you concur that such a capability would offer benefits for United States defense policy in the Asia-Pacific and other maritime theaters?

Dr. CARTER. I support the Army’s ongoing efforts to improve its integrated air and missile defense capabilities. The coming years will allow the Army to focus on resetting and looking forward to greater investment in Asia-Pacific missions, including building partner capacity of counterpart forces in that region.

CHINESE COERCION

64. Senator SULLIVAN. Dr. Carter, over the last several years, China has engaged in coercive diplomacy to achieve its political and territorial aims in the East and South China Seas. The administration has responded with efforts to build partner capacity and strengthen regional institutions, but this will take years if not decades to bear fruit. Beyond private diplomacy with the Chinese, which appears to be insufficient, what steps do you believe we should take to deter Chinese assertiveness in the short and medium term?

Dr. CARTER. The United States has a strong interest in maintaining peace and stability, the free flow of commerce, and the freedom of navigation and overflight in the East and South China Seas. In addition to diplomacy to resolve territorial disputes peacefully and in accordance with international law, the United States should deter assertiveness in the region with a robust force posture, sustained presence, and commitment to building the capacity of its partners and allies. The United States also should encourage China to be more transparent about how it will use its growing military capabilities. The United States should also continue to modernize and strengthen its security alliances with Australia, Japan, the Republic of Korea, Philippines, and Thailand. The United States should also deepen relationships with and among its partners in South and Southeast Asia to build capacity and reduce vulnerabilities. If confirmed, I will continue to prioritize our investments in posture, presence, and partnership capacity in the Asia-Pacific region to deter aggression and underwrite peace and stability.

65. Senator SULLIVAN. Dr. Carter, do you share the view that China’s actions have violated United States national interests in the Freedom of Navigation, the free flow of commerce, and the peaceful settlement of disputes in accordance with international law?

Dr. CARTER. The United States has a longstanding national interest in preserving the freedom of navigation, and in the peaceful settlement of disputes in accordance with international law. I am concerned that recent Chinese actions, including its unilateral and uncoordinated announcement of an Air Defense Identification Zone (ADIZ) that overlapped the previous existing ADIZ in the East China Sea, its unilateral promulgation of fishing regulations covering much of the South China Sea, its pursuit of land reclamation activities in the South China Sea, and its use of economic pressure on other claimants, has raised regional tensions and complicated efforts to peacefully manage and resolve territorial disputes. The United States should remain committed to the preservation of the freedom of navigation, and all the other rights provided under international law. If confirmed, I would carry forward that commitment, and I would work to ensure that disputes are addressed in a manner that both reflects that commitment and that serves the goal of resolving disputes

peacefully. This approach would apply to my dealings with China and with all other countries.

AMERICAN ENERGY

66. Senator SULLIVAN. Dr. Carter, 10 years ago, we would have never expected the United States to be in the current position as an energy superpower. How do you foresee the United States utilizing this power to our advantage abroad?

Dr. CARTER. The profound changes in the global energy market, and the United States' increasing role as an energy superpower, are significant developments in the global landscape. They present a range of opportunities and challenges, which influence the international security environment and the Department's ability to fulfill its global responsibilities. If confirmed, I will ensure that the Department accounts for the security implications and possibilities of this critical but volatile market in its strategic calculus and works with the U.S. interagency and our international partners to leverage it properly.

67. Senator SULLIVAN. Dr. Carter, what actions will DOD take to ensure we maintain this role and what can Congress do to help maintain this power as well?

Dr. CARTER. Although the Department is not the lead agency for energy policy, I do support a whole-of-government approach for U.S. national security that factors in energy use and production.

QUESTIONS SUBMITTED BY SENATOR MIKE LEE

U.S. GLOBAL ROLE

68. Senator LEE. Dr. Carter, in discussing the foreign interests of the United States, early U.S. Presidents like Washington and Jefferson warned against entangling the United States in the business of other nations. I'd like to get your thoughts on what you believe the role of the U.S. is, as a global superpower, and how we can balance this status while not becoming overly involved and burdened in situations that do not impact our Nation's security?

Dr. CARTER. The United States continues to be the preeminent global superpower and remains the strongest, most resilient, and most influential Nation on the face of the earth. We have allies and friends in every corner of the world and our adversaries have few: this is clear testimony to the appeal of our values, our principles, and our leadership. However the world continues to be a dangerous place: turmoil in the Middle East and North Africa, an ongoing war in Afghanistan, the reversion to old-style thinking in parts of Europe, and the long-standing tensions from the past and the rapid changes in Asia. This calls for the continuing need of the stabilizing presence of the United States throughout the world, while working closely with our allies and partners to address threats to U.S. interests.

69. Senator LEE. Dr. Carter, where do you believe DOD should be reprioritizing its focus, either programmatically or geographically, in order to maximize attention to its primary responsibility of securing the freedoms and rights of U.S. citizens?

Dr. CARTER. I believe DOD priorities should include preserving and enhancing the finest fighting force in the world and taking care of their families; providing a strategic perspective to the threats and opportunities in the world; and implementing significant reforms that are crucial in a time of budget uncertainty. From a programmatic perspective, DOD should protect and prioritize investments in innovative technology and operational concepts to maintain the most advanced capabilities in the world.

NATIONAL GUARD

70. Senator LEE. Dr. Carter, if confirmed, how do you plan to build upon the combat experience gained by National Guard and Reserve units and take advantage of the cost-benefits of the Reserve Forces identified by the Reserve Forces Policy Board and Cost Assessment and Program Evaluation (CAPE) reports in order to preserve combat power for the military, especially while adjusting to potential budget constraints?

Dr. CARTER. Each component is critical to the total force. If confirmed, I will review the reports and ensure that all force structure decisions take into account the comparative cost, capability, and operational capacity and experience of each component to attain the best force mix.

71. Senator LEE. Dr. Carter, as you know, the Army's Aviation Restructuring Initiative (ARI) calls for the transfer of all Apache attack helicopters from the National Guard to Active Army. There are thousands of men and women in the National Guard currently assigned to the Apache battalions, many who have years of combat experience and decades of training with this equipment. Are you concerned that we are losing a valuable national security asset that we already have in these personnel by carrying out this initiative?

Dr. CARTER. If confirmed I will review the Army's Aviation Restructuring Initiative (ARI) as well as take into account the recommendations of the Army Commission established by the Congress to review this issue and make independent recommendations

72. Senator LEE. Dr. Carter, do you have any concerns that this initiative would reduce the strategic depth of the Army aviation?

Dr. CARTER. If confirmed I will review the Aviation Restructuring Initiative and look forward to receiving the views of the Army, the Chief of the National Guard Bureau, and the Council of Governors and the results of the Army Commission.

AIR FORCE

73. Senator LEE. Dr. Carter, at the end of last year, the Air Force announced that if it was not authorized to retire weapons systems (the A-10) as requested in the fiscal year 2015 Budget Request, there would be a shortfall of maintainers to train and transition into new equipment, which could potentially delay Initial Operational Capability (IOC) and Full Operational Capability (FOC) for new weapons systems (F-35). To what extent are you aware of this issue, and how do you intend to address any Air Force maintainer shortfall if confirmed?

Dr. CARTER. I am not fully informed on this issue. If confirmed, I will direct the Secretary of the Air Force to address this issue and develop a solution as necessary.

STRATEGIC FORCES

74. Senator LEE. Dr. Carter, the United States Government last year accused Russia of violating the INF Treaty, something that has been largely suspected for some time. What do you believe should be an appropriate response to Russia's violation of this treaty from DOD and the United States Government as a whole?

Dr. CARTER. In response to Russia's violation of the INF Treaty, the United States should consider a comprehensive strategy of diplomatic, economic, and military responses. Russia's continued disregard for its international obligations and lack of meaningful engagement on this particular issue require the United States to take actions to protect its interests and security as well as those of its allies and partners. United States efforts should continue to remind Russia why the United States and Russia signed this treaty in the first place and be designed to bring Russia back into verified compliance with its obligations. I believe that any United States responses should be designed to make the United States and our allies and partners more secure by ensuring that Russia does not gain any significant military advantage from deploying an INF-prohibited system.

The range of options we should look at from the Defense Department could include active defenses to counter intermediate-range ground-launched cruise missiles; counterforce capabilities to prevent intermediate-range ground-launched cruise missile attacks; and countervailing strike capabilities to enhance U.S. or allied forces. United States responses must make clear to Russia that if it does not return to compliance our responses will make them less secure than they are today.

75. Senator LEE. Dr. Carter, do you believe that the United States should undertake any further nuclear forces reductions while Russia is still in violation of this or any other treaty?

Dr. CARTER. If confirmed, I would assess the current situation, consult with my senior military advisors, and recommend a course of action.

76. Senator LEE. Dr. Carter, Secretary Hagel spoke recently about the importance that our Nation's nuclear deterrence still plays in U.S. security and in support of the new long-range strike bomber project. Many of us support the nuclear deterrence mission and want to ensure that future modernization and acquisition projects are executed in the most cost- and time-efficient manner, and that the viability of deterrence missions are not jeopardized by cost overruns and delays. If confirmed, how do you plan to address the modernization and acquisition needs of our strategic deterrence while guaranteeing their budgetary viability?

Dr. CARTER. A safe, secure, and reliable nuclear deterrent is essential to national security, and, if confirmed, ensuring the viability of plans for its future needs will be a priority for me.

CYBERSECURITY

77. Senator LEE. Dr. Carter, many of us are concerned about the improved abilities of both state and non-state actors to conduct cyber-attacks against government and non-government entities alike. What, in your opinion, is necessary for DOD to deter and defend against these attacks, and how should the United States calibrate responses to cyber attacks?

Dr. CARTER. Defending against cyber-attacks requires a whole of government effort. DOD employs an array of techniques and capabilities to defend its own networks while providing support to other departments and agencies as appropriate. Greater resiliency for DOD networks and systems and more robust information sharing will be crucial to defending against these attacks.

The U.S. should calibrate responses to cyber-attacks by establishing all the facts and conducting case-specific analysis, determining an appropriate proportional response, and should consider the broader strategic context, security, and foreign policy considerations of any attack and response.

78. Senator LEE. Dr. Carter, when would you consider a cyber attack to be an act of war?

Dr. CARTER. Cyber-attacks can affect our critical infrastructure, the national economy, and military operations. I believe that what is termed an act of war should follow the same practice as in other areas, because it is the seriousness, not the means, of an attack that matters most. Whether a particular attack is considered an "act of war," in or out of cyberspace, requires a determination on a case-by-case and fact-specific basis. Malicious cyber activities could result in death, injury or significant destruction, and any such activities would be regarded with the utmost concern and could well be considered "acts of war." An attack does not need to be deemed an "act of war" to require a response.

ISLAMIC STATE OF IRAQ AND SYRIA

79. Senator LEE. Dr. Carter, do you believe that President Bashar Assad has to be removed, either peacefully or by force, from power in order to protect the United States from the threats emanating from this conflict?

Dr. CARTER. Assad has lost all legitimacy and cannot be part of the future of Syria. A stable Syria will require both defeating ISIL and a political transition in which Assad is removed from power.

80. Senator LEE. Dr. Carter, one of the enduring images that many Americans have seen from the conflict in Iraq and Syria are of ISIS fighters parading through urban streets or in desert convoys in United States-made armored vehicles captured from surrendering Iraq Security Force units. Recently, the United States has sent hundreds of Mine-Resistant Ambush Protected (MRAP) vehicles to Iraqi and Kurdish forces, and the Iraqi Government has requested armored vehicles and equipment, such as Abrams tanks and High Mobility Multipurpose Wheeled Vehicle (HMMWV). If confirmed, what will you recommend the United States do to ensure that such lethal equipment does not end up in the hands of ISIS fighters, and that the United States is not inadvertently arming ISIS in Iraq?

Dr. CARTER. If confirmed, I will continue to support the efforts of the Department of Defense to train, advise, and assist the Iraqis to reconstitute a credible and combat capable security force. Cohesive, well-trained, well-led and properly supported forces reduces the risk that those forces will surrender or abandon the equipment the U.S. has given them. I will also ensure that DOD uses all appropriate end use monitoring tools and practices.

81. Senator LEE. Dr. Carter, what role should DOD play in disrupting the flow of foreign fighters flowing into and out of the conflict in Syria and Iraq?

Dr. CARTER. United States military action, in concert with coalition partners, can have an impact on ISIS's capabilities and reduce its ability to flow fighters in and out of Syria. I believe it is important that the United States continue its close collaboration with other governments to stop the flow of foreign fighters into the region. If confirmed, I will focus attention on the foreign fighter flow, and their support networks, and assess what changes may be needed.

82. Senator LEE. Dr. Carter, do you believe that the U.S. military action against ISIS can be successful at defeating the threats to our country if the United States and international community are not able to significantly stop the flow of fighters, funds, and weapons into this conflict?

Dr. CARTER. No.

NORTH ATLANTIC TREATY ORGANIZATION

83. Senator LEE. Dr. Carter, at the NATO summit in Wales last September, NATO members agreed to reverse trends in declining defense spending and maintain a defense budget of 2 percent GDP, a spending level that, as you know, has been a NATO goal for over a decade but few countries have achieved. Do you believe that it is in the interests of the United States as a deterrent to Russian aggression for our NATO allies to reverse declines in defense spending and work towards meeting these goals?

Dr. CARTER. Yes.

84. Senator LEE. Dr. Carter, if confirmed, what will you do to assist and encourage NATO members to prioritize defense spending in their own countries to meet the Russian threat?

Dr. CARTER. If confirmed, I will emphasize the importance of strong U.S. leadership within the NATO, including for collective defense planning. I will urge Allies with larger economies to invest in military capabilities that that can impose costs on any opponent with minimal cost and risk to Alliance forces. For Allies with smaller economies, I will encourage them to invest in capabilities that are needed by the Alliance, and in which they may have a comparative advantage.

AFGHANISTAN

85. Senator LEE. Dr. Carter, what is your assessment of the quality and capabilities of the Afghan National Security Forces (ANSF), and the relationship between the political leadership and the military leadership in Afghanistan?

Dr. CARTER. If confirmed, I will assess these issues first hand, but my assessment based on public information has been that President Ghani has a positive relationship with both military leaders and the Afghan forces, and that the ANSF have steadily improved. It appears that the ANSF are increasingly effective at leading operations and prevailing over insurgents with limited assistance from U.S. and coalition partners.

I understand the relationship between the ANSF and Afghan political leadership has significantly improved since President Ghani took office. I believe President Ghani has embraced his role as commander-in-chief, and has demonstrated his commitment to focus on improving ANSF effectiveness and security for the people of Afghanistan.

86. Senator LEE. Dr. Carter, if the ANSF fails to provide security for the country as expected during the U.S. drawdown, what threats to the United States do you believe could develop in Afghanistan?

Dr. CARTER. The objective of strengthening the ANSF's ability to provide security is to protect the Afghan people and to ensure that Afghanistan is never again a base for attacks upon the United States. If confirmed, I will be committed to countering the al-Qaeda threat in the region and addressing any other terrorist elements in Afghanistan that pose a threat to our nation.

YEMEN

87. Senator LEE. Dr. Carter, the Yemeni Government has collapsed and a strong possibility exists of full-scale civil war there as al Qaeda in the Arab Peninsula (AQAP), Shiite rebels backed by Iran, and the remnants of the government all fight for control of territory and authority. What do you identify as the greatest threat to the United States stemming from the conflict in Yemen?

Dr. CARTER. AQAP in the Arabian Peninsula poses the greatest threat to United States interests from the conflict in Yemen. Therefore, the primary United States national security interest in Yemen is to disrupt, dismantle, and defeat AQAP. Continued political instability in Yemen also risks our joint efforts with the Yemenis to combat AQAP.

88. Senator LEE. Dr. Carter, do you believe that there are any necessary changes to the administration's current strategy to protect the United States from threats growing there?

Dr. CARTER. If confirmed, I will assess the current strategy and make any recommendations I believe are needed. I do not have any recommendations at this time based on the information currently available to me. I understand that United States counterterrorism strategy in Yemen focuses on a mix of partnership activities and limited direct action against those who threaten the United States. The United States Government, in partnership with its partners and the Yemeni government, have made a number of gains against AQAP, including the removal of numerous leaders and the disruption of plotting against the United States. AQAP remains resilient and the political instability that has long plagued Yemen—particularly in recent weeks—hinders Yemen’s ability to respond to the threat posed by AQAP. If confirmed, I intend to receive a detailed briefing to inform any changes I would recommend.

WESTERN HEMISPHERE

89. Senator LEE. Dr. Carter, what threats to United States national security do you see developing out of Latin and South America and do you believe any changes need to be made in U.S. policy towards that region to address these threats?

Dr. CARTER. I believe that threats developing out of Latin and South America include weak governmental institutions, corruption, under-governed spaces, transnational crime, narcotics, and natural disasters. These threats could increase instability in the region and threaten U.S. interests. To address these threats, I understand the Department of Defense, in support of the broader U.S. interagency effort, is focused on defending the southern approaches to the United States, strengthening hemispheric security, and encouraging further defense integration and collaboration on regional and global security affairs. If confirmed, I will assess these efforts and, if necessary, recommend changes to our strategy.

90. Senator LEE. Dr. Carter, do you believe that United States national security would benefit from increased ISR assets in the United States Southern Command (SOUTHCOM) area of operation?

Dr. CARTER. ISR continues to be in high demand in each Combatant Commander’s Area of Responsibility, including in United States Southern Command. If confirmed, I will evaluate requests for ISR in the context of needs across all the Combatant Commands.

TAIWAN

91. Senator LEE. Dr. Carter, as you know, the United States for decades has benefited from a strong security and economic relationship with Taiwan. If confirmed, what would you do to carry on and enhance the execution of U.S. policies that assist in maintaining Taiwan’s self-defense capabilities?

Dr. CARTER. I am firmly committed to maintaining Taiwan’s self-defense capability. The Taiwan Relations Act states that “the United States will make available to Taiwan such defense articles and defense services in such quantity as may be necessary to enable Taiwan to maintain a sufficient self-defense capability” and will “maintain the capacity of the United States to resist any resort to force or other forms of coercion that would jeopardize the security, or the social or economic system, of the people on Taiwan.” If confirmed, I will ensure that the Department of Defense is continually engaged in evaluating, assessing, and reviewing Taiwan’s defense needs, while also providing defense articles and services necessary to enable Taiwan to deter threats. I will also ensure that the United States maintains the planning and posture to resist any coercion against Taiwan. If confirmed, I will also ensure that the Department will continue to work closely with our partners on Taiwan to bolster their military preparedness, sustain the credibility of their deterrent, and support their military modernization effort.

QUESTIONS SUBMITTED BY SENATOR LINDSEY GRAHAM

MILITARY COMPENSATION AND RETIREMENT MODERNIZATION COMMISSION REPORT

92. Senator GRAHAM. Dr. Carter, do you have any concern that the removal of all attack aviation from the Army National Guard through the Army’s Aviation Restructuring Initiative will reduce the Army’s operational combat depth?

Dr. CARTER. The Army National Guard has been and will continue to be a crucial component of the total aviation force and the total army. If confirmed, I will review the Aviation Restructuring Initiative and work with the Department of the Army and the Chief of the National Guard bureau to understand and assess its impact on capabilities both in the active and reserve component. I also look forward to re-

viewing the recommendations of the Army Commission established by the Congress with your sponsorship.

93. Senator GRAHAM. Dr. Carter, given the overwhelming success of the operational Reserve model in Iraq and Afghanistan according to commanders in the field, how do you intend to maintain combat, combat support, and combat service support operational experience in the Reserve components during a time of lower operational demand?

Dr. CARTER. The use of the Reserves during the wars in Iraq and Afghanistan was a major factor in the Department's success. The CJCS and Service Chiefs have highlighted leader development as a key to sustaining the lessons learned from the last 13 years of war. Our Defense and Service institutions must ensure that we capture lessons learned and continue to grow leaders armed with that knowledge and shared experience. Another key element to maintaining operational experience is to retain the key officers and enlisted personnel with combat experience as well as ensure sufficient funding and readiness for the Reserve Component to meet operational requirements.

QUESTIONS SUBMITTED BY SENATOR JACK REED

MILITARY LENDING ACT PROTECTIONS FOR SERVICEMEMBERS

94. Senator REED. Dr. Carter, last November, 40 Senators wrote to Secretary Hagel in strong support of the proposed Military Lending Act (MLA) rule. If and when confirmed, will you work to ensure that the Department of Defense produces a final MLA rule that, like the proposed one, robustly enhances protections for servicemembers and their families and improves military readiness?

Dr. CARTER. Yes, if confirmed, I will ensure the final Military Lending Act rule supports robust protections for servicemembers and their families.

QUESTIONS SUBMITTED BY SENATOR JEANNE SHAHEEN

INTEGRATION OF WOMEN

95. Senator SHAHEEN. Dr. Carter, in 2013, DOD announced the elimination of the direct combat exclusion policy and plans to more fully integrate women into all occupational fields by 2016. Do you commit to work with the Services to keep this effort moving forward and keep Congress apprised of DOD's process?

Dr. CARTER. Yes. If confirmed, I will closely monitor the Department's progress to ensure we meet our timelines and I will keep Congress apprised of our progress.

96. Senator SHAHEEN. Dr. Carter, I understand that the Services and U.S. Special Operations Command (SOCOM) are studying whether to open all previously closed units and military operations to women and will have to submit specific requests if they wish to keep units or operations closed. What criteria will you and DOD use when evaluating any such requests to ensure consistency across DOD?

Dr. CARTER. In accordance with the 2013 Direct Ground Combat Definition and Assignment Rule rescission memo, all requests for exceptions to policy must be narrowly tailored and based on a rigorous analysis of factual data regarding the knowledge, skills, and abilities needed for the position. If confirmed, and if I receive requests for exception to policy, I will carefully consider them in this light.

BIOFUELS

97. Senator SHAHEEN. Dr. Carter, last September, the Departments of Navy, Energy, and Agriculture awarded contracts to three companies to construct and commission bio-refineries to produce drop-in biofuels to help meet transportation needs. Can you speak to the strategic importance of the military transiting away from a strict dependence on petroleum to biofuels?

Dr. CARTER. Over the long-term, I believe the Nation will benefit from a competitive, domestic renewable fuels industry, and, as a major consumer of liquid fuels, the Department would benefit from such competition. Similarly, the certification and qualification of alternative fuels for our equipment mean the Department will be better positioned to acquire and use a variety of fuels, as needed, to accomplish the mission.

DEFENSE INDUSTRIAL BASE

98. Senator SHAHEEN. Dr. Carter, when you served as Deputy Secretary of Defense, you said that "(s)maller firms, start-ups, and new entrants provide needed new technology, new face, and new ideas to the defense industry," and that "a key part of our defense industrial strategy is to encourage new entrants (that) offer competition, renew and refresh the technology base, and ensure that defense is benefiting from the main currents of emerging technology." You added "we must accordingly work constantly to lower barriers to entry." What do you have planned to ensure a culture of embracing small start-ups and new entrants?

Dr. CARTER. If confirmed, I would support policies that remove barriers to commercial technology utilization. I would also ensure that the Department has aggressive outreach to the small business community and other innovative firms. If confirmed I would direct the Under Secretary of Defense for Acquisition, Technology, and Logistics to develop and implement policies that achieved these goals.

BERRY AMENDMENT AND BUY AMERICAN ACT

99. Senator SHAHEEN. Dr. Carter, last November the DOD Inspector General (IG) filed a report on the Army's compliance with the Berry Amendment and Buy American Act. The IG recommended that the Services perform training for their contracting officers on the details of these purchasing requirements. What can DOD do to ensure that both contracting officers and the industry have a mutual understanding and appreciation for these extremely important laws?

Dr. CARTER. Although I am not familiar with the IG report, I know the Department has a number of learning tools available to assist the acquisition workforce in understanding all statutory requirements. If confirmed, I would direct the Under Secretary for Acquisition, Technology, and Logistics to report to me on the steps that have been taken and on any recommended improvements to enhance the training for government contracting officers to enhance their understanding and trust of their industry partners.

100. Senator SHAHEEN. Dr. Carter, what steps have been taken thus far to address the concerns raised in the IG report?

Dr. CARTER. I am not familiar with the IG report or the steps that have been taken to address the concerns raised in the report. If confirmed I will ascertain what steps have been taken and respond appropriately.

SMALL BUSINESS INNOVATION RESEARCH

101. Senator SHAHEEN. Dr. Carter, I know you have been a strong supporter of small business and the Small Business Innovation Research (SBIR) program. As you know, the SBIR Reauthorization Act that was signed into law 3 years ago requires DOD to use SBIR technology to the greatest extent practicable and requires the Secretary to establish goals and incentives for using SBIR technology. How will you ensure that these provisions are fully implemented?

Dr. CARTER. Before I left the Department as Deputy Secretary of Defense, I approved the interim version of DOD Instruction 5000.02 "Operation of the Defense Acquisition System," that included SBIR goals and incentive provisions. I understand that those provisions are also included in the recently approved final version of this Instruction. If confirmed, I will direct the Under Secretary of Defense (Acquisition, Technology, and Logistics) to oversee the implementation of this important initiative, and to ensure I am kept apprised.

QUESTIONS SUBMITTED BY SENATOR KIRSTEN E. GILLIBRAND

MILITARY COMPENSATION AND RETIREMENT MODERNIZATION COMMISSION REPORT

102. Senator GILLIBRAND. Dr. Carter, I have been concerned by what appears to be a haphazard approach from DOD to reforming pay and benefits. Last week, the Military Compensation and Retirement Modernization Commission released its report with a series of recommendations. At the same time DOD sent us back the same proposals it sent us last year, but with some changes. I was concerned last year about how DOD's recommendations would impact lower enlisted troops and their families. How do you see these two sets of recommendations and how do you ensure we continue to support lower enlisted troops and their families?

Dr. CARTER. I appreciate the difficult task that was presented to the Commission. If confirmed, I intend to carefully review and evaluate the Commission's recommendations on reforming military compensation and retirement and will ensure

I meet the deadlines established in the law for my input to the President. I was not privy to the details of the FY 2016 budget prior to my confirmation hearing. If confirmed, I will be prepared to comment on the FY 2016 budget proposals at the posture hearing the Committee is planning in early March.

CYBER

103. Senator GILLIBRAND. Dr. Carter, I want to be helpful to DOD in recruiting the best talent and acquiring the best tools for our cyber mission. What do you think are our two most important cyber needs for the next 5 years?

Dr. CARTER. The most important aspect of the Department's strategy for countering these threats is manning, training, and equipping a cyber-force that can fulfill its missions. If confirmed, I look forward to working closely with the Committee on this issue. A top priority is recruiting and retaining the most highly skilled professionals, which is challenging because cyber is a highly technical domain. In addition, DOD must work in closer partnership with the Intelligence Community, the Department of Homeland Security, and other government agencies to identify cyber threats, deter attacks, and improve defenses for our networks.

104. Senator GILLIBRAND. Dr. Carter, how will you incorporate cyber forces, especially in the National Guard, into our Homeland defense strategy?

Dr. CARTER. DOD is in its third year of building a Cyber Mission Force of approximately 6,000 personnel. I believe that the National Guard and Reserve are a tremendous resource of talent and of surge capacity for DOD, and these skilled personnel can contribute greatly to the cyber mission. It will be critical to recruit the right talent, and we must take a strategic approach to leveraging our National Guard and Reserve forces as part of our overall structure. DOD is already using some Guard and Reserve personnel in the cyber mission area, and they have proven to be of tremendous value enhanced by their civilian skills. The Guard and Reserve should be part of the Cyber Mission Force and also create additional Cyber Protection Teams to augment Service capacity. This expertise and support should be made available to the States in traditional missions like responding to natural disasters as well as less traditional missions in cyberspace. If confirmed, I look forward to working with the Joint Staff, the Combatant Commands, the Services, and the States through the Council of Governors to ensure the National Guard and reserve forces cyber capabilities are sufficiently augmented and incorporated into the Department's force planning construct.

105. Senator GILLIBRAND. Dr. Carter, please provide your thoughts on the relationship between the Department of Homeland Security (DHS) and DOD in terms of global cyber-security roles and responsibilities.

Dr. CARTER. The Department of Defense has the responsibility to defend the Nation from attack in cyberspace. This cyber mission necessitates a close partnership with the Department of Homeland Security (DHS) in its role of protecting U.S. critical infrastructure, securing non-Department of Defense unclassified government networks, and coordinating the national protection from, prevention of, mitigation of, and recovery from cyber incidents. The Department of Justice, with the FBI, is also a critical member of this operational partnership and all three Departments work closely together in an effective operational cybersecurity partnership.

Cybersecurity requires a whole-of-government approach, and DOD synchronizes its international engagement with its interagency partners. DOD joins DHS and other Departments and agencies in whole-of-government dialogues around the globe, and DOD and DHS work closely together to build robust international relationships that reflect and promote our core commitments and common interests in cyberspace.

 QUESTIONS SUBMITTED BY SENATOR JOE DONNELLY

NUCLEAR ENTERPRISE REVIEW

106. Senator DONNELLY. Dr. Carter, following up on my questions in the hearing, if confirmed, will you commit to reading the Creedon-Fanta Nuclear Enterprise Review report and getting back to the committee with your views and whether you agree with its findings?

Dr. CARTER. Yes.

NATIONAL GUARD

107. Senator DONNELLY. Dr. Carter, if confirmed, will you work to maintain the National Guard as an operational Reserve?

Dr. CARTER. The National Guard and Reserve are a critical source of many of the capabilities required in ongoing operations and contingency surge requirements both abroad and at home. As an operational Reserve, the Reserve components need to make certain capabilities available on a continuing basis and others to augment and reinforce active components when mobilized over time. If confirmed, I will work to ensure that the Guard and Reserve components are supported so that they are ready to operate in peacetime, in wartime and in support of civil authorities.

DEFENSE MANPOWER DATA CENTER

108. Senator DONNELLY. Dr. Carter, what is your approach to the administration of the Defense Manpower Data Center (DMDC), specifically regarding adequate staffing, funding and data security, in order to maintain and increase the accuracy, reliability, and integrity of the DMDC database?

Dr. CARTER. The Defense Manpower Data Center (DMDC) systems and information are critical to ensuring eligibility and providing benefits to all DOD personnel, and also provide the vital interface to operate numerous other DOD-wide systems, including physical security, healthcare, and personnel security programs. The Department has an obligation to provide these capabilities, to ensure the data security, and to protect the privacy of these information systems. If confirmed, I will work closely with Congress to ensure that DMDC has the necessary resources to execute its mission.

109. Senator DONNELLY. Dr. Carter, if confirmed, will you commit to providing me and the committee with information on DOD's plans to address the capabilities of the DMDC, particularly its capability to assist in the effort to ensure that servicemembers eligible for Servicemember Civil Relief Act benefits and protections can be proactively identified in a timely and accurate manner?

Dr. CARTER. Yes.

 QUESTIONS SUBMITTED BY SENATOR MAZIE K. HIRONO

MISSILE DEFENSE

110. Senator HIRONO. Dr. Carter, I understand that DOD is systematically implementing upgrades to the Ground-Based Midcourse Defense system, including sensor and discrimination improvements. Within this area of improvement is the planned Long Range Discrimination Radar (LRDR) to improve defense of the United States against a long-range North Korean missile threat. While DOD is improving our overall Homeland missile defense capability, I want to ensure that Hawaii is well protected – especially as North Korea continues to evolve its capabilities. If confirmed, will you commit to looking into our capability to defend Hawaii against such a North Korean threat, and keeping me informed of the progress in this important area?

Dr. CARTER. Yes.

RETENTION OF WOMEN IN THE MILITARY

111. Senator HIRONO. Dr. Carter, women are a great asset both to the diversity of our military and to its success. This past October the military appointed its third female four-star officer. While that is a fact to be celebrated, women leave the service at a rate nearly twice that of men. As we have seen with other types of diversity within the military, retention of women for senior leadership positions has a significant influence on the success through mentoring of junior female military members. If confirmed what measures will you consider for increasing retention of women in the military and achieving the diversity needed to mentor future female leaders?

Dr. CARTER. I believe that the Department of Defense must compete for the best and brightest talent our Nation has to offer as it expands opportunities for all qualified individuals at all levels through our most senior general and flag officers. If confirmed, I will continue to emphasize the need for retaining a high quality and diverse force in an environment free from personal, social, or institutional barriers that prevent servicemembers from rising to the highest level of responsibility possible.

MENTAL HEALTH CARE FOR VETERANS

112. Senator HIRONO. Dr. Carter, a memorandum published by the Secretary of Defense on September 3, 2014, implemented new policy guidance to be used in the respective Services' review of post-traumatic stress disorder (PTSD)-related dis-

charge upgrade requests. The memorandum also called for “a public messaging campaign by the Services” in order to ensure outreach and notification. Should you be confirmed, are you committed to continuing this policy and outreach directive so that Vietnam veterans diagnosed with PTSD who received less-than-honorable discharges be allowed liberal consideration for a discharge upgrade?

Dr. CARTER. If confirmed, I will continue to work with all parties concerned to ensure that veterans of all periods of service receive a fair hearing and obtain appropriate relief. We will also continue to work with Veterans and Military Support Organizations and legal service providers to ensure veterans receive assistance in the review process.

QUESTIONS SUBMITTED BY SENATOR ANGUS S. KING, JR.

ATHLETIC FOOTWEAR FOR NEW RECRUITS

113. Senator KING. Dr. Carter, on April 25, 2014, Acting Deputy Secretary of Defense Christine Fox confirmed in a letter that DOD’s athletic footwear policy for recruits would be modified to include the following provision:

“As Berry Amendment-compliant shoes come on the market, we will assess them for cost and durability to ensure they are comparable to other models available to recruits. If one or more Berry Amendment-compliant shoe models correspond to a shoe type category, only these shoes will be made available for purchase using the one-time cash allowance.”

Do you commit that, if confirmed, DOD’s athletic footwear policy for new recruits will remain consistent with the provisions of Acting Deputy Secretary Fox’s April 25, 2014, letter?

Dr. CARTER. Yes.

QUESTIONS SUBMITTED BY SENATOR MARTIN HEINRICH

NATIONAL NUCLEAR SECURITY ADMINISTRATION

114. Senator HEINRICH. Dr. Carter, the Congressional Advisory Panel on the Governance of the Nuclear Security Enterprise released its final report in November 2014. After considering a number of alternative leadership structures, the panel concluded the current structure with a “separately-organized” National Nuclear Security Administration (NNSA) is fundamentally flawed. The panel recommended amending the NNSA Act to replace the separately-organized NNSA with a new Office of Nuclear Security (ONS) within the Department of Energy (DOE) charged with performing the missions currently performed by NNSA. The panel’s objective was to enable an Energy Secretary who sets the policy and a Director of ONS who is fully empowered to implement the policy.

Based on your many years of experience with the nuclear weapons complex, what thoughts do you have on improving the existing governance structure of DOE’s Nuclear Security Enterprise?

Dr. CARTER. I believe DOD can work effectively with the Department of Energy and the National Nuclear Security Administration (DOE/NNSA) under the current structure or an alternative arrangement as long as DOE/NNSA continues to execute its primary mission of warhead and infrastructure life extension programs that meets DOD military requirements. If confirmed, I will direct the consistent engagement with senior leadership through the interagency process of the Nuclear Weapons Council, which is charged to manage the nuclear weapons stockpile and maintain a safe, secure, and effective nuclear deterrent.

ISLAMIC STATE

115. Senator HEINRICH. Dr. Carter, 2 weeks ago, former national security advisor Zbigniew Brzezinski testified before the Senate Armed Services Committee about the Islamic State and the three civil wars that were essentially raging in the Arab world today. Brzezinski explained: “I think getting involved in the internal dynamics, religious conflicts, sectarian animosities of the region is a prescription for a protracted engagement of the kind that can be very destructive to our national interests.”

How important is it that the fighting on the front lines against the Islamic State be conducted by the Iraqis and other regional, Arab members of the coalition and not the United States?

Dr. CARTER. To inflict a lasting defeat on ISIL, it is very important that regional coalition partners, including Iraq, be fighting on the front lines. Building the capac-

ity of these local security forces must be a central part of the U.S. strategy. The Iraqi Security Forces, including Kurdish Peshmerga and Sunni tribal elements, are on the front line force in the current fight. If confirmed, I will support the effort to train, equip, advise, and assist local forces to enhance their ability to defeat ISIL.

NATIONAL LABS

116. Senator HEINRICH. Dr. Carter, beyond current and future life extension programs (LEP), do you believe a sustained funding commitment is necessary at our national laboratories to preserve the intellectual infrastructure and sustain the scientific base of the weapons program? If so, how do you propose formalizing this commitment?

Dr. CARTER. The Department of Energy National Laboratories are important to the Department of Defense's technology base and laboratory enterprise, particularly with respect to the science and engineering that underpins the Nation's nuclear weapons program. If confirmed, I will work with the Secretary of Energy and the President to ensure that the unique capabilities of the national laboratories are maintained and available to DOD in support of national defense missions.

[The nomination reference of the Honorable Ashton B. Carter follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
January 7, 2015.

Ordered. That the following nomination be referred to the Committee on Armed Services:

Ashton B. Carter, of Massachusetts, to be Secretary of Defense, vice Charles Timothy Hagel.

[The biographical sketch of the Honorable Ashton B. Carter, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF ASHTON B. CARTER

Education:

- Oxford University
 - 1976–1979
 - Ph.D., Theoretical Physics
 - Senior Scholar, St. John's College
 - Best Participant Prize, NATO Center for Subnuclear Physics
- University of Edinburgh
 - Fall, 1974, no degree
- Yale University
 - 1972–1976
 - B.A., summa cum laude
 - Honors in Medieval History
 - Honors in Physics
 - Phi Beta Kappa
 - Andrew D. White Essay Prize in European History

Employment Record:

- Senior Executive, Markle Foundation (2014–present)
- Stanford University (2014–present)
 - Distinguished Visiting Fellow, Hoover Institution
 - Lecturer, Freeman Spogli Institute for International Studies
- U.S. Department of Defense
 - Deputy Secretary of Defense (2011–2013)
 - Under Secretary of Defense for Acquisition, Technology, and Logistics (2009–2011)
- Harvard University

- Chair, International and Global Affairs Faculty
- John F. Kennedy School of Government
- 2006–2009 (leave of absence 2009–2011)
- Harvard University
 - Ford Foundation Professor of Science and International Affairs
 - John F. Kennedy School of Government
 - 1996–2009
- Preventive Defense Project, Harvard and Stanford Universities
 - Co-Director (with William J. Perry)
 - 1997–2009
- U.S. Department of State
 - Senior Advisor to the North Korea Policy Review
 - 1998–2000
- U.S. Department of Defense
 - Assistant Secretary of Defense for International Security Policy
 - 1993–1996
- Harvard University
 - Director, Center for Science and International Affairs
 - 1990–1993
- Harvard University
 - Professor, and Associate Director, Center for Science and International Affairs
 - 1988–1990
- Harvard University
 - Associate Professor
 - 1986–1990
- Harvard University
 - Assistant Professor
 - 1984–1986
- Massachusetts Institute of Technology
 - Research Fellow, Center for International Studies
 - 1982–1984
- U.S. Department of Defense
 - Program Analysis and Evaluation
 - 1981–1982
- Office of Technology Assessment, U.S. Congress
 - International Security and Commerce Program
 - 1980–1981
- Rockefeller University, New York
 - Research Associate
 - 1979–1980
- Oxford University
 - Physics Instructor (“Tutor” in the Oxford system)
 - Quantum Mechanics and Relativity
 - 1977–1979
- Brookhaven National Laboratory
 - Experimental Research Associate
 - 1976
- Fermi National Accelerator Laboratory
 - Experimental Research Associate
 - 1975

Honors and Awards:

- Henry L. Stimson Pragmatist and Idealist Award, Stimson Center, 2014.
- W. Stuart Symington Award, Air Force Association, 2014.
- Distinguished Public Service Medal, Department of Defense (awarded five times), 1994, 1995, 2010, 2012, and 2013.
- Joint Distinguished Service Medal, from the Chairman and the Joint Chiefs of Staff, 2013.
- Nunn-Lugar Award, Nuclear Threat Institute, 2011.

- Defense Intelligence Medal, from the Defense Intelligence Agency, 1998.
- Forum Award, American Physical Society, 1988.
- Ten Outstanding Young Americans, United States Jaycees, 1987.
- Senior Scholar, St. John's College, 1978–1979.
- Best participant prize, NATO Center for Subnuclear Physics, 1978.
- Rhodes Scholar, 1976.
- See above under "Education."

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by the Honorable Ashton B. Carter in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES
ROOM SR-228

WASHINGTON, DC 20510–6050

(202) 224–3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed, use an additional sheet and cite the part of the form and the question number (i.e. A–9, B–4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in Committee offices for public inspection prior to the hearing and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Ashton Baldwin Carter (Ash Carter).
2. **Position to which nominated:**
Secretary of Defense.
3. **Date of nomination:**
January 7, 2015.
4. **Address:** (List current place of residence and office addresses.)
[The nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
September 24, 1954, Philadelphia, PA.
6. **Marital status:** (Include maiden name of wife or husband's name.)
Married. Wife: Stephanie DeLeeuw Carter.
7. **Names and ages of children:**
[The nominee responded and the information is contained in the committee's executive files.]
8. **Education:** List secondary and higher education institutions, dates attended, degree received and date degree granted.
Abington High School, Abington, PA, 1968–1972, High School Diploma 1972.
Yale University, New Haven, CT, 1972–1976, B.A. 1976.
University of Edinburgh, Edinburgh, Scotland, Fall, 1974, no degree.
Oxford University, Oxford, United Kingdom, 1976–1979, D. Phil., 1979.

9. Employment record: List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.

Self-employed, Ashton Carter LLC—Sole proprietorship, Washington, DC, 2014–Present.

Deputy Secretary of Defense, 2011–2013; U.S. Department of Defense—Washington, DC.

Under Secretary of Defense for Acquisition, Technology & Logistics, 2009–2011; U.S. Department of Defense—Washington, DC.

Chair, International & Global Affairs faculty, 2006–2009 (on leave of absence 2009–2011); John F. Kennedy School of Government, Harvard University—Cambridge, MA.

Ford Foundation Professor of Science and International Affairs, 1996–2009; John F. Kennedy School of Government, Harvard University—Cambridge, MA.

Co-Director (with William J. Perry), Preventive Defense Project, 1997–2009; Harvard & Stanford Universities—Cambridge, MA.

10. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.

Member, National Council on Federal Labor-Management Relations (2012–2013).

Member, President's Management Council (2011–2013).

Member, White House Government Accountability and Transparency Board (2011–2013).

Chair, National Security Strategy and Policies Expert Working Group, Congressional Commission on the Strategic Posture of the United States, 2008–2009.

Member, Department of Defense Agency Review team, Obama-Biden Transition, 2008–2009.

Co-Chair, Review Panel on Future Directions for DTRA (Defense Threat Reduction Agency) Missions and Capabilities To Combat Weapons of Mass Destruction, 2007–2008.

Member, International Security Advisory Board to the Secretary of State, 2006–2008.

Member of National Security Advisory Group to Senator Tom Daschle, then Senator Reid, chaired by William J. Perry, 2005–2008.

Co-Chair, with Ronald Lehman, of Policy Advisory Group to Senator Richard Lugar, 2005–2008.

Member National Academy of Sciences Committee on Science and Technology for Countering Terrorism, 2001–2003.

Member, National Missile Defense White Team, 1998–2009.

Member, Threat Reduction Advisory Committee, U.S. Department of Defense, 1998–2002.

Member, Defense Science Board, 1991–93, 1997–2001.

Member, Defense Policy Board, 1997–2001.

Assistant Secretary of Defense for International Security Policy, U.S. Department of Defense, 1993–1996.

Member, National Academy of Sciences, Committee on International Security and Arms Control, 1990–1993.

Member, Sandia National Laboratory, President's Advisory Council, 1992–93.

Member, Congressional Office of Technology Assessment, Advisory Panel on START Verification Technologies, 1991–92.

Member, National Academy of Sciences Panel on National Security Export Controls, 1990–91.

Member, National Research Council Naval Studies Advisory Committee on the Future of the Aircraft Carrier, 1990–91.

Member, White House, President's Council of Advisers on Science and Technology, Panel on National Security, 1990–91.

Member, Defense Science Board Task Force on New Scenarios and Intelligence, 1990.

Member, Congressional Office of Technology Assessment Advisory Panel on START Verification Technologies, 1989–90.

Member, Joint Chiefs of Staff Advisory Group on the Future of U.S.-Soviet Military Relations, 1988–89.

Member, Commission on The Presidency and Science Advising, 1988.

Consultant, Bureau of Intelligence and Research, U.S. Department of State, 1986–1988.

Member, Advisory Panel on Military Uses of Space, Office of Technology Assessment, U.S. Congress, 1985–86.

Analyst, Program Analysis and Evaluation, Office of the Secretary of Defense, Pentagon, 1981–1982.

Analyst, International Security and Commerce Program, Office of Technology Assessment, U.S. Congress, 1980–1981.

Experimental Research Associate, Brookhaven National Laboratory, 1976.

Experimental Research Associate, Fermi National Accelerator Laboratory, 1975.

11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational or other institution.

a. Senior Executive, Markle Foundation, New York, New York, 2014–Present.

b. Distinguished Visiting Fellow, Hoover Institution and Lecturer, Freeman Spogli Institute for International Studies, Stanford University, 2014–Present.

c. Advisor, Box Inc., 2014–Present.

d. Advisor, Palo Alto Networks, 2014–Present.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable and other organizations.

a. Aspen Strategy Group, 1997–2009 (now emeritus member).

b. Council on Foreign Relations, 1989–present.

c. Fellow, American Academy of Arts and Sciences, 1989–present.

d. American Physical Society, 1976–present.

e. American Association of Rhodes Scholars, 1977–present.

13. **Political affiliations and activities:**

a. List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

b. List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

c. Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

None.

14. **Honors and Awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

(1) *Henry L Stimson Pragmatist and Idealist Award*, Stimson Center, 2014.

(2) *W. Stuart Symington Award*, Air Force Association, 2014.

(3) *Distinguished Public Service Medal*, Department of Defense (awarded five times), 1994, 1995, 2010, 2012, and 2013).

(4) *Joint Distinguished Service Medal from the Chairman and the Joint Chiefs of Staff*, 2013.

(5) *Nunn-Lugar Award*, Nuclear Threat Institute, 2011.

(6) *Defense Intelligence Medal*, from the Defense Intelligence Agency, 1998.

(7) *Forum Award*, American Physical Society, 1988.

(8) *Ten Outstanding Young Americans*, United States Jaycees, 1987.

(9) *Senior Scholar*, St. John's College, 1978–1979.

(10) *Best Participant Prize*, NATO Center for Subnuclear Physics, 1978.

(11) *Rhodes Scholar*, 1976.

(12) *Summa cum laude*, *Phi Beta Kappa* graduate, Yale University, with honors in medieval history and physics (B.A. 1976).

(13) *Andrew D. White Essay Prize in European History*, Yale University, 1976.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

Publications. Books.

Keeping the Edge: Managing Defense for the Future. Editor (with John P. White) and author of three chapters. Cambridge, MA: The MIT Press, 2001.

16. **Speeches:** Provide the Committee with two copies of any formal speeches you have delivered during the last 5 years of which you have copies and are on topics relevant to the position for which you have been nominated.

I have delivered a large number of speeches in my capacity as Deputy Secretary of Defense and Under Secretary of Defense for Acquisition Technology & Logistics, and, previously, as Chair of the International and Global Affairs Faculty at Harvard’s Kennedy School of Government. Since leaving the DOD in 2013, I have delivered one formal speech, the Fubini Lecture indicated below and several times have delivered informal remarks. In these cases, I have delivered these speeches using no notes, or using hand-written notes that have not been archived. Almost all of those speeches are derived from, or form the basis of, written publications or testimony, and their content can be found in my response to the previous question.

1. Remarks to Steel Tube Institute of America, Coral Gables, Florida. 17 November 2014.

2. Remarks to JMI Equity CEO Conference, Baltimore, MD. 2 October 2014.

3. Remarks to Barclays Geopolitical Risk and Defense Policy Roundtable, Washington, DC. 7 September 2014.

4. Remarks at Aerospace Corporation Board Dinner, Rancho Palos Verdes, California. 12 June 2014.

5. Fubini Lecture, MIT-LL. Boston, MA. 29 May 2014.

6. Remarks at Ashton Carter’s official farewell ceremony. Pentagon. 2 December 2013.

7. Troop Talk at U.S. Consulate. Herat, Afghanistan. 14 September 2013.

117. Remarks at Aviation Week's R&D Technology & Requirements Conference. Washington, DC. 16 February 2011.

118. "The Defense Industry Enters a New Era." Remarks to Cowen Investment Conference, New York, NY. 9 February 2011.

119. Remarks at Center for American Progress Conference, "A \$400 Billion Opportunity: 10 Strategies to Cut the Fat out of Federal Procurement." 16 November 2010.

120. "Acquisition Process." Remarks before the Air Force Association Conference. 15 September 2010.

121. "Remarks at Navy League Sea-Air-Space Exposition, Gaylord Convention Center, Washington, DC. 4 May 2010.

122. Remarks at Defense Logistics Modernization Conference. Center for Strategic and International Studies. 2 April 2010.

123. Remarks at 38th IFPA-Fletcher Conference on National Security Strategy and Policy, "Air, Space, and Cyberspace Power in the 21st Century." 20 January 2010.

17. Commitments regarding nomination, confirmation, and service:
(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

- Yes.
- (b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?
No.
- (c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?
Yes.
- (d) Will you cooperate in providing witnesses and briefers in response to congressional requests?
Yes.
- (e) Will those witnesses be protected from reprisal for their testimony or briefings?
Yes.
- (f) Do you agree, if confirmed, to appear and testify upon request before this committee?
Yes.
- (g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?
Yes.

[The nominee responded to Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

ASHTON B. CARTER

This 13th day of January, 2015

[The nomination of the Honorable Ashton B. Carter was reported to the Senate by Chairman McCain on February 10, 2015, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on February 12, 2015.]

**NOMINATION OF MR. PETER K. LEVINE TO BE
DEPUTY CHIEF MANAGEMENT OFFICER,
DEPARTMENT OF DEFENSE**

TUESDAY, APRIL 21, 2015

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:32 a.m. in room SH-216, Hart Senate Office Building, Senator John McCain (chairman) presiding.

Committee members present: Senators McCain, Inhofe, Ayotte, Cotton, Rounds, Ernst, Tillis, Reed, McCaskill, Manchin, Donnelly, Hirono, and King.

OPENING STATEMENT OF SENATOR JOHN MCCAIN, CHAIRMAN

Chairman MCCAIN. All right, Peter. We have done enough schmoozing.

This committee is always gratified to be in a position to help the Senate confirm nominees that previously distinguished themselves as esteemed members of its staff. That is why I am especially delighted to welcome Peter Levine who appears before us today as the President's nominee to serve as Deputy Chief Management Officer [DCMO]. I would also like to welcome his wife Mary Ellen and his son Daniel. We thank you both for lending Peter to his country in service once again.

Having served as staff director and before that as general counsel to the Senate Armed Services Committee [SASC], Peter has gained keen insight into how the Department of Defense [DOD] operates and how it is managed. He has an in-depth understanding of the challenges that confront its senior most managers and ensuring that the Pentagon provides our Nation's defense effectively and responsibly. Peter also knows how inherently challenging the position of DCMO is. He has seen how the Department does business, especially in the area of financial improvement and business transformation, critical areas over which the DCMO has a critical oversight role.

Peter, the task lies ahead of you. Few people outside Washington truly appreciate the challenge that the Department faces in the area of management, business transformation, and financial management. Measured by dollars, people, or global missions, the Department of Defense is quite possibly the largest, most complex single organization in the world. With this size and complexity comes difficulties in management. The Comptroller General, Congress'

independent watchdog, has continually listed DOD as high risk and vulnerable to fraud, waste abuse, and mismanagement.

The Department of Defense is unique in that it is the only large Federal agency that cannot even undergo a financial statement audit of its balance sheet. This committee, with Mr. Levine's help, has spent a great deal of time and energy working on specific challenges at DOD in the areas of weapon systems acquisition, business transformation, IT [information technology] system implementation, financial management, and supply chain management. To date none of these risk areas have been removed from GAO's [the Government Accountability Office] high risk list, but I am optimistic that with Mr. Levine's leadership and partnership with this committee we will make great progress which will benefit both the warfighter and the taxpayer.

While efforts to improve business systems, cut costs, and find waste at the Department of Defense are used to identify savings, it is also to gain knowledge and understanding about how the Department works. Former Secretary of Defense Robert Gates said back in 2011, "The current apparatus for managing people and money across the DOD enterprise is woefully inadequate." That came from the Secretary of Defense at the time. He went on to say it was, "nearly impossible to get accurate information and answers to questions such as how much money did you spend and how many people do you have."

Secretary Gates also mentioned that the result of these shortfalls in information was that he could not measure results or make judgments about priorities for the military. There is something very wrong when the Secretary of Defense cannot get answers to simple questions or know how or whether the agencies under his control achieve their intended results.

Fixing these weaknesses and improving the management of the Pentagon is not the job of any one person. All Pentagon leaders must be invested in this work from the Secretary on down, and Congress must never forget its critical role in this area. But this work goes directly to the heart of what the Deputy Chief Management Officer is all about, empowering the Secretary of Defense with timely and accurate information to assess whether the Department is achieving its goals, streamlining bureaucracy and cutting through red tape to enable the Military Services to put their full effort toward achieving their missions, not filling out paperwork, and holding leaders accountable for failing to change or adopt better practices, while at the same time rewarding managers who learn from mistakes and succeed in transformation.

Peter, this is no small task, but I assure you that, if confirmed, you will have a committed partner in this committee.

Again, I thank the witness for his willingness to serve and look forward to hearing from the witness on this important matter.

This committee has the well-deserved reputation for acting 99 percent of the time in a bipartisan fashion. A lot of that comes from the interaction between the staffs on both sides of the aisle, no matter who is in the majority. Peter, over many years as service to Senator Levin as well as other members of this committee, you have made a significant contribution to maintaining that environ-

ment of bipartisanship, not to mention though, however, that you and I have had spirited conversations on occasion in the past.

Senator Reed?

STATEMENT OF SENATOR JACK REED

Senator REED. Thank you very much, Mr. Chairman. Let me echo your comments about the spirit that Peter has helped keep alive, and I know he will continue to do that at the Department of Defense.

I want to welcome Peter and Mary Ellen and Daniel. Thank you very much.

One indication of success that the people that you led are strongly behind you—literally they are because the entire Democratic PSM [professional staff members] staff is here for this hearing to cheer you on and secretly send messages to you so that you get the answers right.

[Laughter.]

Senator REED. The chairman has gone into great detail and very accurate detail about the incredible contributions you have made to the committee. You originally came in 1996. You have been the general counsel, the staff director. You have been a trusted advisor to Senators on both sides of the aisle. You have been a mentor to the professional staff. You have made us all a little wiser and a little better prepared to face the challenges of a very difficult and dangerous world.

Many of the pieces of legislation that you worked with have profoundly reshaped the Pentagon, and there is a lot more that has to be done. You have been a major force in developing Government-wide procurement reform initiatives—for the Pentagon, I should say—including the Weapon Systems Acquisition Reform Act of 2009. That was really due to your staff efforts with the leadership of Senator Levin and Senator McCain. This was a tribute to their vision, as well as your efforts.

You have developed mechanisms to streamline the Department's workforce to help the Pentagon to maintain this workforce. You have also led efforts in the Senate to combat waste, fraud, and abuse in the Pentagon acquisition, stretching back to your days not just on this committee but when you were on the Government Affairs Committee.

We will miss you, your knowledge of the laws, your analytical ability, your determination, your professionalism. But we will recognize that we are benefiting and the Pentagon is benefiting and the Nation is benefiting from those skills in your new position as Deputy Chief Management Officer for the Department of Defense.

The DCMO position is charged with improving the management of the Department of Defense and it does need improvement. As such and especially in these constrained budget times, you will be challenged to support warfighters while making very difficult choices about eliminating low priority functions, cutting costs, but maintaining capacity and, in fact, enhancing capacity. Those are very difficult, in fact sometimes contradictory, challenges. You will be charged with leading the modernization efforts, and we have every confidence you will do it well as you have done everything well.

We look forward to working with you.

Again, let me thank the chairman for scheduling this hearing. Mr. Chairman, thank you.

Chairman MCCAIN. Thank you.

Before your statement, as you know, there are standard questions that have to be answered for the record, which I will go into now.

In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress be able to receive testimony, briefings, and other communications of information. Have you adhered to applicable laws and regulations governing conflicts of interest?

Mr. LEVINE. I have.

Chairman MCCAIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

Mr. LEVINE. I have not.

Chairman MCCAIN. Will you ensure that your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Mr. LEVINE. I will.

Chairman MCCAIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

Mr. LEVINE. I will.

Chairman MCCAIN. Will those witnesses be protected from reprisal for their testimony or briefings?

Mr. LEVINE. Yes.

Chairman MCCAIN. Do you agree, if confirmed, to appear and testify upon request before this committee?

Mr. LEVINE. I do.

Chairman MCCAIN. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Mr. LEVINE. I do.

Chairman MCCAIN. Please proceed.

STATEMENT OF MR. PETER K. LEVINE, NOMINEE TO BE DEPUTY CHIEF MANAGEMENT OFFICER, DEPARTMENT OF DEFENSE

Mr. LEVINE. Mr. Chairman, Senator Reed, members of the committee, first let me thank you for those very generous remarks that you made at the outset.

You are absolutely right about the challenges, management challenges, facing the Department of Defense. As I, if confirmed, take those on, it will be a great comfort to know that this committee is supportive of that effort.

It is my pleasure to appear before you today as the President's nominee for the position of Deputy Chief Management Officer of the Department of Defense. I would like to thank the President, Secretary Carter, and Deputy Secretary Work for selecting me for this position.

I would also like to thank my wife Mary Ellen and my son Daniel, both of whom are with me today. I mention them for all their love, support, and understanding over the years, and I would not be here without them.

This committee established the DCMO position in an effort to address the broken business practices and bureaucratic inefficiencies that caused DOD management programs and support functions to take too long, cost too much, and produce less than optimal results.

I believe that an active DCMO, with the support of the Secretary, Deputy Secretary, can make a real difference. If confirmed, I will strive to institute more effective management practices and take on the waste and inefficiency that needlessly squander the taxpayers' money and the Department's resources.

Mr. Chairman, it has been my privilege and honor to serve on the staff of the Armed Services Committee for almost 20 years. I could not have asked for a more rewarding place to work, for better people to work with and for, or for a better learning experience. I thank all of you, members and staff, for that.

I know that I have more to learn, but if confirmed, I will bring a piece of the Armed Services Committee with me to the Department of Defense.

That concludes my opening statement, and I look forward to your questions.

[The prepared statement of Mr. Levine follows:]

PREPARED STATEMENT BY MR. PETER LEVINE

Chairman McCain, Senator Reed, Members of the Committee—Thank you for scheduling this hearing. It is my pleasure to appear before you today as the President's nominee for the position of Deputy Chief Management Officer (DCMO) of the Department of Defense.

I would like to thank the President, Secretary Carter, and Deputy Secretary Work for the confidence they have shown in selecting me for this important position. I would also like to thank my wife Mary Ellen and my son Daniel, both of whom are here with me today, for their understanding and support over the years. I would not be here without them.

This committee established the DCMO position in an effort to address the broken business processes and bureaucratic inefficiencies that cause DOD management programs and support functions to take too long, cost too much, and produce less than optimal results. The committee also expected the DCMO to help the Department develop and implement the sound business systems and practices that will be needed to produce an auditable financial statement.

I understand that the Deputy Secretary of Defense has directed the DCMO to conduct a review of the organizations and business processes of the Office of the Secretary of Defense (OSD) and the defense agencies, with the objective of streamlining organizations and improving business processes. I do not believe that there are any significant management processes in the Department of Defense that cannot be streamlined and made more efficient.

Making process improvements will be difficult and time-consuming and may require changes to the culture of the Department. However, I believe that significant improvements are not only possible, but essential to enable the Department to reduce the size and composition of its management headquarters and achieve needed savings without creating bottlenecks that would undermine the mission. If confirmed, I will devote my fullest effort to this project.

Mr. Chairman, it has been my privilege to serve on the staff of the Armed Services Committee for almost twenty years. I believe that this committee is unique in the Senate because of its productivity, having produced a National Defense Authorization Act every year for the last 53 years. It is unique because of its tradition of bipartisanship, with Members and staff on both sides working together to solve common problems. And it is unique because of its dedication to a common purpose—doing what is best for our men and women in uniform and the national defense.

If confirmed, I pledge to bring this spirit of productivity, bipartisanship, and dedication to our men and women in uniform with me to the Department of Defense.

Mr. Chairman, that concludes my opening statement. I look forward to your questions. Thank you.

Chairman MCCAIN. Thank you very much.

The issue of continuing interest to this committee, as you know, is the inability of the Department of Defense to pass a financial statement and audit. The current audit deadline is, starting in 2017, that DOD will be audit-ready. Do you think that is going to be the case?

Mr. LEVINE. Mr. Chairman, I have always tried to be honest with members of this committee and give my best assessment, and I have always been skeptical that the 2017 deadline will be met and I cannot change my stripes just because I am sitting down here at the witness table.

Chairman MCCAIN. Why do you think that they have never been able to do that? People ask me that all the time.

Mr. LEVINE. Looking at the problem of an auditable financial statement for the Department of Defense, you have to keep in mind that it is the biggest entity in the world. We have hundreds of millions of transactions every year and billions of historic transactions. An individual taxpayer or a small business may be able to put their receipts in a shoebox and add them at the end of the year and balance their books, but an entity the size of the Department of Defense simply cannot do that. We have to have systems and processes in place that work and that produce good financial information, and when we get those systems and processes in place, it will not only provide us an auditable financial statement, but it will answer that question that Secretary Gates had about why he cannot get good answers to his questions when he needs to make a decision.

I think we have made significant progress really going back to when Deputy Secretary England took this on as a challenge in about 2005 when he became Deputy Secretary. I think that Mr. Hale as Comptroller continued that effort, and I think that it is now foreseeable to me that we can get to an auditable financial statement. I just do not believe we will make it by 2017.

Chairman MCCAIN. As you remember, a couple years ago, as part of not the Department of Defense but my role—and I was a member of the Permanent Subcommittee on Investigations—we discovered that the Air Force spent over \$1 billion, many years of mismanaging what was supposed to be a commercial, off-the-shelf system. It was known as the expeditionary combat support system [ECSS]. No one was held responsible. What do I tell the taxpayers at the next town hall meeting that we wasted \$1 billion on a program that never even begun at all, and no one was held responsible? What is your solution to that?

Mr. LEVINE. Senator, first I worked with your staff on that review.

Chairman MCCAIN. I remember.

Mr. LEVINE. I share their views and your views of that. It is absolutely unacceptable. What I will say is the failures that you identified in your report on ECSS, lack of planning, lack of a firm requirement, changing requirements, lack of commitment to the com-

mercial nature of the system, are systemic problems that we have in the acquisition of business systems for the Department of Defense, and we created the DCMO in part to make sure that that does not happen.

Chairman MCCAIN. I take it that one of your priorities is going to be to hold people responsible because just your appointment is not going to eliminate those.

Mr. LEVINE. It will be one of my jobs to review business system programs for the Department of Defense to make sure that they are doing the planning that they need to do, that they have the governance processes to make sure this does not happen again.

Chairman MCCAIN. Does that mean you are going to hold people accountable?

Mr. LEVINE. Senator, the people that need to be held accountable do not actually report to the DCMO. So it will be the job of—

Chairman MCCAIN. Will you identify them?

Mr. LEVINE. Yes. Yes, Senator, I will help identify people who need to be held accountable. I think that is a fair—yes.

Chairman MCCAIN. Thank you.

In a recent audit, GAO noted that a majority of major IT programs did not—and we know how important in this day and age IT programs are—establish baseline costs and schedule estimates within 2 years of program initiation. In fact, it took over 5 years and nearly half a billion dollars to be spent before baseline costs and schedule estimates were created for 12 major IT systems.

Is the IT system issue not of highest importance?

Mr. LEVINE. I will make it an issue of the highest importance. Yes, Senator.

Chairman MCCAIN. Do you think you can fix the problem?

Mr. LEVINE. I think we can do far, far better than we have done, and we need to do far, far better than we have done.

Chairman MCCAIN. Will you have the confidence of the Secretary of Defense?

Mr. LEVINE. I believe that I will, yes.

Chairman MCCAIN. Good.

As you know, from time to time, as a member of the staff of this committee, we have been frustrated with sometimes the lack of complete and timely information from the Department of Defense, and I hope that you will also make sure that we do receive that information in a timely and accurate fashion.

Mr. LEVINE. I have shared that frustration, and I will do my best to be as responsive as possible. I certainly understand the problem.

Chairman MCCAIN. Some of your comments I will keep on record to provide to you in case we do have difficulties in that area, Peter.

Mr. LEVINE. I appreciate that, Mr. Chairman.

Chairman MCCAIN. It was my beloved friend, Morris Udall, who once said the politician's prayer is that the words that I utter today be tender and sweet because tomorrow I may have to eat them. Thank you. [Laughter.]

Senator Reed?

Senator REED. Thank you very much, Mr. Chairman. Again, Peter, thank you for your service to Congress.

You were there in 2008 when this office was created. Briefly, can you give an assessment of what it has done positively and where are still the failings that it has not lived up to?

Mr. LEVINE. This committee was responsible for creating the position of DCMO, and it was created for the reasons that Senator McCain laid out in his opening statement, because the committee did not believe that Department was paying enough attention to the management issues that end up leading to waste and inefficiency and costing the Department so much money. It actually started with an amendment by Senator Byrd to create a second Deputy Secretary who was going to be a Deputy Secretary for management, and it evolved to where the Deputy Secretary would be the CMO [Chief Management Officer] and he would be assisted by a DCMO.

The idea was to elevate the issue of management within the Department and give it top level attention so that we could address some of these problems that just seemed to go on from year to year to year and never be solved.

There has been only one DCMO to date, one Senate-confirmed DCMO to date. I think she worked hard. I do not think she had the support at the top level of the Department that she needed to really take on some of these bigger problems. I have been assured that I will have that support, and I hope to have that support and I hope to take on the big management problems that have been of concern to this committee for so long.

Senator REED. Thank you.

Senator McCain alluded to in his questions about the IT systems. The Pentagon is the biggest enterprise in the world, but there are lots of big companies that are audited every year and they are pretty complicated and complex. I guess it begs the question, what can you learn from the private sector, not just studying them but adopting some of their mechanisms, getting advisors coming in who are management experts to tell you how you should do things differently at the Pentagon?

Mr. LEVINE. We need to do all of that. There are some mechanisms in the Department for doing that. There are some authorities we have given the Department to do that kind of thing, and the Department has not taken full advantage of the authority it has in that regard. We will want to bring in expertise from the private sector and do whatever we can to draw on that.

Senator REED. I know the Secretary has a business sort of advisors group. I do not know the official title.

Mr. LEVINE. The Defense Business Board.

Senator REED. I would assume you are going to be looking to them or work closely with them for advice and insight.

Mr. LEVINE. My understanding is that they are available to assist in these areas and to provide advice, and I hope that we will be able to draw on that advice. Yes, sir.

Senator REED. One aspect too here of the auditability and everything is that sometimes the fault is not in our stars but in ourselves, and some of the congressional requirements that we place make it very difficult to manage. Are you going to look also at the structures we give you to operate? We do not have the same type of capital budget, for example, in the Pentagon that you find in

most big, private enterprises. Are you going to be able to give us advice too about what changes we should make?

Mr. LEVINE. Senator Reed, I think there is an awful lot that can be done to improve the way the Department works without legislation. I think there are lots of ripe targets there. If I identify something that does need legislation or an area where we do need congressional help, of course I will come back to you and ask for that.

Senator REED. Just the final point and more of a comment than a question. Information technology is so critical to businesses today to be agile, to be proficient and productive, and some of the systems that you are operating are antiquated, to be kind.

Mr. LEVINE. I am hearing about COBOL-based systems and FORTRAN-based systems. Yes.

Senator REED. That is encouraging because those are the last computer languages that I learned in 1967 and 1969. So there is a place for me over there programming FORTRAN and BASIC.

[Laughter.]

Maybe I will withdraw the question.

[Laughter.]

But you know, you are right. You are looking at systems which are 20 years out of date, and the irony, of course—at least the perception that I have—is in the 1950s and 1960s and 1970s, the Pentagon was where the really spectacular information technology breakthroughs and automation were going on. It was business that was trying to catch up, and now it is completely reversed.

Mr. LEVINE. Particularly in the area of business systems, all of the initiative is now on the private sector side. You are talking about accounting systems or purchasing systems or personnel systems, those kinds of IT systems. The key is in order to make use of those, you need to address the problems that Senator McCain referred to earlier with the ECSS system where we tried to buy a commercial system but then we refused to change our processes. We ended up having to hire a squadron of computer programmers to try to reinvent a system that was working perfectly well in the commercial sector. What we need to do is to change our business processes so that they make sense and that they can be appropriately automated rather than automating an old process that really is not very efficient in the first place.

Senator REED. Thank you very much. Again, thank you for your service and your personal support systems in Congress.

Mr. LEVINE. Thank you, Senator Reed.

Chairman MCCAIN. Senator Inhofe?

Senator INHOFE. Thank you, Mr. Chairman.

You know, Peter, I find it difficult to believe the many, many years that I have personally had the honor of working with you I never met any of your family before. Mary Ellen, it is really nice to meet you. For the benefit of my fellow Senators up here, Daniel is at Harvard in computer science right now and he made a real sacrifice to be here today. You will be very much rewarded to know how much everyone thinks of your daddy because I do not recall anyone at any of these hearings who is more loved than he is.

In fact, the chairman said that 99 percent was nonpartisan in his past and talked about a few spirited conversations. I cannot re-

member any spirited conversations in the past that you and I have had.

Chairman MCCAIN. Peter can.

[Laughter.]

Senator INHOFE. No. That he and I have had. I understand that.

Even at the time with the Big 4, I remember 2 years ago with the Big 4, we got to know each other pretty well. It was really a great experience.

Anyone, if you just listen today to all of these people that are running for President of the United States, when they talk about the military and they talk about the Department of Defense, they talk about the Pentagon, they talk about waste, fraud, and abuse. In fact, that term was made by Senator Reed a minute ago. We hear a lot about that, and it is a very popular thing. But it seems like no one has ever really done anything about it maybe because we have never had anyone in this new position. I think the world of Beth McGrath, but she did not have the background that you do.

Now, you have been in the trenches. You know these problems that exist. It is going to be a real tough thing for you to do. In reading the mission statement here, it said in 2008 DOD formally chartered the office of DCMO to better synchronize, integrate, and coordinate the business operations of the Department and ensure the optimum alignment and all that stuff. If there is anyone who has a background that is more conducive to that, it would be you.

In your opening statement, you said that reductions should not take the form of across-the-board cuts. Cutting personnel without improving management processes or divesting functions will result in fewer people to do the same work, creating bottlenecks and backlogs that are counterproductive to the mission of the Department.

I think everyone knows the easy thing to do is the meat axe approach. Then it is somebody else's problem. But you are going to have to—and you have already done this—deal with OSD [the Office of the Secretary of Defense], deal with the combatant commands. When they come and testify here or the ones that we talk to in the field, and they talk about what they could do, sometimes it is just not something that is really easy in our system.

Does anything come to your mind now on how you are going to be able to focus these cuts and these efficiencies that we are depending upon you to do that specifically you are going to dive right in? You know the job, and you know about this from a position of knowledge. What are you going to be doing?

Mr. LEVINE. Senator, you know I have never shied away from taking on a difficult problem. If confirmed, in the near future I will have about a year and a half to work with, and I figure I have to take on some very specific targets to identify five or six priorities to go after. The Deputy Secretary has already asked the DCMO to review the organization of OSD and to look for places where we have redundant or superfluous organizations, and we will continue that. I have a couple of areas that I want to look at specifically.

I think the acquisition decision-making process is incredibly inefficient, and it has to be improved and it is not only too costly but it slows things down in a way that is counterproductive.

I think that the civilian personnel system can be dramatically improved. We need to streamline processes and we need to look at organizations and make that process more efficient and less costly.

There are several others like that, but I think that what I am going to have to do is to target specific issues and go after them and I intend to do that.

Senator INHOFE. In a comment you made—I do not know if it was a response to a question or your opening statement. I cannot remember, but you talked about the one person who was predecessor in this job sometimes may not have had the support of the top management. I am going to ask you that if you run into that, you can come to us because I do not recall having heard from that office before that there were some problems. I would say this—and I think everyone here looking at it up here at this table—that if you are not getting the full support, there is one thing you can do about it and that is come to us and we will make sure you do get the full support. Is that all right?

Mr. LEVINE. Yes, absolutely, Senator. I think that that is something that will help as I have to work with under secretaries and tell them that we are going to have to take on issues in their organizations or chiefs or deputy chiefs of staff. If they understand that the committee stands behind that and really wants these efficiency measures and really wants to make improvements necessary, that will be very helpful. Thank you.

Senator INHOFE. That is good because they are going to have to know that we are behind you.

Thank you, Mr. Chairman.

Chairman MCCAIN. Senator Hirono?

Senator HIRONO. Thank you, Mr. Chairman.

I was looking at the advance policy questions that have been submitted to you, and the first question is what is your understanding of the relationship between the Deputy Chief Management Officer and each of the following. I noted that there were at least 14 sets of individuals and their offices, everybody from the Secretary of Defense to the business transformation offices of the Military Departments. That is a lot of people that you are attempting to work with to do the kinds of modernization that you have told us you want to do.

How many people do you have in your office to help you deal with 14 individuals and offices?

Mr. LEVINE. I cannot remember. I think the staff of the DCMO is about 100 people.

What I would say is, first of all, in listing all those people that the office has to deal with, your staff was very good and very thorough in putting together those advance policy questions.

Second, I do think I have something of an advantage in taking it on in that from my work with the committee, I already know all those people that I will have to interface with and have worked with them over the years. I think that that will put me in a position to do that.

Senator HIRONO. I think those relationships are critical because anytime that you are dealing with folks who are already in place who are supposed to be doing many of the things that you are doing within their own Services, without that kind of relationship,

they do not necessarily have to listen to you. I commend you for that.

Now, going to acquisition reform, you said that it obviously needs to be much more efficient and less costly, and you said you would target specific issues in the area of acquisition reform and go after those. Could you tell us what your first specific target issue for acquisition reform would be?

Mr. LEVINE. I need to be careful here because the Under Secretary of Defense for Acquisition Technology and Logistics is the acquisition policy official for the Department of Defense. The DCMO has a role here, as in other areas, in looking at process. We had a GAO report that the committee received recently that indicates that for a program manager of a major program in the Department to get a milestone decision can take 2 years and 2,000 man-hours. They may have to go to 200 different offices to get their approval. That kind of process where you have to go to all these different offices—the program managers should not have to do that. They are spending all their time briefing people and changing slides to get approval rather than working on the substance of the program. I think that process—without changing the acquisition policy, which this committee will do, the Under Secretary for Acquisition Technology will decide what the policy is. The process can be significantly improved, and I hope to work with Frank Kendall and others in the Department to do that.

Senator HIRONO. I am really hopeful that you will be able to move the ball because I know that the chairman has had all kinds of questions, as have many of us, regarding acquisition reform. It is not exactly transparent. For example, if you would be looking at things like contracts, the kind of contracts we put in place, the requirement process. Would you agree that the more specific we are as to what it is we want, that would limit the changes that we make that just add to the cost? There is a whole range of things that are very specific to the acquisition process, complicated as it is.

Mr. LEVINE. Yes, Senator. There are a whole range of things like that that need improvement. This committee has made significant strides in the past, and I understand that the chairman has made it a priority to address that issue again this year. I know it continues to be a priority for the Department, and I will make whatever contribution I can if confirmed.

Senator HIRONO. We have had questions relating to cybersecurity. I think that is one of these most vulnerable areas of vulnerability across departments. Can you talk a little bit more about how you would make sure that DOD addresses its cybersecurity needs in an appropriate way?

Mr. LEVINE. I should defer that question to my son who is the IT expert in the family.

[Laughter.]

The DCMO works closely with the Chief Information Officer (CIO), of the Department who really is more the technology person, the IT technology side. The DCMO is more on the business process side. If confirmed, I would work closely with Terry Halvorsen, who is the Chief Information Officer of the Department and is heavily focused on cybersecurity issues. One of the things that you look at

in the chaotic systems environment the Department has where we have so many different systems run by so many different people is that that presents too many targets. One of the things that Mr. Halvorsen is working on is streamlining that system, consolidating, which not only enables you to be more efficient and have a better business process but also should enable a more secure environment.

Senator HIRONO. Thank you.

Thank you, Mr. Chairman.

Mr. LEVINE. Thank you, Senator.

Chairman MCCAIN. Senator Rounds?

Senator ROUNDS. Thank you, Mr. Chairman.

Mr. Levine, I understand that you have been here for a long time, a lot longer than I have been. It would appear to me that before you would have made a major change moving from this side to that side, that you would have had a number of conversations with the individuals who will employ you and you would have had discussions about your capabilities and your ability to actually get the job done. I would like to explore just a little bit.

You have indicated that, number one, as the DCMO you are going to be responsible for the processes, but I am just curious. In the discussions that you have had to convince you to want to do this job in the first place and one that I suspect might make you more frustrated than a former Governor coming into the U.S. Senate is—

[Laughter.]

Senator ROUNDS.—what did you receive in terms of an assurance of resources available to you, the assurances themselves that you would have the ability to get in and actually look at the different processes, open access, and finally your access to the guys who can hire and fire and make a difference? What types of discussions and where are you at right now in that process?

Mr. LEVINE. When the Deputy Secretary, Secretary Work, talked to me about the job and asked me if I would do it, I said, so you want to make me the most unpopular person in the Pentagon. He said, yes, and I will be right there with you. That was the assurance that I needed that he understood that what the DCMO has to do is to go into basically other people's rice bowls and tell them they are not doing it right and they need to do it differently, and that is never going to be something that is popular in any organization and certainly not an organization like the Pentagon. He understands that that is what the DCMO needs to do and he said he stands fully behind it and will be absolutely supportive of it.

I did not get any assurance of more resources, and I do not think that that would have been an appropriate—if there is some specific project that needs something, we will try to find resources within the Department and available resources. But I think that building a new office or a new bureaucracy is not the way you fight bureaucracy. We need to make use of the resources we have and not create some new structure to try to do that.

Senator ROUNDS. Do you believe the resources that are available to you will be capable? Do you have the resources available to make a dent?

Mr. LEVINE. Senator, I do not believe that the resources of the DCMO office alone are sufficient. I do not think that any one office could be sufficient for that. What I believe is that with the commitment of the Deputy Secretary, I will be able to draw on other offices in the Department and other expertise in the Department. For example, if we are going to look at acquisition, we are going to have to work with the acquisition people, with Frank Kendall and his organization, and the Service acquisition executives and their organizations. They do have expertise, and we are going to have to draw on that expertise. We are going to have to draw on expertise from the private sector through the Defense Business Board and other mechanisms that are available to do that. I think there are mechanisms to provide the support that we need and to provide the resources we need, but I do not think the answer is to build a huge new office.

Senator ROUNDS. You indicated that when we talk about the chain of command, specifically you felt comfortable coming back to us. Do you think that under the current chain of command and the responsibility that you have to those individuals that will be your superiors, that you have access and that you believe you can come directly to this committee and ask for the resources or the assistance to get something done?

Mr. LEVINE. I think that the Secretary and Deputy Secretary understand very well where I am coming from and the background that I have and understand the relationship I have with this committee and look at that as a positive rather than a negative. Yes, I do think that is the case.

Senator ROUNDS. Thank you, sir.

I yield back.

Mr. LEVINE. Thank you, Senator.

Chairman MCCAIN. Senator McCaskill?

Senator MCCASKILL. So many questions, so little time.

Mr. LEVINE. Senator, it is very strange to see you all from this side.

Senator MCCASKILL. I can imagine.

Mr. LEVINE. I am seeing you face to face for the first time, rather than seeing the back of your head.

Senator MCCASKILL. I can imagine. My swivel, where I go first to Jason and then to Peter—I do not know how this is going to work out.

First, I want to talk about the audit stuff. I was really disappointed when I found out in March that they have pulled the clean audit finding from the Marine Corps.

Mr. LEVINE. Yes, Senator.

Senator MCCASKILL. People that have been at this longer than I have, but I have certainly since the day I got here tried to figure out, coming in as a former auditor, how in the world we had gotten to the point that the Department of Defense was incapable of being audited.

My false sense of optimism that the Marine Corps had finally come up with a clean audit, to now have it pulled because we found out about these suspense accounts at the Department of the Treasury, and now not only do we not have a clean audit of the Marine

Corps, that is going to call into question the ability of us to get clean audits anywhere.

Briefly, can you give me any sense of what we can do about fixing this suspense account problem at the Department of the Treasury for all of these commingling of funds that sound like to me funds that are looking for an appropriation but have not found them?

Mr. LEVINE. Senator, I do not know the answer to that.

Now, I do know that one of the even more troubling things about the Marine Corps audit is that I believe that it was a 2011 clean audit that got the clean opinion, which means that we have done 2012, 2013, and 2014, and now we are told that we have the problem. Not only is the 2011 audit not good, but that means that the subsequent audits would not be good either. I do not know why it took us 4 years to get to the point where that problem was discovered.

Senator MCCASKILL. Could you find the answer to that question?

Mr. LEVINE. Yes, Senator. If confirmed, I will look into that and get back to you on that.

Senator MCCASKILL. I would really like to know the answer to that because the fact that it took them years—I cannot figure out why this is so hard.

Mr. LEVINE. It seems to me that if there was a problem with the 2011 audit, we should have known that in 2012, and we would have been working on it for 3 years by now and figuring out how to get traceability and fix it. We should not be hitting the point in 2015 where we learn about the problem. All I can say is I do not understand it, and if confirmed, I will look into that and get back to you about it.

Senator MCCASKILL. I also want to make a comment that I am hopeful that no matter who gains the White House in 2016, regardless of which party, that I am hopeful that the work that you have done on this committee will serve you well and hopefully the next commander in chief would want to utilize continually your expertise that you have. You just start so much further down the line than anybody else who would take this job because of your incredible working knowledge of the labyrinth that is the process of acquisition and how they spend money and the way they mess it up. I just hope that you stick around.

I know you cannot get this done in a year and a half, but I am still going to keep banging about this contractor manpower thing. We had the hearing back in 2012. You remember it. In July of last year, I sent a letter to the Department asking for specific information about the implementing of a department-wide contractor manpower reporting application. We have to know what we are buying through contractors, and we need to know it department-wide. We cannot evaluate whether or not we are getting a good deal with contractors or a bad deal with contractors if we do not even know how many contractors we have. I really would like you and would like a commitment from you today that you would at least help me figure out what the stall is here. Why is this so hard? If you would comment on that, I would appreciate it.

Mr. LEVINE. Yes, Senator. We have this requirement for a contractor inventory, for an inventory of the service contractors work-

ing for the Department. I know this is an issue that is important to Senator Manchin as well.

There is an inventory system in place. It does produce a number. I checked yesterday and I was told that the number of service contractors we currently have working for the Department of Defense is 629,000. In fact, it was not just 629,000. It was 629,000 and so many hundred and such. It was a very precise number.

The problem, now that I have told you that there is a number, is accuracy as with so many of the Department systems. Contractors are hard to count, and the universe of contractors is hard to define because when you are doing service contracts, we have times when we hire service contracts by the person, and so we have a number of people. You also have places where you hire for a result. If you have an elevator maintenance contract, you do not care whether you have six people working on it or five. You are contracting to have the elevator operating. We have places where it is easier to count and places where it is harder to count.

We have different systems of counting in the different Military Departments. The Army has a system where they go out and they put as a term of all their contracts with service contractors, you have to tell us how many people you working on it. The other Military Departments have a conversion factor where they say we are spending this number of dollars. We figure it must be this number of people.

The number sounds very precise, but it is a lot less precise than it sounds because of the techniques that they use to gather that information.

Senator MCCASKILL. Exact numbers may not be as important as the ability to compare apples to apples, branch to branch, Service to Service, whether or not we are getting value. If the elevator operators that are maintaining elevators in the Army are making three times as much as the elevator operators that are maintaining elevators for the Navy, we need to know that. That is why this inventory is so important.

Mr. LEVINE. You need to have more information, not just about how many you have but how you are hiring them and whether you are hiring them in the right way. Yes, Senator, I agree.

Senator MCCASKILL. Okay. Get to work. We will be watching.

Mr. LEVINE. Thank you, Senator.

Chairman MCCAIN. Senator King, can you follow that act?

Senator KING. Thank you, Mr. Chair.

Peter, I would like to talk about two versions, one about personnel and the other about purchasing and contracts, which we have been talking about.

Often I think it is as much about process as it is policy. An example of this is personnel management. What do you think about human resources [HR] reform within the Department of Defense, and what can Congress do to help facilitate more efficient HR practices?

Mr. LEVINE. The Defense Business Board reported earlier this year that the human resources area is an area where they think that there are significant efficiencies that can be achieved by the Department, that it is an area where we have too many layers of management, too many managers with a small span of control. You

have one person, for example, managing three people, and those people managing five people. You have too many layers of middle management. That is something we are going to have to look at.

We are also going to have to look at efficiencies of specific processes. We have a civilian hiring process, and I am told it takes at least 6 months and maybe 8 months or more to hire a single individual to work at the Department of Defense. That is just crazy. You lose some of the most talented individuals you are trying to hire because you cannot offer them a job even though you know you want them to come work for you.

Senator KING. This is a problem throughout Government.

Mr. LEVINE. It is a problem throughout Government.

Senator KING. When you layer on the security clearance part, it could go up to 2 years.

Mr. LEVINE. Yes. The security clearance is hard to deal with. There are changes that we are looking at in that area that this committee has asked the Department to look at with what is called a continual security clearance process.

But I think there are significant improvements also that can be made in the hiring process, and this relates to the issue of sort of too much bureaucracy. If you add in extra layers, then your different human resources offices spend time negotiating with each other instead of getting the job done, and we need to cut out some of those middle boxes and simplify the process.

Senator KING. I take it that you see this as part of your responsibility to build a team to tackle this particular problem?

Mr. LEVINE. Absolutely, Senator.

Senator KING. We have talked about contracting and procurement. I have a modest suggestion that I utilized when I was Governor, which is pick some typical cases. Take five or six different cases from the mundane—you know, Fort Bragg needs five new sinks in their kitchens to acquisition of a tank or something larger—and ask your people to prepare a chronology of all the steps necessary so that you can see it. Rather than talking in the abstract, you are saying, okay, why did it take 12 approvals to buy a sink? The same thing with services. I have found they can blow the smoke at you when you are talking in generalities, but when you say why did it take this long to get this printer in this office—specific cases.

I used to also call the 800 numbers for the public and see who answers, how long does it take, what do they tell you. I will never forget calling the tourism office in Maine. Everything went fine until they said we will send you a brochure in 3 to 6 weeks and it was June. In 3 to 6 weeks in Maine, the summer is over.

[Laughter.]

Senator KING. The point is you learn from reaching into in a direct kind of way. I hope you will try out some of those.

Mr. LEVINE. Senator, I am going to have to chose my targets carefully with a limited amount of time, but one of the targets I hope to chose is the acquisition process and particularly the acquisition milestone decision-making process that we use for major weapon systems. I think you are exactly right, that what we are going to need to do is we hear that program managers have to go

to 200 different offices we are going to have to document for several programs.

Senator KING. Take a real life case.

Mr. LEVINE. It may be one from each of the services or something. Who is it you have to go to? What does this process actually look like when you diagram it so that we can say you cannot do that anymore. It cannot be that complicated.

Senator KING. This may be a moment in time where the stars are literally aligned, starting with the chairman of this committee to Ash Carter to Frank Kendall to you. That is a very special constellation of people who are very aware of this problem and that it has to be addressed. We may not have an opportunity like this for years. I hope that you will be a real irritant on this subject. As I mentioned to you yesterday, you do not want to look back 10 years from now and say, gee, I wish I had pushed on this.

Mr. LEVINE. Senator, some people tell me I am too good at being an irritant. But, yes, I will do my best.

Senator KING. I had that experience once in a court where I said, Judge, I do not want to beat my head against a stone wall. He said, Attorney King, I know of no one in Maine better qualified for that. [Laughter.]

I appreciate your willingness to take this on, and I do hope you will view this as an extraordinary opportunity. Working with a great team, and with the support of this committee, I think some good things can be done for America both in terms of security and in terms of our taxpayers. Thank you.

Mr. LEVINE. I appreciate that. Thank you, Senator.

Chairman MCCAIN. An incredibly wise judge.

Senator Ayotte?

Senator AYOTTE. First of all, Peter, I am so thrilled that you are going to be nominated for this. I have been so impressed with your work on SASC. The Department is very fortunate to have someone of your caliber to go over and serve there. I am really enthusiastically looking forward to voting for you and I am very glad that you have translated your service in the Senate over to help and take that knowledge over to the Department of Defense.

Mr. LEVINE. Thank you, Senator.

Senator AYOTTE. Thank you, and thank you to your family for all the sacrifices they have made over the years for many of us on SASC and all the questions we have asked. We appreciate it.

I know that many of the questions that I had have already been asked, I am looking forward to your spending some time on the high risk list that GAO puts together and really focusing on that and trying to address some of those concerns. I know that that has already been directed at you.

Mr. LEVINE. Yes, Senator. That will be a priority.

Senator AYOTTE. One of the things I think we have struggled with here and thought about is just the size of management and headquarters organization at the Department of Defense. It has really grown fairly significantly over the last 15 years. Given the challenges that we are facing in terms of resourcing and what we need to do to defend the Nation, I wanted to get your thoughts on how the size, the composition at the Department of Defense management headquarters—what thoughts you have to make that

more efficient. Is it the right size or should we be looking at shifting what happens there?

Mr. LEVINE. Senator, I think that, first of all, it cannot be the right size. We have to make it more efficient. We have to make it smaller. We have to find cuts. I think that is hard to do. It is hard to get your arms around management headquarters at the Department. You have shifting definitions. I know there is a case that Senator McCain was concerned about, for example, where the Air Force claimed to have downsized some of its headquarters, and apparently they moved something to a separate command or created a separate command to do it. That kind of thing does happen, you know, changing definitions so you do not have to change the numbers.

I believe we have to change the processes. We have to change the structures, and we have to find things that we have been doing that we can either do better or not do at all. That to me is the core is to take on those issues. But we have to get smaller.

Senator AYOTTE. Terrific.

I think so too especially as you look at just the growth in the size and obviously the priorities that we need to have and what we are trying to accomplish. I think all of us are looking forward to working with you I in this new position, and I look forward to enthusiastically supporting you. Thank you for your willingness to do this. I appreciate it.

Mr. LEVINE. Thank you, Senator. I, of course, can come talk to you anytime if you have specific concerns in these areas as we go forward.

Senator AYOTTE. Terrific. Thank you.

Chairman MCCAIN. Senator Manchin?

Senator MANCHIN. Thank you, Mr. Chairman.

Again, Mr. Levine, Peter for me, thank you for the service you have given to this body in the Senate and to this committee for many, many years. We really, all of us, I think in a bipartisan way leaned on you pretty heavy, and you did a great job.

Mr. LEVINE. Thank you, Senator.

Senator MANCHIN. I want to thank you for taking that experience level that you have to this next level. You could have very easily have taken another path. But staying in what you know and what you have been able to do over the years, knowing our concerns, means a great deal to all of us on this committee, and we thank you on behalf of the committee.

Let me just say that, Peter, every time we have talked and we get the money crunch, it is all a reduction of staff. I always hear about reduction of staff. We throw the frontline soldier out there first. I know you have heard the concerns we have had, and you and I have talked about contracting, procurements, all the things and the waste that we have. There is not a person who does not want to defend this country and make sure that we support our troops.

With that being said, I have been particularly concerned with the growth of the headquarters staff. Every time we talk about reduction of staff, no one ever talks about headquarters staff in light of the drawdown of what we are talking about in the military services. It is sometimes hard to get visibility as to whether their cuts

to headquarters staffs are actually creating more efficient organizations or simply reshuffling the deck chairs on the Titanic.

Is that something in your bailiwick that you will be able to get a hold of?

Mr. LEVINE. It will be, Senator. The Deputy Secretary has asked the DCMO office, as I understand it, to review the Office of the Secretary of Defense, which is I guess—I do not know the number—somewhere in the order of 2,000–3,000 people and figure out where there can be cuts made. Now, that is civilian personnel in the Office of the Secretary of Defense. This is one of the misleading things about management in headquarters is that, of course, there is contract support and there are other support elements in there that you do not see on the surface. But I expect it is something that we will look at actively and see where we can bring it down. Not just the Office of the Secretary of Defense because one of the problems with the Department is we have so many different management headquarters, and we need to focus on all of them.

Senator MANCHIN. Let me just say this. I do not want to take a lot of time. You know, when you look at the support and look what is going on, we spend—what—\$600 billion, \$650 billion on defense right now. When you look at all the other countries combined and where we are—we are a superpower and we want to remain that superpower and we want to make sure that our people are the best trained, best equipped, and have the latest technology. We are always on the vision of the cutting edge of what is the next technology we need to keep world peace. I am in favor of every bit of that.

I have to look people in the eye in West Virginia and basically say, well, we have to cut here, here, and here because we had to spend here, here, and here. Efficiencies. Without the audits, without knowing what is going on, without proving business decisions, running an organization, the largest in the world, the size of the Pentagon, it is going to take tough management. Someone is going to bite the bullet here.

When you come back to us and say, listen, we have looked at everything humanly possible and with all of our incurred costs, we just cannot, that is fine. But if there are ways to run it better—and that is where I think there is more efficiencies to be gotten out of this, that is what I am looking for.

Mr. LEVINE. Yes, Senator. You have had the testimony before the committee of the Service Chiefs telling you that with the sequestration level budgets, we do not have the money to support the force structure we have now. Absolutely, wherever we can find efficiencies, wherever we can get savings from the infrastructure and the support services, we need to do that.

Senator MANCHIN. When I look at the Guard, being a former Governor—and I know Senator King being a former Governor—we are really fond of our Guard because of what we ask them to do every day. This is not the Guard that we knew. This is not the Guard of 20 years ago. This is a whole different Guard. They are going on the front lines prepared, ready to go. I do not know why we do not utilize them more for cost savings than going into the contracting route that we have gone. That just does not make any

sense to me. I am anxious to get that report. I know that Senator McCaskill asked you about that.

Mr. LEVINE. Yes. Of course, you have the Independent Commission on the Army which will be looking at that issue and coming back to you within the next year or so.

Senator MANCHIN. Thank you.

Chairman MCCAIN. Senator Reed?

Senator REED. I have one final question. Senator McCain and I were talking back forth about how we have told the Pentagon to get an audit. The question is there are agencies—and Senator McCain reminded me—Homeland Security has a private outside auditor that comes in. But I think we are jumping over a basic question which is can the Department of Defense be audited? Has anyone ever asked the outside experts to come in and just answer the first question, i.e., yes, it can be audited but you have to have these changes, these changes, these changes, these changes? I think we have assumed it is auditable, and then you have not been able to do it. It is frustrating. Will one of the first questions you ask be, can we audit this place?

Mr. LEVINE. Back in 2001 or 2002, I helped write a piece of legislation, advised the committee on a piece of legislation which said essentially do not even try to audit the Pentagon right now. What it said is you need to determine that you are at a state where your books and records are in a good enough shape that it is worth hiring an auditor and spending the money on an auditor before you plunge money into that because right now they are so bad that you are just sending good money after bad. You cannot do it right now.

There is now a process, which we have in law and it has been in law for several years, which says the Department has to assert that they are audit-ready before they can spend money for auditors. They are now reaching a point where they are willing to make those assertions. As I say, there has been a definite progress over that period of time. We are not where we need to be.

Frankly, I think that one of the things that the committee needs to think about and the Department needs to think about is if I am right and we do not make the 2017 deadline, how do we keep that pressure on after 2017 because the 2017 deadline has put some real pressure on the Department to make improvements. But you have to think, okay, so if you get to 2017 and it did not happen, how do we make sure that the same pressure remains on in 2018 and we do not just say, well, we blew it, now we are going to give up and go home because we cannot afford to do that.

Senator REED. Just a final quick point. I thank the chairman for his indulgence.

That process is sort of self-certification. We are ready.

Mr. LEVINE. Right.

Senator REED. Would it not make sense to have a private auditor to come in and say, yes, they are ready, we have looked at it, the systems are in place, et cetera? Because I think some of the problems are, ala the Marine Corps, we are ready.

Mr. LEVINE. The Comptroller is working with major accounting firms on that exact process. In fact, one of the issues they have had over time is they have to have audit firms consult with them on that issue. They are also going to have independent audit firms

come in and help in the audit when it takes place. They have to make sure they get them lined up so that they are not all conflicted out because they have to have both audit firms to advise them and audit firms to conduct the audit. But, yes, they are doing that.

Senator REED. Thank you.

Chairman MCCAIN. Just to pursue that line again, I see nothing wrong with bringing in an outside auditor to look at the whole situation and see if they cannot do the auditing. The Department of Homeland Security somehow was able to get audited—they are a pretty big organization—by an outside auditor. They have been screwing around for 15 years now.

Mr. LEVINE. We have to get it done. I agree with you, Senator.

Chairman MCCAIN. An outside auditor I think is at least an option that we ought to explore or even try.

I congratulate you again on your appointment. We look forward to working with you. I want to assure you the next hearing will not be nearly as pleasant as this one was.

[Laughter.]

We congratulate you and also appreciate you very much, and congratulations to your wonderful family.

The hearing is adjourned.

[Whereupon, at 10:32 a.m., the committee adjourned.]

[Prepared questions submitted to Mr. Peter K. Levine by Chairman McCain prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

RELATIONSHIPS

Question. What is your understanding of the relationship between the Deputy Chief Management Officer of the Department of Defense and each of the following?
The Secretary of Defense.

Answer. The Secretary of Defense is responsible for all programs and activities of the Department of Defense. Accordingly, the Deputy Chief Management Officer (DCMO) is responsible and accountable to the Secretary in the performance of his duties. In addition, as a result of a recent reorganization within the staff of the Office of the Secretary of Defense (OSD), the DCMO is directly responsible to the Secretary for the management and support of the OSD staff; the management and protection of the Pentagon reservation; and selected intelligence oversight matters.

Question. The Deputy Secretary of Defense.

Answer. Under section 132 of title 10, U.S.C., the Deputy Secretary of Defense serves as the Chief Management Officer (CMO) of the Department of Defense. Section 132a provides that the DCMO shall assist the Deputy Secretary in the performance of his duties as CMO. The Deputy Secretary of Defense has delegated duties and authorities to the DCMO to assist in effectively and efficiently organizing the business operations of the Department.

Question. The Defense Business Systems Management Committee (DBSMC).

Answer. I understand that section 901(c) of the Carl Levin and Howard P. 'Buck' McKeon National Defense Authorization Act for fiscal year 2015 repealed the requirement for the DBSMC. The functions of the DBSMC have been absorbed as a part of the Deputy's Management Advisory Group (DMAG). Business reform, DOD strategy and budget discussions are all subjects of the DMAG. The DMAG is co-chaired by the Deputy Secretary of Defense and the Vice Chairman of the Joint Chiefs of Staff and includes as members the Under Secretaries of the military departments, the military vice chiefs, and key OSD staff. If confirmed, I would serve as a voting member of the DMAG and would be responsible for bringing business management agenda items to the DMAG.

Question. The Under Secretary of Defense for Financial Management (Comptroller).

Answer. The DCMO works with the Comptroller to improve the financial management of the Department and move toward an auditable financial statement by improving the business systems and processes of the Department.

Question. The Other Under Secretaries of Defense.

Answer. The DCMO works with the Under Secretaries to review and improve key business processes, modernize business systems, and implement Department-wide management initiatives. The DCMO is currently working with the Under Secretaries to carry out the Business Process and Systems Review (BPSR) directed by the Deputy Secretary of Defense.

Question. The Assistant Secretaries of Defense.

Answer. The DCMO works with the Assistant Secretaries to modernize and improve the business systems and processes of the Department of Defense.

Question. The Secretaries of the Military Departments.

Answer. If confirmed, I expect to work closely with the Secretaries of the military departments to ensure that the business management and modernization objectives of the Secretary of Defense and the Deputy Secretary of Defense are carried out by the military departments.

Question. The Chief Management Officers of the Military Departments.

Answer. The Under Secretaries of the military departments serve as the CMOs of their respective organizations and, as such, have enterprise responsibility for overseeing business operations within their departments. The Office of the DCMO interacts routinely with these officials on business transformation initiatives. If confirmed, I expect to work closely with the CMOs of the military departments to carry out the business management and modernization objectives of the Secretary and the Deputy Secretary.

Question. The Investment Review Boards of the Military Departments.

Answer. The DCMO provides direction and guidance to the pre-certification authorities of the military departments to ensure the consistency and rigor of the investment management process throughout the Department. The Defense Business Council, which is co-chaired by the DCMO and the CIO, reviews of the results of the service investment reviews.

Question. The Comptrollers of the Military Departments.

Answer. The DCMO works with the Comptrollers of the military departments to modernize financial systems and processes, and ensure that business modernization efforts within their areas of responsibility are carried out in a manner consistent with the goals and objectives established by the Secretary and the Deputy Secretary. The DCMO also serves as a member of the Financial Improvement and Audit Readiness Governance Board. In this capacity, the DCMO works with the Comptrollers of the military departments to further their efforts toward achieving financial audit readiness.

Question. The Business Transformation Offices of the Military Departments.

Answer. The Under Secretaries of the military departments, in their capacity as CMOs, oversee the business transformation offices (BTOs) of their respective departments. The DCMO works with the CMOs and the BTOs to ensure that the military departments carry out the business management and modernization objectives of the Secretary and the Deputy Secretary.

Question. The Inspector General of the Department of Defense.

Answer. The DCMO responds to inquiries and recommendations of the Government Accountability Office and the DOD Inspector General relative to defense business operations and the operation of the Office of the DCMO.

Question. The General Counsel of the Department of Defense.

Answer. The DCMO receives legal advice and guidance from the General Counsel of the Department of Defense on matters relating to defense business operations and the operation of the Office of the DCMO.

Question. The Directors of the Defense Agencies.

Answer. Under a recent OSD reorganization, the DCMO is responsible for two Defense Agencies, the Washington Headquarters Service and the Pentagon Force Protection Agency. The DCMO works with other Defense agencies to further the Department's business transformation goals.

DUTIES OF THE DEPUTY CHIEF MANAGEMENT OFFICER

Question. Section 132 of title 10, U.S.C., provides that the Deputy Secretary of Defense serves as the Chief Management Officer (CMO) of the Department of Defense. The Deputy Secretary is to be assisted in this capacity by a Deputy Chief Management Officer (DCMO). The NDAA for fiscal year 2015 includes several changes to the CMO and DCMO structure scheduled to take effect in 2017.

What is your understanding of the duties and responsibilities of the CMO and DCMO of the Department of Defense?

Answer. The duties and responsibilities of the CMO and DCMO, as prescribed by the Secretary of Defense, are to: (a) ensure that the Department can carry out its

strategic improvement plans; (b) ensure that the core business missions of the Department are optimally aligned to support the warfighting mission; (c) establish performance goals and measures for improving and evaluating overall economy, efficiency, and effectiveness and monitor and measure the progress of the Department; and (d) develop and maintain a Department-wide strategic plan for business reform. In general, the duty of the DCMO is to assist the CMO in carrying out those objectives and, if delegated, assume primary responsibility for those functions. As a result of a recent OSD staff reorganization, the DCMO is also accountable to the Secretary of Defense for the effective organization and operation of the OSD staff; the effective operation and protection of the Pentagon reservation; and for the execution of select intelligence oversight responsibilities.

Question. What specific duties and responsibilities do you expect the Deputy Secretary to assign to you in your capacity as DCMO?

Answer. I understand that the Deputy Secretary has directed the DCMO to conduct a review of the organizations and business processes of the Office of the Secretary of Defense (OSD) and the defense agencies, with the objective of streamlining organizations and improving business processes. I expect that the Deputy Secretary may also direct the DCMO, in coordination with the CMOs of the military departments, to ensure that similar reviews are conducted by the military departments. If confirmed, I expect to play a key role in these efforts.

Question. What background and expertise do you possess that you believe qualify you to perform these duties and responsibilities?

Answer. For the last 18 years, I have served on the staff of the Senate Armed Services Committee as minority counsel, General Counsel, and Staff Director. In this capacity, I have helped to advise committee members on defense management issues, including the committee's oversight of DOD business systems and processes. I have also participated in committee reviews of previous efforts to streamline business processes and achieve management efficiencies in OSD and the military departments. Through this work, I have developed a familiarity with key DOD organizations and business processes and I have worked closely with DOD leaders responsible for managing and overseeing those organizations and processes. I believe that the knowledge and experience I have gained through my work for the Armed Services Committee provides a solid foundation for the work I will be asked to perform as DCMO.

Question. Do you believe that the CMO and DCMO have the resources and authority needed to carry out the business transformation of the Department of Defense?

Answer. I do not believe that any one component of the Department of Defense has the resources, knowledge, and capabilities necessary to carry out the comprehensive business transformation that the Department needs. However, I believe that the DCMO, with the support of the Deputy Secretary, has both the capacity to bring together needed resources, knowledge, and capabilities from key organizations throughout the Department and the authority to direct those resources as necessary to carry out the business transformation effort.

Question. What role do you believe the CMO and DCMO of the Department of Defense should play in the planning, development, and implementation of specific business systems by the military departments?

Answer. I believe that the military departments should retain full responsibility for planning, developing and implementing their own specific business systems. Oversight for the acquisition of new business systems has been delegated to the Under Secretary of Defense for Acquisition, Technology, and Logistics, not the DCMO. The role of the CMO and the DCMO is to ensure that the military departments conduct appropriate business process reengineering before acquiring new systems or modernizing existing systems, that appropriate governance processes are in place to keep the customization of commercial, off-the-shelf business systems to a minimum, and that new and existing business systems of the military department are consistent with the business enterprise architecture of the Department of Defense. The CMO and the DCMO can also play an important role in identifying gaps and deficiencies in the business systems and processes of the military departments and components and ensuring that the military departments and components work to address those gaps and deficiencies in an expeditious manner.

Question. Do you believe that the DCMO should have clearly defined decision-making authorities, or should the DCMO serve exclusively as an advisor to the Deputy Secretary in his capacity as CMO?

Answer. I understand that the DCMO has some statutorily-assigned decision-making authorities, particularly in the investment review process conducted pursuant to section 2222 of title 10, U.S.C.. The DCMO may be assigned additional decisionmaking responsibilities by the Deputy Secretary of Defense. However, I believe

that the DCMO can only be effective if he works closely with the Deputy Secretary and has the full support of the Deputy Secretary in his capacity as CMO.

MAJOR CHALLENGES

Question. In your view, what are the major challenges confronting the DCMO?

Answer. I believe that the two major challenges facing the DCMO are: (1) to help the Department achieve the management efficiencies and savings that it will continue to need in an austere budget environment; and (2) to help the Department implement the business systems and processes needed to produce a clean audit and provide senior managers with sound information on which to base management decisions.

Question. If confirmed, what plans do you have for addressing these challenges?

Answer. With regard to the first challenge, if confirmed I expect to play a key role in carrying out the review of management organizations and processes directed by the Deputy Secretary. This review provides an important opportunity to streamline management organizations, align resources with priorities, and improve business processes throughout the Department. It should also provide an opportunity to identify and address DOD business processes that have become dysfunctional—taking too long, costing too much, and producing less than optimal results. It is my hope that this review will not only result in significant savings, but also in more effective management and improved outcomes.

With regard to the second challenge, the military departments and defense agencies have already committed to major investments in new business systems. In the limited time remaining in this Administration, dramatic changes of course for these investments would probably be counterproductive. However, I believe that that the DCMO can help optimize ongoing investments by enforcing the investment review process and ensuring that the military departments and defense agencies continue to reengineer and improve their business processes, institute appropriate governance structures to minimize customization of commercial, off-the-shelf systems, and take full advantage of the capabilities of their new and existing business systems.

PRIORITIES

Question. What broad priorities would you establish, if confirmed, with respect to issues which must be addressed by the DCMO?

Answer. My top priorities, if confirmed, will be to address the two major challenges addressed in response to the previous question: achieving management efficiencies and improving the business systems and processes of the Department.

MANAGEMENT GOALS

Question. If confirmed, what key management performance goals would you want to accomplish, and what standards or metrics would you use to judge whether you have accomplished them?

Answer. If confirmed, I expect to focus on maintaining and improving support to the Department in its business operations while reducing the overall cost of those operations. I would expect to develop standards or metrics based on savings and on customer-oriented results per unit of cost expended to achieve the results. I understand that the ongoing benchmarking initiative implemented by OMB contains some relevant metrics that could serve as examples, such as the cost of human resource support per population supported.

Question. The GPRA Modernization Act of 2010 (GPRAMA) makes the Deputy Secretary of Defense—as the Chief Management Office (CMO) and Chief Operating Officer (COO)—responsible for improving the management and performance of the department. The Deputy Chief Management Officer (DCMO) serves as the agency Performance Improvement Officer under GPRAMA and is to advise and assist the CMO in areas such as performance planning and measurement.

If confirmed, what actions would you and your office take to prioritize as well as improve DOD's ability to plan for and manage achievement of performance goals across the department?

Answer. I understand that Office of the DCMO has started to reform performance goals to ensure they are more appropriately aligned to the Department's objectives. I am not yet in a position to judge the effectiveness of that effort. If confirmed, I expect to use my role as the DCMO and as a member of the DMAG to advocate alignment of measures to the Department's priorities.

Question. As required by GPRA Modernization Act of 2010, the Administration has established certain cross agency priority goals, such as benchmarking of mission support operations, cybersecurity, and security clearances, to which DOD must contribute.

If confirmed, what actions would you take to ensure that DOD is contributing to government-wide success on cross agency priority goals?

Answer. I understand that one of the duties of the DCMO is to serve as the Department's representative to the President's Management Council, which has responsibility for cross-agency priority goals. If confirmed, I expect to coordinate DOD support for appropriate cross-agency goals to ensure the success of both the Department and the success of the broader Federal agency community.

Question. In July 2008, DOD issued its first Strategic Management Plan, which was intended to serve as the department's highest-level plan for improving defense business operations. This plan and its subsequent iterations were to outline DOD's priority business goals, objectives, measures, and initiatives, and advance the department's performance management activities. They were also to be aligned with the Quadrennial Defense Review and the Performance Budget. However, DOD's Strategic Management Plan has not fully met these expectations nor does it fully meet the GPRAMA requirement of an Agency Strategic Plan to be issued by 2014.

If confirmed, what actions would you and your office take to ensure the timely development of a department-wide strategic plan that can effectively improve business operations while support the warfighter during an environment of continued budget austerity?

Answer. I understand that work is underway on a revised Agency Strategic Plan that more closely conforms to the GPRAMA requirements. If confirmed, I will work with the Department to complete this plan and improve the Department's ability to objectively assess its performance and ensure that resources are applied to key challenges.

STAFFING AND RESOURCES

Question. The NDAA for fiscal year 2014 contains a provision requiring the Secretary of Defense to develop a plan for streamlining Department of Defense management headquarters by reducing the size of staffs, eliminating tiers of management, cutting functions that provide little or no addition value, and consolidating overlapping and duplicative program offices.

GAO has recently reported that "DOD's data on its headquarters personnel lacked the completeness and reliability necessary for use in making efficiency assessments and decisions." Further, that "DOD did not have an accurate accounting of resources being devoted to management headquarters to use a starting point for tracking reductions to such headquarters."

In your view, is the GAO correct? If so and if confirmed, what will you do to address these issues?

Answer. I believe that the GAO conclusions quoted above are correct. As I understand it, the statutory baseline for measuring the size of DOD management headquarters was established in the 1990s and was not as clearly defined as it should have been even then. With the extensive changes to DOD organizational structures that have taken place over the last two decades, measurements against the original baseline would probably not be meaningful even if they were possible.

In my view, the meaningful measurement of DOD streamlining efforts will require the establishment of a new baseline that is relevant to the Department's current management structure. It is my understanding that, as a part of the review directed by the Deputy Secretary, the DCMO has begun to collect data that could be used to establish such a baseline. If confirmed, I will endeavor to carry forward this process.

Question. What is your view on reductions to the size and composition of Department of Defense management headquarters?

Answer. I believe that significant reductions to the size and composition of DOD management headquarters are not only possible, but essential. Ideally, cuts should be made not only at headquarters, but through entire management processes. However, I do not believe that reductions should take the form of across-the-board cuts. Cutting management personnel without improving management processes will result in fewer people to do the same work, creating bottlenecks and backlogs that are counterproductive to the mission of the Department.

I do not believe that there are any significant management processes in the Department of Defense that cannot be streamlined and made more efficient. Making process changes will be difficult and time-consuming and may require changes to the culture of the Department of Defense. However, significant improvements can and should be made to enable the Department to reduce the size and composition of its management headquarters and achieve savings without undermining the mission.

Question. What role do you expect to play, if confirmed, in ensuring savings are achieved?

Answer. If confirmed, I expect to help direct the Deputy Secretary's initiative to streamline the management processes of the Department of Defense. This initiative should provide an opportunity to achieve the reductions in the size and composition of DOD management headquarters described above.

Question. Do you believe that the Department of Defense can achieve significant additional savings in this area?

Answer. Yes.

Question. What types of expertise do you believe the office of the DCMO needs to effectively carry out its mission?

Answer. The DCMO needs expertise in business systems, business process re-engineering, business case analysis, and program assessment. It also needs personnel with a thorough understanding of the organization and business processes of the Department of Defense.

Question. What mix of employees, contractors, and individuals detailed from other organizations inside and outside the Department of Defense should the DCMO rely upon to provide it with needed expertise?

Answer. I understand that the office of the DCMO has some organic capacity and some contractor support in each of the areas described in response to the previous question. To successfully streamline the Department's management processes, the office will need to draw on other centers of expertise in the Department and to partner with the principal offices responsible for the management processes under consideration.

Question. Do you believe the Office of the DCMO has the staffing and resources needed to effectively carry out its mission?

Answer. I do not believe that any one component of the Department of Defense has the resources, knowledge, and capabilities necessary to carry out the comprehensive business transformation that the Department needs. However, I believe that the DCMO, with the support of the Deputy Secretary, has both the capacity to bring together needed resources, knowledge, and capabilities from key organizations throughout the Department and the authority to direct those resources as necessary to carry out the business transformation effort.

UNDER SECRETARY OF DEFENSE FOR BUSINESS MANAGEMENT AND INFORMATION

Question. The Carl Levin and Howard P. "Buck" McKeon National Defense Authorization Act for fiscal year 2015 converts the Deputy Chief Management Officer (DCMO) to the Under Secretary of Defense for Business Management and Information, who will also serve as the Chief Information Officer. This new position, to begin in February 2017, is expected to provide greater authority to supervise management of business operations and systems.

What are your views on this new Under Secretary of Defense for Business Management and Information position?

Answer. I support the legislation. I believe that the merger of the DCMO position with the CIO position will serve to strengthen both positions. In my view, however, the title and responsibilities of the position are less important to the success of the mission of the office than the alignment of the position with the Deputy Secretary and the Deputy Secretary's ongoing support for, and engagement in, that mission.

Question. If confirmed, what would be your priorities prior to the implementation of the new position in February 2017, and what actions would you take and what resources would you need to achieve those priorities?

Answer. I understand that some preliminary planning and guidance will be needed before February 2017 to ensure that the new position can get off the ground in a timely and effective manner. If confirmed, I will work to identify the necessary steps and ensure that they are completed.

Question. The Government Accountability Office reported in December 2007 on key strategies for implementing Chief Operating Officer (COO)/Chief Management Officer (CMO) positions in government, which includes defining the specific roles and responsibilities of the COO/CMO position, and ensuring that the COO/CMO has a high level of authority and clearly delineating reporting relationships, among other strategies.

What do you believe would be the most effective approach to implementing the Under Secretary of Defense for Business Management and Information position, and what additional resources or flexibilities would be needed to do so?

Answer. I believe that the alignment of the DCMO and, in the future, the Under Secretary of Defense for Business Management and Information with the Deputy

Secretary of Defense is the most promising approach to ensure the success of the position.

I am not aware at this time of any additional resources or flexibilities that will be needed to implement the position of Under Secretary of Defense for Business Management and Information. If I become aware of any such requirements, I will work with the committee and the Department to address them.

BUSINESS ENTERPRISE ARCHITECTURE AND TRANSITION PLAN

Question. Section 2222 of title 10, U.S.C., requires that the Secretary of Defense develop a comprehensive business enterprise architecture and transition plan to guide the development of its business systems and processes.

What is your understanding of the role of the DCMO in the implementation of the business enterprise architecture and transition plan required by section 2222?

Answer. It is my understanding that the Department has chosen to implement the requirement for a business enterprise architecture and transition plan through a “federated” approach in which the DCMO is responsible for developing and maintaining the top level architecture, while leaving it to the military departments to fill in most of the detail.

Question. What is your assessment of the current state of DOD’s comprehensive business enterprise architecture and transition plan?

Answer. While the Department has made considerable progress in refining its business enterprise architecture since the enactment of section 2222, I do not believe that the business architecture and transition plan developed by the Department is as mature as Congress hoped it would be when the provision was enacted. In particular, I do not believe that the current transition plan provides the comprehensive roadmap needed for the replacement, upgrade, or decommissioning of legacy business systems that are outdated, duplicative, or unreliable.

Question. Do you believe that a comprehensive, integrated, enterprise-wide architecture and transition plan is essential to the successful transformation of DOD’s business systems?

Answer. I believe that the Department can make, and has made, significant progress by developing more limited plans that have helped to guide specific portfolios of business systems. However, I do not believe the Department will ultimately be able to complete the transformation process without a comprehensive, integrated, enterprise-wide approach—regardless whether that approach takes the form of a single plan or the federated plans currently envisioned by the Department.

Question. What are your views on the importance and role of timely and accurate financial and business information in managing operations and holding leaders accountable?

Answer. DOD leaders are called upon to make business decisions on a day-to-day basis—for example, decisions on whether to hire additional employees, whether to extend contracts, whether to reduce the number of managers in an organization, or whether to enter into multi-year contracts. On occasion, they must make much larger decisions—for example, decisions on whether to shut down a command and realign its functions, whether to rely on the active force or the Reserves to perform a mission, or whether to upgrade an existing weapon system instead of acquiring a new one. Financial and business data is crucial to all of these business decisions, and in my view, better data is likely to result in better decisions.

Question. How would you address a situation in which you found that reliable, useful, and timely financial and business information was not available for these purposes?

Answer. I do not think that the Department can afford to be paralyzed by the inadequacy of its financial and business information. A decision not to act—for example, a decision not to reform a defective business process or consolidate duplicative organizations—is every bit as much of a decision as the decision to act. I believe that DOD managers have a responsibility to make use of the best business and financial data available, even if that data is less than perfect, and exercise their best judgment on a case-by-case basis.

Question. What role do you envision playing, if confirmed, in managing or providing oversight over the improvement of the financial and business information available to DOD managers?

Answer. The quality of financial and business information available to DOD managers should improve as the Department’s business systems and processes improve. Sound controls, improved interfaces, and the elimination of unnecessary manual transmission of data should improve data quality. Business process reengineering should result in data that is more relevant to the tasks to be performed.

Although the DCMO is not directly responsible for the acquisition of new business systems, the DCMO can contribute to the improvement of business systems and processes through the ongoing investment review process and the business transformation process launched by the Deputy Secretary.

Question. What role do you envision playing, if confirmed, in assuring that appropriate business process re-engineering efforts associated with business system programs have been undertaken?

Answer. One of the key responsibilities of the DCMO is to ensure that appropriate business process re-engineering efforts are undertaken before any new business system is acquired or any existing business system is upgraded. Business process re-engineering is not a one-time effort, and there is also much that the DCMO can do to ensure continuing reengineering efforts to optimize the fielding of business system programs and to ensure that their capabilities are fully realized. If confirmed, I will take these responsibilities very seriously.

Question. What metrics do you believe should be used to ensure that the business process supported by the defense business system program is or will be as streamlined and efficient as practicable?

Answer. I understand that there is a body of practice in the commercial sector that can be brought to bear on the question of measuring the success of a defense system business program in improving the business process. Examples of these metrics include reduced processing time; improved accuracy of information; better responsiveness to customers and overall reduction in cost of operations.

Question. What metrics do you believe should be used to ensure that the need to tailor commercial-off-the-shelf systems to meet unique requirements or incorporate unique requirements or incorporate unique interfaces has been eliminated or reduced to the maximum extent practicable?

Answer. I understand that there is a body of practice from the commercial sector that would suggest appropriate metrics to include measures of requirements stability, numbers of "RICE" objects (the reports and extensions that have to be configured), and actual numbers of interfaces. Loss of control of these elements would suggest either a weak management structure, or alternatively, a bad initial assessment of the applicability of a commercial, off-the-shelf (COTS) product. To avoid unnecessary and expensive customization of COTS business systems, the Department needs not only sound metrics, but also effective governance systems.

Question. Section 2222 requires that the DBSMC review and approve all major defense business system modernization programs to ensure that they are in compliance with the Department's business enterprise architecture and transition plan.

What is your understanding of the extent to which the process for the Defense Business Systems Management Committee (DBSMC) review and approval has ensured that business system modernization programs are fully coordinated with the business enterprise architecture and transition plan, as intended?

Answer. As indicated above, I do not believe that the current business enterprise architecture and transition plan is as comprehensive as Congress intended it to be. I do not have any reason to believe that the investment review process has failed to coordinate business system modernization programs with the architecture, but that coordination has probably not been as helpful as it might have been, had the architecture been more complete.

Question. How meaningful do you believe DBSMC review and approval has been?

Answer. I believe that the DBSMC review and approval process has contributed to the Department's understanding of its business systems programs and provided a useful incentive for business process reengineering. However, I am concerned that the current low thresholds for DBSMC review may have contributed to a review and approval process that has failed to recognize its full potential. If confirmed, I plan to review this issue and seek appropriate changes.

Question. Do you believe that the DBSMC has the expertise and resources needed to conduct a meaningful, independent review of proposed business system modernization programs, or is the DBSMC reliant on the representations made by the military departments and their program managers?

Answer. I believe that the DBSMC has important expertise and resources, and can draw on other resources of the Department, for this purpose. However, I am concerned the current low thresholds for DBSMC review may have resulted in a tendency to rely too much on representations made by the military departments and their program managers.

Question. What recommendations, if any, do you have for improving or changing the DBSMC review process?

Answer. If confirmed, I plan to review the DBSMC process and look for opportunities to make the process more rigorous.

COMPTROLLER GENERAL HIGH RISK LIST

Question. The Department of Defense remains on GAO's High Risk List in the following areas:

- (1) Business Transformation
- (2) Business Systems Modernization
- (3) Support Infrastructure Management
- (4) Financial Management
- (5) Supply Chain Management
- (6) Weapon System Acquisition
- (7) Contract Management

What is the role of the DCMO for enabling DOD to be removed from the GAO High Risk list in each of these areas?

Answer. The DCMO is the senior official of the Department of Defense with primary responsibility for business transformation. This transformation will require an enduring effort over a period of years. If confirmed, I plan to give the effort my highest priority.

Individual business systems modernization programs are carried out by the military departments and defense agencies. Through the investment review process, the DCMO exercises considerable influence over these programs. If confirmed, I will emphasize the need for continued business process reengineering to optimize the fielding of business system programs and to ensure that their capabilities are fully realized.

The Under Secretary of Defense (Comptroller) is the senior official of the Department of Defense with primary responsibility for financial management. The DCMO can contribute to the financial management effort by working to improve the business systems and processes of the Department, so that the financial data generated by those processes is more timely and reliable. If confirmed, I expect to work closely with the Comptroller in the effort to move the Department toward an auditable financial statement.

The Under Secretary of Defense for Acquisition, Technology, and Logistics is the senior official of the Department of Defense with primary responsibility for support infrastructure management, supply chain management, weapon system acquisition, and contract management. The DCMO can contribute to improved management in these areas by working with the Under Secretary to assess existing management practices and identify areas for potential streamlining and reengineering. If confirmed, I will actively look for opportunities to improve these management processes.

FINANCIAL MANAGEMENT

Question. What is your understanding of DOD's efforts and progress toward the goal of being able to produce auditable financial statements?

Answer. I have long been skeptical of the ability of the Department to achieve the statutory timeline for producing auditable financial statements. However, I believe that the Department has made considerable progress toward this objective and is much closer to being able to produce auditable financial statements today than it was five years ago.

Question. What is your assessment of the current version of the Financial Improvement Audit Readiness (FIAR) plan prepared by the Department of Defense?

Answer. I believe that the FIAR plan has steadily improved over the years. While I am sure there are still gaps and inconsistencies in the FIAR plan, I believe that it largely serves its purpose by providing helpful guideposts for the Department's efforts to achieve auditable financial statements.

Question. What steps do you believe the Department should take to improve the FIAR plan?

Answer. This is an issue that I will review closely, if confirmed.

Question. What role do you expect to play, if confirmed, in the Department's efforts to produce auditable financial statements?

Answer. The Under Secretary of Defense (Comptroller) is the senior official of the Department of Defense with primary responsibility for financial management. The DCMO can contribute to the financial management effort by working to improve the business systems and processes of the Department, so that the financial data generated by those processes is more timely and reliable. I understand that the DCMO also plays a role in the governance process for the FIAR plan. If confirmed, I expect to work closely with the Comptroller in the effort to move the Department toward an auditable financial statement.

Question. Do you believe that the Department is likely to meet the current 2017 statutory objective for ensuring that its financial statements are validated as ready for audit?

Answer. I have long been skeptical of the ability of the Department to achieve the statutory timeline for producing auditable financial statements. Senior officials of the Department have expressed a greater degree of optimism that this timeline can be met. If confirmed, I will work with them to understand whether or not this optimism is realistic. Regardless whether the statutory objective is achieved, I believe that it has served a useful purpose by prompting aggressive action by the Department to make improvements to business systems and processes without which an auditable financial statement would not be possible.

Question. What is the likelihood that this audit will produce a clean opinion? In your view, how long is it likely to be from the time when the Department certifies its financial statements as “ready for audit” to the time when the Department achieves a clean audit opinion? If confirmed, what specific actions would you propose taking to promote compliance with the statutory objective?

Answer. I do not believe it is likely that the first round of audits is likely to produce a clean opinion. As I understand it, financial audits are a learning process through which the Department expects to identify continuing deficiencies in its financial data, which can then be remedied. Based on discussions with financial professionals, I believe that it could take several cycles before the Department achieves a clean audit opinion. If confirmed, I will work with the Comptroller to identify steps that the Department can take to improve its business systems and processes, so that those systems and processes can produce the quality of financial data needed to produce a clean audit.

Question. What is your understanding of what the validation of audit readiness means? What steps will the Department go through to validate its financial statements as ready for audit and when will these steps be taken?

Answer. As I understand it, validation of audit readiness means that Department has performed an internal test to assure itself that appropriate controls are in place and functioning prior to asserting readiness for inspection by an external auditor. I understand that the Department already has taken action to validate preparation for audit including the hiring of qualified financial process consultants to help review internal controls; testing of financial systems in accordance with the GAO’s Federal Information Systems Audit Controls Manual (FISCAM) and developing associated corrective action plans; and conducting trial runs of audits in assessable areas. I understand these internal validation checks will continue as the Department seeks to achieve full audit readiness.

Question. How will the costs and delays of implementing major Enterprise Resource Planning (ERP) systems in the Department affect its ability to achieve an auditable Statement of Budgetary Resources (SBR)?

Answer. I understand that the military departments and defense agencies have been working on back-up plans to ensure that they are able to produce auditable data in areas where ERPs and other upgraded business and financial systems have not yet been fielded. These plans appear to include building new controls into existing business processes and measures to ensure data traceability in legacy business systems. If confirmed, I will work with the Comptroller to understand the efficacy of these interim measures.

Question. The National Defense Authorization Acts for fiscal year 2010 and fiscal year 2013 require that DOD validate the audit readiness of DOD’s Statement of Budgetary Resources (SBR) by September 30, 2014. Why has the Department missed this audit deadline?

Answer. The Department validated the audit readiness of its Schedule of Budgetary Activity (SBA) prior to September 30, 2014, but was unable to validate its SBR by that time. The difference between the SBA and the SBR is that the SBA includes only current-year budgetary activity, while the SBR also reflects prior-year transactions.

As I understand it, the Department has determined that its business systems and processes are now capable of producing auditable financial data on ongoing transactions. However, the Department concluded that it would be prohibitively expensive to fully document earlier transactions, which were conducted in legacy systems without appropriate controls.

Section 1005 of the National Defense Authorization Act for fiscal year 2013, which established the 2014 objective, also directed the Department to avoid “an unaffordable or unsustainable level of one-time fixes and manual work-arounds” in its effort to meet that objective. For this reason, I understand that the Department chose to take a more affordable and sustainable path to a full SBR audit by rolling

in the audit over time, covering a longer period of budget activity with each successive year.

BUSINESS PROCESS AND SYSTEMS REVIEW

Question. In August 2014, the Deputy Secretary of Defense directed the Deputy Chief Management Officer and Chief Information Officer to co-lead a review of business processes and the supporting information technology systems within the organizations of the Principal Staff assistants (PSA) and their associated defense agencies and field activities. This review is intended to provide the PSAs with information that will help them clarify whether their organizations are aimed at department-wide outcomes as well as identify resources allocated to outcomes, obstacles to achieving those outcomes, and activities that might be improved or eliminated. This effort has already identified potential savings.

If confirmed, what actions would you and your office take to ensure that the potential savings from these business process and system reviews are achieved?

Answer. As I understand it, the DOD Business Process and Systems Review (BPSR) process will take place in two phases. The first phase will identify potential changes to DOD organizations, activities, and processes that could yield savings. The second phase will further study those organizations, activities, and processes to quantify the potential savings and establish a plan of action for achieving those savings. I understand that the first phase of the BPSR process has been completed for some OSD organizations and their associated defense agencies and field activities. The DCMO and the CIO are currently working to initiate the phase 2 process for those organizations and activities, and to schedule phase 1 reviews for the additional OSD organizations and activities. If confirmed, I will aggressively pursue this process.

Question. What other DOD components—beyond the reviews of headquarters and Office of the Secretary of Defense entities already underway—could benefit from a similar review to identify potential savings from, among other things, improving or eliminating activities?

Answer. I believe that every management headquarters element of the Department of Defense, including at a minimum the organizations and entities listed in section 904 of the National Defense Authorization Act for fiscal year 2014, could benefit from a review to identify potential savings through changing or reducing the size of staffs, eliminating tiers of management, cutting functions that provide little or no added value, and consolidating overlapping and duplicative programs and offices.

Question. What role should Congress play in the reduction of personnel or the divesting of owned or leased facilities that might result from this review?

Answer. Congress plays an important role in prompting the Department of Defense to do the hard work of conducting management reviews to identify potential savings through reductions in personnel. Congress also plays an essential role in providing the authority to achieve needed efficiencies by reducing personnel and divesting owned or leased facilities that are excess to needs.

I believe that significant reductions to the size and composition of workforce are possible. However, I do not believe that reductions should take the form of across-the-board cuts. In my view, cutting personnel without improving management processes or divesting functions will result in fewer people to do the same work, creating bottlenecks and backlogs that are counterproductive to the mission of the Department.

BUSINESS TRANSFORMATION

Question. Since 2005, the Government Accountability Office (GAO) has designated the Department of Defense's approach to business transformation as "high risk" due to its vulnerability to waste, fraud, abuse and mismanagement. However, GAO has recently found that the Department has not implemented leading performance management practices for Federal agencies in the area of business transformation. GAO also found that DOD's performance measures are "not clear, comprehensive, or aligned with its strategic goals."

Do you believe that the Department needs to more clearly define roles and responsibilities, as well as relationships among key positions and governance entities?

Answer. I understand that the Department has continued to refine its governance processes, including making more explicit the role of the DCMO in business management transformation. The Deputy Secretary has reshaped the structure and functions of the Deputy's Management Advisory Group (DMAG), to include making the DCMO a full member of that body. If confirmed, I will review this issue and determine whether further action is necessary.

Question. If so, what steps do you believe the Department should take to achieve this objective?

Answer. If confirmed, I review this issue and determine whether further action is necessary.

Question. If confirmed, what steps, if any, would you take to more clearly define the Department's strategic planning process, including mechanisms to guide and synchronize efforts to develop strategic plans; monitor the implementation of reform initiatives; and report progress, on a periodic basis, towards achieving established goals?

Answer. I understand that the Deputy Secretary of Defense has recently undertaken a series of reforms to improve the strategic planning process, including the reshaping of the DMAG. If confirmed, I will work with the Deputy Secretary and others to identify and pursue potential improvements to these processes.

ACQUISITION OF MAJOR AUTOMATED INFORMATION SYSTEMS

Question. A number of the Department's Major Automated Information Systems are over budget and behind schedule. GAO recently reported that even new programs are failing to establish initial baselines for cost, schedule, and performance.

What is your assessment of the extent of the problems the Department faces in its acquisition of Major Automated Information Systems?

Answer. It is my understanding that virtually every DOD acquisition of a major business system has suffered from cost overruns, schedule delays, customer resistance, and failure to meet performance requirements. In some cases, the Department has been able to work through these problems, but in other cases the problems have become so extreme that they have led to system failure and program cancellation.

Question. What do you see as the root causes of these problems?

Answer. In my view, there are three closely related root causes for most of these failures: failure of leadership, failure of planning, and failure to perform adequate business process engineering. Too often, the Department has sought to address deficiencies in its business systems by acquiring commercial solutions without adequately understanding its own business processes and planning the changes that will be needed to implement commercial solutions.

Question. What is your understanding of the role of the DCMO in the management and oversight of Major Automated Information Systems?

Answer. Although the DCMO is not directly responsible for the acquisition of new business systems, the DCMO plays a key role in the management and oversight of business systems through the ongoing investment review process. The role of the DCMO is to ensure that the military departments and defense agencies conduct appropriate business process reengineering before acquiring new systems or modernizing existing systems, that appropriate governance processes are in place to keep the customization of commercial, off-the-shelf business systems to a minimum, and that new and existing business systems of the military department are consistent with the business enterprise architecture of the Department of Defense. The DCMO can also play an important role in identifying gaps and deficiencies in the business systems and processes of the military departments and defense agencies, and ensuring that they work to address those gaps and deficiencies in an expeditious manner.

GEOGRAPHIC AND FUNCTIONAL COMBATANT COMMAND MISSION AND HEADQUARTERS-SUPPORT COSTS:

Question. In May 2013 and June 2014, the Government Accountability Office (GAO) reported on the considerable growth that has occurred over the last several years in the mission and headquarters-support costs of the geographic and functional combatant commands. GAO found that the commands do not conduct comprehensive, periodic evaluations that would help them ensure that they are properly sized and structured. As a result, there is little assurance that these commands can manage resources efficiently and meet their assigned missions. Through its Business Process and System Reviews of the Office of the Secretary of Defense and associated defense agencies, the Office of the Deputy Chief Management Officer has identified opportunities for savings through restructuring and reorganizing resources to ensure that they are properly aligned with desired outcomes.

What is your understanding and assessment of the GAO's findings as well as the potential savings already identified as part of the Business Process and Systems Reviews currently underway?

Answer. I am aware that the GAO found considerable growth in the size and cost of the combatant commands over the last decade. I understand that GAO identified some steps that the Department has taken to control those costs, but concluded that

more could be done in this regard. I am not aware that the BPSR review process has been extended to the combatant commands.

Question. If confirmed, would you recommend that the geographic and functional combatant commands be subject to such reviews? If so, what actions would you propose or take to require and implement such reviews?

Answer. I am in general agreement with the findings and recommendations of the two GAO reports referenced. I believe that every management headquarters element of the Department of Defense, including the combatant commands, could benefit from a review to identify potential savings through changing or reducing the size of staffs, eliminating tiers of management, cutting functions that provide little or no added value, and consolidating overlapping and duplicative programs and offices. I do not have a position as to whether the BPSR process is the best mechanism conducting such a review of the combatant commands.

Question. In your view, how might the results of such reviews, if conducted, be used to improve the strategic analysis and decision making processes associated with the Unified Command Plan?

Answer. I believe that the Unified Command Plan should be informed by a sound understanding of the existing organizations and capabilities of the combatant commands. In advance of conducting a review, I do not believe it is possible to determine how that review would improve the processes referenced.

DOD CONFERENCE POLICIES

Question. What role will you play, if confirmed, establishing DOD conference approval processes?

Answer. I understand that the DCMO is responsible for the overall DOD conference approval policy. If confirmed, I will work to ensure that this policy appropriately balances the benefits of DOD presence at appropriate conferences with the need to be judicious in expending the Department's resources, consistent with applicable legal requirements.

Question. How will you assess the impact of these policies on the missions of DOD organizations and the value of the policies relative to the costs of their implementation?

Answer. I believe that many conferences have a genuine professional value in terms of peer exposure, training, and professional growth. Examples include professional conferences for accounting and finance; for the medical community; and for the scientific community. I am also concerned that the DOD conference approval process could be interpreted to extend to important meetings that are not conferences at all. If confirmed, I expect to work with the functional communities within the Department to ensure that the conference policy does not unnecessarily detract from the missions of DOD organizations and the development of DOD personnel.

Question. The GAO recently recommended that "the Secretary of Defense direct the Secretaries of the military departments, in coordination with the Office of the DCMO, to establish time frames for providing conference review and approval decisions based on applicants' needs.

Do you agree with this recommendation? Why or why not? How would you develop the time frames that GAO recommends?

Answer. I agree with the recommendation. If confirmed, I will work with involved stakeholders to address concerns about the timeliness of the review and approval process.

SERVICES CONTRACTING

Question. Over the last decade, the Department has become progressively more reliant upon contractors to perform functions that were once performed exclusively by government employees. As a result, contractors now play an integral role in areas as diverse as the management and oversight of weapons programs, the development of personnel policies, and the collection and analysis of intelligence. In many cases, contractor employees work in the same offices, serve on the same projects and task forces, and perform many of the same functions as DOD employees.

In your view, has DOD become too reliant on contractors to support the basic functions of the Department?

Answer. Contractors have always played a valuable role in supporting the operations of the Department of Defense. However, I believe that there are areas in which the Department has become so reliant on contractors that it risks losing the organic capability to manage its own operations.

Question. What risks do you see in the Department's reliance on such contractor support? What steps do you believe the Department should take to mitigate such risk?

Answer. I believe that it is important that government officials remain accountable and responsible for the actions taken by Federal agencies, including those listed in the question. In my view, responsibility and accountability are possible only if the government retains not only final decisionmaking authority, but also the organic capability to fully understand the range of options available and to make informed choices among them.

Question. What advantages do you see in using contractors to perform functions for the Department of Defense?

Answer. I believe that the use of contractors to perform commercial and industrial functions can leverage private sector capabilities to improve efficiency and lower costs. With regard to the performance of core government functions, contractors can and do support decision-making by providing knowledge and expertise that would not otherwise be available to the Department of Defense.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this committee and other appropriate committees of Congress?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this committee, or designated members of this committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the DCMO?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings, and other communications of information are provided to this committee and its staff and other appropriate committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR DAN SULLIVAN

8(A) DIRECT AWARDS TO NATIVE COMMUNITY-OWNED CONTRACTORS

1. Senator SULLIVAN. Mr. Levine, in March 2015, the Department of Defense (DOD) issued a report to Congress "Assessment of Justification and Approval Requirements Implemented Under section 811 of the National Defense Authorization Act for fiscal year 2010 (section 811)." The report found that in fiscal year 2014 no 8(a) sole-source contracts were awarded that required an 8(a) justification and approval. DOD stated it cannot conclude the cause for this decline. There have been numerous reports from firms that the decline in awards is due to scrutiny on the firms themselves, not the sole-source contracts that could be awarded to these firms. How would you encourage DOD to work more effectively with Native community-owned contractors, particularly regarding 8(a) sole-source contracts?

Mr. LEVINE. It is my understanding that the Competition in Contracting Act (CICA) requires the use of competitive contracting throughout the Federal procurement system, subject to certain exceptions. While the Department of Defense may use sole source contracts in appropriate circumstances, these circumstances are an exception to the general preference of the use of competitive procedures. For this reason, the Department does not generally encourage the use of sole source contracts of any kind.

The DCMO is not an acquisition official, and if confirmed, I would not be in a position to establish acquisition policy for the Department of Defense. However, I would expect DOD acquisition officials to work with Native community-owned contractors to grow the over-all level of contracting by ensuring that: (1) these firms are aware of, and prepared for, opportunities to compete for DOD contracts, includ-

ing in competitions limited to 8(a) firms; and (2) they understand the exceptions to the Competition in Contracting Act and the circumstances in which it might be appropriate for the Department to award a sole-source contract.

2. Senator SULLIVAN. Mr. Levine, the March 2015 DOD report listed 10 instances of guidance issued regarding the implementation of section 811. Can you please provide a copy of each communication?

Mr. LEVINE. The Department has provided me with the attached implementing documents highlighted in the Department's Report to Congress on section 8135(a) of the 2015 Consolidated Appropriations Acts. These documents include an interim FAR rule effective March 16, 2011; a final FAR rule effective April 18, 2012; a memo from Director for Defense Procurement and Acquisition Policy issuing guidance to the Military Departments and Defense Agencies; and other guidance documents issued by the Military Departments and Defense Agencies. [See Appendix A]

3. Senator SULLIVAN. Mr. Levine, has the Office of Federal Procurement Policy (OFPP) issued any guidance to the Department of Defense or other agencies regarding section 811 and can you provide this guidance?

Mr. LEVINE. The Department informs me that under the leadership of the Office of Federal Procurement Policy, the FAR Council held three Tribal consultation and outreach meetings to discuss rulemaking associated with section 811. The meetings took place during October 2010 in Washington, DC; Albuquerque, NM; and Fairbanks, AK; and were publicized in the Federal Register on August 31, 2010 (75 FR 53269). The FAR Council analyzed the comments provided at the public meetings and published an interim FAR rule, with a request for requesting public comments, in the Federal Register on March 16, 2011 (76 FR 14559) to implement section 811 in the FAR. The interim rule encouraged agencies to maximize the effective use of competition by making certain that contracting officers provide a proper justification and obtain approval before awarding a sole-source contract over \$20M as required by section 811. After extensive analysis of public comments received in response to the interim rule, the FAR Council subsequently published a final FAR rule in the Federal Register on April 18, 2012 (77 FR 23369), that made no changes to the interim rule.

4. Senator SULLIVAN. Mr. Levine, the March 2015 DOD report states the Army issued guidance to the Principal assistants Responsible for Contracting and policy chiefs. According to the report, the guidance highlighted the FAR [Federal Acquisition Regulation] case and "the need for additional scrutiny". What date was this guidance issued?

Mr. LEVINE. The Department informs me that the acting Deputy assistant Secretary of the Army (Procurement) issued this guidance in a memorandum entitled "Extensive Use of High Dollar, Sole-Source 8(a) Contracts" on January 5, 2011.

5. Senator SULLIVAN. Mr. Levine, a January 2011 Army memorandum, "Extensive Use of High Dollar, Sole-Source 8(a) Contracts" noted, "Pending issuance of an interim or final rule on this subject, I expect you to scrutinize all proposed awards of sole-source 8(a) contracts ... [emphasis added]" The memorandum indicates that the additional scrutiny was required in absence of formal FAR guidance. Do you think the "additional scrutiny" requested by this memo has remained in effect, despite clear guidance of the action required to issue an 8(a) sole-source award greater than \$20 million?

Mr. LEVINE. The Department informs me that this guidance is no longer in effect.

6. Senator SULLIVAN. Mr. Levine, since the FAR Council has issued formal guidance regarding section 811, do you believe it is appropriate for the Army and other agencies to rescind any guidance that required increased scrutiny of such contracts that could be interpreted as anything other than the now implemented justification and approval process?

Mr. LEVINE. The DCMO is not an acquisition official, and if confirmed, I would not have any role in this issue. However, since the Army memo was predicated on the lack of FAR guidance once the guidance was issued it would appear that the Army guidance should no longer be necessary.

7. Senator SULLIVAN. Mr. Levine, section 811 does not prohibit direct awards greater than \$20 million. How would you encourage such awards, when appropriate, to Native community-owned contractors given the additional scrutiny experienced by these firms?

Mr. LEVINE. As indicated above, it is my understanding that the Department does not generally encourage sole-source contract awards of any kind. Although the DCMO is not an acquisition official and does not set acquisition policy for the Department of Defense, I would expect the Department to encourage competitive awards to Native community-owned contractors and to ensure that such contractors are aware of the circumstances in which it might be appropriate to award sole-source contracts.

8. Senator SULLIVAN. Mr. Levine, section 811 only requires a justification and approval of 8(a) sole-source awards. Do you believe it is appropriate for DOD contracting officers to issue such awards provided a justification and approval is performed?

Mr. LEVINE. While the DCMO is not an acquisition official and does not set acquisition policy for the Department of Defense, I believe that it is appropriate for a DOD contracting officer to award an 8(a) sole-source contract upon the issuance of a justification and approval in accordance with the requirements of section 811.

9. Senator SULLIVAN. Mr. Levine, would you support a requirement to require a justification and approval for any sole-source contract greater than \$20 million that is not currently subject to a justification?

Mr. LEVINE. I am not aware of significant categories of sole-source contracts in excess of \$20 million that are not subject to a requirement for justification and approval. While the DCMO is not an acquisition official and does not set acquisition policy for the Department of Defense, it seems to me that a requirement for justification and approval of any such category of contracts would be consistent with the competition policy established in CICA.

10. Senator SULLIVAN. Mr. Levine, would you support a repeal of section 811?

Mr. LEVINE. The DCMO is not an acquisition official and does not set acquisition policy for the Department of Defense. However, I believe that, consistent with the general preference for competition in Federal procurement, all significant categories of sole-source contracts should be subject to a requirement for justification and approval. For this reason, I do not see the need for repeal of section 811.

11. Senator SULLIVAN. Mr. Levine, would you support an increased threshold for contracts subject to an 8(a) justification and approval?

Mr. LEVINE. It is my understanding that most categories of sole-source contracts are subject to a much lower dollar threshold for justification and approval than the \$20 million threshold set in section 811. For this reason, while the DCMO is not an acquisition official and does not set acquisition policy for the Department of Defense, I do not see the need for an increase to the \$20 million threshold.

12. Senator SULLIVAN. Mr. Levine, would you consider other changes that could reduce potential inappropriate scrutiny of Native community-owned contractors receiving sole-source awards, while ensuring value to the taxpayer?

Mr. LEVINE. The DCMO is not an acquisition official and does not set acquisition policy for the Department of Defense. However, I believe that all categories of sole-source contracts should be subject to careful scrutiny to ensure that they are properly justified, in order to ensure value to the taxpayer. Subject to this general rule, I do not believe that Native community-owned contractors receiving sole-source awards should be subject to additional, inappropriate scrutiny.

13. Senator SULLIVAN. Mr. Levine, do you think section 811 applied more scrutiny to 8(a) sole-source contracts than sole-source contracts covered by the Competition in Contracting Act?

Mr. LEVINE. I am not aware of any independent reports or reviews that address this issue. In the absence of such a report or review, I do not feel that I have the information needed to answer this question.

14. Senator SULLIVAN. Mr. Levine, does section 811, similar to the Competition in Contracting Act, allow for the approval of a justification for an 8(a) sole-source to be approved by someone other than the Head of Agency and can the Head of Agency have the legal ability to delegate the approval authority for an 8(a) justification?

Mr. LEVINE. It is my understanding that section 811 allows the approval authority for sole-source contracts to be delegated to the same levels of officials as the Competition in Contracting Act. In particular, section 811(a)(2) provides that a justification and approval must be "approved by the appropriate official designated to ap-

prove contract awards for dollar amounts that are comparable to the amount of the sole-source contract.” Section 811(c)(3) defines “appropriate official” to mean the same officials to whom approval authority may be delegated under CICA. Consequently, I do not believe that there is any difference between the two statutes on this point.

DEPUTY ASSISTANT SECRETARY OF THE ARMY
(PROCUREMENT)
DEPUTY ASSISTANT SECRETARY OF THE NAVY
(ACQUISITION AND LOGISTICS MANAGEMENT)
DEPUTY ASSISTANT SECRETARY OF THE AIR FORCE
(CONTRACTING)
DIRECTORS OF THE DEFENSE AGENCIES
DIRECTORS OF THE DOD FIELD ACTIVITIES

SUBJECT: Section 811 of the National Defense Authorization Act for Fiscal Year 2010

The Federal Acquisition Regulation (FAR) was recently amended with the March 16, 2011 publication of the interim rule to implement Section 811 of the National Defense Authorization Act for Fiscal Year 2010. Public comments to assist in finalizing the rule were received on May 16, 2011. Section 811 requires that a written Justification and Approval (J&A) be approved prior to the award of sole-source contracts over \$20 million to an 8(a) contractor. The \$20 million requirement for the J&A is not a ceiling or a cap. Though FAR 6.303-2 has 12 elements that are to be responded to when drafting the contents of a J&A, the interim rule for 8(a) contracts only requires five elements to be completed by the contracting officer.

Program offices and contracting officers are encouraged to work closely with their respective small business specialists to identify 8(a) firms to include Native Enterprises (Alaska Native Corporations, Tribal and Native Hawaiian firms) that could provide needed services or supplies. The Department of Defense is committed to providing contracting opportunities to all small businesses, including 8(a) entities. The implementation of this interim rule will help strengthen our small business accomplishments.

The DPAP staff point of contact for small business procurement policy is Ms. Cassandra R. Freeman, 703.693.7062 or cassandra.freeman@osd.mil.

6-5 JAN 2011

SAAL-PP

MEMORANDUM FOR SEE DISTRIBUTION

SUBJECT: Extensive Use of High Dollar, Sole-Source 8(a) Contracts

1. The Army has recently come under scrutiny for extensive use of high dollar, sole-source contracts with Alaska Native Corporations (ANCs) awarded pursuant to the Small Business Administration's, 8(a) business development program. While I understand there are times when such action is necessary, the practice should be the exception rather than the rule. It is imperative that discipline be put into the process supported by sound business judgment.
2. Use of high dollar non-competitive contracts, and on occasion the use of permissible contracting flexibilities, resulted in the need to review our business practices and to instill tighter controls. Pursuant to PL 111-84, Section 811, the Defense Acquisition Regulations Council initiated a FAR Case 2009-038 that will require an approved Justification and Approval prior to award of a sole-source, 8(a) contract greater than \$20 million, to include Alaska Native Corporations.
3. Pending issuance of an interim or final rule on this subject, I expect you to scrutinize all proposed awards of sole-source 8(a) contracts in excess of the 8(a) competitive threshold to ensure the justification is appropriate, applicable subcontracting limitations are met and overall the award is in the best interest of the Government.

Lee Thompson
Acting Deputy Assistant Secretary
of the Army (Procurement)

Communiqué 11-48: Use J&A electronic tool for Limited Source and Fair Opportunity justifications; J&A required for 8(a) > \$20M

 JA Training on electronic tool 1_Aug
 DASN memo.section 811 (2).pdf

Author: Jessica Blackwell

The purpose of this communiqué is as follows: (1) address major changes to the electronic J&A tool, (2) provide some useful tips when using the tool, and (3) introduce the new requirement to execute a J&A prior to awarding a sole-source contract in an amount over \$20 million under the 8(a) program.

1. The J&A Electronic Tool will be upgraded and improved with the following major changes:

-There are now 3 justification templates that can be created. They are:
 *J&As/CJ&As in accordance with FAR Part 6, *Limited Source Justifications(called LSJ in the tool) in accordance with FAR 8.4 for GSA/FSS, and *Justification for an Exception to Fair Opportunity in accordance with FAR 16.505(b)(2) (called FOJ in the tool).

-All J&As/CJ&As, LSJs and FOJs will be created in e-POWER. The originator can access the templates by directly getting into e.POWER or using the link at MyNAVAIR.
 -Justification form fields that previously held only 2000 characters now support 6000 characters.
 -The funding picklist used in creating J&As/CJ&As that was previously a drop-down menu, is now a pop-up window that includes a description and has been expanded.
 -If a J&A is >= \$85.5M, the Funding Table will be printed below the data in paragraph 3 of the body of the J&A/CJ&A.
 -Notifications have been updated to provide more detailed information.

2. TIPS on J&A electronic tool:

-Check that the entries in Block#3 (the funding table) have been entered in thousands. For example, \$3,000 is entered as 3; \$1M is entered as 1000; \$5,500,000 is entered as 5500; \$6,322,140 is entered as 6322.
 -To reassign a J&A, use proxy feature in e-power, contact AIR 2.1 point of contact, Chris Juron or the NAVAIR National Helpdesk at 2-3104 or 1-888-292-5919 -After J&A is printed on letterhead and signatures obtained, it remains in the PCO's e-POWER inbox waiting for the next step. The next step has two options- either, make more changes to the J&A in the electronic tool (option is titled "Return to Specialist for Changes") OR mark it as the final version (this option is titled "Approved/Signed"). By completing the final steps, we can build an accurate repository of J&As.
 -The Tutorial is regularly updated to address changes and improvements as they occur and is available in three places -on the MyNAVAIR website, in e-POWER under "documentation," and on the AIR 2.0 website under Procurement Training. The attached (dated 1Aug2011) tutorial is effective with the system upgrade discussed in paragraph #1 above.

3. NEW REQUIREMENT for 8(a) > \$20M:

An interim rule (effective Mar 16, 2011) has been issued amending FAR to implement Sec. 811 of the National Defense Authorization Act for FY 2010 (Pub. L. 111-84). Sec. 811 requires a J&A prior to awarding a sole-source contract in an amount over \$20 million under the 8(a) program. This written J&A must be approved by an appropriate official and, after award, made public. Authorized by 15 U.S.C. 637(a), the 8(a) program enables contract awards to be made to small business concerns determined eligible for the 8(a) program by the Small Business Administration (SBA). The attached Defense Procurement and Acquisition Policy (DPAP) memorandum provides details.

The Federal Register announcement emphasized the requirement for a J&A is not a ceiling or a "cap" on sole-source awards over \$20 million for 8(a) contractors. Prior to the enactment of section 811, a sole-source award of a new contract made using the 8(a) contracting authority did not require a J&A, regardless of the dollar value. The new statute does not institute any requirement for a J&A for sole-source 8(a) awards that are less than or equal to \$20 million.

As requested in a series of outreach meetings, the interim rule has been drafted to adopt only the five elements listed in section 811(b) of the statute, which are set forth in FAR 6.303-2(d) and as follows:

- (1) A description of the needs of the agency concerned for the matters covered by the contract;
- (2) A specification of the statutory provision providing the exception from the requirement to use competitive procedures in entering into the contract;
- (3) A determination that the use of a sole-source contract is in the best interest of the agency concerned;
- (4) A determination that the anticipated cost of the contract will be fair and reasonable; and
- (5) Such other matters as the head of the agency concerned shall specify.*

Use the NAVAIR web-based tool to complete the J&A. However, to comply with the intent of this change, Block#6, Description of Efforts Made To Solicit Offers from as Many Offerors as Practicable and Block# 8, Actions to Remove Barriers to Future Competition, are not applicable elements.

NOTE: *In their respective implementing memos, DoD and DON have encouraged program offices and contracting officers to work closely with small business specialists to identify 8(a) firms that could provide needed supplies and services, to strengthen DoD's small business accomplishments.

J&A Electronic Writing Tool
(Includes Limited Source Justifications and Justifications for Exceptions to Fair Opportunity)
Training Package

*Policy contained in AIR 2.0 Communiqué 10-73 and 11-16 found on AIR 2.0 website:
<https://contracttools.navair.navy.mil/>
Training Package Updated 1 August 2011*

Release Notes

The following major changes have been made to this latest release of the e.POWER J&A application:

- The MyNAVAIR website for creating J&As has been discontinued. All J&As will now be created through e.POWER. (see slide 6)
 - See slide 57 on Searching justifications in e-POWER
- There are now 3 types of Justifications that can be created (J&A, LSJ, FOJ). (see slides 12-14 for details)
- Justification form fields that previously held only 2000 characters now support 6000 characters.
- The funding picklist, used in creating J&As, that was previously a drop-down menu in Section #3 is now a pop-up window that includes a description and has been expanded. (see slide 12 for details)
- If a J&A is \geq \$85.5M, the Funding Table will be printed below the data in Section 3.
- Notifications have been updated to provide more detailed information.

Web-Based Tool

- Software application which allows users to submit a web-based Justification Form to the NAVAIR Community of Interest (COI).
- Forms will provide pull-downs, required fields, and business logic where feasible to minimize errors upon submission.
- Form will auto-populate user's credentials based on CAC login.
- Each section to be filled in by the user will offer sample language and help in completing each field to minimize re-writes.
- Form is routed among stakeholders in e.POWER.
- The form will auto-generate an MS-Word document in the current Assistant Secretary of the Navy (ASN(RDA)) format.

3

Web-Based Tool (cont.)

- Form will allow for continuous saving and updating until it is submitted to the next status.
- Tool will track "status" of the form as follows: Draft, Review, Rework, Approve, Cancel.
- When status is changed within the tool, automatic email notification will be provided.
- Tool will provide a document repository.
- The Help Desk referenced herein is: National Help Desk
<https://homepages.navair.navy.mil/NHD/>
 Phone: 1-888-292-5919 or 301-342-3104
- ❖ The current system administrator (with limited rights) in contracts is Chris Juron / 301-757-6556 / christine.juron@navy.mil

4

Getting Started

- Getting into the Contracts Justification tool
 - Starting from e.POWER website
<https://teamworkflow.navair.navy.mil/epwfactivator/>
 - Save this link as a bookmark for future.
 - Starting from MyNAVAIR website (see next slide).
<https://mynavair.navair.navy.mil/portal/server.pt/community/mynavair/206>
 - Under the **Acquisition Resources** section, Click **J&A Submission**.
 - Justification tool access through the MyNAVAIR website (<https://teamworkflow.navair.navy.mil/janda/>) has been discontinued
- There are 8 blocks to fill out with a choice of 3 different forms (J&A, LSJ, FOJ).
- As is typical for web sites, there is a 30 minute timeout. Users should save their forms within 30 minutes or risk losing work.

5

Getting Started – From MyNAVAIR

Justification and Approval (J&A) Access Page

J&A's are now being created from within e.POWER

You have an e.POWER account and are CAC-enabled. Please log into e.POWER to create your J&A.

Please click the button below to log into e.POWER:

Training and Help:

[J&A Tutorial and Training for J&A submissions](#)
[National Help Desk Website](#)

For more information, contact the National Help Desk @ 1-888-292-5919 and identify yourself as an e.POWER J&A application user.

- If going to the MyNAVAIR website, you will now receive the screen above.
- If you do not already have an e.POWER account, one will be automatically created for you and CAC-enabled once you access the screen above.
- Click the **e.POWER** button to access and login to the e.POWER system.

6

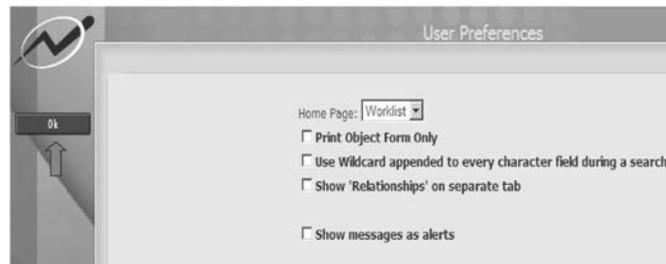

Logging into e.POWER

- The URL to access e.POWER is:
<https://teamworkflow.navair.navy.mil/epwfactor/>.
- Save this link as a bookmark for future.
- e.POWER is CAC enabled, so Click **OK** on the initial pop-up message and then **SUBMIT** WITHOUT entering a password. If you are not CAC enabled, use the forgot password link and follow instructions or contact the National Help Desk for assistance.

Logging into e.POWER – User Preferences

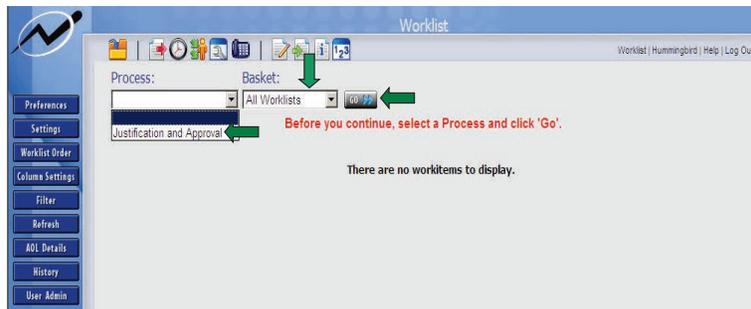

The first time you log into e.POWER, you are asked to save your User Preferences. It is best to leave all selections unchecked and simply click Ok.

Logging into e.POWER – Worklist Screen

After your User Preferences are set, you will need to set your Process (on your initial login only). This is done at the Worklist screen. It is possible to have more than one option in this list. Select the “Justification and Approval” option, make sure the Basket is set to “All Worklists” and click the GO >> button.

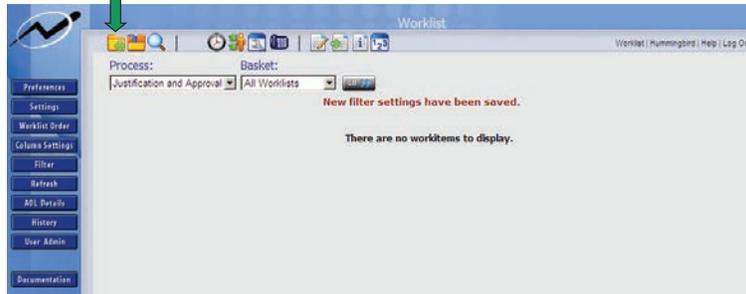

Originator

Creating forms in e.POWER – New Object

To create a new Contracts Justification form, select the **New Object** icon on the top toolbar. The next two slides show the layouts of the J&A, LSJ, and FOJ forms that can be created within e.POWER.

Note: Clicking/un-clicking on a field from within the **PPT Slide Show** view will show/hide comments about the fields on the next three slides.

11

Create J&A Form

Is this a Class J&A? Yes or No from drop-down

Contracts Justification

Select Contract Specialist from drop-down (PCO)

Select Contracting Officer from drop-down (Originator)

Justification Number: Auto-generated by e.POWER

Form Status: Read-Only

Select Legal Representative from drop-down (PCO)

Contracting Officer: []

Contract Specialist: []

Legal Representative: []

1. Description of the Action being Approved:

Enter "Description of the Action being Approved". Select "Guiding Text" or "Example" for further information.

Guiding Text Example 6000 Characters Remaining

2. Description of Supplies/Services:

Enter "Description of Supplies/Services". Select "Guiding Text" or "Example" for further information.

Guiding Text Example 6000 Characters Remaining

Estimated Dollar Value (in Thousands)	Funding Start Year						
	PY 11	PY 12	PY 13	PY 14	PY 15	PY 17	Row Totals
Columns Totals							
Add Row	Total	Delete Row	Denominator: 0.000000				

3. Statute Authority Permitting Other Than Full and Open Competition:

Statute: []

Select the appropriate Authority from the drop-down matching the rationale discussed in Block 5.

4. Rationale Justifying Use of Cited Statutory Authority:

Enter "Rationale Justifying Use of Cited Statutory Authority". Select "Guiding Text" or "Example" for further information.

Guiding Text Example 6000 Characters Remaining

5. Description of Efforts Made to Solicit Offers from as Many Offerors as Practicable:

Enter "Description of Efforts Made to Solicit Offers from as Many Offerors as Practicable". Select "Guiding Text" or "Example" for further information.

Guiding Text Example 6000 Characters Remaining

6. Determination of Fair and Reasonable Cost:

Enter "Determination of Fair and Reasonable Cost". Select "Guiding Text" or "Example" for further information.

Guiding Text Example 6000 Characters Remaining

7. Actions to remove barriers to future competition:

Enter "Actions to Remove Barriers to Future Competition". Select "Guiding Text" or "Example" for further information.

Guiding Text Example 6000 Characters Remaining

Justification Type
LSJ: Limited Source Justification
FOJ: Justification for Exception to Fair Opportunity
J&A: Justification for Other than Full and Open Competition

*For more detailed Justification Type info, select the "Types of Justification" link.

****Warning: Always wait for the form to load completely before making selections!****

*Click on the >> button to select type of funds. If you don't see the proper funding site then it will need to be added by calling the Help Desk.
*Select the funding start year by selecting from the drop-down.
*Populate funding by fiscal year.
*Funds need to be specified in Thousands of Dollars.
*Click Add Row for additional funding lines.
*Once funds have been populated, click Total, and your funds will automatically be added by appropriation and fiscal year and provide an overall total.

12

Create LSJ Form

Contracts Justification

Type of Justification (click for details) [LSJ]

Select Contracting Officer from drop-down (Originator)

Justification Number: Auto-generated by e-POWER

1. Contracting Activity: Contracting Officer: Form Status: Read-Only

2. Nature and/or Description of Action Being Approved: Contract Specialist: Legal Representative:

3. Description of the Supplies or Services Required to Meet the Agency's Needs (including the estimated value): 6000 Characters Remaining

4. Identification of the Justification Rationale (see FAR 8.405-6(b)) and, if applicable, a Demonstration of the Proposed Contractor's Unique Qualifications to Provide the Required Supply or Service: 6000 Characters Remaining

5. Determination by the Ordering Activity Contracting Officer that the Order Represents the Best Value Consistent with FAR 8.404(d): 6000 Characters Remaining

6. A description of the market research conducted among schedule holders and the results or a statement of the reason market research was not conducted: 6000 Characters Remaining

7. Any Other Facts Supporting The Justification: 6000 Characters Remaining

8. A Statement of the Actions, if Any, The Agency May Take to Remove or Overcome Any Barriers That Preclude The Agency From Meeting The Requirements Of FAR 8.405-1 And FAR 8.405-2 Before Any Subsequent Acquisition For The Supplies Or Services Is Made: 6000 Characters Remaining

Justification Type: LSJ: Limited Source Justification

FOJ: Justification for Exception to Fair Opportunity

J&A: Justification for Other than Full and Open Competition

*For more detailed Justification Type info, select the "Types of Justification" link.

Warning: Always wait for the form to load completely before making selections!

Select Contracting Activity from drop-down.

Select the appropriate Justification Rationale from the drop-down.

Create FOJ Form

Contracts Justification

Type of Justification (click for details) [FOJ]

Select Contracting Officer from drop-down (Originator)

Justification Number: Auto-generated by e-POWER

1. Contracting Activity: Contracting Officer: Form Status: Read-Only

2. Nature and/or Description of Action Being Approved: Contract Specialist: Legal Representative:

3. Description of the Supplies or Services Required to Meet the Agency's Needs (including the estimated value): 6000 Characters Remaining

4. Identification of the Justification Rationale (see FAR 16.505(b)(2)) and, if applicable, a Demonstration of the Proposed Contractor's Unique Qualifications to Provide the Required Supply or Service: 6000 Characters Remaining

5. Determination by the Ordering Activity Contracting Officer that the Order Represents the Best Value Consistent with FAR 16.505(b)(2): 6000 Characters Remaining

6. A description of the market research conducted among schedule holders and the results or a statement of the reason market research was not conducted: 6000 Characters Remaining

7. Any Other Facts Supporting The Justification: 6000 Characters Remaining

8. A Statement of the Actions, if Any, The Agency May Take to Remove or Overcome Any Barriers That Preclude The Agency From Meeting The Requirements Of FAR 8.405-1 And FAR 8.405-2 Before Any Subsequent Acquisition For The Supplies Or Services Is Made: 6000 Characters Remaining

Justification Type: LSJ: Limited Source Justification

FOJ: Justification for Exception to Fair Opportunity

J&A: Justification for Other than Full and Open Competition

*For more detailed Justification Type info, select the "Types of Justification" link.

Warning: Always wait for the form to load completely before making selections!

Select Contracting Activity from drop-down.

Select the appropriate Justification Rationale from the drop-down.

Filling out Form Fields in e.POWER

Notes for filling out fields from the previous two slides:

****Warning: Always wait for the form to load completely before performing actions!!****

- If you are unsure of what belongs in the form text boxes, click on **Guiding Text** for help. If you want a sample of what the language may look like, click on **Example**. (**Note:** These options are only available on the J&A form.)
- You can cut and paste from any word document or from the example box, then edit to fit your needs. Be conscious of the maximum characters and special characters that may cause errors.
- In the **Contracting Officer, Contract Specialist, or Legal Representative** drop-down menus, if you don't see the appropriate individual in the drop-down menu, alert that person so they can take appropriate action to be added.
- If your **Funding Table Total** exceeds \$85.5 million dollars, you will receive a warning message in the event that this was an erroneous figure.

15

Submit Contracts Justification Form into Workflow

Object Details - New

ID: "NEW" Form Name: J&A / J&A

Title: J&A

Insert into Workflow

INDEX INFO NOTES HISTORY

Ok Add Docs Apply Refresh Cancel Print

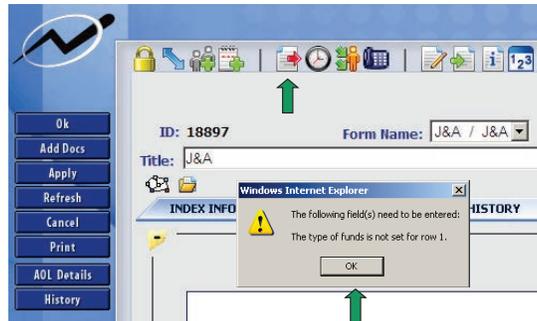

After the form fields have been filled-out for either the J&A, LSJ, or FOJ form, select the **Ok** button on the left-hand button menu. This will insert the form into workflow (see workflow map on next slide).

16

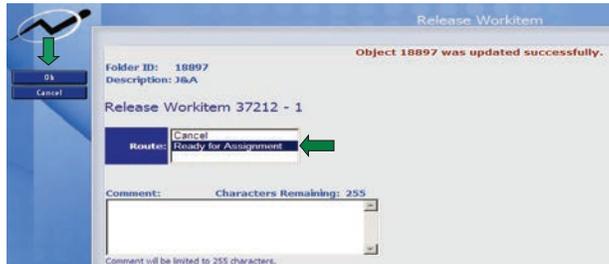

Final Changes before Sending Form to the PCO

After updating your form with any additional changes, click the **Process Workitem** icon on the top toolbar menu. (**Note:** All form fields must be completed before your form can be submitted to the PCO or you will receive a **warning message.**)

Submit Contracts Justification Form into Workflow

From the Release Workitem screen, to process your form to the PCO at the PCO Assign Specialist task, select the default route of **Ready for Assignment**. To cancel your form and send it out of workflow select the **Cancel** route (**do not confuse this with the Cancel button which will cancel the Release Workitem action and send you back to the Worklist screen**). Enter any comments, if desired, and click the **OK** button to process.

Originator Workflow Process Complete

As an Originator, you are now completed with your portion of the workflow process, however, contracts may return the form back to you at certain times within the process. If this happens, you will receive an email that the form has been returned to you for your action.

PCO (Procuring Contract Officer)

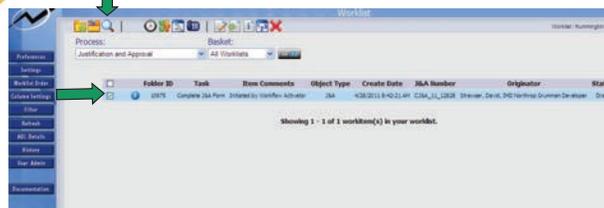

PCO Assign Specialist

- A system generated e-mail will be sent to the PCO in Outlook with a link. Open the Justification using the link.
 - If the PCO has changes to recommend to the Originator then it should be returned to the Originator providing the necessary action to be taken...
 - ...by using the comment block.
- OR
- ...by using notes. (slides 29-33)

Opening the Justification

- Once logged into the tool, the list of Justifications requiring action will show in your Worklist.
- Open the Justification by clicking on the **blue circle** with the white "I" in it at the Justification desired.
- If you need to find a Justification that is not in your inbox, use the search functionality. The search icon is the magnifying glass (refer to slide 57 for more instructions on the search).

Contracting Officer Assigns Justification to Specialist 1 of 2

- PCO selects Contract Specialist from drop-down box for review and processing of Justification.
- To assign the Contract Specialist review, click the Process Workitem button at the top of the screen. This is the button with the red arrow on it.
- If you want to save changes and forward to the Contract Specialist at a later time, click OK to save changes and save form.

Contracting Officer Assigns Justification to Specialist 2 of 2

- Select the Ready for Review route and include appropriate comments in the field provided.
- Select Ok at the left of the screen.

Contract Specialist Review

- A system generated e-mail will be sent to the Contract Specialist in Outlook with a link. Open the Justification using the link.
 - If the Contract Specialist has changes to recommend to the requiring office and/or needs concurrence with changes they made to the document, then it should be returned to the Originator (see slides 36-37) providing the necessary action to be taken...
 - ...by using the comment block.
- OR
- ...by using notes. (slides 29-33)

Navigating in e.POWER Form Tabs

The screenshot shows a web interface for a Justification form. At the top, it displays 'ID: 10975' and 'Form Name: J&A / J&A'. Below that is a 'Title: J&A' field. There are two small icons (a magnifying glass and a refresh icon) to the left of the 'INDEX INFO' tab. The 'INDEX INFO' tab is currently selected and highlighted. Other tabs visible are 'NOTES' and 'HISTORY'.

- Index Info:** This tab shows the Justification form and any attached documentation, this is the default tab.
- Notes:** This tab is available to view any notes associated with the Justification.
- History:** This tab shows all history for the Justification.

Navigating in e.POWER Adding Notes 1 of 2

•To add a note to the form, click on the Add Notes icon.

Navigating in e.POWER Adding Notes 2 of 2

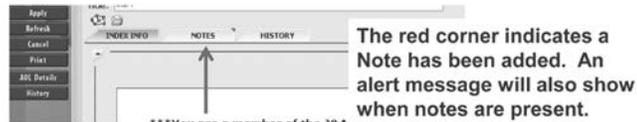

•After entering your note click on Ok to return to the form.

Navigating in e.POWER Viewing Notes

- To view Notes, click on the Notes Tab.

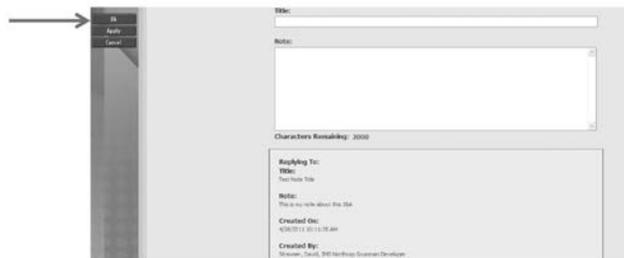

- To view the Note, click on the title
- If you added the note, you can also modify or delete the note. Security can be applied by named users or groups. Click reply to reply.

31

Navigating in e.POWER Replying to a Note

- Enter your Note and Title and click on Ok when finished.
- Each note can be up to 2000 characters
- All notes display who made the note and when the note was added.

32

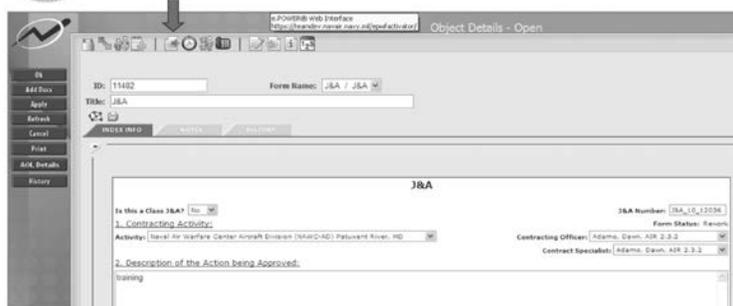

Navigating in e.POWER Printing the Draft Justification (can be done anytime)

- Clicking the Print button opens a window containing current Justification form data that is printable. Once the window is opened, select Print to print the data or Close to return to the Justification form.

Send Justification Back to Originator 1 of 2

- To send the Justification back to the requiring office for review and/or rework, select the Process Workitem button.

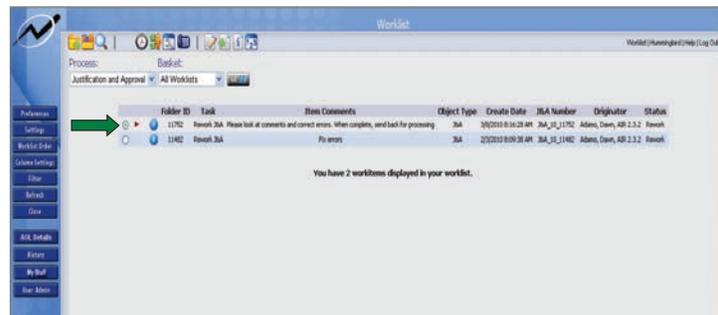

Send Justification Back to Originator 2 of 2

- Click Return for Rework under the Route drop down box.
- Add appropriate comments to the Comment box.
- Click Ok when finished. The Originator will receive the system generated e-mail in the Outlook inbox with the link.

Return to Originator for Rework 1 of 2

- The Originator should open the Justification by clicking on the blue circle with the white "I" in it at the Justification for which rework is required.

Return to Originator for Rework 2 of 2

- Once all revisions to the document have been made, select **Process WorkItem**.

Return to Contract Specialist for Review

- Choose **Return for Review** under the **Route** drop-down box, add appropriate comments, then click **Ok**.

Review/Rework Process

- The Specialist and Originator can send the Justification back and forth as many times as necessary, until the Specialist is satisfied the Justification is sufficient and can be sent to the PCO for review and approval.
- A system generated e-mail to the recipient's Outlook inbox results each time.

Justification to Contracting Officer for Review

Release Workitem

Object 11752 was updated successfully.

Comments are limited to 255 characters. Use the NOTES feature on attach documents if you need more space.

Folder ID: 11752
Description: BA

Release Workitem 21110 - 1

Route:

Comments:
(Sent to PCO for review and approval of final document)

Characters Remaining: 291

- The Contract Specialist opens the Justification from the Worklist.
- Once inside the form, the Specialist should click on Process Workitem.
- Choose Concur from the Route drop-down box, include comments, and click OK.

Return to Specialist for Rework 1 of 2

- To return the Justification to the Specialist for changes, click **Process Workitem**.

43

Return to Specialist for Rework 2 of 2

- Choose **Return to Contract Specialist** from the Route drop-down box, include appropriate comments, and click **Ok**.

44

Review/Rework Process

- The Specialist and PCO can send Justification back and forth as many times as necessary, until the PCO is satisfied the Justification is sufficient.
- A system generated e-mail to the recipient's Outlook inbox results each time.
- Once the Justification is ready for legal review, it is forwarded to the respective attorney.

Send to Legal for Review 1 of 2

Legal Representative:

- Once the Contract Specialist and the PCO are satisfied with the Justification, the PCO sends to the Legal Representative for Legal review.
- Select the lawyer from the **drop-down** illustrated above and process to legal.
- A system generated e-mail will be sent to the legal recipient's Outlook inbox. Click the link to get into your e.POWER inbox.
- The Justification can be printed in draft (see slide 35) by legal.

Send to Legal for Review 2 of 2

- After legal completes their review, the form is sent back to the PCO.
- Legal has two review options:
 - **Concur** and send back to PCO
 - **Changes Required** and send back to PCO
- Legal can type in the document, in the **comment** block or use Notes.
 - Refer to Slides 29-33 on using notes.
- When Legal selects Concur, it is routed to the PCO. The PCO is then able to process the Justification as Approve/Print.

47

Approve and Print 1 of 2

- When the PCO processes the Justification with Approve/Print, the Word document is created with the appropriate signature page and letterhead.
- To Approve and Print, click Process Workitem, and choose Approve/Print from the Route drop-down box, then click OK.
 - Document is locked down. No further changes can be made unless the PCO processes the form as Return to Specialist for Changes. (see slides 50-52)
 - This will print the document on the appropriate letterhead and format ready for signature, including those sent to ASN for signature. The document can also be saved outside the tool.
 - The hard copy will need to be signed by the Program Manager, Contracts and Legal before further routing through the contracts chain.

48

Approve and Print 2 of 2

ID: _____ Form Name: J&A / J&A

Title: J&A

Insert into Workflow

INDEX INFO NOTES HISTORY

+ J&A Details

Filter: Show Immediate Contents

ID	Workflow State	Title	Object Type Name	Doc #	Document Actions	Document Status	Last Edited

49

v

Return to Specialist for Changes (if necessary) 1 of 3

- If the signatories make changes to the Justification, those changes **MUST** be made to the document in e.POWER.
- Click Process Workitem.

50

Return to Specialist for Changes (if necessary) 2 of 3

A screenshot of a software interface showing a "Route:" label followed by a drop-down menu. The menu is open, displaying two options: "Approved/Signed" and "Return to Specialist for Changes". A red arrow points to the "Return to Specialist for Changes" option, which is highlighted in blue.

- Choose **Return to Specialist for Changes** from the **Route drop-down box** then click **Ok**.

Return to Specialist for Changes (if necessary) 3 of 3

- The Justification will now go through all of the appropriate reviews again. Once the Justification makes it back through workflow, a new Word document will be created.
- Return to slides 48-49 for Approve and Print.

Approve/Signed

- Once all signatures have been obtained on the Justification, the PCO will:
 - click Process Workitem.
- Choose Approved/Signed from the Route drop-down box then click Ok. No further changes can be made.
- By clicking Approved/Signed, the PCO is verifying that it is the final version signed by all parties.
- The document is now ready for the Contract Specialist to post to FedBizOpps and Navy Electronic Commerce Online (NECO) in accordance with local instructions*.
- Reference: AIR 2.0 website --- Communiqué 11-16: Publication of J&As [<https://contracts.navair.navy.mil>]
- At a minimum, the appropriation table and signature page is redacted before posting. Based on the PCO/Legal assessment , other sensitive information and details may be removed for various reasons prior to posting.

Establish Proxies 1 of 3

- Users can establish proxies in e.POWER to grant other users access to their e.POWER account. Proxies are assigned from available e.POWER user names. Users grant proxy assignments for a specific time period with a given start and end date. A proxy can be edited to extend or shorten the time period, or a proxy can be deleted when no longer desired.
- Select the settings button. The Worklist Display Settings window opens.
- Select the set proxy button. The Proxy window opens.
- From the top toolbar, select the *Create New Proxy* button. The New Proxy Properties window opens:

Establish Proxies 2 of 3

- From the Worklist screen, select Settings button. The Worklist Display Settings window opens.

- Select the Set Proxy button. The Proxy Management window opens

Establish Proxies 3 of 3

- From the Proxy Management window, select the Create New Proxy icon (green plus sign).

- Select the MORE... button to add users and set the Start and End Dates or No Expiration and click Ok.
- After all users have been added, click Close. Users will now be able to log in to perform work on your behalf until their proxy privileges have been revoked or have expired. You can also edit proxies by selecting the Edit Selected Proxy icon (pencil).

Using Search in e.POWER

- Click on the magnifying glass from the worklist.

- Ensure J&A and not All Object Types is selected.
- Enter your criteria and click Ok.
- Searches can be saved and opened with the top icons.

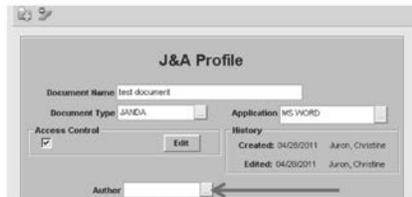

57

Uploading Documentation 1 of 3

- To upload a document, click Add Docs.

- Click the ellipses to select the author.

58

Uploading Documentation 2 of 3

OK Cancel

Filter: Short Name By: Apply

Short Name	Full Name	Office
<input checked="" type="checkbox"/> DAVID.L.STRAWSER1	STRAWSER, DAVID L.	PATUXENT

1 - 1 of 1

- Type your logon name in the By field and click apply.
- Ensure your name is checked and click Ok.

J&A Profile

- Click the folder Icon to create the document.

Uploading Documentation 3 of 3

Upload test document Action

Upload file Browse to select the file for the document profile you created, then click Upload.

Document type: JANDA

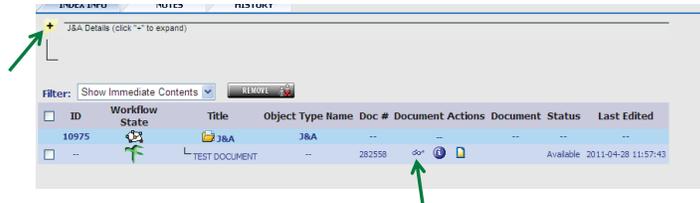

If the document upload is interrupted, you will lose the profile you just created. Do not click on any links or buttons until the upload is complete.

- Click the Browse button and attach the document as you would for any attachment in Outlook.
- After you have attached your document, click Upload.

Viewing Attached Documentation

- When documentation is available, the Justification form is automatically collapsed.
- To open the form click on the + icon.
- To view the document, click the eye glasses icon.
- Clicking the eye glasses icon will open the document in a new window.

61

Document Actions

- One can view metadata about the file by clicking the "i" icon.
- The document can be checked out and locked for updating by clicking the paper icon. The document repository will keep the different versions of the document.
- To remove an attached document double-click the appropriate checkbox and click Remove.
- If more than one document is attached they will be listed in additional rows.

62

FAQs

- **Why am I not getting E-mail notifications?**
 - ✓ Answer: profile needs to be active – contact Help desk or Contracts System Admin
- **Why is e.POWER asking me for a password?**
 - ✓ Answer: #1 follow instructions at e.POWER sign in then set yourself up so it is CAC enabled for next time OR #2 contact Help desk or Contracts Sys Admin to update your profile so it is CAC enabled
- **How can I be added to the drop down list?**
 - ✓ Answer: call Contracts Sys Admin
- **How do I move the Justification to another representative if I am not the right representative?**
 - ✓ Answer: contact Help desk or Contracts Sys Admin to move it to another person's e.POWER inbox
- ❖ **National Help Desk Contact: 1-888-292-5919, 301-342-3104, or <https://homepages.navair.navy.mil/NHD/>**

1000 NAVY PENTAGON
WASHINGTON DC 20350-1000

MEMORANDUM FOR DISTRIBUTION

SUBJECT: Section 811 of the National Defense Authorization Act for
Fiscal Year 2010

The attached Director, Defense Procurement and Acquisition Policy memorandum of June 16, 2011 is forwarded for your information and action, as appropriate. An interim rule published on March 16, 2011 amended the Federal Acquisition Regulation to implement Section 811 of the National Defense Authorization Act for Fiscal Year 2010. Section 811 requires that a written Justification and Approval be approved prior to sole source 8(a) awards over \$20 million. Further details are provided within the memorandum.

Please encourage your program offices and contracting officers to work with their respective small business specialists to identify 8(a) firms that could provide needed services or supplies, to strengthen DoD's small business accomplishments.

My point of contact is Gabrielle Trickett, gabrielle.trickett@navy.mil, 703-614-9641.

DIRECTORS OF THE DEFENSE AGENCIES
DIRECTORS OF THE DOD FIELD ACTIVITIES

SUBJECT: Section 811 of the National Defense Authorization Act for Fiscal Year 2010

The Federal Acquisition Regulation (FAR) was recently amended with the March 16, 2011 publication of the interim rule to implement Section 811 of the National Defense Authorization Act for Fiscal Year 2010. Public comments to assist in finalizing the rule were received on May 16, 2011. Section 811 requires that a written Justification and Approval (J&A) be approved prior to the award of sole-source contracts over \$20 million to an 8(a) contractor. The \$20 million requirement for the J&A is not a ceiling or a cap. Though FAR 6.303-2 has 12 elements that are to be responded to when drafting the contents of a J&A, the interim rule for 8(a) contracts only requires five elements to be completed by the contracting officer.

Program offices and contracting officers are encouraged to work closely with their respective small business specialists to identify 8(a) firms to include Native Enterprises (Alaska Native Corporations, Tribal and Native Hawaiian firms) that could provide needed services or supplies. The Department of Defense is committed to providing contracting opportunities to all small businesses, including 8(a) entities. The implementation of this interim rule will help strengthen our small business accomplishments.

The DPAP staff point of contact for small business procurement policy is Ms. Cassandra R. Freeman, 703.693.7062 or cassandra.freeman@osd.mil.

MEMORANDUM FOR DISTRIBUTION

SUBJECT: Section 811 of the National Defense Authorization Act for
Fiscal Year 2010

The attached Director, Defense Procurement and Acquisition Policy memorandum of June 16, 2011 is forwarded for your information and action, as appropriate. An interim rule published on March 16, 2011 amended the Federal Acquisition Regulation to implement Section 811 of the National Defense Authorization Act for Fiscal Year 2010. Section 811 requires that a written Justification and Approval be approved prior to sole source 8(a) awards over \$20 million. Further details are provided within the memorandum.

Please encourage your program offices and contracting officers to work with their respective small business specialists to identify 8(a) firms that could provide needed services or supplies, to strengthen DoD's small business accomplishments.

My point of contact is Gabrielle Trickett, gabrielle.trickett@navy.mil, 703-614-9641.

SUBJECT: Section 811 of the National Defense Authorization Act for Fiscal Year 2010

The Federal Acquisition Regulation (FAR) was recently amended with the March 16, 2011 publication of the interim rule to implement Section 811 of the National Defense Authorization Act for Fiscal Year 2010. Public comments to assist in finalizing the rule were received on May 16, 2011. Section 811 requires that a written Justification and Approval (J&A) be approved prior to the award of sole-source contracts over \$20 million to an 8(a) contractor. The \$20 million requirement for the J&A is not a ceiling or a cap. Though FAR 6.303-2 has 12 elements that are to be responded to when drafting the contents of a J&A, the interim rule for 8(a) contracts only requires five elements to be completed by the contracting officer.

Program offices and contracting officers are encouraged to work closely with their respective small business specialists to identify 8(a) firms to include Native Enterprises (Alaska Native Corporations, Tribal and Native Hawaiian firms) that could provide needed services or supplies. The Department of Defense is committed to providing contracting opportunities to all small businesses, including 8(a) entities. The implementation of this interim rule will help strengthen our small business accomplishments.

The DPAP staff point of contact for small business procurement policy is Ms. Cassandra R. Freeman, 703.693.7062 or cassandra.freeman@osd.mil.

FAR PART 6 JUSTIFICATION FORMAT

Justification for OTFAOC (Template)

Sole-Source J&A accomplished IAW FAR Subparts 6.203-5 and 19.808, 19.1306, and 19.1406

NOTE: Contracting officers must be sensitive about proprietary information when posting justifications. Contracting officers shall carefully screen all justifications for contractor proprietary information and remove such information before making available to the public. Contracting officers are to adhere to the exemptions on disclosure of information contained in the Freedom of Information Act (5 U.S.C. 552) and the prohibitions against disclosure in FAR 24.202 in determining the information that should be removed.

On average, the J&A document should be between 5 and 7 pages in length.

****GUIDANCE LANGUAGE IS ITALICIZED IN RED FONT. REMOVE ALL GUIDANCE LANGUAGE IN THE FINAL DOCUMENT****

Purchase Request Number:
Contract Number:
Task/Delivery Order Number:
Procurement Title:
Contracting Office:
Estimated Value: \$
Statutory Authority: *15 U.S.C. 637(a) (8(a) sole-source) or 15 U.S.C. 657a (HubZONE sole-source) or 15 U.S.C. 657f (SDVOSB sole-source)*

Note that a Sole Source J&A is NOT required for 8(a) set-asides less than or equal to \$20M (FAR 6.302-5(c)(2)(iii))

JUSTIFICATION FOR OTHER THAN FULL AND OPEN COMPETITION

Justification for OTFAOC Number: *(Assigned by Procuring Activity Competition Advocate)*

Upon the basis of the following justification, I, as the *[insert title of appropriate official]*, hereby approve the use of other than full and open competition of the proposed contractual action pursuant to the authority of *15 U.S.C. 637(a) (8(a) sole-source) or 15 U.S.C. 657a (HubZONE sole-source) or 15 U.S.C. 657f (SDVOSB sole-source)*

JUSTIFICATION

1. **REQUIRING AGENCY AND CONTRACTING OFFICE:** *Specify the requiring agency and the DITCO contracting activity responsible for accomplishing the contract action. (FAR 6.303-2(b)(1))*

2. **NATURE/DESCRIPTION OF ACTION(S):** *Describe the nature of the contractual action for which approval is requested (i.e., new contract, modification). Include type of contract (e.g.*

FFP, CPAF) type and year of funds to be used (e.g. R&D, Procurement, O&M); and estimated share and ceiling arrangements, when applicable. (FAR 6.303-2(b)(2))

3.. DESCRIPTION OF SUPPLIES/SERVICES: *A brief description of the supplies and/or services required to meet the agency's needs, including the delivery schedule and/or the period of performance (inclusive of all option periods), and the estimated life-cycle costs of the procurement). (FAR 6.303-2(b)(3) and FAR 6.303-2(d)(1))*

(a) *Explain the requirement in layman's terms so it can be understood by a non-technical reviewer who is not familiar with the requiring activity or the project.*

(1) *If the action described is a modification to an existing contract, be sure to distinguish clearly between the work covered by the basic contract and the additional work to be obtained by the proposed modification.*

(2) *Identify the customer activity.*

(3) *State option quantities and/or performance periods.*

(b) *If FAR 52.237-3 (Continuity of Services) and/or 52.217-8 (Option to Extend Services) will be included in a noncompetitive bridge contract action, be sure to mention each and its associated potential time period and dollar value. These two clauses should be considered for inclusion in competitive contracts to preclude the necessity for later noncompetitive actions if the follow-on is delayed or if a phase-in/phase-out period is required.*

4. IDENTIFICATION OF STATUTORY AUTHORITY: *Identify the statutory authority, FAR Citation and FAR Exception Description permitting other than full and open competition.*

5. A DETERMINATION THE USE OF A SOLE SOURCE IS IN THE BEST INTEREST OF THE AGENCY CONCERN: *Discuss how this particular sole source procurement provides the best possible solution for the Government. Discuss the contracting officer's compliance with applicable Part 19 sole source set-aside requirements. Identify the proposed sole source contractor and discuss the unique capabilities, experience, expertise, etc. that the contractor has that makes the firm the best firm to perform the required work. Identify the constraints of the procurement, such as schedule requirements or unique features and mandatory requirements which create a sole source environment. (FAR 6.303-2(b)(5) and 6.303-2(d)(3)).*

6. FEDBIZOPPS ANNOUNCEMENT/POTENTIAL SOURCES: *Describe efforts made to ensure that offers are solicited from as many potential sources as is practicable. Also indicate whether a notice was or will be published as required by FAR 5.2, and, if not, which exemption under FAR 5.202 applies. (FAR 6.303-2(b)(6))*

7. DETERMINATION OF FAIR AND REASONABLE COST: *Include a statement by the contracting officer that the anticipated cost will be considered fair and reasonable and provide the basis for this determination. Indicate the method to be used by the contracting officer to determine that the resulting contract costs or prices will be fair and reasonable. Examples of such methods include results of the limited competition, comparison of proposed costs or prices*

with costs or prices for similar supplies or services, the extent of cost or price analysis anticipated (including the requirements for certified cost or pricing data), technical evaluations, and audit of vendor costs (if vendor is compliant with Cost Accounting Standards). (FAR 6.303-2(b)(7)) and 6.303-2(d)(4).

8. MARKET RESEARCH: *Describe the extent of the market research (FAR 10.002) conducted to identify all qualified sources and the results thereof. Research must have been meaningful and conducted within the previous 12 months. The J&A must include a detailed description and results of the market research (including who, what, when, where, why and the outcome) or a statement discussing why it was not conducted. The J&A should also fully analyze any alternative strategies to using an exception to full and open competition and indicate that a good faith effort to consider viable alternatives. (FAR 6.303-2(b)(8)).*

9. ANY OTHER SUPPORTING FACTS: *Indicate any other facts supporting the use of the authority. If technical data packages, specifications, engineering descriptions, statements of work, or purchase descriptions have not been developed or are not available, explain why. (FAR 6.303-2(b)(9) and 6.303-2(d)(5))*

10. LISTING OF INTERESTED SOURCES: *Provide a listing of the sources, if any, which expressed, in writing, an interest in the procurement. (FAR 6.302-2(b)(10)).*

11. ACTIONS THE AGENCY MAY TAKE TO REMOVE OR OVERCOME BARRIERS THAT LED TO THE EXCEPTION TO FULL AND OPEN COMPETITION. *(FAR 6.302-2(b)(11))*

- (a) Procurement History.** *The following items of information are expected.*
- (1) Contract numbers and dates of the last several awards for this action.*
 - (2) Competitive status of these actions.*
- (b)** *Briefly describe the actions proposed to remove barriers to full and open competition/fair opportunity/need for limited sources/need for brand-name and explain the results thereof, if a J&A was prepared to support any related prior procurement(s).*
- (c)** *If any related prior award was accomplished without the need for a brand-name, exception to fair opportunity, limited-sources, and/or exception to full and open competition justification, explain the changed circumstances in detail.*

Required certifications/approvals should begin on a separate page.

TECHNICAL CERTIFICATION: I certify that the supporting data under my cognizance which are included in the J&A are accurate and complete to the best of my knowledge and belief.

[FAR Case 2009-038, Docket 2010-0095; Sequence 1]

Federal Acquisition Regulation: Tribal Consultation: Justification and Approval of Sole-Source 8(a) Contracts

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of tribal consultation and outreach meetings and request for comments.

SUMMARY: The Federal Acquisition Regulatory Council (FAR Council) will hold tribal consultation and outreach meetings to discuss rulemaking associated with section 811 of the National Defense Authorization Act (NDAA) for F 2010, Public Law 111-84. Section 811 addresses requirements for the justification and approval of sole source contracts over 20 million under the 8(a) small business development program. Presentations made during the meetings will be taken into consideration by the FAR Council as it develops changes to the Federal Acquisition Regulation (FAR) to implement section 811.

DATES: The meetings will be held during the month of October in Washington, DC, Albuquerque, NM, and Fairbanks,

AK. For more detailed information about the consultation registration procedures, dates, location, times, and agendas, please see <http://www.acq.osd.mil/dpap/dars/section811.html>.

FOR FURTHER INFORMATION CONTACT: For questions about registration, the submission of comments, or for clarification of the subject matter of the consultation and outreach, submit them to the e mail address identified at <http://www.acq.osd.mil/dpap/dars/section811.html>. Please put "Consultation questions" in the subject line of the e mail.

SUPPLEMENTARY INFORMATION:

A. Additional Information

Procedures for the consultation and outreach: The FAR Council respectfully requests that any elected or appointed representatives of the tribal communities that are interested in attending the consultation and outreach meeting preregister and indicate whether they would like to make a presentation during the meeting. Registration is on a first come first served basis. To pre register, please go to <http://www.acq.osd.mil/dpap/dars/section811.html> and send an e mail to the address identified on the site with your name, organization affiliation, address, telephone number, e mail address, and fax number, and indicate which consultation and outreach session you are interested in attending. Please put "Consultation Registration" in the subject line of the e mail.

Formal oral presentations: The purpose of these consultations and outreach is to encourage meaningful dialogue with tribal officials regarding the development of federal acquisition policy when implementing section 811 of the NDAA 2010. In addition, participants interested in making formal oral presentations during the meeting should provide the following information by the preregistration deadline stated on <http://www.acq.osd.mil/dpap/dars/section811.html>: Name, organization affiliation, address, telephone number, e mail address, and fax number. Based on the number of registrants requesting time for presentations, the FAR Council may ask participants to limit the length of their formal presentations so that all attendees wishing to speak have the opportunity to be heard and there is adequate time for discussion.

Written comments: The FAR Council welcomes written statements from attendees making formal oral presentations, other attendees, and members of the tribal communities who

are unable to attend the meeting but wish to share their views on the development of regulations to implement section 811. Written comments may be submitted to the e-mail address identified at <http://www.acq.osd.mil/dpap/dars/section811.html>. Please provide your name, organization affiliation, address, telephone number, e-mail address, and fax number. Please put "Consultation Comments" in the subject line of the e-mail. Parties wishing to have their written comments shared at the meeting should ensure comments are received by the deadlines stated on Web site.

Meeting accommodations: The meeting is physically accessible to persons with disabilities. For information on facilities or services for individuals with disabilities or to request special assistance at the meeting, contact the Special Assistance Contact via the telephone number or e-mail address listed on <http://www.acq.osd.mil/dpap/dars/section811.html>.

B. Background

Section 811 of the FY 2010 NDAA establishes a new requirement for Federal agencies to justify a sole-source contract award to a business under the Small Business Administration's 8(a) business development program, including businesses owned by Indian Tribes and Alaska Native Corporations, if the sole-source award is to exceed \$20 million. The 8(a) program enables contract awards to be made to socially and economically disadvantaged small business concerns using the Small Business Administration (SBA) as the prime contractor to the requiring agency.

Section 811 states that a sole-source justification must include the following information: (1) A description of the needs of the agency concerned for the matters covered by the contract, (2) a specification of the statutory provision providing the exception from the requirement to use competitive

procedures in entering into the contract, (3) a determination that the use of a sole-source contract is in the best interest of the agency concerned, (4) a determination that the anticipated cost of the contract will be fair and reasonable, and (5) such other matters as the head of the agency concerned shall specify. Before an award can be made, the justification must be approved by an appropriate official, as specified in statute. Section 811 does not require a justification and approval (J&A) if the contract award is equal to or less than \$20 million. Similar to the handling of J&As for other sole-source awards, J&As prepared pursuant to section 811 must be made public within 14 days after contract award is made. Finally, section 811 requires that the FAR—the government-wide regulation governing the Federal acquisition process—be revised to reflect its revisions.

The FAR Council is responsible for overseeing the development and maintenance of the FAR, including changes to implement section 811. Its members include the Administrator for Federal Procurement Policy, who serves as the chair of the Council and is a senior official in the Office of Management and Budget, and senior acquisition officials from the Department of Defense, the General Services Administration, and the National Aeronautics and Space Administration.

The FAR Council believes the conduct of tribal consultation and outreach in connection with section 811 will be a valuable component of its deliberations in preparing to implement this law, which includes contracting with Indian Tribes and Alaska Native Corporations. As explained in E.O. 13175, Tribal consultation is a critical component of a sound and productive Federal-Tribal relationship. The President's Memorandum of November 5, 2009 underscores this Administration's commitment to regular and meaningful consultation with tribal officials in policy decisions that have

tribal implications. The FAR Council seeks tribal consultation and outreach in connection with section 811 to allow for constructive dialogue and an opportunity for the FAR Council to hear the views of the tribal community, Tribal Leaders, Elders and elected members of Alaska Native Villages or their appointed representatives on how this law may affect the ability of Indian Tribes and Alaska Native Corporations to receive Federal contracts under the 8(a) Program. Officials from the Small Business Administration will also participate in the consultation and outreach.

Attendees who plan to make oral presentations during the meeting are also encouraged to provide a written copy of their statements and any supplementary material they believe is relevant and will assist the FAR Council in its deliberations. Electronic or digitized copies are especially welcomed. FAR Council members or other officials representing the FAR Council may ask questions of individuals making formal oral presentations during the meeting to clarify or further explain their statements. The FAR Council will analyze the presentations, both oral and written, along with any written comments received. Following consultation and outreach and analysis of comments from the tribal community, the FAR Council will prepare a rule for review by the Office of Management and Budget pursuant to Executive Order 12866, *Regulatory Planning and Review*. Members of the public at large, as well as tribal officials, will have the opportunity to provide written comments on FAR changes to implement section 811, which will be considered by the FAR Council, before a final rule is promulgated.

Dated: August 26, 2010.

Edward Loeb,

Director, Acquisition Policy Division.

Federal Acquisition Regulation; Justification and Approval of Sole-Source 8(a) Contracts

AGENCIES: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Interim rule.

SUMMARY: DoD, GSA, and NASA are issuing an interim rule amending the Federal Acquisition Regulation (FAR) to implement section 811 of the National Defense Authorization Act for Fiscal Year 2010. This FAR change encourages agencies to maximize the effective use of competition by making certain that the proper Justification and Approval (J&A) is obtained prior to award of 8(a) sole-source contracts over \$20 million, as required by section 811.

DATES: *Effective Date:* March 16, 2011.

Comment Date: Interested parties should submit written comments to the Regulatory Secretariat on or before May 16, 2011 to be considered in the formulation of a final rule.

ADDRESSES: Submit comments identified by FAC 2005-50, FAR Case 2009-038, by any of the following methods:

- *Regulations.gov:* <http://www.regulations.gov>. Submit comments via the Federal eRulemaking portal by inputting "FAR Case 2009-038" under the heading "Enter Keyword or ID" and selecting "Search." Select the link "Submit a Comment" that corresponds with "FAR Case 2009-038." Follow the instructions provided at the "Submit a Comment" screen. Please include your name, company name (if any), and "FAR Case 2009-038" on your attached document.

- *a:* (202) 501-4067.
- *ail:* General Services Administration, Regulatory Secretariat (MVCB), ATTN: ada Flowers, 1275 First Street, NE., 7th Floor, Washington, DC 20417.

Instructions: Please submit comments only and cite FAC 2005-50, FAR Case 2009-038, in all correspondence related to this case. All comments received will be posted without change to <http://www.regulations.gov> including any personal and/or business confidential information provided.

FOR FURTHER INFORMATION CONTACT: Mr. Anthony Robinson, Procurement Analyst, at (202) 501-2658, for clarification of content. For information pertaining to status or publication schedules, contact the Regulatory Secretariat at (202) 501-4755. Please cite FAC 2005-50, FAR Case 2009-038.

SUPPLEMENTARY INFORMATION:

I. Background

DoD, GSA, and NASA are issuing an interim rule amending the FAR, to implement section 811 of the National Defense Authorization Act for Fiscal Year 2010 (Pub. L. 111-84), enacted October 28, 2009. Section 811 requires

a J&A prior to awarding a sole-source contract in an amount over \$20 million under the 8(a) program (15 U.S.C. 637(a)). This written J&A must be approved by an appropriate official and, after award, made public. Authorized by 15 U.S.C. 637(a), the 8(a) program enables contract awards to be made to small business concerns determined eligible for the 8(a) program by the Small Business Administration (SBA).

The requirement for a J&A is not a ceiling or a "cap" on sole-source awards over \$20 million for 8(a) contractors. The statute requires execution of a J&A documenting the reasons for making the award on a sole-source basis rather than competing among the small businesses in the 8(a) program. Prior to the enactment of section 811, a sole-source award of a new contract made using the 8(a) contracting authority did not require a J&A, regardless of the dollar value, and the new statute does not institute any requirement for a J&A for sole-source 8(a) awards that are less than or equal to \$20 million.

II. Discussion and Analysis

Section 811 became effective on the date of enactment, October 28, 2009.

Section 811 addresses requirements for the J&A of sole-source contracts over \$20 million under the 8(a) small-business development program.

The Federal Acquisition Regulatory Council (FAR Council) held three Tribal consultation and outreach meetings to discuss rulemaking associated with section 811.

The meetings took place during October 2010 in Washington, DC; Albuquerque, New Mexico; and Fairbanks, Alaska (see the meeting notice that was published in the *Federal Register* on August 31, 2010 at 75 FR 53269). Transcripts of the meetings are available at http://www.ac.osd.mil/dpap/dars/section_docs.html.

After the meetings, DoD, GSA, and NASA weighed the costs and benefits of publishing this rule as proposed or interim. The rule is being published as interim, rather than proposed, because the rule is implementing a statutory mandate, and the statutory date for issuance of regulations has already passed. Because this is an interim rule, the public will have another opportunity to comment. These additional comments could result in further changes in the final rule.

A frequently heard comment at the October meetings was a request that the FAR not use the 12 elements currently required at FAR 6.303-2 for J&As for less than full-and-open competition, but instead limit the elements to be addressed to the five elements listed in

section 811(b), which are set forth as follows:

(1) A description of the needs of the agency concerned for the matters covered by the contract;

(2) A specification of the statutory provision providing the exception from the requirement to use competitive procedures in entering into the contract;

(3) A determination that the use of a sole-source contract is in the best interest of the agency concerned;

(4) A determination that the anticipated cost of the contract will be fair and reasonable; and

(5) Such other matters as the head of the agency concerned shall specify.

DoD, GSA, and NASA have drafted the interim FAR rule to adopt only these five elements. DoD, GSA, and NASA did not adopt the suggestions raised in the October meetings (1) not to include the fair and reasonable price determination and (2) not to allow agency heads to address any matter, without specific limits (the fifth element set out in section 811). A determination that the anticipated cost of a contract will be fair and reasonable is a universal requirement in Federal contracting; including the requirement in the J&A would be sensible, even if it were not specifically required by section 811.

A common issue raised in the meetings was that the fifth element, "Such other matters as the head of the agency concerned shall specify," was too broad. DoD, GSA, and NASA

determined that it made sense to allow agency heads to identify other factors supporting the decision to make a sole-source 8(a) award. By retaining the wording from the statute, agency heads retain the discretion to consider such factors as Indian economic development or meeting agency small business contracting goals—both factors that participants in the October meetings offered as legitimate reasons to make a sole-source award.

Commenters at the meetings and in the written comments also requested that the "over \$20 million" threshold for requiring a J&A be applied only to the base year of a contract. For example, if a requirement was for \$75 million, with a base year estimate of \$15 million and four one-year \$15 million options, commenters stated their belief that the requirement should not need a J&A because the base-year amount was not over \$20 million. DoD, GSA, and NASA have declined to use the base year amount as the basis for determining the applicability of the J&A requirement. The FAR (1.108(c)) establishes the following rule:

- *Dollar thresholds.* Unless otherwise specified, a specific dollar threshold for the

purpose of applicability is the final anticipated dollar value of the action, including the dollar value of all options. If the action establishes a maximum quantity of supplies or services to be acquired or establishes a ceiling price or establishes the final price to be based on future events, the final anticipated dollar value must be the highest final priced alternative to the Government, including the dollar value of all options.

Unless there is a specific reason, such as a statutory requirement to establish the dollar value of a procurement using a different method, agencies will not deviate from this FAR convention.

Commenters also requested that the requirement for the agency head to approve the J&A be delegated down to a much lower level, such as the contracting officer. FAR 1.108(b) states the following:

- *Delegation of authority.* Each authority is delegable unless specifically stated otherwise. * * *

J&As are delegable, but there are limits on the redelegation authority based on the dollar value of the procurement; these are stated at FAR 6.304. The competition advocate for the procuring activity and the head of the approval authorities to ensure the J&A is prepared and coordinated properly within the agency. Unless there is a specific reason, agencies will not deviate from the FAR convention at FAR 6.304.

A commenter was concerned about whether "fair and reasonable price" equates to "fair market price." The FAR provides various provisions to address the commenter's concern. The various techniques that contracting officers may use to determine that a price is fair and reasonable are described at FAR 15.404–1, Proposal analysis techniques. With regard to 8(a) contracts, FAR 19.202–6(b) states that contracting officers shall follow the procedures at FAR 19.807, which reads in pertinent part as follows:

- Estimating fair market price.
 - The contracting officer shall estimate the fair market price of the work to be performed by the 8(a) contractor.
 - In estimating the fair market price for an acquisition other than those covered in paragraph (c) of this section, the contracting officer shall use cost or price analysis and consider commercial prices for similar products and services, available in-house cost estimates, data (including certified cost or pricing data) submitted by the SBA or the 8(a) contractor, and data obtained from any other Government agency.

As required by the FAR, agencies will continue to use the existing regulations to evaluate prices offered for 8(a) contracts over \$20 million.

The changes made by the interim rule are summarized as follows:

(1) Cross references to the requirement for a J&A when the procurement is a sole-source 8(a) over \$20 million are added at FAR 6.204, entitled "Section 8(a) competition," FAR 6.302–5, entitled "Authorized or required by statute," and in 19.808–1, entitled "Sole source".

(2) FAR 6.302–5, which sets forth the situations in which other than full-and-open competition is authorized or required by statute, has been modified to clarify that, while 8(a) sole-source awards are still authorized, they now must be supported by a J&A prior to award when the total estimated contract amount is over \$20 million.

(3) Circumstances requiring a J&A for other than full-and-open competition have been expanded to include a new FAR 6.303–1(b) that includes the section 811(a) prohibition against awarding a sole-source 8(a) contract over \$20 million unless a written J&A is approved by the appropriate official and made public after award.

(4) FAR 6.303–2, Content, (of the J&A) has a new paragraph that lists the five required elements for the sole-source 8(a) J&A from section 811.

(5) FAR 19.808–1(a), Sole source, was revised to inform the contracting officer that the SBA may not accept for negotiation a sole-source 8(a) contract over \$20 million unless the requesting agency has completed a J&A in accordance with the requirements at FAR 6.303.

Other requirements of section 811 were reviewed by DoD, GSA, and NASA and determined to be fully covered by the existing FAR. The specific areas reviewed included—

(1) *The definition of a "covered procurement" at section 811(c)(1).* Review determined that covered procurements, for the purposes of section 811, are those made under the SBA's Section 8(a) program. Therefore, it was not necessary to define and use the term "covered procurement" in this rule.

(2) *The definition of "head of an agency" at section 811(c)(2).* Review of the statutory references in this section determined that the FAR-wide definition of this term at FAR 2.101 could be used.

(3) *The definition of "appropriate official" at section 811(c)(3).* The statutory references provided in this section equate to those currently in FAR 6.304, Approval of the Justification.

(4) *Requirement for synopses of proposed procurement actions.* The existing FAR synopsis requirements at subpart 5.2, Synopses of Proposed

Contract Actions, were reviewed. No change is proposed to FAR 5.202. Exceptions, or FAR 5.205, Special situations, because the statute did not modify the existing 8(a) synopsis requirements.

(5) *Requirement at section 811(a)(3) to make the J&A and related information available to the public.* This statutory requirement matches the J&A publication requirements added by the National Defense Authorization Act for Fiscal Year 2008, section 844, entitled "Public Disclosure of Justification and Approval Documents for Noncompetitive Contracts" (FAR Case 2008-003). The latter FAR case added the requirement to FAR 6.305. Availability of the justification. Any J&A issued for an 8(a) sole-source contract award over \$20 million will require posting in accordance with FAR 6.305, but no further change to that section is necessary.

Various commenters at the public meetings questioned whether contracting officers will be trained on the content of this rule implementing section 811. DoD, GSA, and NASA have prepared and submitted documentation to the Defense Acquisition University and the Federal Acquisition Institute to coordinate the appropriate changes in training curricula.

III. Executive Order 12866

This is a significant regulatory action and, therefore, was subject to review under Section 6(b) of Executive Order 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

IV. Regulatory Flexibility Act

DoD, GSA, and NASA do not expect this interim rule to have a significant negative economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the rule does not impose any requirements on the majority of small businesses. Therefore, an Initial Regulatory Flexibility Analysis has not been performed. It is recognized that a very small number of businesses that have been awarded 8(a) contracts over the \$20 million threshold may be impacted. However, the rule does not limit the number of contracts or dollars awarded to these businesses. The rule may also indirectly benefit the 9,165, currently certified section 8(a) firms by improving their likelihood of a contract award through increased competition, but this impact is similarly considered not significant.

Also, the FAR Council has limited flexibility in this case as the rule

implements in the FAR statutory requirements mandated by section 811, Justification and Approval of Sole-Source Contracts, of the National Defense Authorization Act for Fiscal Year 2010.

DoD, GSA, and NASA invite comments from small business concerns and other interested parties on the expected impact of this rule on small entities.

DoD, GSA, and NASA will also consider comments from small entities concerning the existing regulations in subparts affected by the rule in accordance with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 610, (FAC 2005-50, FAR Case 2009-038) in correspondence.

V. Paperwork Reduction Act

The interim rule implements section 811, which prohibits the award of a sole-source contract in an amount over \$20 million under the 8(a) program authority (15 U.S.C. 637(a)) without the contracting officer first obtaining a written J&A approved by an appropriate official and making public the J&A and related information. This additional paperwork requirement is internal to the Government and does not contain any information collection requirements that require the approval of the Office of Management and Budget under the Paperwork Reduction Act (44 U.S.C. chapter 35).

VI. Determination To Issue an Interim Rule

A determination has been made under the authority of the Secretary of Defense (DoD), the Administrator of General Services (GSA), and the Administrator of the National Aeronautics and Space Administration (NASA) that urgent and compelling reasons exist to promulgate this interim rule without prior opportunity for public comment. This action is necessary because the National Defense Authorization Act for Fiscal Year 2010 (Pub. L. 111-84) was enacted on October 28, 2009. Section 811 required the FAR to be revised no later than 180 days after enactment, or April 26, 2010. Absent implementation of this interim rule, section 811 will not be implemented in the FAR and agencies will not be compliant with this provision. However, pursuant to 41 U.S.C. 1707 and FAR 1.501-3(b), DoD, GSA, and NASA will consider public comments received in response to this interim rule in the formation of the final rule.

List of Subjects in 48 CFR Parts 6, 15, and 19

Government procurement.

Dated: March 4, 2011.

Millisa Gary,

Acting Director, Office of Governmentwide Acquisition Policy.

Therefore, DoD, GSA, and NASA amend 48 CFR parts 6, 15, and 19 as set forth below:

■ 1. The authority citation for 48 CFR parts 6, 15, and 19 continues to read as follows:

Authority: 40 U.S.C. 121(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 6—COMPETITION REQUIREMENTS

■ 2. Amend section 6.204 by adding a sentence to the end of paragraph (b) to read as follows:

6.204 Section 8(a) competition.

* * * * *

(b) * * * (But see 6.302-5 and 6.303-1 for sole source 8(a) awards over \$20 million.)

■ 3. Amend section 6.302-5 by revising paragraphs (b)(4) and (c)(2) to read as follows:

6.302-5 Authorized or required by statute.

* * * * *

(b) * * *

(4) Sole source awards under the 8(a) Program (15 U.S.C. 637), but see 6.303 for requirements for justification and approval of sole-source 8(a) awards over \$20 million. (See subpart 19.8.)

* * * * *

(c) * * *

(2) Contracts awarded using this authority shall be supported by the written justifications and approvals described in 6.303 and 6.304, except for—

(i) Contracts awarded under (a)(2)(ii) or (b)(2) of this subsection;

(ii) Contracts awarded under (a)(2)(i) of this subsection when the statute expressly requires that the procurement be made from a specified source. (Justification and approval requirements apply when the statute authorizes, but does not require, that the procurement be made from a specified source); or

(iii) Contracts less than or equal to \$20 million awarded under (b)(4) of this subsection.

* * * * *

■ 4. Amend section 6.303-1 by redesignating paragraphs (b), (c), and (d) as paragraphs (c), (d), and (e), respectively; and adding a new paragraph (b) to read as follows:

6.303-1 Requirements.

* * * * *

(b) The contracting officer shall not award a sole-source contract under the 8(a) authority (15 U.S.C. 637(a)) for an amount exceeding \$20 million unless—

(1) The contracting officer justifies the use of a sole-source contract in writing in accordance with 6.303-2;

(2) The justification is approved by the appropriate official designated at 6.304; and

(3) The justification and related information are made public after award in accordance with 6.305.

* * * * *

■ 5. Amend section 6.303-2 by—

■ a. Redesignating paragraphs (a) and (b) as paragraphs (b) and (c), respectively;

■ b. Adding a new paragraph (a);

■ c. Revising newly redesignated paragraph (b) introductory text; and

■ d. Adding a new paragraph (d).

The added and revised text reads as follows:

6.303-2 Content.

(a) Each justification shall contain sufficient facts and rationale to justify the use of the specific authority cited.

(b) As a minimum, each justification, except those for sole-source 8(a) contracts over \$20 million (see paragraph (d) of this section), shall include the following information:

* * * * *

(d) As a minimum, each justification for a sole-source 8(a) contract over \$20 million shall include the following information:

(1) A description of the needs of the agency concerned for the matters covered by the contract.

(2) A specification of the statutory provision providing the exception from the requirement to use competitive procedures in entering into the contract (see 19.805-1).

(3) A determination that the use of a sole-source contract is in the best interest of the agency concerned.

(4) A determination that the anticipated cost of the contract will be fair and reasonable.

(5) Such other matters as the head of the agency concerned shall specify for purposes of this section.

6.304 [Amended]

■ 6. Amend section 6.304 by removing from paragraph (a)(1) “6.303-2(a)(12)” and adding “6.303-2(b)(12)” in its place.

PART 15—CONTRACTING BY NEGOTIATION**15.607 [Amended]**

■ 7. Amend section 15.607 by removing from paragraph (b)(2) “6.303-2(b)” and adding “6.303-2(c)” in its place.

PART 19—SMALL BUSINESS PROGRAMS

■ 8. Amend section 19.808-1 by redesignating paragraphs (a) and (b) as paragraphs (b) and (c), respectively; and adding a new paragraph (a) to read as follows:

19.808-1 Sole source.

(a) The SBA may not accept for negotiation a sole-source 8(a) contract that exceeds \$20 million unless the requesting agency has completed a justification in accordance with the requirements of 6.303.

* * * * *

Federal Acquisition Regulation; Additional Requirements for Market Research

AGENCY: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: DoD, GSA, and NASA have adopted as final, with changes, the interim rule amending the Federal Acquisition Regulation (FAR) to implement section 826, Market Research, of the National Defense Authorization Act for Fiscal Year 2008. Section 826 requires the head of an agency to take appropriate steps to ensure that any prime contractor of a contract (or task order or delivery order) in an amount in excess of \$5 million for the procurement of items other than commercial items engages in market research as necessary before making purchases.

DATES: *Effective Date:* April 15, 2011.

FOR FURTHER INFORMATION CONTACT: Ms. Ori Sakalos, Procurement Analyst, at (202) 208-0498, for clarification of content. For information pertaining to status or publication schedules, contact the Regulatory Secretariat at (202) 501-4755. Please cite FAC 2005-50, FAR Case 2008-007.

SUPPLEMENTARY INFORMATION:**I. Background**

DoD, GSA, and NASA published an interim rule in the **Federal Register** at 75 FR 34277 on June 16, 2010, to implement section 826, Market Research, of the National Defense Authorization Act for Fiscal Year 2008 (Pub. L. 110-181). Section 826 establishes additional requirements in subsection (c) of 10 U.S.C. 2377. As a matter of policy, these requirements are extended to all executive agencies. Specifically, the head of the agency must conduct market research before issuing an indefinite-delivery indefinite-quantity task or delivery order for a noncommercial item in excess of the simplified acquisition threshold. In addition, a prime contractor with a contract in excess of \$5 million for the procurement of items other than commercial items is required to conduct market research before making purchases that exceed the simplified acquisition threshold for or on behalf of the Government. Three respondents submitted 16 comments on the interim rule.

II. Discussion/Analysis

Public Comments: A discussion of the comments and the changes made to the rule as a result of those comments are provided as follows:

A. Purpose

1. *Comment:* no respondent stated that the guidance does not appear to explain the end purpose of the market research. Another respondent, however, concluded that the FAR states the purpose of the market research twice, in FAR 44.402(b) and 10.001(a)(3). The second respondent stated that the purpose for conducting market research is “clearly described in part 10 and there is no reason to repeat that same language elsewhere in the FAR.”

Response: The Defense Acquisition Regulations Council and the Civilian Agency Acquisition Council (the Councils) agree with the second respondent. FAR part 10 “prescribes policies and procedures for conducting market research to arrive at the most suitable approach to acquiring, distributing, and supporting supplies and services” (FAR 10.000). FAR 10.001(a)(3) lists the ways in which the

Federal Acquisition Regulation;
Justification and Approval of Sole-
Source 8(a) Contracts

AGENCY: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: DoD, GSA, and NASA are adopting as final, without change, an interim rule amending the Federal Acquisition Regulation (FAR) to implement a section of the National Defense Authorization Act for Fiscal Year 2010. This section requires the head of an agency to execute and make public prior to award, the justification for an 8(a) sole-source contract in an amount exceeding \$20 million.

DATES: Effective Date: April 18, 2012.

FOR FURTHER INFORMATION CONTACT: Mr. Karlos Morgan, Procurement Analyst, at 202-501-2364, for clarification of content. For information pertaining to status or publication schedules, contact the Regulatory Secretariat at 202-501-4755. Please cite FAC 2005-58, FAR Case 2009-038.

SUPPLEMENTARY INFORMATION:**I. Background**

DoD, GSA, and NASA published an interim rule in the *Federal Register* at 76 FR 14559 on March 16, 2011, to implement section 811 of the National Defense Authorization Act for Fiscal Year 2010 (NDAA for FY 2010) (Pub. L. 111-84). Section 811 prohibits the award of a sole-source contract in an amount over \$20 million under the 8(a) Business Development Program authority (15 U.S.C. 637(a)) without first obtaining a written Justification and Approval (J&A) approved by an appropriate official and making public the J&A and related information. Section 811 does not institute any requirement for J&As for sole-source 8(a) contracts less than or equal to \$20 million. Nine respondents submitted comments on the interim rule.

II. Discussion and Analysis

The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council (the Councils) reviewed the public comments in the development of the final rule. A discussion of the comments is provided as follows:

A. Summary of Significant Changes

There were no changes made to the FAR as a result of the public comments received.

B. Analysis of Public Comments**1. General Support for the Rule as Written**

Comment: A majority of the respondents were supportive of the rule as written and recommended there be no substantial changes to the interim rule.

Response: The Councils acknowledge receipt of these comments in support of the rule.

2. Statutory Basis for the Rule

Comment: A number of respondents commented that there is no statutory basis for the new language at FAR 19.808-1(a), which states that the Small Business Administration (SBA) may not accept a sole-source 8(a) contract in excess of \$20 million for negotiation, unless the requesting agency has completed a J&A in accordance with FAR 6.303. The respondents recommended amending this language in the final rule to clarify that the J&A is only required to be developed and executed prior to award and after coordinating and negotiating with the SBA (or the 8(a) participant where SBA has delegated its authority to the procuring agency).

Response: The law stipulates that the head of the agency may not award a sole-source contract that exceeds \$20 million under the 8(a) program unless the contracting officer justifies the use of a sole-source contract in writing and the justification is approved by the appropriate official. However, the law does not specify the precise stage in the contract award process when the J&A must be executed. The language that was added to FAR 19.808-1 ensures that the J&A is executed prior to contract negotiation, a critical juncture in the contract award continuum. Contract negotiation, with rare exception, occurs before the contract is awarded; therefore there is no conflict with the law.

Execution of the J&A prior to the SBA's initiation of contract negotiations adheres to the established procedures in the FAR that require (1) at FAR 6.303-1, the contracting officer to justify the

use of a sole-source contract in writing prior to negotiations; and (2) at FAR 19.804-2, the agency, if appropriate, to request in its offering letter to the SBA, that a requirement with a contract value over the applicable competitive threshold be awarded as a sole-source contract under the 8(a) program. The language that was added at FAR 19.808-1 does not pre-empt the obligation of agencies to cooperate with the SBA in determining the extent to which a requirement should be offered in support of the 8(a) program, nor does it impact SBA's acceptance of the requirement into the 8(a) program. It does not affect the timing of SBA's eligibility determination.

3. Including the Value of Options in Contract Value

Comment: Several respondents recommended that the \$20 million threshold be applicable to the base year only, rather than including options in the total contract value.

Response: The standard contract action valuation practice is outlined in FAR 1.108(c), which provides that the final anticipated dollar value of an action include the dollar value of all options. Section 811 does not provide a basis to diverge from this standard.

4. Cross Reference at FAR 6.204(b)

Comment: no respondent recommended striking the parenthetical text at FAR 6.204(b), which references the requirements for a separate justification to support the use of 8(a) sole-source awards in FAR subpart 6.3, because it was unnecessary and potentially confusing.

Response: The Councils considered the comment, but find that the cross reference adds clarity to the FAR text.

5. Content of Justification

Comment: A number of respondents recommended that the language at FAR 6.303-2(d)(5) be amended in the final rule to clarify the other matters the head of the agency should consider when justifying and approving the award of a sole-source 8(a) contract in excess of \$20 million. These considerations should include Native American economic development and meeting agency small business goals.

Response: FAR 6.303-2(d)(5), as currently written, requires agency heads to address "Such other matters as the head of the agency concerned shall specify for purposes of this section." This gives agency heads the discretion to consider Native American economic development and meeting agency small business goals, as well as other relevant

matters when justifying and approving the award of a sole-source 8(a) contract.

6. Potential Impact on Native American-Owned Firms

Comment: Several respondents expressed concern regarding the possible impact facing Native American-owned enterprises. The respondents pointed out that the 8(a) program has undergone considerable reform over the last two years and has experienced overwhelming success in achieving its goals. The respondents also emphasized that the vast majority of Native American-owned enterprises have consistently provided high value support to their Government customers. In view of these considerations, the respondents requested that each executive agency send a policy directive to their contracting officers to outline the benefits of the SBA 8(a) program and the positive impact this program has had for Native participants.

Response: The benefits of SBA's 8(a) program and the positive impact this program has had for Native participants are promoted by SBA and the Office of Small and Disadvantaged Business Utilization (OSDBU) on a consistent basis throughout the Government. Each Federal agency with contracting authority has established an OSDBU. The OSDBU advocates for small, small disadvantaged (including the 8(a) program), veteran, service-disabled veteran-owned, HUBZone, and women-owned businesses. The OSDBU is charged with promoting increased access for small businesses to procurement opportunities, conducting outreach efforts, and providing liaison support for small and disadvantaged businesses. In addition, the OSDBU works closely with program officers and contracting officers to assist in the accomplishment of the annual Governmentwide 5 percent procurement goals for small disadvantaged businesses.

III. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting regulatory flexibility. This is a significant regulatory action and, therefore, was subject to review under section 6(b) of

E.O. 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

IV. Regulatory Flexibility Act

The Department of Defense, the General Services Administration, and the National Aeronautics and Space Administration certify that this final rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the rule does not impose any additional requirements on the majority of small businesses. The rule implements the statutory requirements mandated by section 811, Justification and Approval of Sole-Source Contracts, of the National Defense Authorization Act for Fiscal Year 2010. It is recognized that a very small number of businesses that have been awarded 8(a) contracts over the \$20 million threshold may be impacted. However, the rule does not limit the number of contracts or dollars awarded to these businesses. The rule may also indirectly benefit the 8,833 currently certified section 8(a) firms by improving their likelihood of a contract award through increased competition, but this impact is similarly considered not significant.

V. Paperwork Reduction Act

The final rule does not contain any information collection requirements that require the approval of the Office of Management and Budget under the Paperwork Reduction Act (44 U.S.C. chapter 35).

Federal Acquisition Regulation; Technical Amendments

AGENCY: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: This document makes amendments to the Federal Acquisition Regulation (FAR) in order to make editorial changes.

DATES: *Effective Date:* April 18, 2012.

FOR FURTHER INFORMATION CONTACT: The Regulatory Secretariat, 1275 First Street NE., 7th Floor, Washington, DC 20417, 202-501-4755, for information pertaining to status or publication schedules. Please cite FAC 2005-58, Technical Amendments.

SUPPLEMENTARY INFORMATION: In order to update certain elements in 48 CFR parts 1 and 52, this document makes editorial changes to the FAR.

List of Subjects in 48 CFR Parts 1 and 52

Government procurement.

Dated: April 11, 2012.

Laura Auletta,

Director, Office of Governmentwide Acquisition Policy, Office of Acquisition Policy, Office of Governmentwide Policy.

Therefore, DoD, GSA, and NASA amend 48 CFR parts 1 and 52 as set forth below:

■ 1. The authority citation for 48 CFR parts 1 and 52 continues to read as follows:

Authority: 40 U.S.C. 121(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 1—FEDERAL ACQUISITION REGULATIONS SYSTEM

■ 2. Amend section 1.201-1 by revising paragraph (c) to read as follows:

1.201-1 The two councils.

* * * * *

(c) The Director of the DAR Council shall be the representative of the Secretary of Defense. The operation of the DAR Council will be as prescribed by the Secretary of Defense.

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
March 4, 2015.

Ordered, That the following nomination be referred to the Committee on Armed Services:

Peter K. Levine, of Maryland, to be Deputy Chief Management Officer of the Department of Defense, vice Elizabeth A. McGrath.

[The biographical sketch of Mr. Peter K. Levine, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF PETER LEVINE

Education:

- Harvard Law School
 - September 1980 to June 1983
 - J.D., *magna cum laude*
- Harvard College
 - September 1975 to June 1979
 - A.B., *summa cum laude*

Employment Record:

- Senate Armed Services Committee
 - Staff Director
 - March 2013 to January 2015
 - General Counsel
 - January 2006 to March 2013 and May 2001 to January 2002
 - Minority Counsel
 - January 2002 to January 2006 and August 1996 to May 2001
- Office of Senator Carl Levin
 - Counsel
 - January 1995 to August 1996
- Subcommittee on Oversight of Government Management, Senate Governmental Affairs Committee
 - Counsel
 - January 1987 to January 1985
- Crowell & Moring
 - Associate
 - September 1983 to January 1987
 - Summer Associate
 - June 1982 to August 1982
- Brobeck, Phleger & Harrison
 - Summer Associate
 - June 1981 to August 1981

Honors and Awards:

- Editor, Harvard Law Review, 1982 to 1983
- Phi Beta Kappa, 1979

[The Committee on Armed Services requires all individuals nominated from civilian life by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee.]

The form executed by Mr. Peter K. Levine in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

Room SR-228

WASHINGTON, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed, use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in Committee offices for public inspection prior to the hearing and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Peter Levine.
2. **Position to which nominated:**
Deputy Chief Management Officer, Department of Defense.
3. **Date of nomination:**
March 4, 2015.
4. **Address:** (List current place of residence and office addresses.)
[The nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
July 29, 1957; Santa Monica, California.
6. **Marital status:** (Include maiden name of wife or husband's name.)
Married to Mary Ellen Myers (Levine).
7. **Names and ages of children:**
[The nominee responded and the information is contained in the committee's executive files.]
8. **Education:** List secondary and higher education institutions, dates attended, degree received and date degree granted.
Harvard Law School, 1980 to 1983, J.D., 1983.
Harvard College, 1975 to 1979, B.A., 1979.
University High School, Los Angeles, CA, 1972 to 1975, graduated 1975.
9. **Employment record:** List all jobs held since college or in the last 10 years, whichever is less, including the title or description of job, name of employer, location of work, and dates of employment.
Staff Director, Senate Armed Services Committee, 2013-2015.
General Counsel, Senate Armed Services Committee, 2001-2002, 2007-2012.
Minority Counsel, Senate Armed Services Committee, 1996-2001, 2003-2006.
10. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed above.
Counsel, Office of Senator Carl Levin 1995-1996.
Counsel, Subcommittee on Oversight of Government Management, 1987-1994.
11. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, company, firm, partnership, or other business enterprise, educational or other institution.
None.

12. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable and other organizations.

American Bar Association (member).
 District of Columbia Bar (member).
 Montgomery Sycamore Island Club (member).
 Mohican Hills Pool Association (member).

13. **Political affiliations and activities:**

(a) List all offices with a political party which you have held or any public office for which you have been a candidate.

None.

(b) List all memberships and offices held in and services rendered to all political parties or election committees during the last 5 years.

None.

(c) Itemize all political contributions to any individual, campaign organization, political party, political action committee, or similar entity of \$100 or more for the past 5 years.

February 20, 2014: \$100 to Daniella Levine Cava for Dade County Commissioner.

14. **Honors and Awards:** List all scholarships, fellowships, honorary society memberships, military medals and any other special recognitions for outstanding service or achievements.

None.

15. **Published writings:** List the titles, publishers, and dates of books, articles, reports, or other published materials which you have written.

None.

16. **Speeches:** Provide the Committee with two copies of any formal speeches you have delivered during the last 5 years of which you have copies and are on topics relevant to the position for which you have been nominated.

None.

17. **Commitments regarding nomination, confirmation, and service:**

(a) Have you adhered to applicable laws and regulations governing conflicts of interest?

Yes.

(b) Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

No.

(c) If confirmed, will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

Yes.

(d) Will you cooperate in providing witnesses and briefers in response to congressional requests?

Yes.

(e) Will those witnesses be protected from reprisal for their testimony or briefings?

Yes.

(f) Do you agree, if confirmed, to appear and testify upon request before this committee?

Yes.

(g) Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted committee, or to consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

Yes.

[The nominee responded to Parts B–F of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–F are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

PETER K. LEVINE.

This 13th day of March, 2015

[The nomination of Mr. Peter K. Levine was reported to the Senate by Chairman McCain on April 30, 2015, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on May 23, 2015.]

**NOMINATION OF GENERAL JOSEPH F.
DUNFORD, JR., USMC, TO BE CHAIRMAN OF
THE JOINT CHIEFS OF STAFF**

THURSDAY, JULY 9, 2015

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:33 a.m. in room SH-216, Hart Senate Office Building, Senator John McCain (chairman) presiding.

Committee members present: Senators McCain, Inhofe, Sessions, Wicker, Ayotte, Fischer, Cotton, Ernst, Tillis, Sullivan, Lee, Graham, Cruz, Reed, Nelson, McCaskill, Manchin, Shaheen, Gillibrand, Blumenthal, Donnelly, Hirono, Kaine, and Heinrich.

OPENING STATEMENT OF SENATOR JOHN MCCAIN, CHAIRMAN

Chairman MCCAIN. Well, good morning.

The Senate Armed Services Committee meets today to consider the nomination of General Joseph Dunford to be the Chairman of the Joint Chiefs of Staff.

General Dunford is certainly no stranger to the members of this committee. We have known him as Commandant of the Marine Corps and our commander in Afghanistan and many posts before that. He is a warrior and a leader of the highest quality, and we are grateful for his 38 years of distinguished service.

We are also thankful for the sacrifices General Dunford's family has made over the years and their willingness to lend him to the Nation in service once again. As is our tradition, at the beginning of your testimony, we welcome you, General Dunford, to introduce the members of your family joining you this morning. I would, however, like to take this moment to express our special thanks to your wife, Ellyn. We know how much of your husband's service and his future absence will rest on you and we honor the sacrifices you are making through your continued support to our Nation, not to mention the downgrade in your residence that will be part of this.

[Laughter.]

The next Chairman will have to prepare our military to confront the most diverse and complex array of global crises since the end of World War II.

In Iraq and Syria, the Islamic State in Iraq and the Levant (ISIL's) terrorist army has continued to succeed on the battlefield, including taking Ramadi and other key terrain in Iraq, capturing over half the territory in Syria, and controlling every border post

between Iraq and Syria. The lack of a coherent strategy has resulted in the spread of ISIL around the world to Libya, Egypt, Nigeria, and even to Afghanistan where I visited last weekend.

There, our troops are supporting our Afghan partners in sustaining a stable and democratic future. But even as ISIL and the Taliban threaten this future, the President remains committed to a drastic reduction in U.S. presence at the end of 2016 before the Afghan government and security forces are fully capable of operating effectively without our support. This would create a security vacuum, and we have seen what fills similar kinds of vacuums in Syria and Iraq. Given your experience in Afghanistan, General Dunford, we will be interested to hear your thoughts about the appropriate U.S. and coalition presence going forward.

Meanwhile, Iran continues to threaten peace and stability across the Middle East through its support of terrorist proxies, pursuit of nuclear weapons, and development of missiles needed to deliver them to targets far beyond its shores.

In Europe, Vladimir Putin's Russia continues its onslaught in Ukraine. But even as Russian troops and equipment execute this neo-imperial campaign to undermine Ukraine's government and independence, the United States has refused Ukraine the weapons it needs and deserves for its defense.

In the Asia-Pacific, China is continuing a pattern of destabilizing behavior, its reclamation and militarization of vast land features in the South China Sea, its continued military buildup designed to counter U.S. military strengths, and its blatant and undeterred cyber attacks against the United States. While our rebalance to the Asia-Pacific has shown some successes, especially in deepening of our alliances, this policy has not deterred China from its increasingly assertive course.

Yet, while worldwide challenges like these grow, the Defense Department has grown larger but less capable, more complex but less innovative, more proficient at defeating low-tech adversaries but more vulnerable to high-tech ones. Worse, the self-inflicted wounds of the Budget Control Act and sequestration-level defense spending have made all of these problems worse.

Army and Marine Corps end strength is dropping dangerously low. The Air Force is the oldest and the smallest that it has ever been. The Navy's fleet is shrinking to pre-World War I levels. With the present operational tempo and drastic reductions to defense spending, we will continue the downward spiral of military capacity and readiness that will compromise each service's ability to execute our Defense Strategic Guidance at a time of accumulating danger to our national security.

Budget cuts have also slowed critical modernization priorities, imperiling our Nation's ability to preserve its military technological advantage. This is not just about the weapons systems we hear the most about; fighter aircraft, submarines, or armored vehicles. These are important, but budget cuts also threaten our ability to seize the future and make vital investments in cyber, space, and breakthrough technologies such as directed energy, autonomous vehicles, and data analytics.

The current Chairman of the Joint Chiefs of Staff has stated that even if the Defense Department receives the additional \$38 billion

above the budget caps that the President's Defense Budget requests, our military would still, quote, "remain at the lower ragged edge of manageable risk in our ability to execute the defense strategy." More worrisome, every one of our military service chiefs, yourself included, has testified that continued sequestration-level defense spending puts American lives at greater risk. Unless we change course, eliminate sequestration, and return to strategy-driven defense budgets, I fear our military will confront depleted readiness, chronic modernization problems, and deteriorating morale.

No matter how many dollars we spend, we will not be able to provide our military the equipment they need with a broken defense acquisition system that takes too long and costs too much. With this year's National Defense Authorization Act, this committee has embarked on a major effort to reform this system, including ways to empower our service leaders to manage their own programs in exchange for greater accountability. General Dunford, we are very interested in hearing your views about improving the defense acquisition system based on your years of service.

Finally, the Chairman of the Joint Chiefs of Staff is the principal military advisor to the President. More than ever, we need an honest and forthright leader that offers his best and unvarnished military advice. The President will not always take your advice, but it is my hope that he will always have an appreciation of the military dimensions of the difficult problems our Nation confronts with you at his side.

Thank you for your willingness to serve once more. We look forward to your testimony.

Senator Reed?

STATEMENT OF SENATOR JACK REED

Senator REED. Well, thank you very much, Mr. Chairman. Let me join you in welcoming General Dunford and to take this opportunity to thank him for his extraordinary service to the Nation. During his 38 years of military service, General Dunford has served with courage and distinction, and I am confident he will continue to do so as the next Chairman of the Joint Chiefs of Staff.

Finally, let me also recognize and thank his family. Ellyn, thank you. Patrick, thank you for being here today. I know Joe and Kathleen wanted to be here, but they are serving elsewhere. But thank you very much for what you have done to serve the Nation and the Marine Corps.

Last week, the current Chairman of the Joint Chiefs of Staff, General Dempsey, released the 2015 National Military Strategy. In his forward, General Dempsey stated that the current "global security environment is the most unpredictable" he has seen during his military service and that "global disorder has significantly increased while some of our comparative military advantage has begun to erode."

Without question, the United States faces a wide range of challenges around the world. If confirmed as the Chairman of the Joint Chiefs of Staff, you will be advising the President and the Secretary of Defense on these complex international issues facing our national interests.

Possibly the gravest and most complex issue for the next Chairman will be countering the security threat from ISIL in Iraq and Syria and its spread beyond the Middle East region. As the President said earlier this week, our counter-ISIL campaign will be long-term and employ all elements of American power, including military, intelligence, diplomatic, and economic.

If confirmed, General Dunford, you will be responsible for advising on the U.S. military's role in supporting our broader counter-ISIL campaign, including denying ISIL safe havens and building the capacity of local forces to counter ISIL, with training, assistance, and air support from the international coalition. The success of these efforts will ultimately depend on a broader, complementary effort to address the conditions that gave rise to ISIL and allowed it to thrive. I look forward to hearing your views on the situation in Iraq and Syria and your thinking on the most effective role the military can play in supporting efforts on the diplomatic front.

Regarding Iran, while there remains no clear outcome to the P5 Plus 1 negotiations over Iran's nuclear program, no matter what happens, the Department of Defense will play a key role in reaffirming our shared priorities with our partners in the region, confronting common threats, and working to de-escalate or, where possible, resolve these threats.

General Dunford, if confirmed, you will also bring invaluable experience to oversight of the Department's missions in Afghanistan where you have led the U.S. and coalition forces with distinction. While the Afghan Security Forces have fought courageously against Taliban attacks, more needs to be done to build the Afghan forces' capabilities and deny any safe haven for extremists. The next Chairman will play a critical role in the President's review later this year of the size and footprint of U.S. forces in Afghanistan for 2016 and beyond.

Another security challenge going forward will be deterring additional Russian aggression toward Ukraine and its European neighbors and reinforcing the Minsk ceasefire accords. Congress has made clear its support of military assistance to Ukraine, including defensive weapons, to help the Ukrainian people defend their sovereignty and territorial integrity. We will be interested in your views of the security situation in Ukraine and what additional steps you would recommend for assisting Russia's neighbors in protecting themselves from the kinds of hybrid warfare tactics employed in Crimea and eastern Ukraine.

Our men and women in uniform remain the committee's top concern, and I know they are your top concern also. Our Armed Forces are nothing without its people, and the Department continues to juggle the twin goals of providing a high quality of life through fair pay and compensation and exceptional service through adequate levels of training and equipping. In my view, it is incumbent on Congress and the Nation to provide a sufficiently sized, trained, and equipped military of the necessary quality of character and talent to meet national defense requirements. Sometimes that means making hard choices, especially in the budget constrained environment we find ourselves.

To that end, as you well know from your time as Commandant, the Department and Congress have for several years considered

various proposals for changes in compensation and health care to slow the growth of personnel costs so that those savings can be re-directed to buy back readiness and modernization benefits. I would be particularly interested in your views on such proposals and the impact if such changes are not enacted.

Now, during consideration of the fiscal year 2016 National Defense Authorization Act, this committee had a robust debate on how best to fund defense programs. I have repeatedly stated that sequestration is not the approach that we need to address our Nation's fiscal challenges, and more pointedly, it undermines our national military readiness. Defense budgets should be based on our long-term military strategy—that is the point the chairman made very eloquently—not sequestration-level budget caps. Even a 1-year increase in OCO spending does not provide DOD with the certainty and stability it needs when building its 5-year budget. As a consequence, this instability undermines the morale of our troops and their families who want to know that their futures are planned for more than 1 year at a time and the confidence of our defense industry partners we rely on to provide the best technologies available to our troops. I hope you will share your thoughts on this topic with the committee today.

General Dunford, thank you again for your willingness to serve our Nation. I look forward to discussing these issues.

Chairman MCCAIN. General, before your statement, there are standard questions that the committee always asks of military nominees. So we have always done that, and so I would like to proceed with that before your testimony.

In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of the Congress are able to receive testimony, briefings, and other communications of information. Have you adhered to applicable laws and regulations governing conflicts of interest?

General DUNFORD. I have, Chairman.

Chairman MCCAIN. Do you agree, when asked, to give your personal views, even if these views differ from the administration in power?

General DUNFORD. I do, Chairman.

Chairman MCCAIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

General DUNFORD. I have not.

Chairman MCCAIN. Will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

General DUNFORD. I will, Chairman.

Chairman MCCAIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

General DUNFORD. I will, Chairman.

Chairman MCCAIN. Will those witnesses be protected from reprisal for their testimony or briefings?

General DUNFORD. They will.

Chairman MCCAIN. Do you agree, if confirmed, to appear and testify, upon request, before this committee?

General DUNFORD. I do, Chairman.

Chairman MCCAIN. Do you agree to provide documents, including copies of electronic forms of communications, in a timely manner when requested by a duly constituted committee or consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

General DUNFORD. Yes, Chairman.

Chairman MCCAIN. Thank you very much for complying with that formality. Thank you. Please proceed with your testimony.

**STATEMENT OF GENERAL JOSEPH F. DUNFORD, JR., USMC, TO
BE CHAIRMAN OF THE JOINT CHIEFS OF STAFF**

General DUNFORD. Chairman McCain, Ranking Member Reed, distinguished members of the committee, good morning and thank you for the opportunity to appear before you today. I am truly honored to be nominated as the Chairman of the Joint Chiefs of Staff. I want to thank the President and the Secretary of Defense for their confidence me, and I want to recognize General Dempsey and his wife Deanie for their extraordinary to our Nation, our men and women in uniform and our military families.

Joining me today is my wife Ellyn and our son Patrick. Our son Joe and Kathleen were not able to be here. Ellyn has been a great mother to our children and has served as a tireless advocate for military families. I refer to her as the MVP in the family. Her sense of humor, flexibility, and endurance have been tested in over 30 years as a military spouse, and I would not be here today without her love and support.

I would like to begin by thanking the committee for your commitment to our soldiers, sailors, airmen, and marines. Due to your support, they comprise the most well trained, well equipped, and capable military force in the world.

As I appear before you this morning, I am mindful of the complexity and volatility of the current security environment. Chairman, you mentioned that. This committee is also well aware of the pressing challenges we face in Europe, the Pacific, the Middle East, Africa, space, and cyberspace. While dealing with these and other issues, we also face the need to restore readiness and modernize the joint force in the context of fiscal challenges and budget uncertainty.

If confirmed, I will provide the Secretary of Defense and the President with my best military advice in a full range of military options for addressing the current and future challenges to our national security.

When asked, I will provide the Congress with my best military advice. When delivering best military advice, I will do so with candor.

I will also work with the Joint Chiefs, our civilian leaders, and members of the committee to maintain a joint force that is capable of securing our national interest today and tomorrow.

Most importantly, if confirmed, I will dedicate myself to properly leading, representing, and keeping faith with the men and women in uniform and our civilian workforce who volunteer to serve our Nation.

Thank you again for allowing me to appear this morning, and I am prepared for your questions.

Chairman MCCAIN. Thank you very much, General.

The day before yesterday, we received testimony that so far with \$500 million committed, there have been 60 individuals who have been trained to go into Syria and fight against the Islamic State in Iraq and Syria (ISIS). What do you know about that particular situation?

General DUNFORD. Chairman, what I know is that we have got Major General Mike Nagata who has been working that for some months. Those numbers are certainly much less than what he estimated. The feedback I have received is those numbers are largely attributable to the vetting process, that they think they have learned some things during the process of these first 60. They have made some other contacts. But, frankly, Chairman, until I have an opportunity to get on the ground and speak to the commanders, what I really know about that now is secondhand.

Chairman MCCAIN. Do you believe that we should be getting a pledge from these recruits that they will only fight against ISIS and not Bashar Assad?

General DUNFORD. Chairman, what I understand right now is that we do not have the authority to take action against Assad's forces. So unless that policy would change, then that pledge would be required.

Chairman MCCAIN. Given your experience in the military, do you think it is a good idea to train people and send them into a conflict to be attacked and barrel-bombed by another entity and not defending them?

General DUNFORD. Chairman, I do not. If we train those individuals and they go back into Syria to fight, then I think we need to— if we expect them to be successful, we need to provide them with enabling capability that will allow them to be successful.

Chairman MCCAIN. In other words, prevent them from being barrel-bombed by Bashar Assad, which is routine now?

General DUNFORD. I think, Chairman, we need to provide them with a full range of capability for them to be successful.

Chairman MCCAIN. I recently was over in Afghanistan over the Fourth of July, and there is great concern both amongst our military and with Ashraf Ghani and Abdullah and other Afghans about the present proposal to have our force in Afghanistan down to a, quote, embassy-centric force by 2017, meaning that we would be giving up or turning over our bases in Bagram, Kandahar, and a force that is only based in the U.S. embassy. A great concern was voiced concerning this plan or articulated, announced plan by the President of the United States.

As you know, the Taliban did not respect the non-fighting season. As you know, the Afghan casualties are extremely high, higher than they have ever been. We now have ISIS getting a hold, and we also have the Iranians providing Taliban with weapons.

Is this a wise decision on your part to have a calendar-day withdrawal of American troops rather than a conditions-based withdrawal? Given your background and experience there, I think you are probably pretty well qualified to make that judgment.

General DUNFORD. Chairman, I am aware of the consequences of our mission, the importance of our mission in Afghanistan, and clearly I also have a degree of personal commitment, having spent

time there. I can assure you, if I am confirmed, I will provide advice to the President that will allow us to meet our desired end state, and I think that that will be based on the conditions on the ground, as you have articulated.

Chairman MCCAIN. Rather than a calendar-based decision.

General DUNFORD. Chairman, my experience has been that sometimes the assumptions that you make do not obtain particularly with regard to time, and that is certainly the case in Afghanistan.

Chairman MCCAIN. Thank you.

In Ukraine, it is obvious that the Russians continue their military buildup. I was in eastern Ukraine and watched the surveillance video that was made by the Ukrainians showing the gradual buildup of Russian forces inside Ukraine.

Do you believe that we should give the Ukrainians with the counter-battery systems with which to defend themselves from mass Russian artillery and rocket strikes, and should we provide them with Javelin or tube-launched, optically-tracked, wireless-guided (TOW) anti-tank missile systems to defeat the Russian T-90 tank parades?

General DUNFORD. Chairman, from a military perspective, I think it is reasonable that we provide that support to the Ukrainians. Frankly, without that kind of support, they are not going to be able to protect themselves against Russian aggression.

Chairman MCCAIN. General Dunford, I just would like to repeat again my appreciation for your service, and I am confident that you will serve with distinction. You are the principal military advisor to the President of the United States, and that is a unique role as designed in the 1947 act I believe. So I hope that you will keep in mind your obligation to the President but also to the men and women who are serving who we may have to send into harm's way and make sure they are provided with the best capabilities.

Finally, I hope in answer to some of these questions, because I have run over time, you will talk about the devastating effects of sequestration on our ability to defend the Nation. Maybe you will just make a brief comment on that now.

General DUNFORD. Chairman, I have dealt with the issue of sequestration as a service chief, and quite frankly, if we go into sequestration, we will be unable to support the current strategy that we have to protect our Nation. Quite honestly, the readiness of the joint force and modernization of the joint force will suffer, what I will describe and without exaggeration, catastrophic consequences.

Chairman MCCAIN. I thank you, General Dunford.

Senator Reed?

Senator REED. Well, thank you very much, Mr. Chairman.

Once again, thank you, General, for your service and your sacrifice.

Following a bit on Senator McCain's final question about sequestration, the administration—and Secretary Carter made this clear—has adopted an anti-ISIL campaign with nine lines of effort, two principally controlled by the Department of Defense. Are you comfortable with that overall approach at this point?

General DUNFORD. Senator Reed, I am comfortable with that overall approach.

Senator REED. The other lines of effort are controlled by other elements of the Government, State Department, Homeland Security, et cetera. Apropos of Senator McCain's question about effects of sequestration on the Department of Defense, are you concerned that these partners in this effort could be hamstrung just as much as you would be if the Budget Control Act (BCA) went into effect for them?

General DUNFORD. Senator, very much so. I would say that not only do we just represent two of the nine lines of effort, but we cannot be successful in either Iraq or Syria or, frankly, in any of our other endeavors with out a whole-of-government approach.

Senator REED. Let me just ask you since you are the expert. You were in Afghanistan. We had a significant military effort, but we also had a significant civilian agency effort, the State Department, Federal Bureau of Investigation (FBI), Drug Enforcement Administration, all of these agencies. I would assume you considered them to be integral and essential parts of your effort, and without them or without their ability to provide resources, you could not have accomplished what you did. Is that fair?

General DUNFORD. Sir, I think it is absolutely fair. Although we have challenges remaining, I think we have accomplished quite a bit over the last few years, and from my perspective, that is because we have been able to integrate the capabilities of those organizations that you mentioned. In particular, I think the relationship that we have with the State Department in Afghanistan was absolutely critical to our success.

Senator REED. One of the most difficult issues you face is building the capacity of the Iraqi Security Forces, and this has been an endeavor frankly that we have tried for a long time. Do you have any sort of sense at this juncture of what we can or should be doing differently of how do we do this? We have heard colleagues come before the committee—your colleagues—and suggest that there are gaps of leadership at the upper levels. Just your perspectives on a length of time and the efforts we have to undertake to get a credible Iraqi force in the field, which will secure the country.

General DUNFORD. Sir, with the caveat that I have been away 11 months, but certainly, if confirmed, will go back almost immediately, the areas of most concern were intelligence, logistics, special operations capability, and the aviation capability, and then more broadly the ministerial capacity. Frankly, our estimates always were that that was a long-term endeavor. It would take years to grow the kind of capacity that we have in this country, and frankly, what we are not trying to do is develop the capability that we have in this country, something far less than that, but the ability at the ministerial level, at the minister of defense and the minister of the interior to support tactical-level organizations. So I think continue to stay the course in the plan that General Campbell has and recognizing that is going to require continued resources and patience is the way for us to be successful.

Senator REED. Now, I focus for a moment—I know your practical experience is Afghanistan and other places, but in Iraq there are the same capability problems. Does your analysis apply there also in terms of the long-term need to build up the Iraqi Security Forces and ministries?

General DUNFORD. Senator, it does. In some ways the situation is the same. There are also some vast differences. I think one of the biggest challenges in Iraq has been when Prime Minister Maliki was there, he eliminated many of the capable quality leaders that were in the Iraqi Security Forces. So I think at the tactical level, it is fair to say today the Afghan forces actually have some pretty solid leaders. We have seen them. We have developed them. They have gone to our schools. I feel pretty good about where we are with the Afghan leaders. I think we have some work to do to rebuild the Iraqi Security Forces, frankly to get them back to perhaps where they were a few years ago.

Senator REED. There is one other aspect—in fact, there are many aspects of the situation in Iraq, but one is this tension, sectarian and geographic tensions in the country. But our policy is to support a unified government in Baghdad and work with them so that they are able to integrate their ethnic communities. Is that the approach that you think makes much sense?

General DUNFORD. Senator, that is going to be very difficult to do, but at this point I believe that is the best prospects for long-term success is a unified, multi-sectarian government in Iraq. Frankly, if confirmed, if at any point I no longer believe that is possible, then my advice to the President will be adjusted accordingly.

Senator REED. Thank you very much, sir, and again, thank you for your service.

Chairman MCCAIN. Senator Inhofe?

Senator INHOFE. Thank you, Mr. Chairman.

In responding to one of the chairman's questions, you were talking about you did not have the authority to go after Assad. Is that not what you said that you do not have the authority to go after Assad?

General DUNFORD. Senator, my understanding is that we do not have the legal authority at this time to go after the Assad regime, and it is also the policy of the administration not to go after the Assad regime militarily.

Senator INHOFE. Okay. Well, I think for the record I would like to have you expand a little bit on that as to whether or not it would be desirable for you to have that authority.

[The information follows:]

President Assad's policies contributed to the rise of ISIL and motivate some members of ISIL today. However, the current military campaign in Syria is designed to degrade and ultimately defeat ISIL, not the Assad regime. If our policy changes, I will be prepared to provide a range of military options in support of broader political efforts to resolve the conflict.

Senator INHOFE. We have been talking for a long time and with you also at these hearings about the amount of risk that we are at right now. You were quoted as saying our combatant commanders face increasing risk. So we are talking about the risk that is out there. You know, risk equals lives. We talk about this in all these areas.

But how do you define too much risk? Are we there yet?

General DUNFORD. Senator, I believe today we are capable of providing adequate security to protect our national interests. I also believe that we are at the razor's edge, and that has certainly been a subject of testimony several times before this committee is that

our readiness level is at the point right now where were we to go below this level, we would have to adjust the ends of our strategy. We would no longer be able to support our strategy.

Senator INHOFE. That is similar to the responses we get, whether it is General Odierno or any of the rest of them. They are very much concerned about the level of risk that we are accepting now that we never had to accept in the past.

In the Ukraine—I am particularly sensitive to that. I happened to be there when they had the election that resulted in, for the first time in 96 years, no communists serving in their parliament.

We talked about what they really should be having there. Are there obstacles, if you were to make that determination, as to giving them more to defend themselves, the things that we agree that they should have? Is there an obstacle that we could help with, or do you think you have that authority now?

General DUNFORD. Senator, from a military perspective, additional capability to the Ukrainians would clearly help them to deal with both the separatist and the Russian threat in the Ukraine. There are some policy issues associated with that that do not fall into the Department of Defense (DOD) and military—

Senator INHOFE. Yes, I understand that and I appreciate that answer.

Kind of the same thing with the Kurds. Now, they have a need for, I guess, anti-armor, mine-resistant ambush protected (MRAP) vehicles, and a lot of these things. I get two conflicting stories, one from some of the top people in charge saying that by sending through Baghdad, you have a problem in getting it up to the fight. Yet, I heard just yesterday from someone who is in charge that that problem has been resolved now. Is that really resolved? Do we have a problem getting the equipment that they need up there and those fighters to effectively fight?

General DUNFORD. Senator, I watched carefully the hearing on Tuesday and the exchange that took place on this particular issue. You know, I have been briefed that in fact the issues have been resolved and the support is getting to the Kurds right away. But this would be one of those issues that, if confirmed, again Iraq, Afghanistan, and places where our young men and women are in harm's way would be the first places I would go to visit. This issue, because it is so important, would be one issue that I would look into personally.

Senator INHOFE. Good. I appreciate that.

In this morning's "The Hill," General Petraeus had a couple quotes in there, and I will just read these. He said we can schedule an end to our role in that—talking about Afghanistan—in that nation's conflict, but we cannot schedule an end to the war there or an end to the threat from Al Qaeda, the Islamic State, or other extremist elements of the global jihad. Going to a zero option next year would be playing roulette with Afghanistan's future.

Is Petraeus right?

General DUNFORD. Sir, I think he is absolutely right with regard to the war would continue whether or not we are there or not, and I think you can assume that the war would get worse were our presence not to be there. Again, my assessment is that our presence ought to be based on the conditions on the ground, and I will

certainly go over there and check those as soon as—and if confirmed.

Senator INHOFE. Very good. Thank you very much.

Thank you, Mr. Chairman.

Chairman MCCAIN. Senator Nelson?

Senator NELSON. Thank you, Mr. Chairman.

General, ISIS with regard to Iraq and Syria. Would you generally ascribe to the fact that in Iraq it is going to require the Iraqis to have the will to fight to meet ISIS in Iraq and be successful?

General DUNFORD. Senator, our current campaign is dependent on the capabilities of the Iraqi Security Forces to deal with ISIL.

Senator NELSON. Go over to Syria. Now, that is a hodgepodge. How much do you think that the Assad regime staying in power would complicate the issue of us being able to take down ISIS in Syria?

General DUNFORD. Senator, my assessment is it plays a significant role. I think Assad's brutality to his people was certainly the primary factor giving rise to ISIS is at least one of the assessments, and I ascribe to that particular assessment. I think his remaining in power has certainly continued to inflame people and gives ISIS the recruits and the support that they need to operate inside of Syria.

Senator NELSON. I agree with that.

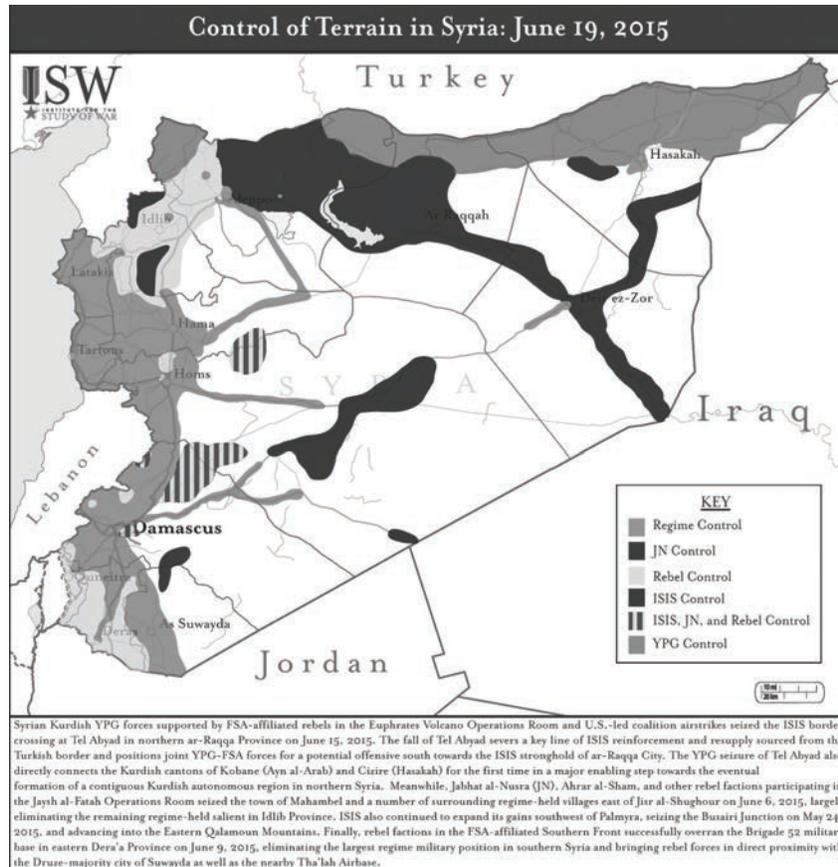

Then the question is, when do we really press to have some kind of political settlement for Assad to exit? Do you have any thoughts on that?

General DUNFORD. Senator, I do not. I am not involved in the dialogue today in that regard. The political resolution is one of the lines of effort that is part of our overall strategy. While I do not know, I would assume that today that issue is being addressed, and certainly if confirmed, I expect to be part of those conversations and know a bit more than I do today.

Senator NELSON. General, someone of your stature is going to be very comforting to us to have the confidence to know that those very tough decisions that will be made with regard to limiting the effectiveness and ultimately defeating ISIS will be made with you sitting there at the table giving counsel.

If you just look at a map of who is in control of Syria in the different geographical areas of Syria, it is a mess. How you bring order—thank you. Senator McCaskill has shown this is Syria and the different colors representing the different entities that in fact are in control in that geographic area. So it is comforting to know that you are going to be there giving your wise counsel.

[The information referred to follows:]

Thank you, Mr. Chairman.

Chairman MCCAIN. Senator Sessions?

Senator SESSIONS. Thank you very much, Mr. Chairman.

General Dunford, with regard to the Budget Control Act, which includes the sequester, the Budget Committee, the Armed Services Committee, with a bipartisan strong vote, has voted out legislation that will add, I believe, \$23 billion above last year's spending for the Defense Department. I believe the Appropriations Committee has already voted out that same spending level, and it is on the floor.

The problem is that the commander in chief, the President of the United States, is insisting on blocking that bill, encouraging Democrats to filibuster it until there is an agreement to spend an equal amount on non-defense. I just believe that the fact that we have a crisis internationally and we need to spend more on defense does not require that this Nation spend more on non-defense. So that is the difficulty we face. You will be seeing more of that, I guess, as time goes by.

General Dunford, with regard to Iraq and this ISIS situation, is it not true that the threat in Iraq is not just a threat to Iraq but

it implicates the national security interests of the United States and that we have a national security interest in blocking a takeover of Iraq by this extremist group ISIS that chops off heads and does other extreme things?

General DUNFORD. Senator, I would agree that the issue of ISIS has both regional issues—it is creating regional instability, but absolutely we have U.S. national interests in a stable Iraq that is not a sanctuary for extremists.

Senator SESSIONS. So I think it is a mistake sometimes to just sit back and say, well, we are going to wait on the Iraqi army to get its act together. We have trained the Iraqi army for over a decade. They have battalions and companies and organizations. They are not well led, and their morale is not good. But they have an army. The question is can we help encourage them to be more effective in fighting back against ISIS. Would you not agree?

General DUNFORD. I do agree with that, Senator. I would just say, despite the challenges, we have had, as you know, some thousands of men and women from the United States Central Command that have been in Iraq and conducting strikes into Syria over the last year. Despite the challenges in pretty difficult conditions, I think they have had some accomplishments over the past year that we can be proud of. Clearly we are going to do more. I think Secretary Carter made that clear on Tuesday. Clearly we need to do more to assist the Iraqis in moving forward, and I think that is the plan.

Senator SESSIONS. Well, the President's press conference 2 days ago did not encourage me and did not clarify in my mind that we have a good strategy for Iraq. Frankly, I think General Dempsey and Secretary Carter following up on that were not very persuasive either in convincing me or the American people that we have a good plan.

Now, based on your experience, is it not a fact that if we had a limited number, just five, special forces embedded with an Iraqi battalion of 600, that that can give confidence to that battalion, help improve their morale, and help them be more effective on the battlefield?

Senator SESSIONS. Senator, it has been my experience that when U.S. forces have accompanied Iraqis—or for that matter, my experience in Afghanistan—that those units are more effective.

Senator SESSIONS. Well, General Dempsey said he has not yet recommended that we embed a limited number, a very small number, of such forces in the Iraqi army, but he would do so if he thought it was appropriate. Do you not think it is time for us to maybe move from being in Baghdad in headquarters and actually move out to help provide this kind of confidence, the air cover, the direction of munitions, giving confidence of resupply and American commitment? Is it not time for us to move forward in that direction?

General DUNFORD. Senator, without appearing to be evasive, what I really would like to do, if confirmed, is have the opportunity to get on the ground, speak to the commanders, and frankly provide a more comprehensive recommendation to how we can move the campaign forward in Iraq without focusing on one or another of the factors.

Senator SESSIONS. Well, I hope you will do that quickly.

Just one more thing. Senator McCain warned yesterday that we could be facing the same situation that he warned about Iraq in 2011 when we pulled out prematurely. Now we are going to be facing this decision in Afghanistan. I hope that you will be clear and firm in your recommendation to the President if you believe this plan we have today, date-specific withdrawal, is in error, and I hope you will do that. Will you do so if you think it is in error?

General DUNFORD. I will do that, Senator.

Senator SESSIONS. Thank you.

Chairman MCCAIN. Senator McCaskill?

Senator MCCASKILL. Thank you.

My good friend and colleague, Senator Sessions, and I have worked together on matters of fiscal accountability and trying to spend less money, but I have a different take than he does on where we are in terms of the military budget.

I cannot figure out any reason why we would be putting the \$40 billion increase into the war fund instead of into the base budget. I cannot think of any reason to do that other than one of misleading the American people about whether or not we are balancing something because that is the only place they can put the money and not have to pay for it. So they put it there so it did not have to be paid for and completely short-changed national security for our country in the form of cybersecurity, port security, airport security, Federal Bureau of Investigation (FBI), Central Intelligence Agency (CIA), all of which I know you would acknowledge, General Dunford, is a very important part of the role of keeping America safe. Would you agree with that?

General DUNFORD. Senator, I would absolutely agree that all those organizations play an inextricable role in keeping us safe.

Senator MCCASKILL. Let us make very clear, if in fact we go down this path of pretending we are balancing something by putting it in a fund that we do not have to pay for, will in fact the Overseas Contingency Operation (OCO) funds, or the war fund as I like to call them—will they do anything to avoid the force structure cuts that are looming across our Nation if we do not get off of this path of misleading the American people about what we are balancing?

General DUNFORD. Senator, I think all of the service chiefs that have to balance a budget and certainly me included where I sit right now would much prefer that money to be in the base budget because that provides a degree of predictability that we can get after the two main issues that we have to deal with. One is modernization of force, and the other is to get the readiness back to a level that we are comfortable with.

Senator MCCASKILL. So the cuts that we have seen this week that General Odierno announced—they are a drop in the bucket as to what is coming if we continue on this bizarre idea of putting all of this money in the war fund as opposed to in the base budget where force strength belongs. Correct?

General DUNFORD. If the budget level goes below what has been requested in the President's Budget 2016, there will be significant additional cuts made.

Senator MCCASKILL. Thank you.

You know how hard we have all worked on the problem of sexual assault in the military. I am pleased that the incidents are down. I am pleased that reporting is up. I am pleased that the efforts that are being made to measure victim satisfaction with command look good. I think it is too early to declare success, obviously. We have a lot more work to do.

But the thorny problem that remains, General, and one that I really want to make sure you have at the top of your list is retaliation. I know that there have been some initiatives begun, but I would like to see a written plan from you as Chairman of the Joint Chiefs with all of the chiefs signing off on what is your path to getting at this culture. The problem is not, based on the survey, the command. The problem is primarily lower level command, unit command, and peer-to-peer, not that there may not be some outliers there, but that is the bulk of the problem. That is a culture issue, and that means from the top.

I am disappointed that we have not had more prosecutions. Retaliation is a crime. I know it is new. I know people might be very reluctant to bring somebody up on those charges because of what that might mean within their unit. But that is where you guys come in. I would like a commitment from you today that you would be willing to put a plan in writing that we could follow.

General DUNFORD. Senator, I would make that commitment. I think you have correctly identified peer retaliation as the real issue that we are trying to grapple with in the wake of the Research and Development (RAND) report. I can assure you that the leadership across the Department has been carefully looking at that issue in an effort to set the right command climate where retaliation is unacceptable.

Senator MCCASKILL. I will put a question for the record about the unused building report that Special Inspector General for Afghanistan Reconstruction (SIGAR) pointed out in Afghanistan. I know there was an investigation. You, of course, were not found to be a problem in this, but it is a problem the investigation found no problem and in reality there was a huge problem, that somebody signed off on a building for \$36 million that is never going to be used and is sitting empty. We have got to make sure we avoid that.

My final question is—if you do not have time to do it now—I am just about out of time. I want to make sure that we get your take on ISIS in Afghanistan. I know they are trying to move everywhere. Obviously, this is a Shia-Sunni issue and that is something that is prevalent throughout the region. With your experience in Afghanistan, are you comfortable that we have a handle on what ISIS is trying to do in Afghanistan?

General DUNFORD. Senator, what I know from General Campbell's reports and intelligence is that we have seen a number of Taliban rebrand themselves as ISIS. But beyond that, I do not have a good feel at this time for the depth of the problem, but certainly it would be one of the issues I would look into if confirmed.

Senator MCCASKILL. Thank you very much.

Thank you, Mr. Chairman.

Chairman MCCAIN. Senator Wicker?

Senator WICKER. General Dunford, I think you are just the man for the job, but let me tell you you have got a lot of crises to preside over. I would simply ask you, during the course of your term in office, tell us what you need. Come back to us and be honest and tell us what our men and women in uniform need to succeed and get the job done because I do not think we are quite there.

I was privileged to lead a bipartisan delegation of House and Senate Members over the past week to Ukraine. We met with President Poroshenko in Kiev, and he is grateful for the \$300 million that this Government provided in military assistance during the past year. He also mentioned the need for Javelin anti-tank missiles. I think your testimony earlier today is that that is a reasonable request on the part of the president of Ukraine, and it will be necessary for him to get those in order for him to defend his country. Was that your testimony?

General DUNFORD. Senator, it was. From a military perspective, those kinds of capabilities in my judgment would be necessary for him to deal with both Russian aggression and the separatism issue that he is dealing with in Ukraine.

Senator WICKER. Separatists that are backed by the Russian hierarchy.

Would you also agree that it is unacceptable that this month's transfer of 100 armored Humvees to Ukraine took over a year to process due to bureaucratic delays at DOD and State?

General DUNFORD. Senator, if it took a year to do that, it would be unacceptable. I am not personally aware of that issue.

Senator WICKER. Okay. Well, look into that for us.

I also led the delegation to Helsinki for the The Organization for Security and Co-operation in Europe (OSCE) parliamentary assembly. Before the delegation left—before the Russian delegation left en masse because of a dispute over five delegates being on the European Union (EU) sanctions list—the head of the delegation, Nikolay Kovalev, said that Russia's neighbors have no reason to be threatened by Russia. Now, of course, Russia has—under Mr. Putin's leadership, Russia has twice invaded neighbors, Georgia in 2008, Ukraine last year. We see now that there is a Russian official investigating the legality of Mr. Kruschev's transfer of Crimea back in the day saying that this perhaps was not an invasion because Crimea was never legally transferred to Ukraine by the Russian Federation.

It concerns me that this same official is now investigating whether the transfer of the Baltic States, whether the giving of independence to the Baltic States, Latvia, Lithuania, and Estonia, was also legal. Perhaps that was not legal at all, this Russian official suggests.

We can get to the issue this way. I just want to ask you this about our North Atlantic Treaty Organization (NATO) commitment. I can envision a situation where there are small jurisdictions within Latvia that have a majority of Russian speakers, small jurisdictions within Estonia that have a majority of Russian speakers. A pretext of a plebiscite is created at that point. I realize I am posing something to you that is hypothetical, but in light of pronouncements from officials in the Russian Federation, I think it is something to be concerned about.

Zbigniew Brzezinski spoke to this committee earlier this year and said we need to create a trip wire in the Baltics and that this trip wire should communicate clearly to Russia that NATO will not tolerate violations of the territorial integrity of our allies.

What do you think of this idea and can you highlight to this committee the steps DOD needs to take under leadership to send a credible message that this sort of pretext by the Russian Federation would absolutely not be tolerated by the United States and our NATO allies?

General DUNFORD. Senator, I think our experience in Ukraine and in the other examples that you used highlights the fact that we need to update our deterrence and response model to deal with the kind of threat that we have today, which has been described as a hybrid threat from Russia, which combines political instruments, unconventional warfare, as well as support for separatists in these countries. Quite frankly, that needs to be a priority. You are asking what should the Department do. We frankly need an effective deterrent model for the 21st century to deal with the kind of threats that we are now seeing in Russia because, quite frankly, I think that kind of asymmetric threat is one we will continue to see in the future and certainly we are going to continue to see that in the European context.

Senator WICKER. Would an incursion of Russian troops or Russian-back separatist troops in small jurisdictions of Russian-speaking majorities within Latvia and Estonia—would that be completely unacceptable to this Government?

General DUNFORD. From a policy perspective, Senator, I cannot answer that. From a personal perspective, it certainly looks like a violation of sovereignty to me.

Senator WICKER. Under article 4 of NATO, in my view it would be absolutely unacceptable. We need to make it clear. This administration needs to make it clear. This Congress needs to make that we will do what is necessary to prevent this sort of idea from ever being considered in the first place.

General DUNFORD. Senator, I agree with that, and I think this also applies to the cyber threat as well, again, the idea of deterrence in response to a changing threat in the 21st century, and I think we need to update our models for both.

Senator WICKER. Thank you, sir.

Chairman MCCAIN. Senator Manchin?

Senator MANCHIN. Thank you, Mr. Chairman.

Thank you, General, for your service to our great country, your family's dedication and sacrifice they have made with you I know over the years.

Sir, I am sure you have had the opportunity to form opinions on what our threats have been and what our threats are today. What would you consider the greatest threat to our national security?

General DUNFORD. My assessment today, Senator, is that Russia presents the greatest threat to our national security.

Senator MANCHIN. Would you want to elaborate on that to a certain extent?

General DUNFORD. Well, Senator, in Russia we have a nuclear power. We have one that not only has the capability to violate the sovereignty of our allies and to do things that are inconsistent with

our national interests, but they are in the process of doing so. So if you want to talk about a nation that could pose an existential threat to the United States, I would have to point to Russia. If you look at their behavior, it is nothing short of alarming.

Senator MANCHIN. I have been very much concerned about the same issue. I think we have talked about it briefly before when you visited my office. But I have been told by major scholars that the Cold War is colder today than it was when it was declared because of the lack of communications, the lack of inter-party affiliations. Do you find it to be true, and can you change that course in your new position?

General DUNFORD. Senator, certainly the relationship of Russia a few years ago, if you recall—we actually were including them in NATO meetings and so forth, and those kinds of exchanges have stopped. From my perspective, my role would be even as the relationship is challenged and even with the difficulties that we face right now, I think it is important that we attempt to maintain a military-to-military relationship, an effective military-to-military relationship, with our Russian counterparts to the extent possible to mitigate the risk of miscalculation and begin to turn the trend in the other direction in terms of trust.

Senator MANCHIN. Thank you, General.

Also, going back to Iraq—it has been spoken previously, but could you find yourself at some time recommending to the President for a three-state solution in Iraq versus staying the course of a united Iraqi government?

General DUNFORD. Well, Senator, from my perspective, I can imagine two states in Iraq. I have difficulty imagining a third separate state given the lack of resources that would be available to the Sunni. Frankly, I think if it was in thirds without a Federal Government, I think we would have some difficulty, the same difficulty that we have today exacerbated by the fact that there is not a central government.

Senator MANCHIN. Basically you are acknowledging that the Kurds are strong, prepared, ready to go if they were given that opportunity?

General DUNFORD. Senator, you know, again it is probably out of my lane to talk about what the organization of Iraq might be in the future. But I think from just a pure economic resources and governance perspective, the Shia and the Kurds are certainly much more equipped to set up a separate state than the Sunni would be at this time.

Senator MANCHIN. I know it has been spoken about also, the mistake of us leaving Iraq, pulling our troops out when we did. Did we have an option to stay?

General DUNFORD. Senator, I was not involved in the discussion at that time. The assessment of the administration at that time was we did not have an option to stay.

Senator MANCHIN. So basically those of us who believe that maybe there could have been some forces left there or basically the evaluation Maliki was not doing his job, once we went down the path of democracy democratizing that country, we did not have the option to go back and stay there.

General DUNFORD. Given what we were demanding of the Iraqis, they were not meeting our demands. I am not sure I would say that meant we had no option to stay.

Senator MANCHIN. I have spoken many times about the lack of an audit. The only agency in the Federal Government that we do not audit is the Pentagon. Defense. The Marines have made an effort. I will say they have made more of an effort than any other branch of the military to do an audit, but it has not been fulfilled.

What would your commitment be, sir, for us to have an audit, especially for us to know about our contractors, how much money we spend on contractors, how many contract forces that we have doing the job that I believe maybe our military and definitely our National Guard could be supporting in that effort that we are not doing today?

General DUNFORD. Senator, we cannot be effective as a warfighting organization and we certainly cannot be efficient with the taxpayers' dollars if we do not have an effective audit. As you alluded to, we worked that pretty hard in the Marine Corps. I worked it both as an assistant Commandant and then over the last year as the Commandant. We did make a significant amount of progress. We were able to get to the point where we could internally audit all of the resources that were directly under the cognizance of the Marine Corps with some database challenges outside. But I can assure you that, if confirmed, you will have my commitment to continue to press hard in that direction and to support the efforts across the Department to make sure that we can come to you with a clean audit.

Senator MANCHIN. General, I again want to thank you. You do have my support and I think the confidence of the American people, definitely the West Virginians. Thank you, sir.

Chairman MCCAIN. Senator Ayotte?

Senator AYOTTE. General, I just want to thank you for all that you have done for the country, and I think that you will do a tremendous job as Chairman of the Joint Chiefs of Staff. I want to thank Ellyn and your family for what they have done for the country and continue to do. We appreciate it.

I wanted to also add my support to what Senator McCaskill said about the issue of retaliation. I think this is a very important issue as we focus on the work that we have done in this committee to eliminate and to work to prevent sexual assault in the military and to support victims and to hold the perpetrators accountable. So I think that is excellent. I look forward to seeing that proposal from you.

I wanted to ask about the situation, as we look at Iran and their support for regional terrorism. How would you assess Iran's current activities and where are they engaging in support either directly or through proxies for efforts that are undermining security in the region?

General DUNFORD. Senator, Iran is clearly a malign influence in the most destabilizing element in the Middle East today. They are providing support to the Huthis down in Yemen. They obviously provide support. Hezbollah is a clear malign influence in Lebanon. There are indications they are involved in Syria, and certainly they are involved and trying to expand their influence into Iraq. They

are creating I think—they are exacerbating at least the Sunni-Shia sectarianism across the region.

Senator AYOTTE. I want to follow up more on that, but I also want to ask you. I saw reports that they were also engaged in supporting the Taliban in Afghanistan more now. Is there anything you can share with us on that?

General DUNFORD. Senator, I have seen those same reports, and from my perspective, what I have seen in the reports is that they have provided some support to the Taliban in an effort to counter ISIL.

Senator AYOTTE. Do you believe, as we think about your experience—I know you commanded troops in Iraq. But certainly Iran has the blood of American soldiers on its hands for the explosive materials that they provided to the Shia militias in Iraq that killed many of our men and women in uniform. So do you think, as we look at the situation in Iraq and what is happening with the Shia militias you referred to, how could they be a malign influence in the longer-term solution in Iraq?

General DUNFORD. Senator, they clearly could be a malign influence, which is why I believe we should not provide any support to those forces unless they are directly under the Iraqi Government and not provided support by the Iranians.

Senator AYOTTE. Thank you.

I wanted to also ask you about the situation on cyber because the FBI Director—we have received briefings on the Office of Personnel Management (OPM) breach, but the FBI Director has said that he believes this is an enormous breach. Millions and millions of individuals who provided background information have been breached. Director Clapper has said that they believe it is the Chinese who have done this breach.

When we look at the threats facing our Nation, how grave do you think the cyber threat is? Also, how would you assess our current posture with the Chinese and how we should be addressing the situation?

General DUNFORD. Senator, I would agree with you. The cyber threat is clearly very significant. Frankly, every week we learn a bit more about the OPM breach. My number one concern, obviously, as a service chief is for the data and the wellbeing of the men and women whose data that is having been compromised.

One of the challenges is, of course, attribution. But from my perspective, if confirmed, my role will be to provide the President with a full range of options to deal with these cyber attacks, which is what the OPM breach was.

Senator AYOTTE. So I know that Senator Manchin had asked you what you believe our gravest national security threat was, and you identified Russia. Certainly we have seen this aggression by Putin in Russia certainly invading other countries essentially.

But what is it—as you look at the National security situation, you think about immediate threats to the country, what keeps you up at night the most?

General DUNFORD. Senator, what keeps me up at night the most is our ability to respond to the uncertain. I am very confident—very confident—in the joint force today and our capabilities and capacities to deal with the challenges that we have today, albeit we

need improvement in cyber, other capabilities, but on balance, the force that we have today is able to deal with the challenges that we know. There is very little residual capacity. This is the issue that has been discussed many times before this committee and that you have had some personal engagement on. It is the readiness to respond to the uncertain, frankly, that keeps me up at night as a service chief and certainly one that would keep me up at night were I to be confirmed as the Chairman.

Senator AYOTTE. Thank you.

Chairman MCCAIN. Senator Gillibrand?

Senator GILLIBRAND. Thank you, Mr. Chairman and Ranking Member. I appreciate this hearing.

Thank you, General Dunford, for your service. I am grateful for your wife and children being here with you. We all know you serve together.

I want to continue along the line that Senator Ayotte started with with Iran. We are expecting a potential nuclear agreement between P5 Plus 1 as early as today. Are you concerned that lifting sanctions on Iran might allow that country to invest more money in terrorist activities in the Middle East, and what can we do to address those concerns?

General DUNFORD. Senator, there is no question that signing an agreement will change the dynamic in the Middle East. The first thing I guess I would say is that, if confirmed, I know I would have the responsibility to develop options for the President to deal with the changing dynamic.

With regard to increased resources for malign activity, I think it is reasonable to assume that if sanctions are lifted, the Iranians would have more money available for malign activities. But I would probably say that regardless of whether there is an agreement or not, my expectation is that Iran will continue the malign activity across the Middle East that we have seen over the past several years.

Senator GILLIBRAND. I also want to continue the line started by Senator McCaskill about retaliation. Senator McCaskill was correct when she said this is something we are all very concerned about, and she said it is not just peer-to-peer. She mentioned unit commanders. I want to be specific about this issue so you know the problem you are dealing with.

So 53 percent was peer-to-peer retaliation, but 35 percent was adverse administrative action. 32 percent was professional retaliation, and 11 percent was punishment for an infraction. So you have to recognize some of this retaliation is being perceived by survivors to be done by unit commanders or someone within the chain of command because administrative retaliation or perceived administrative retaliation or professional retaliation is serious. So there is still a climate issue that the chain of command is responsible for, particularly unit commanders and lower level commanders, that is not getting the right message.

In fact, the recent RAND survey said that 60 percent of women who said they experienced sexual discrimination or some kind of negative behavior came from their commanders, their unit commanders. So you have to recognize there is a climate issue that is

not being adequately addressed. So when you do your report for this committee, I would like you to look at that issue as well.

You also have the challenge that in the reported cases, 1 in 7 of the perpetrators who were alleged have committed rape, sexual assault, or unwanted sexual contact was also in the chain of command. So you have a challenge with lower level commanders that is not yet being addressed that I would like your report to cover as well.

Somewhat related, I want to talk about combat integration. I strongly believe that we should have standards that meet the needs of each position and then allow anyone in who meets those standards to compete. You have not been very vocal on this issue, but if confirmed, you will be one of those individuals who are advising the Secretary of Defense about whether the services should receive any exceptions to policy.

Do you expect the services, especially the Marines, who I assume you have been tracking most closely, to ask for exceptions?

General DUNFORD. Senator, I am not able to answer that question right now, and I can just explain the process in the Marine Corps. We have looked at this issue pretty hard. As you know, we put together a task force that is just completing. In fact, they will stand down this week. I expect the data that we have collected over the past 18 months in a very deliberate, responsible way to be available to me in the August-September time frame. We will meet the timeline established by Secretary Panetta and General Dempsey in a letter from 2012.

Senator GILLIBRAND. Okay.

Will you be looking across the services to see if one asks for exception in a position whose equivalent another service does not request an exception for? Will you be doing a comparison between services?

General DUNFORD. Senator, my understanding of the way it will work now, again, if I am confirmed, sitting as the Chairman, is that I will have a responsibility to look at each one of the requests on its own merits and make a recommendation to the Secretary of Defense.

Senator GILLIBRAND. Okay.

Then with my remaining 30 seconds, I want to address cyber. We are constantly being confronted by our need for a capable cyber force. Cyber Command (CYBERCOM) and the services have been building out those capabilities, but there is still work to be done. How do you envision the force, and what do you see the role as the Reserve component?

General DUNFORD. Senator, I envision the force, as you mentioned—it is certainly going to grow, and I would support the plans that Admiral Rodgers—and I think he has testified here before the committee. I think he is setting the right path in terms of growing the capacity of the cyber force.

The Reserve component is going to be very important. In fact, in many cases and certainly as a service chief who looked at this, some of the skill sets that are unique to cyber are available to us in the Reserve Force. We need to figure out a way to maximize and leverage those capabilities.

Senator GILLIBRAND. Thank you.

Thank you, Mr. Chairman.

Chairman MCCAIN. Senator Fischer?

Senator FISCHER. Thank you, Mr. Chairman.

Thank you, General Dunford, for your many years of service to this country and to the men and women under your command. I would like to also thank your family, your wife, your son who is present today, and your niece who is here as well. So thank you, sir.

I was pleased to see that you listed modernizing the nuclear enterprise among the top challenges that you do expect to face in your response to the committee's advance questions. You also described our nuclear deterrent as the Nation's top military priority.

Do you believe it is critical that we maintain the full triad of our delivery vehicles?

General DUNFORD. Senator, given the nature of the threat today, I do believe that.

Senator FISCHER. Do you support a bomber leg of the triad that is armed with both the gravity bombs and the cruise missiles?

General DUNFORD. I do, Senator.

Senator FISCHER. The gravity bombs, as you know, and the cruise missiles—they are entirely different capabilities. So one does not make the other redundant. Is that correct?

General DUNFORD. It is, Senator, and my understanding of the issue is it adds a degree of complexity for the threat and gives us a greater assurance of being able to deliver, should that be required.

Senator FISCHER. Great. Thank you.

As you know, modernization has been delayed and deferred for some time, and we are now at a point where the life of the delivery systems cannot be extended any further. As Deputy Secretary Work put it recently, the choice right now is modernizing a losing deterrent capability in the 2020's and the 2030's .

Some have argued that these bills are simply too large and we cannot afford to retain our nuclear deterrent. But, according to the Department's calculation, at its peak the nuclear mission would be about 7 percent of the nuclear budget. I think it is a little confusing when we hear about our deterrent described as unaffordable, and to me the alternative, letting that deterrent age out—that has the unaffordable cost to us.

Do you have any thoughts on that?

General DUNFORD. Senator, I would say I would pose the question—you know, some people would ask whether we can afford it. I would probably flip that around and say I think we need to think about how we will fund it. It is a capability that is required. Again, we have identified that as the number one capability that we need to have to protect the Nation, and nuclear weapons certainly create an existential threat. So for me, it is a question more of how do we work together moving forward to fund this as opposed to whether or not we can afford to do it.

Senator FISCHER. That is 7 percent of the budget at its peak, though, and being the number one priority, should that not be what we fund first?

General DUNFORD. Senator, frankly, it is more complicated to me than that, and I have some experience with that inside the Depart-

ment of the Navy. When I looked at the Ohio class replacement, as an example, and what that would do to pressurize the ship-building account, we would have to make some very difficult decisions inside the Department from a capability perspective. So while it is clear that that is the priority, it is not an issue of exclusivity. So balanced capabilities is what the joint force needs, and so I think we need to approach it from that perspective.

Senator FISCHER. Fair enough.

I also appreciate the connection that you made between the modernization and the reductions to the hedge of our non-deployed weapons. I think that this linkage is often overlooked, and I think it is based on simple logic. If you have a modern stockpile and you have a responsive infrastructure, you do not keep as many spares. I think you are more insulated as well from what is happening in the world. You are more insulated from those surprises and also from technical failure.

But to be clear, do you believe that it would be premature to make any significant changes to the hedge before we have a modern stockpile and before we have a responsive infrastructure?

General DUNFORD. Senator, my understanding at this time from the briefings I received is that would be the most prudent course for us to take.

Senator FISCHER. Thank you, sir.

With respect to further nuclear arms reductions, do you believe that any reductions below the New Strategic Arms Reduction Treaty (START) force levels must be achieved through a negotiated treaty and also be verifiable?

General DUNFORD. Senator, I do. I do not believe we ought to take unilateral action in that regard.

Senator FISCHER. Should non-strategic nuclear weapons be included as well?

General DUNFORD. Senator, I would like to take that particular question for the record.

[The information follows:]

New START does not include any limitations on nonstrategic nuclear weapons. Any change to our nuclear deterrence posture, including both strategic and nonstrategic forces, must maintain strategic stability and sustain effective deterrence with the current strategic environment, and must also protect our ability to hedge against future technical and geopolitical changes. I agree that any future negotiated treaty must be verifiable. Given the current environment, we must also ensure existing arms control obligations are being met before concluding additional arms control agreements.

Senator FISCHER. Thank you.

Do you agree that any arms control negotiations must take into account Russia's current behavior, especially its compliant record. You mentioned at the beginning that you feel that Russia is our greatest threat.

General DUNFORD. I do, Senator.

Senator FISCHER. Thank you, sir.

Chairman MCCAIN. Senator Donnelly?

Senator DONNELLY. Thank you, Mr. Chairman.

I want to also thank General Dempsey and his family for everything they have done for the country.

General Dunford, you and your family—thank you very, very much for stepping up to the plate. We are really in your debt.

As you know and we have discussed in the past, I believe one of the greatest threats to our troops is when they find themselves in a personal place where they start to think about something like suicide. We lost over 400 young men and women in the past year. I know you have worked very hard in this area. You have done a lot of rigorous screening in the Marine Corps.

Will you have that same screening used across the branches when you look at recruits and early on in their careers?

General DUNFORD. Senator, one of the thoughts I had as a service chief was to ensure that once we identified a better way to screen, as you said, and identified people at risk and take appropriate action, that we would share that as best practices across the services. I would certainly look to facilitate that if confirmed.

Senator DONNELLY. Then the other question I wanted to ask you in this area is a lot of times, in talking to the parents, there has been a stigma for the young men and women to seek help. I know that you are committed to removing that stigma. Are we going to make sure that everybody knows, look, it is a sign of strength to try to get some help, to talk to somebody, as opposed to any weakness?

General DUNFORD. Senator, absolutely. You know, this is one of those areas where you are never complacent, you are never satisfied with where you are. But I would tell you this. I really believe this: Over the past probably 5 or 7 years, the issue of stigma as it associates with suicide has changed dramatically. Even the way we deal with families in the wake of suicide, if you think about where we were a decade ago, is completely different. I do think the command climate is much more receptive to somebody today seeking help than it was in the past and making sure that help is accessible and, where appropriate, anonymous. But, again, I am not suggesting that we are satisfied with where we are, but I do believe we have made a lot of progress in that particular regard.

Senator DONNELLY. Thank you.

Last week, I was on a trip led by Senator Kaine. We went to Iraq and met with a number of our forces there, some of the leadership. One of the greatest concerns was the Iraqi troops, and when you look at the number of ISIS fighters in Ramadi compared to the Iraqi troops, it was a very sparse number of ISIS fighters, but they won the day anyhow because the Iraqi troops turned and left.

I know that that has to be a focus of the leadership of the Iraqi forces. Are we going to send the message that the only way through Ramadi is through Ramadi; that there is no back door anymore in these kind of efforts?

General DUNFORD. Senator, again, you have been on the ground more recently than me now, and I know you have talked to the commanders there. I did have an opportunity to listen to General Austin the other day, and I have seen General Terry's plan, and I think they have made it very clear to the Iraqi Security Forces how important Ramadi is. In fact, they have been working hard over the last couple months to set the conditions for the Iraqis to be successful in Ramadi. It probably is one of those issues where it is a tactical action to go back in Ramadi, but there is no question in my mind that from an information operations perspective and

frankly from a perception of the campaign, it is a strategic action. I think the Iraqis understand that.

Senator DONNELLY. One of the other groups we met with—and I know the marines have shed so much blood and treasure in Anbar Province over the past years. We met with a lot of the Sunni tribal leaders, and they said, look, we are still united with you but we need to know that you are in this, that you care, that you will be there. I mentioned this the other day to Secretary Carter and General Dempsey. One of the council members from Haditha said, we have got people eating grass in our town now. These are people who worked with the United States. They are now eating grass. There is no milk for our children. We need you to help in this humanitarian crisis.

So I think we not only have to win the battles, we have to reacquire the hearts and minds of the people there. They said, if you do, we will move these folks out. I just wanted to get your views on that.

General DUNFORD. Senator, I agree, and I think with regard to Anbar, I have got both a personal and a professional stake, having lived in the province for a year and developed relationships with some of the people in the Anbar Province. I could not agree with you more that their confidence in our commitment, their trust in our commitment will absolutely have an impact on the success of our campaign not only from the military perspective, but from the perspective of the people's willingness to support us.

Senator DONNELLY. The last thing I wanted to mention is Syria. It appears that the plan we have right now is really no plan. You know, we have talked about buffer zones when we were in Saudi Arabia—Chairman McCain with a group of us. We talked about creating no-fly zones there. So we seem to be in search of a plan. My fear is that Assad is going to fall, and we are hearing that from a lot of folks in the area that he is on very shaky ground right now. Do we then look up the next day and see a race between ISIS and al-Nusra to take over the rest of the country, which is a nightmare scenario at that point? So you are stepping into a real challenging position, but I think one of the very, very front on the lens is Syria is going to change. It is going to change quickly, and we had best be prepared for that change and be ahead of it or else we are going to look up and an entire country is going to be gone.

Thank you.

General DUNFORD. Thanks, Senator.

Chairman MCCAIN. Senator Cotton?

Senator COTTON. General Dunford, thank you for being here today. Thank you for your years of service. Mrs. Dunford, thank you for your years of service.

General Dunford, you said earlier that you believe Russia is the gravest threat that the United States faces. I take it that is because, in large part, Russia is the only country with a nuclear capability to destroy the United States and our way of life?

General DUNFORD. That is one of the reasons, Senator, and of course, that is combined with their recent behavior.

Senator COTTON. Given that Russia, according to the administration, is currently in ongoing violation of the Intermediate Nuclear

Forces Treaty, do you believe the United States should consider withdrawing from that treaty?

General DUNFORD. Senator, I would like to take that for the record.

[The information follows:]

We view Russian violation of the Intermediate-range Nuclear Forces Treaty with great concern. But it is not yet time to consider withdrawal. Our goal remains to return Russia to compliance and preserve the viability of the Treaty. At the same time, we must not allow the Russian Federation to gain a significant military advantage through their violation of an arms control treaty. It is my understanding, the Department is developing and analyzing potential response options for the President, and will consult with our Allies.

Senator COTTON. Okay. We would like to hear a response to that for the record because as it currently stands, Russia and the United States are the only parties to the treaty, and Russia is violating it. It means that the United States is the only country in the world prohibited from developing missiles with a range of 500 to 5,000 kilometers.

The President currently has a proposal to preposition some equipment in our eastern NATO allies' countries as a response not just to the capability that Russia has but also the intention they have displayed to put stresses on our alliance. I find that proposal somewhat underwhelming, although a step in the right direction. Are there barriers to stationing troops in those countries up to the battalion or even brigade level?

General DUNFORD. Senator, I think that proposal is part of a wide range of activities. One is to have infrastructure that we can support deployments. The other is to preposition equipment so we can rapidly move forces into Europe. Then the other piece of it is actually rotational forces, as you are suggesting. So I think rotational forces are envisioned as part of the whole package that Secretary Carter announced at the defense ministerial in NATO a month ago.

Senator COTTON. Thank you.

I would like to move now to Iran. As far as I know, there has still not been an announced nuclear agreement with Iran. But under any such agreement, Iran will probably get a signing bonus of billions and billions of dollars. How do you expect Iran will use that signing bonus?

General DUNFORD. Senator, again, from the outside looking in, there are two challenges they have. One is their economy internally and the disaffection of the Iranian people as a result of that economy, and the other is that they use resources that they have available to support their malign activity across the region.

Senator COTTON. So you believe that at least part of that money can go to terrorist organizations they support like Hezbollah, as well as to destabilize governments in the Middle East like support for the Huthis in Yemen or Shiite militias in Iraq.

General DUNFORD. Senator, I think it is reasonable to assume that.

Senator COTTON. Does the United States have the military capability to destroy Iran's nuclear program?

General DUNFORD. My understanding is that we do, Senator.

Senator COTTON. You have served in Iraq and Afghanistan. Do you know how many soldiers, marines underneath your command were killed by Iranian activities?

General DUNFORD. Senator, I know the total number of soldiers, sailors, airmen, and marines that were killed by Iranian activities, and the number has been recently reported as about 500. We were not always able to attribute the casualties that we had to Iranian activity, although many times we suspected it was Iranian activity, even though we did not necessarily have the forensics to support that.

Senator COTTON. So about 500 confirmed, but many more suspected killed in action and even more wounded in action.

You have a reputation for being particularly thoughtful when you deal with the families of fallen servicemembers. What would you say to family members of a soldier, sailor, airman, or marine that was killed by Iranian activity if we make a nuclear agreement with Iran before they change their behavior in the region?

General DUNFORD. Well, Senator, what I would say is that my expectation is that regardless of there being an agreement or not, Iran will continue to be a malign force and influence across the region. Then if confirmed as the Chairman, I will make sure that our leadership has a full range of military options to deal with Iranian activity.

Senator COTTON. It has been reported that your nickname is "Fighting Joe." Is that correct?

General DUNFORD. Senator, actually it is not one I use.

Senator COTTON. But it is one that has been given to you. Correct?

General DUNFORD. Senator, perhaps by my wife.

[Laughter.]

Senator COTTON. Do you care to tell us the origin of that nickname given to you that you choose not to use?

General DUNFORD. Senator, I would prefer to talk about that in private, if you do not mind.

Senator COTTON. So I have heard it reported that it was because of your activities as a commander in the early days of the Iraq war as an infantry officer.

Given whatever budget agreement we reach, it will probably be inadequate to meet the forces that we face and the long-term modernization needs that we have, whether it is the long-range strike bomber or the F-35, the Ohio class replacement submarine. Are you worried about the next generation of infantrymen in the Marine Corps and the Army, that we are going to be taking money from our ground troops to put in major capital investments, which are clearly needed?

General DUNFORD. Senator, I am concerned, and I think it is broader than just the infantry piece. I mean, I think experience tells us we need a balanced inventory of capabilities and capacities in the joint force to be successful.

When I answered the question of Senator Ayotte earlier when she asked me what kept me up at night, I talked about the need to respond to the uncertain. What concerns me are people who actually think they know what the future is going to look like because our experience tells us we do not. So having a full range of

capabilities that includes effective marines and soldiers from my perspective is the prudent thing to do.

Senator COTTON. Thank you.

In your long and distinguished career, I think we put ground forces at a minimum into Grenada, Panama, Iraq, Somalia, the Balkans, Afghanistan, Iraq again, and there is no doubt that we may be called upon again in the future. So I hope in your tenure that even if you do not want to be called “Fighting Joe,” that you will be on the lookout for all the Fighting Joes in the Marine Corps and the Army so the country will have them ready to serve once again.

General DUNFORD. I will do that, Senator. Thank you.

Chairman MCCAIN. The committee will not review how the Senator from Arkansas got his nicknames here in the Senate.

[Laughter.]

Senator KAINE?

Senator KAINE. Thank you, Mr. Chairman.

Thank you, General Dunford, to you and your family.

General Dunford, with the President’s recent announcement about 500 more advisors going into the anti-ISIL mission in Iraq and Syria and in the region, we are now up to 3,500 troops that are serving abroad in that battle serving as advisors, as trainers, special forces coordinating air campaigns, conducting ground strikes. The war passed its 11-month anniversary yesterday. 2 days ago, General Dempsey was here and testified that he believed in a mission of this complexity, it was likely to be a multiyear effort that would require a sustained commitment by the United States to defeat ISIL.

Do you think it would be received positively by the troops who we are asking to deploy far from home and risk their lives if Congress were to have a debate and authorize and affirm the U.S. mission against ISIL?

General DUNFORD. Senator, I do think it would be positive from a couple perspectives. One, the reason you mentioned is—I think what our young men and women need—and it is really all they need to do what we ask them to do—is a sense that what they are doing has purpose, has meaning, and has the support of the American people. So that is the first reason.

But I also think that there is a second benefit from such a debate, and that is to send a clear and unmistakable message to our adversaries and to our allies that we are committed to this endeavor.

Senator KAINE. Thank you, General.

With respect to the anti-ISIL effort, I want to pick up on something Senator Reed was talking about earlier. The whole-of-government approach, as you referred to it, has sort of nine lines of effort, and just for the record—I think we know these, but for everybody there—supporting effective governance in Iraq, denying ISIL safe haven, building partner capacity, enhancing intelligence collection on ISIL, disrupting ISIL finances, exposing ISIL’s true nature, disrupting the flow of foreign fighters, protecting the homeland, and humanitarian support. Those nine lines—two are purely DOD, denying ISIL safe haven and building partner capacity. The DOD has

a piece of some of the others, but the others are generally non-DOD.

You have testified that you think the effect of sequester on the DOD mission could be catastrophic. But given the fact that seven of these line items are non-DOD, would you agree that the allowance of sequester cuts to come back full force October 1 would also significantly hurt the other seven lines of effort, which are critical to defeating ISIL?

General DUNFORD. Senator, I do. If you just do not mind, I would just like to talk about the relationship between the two lines of effort in the DOD and the other seven because I think it highlights the issue.

Senator KAINE. Please.

General DUNFORD. From my perspective, the two lines of effort that we have right now—one, deny sanctuary and to build partnership capacity in both Iraq and Syria—really are buying time and space for those other seven lines of effort to work. But to be quite honest, you know, I do not see how we can have an enduring success unless those other seven lines of effort are addressed, and they are, in the final analysis, more important.

I think the military lines of effort will set the conditions for those other seven lines of effort to be put into effect, but I certainly cannot see us being successful without all of them being properly resourced. When you talk about threat finance, when you talk about moving foreign fighters, and as importantly, when you talk about the State Department's efforts to negotiate to develop effective governance in both Iraq and Syria, those are going to be very important actions to be taken for us, again, to have enduring stability in the region so we can actually deal with this issue once and for all.

Senator KAINE. I think there has been some suggestion that if we fix sequester for defense, that is all that we need to do. But even for important defense priorities like defeating ISIL, the testimony you have just given about the connection between non-defense investments and defense investments in defeating ISIL is really important. I will just note, by my count, 95 of 100 Senators are now on record either by voting in the budget or voting in the National Defense Authorization Act (NDAA) or in their public statements for supporting the notion that sequester should be fixed both for defense and non-defense accounts. It is my hope that we will do that.

With respect to training and equipping opposition in the anti-ISIL battle, just two items. Senator McCain first raised in September in a hearing—I think it was in this room—the question of if we train folks to fight ISIL in Syria and they get attacked by the Assad regime, will we protect them? He still has not gotten an answer to it. He asked it again yesterday. So by my count, September to now, that is 9 months without a clear answer.

We were told in theater last week that the current rules of engagement still would prohibit U.S. effort to support U.S.-trained anti-ISIL fighters in Syria if they come under attack by the Assad regime. I have asked questions for the record to get that clarified, and I would like to know if that is in fact the policy, if DOD intends to change the policy, when they will change the policy, and if not, what do we need to do to change the policy because I do not

believe we should be sending U.S.-trained folks into a theater of war without giving them a guarantee that they will be protected. Those questions will be record questions from the hearing 2 days ago, but I just want to let you know that those are coming and we view that as a very important matter.

General DUNFORD. Thank you, Senator.

Senator KAINE. Thank you, Mr. Chair.

Chairman MCCAIN. Senator Sullivan?

Senator SULLIVAN. Thank you, Mr. Chairman.

General and Ms. Dunford, I want to thank you for your service to the country taking on this new responsibility. I certainly know that marines all over the country, whether on active duty or retired, take great pride in the fact that you are only the second marine ever nominated for this post. I know your career has exemplified the values of honor, courage, and commitment that are the values of the Marine Corps. I certainly plan on voting for you with enthusiasm and encourage my colleagues to do so as well. So we look forward to seeing you tomorrow night at the parade.

I wanted to ask a few questions about the military relationship with the Congress, even though your role is going to be principal advisor to the President.

First, in the area of force posture, this committee occasionally weighs in through the NDAA and other means on key force posture issues, number of ships, basing of troops, aircraft like the Fairchild Republic A-10 Thunderbolt (A-10). When this happens, how important is it that the military follow the defense guidance of the Senate or the Congress?

General DUNFORD. Senator, I think it is very important, given how explicit it is in the Constitution what the responsibilities of the Congress are in that regard.

Senator SULLIVAN. So let me provide a couple examples. So let us say there was an amendment from the chairman and it was about the number of aircraft carriers, passed unanimously through the committee, votes on the Senate floor. Do you think the CNO should say, well, the chairman does not know that much about the Navy anymore, we are going to blow that advice in the NDAA off? Is that an appropriate role for the military?

General DUNFORD. If Congress passes a law, Senator, it would not be appropriate to ignore it.

Senator SULLIVAN. So how about an NDAA amendment that says it is the sense of Congress, in support of the President's rebalance in the Asia-Pacific strategy, to increase forces in the Pacific Command Area of Responsibility (PACOM AOR)? Is it appropriate to ignore that or even significantly decrease forces? What do you think our response to that should be if that is happening?

General DUNFORD. Senator, first, obviously, the sense of Congress ought to inform all the actions—

Senator SULLIVAN. There is a recent amendment that says exactly that.

General DUNFORD. Right.

Senator SULLIVAN. Let me provide a second area that we have talked about a little bit in terms of emerging threats. You know, sometimes the Department of Defense civilian and military officials, because there are so many threats out there, miss certain

threats. Let me provide an example of one that everybody seems to be focused on with the exception of the Department of Defense.

You may have seen ?Newsweek? this week had a cover story on the Arctic and what they called ?In the Race to Control the Arctic, the U.S. Lags Behind.? It is a very long article. It talks about how this is the world's newest great game, Kipling's term for the struggle between major powers to dominate the earth's remote but very strategic places. It talks about how the Russians are very, very aggressively moving military forces into the Arctic, serious military exercises, and how, whether it is the Coast Guard or the Secretary of Defense saying this new kind of geopolitical cold war the U.S. is in danger of losing. We are not even in the same league as the Russians. We are not even playing this game at all. So I think it is safe to say the Department of Defense has been asleep at the switch on this.

Congress has been more attuned to this issue. In this year's NDAA, there is a section that requires the Department of Defense to provide Congress with a military strategy, given the new threat levels, and an Operation Plan (OPLAN) for the Arctic based on the increased interests and threats.

Does it make sense to cut any of America's limited number of cold weather-trained warriors in the Arctic before this congressionally mandated strategy is completed?

General DUNFORD. Senator, I guess I am not sure which forces you are alluding to be cut.

Senator SULLIVAN. Well, there are only certain forces in the Arctic right now. They are all in Alaska.

General DUNFORD. Senator, I would like to take that for the record. I am not aware of the full range of decisions that are being made right now and what the implications are.

[The information follows:]

The Department's 2013 Arctic Strategy is aligned with the 2013 National Strategy for the Arctic Region. Our current capabilities and posture protect U.S. interests, and we are evaluating requirements against the evolving security environment to ensure we continue to meet our global defense responsibilities. Further development of cooperative strategic military partnerships with, for example, Norway and Canada, will underpin the Department's balanced approach to a region that is receiving increased attention.

The reduction of cold weather trained personnel is a result of the ongoing need to balance the growing importance of Arctic security with current operational priorities and resource constraints. DOD has a wide range of capabilities that can be deployed with proper preparation in a variety of operating environments, including the Arctic. As we continue to review requirements, we will review DOD's recent Arctic Strategy as well. If confirmed as Chairman, I will meet the NDAA mandate to provide Congress with a military strategy for the Arctic.

We are and will continue to train and operate regularly in the Arctic to meet our primary objectives of ensuring security, supporting safety, and promoting defense cooperation while preparing for a wide range of challenges and contingencies.

Senator SULLIVAN. General, I mean, I think it is important to recognize, you know, it is hard to figure out appropriate force levels and capabilities in the Arctic without having a plan. We have mandated the desire and need for a plan, and I think we are getting a little bit of the cart before the horse, cutting forces before we even know what our plan is. But we certainly recognize that there is an increased threat. Congress has, and we hope the DOD will recognize it is as well.

General DUNFORD. Senator, if confirmed—I know I have had some conversations with both the current Chief of Naval Operations and Commandant of the Coast Guard about the implications for the Arctic. The commitment I would make to you is that we will, in fact, develop an appropriate role for the military in support of our economic and political interests in the Arctic.

Senator SULLIVAN. Thank you.

Chairman MCCAIN. Senator Hirono?

Senator HIRONO. Thank you, Mr. Chairman and General Dunford and Mrs. Dunford and your family, for your service.

I just wanted to pick up very briefly on the issue of sexual trauma in the military and the concerns about retaliation. I think that you had noted that you would determine the root causes and continue to work to ensure that the culture does not support retaliation.

I would ask you to have a sense of urgency as you respond to this committee on how you are going to address and resolve the issue of retaliation because even as we downsize our military, it is even more important that our troops' morale remain strong and that there is cohesion, and there could not be strong morale or cohesion if some of your troops are encountering sexual assault and harassment and retaliation. I just wanted to make that point.

Could you share very briefly your views on the rebalance to the Asia-Pacific?

General DUNFORD. Senator, I can. It is absolutely critical that we do that, given both the demographics in Asia but also our economic future. So there is no question about it. That is going to require us to modernize our alliances, and I think you have seen some progress in that regard, our relationship with South Korea, our relationship with Japan, our relationship with the Philippines, Vietnam, India, Australia have all been adjusted here in recent months. I think we have an unprecedented level of exercises and engagement right now in the Pacific again to assert our influence and to provide a stabilizing presence.

The most important thing I think the rebalance to the Pacific does is it provides a security infrastructure within which we could advance our National interests. That is what has existed for the past 7 years, and I think the rebalance to the Pacific, as we know it today, is designed to modernize that security infrastructure and make sure it is in place so that just as we protect our National interests over the past 7 years, we can do that in the indefinite future as well.

Senator HIRONO. I just got information on the cuts that will happen to Pacific Command (PACOM) as a result of the budget necessities. I am glad to know that General Odierno did say that the cuts were with regard to the importance of a rebalance, and therefore, we want to make sure—and this is something that I know that Senator Sullivan shares with me—that the rebalance to the Asia-Pacific remains a very strong commitment on our part.

You mentioned that Russia is the greatest threat to our National security. Where would ISIL, China, and North Korea fall with regard to our National security dangers?

General DUNFORD. Senator, if I had to rack and stack them today, I would have Russia down as number one. I would have China down as number two.

Senator HIRONO. Could you explain why briefly?

General DUNFORD. Sure. Russia, of course, because of nuclear capability and their aggression.

China because of their military capability, their growing military capability, and their presence in the Pacific and our interests in the Pacific. So it is a relationship between their capabilities and our interests. It does not necessarily mean they are a current threat. It does not mean they view China as an enemy. But, again, as someone in uniform, I get paid to look at both somebody's intent and their capabilities. So when I look at Chinese capabilities relative to our interests in the Pacific, I would have to consider China as an area of concern for security, again as distinct from a threat.

Clearly, North Korea with ballistic missile capability and the potential to reach the United States and attack the homeland is high on that list.

Then ISIL.

But, you know, Senator, I just want to make it clear. As I go down that list and prioritize, I do not view that meaning that we can attack those issues in sequence or that a prioritization of one at the expense of the other is necessarily something we would have to do at this particular time. All four of those security issues are ones that require the Department to look at. They all create a challenge that needs to be addressed.

Senator HIRONO. That is why we live in very complicated times.

I would like to focus on our distributed laydown in the Pacific. Specific to Japan, I am aware of the concerns of the Okinawan population and of their leadership's desire to halt construction of the Futenma replacement facility. Can you characterize our relationship and the challenges for relocating our forces from and within Japan? Because that is very much a part of the rebalance that we are committed to.

General DUNFORD. Senator, thanks. I recently did visit Japan. I was encouraged by my visit. I met with a number of their senior leaders, to include the minister of defense. I received nothing but their full commitment to continue with the Futenma replacement plan. So my sense is that the Japanese Government is committed to that. They recognize that that is important for us to continue with the preferred laydown that you alluded to. So my sense right now is that our relationship with the Japanese and their stated commitment—we are in a pretty good place with regard to the Futenma replacement facility.

Senator HIRONO. Do you view the Okinawa situation as mainly a concern that should be dealt with within Japan and their government?

General DUNFORD. Senator, we—and I specifically now talk about the marines in Okinawa. We need to be good neighbors and set the conditions for a positive relationship with the Okinawan people. So I think we can make a contribution. But at the end of the day, the issue of the Futenma replacement facility from my perspective is in fact an internal Japanese political issue that has to be worked by the Japanese Government.

Senator HIRONO. Thank you.

Thank you, Mr. Chairman.

Chairman MCCAIN. Senator Heinrich?

Senator HEINRICH. General Dunford, welcome to you and your family. In your written testimony, you state, as Senator Fischer pointed out, that our nuclear deterrent is the Nation's top military priority. That leads me to a specific question related to how we plan for that priority over time.

The health of our Nation's whole nuclear weapons complex is critical to our nuclear deterrent. One of the things you wrote in your written testimony is that we must recruit and train our next generation workforce capable of certifying stockpile requirements and to modernize the nuclear weapons infrastructure.

Can you share with me your thoughts specifically on LDRD, or laboratory-directed research and development, and the life extension programs that are going on at our National labs and their role in achieving recruitment and retention of that next generation nuclear workforce?

General DUNFORD. Senator, that is an issue that in my current capacity I frankly have not developed any level of expertise, and I would like to take that one for the record.

[The information follows:]

While I am not familiar with these programs in my current capacity, I understand the warhead Life Extension Programs and LDRD represent the broad nature of the workload at the Department of Energy's national security laboratories. These programs are necessary to deliver near-term warhead commitments while advancing science and technology for future national security needs. Furthermore, they contribute towards maintaining a steady, sustainable, and meaningful workload for the laboratories and are critical for attracting and retaining the highly technical workforce required to sustain our Nation's nuclear deterrent.

Senator HEINRICH. That would be fine. I look forward to engaging you on that in the future. I think it is going to be really important for us to view some of the particulars of how we manage the labs and particularly the things that bring people into the pipeline at the front end with the greatest amount of expertise and then they stay in those positions, rise up through the labs, and provide the continuity that it is going to take to make sure that we have the kind of modern deterrent that we need.

I want to focus my next question on some of the challenges here at home. In my view, defense innovation is moving too slowly, oftentimes in cycles that last years, while commercial innovation can be measured in cycles of months.

This committee included a section in this year's NDAA to authorize funding, about half of which would be dedicated for directed energy to accelerate the fielding of a variety of important offset technologies including, in addition to directed energy, things like low-cost, high-speed munitions, cyber capabilities, autonomous systems, undersea warfare, and intelligence data analytics.

What role do you think the development of these new technologies like directed energy and robotics will play in our National security posture? What steps should we take to develop and deliver operationally useful systems more quickly?

General DUNFORD. Senator, in my capacity as the Chairman, if I am confirmed, I view the future of the joint force as being one of my critical responsibilities. A key piece of that is making sure

we keep apace of innovation so that we not only get better at doing what we are doing today, but we find fundamentally different ways to do things in the future that are more effective and they maintain our competitive advantage. So I think what you are outlining is certainly an area of concern for me. Even as a service chief, I would tell you that over the past decade our efforts at innovation probably were at a lower priority than they ought to be, and we have, over the past year, tried to energize that. I would certainly bring that same focus and attention if I was confirmed as the Chairman.

Senator HEINRICH. I appreciate that.

One other challenge at home here is that the Air Force's remotely piloted aircraft career field is under really severe strain, largely through increased combatant commander requirements, insufficient personnel policy actions to improve manning levels, and just the basic reality that the Air Force is losing more remotely piloted aircraft pilots than it is training. We have heard from Secretary James and General Welch. They have assured this committee that they are dedicated to resolving the shortfall, but I also want to get your commitment to helping resolve this issue. So if confirmed, I would just ask that you make that a priority.

General DUNFORD. Senator, I would maybe just comment quickly that those men and women that are in that field represent a core capability in the joint force, and their effectiveness, their morale, their willingness to continue to serve is absolutely important. I have spoken to General Welch about this particular issue, but I will certainly reinforce the efforts of the Chief of Staff of the Air Force and the Secretary of the Air Force to make sure that those individuals are appreciated and that they have a climate within which they want to remain airmen.

Senator HEINRICH. I appreciate that deeply. I think it is an area where we are seeing some severe strains and where folks really need our support. So thank you.

Chairman MCCAIN. Senator Tillis?

Senator TILLIS. Good morning, General Dunford. Thank you for your service and for your family's longtime serving our Nation.

I leaned over to Senator Sullivan during some of your comments, and I also thoroughly appreciate your precise answer to questions. It is refreshing to get that in the committee.

I would like to go back to a question or build on a question that Senator Sessions asked of you, and it had to do with the plus-up of spending and the use of OCO as a way. But we all know that that is not the best way to do what you need to do, primarily for the purposes that you pointed out, the certainty. It still does not give you long-term certainty.

But my question to you is have you given thought to how you could potentially use this funding, although it is not a long-term commitment, to take the edge off of sequestration and any ideas on precisely how you would?

General DUNFORD. Senator, we started to look at that, and it would really require a change in the rules for using OCO for us to be able to do that. Right now, if you gave us OCO, given the current rules, we would not be able to use it in the places where we most need it. Much of the money that we requested, in addition to

the BCA level in the President's Budget for 2016, was really focused on modernization. That is the thing that has suffered the most over the last 2 years, in addition to readiness. So we have looked at it, but there are some very practical limitations in our ability to apply OCO to some of the areas that we need it applied to.

Senator TILLIS. Will you be making specific recommendations for things that we need to look at to make sure you get the most productivity you can out of it?

General DUNFORD. Senator, I will certainly do that through the Secretary of Defense as he works this issue.

Senator TILLIS. Thank you.

I wanted to go back to also questions that were asked about Afghanistan and Iraq. I visited both countries and spoke with a number of people while we were there. It seems like in Afghanistan we have got the right mix. We have got them in the right roles and the Afghanis have proven that they can fight successfully.

In Iraq, I understand what you said about some of the political decisions of the past administration have caused a problem. Those structural issues have to be addressed.

But have you given any thought to, assuming that you get to the point to where you have the right command infrastructure among the Iraqis, what we may need to actually create a credible, trained, effective fighting force for the Iraqis beyond the 3,000 currently present troops?

General DUNFORD. Senator, you know, I can address that conceptually in terms of their ability to develop combined arms and in terms of their ability to develop institutional training and in terms of their ability to develop the capacity at the ministerial level to support tactical-level forces. But frankly, it has been a few years since I have been on the ground in Iraq, and what I would like to do is take the opportunity, if I am confirmed, to visit Iraq, talk to the commanders on the ground and again develop a comprehensive recommendation that would help us to move the campaign forward.

Senator TILLIS. On the flip side, I know the Afghanis have made a lot of progress, but I think they still rely on us heavily for our train, advise, and assist role and our Intelligence, Surveillance, and Reconnaissance (ISR) capabilities in the region. I know that I have heard you say we cannot have a calendar-based approach towards reduction in forces. But the sense that I got when I was in Kabul was that those who are very much in touch with the situation on the ground now think that it would be a very bad idea to substantially reduce our current presence over the near term. Now, I assume that that is because they are looking ahead to 12 months, 18 months from now and saying we are still not going to at a place where the Afghanis can be completely independent. Do you share that view?

General DUNFORD. Senator, what I can tell you is the assumptions that we made in the recommendation that was delivered in December of 2013. So it is now some 19 months ago. Some of the assumptions affected the timeline. We certainly did not expect there to be as much of a delay in the elections process of 2014, and there was. That was a great distracter in our efforts to develop ministerial capacity. When I was on the ground, it was very dif-

difficult to get my counterparts to focus on some of the practical side of growing ministerial capacity when they were involved in a very real challenge of providing security for the election. So it delayed our efforts in growing ministerial capacity.

There have been other areas where we made some assumptions about things that could be done within a certain period of time that we actually did not in the event get done during that window of time.

So from a distance now—and again, another area where I would go over and talk to General Campbell and General Austin down at Central Command, if confirmed, immediately. From a distance, it certainly makes sense to me that the timeline that we originally identified in 2013 as being possible has probably been affected by the political events inside of Afghanistan and other events associated with the enemy.

Senator TILLIS. Thank you, General Dunford. I look forward to supporting your confirmation.

Thank you, Mr. Chair.

Chairman MCCAIN. Senator Blumenthal?

Senator BLUMENTHAL. Thanks, Mr. Chairman.

Thank you for your service, General, and thank you to your family who are here today for their service as well.

I want to begin with what you assessed as the primary threats from Russia and China and talk about a weapons platform or system that has not been raised today, our submarine force. I recognize that is not immediately part of your background, but obviously a grave responsibility, if you are confirmed. I certainly am going to strongly support your confirmation as the next Chairman of the Joint Chiefs of Staff.

The Ohio replacement program is critical to our nuclear deterrence, and the cost of that program has been estimated in the range of \$100 billion. The Navy has said that it cannot pay for it out of its Navy budget. I am wondering whether you will consider and whether you will support looking at the Defense Department budget as a whole to fund the Ohio replacement program, which I am assuming you agree is critical to our nuclear deterrence.

General DUNFORD. Senator, thanks.

First, I do agree it is critical. It is the most survivable part of the triad and a critical capability for us to modernize.

I am very familiar with the budgetary implications of the Ohio class replacement on the Department of the Navy's long-range shipbuilding plan. What I can tell you with a degree of surety is that were we to fund the Ohio class replacement out of the Department of the Navy, it would have a pretty adverse effect on the rest of the shipbuilding plan, and the estimates are somewhere between two and a half and three ships a year. Again, we are not anywhere near where we need to be right now. So the 30-year shipbuilding plan was intended to get us where we need to be.

So I do think a broader mechanism for the Ohio class replacement makes sense. Otherwise, we are going to have some pretty adverse effects on the Navy. As I mentioned a couple times in testimony today, one of my perspectives coming into this role would be, if confirmed, is that we need to have some balance, and that includes a balanced Navy. So as important as the Ohio class replace-

ment is, the United States Navy, in terms of the forward presence they provide, in terms of their warfighting capability, has many other capabilities that are critical to our Nation as well. It would be difficult to balance those were the Ohio class replacement to be paid for within the current Department of the Navy's projected resources.

Senator BLUMENTHAL. Thank you for that answer, General. I am hoping that you would agree with equal surety that the continuing program to build two subs a year, two Virginia class subs a year, should continue as planned right now.

General DUNFORD. Senator, here is where I defer to my partner, the Chief of Naval Operations. But that is certainly his plan, and I trust his judgment in that regard.

Senator BLUMENTHAL. Thank you.

Going to another area that I do not think has been raised yet, I know of your very passionate and admirable commitment to the men and women who are our greatest asset in the United States Armed Forces, their wellbeing and their welfare. I hope that you can commit that you will continue the effort to coordinate better with the Veterans Administration for men and women who are leaving active duty on everything from transfer of medical records to drug formularies to a range of issues. I do not need to expound on them for you, but I hope that you will focus and continue those efforts.

General DUNFORD. Senator, absolutely. Just so you know, I view keeping faith with our men and women in uniform as one of the primary responsibilities of leadership, and that is both when they are in uniform and when they are out of uniform. We have an expression, you know, certainly in the Marine Corps that once a marine, always a marine. From my perspective, once you have served our country, the service and support that you should get in return as part of that bargain that we make with young men and women who enlist is something that is pretty sacred. I absolutely will continue to support the efforts to make sure that the health care transition that our young men and women make when they are in uniform to the Veterans Administration is as seamless as possible. I think we owe them that.

Senator BLUMENTHAL. One last question, General. Your predecessor, General Dempsey, has stated repeatedly—and I am quoting—we have the capability to use a military option if the Iranians choose to stray off the diplomatic path. End quote.

My question to you is are you satisfied that our Nation has done enough to prepare militarily for the option—and the President has said that all options should be on the table—if necessary, to use a military option there, as much as we all may wish that the negotiations should succeed?

General DUNFORD. Senator, my understanding today is that we have both the plans in place and the capability in place to deal with a wide range of eventualities in Iran.

Senator BLUMENTHAL. Thank you. Thanks very much.

Chairman MCCAIN. Senator Cruz?

Senator CRUZ. Thank you, Mr. Chairman.

General Dunford, congratulations on your nomination and thank you for your 38 years of distinguished service and your leadership

as Commandant of the Marine Corps. Our Nation is fortunate to have a military leader such as you serving at a time of great peril.

I want to ask a question of you that is the same question I asked your predecessor, General Dempsey. If the objective were to destroy ISIS, not to weaken them, not to degrade them, but to utterly destroy them within 90 days, what would be required militarily to accomplish that objective?

General DUNFORD. Senator, my assessment is that it would not be possible to destroy ISIL within 90 days, and I also do not believe that we can develop an enduring solution simply with military force against ISIL although I do think the military aspect of the campaign is critical.

Senator CRUZ. Well, if the time frame I have suggested is not feasible, let me ask you a follow-up question which is what would be required to destroy ISIS and what time frame is necessary. Specifically if that were the objective, what would be required to accomplish it militarily?

General DUNFORD. Senator, if I am confirmed, I will continue to look at this issue, but my perspective today is that this is a long-term endeavor. This is on the order of years not months in order to defeat, destroy in your words, ISIL.

Senator CRUZ. What would be required to do that in whatever time period is necessary?

General DUNFORD. From a military perspective, the two things that we are doing I think we would need to continue to do, and that is, to take action to deny ISIL sanctuary wherever it may take root both in Iraq and Syria and elsewhere. That would require us to build local forces, build partnership capacity, if you will, of the local forces that would be the real defeat mechanism for ISIL in the respective countries, given the way that it is spread right now. You would have to have effective governance so that you had the conditions set for long-term stability where ISIL could not then get traction again in the future. It would have to address the foreign financing of ISIL, where they get their money, as well as their economic assets within each one of those countries. You would have to address the movement of foreign fighters back and forth. Probably as importantly, the one thing we need to do, Senator, is we need to undermine the narrative of ISIL and discredit the narrative of ISIL.

Senator CRUZ. In your personal judgment, are you concerned about the rules of engagement for our current use of airpower, that it is overly constraining the effectiveness?

General DUNFORD. Senator, I am not. One of the reasons is when we go to war, we go to war with our values, and we conduct proportionality in the planning and discrimination in execution. The thing that we are doing now is ensuring that we do not have civilian casualties. I think that, frankly, supports our narrative and gives us the credibility we need to be successful long term in this campaign.

Senator CRUZ. In recent days, the administration has informed Congress that we are arming the Kurds. This is something I have called for for a long time. I spoke this week with a senior Kurdish leader who reported that the commanders on the ground of the Peshmerga are not confirming that. What can you tell this committee about the extent to which we are providing serious arms to

the Kurds and it is actually getting to them rather than being bogged down in Baghdad?

General DUNFORD. Senator, first, I would agree with you. The most effective ground forces both in Syria and Iraq today are in fact the Kurds.

My understanding is that the issues associated with supporting the Kurds have been addressed, and they are now getting the material support that they need, as well as the training that they need. If I am confirmed, I will certainly, as a matter of priority, go over there, visit, and make sure that I am able to make my own personal assessment based on the facts on the ground.

Senator CRUZ. Will you commit to providing this committee with specific details in terms of what is being done to arm the Kurds?

General DUNFORD. I will do that, Senator.

Senator CRUZ. Let me ask concerning Iran. If Iran were to acquire nuclear weapons, what is the National security risk in your judgment to the United States of that occurrence?

General DUNFORD. Senator, I think it is significant, particularly if accompanying that is intercontinental ballistic missile technology. It is a significant threat to our Nation. It is also a destabilizing action in the Middle East. I think we can expect a proliferation of nuclear arms as a result of Iranian possession of nuclear weapons.

Senator CRUZ. So, General, my final question. I am concerned about morale in the military. We have discussed in this hearing how the world is getting more and more dangerous, and yet at the same time, I think we are dramatically undermining our readiness, our ability to defend this Nation. The "Military Times" did a survey where in 2009 they asked soldiers whether overall the quality of life is good or excellent. 91 percent said yes. In 2014, that number had dropped from 91 percent to 56 percent. Likewise, they asked whether the senior military leadership has my best interest at heart. In 2009, 53 percent agreed. In 2014, that had dropped in half to roughly 27 percent.

Do you share the concerns about declining morale in the military, and if so, what do you see as the causes of it and the proper approach to fix it?

General DUNFORD. Senator, thanks for the question.

First of all, with regard to the morale of our force, it is clearly one of the things that distinguishes us. I was able to say in my opening statement that we have the most capable military force in the world today, and that clearly is rooted in the men and women that we have in uniform and their willingness to do what we have asked them to do in the last decade. It is not something I would be complacent about.

I do have concerns as a service chief about how hard we have been running our men and women over the last few years. As an example, Senator, we had had a plan where we wanted to have a 1-to-3 deployment-to-dwell ratio. That means our forces would be deployed about 7 months, home for 21 months. That allowed us to get adequate training. It allowed us to take care of families, allowed the marines to kind of be what I describe as a sustained rate of fire. Many of our units now inside the Marine Corps are at or below a 1-to-2 deployment-to-dwell rate. So they are home for less

than twice as much time. So they will be deployed for 7 months, home less than 14 months, and back out again, and that continues on and certainly has an effect on the families and, again, our ability to train across the range of military operations.

If I am confirmed, Senator, this is absolutely going to be one of the areas that I focus on. I think I have a responsibility to lead the young men and women in uniform. I think I have a responsibility to represent them, and when I say represent them, that means to articulate to our leadership, both here on the Hill, as well as the executive branch, what material support, what leadership, what resources they need to remain the finest fighting force in the United States.

It bothers me greatly if our young men and women do not have confidence in their senior leadership, and I can tell you that every day when I wake up, if I am confirmed, that will be an issue of priority for me, that that will be exactly what I seek to do is gain the trust and confidence of our young men and women and let them know that they are in fact properly represented back here Washington, D.C., and that we as leaders recognize that we are asking them to do a lot. They do not ask much more in return than to have the wherewithal to accomplish the mission with minimal loss of life or equipment. I will commit to you that is exactly what I will do.

Senator CRUZ. Thank you, General.

Thank you, Mr. Chairman.

Chairman MCCAIN. Has sequestration not bred uncertainty which has contributed to this drop in morale?

General DUNFORD. Chairman, thanks. I should have mentioned that when I talked about how busy the forces are. There is a tremendous amount of angst across the force, and a large part of that is driven by the uncertainty about how big the force will be, what will happen to their particular careers, and will we have the equipment necessary to accomplish the mission. So I do think, Chairman, that sequestration is a factor.

Chairman MCCAIN. Senator Sullivan had one follow-up question, and then we will turn to Senator Shaheen.

Senator SULLIVAN. Thank you, Mr. Chairman.

General, I just wanted to get back to the issue of the military's role in relationship with Congress. Do you think it is an important role that we have to make sure that our services do not replicate missions and core competencies, particularly in an austere budget environment like we have right now?

General DUNFORD. I do, Senator.

Senator SULLIVAN. Let me just provide a quick example. I believe one of the core competencies that the Army has is large-scale airborne units that can deploy in a moment's notice anywhere in the world. Do you think that is one of their core competencies?

General DUNFORD. I do, Senator.

Senator SULLIVAN. A few months ago, a military general testified in front of one of the subcommittees here about putting troops and helicopters on naval shipping for, quote, expeditionary maneuver throughout the Pacific. What service's core competency would you associate that mission with?

General DUNFORD. I would associate that with the United States Marine Corps, Senator.

Senator SULLIVAN. So if I told you that was an Army general describing the Army's new Pacific Pathways strategy, would that surprise you?

General DUNFORD. It would not, Senator. I have seen that description in the open source.

Senator SULLIVAN. Do you think that costly new Army mission is a redundant mission to the United States Marine Corps? mission, and is that a good use of America's taxpayer and military spending?

General DUNFORD. Senator, given the shortfall of the amphibious lift—I am speaking now as a service chief—I think the priority ought to go to the United States Marine Corps.

Senator SULLIVAN. Would be it an appropriate role of this Congress to try to limit such redundancies by making sure military funding goes to core competencies like much-needed Army airborne brigades in the Asia-Pacific and the Arctic as opposed to redundant activities like troops and Army helicopters on naval shipping?

General DUNFORD. Senator, I do agree that the Congress has a critical role in ensuring that we have a proper division of labor within the Department of Defense and that the joint capabilities and capacities that we have are right-sized.

Senator SULLIVAN. Thank you.

Thank you, Mr. Chairman.

Chairman MCCAIN. Thank you for that single follow-up question. Senator Shaheen?

Senator SHAHEEN. Thank you, Mr. Chairman. I apologize for getting back so late. I was in an Appropriations markup.

But, General Dunford, thank you very much to you and your family for your service in the past and for your willingness to continue to serve. I have to say after watching you before the crowd of New Hampshire business folks and hearing from them, how impressed they were. I look forward to the impression that you are going to make as the new Chairman of the Joint Chiefs.

I wanted to follow up on Senator Wicker's questions about Europe and the concerns in Europe because I recently returned from a visit to Poland and to Latvia where I saw the NATO exercises in Latvia at Adazi Base and heard extreme concern about the potential for Putin to engage, as you pointed out, in an asymmetric instigation in the Baltics and in other eastern European countries. I am concerned about the failure to date of Europe to commit to the 2 percent of their Gross Domestic Product (GDP) for defense spending and wonder if you have thoughts about what more we might be able to do to encourage them to ante up.

General DUNFORD. Senator, I do think it is important that our NATO partners bear their share of the burden. That is an issue that I know Secretary Carter and his predecessors all addressed. They came out of the Wales conference with a commitment for all those nations to meet that 2 percent.

From my perspective, given the shortfall of capabilities and capacities in Europe in areas like intelligence, surveillance, reconnaissance, defensive cyber capabilities, strategic lift, and so forth,

I think it is going to be absolutely critical for our partners to develop those capabilities and capacities.

I would also add that I have seen firsthand in my previous assignment in Afghanistan when our NATO partners are properly resourced, they do have capabilities and capacities that can be integrated to great effect. So I do think the alliance, were it to be properly resourced, can be a very effective force for stability in Europe, as well as for out-of-Europe operations.

Senator SHAHEEN. I agree and hopefully we will see that commitment followed through on because clearly the threat from Putin and from Russia continues, and our eastern European allies are very concerned about that.

I want to ask you about—you talked about the deployment pressures on our military. I wonder if you could give me your perspective on the appropriate active-to-Reserve ratio and the importance of the National Guard and Reserve and continuing the military mission that we have in this country.

General DUNFORD. Senator, I can. Of course, one of the things we have to do when we talk about using the Reserve and the Guard is balance the concerns of employers, concerns of families with the willingness and the desire frankly for the Guard and Reserve to continue to serve in what is more of an operational or strategic sense. What I mean by that is there was in the past the sense that the Guard and Reserve would be something—in the case of a major war, we would mobilize the Guard and Reserve. I think we found today, particularly with the size of our U.S. military force and our commitments to the Guard and Reserve, is much more operational in that they are useful and necessary on a day-to-day basis.

My sense is as a service chief—and I will certainly look at the implications across the other services if I am confirmed—is about once every 4 years is a reasonable time for a major deployment, although in many cases, depending on what their employment is and so forth, individuals can be available on a much more routine basis. But for whole units, probably about 1 to 4 years, 1 year deployment and mobilization and then 4 years back focused on their families and employers, seems to be sustainable. But, again, if I am confirmed, I will certainly consult with the appropriate leadership in the Guard and Reserve to make sure that I have a full appreciation for their challenges, as well as the other service chiefs.

Senator SHAHEEN. Well, thank you. We have seen in New Hampshire the significant contribution of the Guard and the integration, particularly with the air refueling, of active duty and Guard in providing that mission. So I think it is very important.

Let me ask you if you would commit to two things. One is in 2013, the Department announced the elimination of the direct combat exclusion policy and announced plans to fully integrate more women into all occupational fields. I hope that you will continue that effort and see it through. As we know, women are making up a greater percentage of our military these days, and making sure that they have the ability to compete in all areas I think is significant.

The other question. I noticed this week that the Navy announced that they have tripled the maternity leave policy for women serving in the Navy, and I would urge you to consider that across all

branches of the military. Again, as women are making up more of our troops, I think it is important to address the family issues that they have, and certainly maternity leave is a big part of that. So I hope you will do that.

General DUNFORD. Thank you, Senator. I will look at both of those issues.

Senator SHAHEEN. Thank you.

Senator REED [presiding]. Senator Graham?

Senator GRAHAM. Thank you.

General, I think you are an outstanding choice. The President could not have chosen a better person to be Chairman of the Joint Chiefs of Staff. So congratulations to you and your family for a lot of great service. The best is yet to come.

When it comes to stopping ISIL—that is the stated goal is to degrade and destroy—what if we fail in that goal? What can America expect?

General DUNFORD. Senator, if we were to fail in stopping ISIL, I think you will see an expansion of ISIL not only across the Middle East but outside the Middle East. We have, obviously, seen now elements of ISIL in the Maghreb all the way over to Afghanistan.

Senator GRAHAM. So they are an expanding power, as we speak?

General DUNFORD. Well, Senator, I think they are expanded in terms of geographic location. I have not yet concluded that they are expanded in terms of capability.

Senator GRAHAM. Got you. But I remember when we were talking in the office, you said if we do not stop these guys, we can expect a tsunami of ISIL and their sympathizers. Is that fair?

General DUNFORD. Senator, I think it is fair. That is exactly what I said, and I stand by that comment.

Senator GRAHAM. So at the end of the day, I do not want the tsunami to come, so we are going to have to stop these guys.

Is it fair to say that Iraq and Syria need to be viewed as one battle space when it comes to ISIL or to stop them in Iraq if you do not address their presence in Syria?

General DUNFORD. Absolutely, Senator. The enemy does not respect the boundaries that we see on the map.

Senator GRAHAM. Can you envision a scenario where you have a regional army made up of Arabs and maybe Turkey that would go into Syria and fight ISIL alone, leaving Assad off the table? Would they join up for such a fight?

General DUNFORD. Senator, it is hard for me, watching the politics from the outside right now, to see that degree of integration, given the divergent interests that those countries have. But I can certainly see where that would be an effective way to deal with this is to have a regional army that would be willing to deal with ISIL.

Senator GRAHAM. Right. But my question is if you did not put Assad's removal on the table, it would be hard to get them to join up just to fight ISIL because they are worried about Syria becoming a puppet of Iran.

General DUNFORD. That is right, Senator. Most of the countries that you spoke about all have a shared goal of removing Assad from power.

Senator GRAHAM. Would you agree with me that Assad's presence is sort of a magnet for Sunni extremists?

General DUNFORD. I think if not the proximate cause of the ISIL movement, certainly one of the primary drivers of the ISIL movement was the abuses of the Assad regime.

Senator GRAHAM. If we go down to a thousand Kabul-centric U.S. forces in 2017 in Afghanistan, do we substantially lose our counterterrorism mission?

General DUNFORD. My assessment is we would have a significant degradation of our counterterrorism mission in Afghanistan, were we to do that.

Senator GRAHAM. Would we lose our eyes and ears along the Afghan-Pakistan border that we enjoy today?

General DUNFORD. We would, Senator.

Senator GRAHAM. Would in your view that create a lot of risk to the gains we have achieved over the last decade if we did not have those eyes and ears and counterterrorism forces?

General DUNFORD. Senator, there is no question it would create risk.

Senator GRAHAM. When it comes to 60 Free Syrian Army troops being trained under the current regime, would you agree with me it is going to be very hard to recruit people to go into Syria if you do not promise them protection from Assad because if they get any capability at all in fighting ISIL, Assad would assume that capability would be turned on him one day and he is not going to sit on the sidelines and watch a force mature and develop without hitting them? Does that make sense to you?

General DUNFORD. I agree with that assessment, Senator.

Senator GRAHAM. So the most logical consequence of training a force to go into Syria to fight ISIL alone is that Assad will see them as a threat to his regime and most likely attack.

General DUNFORD. I agree with that, Senator.

Senator GRAHAM. It would be very, I think, immoral to put someone in that position knowing that is coming their way with some capability to defend themselves. Does that make sense to you?

General DUNFORD. Senator, my assessment is that if we train moderate Syrian forces, the new Syrian army, then we ought to also provide them with the wherewithal to be successful.

Senator GRAHAM. If this war in Syria continues the way it is going for another year, do you worry about stability in Jordan?

General DUNFORD. I do, Senator.

Senator GRAHAM. Do you worry about stability in Lebanon?

General DUNFORD. I do, Senator.

Senator GRAHAM. So the consequences of going into Syria with a regional force and all of the problems associated with it have to be balanced against the consequences of ISIL surviving and thriving.

General DUNFORD. I agree with that, Senator.

Senator GRAHAM. In your view, over the long haul, is it in America's national security interest to do things necessary to degrade and destroy ISIL?

General DUNFORD. I do believe that is absolutely in our National interest to do that, Senator.

Senator GRAHAM. Do you agree with me that whatever regional army we may form, there are certain American capabilities that would be outcome determinative in any fight against ISIL, and it

would be in our National security interest to provide those capabilities?

General DUNFORD. I agree with that, Senator, particularly in the case of aviation, intelligence, surveillance, reconnaissance, and probably special operations capabilities.

Senator GRAHAM. Finally, if a soldier or a member of our military falls in Iraq or Syria trying to destroy ISIL, would you agree with me that they died protecting their homeland?

General DUNFORD. I would, Senator.

Senator GRAHAM. That is the reason some of them may have to go back.

General DUNFORD. Senator, there is no question in my mind that the young men and women that we have deployed right now, the 3,500 that are inside of Iraq and those that are in the surrounds working through CENTCOM in this campaign, are protecting our Nation.

Senator GRAHAM. God bless them. God bless you. Best of luck.

General DUNFORD. Thank you, Senator.

Senator REED. General, on behalf of Chairman McCain, let me thank you for your testimony, thank you for your service and the service of your family.

Also on behalf of the chairman, I will now adjourn the hearing.

[Whereupon, at 11:53 a.m., the committee adjourned.]

[Prepared questions submitted to General Joseph F. Dunford, Jr., USMC by Chairman McCain prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. On previous occasions you have answered the Committee's policy questions on the reforms brought about by the Goldwater-Nichols Act, the last time being in connection with your recent nomination to be Commandant of the Marine Corps. You indicated that you did not see a need for modifications to Goldwater-Nichols Act provisions.

Has your view of the importance, implementation, and practice of these reforms changed since you testified before the Committee at your last confirmation hearing?

Answer. No.

Question. In light of your experience as Commandant of the Marine Corps, do you see any need for modifications to Goldwater-Nichols? If so, what modifications do you believe would be appropriate?

Answer. I do not currently anticipate the need to modify the Goldwater-Nichols Act.

DUTIES

Question. Based on your experience as Commandant of the Marine Corps, as Commander of United States Forces and the International Security Assistance Force in Afghanistan, and as Vice Director of Operations for the Joint Staff, what recommendations, if any, do you have for changes in the duties and functions set forth in section 152 through 155 of title 10, United States Code, and in regulations of the Department of Defense (DOD), that pertain to the Chairman and the Vice Chairman of the Joint Chiefs of Staff and the organization and operation of the Joint Staff in general?

Answer. I do not presently have recommendations to change the law or regulations.

RELATIONSHIPS

Question. Other sections of law and traditional practice establish important relationships between the Chairman and other officials. Please describe your under-

standing of the relationship of the Chairman of the Joint Chiefs of Staff to the following officials:

The Secretary of Defense.

Answer. The Chairman of the Joint Chiefs of Staff must have a close working relationship with the Secretary of Defense. Under Title 10, the Chairman is assigned several duties that guide this relationship to include serving as the principal military advisor to the President, the National Security Council, and the Secretary of Defense. The Chairman also performs other duties assigned by the Secretary of Defense.

Question. The National Security Advisor.

Answer. If confirmed, I will work closely with the National Security Advisor to ensure that our military efforts and options are synchronized with civilian efforts across the government. Since the Chairman is also the principal military advisor to the National Security Council and Homeland Security Council, I also will work with the National Security Advisor to inform and implement Presidential decisions.

Question. The Deputy Secretary of Defense.

Answer. Existing directives grant the Deputy Secretary of Defense full power and authority to act for the Secretary of Defense on any matters upon which the Secretary is authorized to act. As a result, I expect the relationship of the Chairman with the Deputy Secretary will be similar to that of relationship with the Secretary.

Question. The Under Secretaries of Defense.

Answer. Current DOD directives and Title 10, U.S. Code establish the Under Secretaries of Defense as the principal staff assistants and advisers to the Secretary regarding matters related to their functional areas. Under Secretaries exercise policy and oversight functions within their respective areas. In carrying out their duties, they may issue instructions and directive memoranda to implement policies approved by the Secretary. These instructions and directives are applicable to all DOD components. When directed by the President and Secretary of Defense or when carrying out their responsibilities, Under Secretaries typically transmit communications to commanders of the unified and specified commands through the Chairman of the Joint Chiefs of Staff.

Question. The General Counsel of the Department of Defense.

Answer. The DOD General Counsel serves as the chief legal officer of the Department of Defense consistent with Title 10, U.S. Code, Section 140. The DOD General Counsel generally is responsible to oversee legal services, establish policy, and administer the DOD Standards of Conduct Program. The DOD General Counsel also establishes policy and positions on specific legal issues and provides advice on significant international law issues raised in relation to major military operations, the DOD Law of War Program, or the legality of weapons reviews. Communications between the combatant commanders and the DOD General Counsel are normally transmitted through the Chairman of the Joint Chiefs of Staff. The office of the DOD General Counsel works closely with the Office of Legal Counsel to the Chairman of the Joint Chiefs of Staff.

Question. The Department of Defense Inspector General.

Answer. If confirmed, I will continue to cooperate with and provide support to the Department of Defense Inspector General as required. The Department of Defense Inspector General performs the duties, has the responsibilities, and exercises the powers specified in the Inspector General Act of 1978.

Question. The Vice Chairman of the Joint Chiefs of Staff.

The Vice Chairman of the Joint Chiefs of Staff performs the duties prescribed for him as a member of the Joint Chiefs of Staff and other such duties as may be prescribed by the Chairman, with the approval of the Secretary of Defense. When there is a vacancy in the Office of the Chairman or in the absence or disability of the Chairman, the Vice Chairman acts as Chairman and performs the duties of the Chairman until a successor is appointed or the absence or disability ceases. If confirmed, I intend to discuss potential duties with the Vice Chairman as part of our close working relationship. I have not yet determined any additional duty assignments that I would to assign the Vice Chairman beyond those prescribed in law.

Question. The Secretaries of the Military Departments.

Answer. The Secretaries are the heads of their respective military Departments and are responsible for, and have the authority necessary to conduct, all affairs of their respective Departments. Title 10, U.S. Code, Section 165 provides that, subject to the authority, direction and control of the Secretary of Defense, and subject to the authority of the combatant commanders, the Secretaries of Military Departments are responsible for administration and support of forces that are assigned to unified and specified commands. The Chairman advises the Secretary of Defense on the extent to which program recommendations and budget proposals of the Military Departments conform to priorities in strategic plans and with the priorities estab-

lished for requirements of the Combatant Commands. The Secretaries of the Military Departments also are responsible for such other activities as may be prescribed by law or by the President or Secretary of Defense.

Question. The Chiefs of Staff of the Services.

Answer. The Service Chiefs are no longer involved in the operational chain of command as a result of the reforms of the Goldwater-Nichols Act, but this change does not diminish their importance with respect to Title 10 responsibilities. The Chiefs of Staff of the Services serve two significant roles. First, they are responsible for the organization, training, and equipping of their respective Services. Without the full support and cooperation of the Service Chiefs, no Combatant Commander can assure the preparedness of his assigned forces for missions directed by the Secretary of Defense and the President. Second, as members of the Joint Chiefs of Staff, the Chiefs are advisers to the President, National Security Council, and the Secretary of Defense as the senior uniformed leaders of their respective Services. In this function, they play a critically important role in shaping military advice and developing our joint capabilities. If confirmed, I will continue to work closely with the Service Chiefs to fulfill warfighting and operational requirements.

Question. The Combatant Commanders.

Answer. The combatant commanders are responsible to fight our wars and conduct joint military operations around the world. By law, and to the extent directed by the Secretary of Defense, the Chairman serves as spokesman for the combatant commanders and is charged with overseeing their activities. He provides a vital link between the combatant commanders and other elements of the Department of Defense, and as directed by the President, may serve as the means of communication between the combatant commanders and the President or Secretary of Defense. If confirmed, I will continue to work closely with the combatant commanders to enable their warfighting capability and to provide support. If confirmed, I also will ensure that I consider and work to de-conflict any issues or decisions that span multiple combatant commands.

Question. The Chief of the National Guard Bureau.

Answer. The Chief of the National Guard heads a joint activity of the Department of Defense and is the senior uniformed National Guard officer responsible for formulating, developing and coordinating all policies, programs and plans affecting more than half a million Army and Air National Guard personnel. Appointed by the President, he serves as principal adviser to the Secretary of Defense through the Chairman of the Joint Chiefs of Staff on National Guard matters. He is also the principal adviser to the Secretary and Chief of Staff of the Army and the Secretary and Chief of Staff of the Air Force on all National Guard issues. As National Guard Bureau Chief, he serves as the department's official channel of communication with the Governors and Adjutants General. As a member of the Joint Chiefs of Staff, the Chief of the National Guard Bureau has the specific responsibility of addressing matters involving non-Federalized National Guard forces in support of homeland defense and civil support missions.

Question. The Commander, U.S. Forces—Afghanistan.

Answer. Although the Chairman of the Joint Chiefs of Staff is the principal military advisor to the President, the Secretary of Defense, and the National Security Council, he is not in the chain of command of the Commander, U.S. Forces—Afghanistan (USFOR-A). The Commander, USFOR-A reports to the Commander, USCENTCOM, who, in turn, reports directly to the Secretary of Defense. This reporting relationship is prescribed in 10 USC Section 164(d)(1). The Commander, USFOR-A does not have a formal command relationship with the Chairman of the Joint Chiefs of Staff, but he coordinates with him through the Commander, USCENTCOM on a regular basis. The Commander, USFOR-A sends his advice and opinions related to Operation Resolute Support to the Commander, USCENTCOM, who, in turn, presents them to the Chairman.

MAJOR CHALLENGES

Question. What do you consider to be the most significant challenges you expect to face if you are confirmed?

Answer. The current security environment is extraordinarily complex and volatile. We face challenges from state actors including Russia, China, Iran, and North Korea. We are also engaged in a long-term fight against violent extremist organizations. We are in the midst of a critical transition in Afghanistan. While dealing with these issues, we face the need to modernize the Joint Force in the context of fiscal challenges and budget uncertainty. Particular areas of concern are our cyber capabilities, space capabilities, modernizing the nuclear enterprise, and assuring all do-

main access for the Joint Force. We must navigate this environment while maintain our flexibility to deal with the unexpected.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. First, I will energize our efforts to develop a framework for deterrence that will address the full range of threats that we face in the 21st Century. I will also work closely with the services and combatant commanders to ensure we strike the right balance between dealing with current operations, being prepared for the uncertain, and developing the Joint Force of the future. Given the nature of the challenges we confront, it will also be critical that we enhance our integration with other elements of the Interagency in partnership with Congress.

PRIORITIES

Question. Recognizing that challenges, anticipated and unforeseen, will drive your priorities to a substantial degree, if confirmed, what other priorities, beyond those associated with the major challenges you identified in the section above, would you set for your term as Chairman?

Answer. If confirmed, I would focus on contributing to the development of a comprehensive and sustainable Interagency strategy to address the challenges associated with violent extremism. I would also be decisively engaged in restoring the readiness of the Joint Force. Finally, I would focus on shaping the capabilities and capacities of the future Joint Force with a particular focus on leader development.

CHAIN OF COMMAND

Question. Section 162(b) of title 10, United States Code, provides that the chain of command runs from the President to the Secretary of Defense and from the Secretary of Defense to the combatant commands. Section 163(a) of title 10 further provides that the President may direct communications to combatant commanders be transmitted through the Chairman of the Joint Chiefs of Staff and may assign duties to the Chairman to assist the President and the Secretary of Defense in performing their command function.

Do you believe that these provisions facilitate a clear and effective chain of command?

Answer. Yes. The chain of command runs from the President to the Secretary of Defense and from the Secretary of Defense to the commanders of the combatant commands. If confirmed, I will continue to inform decisions as appropriate and transmit directions as directed. However, there will be no ambiguity about the chain of command: the combatant commanders receive their orders from the Secretary of Defense.

Question. Are there circumstances in which you believe it is appropriate for U.S. military forces to be under the operational command or control of an authority outside the chain of command established under title 10, United States Code?

Answer. The Armed Forces should ordinarily operate under the chain of command established in Title 10. In the case of certain sensitive military operations, it may be appropriate for the President to establish other temporary command relationships. However, in all cases U.S. Armed Forces supporting such operations are still governed by the law of armed conflict, remain accountable to the Title 10 chain of command, and are subject to the Uniform Code of Military Justice for disciplinary matters. If confirmed, I would provide the President with my best military advice regarding any operation in which an exception to the established chain of command may be warranted.

Question. What is your understanding and assessment of the authorities and agreements which are in place to allow U.S. military personnel to carry out missions under the authorities contained in title 50, United States Code? Do you believe any modifications to these authorities are necessary?

Answer. Title 50 of the U.S. Code tasks the Secretary of Defense to ensure that the military departments maintain sufficient capabilities to collect and produce intelligence to meet requirements of the DNI, Secretary of Defense, CJCS, and COCOMs. Title 50 of the U.S. Code also authorizes the Secretary to use such elements of the DOD as may be appropriate for the execution of the national intelligence program functions described in section 3038 of title 50. While I believe that our military forces are generally most effective when they operate under a military chain of command, there are circumstances in which exceptions to this general rule are appropriate; authorities and agreements exist to facilitate the granting of such exceptions. In some cases, the Secretary of Defense may approve this exception and in other cases only the President has approval authority. I believe the current authorities strike the appropriate balance between enabling DOD to operate within its

independent Title 50 authorities, providing necessary and appropriate support to other agencies of the U.S. government under Title 50, and ensuring critical oversight of sensitive operations.

Advice of the Service Chiefs, Combatant Commanders, and Chief of the National Guard Bureau

Question. Section 163 of title 10, United States Code, provides that the Chairman of the Joint Chiefs of Staff serves as the spokesman for the combatant commanders, especially on the operational requirements of their commands. Section 151 of title 10 provides for the other members of the Joint Chiefs of Staff to submit their advice or opinion, in disagreement with or in addition to the advice or opinion of the Chairman, and requires the Chairman to provide that advice at the same time that he presents his own advice to the President, National Security Council, or Secretary of Defense.

What changes to section 151 or 163, if any, do you think may be necessary to ensure that the views of the individual Service Chiefs, combatant commanders, and the Chief of the National Guard Bureau are presented and considered?

Answer. I do not see a need to change section 151 or 163.

OFFICER MANAGEMENT ISSUES

Question. As the Chairman of the Joint Chiefs of Staff you would have significant responsibilities with regard to joint officer management policies.

Answer. If confirmed, what modifications would you make to provide the Department of Defense and the military services the force management tools necessary to meet the needs of the 21st century joint, all-volunteer force?

The Department, the Joint Staff, and the Services already possess a wide range of force management tools which provide ample flexibility in meeting the needs of the 21st century joint, all-volunteer force. However, if confirmed, I will continue to examine the joint operational and strategic environment to determine if there are opportunities for, or capability gaps that require, reform to make the Joint Force even more capable of meeting both today and tomorrow's needs.

Question. Do you believe the current DOD and service procedures and practices for reviewing the records of officers pending nomination by the President are sufficient to ensure the Secretaries of the military departments, the Secretary of Defense, and the President can make informed decisions?

Answer. In conjunction with existing statutes, the current Department and Service policies provide a sound framework for the Services' evaluation of the qualifications, previous performance, and potential of their officers. I believe these frameworks provide the necessary information to allow the Services to make sound decisions regarding the promotion and utilization of each Service's officers.

Question. In your view, are these procedures and practices fair and reasonable for the officers involved?

Answer. Yes. I believe these procedures and practices are fair and reasonable for the officers involved.

Question. What modifications, if any, to the requirements for joint officer qualifications are necessary to ensure that military officers are able to attain meaningful joint and service-specific leadership experience and professional development?

Answer. I feel the current combination of Joint Professional Military Education and requisite experience gained through joint assignments, training, and exercises adequately prepares officers to operate effectively at both the strategic and operational level in steady-state and wartime conditions. Therefore, I do not currently recommend any modifications to the requirements for joint officer qualification.

Question. In your view, what is the impact of joint qualification requirements on the ability of the services to select the best qualified officers for promotion and to enable officer assignments that will satisfy service-specific officer professional development requirements?

Answer. It is certainly challenging for Services to ensure that officers are adequately prepared to operate effectively as senior leaders in both the Service and joint environment. Although satisfying qualification requirements may curtail the time available for the Services to develop their officers' Service-specific skill sets, current requirements produce a cadre of well-rounded and competitive officers, who are capable of integrating Service functions with national directives in both strategic and operational environments. In my opinion, officers with these capabilities possess the greatest potential for success in positions of senior leadership. As such, they are the most qualified, and hence most competitive, for promotion.

Question. In 2008, Congress created the requirement that the Legal Counsel to the Chairman of the Joint Chiefs of Staff be selected by a board of officers convened by the Secretary of Defense. This process remains the only joint duty officer position

specifically selected by a selection board from among qualified officers of the Armed Forces.

Do you consider the selection process required by section 156 of title 10, United States Code, to be an efficient and effective process for selecting officers from among the services to serve in this joint position?

Answer. Based on available information, I believe the selection process for the position of the Legal Counsel to the Chairman of the Joint Chiefs of Staff is an efficient, equitable, and effective means to select an officer for this position from a pool of talented judge advocate leaders across the Services.

Question. What lessons, if any, have been captured from this joint officer selection board process that could improve the processes for selection of officers in the military services?

Answer. I'm not aware of any lessons that could improve the processes for selection of officers in the military service. The process to select the legal counsel to the CJCS was informed by service processes.

Question. Would you support expanding the process used to select the Legal Counsel to the Chairman of the Joint Chiefs of Staff to other joint billets? Why or why not?

Answer. I do not see a need to expand our selection process to other joint billets as currently established processes used to select general/flag officers to joint positions are sound. First, our process for identifying officers gives the Combatant Commander and the Chairman flexibility. We can select from across the Services (to include the Coast Guard) and the Active, Guard, and Reserve Components to ensure we get the right individual with the appropriate skills and experience. Second, the current process is efficient in that it gives the commander and other senior leaders an opportunity to quickly review a slate of nominated officers, and conduct interviews as necessary. Finally, our process is extremely responsive to emerging or unexpected requirements. We can quickly alert the Services to identify eligible personnel, select candidates, nominate them, and have them in position in as little as 90 days, if necessary.

HEADQUARTERS STREAMLINING

Question. The Senate reported Fiscal Year 2016 National Defense Authorization Act directs reforms to consolidate the headquarters functions of the Department of Defense and the military departments.

If confirmed, and if the provisions in the bill become law, what would be your role in identifying and implementing streamlining and reductions in the Joint Staff?

Answer. The current Chairman directed an enterprise-wide functional review with a detailed evaluation of tasks and activities associated with primary Joint Staff directorates. This review identified a range of potential areas for reduction, realignment, or elimination within the staff, and some of the recommendations have already been implemented. I would continue to use this functional review as a road-map to quantify the efficiency of past actions and spur organizational streamlining by reducing, realigning or eliminating redundant or conflicting requirements.

Question. What Joint Staff areas, specifically and if any, do you consider to be the priorities for possible consolidation or reductions?

Answer. There are a number of potential areas for consolidation or reduction. For example, the Joint Staff J6 is currently working with the U.S. Army Information Technology Agency (ITA), the Washington Headquarters Services (WHS), and the Defense Information Systems Agency (DISA) to determine which IT functions can be consolidated within the Pentagon to improve our IT capabilities while reducing costs and unnecessary redundancies. Further areas for efficiencies include consolidating support functions common to the Joint Staff directorates and eliminating duplicative functions accomplished by the OSD, Joint Staff and Defense Activities.

Question. To the extent that the Joint Staff has functions that overlap with the Department of Defense and the military departments, what would be your approach to consolidating and reducing redundancy?

Answer. The first, and most important step, would be to determine whether those functions are currently codified in statute. Some duplicative efforts may be due to the responsibilities being laid out in law with some respective pieces executed by the Department, some by the Joint Staff, and some by the military departments. Consolidation and reduction of redundancy may require legislative changes. Second, I would recommend a combined review by the OSD, the Services, and the Joint Staff to determine the most appropriate ways to reduce, realign, or eliminate duplicative functions.

TRAINING AND ASSIGNMENT OF GENERAL AND FLAG OFFICERS

Question. In your view, do a sufficient number of general and flag officers have advanced training and degrees in scientific and technical disciplines?

Answer. Yes. Rigorous and deliberate Service accession, training, and development processes generate the technical and scientific capability needed in sufficient numbers to meet DOD needs. I will work closely with and support the Service Chiefs and other leaders to continue to ensure we maintain an appropriate pipeline of specialized, technical officer talent.

Question. Are the career paths for officers with technical skills appropriate to ensure that the Department and the services can execute complex acquisition programs, adapt to a rapidly changing technological threat environment, and make informed investment decisions? If not, what will you do to address this deficiency?

Answer. I believe the Department has grown, and continues to grow, world-class, technically-astute officers who are ready to take on the challenges inherent in a rapidly changing and technical acquisition environment. While the Services vary with respect to their use of officers in acquisition, each Service tailors officer career paths to meet their particular mission priorities, to include successfully executing critical major acquisition programs. Each Service has career path models that are appropriately aligned with their force management process.

Question. In your view do current general and flag officer assignment policies provide and incentivize qualified officers to serve in acquisition programs? Do tour lengths for those assignments enable and empower such officers to effectively manage acquisition programs? If not, what changes do you believe are necessary to improve the effectiveness of senior officers assigned those duties?

Answer. Yes. Senior officers are assigned with adequate tenure and are empowered to effectively manage their programs. The Services demonstrate flexibility in adjusting tour lengths to match logical progression points in acquisition programs. That said, I will support the Service Chiefs, Service acquisition executives, and OSD leaders in their efforts to ensure we continuously improve the development and assignment of highly-motivated and qualified officers in acquisition positions.

Question. Are you satisfied that the Department of Defense, the Joint Staff, and the military services have in place sufficient training and resources to provide general and flag officers, and Senior Executive Service employees the training they need to make informed, ethical decisions? If not, what actions would you take, if confirmed, to address your concerns?

Answer. Yes. I judge that sufficient training and resources are in place to achieve the desired outcome. The ability to make ethical decisions based on the shared values of the profession of arms is identified as a specific Desired Leader Attribute for leaders throughout the military and is foundational to all Joint and Service developmental efforts. The ethical foundation is laid at the outset of an officer's career and is further developed and reinforced in formal education and training settings throughout their progression through the ranks.

Question. It has been observed that despite numerous changes in the law, the requirements and the process for attaining joint officer qualifications is still beset by systemic challenges. Some of these challenges appear to force the services to make officer assignments to "check the box" for joint qualifications at the cost of depriving the services of flexibility to assign officers to other career enhancing and professional development opportunities. Officers not assigned to a designated joint billet on an operational staff receive joint credit while other officers supporting the same joint commander do not receive joint credit unless they submit a package to have their assignments qualify for joint service. As operational tempo remains high and as end strength continues to decline to historically low levels, some exceptionally qualified officers will be unable to serve in qualifying assignments to earn joint credit because the Nation demands they perform other critical duties. As a result those officers may be disadvantaged professionally as compared to their peers for promotion eligibility. Given the substantial resources invested in the developing officers to serve successfully in, and to support or lead joint forces, more must be done to improve the joint qualification system or to replace it with a system that is more effective.

If confirmed, I will work to identify inequities or inefficiencies in the current system and implement change where appropriate.

Question. If confirmed, what steps would you take to review the joint qualification requirements to ensure that the qualification process is matched to the increasingly joint service environment in which many officers serve throughout their careers?

Answer. If confirmed, I will ensure that we have a process in place to continuously review our qualification process and drive appropriate revisions.

Question. Should the formal requirement for joint qualifications be eliminated as a consideration for promotions and assignments?

Answer. No. I believe we need to continue to ensure that our future senior leaders are well prepared to operate within both the Services and the joint environment in steady-state and wartime conditions. This is best accomplished through a continued mixture of mandatory formal professional military education and hands-on experience in positions dealing with both joint and Service matters.

SECURITY STRATEGIES AND GUIDANCE

Question. How would you characterize current trends in the range and diversity of threats to national security we face today?

Answer. The range and diversity of potential threats is increasing. We face both state and non-state adversaries who are more capable in terms of military capabilities, and more empowered by the diffusion of technology. Both types of adversaries are developing new ways to counter our traditional military advantages.

Question. The Defense Strategic Guidance issued January 2012 took into account a \$487 billion dollar reduction in defense resources.

With the additional \$500 billion in cuts to the Department of Defense as a result of sequestration, is the Defense Strategic Guidance still valid?

Answer. The 2014 Quadrennial Defense Review superseded the 2012 Defense Strategic Guidance, and provided new DOD guidance for capabilities, capacity, and readiness. We cannot execute the 2014 Quadrennial Defense Review with an additional \$500 billion in cuts as the result of the Budget Control Act further exacerbated by Sequestration.

Question. In your view, as Russian aggression and the emergence of ISIL have occurred since the Defense Strategic Guidance was issued in January 2012, is that strategic guidance still appropriate for the threats we face today or do you think an update is warranted?

Answer. The 2014 Quadrennial Defense Review superseded the 2012 Defense Strategic Guidance. This QDR did not fully anticipate growing Russian aggression, the emergence of the ISIL threat, and the increase in cyber intrusions.

Question. In your view, are our defense strategy and current establishment optimally structured, with the roles and missions of the military departments appropriately distributed, and U.S. forces properly armed, trained, and equipped to meet security challenges the Nation faces today and into the next decade?

Answer. I believe our defense strategy is sound but we must continually adapt it to address emerging threats and a dynamic strategic landscape. I also believe that the current defense establishment is effective with an appropriate distribution of roles and missions. I am concerned with the readiness of the force today and I believe we need to review the capabilities and capacities that will be needed to meet future security challenges.

Question. If confirmed, what changes, if any, would you propose to the capabilities, structure, roles, and missions of the defense establishment?

Answer. The defense establishment is extremely complex. If confirmed, I will work with the Service Chiefs, combatant commanders, and Joint Staff to identify needed change to the capabilities, structure, roles, and missions of the defense establishment. Our cyber, space, and nuclear capabilities will be areas of particular emphasis.

STRATEGIC RISK

Question. How and over what periods of time, if at all, will reductions to Army and Marine Corps end strength increase strategic risk?

Answer. Reductions to Army and Marine Corps end strength must be considered in the context of the current security environment and our military objectives. If confirmed, I will be decisively engaged in ensuring that we have a clear understanding of risk as we make changes to the capabilities and capacities of the Joint Force.

Question. What is your understanding and assessment of the Army and Marine Corps' decision to reduce active end strength to 450,000 and 182,000 soldiers respectively by the end of 2017?

Answer. I am confident that the Marine Corps can meet its requirements at 182,000. If confirmed, I will work to better understand the requirement for Army end strength.

Question. If confirmed, what additional actions would you take, if any, to reduce or mitigate this strategic risk?

Answer. If confirmed, I will provide my best military advice to the Secretary of Defense and the President to include an assessment of risk and proposed actions to mitigate risk.

Question. Upon issuance of the 2014 Quadrennial Defense Review, the fiscal year 2015 budget reduced projected defense budgets by \$113 billion over five years. What was the incurred strategic risk of this reduction relative to the 2012 Defense Strategic Guidance?

Answer. Overall, the strategic and military risk to our ability to accomplish the objectives laid out in the QDR and DSG have increased. I would be happy to discuss the details of this increased risk in a classified venue.

CHAIRMAN'S RISK ASSESSMENT

Question. In his 2013 risk assessment, Chairman Dempsey identified for the first time six National Security Interests that were derived from four enduring interests contained in the 2010 National Security Strategy. The April 2013 assessment identified several areas of broad and significant risk to national security as a result of current budget issues.

How would you characterize the trends of risk in these areas (whether they are increasing or decreasing)?

Answer. Overall, both strategic risk and military risk are increasing. I would be happy to discuss risk further in a classified venue.

Question. What is your current assessment of the risk to combatant commanders in their ability to successfully execute their operational plans?

Answer. In an unclassified response I cannot go into much detail. Generally, however, our combatant commanders face increasing risk.

TRANSFORMATION

Question. Military "transformation" has been a broad objective of the Armed Forces since the end of the Cold War.

In your view, what does military "transformation" mean?

Answer. Military transformation involves leveraging new concepts, organizational constructs, or technologies to fundamentally change the way we fight. In the end, transformation is about innovating to maintain a competitive advantage.

Question. What is your understanding and assessment of the progress made by the Department, including the Joint Chiefs of Staff and the Joint Staff, toward transforming the Armed Forces?

Answer. Transformation is more of a journey than a destination. We can never be satisfied with our progress. I believe we need to energize our Joint exercise and experimentation efforts.

Question. If confirmed, what goals, if any, would you establish during your term as Chairman regarding military transformation in the future?

Answer. If confirmed, I would develop a detailed concept for Joint exercises and experimentation. My initial assessment, from the perspective of a service chief, is that our operational tempo over the past decade has adversely impacted us in this area.

Question. Do you believe the Joint Staff should play a larger role in transformation? If so, in what ways?

Answer. I believe, consistent within the statutory responsibilities of the Chairman, that the Joint Staff has a leading role in the transformation of the Joint Force.

MILITARY CAPABILITIES IN SUPPORT OF DEFENSE STRATEGY

Question. In your opinion, do current military plans include the necessary capabilities to meet the defense strategy stated in the 2014 QDR? Where are areas of higher risk?

Answer. If confirmed, I will work with the Secretary of Defense to ensure that the committee continues to receive a quarterly report in response to this question. I will personally engage in this area.

Question. Does the 2014 QDR specify the correct set of capabilities to decisively win in future high-end engagements?

Answer. I believe so from the perspective of my current assignment. I believe this is an area that requires continuous review.

Question. According to the force sizing construct in the 2014 QDR, American forces should be able to "defeat a regional adversary in a large-scale multi-phased campaign, and deny the objectives of—or impose unacceptable costs on—another aggressor in another region."

In your opinion, does the Department's force sizing construct provide adequate capability to address the country's current threat environment?

Answer. Yes, the force sizing construct, with its emphasis on a range of military options, provides adequate capability to address the country's current threat environment should deterrence fail.

Question. Are the services adequately sized to meet this construct?

The Services are currently able to provide forces to support the construct to "defeat a regional adversary in a large-scale multi-phased campaign, and deny the objectives of—or impose unacceptable costs on—another aggressor in another region." Resource constraints, however, have eroded readiness and extended the timeline by which forces can be made available to fulfill combatant commanders' requests and respond to emerging requirements.

Question. What will you advise if the Department cannot meet the demands placed on it?

Answer. I would advise we carefully prioritize the most important missions necessary to meet our military objectives and protect our national security interests. I will also provide the Secretary of Defense and the President with a clear articulation of risk.

FUTURE ARMY

Question. The Defense Strategic Guidance (DSG) of January 2012 articulated the need to shift strategic emphasis toward the Asia-Pacific region while continuing to engage in the Middle East.

Do you agree that future high-end military operations, as envisioned by the DSG, will primarily be naval and air engagements such that the Army will have difficulty justifying the size, structure, and cost of the number and equipment its combat formations?

Answer. We cannot predict where or when we will be asked to fight. Hence, we need a full-spectrum, balanced military force capable of responding to various threats to our national security.

Question. In your view, what are the most important considerations or criteria for aligning the Army's size, structure, and cost with strategy and resources?

Answer. In my view, our Nation requires an Army able to conduct full spectrum operations as part of the Joint Force. The Army is realigning and resizing consistent with the 2014 QDR. I believe that is appropriate.

Question. If confirmed, what actions, if any, would you propose to properly align the Army's size and structure with the requirements of security strategies and the likely availability of resources?

Answer. As force structure changes are made within both the active and reserve components, we will continue to assess the impact of these changes and make adjustments as necessary to ensure we maintain the health of the force, retain an effective balance of active and reserve forces, and continue to meet the needs of our strategy.

DEFENSE REDUCTION

Question. In your view, what have been/will be the impacts of the following budget reductions on the military, their capability, capacity, and readiness?

Answer.

Initial Budget Control Act reduction of \$487 billion

The abrupt, deep cuts resulting from the Budget Control Act forced our military to make topline-driven decisions, such that we now have a strategy with little to no margin for surprise. Therefore, we are operating at higher levels of risk to our defense strategy. To limit adverse consequences, we need the certainty of a more predictable funding stream, time to balance force structure, modernization, compensation, and readiness, and the flexibility to make trade-offs.

Sequestration in fiscal year 2013

The sequestration cuts in fiscal year 2013 reduced already-strained readiness, which takes resources, principally time and money, to restore. To date, sequestration has resulted in cuts to training, exercises, deployments and maintenance, in civilian furloughs and a hiring freeze, and in disruptions to modernization and force morale. If sequester continues, our military will be forced to make sharp cuts with far reaching consequences, including limiting combat power, further reducing readiness, and rewriting our defense strategy. We are doing what we can to support our all-volunteer force, as well as protect necessary funding for our deployed forces and nuclear enterprise.

Reduction of \$115 billion in projected spending in the fiscal year 2015 budget, in line with the 2014 Quadrennial Defense Review

The fiscal year 2015 budget request assumes higher risks in some areas, but this budget helps us to remain the world's finest military—modern and capable even while transitioning to a smaller force and resetting readiness over time. The \$115 billion reduction refers to the difference between the PB15 (FYDP) submission and the BCA sequestration levels across fiscal year 2015–19. Funding to the sequester levels removes the flexibility to respond to emergent challenges (i.e., increasingly contested space and cyber domains, a resurgent Russia, the Ebola response, and the rise of ISIL), while also being able to execute our defense strategy.

Sequestered Budget Control Act discretionary caps starting in fiscal year 2016 onward

Question. If sequester level cuts return in fiscal year 2016, then we will see further increased risks and fewer military options to defend our Nation and its interests. The impact of sequestration and other budget constraints will further reduce unit readiness. The effects caused by deferred maintenance will impose significant strain on long-term institutional readiness. Ultimately, reduced readiness (i.e., reduced training cycles, deferred maintenance, and the continuing pace of current operations) will damage the credibility and the morale of our military.

The fiscal year 2016 budget request assumes that the Budget Control Act will be amended in fiscal year 2016. The fiscal year 2016 budget resolution passed by the Senate and House of Representatives do not assume this but instead provides \$38 billion of the necessary spending through OCO budget.

Should this funding not be available, what recommendations would you have, if confirmed, for how the Department of Defense should manage the \$35 billion in cuts for fiscal year 2016?

Answer. Ongoing cuts will threaten our ability to execute the current defense strategy. Our military remains hopeful that Congress can once again come together in a manner that avoids the abrupt, deep cuts of sequestration. We will continue to reduce costs through efficiencies and reforms, but an fiscal year 2016 budget at BCA cap levels will create risks requiring a new defense strategy. Should we be cut \$35 billion in fiscal year 2016, we will be forced to further reduce the size of the force, delay readiness restoral, and reduce modernization and investment programs.

Question. What are your views on the impact that these cuts could have on readiness?

Answer. These cuts would have a dangerous impact on readiness and future force generation capability of the Department, which are critical to our ability to execute the defense strategy. Losing \$35 billion from the fiscal year 2016 defense budget would force us to mortgage ongoing readiness recovery efforts, equipment recapitalization and force modernization in favor of supporting currently deployed and next-to-deploy forces, all within a context of expanding global threats. We rely on sufficient and predictable resourcing to ensure our military readiness and ability to meet additional operational demands.

Question. What are your views on the impact that these cuts could have to military capabilities?

Answer. Quite simply, these cuts would make our military smaller and less capable. We would be forced to disproportionately reduce funding for operations and maintenance, procurement, RDT&E, and military construction. Fiscal year 2016 cuts would increase risk, prolong readiness recovery, and delay necessary modernization programs. Funding for hundreds of program line items, large and small, will be significantly reduced. Cuts in funding for research and development will ultimately slow discovery and advancement, erode the technological superiority enjoyed by U.S. forces and translate into less desirable military outcomes in future conflicts.

READINESS FUNDING

Question. Given the reductions in readiness funding, what is your assessment of the current readiness of the Armed Forces to meet national security requirements across the full spectrum of military operations?

Answer. The Joint Force's overall readiness remains at levels posing significant risk to our ability to execute our National Military Strategy. While specific details cannot be addressed in this unclassified forum, it is understood that sequestration exacerbated an already declined state of readiness fueled by sourcing over a decade of exceptional demand. The Bipartisan Budget Act restored some resources, and provided much needed fiscal certainty and stability, thereby preventing further decline in readiness. The Department has since experienced minor Service readiness gains, which show continued promise as long as funding and commitments remain con-

stant. However, this recovery is fragile. Recent gains are dependent on a combination of recovery time paired with sufficient and predictable resourcing allowing the Services to rebuild the necessary capabilities for full spectrum operations.

Question. What is your assessment of the near term trend in the readiness of the Armed Forces?

Answer. If current funding levels prevail, I expect the Department's readiness to remain at significantly-less-than-optimal levels for the foreseeable future. Any additional operational demands and/or a loss of resourcing will introduce a significant amount of risk to ongoing military operations, limit military options the Department can offer to respond to emerging crises, and increase the Department's risk in meeting the requirements of our National Security Strategy.

Question. How critical is it to find a solution to sequestration given the impacts we have already seen to DOD readiness in fiscal year 2013?

Answer. Sufficient and predictable resourcing is absolutely critical to restoring the Joint Force's ability to provide the full range of military capabilities at a sufficient capacity required to meet the challenges posed by today's dynamic international environment. Current funding and OCO allow the Department to conduct operations at their present level of commitment. However, recovering to the readiness posture needed to sustain these operations, meet additional commitments, and restore our comparative advantages through modernization will only come from a robust and predictable funding profile. Without adequate funding, maintaining current operations will come at the expense of long-term development and sustainment efforts, thereby exacerbating our readiness challenges.

Question. What is your understanding and assessment of the methods currently used for estimating the funding needed for the maintenance of military equipment?

Answer. The method for funding equipment maintenance is requirements-driven based on a variety of factors to include: force structure, operations tempo, schedule, nature and usage rate of the equipment, and safety. The Services develop detailed maintenance plans that balance operational availability to the warfighter with maintenance requirements. However, perturbations in the budget process and funding uncertainties will have a negative effect on the workload scheduling at Service depots. These negative effects ripple beyond the current year and can extend for months and even years.

Question. Given the backlog in equipment maintenance over the last several years, do you believe that we need an increased investment to reduce this backlog?

Answer. The Services have relied upon OCO funding to supplement their equipment maintenance backlogs over the past several years. This is because OCO was used for deliberate reset of equipment used to support OIF and OEF combat operations. Also in the past, baseline funding of maintenance accounts has been at levels below the Services' enduring requirements. While some level of backlog is normal in the repair cycle process, shortfalls in baseline funding cause increased maintenance backlog and drive greater future funding needs. We need consistent and predictable base budget funding to reduce the maintenance backlog.

Question. How important is it to reduce the materiel maintenance backlog in order to improve readiness?

Answer. It requires continuous attention. The accumulation of backlog or deferred maintenance beyond what is manageable may not be immediately apparent, but it reduces readiness. These manifest as reduced equipment availability rates, less reliable systems, and shortened service life.

Question. How important is it to receive OCO funding two or three years after the end of combat operations in order to ensure all equipment is reset?

Answer. It remains very important. OCO has been a necessary funding source to conduct ongoing operations and restore equipment readiness for future operations. The Services have done well in prioritizing their equipment for reset and filling shortfalls in deployed and deploying units. However, much work remains to reduce the accumulated backlog of scheduled and deferred maintenance. As our operations tempo remains high, this funding is necessary to fully restore equipment readiness levels to support the National Security Strategy.

Question. In years past, Congress has based additional readiness funding decisions on the Service Chief unfunded priorities lists. However, in recent years those lists have either been nonexistent or have arrived too late in our markup process.

Do you agree to provide unfunded priorities lists to Congress in a timely manner beginning with the fiscal year 2017 budget request?

Answer. I will always strive to be compliant with Congressional direction.

DEFENSE ACQUISITION REFORM

Question. Congress is considering a number of acquisition reform measures designed to reduce the costs and development timelines of major systems, and to streamline access to innovative commercial technologies and systems.

What are your views regarding acquisition reform and the need for improvements in the Defense acquisition process?

Answer. I am a strong proponent of acquisition reform based upon the following key principals:

- a. The responsibility and authority for acquisition system outcomes should be clearly identified within the DOD;
- b. The requirements' sponsor should be an integral part of delivering needed capability and remains accountable throughout the acquisition process, and;
- c. There is a continued effort to reduce overhead and increase efficiencies across defense acquisition.

Question. If confirmed, how would you improve all three aspects of the acquisition process requirements, acquisition, and budgeting?

Answer. I would work with the Department leadership and the Congress to bring about necessary reform.

Question. Do you believe that the current investment budget for major systems is warranted given increasing historic cost growth in major systems, costs of current operations, and asset recapitalization?

Answer. I am concerned that acquisition, procurement, and operations and support costs will continue their historic growth profiles, further exacerbating shortfalls under a sequestered budget. Although recent cost and schedule trends have shown improvement, we will continue to scrub our processes, including our warfighter requirements, to ensure they are aligned with strategy and available resources.

Question. If confirmed, how do you plan to address this issue and guard against the potential impact of weapon systems cost growth?

Answer. I will partner with Secretary Carter to refine our processes, and work closely with our combatant commanders and the Services to mitigate cost growth on our highest priority investments. I will continue to drive the requirements process to consider cost-informed performance tradeoffs to assist in mitigating cost and schedule growth perturbations across our investment accounts and advocate for versatile capabilities that are both affordable and sustainable.

Question. If confirmed, what actions would you propose, if any, to ensure that requirements are realistic, technically achievable, and prioritized?

Answer. As the Department's senior validation authority for joint military requirements, the Joint Requirements Oversight Council (JROC) continues to make improvements to the Joint Capability Integration Development System (JCIDS). These refinements to JCIDS ensure the appropriate rigor in validating realistic, technically achievable, prioritized, and cost-informed requirements. If confirmed, the necessary refinements to the requirements process will continue during my tenure as Chairman.

Question. If confirmed, what actions would you propose, if any, to ensure that resources are programmed for acquisition programs that are consistent with their cost estimates and schedules?

Answer. If confirmed, I will participate in the Department's program and budget process, and advocate for major system resource allocation consistent with the Secretary's cost and schedule position.

Question. What should the role of the combatant commanders, Service Chiefs, Service Acquisition Executives, and Under Secretary for Acquisition, Technology, and Logistics be in the acquisition process?

Answer. The role the combatant commanders and Service Chiefs play today in the requirements generation process is crucial to the success of the acquisition process. Likewise, their proactive engagement with the Service Acquisition Executives (SAE) and the Under Secretary for Acquisition, Technology and Logistics (USD(AT&L)) throughout the acquisition life-cycle ensures that major systems stay relevant, timely and cost-effective. USD(AT&L)'s role in reviewing Service plans at discrete milestones associated with major Department resource commitments ensures programs are affordable and executable, and that they follow sound business and risk management practices. This role should continue in conjunction with the efforts of the Service Acquisition Executives.

Question. Are there specific new roles or responsibilities that should be assigned to the Service Chiefs or Service Secretaries in the acquisition process?

Answer. I am supportive of current efforts that would provide additional authority and accountability to the Services as long as it does not undermine the statutory

responsibilities of the Secretary of Defense. Any potential changes should hold the Services accountable and streamline the bureaucratic processes involved.

TACTICAL FIGHTER PROGRAMS

Question. The F-35 Joint Strike Fighter Program, which is the largest and most expensive acquisition program in the Department's history, and was formally initiated as a program of record in 2002, with a total planned buy of 2,443 aircraft for the U.S. The program has not yet completed the System Development and Demonstration (SDD) phase, and is not due to enter full rate production until 2019, 17 years after its inception. At projected procurement rates, the aircraft will be procured by the Department well into the 2030 decade to reach its total quantity buy.

The requirement for 2,443 aircraft was established nearly 20 years ago; do you believe that requirement is still valid in light of countervailing pressure to reduce force structure to conserve resources and to improve capability to respond to prospective adversary technological advances and increased capabilities with regard to establishing contested combat environments, combined with updated threat assessments and an evolving national defense strategy?

Answer. With projected adversarial threats challenging our current capabilities in coming years, the Joint Strike Fighter is a vital component of our effort to ensure the Joint Force maintains dominance in the air. Given the evolving defense strategy and the latest Defense Planning Guidance, we are presently taking the newest strategic foundation and analyzing whether 2,443 aircraft is the correct number. Until the analysis is complete, we need to pursue the current scheduled quantity buy to preclude creating an overall near-term tactical fighter shortfall.

Question. Do you believe the Nation can afford to procure these aircraft at a cost of \$12B to \$15B per year for nearly the next 20 years for an aircraft design that will be 30 years old at the completion of the program procurement phase?

Answer. Fifth-generation fighter aircraft, including the F-35, are critical as we contend with the technological advancements of near-peer competitors. We must ensure that we do not allow shortfalls in fighter capability or capacity to develop. The Department has been working diligently to make the overall cost per F-35 more affordable. Additionally, there will continue to be critical updates throughout the life cycle of the F-35 that will ensure the platform maintains a tactical advantage.

Question. Do you believe the Department's current and planned force mix of short-range fighters and long-range strike aircraft, whether land- or maritime-based, is sufficient to meet current and future threats around the globe, and most especially in the Asia-Pacific theater of operations where the "tyranny of distance" is such a major factor?

Answer. The Department continually assesses our ability to meet current and future threats, especially concerning short-range fighters and long-range aircraft. Over the past three years, DOD has made significant progress in developing new alliance initiatives, securing new rotational access for U.S. forces, and enhancing both the quantity and quality of U.S. forces and capabilities in the Pacific region. The rebalance to the Asia-Pacific region is an important component of our effort to ensure we are postured to address the "tyranny of distance" and succeed militarily if required.

Question. The Senate Armed Services Committee report accompanying S. 1376, the National Defense Authorization Act for Fiscal Year 2016, would require the Secretary of Defense to assess the current requirement for the F-35 Joint Strike Fighter total program of record quantity, and then to revalidate that quantity or identify a new requirement for the total number of F-35 aircraft the Department would ultimately procure.

What will be your role in assisting the Secretary to revalidate the F-35 total program quantity?

Answer. If confirmed, I will advise the Secretary as he assesses the delicate balance of the capacity and the capabilities of the future Joint Force. This advice will be informed by the extent to which the F-35 program conforms to the priority requirements identified by combatant commanders and the Department's strategic plans.

Question. The Air Force has proposed several times over the last decades to retire the A-10 close air support aircraft fleet, but each time Congress has rejected the proposals due to lack of a sufficient replacement capability. The Air Force's latest proposals to retire the fleet in fiscal years 2015 and 2016 were again rejected by Congress.

Do you believe a need exists for a dedicated capability to provide close air support for American troops in close quarters battles?

Answer. I believe America's troops in close quarters battles must have effective close air support.

Question. What will be your role in ensuring our land forces receive the air support they'll need to survive and succeed while fighting the nation's land battles?

Answer. If confirmed, I will make recommendations to the Secretary of Defense concerning our ability to deliver effective air support to the Joint Force.

The Secretary of the Navy recently remarked that he believed the F-35 would be the nation's last manned fighter aircraft.

Question. Do you believe this to be true?

Answer. While robotic and autonomous systems technology has advanced greatly over the past decade, I believe it is premature to rule out manned fighter aircraft without a more thorough analysis of the technologies currently available, as well as those likely to be available in the future. Decisions about future platforms should also take into consideration the threats our aircraft will face and their required missions.

Question. If so, what will be your role in leading capabilities and requirements development to increase the role of unmanned aerial combat systems in the Department?

Answer. If confirmed, I will continue to lead the ongoing development of a joint concept for robotics and autonomous systems. This concept will establish a vision to establish capability requirements and to guide the subsequent development, fielding, and employment of robotics and autonomous technology in the Joint Force.

Question. If not, how do you see the future balance developing between manned and unmanned combat aircraft for the Department's future force structure?

Answer. I expect that the rapid growth in robotic and autonomous systems technology we have seen in the past decade will only increase in the coming years for all weapons systems, not only combat aircraft. With this growth will come opportunities for increased capability across the Joint Force through the complimentary use of manned and remotely operated systems. The Joint Staff is currently developing a Joint Concept for Robotic and Autonomous Systems that will help guide the Joint Force as it incorporates these new technologies and determines how to balance manned and remotely operated systems to maximize effectiveness.

SPACE

Question. China's test of an anti-satellite weapon in 2007 was a turning point for the United States in its policies and procedure to ensure access to space. As a Nation heavily dependent on space assets for both military and economic advantage, the United States has to make protection of space assets become a national priority.

Do you agree that space situational awareness and protection of space assets now has the appropriate level of national security priority?

Answer. No. Both are in need of attention in order to securely and effectively project U.S. military power.

Question. In your view, how should China's continued development of space systems inform U.S. space policy and programs?

Answer. China is rapidly developing space capabilities of its own that both mirror U.S. capabilities and could threaten our access and use of space for national security purposes. If confirmed, I will review our efforts to address China's developments in space, and will coordinate closely with the Secretary of Defense.

Question. If confirmed would you propose any changes to National Security space policy and programs?

If confirmed, I will continue to review our policies and programs to ensure U.S. warfighters can continue to depend on having the advantages that space confers.

ACCESS TO RADIO FREQUENCY SPECTRUM

Question. What actions would you take to ensure that the Department continues to have access to radiofrequency spectrum that is necessary to train and to conduct its operations?

Answer. Overall, it is recognized that electromagnetic spectrum superiority is essential to all joint operations, and spectrum has become increasingly important to the Department's missions. Spectrum is also critical to the economy of the nation. If confirmed, I will continue to work diligently with the Interagency and industry on spectrum sharing in order to ensure that the Department maintains assured access to the spectrum necessary to train and conduct operations, while enabling access for commercial broadband.

Additionally, Public Law 106-65 (National Defense Authorization Act for Fiscal Year 2000) requires the Secretaries of Commerce and Defense and the Chairman of the Joint Chiefs of Staff to certify that any alternative band or bands to be sub-

stituted for spectrum currently used by DOD provide “comparable technical characteristics to restore essential military capability that will be lost as a result of the band of frequencies to be so surrendered.” Preserving this provision is absolutely necessary to ensure that DOD maintains access to spectrum necessary to operate critical military capabilities.

STRATEGIC SYSTEMS

Question. Over the next 5 years DOD will begin to replace or begin studies to replace all of the strategic delivery systems. For the next 15 plus years, DOD will also have to sustain the current strategic nuclear enterprise. This will be a very expensive undertaking.

Do you have any concerns about the ability of the Department to afford the costs of nuclear systems modernization while meeting the rest of the DOD commitments?

Answer. The strategic, operational and fiscal environments we face pose significant challenges for the Department of Defense. The modernization of strategic delivery systems and the sustainment of the strategic nuclear enterprise are important to maintaining a safe, secure, and effective nuclear deterrent. I support the continued investment in sustainment and modernization as a priority for defense spending. I am, of course, concerned about the impact of future budget resource reductions on our ability to meet these requirements. Therefore, if confirmed, I plan to continue to request budget certainty, stability, and flexibility to ensure we continue to modernize and sustain our nuclear capabilities, while balancing DOD priority commitments.

Question. If confirmed will you review the modernization and replacement programs to ensure that they are cost effective?

Answer. Yes.

MISSILE DEFENSE IN THE BOOST PHASE

Question. The Missile Defense Agency’s (MDA) mission is to develop, test, and field an integrated, layered ballistic missile defense system to defend the United States and its allies against all ranges of enemy ballistic missiles in all phases of flight. While MDA is conducting research into next generation laser concepts that could be mounted on high altitude unmanned aerial vehicles, there is no program of record designed to intercept missiles during the boost phase of flight, when they are potentially most vulnerable.

Do you agree with the Commander of Northern Command, when he said on April 7, 2015, referring to missile threats that “we need to be able to start knocking them down in the boost phase ... and not rely on the midcourse phase where we are today?”

Answer. Yes. We should continue to support research and design efforts to defeat threats in the boost phase if operationally, technically and economically practical. Current capabilities are limited to denial in the midcourse and beyond phases; we need to look for solutions across the entire ballistic missile kill chain. The science shows a ballistic missile is comparatively easy to detect and track while boosting. Further, countermeasures on a missile, such as decoys designed to distract defensive systems, are not typically deployed until after the booster burns out. As such, boost-phase intercept is an attractive missile defense alternative.

Question. Would you support an increase in the priority of technology investments to develop and deploy a boost phase airborne laser weapon system for missile defense in the next decade, if technically practicable?

Answer. Yes, but only if operationally, technically and economically practical. The current budget supports pursuit of a laser demonstrator. A laser potentially would be capable of acquiring, tracking, and eventually destroying an enemy missile at a much lower cost than existing systems.

DOD’S COOPERATIVE THREAT REDUCTION PROGRAM

Question. The Cooperative Threat Reduction (CTR) program, which is focused historically on accounting for, securing or eliminating Cold War era weapons of mass destruction (WMD) and materials in the states of the former Soviet Union, has started to expand its focus to other countries. With this expansion the CTR program is widening its focus to biological weapons and capabilities including biological surveillance and early warning; and encouraging development of capabilities to reduce proliferation threats.

Do you think the CTR program is well coordinated among the U.S. government agencies that engage in threat reduction efforts, e.g., the Department of Defense, the Department of Energy, and the State Department?

Answer. I understand that the Departments of State, Energy, and Defense in conjunction with the Defense Threat Reduction Agency and the Combatant Commands, make extensive efforts to conduct both formal and informal coordination across the different WMD threat reduction efforts on a regular basis. These efforts also include placement of DTRA liaison officers at U.S. Embassies where significant activities take place.

Question. About 60 percent of CTR resources are proposed for biological programs. With the very real threat of chemical weapons use and/or proliferation as we saw in Libya and are seeing in Syria, why is there such a large percentage of resources directed toward biological issues?

Answer. The DOD CTR Program remains postured to eliminate state-based WMD programs, including chemical weapons programs, if opportunities arise. At the same time, current scientific, economic, and demographic trends are magnifying the risks posed by outbreaks of infectious diseases of security concern, whether they are the result of a laboratory accident, a bioterror attack, or natural transmission. Such events are difficult to contain, pose a high threat to the health of U.S. citizens, drain economic resources and can potentially undermine geopolitical stability. As seen with the Ebola Virus Disease outbreak, due to the ease and speed of global travel, a bio-incident anywhere in the world may lead to dangerous regional and global security consequences when states are unable to provide basic services for their citizens, potentially creating environments enabling terrorists to act with impunity and increasing the risk of pathogens of security concern being stolen or diverted due to insecure storage.

PROMPT GLOBAL STRIKE

Question. The 2010 Quadrennial Defense Review concluded that the United States will continue to experiment with prompt global strike prototypes. There has been no decision to field a prompt global strike capability as the effort is early in the technology and testing phase.

In your view, what is the role for a conventional prompt global strike capability in addressing the key threats to U.S. national security in the near future?

Answer. Future circumstances may require the capability to address high value, time sensitive, and well-defended targets from outside the range of current conventional technology. I support the continued exploration of alternatives to existing strike system technologies and operational concepts to address these threats. The joint requirements process will continue to evaluate the alternatives to make informed recommendations for capability development balancing potential operational employment against costs.

Question. What approach (e.g. land-based or sea-based or both) to implementation of this capability would you expect to pursue if confirmed?

Answer. I would expect to continue support of a sea-based approach as articulated in established joint requirements. If confirmed, I will monitor the review of potential alternatives that support this capability.

Question. In your view what, if any, improvements in intelligence capabilities would be needed to support a prompt global strike capability?

Answer. In an unclassified response, I cannot go into much detail. If confirmed, I will seek to better understand and identify the capability improvements necessary to address any intelligence gaps discovered in the development this requirement.

NUCLEAR WEAPONS AND STOCKPILE STEWARDSHIP

Question. Congress established the Stockpile Stewardship Program with the aim of creating the computational capabilities and experimental tools needed to allow for the continued certification of the nuclear weapons stockpile as safe, secure, and reliable without the need for nuclear weapons testing. The Secretaries of Defense and Energy are statutorily required to certify annually to the Congress the continued safety, security, and reliability of the nuclear weapons stockpile.

As the stockpile continues to age, what do you view as the greatest challenges, if any, with respect to assuring the safety, security, and reliability of the stockpile?

Answer. To sustain a safe, secure, and effective stockpile, we must prudently manage our stockpile and related warhead Life Extension Programs. Our success in executing these programs will largely depend on our people and our infrastructure. We must recruit and retain our next-generation workforce capable of certifying the stockpile without underground testing. We must maintain and modernize the nuclear weapon infrastructure to ensure we have the full range of capabilities available to produce components required for our Life Extension Programs.

Question. If the technical conclusions and data from the Stockpile Stewardship Program could no longer confidently support the annual certification of the stockpile

as safe, secure, and reliable, would you recommend the resumption of underground nuclear testing? What considerations would guide your recommendation in this regard?

Answer. Any decision to resume underground nuclear testing should not be taken lightly. I would strongly consider recommendations from the Department of Energy and the National Laboratory Directors before making my recommendation to the Secretary and President. If confirmed, I am committed to working with the Department of Energy to maintain the critical skills, capabilities, and infrastructure needed to ensure the safety, reliability, and security of the stockpile without underground testing if practicable.

Question. Do you agree that the full funding of the President's plan for modernizing the nuclear weapons complex, commonly referred to as the 1251 report, is a critical national security priority?

Answer. Yes, funding the President's plan for sustaining and modernizing our nuclear weapons delivery platforms, sustaining a safe, secure, and reliable nuclear weapons stockpile, and modernizing the nuclear weapons infrastructure is a critical national security priority. Our nuclear deterrent is the nation's top military priority. The President's plan for modernizing the complex aligns funding with this priority.

Question. Prior to completing this modernization effort, do you believe it would be prudent to consider reductions below New START Treaty limits in the deployed stockpile of nuclear weapons?

Answer. Yes, I believe it is prudent to consider options for future reductions below New START Treaty limits, both in the deployed stockpile and in non-deployed weapons. However, I strongly believe that any further reductions should be accomplished "hand-in-hand" with Russia and focus on measures that will maintain or strengthen deterrence of adversaries, assurance of our Allies and partners, and strategic stability.

Question. If confirmed, would you recommend any changes to the non-deployed hedge stockpile of nuclear weapons?

Answer. I support reducing the size of the stockpile consistent with deterrence objectives and warfighter requirements. The United States retains a force of non-deployed nuclear warheads to hedge against technical failure and geopolitical developments that might alter our assessment of U.S. deployed force requirements. Completion of life-extension programs that improve safety, security and reliability of the stockpile and infrastructure modernization efforts that improve responsiveness may provide opportunities to change the non-deployed hedge while still effectively managing stockpile risk.

COUNTERING THE ISLAMIC STATE OF IRAQ AND THE LEVANT IN IRAQ & SYRIA

Question. To "degrade and ultimately destroy the terrorist group known as ISIL" the Department of Defense seeks to deny ISIL safe-haven and build partner capacity.

If confirmed, what criteria would you use to evaluate ISIL degradation and what is your assessment of the progress to degrade ISIL in Iraq and in Syria?

Answer. I view ISIL's inability to hold key terrain and lines of communication, and ISIL's failure to resupply or refit its fighters as indicators of degraded capability. I would additionally consider the rate at which ISIL recruits and replaces fighters on the battlefield. I would also view large groups of displaced persons returning to their homes and working to restore their former way of life, in cities like Tikrit, as another positive indicator of degraded ISIL influence. DOD will continue to work closely with the U.S. Intelligence Community, using its databases and analytic tools to run assessments on these and other indicators as necessary.

If confirmed, I will visit the region to make a personal assessment of our progress in degrading ISIL in Iraq and Syria.

Question. A large part of the support for ISIL and other violent extremist groups like al Nusrah by the local Syrian population is based on the fact that these groups seek to remove President Assad from power.

What limitations, if any, do we face by failing to have the removal of Assad as an objective in Syria?

Answer. President Assad's policies contributed to the rise of ISIL and limits effective C-ISIL operations in Syria today.

Question. In Iraq, what is the importance of arming the Sunni tribes in Anbar province to degrading ISIL and how do you assess progress to date? What is your understanding of the current plan to train and equip Sunni fighters to help in the campaign against ISIL?

Answer. Support to Sunni tribes is an important component of the effort to defeat ISIL. Sunni tribal fighters have the potential to be a credible ground force, and are

necessary to protect Iraqis in Anbar and other Sunni-dominant areas. PM Abadi and the GoI have made some progress in mobilizing Sunni tribes, supported by our efforts at airbases like Al Asad and Al Taqaddum. Much additional work remains.

Question. What is your assessment of the fall of Ramadi to ISIL last month and what adjustments, if any, to U.S. and coalition strategy do you believe need to be made?

Answer. Ramadi was a tactical setback, and it shows that ISIL is an agile and adaptive adversary. CENTCOM and the Iraqis have learned from this setback, and are adjusting the implementation of the strategy accordingly. If confirmed, I'll review the military campaign to make sure it will allow the non-military lines of effort the time and space they need to succeed. This will be a long campaign.

Question. What is your assessment of the coalition air campaign in Iraq and Syria and what adjustments, if any, do you think need to be made?

Answer. The Coalition air campaign is making some progress toward degrading ISIL's military capabilities and disrupting key ISIL enablers like oil production and communications. These efforts limit ISIL's freedom of movement, constrain its ability to recruit and reinforce its fighters, and impede its command and control. Coalition air support has enabled some key achievements for local forces, including ISF efforts to clear Tikrit and the recent success of anti-ISIL forces who took control of Tal Abyad. The air campaign is creating time and space for our ongoing diplomatic and political efforts and the development of credible ground partners in Iraq and Syria.

If confirmed, I will consult with commanders on the ground and make recommendations on how to improve our effectiveness.

Question. What is your assessment of the capabilities of the Iraqi security forces to respond to the threat posed by ISIL and other security challenges?

Answer. Our strategy is dependent upon having a trained, capable, and motivated partner on the ground. We have seen that with effective training, equipping, command and control, and Coalition air support, Iraqi and Kurdish forces can fight and achieve success against ISIL. However, it will take time to repair the damage caused by sectarian policies and corrosive leadership and to build the capability and capacity of our Iraqi partners on the ground. If confirmed, one of my first trips will be to Iraq to assess the current situation for myself.

Question. What lessons do you assess need to be taken from the fighting in Tikrit in March and April of this year?

Answer. We learned that Iraqi forces supported by Coalition air power have the potential to achieve success against ISIL. Iraqi leaders learned that Iranian support comes with conditions, and that there is no substitute for U.S. power.

Question. Does the current troop limitation of 3,100 give U.S. commanders, in conjunction with Iraqi security forces, Kurdish Peshmerga, tribal and local security forces, and coalition partners, in Iraq enough capability to successfully degrade and ultimately destroy ISIL?

Answer. I think our troop levels, including the recent addition of another 450 troops in al Taqqadum, is sufficient for us to advance the strategy's two military lines of effort in the near term. However, as conditions change on the ground, it may become necessary to adjust how we implement the military campaign. In the long term, the success of our advisory forces' efforts must be matched by the commitment and capacity of credible Iraqi ground partners in order to degrade ISIL. Our Iraqi partners must own this fight, and we must continue to enable their forces.

Question. What do you see as the principle role or roles of the Office of Security Cooperation within the U.S. Embassy in Iraq?

Answer. The Office of Security Cooperation is the Department's primary interlocutor for traditional security assistance and cooperation, in support of the U.S. Embassy. OSC-I, along with the Foreign Military Sales program, enables military programs to enhance the professionalization of the Iraqi Security Forces.

Question. What is your assessment of the success of the current strategy against ISIL?

Answer. We are only in month nine of a long campaign, but we have seen that well-led and determined Iraqi forces supported by Coalition air power potentially can have success against ISIL. Iraqi and Kurdish forces in Iraq and Syria have repelled ISIL advances in several towns, halted their advances following large-scale attacks, and cleared and secured lines of communication, which disrupts ISIL's ability to replenish combat power and supplies.

Militarily, we are making moderate progress. ISIL has lost ground overall since the beginning our campaign. However, the current strategy depends on the development of reliable ground partners and on progress toward inclusive political systems in Iraq and Syria. If we get an indication that the other lines of effort cannot make the necessary progress, we should re-examine the strategy. Any enduring solution

to the challenge that ISIL and other VEOs pose requires a generational effort, and our military efforts must be part of a whole of government approach.

Question. Do you assess that the training and equipping of Syrian opposition fighters by the United States and coalition partners under section 1209 of the fiscal year 2015 NDAA will produce enough fighters to make a strategic difference on the battlefield in Syria?

Answer. The outcome of the T&E program remains to be seen, but we face significant challenges in recruiting and vetting suitable volunteers at the scale necessary to have strategic effects. If confirmed, I plan to visit the region and assess our approach in Syria to develop a better understanding of this immensely complex and challenging situation.

Question. In your view, what military support, if any, will the Syrian opposition fighters who receive support under section 1209 of the fiscal year 2015 NDAA need from the United States and coalition partners when they return to Syria?

Answer. We will provide equipment, such as basic military gear, some mobility assets in the form of trucks and vehicles, and small arms and ammunition so that they can better defend themselves. The United States is committed to the success of the personnel we train, and we have legal and ethical responsibilities to support them. We are still considering the full complement of assistance we might provide to the T&E forces.

Question. What are the lessons learned from the drawdown and post-combat operations in Iraq that should be applied to the drawdown and post-combat operations in Afghanistan?

Answer. Iraq demonstrated that decisions about the drawdown and post-combat operations in Afghanistan should be based on conditions on the ground, with the flexibility to make adjustments as those conditions evolve. In addition, the drawdown from Iraq shows that whole-of-government cooperation is required to sustain security gains. We learned that U.S. forces can only mitigate the effects of security threats that are fueled by underlying political or sectarian problems. Ultimately, it is critical to have credible and capable local partners.

AFGHANISTAN CAMPAIGN

Question. What is your assessment of the progress of the Resolute Support mission in Afghanistan?

Answer. The initial forward momentum of the Resolute Support mission has been stymied by delays in forming the full new 25-member Afghan cabinet. In general, the Afghan National Defense and Security Forces (ANDSF) are better trained and equipped than insurgent forces, and continue to demonstrate tactical proficiency as they work together across the security pillars. The ANDSF's most critical gaps remain in aviation, intelligence, and special operations, all linked to the ANDSF's targeting capability. These gaps will endure for some time, even with the addition of key enablers. RS advisors are also working to address developmental shortfalls in the areas of logistics, medical support, and counter-IED exploitation.

Question. In May of 2014 President Obama said "... by the end of 2016, our military will draw down to a normal embassy presence in Kabul ..."

What is your understanding of what military forces comprise a "normal embassy presence"?

Answer. A normal embassy presence will have counter-terrorism and security operation components; it will consist of a Defense Attaché Office, an Office of Security Cooperation, and a special operations element. A deliberate and measured transfer of enduring security cooperation activities is required to maintain continuity of ANDSF development and maintain our relationship with Afghanistan as an enduring counter-terrorism partner. Planning for this presence is underway at CENTCOM and its size will depend upon factors such as security force assistance objectives, ANDSF capabilities, Afghan government requests, and force protection concerns.

Question. What lessons should we learn from the experience of a calendar-based drawdown of U.S. troops in Iraq as applied to the drawdown of U.S. and international troops in Afghanistan?

Answer. We have learned that transitions must be conducted in a manner that properly balances our end state with conditions on the ground.

Question. If confirmed, are there changes you would recommend to the U.S. strategy in Afghanistan?

Answer. I support our overall approach in Afghanistan. If confirmed, I will visit Afghanistan to make an assessment of our current progress toward achieving our objectives. That visit will inform any recommendations I may make for changes to our strategy.

Question. What is the effect of ISIL operations in Afghanistan and/or coordination with the Taliban for the U.S. strategy for Afghanistan?

Answer. ISIL is a competitor with other groups that have traditionally operated in Afghanistan, which may result in increased violence between the various extremist groups. The Taliban has declared that it will not allow ISIL in Afghanistan. The coalition and the Afghan government are closely watching ISIL's attempt to expand its reach to Afghanistan and Pakistan. The ANDSF, National Directorate of Security (NDS), and Afghan political leadership are also collaborating closely to prevent this threat from expanding.

Question. If security conditions on the ground in Afghanistan degrade in 2016, would you recommend to the President revisions to the size and pace of the draw-down plan in order to adequately address those security conditions?

Answer. Yes.

Question. Should the authorities granted to the commander of U.S. forces in Afghanistan take into account the security conditions on the ground faced by U.S. troops?

Answer. Yes.

AFGHANISTAN NATIONAL SECURITY FORCES

Question. What is your assessment of the progress in developing a professional and effective Afghanistan National Security Forces (ANSF) and what recommendations would you make to address challenges to building ANSF capacity?

Answer. My assessment is that the ANDSF are strong at the tactical level and still needs assistance at the corps and institutional levels. They still need help in developing the systems and processes necessary to run a modern, professional army and police force. They also need sustained support in addressing capability gaps in aviation, intelligence, sustainment, and special operations. To address these gaps, our advisory mission and mentorship will continue to be vital. Our advisors are at the security ministries, at the army corps level, and in the police zones—those remain our main efforts.

Question. Do you support plans for building and sustaining the ANSF at 352,000 personnel and, if so, what factors influence your recommendation about the proper size of the ANSF?

Answer. Yes, for the near-term the Afghan National Army (ANA) and Afghan National Police (ANP) are the right size and possess the right capabilities to address the security situation in Afghanistan. Long-term, we will need to evaluate and assess the threat and security situation, and work with the Afghan government to right size the force to a level consistent with its long term security requirements and funding limitations.

RECONCILIATION

Question. In your view, what should be the role of the United States in any reconciliation negotiations with the Afghan Taliban and other insurgent groups?

Answer. The United States should continue to support a political process that enables Afghans to sit down with other Afghans to determine the future of their country.

Question. What additional steps, if any, should the United States take to advance the reconciliation process?

Answer. We remain strongly supportive of an Afghan-led and Afghan-owned reconciliation process whereby the Taliban and the Afghan government engage in talks toward a settlement to resolve the conflict in Afghanistan.

Question. In your view, what should be the role of Afghanistan's neighbors, in particular Pakistan, in the reconciliation process?

Answer. We believe regional partners have an important role to play in ensuring a stable, democratic Afghanistan. We have encouraged stronger ties between Afghanistan and Pakistan and have been pleased with their recent bilateral efforts to address their security concerns.

An audit report by the Special Inspector General for Afghanistan Reconstruction (SIGAR) raised concerns about Department of Defense plans to purchase PC-12 aircraft and Mi-17 helicopters for the Afghan Special Mission Wing and recommended suspending the contracts for these purchases. The Department of Defense and the North Atlantic Treaty Organization Training Mission—Afghanistan/ Combined Security Transition Command—Afghanistan did not concur with the SIGAR's recommendation on contract suspension.

Question. What is your assessment of current plans to equip the Afghan Special Mission Wing with PC-12 aircraft and Mi-17 helicopters?

Answer. These programs are long term and are moving in the right direction and will have a significant impact on ANDSF's ability to provide security to Afghanistan. If confirmed, however, I will assess all options to support the Special Mission Wing (SMW). With the ANDSF assuming full responsibility for security, and an associated significant decrease in coalition air support, the demand for air support in the form of ISR, airlift, aerial fires, and CASEVAC is likely to increase significantly.

Question. What is your assessment of the impact to effectiveness of current Afghanistan counterterrorism and counterinsurgency efforts of the PC-12 aircraft and Mi-17 helicopters?

Answer. Both the Mi-17s and PC-12s have enhanced the ANDSF's capability to conduct counterterrorism and counterinsurgency operations. The Mi-17 fleet remains the workhorse of the Afghan Air Force (AAF), conducting personnel transport, CASEVAC, resupply, close combat attack, aerial escort, and armed overwatch missions. The SMW uses its Mi-17 helicopters to provide Afghan special forces with medium-lift air assault, personnel transport, CASEVAC, and quick reaction force capabilities. The PC-12 aircraft is Afghanistan's first fixed-wing ISR platform, and it has expanded the SMW's capability to locate and identify threats using enhanced video and other intelligence collection capabilities. These platforms have improved the SMW's ability to conduct intelligence preparation of the battlefield, provide mission overwatch during the infiltration and exfiltration of forces, and gain access to areas prohibitive of vehicular traffic. Both of these aircraft provide the ANDSF with increased capabilities to overmatch the Taliban.

U.S. STRATEGIC RELATIONSHIP WITH PAKISTAN

Question. What in your view are the key U.S. strategic interests with regard to Pakistan?

Answer. The key U.S. strategic interests in Pakistan are 1) preventing al-Qaeda's resurgence in Afghanistan and Pakistan to limit its ability to attack the homeland, 2) preventing the proliferation of nuclear weapons and technology, and 3) promoting regional stability (including a peaceful outcome in Afghanistan).

Question. What would you consider to be areas of shared strategic interest between the United States and Pakistan?

Answer. The United States and Pakistan share the common strategic interests of defeating al-Qaeda and other extremist threats, ensuring regional stability, and furthering the non-proliferation of nuclear weapons and technology. We also share the goal of a stable peaceful Afghanistan.

Question. In what areas do you see U.S. and Pakistani strategic interests diverging?

Answer. Areas of divergent interest with Pakistan include our views on the use of proxies and the importance of a positive and stable Pakistan-India relationship.

Question. If confirmed, what changes, if any, would you recommend for U.S. relations with Pakistan, particularly in terms of military-to-military relations?

Answer. The U.S.-Pakistan relationship is fundamental to our vital national security interests. We will need to continue cooperation with Pakistan to defeat al-Qaeda, support Pakistan's stability, and achieve a lasting peace in Afghanistan. If confirmed, I would continue to evaluate the specifics of the relationship based on my assessment of our shared interests with Pakistan and its effectiveness of achieving our shared goals. I will continue to evaluate the efficacy of the mil-to-mil cooperation we have with Pakistan and identify ways in which we can work with Pakistan to enhance regional stability.

U.S. ASSISTANCE TO PAKISTAN

Question. Since 2001, the United States has provided significant military assistance to Pakistan. In addition, the United States has provided significant funds to reimburse Pakistan for the costs associated with military operations conducted by Pakistan along the Afghanistan-Pakistan border.

As U.S. troop presence draws down in Afghanistan, what recommendations, if any, would you have regarding the reduction or cessation of Coalition Support Funds that currently reimburse Pakistan for military support in connection with U.S. military operations in Afghanistan?

Answer. Pakistan has been, and remains, the largest recipient of CSF. It is in our interests to have an enduring partnership with Pakistan. As our mission in Afghanistan transitions, there remains a need for our mutually beneficial relationship. If confirmed, I will provide military advice and recommendations regarding our support for their operations based on my assessment of Pakistan's effectiveness and the larger strategic environment.

Question. In your view, how effective has the assistance and other support that the United States has provided to Pakistan been in promoting U.S. interests?

Answer. Our assistance has enabled operations in Afghanistan and operations against al-Qaeda and helped secure our strategic interests. If confirmed, I will continue to work with the Pakistani military to ensure that they continue to do more.

Question. Do you support conditioning U.S. assistance and other support to Pakistan on Pakistan's continued cooperation in areas of mutual security interest?

Answer. Yes.

Question. What is your assessment of the current relationship between Afghanistan and Pakistan?

Answer. The current relationship appears to have improved since the election of President Ghani. It is clear that security in Afghanistan and Pakistan are linked. Both sides are working to ensure that concrete steps are taken to enhance their bilateral relationship and cooperation.

Question. What is your assessment of Pakistan's cooperation with the United States in counterterrorism operations against militant extremist groups located in Pakistan?

Answer. Pakistan has cooperated with the United States in our operations against al-Qaeda and other terrorist organizations. Their actions in North Waziristan and other areas of western Pakistan have disrupted groups that are a threat to U.S. personnel and objectives in Afghanistan. We will continue to work with Pakistan to do more.

Question. What is your assessment of Pakistan's efforts to maintain transit and provide security along the ground lines of communication (GLOCs) through Pakistan?

Answer. The GLOCs are open and Pakistan's support has been commendable. We currently rely on multiple lines of communication, to include the Pakistani GLOCs to support operations in Afghanistan and do not foresee any issues that would constrain our ability to operate.

Question. What is your assessment of Pakistan's efforts to counter the threat improvised explosive devices, including efforts to attack the network, go after known precursors and explosive materials?

Answer. Pakistan recognizes that improvised explosive devices (IED) are a shared problem. They suffer significant casualties within Pakistan due to IED attacks. We are making progress in the area of counter-IED cooperation, and Pakistan is taking demonstrable steps to disrupt the IED network, to include placing new restrictions on the distribution of precursor materials and hosting regional discussions to discuss the IED problem with international partners. More progress needs to be made though, particularly as it relates to interdicting explosives through increased border security.

IRAN

Question. What is your assessment of the military and political threat posed by Iran?

Answer. Iran, the foremost state sponsor of terrorism, is both a regional and global security threat. Iran attempts to export its influence and protect its governing regime through support for proxy terrorist groups like Hezbollah; weapons trafficking; ballistic missile procurement and advancement; and maritime assets that threaten and harass international waters in the Straits of Hormuz and beyond.

Question. What is your assessment of the threat of Iran's influence in Iraq to U.S. interests?

Answer. Iran's goals and actions are inconsistent with our interests. Iran's goal in Iraq is not to build an inclusive government; rather, it is to create a compliant, Shia-dominated buffer state.

Question. In your view, what are the risks, if any, associated with reducing U.S. presence in the Middle East with respect to the threat posed by Iran?

Answer. Reducing our presence in the Middle East could leave space for Iran to pursue its hegemonic goals. U.S. military presence gives credibility to the military options in the Middle East that both demonstrate our commitment to our regional security partners and deters Iran from employing its large conventional army or ballistic missiles and from interdicting the Strait of Hormuz. Nothing we say can match the message we deliver with our military presence or lack thereof.

Question. Negotiations on the Iran nuclear program have been extended with a deadline now of June 30, 2015 to finalize a comprehensive agreement. What are the elements of a nuclear agreement with Iran that you consider critical to ensuring that it is a "good" deal for U.S. national security interests?

Answer. A good deal rolls back Iran's nuclear program; provides the international community with unprecedented access and transparency into Iran's nuclear facilities and nuclear supply chain; and preserves critical sanctions on conventional arms and ballistic missiles. A finalized deal based on the 02 April political framework satisfies all three of these criteria and clearly makes it more difficult for Iran to move towards a nuclear weapon.

Question. If Iran is allowed to maintain a monitored and limited uranium enrichment program, do you believe that other states in the region may seek to develop enrichment programs of their own and why or why not?

Answer. Any response I would make at this time would be speculation. If confirmed, I will make an assessment based on intelligence and my engagement with regional partners.

Question. What role, if any, should DOD play in countering Iran's support of international terrorism?

Answer. The DOD's role is to deter and counter Iran's support of international terrorism and support our interagency partners' efforts. We deter Iran through our own responsive military presence in the Middle East and through defensive infrastructure and tactics for both ourselves and our allies. To counter Iran, we enable our partner nations through counter terrorism training and equipment sales, multinational exercises, and information sharing, which when combined help to both weaken terrorist groups and Iran's ability to support them.

THE 2001 AUTHORIZATION FOR USE OF MILITARY FORCE

Question. What is your understanding of the scope and duration of the 2001 Authorization for Use of Military Force (AUMF), including with respect to military operations against the Islamic State in Iraq and the Levant?

Answer. The United States is in an armed conflict against al-Qaeda and its associated forces. An associated force is defined as a group that (1) is an organized armed group that has entered the fight alongside al-Qaeda and, (2) is a co-belligerent with al-Qaeda in hostilities against the United States or its coalition partners. These are the same terrorist threats that carried out the grievous attacks on U.S. soil on September 11, 2001, and the AUMF still serves as the legal basis under U.S. domestic law to employ military force against these threats. Since September 2014, the Administration has stated that the 2001 AUMF is interpreted to permit the use of military force against the Islamic State of Iraq and the Levant (ISIL). ISIL, previously known as al-Qaeda in Iraq, has been subject to the use of force under the AUMF since at least 2004, when it entered the conflict against the United States and joined Usama bin Laden's al-Qaeda organization. While there are tensions between ISIL and parts of bin Laden's al-Qaeda network, ISIL views itself as the true executor of bin Laden's legacy of global jihad, and continues its violent campaign against the United States, its citizens, and interests.

Question. What factors govern Department of Defense determinations as to where the use of force is authorized, and against whom, pursuant to the AUMF?

Answer. The May, 2013 Presidential Policy Guidance (PPG) governs direct action against terrorist targets located outside the United States and areas of active hostilities. This document establishes the procedures necessary for the DOD to conduct these types of military operations. The PPG and its underlying operational plans provide clear standards and procedures for DOD concerning where, how, and against whom military force may be used. The DOD meticulously adheres to the formalized procedures of the PPG to ensure that decisions in these counter-terrorist operations are informed by sound military and policy advice, and are based the most up-to-date intelligence and the expertise of our national security professionals. Senior commanders, with the advice of their legal counsel, carefully review all operations for compliance with U.S. and international law before a decision is rendered by the Secretary of Defense or the President.

Question. Are you satisfied that current legal authorities, including the AUMF, enable the Department to carry out counterterrorism operations and activities at the level that you believe to be necessary and appropriate?

Answer. In its current form, the 2001 AUMF provides the necessary and sufficient authorities to counter al-Qaeda and its associated forces. Furthermore, the 2001 AUMF and the 2002 AUMF provide statutory authority for the current operations against ISIL.

ISLAMIC STATE IN IRAQ AND THE LEVANT (ISIL)

Question. What is your assessment of the threat posed by ISIL to the U.S. homeland, U.S. interests overseas, and Western interests more broadly?

Answer. ISIL is currently focused on strengthening and expanding its self-declared caliphate in Iraq and Syria and, to a lesser extent, on strengthening its affiliates in Libya and Nigeria. If ISIL were to refocus its efforts on attacking the U.S. homeland or other Western countries, it would have access to a pool of operatives from which to draw. ISIL already poses a threat to the U.S. and Western interests abroad, particularly U.S. persons traveling in the region.

Question. How would you describe the U.S. strategy to counter ISIL?

Answer. We have a whole-of-government strategy. The “ends” are defined as degrading ISIL over the course of 36 months and ultimately defeating ISIL, in coordination with the international coalition. Nine lines of effort across the USG constitute the “ways” in which we will achieve that objective, including supporting effective governance in Iraq, disrupting ISIL’s finances, disrupting the flow of foreign fighters, and protecting the homeland. DOD is responsible for two of those lines of effort: to deny ISIL safe haven and to build partner capacity. The Department’s “means” include: kinetic strike operations, advise/assist operations, training/equipping efforts, and our military posture in the region.

The military campaign, as one component of the broader strategy, provides time and space for progress along the other lines of effort, particularly the development of inclusive and legitimate governments in Iraq and Syria.

Question. What is your assessment of the effectiveness of that strategy in achieving its objectives?

Answer. We are seeing some military progress, but it is early in the campaign. In both Iraq and Syria, ISIL’s ability to mass and maneuver forces is degraded, its leadership cells are pressured, and its command-and-control and supply lines are being severed. We have reduced ISIL’s ability to produce, process, and transport oil. However, challenges remain, and this will be a long campaign.

The current strategy depends on the development of reliable ground partners and on progress toward inclusive political systems in Iraq and Syria. If we get an indication that the other lines of effort cannot make the necessary progress, we should re-examine the strategy. Any enduring solution to the challenge that ISIL and other VEOs pose requires a generational effort, and our military efforts must be part of a whole of government approach.

Question. What do you assess to be the greatest impediments to implementing the strategy to counter ISIL?

Answer. Poor governance and sectarian divisions create the greatest challenge to our efforts to counter ISIL. Political systems that foster inclusive and legitimate governance remain the most likely path to enduring stability and security in Iraq and Syria over the long-term.

Question. What modifications, if any, would you recommend be made to the strategy to counter ISIL?

Answer. If confirmed, I will assess the military lines of effort to ensure that they are providing the time and space necessary for the non-military lines of effort to succeed. I also will evaluate the efficacy of our efforts to train and equip security forces in Iraq and Syria, and assess whether we can make adjustments to increase their effectiveness. A final area I would examine is whether and how we would need to adjust our efforts to respond to ISIL’s shifting geographic reach to confront ISIL not only where it exists today, but also where it is most likely to take root in the future. As with any strategy, I expect that continued assessment and refinement of both the strategy and its implementation is ongoing. As a key component of the overall strategy, we will continue to adjust implementation of the military campaign based on changes on the ground in Iraq and Syria.

AL QAEDA

Question. What is your assessment of the threat posed by al Qaeda and its affiliates to the U.S. homeland, U.S. interests overseas, and Western interests more broadly? Which affiliates are of most concern?

Answer. Al-Qaeda and its affiliates continue to pose a threat to the U.S. homeland, U.S. interests overseas, and Western interests more broadly despite ongoing counterterrorism (CT) pressure and competition from ISIL. Al-Qaeda in the Arabian Peninsula (AQAP) remains the affiliate of most concern.

YEMEN AND AL QAEDA IN THE ARABIAN PENINSULA

Question. What are the U.S. national security interests in Yemen?

Answer. We seek a stable Yemen, with an inclusive and legitimate government, that is willing and able to confront violent extremist organizations. Continued instability in Yemen not only imposes significant humanitarian costs on civilians, it also enables AQAP to thrive—a group which poses a direct threat to the U.S. home-

land—and allows groups to threaten freedom of navigation in the Gulf, particularly in the Bab al Mandeb Strait.

Question. What is your assessment of U.S. strategy in Yemen to date?

Answer. Our current U.S. strategy in Yemen is founded upon three related pillars: (1) support political transition, namely National Dialogue, Constitutional reform, and Elections, (2) provide continued economic and humanitarian assistance, and (3) lay the groundwork for security reform, specifically counterterrorism capacity building, border security, and critical infrastructure protection. The first step is for political parties to return to negotiations and establish a legitimate government. That would enable the United States to resume cooperation with the Yemen government in the future, particularly on countering AQAP. At this time we are challenged to conduct effective CT operations.

Question. What are the implications of recent events in Yemen for U.S. counterterrorism policy both in Yemen and globally?

Answer. The current turmoil in Yemen has hampered DOD CT operations against AQAP. Although, the United States still maintains a diminished capability. Prior to a Houthi takeover, DOD worked with the Republic of Yemen Government (RoYG) military units to combat the significant terrorist threat to the U.S. homeland emanating from AQAP. However, security concerns in Yemen led to an evacuation of all U.S. personnel, hindering efforts to combat AQAP. AQAP continues to pose an immediate security threat to Yemen, the region, and the United States. When the political and security situation allows, DOD will resume our counterterrorism partnership with the Yemeni government.

Question. What is your assessment of the effectiveness and capability of coalition operations led by Saudi Arabia in Yemen?

Answer. Coalition airstrikes are slowing Houthi expansion in Yemen. Saudi-led Coalition operations can be sustained at least in the near term. However, these operations have not compelled the Houthis to withdraw from cities they captured earlier this year nor deterred Houthi attacks along the Saudi border.

SOMALIA AND AL SHABAB

Question. What is your assessment of the threat posed by Al Shabab?

Answer. Al-Shabaab is primarily a threat in Somalia, Kenya, and other regional countries. It specifically targets countries providing forces to the African Union Mission in Somalia (AMISOM) as well as government facilities and Western targets in and around Mogadishu.

Question. In your view, does al Shabab pose a threat to the United States and/or western interests outside of its immediate operational area?

Answer. Al-Shabaab does not pose a direct threat to the U.S. homeland or Europe at present. Nevertheless, the group poses an ongoing threat to U.S., Western, and other allied interests in East Africa, to include Somalia and Kenya.

Question. What is your understanding of the current U.S. strategy in Somalia and the role of DOD in that strategy?

Answer. The current U.S. strategy on Somalia that was put in place in May 2014 focuses on two main security lines of effort: (1) Continued support to the African Union Mission in Somalia (AMISOM), to stabilize the short term security situation and (2) Promoting Somali security sector reform by expanded support to the Somali National Army, to advance longer term security and stabilization. DOD had an integral role in developing the strategy and we are playing an important role in its execution. These security efforts promote the stabilization of the political and economic situation which allows for the creation of responsive and functioning governmental institutions at the federal, regional, and local level.

Question. What role should DOD play in building the capacity of the Somali national military forces?

Answer. DOD continues to work closely with our colleagues at the Department of State to build the capacity of Somali security services that are loyal to the federal government and are composed of a mixture of clans and regional backgrounds. We intend to increase our support to the Somali National Army in the next year, with programs designed to provide equipment and logistics capacity to units of the Somali National Army to support their continued efforts alongside the African Union Mission in Somalia to defeat al-Shabaab.

AL-QAEDA IN THE ISLAMIC MAGHREB (AQIM)

Question. What is your assessment of the threat posed by Al-Qaeda in the Islamic Maghreb (AQIM)?

Answer. Al-Qaeda in the Lands of the Islamic Maghreb (AQIM) and affiliated groups pose a local and regional threat. AQIM will likely continue to target Malian

government and military targets and Multidimensional Integrated Stabilization in Mali (MINUSMA) forces and facilities, as well as pursue kidnapping for ransom tactics in Niger and Mali.

Question. In your view, does AQIM pose a threat to the United States and/or western interests outside of its immediate operational area?

Answer. No, AQIM does not presently pose a direct threat to the U.S. homeland. We see no indications the group views conducting attacks outside North Africa and the Sahel as a priority in the near term.

Question. What capacity has AQIM demonstrated to plan and carry out actions threatening U.S. interests?

Answer. AQIM has the capacity to threaten U.S. and Western interests within North and West Africa, where it has conducted or attempted attacks in several countries (i.e. Mali, Niger, Algeria, and Mauritania). The group will likely continue to bolster its ties to al-Qaeda-associated terrorist groups throughout the region to influence and support attack planning.

Question. In your view, what has been the impact of the recent expansion of AQIM's area of operations in northern Mali on the group's capacities and aims?

Answer. AQIM's expansion in northern Mali has increased its freedom of movement and enabled it to institute its own severe brand of sharia in territories it controls, implementing policies that are particularly brutal for women. AQIM remains capable of conducting small-scale improvised explosive device (IED), indirect fire (IDF), and mortar attacks against Multidimensional Integrated Stabilization Mission (MINUSMA) and Malian interests in the north.

LIBYA

Question. What is your assessment of the current security situation in Libya?

Answer. Libya's civil war has created a security vacuum and the country will remain volatile in 2015. Two rival governments are seeking to establish legitimacy, and their aligned militias are vying for control of territory and key infrastructure. ISIL also has declared the country part of its caliphate, and ISIL-aligned extremists are trying to institute sharia in parts of the country.

Question. What is your understanding of the U.S. strategy with regards to Libya and the role of DOD in that strategy?

Answer. The United States maintains a national interest in stabilizing Libya and preventing terrorists from using it as a safe haven. The United States and our allies are supporting the United Nations-led efforts to help the warring Libyan factions reach a political solution by forming a national unity government. Currently, the role of DOD in the U.S. strategy is to leverage military relationships with regional partners to encourage support for a political solution. A unity government containing both secularists and Islamists provides the best long term partner to counter VEOs in Libya. Should diplomatic efforts to form a unity government succeed, the United States will be prepared to revisit security assistance efforts for the legitimate Libyan security forces.

Question. How would you assess its effectiveness in achieving its objectives?

Answer. Political reconciliation has yet to materialize. Libya's political landscape is severely fragmented and the country is in the midst of civil war. The UN-led negotiations have so far failed to gain traction, however negotiators remain optimistic that an agreement can be reached and a unity government formed.

Question. What do you assess to be the greatest impediments to implementing the strategy and protecting U.S. interests in Libya?

Answer. The greatest impediment to advancing U.S. goals in Libya is the severe fragmentation of Libya's political and security landscape, which has significantly complicated the negotiations. Libya has disintegrated into a complex mix of rival political factions, tribes, militias and other armed groups, interspersed with local and foreign extremists. Competition between these rival groups poses a challenge to building enduring political consensus, while violent extremists exploit this window of uncertainty to compromise regional stability.

NORTH AFRICA

Question. In recent years, there has been a growth of terrorist networks, capabilities, operations, and safe havens throughout North and East Africa, including groups that have the intention to target U.S. and Western interests. In the face of growing instability and threats, the U.S. counterterrorism effort in the region has been described as an "economy of force" effort.

Do you agree with that characterization of the situation in North and East Africa and the U.S. counterterrorism efforts to combat the related threats?

Answer. North and East Africa are important areas in our fight against extremists. Multiple different terrorist networks are indeed active in North and East Africa, as well as West Africa. These networks have primarily local ambitions—seeking increased influence over resources or territory, and threatening the stability of our regional partners and safety of civilians on the ground. Some have, at times, also demonstrated a willingness to target U.S. and Western interests. AFRICOM is continually working to identify, prioritize and target these networks, in partnership with host nations.

Question. What is your assessment of the current U.S. counterterrorism strategy in the region? In your view, is the U.S. military allocating adequate resources to effectively address the terrorism threat in the region?

Answer. DOD assets have been allocated based on the level of threat and the potential for collaboration with partner nations. Based on that criteria, our current allocation of resources appears appropriate, however if confirmed, I will consider whether additional investments are required in order to stem the growth of violent extremism in the region.

Question. General Rodriguez noted in his March 2014 testimony that “North Africa is a significant source of foreign fighters in the current conflict in Syria.” What is your understanding of the foreign fighter flow from North Africa to the conflict in Syria and Iraq?

Answer. North Africans make up the vast majority of foreign fighters entering Iraq and Syria; however, increasingly many are choosing to remain in North Africa, and join the ISIL affiliate in Libya. Tunisians provide the largest contingent of foreign fighters to Syria and Iraq, followed by Morocco, Libya, and Algeria.

Question. In your view, is it likely that many of these fighters will eventually return home from Syria and Iraq to North Africa and continue their fight against regional governments?

Answer. Yes, it is likely that North African foreign fighters will eventually return home to conduct attacks in their home countries; however, it is currently unknown if these individuals would be tasked by ISIL to conduct attacks or if it would be of their own accord.

RUSSIA

Question. Crimea was formally annexed when President Putin signed a bill to absorb Crimea into the Russian Federation on March 18, 2014, and Russia continues to fuel instability in eastern Ukraine despite a ceasefire agreed to in September 2014.

How effective do you assess the sanctions of the U.S. and the European Union have been in deterring additional aggression by Russia?

Answer. Sanctions alone are unlikely to deter future Russian aggression; deterring combined Russian-separatists actions against Ukraine requires a whole of government approach that is aligned with our NATO allies and friends in Europe. However, U.S. and EU sanctions have had an impact on Russia’s economy and send a clear signal to Moscow that aggression against Ukraine’s sovereignty and territorial integrity entails costs.

Question. What other specific U.S. actions helped to deter additional Russian aggression in Eastern Europe?

Answer. Congressional support for the European Reassurance Initiative has enabled DOD, via Operation ATLANTIC RESOLVE (OAR), to conduct military exercises and training on land, in the air and at sea, while sustaining a rotational presence across Europe; and increase the responsiveness of U.S. forces to reinforce NATO by pursuing the prepositioning of equipment and enhancing reception facilities in Europe. Our bilateral efforts as well as our continued support of NATO adaptation measures all support the goal of deterring additional Russian aggression. Senior defense and diplomatic officials travel and consult with our allies and friends to affirm Alliance resolve and bolster approaches to deter Russian aggression.

Question. What additional steps, if any, are likely to prove most effective at deterring Russian aggression in Eastern Europe?

Answer. If confirmed, I will continue to evaluate current measures and take a close look at potential adjustments and adaptations. Of key concern to me is wisely channeling U.S. military efforts and resources to ensure our allies and partners are militarily capable and interoperable.

Question. Are you concerned that Moldova and Georgia may be at a heightened state of vulnerability given Russian willingness to take aggressive action in Ukraine?

Answer. Yes. Russia has demonstrated both in Georgia in 2008 and Ukraine today its willingness to use force, violate sovereignty, and exploit the vulnerabilities of

these fragile democracies to achieve its strategic objectives. Georgia, Moldova and Ukraine all contain Russian occupied separatist regions that the Kremlin exploits for its own purposes.

Question. Russian tactics in eastern Ukraine have been called “hybrid” and combine hard power with soft power, including elements such as lethal security assistance to separatists, the use of special operations forces, extensive information operations, withholding energy supplies and economic pressure.

If confirmed, what steps would you recommend as part of a strategy to counter this “hybrid” approach?

Answer. We need to remain alert to Russian strategic intent and capabilities—and their integration of military and non-military tools in the gray space. Most importantly, we must lead in order to maintain Trans-Atlantic resolve to resist Russian coercion now and in the future. I will continue to emphasize efforts and investments that enable our allies and friends to defend against a range of threats—and to do so collectively. Increasingly, there is a non-military dimension to security that requires whole-of-government and multinational approaches. Military power is just one aspect of these approaches.

Question. In light of Russia’s actions in 2014, what do you believe are appropriate objectives for U.S.-Russian security relations?

Answer. Cooperation with Russia in areas of mutual interest within the military sphere remains possible if Russia assumes the role of a responsible international actor moving forward, not isolated and moving backward as it is today. If confirmed, my intent for the military-to-military relationship is to reduce the chances of miscalculation or escalation through professional, candid communications and behaviors.

NATO ALLIANCE

Question. The reemergence of an aggressive Russia has resulted in the North Atlantic Treaty Organization (NATO) developing the Readiness Action Plan that NATO Secretary General Jens Stoltenberg called “the biggest reinforcement of our collective defense since the end of the Cold War.” NATO also continues to be central to our coalition operations in Afghanistan and elsewhere, even as many NATO members have significantly reduced their national defense budgets in response to economic and fiscal pressures.

How important is the NATO alliance to U.S. national security interests?

Answer. The Alliance is essential to our national security. The bedrock of NATO’s collective defense obligation is Article 5, but NATO’s importance extends beyond Article 5. NATO has been fundamental to sustaining Trans-Atlantic unity, prosperity and security. This has enabled Europe to contribute to security and prosperity on a global basis. The Alliance maintains a persistent air, land, and maritime presence in and around the territories of our European allies, demonstrating a commitment to defend its territory against any aggression. NATO is a fundamental contributor to international order. NATO conducts military operations in Kosovo, Afghanistan, the Mediterranean Sea, and off the Horn of Africa to support stability to those areas. NATO also assists nations in North Africa and the Middle East to develop local capabilities to stem the growing instability and transnational threats in and around their countries and to prevent those threats from spreading to Europe or threatening the U.S. homeland.

Question. In light of the Russian Federation’s aggression against Ukraine, what do you see as the major strategic objectives of the NATO Alliance in the coming years and what are the greatest challenges in meeting those objectives?

Answer. NATO must affirm Trans-Atlantic Unity by adapting its collective defense against state and non-state threats across a broad spectrum. NATO’s unity is fundamental, and that requires us to be attentive to the challenges confronting all members. The Russian Federation’s aggression in Ukraine consolidated attention on the Alliance’s clearest responsibility, which is to protect and defend its territory and populations against attack, per Article 5 of the North Atlantic Treaty. NATO must also remain prepared and continue to undertake its other “core tasks” of crisis management and cooperative security. Violent extremist non-state actors and Russian coercion and subversion in “gray space” test the Alliance’s ability to adapt Article V to these challenges. As Allies, we must thereby ensure that the Defense Investment Pledge at the 2014 Wales Summit meets these challenges and threats.

Question. What do you see as the proper role, if any, for NATO in addressing the threat posed by ISIL and in addressing the problem of illegal immigration across the Mediterranean Sea?

Answer. A unified Europe can and must do more than one thing at a time. But NATO must be judicious about prioritizing its engagement given limited resources to address the threats and challenges to the southern and eastern flanks.

Information sharing is a useful contribution NATO could make to counter ISIL and/or to support Mediterranean Allies and friends managing border security and immigration challenges..

Question. The concept of defense cooperation among NATO members was emphasized at the NATO summit in Chicago in May 2012.

What areas or projects would you recommend, if confirmed, that NATO nations cooperate in to improve NATO alliance capabilities?

Answer. Cooperative efforts among Allies on developing capabilities have become increasingly important in light of the worldwide challenges and the fiscal straits facing many Allied nations. If confirmed, I would use my office to influence Allies to implement Wales Summit pledge to move toward the two percent defense spending target as soon as possible. In doing so, I would encourage Allies to focus their resources on specific Alliance capability needs, such as developing command and control and joint intelligence, surveillance and reconnaissance and maintaining and improving readiness and interoperability.

Question. Under what conditions, if any, would you envision further enlargement of NATO in the coming years?

Answer. Enlargement should be reserved for those candidates deemed ready to accept the obligations of membership, who are prepared to make the necessary reforms that further NATO's principles, and who contribute to the unity and security of the Alliance.

Question. Turkey continues to be a gateway for foreign fighters proceeding to and from Syria and Iraq.

What steps would you recommend to encourage Turkey to continue to address the threat posed by foreign fighters proceeding to and returning from Syria and Iraq?

Answer. Turkey acknowledges the foreign terrorist fighter threat and is taking steps to bolster its law enforcement and border security efforts, including increased monitoring, border security, and counter-illicit finance measures. If confirmed, I would support the Department's contributions to interagency support of Turkish enhance border security enhancements, to include strengthening critical information sharing with the Turkish military. Moreover, I would support international efforts to help source countries identify and disrupt foreign fighter transit through Turkey.

Question. At the NATO Summit in Wales in 2014, NATO leaders declared their "aim to move towards the 2 percent guideline [of GDP for defense spending] within a decade with a view to meeting their NATO Capability Targets and filling NATO's capability shortfalls."

In your view, what impact have national defense budget cuts had on the capabilities of the NATO alliance, and what do you believe needs to be done to address any capability shortfalls?

Answer. National defense budget cuts and fiscal austerity measures by our Allies have limited their ability to address long standing Alliance capability shortfalls such as in joint intelligence, surveillance and reconnaissance. These capabilities can be costly, but we need to ensure that in the future the United States is not the only Ally with such capabilities. The rhetoric of the Wales Defense Investment Pledge must be matched by real resources to build capability. The United States is committed to working with Allies on defense planning to ensure they maintain or develop the specific capabilities that the Alliance is lacking.

Question. What are the greatest military capability shortfalls that you see in the NATO alliance?

The most significant shortfalls that I see in the Alliance are: cyber defense, defense institution-building, enabling capabilities such as joint intelligence, surveillance and reconnaissance, air-to-air refueling and strategic lift. The Alliance places heavy reliance on the United States to provide these limited but high-demand capabilities. Other Allies should be encouraged to develop these capabilities through national and multinational investment.

Question. In light of the reductions in national defense spending by some NATO members, are you concerned that the Alliance will lack critical military capabilities? If so, what steps, if any, would you recommend be taken to address potential shortfalls in Alliance capabilities?

Answer. The United States is engaged in political, diplomatic and military channels to address continued reductions in defense investment by our Allies. We are particularly focused on NATO Allies that have been our most reliable partners for managing global security issues and those with the largest Gross Domestic Products. Alliance capability shortfalls will increase as national defense spending decreases. Most Allies have gone as far as they can go in wringing out efficiencies in

their defense spending. The key step for addressing capability shortfalls is to arrest the decline in national defense investment and move to meet the Defense Investment Pledge made at the 2014 Wales Summit.

Question. What are the greatest opportunities and challenges that you foresee for NATO in meeting its strategic objectives over the next five years?

Answer. The greatest opportunity and challenge are the same: adapting NATO to better meet current and future security challenges while preserving Trans-Atlantic unity. The events in both Europe and the Middle East have provided the catalyst for adapting NATO's political, military and institutional processes and focus. NATO leaders—including our President—have committed to this adaptation which will make NATO more responsive and ready to face, or deter, challenges. Following thru on this adaptation is the greatest opportunity for NATO; gaining the consensus to do this in a focused, proactive manner is the greatest challenge.

Question. In your view, is there a continuing requirement for U.S. nuclear weapons to be deployed in NATO countries?

Answer. The 2010 Strategic Concept for the Alliance states NATO will remain a nuclear alliance for as long as nuclear weapons exist. Further, the 2012 NATO Deterrence and Defense Posture Review, the DDPR, concluded NATO's current mix of conventional, nuclear, and missile defense capabilities remains appropriate. I concur with both of these judgments by the Alliance. Finally, in the context of recent Russian behavior, including their development of dual capable intermediate-range missile systems that directly threaten our NATO allies, now is not the time to eliminate a capability that has been an effective centerpiece of Alliance cohesion, resolve and deterrence for decades.

U.S. FORCE POSTURE IN EUROPE

Question. The Department of Defense continues to review its force posture in Europe to determine what additional consolidations and reductions are necessary and consistent with U.S. strategic interests.

How would you define the U.S. strategic interests in the European area of responsibility (AOR)?

Answer. As the National Security Strategy states, the United States maintains a profound commitment to a Europe that is free, whole, and at peace. According to the National Military Strategy, NATO's collective security guarantees are strategically important for deterring aggression, particularly in light of recent Russian aggression on its periphery.

Question. Do you believe that additional consolidation and reductions of U.S. forces in Europe are consistent with U.S. strategic interests in that AOR given the increase in Russian aggression in the last 15 months?

Answer. Yes. The current U.S. footprint in Europe—including the recent changes announced by Secretary Carter—supports garrison operations, training facilities and power projection capabilities for operations inside and outside the AOR. However, the credibility and effectiveness of our response to Russian aggression in the East depend not only on the operational scale and geographic scope of our operations, but also on their longevity. If confirmed, I will seek to ensure the persistent, appropriate level of rotational presence is retained in Europe to effectively assure allies and deter Russian aggression.

U.S. FORCE POSTURE IN THE ASIA-PACIFIC REGION

Question. The Department continues the effort to rebalance toward the Asia-Pacific as announced in the January 2012 Strategic Defense Guidance.

Are you satisfied with the rebalance efforts to date?

Answer. Yes. I am satisfied with our Rebalance efforts to date. The rebalance to the Asia-Pacific region has resulted in a significant adjustment in U.S. force structure and capabilities. As indicators of our success, we have negotiated new comprehensive force posture and access agreements with key allies and partners to support broader U.S. goals and objectives in the region. We have strengthened our alliances and greatly expanded partnerships with countries like Singapore, Vietnam and India. We have moderated tensions in East and South China Sea maritime disputes and reinforced our position as the security partner of choice for most nations in the region. An added benefit of these strengthened ties is the commitment of military forces and assets of several countries to the anti-ISIL coalition.

Question. What do you see as the U.S. security priorities in the Asia-Pacific region over the next couple of years and what specific capabilities or enhancements are needed in to meet those priorities?

Answer. The United States faces a range of challenges in the Asia-Pacific region, including provocations by the DPRK and the growth of its ballistic missile pro-

grams; China's development of new technologies intended to prevent open access to the air and maritime domain; widespread natural disasters and transnational threats; and territorial disputes. Going forward, we must prioritize investments in advanced capabilities that are critical for the future operational environment. I will support the ongoing efforts to increase U.S. military presence in the region and invest in and deploy critical advanced capabilities.

I believe we must not only continue to modernize U.S. alliances and partnerships, which provide a critical role in underwriting regional security, but also help grow the ISR, HADR and maritime security/domain awareness capacities of our allies and partners in the region. The Department must continue to enhance U.S. force posture and capabilities and work with China to encourage greater transparency about how it will use its growing military capabilities.

Question. Do the budget cuts and resource constraints associated with sequestration threaten your ability to execute the rebalance to the Pacific?

Answer. If we return to sequestration-level cuts in Fiscal Year 2016, we will face serious risks across the board, and may have to reassess the rebalance strategy. If confirmed, I look forward to working with the Department and Congress to help solve this pressing problem.

Question. As the United States realigns its forces in the Asia-Pacific Theater, do you believe we have the air and maritime lift required to support the distribution of Marines across North and Southeast Asia?

Answer. No. If confirmed, I look forward to working with the Services and the U.S. Pacific Command to address this challenge.

KOSOVO

Question. Approximately 700 U.S. troops remain in the Balkans as part of the Kosovo Force (KFOR) that first deployed to Kosovo in 1999 and today is comprised of over 4,600 personnel from 30 countries. Spikes in violence in 2011 required the deployment of the NATO operational Reserve Force battalion of approximately 600 soldiers to bolster KFOR and maintain a secure environment. Progress is required in both the military and political realms before further troop reductions can be made.

What major lines of effort do you think are required to further reduce or eliminate U.S. and NATO presence in Kosovo?

Answer. Continued progress in the EU implementation of the April 2013 accord between Serbia and Kosovo will go a long way to stabilizing the Western Balkans and ending Kosovo's ethnic partition thus setting the security conditions appropriate for further reducing or eliminating U.S. and NATO presence in Kosovo.

Question. In your view, can the European Union play a more significant role in Kosovo?

Answer. The EU plays a significant role by contributing to the security of Kosovo through its European Union Rule of Law Mission in Kosovo (EULEX-Kosovo) in addition to ongoing efforts to implement the 2013 Accord. The EULEX mission supports Kosovo on its path to a greater European integration in the rule of law area by investigating, prosecuting and adjudicating sensitive cases using its executive powers as well as by monitoring, mentoring, and advising local counterparts in the police, justice and custom fields to achieve sustainability and EU best practices in Kosovo. The EU's active engagement has helped facilitate political dialogue between Serbia and Kosovo and will continue to be an essential part of progress.

SECURITY SITUATION ON THE KOREAN PENINSULA

Question. What is your assessment of the current security situation on the Korean peninsula and of the threat posed to the United States and its allies by the current state of North Korea's ballistic missile and nuclear weapons capabilities?

Answer. North Korea remains one of the most challenging security problems for the United States and our allies and partners in the region. North Korea continues to take actions that are destabilizing for the region, including its December 2012 missile launch, February 2013 nuclear test, series of short-range ballistic missile launches in 2014, and the cyber-attack against Sony Pictures Entertainment.

North Korea's ballistic missile and weapons of mass destruction (WMD) capabilities clearly present a serious and direct threat to U.S. forces postured in the Asia-Pacific region as well as to our regional allies and partners. These capabilities could eventually pose a direct threat to U.S. territory. Moreover, North Korea's history of proliferation amplifies the dangers of its asymmetric programs.

The US-ROK alliance continues to be the linchpin to deterring North Korean aggression and maintaining stability on the Korean Peninsula. If confirmed, I will ensure that the U.S.-ROK Alliance continues to strengthen alliance capabilities to

counter North Korea's increasing missile and nuclear threat. I will also ensure that we draw upon the full range of our capabilities to deter, defend, and respond to North Korean ballistic missile and WMD threats.

Question. In your view, are there additional steps that DOD could take to ensure that North Korea does not proliferate missile and weapons technology to Syria, Iran and others?

Answer. If confirmed, I will continue efforts to strengthen our strong defense posture against the North Korean ballistic missile threat. This includes enhancing DOD's ability to highlight and disrupt the illicit proliferation networks that North Korea uses, and promoting cooperation with partners to interdict vessels and aircraft suspected of transporting items of proliferation concern.

Question. What is your view regarding the timing of transfer of wartime operational control from the U.S. to the ROK?

Answer. At the 2014 U.S.-ROK Security Consultative Meeting, SecDef Hagel and ROK Minister of Defense Han decided that in light of the evolving security environment in the region, we will implement the ROK-proposed, conditions-based approach to the transition of wartime OPCON.

The ROK will take wartime OPCON when critical ROK and alliance military capabilities are secured and the security environment in the region is conducive to a stable wartime OPCON transition.

CHINA ASSERTIVENESS

Question. How has China's aggressive assertion of territorial and maritime claims, particularly in the South China Sea and East China Sea, affected security and stability in the region?

Answer. China's actions in the South and East China Seas, as well as its rapid military modernization and growing defense budgets, have led many in the region—including the United States—to question its long-term intentions. It has still not clarified its expansive 9-Dash Line claim, and it continues to conduct large scale land-reclamation activities in the South China Sea. Such behavior has been destabilizing.

CHINA MIL-MIL

Question. What is your assessment of the current state of the U.S.-China military relationship and your views regarding China's interest in and commitment to improving military relations with the United States?

Answer. I view the U.S.-China military-to-military relationship as a critical component to our overall bilateral relations. It allows us to increase cooperation on areas of mutual interest and reduces risk as our forces come into closer contact. The Chinese leadership has expressed the view that the military-to-military relationship is useful as vehicle for stability in the overall bilateral relationship. The relationship has room for improvement.

Question. What is your view of the purpose and relative importance of sustained military-to-military relations with China?

Answer. As an enduring Pacific power, the United States has a clear interest in sustaining military-to-military contacts with China. I will continue to seek a mil-mil relationship that builds sustained and substantive dialogue, practical cooperation in areas of mutual interest, and mitigates the risk of miscalculation.

ANTI-ACCESS/AREA DENIAL

Question. Over the past few years, much has been made of the emerging anti-access and area denial capabilities of certain countries and the prospect that these capabilities may in the future limit the U.S. military's freedom of movement and action in certain regions. Do you believe emerging anti-access and area denial capabilities are a concern?

Answer. Yes. One of the keys to our nation's success is our ability to rapidly project power around the globe. Our power projection capability is essential to deterring our adversaries and maintaining global stability. Russia, Iran, and China are developing technologies, most notably missiles, designed to limit U.S. military's freedom of movement. If confirmed, I will make it a priority to ensure that we sustain our ability to project overwhelming combat power into any theater at a time of our choosing.

Question. If so, what do you believe the U.S. Armed Forces need to be doing now and in the next few years to ensure continued access to all strategically important segments of the maritime domain?

Answer. The United States is committed to keeping the global commons, especially maritime, free. We will continue to invest in the personnel and technological

advantages that will allow us to meet that commitment, especially to counter anti-access and area denial capabilities of our potential enemies. However, any discussion of specific actions and investments associated with our counter A2AD strategy and capabilities are more appropriate for discussion in a classified forum.

Question. If confirmed, you would play an important role in the process of transforming the U.S. Armed Forces' capability and capacity to meet new and emerging threats.

Answer. Concerning capability and capacity to meet new and emerging threats, what are your goals regarding transformation of the U.S. military?

Question. If confirmed, I would develop a detailed concept for Joint exercises and experimentation. My initial assessment, from the perspective of a service chief, is that our operational tempo over the past decade has adversely impacted us in this area.

INTELLIGENCE, SURVEILLANCE, AND RECONNAISSANCE CAPABILITIES

Question. Despite the ongoing drawdown in Afghanistan, demand for intelligence, surveillance, and reconnaissance (ISR) capabilities of every kind remains very high due to the enhanced situational awareness and targeting capabilities they bring to our commanders. Almost all of the geographic combatant commands still have validated ISR requirements that are not being met.

What is your assessment of the Department's current disposition of ISR assets across the various combatant commands?

Answer. Demand for ISR continues to outpace available supply. The Services are operating at maximum capacity; therefore, sourcing for new requirements is a zero sum game. Assets are primarily reallocated from other combatant commander operations to meet new demands.

The Department's allocation strategy remains focused on leveraging our ISR capabilities to maximize effects. To support counter-terrorism and force protection, we have allocated nearly 90 percent of our remotely-piloted full-motion video assets to USCENTCOM, with the remaining sourced primarily to USAFRICOM. In USEUCOM and USPACOM's sensitive reconnaissance operations areas, we have leveraged assets with standoff capabilities to maximize indications and warning collection.

Question. As our forces are withdrawn from Afghanistan, should existing ISR assets be re-postured to support combatant command needs in other regions, or can we afford to reduce ISR capacity?

Answer. The Department continually evaluates our capabilities against evolving combatant command requirements, ensuring a balance across operational, force management, and institutional risks. When appropriate, ISR assets can be re-postured to support emerging combatant commander needs across other regions. For example, within the last year, we shifted some ISR from Afghanistan to monitor ISIL activity in the Middle East. Additionally, we made the challenging decision to return medium-altitude ISR capacity to a steady-state 60 flights a day, from an almost continual surge of 65, reducing risk to the long-term sustainability of the USAF's unmanned pilot force.

Question. Most of the highest-value ISR assets acquired after 9/11 are aircraft that were not designed to be survivable in high-threat air defense environments, although in some cases unmanned aerial vehicles were designed to be deployed in large numbers in the expectation of substantial combat attrition.

Do you believe that the Department needs a major shift towards ISR platforms that are survivable in high-threat situations, or merely an augmentation of the capabilities we now have, with the assumption that air superiority can be gained rapidly enough to operate today's assets effectively?

Answer. We have learned a great many ISR lessons from more than ten years of conflict. It is in the best interest of the United States to invest in ISR platforms, sensors, and communications capabilities designed to penetrate and survive in high-threat and denied environments; not just in the air domain, but in space, surface, and sub-surface domains as well. These systems also offer the potential to improve pre-conflict warning. These capabilities are expensive to develop and field, but are a necessary component of balanced efforts to maintain our warfighting advantages. However, existing ISR systems remain very relevant for today's operations and future scenarios; particularly in support of ongoing counter-terrorism missions. So the right path appears to be augmenting the capabilities we have today to fill critical capability and capacity gaps.

AIRCRAFT CARRIER-LAUNCHED UNMANNED SYSTEMS

Question. The Navy's current plan for the Unmanned Carrier-Launched Airborne Surveillance and Strike (UCLASS) system aircraft is to develop an airframe optimized for unrefueled endurance (14 hours) and the ISR mission.

Given the combat radius of the planned carrier air wing, are you concerned the carrier will lack the ability to project power at relevant distances given emerging anti-access/area-denial threats?

Answer. Yes. That's why it's critical that we continue to develop concepts and capabilities that will allow us to maintain a competitive advantage in an A2AD environment.

SPECIAL OPERATIONS FORCES

Question. The 2006 and 2010 QDRs have mandated significant growth in our special operations forces (SOF) and enablers that directly support their operations. The most-recent QDR released in 2014 capped this growth at 69,500, approximately 2,500 below the originally planned growth.

In light of the growing global terrorism threat, do you believe the currently planned end-strength for SOF is sufficient to meet global requirements?

Answer. The last two Quadrennial Defense Reviews (QDRs) directed significant growth in our special operations forces (SOF) along with enablers that directly support their operations. We will continue to carefully balance the need for further growth in SOF with our need to address other capability demands in light of increased budgetary pressures.

Question. SOF are heavily reliant on enabling support from the general purpose force. In light of current fiscal challenges, do you believe sufficient enabling capabilities can be maintained within the general purpose forces and that such capabilities will remain available to special operations forces?

Answer. Special operations forces depend on general purpose forces for many enabling capabilities, including intelligence, surveillance and reconnaissance (ISR), logistics, and medical evacuation. I believe that we have sufficient and trained general purpose forces to support high priority special operations missions.

INTERNATIONAL PEACEKEEPING CONTRIBUTIONS

Question. In testimony before the House Committee on Foreign Affairs (July 29, 2009), Ambassador Susan Rice, then U.S. Ambassador to the United Nations, stated that the United States "is willing to consider directly contributing more military observers, military staff officers, civilian police, and other civilian personnel—including more women I should note—to UN peacekeeping operations."

What is your view on whether the U.S. should contribute more military personnel to both staff positions and military observers in support of U.N. peacekeeping operations?

Answer. I believe we should focus on how best to increase the effectiveness and efficiency of UN peacekeeping operations. Deliberate and strategically crafted placements of personnel to key positions within the UN can advance U.S. influence and interests.

Question. If confirmed, would you support identifying methods through which the DOD personnel system could be more responsive to requests for personnel support from multilateral institutions like the United Nations?

Answer. Over the past year the Joint Staff has provided multiple officers to the UN to include the head of the UN's military planning service. The recent administrative waiver extension provided by the UN to the United States will help ease future assignments, when warranted.

INTERAGENCY COLLABORATION

Question. The collaboration between U.S. Special Operations Forces, general purpose forces, and other U.S. Government departments and agencies has played a significant role in the success of counterinsurgency and counterterrorism operations in recent years. However, much of this collaboration has been ad hoc in nature.

What do you believe are the most important lessons learned from the collaborative interagency efforts in Afghanistan, Iraq, and elsewhere?

Answer. Military power is necessary, but not sufficient to achieve our national security objectives. The non-military dimensions of national security are increasing in their importance. Our adversaries understand this and have adapted to challenge us outside or short of our military redlines. Whereas the U.S. military provides a range of options to employ force, our diverse civilian partners provide potent and diverse options to exert and sustain American influence. Much of the incremental

progress bringing civil and military capacities together in the field is waning. Agencies and Departments must deliberately and jointly invest in civil-military strategy, doctrine, training and operations to meet the tests of this era, whether State-based coercion in “gray space,” non-state violent extremism, or cyber threats to our homeland and overseas interests. If confirmed, my military advice to the President, NSC and Congress will reflect the need to invest, apply and sustain deliberate civil-military approaches to national security.

Question. How do you believe these efforts can be improved?

Answer. It begins with leadership. If confirmed, I will consult early and often with Secretary Carter, other members of the NSC and Congress to understand specific ways the Joint Force can support or enable the non-military dimensions of our national security. My focus will remain on the military instrument of power. I will establish expectations that the Joint Staff parallel my efforts by pursuing a more collaborative and engaged posture in NSC fora and with departments, agencies and the private sector.

Question. How can the lessons learned in recent years be captured in military doctrine and adopted as “best practices” for future contingency operations?

Answer. The Department’s Joint Force Development process that takes observations from operational practice, joint training and concept development, analyzes them, and synthesizes them into Joint Doctrine for the operational preparation and employment of the force. As an example, the current average age of the Department’s 81 Joint Doctrine publications is about 2 years old, a refresh rate that is about 3-times faster than it was in the years after 9/11. We should look at making doctrine more adaptable to the dynamic environment and accessible to the joint force. But we must also infuse learning into our joint education and joint exercise programs to ensure that its impact is aligned at the strategic, operational and tactical echelons within OSD, the Military Departments and Services, combatant commands and defense support activities.

Question. Interagency collaboration on an operational or tactical level tends to address issues on a country-by-country basis rather than on a regional basis (e.g. international terrorists departing Mali for safe havens in Libya).

How do you believe regional strategies that link efforts in individual countries can best be coordinated in the interagency arena?

Answer. Combatant commanders develop Theater Campaign Plans and Functional Campaign Plans that address regional and trans-regional issues. They seek input from interagency partners in the development of these plans to de-conflict and complement efforts. We need to change our paradigm. The State Department has initiated regional, functional and country strategies and supporting processes. DHS is maturing its scenario-based planning process. Our military paradigm needs to shift from expecting others to integrate into military plans and processes. This reinforces the tendency for DOD to become the option of first resort and the default integrator. We need to be more engaged with OSD to support and influence foreign affairs and homeland security planning and resourcing processes and integrate those into military plans and processes.

RESPONSIBILITY TO PROTECT

Question. The U.S. Government has recognized the “responsibility to protect” (R2P)—that is, the responsibility of the international community to use appropriate means to help protect populations from genocide, war crimes, ethnic cleansing and crimes against humanity, by encouraging states to protect their own populations, by helping states build the capacity to do so, and by acting directly should national authorities fail to provide such protection. In its 2010 Quadrennial Defense Review, the Department of Defense names “preventing human suffering due to mass atrocities” as one of a long list of potential contingencies that DOD might be called on to address. DOD has begun to explore some of the implications of R2P, by considering “mass atrocity prevention and response operations” (MAPRO).

Question. In your view, how high a priority should the “responsibility to protect” be for the U.S. Government as a whole?

Answer. My role is not to set policy priorities but rather to design and employ the military instrument in support of policy decisions. The military instrument can be used to meet many priorities as directed by the President. The U.S. military has often taken an active role in helping to prevent and responding to mass atrocity situations.

Question. In your view, what should be the role of DOD, if any, in fulfilling the responsibility to protect?

Answer. The role of DOD is to support the broader U.S. government’s response in any situation as part of a whole-of-government approach. DOD should provide op-

tions, assess the risk associated with those options, and execute selected options as needed.

Question. In your view, what is the proper application of R2P doctrine with respect to the situation in Syria?

Answer. We incorporate R2P considerations, and civilian security considerations more broadly, when we weigh the acceptability and feasibility of our military strategies, whether in Syria or elsewhere. The U.S. Government is working with allies and partners and with the Syrian opposition to provide humanitarian assistance within Syria and across the region. Since fiscal year 2012, the United States has provided over \$4.4 billion in aid to help the victims of this conflict, including emergency medical care and supplies, food, and shelter. Of that, over three quarters of a billion dollars have already been spent in fiscal year 2015.

OPERATION OBSERVANT COMPASS & THE LORD'S RESISTANCE ARMY

Question. Despite pressure by the Ugandan People's Defense Forces (UPDF) and efforts by U.S. Special Operations personnel to support them, elements of the Lord's Resistance Army (LRA)—including Joseph Kony—continue to operate and commit atrocities against civilian populations in the Central African Republic, Democratic Republic of the Congo, and South Sudan. Some observers have identified operational concerns with this mission, including that: (1) supported forces are trying to find an elusive foe in an area roughly the size of California, much of which is covered in thick jungle; (2) technical support to U.S. forces and their UPDF partners from the defense and intelligence community continues to be inadequate; and (3) limitations continue to be placed on the ability of U.S. Special Operations personnel to accompany UPDF partners outside of main basing locations, thereby limiting the level of direct support they can provide.

In your view, what is the objective of Operation Observant Compass?

Answer. Operation OBSERVANT COMPASS has four main objectives:

- 1) Increase protection of civilians affected by the LRA
- 2) Promote defection, disarmament, demobilization, and reintegration of LRA fighters
- 3) Remove Joseph Kony and LRA leaders from central Africa
- 4) Increase humanitarian access and provide relief

Our African partners, with DOD and interagency assistance, have made progress in achieving these mission objectives.

Question. Do you support the continuation of DOD's current level of support to this mission?

Answer. I am sensitive to the resource constraints we face, especially in the Africa area of operations, and am open to exploring other options to achieve our stated policy goals. I recommend resourcing at a level appropriate to the threat the LRA poses to our national interests in the region.

NATIONAL STRATEGY TO COMBAT TRANSNATIONAL ORGANIZED CRIME

Question. Criminal networks are not only expanding their operations, but they are also diversifying their activities, resulting in a convergence of transnational threats that has evolved to become more complex, volatile, and destabilizing. The Director of National Intelligence recently described transnational organized crime as "an abiding threat to U.S. economic and national security interests," and stated that "rising drug violence and corruption are undermining stability and the rule of law in some countries" in the Western Hemisphere. In July 2011, the President released his Strategy to Combat Transnational Organized Crime: Addressing Converging Threats to National Security. One of the priority action areas designated in the strategy is "enhancing Department of Defense support to U.S. law enforcement."

What is your understanding of the President's strategy to combat transnational criminal organizations?

Answer. The President's Strategy to Combat Transnational Organized Crime integrates all elements of our national power to combat transnational organized crime and related threats to national security—and urges our partners to do the same. The strategy seeks to reduce transnational organized crime from a national security threat to a manageable public safety concern in the U.S. and strategic regions abroad.

Question. What is your understanding of the Department's role within the President's strategy?

Answer. The Department of Defense provides support to other U.S. government agencies who lead our efforts to combat transnational organized crime.

Question. In your view, should DOD play a role in providing support to the U.S. law enforcement and the Intelligence Community on matters related to transnational organized crime?

Answer. Consistent with current and recently expanded authorities provided in the fiscal year 2015 NDAA, the Department provides unique capabilities that support U.S. law enforcement and Intelligence Community activities as part of a whole-of-government approach to address the national security threat posed by transnational criminal organizations. Intelligence support, counter-threat finance support, building partner capacity, and detection and monitoring are specific DOD capabilities which support the interagency and partner nations.

MASS ATROCITIES PREVENTION

Question. President Obama identified the prevention of mass atrocities and genocide as a core U.S. national security interest, as well as a core moral interest, in August 2011 under Presidential Study Directive 10.

Among interagency partners, what is DOD's role in addressing atrocity threats, and what tools does DOD have for preventing or responding to atrocities?

Answer. DOD has developed Joint Doctrine for conducting Mass Atrocity Response Operations. Based on this doctrine, atrocity prevention and response is now incorporated into DOD plans and planning guidance. In addition, DOD has conducted a comprehensive review of training in this area and is working to strengthen the capacity of UN peacekeeping operations to respond to atrocity situations.

Question. Has DOD developed planning processes toward this effort so that it will be able to respond quickly in emergency situations?

Answer. Yes, DOD has developed planning processes toward this effort. All DOD components have been directed to integrate atrocity prevention and response into their policies and plans. Specific plans are further developed and implemented at the Geographic Combatant Command level, in coordination with the Office of the Secretary of Defense, the Joint Staff, and the interagency as appropriate.

Question. In your view, is the situation in Syria a mass atrocity?

Answer. Assad's actions against his own people have harmed civilians and undermined security in Syria and the region, with over two hundred thousand combatant and non-combatants deaths and over four million displaced.

COUNTER THREAT FINANCE

Question. DOD and the Intelligence Community (IC) have begun investing more resources in identifying and tracking the flow of money associated with terrorist networks and illicit trafficking, but the opportunities for tracking and degrading illicit financing flows are not yet matched by the effort and resources devoted to them. Identifying and disrupting key individuals, entities, and facilitation routes enabling the flow of money that supports terrorism, production of IEDs, narco-trafficking, proliferation, and other significant national security threats could have an outsized impact on confronting these threats.

What are your views on the role of DOD in counter threat finance activities?

Answer. Many terrorists, criminal networks, and other adversaries who threaten U.S. strategic interests rely heavily on licit or illicit financial networks to support and sustain their operations. DOD policy is to work with other U.S. government entities and partner nations to effectively deny, disrupt, degrade, and defeat our adversaries' ability to access and utilize financial resources. If confirmed, I will review our level of integration across the interagency and with our foreign and institutional partners with the goal of maximizing cooperation and effectiveness in countering these activities and networks.

Question. Are you aware of any policy, legal authority, or resource shortfalls that may impair U.S. counter threat finance efforts?

Answer. Lack of sufficient insight and fidelity on the sources of corruption in partner nations can hinder our ability to achieve counter threat network goals. Additionally, in non-terrorism cases, there is room for improvement with respect to the full and timely sharing of relevant information between law enforcement and intelligence elements in a timely manner.

Question. In your view, how should the Department of Defense coordinate and interface with other key agencies, including the Department of Treasury and the Intelligence Community, in conducting counter threat finance activities?

Answer. The Department should, and currently does, use its unique capabilities to augment and support the efforts of other U.S. government entities, including the Department of Treasury and the Intelligence Community. The result is a well-coordinated, capable, and robust counter threat finance posture. If confirmed, I will

continue to remain fully engaged in the interagency process to diminish adversary use of both licit and illicit financial networks.

SECTION 1208 OPERATIONS

Question. Section 1208 of the Ronald Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375), as amended by subsequent bills, authorizes the provision of support (including training, funding, and equipment) to regular forces, irregular forces, and individuals supporting or facilitating military operations by U.S. Special Operations Forces to combat terrorism.

What is your current assessment of this authority?

Answer. Section 1208 funding allows the U.S. government to reduce our reliance on unilateral Direct Action operations and increase the role of our foreign partners in combatting terrorism around the globe. It is an effective Advise and Assist program that can be rapidly established to advance U.S. counterterrorism objectives in areas that do not possess the will or capacity to fight terrorism. It can serve as a bridging solution to future programs focused on building partner nation capacity.

ACTIVE-DUTY AND RESERVE COMPONENT END STRENGTH

Question. Last year DOD announced its 5-year plan to reduce active-duty end strengths by over 100,000 servicemembers by 2017 and the reserve components by another 21,000 over the same period. These cuts do not include any additional personnel reductions that could result from sequestration or any agreement to avoid sequestration.

What is your view of the role of the reserve components as the active components draw down?

Answer. As an integral part of our Total Force, the Reserve Components provide much of the operational capability and strategic depth needed to meet our nation's defense requirements. The drawdown of both active-duty and reserve end strength requires us to rebalance some capabilities between the active and reserve components to maintain the force structure required by our National Military Strategy. This balance between components provides us with the agility to meet strategic objectives while managing our current fiscal constraints. I see the Reserve Components as continuing to provide much of the operational capability needed to support current operations while maintaining the strategic depth required in responding to the more demanding global contingencies. Our nation's investment in the Reserve Components has generated a well-trained, fully integrated, and capable force that will continue to fulfill these roles. In addition, we will continue to capitalize upon the broad skills and experience our Reserve Component servicemembers bring to the force from their civilian occupations.

Question. What additional military personnel reductions do you envision if the sequester continues into 2014 and beyond?

Answer. PB16 FYDP manning levels already reflect the maximum acceptable risk in executing our defense strategy. If sequestration continues, we will further reduce total personnel numbers, known as end-strength, consistent with the numbers we have provided since the Strategic Choices Management Review (SCMR) of 2013-2014. These numbers were highlighted by all of the Service Chiefs in their combined testimony to the SASC on January 28, 2015.

Question. In your view, what tools do DOD and the Services need to get down to authorized strengths in the future, and which of these require Congressional authorization?

Answer. The Department and Services' current force management tools provide adequate flexibility to enable the drawdown to authorized Service end strengths, and, at present, the Services do not seek additional authorities in this regard.

RELIGIOUS GUIDELINES

Question. American military personnel routinely deploy to locations around the world where they must engage work effectively with allies and with host-country nationals whose faiths and beliefs may be different than their own. For many other cultures, religious faith is not a purely personal and private matter; it is the foundation of their culture and society. Learning to respect the different faiths and beliefs of others, and to understand how accommodating different views can contribute to a diverse force is, some would argue, an essential skill to operational effectiveness.

In your view, do policies concerning religious accommodation in the military appropriately accommodate the free exercise of religion and other beliefs, including individual expressions of belief, without impinging on those who have different beliefs, including no religious belief?

Answer. Yes. I believe current policies appropriately accommodate the free exercise of religion, including individual expressions of belief, without impinging on those who have different, or no, religious beliefs. Department of Defense policy regarding religious accommodation, set forth in DODI 1300.17, affirms the rights of individuals to express their sincerely held beliefs, whether they be matters of conscience, moral principles, or religious beliefs. The Department of Defense places a high value on the rights of individuals to do so, or not do so. This is held in balance with the need of the Military Departments to maintain military readiness, unit cohesion, and good order and discipline.

Question. Under current law and policy, are individual expressions of belief accommodated so long as they do not impact unit cohesion and good order and discipline?

Answer. Yes. The current policies regarding religious accommodation provide a clear means by which individual expressions of belief, including apparel, grooming and worship practices, can be considered by commanders. Denial of religious accommodation requests may only occur when it furthers a compelling governmental interest and is the least restrictive means of furthering that interest. Unit cohesion and good order and discipline are compelling interests, but they must be preserved in the least restrictive manner that is practicable for mission accomplishment.

Question. In your view, does a military climate that welcomes and respects open and candid discussions about personal religious faith and beliefs in a garrison environment contribute in a positive way to preparing U.S. forces to be effective in overseas assignments? Would a policy that discourages open discussions about personal faith and beliefs be more or less effective at preparing servicemembers to work and operate in a pluralistic environment?

Answer. In my view, a military climate that welcomes and respects open and candid discussion about personal religious faith in garrison can positively prepare U.S. forces to be effective in overseas assignments. In a world that appears to be increasingly committed to expressing religious belief, possessing this skill is necessary to not only understand our adversaries, but also understand our partner nations (consistent with the National Strategy on Integrating Religious Leader and Faith Community Engagement into U.S. Foreign Policy). Any policy that discourages open discussion diminishes our ability to develop these skills. However, there must be clear guidance about the importance of mutual respect and trust.

PREVENTION OF AND RESPONSE TO SEXUAL ASSAULTS

Question. In 2014, there was what the Department described as an “unprecedented 53 percent increase in victim reports of sexual assault. In fiscal year 2014, victims made 4,660 Unrestricted Reports and 1,840 initial Restricted Reports of sexual assault. Also in fiscal year 2014, the Department saw the number of victims who converted Restricted Reports to Unrestricted Reports increase from an average of 15 percent to 20 percent. According to the 2014 RAND Military Workplace Study approximately 72 percent of servicemember victims who indicated they made a sexual assault report said they would make the same decision to make a report if they had to do it over again. The Rand Study also indicated the percentages of active duty personnel who experienced unwanted sexual assault declined in 2014, from 6.1 percent to 4.3 percent for women and from 1.2 percent to 0.9 percent for men. The Department also concluded the estimated gap between reporting and prevalence of sexual assaults was at the narrowest point since the Department began tracking this data.

What is your assessment of the current DOD sexual assault prevention and response program?

Answer. The Department’s response to sexual assault continues to improve, but work remains. The Services have developed a number of reforms and policy changes designed to increase victim confidence and enhance access to victim advocacy and legal support. To reinforce these changes, as the Services have instituted unique training for investigators and prosecutors who handle sexual assault crimes. They have also increased bystander intervention training and sexual assault awareness across the entire force.

Question. What is your view of the provision for restricted and unrestricted reporting of sexual assaults?

Answer. Victim care remains a top priority for the Department. We face the same challenges that society faces in dealing with incidents of sexual assault—balancing care to victims with prosecuting offenders. Unrestricted reporting automatically initiates a criminal investigation. After learning some victims were choosing to forego support services rather than initiate an investigation, the Department offered the restricted reporting option. Offering both forms of reporting provides a means to

protect a victim's privacy while also providing access to medical care and support services.

Question. What is your understanding of the adequacy of DOD oversight of military service implementation of the DOD and service policies for the prevention of and response to sexual assaults?

Answer. The Department has put a considerable amount of effort into the development of policies and procedures designed to address sexual assault. The Sexual Assault Prevention and Response Office provides oversight for sexual assault policy and works with the Services to execute their prevention and response strategic plans. The Joint Chiefs of Staff's partnership with OSD provides the operational perspective to the sexual assault program in support of initiatives to improve oversight and accountability.

Question. What is your view about the role of the chain of command in changing the military culture in which these observed changes in sexual assaults have occurred?

Answer. Establishing an appropriate culture where victims are treated with dignity and respect starts at the top. Commanders are accountable for what happens in their units and they set the leadership tone. Commanders are crucial to our ability to effect institutional change and leaders at all levels must foster a command climate where sexist behavior, sexual harassment and sexual assault are not condoned or ignored.

Question. Surveys report that up to 62 percent of victims who report a sexual assault perceive professional or social retaliation for reporting. If confirmed, what will you do to address the issue of retaliation for reporting a sexual assault?

Answer. First of all, any form of retaliation goes against our core values and has no place in our military. While the latest surveys confirmed that victims perceive retaliation, the data did not provide the depth needed to understand this challenging problem or to develop appropriate solutions to the problem of peer retaliation. If confirmed, I, along with the Joint Chiefs, will continue to support efforts to better define the problem and determine root causes. I will also continue to work to ensure that the joint force culture is one of respect and that retaliation is not tolerated, especially among peers.

Question. Sexual assault is a significantly underreported crime in our society and in the military. If confirmed, what will you do to increase reporting of sexual assaults by military victims?

Answer. In order to increase reporting of sexual assaults by military victims, we must improve victim confidence in our ability to respond to incidents of sexual assault. We must also establish a climate in which victims are treated with dignity and respect, and where any form of retaliation or reprisal is unequivocally unacceptable. If confirmed, I will continue the partnership with OSD to assess current programs and develop initiatives to enhance support services and improve our systems to hold perpetrators appropriately accountable.

Question. In your view, what would be the impact of requiring a judge advocate outside the chain of command, instead of a military commander in the grade of O-6 or above as is currently the Department's policy, to determine whether allegations of sexual assault should be prosecuted?

Answer. I support the Department's current policy. The Uniform Code of Military Justice operates as both a criminal justice system and a critical component of a commander's authority to maintain good order and discipline. I believe our military members and national security will best be served by retaining the military commander's key role in the military justice decision process. While I greatly value the legal analyses and recommendations provided by our highly proficient judge advocates, and fully expect all leaders in the Services to take the greatest advantage of this expertise, I firmly believe the military commander's role is indispensable in the prosecutorial process.

ASSIGNMENT POLICIES FOR WOMEN IN THE MILITARY

Question. As you know, the Department in January rescinded the policy restricting the assignment of women to certain units which have the primary mission of engaging in direct ground combat operations, and has given the military services until January 1, 2016, to open all positions currently closed to women, or to request an exception to policy to keep a position closed beyond that date, an exception that must be approved by the Chairman of the Joint Chiefs of Staff and the Secretary of Defense. The services are working now to develop gender-free physical and mental standards for all military occupations, presumably with the goal of allowing individuals, regardless of gender, to serve in those positions if they can meet those standards.

If confirmed, what role will you play in the development of these standards?

Answer. The Services are in the final stages of validating their standards. In my current capacity, I have been involved in the process. Military Department Secretaries must certify that their standards are gender-neutral and in compliance with all applicable Public Laws by 30 Sept. If confirmed, I will be engaged in the development and implementation of standards that affect joint warfighting.

Question. Will you ensure that the standards will be realistic and will preserve, or enhance, military readiness and mission capability?

Answer. Yes. The Services and USSOCOM worked with various scientific and research agencies to ensure the standards are current, occupationally valid and tied to the operational requirement. Preserving readiness is a key tenant of the guiding principles established in the Jan 2013 memorandum.

Question. Do you believe that decisions to open positions should be based on bona fide military requirements?

Answer. Yes. Decisions to open positions will be based on rigorous analysis of the Services and USSOCOM integration studies and the recommendations of the Secretaries of the Military Departments.

Question. If so, what steps will you take, if confirmed, to ensure that such decisions are made on this basis?

Answer. As the senior military advisor to the Secretary of Defense, I will provide sound advice from a Joint operational perspective to ensure that we preserve unit readiness and maintain the best qualified forces to meet mission requirements.

Question. Some family members have expressed concerns about assigning women to what are currently male-only combat units.

To what extent do you believe that this will be a problem in the implementation of this policy?

Answer. As with any institutional change, we can expect there will be concerns from a variety of sources. I respect the concerns of our military families, but I do not see this as a problem as we implement the policy. Women are already serving in units that provide direct support to combat units.

Question. If it is a problem, what steps would you take if confirmed to address it?

Answer. If confirmed, I will continue to engage with military families our servicemembers to discuss their concerns and explain our policies.

MILITARY HEALTH CARE REFORM AND MODERNIZATION

Question. Congress authorized the Military Compensation and Retirement Modernization Commission in the National Defense Authorization Act for Fiscal Year 2013 to conduct a review of the military compensation and retirement systems and to make recommendations to modernize those systems. The Commission released its report in January 2015.

What is your view of the Commission's findings regarding the military health system?

Answer. I agree with the Commission that DOD needs to continue to improve the military health care system. I also believe the health care reforms proposed in the fiscal year 2016 budget are a good first step and offer servicemembers, retirees, and their families more control and choice over their health care decisions. I'm open to working with Congress to develop additional reform proposals for consideration in the fiscal year 2017 budget.

Question. Do you believe the Department's fiscal year 2016 proposal to consolidate TRICARE adequately addressed the Commission's findings on military health care?

Answer. Yes. The TRICARE proposal in the President's Fiscal Year 2016 budget more effectively achieves the aim of providing family members and retirees with greater choice and control over their healthcare decisions without the risk of an untested, and potentially infeasible, overhaul of the Military Health System. If confirmed, I will work closely with DOD leadership and Congress to ensure the proposal is implemented as efficiently and effectively as possible.

Question. What is your view of the Commission's recommendation to establish a Joint Readiness Command?

Answer. I agree with the Commission's overall objective of protecting medical readiness across the joint force including establishment of essential medical capabilities (EMCs). However, a new, four-star readiness command is not necessary as the Department has sufficient processes and governance structures in-place to identify, track, and measure the readiness status of enterprise wide and Service specific EMCs.

Question. What is your assessment of progress the Defense Health Agency has made to create efficiencies and generate cost savings by combining the medical support functions of the Services?

Answer. The Defense Health Agency (DHA) will reach Full Operational Capability (FOC) on 01 October 2015 and I am told they are on track to meet this goal. Once FOC, DHA will receive a Combat Support Agency Review Team Assessment (CSART) from the Joint Staff NLT 2017 to determine its responsiveness and readiness to support the operating forces.

Question. Do you believe the Defense Health Agency should be replaced with a new combatant command, a Unified Medical Command?

Answer. The Defense Health Agency (DHA) will reach Full Operational Capability (FOC) on 01 October 2015 and I believe it is premature to make a determination if DHA is able to meet its mission. As a Combat Support Agency (CSA), DHA will receive Combat Support Agency Review Team Assessment (CSART) in early 2017 to determine its responsiveness and readiness to support the operating forces. In addition, in my role as the Commandant of the United States Marine Corps, I was directly involved in Department's review of the Military Compensation and Retirement Modernization Commission recommendations. As such, I agree with the Secretary's assessment of not supporting creation of an additional new four-star combatant command for the purpose of ensuring joint medical readiness.

WOUNDED WARRIOR SUPPORT

Question. Servicemembers wounded and injured in combat operations deserve the highest priority from their Service for support services, healing and recuperation, rehabilitation, evaluation for return to duty, successful transition from active duty when appropriate, and continuing support beyond retirement or discharge.

What is your assessment of the progress made by the Department of Defense, the Department of Veterans Affairs, and the Services to improve the care, management, and transition of seriously ill and injured servicemembers and their families?

Answer. DOD, the VA, and the Services have made considerable progress in ensuring the Nation's wounded, ill, and injured recovering servicemembers (RSMs), their families, and caregivers receive the support they need for recovery, rehabilitation, and reintegration. The NDAA for fiscal year 2008 directed DOD to improve the care, management, and transition of recovering servicemembers. It established the office now known as Warrior Care Policy (WCP) to develop policies for the Department and provide the oversight of those policies to ensure proper execution and outcomes. The policy and oversight areas for WCP include the Recovery Coordination Program, the Integrated Disability Evaluation System, the Military Adaptive Sports Program, Operation Warfighter, the Education and Employment Initiative, and the Caregiver Support Program.

The Department continuously evaluates our wounded warrior and caregiver programs, and implements improvements. We are incorporating lessons-learned and best practices to update policies and programs to improve support for RSM and their families.

Question. If confirmed, are there additional strategies and resources that you would pursue to increase support for wounded servicemembers and their families, and to monitor their progress in returning to duty or to civilian life?

Answer. The recovery care coordinators are a crucial resource for Wounded Warriors and their families, and we must continue to fund and evaluate the effectiveness of this resource over time. The Joint Staff conducted a thorough review of the Service's policies and procedures related to returning our Wounded Warriors to service, and found that all Services were operating within OSD guidance. We provided constructive feedback to OSD which will allow the Services to retain flexibility to develop programs unique for their Service needs and culture, while also providing guidance that better supports Wounded Warriors. This guidance provides clarity on how to navigate the "reassignment and retraining" process if they desire (and qualify for) continued service. If confirmed, I am committed to continued improvement on our efforts and results with regards to the care and support of our Wounded Warriors and their families.

Question. What is your assessment of the need to make further improvements in the Integrated Disability Evaluation System?

Answer. The Department continuously evaluates IDES to identify improvements. DOD has implemented several actions that have resulted in the IDES reaching a critical milestone in timeliness and overall servicemember satisfaction. As of May 2015, Active Component case timeliness averaged 223 days against a 295-day goal, Reserve Component timeliness averaged 298 days against a 305-day goal, and 87 percent of servicemembers expressed overall satisfaction with the IDES process. If

confirmed, I will ensure my staff and I support improvements to the Disability Evaluation Process that benefit both our servicemembers and the Department.

SUICIDE PREVENTION AND MENTAL HEALTH RESOURCES

Question. The numbers of suicides in each of the Services continues to concern the Committee.

In your view, what role should the Joint Chiefs of Staff play in shaping policies to help prevent suicides both in garrison and in theater and to increase the resiliency of all servicemembers and their families, including members of the reserve components?

Answer. Suicide prevention is an important responsibility I share with the Service Secretaries and Service Chiefs. We have joined forces with agencies across DOD and Interagency, the White House and civilian sector to better understand the factors leading to suicide and refine our prevention programs. As leaders, we have the responsibility to not only seek to build strong and resilient individuals, but also to grow strong and resilient organizations.

Question. If confirmed, what actions will you take to ensure that sufficient mental health resources are available to servicemembers in theater, and to the servicemembers and their families upon return to home station?

Answer. Adequate mental health staffing must remain a priority to ensure the highest delivery of mental health services. I support several initiatives underway to improve access to mental health care, increased provider availability, and more effective recruitment and retention of mental health providers. The continued embedding of Mental Health personnel across the deployed force is critical with required in-theater periodic mental health assessments. These initiatives in conjunction with the cooperative efforts underway between the VA and DOD work to ensure continuity of mental health care for deployed and returning servicemembers. It is imperative that these efforts continue to address the long-term mental health needs of servicemembers and their families.

MILITARY QUALITY OF LIFE

Question. The Committee is concerned about the sustainment of key quality of life programs for military families, such as family support, child care, education, employment support, health care, and morale, welfare and recreation services, especially as DOD faces budget challenges.

If confirmed, what further enhancements, if any, to military quality of life programs would you consider a priority in an era of intense downward pressure on budgets?

Answer. I don't have any recommendations for enhancement at this time. If confirmed, I will continue to engage in the maintenance and development of effective quality of life programs.

FAMILY READINESS AND SUPPORT

Question. Military members and their families in both the active and reserve components have made, and continue to make, tremendous sacrifices in support of operational deployments. Senior military leaders have warned of growing concerns among military families as a result of the stress of frequent deployments and the long separations that go with them.

What do you consider to be the most important family readiness issues for servicemembers and their families?

Answer. Every family has unique needs, requiring a flexible and responsive network of services to deliver support at the right time, using the most effective methods. From pay and benefits, to deployment forecasting to wellness plans, military families have valid concerns that should be addressed. Our research indicates that military families are most concerned about pay and benefits, including retirement. Other critically important issues are health care, education, and housing.

Question. How would you address these family readiness needs in light of global rebasing, deployments, and future reductions in end strength?

Answer. If confirmed I will continue to work with the Services to meet the changing needs of our military families. Community-based partnerships will be key to improve education, employment, and wellness support for current and transitioning members. The Services have also adjusted force size and rotation, redoubled transition support, and invested in world-class health care for our wounded. Family support programs that are flexible, responsive, and communicate and coordinate with interagency and non-governmental family services are critical to meet the enduring needs of our servicemembers and their families, whether they live on, near, or far from military installations. Working together with the Services, we can find effi-

ciencies and enhance the accessibility of support when and where it is needed and at the right level.

I remain committed to building and retaining ready, resilient servicemembers and families. Readiness/retention efforts must look beyond reactive financial incentives to emphasize total servicemember and family wellness.

Question. If confirmed, how would you ensure support is provided to reserve component families related to mobilization, deployment and family readiness, as well as to active duty families who do not reside near a military installation?

Answer. We must continue outreach, education, awareness, and engagement strategies to promote servicemember and family readiness programs within the Reserve Component. Since 2008, the Yellow Ribbon Reintegration Program has led our support efforts with this population, providing access to deployment cycle information, resources, programs, services, and referrals to more than 1.53 million servicemembers and their families. The Yellow Ribbon Reintegration Program eases transitions for servicemembers and families as they move between their military and civilian roles. Our geographically diverse populations are also supported by Department of Defense Military One Source Consultants that works to build capacity to identify and meet evolving needs at the local community level. To augment and enable that local support, Military OneSource provides support to military families, military leadership, and military and civilian service providers through delivery of information, referrals, specialty consultations and non-medical counseling.

OPERATIONAL ENERGY BUDGETING

Question. Since Congress created the Office of the Assistant Secretary of Defense for Operational Energy Plans and Programs, much progress has been made in a few short years in these programs.

In what specific areas, if any, do you believe the Department needs to improve the incorporation of energy considerations into the strategic planning and force development processes?

Answer. The Joint Staff and Combatant Commands will continue to analyze, evaluate, and assess where increased energy demand necessary for improved combat capabilities intersects with operational energy and energy security constraints or vulnerabilities. We will further refine and improve plans, strategy, procurement, force development and policies regarding energy considerations as it relates to mission success.

Question. In what specific areas, if any, do you believe the Department should increase funding for operational energy requirements, energy efficiency, alternative energy, and renewable energy opportunities?

Answer. I am mindful of our need to increase military capability, reduce risk, and mitigate operational costs through our use and management of energy. As a result, I believe that we should make additional investments to increasing both operational effectiveness and efficiency. This will be accomplished by improving the energy performance of aircraft, ships, ground vehicles, and military bases, reducing the vulnerability of our energy supply chains, and diversifying the kinds of energy accessible to our combatant commanders. Additional funding applied towards alternative energy solutions for contingency operations would be particularly welcomed given ongoing and anticipated operational requirements.

UNITED NATIONS CONVENTION ON THE LAW OF THE SEA

Question. Officials of the Department of Defense, including previous Chairmen of the Joint Chiefs of Staff, have advocated for accession to the Law of the Sea Convention.

Do you support United States accession to the United Nations Convention on the Law of the Sea?

Answer. I support accession to the Convention. Being a party to the Convention enhances the United States' security posture by reinforcing freedom of the seas and rights vital to ensuring our global force posture. The Convention provides legal certainty in the world's largest maneuver space. Access would strengthen the legal foundation for our ability to transit through international straits and archipelagic waters; preserve our right to conduct military activities in other countries' Exclusive Economic Zones (EEZs) without notice or permission; reaffirm the sovereign immunity of warships; provide a framework to counter excessive maritime claims; and preserve or operations and intelligence-collection activities. Joining the Convention would also demonstrate our commitment to the rule of law, strengthen our credibility among those nations that are already party to the Convention, and allow us to bring the full force of our influence in challenging excessive maritime claims. Fi-

nally, it would secure for us a leadership role in shaping and influencing future maritime developments.

Question. How would you respond to critics of the Convention who assert that accession is not in the national security interests of the United States?

Answer. There are significant national security impacts from failing to join the Convention. By remaining outside the Convention, the United States remains in scarce company with Iran, Venezuela, North Korea, and Syria, and foregoes the most effective way to counter undesirable changes in the law or to exercise international leadership. By not acceding to UNCLOS we deny ourselves the ability to challenge changes to international law as a result of the practice of nations at the local, regional, or global level. As some states seek to interpret treaty provisions in a manner that restricts freedom of navigation, U.S. reliance on customary international law as the legal foundation for our military activities in the maritime becomes far more vulnerable and needlessly places our forces in a more tenuous position during operations. Moreover, by failing to join the Convention, some countries may come to doubt our commitment to act in accordance with international law.

Question. In your view, what impact, if any, would U.S. accession to the Law of the Sea Convention have on ongoing and emerging maritime disputes such as in the South China Sea and in the Arctic?

Answer. Acceding to the Convention would strengthen our credibility and strategic position on issues pertaining to these regions. While we do not take sides in the various territorial disputes in the South China Sea, we do have a national security interest in ensuring disputes are resolved peacefully, countries adhere to the rule of law, and all nations fully respect freedom of the seas. However, we undermine our leverage by not signing up to the same rule book by which we are asking other countries to accept. As for the Arctic, the other Arctic coastal nations (Russia, Canada, Norway and Denmark (Greenland)) understand the importance of the Convention and are in the process of utilizing the Convention's procedures to establish the outer limits of their extended continental shelves (ECS) in the Arctic. The United States has a significant ECS in the Arctic Ocean, but cannot avail itself of the Convention's mechanisms to gain international recognition of its ECS. We must put our rights on a treaty footing and more fully and effectively interact with the other seven Arctic Council nations who are parties to the Convention.

DETAINEE TREATMENT POLICY

Question. Recent Department of Defense operations in Iraq and Syria highlight the need for a continued detention capability for both interrogation and law of war detention.

What recommendations do you have for ensuring that the Department of Defense maintains sufficient detention capabilities for capture operations against ISIL and other affiliated terrorist groups to remain a viable option?

Answer. The United States needs a viable detention capability to support our counterterrorism strategy. If confirmed, I will work with civilian and military leadership to ensure our commanders on the ground have the capability to lawfully detain as part of capture operations.

Question. Do you support the policy set forth in the July 7, 2006, memorandum issued by the Deputy Secretary of Defense stating that all relevant DOD directives, regulations, policies, practices, and procedures must fully comply with Common Article 3 of the Geneva Conventions?

Answer. Yes.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2-22.3, issued in September 2006, and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated August 19, 2014?

Answer. Yes.

Question. If confirmed, will you ensure that all DOD policies promulgated and plans implemented related to intelligence interrogations, detainee debriefings, and tactical questioning comply with the Common Article 3 of the Geneva Conventions and the Army Field Manual on Interrogations?

Answer. Yes.

Question. Do you share the view that standards for detainee treatment must be based on the principle of reciprocity, that is, that we must always keep in mind the risk that the manner in which we treat our own detainees may have a direct impact on the manner in which U.S. Soldiers, Sailors, Airmen or Marines are treated, should they be captured in future conflicts?

Answer. Yes.

OFFSET TECHNOLOGIES

Question. During the Cold War, the DOD pursued three key technologies to offset the numerical superiority of Soviet conventional forces: precision guided munitions, stealth technology, and satellite-based navigation. These three technologies have given U.S. forces unparalleled superiority until now. However, with advancements by our emerging adversaries, it seems like the military technological superiority is beginning to erode. As a result, it is critical that the United States once again focus on offsetting the technology advantages being gained by our adversaries.

Which technology priorities do you believe the Department of Defense should be pursuing to maintain the military technological superiority of the United States?

Answer. To offset advances in anti-access and area-denial weapons and other advanced technologies that are proliferating around the world, the Department will identify, develop, and field breakthroughs in cutting-edge technologies and systems—especially from the field of robotics, autonomous systems, miniaturization, big data, and additive manufacturing.

Question. What strategies would you recommend that Secretary Carter implement to develop these technology priorities?

Answer. I strongly support Secretary Carter's vision and strategy as captured in the Defense Innovation Initiative. This multi-faceted effort recognizes that more than just developing new technology priorities is required, and acts as the organizing and integrating construct weaving cutting-edge technology recommendations developed by our long-range research and development planning program into new innovative operational concepts. We must also make sure that our investments in operational concepts and human capital proceed apace with our efforts to pursue innovative solutions through technological means. Our greatest asset will remain our servicemembers.

Question. What role do the services have to play in their development?

Answer. The Services will have a key role, as part of the Defense Innovation Initiative team and as the Department's primary organizations for developing and acquiring weapons systems. The Services identify combinations of new and existing technologies that are necessary to project power globally, and to prevent the erosion of our technological superiority in other areas. Ultimately, the Services integrate technology, training, and operational concepts to produce capabilities and generate fielded forces for the combatant commanders.

SCIENCE AND TECHNOLOGY

Question. One of the main objectives of the defense research enterprise is to develop advanced technologies that will be of benefit to the warfighter. In this regard, it is critical that advancements quickly transition from the development phase into testing and evaluation and ultimately into a procurement program for the warfighter.

What are some of the challenges you see in transitioning technologies effectively from research programs into programs of records?

Answer. There are three challenges that I see in transitioning technologies effectively into programs of record. The first is establishing a compelling case and the necessary "head-room" in the budget. The second is maintaining momentum in the program and budgeting process given the competing and evolving strategic demands placed on the U.S. military. The third is achieving the promise of the research technology in a timely manner at a reasonable cost.

Question. As the Chairman of the Joint Chiefs of Staff, what steps will you take to ensure that the services are benefitting more quickly and directly from the research being performed by the defense research enterprise?

Answer. As the primary advocate for warfighter requirements, I will ensure that the resourcing and acquisition processes are well-informed on the priority and timing of capability needs. I will also continue to use the Chairman's Gap Assessment and the Chairman's Program Recommendation to communicate directly to Secretary Carter my thoughts on promising research being performed by the research enterprise.

Question. Do you feel that defense technologies and systems, especially in areas such as mobile communications, computing, and robotics, are keeping pace with global and commercial technological advances? If not, what do you suggest that the Department do to keep up with the pace of global technological change?

Answer. I believe the Department is challenged keeping pace with global and commercial technology advances. The Secretary's Defense Innovation Initiative is focusing the Department on maintaining our military's technological edge in an increasingly competitive technology environment.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this Committee and other appropriate committees of the Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this Committee and other appropriate committees of the Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the Administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this Committee, or designated members of this Committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as Chairman of the Joint Chiefs of Staff?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this Committee and its staff and other appropriate Committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted Committee, or to consult with the Committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR JAMES M. INHOFE

FORCE STRUCTURE AND DETERRENCE

1. Senator INHOFE. General Dunford, does our military have the force structure, training and equipment to meet requirements in the National Military Strategy?

General DUNFORD. My initial assessment is yes. However, if Budget Control Act level cuts return, we will need to reassess our ability to execute the strategy with an acceptable level of risk

2. Senator INHOFE. General Dunford, in your opinion, why is the United States being challenged around the globe?

General DUNFORD. The United States is being challenged because our comparative military and technological advantages over adversaries are eroding. Moreover, the pace and diffusion of technology advancement makes it easier for both state and non-state actors to challenge us.

3. Senator INHOFE. General Dunford, does our military have the capability and credibility to deter aggression around the globe?

General DUNFORD. Yes. I believe the Services have maintained our military capabilities to provide credible deterrence against potential aggressors across the globe. However, the capabilities of potential aggressors are expanding and modernizing. We need to update our deterrence model for emerging threats, which are more asymmetric and hybrid in nature. We must now focus on resetting and reconstituting capabilities that have degraded over the past fifteen years, while also incorporating new capabilities so we can continue to provide a credible deterrent.

4. Senator INHOFE. General Dunford, do you believe our potential adversaries have that perception?

General DUNFORD. Yes, I do, although it is certainly difficult to know exactly how potential adversaries view our capabilities and credibility. As we develop an effective deterrence model, understanding and shaping the perceptions of adversaries about our capabilities and credibility must be a major component.

AFGHANISTAN AND IRAQ

5. Senator INHOFE. General Dunford, are their benchmarks established to determine if conditions on the ground dictate the time and level of a withdrawal of U.S. forces?

General DUNFORD. Yes, in Afghanistan we continually validate our assumptions and assess the conditions on the ground using eight “Essential Functions” as our benchmark and the overall security environment with the country and within the year. These functions identify the areas where Coalition efforts support the Afghan security institutions to more effectively enable Afghan National Defense and Security Forces. Over time, ANDSF will require less U.S. participation to train, advise, and assist Afghan security institutions as they build sustainable capabilities.

If security conditions on the ground in Afghanistan degrade against these benchmarks, I will continue to reassess the size and pace of the drawdown plan and provide my best military advice to the President and the Secretary of Defense.

If confirmed, I will visit Afghanistan to make an assessment of our current progress. That visit will inform any recommendations I may make for changes to our strategy.

6. Senator INHOFE. General Dunford, how do we avoid the same mistake we made in Iraq?

General DUNFORD. Iraq demonstrated that decisions about the drawdown and post-combat operations in Afghanistan should be based on conditions on the ground, with the flexibility to make adjustments as those conditions evolve. In addition, the drawdown from Iraq shows that whole-of-government cooperation is required to sustain security gains. U.S. forces can mitigate the effects of security threats that are fueled by underlying political or sectarian problems, but ultimately, it is critical that we have credible and capable local partners and an enduring political solution.

ARMING THE KURDS

7. Senator INHOFE. General Dunford, if confirmed, will you take steps to ensure the Kurds receive weapons and equipment they need to fight ISIL?

General DUNFORD. Yes.

8. Senator INHOFE. General Dunford, will you also look into the process used to approve which weapons are giving to the Kurds and report back to this committee any issues with the process, recommendations on how to improve the process, and status of the Kurds receiving the equipment they need to fight ISIL?

General DUNFORD. Yes.

TAIWAN

9. Senator INHOFE. General Dunford, the Taiwan Relations Act and the “Six Assurances” affirm our commitment to maintain Taiwan’s self-defense capability. What is your view towards this longstanding policy?

General DUNFORD. Consistent with the Taiwan Relations Act, the U.S. remains firmly committed to make available to Taiwan such defense articles and services in such quantity as may be necessary to enable Taiwan to maintain a sufficient self-defense capability. It has been over 35 years since the TRA was enacted, and we will continue to support Taiwan through the robust unofficial relationship contemplated in the TRA. We oppose any unilateral changes to the status quo on either side of the Strait, and we support peaceful resolution of cross-Strait differences in a manner acceptable on both sides.

10. Senator INHOFE. General Dunford, what do you believe are the priorities for U.S. military assistance to Taiwan?

General DUNFORD. The priority for U.S. military assistance to Taiwan is to provide defensive systems and capabilities in order for Taiwan to maintain a sufficient self-defense capacity. This long-standing policy contributes to the maintenance of peace and stability across the Taiwan Strait by providing Taiwan with the confidence to pursue constructive interactions with the PRC.

11. Senator INHOFE. General Dunford, due to Taiwan’s geo-strategic position and close bilateral cooperation, Taiwan can potentially play an important role in our rebalance to Asia strategy. Do you plan to help improve Taiwan’s asymmetric capability to deter potential threats from the PRC?

General DUNFORD. The U.S. conducts robust security cooperation with Taiwan, and both sides carefully examine Taiwan’s defense needs. Cost-effective, asymmetric capabilities are important for Taiwan to maintain a sufficient self-defense capability.

12. Senator INHOFE. General Dunford, do you believe Taiwan should be invited to participate in regional maritime security and humanitarian assistance/disaster relief operations?

General DUNFORD. The U.S. military has deepened and expanded its cooperation with Taiwan's military in recent years and HA/DR is one of many important areas in which this has occurred. Going forward, we will continue to evaluate every opportunity for Taiwan's participation, based on specific training objectives.

QUESTIONS SUBMITTED BY SENATOR RODGER F. WICKER

RUSSIA AND EASTERN EUROPE

13. Senator WICKER. General Dunford, last week I met with President Poroshenko in Kyiv. While he is grateful for the \$300 million in military assistance authorized in our Senate-passed National Defense Authorization Act (NDAA), Poroshenko told me that Ukraine urgently needs Javelin anti-tank missiles to counter Russian advances in the East. Would you agree with me that the United States not providing defensive arms to Ukraine could send a message to Putin about a lack of resolve on Ukraine from the administration?

General DUNFORD. The U.S. is delivering substantial security assistance and training, which demonstrates resolve. Defense institution building is essential. From a purely military perspective, enhancing Ukraine's capabilities to deal with Russian aggression would help Ukraine protect its sovereignty.

14. Senator WICKER. General Dunford, would you also agree that it's outrageous that this month's transfer of 100 armored Humvees to the Ukrainians took over one year to process due to bureaucratic delays at DOD and State?

General DUNFORD. We must improve our processes and increase efficiency. In this case, the White House announced approval of the transfer of 30 armored and up to 200 unarmored HMMWVs to Ukraine on 11 March 2015. Ukraine took delivery of 30 armored HMMWVs later that month and 100 unarmored HMMWVs on 16 July 2015. One hundred additional unarmored HMMWVs will be delivered based on Ukraine's schedule. These are provided as Excess of Defense Articles which means the country determines the number, and pays for delivery and any refurbishment.

15. Senator WICKER. General Dunford, earlier this year, former national security advisor Zbigniew Brzezinski proposed to this committee the creation of a "tripwire" in the Baltics that communicates clearly to Russia that NATO—in particular, the United States—will not tolerate violations of the territorial integrity of our allies. Can you highlight to this committee the steps the Department of Defense (DOD) should take to send a credible message to Russia about our red-lines in Eastern Europe?

General DUNFORD. We must continue to take actions to deter Russian aggression and remain alert to its strategic capabilities. Most importantly, we must also help our allies and partners resist and defend against Russian coercion now, and over the long term. I will continue to emphasize a package of security cooperation, rotational presence, and deterrence measures. These measures will further affirm alliance intent and capability to deter and defeat asymmetric threats. I will continue to evaluate current measures and recommend or make appropriate adjustments.

16. Senator WICKER. General Dunford, for too long, Europe has relied on the American taxpayer for their security. According to NATO guidelines, member countries should spend at least 2 percent of their gross domestic product (GDP) on defense. Only four countries spent that much in 2013—Estonia, Greece, the United States, and the United Kingdom. Given the fragility of the economies of many European states, how would you engage and encourage our NATO allies to live up to their commitments to invest in their militaries?

General DUNFORD. If confirmed, I would encourage my Allied counterparts to invest in specific capabilities that address both the Alliance needs and support to their nations' defense modernization efforts.

SEQUESTRATION

17. Senator WICKER. General Dunford, in fiscal year 2013, the Navy implemented numerous cuts in response to sequestration. This included cancellation of five ship deployments and the delayed deployment of a carrier strike group to the Middle East. Since 2013, we've witnessed the rise of ISIL, the deteriorating situation in Yemen, Russia's aggression in Eastern Europe, and a belligerent North Korea. The

world is more dangerous today than it was in 2013. What is your view on how sequestration would threaten DOD's ability to decisively project power abroad?

General DUNFORD. Funding to sequester levels removes flexibility to respond to emergent challenges while maintaining our forward presence to deter threats sequestration will require that we develop a new strategy. If sequester continues, our military will be forced to make cuts with deep and enduring consequences. These consequences include limiting combat power, limiting decisive power projection abroad, reducing the size of our military units and further reducing readiness. We will incur significant risk to mission and risk to force. Our ability to maintain present commitments to allies and partners will be degraded.

18. Senator WICKER. General Dunford, what is your assessment of the impact sequestration would have on our amphibious forces and DOD's ability to execute DOD's pivot to Asia?

General DUNFORD. A return to sequestration would necessitate a revision of the Defense Strategic Guidance and the Quadrennial Defense Review. It would also compel me to revise the national military strategy. Funding cuts would force us to further delay or cancel critical warfighting capabilities to amphibious capabilities include amph reduce readiness of forces needed for steady-state and contingency response operations, and further degrade warfighting capacity and capability. Sequestration presents serious risk to executing the military aspects of the rebalance to the Asia-Pacific and supporting our contributions to other aspects of the rebalance. Sequestration level cuts would compel us to re-evaluate our Asia Pacific rebalance in a way that emphasizes budgets above national interests, regional goals, and military missions.

19. Senator WICKER. General Dunford, certain sectors of the defense industry—such as shipbuilding—are extremely capital intensive. Our fiscally constrained environment threatens to close production lines that would take years to restart. Given your prior experience Commandant of the Marine Corps, what is your assessment of the risks to DOD industrial base given our current budget environment?

General DUNFORD. The current budget environment creates significant risk to the industrial base. The volatility and unpredictability affects the quality of the workforce and creates inefficiencies for industry that ultimately affect our buying power.

QUESTIONS SUBMITTED BY SENATOR DAN SULLIVAN

U.S. ARMY FORCE STRUCTURE ADJUSTMENTS (FISCAL YEARS 2016–2017):

20. Senator SULLIVAN. General Dunford, in your personal opinion, do U.S. Army Force structure reductions in Alaska make strategic sense, especially given an increasingly aggressive Russia and China, an unpredictable North Korea, and the need to reassure our Arctic and Pacific allies against these threats?

General DUNFORD. The department faces numerous pressing challenges across the globe, to include the Arctic and Pacific. Force structure decisions are informed by strategy, but intrinsically tied to fiscal realities. As a result of the current fiscal environment, the Department has been forced to make difficult choices that affect our force posture. The Army force structure reduction in Alaska were made in that context.

21. Senator SULLIVAN. General Dunford, in your personal opinion, should the U.S. Army reduce the ONLY ABCT in the Pacific AOR and does doing so hurt the credibility of—or entirely undermine—the Obama administration's strategic rebalance to the Asia-Pacific Region?

General DUNFORD. The Army has been constrained by the requirement to reduce overall force structure. The reduction of the ABCT in Alaska is part of their solution to that requirement. To mitigate, they have reorganized in order to effectively meet PACOM requirements with sufficient capabilities on a smaller scale.

22. Senator SULLIVAN. General Dunford, do these large Army reductions in the Asia-Pacific area of responsibility (AOR) make the Rebalance more rhetoric than substance?

General DUNFORD. The Army has reorganized in light of force reductions to effectively meet PACOM requirements with sufficient capabilities on a smaller scale. The reductions do not affect the level of U.S. engagement in the Pacific AOR. The Rebalance is about more than force structure: it includes an increased footprint, expanded agreements, enhanced partnerships, and economic development in the region. These

factors, combined with the sustainment of capabilities necessary to meet PACOM requirements, ensure a substantive effort.

23. Senator SULLIVAN. General Dunford, in your personal opinion, what alternatives should the U.S. Army have considered, as opposed to reducing strategically-important forces in Alaska and Hawaii?

General DUNFORD. The Army states that they considered all possible options to retain its warfighting capability with a trained and modern force. The reductions are designed to maintain the proper balance between force structure, readiness, and modernization. The Army's stationing plans are designed to leverage existing installation capabilities, minimize future construction costs, and posture the force to support the defense strategy.

24. Senator SULLIVAN. General Dunford, what is the exact number of soldiers that will be reduced in Alaska and can you provide an installation-specific profile of how many soldiers will be reduced from each installation and how many soldiers will remain following the reductions?

General DUNFORD. I understand that the Army is planning to reduce 2,704 soldiers in Alaska. Fort Wainwright will be reduced by 73 soldiers and maintain authorization for 6,223. Joint Base Elmendorf-Richardson will be reduced by 2,631 and maintain authorization for 1,895 soldiers. I will continually look across the Joint Force to ensure each service is best postured to support combatant commands in the present, while simultaneously equipping and training to counter future threats.

25. Senator SULLIVAN. General Dunford, specifically, what elements of are being reduced in Alaska and specifically what elements are being kept?

General DUNFORD. I understand the Army plans to reduce the 4th Brigade Combat Team, 25th Infantry Division at Joint Base Elmendorf-Richardson to an infantry battalion task force and maintain a Striker Brigade Combat Team at Fort Wainwright.

26. Senator SULLIVAN. General Dunford, what are the exact dates that these reductions in Alaska officially begin and end?

General DUNFORD. Reductions are scheduled to be complete by the end of fiscal year 2017.

27. Senator SULLIVAN. General Dunford, what specific cost/strategic factors did the United States use to make this decision and can you provide all of that information to me?

General DUNFORD. It is my understanding the Army used a comprehensive analysis of mission requirements and installation capabilities that included public participation. Total Army Analysis, Focus Area Review Groups and Military Value Analysis were used to determine necessary reductions. For specific details, I defer to the Chief of Staff of the Army.

28. Senator SULLIVAN. General Dunford, what will be the remaining combat elements of the 4-25 ABCT, what missions will they be capable of, and what missions will they no longer be capable of?

General DUNFORD. The 4-25 ABCT will become an infantry battalion task force, which includes engineer, field artillery, and support elements. This task force will allow USARPAC to retain an airborne capability for rapid deployment.

29. Senator SULLIVAN. General Dunford, in terms of threats in the region and the AOR, including North Korea, China, and Russia, what are the specific risks that the U.S. Army is assuming in relation to each of these threats, and in your personal opinion, is the U.S. Army accepting too much risk?

General DUNFORD. Any assessment of military risk must include analysis of all Joint Force capabilities. However, as long as we do not return to BCA-level funding, the Army assesses that it will have the necessary force structure to counter these regional threats. The Army used extensive analysis including Total Army Analysis (TAA) and Military Value Analysis (MVA) as well as COCOM component input to arrive at a force structure to best posture a smaller Army to fulfill strategic requirements and world-wide operational demands.

30. Senator SULLIVAN. General Dunford, if confirmed, would you want to have a say in the highly strategic force structure decisions of each Service? Do you believe the Chairman of the Joint Chiefs of Staff (CJCS) should have a say and did the cur-

rent CJCS—or the Secretary of Defense (SECDEF)—weigh into this recent Army decision?

General DUNFORD. In accordance with Title 10, I will advise the Secretary on the extent to which Service program recommendations and budget proposals conform with the priorities established in strategic plans and with the priorities established for the requirements of the combatant commands. In addition, if in my judgment these priorities and requirements are not being met, I will provide alternative program recommendations.

31. Senator SULLIVAN. General Dunford, in your personal opinion, given what the Russians are doing and the importance of the Rebalance, shouldn't both the SECDEF and the CJCS weigh into decisions like this one, which involve key national security priorities?

General DUNFORD. In accordance with Title 10, I will advise the Secretary on the extent to which Service program recommendations and budget proposals conform with the priorities established in strategic plans and with the priorities established for the requirements of the combatant commands. In addition, if in my judgment these priorities and requirements are not being met, I will provide alternative program recommendations.

32. Senator SULLIVAN. General Dunford, if confirmed, would you advise the SECDEF to have input in force structure decisions that affect our national security, like those in the Arctic?

General DUNFORD. Yes. In accordance with Title 10, I will advise the Secretary on the extent to which Service program recommendations and budget proposals conform with the priorities established in strategic plans and with the priorities established for the requirements of the combatant commands. In addition, if in my judgment these priorities and requirements are not being met, I will provide alternative program recommendations.

33. Senator SULLIVAN. General Dunford, in your personal opinion, are the U.S. Army's reductions in fiscal year 2016 and fiscal year 2017 more driven by Sequestration or the 2014 Quadrennial Defense Review (QDR)?

General DUNFORD. The Army's reduction to 980,000 Soldiers (450,000 Active, 335,000 National Guard, and 195,000 Reserve) reflects their assessment of the minimum force necessary to execute the defense strategy as outlined in the 2014 QDR that end strength was informal by the resources available. Should fiscal year 2016 be funded at BCA sequestration levels, programmatic decisions will be driven by sequestration, which, as you know, is a fiscal topline not based on strategy. At sequestration funding levels, as stated in the QDR, Army end strength would go down to:

- (1) Active duty end strength, 420,000;
- (2) Army National Guard, 315,000;
- (3) Army Reserves, 185,000.

34. General Dunford, in the U.S. Army's decision, what, if any, thought was given to the recent actions of President Putin and the Russians in the Arctic and how heavily were his recent aggressive actions weighed?

General DUNFORD. I will defer to the Chief of Staff of the Army for specifics on how Russian activities weighed into the decisions. If confirmed, I will work with leaders to maintain a full range of options to protect our interests in the Arctic. Any future force structure reductions or realignments will be evaluated against the ever-evolving security environment to ensure we consistently meet our global defense responsibilities.

35. Senator SULLIVAN. General Dunford, recently, General Brooks, U.S. Army Pacific (USARPAC) alluded that he could respond to contingencies in the South China Sea, specifically at Fire Cross Reef, utilizing the 4–25 ABCT and could do so “to-night.” Following these reductions, would this still be a true statement?

General DUNFORD. I am not familiar with General Brooks' specific comments. However if confirmed as Chairman, I will continually look across the Joint Force to ensure each service is best postured to support Combatant Commands in the present, while simultaneously equipping and training to counter future threats.

36. Senator SULLIVAN. General Dunford, how do these reductions in Alaska impact the response to a Korean Peninsula contingency and what specifically is that impact?

General DUNFORD. Although this action may change the sourcing allocation for our plans, we have the necessary forces and capabilities to respond to a treat on the Korean Peninsula.

37. Senator SULLIVAN. General Dunford, how do these reductions in Alaska impact the Army's ability to quickly respond to contingencies in the Arctic?

General DUNFORD. The Armed Forces possess sufficient capabilities to respond to a wide-range of contingencies across the globe, including the Arctic. U.S. Northern Command and U.S. European Command, as the combatant commands with geographic responsibility for the Arctic region, are continually assessing the security environment to ensure we can meet assigned or potential missions.

38. Senator SULLIVAN. General Dunford, how much excess facility capacity will Fort Richardson have after the 4-25 ABCT is reduced and specifically what excess facilities will those be?

General DUNFORD. This analysis is ongoing and will incorporate a number of strategic factors. When complete, the final force structure results will inform the amount of excess infrastructure capacity generated. As part of a Joint Base, the force structure decision calculus is conducted by the Army while the Air Force, as the lead Service for Joint Base Elmendorf-Richardson, will make the facility decisions.

39. Senator SULLIVAN. General Dunford, will the reduction of the 4-25 negatively affect the DOD/VA Joint venture hospital on Joint Base Elmendorf-Richardson (JBER)?

General DUNFORD. The withdrawal of the U.S. Army's 4th Brigade, 25th Infantry Division will not affect the DOD/VA joint venture hospital at Joint Base Elmendorf-Richardson. The reduction in active duty forces and families should increase the hospital's available capacity, enabling more Veterans to receive medical care at the medical facility.

40. Senator SULLIVAN. General Dunford, how much input did U.S. Pacific Command (PACOM) have in the U.S. Army's decision to reduce forces in Alaska and Hawaii and what specifically was that input and how heavily was it weighed?

General DUNFORD. It is my understanding that USPACOM was represented by U.S. Army Pacific (USARPAC) throughout the process that determined the recently announced Army Force structure decisions.

41. Senator SULLIVAN. General Dunford, how much input did U.S. European Command (EUCOM) have in the U.S. Army's decision to reduce forces in Alaska and what specifically was that input?

General DUNFORD. EUCOM, as represented by USAREUR, participated in the Army's comprehensive process that facilitated the recent force structure decisions. Their input, like that of every other geographic combatant command, helped inform a decision to best posture a smaller Army to fulfill strategic priorities, including the Asia-Pacific rebalance and world-wide operational demands.

42. Senator SULLIVAN. General Dunford, I have been told that the final decision to reduce forces in Alaska and Hawaii came down to tradeoff between those forces and the 173rd Airborne Brigade Combat Team in Vicenza, Italy. Is this accurate, and if so, specifically what strategic considerations (location, deterrence, proximity to threats, access to nearby or organic lift, and capabilities) went to making this decision?

General DUNFORD. I do not have insight at this level of detail about the force structure decisions of the other services. I defer to Chief of Staff of the Army.

43. Senator SULLIVAN. General Dunford, how much input did U.S. Northern Command (NORTHCOM) have in the U.S. Army's decision to reduce forces in Alaska and what specifically was that input?

General DUNFORD. NORTHCOM, as represented by ARNORTH, participated in the Army's comprehensive process that facilitated the recent force structure decisions. Their input, like that of every other geographic combatant command, helped inform a decision to best posture a smaller Army to fulfill strategic priorities, including the Asia-Pacific rebalance and world-wide operational demands.

44. Senator SULLIVAN. General Dunford, to what extent was the U.S. Army's decision to reduce forces in Alaska coordinated with Alaska Command (ALCOM) and what concerns were raised/mitigated from this coordination?

General DUNFORD. ALCOM, a sub-command of NORTHCOM, as represented by ARNORTH, participated in the Army's comprehensive process that facilitated the recent force structure decisions. Their input, like that of every other geographic combatant command, helped inform a decision to best posture a smaller Army to fulfill strategic priorities, including the Asia-Pacific rebalance and world-wide operational demands.

45. Senator SULLIVAN. General Dunford, to what extent was this decision coordinated with the Air Force side of JBER and what concerns were raised/mitigated from this coordination?

General DUNFORD. Joint Base Elmendorf-Richardson, like the other 29 installations at which substation Army forces are stationed, helped inform and facilitate the Army's decision process through participating in two environmental and socio-economic analyses, providing input to the Military Value Analysis and facilitating "listening sessions" for installation communities. Commands were solicited to ensure the accuracy of data and HQDA awareness of issues and concerns associated with their installations. While analysis focused on potential losses at the former Fort Richardson, it considered impacts to Joint-Base Elmendorf-Richardson as a whole.

46. Senator SULLIVAN. General Dunford, to what extent were our South Korean Allies consulted on the U.S Army's decision to reduce forces in Alaska?

General DUNFORD. I defer to the Chief of Staff of the Army to characterize any engagement with our Allies regarding their decision to reduce forces in Alaska.

47. Senator SULLIVAN. General Dunford, if so, what were their concerns and how much were those concerns weighed?

General DUNFORD. I defer to Chief of Staff of the Army.

48. Senator SULLIVAN. General Dunford, to what extent were our Japanese Allies consulted on the U.S Army's decision to reduce forces in Alaska?

General DUNFORD. I defer to the Chief of Staff of the Army to characterize their engagement with our Allies regarding the decision to reduce forces in Alaska.

49. Senator SULLIVAN. General Dunford, if so, what were their concerns and how much were those concerns weighed?

General DUNFORD. I defer to Chief of Staff of the Army.

50. Senator SULLIVAN. General Dunford, to what extent was section 1043 of the NDAA for fiscal year 2016 considered in the U.S Army's decision to reduce forces in Alaska?

General DUNFORD. I defer to the Chief of Staff of the Army on how/if Section 1043 informed their decision to reduce forces in Alaska. If confirmed as Chairman, I will pay close attention to what is required to meet our strategic military objectives in the Arctic, including consideration of how we best posture forces in and around that region. I will seek to ensure a balanced approach to the posturing of our global forces.

51. Senator SULLIVAN. General Dunford, in your personal opinion, is it strategically wise to reduce forces in the Arctic before we have a new Arctic strategy and OPLAN?

General DUNFORD. The reduction of personnel in Alaska, as well as elsewhere, is a result of the need to balance current operational priorities and resource constraints. These force structure decisions best posture a smaller Army to meet global commitment. The Department is continually reviewing the security environment and operational requirements in the Arctic and will reprioritize resources as needed. I look forward to participating in this process.

52. Senator SULLIVAN. General Dunford, to what extent was section 1262 of the NDAA for Fiscal Year 2016 considered in the U.S Army's decision to reduce forces in Alaska?

General DUNFORD. I defer to the Chief of Staff of the Army on how/if section 1043 informed their decision to reduce forces in Alaska. If confirmed as Chairman, I will pay close attention to what is required to meet our strategic military objectives in the Arctic, including consideration of how we best posture forces in and around that region. I will seek to ensure a balanced approach to the posturing of our global forces.

53. Senator SULLIVAN. General Dunford, to what extent were Alaska's, and specifically JBER's organic strategic airlift and close proximity to large and robust training areas, weighted in the U.S Army's decision to reduce forces in Alaska?

General DUNFORD. The Army considered all possible options to retain its warfighting capability, to include strategic airlift and training area location. Ultimately, these reductions are designed to maintain the proper balance between force structure, readiness, and modernization. The Army's stationing plans are designed to leverage existing installation capabilities, minimize future construction costs, and posture the force to support the defense strategy.

54. Senator SULLIVAN. General Dunford, what countries has the 4-25 ABCT worked closely with and possibly trained with and what is the impact of this reduction on the military-to-military relationships with those countries following the reduction of this unit?

General DUNFORD. I defer to the Chief of Staff of the Army for any specific details on the 4-25 ABCT's training history.

55. Senator SULLIVAN. General Dunford, following the Air Force's initial decision to remove a squadron from Eielson, senior Air Force officials soon went up to Fairbanks and North Pole communities to explain the decision. When will this be done in the case of Fort Richardson and who will be sent?

General DUNFORD. Engaging our communities on basing decisions is important. I understand the Department of the Army conducted extensive community outreach. I defer to the Chief of Staff of the Army on the specifics of the community engagement plan.

56. Senator SULLIVAN. General Dunford, what impact has the Army assessed will occur to the greater Anchorage housing market and to the greater Anchorage economy as a result of the decision to reduce the 4-25 ABCT?

General DUNFORD. Analysis of the Anchorage housing market and greater economy was part of the Army's overall analysis in determining force structure changes. I defer to the Department of the Army to provide specific detail regarding your request.

57. Senator SULLIVAN. General Dunford, will installations with reductions be allowed to access DOD Office of Economic Adjustment (OEA) funds to mitigate the effects of these reductions?

General DUNFORD. If an Army installation is selected for reduction, impacted areas may qualify for assistance from OEA. I understand the Army intends to distribute letters and brochures to the most impacted areas, based on job loss, and that OEA will consider all applications for assistance.

58. Senator SULLIVAN. General Dunford, what effects with the U.S. Army's reductions in Alaska have on U.S. Army Alaska (USARAK) and USARAK's headquarters?

General DUNFORD. I defer to the Department of the Army for specific detail on impacts to the HQ reduction. I am aware that the Army's force structure analysis included Total Army Analysis (TAA), Military Value Analysis (MVA), as well as environmental and socio-economic analysis.

59. Senator SULLIVAN. General Dunford, in what way does the U.S. Army's decision to reduce forces in Alaska impact Alaska-based joint training exercises such as Red Flag-Alaska, Northern Edge, and Alaska Shield?

General DUNFORD. The U.S. Army's decision to reduce forces in Alaska could potentially limit their ability to operate the Joint Pacific Alaska Range Complex (JPARC). The JPARC provides joint combined arms training support to all of the Services for exercises such as Red Flag-Alaska, Northern Edge, and Alaska Shield.

60. Senator SULLIVAN. General Dunford, before you are confirmed, can you please provide the Military Value Analysis (MVA) Model and the Total Army Analysis used to make all of the Army's fiscal year 2016-2017 force structure decisions?

General DUNFORD. I will work with Army leadership to ensure the committee has access to the documents necessary for the committee to provide oversight.

61. Senator SULLIVAN. General Dunford, can you provide more information on the U.S. Army's possible desire to convert at National Guard brigade at Joint Base Lewis-McChord (JBLM) to Styker brigade?

General DUNFORD. The decision to convert a National Guard brigade to a Stryker Brigade rests with the Department of the Army. They can provide the best information regarding any planned force structure change.

62. Senator SULLIVAN. General Dunford, if confirmed, do you pledge to ensure that the U.S. Army is completely transparent about the entire fiscal year 2016–2017 force reductions and makes all the documents used to make all of these decision available to Congress?

General DUNFORD. If confirmed, I will work with the Army leadership to provide requested information regarding the fiscal year 2016–2017 force reductions to Congress.

63. Senator SULLIVAN. General Dunford, if confirmed, do pledge to fully review the Army's reductions decisions, especially in light of the emerging concerns in the Asia-Pacific, the Arctic and given that there is a pending Arctic strategy?

General DUNFORD. Yes.

64. Senator SULLIVAN. General Dunford, as the Army has told me that they hope to reverse the decision in Alaska. If confirmed, will you work with me, and them, to bring all the U.S. Army forces back to my State and the Arctic?

General DUNFORD. If confirmed, I will work with all the Services to determine the right size, capabilities, and posture to best support our National Security.

MARINE CORPS IN ALASKA

65. Senator SULLIVAN. General Dunford, what opportunities and challenges would exist to either permanently stationed marines in Alaska, specifically at JBER—or developing rotational forces at JBER—as a part of the Rebalance from Okinawa?

General DUNFORD. The state of Alaska, and specifically Joint Base Elmendorf-Richardson, is important to our nation's security in protecting the homeland and projecting power in the Pacific and beyond. As the global security environment evolves, we will continue to assess the optimal strategic footprint across the services in the PACOM AOR.

U.S. SECURITY COMMITMENT TO TAIWAN

66. Senator SULLIVAN. General Dunford, The Taiwan Relations Act (TRA) and the “Six Assurances” form the cornerstone of U.S.-Taiwan relations and affirms our commitment to maintain Taiwan's self-defense capability. How do you and the administration plan to continue to implement our policy under this framework?

General DUNFORD. The U.S. remains firmly committed to supporting Taiwan within the overall framework of our one-China policy, based on the three joint U.S.-China communiqués and the Taiwan Relations Act. We also remain committed to the Six Assurances. Accordingly, we will continue to promote cross-Strait stability by ensuring that Taiwan maintains a sufficient self-defense capability.

PACIFIC PATHWAYS

67. Senator SULLIVAN. General Dunford, in your personal opinion, in a budget constrained environment, can we afford to have an Army mission in the Pacific that is redundant with another service's longstanding mission?

General DUNFORD. The Army's mission in the Pacific remains a critical component of the Joint Force's broader mission and presence. Each service provides unique, valuable capabilities in executing joint responsibilities in the region based on national strategic interests.

68. Senator SULLIVAN. General Dunford, is Pacific Pathways redundant with the mission of the U.S. Marine Corps?

General DUNFORD. When it comes to increasing U.S. presence in the Pacific for peacetime engagement or the maintenance of forces to support the execution of contingency plans, the United States Army remains a critical component. Their efforts in the Pacific are consistent with broader department efforts and support combatant commanders requirements.

THE NEED FOR STRATEGIC LIFT IN THE PACIFIC AOR

69. Senator SULLIVAN. General Dunford, you have said in multiple forms (hearings, public speaking engagements, answers to Advanced Policy Questions from the Senate Armed Services Committee (SASC)) that lift capacity to support the shifting laydown of forces in the Pacific theater will be insufficient and constitutes a major

concern for you. In your response to the committee's questions, you stated that you "look forward to working with the Services and the U.S. Pacific Command to address the lift needs in the Pacific." If confirmed, what are some of the ways you would consider to address this pending shortfall?

General DUNFORD. The Pacific force laydown is a challenge exacerbated by the fact that we have a shortfall of amphibious lift to meet global demand whether it is support to peacetime or contingency operations. I will work with the Secretary of Defense to ensure the department's priorities reflect the lift requirements in the Pacific. I will also support efforts to work with our allies and partners to advance initiatives that mitigate this challenge.

70. Senator SULLIVAN. General Dunford, as Admiral Roughead testified to this committee in April, do you believe we should also consider moving additional naval and maritime assets forward into the theater to support our peacetime and contingency lift?

General DUNFORD. Yes, we should continue to consider how we can best posture our naval assets in the Pacific. The movement of forces around the Pacific is a challenge given the tyranny of distance, and this challenge is exacerbated by a shortfall of amphibious lift to meet global demand, whether in support of peacetime or contingency operations. We continually evaluate our force posture in the Pacific theater, and all theaters, based on global threats.

QUESTIONS SUBMITTED BY SENATOR MIKE LEE

TEST AND TRAINING RANGES

71. Senator LEE. General Dunford, one of the most important, yet often overlooked, assets DOD is our test and training ranges. Many of these are located in western states and are utilized by all branches of the military, as well as other Federal agencies, to train members on a variety of threats and environments and to research and test new systems vital to the future of our national security. In order to adapt their training to the rapidly changing spectrum of threats facing the military, it is imperative that we work to modernize our training ranges and protect these assets from issues like encroachment and cumbersome environmental regulations. What is your assessment of the state of our military test and training ranges, and do you agree that we need to modernize and prioritize our military readiness against future threats?

General DUNFORD. Yes. Test and training ranges are critical assets for enabling our nation's military to prepare and respond flexibly across the wide range of potential threats, both now and in the future. Currently, many of our weapons systems exceed the contiguous space capabilities that our U.S. ranges can support. In addition, meeting the Department of Defense's Endangered Species Act (ESA) responsibilities, along with competition for frequency spectrum, will continue to challenge our management of test and training ranges. Modernization of our ranges to assure military readiness is critical to addressing threats posed by our adversaries.

NATIONAL GUARD AND RESERVE UNITS

72. Senator LEE. General Dunford, you have been a combat commander in Iraq and Afghanistan, what is your assessment of the performance of our National Guard and Reserve units in these conflicts?

General DUNFORD. Throughout the conflicts in Iraq and Afghanistan, our Reserve Component forces performed admirably. Our Reserve Component forces were an integral part of our operations in both theaters and they often brought unique civilian skills that proved invaluable on the battlefield.

73. Senator LEE. General Dunford, if confirmed, how do you plan to build upon the combat experience gained by National Guard and Reserve units and take advantage of the cost benefits of the Reserve Forces that have been identified by the Reserve Forces Policy Board and CAPE reports in order to preserve combat power for the military, especially while adjusting to potential budget constraints?

General DUNFORD. The National Guard and Reserves are integral to our operational force and our strategic reserve. The challenge we face is striking the right balance between what is needed in the active component to meet emergent or short-notice requirements and what can be maintained in the reserve components and activated as required. The studies conducted by the Reserve Forces Policy Board and CAPE will certainly help inform these decisions. If confirmed, I will work with the

Services to leverage the capabilities and experience inherent within our reserve components.

ACQUISITIONS

74. Senator LEE. General Dunford, one of the topics of great concern to this committee has been reforming the acquisition process in DOD to streamline efforts and find savings, especially for big-ticket acquisitions that have experienced major cost overruns in the past. Equally important to better allocation of funding and resources across DOD is ensuring that weapon system sustainment concerns are addressed beginning in the acquisitions process and aligned throughout the system's entire lifecycle. I am pleased by steps that the Air Force has taken to bring sustainment issues into the acquisition process and look forward to seeing those efforts continue. If confirmed, what ideas do you have for acquisition and sustainment efforts to increase the total life-cycle efficiency and decrease overall costs of weapons systems?

General DUNFORD. I am an advocate of the Air Force's "Bending the Cost Curve-Weapon System Sustainment Initiative" focused on significantly reducing weapon system sustainment cost growth and the Navy's ground-breaking work in the field of renewable energy to power "the Great Green Fleet" driven by 50-50 blends of biofuels.

We need to press forward on efforts to promote commonality across weapons systems where it makes sense, establish competition at all phases of the acquisition cycle, and demand the incorporation of life-cycle efficiency considerations into the basic DNA of every weapon system we build.

ISIS/SYRIA/IRAQ

75. Senator LEE. General Dunford, the stated objective of the United States in the conflict against ISIS is to defeat the group and leave a stable, unified government in Iraq and a post-Assad state in Syria. Some of my colleagues earlier this week discussed with Secretary Carter and General Dempsey the viability and appropriateness of supporting the modern borders of Iraq and Syria given the region's cultural, religious, and tribal histories. While I do not think it is the role of the United States to partition and re-draw borders on the other side of the world, I am also greatly concerned that we could be ineffectively employing our national security resources by continuing to support governing constructs that may be flawed in the first place.

You have extensive experience in Iraq and in the Middle East. Do you believe that in order to protect Americans from the terrorist threats that are physically or ideologically generated in this region that we must absolutely continue supporting the concept of an Iraqi and Syrian state as currently drawn?

General DUNFORD. Protecting American citizens, our homeland, and our interests abroad will remain our top priority. Supporting the current strategy to defeat ISIL, which assumes Iraq and Syria as nation states, is our best option to mitigate threats in the region. If, in the future, I assess that Iraq and/or Syria are not viable as nation states, I will adjust my best military advice accordingly.

76. Senator LEE. General Dunford, how significant of an investment in forces, funding, and time would be necessary to overcome the sectarian divisions that exist inside and outside of these borders?

General DUNFORD. Ultimately, the solution to overcome sectarian divisions must come from the leaders and communities within the region. No amount of U.S. investment alone will be sufficient.

77. Senator LEE. General Dunford, Secretary Carter stated on Tuesday to this committee that the Department of Defense is currently training only 60 Syrian rebels under the \$500 million program authorized last year, with the goal of graduating thousands of recruits by the end of the year. How would you define success in this program, and specifically what do you view as the timeline for achieving success?

General DUNFORD. The Syria train and equip program is a long-term effort that is only one component of our broader approach. The impact of the T&E program remains to be seen, but we currently face significant challenges in recruiting and vetting suitable volunteers at the scale necessary to have strategic effects. If confirmed, I plan to visit the region and assess our approach in Syria to develop a better understanding of this immensely complex and challenging situation.

78. Senator LEE. General Dunford, what will you do to ensure that the weapons and training we supply are not used by or to the advantage of ISIS and other ex-

tremist forces that share a common enemy with the groups we are supporting in Syria?

General DUNFORD. The first step is to accurately identify those groups with whom we wish to train. Next, we need to ensure a stringent and rigorous vetting process to better understand the backgrounds and motivations of those we are training. Last, we must have a well-designed end use monitoring program, in order to verify our equipment is being used according to U.S. objectives and our high standards of battlefield conduct.

IRAN/P5+1

79. Senator LEE. General Dunford, the P5+1 negotiations on the Iranian nuclear program have passed two deadlines for a final deal, and concerns exist over the ability of any deal under the parameters of the framework released earlier this year to prevent Iran from achieving a nuclear weapons capability in the future. What impact will Iran maintaining a path to a nuclear weapon capability, or the lack of sufficient verification and inspection agreements, have on our strategic posture in the U.S. Central Command (CENTCOM) area and the actions of Arab countries?

General DUNFORD. If Iran maintains a path to a nuclear weapon capability it would have a destabilizing impact within the region and constitute a threat to our national interests.

BORDER SECURITY

80. Senator LEE. General Dunford, last year, the commander of U.S. Southern Command, General John Kelly, stated that the security along our southern border and the migration crisis were existential threats to U.S. national security. In addition to the drugs and crime that can enter into the United States from the Southern border, we know that terrorist organizations have connections with drug cartels and other contacts in that region. Are you concerned about the security threats that are presented by unsecure borders, and what is your overall assessment of security in the western hemisphere?

General DUNFORD. I appreciate the complexity of securing borders as vast as ours and recognize the challenge they present. I am concerned about the security of our borders. Within the Western Hemisphere, we have seen the negative influence of Transnational Criminal Organizations (TCOs) on security and the rule of law, especially in Mexico and Central America. While there is always a potential for convergence between violent extremists (VE) and Transnational Criminal Organizations (TCO) in the Western Hemisphere, TCOs are motivated by profit and the ability to operate unimpeded by law enforcement. Within our hemisphere, TCOs generally understand that supporting terrorists or terrorist activities would bring increased U.S. attention and negative impacts to their operations.

QUESTIONS SUBMITTED BY SENATOR CLAIRE MCCASKILL

SIGAR UNUSED BUILDING REPORT IN AFGHANISTAN

81. Senator MCCASKILL. General Dunford, in May, the Special Inspector General for Afghanistan Reconstruction (SIGAR) released a report on a 64,000 square foot regional headquarters built in Afghanistan at a cost of \$36 million that was never occupied. Its findings implicated a senior Army general who ignored requests to cancel the construction, and also the Army's own investigation of the matter. SIGAR recommended that disciplinary action be taken against the senior Army general who conducted the investigation "in light of his failure to carry out a fulsome investigation in compliance with General Dunford's orders." This investigation was ordered by you while serving as commander of the International Security Assistance Force (ISAF) and U.S. Forces-Afghanistan (USFOR-A). While SIGAR did not find any fault with your actions, as the officer who ordered the investigation you ultimately signed it. General Dunford, given SIGAR's findings, are you concerned that the investigation into this matter was inadequate?

General DUNFORD. No. However, I fully recognize the necessity for the military to be effective stewards of the resources we are provided. This facility was constructed prior to my assumption of command. When I became aware of the issue, I directed an investigation. The investigation did not find criminal behavior, but rather identified incorrect assumptions made in a combat environment. We should and must learn from these incorrect assumptions. I am committed to responsible stewardship of both the resources Congress appropriates and taxpayer trust.

QUESTIONS SUBMITTED BY SENATOR JEANNE SHAHEEN

ISIL/IRAQ

82. Senator SHAHEEN. General Dunford, what is your assessment of the effectiveness of the current coalition air campaign against the Islamic State of Iraq and the Levant (ISIL)?

General DUNFORD. From a military effectiveness perspective, coalition airstrikes since August 2014 have blunted ISIL's initiative, removed a number of ISIL leaders, and degraded the ability of the group to operate openly in Iraq and Syria. ISIL's total area of influence in Syria remains largely unchanged as the group has offset the losses of Kobane and territory in Raqqah province with gains in As Suwayda, the Damascus countryside, and Homs Province.

Coalition airstrikes have also degraded ISIL's capability to mass and stage fighters, forcing the group to rely more heavily on asymmetric terrorist tactics such as suicide attacks, car bombs, and assassinations.

83. Senator SHAHEEN. General Dunford, what do you assess would be the impact on the campaign of deploying U.S. forward air controllers to Iraq to call in close support during combat?

General DUNFORD. Employing Forward Air Controllers or accompanying Iraqi ground forces in the past has, in my experience, made those units more effective at the tactical level. Adjustments to our military support campaign will further enable Iraqi forces to gain the skill and confidence necessary for improved combat effectiveness.

84. Senator SHAHEEN. General Dunford, do you favor this shift in policy?

General DUNFORD. If confirmed, I would take an early opportunity to get on the ground to speak to commanders so I could provide a more comprehensive recommendation as to how we can support our broader campaign objectives in Iraq.

QUESTIONS SUBMITTED BY SENATOR JOE DONNELLY

DEFENSE MANPOWER DATA CENTER

85. Senator DONNELLY. General Dunford, the Defense Manpower Data Center (DMDC) is an important resource for ensuring that servicemembers receive the benefits and protections they are entitled to under the law. The use of the DMDC system has been designated as a resource to enhance compliance with the Servicemembers Civil Relief Act (SCRA). In view of the growing importance of the DMDC for a wide variety of purposes, what steps has the Department taken to strengthen the capabilities of the DMDC?

General DUNFORD. The Defense Manpower Data Center (DMDC) plays a vital role in ensuring our servicemembers, retirees, and their family members receive all the entitlements and benefits provided under the law. The department has taken steps to strengthen the DMDC, for example, when DOD saw the use of the Servicemembers Civil Relief Act (SCRA) database increased from approximately 490 million searches in 2012 to over 2.9 billion searches in 2014, DOD provided additional resources to improve the SCRA website to meet this demand. I am confident the Department will continue to provide DMDC the necessary resources to carry out its critical mission.

SERVICEMEMBERS CIVIL RELIEF ACT (SCRA) AND MILITARY LENDING ACT (MLA)

86. General Dunford, are the staffing, funding, and security levels appropriate to ensure the accuracy, reliability and integrity of the SCRA and MLA database systems?

General DUNFORD. It is my understanding that the SCRA and MLA database systems are appropriately staffed, funded, and secured to ensure the accuracy, reliability, and integrity of the systems.

87. Senator DONNELLY. General Dunford, if there are shortfalls in maintaining and improving the SCRA and MLA databases, what are your requests to bring them to a level you feel would place them at the highest levels of accuracy, reliability and integrity?

General DUNFORD. I am not aware of shortfalls in maintaining the SCRA and MLA databases.

88. Senator DONNELLY. General Dunford, how is the Department ensuring that the SCRA and MLA databases provide adequate protection of servicemembers' personal information?

General DUNFORD. The SCRA and MLA databases conform to all federal requirements for the protection of personal information. Protections include Information Assurance certification and accreditation of the SCRA and MLA databases, encryption of traffic to and from the databases, best practices for data security and data retention, and protection of information as required by the Privacy Act of 1974.

89. Senator DONNELLY. General Dunford, how is the Department ensuring that the SCRA and MLA databases have the capability to provide timely and accurate data to enable servicemembers eligible for SCRA benefits?

General DUNFORD. The Department maintains the SCRA and MLA databases with near real-time data supplied directly by the Military Services. The SCRA and MLA databases are publicly accessible and available 24 hours a day, 7 days a week (barring periodic maintenance), which allow the Department to meet the highest standards for providing timely and accurate verification data.

90. Senator DONNELLY. General Dunford, does the SCRA and MLA databases have the capability to prevent delays with military consumers seeking credit or receiving their benefits?

General DUNFORD. The SCRA and MLA databases are publicly accessible 24 hours a day, 7 days a week (barring periodic maintenance). Those seeking to determine eligibility for benefits or seeking credit may use the SCRA or MLA databases to verify status anytime with the most up-to-date information

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by General Joseph F. Dunford, Jr., USMC in connection with his nomination follows:]

UNITED STATES SENATE
COMMITTEE ON ARMED SERVICES

ROOM SR-228

WASHINGTON, DC 20510-6050

(202) 224-3871

COMMITTEE ON ARMED SERVICES FORM

BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed, use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in Committee offices for public inspection prior to the hearing and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)

Joseph F. Dunford, Jr.

2. **Position to which nominated:**

Commandant of the Marine Corps.

3. **Date of nomination:**

21 May 2015.

4. **Address:** (List current place of residence and office addresses.)

[Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**

23 December 1955; Boston, Massachusetts.

6. **Marital status:** (Include maiden name of wife or husband's name.)

Married to Ellyn A. Dunford (Maiden name: Ellyn A. Sartucci).

7. **Names and ages of children:**

[Nominee responded and the information is contained in the committee's executive files.]

8. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.

None.

9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, firm, partnership, or other business enterprise, educational or other institution.

None.

10. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable and other organizations.

Member, Marine Corps Association.

11. **Honors and Awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

Awarded Colonel Donald Cook Award for Citizenship, from St. Michael's College, Vermont.

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes.

13. **Personal views:** Do you agree, when asked before any duly constituted committee of the Congress, to give your personal views, even if those views differ from the Administration in power?

Yes.

[The nominee responded to Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–E are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

GENERAL JOSEPH F. DUNFORD, JR.

This 23rd day of May, 2015

[The nomination of General Joseph F. Dunford, Jr., USMC was reported to the Senate by Chairman McCain on July 23, 2015, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on July 29, 2015.]

**NOMINATIONS OF GENERAL PAUL J. SELVA,
USAF, TO BE VICE CHAIRMAN OF THE
JOINT CHIEFS OF STAFF; AND GENERAL
DARREN W. McDEW, USAF, TO BE COM-
MANDER, U.S. TRANSPORTATION COMMAND**

TUESDAY, JULY 14, 2015

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:34 a.m. in room SD-G50, Dirksen Senate Office Building, Senator John McCain (chairman) presiding.

Committee members present: Senators McCain, Inhofe, Ayotte, Fischer, Cotton, Rounds, Ernst, Tillis, Sullivan, Reed, McCaskill, Manchin, Shaheen, Gillibrand, Donnelly, and Kaine.

OPENING STATEMENT OF SENATOR JOHN McCAIN, CHAIRMAN

Chairman MCCAIN. Please take seats, gentlemen, and we'll begin the hearing. And thank you.

The Senate Armed Services Committee meets this morning to consider the nominations of General Paul Selva to be the Vice Chairman of the Joint Chiefs of Staff and General Darren McDew to be the Commander of U.S. Transportation Command (TRANSCOM).

We welcome you here this morning, as well as members of the Selva and McDew family. As is our tradition, at the beginning of your testimony, we welcome each of you to introduce the members of your family joining you this morning. We know the sacrifices your families make, and we're grateful to them for their continued support to our Nation.

Please proceed, General Selva.

General SELVA. Senator McCain, I'd like to introduce you to my wife, Ricki, who's sitting right behind me. She's been with me for every day of my 35-year career. In fact, we are classmates from the U.S. Air Force Academy. She wore the uniform of our Air Force for 9 years. She's probably the only person in the world that can give me the kind of feedback I need when I stray from centerline. And she is a lifelong friend, and I love her for being by my side.

Chairman MCCAIN. Well, thank you, General. And welcome.

General McDew.

General McDEW. You know, they trained me to do this, and the first thing I did was not do it.

[Laughter.]

Thank you, Mr. Chairman, Senator Reed.

Behind me I have the folks that have been behind me for a long, long time. First, my beautiful wife, Evelyn, who's been with me for 40 years. We've been married for 31, we've known each other for 40. We have been blessed to have two children, who continue to grow our family. We have my favorite daughter, Keisha. We also have our son, Keith, our daughter-in-law, Becca, and the most wonderful human in the world, our grandson, Henry, who's 5 weeks old—5 months old this week. But, also behind me—

Chairman MCCAIN. Henry looks pretty healthy to me.

[Laughter.]

General MCDEW. And if he could just play, here, with my uniform, he'd be fine, but, otherwise, he'll probably sleep.

We also have behind us a very close friend and colleague, Dr. William R. Sutherland. I call him "my buddy, Bert." My buddy, Bert, has pinned on every rank since colonel, and he's been a colleague, a friend, and a mentor. And I thank all of them for being here today and as they've been along the way.

Chairman MCCAIN. Thank you. We are so pleased to see the families here today.

General Selva and General McDew, you come before this committee today amid a sweeping transition in military leadership that will take place over the coming months. In addition to your nominations, this committee is currently considering the nominations of a new Chairman of the Joint Chiefs of Staff, new Service Chiefs for the Army, Navy, and Marine Corps, and potentially others in the near future. This team of military leaders will be soon—will soon be responsible for preparing our military to confront the most diverse and complex array of global crises since the end of World War II.

The list of challenges for our national security is as daunting as it is drearily familiar: the rampage of ISIS [Islamic State of Iraq and Syria] terrorist army, Iran's pursuit of nuclear weapons and support for its destabilizing proxies, revisionist Russia's invasion of Ukraine, and China's continued military buildup and aggressive behavior towards its neighbors. And yet, while worldwide challenges like these grow, the Defense Department has grown larger but less capable, more complex but less innovative, and more proficient at defeating low-tech adversaries but more vulnerable to high-tech ones. And worse, the self-inflicted wounds of the Budget Control Act and sequestration-level defense spending have made all these problems worse.

Over the past 4 years, we've seen drastic reductions to defense spending that have cut Army and Marine Corps end strength dangerously low and slowed critical modernization priorities across the Services, placing at risk our Nation's military technological superiority. At the same time, our military has maintained an accelerated operational tempo and, as a consequence, entered a dangerous downward spiral of military capacity and readiness that risk compromising each Service's ability to execute our defense strategic guidance at a time of accumulating danger to our national security.

The current Chairman of the Joint Chiefs of Staff has stated that, even if the Defense Department receives the additional \$38 billion above the budget caps that the President's defense budget

requests, our military would still “remain at the lower ragged edge of manageable of risk in our ability to execute the defense strategy.” More worrisome, every one of our military Service Chiefs has testified that continued sequestration-level defense spending puts American lives at greater risk. Unless we change course and return to strategy-driven defense budgets, I fear our military will confront depleted readiness, chronic modernization problems, and deteriorating morale. No matter how many dollars we spend, we won’t be able to provide our military the equipment they need with a broken defense acquisition system that takes too long and costs too much. For example, an Army study looked at the time it would take to go through all of the AT&L [Acquisition, Technology, and Logistics] reviews and buy nothing. What was the answer? Ten years. Ten years to buy nothing. Our adversaries are not shuffling paper, they’re building weapon systems, and it’s time for us to do the same.

General Selva, if confirmed as the next Vice Chairman, in addition to your many responsibilities supporting the next Chairman, you would serve as the chairman of the Joint Requirements Oversight Council and an executive member of the Defense Acquisition Board. In these—in this combination of roles, you will have a critical role in the defense acquisition system, from identifying and approving joint requirements to assessing cost, schedule, and performance. Members of this committee will be very interested to hear your thoughts on acquisition reform. In particular, we will be interested to hear your views on how we fix blurred lines of accountability inside the defense acquisition system that allow its leaders to evade responsibility for results. This is the central problem this committee is trying to address in the acquisition reforms adopted in the Senate’s defense authorization bill. There are diverse views on acquisition reform, but one thing is for sure: The status quo is unacceptable. And we need a Vice Chairman of the Joint Chiefs who recognizes that.

General McDew, as the Commander of Air Mobility Command, you are well aware of the challenges facing TRANSCOM [United States Transportation Command] in projecting and sustaining forces around the world amid ongoing budget cuts. But, TRANSCOM isn’t just providing capability to support other commands in confronting escalating global threats. Some of these threats are aimed at TRANSCOM itself. For example, just last year, this committee conducted an exhaustive investigation of the cyberthreats facing TRANSCOM. The report documented at least 20 advanced cyberintrusions targeting TRANSCOM contractors, all attributed to China. That’s because, according to the Pentagon, Chinese military analysts have identified logistics and mobilization as potential U.S. vulnerabilities, and their military doctrine advocates targeting these networks to impact our ability to operate during the early stages of conflict.

Given TRANSCOM’s dependence upon the private sector and the fact that the vast majority of their business is conducted on unclassified networks, there’s still important work left to be done to enhance the Defense Department’s ability to share information with its critical transportation contractors and assist them in detecting and mitigating cyberattacks.

General Selva, General McDew, we thank you for—both for appearing before us today. We look forward to your testimony.
Senator Reed.

STATEMENT OF SENATOR JACK REED

Senator REED. Thank you very much, Mr. Chairman.

Let me join you in welcoming General Selva and General McDew. Thank you for your service and for your sacrifice, and also for your families' service and sacrifice.

Let me, too, welcome Ricki, and thank you, ma'am, for your service as well as your support.

General McDew, your wife, Evelyn—Evelyn, hello—and Keisha and Keith and Becca and, the most important person here, who just left, Henry.

I also want to commend Keith for his service in the Coast Guard. Thank you for your service.

Finally, Dr. Sutherland, thank you for being here, also.

The United States, as the Chairman indicated very astutely, faces challenges across the globe that are unprecedented in nature. And, if confirmed, you'll both be playing an important role in addressing these complex international issues.

Last week, we had General Dunford before the committee, the designated-to-be Chairman of the Joint Chiefs of Staff, and he testified that the threats confronting the United States are multifaceted and varied, they include the campaign against ISIL [Islamic State of Iraq and Syria]; building local forces to counter ISIL; deterring additional Russian aggression toward Ukraine and its European neighbors; our rebalance to the Asia-Pacific theater; and how best to address sequestration and the ongoing fiscal challenges of the Department. General Selva, if confirmed as Vice Chairman, you'll be working closely with General Dunford to address each of these issues. We're looking forward to your views on all the issues that I've mentioned and that the Chairman has mentioned.

In addition, if confirmed, you will assume a number of distinct responsibilities as the Vice Chairman. In the past, the Vice Chair has been an integral participant in the interagency process, working closely with senior policymakers within the Department and at the National Security Council on critical national security issues. Additionally, the Vice Chairman oversees the Joint Retirement—Requirements Oversight Council, JROC, which is charged with reviewing requirements for acquisition programs to ensure they are reasonable and necessary. And finally, as a senior member of the Nuclear Weapons Council, the Vice Chairman plays a central role in ensuring the United States safely maintains its nuclear weapons stockpile. And I look forward to hearing more from you, General Selva, about how you'll prioritize and execute all these responsibilities as Vice Chairman.

General McDew, you've been nominated to be Commander of TRANSCOM. It encompasses the Air Force's Mobility Command, the Navy's Military Sealift Command, and the Army's Surface Deployment and Distribution Command, and is really the backbone of our strategic mobility. And, for the past several years, TRANSCOM has played a critical role in supplying our operations in Iraq and

Afghanistan, as well as bringing home our troops and equipment after deployments.

Given the myriad of national security challenges facing the United States and the long-term effects of sequestration on our defense budget, we will certainly look to your views on the challenges TRANSCOM must tackle in this environment. And, as the Chairman indicated, one of those challenges is cyberintrusions. It will become more of a problem as the days go on, rather than less of a problem. And your views are absolutely critical, and your actions will be critical, going forward.

So, Mr. Chairman, again, let me join you in welcoming our nominees and thanking them for their service.

Chairman MCCAIN. Thank you.

I'd like to mention to the witnesses, we have standard questions that are asked of all military nominees. I would now like to read them to you.

In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of Congress are able to receive testimony, briefings, and other communications of information. Have you adhered to applicable laws and regulations governing conflicts of interest?

[Both witnesses answered in the affirmative.]

Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

[Both witnesses answered in the affirmative.]

Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

[Both witnesses answered in the negative.]

Will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

[Both witnesses answered in the affirmative.]

Will you cooperate in providing witnesses and briefers in response to congressional requests?

[Both witnesses answered in the affirmative.]

Will those witnesses be protected from reprisal for their testimony or briefings?

[Both witnesses answered in the affirmative.]

Do you agree, if confirmed, to appear and testify, upon request, before this committee?

[Both witnesses answered in the affirmative.]

Do you agree to provide documents, including copies of electronic forms of communications, in a timely manner when requested by a duly-constituted committee, or to consult with the committee regarding the basis for any good-faith delay or denial in providing such documents?

[Both witnesses answered in the affirmative.]

Thank you very much.

General Selva, and then General McDew, please proceed.

**STATEMENT OF GENERAL PAUL J. SELVA, USAF, NOMINEE TO
BE VICE CHAIRMAN OF THE JOINT CHIEFS OF STAFF**

General SELVA. Thank you.

Mr. Chairman, Ranking Member Reed, distinguished members of the Senate Armed Services Committee, it's a great honor to appear before you today as President Obama's nominee to become the Vice Chairman of the Joint Chiefs of Staff.

First, I want to thank all of you for your undying support for our soldiers, sailors, airmen, marines, and coastguardsmen who guard our liberty every single day, specifically those who serve today in TRANSCOM.

Leading the men and women of Transportation Command has been a distinct honor, and I have no doubt that they are representative of the servicemembers across our institution who are the best-trained, best-led, best-equipped, and most-capable military in the world.

I would like to acknowledge and congratulate my close friend and colleague, General Darren McDew, testifying beside me today. I can think of no person more qualified to lead the men and women of TRANSCOM. I wish him and Evelyn the greatest of success, subject to your confirmation.

If confirmed, I look forward to working with the senior leadership in the Department of Defense (DOD), the combatant commanders, our friends, allies, and partners around the world, key members of the executive branch and the interagency process and Members of Congress, including this committee, to address a wide spectrum of challenges confronting our Nation. We are increasingly at risk in space, across the networks of cyberspace, and face a cast of regional and near-peer competitors who are fielding increasingly sophisticated conventional and nuclear arsenals. While these threats represent a clear and present danger to our security, we continue to front—to confront violent extremists, such as ISIL, who shock the very core of our beliefs and threaten to further destabilize a very strategic region—region that includes several of our key allies.

Effectively confronting these threats, as diverse as they are, requires a whole-of-government approach. Our soldiers, sailors, airmen, marines, and coastguardsmen truly are the heart and soul of our competitive advantage, and they are far more effective when the full weight of our country's power is working in unison. If confirmed, I look forward to being an advocate for those men and women who wear the uniform of our Nation, and their civilian counterparts in our Department.

Lastly, I want to say that I am humbled by the President's nomination and the Secretary's confidence in putting me before this committee as the nominee to be the Vice Chairman of the Joint Chiefs of Staff. I'm grateful for the opportunity to appear before you today, and look forward to working with you, subject to your confirmation.

Thank you, Mr. Chairman.

[The prepared statement of General Selva follows:]

PREPARED STATEMENT BY GENERAL PAUL J. SELVA.

Thank you. Mr. Chairman, Ranking Member Reed, distinguished members of the Senate Armed Services Committee, it's a great honor to appear before you today as President Obama's nominee to become the vice chairman of the Joint Chiefs of Staff.

First, I want to thank all of you for your undying support for our soldiers, sailors, airmen, Marines and Coast Guardsmen who guard our liberty every single day, specifically those who serve today in the United States Transportation Command.

Leading the men and women of Transportation Command has been a distinct honor and I have no doubt that they are representative of the servicemembers across our institution who are the best trained, best led, best equipped and most capable military in the world.

I would like to acknowledge and congratulate my close friend and colleague, General Darren McDew, testifying beside me today. I can think of no person more qualified to lead the men and women of the United States Transportation Command, and I wish him and Evelyn the greatest of success, subject to your confirmation.

If confirmed, I look forward to working with the senior leadership in the Department of Defense, the combatant commanders, our friends, allies and partners around the world, key members of the Executive Branch and the interagency process and members of Congress, including this committee to address a wide spectrum of challenges confronting our nation.

We are increasingly at risk in space, across the networks of cyberspace, and face a cast of regional and near-peer competitors who are fielding increasingly sophisticated conventional and nuclear arsenals. While these threats represent a clear and present danger to our security, we continue to fund—to confront violent extremists such as ISIL who shocked the very core of our beliefs and threatened to further destabilize a very strategic region—that include several of our key allies.

Effectively confronting these threats, as diverse as they are, requires a whole of government approach. Our soldiers, sailors, airmen, Marines and Coast Guardsmen truly are the heart and soul of our competitive advantage, and they are far more effective when the full weight of our country's power is working in unison.

If confirmed, I look forward to being an advocate for those men and women who wear the uniform of our Nation and their civilian counterparts in our department.

Lastly, I want to say that I am humbled by the President's nomination and the Secretary's confidence in putting me before this committee as the nominee to be the vice chairman of the Joint Chiefs of Staff. I'm grateful for the opportunity to appear before you today and look forward to working with you, subject to your confirmation.

Thank you, Chairman.

Chairman McCAIN. Thank you.

General McDew.

STATEMENT OF GENERAL DARREN W. McDEW, USAF, NOMINEE TO BE COMMANDER, U.S. TRANSPORTATION COMMAND

General McDEW. Thank you, Mr. Chairman, Ranking Member Reed, and distinguished members of the committee. It is, indeed, a great honor for me and my family to sit before you today.

For 31 years, Evelyn and I have treated every single person that we've had the privilege to lead in our commands as an extension of our family. If confirmed, we look forward to welcoming the soldiers, sailors, airmen, marines, and coastguardsmen of Transportation Command to our extended family.

Before I go any further, I also owe a debt of gratitude to my esteemed colleague, General Paul Selva, for his support of Air Mobility Command and his dedicated leadership of Transportation Command. I have no doubt that, if confirmed, General Selva's service as Vice Chairman of the Joint Chiefs will benefit our Nation.

Members of the committee, thank you for your steadfast support of 118,000 men and women of Air Mobility Command. They are our Nation's finest. I hope I have the opportunity to tell you more about them during questioning.

If confirmed, I am excited to continue working with the men and women of TRANSCOM—Active Duty, Guard, Reserve, and civilian,

as well as the vast network of commercial carriers that support American forces worldwide. These unheralded professionals are the business end that project military power around the globe. I cannot overstate the importance of the often thankless work accomplished at TRANSCOM, and I am humbled to be considered to be their commander.

Members of the committee, I am committed to working with you and other committees to ensure our servicemembers and civilians have everything needed to support and defend the United States of America. If confirmed, I will provide the leadership the men and women of Transportation Command expect and deserve. I appreciate the trust and confidence the President, the Secretary of Defense, and General Dempsey have placed in me by considering me for this position.

I thank you, Mr. Chairman and the members of the committee, for continuing—for conducting this hearing. And I look forward to your questions.

Chairman MCCAIN. Well, thank you very much, General. Thank you.

General Selva, we had a hearing with the prospective Chairman of the Joint Chiefs of staff a few days ago, as you know, and one of the many members—I believe it was Senator Manchin—asked the prospective Chairman of the Joint Chiefs, General Dunford, what he believed was the greatest threat that the United States faces in the world today. And, to the surprise of some, General Dunford responded: Russia. What is your opinion on that response to that question, General?

General SELVA. Thank you, Mr. Chairman. I would put the threats to this Nation in the following order: Russia, China, Iran, and North Korea, and all of the organizations that have grown around the ideology that was articulated by al-Qaeda early in the turn of this century. And that's not to say that each or any of those present a clear and present danger today. But, in that order, you see the countries that are peer and near-peer competitors who are developing conventional and nuclear weapons that match our own. You see opaque governments that have ideologies that we don't agree with. And you see the broad base of terrorist threats that might threaten our interests abroad, our—

Chairman MCCAIN. I got all that.

General SELVA.—abroad, and our Homeland.

Chairman MCCAIN. I got all that. What—your—you agree with General Dunford that the first would be Russia?

General SELVA. Yes, sir.

Chairman MCCAIN. Because?

General SELVA. Because Russia possesses the conventional and nuclear capability to be an existential threat to this Nation, should they choose to do so.

Chairman MCCAIN. And you place ISIS last of those four priorities?

General SELVA. Yes, sir, I do.

Chairman MCCAIN. Because?

General SELVA. Because right now ISIS does not present a clear and present threat to our homeland and to the existence of our Na-

tion. It is a threat we must deal with, and we must help our regional partners deal with, but it does not threaten us at home.

Chairman MCCAIN. Does it threaten us at home when these young men who have gone to Iraq and Syria and become radicalized and then return to the United States, that the Director of the FBI and the Director of Homeland Security have said is a direct threat to the United States? That's their testimony.

General SELVA. Yes, sir. I would agree with their assessment. However, I would qualify it with the following. Those do not present an existential threat to the existence of the Nation. ISIL does not possess the tools or the capabilities to threaten the existence of the United States as we know it.

Chairman MCCAIN. I would like your and General McDew's comments and assessment of the effects of sequestration on our ability to defend the Nation, and its effect on the risk to the men and women who are serving, and the effect on their morale as they face this uncertainty that is dictated by sequestration. Beginning with you, General Selva.

General SELVA. Mr. Chairman, I think sequestration presents a direct threat to the morale of our soldiers, sailors, airmen, and marines, who deserve the best-maintained and best equipment available to fight the threats that face this Nation. And, as we see the effects of sequestration and the potential declines in the defense budget affecting readiness, they affect our ability to train those young men and women to do their work, they affect our ability to maintain and reset the equipment that they have been using for the better part of the last decade and a half in Iraq and Afghanistan, and they affect our ability to retain the best of those soldiers, sailors, airmen, and marines as they make the decision on whether or not they believe they have the full support of the Nation in the work that they do to defend our freedom and liberty every day.

So, I do believe sequestration has readiness impacts, it has impacts on our ability to maintain the force, and it has impacts on our ability to sustain the morale of the men and women who have committed to defending our freedom and liberty around the world.

Chairman MCCAIN. The Overseas Contingency Operations (OCO) funding is a bandaid.

General SELVA. Sir, I believe the OCO funding is a 1-year incremental fix to a long-term problem that we all need to address together. And, if confirmed, I look forward to working with this administration, with this Congress, and with this committee, and others, to try and find a long-term solution to that problem.

Chairman MCCAIN. General McDew. First, the answer on the greatest threat, and then the second, if you would.

General MCDEW. One of the greatest threats that faces our Nation is our ability to deal with the cyberthreat. I will separate it slightly from the other discussion that you were having with General Selva, and focus on one that impacts Transportation Command and our network more readily today, and that is our ability to figure out how we will continue to work with commercial industry that we're required to work with, and need to work with. Ninety percent of our work is done on the commercial networks, and that is a threat that I have got to face, going forward, if confirmed.

Chairman MCCAIN. It's an interesting perspective. So, right now there is the possibility that adversarial nations could shut down your business?

General MCDEW. There is always that threat that adversarial nations could shut down our Nation. But, what I—and I think this is something that the entire Nation and a lot of folks in the whole-of-government—

Chairman MCCAIN. But, particularly, your ability to get things to the warfighters.

General MCDEW. Senator, that threat is there. I believe that TRANSCOM has put some things in place to make that less likely. But, as we go forward, the threat only gets worse. Our ability to deal with it must evolve, and we have to find ways to do better with it, going forward.

Chairman MCCAIN. Thank you very much.

Senator Reed.

Senator REED. Well, thank you very much, Mr. Chairman.

Thank you both, gentlemen, for your testimony.

And, General Selva, getting to one of your specific roles as Vice Chairman—that's the Council of—for the Command and Control—National Leadership Command and Control Council of Nuclear Weapons—can you comment about that? It appears that this issue, particularly over the last several years with our land-based forces, has become even more prominent with respect to not just aging infrastructure, but leadership issues, a whole host of issues. Can you just comment upon how you perceive your role and what you will do?

General SELVA. Senator, I believe the statutory roles that are defined for the Vice Chairman with respect to management of the Nuclear Weapons stockpile, the Nuclear Leadership Command and Control Network, as well as the National Deterrence Oversight Panel, are fairly clear. They require me to be able to assert with confidence that we have a safe, secure, and reliable arsenal that is connected to our leadership by a reliable, secure, and resilient command-and-control network, and that that puts the President of the United States, as the authority for use of those weapons, in direct control of the decisions that would accrue to our nuclear weapons inventory. And so, I look forward to working with this committee, if confirmed, to make sure that all the legs of our nuclear triad and all of the capabilities that make our nuclear deterrent believable and ready are in place to give us that capability.

Senator REED. Looking forward, there's going to have to be a significant recapitalization of the nuclear enterprise, both land, air, and sea bases. Do you think we're fully prepared for that, in terms of—particularly in terms of the issues the Chairman raised about sequestration and these budgets?

General SELVA. Senator Reed, I've only been recently studying the issues that accrue to the nuclear weapons enterprise as it relates to the nominations for this new position. To be honest, I haven't had the time to look at all of the detail that would be required to answer that question. I would look forward to answering it in a classified environment with a lot more detail.

Senator REED. But, I would assume your initial impression is that we have a big bill to pay, going forward, to maintain our current strategic dominance.

General SELVA. Yes, sir. My understanding is that the current weapons stockpile and the current delivery platforms require significant maintenance and upgrades. But, I'm also aware of the requirement to invest in the long-range strike bomber, the *Ohio*-class replacement, and potentially a follow-on intercontinental ballistic missile, to keep all three legs of our nuclear triad viable.

Senator REED. Let me switch gears, General McDew. You've really, I think, in your questions with the Chairman and your opening statement, put your finger on the cyber issue. It seems to me that that's the first stage of any conflict today, which would be a cyberattack. In fact, it's unclear when you cross the line into something that's a probing action or an act of war. Not only do you have to maintain the infrastructure of DOD, but you have numerous contractors. Can you comment on the challenge that you have with some of your contractors to maintain their cybersecurity, and the steps you're taking to ensure that, if they were compromised, it wouldn't cascade into your system?

General MCDEW. Senator, I am beginning to understand the vastness of the network. I am more familiar with the Air Mobility Command portion and its contractors. However, in some of the study that I've done so far, which has not been in great depth, I see that TRANSCOM has put some things in place in their contracting system to allow the contractor to show assuredness of their network and to provide for requirements to report intrusions in their network. Those are, I think, very beneficial. I think, if confirmed, I will want to look deeper into that and to see where we can strengthen those places where we can.

Senator REED. Thank you.

General Selva, a final question. And just—you will also, as the JROC Chair, have a great deal to do about acquisition policy. Can you—general comments about the efforts underway to engage the Services more actively in acquisition?

General SELVA. Senator, I'm aware that there is an active effort inside the Joint Requirements Oversight Council to reinvigorate the relationship with the stakeholders who bring requirements to the table, and to look at the authorities and responsibilities for actually delivering the military capabilities as an outcome. If confirmed, I look forward to working with that body and with this committee as we continue the process of looking at the duplication of effort that might exist across the enterprise, and to come back to you with any potential legislative proposals that might be required to remove requirements that are currently articulated in statute. That is the extent to which I've studied that process.

Senator REED. Thank you.

Thank you, Mr. Chairman.

Chairman MCCAIN. Senator Inhofe.

Senator INHOFE. Thank you, Mr. Chairman.

Let me mention something that's not very often talked about. I have briefly mentioned it to each one of you. The fact that the airlines are anticipating hiring about 20,000 pilots over the next 7 years due to the mandated retirement age of 65. In fact, I authored

the amendment that raised it from 60 to 65. Maybe we should have put it at 70. It would have maybe put off that problem. But, it is a serious thing. RAND [Research and Development Corporation] did a release—a study that the airlines have an average of 2,000 per year over the next 10 years, and that they will be upwards of 5,000 after that. That compares, over the last 10 years, to 1,500. So, this is something that's out there. And it's something that we—first of all, I'd like to ask each one of you, consider this a problem, do you have any ideas right now that might help alleviate it?

General SELVA. Senator, the problem of pilot inventory in this Nation, I believe, is going to become a readiness issue over time. It's—it is not upon us, but it is approaching quickly.

Three dynamics play out that cause that to happen. First is the exponential expansion of the airline industry, internationally, which places a huge demand on the pilot inventory in the United States as the preference to have an English-speaking pilot in the cockpits is internationally known. The second, as you mentioned, is the approaching age of retirement for many of our pilots. The third is the decline in production of military pilots that are a preference across the network. And so, each of those three will conspire over time to place heavier demands by the industry on the military inventory of pilots that are their preference.

And so, working with the airlines on innovative ways to bring civilian-educated pilots out of our higher learning institutions directly into commercial air service is one of the initiatives that we've begun working with the airline industry.

Senator INHOFE. Well, yes. I understand. This is not—right now, we're putting out the fires that are burning today, but this is something that we know is coming. I've talked to General Welsh about this several times, and he agrees that the logical place for them to go is going to be going to the military. We spend the money training them. The—I guess, the cost of getting a pilot to an F-22 capability is about \$9 million. And so, this is a huge issue that's—it's—I'd suggest it's here. Any further thoughts on that, General McDew?

General MCDEW. Senator, the one thing I would add is that, although the numbers don't say that it's here with us today, the discussion is in our cockpits today. There is not a pilot that serves anywhere in any capacity across our Nation that doesn't understand—

Senator INHOFE. But—

General MCDEW.—the demand.

Senator INHOFE. Yes. We tried something a year ago, when we stood down 17 combat-coded squadrons. That was supposed to be til the end of the year, which would have been 6 months. Then, 3 months later, they changed their mind and then stood them up again. It's my understanding that that actually costs more than what was saved during that 3-month period. I don't—I'm not asking you if you were aware of that, but, nonetheless, it's something I believe.

I—let me throw out three ideas here and just have you, maybe for the record, comment on each one of them.

First of all, the idea the—of the cost of the training, \$9 million to get a pilot up to that—those standards, and the fact that, with

their aviation bonuses over the next 9 years amount to \$225,000. So, those are two things that we have to face as a reality.

The second thing that, to me, from my personal conversations with pilots, is the fact that they're not flying the sorties that they were flying before. They want to fly. And it used to average about six sorties a week, and now it's down to about three, from what we've found out. And then the additional duties, since we've downsized, a lot of the pilots are doing things that were heretofore not done by pilots.

So, on those three issues, any comments you want to make now are fine, but why don't you—for the record, if the two of you would respond to those as problems that are there.

[The information referred to follows:]

SENATOR INHOFE. What are we doing to address the upcoming pilot shortage—both within DOD and outside DOD?

GENERAL SELVA AND GENERAL MCDEW. In 2014, the AF stood up a Total Force Aircrew Management division to seek efficiencies and ways to better utilize Active Duty, Air National Guard and AF Reserve aircrew. Additionally, the Air Force developed the Total Force Aircrew Management Amplified Affiliation Program, which was implemented in March 2015 to encourage separating pilots to affiliate with the ANG and AF Reserve.

Working outside of the DOD, the Air Force developed the National Pilot Sourcing Forum (NSPF) to foster collaboration between the Total Force and Major Airlines on a quarterly basis. This Forum works to find ways to best utilize this “National Asset” from recruitment to production through retirement.

SENATOR INHOFE. What factors will lead to pilots departing the service—pay, training, flying hours, deployments, family, etc.?

GENERAL SELVA AND GENERAL MCDEW. Pilots leave the service for many of the same reasons as other career fields. One of the biggest reasons we see them leaving today is the increased OPTEMPO of a smaller force. As the administrative and personnel functions of the military have been reduced, increased additional duties and non-flying duties have been added. More non-flying duties coupled with insufficient flying/training opportunities and increased deployments (which restrict training to all mission sets) make job satisfaction and quality of life reduced. Finally, the outside active duty opportunities are growing every day to include flying for the airlines.

SENATOR INHOFE. Are bonuses enough to keep our pilots in our military?

GENERAL SELVA AND GENERAL MCDEW. No. Bonuses alone are not enough. The Aviator Bonus has historically proven to be an effective tool to assist with pilot retention, but monetary compensation is not the only factor for separating from the military. The new dynamics of increased OPSTEMPO, manpower shortages, an improving economy, and major airline hiring, all influence servicemember retention decisions. Current bonus caps also restrict the services from increasing incentives, which limits flexibility in reducing the influence of greater compensation outside of the service. Bonuses themselves are not a sole solution, but can reduce some of the causal factors for separation.

SENATOR INHOFE. How do the flying hours our pilots are getting today compare a decade ago? How do they compare with our Allies and adversaries?

GENERAL SELVA AND GENERAL MCDEW. The United States Air Force currently flies approximately 2.0 million flying hours per year, including all training and operational missions. However, these flying hours vary a great deal depending on weapon system type, pilot end-strength, numbers of squadrons/aircraft, and operations tempo.

In fiscal year 2004, the Total Force “peacetime training hours” were programmed at 1.7 million flying hours. The same Total Force “peacetime training hours” in fiscal year 2014 were programmed at 1.2 million flying hours.

The table below provides a breakdown of these averages by requested weapon system type and provides the average of annual flying hours per pilot from fiscal year 2004 and fiscal year 2014:

	FY04	FY14
Mobility:	360	230
Tanker:	405	200
Bombers:	200	225
Fighters:	205	160

Current Average Flying Hours per Pilot USAF:

Average 223

European Allies:

Average 183

Russia:

Average 120

China:

Average 110

SENATOR INHOFE. Are our pilots getting enough flight hours and training to remain fully combat ready in all the mission areas?

GENERAL SELVA AND GENERAL MCDEW. Yes. There are many factors that influence a pilot being fully combat ready. Our peace time flight hours are designed to provide training opportunities to achieve full spectrum readiness, while deployed contingency flying may provide only a partial opportunity to train to the designed capability of the weapon system and crew. A balance of training opportunities, and adequate resources, in relation to peacetime and contingency flying is necessary for the Air Force to improve readiness.

SENATOR INHOFE. Are you also going to have issues with aircraft maintenance manning shortfalls?

GENERAL SELVA AND GENERAL MCDEW. The United States Air Force requires approximately 3,000 additional maintainers to meet readiness requirements based on current force structure projections. Retention of legacy aircraft is driving additive maintenance manpower requirements to beddown the F-35 and support legacy maintenance shortfalls. F-35 Phase I Manning Plan meets Initial Operational Capability requirements; however, subsequent F-35 growth (new unit standups) are at risk. Additive force structure requirements vice unit conversions compound the challenge of providing experienced maintainers to meet F-35 and legacy maintenance manning requirements.

Completed actions to date to alleviate the maintenance manning shortfall include:

- Moved 39 Active Association Active Duty (AD) maintenance personnel to F-35 bases.
- Transferred 18 A-10s to Backup Aircraft Inventory, enabling 130 A-10 maintenance personnel to move to F-35 bases.
- Established 2-year contract maintenance for F-35 Aircraft Maintenance Unit (AMU) at Luke AFB.
- Converting F-16 maintainers to F-35 at Hill AFB, UT in fiscal year 2015/2016.

Then the last thing I wanted to mention is—General McDew, in your written testimony, you talked about infrastructure shortfalls, and you didn't say anything about that in your abbreviated testimony. Is there anything you want to mention about the infrastructure problems that we're having right now?

General MCDEW. Senator, I have to get a little bit more depth, but one of the concerns I have is the ability to recapitalize the infrastructure, both on the sea, air, and land. There are considerable things that will need to be addressed over the next 5 to 10 years that will be problematic if we hit sequestration as we know it.

[The information referred to follows:]

I am aware of several infrastructure issues that could impact TRANSCOM, and if confirmed, I will continue efforts across the Combatant Commands, the Services, other agencies as applicable, and industry to find long term solutions.

In terms of port infrastructure, my biggest concern is Military Ocean Terminal—Concord (MOTCO). As the main strategic seaport for shipping ammunition to the Pacific Command (PACOM) area of responsibility (AOR), no other port on the West

Coast can meet MOTCO's ammunition throughput capacity. Much of MOTCO's infrastructure dates back to World War II. Although substantial funding has been programmed to address major deficiencies, additional infrastructure projects are still needed to address remaining deferred maintenance issues and maintain operational readiness.

Additionally, while en route infrastructure has improved over the last few years, there remain key infrastructure shortfalls in the European Command (EUCOM) and PACOM AOR which could hinder strategic mobility operations. My intent is to advance efforts underway to highlight these shortfalls in the posture planning efforts and budgetary processes in order to enhance the ability to rapidly respond globally.

I am also concerned with continuation of aircraft modernization efforts to replace aging components in the existing organic fleet. The vast majority of the air refueling fleet is over 50 years old and vulnerable to potential fleet wide maintenance issues due to aging. Bringing the new KC-46 on line as scheduled is essential to help mitigate this vulnerability.

With respect to sealift, the Ready Reserve Force (RRF), the key first response strategic sealift component for moving U.S. Army and U.S. Marine Corps units to the fight, must also remain ready to meet the needs of Geographic Combatant Commands. As 1.6 million square feet of RRF roll-on/roll-off capacity ages out of service in the next 10 years, an executable recapitalization plan must be in place to ensure long-term viability of surge sealift.

DOD uses a combination of self-deployment, trucks, and rail to get equipment to ports of embarkation. The primary issue with surface moves supporting full scale deployment operation is a large portion of the current fleet of commercial chain tie-down railcars is facing age-mandated retirement before 2020.

Finally, one of the greatest challenges to our Nation is the existing cyber threat to logistics and mobility systems including supporting infrastructure. The ever present risk posed by our cybersecurity vulnerabilities across this complex and interdependent enterprise requires responsive, reliable and resilient joint deployment and distribution command and control capabilities. These essential capabilities enable TRANSCOM the freedom to operate as needed on all networks across the joint deployment and distribution enterprise to meet mission objectives.

Senator INHOFE. Yes. Appreciate that very much.

Thank you, Mr. Chairman.

Chairman MCCAIN. Senator Donnelly.

Senator DONNELLY. Thank you, Mr. Chairman.

General Selva and your family, thank you very much. General McDew and your family, thank you very much. Both of you are very lucky guys to have such wonderful families.

General Selva, last week a new study showed that suicide attempts are most common in the newest enlisted soldiers who have never been deployed. In June, the Los Angeles Times brought attention to an unbelievable statistic. For women ages 18 to 29, women veterans have committed suicide at a rate nearly 12 times the rate of women non-veterans of the same age. And so, this—these are folks who were Active Duty not too long before that time. And I want to know, if you're confirms, will you prioritize mental health as a critical readiness issue?

General SELVA. I will, Senator, and I look forward to working with this committee to make sure that we have the mental health providers that are available to our soldiers, sailors, airmen, and marines, particularly those in crisis. So, subject to your confirmation, I commit to doing so.

Senator DONNELLY. And how will you work to reach female servicemembers who face unique stressors, as well as also young enlisted troops who confront and worry about things like stigma regarding mental health care?

General SELVA. Senator, I believe that there should be no stigma attached to a soldier, sailor, airmen, or marine who has the courage to seek mental health care when they're in crisis. I will do ev-

everything in my power, in this job and any other job, to make sure that we try to remove that stigma from our military.

Senator DONNELLY. Okay. I would also encourage you to keep in mind some of the unique challenges that our female servicemembers face every single day.

In regards to what Senator McCain said before about General Dunford's testimony regarding Russia as perhaps the most dangerous threat to our country, there's recent reports that just came out about a directed energy weapon they've developed. This is incredibly troubling. It can disable sophisticated guidance systems, navigation systems, communications systems. And I was wondering if there has been any discussion as to how to counter this threat at this time?

General SELVA. Sir, in the position I hold at TRANSCOM, I'm not aware of any conversations, but I will endeavor, if confirmed, to get briefed up on any—

Senator DONNELLY. If you could, that would be very, very helpful, because it, from the description, seems to be an incredibly troubling and dangerous weapon that is being worked on right now.

Second is—and you're with Transportation Command—but, second is in regards to North Korea. I was recently there, and—not in North Korea, but in South Korea—met with the leadership there and met with some of the leaders in China to talk about this threat. And I'd like to get your perspective of how you assess that threat from North Korea, and what plans you're aware of right now to deal with it.

General SELVA. Senator, North Korea represents one of those opaque governments that we have very little visibility into. So, assessing the intentions of the North Korean government is something that requires a very careful intelligence analysis of what we can learn about the country. If confirmed, I look forward to working with the Office of Defense Intelligence, as well as the inter-agency and the Intelligence Community, to try to unpack the threat that is North Korea, not only from a perspective of their capabilities, but of their intentions.

Senator DONNELLY. General McDew, I was in Iraq a few weeks ago with a group led by Senator Kaine, who's sitting next to me. And one of the things we talked about was with some Sunni tribal leaders. And one of them was from Haditha. And he said that his city was surrounded, at the present time, by ISIS, that many of the people who live there were eating grass because there is no food coming in, that babies were not able to get milk, and that the population was in an extraordinarily dire situation. We had discussed with the military there about having an airlift come in to Haditha. It was mentioned, in testimony here about a week or so ago by one of the witnesses, that, "Well, the Iraqi air force has the ability to put a C-130 in there, but they have not." And you will be in TRANSCOM. And so, I would ask you to take a look at this particular problem. I would love to discuss it further with you in the next few days. But, we have people who are starving, in effect, and we have the ability to try to do something about it.

Last, I would like to mention to you, General McDew, about the breach that we saw at OPM [the Office of Personnel Management]. It began in May 2014 with hackers using a contractor's com-

promised username and password. And you had mentioned about working with our commercial partners and civilian partners. I think it's critical, in your position coming up, to make sure to work with them to harden their networks, to harden their abilities. And I was wondering if you could talk to me a little bit about appropriate measures you think we need to take, moving forward.

General MCDEW. Senator, if confirmed, I will do all the things that you suggest. It is a threat that we must deal with. And I believe TRANSCOM has done some things to date that are foundational. We would just try to extend those and strengthen them.

Senator DONNELLY. Thank you very much.

Thank you, Mr. Chairman.

Chairman MCCAIN. Senator Fischer.

Senator FISCHER. Thank you, Mr. Chairman.

General Selva, as you know, the Department is currently building a cyber mission force of about 6,000. Overall, how do you measure things like readiness or force structure adequacy when we're largely unable to do those conventional net assessments of our adversaries' capabilities?

General SELVA. Senator, I think the first measure of our readiness in the cyberdomain is our ability to defend the networks that allow us to provide command and control of our military. And, as a result of that work, the cyber mission teams and the cyber protection teams have been put in place to protect those networks that our combatant commanders depend on to execute command and control over their fielded forces.

I think three things have to accrue to cyber on a broader sense. The first is our ability to attribute whether or not the cyberintrusion is criminal activity, amateur hackers, or sponsored nation-state activity, because that then will condition the response of the Nation. Will we respond to the Nation-state, will we respond to the criminal threat, or will we respond to the amateur hacker? And I think that will ultimately be the measure of the wisdom of how we have put together the cyberprotection teams on the cyber mission force.

Putting a number of 6,000 against it may or may not be the right measure. If confirmed, I look forward to working with Admiral Mike Rogers, in his roles in the National Security Agency as well as U.S. Cyber Command, to try to get to that definition and continue to advocate the capability that will allow us to defend our cybernetworks.

Senator FISCHER. And as you look at those different threats and the sources of the—those different threats, how are you willing to step forward, I guess, to look at developing a policy in what our response should be to each of those threats? And again, when you look at the size of the force, with 6,000, do you differentiate within that cyber mission force the direction that each of those members will take once the threat is identified, the source of that threat is identified?

General SELVA. Senator, I think—

Senator FISCHER. But, my real question is, What are we going to do with policy?

General SELVA. Senator, that was exactly where I was headed, which is, in the absence of statutes that define the responsibilities and authorities of our law enforcement agencies and our military capability to react in cyber, we run into those policy questions as a consequence of the nature of the threat. And so, I think one of the more powerful things we can do is to put the power of statute behind those authorities and responsibilities so that we can define the lanes in the road and allow law enforcement to work those issues that are uniquely law enforcement, and allow the military to respond to those military threats that emerge in cyber. And I look forward to be—to working with the committee on those kinds of policies as we move forward on this issue.

Senator FISCHER. I look forward to working with you on those issues, as well, because I think cybersecurity in all realms is a priority of this country, and should be, and we need to take action on it.

When General Rodriguez stated that Libya-based threats to the U.S. interests are growing and that Libya is emerging as a safe haven where terrorists are able to train, where they're able to rebuild with impunity, I think all of us on the panel realize that was the case, but my question to you is, Do you think that we are doing enough to prevent those terrorist groups from establishing these safe havens in Libya? And, down the road, what are the lessons that we've learned from our experiences in Syria with regards to what is now happening in Libya?

General SELVA. Senator, I'm aware of the work we're doing with our allies, partners, and friends across all of North Africa to look at the growing threat from al Qaeda and al Qaeda-related terrorist organizations. I have not had an opportunity to dive into some of other issues that are going on right now in the ungoverned regions in Libya, specifically. But, I think the lesson of the last decade and a half is, in areas that are poorly governed or ungoverned, those radical elements are given the freedom to develop their violent capabilities and to inflict damage on U.S. interests and our citizens abroad. And the extent to which those areas are left ungoverned, they have the freedom to do that. So, I look forward to working with Dave Rodriguez and his team in AFRICOM [United States Africa Command], and Congress and the committee, to look at opportunities to continue to counter those threats across North Africa.

Senator FISCHER. When we look at the time that we've watched Syria fall into chaos and again become a training ground for terrorists, and we compare that to what's happening in Libya, though, what—at what point do you say, "Enough. This is—it is time now for the United States to step forward?" What have we learned in Syria?

General SELVA. Senator, I think the policy of the United States is an issue that we ought to discuss about our position in the—in regards to all of the parties that are fighting in Syria. And we have to make a decision. And that decision shouldn't be the consequence of one person's opinion, but the collected opinions of the people who have studied the area. And so, I worry a little bit that we not jump to a conclusion on what the best outcome would be for Syria, that—but we take a reasoned approach to our national interests in the

region and to the stability of the region, writ large, with respect to all of the parties that are now fighting in Syria.

Senator FISCHER. I know you served at SAC [Strategic Air Command], and you've recently been at STRATCOM [United States Strategic Command]. I welcome you back anytime so we can continue our discussion on the need for modernization of our triad.

General SELVA. Thank you, Senator.

Senator FISCHER. Thank you, sir.

Chairman MCCAIN. Senator Selva, the conflict in Syria has been going on for 4 years.

Senator KAINE.

Senator KAINE. Thank you, Mr. Chairman.

And thank you to our witnesses. Congratulations on your nominations.

Just to pick up on Senator Fischer, I also agree that the policies around cyber is really important for us to continue to dialogue about. We had testimony within the last year, I think it was from Admiral Rogers—it was somebody connected with Cyber Command—and the testimony was, with respect to a particular cyberattack, if there was this kind of cyberattack, it could lead to war. And so, my followup question is, Well, so then a cyberattack, in and of itself, is not war? It's some prewar kind of an attack? And then the answer to that was pretty hazy. I have been on this committee for 2½ years now. I don't really have an understanding for what our cyberstrategy is. Do we have a line by which we would say a cyberattack constitutes war? Do we have a clear doctrine for the kind of response that we should make to cyberattack? What is the policy with respect to cyberdeterrence, cyberdefense, and then offensive use of cyber so that—this is not really sort of TRANSCOM. I'm not directing a question to you. But, it's more to colleagues on the committee. I think we need to educate ourselves more and challenge our military brass to understand what the current dimension of cyberstrategy is. I appreciate Senator Fischer's questions in that regard.

A compliment to each of you with respect to TRANSCOM. I think TRANSCOM is a great example of integration. I mean, TRANSCOM is cross-service. It is public and private. You probably do as good a job of—at balancing Active, Reserve, and Guard as any of the components of the military. Senator Donnelly and I were in Iraq, and the folks flying us around in C-130s were—I think they were Pennsylvania air reservists on a 4-month stint. And that's pretty common. I hope that, in your new role, General McDew, as the head of TRANSCOM, and General Selva, taking that lesson from TRANSCOM to the Vice position with the Joint Chiefs, I hope you'll take that—the lessons of that kind of integration—public/private, cross-service, Guard/Active/Reserve—and spread how that can be done more generally throughout the DOD [Department of Defense]. If you want to just comment upon that, I'd love to hear what you have to say.

General SELVA. Senator, I appreciate the compliment to TRANSCOM. It is true that the Command absolutely depends on the total force and the contribution of our commercial partners to our strategic lift around the world. If confirmed for the job as Vice Chairman, I look forward to bringing some of those lessons into the

Joint Staff and into the interagency. And I look forward to working with this committee and finding ways to make that possible.

Senator Kaine. General McDew?

General McDEW. If you allow me, Senator, just to brag on the men and women of the—my current command, Air Mobility Command, they do it better than anyone, because they've lived through this together since 1968. We have had these bonds and these alliances and—with the Guard and Reserve—and we cannot operate without them.

Senator Kaine. General Selva, the military leadership at the Pentagon that gets over the finish line on audited financial statements, they'll have a star put on the sidewalk up here. I hope that you're going to be part of the team that gets us there. We've got a 2017 date by which we're supposed to be there. This is a question that Senator Manchin has been a real bird-dog about, always asking about it. Talk to us about the status of the move toward audited financial statements for the Department of Defense (DOD). Because it sure makes it a lot easier for us to advocate, for example, about sequester relief if we know that we are on a path to be able to do that.

General SELVA. Senator, from my position at TRANSCOM, we are one of the combatant commands that will have to assert our audit readiness as a consequence of managing a working capital fund that moves all of our equipment and personnel around the world. From that perspective, I can tell you, we're making significant progress towards audit readiness: towards being able to account for every dollar that we spend.

Across the Department, I'm going to need some time to take a look at where each of the individual Services are, but I will continue to be an advocate, across the enterprise, that we be prepared for our audit readiness deadline of October 2017. If confirmed, I look forward to working with all of the Service Chiefs and Secretaries to make that happen.

Senator Kaine. Thank you.

And just one last comment. I think we're about 24 hours into the Ramadi campaign in Iraq, and it's going to be a real test of the training and the work we've done with the Iraqi military and Sunni leaders in the last year, the success of this campaign. And I just know that we're all thinking about that and monitoring the success of that mission carefully.

Thank you for your service.

Thank you, Mr. Chairman.

Chairman MCCAIN. Senator Rounds.

Senator ROUNDS. Thank you, Mr. Chairman.

Gentlemen, thank you both for your service. Thank you also to your families for their backing of you, and their sacrifice. It is greatly appreciated, and it does not go unnoticed.

Let me just begin. I find it interesting that both of you have—or that you have identified, General Selva, in your opening comments or in response to the Chairman, the list of where you see our greatest threats. I'm just going to identify that, in the new national military strategy, General Martin Dempsey, current Chairman, describes the need to counter revisionist states that threaten international peace and security. The strategy identifies Russia,

China, Iran, and North Korea as the four principal revisionist states. General Dempsey also writes that the U.S. military advantage has begun to erode and that future conflicts will come more rapidly, last longer, and take place on a more technically challenging battlefield.

In which areas—General Selva, in which areas has the U.S. military advantage begun to erode, if you agree with his statement? Where would you recommend that DOD focus its investments in response to this erosion?

General SELVA. Senator, I think there are four principal areas where that erosion has started to take place. The first is space. Up until the turn of this decade, the United States had pretty much dominance in space. That's no longer true. Across the networks of cyberspace, we see intruders and nation-states acting to counter our capability to provide the command and control for our military that gives us the speed of decision on the modern battlefield. Then, I'd—it wouldn't be fair not to highlight the fact that our opponents are looking—and our potential adversaries are looking for asymmetries across our conventional and nuclear capabilities. As they detect and act against those asymmetries, they erode the capability that we have within our current force structure to react to threats that might emerge.

So, I would place the four in about that order.

Senator ROUNDS. Okay.

General McDew, you identified cyber as being an item of major concern. I agree with your assessment. I'm just curious, though, it—with regard to whether we're talking about policy or as we talk about statutory assistance, if you've looked at, and you've begun, the process, where do you see the most important statutory changes, if any, that DOD would be required to make recommendations with regard to cyber capabilities and operations? Are there specific statutes that you've identified yet in your review?

General MCDEW. Senator, I have not had that level of depth to have specific statutes. But, if confirmed, I will endeavor to do so.

Senator ROUNDS. General Selva?

General SELVA. Senator, the only area that, as the TRANSCOM commander, that I looked for increasing capabilities is the ability—having looked into contract law and the imposition of specific requirements for reporting on intrusions to work across the inter-agency, to make sure that any location, any organization that received a notification of an intrusion into a commercial or military network had an affirmative obligation to report that intrusion so that we could defend the networks that make us successful. That authority is tied up in a variety of statutes that prevent agencies from speaking to each other clearly across law enforcement and the military.

Beyond that, I have not spent the time and effort yet to work with Admiral Rodgers at Cyber Command to look at the broader national issue of cyberdefense.

Senator ROUNDS. Okay.

You identified, as one of those four existential threats, the country of Iran. In your view, is Iran still the leading state sponsor of terror?

General SELVA. Yes, sir, they are.

With the proposed nuclear treaty or nuclear agreement which was announced this morning, if Iran is provided economic sanctions relief, do you believe Tehran would use some of these funds to enhance its military capabilities in support for terrorist organizations?

General SELVA. Senator, I haven't yet had the opportunity to study the entire agreement, but, on its face, what I've heard from the press, the immediate lifting of sanctions or the sequential lifting of sanctions will give Iran the access to more economic assets with which to sponsor state terrorism, should they choose to do so. And I think we need to be alert to that possibility. And, as the military, we have an obligation to provide the President with a full range of options to respond. So, if confirmed, I look forward to working with the Department to examine those issues more deeply.

Senator ROUNDS. How do you respond to any additional Iranian aggression that may be forthcoming with their additional capabilities for procuring weapons?

General SELVA. Senator, absent the actual context of that specific intervention and that specific sponsorship of terrorism or other malign activities, it's difficult me—for me to actually give you an answer to that question, other than to say we need to have a range of available options with which to respond, whether it's militarily, diplomatically, economically, or otherwise.

Senator ROUNDS. But, you clearly recognize that the additional threat would now exist.

General SELVA. Absolutely.

Senator ROUNDS. Thank you, sir.

Chairman MCCAIN. Senator Manchin.

Senator MANCHIN. Thank you very much, Mr. Chairman.

And thanks, both of you all, for your service. And also, congratulations on your nominations. And I'm looking forward to working with you in the future.

Let me just say—and maybe, General Selva, if I may ask this question, because I think both of you have answered, and General Dunford answered the question I asked last week and Senator McCain just asked again—the greatest threat—and I think you all identified Russia—is that opinion held by most of our military higher echelon, if you will?

General SELVA. Senator, I believe it is, but I would actually quote an article I read early this morning from Dr. Andy Krepinevich. A quote in the article said that, over the better part of the last decade and a half, and in the years that preceded it, this Nation was able to look at the threats to our security through a periscope. And today we find ourselves having to analyze them through a kaleidoscope. And so, as each facet of the threat becomes apparent to us, we have to have the capability to react. And so, my reaction to the four major threats to the security of the United States comes from a military perspective. I'm not necessarily indicating that any of those states has a current intent to attack the United States.

Senator MANCHIN. Sure.

General SELVA. But, all of them have the capability. And so, we need to be ready to respond.

Senator MANCHIN. I've had the opportunity to have some dialogue with some of the people that were concerned about the relationships of the United States and Russia. And with that being said, could you comment on the state of the relationships, the dialogue going on, and what you would do to either improve, change, or have a different direction?

General SELVA. Senator, I haven't personally been involved in the dialogue, so it wouldn't be fair for me to comment on the dialogue itself, but what I will say to you—

Senator MANCHIN. Do we have one, of your knowledge?

General SELVA. Yes, sir. And what I will say to you and the committee is, if confirmed for the position of Vice Chairman, I think it is very important that our senior military leaders maintain an open dialogue with the senior military leaders of competitor nations so that we can minimize the chance of miscalculation or missteps in any military operation anywhere in the world. That goes for Russia and China, specifically, and for any other country that might wish us ill. We need to open those dialogues to make sure that we—

Senator MANCHIN. What I'm—and we're speaking about Russia being our greatest challenge right now, and the greatest threat, or possible threat, because of their capabilities. With that being said, I've spoken to some people from that arena, and they're telling me that the Cold War is colder today than it was when it declared.

General SELVA. Senator, I don't know that to be true or false, other than that they have said it. But, what I will tell you is that my experience is that the dialogue between senior leaders across our militaries has been open and frank. That helps us avoid miscalculation, and—

Senator MANCHIN. I'm just saying we're not hearing an awful lot of dialogue about this relationship or lack of a relationship. And now, when two of our top people who basically are on the verge of being nominated to lead our military forces have identified it, and not hearing anything before, I think it kind of caught a lot of us by surprise, if you will—

General SELVA. Yes, sir.

Senator MANCHIN.—that that would be your direction.

With that being said, I know the Iran nuclear deal we just talked about, it was revealed today that we have tentative agreement on that. I think, when we asked for your response on policy, you said—when we asked what would be a good deal for the U.S. from a security standpoint, your response was “Important outcomes includes rolling back Iran's nuclear program, providing the international community with necessary access and transparency while preserving the sanctions imposed on conventional arms and ballistic missiles.” And I believe some of those, conventional arms and ballistic missiles, have expired terms on them at time—do you consider that a concern or a problem?

General SELVA. Senator, my understanding is that those sanctions have a 5-year and an 8-year term, having read the open press this morning. I haven't seen the details of the agreement and how those sanctions will be rolled back. But, it is my understanding, within the agreement, that there are snap-back provisions, that if we find Iranian behavior not to comport with the agreement, that

we can snap back the original sanctions. What I don't know is whether that applies to the conventional weapons and the ballistic missile technologies. So, if confirmed, I'm committed to taking a much deeper look at the text of the agreement to determine where our maneuvering—

Senator MANCHIN. One final question I have. Shortly after the fall of Ramadi, Secretary Carter stated the Iraqi forces showed no will to fight despite vastly outnumbering ISIS fighters. There is at least one group in Iraq that I have no doubt has the will to fight, and that are the Kurds. And we've spoken about that. Are there ways to empower the Kurds and the Sunnis to engage and to help them without undermining, I guess, the one-country solution or one-state solution, if that's our policy?—which I'm not certain I agree with, but, for the sake of discussion, if you would have any comment on that.

General SELVA. Senator, our policy is to continue to work through the government in Iraq to empower all of the parties in Iraq that are willing to fight against ISIL and to defend Iraqi sovereignty. I would need more time to be able to examine the issue of whether or not supporting one party over the other makes more sense, or not. If confirmed, I look forward to doing so.

Senator MANCHIN. Thank you, sir.

My time is expired.

General SELVA. Thank you, sir.

Chairman MCCAIN. Senator Ernst.

Senator ERNST. Thank you, Mr. Chair.

And thank you, gentlemen, for being here today. TRANSCOM is always very exciting to me. I am a transporter and a logistician, so I appreciate your service, especially in that area, very, very much.

General McDew, I'd like to start with you. Senator Kaine had pointed out the fact that TRANSCOM does work between the National Guard, the U.S. Army Reserves, Active Duty component, and many, many contractors, wonderful civilians who fill in those gaps. So, I would just like to visit with you a little bit about your thoughts on the role of the National Guard in supporting TRANSCOM's mission to provide full-spectrum mobility solutions and enabling capabilities. And, obviously, I have strong opinions there, but I'd like to hear yours, General McDew.

General MCDEW. Senator, I believe we may share the same opinion.

Senator ERNST. I think so.

General MCDEW. I am a strong supporter, and I am a huge fan, of our National Guard and Air Force Reserves. We could not operate without them. It is vital to the defense of this Nation and vital to everything we do in the transportation business. I can't imagine doing it without them.

Senator ERNST. Thank you. And do you see that there are ways that we could further enhance working with our Reserve and our National Guard units? Is there a way to complete that bridge that we have existing out there?

General MCDEW. I believe, Senator, that we need to continue to look at the authorities which our guardsmen and reservists come to work under, look at the different statuses they work in, and see

where those can be streamlined. We also need to be very careful, though, that we understand and fully appreciate the differences between the Active Duty, the Guard, and the Reserves, and work with employers to ensure that that remains as strong as we think it ought to be.

Senator ERNST. That's exceptional. I appreciate that very much. And you brought up a great point that we don't often discuss is our employees that do see us gone for an extremely long periods of time, whether it's just from a 2-week annual training period or an IDT [inactive duty training] weekend to the year-long deployments that we have seen overseas. But, I do believe that the National Guard and Reserve components within transportation are essential to supporting any mission that we have overseas. And so, I thank you for that. I'd like to thank our employers out there for being willing to support our men and women that serve in uniform in a Reserve and Guard status.

General Selva, of course, let's go back to U.S. TRANSCOM, as well. And what lessons learned, significant events, are you taking forward from TRANSCOM into the Vice Chair's position? What are some of the greatest assets that you will bring forward, having those types of responsibilities with TRANSCOM?

General SELVA. Senator, I think the greatest lesson I carry forward into any job is the dedication of our soldiers, sailors, airmen, and marines, and coastguardsmen, and all of their civilian counterparts, both in and out of government, to get the job done. They depend on us for sound leadership and for advocacy. And so, what I will take into the position as Vice Chairman, if confirmed, is that—that undying obligation to be an advocate for the soldiers, sailors, airmen, marines, and coastguardsmen who lay their lives on the line for all of us every day.

Senator ERNST. Thank you very much.

I just want to score again—or underscore again what some of the conversation has been today with regards to the Iran deal. And while we continue as legislators to work through what this deal entails, as well, I did hear you say, General Selva, that you do believe that Iran with potential nuclear capabilities is a great threat to the United States. Is that correct?

General SELVA. Iran with nuclear capabilities would be a threat to our regional partners, to our allies, our friends, and to the United States. And so, the extent to which this agreement fore-stalls their ability to build a nuclear weapon, I think we ought to look at all of the provisions therein to make sure that we're ready to respond for whatever else might come.

Senator ERNST. Thank you.

And again, as well, with sanctions relief providing approximately \$100 billion to Iran, I also believe that this would serve Iran's purpose of funding proxies throughout that region and being a state sponsor of terrorism. So, I do have great concerns with this deal. I have great concerns with Iran, overall, as well as a number of issues that we have worldwide. But, that's for yet another day.

Thank you, General Selva. Thank you, General McDew. I appreciate your service very much to our Nation.

Thank you.

Chairman MCCAIN. Senator King.

Senator KING. Thank you, Mr. Chair.

I want to thank our witnesses for their service.

And, General Selva, you and I have met before. You are an extraordinarily thoughtful and straightforward officer, and I hope to encourage you, in your new position, which is one of the most important in our government, where you will be directly advising the President, particularly the—being on the Deputies Committee of the National Security Council. Will you be straightforward, honest, and courageous in providing your best advice, and not be intimidated by the circumstances that surround your being in that position?

General SELVA. I will, Senator. That's the only person I know how to be.

Senator KING. Well, I certainly hope so, because in situations like this, policymakers don't need "yes" men, they need criticism and straightforward advice. And I certainly hope that you're prepared to provide that. That, to me, is really the fundamental responsibility of this position.

To go to a more specific question, we had a—an explosion in Afghanistan a few days ago. Apparently over 30 people were killed. Do you have a view of the security situation in Afghanistan, and what we can and should do in order to maintain the progress that's been made in that country?

General SELVA. Senator, it's been some time since I traveled to Afghanistan, but my overall impression is that the Afghan national security services, both their military and their national police, are making progress. And they are confronting the Taliban, insurgents, and terrorists where they present themselves. And so, my view is that we need to empower them to continue that work. They have taken ownership of the sovereignty of the country of Afghanistan, and that is the place where we want them to be. And so, I think we need to be careful about the assumptions we made, relative to the timelines for their willingness and ability to manage their own sovereignty. And that goes to the stability of the government and the central government's command and control over those forces. And I think that's the place we need to go, it's to think that through in that domain.

Senator KING. So, I take it your advice would be that our disengagement should be based upon conditions on the ground and not arbitrary dates in a calendar.

General SELVA. Senator, I believe that's true.

Senator KING. Thank you. I hope you will pass that advice on in the strongest possible terms.

We've talked a lot about cyber this morning. And I think there's plenty of responsibility to be spread around. I think it's one of the great disappointments of my 2½ years here that we have not yet brought significant cyber legislation to the floor of the U.S. Senate. And when we have a catastrophic breach, to go home to our constituents and say, "Well, we couldn't do it because four different committees had authority, and we really just couldn't get our act together," that's not going to be satisfactory to the people of the United States. So, certainly there needs to be action here in Congress. And hopefully that will be forthcoming this year.

On the other hand, it seems to me that we need to be thinking about doctrine and the development of a doctrine of cyber, which we don't seem to have now, other than defense. And in my view, there has to be an offensive capability which our adversaries understand, and understand will be applied. The only good thing about the theory of deterrence and the mutually assured destruction which applied to our nuclear posture for 70 years is that it worked. And it just seems to me logical that if our policy is strictly defensive, we're like a guy in a fight who won't be allowed to punch. Eventually, you're going to lose that fight. I would urge you to think about this. And I'd appreciate your thoughts. Assuming we can identify it's a state actor, not an amateur hacker or a criminal conspiracy, but a state actor, it seems to me there has to be some price to be paid. Would you agree, General?

General SELVA. I do agree, Senator, and I look forward to working with the committee, if confirmed, to examine the doctrine for the offensive use of cyber capabilities, both as a deterrent and as an offensive weapon in warfare.

Senator KING. And I hope not only with the committee and with Congress, but also with that all-important Deputies Committee of the National Security Council. That's where it seems to me this policy has to emanate, and then we can work it over here.

General McDew, I assume you agree?

General MCDEW. I do agree, Senator, in that the role of attribution—the interesting part, for me, as I evolve my knowledge of the cyberthreat, is that it is such a low cost of entry, and so much damage can be wielded from it.

Senator KING. Without consequence.

General MCDEW. Right.

Senator KING. And we need to be talking about—there need to be consequences.

Well, I hope you gentlemen will pursue that, because right now we're playing defense, and we're not winning very—we're not getting very far. We're getting—it's getting more and more serious, and we are facing a catastrophic attack, in my view, akin to the next Pearl Harbor. Both we in Congress and the administration have to be thinking about a more comprehensive doctrine and not just talking about how do we work together for defensive purposes.

Again, gentlemen, thank you very much.

General McDew, I understand your early flying career took place at Loring Air Force Base in northern Maine, and delighted to have you before us.

Congratulations on your nominations. Thank you.

Thank you, Mr. Chairman.

Chairman MCCAIN. Senator Sullivan.

Senator SULLIVAN. Thank you, Mr. Chair.

Gentlemen, thank you for your service, and congratulations on your nomination.

General McDew, I just want to add a compliment. At least in my career, I've had the opportunity to work with some of the TRANSCOM military members and, you're correct, I think, in many ways, unheralded workhorse for the U.S. military in many ways behind the scenes. So, I just want to commend all of your

members on a great job, and want to commend your families for their service, as well.

General Selva, I just wanted to touch briefly—it's obviously getting a lot of press right now—on Iran. And in one of the most powerful testimonies we had in front of this committee in the last half year was Henry Kissinger, who came in and talked to this committee about devising strategy. And one of the things he mentioned, that one of the most important things we need to ask ourselves as we're putting together strategy is, What do we seek to prevent as a country, no matter how it happens, and, if necessary, alone? Kind of his top strategic thought for this committee.

I had asked Secretary Carter, during his confirmation hearing, if he thought preventing Iran from obtaining a nuclear weapon would fall into that category? What do we seek to prevent, no matter how it happens, and, if necessary, alone? He said yes, absolutely. Preventing Iran from obtaining a nuclear weapon. Now, that was during his confirmation testimony. It'll be interesting to see if he still believes that, given the agreement that's been announced. If—do you agree with him on that?

General SELVA. I agree with Dr. Kissinger, that if we can find no allies, partners, and friends to help us achieve the results that we believe are important, we have to be willing and able to go it alone.

Senator SULLIVAN. But, do you think that preventing Iran from obtaining a nuclear weapon falls into that category, like Secretary Carter did in his confirmation hearing?

General SELVA. Senator, I agree that preventing the Iranians from getting a nuclear weapon is a critical national interest.

Senator SULLIVAN. So, if this agreement, once we unpack it, allows for a pathway to develop a nuclear weapon after 10 or 15 years, would you disagree with it—

General SELVA. I will reserve—

Senator SULLIVAN.—in your personal view?

General SELVA. I will reserve judgment until I've had the opportunity to look at the entire agreement.

Senator SULLIVAN. Well, I'm just posing a hypothetical. In your personal view, if the agreement, in 10 to 15 years, allow the Iranians to have a pathway to obtain a nuclear weapon, do you think that's in the national interest of the United States?

General SELVA. Then we will have to have the capability to address that eventuality when it's presented, Senator.

Senator SULLIVAN. You're not answering my question, General.

General SELVA. Sir, I am opposed to the Iranians possessing a nuclear weapon.

Senator SULLIVAN. In 15 years?

General SELVA. Ever.

Senator SULLIVAN. Okay.

General SELVA. Because—

Senator SULLIVAN. So, if this agreement allows that in 15 years, you would think that's not in the interest of the United States?

General SELVA. Correct.

Senator SULLIVAN. Thank you.

Let me ask a question. You know, you've spent a lot of time, in your career, in the Asia-Pacific. This committee's been very inter-

ested in the rebalance strategy. The NDAA [National Defense Authorization Act] that just passed with bipartisan numbers had a strong provision in supporting the President's Asia-Pacific rebalance. The countries that you actually mentioned as the top threats are all in the Asia-Pacific. And what we were trying to do in that—in the NDAA is provide additional credibility to the President. In that kind of defense guidance from Congress, should DOD be listening to Congress?

General SELVA. Senator, I think the Department always has an obligation to listen to the will of Congress.

Senator SULLIVAN. So, if there's provisions in the NDAA that say we should not be decreasing, but increasing our force posture in the Asia-Pacific to enhance and provide credibility to the President's Asia-Pacific rebalance strategy, the DOD should be doing that?

General SELVA. To the extent that supports our national objectives globally, yes, sir.

Senator SULLIVAN. If it seems that we're not doing this, if you're confirmed, will you work with this committee to make sure that DOD is implementing Congress' defense guidance to increase forces in the Asia-Pacific?

General SELVA. Senator, I will commit to you and to any Member of Congress to work with Congress to make sure that we have a balanced approach to the reaction that we have to have to the fiscal environment we live in. If that means we have to adjust our force structure on any part of the globe, I'll make sure that I articulate the position that the Services and the combatant commanders have taken in making that happen.

Senator SULLIVAN. But, Congress said we need to be increasing forces in the Asia-Pacific. Should DOD be doing that, given that that's what we're saying here, in terms of our constitutional oversight role for the defense of the Nation?

General SELVA. Sir, the extent to which Congress funds the capabilities and provides the Department the flexibility within those funds to make the will of Congress happen, yes, sir, we should.

Senator SULLIVAN. Thank you, Mr. Chairman.

Chairman MCCAIN. Senator Shaheen.

Senator SHAHEEN. Thank you, Mr. Chairman.

And thank you both for being here today and for your willingness to continue to serve.

I want to just follow up a little bit on the cyber comments—discussion that has been made this morning, because I notice that we are opening a Silicon Valley outreach office, called the Defense Innovation Unit, experimental. I wonder if you could speak to what the goal of that office is.

General SELVA. Senator, I'm not aware of the detail of that specific office, but I am aware of broad outreach across the Department to try and examine opportunities to better understand our capacity to defend and protect the networks that are represented across all of our infrastructure, commercial and military, in cyber. I look forward to actually digging into that particular issue a little bit, if confirmed for the position of Vice Chairman.

Senator SHAHEEN. Thank you.

I appreciated the opportunity for us to talk a little bit before this hearing. And one of the things that we talked about when we met,

General Selva, is the challenge that we're facing from Russia, and that one of the areas where it's a real problem is the Russian propaganda campaign that, particularly in eastern Europe, in the Baltics, they are dealing with. So, can you tell me what we're doing to respond to that Russia propaganda campaign, and whether you believe the DOD is coordinating as—in the best way to address that with the Department of State?

General SELVA. Senator, subject to our meeting, I did a good bit more research on that subject, and it is my understanding that there is an operational and tactical-level capability inside the Department to react to propaganda campaigns against our allies, partners, and friends. But, that is done in close collaboration with the Department of State and their broader responsibility for public diplomacy.

Senator SHAHEEN. And so, do you have thoughts about whether there are more efforts that can be undertaken, where we can, not only cooperate more closely, but be more proactive in our response to what Russia is doing?

General SELVA. Senator, I think we need to evaluate each of the situations where the Russians are imposing their will on their close neighbors, some of whom are our allies, and make sure that we are, in fact, telling the truth when Russian intervention threatens the security of those sovereign states.

Senator SHAHEEN. General Selva and General McDew, as you're both aware, one of the real costs within DOD is for energy. And, as you're—you have an overlapping responsibility for TRANSCOM, can you talk—I guess, General McDew, I will go to you first—about efforts to reduce energy use across the Department and why that's important?

General MCDEW. As the largest user of energy in the Federal Government, it is very important that we get our act together on how we do that. Our chief scientist and several people in my command, in Air Mobility Command, have worked with TRANSCOM and the Department of Transportation at a lot of—a number of initiatives, from how we fly our routes, how we configure our airplanes. We have done a number of initiatives to take weight off airplanes. It seems like not a big deal, but if you talk about 1 or 2 percent on an airplane that flies as often as we fly, it becomes actually significant. Flying in formation with another airplane, and all the things we can do to take the guesswork out of some of the things we do, there's more than that.

Senator SHAHEEN. Well, talk, if you will, about the targeted savings that we're looking for—that we saw last year, that we're looking for this year, and what potential you think there is in the future.

General Selva?

General SELVA. Senator, I would point out two within the transportation enterprise. First is an initiative to more effectively package the commodities that we ship over the ocean. The normal process, years ago, had us at about a 55-percent utilization rate of the space in the containers that travel over ocean. We have raised that metric to 85 percent, and are on a pathway to raise it to 90 percent, by volume. The same has been applied to our aircraft, where we build the cargo loads to a higher density. We have combined

that with an algorithm that tells us where it's the cheapest to buy the fuel that we carry. All in combination, those initiatives, have yielded about a billion and a half in savings over the last 18 months.

Senator SHAHEEN. So, it's significant to the Department.

General SELVA. Yes, ma'am.

Senator SHAHEEN. Let me also—I only have a little time left, but I understand, General McDew, that you have experience flying the KC-135s, and you may be aware that Pease Air Base in New Hampshire is the first base to receive the new KC-46A aerial refueling tankers. We are a lot proud of that. I wonder if you could talk about the importance of that program and also its future role in supporting military operations around the world.

General MCDEW. Absolutely, Senator. The unit at Pease has a strong history in air refueling and will be a valuable partner for decades to come. I have personally been to that unit. I have flown with members of that unit, and I've known that unit for a long time. The KC-135 has been the backbone of our air-refueling fleet for decades, and will be for decades to come. The KC-46 will bring new capabilities and a younger airplane to the fight. And it is great to have Pease partner. You have embraced our airmen, our Active Duty airmen who have joined that unit, and we can't thank you enough for the work that's done at Pease to bring on that airplane.

Senator SHAHEEN. Well, thank you. I think it's a great model for integration between Active Duty and the Guard. And hopefully we will continue to see the role of the KC-46 be more prominent as we look at what's happening around the world.

Thank you both very much.

Chairman MCCAIN. Thank you for that commercial, General McDew.

Senator Ayotte.

Senator AYOTTE. I want to thank both of you for being here and for your service to the Nation.

Following up on that commercial very much, I wanted to ask you right now, as I understand, with Pease and the 157th receiving the first National Guard unit to receive the basing of the KC-46A, there actually is the Site Activation Task Force right now at Pease, today, and that means approximately 60 subject-matter experts from the National Guard Bureau Air Mobility Command and the Program Office at Wright-Patterson are at Pease to prepare for the arrival of the KC-46A. I just want to ask both of you—General Selva, General McDew—is Pease still scheduled to receive 12 primary aircraft in December 2017?

General MCDEW. Absolutely.

[The information referred to follows:]

Pease ANGB is still programmed to receive the first KC-46 aircraft in February 2018. Barring any further changes to the aircraft delivery schedule, Pease is slated to receive its 12th aircraft by the end of fiscal year 2018.

General SELVA. I will echo my colleague. Yes, ma'am.

Senator AYOTTE. Well, that's terrific. And they're ready to receive them, and looking forward to it. So, we're glad that the Site Activation Task Force is there today.

In addition to that, you've spoken, General McDew, about having actually flown with the 157th and the outstanding work that

they've done for the Nation. And one of the things that's important is the strategic location of Pease in the Northeast, and the ability that we've been able to provide that support for TRANSCOM. And so, one of the things that I think makes it strategic is also the facilities that we have there.

General Selva and General McDew, do you believe it's important to maintain the existing facilities, including specifically the aircraft parking ramps, to support the day-to-day operations and contingency operations supporting TRANSCOM in the Northeast from Pease?

General SELVA. Senator, as the combatant commander responsible for managing air refueling, the ability to deploy from, and employ from, sufficient ramp space that has hydrant refueling capable of handling tankers is a strategic asset up and down the eastern seaboard. Pease is one of several locations that has that capability, but it is one we use significantly.

Senator AYOTTE. General McDew, do you think it's important that we maintain that, especially with the basing of the new KC-46A at Pease?

General MCDEW. I do, Senator.

Senator AYOTTE. Thank you. I appreciate it, General.

I also wanted to follow up on some of the cyber questions that you've been asked. And what is it that we're seeing, in terms of TRANSCOM, with additional cyberattacks? What do you believe are the biggest challenges for this area of command which is so critical to everything else we do in our ability, obviously, to defend the Nation?

General SELVA. Being in the awkward position of having the sitting TRANSCOM Commander and the nominated TRANSCOM Commander at the table, let me open.

As a consequence of the work that this committee did in addition to work that the Intelligence Community had been—had ongoing on the threats to TRANSCOM, we've actually completely rewired the way we do cyberdefense and cyberhygiene within the Command. So, we have put our forces, essentially, on the offense, looking for people that are intruding into the network. And the extent to which those are in law enforcement issue, we have a liaison from the FBI and local law enforcement in our headquarters that attends to those parts of the issues. We have members of the intelligence community that provide the liaison into the interagency intelligence community if it's an intelligence issue. And then we have the capacity to turn those intrusions over to Cyber Command for our cyber mission team to begin defensive, and potentially offensive, action, if required. We exercised that in a recent exercise. Without getting into the classified results, we had a pretty good outcome with the Red Team trying to attack our networks. So, management of our cybercapability to do the command and control work that we do across such a broad network is incredibly important to us.

Senator AYOTTE. Is that model that you've talked, which sounds like a very important model, and obviously I'm glad to hear you're seeing some success with it—is that something that we're going to see, now that you're nominated to be the Vice Chairman, being implemented in other commands?

General SELVA. Senator, we've taken all the benchmarks from that set of lessons learned and shared them with all the other combatant commanders and with CYBERCOM. I will commit, if confirmed to becoming the Vice Chairman, to make sure that all the combatant commanders continue to share those kinds of lessons learned and improve our cyberdefense capability.

Senator AYOTTE. Well, I think that's really important. I appreciate it. And I want to thank both of you for your service—and your family—to the Nation. We deeply appreciate it.

General SELVA. Thank you, Senator.

Chairman MCCAIN. Would the Senator from Maine have any additional comments about the criticality of Pease Air Force Base to western civilization as we know it?

[Laughter.]

Senator KING. I was just going to comment that if I were running out of fuel over the North Atlantic, I would want the Maniacs from 101st Air Refueling Wing in Bangor to come and—

Chairman MCCAIN. Ah, I see. I thank the Senator from Maine.

Senator KING. There are other air refueling wings in New England. I'm glad—I appreciate the chairman's opportunity to make that point.

Chairman MCCAIN. Thank you.

Senator Blumenthal.

Senator BLUMENTHAL. Thanks, Mr. Chairman.

Thank you for your service, and thank you to your families, as well, for their extraordinarily valuable support and service.

I want to talk about a subject that has not been covered so far, small business set-asides. I'm a strong supporter of small business set-asides and the American shipping industry and our country's domestic merchant marine sector. A number of constituents of mine have raised this issue with me, saying that DOD has moved away from the dedicated service contract model, and started using a new system, called Universal Service Contracts, to transport goods via ocean from the U.S. mainland to U.S. military installations around the globe. My constituent has raised concerns with TRANSCOM regarding the statutory requirement to use small businesses and mandatory small business preferences, but those concerns have not been met. I suspect others have raised similar kinds of concerns from other States. And so, I'm going to ask you whether, if you're confirmed, you will work with my office to ensure that the statutory requirement to use small business and mandatory small business preferences is complied with.

General MCDEW. Senator, I will do so, if confirmed.

Senator BLUMENTHAL. Are you aware of this change of policy?

General MCDEW. I am not aware of that one, Senator, specifically.

Senator BLUMENTHAL. Could you look into it and get back to me?

General MCDEW. I can, Senator.

[The information referred to follows:]

USTRANSCOM is an advocate for small business utilization and as of the end of the fiscal year 2015 second quarter, has already surpassed the fiscal year 2015 Small Business goal of 15 percent (of prime contracts), established by the Department of Defense and as required by the Small Business Act, by achieving 22.17 percent small business utilization. Additionally, USTRANSCOM is fully compliant with Federal Acquisition Regulation (FAR) small business requirements, as evidenced by

the “Highly Satisfactory” rating assigned following a May 2014 Small Business Administration (SBA) Surveillance Review.

USTRANSCOM’s number one priority is readiness and the readiness of the global distribution enterprise to extend America’s helping hand or project combat power, anywhere, anytime. USTRANSCOM has moved some efforts previously accomplished under a dedicated service model to the USC–7 contract when circumstances warranted, such as where a significant change in cargo volume occurred and dedicated service was no longer feasible. The work performed under the USC–7 contract is in full accordance with the Small Business Act (15 U.S.C. § 644(a)), the FAR, and all other laws and regulations. USTRANSCOM will continue to evaluate whether requirements are appropriate for set aside under the USC–7 contract in accordance with the Small Business Act.

If confirmed, I will look into how USTRANSCOM accomplishes small business awards and will ensure that USTRANSCOM continues to follow the law that applies to use of small businesses.

Senator BLUMENTHAL. And, if confirmed, what steps or policy changes can you take to ensure that small businesses, in fact, have a fair shot at doing business with TRANSCOM?

General MCDEW. Senator, I’ve been a proponent and advocate for small businesses for my entire career. I will pledge to you, if confirmed, I will look deeply into this. And I can’t imagine us having a process that discounts small businesses, so I’ll have to see how we can encounter small business.

Senator BLUMENTHAL. What changes or policies in the course of your commitment, your past commitment—and I welcome it—have you seen DOD undertake? What kinds of initiatives?

General MCDEW. I can—well, other than the fact that I can tell you DOD measures how often we actually contract with small businesses in several different categories, there is a grade for an organization inside, at least I’m familiar right now, the Department of the Air Force, on how we do with small businesses. So, I am very—I’m somewhat surprised by your comments right now, Senator.

Senator BLUMENTHAL. Well, I hope that it is a surprise that is based on a misunderstanding that can be easily corrected. And I welcome your comments. Thank you very much.

Thanks, Mr. Chairman.

Senator REED. [presiding]. Thank you, Senator Blumenthal.

Gentlemen, thank you for your service, along with your families.

On behalf of Chairman McCain, I would declare the hearing adjourned.

[Whereupon, at 11:09 a.m., the committee adjourned.]

[Prepared questions submitted to General Paul J. Selva, USAF by Chairman McCain prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. In connection with your recent nomination to be Commander, U.S. Transportation Command you answered the Committee’s policy questions on the reforms brought about by the Goldwater-Nichols Act. You indicated that you did not see a need for modifications to Goldwater-Nichols Act provisions.

Has your view of the importance, implementation, and practice of these reforms changed since you testified before the Committee at your last confirmation hearing?

Answer. No.

Question. In light of your experience as Commander, U.S. Transportation Command, do you see any need for modifications to Goldwater-Nichols? If so, what modifications do you believe would be appropriate?

Answer. No. I do not presently foresee the need to make any modifications to the Goldwater-Nichols Act.

DUTIES

Question. Based on your experience as Commander, U.S. Transportation Command, what recommendations, if any, do you have for changes in the duties and functions set forth in section 154 of title 10, United States Code, and in regulations of the Department of Defense, that pertain to the Vice Chairman of the Joint Chiefs of Staff and the organization and operation of the Joint Staff in general?

Answer. At present, I do not recommend changes to the law or regulations.

JOINT REQUIREMENTS OVERSIGHT COUNCIL

Question. The Vice Chairman of the Joint Chiefs of Staff serves as the chairman of the Joint Requirements Oversight Council (JROC), which has the responsibility to review and validate Service requirements. Are there any recommendations that you would make to modify the JROC or its authority or the requirements process?

Answer. No, I do not believe any additional authorities or process changes required at this time.

Question. Has the ‘trip-wire’ process, to bring troubled programs back to the JROC for a review and to consider performance trade-offs to mitigate further cost growth and/or schedule delays before the program faced a Nunn-McCurdy review, been regularly employed on large programs that have experienced significant cost growth and schedule delays?

Answer. Yes. The JROC “trip-wire” process was put in place to address potential program difficulties prior to triggering a Nunn-McCurdy breach and subsequent review. A 2012 Joint Capabilities Integration and Development System (JCIDS) guidance update incorporated additional unit-cost criteria in order to address schedule and quantity trip-wire criteria. It has been employed on several occasions to review and adjust requirements on large programs when appropriate to avoid follow-on Nunn-McCurdy breach criteria.

Question. Has the JROC altered requirements, either for performance or procurement quantities, as a result of such reviews?

Answer. Yes, the JROC has altered or revalidated requirements as a result of such reviews. Example programs include the warfighter information network—tactical (WIN-T), advanced anti-radiation guided missile, and the E-6B Block 1.

Question. Weapon Systems Acquisition Reform Act of 2009 (WSARA) required the Secretary of Defense to ensure that trade-off analyses are conducted on cost, schedule, and performance as part of the requirements development and approval process. Such analyses enhance DOD’s understanding of what performance factors are the critical ones driving costs and schedules. What is your view of the modifications to the JROC process made by WSARA?

Answer. The modifications resulting from the 2009 WSARA have benefited JROC deliberations and the supporting JCIDS process. The continuing refinements to JCIDS, the most recent review and update completed in February 2015, ensure the continued focus on trade-off discussions and resulting requirements validation decisions.

Question. What additional steps do you believe that Congress or DOD should take to ensure that trade-offs between cost, schedule, and performance objectives for major weapon systems are made at an appropriately early point in the acquisition process?

Answer. The Department routinely evaluates opportunities for trade-offs among cost, schedule, and performance for major weapons systems. As an example, in 2012 the Department revised the JCIDS instruction to ensure the JROC reviews a system’s Analysis of Alternatives (AOA) to inform and shape Milestone A activities. As further steps are warranted, I will adjust the JCIDS policy and process and work with USD(AT&L) accordingly.

Question. Are there any other recommendations that you would make to modify the JROC or its authority or the requirements process?

Answer. No. At this time, I do not have any recommendations regarding modifications to the JROC or its authorities and the requirements process. If confirmed, I will continue to focus on the statutory responsibilities and authorities to ensure the appropriate rigor in validating realistic, technically achievable, prioritized, and cost informed requirements.

Question. How would you assess the effectiveness of the JROC in the DOD acquisition process?

Answer. I would judge the effectiveness of the JROC by how successfully it works in coordination and partnership with the leaders and primary stakeholders in the

requirements, acquisition, and resourcing processes to deliver capability to the warfighter within cost, schedule, and performance parameters. Over the past few years, the coordination between these processes and leaders has improved, and if confirmed, I intend to continue this close coordination.

Question. What is your vision for the role and priorities of the JROC in the future?

Answer. My vision is for the JROC to play a key role in developing the future joint force by providing a rigorous requirements basis, consistent with statutory responsibilities, to aid senior leader decision-making. If confirmed, I will ensure the development of a superior joint force remains a priority.

Question. Do you believe the JROC process is sufficient to understand and identify where there are opportunities for multi-service collaboration or where programs could or should be modified to take advantage of related acquisition programs?

Answer. Yes. One of the major responsibilities of the JROC process is to promote Service collaboration on joint requirements and raise awareness across the force on opportunities to modify or adapt related acquisition programs.

Question. What principles guide your approach to inviting, and helping ensure the sufficient participation of other stakeholders in the JROC?

Answer. Inclusiveness and frank discussions of key issues will guide my approach in my role as the chair of the JROC and requirements process leader. The recently updated JROC charter details roles and responsibilities of the Council, its subordinate boards, and other organizations with equity in JCIDS.

Question. The Senate Armed Services Committee's report to accompany the fiscal year 2016 NDAA directs the Secretary of Defense to revalidate the total program of record buy quantity of each variant of the F-35 Joint Strike Fighter. How do you see the JROC's role in this revalidation process?

Answer. If confirmed, I will work closely with the Service and Program Sponsor principals as well as the Department's acquisition professionals to assess and validate joint military requirements identified by combatant commanders. I will take a deliberate look at balancing the capacity and the capabilities of the future Joint Force, including the F-35 Joint Strike Fighter program.

JOINT CAPABILITIES INTEGRATION AND DEVELOPMENT SYSTEMS (JCIDS)

Question. What is your perspective on the responsiveness of the JCIDS process in addressing joint capabilities needs?

Answer. I believe JCIDS is very responsive when addressing joint capability needs, whether in the normal course of the deliberate review and validation lane or when evaluating joint urgent or joint emergent operational needs. In addition to having urgent/emergent lanes within the process, the requirements process is flexible and the timeline to review and validate requirements has been tailored for additional timeliness when necessary in the past. If confirmed, I will ensure it continues to be flexible in its execution when appropriate.

Question. What level of involvement in the joint requirements process and the JROC do you believe is appropriate for the COCOMs?

Answer. I believe the combatant commands are key customers of, and stakeholders in, the requirements process. Combatant commands participate at every level, to include the JROC, Joint Capability Board, Functional Capability Boards and associated working groups. The recently updated JROC charter details the roles and responsibilities of the JROC, its subordinate boards, and other organizations with equity in JCIDS. If confirmed, I will ensure that combatant commands continue to play the appropriate role in the requirements process.

Question. Do you think that JCIDS needs to be changed? If so, what are your views on the how it could be improved to make the process more responsive to users' needs while efficiently investing resources in a fiscally constrained budget environment?

Answer. No, not at this time. The Department recently updated JCIDS guidance documents and adjusted the JCIDS process. If confirmed, I will monitor the changes put in place and adjust the process when and where necessary.

Question. The requirements development process is not a stand-alone process, but instead is required to work collaboratively with the acquisition and budgeting processes. What steps are needed to better align the requirements development process with the acquisition and budgeting processes to make for a more efficient and effective process for delivering capabilities?

Answer. Continued collaboration between the requirements' process stakeholders and DOD leadership will be needed to more efficiently and effectively deliver capabilities to the war fighter. There have been substantial improvements in recent

years, which if confirmed I intend to continue, such as quarterly leadership forums among the Vice Chairman, Under Secretary for AT&L, and Director of CAPE.

ACQUISITION REFORM AND ACQUISITION MANAGEMENT

Question. What is your view of the changes made by the Weapon Systems Acquisition Reform Act of 2009 (WSARA)?

Answer. The Weapon Systems Acquisition Reform Act (WSARA) of 2009 has been instrumental in avoiding the high cost of fixing problems late in the acquisition process. WSARA also jump-started acquisition reform within Department and initiated a mindset of continuous process improvement as exemplified by Secretary Carter's Better Buying Initiatives that I strongly endorse.

Question. What role, if any, do you believe the JROC should play in the oversight and management of acquisition programs after requirements have been established?

Answer. I believe that the JROC continues to play a key role in requirements oversight and portfolio management, maintaining visibility into acquisition programs developing capability solutions to meet validated/established requirements. There may be cases where validated requirements need to be reviewed and revalidated based on new conditions such as technology challenges, fiscal constraints, or changes in the threat environment. If confirmed, I will ensure the requirements process remains flexible and responsive to address requirements reviews as needed.

Question. What role if, any, do you believe the JROC should play in reviewing the progress of major defense acquisition programs or other acquisition programs?

Answer. The JROC already plays a role in reviewing the progress of major defense acquisition programs. The JROC considers the progress of programs in the yearly Chairman's Gap Assessment and Chairman's Program Recommendation. The JROC also receives yearly Portfolio Review assessments which include a review of major acquisition programs conducted by the Functional Capability Boards.

Question. Do you see a need for any change in the role of the Chairman or the Vice Chairman of the Joint Chiefs of Staff in the requirements determination, resource allocation, or acquisition management processes?

Answer. No, I do not see a need for any change.

Question. What is your view of the role played by Configuration Steering Boards in preventing cost growth due to requirements creep?

Answer. When proactively utilized by the Service Acquisition Executive, Configuration Steering Boards have been highly effective in preventing cost-growth and identifying opportunities for requirements relief.

Question. What do you see as the proper relationship between Configuration Steering Boards and the JROC in managing requirements for acquisition programs?

Answer. The Configuration Steering Boards (CSBs) are responsible for reviewing acquisition programs on a regular basis to address issues causing hurdles to their success in delivering capability to the warfighter. The CSBs should continue to propose requirements reviews/changes to the applicable requirements validation body, to include the JROC. If confirmed, I will ensure the requirements process remains flexible and responsive to address those CSB-recommended reviews/changes needing JROC validation in a timely manner.

Question. What is your view of the Nunn-McCurdy requirements for Major Defense Acquisition Programs that fail to meet cost, schedule, and performance objectives?

Answer. I believe that the Nunn-McCurdy requirements for designated programs provide the necessary review for cost, schedule, and performance issues as needed.

Question. What do you see as the proper relationship between the JROC and those DOD officials charged with implementing the Nunn-McCurdy requirements?

Answer. The JROC supports USD(AT&L) in the Nunn-McCurdy process as detailed in the statutory language. As the validation body, the JROC reviews the program requirements to determine whether program continuation is essential to national security. If confirmed, I will ensure the JROC and the JCIDS process continues to provide prompt and robust support to the Nunn-McCurdy process and the designated lead official.

URGENT NEEDS PROCESSES

Question. In your view, what specific steps should the Department take to better manage the joint urgent needs process?

Answer. I believe the Department has taken robust action over the past several years to better manage the joint urgent needs process. Examples are the updated JCIDS and acquisition guidance that governs the Joint Urgent Operational Needs (JUONs), Joint Emergent Operational Needs (JEONs), and component-specific urgent operational needs processes. Another example is the focus of the Warfighter

Senior Integration Group (W-SIG) to facilitate delivery of solutions to validated JUONs/JEONs/component-specific urgent operational needs.

Question. What is your sense of where the DOD might consolidate urgent needs entities and/or processes and how cost savings could be achieved through such consolidation?

Answer. My sense is that DOD is making good progress in consolidating urgent needs entities/processes and focusing remaining resources in improving delivery of validated urgent operational needs.

Question. Do you believe that the Joint Staff should take steps to integrate the Joint Urgent Needs process with the individual services' processes? If so, please explain?

Answer. No. I believe there is an appropriate distinction between a component-specific urgent operational need and a Joint Urgent/Emergent Operational Need. If confirmed, I will maintain awareness of the processes and propose changes when and where appropriate.

NUCLEAR WEAPONS COUNCIL

Question. If confirmed as Vice Chairman of the Joint Chiefs of Staff, you will to serve as a member of the Nuclear Weapons Council.

What would your priorities be for the Nuclear Weapons Council (NWC)?

Answer. Sustaining a safe, secure, and effective nuclear arsenal is vital to ensuring our Nation's survival and central to the responsibilities of the NWC. I will work closely with the other NWC members to develop a plan for the Nuclear Enterprise to ensure the appropriate capabilities are available to sustain our nuclear arsenal for the long term.

Additionally, I will work with the other NWC members to modernize our aging nuclear facilities, invest in human capital, accelerate dismantlement of retired warheads, and improve our understanding of foreign nuclear weapons activities.

Question. What changes if any would you recommend to the organization, structure, or function of the NWC?

Answer. USC Title 10 Section 179 sets forth the organization, structure and function of the NWC. While I am aware of the recent Congressional advisory panel that reported on this subject in detail, I have no recommendations at this time. However, if confirmed, I will work with the NWC chairman and other members to assess the organization, structure and function of the NWC, and where warranted, provide recommendations for change to increase effectiveness and value in support of the nuclear mission for national security.

SPACE PROGRAM MANAGEMENT

Question. In many instances the military and intelligence space programs have experienced technical, budget, and schedule difficulties. In some instances these difficulties can be traced to problems with establishing realistic, clear, requirements and then maintaining control over the integrity of the requirements once established. If confirmed as chairman of the JROC you will be involved in determining these requirements. How in your view can or should the space systems requirements process be improved?

Answer. It is my understanding that in order to address the specific issue of space systems the Joint Capabilities Integration Development System (JCIDS) has been updated to allow for more trades between cost, performance, technology, and risk. If confirmed, I will continue to work with my counterparts in the Office of the Director of National Intelligence and the Office of the Secretary of Defense to ensure future space systems have robust and achievable requirements.

Question. In general, space programs take many years to move from conception to launch. The result is that the technology in the satellites is significantly outdated by the time the satellites are launched and operational, which in turn, can lead to a decision to terminate a program early, and look to a newer technology. This vicious cycle results in significantly increased costs for space systems as sunk costs are never fully amortized. How in your view can this cycle be addressed?

Answer. I believe one means of minimizing the use of outdated technology is to allow for technology insertion points into the acquisition process, balanced with limits on any requirements creep that could possibly derail the capability from achieving its core functionality. This allows for newer technology to influence the development program at specific points in the procurement of the space system enterprise.

NUCLEAR WEAPONS

Question. If confirmed you will continue to be a member of the Nuclear Weapons Council, and work closely with the National Nuclear Security Administration and its Stockpile Stewardship Program.

What, in your view, are the longer-term Stockpile Stewardship Program goals and what are the key elements that should be addressed from a DOD perspective?

Answer. Congress established the Stockpile Stewardship Program with the aim of creating the computational capabilities and experimental tools needed to enable the continued certification of the nuclear weapons stockpile as safe, secure, and reliable without the need for nuclear weapons explosive testing. The Secretaries of Defense and Energy are required by statute to certify annually to the Congress the safety, security, and reliability of the nuclear weapons stockpile.

I believe these goals are appropriate and the program is effective, as evidenced by our ability to certify the stockpile for over 20 years without the need for underground testing. That said, while the National Nuclear Security Administration has made significant investments in the tools and facilities that have made this possible, we must now leverage those investments and turn our attention to executing Life Extension Programs so we can sustain a safe, secure, and effective stockpile for the future. If confirmed, I will work across the interagency to ensure an appropriate balance between Life Extension Programs and science-based stockpile stewardship.

Question. In your view is the Stockpile Stewardship Program providing the tools to ensure the safety, reliability, and security of the nuclear weapons stockpile without testing and if not what tools are needed?

Answer. Yes. I believe the Stockpile Stewardship Program provides the requisite tools, as attested to by the directors of the nuclear weapons design laboratories in their annual assessment letters.

Question. Do you believe the Administration's 1251 report sets forth an appropriate road map for the modernization of the nuclear weapons complex and the strategic delivery systems?

Answer. Yes, the Administration's section 1251 report describes an appropriate roadmap for ensuring the future safety, security, and reliability of the nuclear stockpile and associated delivery platforms, including the steps necessary to modernize the aging infrastructure of the nuclear weapons complex. This plan represents a strong commitment to the nuclear mission and is an important element of assurance that the U.S. deterrent remains strong. Additionally, this plan reflects the work of the Nuclear Weapons Council in developing a responsible and affordable long-term plan for the Nuclear Enterprise.

Question. Do you agree that the full funding of the President's plan for modernizing the nuclear weapons complex, commonly referred to as the 1251 report, is a critical national security priority?

Answer. Yes, full funding of the 1251 report is a critical national security priority. The President's fiscal year 2016 Budget Request includes a significant commitment from the Department of Defense to modernize the nuclear weapons complex and support the long-term plan for extending the life of our enduring stockpile. If confirmed, I will support the continued modernization and sustainment of our nuclear weapons delivery systems, stockpile, and infrastructure.

Question. Prior to completing this modernization effort do you believe it would be prudent to consider reductions below New START Treaty limits for either the deployed or nondeployed stockpile of nuclear weapons?

Answer. It is my view that any reductions in the numbers of deployed and non-deployed nuclear weapons, either strategic or non-strategic, would need to be negotiated in a manner that strengthens deterrence of potential adversaries, maintains strategic stability with Russia and China, and assures our allies and partners. The timing and size of reductions, if any, would have to be closely coupled to the status of the modernization effort. If confirmed, I will support the Department's continuing assessment of the proper force size and capabilities required for an effective nuclear deterrent.

CYBERSECURITY

Question. The Senate Armed Services Committee's inquiry into U.S. Transportation Command (TRANSCOM) determined that TRANSCOM was subjected to many cyber intrusions that were not reported. TRANSCOM also suffered from a lack of awareness by other law enforcement and national security agencies regarding cyber intrusions on TRANSCOM contractors as well as misunderstandings by TRANSCOM personnel on the rules and processes for sharing cyber intrusion-related information with necessary officials.

Have you reviewed this report?

Answer. Yes, I have reviewed the report. Cybersecurity has long been a high priority for USTRANSCOM, and we immediately went to work to address the findings identified in the report.

Question. What actions did TRANSCOM take in response to the Senate Armed Services Committee report's findings?

Answer. TRANSCOM worked with OSD and the Joint Staff to implement the recommendations. We established a Cyber Mission Analysis Task Force which used incident scenarios to refine the implementation actions. These actions included updating our critical contractors list and sharing it with the Defense Cyber Crime Center; enhancing our relationship with key mission partners, including the FBI and the DHS; encouraging our commercial partners to participate in the Defense Industrial Base Cybersecurity and Information Assurance Program; and engaging in professional associations, such as the National Defense Transportation Association. In addition, the command standardized cyber defense contracting language according to DOD acquisition guidelines and adopted widely-recognized standards from the National Institutes of Standards and Technology.

Question. Do you feel that the Department of Defense is responding appropriately given recent events such as the threat nation intrusions into databases on U.S. personnel including DOD employees?

Answer. Yes, I do. We continue to support key interagency partners in recovery and mitigation actions and we have increased our internal focus on strengthening cyber readiness and enforcing basic cyber hygiene. Additionally, protection of personal information has been part of our recurring operations security training for many years now. With respect to the recent intrusions, the Department has used a variety of means, including town hall meetings, to proactively inform our people how they can protect themselves from possible identity theft.

Question. What actions do you plan to take, if confirmed, as the Vice Chairman of the Joint Chiefs of Staff to ensure that DOD reduces the risk of cyber intrusions?

Answer. If confirmed, I will continue the Department's partnership with other U.S. agencies to defend the U.S. Homeland and U.S. interests from cyber-attack. Foremost, the DOD must continue to implement current initiatives in the DOD Cyber Strategy, including developing a ready and capable Cyber Mission Force and associated cyber workforce. Next, we must continue to improve our network security architecture and shift the focus from protecting service-specific networks to securing the DOD enterprise in a unified manner through the deployment of the Joint Information Environment. Additionally, I will focus on requirements for new weapon systems to be designed and developed to operate and survive against capable cyber adversaries. Finally, because the DOD cannot guarantee that every cyberattack will be denied successfully, I will ensure our forces train to operate within a degraded cyber environment.

Question. Do you believe that the current posture of the Department of Defense is sufficient to deter adversaries in cyberspace?

Answer. Cyber deterrence is complex and challenged by the number of actors and diversity of their capabilities and motivations. Effective cyber deterrence requires both policies and capabilities that are aligned with all the elements of our national power. The Department must continue to develop capabilities to attribute and deter cyberattacks from both state and non-state actors.

Question. Do you believe a robust offensive cyber capability is required to counter the activities of our adversaries and hold their cyber-enabled capabilities at risk?

Answer. Yes. One of the tenets of the Department's cyber strategy is the ability to provide the President a variety of cyber options, to include offensive options when directed. The Department, in conjunction with other interagency partners, must provide those capabilities should the need arise.

RELATIONSHIPS

Question. Other sections of law and traditional practice establish important relationships between the Vice Chairman and other officials. Please describe your understanding of the relationship of the Vice Chairman of the Joint Chiefs of Staff to the following officials:

The Secretary of Defense.

Answer. The Vice Chairman performs duties assigned to him and other duties as assigned by the Chairman, with the approval of the Secretary of Defense. In the absence or disability of the Chairman, the Vice Chairman acts as the Chairman and performs the duties of the Chairman until a successor is appointed or until the absence or disability ceases. These duties include providing military advice to the Secretary of Defense. The Vice Chairman may also provide the Secretary of Defense advice upon the Secretary's request in his capacity as a military adviser.

Question. The National Security Advisor.

Answer. The Vice Chairman works closely with the Chairman and the National Security Advisor to ensure that military efforts and options are synchronized with other department and agency efforts across the government. When performing the duties of the Chairman, the Vice Chairman serves as an advisor to the National Security Council and works with the National Security Advisor to inform and implement Presidential decisions.

Question. The Deputy Secretary of Defense.

Answer. The relationship of the Vice Chairman with the Deputy Secretary is similar to that with the Secretary. The Deputy Secretary of Defense has been delegated full power and authority to act for the Secretary of Defense on any matters upon which the Secretary is authorized to act.

Question. The Under Secretaries of Defense.

Answer. The Under Secretaries of Defense are the principal staff assistants and advisers to the Secretary regarding matters related to their functional areas, and they exercise policy and oversight functions within their respective areas. In carrying out their duties, the Under Secretaries issue instructions and directive memoranda to implement the Secretary's approved policies. When carrying out their responsibilities as directed by the President and Secretary of Defense, Under Secretaries typically transmit communications to commanders of the unified and specified commands through the Chairman of the Joint Chiefs of Staff. If the Chairman is absent or disabled, they can communicate through the Vice Chairman as necessary.

Question. The General Counsel of the Department of Defense.

Answer. The DOD General Counsel serves as the chief legal officer of the Department of Defense, and generally is responsible to oversee legal services, establish policy, and administer the DOD Standards of Conduct Program. The DOD General Counsel also establishes policy on specific legal issues and provides advice on significant international law issues raised in relation to major military operations, the DOD Law of War Program, or the legality of weapons reviews. Communications between the combatant commanders and the DOD General Counsel are normally transmitted through the Chairman of the Joint Chiefs of Staff. The office of the DOD General Counsel works closely with the Office of Legal Counsel to the Chairman of the Joint Chiefs of Staff.

Question. The Department of Defense Inspector General.

Answer. The Department of Defense Inspector General performs the duties, has the responsibilities, and exercises the powers specified in the Inspector General Act of 1978.

The Vice Chairman must cooperate with and provide support to the Department of Defense Inspector General as required.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. The Vice Chairman performs the duties assigned to him as a member of the Joint Chiefs of Staff and such other duties as assigned by the Chairman, with the approval of the Secretary of Defense. When there is a vacancy in the office of the Chairman, or during the absence or disability of the Chairman, the Vice Chairman acts as Chairman and performs the duties of the Chairman until a successor is appointed or the absence or disability ceases. If confirmed, I look forward to a close working relationship with the Chairman.

Question. The Secretaries of the Military Departments.

Answer. The Secretaries are the heads of their respective military Departments and are responsible for, and have the authority necessary to conduct, all affairs of their respective Departments. Subject to the authority, direction and control of the Secretary of Defense, and subject to the authority of the combatant commanders, the Secretaries of Military Departments are responsible for administration and support of forces that are assigned to unified and specified commands. When the Chairman is absent or his office is vacant, the Vice Chairman advises the Secretary of Defense on the extent to which program recommendations and budget proposals of the Military Departments conform to priorities in strategic plans and with the priorities established for requirements of the Combatant Commands. The Secretaries of the Military Departments also are responsible for such other activities as may be prescribed by law or by the President or Secretary of Defense.

Question. The Chiefs of Staff of the Services.

Answer. The Vice Chairman has a close, collaborative relationship with the Service Chiefs. As a result of the Goldwater-Nichols Act, the Service Chiefs are not in the operational chain of command. However, this change does not diminish their importance with respect to their Title 10 responsibilities. The Chiefs of Staff of the Services serve two primary roles. First, they are responsible for the organization, training, and equipping of their respective Services. They cooperate with and support the combatant commanders to assure the preparedness of assigned forces for

missions as directed by the Secretary of Defense and the President. Second, as members of the Joint Chiefs of Staff, the Chiefs are advisers to the President, National Security Council, and the Secretary of Defense as the senior uniformed leaders of their respective Services. In this function, they play a critically important role in shaping military advice and developing our joint capabilities. The Vice Chairman works closely with the Service Chiefs to fulfill war-fighting and operational requirements.

Question. The Combatant Commanders.

Answer. The commander of a combatant command is responsible to the President and to the Secretary of Defense for the performance of missions assigned to that command by the President or by the Secretary with the approval of the President. Additionally, the Chairman serves as the means of communication between the combatant commanders and the President or Secretary of Defense when directed by the President. When there is a vacancy in the office of Chairman or in the absence or disability of the Chairman, the Vice Chairman acts as Chairman when interacting with the combatant commanders. The Vice Chairman should work closely with the combatant commanders to enable their war-fighting capabilities and provide other support and coordination as required.

Question. The Chief of the National Guard Bureau.

Answer. The Chief of the National Guard heads a joint activity of the Department of Defense and is the senior uniformed National Guard officer responsible for formulating, developing and coordinating all policies, programs and plans affecting Army and Air National Guard personnel. Through the Chairman of the Joint Chiefs of Staff, the Chief of the National Guard Bureau is the principal adviser to the Secretary of Defense on National Guard matters. He also serves as the principal adviser to the Secretary and Chief of Staff of the Army and the Secretary and Chief of Staff of the Air Force on all National Guard and Air National Guard issues. The National Guard Bureau Chief also serves as the department's official channel of communication with both the Governors and Adjutants General. As a member of the Joint Chiefs of Staff, the Chief of the National Guard Bureau has the specific responsibility of addressing matters involving non-Federalized National Guard forces in support of homeland defense and civil support missions. The Vice Chairman works closely with the Chief of the National Guard Bureau to provide support as required.

Question. The Commander, U.S. Forces–Afghanistan.

Answer. The Chairman and the Vice Chairman are not in the chain of command of the Commander, U.S. Forces–Afghanistan (USFOR–A). The Commander, USFOR–A reports to the Commander, USCENTCOM, who, in turn, reports directly to the Secretary of Defense. The Commander, USFOR–A does not have a formal command relationship with the Chairman or the Vice Chairman of the Joint Chiefs of Staff, but he coordinates with the Chairman through the Commander, USCENTCOM on a regular basis. The Commander, USFOR–A sends his advice and opinions related to Operation Resolute Support to the Commander, USCENTCOM, who, in turn, presents them to the Chairman. When there is a vacancy in the office of Chairman or in the absence or disability of the Chairman, the Vice Chairman acts as Chairman when interacting with the Commander, U.S. Forces–Afghanistan.

MAJOR CHALLENGES

Question. What do you consider to be the most significant challenges you expect to face if you are confirmed?

Answer. The most significant challenge I expect to face, if confirmed, is the combination of a highly complex and volatile security environment, a Joint Force coming off a fourteen year war footing, and continued fiscal uncertainty. We must simultaneously contend with both near-peer (and rising near-peer) states as well as with increasingly capable and global non-state actors who seek to threaten the U.S. homeland, our interests, and our allies. Meanwhile we are working to rebuild the capacity, capability, and readiness of our Joint Force. Furthermore we must do this with one hand tied behind our back without the predictability of an annual base budget and without the authority to implement necessary and cost-saving reforms within the Department.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I will work with the Department and interagency leadership and with the Congress to identify, communicate, and manage the operational and fiscal risks while continuing to advocate for the authorities and resources needed to develop and field a Joint Force capable of meeting the demands of the Nation today as well as prepare for future threats.

PRIORITIES

Question. Recognizing that challenges, anticipated and unforeseen, will drive your priorities to a substantial degree, if confirmed, what other priorities, beyond those associated with the major challenges you identified in the section above, would you set for your term as Vice Chairman?

Answer. My priorities will be focused on developing necessary capabilities, concepts, and forces to defend the Nation in the 21st Century. This includes modernizing our aging nuclear enterprise, protecting our assured access to space, protecting DOD cyber networks and developing offensive cyber options for the President. It also includes supporting the Defense Innovation Initiative and supporting Secretary Carter's Force of the Future Initiative to develop and care for the best All Volunteer Force the world has ever seen.

CHAIN OF COMMAND

Question. Section 162(b) of title 10, United States Code, provides that the chain of command runs from the President to the Secretary of Defense and from the Secretary of Defense to the combatant commands. Section 163(a) of title 10 further provides that the President may direct communications to combatant commanders be transmitted through the Chairman of the Joint Chiefs of Staff and may assign duties to the Chairman to assist the President and the Secretary of Defense in performing their command function.

Do you believe that these provisions facilitate a clear and effective chain of command?

Answer. Yes. The law is clear that the chain of command runs from the President to the Secretary of Defense and from the Secretary of Defense to the commanders of the combatant commands. Military doctrine reflects these command relationships. If confirmed, I will enable the decision-making process and transmit orders as directed.

Question. Are there circumstances in which you believe it is appropriate for U.S. military forces to be under the operational command or control of an authority outside the chain of command established under title 10, United States Code?

Answer. U.S. military forces should normally operate under the chain of command established in Title 10. There may be times, such as in the case of certain sensitive military operations, where it may be appropriate for the President to direct other temporary command relationships. However, in all cases U.S. armed forces supporting such operations remain bound by the law of armed conflict, are accountable to the Title 10 chain of command, and are subject to the Uniform Code of Military Justice for disciplinary matters.

Question. What is your understanding and assessment of the authorities and agreements which are in place to allow U.S. military personnel to carry out missions under the authorities contained in title 50, United States Code? Do you believe any modifications to these authorities are necessary?

Answer. Under Title 50, the Secretary of Defense is charged with ensuring that the military departments maintain sufficient capabilities to collect and produce intelligence to meet requirements of the DNI, Secretary of Defense, CJCS, and COCOMs. Title 50 further authorizes the Secretary to use such elements of the DOD as may be appropriate for the execution of the national intelligence program functions described in section 3038 of title 50. As a general rule, our military forces are most effective when they operate under a military chain of command. However, there are circumstances in which exceptions to this general rule would permit our forces to be employed more effectively. There are existing authorities and agreements to facilitate the review and approval of such exceptions. I have no recommendations for changes to this framework at this time.

ADVICE OF THE SERVICE CHIEFS, COMBATANT COMMANDERS, AND CHIEF OF THE NATIONAL GUARD BUREAU

Question. Section 163 of title 10, United States Code, provides that the Chairman of the Joint Chiefs of Staff serves as the spokesman for the combatant commanders, especially on the operational requirements of their commands. Section 151 of title 10 provides for the other members of the Joint Chiefs of Staff to submit their advice or opinion, in disagreement with or in addition to the advice or opinion of the Chairman, and requires the Chairman to provide that advice at the same time that he presents his own advice to the President, National Security Council, or Secretary of Defense.

What changes to section 151 or 163, if any, do you think may be necessary to ensure that the views of the individual Service Chiefs, combatant commanders, and the Chief of the National Guard Bureau are presented and considered?

Answer. I presently do not see a need to change section 151 or 163.

OFFICER MANAGEMENT ISSUES

Question. As the Vice Chairman of the Joint Chiefs of Staff you would have significant responsibilities with regard to joint officer management policies.

If confirmed, what modifications would you make to provide the Department of Defense and the military services the force management tools necessary to meet the needs of the 21st century joint, all-volunteer force?

Answer. The Department, the Joint Staff, and the Services have worked over the past 10 years to develop force management tools to meet the challenges of the 21st century joint force. If confirmed, I will take every opportunity to examine the strategic environment to ensure that the tools remain relevant.

Question. Do you believe the current DOD and service procedures and practices for reviewing the records of officers pending nomination by the President are sufficient to ensure the Secretaries of the military departments, the Secretary of Defense, and the President can make informed decisions?

Answer. The current procedures and practices provide the Department and the Services the policies and procedures to identify officers for future leadership positions. The Services' evaluations of the qualifications, previous performance, and potential of their officers provides the information to make informed decisions regarding the promotion and utilization of the Services' officers.

Question. In your view, are these procedures and practices fair and reasonable for the officers involved?

Answer. I believe the procedures and practices are fair and reasonable for the officers involved.

Question. What modifications, if any, to the requirements for joint officer qualifications are necessary to ensure that military officers are able to attain meaningful joint and service-specific leadership experience and professional development?

Answer. I believe the requirement for officers to be educated, trained and oriented in joint matters through challenging joint experiences appropriately prepares officers for the challenges at both the strategic and operational level. I currently do not recommend any modifications to the joint officer qualification requirement.

Question. In your view, what is the impact of joint qualification requirements on the ability of the services to select the best qualified officers for promotion and to enable officer assignments that will satisfy service-specific officer professional development requirements?

Answer. Although there is limited time to meet the developmental requirements, the Services have proven they are able to develop their officers' and provide a cadre of well-rounded and competitive officers capable of integrating service functions at both the strategic and operational level. I believe the end result provides the Department with officers who possess the greatest opportunity in senior leadership positions.

Question. In 2008, Congress created the requirement that the Legal Counsel to the Chairman of the Joint Chiefs of Staff be selected by a board of officers convened by the Secretary of Defense. This process remains the only joint duty officer position specifically selected by a selection board from among qualified officers of the armed forces.

Do you consider the selection process required by section 156 of title 10, United States Code, to be an efficient and effective process for selecting officers from among the services to serve in this joint position?

Answer. Yes. The selection process for this unique statutory position is efficient and effective.

Question. What lessons, if any, have been captured from this joint officer selection board process that could improve the processes for selection of officers in the military services?

Answer. My understanding is the lessons gleaned from the joint board process are specific to the joint environment and therefore would not apply to Services' officer selection.

Question. Would you support expanding the process used to select the Legal Counsel to the Chairman of the Joint Chiefs of Staff to other joint billets? Why or why not?

Answer. We have a codified process which allows the Department to select qualified officers into established joint positions. Expanding our selection process, at this time, is unnecessary. Established processes used to select general/flag officers to

joint positions are sound. The process for identifying officers gives the Combatant Commander and the Chairman flexibility. We can select from across the Services (to include the Coast Guard); Active, Guard, and Reserve Component, to ensure we get the right individual with the right skills and experience. The process also gives the commander and leadership an opportunity to quickly review a slate of nominated officers, and conduct interviews as necessary. Finally, the process is extremely responsive to emerging or unexpected requirements. We can quickly alert the Services to identify eligible personnel, select, nominate and have them in position in as little as 90 days if necessary.

HEADQUARTERS STREAMLINING

Question. The Senate reported Fiscal Year 2016 National Defense Authorization Act directs reforms to consolidate the headquarters functions of the Department of Defense and the military departments.

Answer. If confirmed, and if the provisions in the bill become law, what would be your role in identifying and implementing streamlining and reductions in the Joint Staff?

If confirmed, I will engage with the Chairman and Joint Staff to consider organizational streamlining by reducing, realigning, or eliminating redundant or conflicting requirements.

Question. What Joint Staff areas, specifically and if any, do you consider to be the priorities for possible consolidation or reductions?

Answer. An example of consolidation efforts that I would consider, if confirmed, is the potential consolidation of IT services and maintenance activities within the Pentagon to reduce costs and unnecessary redundancies. The Joint Staff J6 is currently working with U.S. Army Information Technology Agency (ITA), Washington Headquarters Services (WHS) and Defense Information Systems Agency (DISA) to identify potential consolidation options. Additional potential areas for consolidation or reduction that I would consider, if confirmed, include the consolidation of support functions within Joint Staff directorates and the elimination of duplicative functions accomplished by the OSD, Joint Staff and Defense Activities.

Question. To the extent that the Joint Staff has functions that overlap with the Department of Defense and the military departments, what would be your approach to consolidating and reducing redundancy?

Answer. First we will have to determine if duplicative or redundant functions are directed by statute. Some duplicative responsibilities are laid out in law with some portions executed by the Department, some by the Joint Staff and some by the military departments. Legislative changes may be required to consolidate and reduce redundancies. A combined review by the OSD, Services and the Joint Staff may be the best course of action to identify duplicative functions to reduce, realign, or eliminate.

TRAINING AND ASSIGNMENT OF GENERAL AND FLAG OFFICERS

Question. In your view, do a sufficient number of general and flag officers have advanced training and degrees in scientific and technical disciplines?

Answer. Yes. The Joint Staff continues to work closely with the Service Chiefs and other leaders to ensure an appropriate pipeline of specialized, technical officer talent is available with the right-skilled and experienced leadership. We also have a rigorous and deliberate Service accession, training and development processes generate the technical and scientific capability needed in sufficient numbers to meet DOD mission needs.

Question. Are the career paths for officers with technical skills appropriate to ensure that the Department and the services can execute complex acquisition programs, adapt to a rapidly changing technological threat environment, and make informed investment decisions? If not, what will you do to address this deficiency?

Answer. While the Services vary with respect to the use of military in acquisition, each Service tailors officer career paths to meet Service mission priorities, which includes successfully executing critical major acquisition programs. I believe the Department has, and continues to grow, world-class, technically astute officers ready to take on the challenges of a rapidly changing technical and acquisition environment. Each Service has career path models that are appropriate and aligned with their force management process.

Question. In your view do current general and flag officer assignment policies provide and incentivize qualified officers to serve in acquisition programs? Do tour lengths for those assignments enable and empower such officers to effectively manage acquisition programs? If not, what changes do you believe are necessary to improve the effectiveness of senior officers assigned those duties?

Answer. Yes. If confirmed, I will work to strengthen communication processes between Vice Service Chiefs, Service Acquisition Executives and OSD leadership to make sure we continuously improve our policy, development and assignment of top motivated, qualified military personnel in Defense Acquisition. Senior officers are assigned with adequate tenure to effectively manage their programs and the Services demonstrate flexibility in adjusting tour lengths to logical progression points in acquisition programs.

Question. Are you satisfied that the Department of Defense, the Joint Staff, and the military services have in place sufficient training and resources to provide general and flag officers, and Senior Executive Service employees the training they need to make informed, ethical decisions? If not, what actions would you take, if confirmed, to address your concerns?

Answer. Yes. The ability to make ethical decisions based on the shared values of the profession of arms is identified as a specific Desired Leader Attribute for leaders throughout the military and is

common to all Joint and Service developmental efforts. The ethical foundation is laid at the outset of an officer's career and is further developed and reinforced in formal education and training settings throughout their progression through the ranks. If confirmed, I will ensure these high standards are upheld.

Question. It has been observed that despite numerous changes in the law, the requirements and the process for attaining joint officer qualifications is still beset by systemic challenges. Some of these challenges appear to force the services to make officer assignments to "check the box" for joint qualifications at the cost of depriving the services of flexibility to assign officers to other career enhancing and professional development opportunities. Officers not assigned to a designated joint billet on an operational staff receive joint credit while other officers supporting the same joint commander do not receive joint credit unless they submit a package to have their assignments qualify for joint service. As operational tempo remains high and as end strength continues to decline to historically low levels, some exceptionally qualified officers will be unable to serve in qualifying assignments to earn joint credit because the Nation demands they perform other critical duties. As a result those officers may be disadvantaged professionally as compared to their peers for promotion eligibility. Given the substantial resources invested in the developing officers to serve successfully in, and to support or lead joint forces, more must be done to improve the joint qualification system or to replace it with a system that is more effective.

If confirmed, what steps would you take to review the joint qualification requirements to ensure that the qualification process is matched to the increasingly joint service environment in which many officers serve throughout their careers?

Answer. Developing officers to successfully serve in or lead joint forces is very important and worth the resources invested. Services must actively manage the officers' careers to ensure the most talented officers obtain the joint qualification. Officers who do not develop these skills, no matter how exceptional their performance at the tactical level, are not adequately prepared to accept challenging joint assignments when compared to their peers. The joint officer qualification process provides a tested and flexible means to ensure officers develop the skills necessary for successful service at the operational and strategic levels. The current process also already includes the means for officers in non-joint operational assignments to receive credit toward joint qualification if their duties lead to the acquisition of significant experience in joint matters. If confirmed, I will work to ensure the joint officer qualification requirements, process, and resource investments continue to deliver the Joint Force necessary to meet the demands of the Nation.

Question. Should the formal requirement for joint qualifications be eliminated as a consideration for promotions and assignments?

Answer. No. I believe we need to continue to ensure our future senior leaders are well-prepared to operate in challenging joint environments. The promotion requirement incentivizes both the Service and the officer to obtain joint experience.

SECURITY STRATEGIES AND GUIDANCE

Question. How would you characterize current trends in the range and diversity of threats to national security we face today to national security?

Answer. The range and diversity of threats are increasing. Both potential state and non-state adversaries are projected to possess increased military capabilities, and will continue to benefit from the rapid diffusion of technology. Likewise, future adversaries are also developing new ways to counter our traditional military advantages.

Question. The Defense Strategic Guidance issued January 2012 took into account a \$487 billion dollar reduction in defense resources.

With the additional \$500 billion in cuts to the Department of Defense as a result of sequestration, is the Defense Strategic Guidance still valid?

Answer. If sequestration proceeds we receive less funding, then we will be forced to make further decisions with regard to capabilities, capacity and readiness—which will result in increased risk for our combatant commanders. Sequestration will have a direct impact on the readiness of the Joint Force to execute operations and support the goals outlined in the Defense Strategic Guidance.

Question. In your view, as Russian aggression and the emergence of ISIL have occurred since the Defense Strategic Guidance was issued in January 2012, is that strategic guidance still appropriate for the threats we face today or do you think an update is warranted?

Answer. The 2012 Defense Strategic Guidance and the 2014 Quadrennial Defense Review provide broad guidance to meet the full range of potential threats, from high-end state adversaries to non-state organizations. As threats evolve, it is appropriate to review the assumptions made in formulating a strategy. If confirmed, I will work with the Joint Staff and the Department to determine the necessity for an update to the strategic guidance.

Question. In your view, are our defense strategy and current establishment optimally structured, with the roles and missions of the military departments appropriately distributed, and U.S. forces properly armed, trained, and equipped to meet security challenges the Nation faces today and into the next decade?

Answer. With planned, stable funding, I am confident we will be able to balance capability, capacity, and readiness. If BCA returns, the Services will have to make additional cuts to their forces, impacting capabilities, capacity and readiness, leading to increased risk to meeting current and future security challenges.

Question. If confirmed, what changes, if any, would you propose to the capabilities, structure, roles, and missions of the defense establishment?

Answer. If confirmed as Vice Chairman, I would focus on finding the balance between capacity, capabilities, and readiness for the Joint Force in order to best prepare for current and future threats. Our cyber, space, and nuclear capabilities will be an area of particular emphasis.

STRATEGIC RISK

Question. How and over what periods of time, if at all, will reductions to Army and Marine Corps end strength increase strategic risk?

Answer. Army and Marine Corps forces are an important part of our ability to respond to multiple, simultaneous, or near-simultaneous, crises and to deter conflicts. Our soldiers and Marines also play a key role in reassuring our allies and shaping conditions overseas through security cooperation activities. End strength levels must be considered in light of these missions, the strategic environment, readiness levels, and operational tempo.

Question. What is your understanding and assessment of the Army and Marine Corps' decision to reduce active end strength to 450,000 and 182,000 soldiers respectively by the end of 2017?

Answer. I believe that any change in end strength needs to be understood in terms of risk. Reducing our Army and Marine Corps end strength increases risk and may impact our ability to shape world conditions, assure allies, and deter conflicts. However, I believe our current strategy is still achievable at these end strengths, though at increased risk. Any further cuts though, would dramatically increase our strategic risk.

Question. If confirmed, what additional actions would you take, if any, to reduce or mitigate this strategic risk?

Answer. I believe we would have to prioritize what we are asking our forces to do on a daily basis. For some missions, we should look to our allies and partners to help mitigate risk. In other missions, we would need to look for different ways to operate. Ultimately, consistent with our funding levels, we need to align resources to counter our most dangerous threats.

Question. Upon issuance of the 2014 Quadrennial Defense Review, the fiscal year 2015 budget reduced projected defense budgets by \$113 billion over five years. What was the incurred strategic risk of this reduction relative to the 2012 Defense Strategic Guidance?

Answer. A reduction on defense resources in an increasingly complex strategic environment will introduce strategic risk to our defense strategy (both the QDR and DSG). I am happy to discuss further details in a classified venue.

CHAIRMAN'S RISK ASSESSMENT

Question. In his 2013 risk assessment, Chairman Dempsey identified for the first time six National Security Interests that were derived from four enduring interests contained in the 2010 National Security Strategy. The April 2013 assessment identified several areas of broad and significant risk to national security as a result of current budget issues.

How would you characterize the trends of risk in these areas (whether they are increasing or decreasing)?

Answer. Overall, strategic and military risk trends are increasing. I would be happy to discuss risk in a classified venue.

Question. What is your current assessment of the risk to combatant commanders in their ability to successfully execute their operational plans?

Answer. In an unclassified forum I am reluctant to go into much detail. Generally, our combatant commanders face increasing risk, especially if BCA goes back into effect. We ask a lot of our commanders, and we must be prepared to resource them appropriately. I will say that all military operations entail risk, but we are committed to providing the President a range of options given any threat to U.S. interests.

TRANSFORMATION

Question. Military "transformation" has been a broad objective of the Armed Forces since the end of the Cold War. In your view, what does military "transformation" mean?

Answer. Military transformation means building a Joint Force that is intellectually and organizationally capable of seizing and capitalizing on emerging technological or organizational opportunities, not just adapting or reacting to conditions that the world presents. Military transformation is realized over time through constant innovation in our organizational structures, doctrine, education, leader development and material capabilities.

Question. What is your understanding and assessment of the progress made by the Department, including the Joint Chiefs of Staff and the Joint Staff, toward transforming the Armed Forces?

Answer. My understanding is that we are making progress, but there is more work to be done. We are continuing the implementation of the Joint Operational Access Concept, a concept that provides a framework to ensure the Joint Force can continue to conduct operations to gain access based on the requirements of the broader mission despite growth of anti-access and area-denial threats. We're also making progress in the Joint Information Environment, implementing innovation change across the Department that enhance mission effectiveness and cyber security. Ultimately, our goal is a versatile, responsive, decisive, and affordable Joint Force.

Question. If confirmed, what goals, if any, would you establish during your term as Vice Chairman regarding military transformation in the future?

Answer. If confirmed, I believe we should be selective in the capabilities we choose to reconstitute as we draw down in Afghanistan, while ensuring that lessons learned over a decade of war are retained. As we get smaller, we must become increasingly versatile, agile and opportunity-seeking. I intend to use my role in the JROC and innovation initiatives to advance this transformation.

Question. Do you believe the Joint Staff should play a larger role in transformation? If so, in what ways?

Answer. I believe the Joint Staff has an increasingly important role to play in developing a common understanding of future challenges and how the Joint Force must evolve for success in the future operating environment. To this end, the Joint Staff has a number of useful and unique mechanisms at its disposal. These include military strategy development, joint concepts, war gaming, future joint force requirements, and joint training. I see the Joint Staff increasingly as an aligning mechanism across all the different Joint Force development processes in the department.

MILITARY CAPABILITIES IN SUPPORT OF DEFENSE STRATEGY

Question. In your opinion, do current military plans include the necessary capabilities to meet the defense strategy stated in the 2014 QDR? Where are areas of higher risk?

Answer. In an unclassified forum I am reluctant to go into much detail. The Joint Staff and the Services constantly review our capability portfolios in order to ensure

we can achieve our objectives against potential adversaries. The committee receives a quarterly classified report that details gaps in our current military plans.

Question. Does the 2014 QDR specify the correct set of capabilities to decisively win in future high-end engagements?

Answer. I believe future engagements may be characterized by increasingly sophisticated adversaries employing advanced weapons and challenging the access and advantages in space and cyberspace that U.S. forces currently enjoy. The 2014 QDR calls for continued investment in new systems and development of operational concepts to address these evolving threats. The recently released National Military Strategy reinforces the QDR's guidance; prioritizing investments to counter anti-access area denial threats, as well as space, cyber, and hybrid threats.

Question. According to the force sizing construct in the 2014 QDR, American forces should be able to "defeat a regional adversary in a large-scale multi-phased campaign, and deny the objectives of—or impose unacceptable costs on—another aggressor in another region."

In your opinion, does the Department's force sizing construct provide adequate capability to address the country's current threat environment?

Answer. Yes, the force sizing construct, with its emphasis on a range of military options, provides adequate capability to address the country's current threat environment. This particular excerpt applies to situations where deterrence has failed. The first portion of the force sizing construct states that the U.S. military will be "capable of simultaneously defending the homeland; conducting sustained, distributed counterterrorist operations; and in multiple regions, deterring aggression and assuring allies through forward presence and engagement." The construct involves more than just capability, it also provides a framework to evaluate capacity and readiness. To this end, we need support from Congress to ensure that we have sufficient resources to conduct a wide spectrum of missions globally, while maintaining a thoughtful balance of capability, capacity and readiness to respond to a crisis and win decisively.

Question. According to the force sizing construct in the 2014 QDR, American forces should be able to "defeat a regional adversary in a large-scale multi-phased campaign, and deny the objectives of—or impose unacceptable costs on—another aggressor in another region." Are the services adequately sized to meet this construct?

Answer. I believe the Services are able to provide forces to meet the construct. Resource constraints have eroded the readiness of the joint force, however, and extended the timelines to make forces available to respond to combatant commander needs. Lack of reliable funding levels hinders our ability to field trained, ready forces to meet combatant commander demand.

Question. What will you advise if the Department cannot meet the demands placed on it?

Answer. I would advise that we carefully prioritize the most important missions necessary for meeting our military and defense objectives and for protecting our national security interests. I would also advise that we consistently work with Congress to ensure the Department has sufficient resources to meet the demands the Nation places upon it.

FUTURE ARMY

Question. The Defense Strategic Guidance (DSG) of January 2012 articulated the need to shift strategic emphasis toward the Asia-Pacific region while continuing to engage in the Middle East. Do you agree that future high-end military operations, as envisioned by the DSG, will primarily be naval and air engagements such that the Army will have difficulty justifying the size, structure, and cost of the number and equipment its combat formations?

Answer. Looking only at current threats in a particular region as a way to justify force structure is unwise. We must have a robust and capable military ready to respond to multiple threats. The Army has, and will always have, an essential role in the Asia-Pacific region as well as in the rest of the world. If confirmed as Vice Chairman, I would support the Chairman in seeking a fully-trained joint force ready to defend our national security wherever it is threatened.

Question. In your view, what are the most important considerations or criteria for aligning the Army's size, structure, and cost with strategy and resources?

Answer. Our Nation needs an Army that conducts full spectrum operations as part of the joint force. It must be appropriately sized, structured, and equipped to in order to defend the Nation and defeat our adversaries. The Quadrennial Defense Review deemphasized long duration stability operations and reinforced the importance of defeating and denying the objectives of an adversary. The Army continues realigning and resizing consistent with this guidance.

Question. If confirmed, what actions, if any, would you propose to properly align the Army's size and structure with the requirements of security strategies and the likely availability of resources?

Answer. The Department has assessed our ability of all Services to execute the defense strategy with their programmed force structure, including the Army. We can execute our strategy at current funding levels with acceptable risk. With the Army, and all of the Services, we must continually assess threats and make adjustments to ensure we have a healthy force, with the right mix between the active and reserve components.

DEFENSE REDUCTION

Question. In your view, what have been/will be the impacts of the following budget reductions on the military, their capability, capacity, and readiness?

Initial Budget Control Act reduction of \$487 billion

Answer. The initial Budget Control Act resulted in an immediate and substantial reduction to the Department's topline and forced our military to make difficult resource decisions, such that we now have a strategy with little to no margin for surprise. The BCA reduction translates to increased risk to our strategy, across the board.

Question. Sequestration in fiscal year 2013

Answer. Due to the nature of sequestration, the fiscal year 2013 cuts reduced already-strained readiness. To date, sequestration has resulted in cuts to training, exercises, deployments and maintenance, all of which have a negative impact on force morale. Further, the sequester reductions disrupted modernization efforts and resulted in civilian furloughs and a hiring freeze.

Question. Reduction of \$115 billion in projected spending in the fiscal year 2015 budget, in line with the 2014 Quadrennial Defense Review

Answer. The fiscal year 2015 budget request assumes higher risks in some areas, but this budget helps us to remain a modern and capable military even while transitioning to a smaller force and resetting readiness over time. The \$115 billion reduction refers to the difference between the PB15 (FYDP) submission and the BCA sequestration levels across fiscal year 2015–19. Funding to the sequester levels would result in reduced force structure, decreased readiness funding, exacerbating the existing readiness shortfalls, and reductions to modernization efforts. It would erode our ability to respond to emergent challenges (i.e., increasingly contested space and cyber domains, a resurgent Russia, the Ebola response, and the rise of ISIL), and our ability to execute the defense strategy.

Question. Sequestered Budget Control Act discretionary caps starting in fiscal year 2016 onward

Answer. If sequester level cuts return in fiscal year 2016, then we will see increased risks and fewer military options to defend our Nation and its interests. The impact of sequestration and other budget constraints will further reduce unit readiness and disrupt modernization. The effects caused by deferred maintenance, and lost training will impose significant strain on long-term institutional readiness. Ultimately, reduced readiness (i.e., reduced training cycles, deferred maintenance, and the continuing pace of current operations) will damage the effectiveness, credibility and the morale of our military. Continued sequester cuts will create a situation where our defense strategy may no longer be viable.

Question. The fiscal year 2016 budget request assumes that the Budget Control Act will be amended in fiscal year 2016. The fiscal year 2016 budget resolution passed by the Senate and House of Representatives do not assume this but instead provides \$38 billion of the necessary spending through OCO budget. Should this funding not be available, what recommendations would you have, if confirmed, for how the Department of Defense should manage the \$35 billion in cuts for fiscal year 2016?

Answer. We remain hopeful that Congress can halt the abrupt, deep, and blunt cuts of sequestration and we will continue to reduce costs through increased efficiency and reforms, some requiring Congressional support. But an fiscal year 2016 budget at BCA cap levels will create risks requiring us to revisit the defense strategy. With a \$35 billion cut in fiscal year 2016, we will be forced to further reduce the size of the force, delay readiness restoration, and reduce modernization and investment programs.

Question. What are your views on the impact that these cuts could have on readiness?

Answer. The loss of \$35 billion from the fiscal year 2016 defense budget would gravely undercut the Department's readiness and future force generation capability. We would be forced to mortgage readiness recovery, equipment recapitalization, and

force modernization in order to support currently deployed and next-to-deploy forces. Placing all of this in the context of expanding global threats, we would be unable to execute the defense strategy. Sufficient and predictable resourcing is critical in our ability to maintain both military readiness and to meet additional operational demands.

Question. What are your views on the impact that these cuts could have to military capabilities?

Answer. Because of the nature of the sequester mechanism, funding for operations and maintenance, procurement, RDT&E, and military construction suffer disproportionately. The result of these cuts would be a military that is smaller and less capable. While our military would continue to provide presence and respond to crises, the fiscal year 2016 BCA cuts would increase risk, prolong readiness recovery, and delay necessary modernization for hundreds of programs, large and small. Cuts in funding for research and development would erode the technological superiority enjoyed by U.S. forces and increase risk in future conflicts.

READINESS FUNDING

Question. Given the reductions in readiness funding, what is your assessment of the current readiness of the Armed Forces to meet national security requirements across the full spectrum of military operations?

Answer. The current readiness of the Joint Force poses significant risk to our ability to execute the National Military Strategy. Sequestration exacerbated the existing state of poor readiness as a result of over a decade of exceptional demand in defense of the Nation. The Bipartisan Budget Act restored some resources, and provided much needed fiscal certainty and stability, thereby inhibiting any further readiness decline. Fully restoring readiness of the Armed Forces to meet national security requirements across the full spectrum of military operations requires readiness recovery time coupled with sufficient and predictable resourcing.

Question. What is your assessment of the near term trend in the readiness of the Armed Forces?

Answer. Near-term trends will remain significantly-less-than-optimal for the foreseeable future unless and until Congress provides sufficient and predictable funding and the authorities for the Department to implement critical cost-saving reforms. The loss of additional resourcing and/or the advent of increased operational demands would introduce a significant amount of additional risk to ongoing military operations.

Question. How critical is it to find a solution to sequestration given the impacts we have already seen to DOD readiness in fiscal year 2014?

Answer. It is critical to find a permanent solution to sequestration and to provide the Department with sufficient and predictable resourcing in order to restore the Joint Forces' ability to provide the full range of sufficient military capabilities. The present approach of augmenting base budget with OCO funds is unsustainable and will prevent the Department from fully recovering, meeting additional commitments, and restoring our comparative advantage through modernization. Without a sufficient and predictable funding profile, current operations can only continue at the expense of long term development and sustainment efforts, further complicating existing readiness challenges.

Question. What is your understanding and assessment of the methods currently used for estimating the funding needed for the maintenance of military equipment?

Answer. Service methods for funding equipment maintenance continually assesses the requirements of post-conflict reset—a combination of balancing reset, unit readiness and the sustainment of core capabilities—and developing detailed maintenance plans that balance operational availability with maintenance requirements. However, starts and stops in the budget process and funding uncertainties have a negative effect on the workload scheduling at Service depots. These negative effects ripple beyond the current year and can extend for months and even years.

Question. Given the backlog in equipment maintenance over the last several years, do you believe that we need an increased investment to reduce this backlog?

Answer. Without consistent and predictable base budget funding at requested levels, the Services will continue to rely on OCO to maintain equipment readiness. Inadequate funding of enduring and contingency sustainment requirements results in increased maintenance backlog. Equipment maintenance funding is driven by unit readiness requirements and based on a variety of factors to include force structure, operations tempo, schedule, nature and usage rate of the equipment, and safety. The Services used OCO funding for reset of equipment in support of OIF and OEF combat operations. In the past, this resulted in funding of baseline sustainment accounts at levels below Service enduring requirements.

Question. How important is it to reduce the materiel maintenance backlog in order to improve readiness?

Answer. It requires continuous attention to ensure the accumulation of backlog does not grow beyond what is manageable. Excessive backlog can eventually lead to reduced equipment availability rates, less reliable systems, and potentially shortened service life. OCO funding, beyond the end of combat operations, and adequate funding of Service baseline budget levels are important if we are to improve the trend in equipment readiness.

Question. How important is it to receive OCO funding two or three years after the end of combat operations in order to ensure all equipment is reset?

Answer. It remains critically important to maintain funding levels well beyond cessation of current operations to fully restore equipment readiness and support the National Security Strategy. In the near to mid-term, OCO dollars for enduring requirements and equipment reset is necessary for Joint Force readiness. OCO is still required to adequately address maintenance, repair and overhaul requirements.

Question. In years past, Congress has based additional readiness funding decisions on the Service Chief unfunded priorities lists. However, in recent years those lists have either not been provided or have arrived too late in our markup process. Do you agree to provide unfunded priorities lists to Congress in a timely manner beginning with the fiscal year 2017 budget request?

Answer. Should the Services have such priorities, the process allows the Joint Chiefs to make recommendations that are responsive to Congress after first informing the Secretary of Defense. Should I be confirmed, I will support the use of this process when warranted.

DEFENSE ACQUISITION REFORM

Question. Congress is considering a number of acquisition reform measures designed to reduce the costs and development timelines of major systems, and to streamline access to innovative commercial technologies and systems. What are your views regarding acquisition reform and the need for improvements in the Defense acquisition process?

Answer. I believe that acquisition reform in the Department should be based upon the following key principals:

- a. The responsibility and authority for acquisition system outcomes should be clearly identified within the DOD;
- b. The requirements' sponsor should be an integral part of delivering needed capability and remains accountable throughout the acquisition process, and;
- c. The effort to reduce overhead and increase efficiencies across defense acquisition should be continued.

Question. If confirmed, how would you improve all three aspects of the acquisition process B requirements, acquisition, and budgeting?

Answer. The Department's acquisition processes are constantly evolving in order to reduce overhead, increase efficiencies, and remain agile and responsive to the needs of our warfighters. The Department regularly reviews and updates the Joint Capabilities Integration and Development System (JCIDS) and has recently incorporated many "Better Buying Power" initiatives. If confirmed, I would strongly support the Department's acquisition reform vision.

Question. Do you believe that the current investment budget for major systems is warranted given increasing historic cost growth in major systems, costs of current operations, and asset recapitalization?

Answer. It's my understanding that recent cost and schedule trends show improvement, but I am still concerned that acquisition, procurement, and operations and support costs will continue their historic growth profiles. This growth will further exacerbate shortfalls under a sequestered budget and threaten our ability to meet our partner and ally security guarantees.

Question. If confirmed, how do you plan to address this issue and guard against the potential impact of weapon systems cost growth?

Answer. If confirmed, I will use the JROC to scrub weapon system requirements and consider cost-informed performance tradeoffs early and often to drive out requirements-related weapon-system cost growth. I will also advocate for versatile future capabilities that are both affordable and sustainable as a hedge against legacy weapon systems' cost growth.

Question. If confirmed, what actions would you propose, if any, to ensure that requirements are realistic, technically achievable, and prioritized?

Answer. As the lead of the Department's senior validation body, I would ensure the JROC continues to make adjustments and improvements to the JCIDS process as appropriate. A major review and update was just completed in Feb 2015. The up-

date continues to focus appropriate rigor in validating realistic, technically achievable, prioritized, and cost-informed requirement.

Question. If confirmed, what actions would you propose, if any, to ensure that resources are programmed for acquisition programs that are consistent with their cost estimates and schedules?

Answer. If confirmed, I will advocate in the Department's resource allocation process for major system resource funding that is consistent with the Secretary's cost and schedule position.

Question. What should the role of the combatant commanders, Service Chiefs, Service Acquisition Executives, and Under Secretary for Acquisition, Technology, and Logistics be in the acquisition process?

Answer. Service Chiefs and combatant commanders play a vital role in requirements generation and are pivotal to acquisition process success. Their engagement with the Service and Defense Acquisition Executives during the acquisition life-cycle of a weapon system also prevents requirements growth. USD (AT&L)'s role in reviewing Service plans at discrete milestones associated with major Department resource commitments ensures programs are affordable and executable, and that they follow sound business and risk management practices.

Question. Are there specific new roles or responsibilities that should be assigned to the Service Chiefs or Service Secretaries in the acquisition process?

Answer. If confirmed, I will examine the idea of new roles and responsibilities. I believe that any change should not undermine the statutory responsibilities of the Secretary of Defense. However, I am supportive of changes that promote Service accountability in the acquisition process and further streamline the bureaucratic processes.

TACTICAL FIGHTER PROGRAMS

Question. The F-35 Joint Strike Fighter Program, which is the largest and most expensive acquisition program in the Department's history, was formally initiated as a program of record in 2002, with a total planned buy of 2,443 aircraft for the U.S. The program has not yet completed the System Development and Demonstration (SDD) phase, and is not due to enter full rate production until 2019, 17 years after its inception. At projected procurement rates, the aircraft will be procured by the Department well into the 2030 decade to reach its total quantity buy. The requirement for 2,443 aircraft was established nearly 20 years ago; do you believe that requirement is still valid in light of countervailing pressure to reduce force structure to conserve resources and to improve capability to respond to prospective adversary technological advances and increased capabilities with regard to establishing contested combat environments, combined with updated threat assessments and an evolving national defense strategy?

Answer. The F-35 remains an integral part of the Department's future capabilities portfolio as we prepare for contingencies. In many of the scenarios we may face, the advanced capabilities of the Joint Strike Fighter are essential. If confirmed, I will support ongoing analysis looking at whether 2,443 is the right number of aircraft, but I do not anticipate reductions to the required capacity at this time.

Question. Do you believe the Nation can afford to procure these aircraft at a cost of \$12B to \$15B per year for nearly the next 20 years for an aircraft design that will be 30 years old at the completion of the program procurement phase?

Answer. I believe the Department cannot allow shortfalls in fighter capability or capacity to develop. Fifth-generation fighter aircraft, including the F-35, are critical as we contend with the technological advancements of near-peer competitors. We have been working diligently to make the overall cost per F-35 more affordable. Additionally, there will continue to be critical updates throughout the life cycle of the F-35 that will ensure the platform maintains a tactical advantage.

Question. Do you believe the Department's current and planned force mix of short-range fighters and long-range strike aircraft, whether land- or maritime-based, is sufficient to meet current and future threats around the globe, and most especially in the Asia-Pacific theater of operations where the "tyranny of distance" is such a major factor?

Answer. If confirmed, I will support continual assessments to assure our ability to meet current and future threats, including those concerning short-range fighters and long-range strike aircraft. To ensure we are postured to address the "tyranny of distance" and succeed militarily, the DOD, over the past three years, has made significant progress in developing new alliance initiatives, securing new rotational access for U.S. forces, and enhancing both the quantity and quality of U.S. forces and capabilities in the Pacific region.

Question. The Senate Armed Services Committee report accompanying S. 1376, the National Defense Authorization Act for Fiscal Year 2016, would require the Secretary of Defense to assess the current requirement for the F-35 Joint Strike Fighter total program of record quantity, and then to revalidate that quantity or identify a new requirement for the total number of F-35 aircraft the Department would ultimately procure. What will be your role in assisting the Secretary to revalidate the F-35 total program quantity?

Answer. If confirmed, I will assist the Chairman, in consultation with the Joint Requirements Oversight Council (JROC), in advising the Secretary in the review of the level of capability and capacity required to fulfill the established joint military requirements. This advice will ensure the appropriate balance is struck consistent with the level of priorities identified by the defense strategy and combatant commander requirements.

Question. The Air Force has proposed several times over the last decades to retire the A-10 close air support aircraft fleet, but each time Congress has rejected the proposals due to lack of a sufficient replacement capability. The Air Force's latest proposals to retire the fleet in fiscal years 2015 and 2016 were again rejected by Congress. Do you believe a need exists for a dedicated capability to provide close air support for American troops in close quarters battles?

Answer. No. The interoperable underpinning of joint requirements enables effective close air support utilizing a range of multi-role aircraft. Lessons from the last fourteen years of combat have institutionalized tactics, techniques and procedures integrating a number of manned and unmanned systems supporting these missions. Translating these lessons into joint requirements continues to advance our ability to provide close air support with advanced sensors and precise lethality of our weapon systems.

Question. What will be your role in ensuring our land forces receive the air support they'll need to survive and succeed while fighting the nation's land battles?

Answer. If confirmed, in consultation with the advisors to the JROC, I will ensure the appropriate capabilities are identified, assessed, and approved to meet the requirements of our land forces. I will also recommend alternative program recommendations and budget proposals, where necessary, to achieve this end.

Question. The Secretary of the Navy recently remarked that he believed the F-35 would be the nation's last manned fighter aircraft. Do you believe this to be true?

Answer. Despite the rapid advance of robotic and autonomous technologies over the past decade, I believe that the intellect and judgment of the human pilot remain integral to the combat capability provided by fighter aircraft. Decisions about future platforms will be informed by human and systems capabilities as well as mission requirements.

Question. If so, what will be your role in leading capabilities and requirements development to increase the role of unmanned aerial combat systems in the Department?

Answer. If confirmed, in my role as Chairman of the JROC, I will identify, assess and approve opportunities for increased employment of unmanned systems across the Joint Force. This includes leveraging validated capabilities identified in the Joint Concept for Robotics and Autonomous Systems now in development. I will also work with industry, science and technology, and academia to identify emerging technologies and align them with Joint Force requirements.

Question. If not, how do you see the future balance developing between manned and unmanned combat aircraft for the Department's future force structure?

I believe that the continued growth in robotic and autonomous systems technology will significantly impact the ongoing development and fielding of all future weapons systems, not just combat aircraft. The Joint Concept for Robotic and Autonomous Systems currently under development will help incorporate these new technologies to maximize the effectiveness of the Joint Force.

SPACE

Question. China's test of an anti-satellite weapon in 2007 was a turning point for the United States in its policies and procedure to ensure access to space. As a Nation heavily dependent on space assets for both military and economic advantage, the United States has to make protection of space assets become a national priority.

Do you agree that space situational awareness and protection of space assets now has the appropriate level of national security priority?

Answer. Yes. Space situational awareness underpins our ability to operate safely in an increasingly congested space environment. It is vital that the U.S. protect national space assets to maintain the benefits and advantages dependent on our access to space.

Question. In your view, how should China's continued development of space systems inform U.S. space policy and programs?

Answer. China is rapidly developing space capabilities of its own that mirror U.S. capabilities and could threaten our access and use of space for national security purposes. If confirmed, I will review the U.S. Military's efforts to address China's developments in space, and will coordinate closely with the Secretary of Defense.

Question. If confirmed would you propose any changes to National Security space policy and programs?

Answer. The National Security Space Strategy clearly highlights the growing challenges in the space domain. If confirmed, I will insist on policies, programs, and other measures that ensure U.S. warfighters can continue to depend on having the advantages that space confers.

ACCESS TO RADIO FREQUENCY SPECTRUM

Question. What actions would you take to ensure that the Department continues to have access to radio frequency spectrum that is necessary to train and to conduct its operations?

Answer. If confirmed, I will work with Interagency and industry partners on spectrum sharing in order to maintain DOD's assured access to the spectrum necessary to train and conduct operations while also enabling access for commercial broadband. I will also continue to support Public Law 106-65 (National Defense Authorization Act for Fiscal Year 2000), which requires the Secretaries of Commerce and Defense and the Chairman of the Joint Chiefs of Staff to certify that any alternative band or bands to be substituted for spectrum currently used by DOD provide "comparable technical characteristics to restore essential military capability that will be lost as a result of the band of frequencies to be so surrendered." This provision is necessary to ensure that DOD maintains access to spectrum necessary to operate critical military capabilities.

STRATEGIC SYSTEMS

Question. Over the next 5 years DOD will begin to replace or begin studies to replace all of the strategic delivery systems. For the next 15 plus years, DOD will also have to sustain the current strategic nuclear enterprise. This will be a very expensive undertaking.

Do you have any concerns about the ability of the Department to afford the costs of nuclear systems modernization while meeting the rest of the DOD commitments?

Answer. Yes, I am concerned that in the current budget environment completing these modernization programs will be a challenge. If confirmed, I will give full attention to these programs as they develop and mature. Modernizing the strategic delivery systems and sustaining the strategic nuclear enterprise are vital to maintaining a safe, secure, and effective nuclear deterrent, which is essential to deterring potential adversaries and assuring our allies. As with any funding choices, we will make decisions that balance fiscal prudence with appropriate risk to provide the best possible capabilities.

Question. If confirmed will you review the modernization and replacement programs to ensure that they are cost effective?

Answer. Yes.

Question. Section 1052 of the fiscal year 2014 NDAA established a "Council on Oversight of the National Leadership Command, Control and Communications System".

What do you see as the most pressing challenges in nuclear command, control and communications from a policy and acquisition perspective?

Answer. Nuclear command, control, and communications (NC3) is an enduring priority where we face the challenge of sustaining existing capabilities until new, modernized capabilities can be fielded. We must provide an assured, survivable and enduring NC3 system that simultaneously takes advantage of modern communication capabilities while remaining secure and hardened against attacks ranging from cyber to the most extreme kinetic attacks.

Question. What do you see as the most pressing challenges in overall national leadership communications from a policy and acquisition perspective?

Answer. Providing our national leadership with secure, reliable voice, video and data communications is a critical capability. This capability must be assured, survivable and enduring; allowing senior defense advisors to communicate with the President, the Combatant Commands and strategic Allies during normal day-to-day operations and during national crises from a fixed, mobile or airborne location. The major challenge from both a policy and acquisition perspective is to sustain existing capabilities until new, modernized capabilities can be fielded.

Question. If confirmed will you actively support section 1052 and work with outgoing Vice Chairman Winnefeld to understand the importance of this Council in ensuring the President has at all times control of nuclear weapons?

Answer. Yes.

Question. If confirmed will you agree to attend meetings as a member listed in its statute?

Answer. Yes.

Question. In 2014 Secretary Hagel has conducted an assessment of the state of nuclear deterrence operations of the Department of Defense.

Do you agree with its findings?

Answer. Yes, I agree with the conclusion of both the internal and external reviews that while our nuclear forces are currently meeting the demands of the mission with dedication, significant changes are required to ensure the safety, security, and effectiveness of the force in the future.

Question. Will you actively support the findings and their implementation?

Answer. Yes, if confirmed, I will devote significant attention to the state of our nuclear deterrence enterprise and will ensure the appropriate corrective actions are implemented.

MISSILE DEFENSE IN THE BOOST PHASE

Question. The Missile Defense Agency's (MDA) mission is to develop, test, and field an integrated, layered ballistic missile defense system to defend the United States and its allies against all ranges of enemy ballistic missiles in all phases of flight. While MDA is conducting research into next generation laser concepts that could be mounted on high altitude unmanned aerial vehicles, there is no program of record designed to intercept missiles during the boost phase of flight, when they are potentially most vulnerable. Do you agree with the Commander of Northern Command, when he said on April 7, 2015, referring to missile threats that "we need to be able to start knocking them down in the boost phase ... and not rely on the midcourse phase where we are today?"

Answer. Yes. Ballistic missiles are easier to detect and track in their boost phase, and typically countermeasures such as decoys are not deployed until after booster burnout. These factors make boost-phase intercept an attractive option to investigate.

Question. Would you support an increase in the priority of technology investments to develop and deploy a boost phase airborne laser weapon system for missile defense in the next decade, if technically practicable?

Answer. MDA's budget supports design of a laser demonstrator that is potentially capable of acquiring, tracking, and even destroying an enemy missile. This is an approach that we've studied for many years and, if it proves out, could potentially, come at lower cost than the existing system of kinetic interceptors. However, leap-ahead technology must be paired with corresponding evolutions in doctrine, policy, concepts of operations, and other non-materiel considerations to be militarily useful.

DOD'S COOPERATIVE THREAT REDUCTION PROGRAM

Question. The Cooperative Threat Reduction (CTR) program, which is focused historically on accounting for, securing or eliminating Cold War era weapons of mass destruction (WMD) and materials in the states of the former Soviet Union, has started to expand its focus to other countries. With this expansion the CTR program is widening its focus to biological weapons and capabilities including biological surveillance and early warning; and encouraging development of capabilities to reduce proliferation threats.

Do you think the CTR program is well coordinated among the U.S. government agencies that engage in threat reduction efforts, e.g., the Department of Defense, the Department of Energy, and the State Department?

Answer. Yes. The Department of Defense Cooperative Threat Reduction (CTR) Program informally and formally coordinates on a regular basis with the Combatant Commands, other DOD partners, interagency partners including the Departments of State and Energy, and international partners on CTR Program WMD threat reduction efforts. Part of this interagency coordination includes placing Defense Threat Reduction Agency (DTRA) liaison officers at U.S. Embassies where programs are highly active to further enhance coordination of activities in country and in the immediate regions where engagements occur. Additionally, in order to eliminate duplication of efforts, ensure safety and security is being considered in health capacity building programs, and work together to develop effective and sustainable detection and reporting systems, CTR is working very closely with USG civilian agencies to

plan and execute efforts that both meet threat reduction goals and contribute to the Global Health Security Agenda objectives.

Question. About 60 percent of CTR resources are proposed for biological programs.

With the very real threat of chemical weapons use and/or proliferation as we saw in Libya and are seeing in Syria, why is there such a large percentage of resources directed toward biological issues?

Answer. The DOD CTR Program is designed to posture the United States to eliminate state-based WMD programs, if and when opportunities emerge. At the same time, numerous scientific, economic and demographic trends are increasing the risks that infectious diseases outbreaks pose to U.S. and global security, to include through natural transmission, bioterror attacks or laboratory accidents. Such outbreaks challenge our ability to protect the health of U.S. armed forces, U.S. citizens at home and abroad, and U.S. allies, drain economic resources, and ultimately risk undermining geopolitical stability. The Ebola Virus Disease outbreak demonstrated how, in an interconnected global environment, a bio-incident anywhere in the world can lead to dangerous consequences when governments are unable to provide basic health and diagnostic services for their population. This creates environments in which destabilizing outbreaks can potentially provide terrorists with opportunities to gain access to deadly pathogens for their purposes due to insecure storage. For this reason, the percentage of funding devoted by the CTR Program at this time to reduce biological threats in the most vulnerable locations worldwide is appropriate.

PROMPT GLOBAL STRIKE

Question. The 2010 Quadrennial Defense Review concluded that the United States will continue to experiment with prompt global strike prototypes. There has been no decision to field a prompt global strike capability as the effort is early in the technology and testing phase. In your view, what is the role for a conventional prompt global strike capability in addressing the key threats to U.S. national security in the near future?

Answer. The Joint requirements process has identified the emerging challenge of high value, time sensitive, and defended targets that exist outside the range of conventional weapons systems. I support the continued evaluation of alternative technology and concepts that balance the potential operational employment against costs and the priority of this capability requirement.

Question. What approach (e.g. land-based or sea-based or both) to implementation of this capability would you expect to pursue if confirmed?

Answer. If confirmed, I will assist acquisition officials in identifying the appropriate solutions to validated Joint military requirements. Unless an appropriate alternative is presented, I would expect to support a sea-based approach to fulfill this requirement as previously identified by the JROC.

Question. In your view what, if any, improvements in intelligence capabilities would be needed to support a prompt global strike capability?

Answer. If confirmed, I will lead periodic reviews of joint military requirements and assessments of Combatant Commander integrated priority lists to identify, assess, and approve the doctrine, organization, training, materiel, leadership and education, personnel, facilities, and policy improvements necessary to close any intelligence gaps discovered in the development this requirement.

NUCLEAR WEAPONS AND STOCKPILE STEWARDSHIP

Question. Congress established the Stockpile Stewardship Program with the aim of creating the computational capabilities and experimental tools needed to allow for the continued certification of the nuclear weapons stockpile as safe, secure, and reliable without the need for nuclear weapons testing. The Secretaries of Defense and Energy are statutorily required to certify annually to the Congress the continued safety, security, and reliability of the nuclear weapons stockpile.

As the stockpile continues to age, what do you view as the greatest challenges, if any, with respect to assuring the safety, security, and reliability of the stockpile?

Answer. Our ability to sustain a safe, secure, and effective stockpile rests largely on our people and our infrastructure. As a significant wave of personnel begins to retire over the next decade, we must recruit and retain the next-generation of nuclear weapons stewards capable of certifying the stockpile without underground testing. At the same time, we must remain vigilant about recapitalizing and modernizing the infrastructure we need to design and produce components required for our Life Extension Programs, even as we continue operations in aging facilities.

Question. If the technical conclusions and data from the Stockpile Stewardship Program could no longer confidently support the annual certification of the stockpile as safe, secure, and reliable, would you recommend the resumption of underground

nuclear testing? What considerations would guide your recommendation in this regard?

Answer. Our current nuclear stockpile is assessed as effective. It is certified and does not require further nuclear testing. I am committed to working with the Department of Energy to maintain the critical skills, capabilities, and infrastructure needed to ensure the safety, reliability, and security of the stockpile without underground testing if practicable.

However, the stockpile is aging. I understand there are, and will always be challenges in identifying and remedying the effects of aging on the stockpile. I would strongly consider recommendations from the Department of Energy and the National Laboratory Directors before making any recommendation to the Secretary and President regarding a need to resume underground testing.

Question. If confirmed, would you recommend any changes to the non-deployed hedge stockpile of nuclear weapons?

Answer. Our non-deployed nuclear weapons stockpile allows us to manage risks of technical failures in our stockpile and changes in the geopolitical environment. Implementation of the 3+2 Strategy for nuclear weapons modernization will enable further reductions in the number of hedge warheads required. Furthermore, modernization of key production facilities will improve the responsiveness of the nuclear weapons infrastructure and may provide opportunities to make additional adjustments to the non-deployed hedge stockpile. I am committed to reducing the size of the stockpile to the lowest level consistent with deterrence objectives and warfighter requirements.

COUNTERING THE ISLAMIC STATE OF IRAQ AND THE LEVANT IN IRAQ & SYRIA

Question. To “degrade and ultimately destroy the terrorist group known as ISIL” the Department of Defense seeks to deny ISIL safe-haven and build partner capacity.

If confirmed, what criteria would you use to evaluate ISIL degradation and what is your assessment of the progress to degrade ISIL in Iraq and in Syria?

Answer. I view degraded capability as an inability to hold key terrain and influence population centers. As anti-ISIL forces in both Iraq and Syria gain momentum and achieve tactical and operational successes, I would consider ISIL’s failure to resupply or refit its fighters as additional indicators. Large groups of displaced persons returning to their homes in Tikrit and working to restore their former way of life serve as an example. By leveraging the resources of the U.S. Intelligence Community, the DOD will continue to analyze and assess ISIL capabilities, while identifying additional indicators of degradation.

Progress is being made. However, we must continue to exercise patience during the long campaign to degrade ISIL, and understand that our efforts cannot exceed those of our partnered ground forces in Iraq and Syria.

Question. A large part of the support for ISIL and other violent extremist groups like al Nusrah by the local Syrian population is based on the fact that these groups seek to remove President Assad from power.

What limitations, if any, do we face by failing to have the removal of Assad as an objective in Syria?

Answer. While seeking a negotiated political settlement is U.S. policy, the immediate objective is countering ISIL in both Syria and Iraq. Transition of power from the Assad regime may have implications and negative consequences on Syrian and regional stability, so it is important that we continue to work with our regional partners to counter both the threat of ISIL as well as sequencing an orderly transition from the Assad regime.

Question. In Iraq, what is the importance of arming the Sunni tribes in Anbar province to degrading ISIL and how do you assess progress to date? What is your understanding of the current plan to train and equip Sunni fighters to help in the campaign against ISIL?

Answer. Sunni tribal mobilization is an important component of the counter-ISIL fight. They are a credible ground force we have only begun to empower, and they are necessary to protect Iraqis in Anbar and other Sunni-dominant areas. I understand PM Abadi and the GOI continue to make marginal gains mobilizing Sunni tribes, but much work remains. We must continue to pressure the GOI to embrace the integration of these tribes into Iraqi Security Forces’ efforts. U.S. and Coalition support at airbases like Al Asad and Al Taqaddum are enhancing these efforts.

Question. What is your assessment of the fall of Ramadi to ISIL last month and what recommendations, if any, would you have for the U.S. and coalition strategy, if you are confirmed?

Answer. Ramadi was a tactical setback, and I certainly expect setbacks, as well as gains, over the course of a 36-month campaign to degrade ISIL. Despite tactical or operational shifts in either direction, I believe our strategy remains the correct one. This is a whole-of-government strategy and, at times, may require an adjustment to the military campaign to allow the non-military aspects of the strategy the time and space required to succeed.

Question. What is your assessment of the coalition air campaign in Iraq and Syria and what recommendations, if any, would you have for the air campaign, if you are confirmed?

Answer. ISIL's critical enablers are its ability to move rapidly through ungoverned regions and their ability to generate revenue, both of which are degraded and disrupted by the Coalition air campaign. The air campaign also creates time and space for local ground forces to develop their capability as legitimate security forces. Anti-ISIL forces' successes, including the recapture of Tal Abyad, were enabled by Coalition strikes.

The legitimacy of the Coalition and the success of the air strikes are also dependent on our commitment to minimize collateral damage. I support tactical patience and commander's decisions to withhold munitions in situations where strike effects could be detrimental to local forces or civilian populations. We should continue to avoid the trap of pursuing short-term tactical gains over the long-term strategic effects of losing the support of our partners in both Syria and Iraq.

Question. Does the current troop limitation of 3,100 give U.S. commanders, in conjunction with Iraqi security forces, Kurdish Peshmerga, tribal and local security forces, and coalition partners, in Iraq enough capability to successfully degrade and ultimately destroy ISIL?

Answer. Yes, I believe our current troop levels are sufficient to advance the military lines of effort in the near term. I understand our strategy depends on a credible ground force in Iraq, and our commitments must align with the capability and pace of our Iraqi partners. Iraqis must own this fight, and we may require adjustments in our troop commitments to continue to enable their forces over the long term.

Question. What do you see as the principle role or roles of the Office of Security Cooperation within the U.S. Embassy in Iraq?

Answer. The Office of Security Cooperation is the Department's primary interlocutor for traditional security assistance and cooperation in support of the U.S. Embassy. OSC-I supports the development of military programs to improve the professionalization of the Iraqi Security Forces in concert with providing warfighting capability through the Foreign Military Sales program.

Question. What is your assessment of the success of the current strategy against ISIL?

Answer. We are seeing some successes, but we need to take a long view and understand that there will be both successes and failures early in the campaign. In both Iraq and Syria, ISIL's ability to conduct massed offensive operations is degraded, its leadership cells are pressured, and its command-and-control and supply lines are being severed. We have reduced ISIL's oil production, processing and transportation infrastructure. We continue to work the military lines effort with our coalition partners and in conjunction with all lines of effort in the strategy.

Question. Do you assess that the training and equipping of Syrian opposition fighters by the United States and coalition partners under section 1209 of the fiscal year 2015 NDAA will produce enough fighters to make a strategic difference on the battlefield in Syria?

Answer. From my understanding, it's too early to tell. The number of Syrians who are currently volunteering to participate in the Syria Train and Equip program is growing. The current number of trainees is small but are properly vetted and have objectives that match our own. Larger numbers of unknown or unqualified trainees would not necessarily be better and might work counter to our interests. It will take time to establish a credible partner on the ground in Syria and we are continuously making adjustments based on our lessons learned as we progress.

Question. In your view, what military support, if any, should the Syrian opposition fighters who receive support under section 1209 of the FY2015 NDAA need from the United States and coalition partners when they return to Syria?

Answer. The U. S. is committed to their success. We will be providing basic equipment such as military gear, mobility capabilities such as trucks and vehicles, and small arms and ammunition. If confirmed, I will examine the full range of support that we can provide our T&E forces as the program progresses.

Question. What are the lessons learned from the drawdown and post-combat operations in Iraq that should be applied to the drawdown and post-combat operations in Afghanistan?

Answer. I think an important lesson we can take from our Iraq and Afghanistan experiences is that withdrawal decisions must be conditions-based. I also think we have learned that a military solution alone does not guarantee success. Governance and economic development are required to sustain military and security gains. When security threats are fueled by underlying political or sectarian problems U.S. troops can only address the effects, not the cause.

AFGHANISTAN CAMPAIGN

Question. What is your assessment of the progress of the Resolute Support mission in Afghanistan?

Answer. Overall, the Afghanistan National Defense and Security Forces (ANDSF) continue to grow their tactical proficiency. However, the lack of a Minister of Defense has had a negative impact on the Resolute Support mission. Critical gaps still remain in aviation, intelligence, and special operations, all impacting the ANDSF's targeting capability. These gaps will remain for some time, even with the addition of key enablers. RS advisors continue to address developmental shortfalls in the areas of logistics, medical support, and counter-IED exploitation.

Question. In May of 2014 President Obama said "... by the end of 2016, our military will draw down to a normal embassy presence in Kabul ..."

What is your understanding of what military forces comprise a "normal embassy presence"?

Answer. A normal embassy presence will have a counter-terrorism and security component consisting of a Defense Attach Office and a Security Cooperation Office under a Senior Defense Official with a military reporting chain through CENTCOM. CENTCOM is still planning for the Security Cooperation Office-Afghanistan. Its size will depend upon factors such as security force assistance objectives, ANDSF capabilities, Government of the Islamic Republic of Afghanistan (GIROA) requests, and force protection concerns.

Question. What lessons should we learn from the experience the drawdown of U.S. troops in Iraq as applied to the drawdown of U.S. and international troops in Afghanistan?

Answer. The transfer of security cooperation activities should be deliberate and measured.

"Time" allows for the ownership of the tactical fight to be transferred from coalition forces to the ANDSF; allowing the coalition to focus on issues, critical to the long term viability of the force. The ANDSF continues to prove that they are capable of executing the tactical fight; however, sustainment and institutional development are critical to their long term success.

Question. If confirmed, are there changes you would recommend to the U.S. strategy in Afghanistan?

Answer. Not at this time, but if confirmed I will continually assess and offer recommendations as that strategy unfolds.

Question. What is the effect of ISIL operations in Afghanistan and/or coordination with the Taliban for the U.S. strategy for Afghanistan?

Answer. The coalition and the Afghan government have closely watched ISIL's attempt to expand its reach to Afghanistan and Pakistan. The potential emergence of ISIL has sharply focused the ANDSF, NDS, and Afghan political leadership, which are collaborating closely in order to prevent this threat from expanding. We will continue to support Afghanistan's security through our strategic partnership. It is important to note, ISIL is a competitor with other groups in Afghanistan, which may lead to increased violence between extremist groups.

Question. If security conditions on the ground in Afghanistan degrade in 2016, would you recommend to the President revisions to the size and pace of the drawdown plan in order to adequately address those security conditions?

Answer. We must be willing to reevaluate assumptions of previous recommendations and assess the conditions on the ground as the drawdown takes place. If confirmed, I will collaborate with CENTCOM to assess conditions on the ground and will modify my input to the Chairman's recommendations to the President accordingly.

Question. Should the authorities granted to the commander of U.S. forces in Afghanistan take into account the security conditions on the ground faced by U.S. troops?

Answer. Yes. Protecting the force is an inherent responsibility of command.

AFGHANISTAN NATIONAL SECURITY FORCES

Question. What is your assessment of the progress in developing a professional and effective Afghanistan National Security Force (ANSF) and what recommenda-

tions would you make to address challenges to building ANSF capacity, if confirmed?

Answer. Based on my interaction with the Joint Staff subject matter experts, it is my understanding that the ANDSF are tactically capable, but continue to be challenged at the Corps and Ministerial levels. We assess the ANDSF's capabilities, capacities, and morale will be sufficient to set the conditions for Afghan-led and Afghan-owned reconciliation talks. The ANDSF still need assistance with enablers and related systems and processes necessary to run a modern, professional army and police force. In particular, they need sustained support for capability gaps in aviation, intelligence, sustainment, and special operations. To address these gaps, our advisory mission and mentorship at the security ministries and at the corps and police zone level remain vital.

Question. Do you support plans for building and sustaining the ANSF at 352,000 personnel and, if so, what factors influence your recommendation about the proper size of the ANSF?

Answer. Yes, at least for the near term. Although we've made important gains, GIRoA and the ANDSF will continue to face threats from external regional actors and internal threats from a resilient insurgency. The current ANDSF Plan of Record supports the need for 352,000 ANDSF along with 30,000 ALP at least through 2018. Evaluating the security situation (and prior assumptions) is continual and drives my recommendations on ANDSF size. Committed contributions from partners are also important. Afghan and NATO goals remain generally congruent regarding the denial of terrorist safe havens.

RECONCILIATION

Question. In your view, what should be the role of the United States in any reconciliation negotiations with the Afghan Taliban and other insurgent groups?

Answer. The United States supports an Afghan-led political process to determine the future of their country. Our relationship with Pakistan as a key stakeholder in the region can also have a positive impact. As part of the outcome of any process, the Taliban and other armed Afghan opposition groups must end violence, break any associations with international terrorism, and accept Afghanistan's constitution, including its protections for women and minorities.

Question. What additional steps, if any, should the United States take to advance the reconciliation process?

Answer. We remain strongly supportive of an Afghan-led and Afghan-owned reconciliation process where the Taliban and the Afghans engage in direct talks to resolve the conflict in Afghanistan. In President Ghani's inauguration address, he called on the Taliban to enter political talks, and has made reconciliation central to his foreign policy. We can also continue to encourage stronger ties between Afghanistan and Pakistan—and have been pleased with their recent efforts to address their shared security concerns.

Question. In your view, what should be the role of Afghanistan's neighbors, in particular Pakistan, in the reconciliation process?

Answer. Regional partners have an important role to play in enabling a stable, democratic Afghanistan, and our relationship with Pakistan as a key stakeholder in the region can have a positive impact. We continue to encourage all regional partners to support President Ghani's reconciliation efforts. We are in close communication with President Ghani on these matters and we remain committed to supporting his efforts toward peace.

U.S. STRATEGIC RELATIONSHIP WITH PAKISTAN

Question. What in your view are the key U.S. strategic interests with regard to Pakistan?

Answer. Our strategic interests and national security goals remain to disrupt, dismantle, and defeat Al Qaeda (and other potential transnational insurgent threats) and to prevent the return of safe havens in Afghanistan and Pakistan. We also have an interest in a stable Pakistan and the non-proliferation of nuclear weapons and technology.

Question. What would you consider to be areas of shared strategic interest between the United States and Pakistan?

Answer. The U.S. and Pakistan share the common goals of eliminating Al Qaeda (and other potential transnational insurgent threats), promoting regional stability and the non-proliferation of nuclear weapons and technology.

Question. In what areas do you see U.S. and Pakistani strategic interests diverging?

Answer. We diverge from Pakistan in their policy on leveraging non-state, extremist proxies to attain their national security objectives and in their perception of Indian intentions in the region. Our bilateral interests with Pakistan can also be made more complex by Pakistan's deepening ties with China.

Question. If confirmed, what changes, if any, would you recommend for U.S. relations with Pakistan, particularly in terms of military-to-military relations?

Answer. The U.S.-Pakistan relationship is important to our vital national security interests in the region and will remain so for the foreseeable future. We will need to continue cooperating with Pakistan on defeating transnational insurgent threats, supporting Pakistan stability, and reaching a lasting peace in Afghanistan. We should continue mil-to-mil cooperation to improve on ways we can assist enhanced border security and stability, consistent with Leahy considerations.

U.S. ASSISTANCE TO PAKISTAN

Question. Since 2001, the United States has provided significant military assistance to Pakistan. In addition, the United States has provided significant funds to reimburse Pakistan for the costs associated with military operations conducted by Pakistan along the Afghanistan-Pakistan border.

As U.S. troop presence draws down in Afghanistan, what recommendations, if any, would you have regarding the reduction or cessation of Coalition Support Funds that currently reimburse Pakistan for military support in connection with U.S. military operations in Afghanistan?

Answer. It is in our best interest to have a long term strategic partnership with Pakistan. Coalition Support Funds are a mechanism to advance our security interests with and through Pakistan, however the funding needs to be tied to a broader set of expectations and outcomes, not just ongoing border operations in Pakistan.

Question. In your view, how effective has the assistance and other support that the United States has provided to Pakistan been in promoting U.S. interests?

Answer. U.S.-Pakistan mutually agreed security objectives include improving Pakistan's capacity to counter militancy, developing a stronger bilateral defense relationship, and fostering a better relationship between Pakistan, Afghanistan and India. In support of these objectives, U.S. security assistance has enhanced the Pakistan Military's ability to attack militants, terrorists groups, and other transnational threats. U.S. assistance has bolstered Pakistani capability while also preserving the mil-mil relationship that is a key component of the U.S.-Pakistan strategic partnership.

Question. Do you support conditioning U.S. assistance and other support to Pakistan on Pakistan's continued cooperation in areas of mutual security interest?

Answer. Yes. It is important that we maintain a strategic relationship with Pakistan, not a "transactional" one, as we condition our assistance.

Question. What is your assessment of the current relationship between Afghanistan and Pakistan?

Answer. There is some potential for a more constructive "new normal" going forward. Relations between Afghanistan and Pakistan have improved since the election of President Ghani in Afghanistan. Although gradual, the two sides continue to work to improve border coordination and establish standards for information sharing, communication, and complementary operations near the border.

Question. What is your assessment of Pakistan's cooperation with the United States in counterterrorism operations against militant extremist groups located in Pakistan?

Answer. Pakistan's cooperation on counterterrorism has not always met our expectations, particularly their policy of leveraging proxies to advance national security objectives. Since 2009, Pakistan has undertaken counterinsurgency operations against extremist organizations in the northwest, namely the Swat, North and South Waziristan, Mohmand, and Bajaur with mixed results. Security assistance, Coalition Support Funding reimbursements, and cross-border coordination with ISAF and Afghan forces have helped enable these operations. It is in our interest that Pakistan continues this campaign as effectively and comprehensively as possible.

Question. What is your assessment of Pakistan's efforts to maintain transit and provide security along the ground lines of communication (GLOCs) through Pakistan?

Answer. We have received support from Pakistan in the use of their GLOCs. Currently we rely on multiple GLOCs, including Pakistan's to support our operations in Afghanistan. We do not anticipate any GLOC problems in the foreseeable future.

Question. What is your assessment of Pakistan's efforts to counter the threat improvised explosive devices, including efforts to attack the network, go after known precursors and explosive materials?

Answer. Pakistan suffers significant casualties as a result of IED attacks. They are taking concrete steps to disrupt the networks, placing new restrictions on the distribution of precursor materials and providing Regional Leadership on the issue. We continue to encourage and pressure them to do more.

IRAN

Question. What is your assessment of the military and political threat posed by Iran?

Answer. Iran's authoritarian regime poses both a regional and global security threat. The world's foremost state sponsor of terrorism seeks to export its revolutionary ideology in the Middle East through a large conventional army; terrorist proxies; weapons trafficking; ballistic missile proliferation; and maritime weapons and threats to the Strait of Hormuz. Through its emergent nuclear and established cyber programs, Iran can threaten and undermine the international institutions and conventions that underpin global security. The Supreme Leader will continue to take advantage of opportunities to enable Iran's domestic, hardline political factions' malign policies that value regime survival over international integration.

Question. What is your assessment of the threat of Iran's influence in Iraq to U.S. interests?

Answer. Iran's ambitions in Iraq are not to help create a sovereign, functional government. Iran wants to influence Iraq through the lens of a Shia-dominated buffer state. Currently, Iran is using its influence vis-&-vis Shia militias to offset ISIL behavior. This comes with the risk that one day these militias could possibly threaten Iraqi or U.S. forces. In the future, expect Iran to utilize its political and military instruments of power to control Iraq along sectarian lines.

Question. In your view, what are the risks, if any, associated with reducing U.S. presence in the Middle East with respect to the threat posed by Iran?

Answer. Real or perceived U.S. disengagement from the Middle East could create opportunity for Iran to increase its support to terrorist organizations. Right-sized U.S. military presence in the Middle East demonstrates not only a commitment to the region, but a commitment to our regional security partners. As a result, a continued U.S. military presence in the region will further deter Iran from conducting nefarious activities such as blocking the Strait of Hormuz or threatening other Gulf States. Finally, a continued U.S. military presence in the region is the single most important indicator of our overall commitment to a secure, peaceful and prosperous Middle East.

Question. Negotiations on the Iran nuclear program have been extended with a deadline now of July 7, 2015 to finalize a comprehensive agreement.

What are the elements of a nuclear agreement with Iran that you consider critical to ensuring that it is a "good" deal for U.S. national security interests?

Answer. From a security standpoint, important outcomes include rolling back Iran's nuclear program providing the international community with necessary access and transparency, while preserving the sanctions imposed on conventional arms and ballistic missiles.

Question. If Iran is allowed to maintain a monitored and limited uranium enrichment program, do you believe that other states in the region may seek to develop enrichment programs of their own and why or why not?

Answer. Saudi Arabia's and other Gulf countries' decisions on whether or not to enrich uranium are not solely tied to a deal with Iran; under the Nuclear Non-proliferation Treaty (NPT) signatories are allowed enrichment programs as part of a peaceful nuclear program. Unlike Iran, which endures sanctions, isolation, and economic distress due to a covert attempt intent on developing nuclear weapons, our Gulf partners could choose to pursue nuclear energy in compliance with the NPT. The U.S. military will continue to provide options in support of the overall U.S. strategy.

Question. What role, if any, should DOD play in countering Iran's support of international terrorism?

Answer. DOD's role is to support an interagency and regional effort to deter and counter Iran's support of international terrorism. We deter Iran by maintaining a responsive military capability in the region and ensuring a robust defensive infrastructure for ourselves and our allies. To counter Iran, we work by, with, and through partner nations by conducting counter terrorism training, providing equipment sales, participating in multi-national exercises, and sharing information. When

combined, these efforts—along with those of our partners—help to weaken terrorist groups and hinder Iran’s ability to support them.

THE 2001 AUTHORIZATION FOR USE OF MILITARY FORCE

Question. What is your understanding of the scope and duration of the 2001 Authorization for Use of Military Force (AUMF), including with respect to military operations against the Islamic State in Iraq and the Levant?

Answer. There is an ongoing armed conflict between the United States and Al Qaeda, including its associated forces. Al Qaeda’s associated forces are those groups that (1) are an organized armed group that has entered the fight alongside Al Qaeda and, (2) is a co-belligerent with Al Qaeda in hostilities against the United States or its coalition partners. The AUMF enacted following the terrorist attacks of September 11, 2001 remains the legal basis under U.S. domestic law for use of military force against these threats. Since September 2014, the Administration has applied the 2001 AUMF for the use of military force against the Islamic State of Iraq and the Levant (ISIL, previously known as Al Qaeda in Iraq). ISIL has been subject to the use of force under the AUMF since at least 2004, when it entered the conflict against the United States as part of the Al Qaeda organization. Despite internal power struggles within ISIL and other factions of the Al Qaeda network, ISIL asserts that it is the true heir to bin Laden’s legacy of global jihad, and continues its unlawful campaign against the United States, its citizens, and interests.

Question. Are you satisfied that current legal authorities, including the AUMF, enable the Department to carry out counterterrorism operations and activities at the level that you believe to be necessary and appropriate?

Answer. Yes. The 2001 AUMF provides the necessary authorities to counter Al Qaeda and its associated forces, including ISIL. With respect to ISIL, the 2002 AUMF provides additional statutory authority for the current operations against ISIL both in Iraq and, to extent necessary to achieve the purposes of that AUMF, in Syria.

ISLAMIC STATE IN IRAQ AND THE LEVANT (ISIL)

Question. What is your assessment of the threat posed by ISIL to the U.S. homeland, U.S. interests overseas, and Western interests more broadly?

Answer. ISIL does pose a threat to the homeland as well as to U.S. and Western interests abroad. ISIL is focused on strengthening its self-declared caliphate in Iraq and Syria as well as expanding into other areas in the Middle East and Africa. In so doing, ISIL is integrating foreign fighters that could attempt to return to their countries as operatives. In addition, ISIL sympathizers pose a risk should they heed ISIL calls to conduct attacks against the U.S. and the West.

Question. How would you describe the U.S. strategy to counter ISIL?

Answer. Our strategy is a whole-of-government and regional approach to degrade and ultimately defeat ISIL. Our strategy leverages capable ground partners supported by an International Coalition. The nine lines of effort serve as a guide to achieve this objective, and include: supporting effective governance in Iraq, disrupting ISIL’s finances, disrupting the flow of foreign fighters, and protecting the homeland. DOD is only primarily responsible for the military campaign to deny ISIL safe haven and build partner capacity. Coalition kinetic strike operations, advise/assist operations, training/equipping efforts, and posture in the region combine to achieve these lines of efforts. The military campaign provides time and space for progress in the other lines of effort, particularly inclusive governance.

Question. What is your assessment of the effectiveness of that strategy in achieving its objectives?

Answer. We are seeing limited but steady success, and we need to be patient as there will be both successes and failures throughout the campaign. In both Iraq and Syria, ISIL’s ability to conduct massed-offensive operations is degraded, its leadership cells are pressured, and its command-and-control and supply lines are being severed. We have degraded ISIL’s oil producing, processing and transportation infrastructure. We continue to work with our coalition partners along several lines of effort to degrade and ultimately defeat ISIL. We must also be wary of ISIL’s destabilizing potential outside of Iraq and Syria and leverage our regional partnerships accordingly.

Question. What do you assess to be the greatest impediments to implementing the strategy to counter ISIL?

Answer. Conflicting interests on the ground and rampant sectarianism combined with poor governance and disenfranchised populations are the greatest challenges to defeating ISIL. Only through governments that foster inclusive and legitimate

governance, as well as through robust commitments from regional and international stakeholders, will the strategy be successful.

Question. What modifications, if any, would you recommend be made to the strategy to counter ISIL, if confirmed?

Answer. If confirmed, I will support the Chairman's assessment of the military lines of effort to ensure that they are providing the time and space necessary for the non-military lines of effort to succeed. I also will work to identify additional opportunities to bolster our ongoing efforts to train and equip security forces operating in Iraq and Syria, and recommend adjustments to increase their effectiveness if necessary. Finally, I would look for opportunities to combat ISIL's trans-regional reach and influence to complement the efforts in Iraq and Syria. Continued assessment and refinement are paramount to any strategy and its implementation.

AL QAEDA

Question. What is your assessment of the threat posed by al Qaeda and its affiliates to the U.S. homeland, U.S. interests overseas, and Western interests more broadly? Which affiliates are of most concern?

Answer. Despite ongoing counterterrorism (CT) pressure and competition from ISIL, Al Qaeda and its affiliates continue to threaten the U.S. homeland, U.S. interests overseas, and Western interests more broadly. Al Qaeda in the Arabian Peninsula (AQAP) remains the affiliate of most concern.

YEMEN AND AL QAEDA IN THE ARABIAN PENINSULA

Question. What are the U.S. national security interests in Yemen?

Answer. The 2015 National Security Strategy states "the U.S. has no greater responsibility than protecting the American people. Yet, our obligations do not end at our borders." The continued presence of AQAP in Yemen and the emergence of ISIL present threats to our homeland and to the American people. We act in Yemen in the interest of our security.

Question. What is your assessment of current U.S. strategy in Yemen?

Answer. I believe the U.S. should continue its policy of support to the Republic of Yemen Government (RoYG) in combatting terrorism and addressing instability within its borders. The U.S. requires a stable and reliable partner in order to accomplish its counterterrorism objective of countering AQAP and violent extremist organizations. We seek stability in Yemen through: 1) political transition, namely National Dialogue, Constitutional reform, and Elections; 2) continued economic and humanitarian assistance; and 3) security reform, specifically counterterrorism capacity building, border security, and critical infrastructure protection.

Question. What are the implications of recent events in Yemen for U.S. counterterrorism policy both in Yemen and globally?

Answer. I believe the current conflict in Yemen has hampered some CT operations, but the U.S. still maintains a capability, albeit diminished, to counter AQAP. AQAP remains an immediate threat to Yemen, the region, and the United States. When the political and security situation allows, I believe we should resume our previous partner-based DOD counterterrorism activities with the Yemeni government.

Question. What is your assessment of the effectiveness and capability of coalition operations led by Saudi Arabia in Yemen?

Answer. Saudi-led Coalition operations can be sustained at least in the near term. Airstrikes are slowing Huthi expansion in Yemen, but have not prevented Huthi attacks along the Saudi border nor forced the Huthis to withdraw from cities they captured earlier this year.

SOMALIA AND AL SHABAB

Question. What is your assessment of the threat posed by Al Shabab?

Answer. Al-Shabaab poses a threat to countries providing forces to AMISOM such as Kenya. The group also targets Somali government facilities and Western targets in and around Mogadishu.

Question. In your view, does al Shabab pose a threat to the United States and/or western interests outside of its immediate operational area?

Answer. Al-Shabaab does not currently directly threaten the U.S. Homeland or Europe. The group continues to pose a threat to U.S., Western, and allied interests in East Africa, to include Somalia and Kenya.

Question. What is your understanding of the current U.S. strategy in Somalia and the role of DOD in that strategy?

Answer. The U.S. strategy on Somalia was implemented in May 2014. It has two major security components: (1) Supporting the African Union Mission in Somalia to

stabilize security in the short term, and (2) Expanding support for the creation and training of the Somali National Army, which will provide long term stability and security. DOD contributes significant assets towards the U.S. strategy's success.

Question. What role should DOD play in building the capacity of the Somali national military forces?

Answer. The Department of State has been leading efforts to create Somali security services that are loyal to the federal government and representative of the ethnic and clan diversity in Somalia. I believe DOD should continue to support that effort through building partner capacity, logistics, and encouraging joint operations with the African Union Mission in Somalia.

AL QAEDA IN THE ISLAMIC MAGHREB (AQIM)

Question. What is your assessment of the threat posed by Al Qaeda in the Islamic Maghreb (AQIM)?

Answer. Al Qaeda in the Lands of the Islamic Maghreb (AQIM) and affiliated groups continue to target local and regional government and Western interests. The group poses a threat to the Malian government and military targets, and Multi-dimensional Integrated Stabilization in Mali (MINUSMA) forces and facilities, and U.S. and Western persons in Niger and Mali, who are vulnerable to kidnapping for ransom.

Question. In your view, does AQIM pose a threat to the United States and/or western interests outside of its immediate operational area?

Answer. AQIM does not pose a direct threat to the U.S. homeland. The group currently does not view conducting attacks outside North Africa and the Sahel as a priority.

Question. What capacity has AQIM demonstrated to plan and carry out actions threatening U.S. interests?

Answer. AQIM is able to threaten U.S. and Western interests within North and West Africa, where it has conducted or attempted attacks in several countries to include Mali, Niger, Algeria, and Mauritania. AQIM will likely strengthen its ties to other Al Qaeda-associated terrorist groups in the region to influence and support attack planning.

Question. In your view, what has been the impact of the recent expansion of AQIM's area of operations in northern Mali on the group's capacities and aims?

Answer. AQIM has increased freedom of movement throughout the region and implemented its own brand of sharia in the breakaway northern territories in Mali. AQIM uses small-scale improvised explosive device (IED), indirect fire (IDF), and mortar attacks to further conduct attacks in northern Mali to expel Multidimensional Integrated Stabilization Mission in Mali (MINUSMA).

LIBYA

Question. What is your assessment of the current security situation in Libya?

Answer. Libya currently has two governments competing for control, and their aligned militias are struggling to establish dominance of the country. However, at this point neither government is capable of providing domestic security or addressing transnational threats, such as terrorism or the ongoing migration crisis.

Question. What is your understanding of the U.S. strategy with regards to Libya and the role of DOD in that strategy?

Answer. I believe the U.S. maintains a national interest in stabilizing Libya and impeding extremists from using it as a refuge. The U.S. and our allies support the United Nations-led efforts to help the opposing Libyan groups reach a political resolution by establishing a national unity government. The role of DOD in the U.S. strategy is to use military relationships with regional partners to increase support for a political solution. Should diplomatic efforts to form a unity government succeed, I believe the U.S. should be prepared to revisit security assistance programs for legitimate Libyan security services.

Question. How would you assess its effectiveness in achieving its objectives?

Answer. Libya's political landscape is fragmented and the country is embroiled in a civil war. UN-led negotiations have yet to yield lasting results. I believe the DOD's role in a political solution is necessary, but alone it is not enough to drive resolution.

Question. What do you assess to be the greatest impediments to implementing the strategy and protecting U.S. interests in Libya?

Answer. I believe the greatest obstruction is the severe division of Libya's political and security landscape, which has seriously complicated negotiations. Libya has degenerated into a complex mix of competing political factions, tribes, militias and

other armed groups which are intermixed with local and foreign extremists. These influences continue to make protecting U.S. interests in Libya difficult.

Question. What is your assessment of the threat to the U.S. and our allies from terrorist groups, including ISIL, in Libya.

Answer. Extremists and terrorists from Al Qaeda -affiliated and allied groups are using Libya's permissive security environment as a safe haven to plot attacks, including against Western interests in Libya and the region. ISIL considers Libya a key part of its caliphate and ISIL-aligned extremists are trying to institute sharia law in parts of the country.

NORTH AFRICA

Question. In recent years, there has been a growth of terrorist networks, capabilities, operations, and safe havens throughout North and East Africa, including groups that have the intention to target U.S. and Western interests. In the face of growing instability and threats, the U.S. counterterrorism effort in the region has been described as an "economy of force" effort.

Do you agree with that characterization of the situation in North and East Africa and the U.S. counterterrorism efforts to combat the related threats?

Answer. Diverse and active terrorist networks in North and East Africa (as well as West Africa) are seeking to influence local resources and territory. Some have, at times, also demonstrated a willingness to target U.S. and Western interests. These groups threaten the stability of our regional partners and safety of local civilians. AFRICOM, in partnership with host nations and interagency partners, is working to identify, prioritize, and target these networks.

Question. What is your assessment of the current U.S. counterterrorism strategy in the region? In your view, is the U.S. military allocating adequate resources to effectively address the terrorism threat in the region?

Answer. I believe the U.S. military is allocating adequate resources based on the level of threat and the potential for collaboration with capable partner nations. If confirmed, I will continuously evaluate the adequacy of our strategy and allocation of resources, especially following changes in local threat levels and when new opportunities for potential collaboration with our partners arise.

Question. General Rodriguez noted in his March 2014 testimony that "North Africa is a significant source of foreign fighters in the current conflict in Syria." What is your understanding of the foreign fighter flow from North Africa to the conflict in Syria and Iraq?

Answer. The largest portion of foreign fighters entering Iraq and Syria come from North Africa, specifically Tunisia, Morocco, Libya and Algeria. Many of the fighters however are now choosing to stay in North Africa and join the ISIL affiliate in Libya instead.

Question. In your view, is it likely that many of these fighters will eventually return home from Syria and Iraq to North Africa and continue their fight against regional governments?

Answer. Yes, many Northern African foreign fighters will likely return home to conduct attacks in their home countries. We do not know if these fighters are being tasked by ISIL to attack Western of U.S. interests or whether, having been radicalized by ISIL are acting on their own accord.

RUSSIA

Question. Crimea was formally annexed when President Putin signed a bill to absorb Crimea into the Russian Federation on March 18, 2014, and Russia continues to fuel instability in eastern Ukraine despite signing ceasefire agreements in September 2014 and February 2015.

How effective do you assess the sanctions of the U.S. and the European Union have been in deterring additional aggression by Russia?

Answer. I believe sanctions by themselves are unlikely to deter future Russian aggression. Deterring combined Russian-separatists actions against Ukraine requires a whole of government approach in concert with Europe and NATO. Nevertheless, it's my understanding that U.S. and EU sanctions have impacted Russia's economy and I believe they send a clear signal to Moscow that aggression against Ukraine's sovereignty and territorial integrity entails costs. With the EU's recent decision to extend sanctions for an additional six months, the United States and EU have made clear that sanctions will not be lifted until Minsk is fully implemented. I believe these actions have contributed to deterrence.

Question. What other specific U.S. actions helped to deter additional Russian aggression in Eastern Europe?

Answer. Congressional support for the European Reassurance Initiative has enabled DOD, via Operation ATLANTIC RESOLVE (OAR), to conduct military exercises and training on land, in the air and at sea, while sustaining a rotational presence across Europe; and increase the responsiveness of U.S. forces to reinforce NATO by exploring initiatives such as prepositioning of equipment and enhancing reception facilities in Europe. Our bilateral efforts as well as our continued support of NATO adaptation measures all support the goal of deterring additional Russian aggression.

Question. What additional steps, if any, are likely to prove most effective at deterring Russian aggression in Eastern Europe?

Answer. If confirmed, I will continue to evaluate the effectiveness of our current measures and I will remain alert to potential adjustments. Of key concern to me is wisely channeling U.S. military efforts and resources to ensure our allies and partners are militarily capable and interoperable.

Question. Are you concerned that Moldova and Georgia may be at a heightened state of vulnerability given Russian willingness to take aggressive action in Ukraine?

Answer. Yes. Russia has demonstrated both in Georgia in 2008 and Ukraine today its willingness to use force and exploit the vulnerabilities of these fragile democracies to achieve its strategic objectives. Georgia, Moldova and Ukraine all contain Russian occupied separatist regions that Russia could potentially exploit for its own purposes.

Question. Russian tactics in eastern Ukraine have been called “hybrid” and combine hard power with soft power, including elements such as lethal security assistance to separatists, the use of special operations forces, extensive information operations, withholding energy supplies and economic pressure.

If confirmed, what steps would you recommend as part of a strategy to counter this “hybrid” approach?

Answer. I believe we must continue to take actions which deter Russian aggression, remain alert to its strategic capabilities, and most importantly help our allies and partners resist Russian coercion over the long term. I will continue to emphasize training activities, rotational presence, and capacity-building to make our partners more resilient against asymmetric threats and demonstrate U.S. resolve.

Question. In light of Russia’s actions in 2014, what do you believe are appropriate objectives for U.S.-Russian security relations?

Answer. Although we disagree with Russia’s recent conduct against its neighbors and will continue with our efforts to deter future actions, I will leave open the possibility for collaboration with Russia in areas of mutual national security interests. If confirmed, I will also keep lines of communication with my Russian counterpart open as a means for crisis management.

NATO ALLIANCE

Question. The reemergence of an aggressive Russia has resulted in the North Atlantic Treaty Organization (NATO) developing the Readiness Action Plan that NATO Secretary General

Jens Stoltenberg called “the biggest reinforcement of our collective defense since the end of the Cold War.” NATO also continues to be central to our coalition operations in Afghanistan and elsewhere, even as many NATO members have significantly reduced their national defense budgets in response to economic and fiscal pressures.

How important is the NATO alliance to U.S. national security interests?

Answer. The Alliance is critical to our national security interests. This involves both Article 5 and other non-Article 5 related NATO operations. NATO maintains a persistent air, land, and maritime presence in and around the territories of our European allies, committed to defend its territory against any aggression. But its efforts extend beyond Article 5 with military operations supporting stability in Kosovo, Afghanistan, the Mediterranean Sea, and off the Horn of Africa. NATO is also assisting nations in North Africa and the Middle East to develop local capabilities to counter growing instability and transnational threats to prevent those threats from spreading to Europe.

Question. In light of the Russian Federation’s aggression against Ukraine, what do you see as the major strategic objectives of the NATO Alliance in the coming years and what are the greatest challenges in meeting those objectives?

Answer. As a result of Russia’s aggressive actions, NATO has refocused its attention on the Alliance’s Article 5 responsibilities to protect and defend its territory and populations against attack. Concurrently, NATO must also continue to perform its other “core tasks” of crisis management and cooperative security. Among the chal-

allenges to achieving these objectives are: first, declining national defense budgets that result in capability shortfalls; and second, the required adaptation of NATO's institutional processes to the changing European security environment.

Question. What do you see as the proper role, if any, for NATO in addressing the threat posed by ISIL and in addressing the problem of illegal immigration across the Mediterranean Sea?

Answer. Due to its long-standing partnerships and experience with Defense Capacity Building missions, NATO has the potential to play a role in addressing both issues. Within Iraq, NATO could provide expert advice and capacity-building support to the Government of Iraq in areas such as security sector reform and the development of a national security strategy. To address illegal immigration across the Mediterranean Sea, NATO could potentially support efforts of the Mediterranean Allied nations and the European Union by sharing information gathered through its maritime operations in the Mediterranean Sea.

Question. The concept of defense cooperation among NATO members was emphasized at the NATO summit in Chicago in May 2012.

What areas or projects would you recommend, if confirmed, that NATO nations cooperate in to improve NATO alliance capabilities?

Answer. Cooperation among Allies on developing capabilities provides a cost effective approach to addressing global challenges. If confirmed, I would urge Allies to increase their defense investments in both national and multinational projects and areas that address Alliance capability needs, such as developing command and control and joint intelligence, surveillance and reconnaissance and maintaining and improving readiness and interoperability. In support of that objective, I would also encourage Allies to honor their recent Summit pledge to achieve the two percent defense spending target.

Question. Turkey continues to be a gateway for foreign fighters proceeding to and from Syria and Iraq.

What steps would you recommend to encourage Turkey to continue to address the threat posed by foreign fighters proceeding to and returning from Syria and Iraq?

Answer. If confirmed, I would support the Department's contributions to inter-agency support of Turkish efforts to enhance border security, to include strengthening critical information sharing with the Turkish military. Moreover, I would support international efforts to help source countries identify and disrupt foreign fighter transit to Turkey.

Question. At the NATO Summit in Wales in 2014, NATO leaders declared their "aim to move towards the 2 percent guideline [of GDP for defense spending] within a decade with a view to meeting their NATO Capability Targets and filling NATO's capability shortfalls."

In your view, what impact have national defense budget cuts had on the capabilities of the NATO alliance, and what do you believe needs to be done to address any capability shortfalls?

Answer. There is a direct correlation between national defense budget cuts and increased Alliance capability shortfalls, such as in joint intelligence, surveillance and reconnaissance. To arrest this negative trend, Allies need to be held to the Defense Investment Pledge they agreed to at the Wales Summit. If confirmed, I will work with Allies on defense planning to ensure they maintain or develop the specific capabilities that the Alliance is lacking.

Question. What are the greatest military capability shortfalls that you see in the NATO alliance?

Answer. The most significant shortfalls are in so-called enabling capabilities such as joint intelligence, surveillance and reconnaissance, air to air refueling and strategic lift. These limited capabilities are the ones that the Alliance places heavy reliance on the United States to provide. If confirmed, I would encourage Allies to invest in developing these capabilities through national and multinational efforts.

Question. In light of the reductions in national defense spending by some NATO members, are you concerned that the Alliance will lack critical military capabilities? If so, what steps, if any, would you recommend be taken to address potential shortfalls in Alliance capabilities?

Answer. I am concerned about continued reductions in defense investment by our Allies because Alliance capability shortfalls will increase as national defense spending decreases, thus requiring a greater reliance on U.S. capabilities. The most effective step to counter these potential capability shortfalls is to arrest the decline in national defense investment and move to meet the Defense Investment Pledge that was agreed upon at the NATO Summit in Wales.

Question. What are the greatest opportunities and challenges that you foresee for NATO in meeting its strategic objectives over the next five years?

Answer. NATO's evolving security environment, highlighted by the events witnessed in both the Middle East and Europe, has made it necessary for NATO to adapt its political, military and institutional processes and focus. Our President and other NATO leaders have committed to this adaptation that will make NATO more responsive and ready to face future challenges. This commitment to adaptation provides the greatest opportunity for NATO; gaining the consensus to do this in a focused, proactive manner will be the greatest challenge.

Question. In your view, is there a continuing requirement for U.S. nuclear weapons to be deployed in NATO countries?

Answer. The 2010 Strategic Concept for the Alliance states NATO will remain a nuclear alliance for as long as nuclear weapons exist. Allies reaffirmed this stance with both the 2012 NATO Deterrence and Defense Posture Review and the 2014 Wales Summit. I support NATO maintaining the full range of capabilities necessary to ensure Alliance security, based on an appropriate mix of nuclear, conventional, and missile defense capabilities.

U.S. FORCE POSTURE IN EUROPE

Question. The Department of Defense continues to review its force posture in Europe to determine what additional consolidations and reductions are necessary and consistent with U.S. strategic interests.

How would you define the U.S. strategic interests in the European area of responsibility (AOR)?

Answer. Europe is the home of most of our willing and capable Allies and partners. Our immediate security interests include helping Europe defend against potential security threats from Russia and violent extremists from the south as well as continued strategic interest in reassuring our Allies and partners of the United States' unquestionable commitment to NATO.

Question. Do you believe that additional consolidation and reductions of U.S. forces in Europe are consistent with U.S. strategic interests in that AOR given the increase in Russian aggression in the last 15 months?

Answer. Yes. Regarding facilities, we are maintaining a strong commitment to security and stability in Europe as the Department gains efficiencies through the Secretary's directed European Infrastructure Consolidation. Regarding forces, our focus on rotational presence is consistent with our strategic interests and existing resource constraints. However, the credibility and effectiveness of our response to Russian aggression in the East depend not only on the operational scale and geographic scope of our operations, but also on their persistence and longevity. If confirmed, I will seek to ensure the persistent, appropriate level of rotational presence is retained in Europe to effectively deter Russian aggression.

U.S. FORCE POSTURE IN THE ASIA-PACIFIC REGION

Question. The Department continues the effort to rebalance toward the Asia-Pacific as announced in the January 2012 Strategic Defense Guidance.

Are you satisfied with the rebalance efforts to date?

Answer. Yes. The rebalance to the Asia-Pacific region, as announced by the President, incorporated in the 2012 Defense Strategic Guidance, and reinforced by the 2014 Quadrennial Defense Review, has resulted in a significant rebalancing of U.S. force structure and capabilities to this region, commensurate with its vital importance to U.S. security interests and global peace and prosperity. As we look ahead, we will continue to prioritize the Asia-Pacific region for positioning our most advanced capabilities that are critical for the future operational environment. If confirmed, I will continue to support the ongoing efforts to increase the Department's presence in the region and invest in and deploy critical advanced capabilities.

Question. What do you see as the U.S. security priorities in the Asia-Pacific region over the next couple of years and what specific capabilities or enhancements are needed in to meet those priorities?

Answer. First and foremost, we must work tirelessly to protect security and stability in the Asia-Pacific region, which is vital to the prosperity of all Pacific nations. The U.S. faces a range of challenges in the Asia-Pacific region, including provocations by the DPRK and the growth of its ballistic missile programs, the emergence of new technologies intended to prevent open access to the air and maritime domain, widespread natural disasters and transnational threats, and territorial disputes.

To address these challenges, I believe the Department must continue to modernize U.S. alliances and partnerships, which provide a critical role in underwriting regional security. The Department should also continue to strengthen our ability to deter threats to the U.S. homeland and our allies and citizens overseas, enhance U.S. force posture and capabilities in the region, specifically in terms of intelligence

surveillance, and reconnaissance (ISR) and missile defense, work with China to encourage greater transparency about how it will use its growing military capabilities; and encourage the peaceful resolution of territorial disputes in accordance with international law.

Question. Do the budget cuts and resource constraints associated with sequestration threaten your ability to execute the rebalance to the Pacific?

Answer. Yes. As stated in the 2014 Quadrennial Defense Review, the United States has prioritized its ability to maintain peace and stability in the Asia-Pacific region through presence and power projection. The Department remains committed to the rebalance despite the challenges of fiscal uncertainty and ongoing operations in the Middle East. U.S. long-term economic and security interests are inextricably linked to developments in the Asia-Pacific region, and the Department will continue to prioritize investments in those capabilities most relevant to the region.

Question. As the United States realigns its forces in the Asia-Pacific Theater, do you believe we have the air and maritime lift required to support the distribution of Marines across North and Southeast Asia?

Answer. I believe we will need more lift in certain contingencies, but we have enough capacity for a range of scenarios. That said, it is critical for the U.S. military to evolve its forward presence in the Asia-Pacific region to respond to the changing strategic environment. If confirmed, I will continue to work with the Services and U.S. Pacific Command to address this challenge.

KOSOVO

Question. Approximately 700 U.S. troops remain in the Balkans as part of the Kosovo Force (KFOR) that first deployed to Kosovo in 1999 and today is comprised of over 4,600 personnel from 30 countries. Spikes in violence in 2011 required the deployment of the NATO operational Reserve Force battalion of approximately 600 soldiers to bolster KFOR and maintain a secure environment. Progress is required in both the military and political realms before further troop reductions can be made.

What major lines of effort do you think are required to further reduce or eliminate U.S. and NATO presence in Kosovo?

Answer. Continuation of the EU's implementation of the 2013 Brussels Accord between Serbia and Kosovo is a fundamental line of effort, necessary to stabilizing the Western Balkans and setting the conditions for improved security and follow-on troop reductions.

Question. In your view, can the European Union play a more significant role in Kosovo?

Answer. The EU already plays a significant role in fostering improved security and stability in Kosovo through its European Union Rule of Law Mission in Kosovo (EULEX-Kosovo). EULEX is part of the EU's broader effort to promote peace and stability in the Western Balkans and supports Kosovo, as they adopt and implement necessary reforms on its path toward a greater European integration.

SECURITY SITUATION ON THE KOREAN PENINSULA

Question. What is your assessment of the current security situation on the Korean peninsula and of the threat posed to the United States and its allies by the current state of North Korea's ballistic missile and nuclear weapons capabilities?

Answer. North Korea's ballistic missile and weapons of mass destruction (WMD) capabilities present a serious and direct threat to U.S. forces postured in the Asia-Pacific region as well as to our regional allies and partners. These capabilities could eventually pose a direct threat to United States territory. Moreover, North Korea's history of proliferation amplifies the dangers of its asymmetric programs. If confirmed, I will ensure that the U.S.-ROK Alliance continues to strengthen alliance capabilities to counter North Korea's increasing missile and nuclear threat. I will also ensure that we draw upon the full range of our capabilities to protect against and respond to North Korean ballistic missile and WMD threats.

Question. In your view, are there additional steps that DOD could take to ensure that North Korea does not proliferate missile and weapons technology to Syria, Iran and others?

Answer. If confirmed, I will continue efforts to strengthen our strong defense posture against North Korea. This includes supporting our current efforts to increase the number of ground-based interceptors in California and Alaska, enhancing the Department's ability to highlight and disrupt the illicit proliferation networks that North Korea uses, and promoting cooperation with partners to interdict vessels and aircraft suspected of transporting items of proliferation concern.

Question. What is your view regarding the timing of transfer of wartime operational control from the U.S. to the ROK?

Answer. At the 2013 U.S.-ROK Security Consultative Meeting, then-Secretary of Defense Hagel and ROK Minister of Defense Han decided that in light of the evolving security environment in the region, we will implement the ROK-proposed, conditions-based approach to the transition of wartime OPCON. The ROK will take wartime OPCON when critical ROK and alliance military capabilities are secured and the security environment in the region is conducive to a stable wartime OPCON transition.

CHINA ASSERTIVENESS

Question. How has China's aggressive assertion of territorial and maritime claims, particularly in the South China Sea and East China Sea, affected security and stability in the region?

Answer. China's actions are adding tension to the Asia-Pacific region, and subtly undermine the regional order that has sustained 70 years of security and prosperity in the Asia Pacific. For example, its claims to nearly the entire South China Sea are inconsistent with international law. The international community continues to call on China to settle such issues cooperatively and without coercion. China has responded with aggressive land reclamation efforts on a pace and scale far surpassing other claimants that will allow it to position military forces astride vital international sea lanes.

Through a persistent military and law enforcement presence and the announcement in November 2013 of a new Air Defense Identification Zone (ADIZ) over the East China Sea, China continues to engage in actions that appear designed to challenge Japan's administration of the Senkaku Islands.

CHINA MIL-MIL

Question. What is your assessment of the current state of the U.S.-China military relationship and your views regarding China's interest in and commitment to improving military relations with the United States?

Answer. Regarding our military-to-military (mil-mil) relations with China, it is profoundly in our shared interests that we find ways to increase cooperation where our interests overlap and to manage our differences where we disagree. In recent years, the Department's sustained and substantive dialogue with the Chinese People's Liberation Army (PLA) has enabled both the United States and China to reduce the risk of misperception and miscalculation, as well as to deepen practical cooperation in areas ranging from humanitarian assistance to military medicine. In addition to making investments that ensure our technological advantages in all domains, the military-to-military relationship is an important component in managing competition.

Question. What is your view of the purpose and relative importance of sustained military-to-military relations with China?

Answer. At their most basic level, U.S.-China defense contacts and exchanges provide opportunities to establish and maintain open lines of communication that will be essential to managing a crisis or preventing unintended escalation. The military-to-military relationship also allows us to explore and expand cooperation in areas of mutual interest, as well as manage security competition and other frictions in the relationship in a way that supports overall stability. Our high-level leadership and policy interactions have allowed us to address with China at the strategic-level differences in areas such as nuclear and strategic stability, operations and standards in the space, cyber and maritime domains, and regional security issues such as Afghanistan, North Korea, South and East China Seas, and others.

ANTI-ACCESS/AREA DENIAL

Question. Over the past few years, much has been made of the emerging anti-access and area denial capabilities of certain countries and the prospect that these capabilities may in the future limit the U.S. military's freedom of movement and action in certain regions. Do you believe emerging anti-access and area denial capabilities are a concern?

Answer. Emerging anti-access and area denial capabilities (A2AD) are a concern. China is developing missiles and other military technologies that are intended to limit U.S. military's freedom of movement in the Western Pacific. Russia is developing its A2AD capabilities, including missiles, in order to constrain U.S. and Allied freedom of movement on its periphery. Iran maintains a layered A2AD capability through the employment of road mobile ballistic missiles, an integrated air defense system, anti-ship cruise missiles, and naval assets stationed in the Persian Gulf.

Question. If so, what do you believe the U.S. armed forces need to be doing now and in the next few years to ensure continued access to all strategically important segments of the maritime domain?

Answer. As the President outlined in the 2015 National Security Strategy, the U.S. is committed to freedom of navigation and the safety and sustainability of maritime environment. The Department will therefore invest in critical personnel and technological advantages to meet the President's commitment, especially to counter anti-access and area denial capabilities of our potential enemies. Details of specific actions and investments are more appropriate for a classified discussion.

Question. If confirmed, you would play an important role in the process of transforming the U.S. armed forces' capability and capacity to meet new and emerging threats.

Concerning capability and capacity to meet new and emerging threats, what are your goals regarding transformation of the U.S. military?

Answer. My goals would include addressing emerging threats through capability and capacity advancement across the spectrum of defense activities. The Department is exploring new "offset strategies"—combinations of technologies, operational concepts, and organizational constructs to meet these challenges which we can discuss in a classified setting. If confirmed, I will also emphasize the development of a new model for deterrence in the 21st Century to ensure that emerging domains—such as cyber—are incorporated into our thinking.

INTELLIGENCE, SURVEILLANCE, AND RECONNAISSANCE CAPABILITIES

Question. Despite the ongoing drawdown in Afghanistan, demand for intelligence, surveillance, and reconnaissance (ISR) capabilities of every kind remains very high due to the enhanced situational awareness and targeting capabilities they bring to our commanders. Almost all of the geographic combatant commands still have validated ISR requirements that are not being met.

What is your assessment of the Department's current disposition of ISR assets across the various combatant commands?

Answer. The Department has insufficient ISR assets to meet the global demand. Meeting new requests required reallocating assets from other Secretary of Defense-approved operations. The Department must therefore allocate ISR assets to meet our highest priorities. To support counter-terrorism operations, we have allocated 90 percent of our remotely-piloted full-motion video assets to USCENTCOM in support of our counter-terrorism operations, with the remaining sourced primarily to USAFRICOM. We are leveraging other assets with increased standoff ranges and enhanced defensive capabilities to support USEUCOM's indications and warning collection requirements and to support USPACOM's sensitive reconnaissance operations areas.

Question. As our forces are withdrawn from Afghanistan, should existing ISR assets be re-postured to support combatant command needs in other regions, or can we afford to reduce ISR capacity?

Answer. To ensure a balance across operational, force management, and institutional risks, the Department continually evaluates our capabilities against evolving combatant command requirements. When appropriate, we can reposition ISR assets to support emerging needs across other regions. For example, within the last year, we sourced nearly all of our current ISR for Syria and Iraq from operations in Afghanistan. Additionally, we made the tough decision to return Air Force MQ-1 and MQ-9 capacity to a steady-state 60 flights a day, reducing risk to the long-term sustainability of the USAF's unmanned pilot force.

Question. Most of the highest-value ISR assets acquired after 9/11 are aircraft that were not designed to be survivable in high-threat air defense environments, although in some cases unmanned aerial vehicles were designed to be deployed in large numbers in the expectation of substantial combat attrition.

Do you believe that the Department needs a major shift towards ISR platforms that are survivable in high-threat situations, or merely an augmentation of the capabilities we now have, with the assumption that air superiority can be gained rapidly enough to operate today's assets effectively?

Answer. I believe we should invest in ISR platforms, sensors, and communications capabilities designed to penetrate and survive in high-threat and denied environments, across all domains. It is faulty to assume we will rapidly gain superiority in the air or other domains in future conflicts. We must find the right balance of ISR capabilities. Future scenarios will require assets capable of penetrating and surviving in high-threat and denied areas. While these capabilities are expensive to develop and field, they are a necessary component of balanced efforts to maintain our strategic advantage.

AIRCRAFT CARRIER-LAUNCHED UNMANNED SYSTEMS

Question. The Navy's current plan for the Unmanned Carrier-Launched Airborne Surveillance and Strike (UCLASS) system aircraft is to develop an airframe optimized for unrefueled endurance (14 hours) and the ISR mission. Given the combat radius of the planned carrier air wing, are you concerned the carrier will lack the ability to project power at relevant distances given emerging anti-access/area-denial threats?

Answer. Yes. That is why it is important for the Department to continue development of concepts and capabilities that allow us to project power when faced with an A2AD environment to maintain competitive advantage.

SPECIAL OPERATIONS FORCES

Question. The 2006 and 2010 QDRs mandated significant growth in our special operations forces (SOF) and enablers that directly support their operations. The most-recent QDR released in 2014 capped this growth at 69,500, approximately 2,500 below the originally planned growth. In light of the growing global terrorism threat, do you believe the currently planned end-strength for SOF is sufficient to meet global requirements?

Answer. Any changes to end-strength, whether conventional or special operations forces (SOF), require continual analysis to meet current and predicted threats while informed by fiscal realities.

Question. SOF are heavily reliant on enabling support from the general purpose force. In light of current fiscal challenges, do you believe sufficient enabling capabilities can be maintained within the general purpose forces and that such capabilities will remain available to special operations forces?

Answer. I firmly believe that we have trained general purpose forces for these missions and we will continue to have this capability going forward.

INTERNATIONAL PEACEKEEPING CONTRIBUTIONS

Question. In testimony before the House Committee on Foreign Affairs (July 29, 2009), Ambassador Susan Rice, then U.S. Ambassador to the United Nations, stated that the United States "is willing to consider directly contributing more military observers, military staff officers, civilian police, and other civilian personnel—including more women I should note—to UN peacekeeping operations."

What is your view on whether the U.S. should contribute more military personnel to both staff positions and military observers in support of U.N. peacekeeping operations?

Answer. The Department should focus its contributions to the UN in areas that will help make systemic changes to increasing the effectiveness and efficiency of UN peacekeeping operations. Select placements of personnel to key positions within the UN can help facilitate this objective.

Question. If confirmed, would you support identifying methods through which the DOD personnel system could be more responsive to requests for personnel support from multilateral institutions like the United Nations?

Answer. Over the past year we have provided multiple officers to the UN to include the head of the UN's military planning service. The recent administrative waiver extension provided by the UN to the U.S. facilitates future assignments. If confirmed, I will explore methods to be more responsive to requests for personnel support to multilateral institutions.

INTERAGENCY COLLABORATION

Question. The collaboration between U.S. Special Operations Forces, general purpose forces, and other U.S. Government departments and agencies has played a significant role in the success of counterinsurgency and counterterrorism operations in recent years. However, much of this collaboration has been ad hoc in nature.

What do you believe are the most important lessons learned from the collaborative interagency efforts in Afghanistan, Iraq, and elsewhere?

Answer. The military element of national power will always be critical, but achieving lasting national security objectives requires an integrated whole of government approach. We have learned a great deal about this over the past decade and our capabilities for interagency collaboration have progressed substantially. If confirmed, I will work to ensure we do not lose that ability as we refocus on full spectrum proficiency.

Question. How do you believe these efforts can be improved?

Answer. If confirmed, my focus must remain on the military instrument of power but I will ensure the Joint Staff remains collaborative and engaged with the inter-

agency and private sector. I want to maximize interagency partners' integration into our training and education programs, in order to strengthen the relationships that are essential when facing a national security challenge.

Question. How can the lessons learned in recent years be captured in military doctrine and adopted as "best practices" for future contingency operations?

Answer. Joint Doctrine must adapt quickly to innovation in the dynamic environment of current operations. In turn, we must infuse doctrine quickly into the education and joint exercise programs. We have made great strides in this over the last decade. If confirmed, I will ensure the Department's Joint Force Development process analyzes lessons learned from operational practice, joint training and concept development and moves them rapidly into Joint Doctrine for the operational preparation and future employment of the force.

Question. Interagency collaboration on an operational or tactical level tends to address issues on a country-by-country basis rather than on a regional basis (e.g. international terrorists departing Mali for safe havens in Libya).

How do you believe regional strategies that link efforts in individual countries can best be coordinated in the interagency arena?

Answer. Our performance in crisis situations rests on how well we collaborate on a routine basis. Therefore, I support a whole-of-government planning, operations and resourcing framework to ensure our country plans are mutually-reinforcing. The military develops Theater Campaign Plans and Functional Campaign Plans that address regional and trans-regional issues. We seek input from interagency partners in the development of these plans to de-conflict and complement efforts. State is beginning to develop Joint Regional Strategies to address regional foreign policy priorities and drive country strategies. This new regional perspective will improve our ability to coordinate The Department's plans with State's plans.

RESPONSIBILITY TO PROTECT

Question. The U.S. Government has recognized the "responsibility to protect" (R2P)—that is, the responsibility of the international community to use appropriate means to help protect populations from genocide, war crimes, ethnic cleansing and crimes against humanity, by encouraging states to protect their own populations, by helping states build the capacity to do so, and by acting directly should national authorities fail to provide such protection. In its 2010 Quadrennial Defense Review, the Department of Defense names "preventing human suffering due to mass atrocities" as one of a long list of potential contingencies that DOD might be called on to address. DOD has begun to explore some of the implications of R2P, by considering "mass atrocity prevention and response operations" (MAPRO).

In your view, how high a priority should the "responsibility to protect" be for the U.S. Government as a whole?

Answer. The United States does not currently view the "responsibility to protect" as a legal basis for the use of military force. Without legal standing, it is not a practice to rank order by priority. However, the Department undertook an active role and remains prepared to act, if directed, to help prevent and respond to mass atrocity situations.

Question. In your view, what should be the role of DOD, if any, in fulfilling the responsibility to protect?

Answer. The use of military force is only one instrument of national power. The role of the Department is to support our government's decided response in any situation as part of a whole-of-government approach. The Department should provide options and provide the risk assessment of those options for our political leaders' use in their decision making.

In your view, what is the proper application of R2P doctrine with respect to the situation in Syria?

Answer. It would be a political vice military decision to use R2P as a basis for intervention. However, the U.S. Government continues working with its allies, partners, and with the Syrian opposition to provide humanitarian assistance within Syria and across the region. The United States already has provided over \$4.4 billion in aid since fiscal year 2012 to help the victims of the conflict, including emergency medical care and supplies, food, and shelter. The U.S. Government has spent over three quarters of a billion dollars in fiscal year 2015.

OPERATION OBSERVANT COMPASS & THE LORD'S RESISTANCE ARMY

Question. Despite pressure by the Ugandan People's Defense Forces (UPDF) and efforts by U.S. Special Operations personnel to support them, elements of the Lord's Resistance Army (LRA)—including Joseph Kony—continue to operate and commit atrocities against civilian populations in the Central African Republic, Democratic

Republic of the Congo, and South Sudan. Some observers have identified operational concerns with this mission, including that: (1) supported forces are trying to find an elusive foe in an area roughly the size of California, much of which is covered in thick jungle; (2) technical support to U.S. forces and their UPDF partners from the defense and intelligence community continues to be inadequate; and (3) limitations continue to be placed on the ability of U.S. Special Operations personnel to accompany UPDF partners outside of main basing locations, thereby limiting the level of direct support they can provide.

In your view, what is the objective of Operation Observant Compass?

Answer. It is my understanding that Operation OBSERVANT COMPASS has four main objectives:

- 1) Increase protection of civilians affected by the LRA
- 2) Promote defection, disarmament, demobilization, and reintegration of LRA fighters
- 3) Remove Joseph Kony and LRA leaders from central Africa
- 4) Increase humanitarian access and provide relief

With U.S. government assistance, our African partners are making considerable progress achieving these mission objectives.

Question. Do you support the continuation of DOD's current level of support to this mission?

Answer. If confirmed, I will advocate for the Department to continue resourcing this operation at a level appropriate to the threat the LRA poses to our national interests in the region.

NATIONAL STRATEGY TO COMBAT TRANSNATIONAL ORGANIZED CRIME

Question. Criminal networks are not only expanding their operations, but they are also diversifying their activities, resulting in a convergence of transnational threats that has evolved to become more complex, volatile, and destabilizing. The Director of National Intelligence recently described transnational organized crime as "an abiding threat to U.S. economic and national security interests," and stated that "rising drug violence and corruption are undermining stability and the rule of law in some countries" in the Western Hemisphere. In July 2011, the President released his Strategy to Combat Transnational Organized Crime: Addressing Converging Threats to National Security. One of the priority action areas designated in the strategy is "enhancing Department of Defense support to U.S. law enforcement."

What is your understanding of the President's strategy to combat transnational criminal organizations?

Answer. The President's Strategy to Combat Transnational Organized Crime integrates all elements of our national power to combat transnational organized crime and related threats to national security—and urges our partners to do the same. Ultimately, the strategy seeks to reduce transnational organized crime from a national security threat to a manageable public safety concern in the U.S. and in strategic regions abroad.

Question. What is your understanding of the Department's role within the President's strategy?

Answer. The Department of Defense provides a valuable supporting role to other U.S. government agencies with the lead to combat transnational organized crime.

Question. In your view, should DOD play a role in providing support to the U.S. law enforcement and the Intelligence Community on matters related to transnational organized crime?

Answer. The Department provides unique capabilities to address the national security threat of transnational criminal organizations by supporting U.S. law enforcement and the Intelligence Community as part of a whole of government approach, consistent with current and recently expanded authorities provided in the fiscal year 2015 NDAA. Intelligence support, counter-threat finance support, building partner capacity and detection and monitoring are specific Department capabilities which support the interagency and partner nations.

Question. President Obama identified the prevention of mass atrocities and genocide as a core U.S. national security interest, as well as a core moral interest, in August 2011 under Presidential Study Directive 10.

Among interagency partners, what is DOD's role in addressing atrocity threats, and what tools does DOD have for preventing or responding to atrocities?

Answer. The Department has developed Joint Doctrine for conducting Mass Atrocity Response Operations. Based on this doctrine, atrocity prevention and response is now incorporated into military plans and planning guidance. In addition, the Department has conducted a comprehensive review of training in this area and is

working to strengthen the capacity of UN peacekeeping operations to respond to atrocity events.

Question. Has DOD developed planning processes toward this effort so that it will be able to respond quickly in emergency situations?

Answer. Yes, the Department has developed planning processes toward this effort. All DOD components have been directed to integrate atrocity prevention and response into their policies and plans. Specific plans are further developed and implemented at the Geographic Combatant Command level, in coordination with the Office of the Secretary of Defense and the Joint Staff.

Question. In your view, is the situation in Syria a mass atrocity?

Answer. The situation in Syria is truly tragic considering the estimates of over two hundred thousand combatant and non-combatants deaths, with over four million displaced. There is no military solution in Syria when the violence occurs due to a brutal regime that attacks its own citizens. There can be no peace in Syria with Asad in power, only a negotiated political settlement will solve Syrian crisis.

COUNTER THREAT FINANCE

Question. DOD and the Intelligence Community (IC) have begun investing more resources in identifying and tracking the flow of money associated with terrorist networks and illicit trafficking, but the opportunities for tracking and degrading illicit financing flows are not yet matched by the effort and resources devoted to them. Identifying and disrupting key individuals, entities, and facilitation routes enabling the flow of money that supports terrorism, production of IEDs, narco-trafficking, proliferation, and other significant national security threats could have an outsized impact on confronting these threats.

What are your views on the role of DOD in counter threat finance activities?

Answer. The Department's policy is to work with other U.S. government entities and partner nations to effectively deny, disrupt, degrade, and defeat our adversaries' ability to access and utilize financial resources. If confirmed, I will work to further integrate our efforts with those of the interagency, intelligence community, and our foreign and institutional partners to more effectively counter threat finance activities and networks.

Question. Are you aware of any policy, legal authority, or resource shortfalls that may impair U.S. counter threat finance efforts?

Answer. Lack of sufficient insight and fidelity on the sources of corruption in partner nations can hinder our ability to achieve counter threat network goals. Additionally, in non-terrorism cases, there are still difficulties sharing timely and relevant information between law enforcement and intelligence elements.

Question. In your view, how should the Department of Defense coordinate and interface with other key agencies, including the Department of Treasury and the Intelligence Community, in conducting counter threat finance activities?

Answer. The Department should, and currently does, augment and support the efforts of other U.S. government entities, including the Department of Treasury and the Intelligence Community, with its unique capabilities to conduct counter threat finance capabilities. The result is a well-coordinated, capable, and robust counter threat finance posture. If confirmed, I will continue to remain fully engaged in the interagency process to diminish adversary use of both licit and illicit financial networks.

SECTION 1208 OPERATIONS

Question. Section 1208 of the Ronald Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375), as amended by subsequent bills, authorizes the provision of support (including training, funding, and equipment) to regular forces, irregular forces, and individuals supporting or facilitating military operations by U.S. Special Operations Forces to combat terrorism.

What is your assessment of this authority?

Answer. Section 1208 funding is a good tool enabling the U.S. Government to leverage our foreign partners and reduces U.S. unilateral Direct Action operations to combat terrorism. 1208 funding allows the U.S. to quickly advance counterterrorism objectives in areas that would otherwise allow terrorism to go unchecked. The U.S. can build on programs to transition into building partner capacity so that foreign partners can deny terrorists a safe haven within their sovereign country.

ACTIVE-DUTY AND RESERVE COMPONENT END STRENGTH

Question. Last year DOD announced its 5-year plan to reduce active-duty end strengths by over 100,000 servicemembers by 2017 and the reserve components by another 21,000 over the same period. These cuts do not include any additional per-

sonnel reductions that could result from sequestration or any agreement to avoid sequestration.

What is your view of the role of the reserve components as the active components draw down?

Answer. As the total force draws down, the role of the Reserve Component will continue to be critical in meeting the requirements of our National Military Strategy. Because much of the Total Force's essential capabilities reside in the National Guard and Reserves, we simply cannot meet our global commitments without them. However, I cannot stress enough that we need both statutory authorities and a reliable funding stream to maintain the readiness of our active duty component and assured access to our trained and ready reserve components. Without assured access, we cannot adequately program and properly plan for integrating and employing this critical asset in support of our national interests.

Question. What additional military personnel reductions do you envision if the sequester continues?

Answer. The PB16 FYDP manning levels reflect the maximum acceptable risk in executing our defense strategy. If sequestration continues, we will further reduce total personnel end-strength consistent with the 2013 Strategic Choices Management Review and subsequent SASC testimony by the Service Chiefs.

Question. In your view, what tools do DOD and the Services need to get down to authorized strengths in the future, and which of these require Congressional authorization?

Answer. I believe the Department and Services' force management tools are flexible enough to draw down to authorized Service end strengths. I know of no request for increased tools or authorities at this time.

RELIGIOUS GUIDELINES

Question. American military personnel routinely deploy to locations around the world where they must engage effectively with allies and with host-country nationals whose faiths and beliefs may be different than their own. For many other cultures, religious faith is not a purely personal and private matter; it is the foundation of their culture and society. Learning to respect the different faiths and beliefs of others, and to understand how accommodating different views can contribute to a diverse force is, some would argue, an essential skill for operational effectiveness.

In your view, do policies concerning religious accommodation in the military appropriately accommodate the free exercise of religion and other beliefs, including individual expressions of belief, without impinging on those who have different beliefs, including no religious belief?

Answer. Yes. The Department of Defense is committed to accommodating the free exercise of religion and other beliefs without impinging on those who have different beliefs or no religious belief.

Question. Under current law and policy, are individual expressions of belief accommodated so long as they do not impact unit cohesion and good order and discipline?

Answer. Yes. Law and policy accommodate individual expressions of belief as long as they do not impact mission accomplishment, good order and discipline, and unit cohesion.

Question. In your view, does a military climate that welcomes and respects open and candid discussions about personal religious faith and beliefs in a garrison environment contribute in a positive way to preparing U.S. forces to be effective in overseas assignments? Would a policy that discourages open discussions about personal faith and beliefs be more or less effective at preparing servicemembers to work and operate in a pluralistic environment?

Answer. In my view, it is important to have a military climate that welcomes and respects open and candid discussion about personal religious faith. Expressing personal belief in a manner that is respectful of other's views helps strengthen cohesion within a unit. At the same time, it helps U.S. forces to develop a deeper awareness and understanding of other perspectives, which is important in overseas assignments. Policies that discourage open discussion would be short-sighted in their understanding of the world in which we live.

PREVENTION OF AND RESPONSE TO SEXUAL ASSAULTS

Question. In 2014, there was what the Department described as an "unprecedented 53 percent increase in victim reports of sexual assault. In fiscal year 2014, victims made 4,660 Unrestricted Reports and 1,840 initial Restricted Reports of sexual assault. Also in fiscal year 2014, the Department saw the number of victims who converted Restricted Reports to Unrestricted Reports increase from an average of

15 percent to 20 percent. According to the 2014 RAND Military Workplace Study approximately 72 percent of servicemember victims who indicated they made a sexual assault report said they would make the same decision to make a report if they had to do it over again. The Rand Study also indicated the percentages of active duty personnel who experienced unwanted sexual assault declined in 2014, from 6.1 percent to 4.3 percent for women and from 1.2 percent to 0.9 percent for men. The Department also concluded the estimated gap between reporting and prevalence of sexual assaults was at the narrowest point since the Department began tracking this data.

What is your assessment of the current DOD sexual assault prevention and response program?

Answer. We have taken strong action to address the climate within the military and to bring perpetrators to justice. We hold commanders accountable for both. We have made progress but must continue to work hard, particularly in reforms designed to improve victim confidence, enhance access to victim advocacy and legal support. The Secretary of Defense and the Joint Chiefs are committed to the safety of our men and women and will not relax our comprehensive efforts to combat sexual assault.

Question. What is your view of the provision for restricted and unrestricted reporting of sexual assaults?

Answer. The unrestricted and restricted reporting options were designed to assist victims. Because unrestricted reporting automatically initiates a criminal investigation, some victims were choosing to forego support services rather than initiate an investigation. The restricted reporting option allows a victim access to medical care and support services without initiating an investigation. Offering both forms of reporting provides a means to protect a victim's privacy and time to cope with the trauma of sexual assault.

Question. What is your understanding of the adequacy of DOD oversight of military services implementation of the DOD and service policies for the prevention of and response to sexual assaults?

Answer. The Department has provided close oversight and strong support to the Services. The collaboration between the OSD Sexual Assault Prevention and Response Office and Services led to many advancements, including the development of metrics which will not only improve oversight but will also help better understand the effectiveness of our response efforts.

Question. What is your view about the role of the chain of command in changing the military culture in which these observed changes in sexual assaults have occurred?

Answer. The chain of command is fundamental of our military culture. Our ability to effect institutional change rest with leaders at all levels but starts with the commander. Commanders are accountable for what happens in their units and must foster a command climate of dignity, respect and trust where sexist behavior, sexual harassment and sexual assault is not condoned or ignored.

Question. Surveys report that up to 62 percent of victims who report a sexual assault perceive professional or social retaliation for reporting. If confirmed, what will you do to address the issue of retaliation for reporting a sexual assault?

Answer. Any form of retaliation goes against our core values. The Department is focused on this issue and working to understand what causes this problem and develop solutions. If confirmed, I will work with the OSD and the Services to ensure our servicemembers understand that our culture fosters dignity and respect and retaliation is not tolerated.

Question. Sexual assault is a significantly underreported crime in our society and in the military. If confirmed, what will you do to increase reporting of sexual assaults by military victims?

Answer. We must improve victim confidence in our ability to respond to incidents of sexual assault, and in their well-being after an incident. If confirmed, I will continue to work hard with OSD to assess current programs and best practices that build victim confidence in our systems and our ability to hold perpetrators appropriately accountable.

Question. In your view, what would be the impact of requiring a judge advocate outside the chain of command, instead of a military commander in the grade of O-6 or above as is currently the Department's policy, to determine whether allegations of sexual assault should be prosecuted?

Answer. I value the legal analyses and recommendations of our military judge advocates. However, I firmly believe the military commander's role is indispensable in the military justice process. The Uniform Code of Military Justice a criminal justice system, but it is also a critical aspect of a commander's authority to maintain good order and discipline. I believe our servicemembers and our national security are best

served by retaining the military commander's key role in the military justice decision process.

ASSIGNMENT POLICIES FOR WOMEN IN THE MILITARY

Question. The Department, in January 2014 rescinded the policy restricting the assignment of women to certain units which have the primary mission of engaging in direct ground combat operations, and has given the military services until January 1, 2016, to open all positions currently closed to women, or to request an exception to policy to keep a position closed beyond that date, an exception that must be approved by the Chairman of the Joint Chiefs of Staff and the Secretary of Defense. The services are working now to develop gender-free physical and mental standards for all military occupations, presumably with the goal of allowing individuals, regardless of gender, to serve in those positions if they can meet those standards.

If confirmed, what role will you play in the development of these standards?

Answer. The Services are in the final stages of validating their standards. Military Department Secretaries must certify that their standards are gender-neutral and in compliance with all applicable laws by 30 Sept. If confirmed, I look forward to working with OSD and the Joint Chiefs to monitor the effectiveness of the standards.

Question. Will you ensure that the standards will be realistic and will preserve, or enhance, military readiness and mission capability?

Answer. Yes. Our success is contingent upon establishing a ready and capable military force. Our standards must prepare us to meet any contingency.

Question. Do you believe that decisions to open positions should be based on bona fide military requirements?

Answer. All decisions impacting our armed forces should be based on a complete analysis of mission requirements.

Question. If so, what steps will you take, if confirmed, to ensure that such decisions are made on this basis?

Answer. If confirmed, I will work with the Joint Chiefs of Staff to ensure decisions are made that reflect joint operations requirements.

Question. Some family members have expressed concerns about assigning women to what are currently male-only combat units.

Answer. I believe our final standards, along with sound leadership, will address any concerns.

Question. To what extent do you believe that this will be a problem in the implementation of this policy?

Answer. I do not believe this will be a problem that will impact implementation.

Question. If it is a problem, what steps would you take if confirmed to address it?

Answer. If confirmed, I will take every opportunity to ensure our military family members concerns are addressed.

MILITARY HEALTH CARE REFORM AND MODERNIZATION

Question. Congress authorized the Military Compensation and Retirement Modernization Commission in the National Defense Authorization Act for Fiscal Year 2013 to conduct a review of the military compensation and retirement systems and to make recommendations to modernize those systems. The Commission released its report in January 2015. What is your view of the Commission's findings regarding the military health system?

Answer. I agree with the Commission that the military must continue to improve the military health care system. The health care reforms proposed in the President's fiscal year 2016 budget are a good first step and offer servicemembers, retirees, and their families more control and choice over their health care decisions. As we prepare the fiscal year 2017 budget, we will work with Congress to determine if additional reform proposals are needed.

Question. Do you believe the Department's fiscal year 2016 proposal to consolidate TRICARE adequately addressed the Commission's findings on military health care?

Answer. Yes. The Department's fiscal year 2016 proposal to consolidate TRICARE effectively provides family members and retirees with greater choice and control over their healthcare decision without the risk of an untested, and potentially infeasible, overhaul of the Military Health System. If confirmed, I will work closely with Department leadership and Congress to ensure the proposal is implemented as efficiently and effectively as possible.

Question. What is your view of the Commission's recommendation to establish a Joint Readiness Command?

Answer. A new, four-star readiness command is not necessary as the Department has sufficient existing processes and governance structures to identify, track, and measure the readiness status of Department-wide and Service-specific essential medical capabilities.

Question. What is your assessment of progress the Defense Health Agency has made to create efficiencies and generate cost savings by combining the medical support functions of the Services?

Answer. I have been briefed that the Defense Health Agency (DHA) is on track to reach Full Operational Capability on 1 October 2015. In order for the DHA to be successful, the difference between policy and execution must be clear to the Services, Combatant Commands, and Joint Staff. This clarification and along with the DHA's ability to meet its assigned mission essential tasks will be validated by the Joint Staff NLT 2017 when a Combat Support Agency Review Team Assessment (CSART) is conducted by the Joint Staff.

Question. Do you believe the Defense Health Agency should be replaced with a new combatant command, a Unified Medical Command?

Answer. No. The Defense Health Agency (DHA) will reach Full Operating Capability (FOC) on 01 October 2015 and it is premature to make a determination if the DHA will meet mission demands. As such, I agree with the Secretary Carter's assessment that an additional four-star command for the purpose of ensuring joint medical readiness is not required now.

WOUNDED WARRIOR SUPPORT

Question. Servicemembers wounded and injured in combat operations deserve the highest priority from their Service for support services, healing and recuperation, rehabilitation, evaluation for return to duty, successful transition from active duty when appropriate, and continuing support beyond retirement or discharge.

What is your assessment of the progress made by the Department of Defense, the Department of Veterans Affairs, and the Services to improve the care, management, and transition of seriously ill and injured servicemembers and their families?

Answer. The establishment of the Warrior Care Policy (WCP) Office is probably one of the most significant improvements we've made in support of our wounded, ill, and injured recovering servicemembers (RSMs). The WCP is solely focused on developing policies for the DOD and provides oversight to ensure proper execution and outcomes.

Question. If confirmed, are there additional strategies and resources that you would pursue to increase support for wounded servicemembers and their families, and to monitor their progress in returning to duty or to civilian life?

Answer. Although the Services and Department have made strides in caring for many different aspects/needs of wounded, ill, and injured recovering servicemembers (RSMs), more can be done with regards to standardizing policy across the Services (related to retention). There needs to be more clarity or communication of the procedures and processes which each Service has when a servicemember desires to return to active duty.

Question. What is your assessment of the need to make further improvements in the Integrated Disability Evaluation System?

Answer. My understanding is the Department makes every effort to improve our key processes and IDES is one of those areas. In the last few years, DOD has identified and executed numerous improvements that have resulted in achieving higher servicemember satisfaction as well as more timely processing. As a result, as of May 2015, Active Component case timeliness averaged 223 days with a goal set at 290 days. The Reserve Component has achieved a 298 days metric while the goal is 305 days. Servicemember satisfaction is at a new high of 87 percent. I believe we are moving in the right direction and if confirmed will continue to make improving this process a priority.

SUICIDE PREVENTION AND MENTAL HEALTH RESOURCES

Question. The numbers of suicides in each of the Services continues to concern the Committee.

In your view, what role should the Joint Chiefs of Staff play in shaping policies to help prevent suicides both in garrison and in theater and to increase the resiliency of all servicemembers and their families, including members of the reserve components?

Answer. Preventing suicide among members of the Armed Services is one of the most important challenges we share with the Services. We have joined forces with agencies throughout DOD and civil society to better understand the factors leading to suicide. We are shaping policy to foster a culture of Total Force Fitness that en-

hances wellness, promotes resilience, and sustains a military force fit in mind, body, and spirit. In addition to educating the force on suicide prevention, we are providing additional training and support to our first responders (chaplains, senior enlisted leaders, legal counsel, and mental health providers) to ensure that they are as equipped as possible to prevent suicides.

Question. If confirmed, what actions will you take to ensure that sufficient mental health resources are available to servicemembers in theater, and to the servicemembers and their families upon return to home station?

Answer. I believe we reduce the stigma associated with servicemembers seeking mental health care. I also believe that prevention by early intervention for both servicemembers and their family is a key component of mental health care. Additionally, having adequate care providers at the appropriate locations for servicemembers to seek out support is critical. Specifically, I continue to support embedding mental health personnel across the deployed force and the requirement of an in-theater periodic mental health assessment for all servicemembers deployed. The long-term mental health of our servicemembers and their families cannot be understated and if confirmed I will continue making progress in supporting them in this area.

MILITARY QUALITY OF LIFE

Question. The Committee is concerned about the sustainment of key quality of life programs for military families, such as family support, child care, education, employment support, health care, and morale, welfare and recreation services, especially as DOD faces budget challenges.

If confirmed, what further enhancements, if any, to military quality of life programs would you consider a priority in an era of intense downward pressure on budgets?

Answer. One of the chief priorities within military quality of life that I would like to see pursued, is a greater focus on program evaluation and outcomes. The Military Family Readiness Counsel was established in 2008 specifically to evaluate and assess the effectiveness of the quality of life and family readiness programs, and the Joint Staff participates in this venue. We need to see more concrete recommendations from this body to the Secretary of Defense on how utilize evidence to improve our social support programs, especially in light of downward pressure on budgets.

FAMILY READINESS AND SUPPORT

Question. Military members and their families in both the active and reserve components have made, and continue to make, tremendous sacrifices in support of operational deployments. Senior military leaders have warned of growing concerns among military families as a result of the stress of frequent deployments and the long separations that go with them.

What do you consider to be the most important family readiness issues for servicemembers and their families?

Answer. I consider pay, benefits and retirement on of the top issues for servicemembers and their families. This has been an intense area of examination and discussion within the recent Military Compensation and Retirement Modernization Commission (MCRMC) efforts and among the Services. A family's finances have a direct impact on the stress level and readiness of the servicemember and their families. Changes are coming with the introduction of the new blended retirement package. We need a plan to communicate the value of this new retirement system and educate our members on the financial decisions they must make as the changes are implemented.

Question. How would you address these family readiness needs in light of global rebasing, deployments, and future reductions in end strength?

Answer. I understand that the Services have already made plans to adjust for force size and rotation, and family readiness is a responsibility of each Service; however, we can encourage more collaboration with community-based organizations to maximize non-DOD resources. Family support programs that are flexible, responsive, and communicate / coordinate with interagency and non-governmental family services will be critical in meeting the needs of our servicemembers and their families. The Department can find efficiencies within its own programs through better evaluation practices, and we can also enhance the accessibility to DOD and Non-DOD support programs.

Question. If confirmed, how would you ensure support is provided to reserve component families related to mobilization, deployment and family readiness, as well as to active duty families who do not reside near a military installation?

Answer. Over the past fourteen years of war, one of the best support programs developed for the reserve component (RC) families has been the Yellow Ribbon Reintegration Program (YRRP). The YRRP continues to evolve and change with the deployment operational tempo and fiscal constraints, but if confirmed I am committed to ensuring that its essential services receives proper funding to meet the unique needs of our RC community.

OPERATIONAL ENERGY BUDGETING

Question. In what specific areas, if any, do you believe the Department needs to improve the incorporation of energy considerations into the strategic planning and force development processes?

Answer. Our ability to project and sustain power depends on the assured delivery of energy. Through the Joint Staff's and Combatant Commands' operational experience, campaign analyses, and wargames, we have demonstrated the tradeoffs and risks that accompany our need for large amounts of energy. To increase warfighting effectiveness, we will continue to analyze and improve the broad energy enterprise through overarching policy and strategy, global posture, acquisition management, and force development.

Question. In what specific areas, if any, do you believe the Department should increase funding for operational energy requirements, energy efficiency, alternative energy, and renewable energy opportunities?

Answer. We must continue to take a balanced approach to improve our warfighting capabilities from an operational energy perspective while reducing risk and cost. Energy enables operational capability with improved range, endurance, and force reliability, therefore we should make additional investments to improve the energy performance of our weapon systems, equipment, and their modifications; our enduring and non-enduring installations; by reducing energy supply-chain vulnerabilities; and by increasing energy security through diversification.

UNITED NATIONS CONVENTION ON THE LAW OF THE SEA

Question. Officials of the Department of Defense, including previous Chairmen of the Joint Chiefs of Staff, have advocated for accession to the Law of the Sea Convention.

Do you support United States accession to the United Nations Convention on the Law of the Sea?

Answer. Yes. The United States is a maritime Nation and joining the Convention will enhance our capability and credibility in ensuring freedom of the seas for both military and economic activities on, under and above the world's oceans. The Convention's various navigational and overflight provisions provide global mobility for our Armed Forces.

Question. How would you respond to critics of the Convention who assert that accession is not in the national security interests of the United States?

Answer. Our non-party status diminishes our influence in defending the Convention's existing norms that enable the access, mobility, and sustainment of our military forces and commercial fleet. I also detracts from our ability to lead developments in the maritime domain, and enables emerging powers to advance their contrary interpretations of the Convention. As the global security environment changes, it will become increasingly important for the United States, as the world's foremost maritime power, to use all elements of national power and lead from inside the framework of the Convention rather than observe from the outside.

Question. In your view, what impact, if any, would U.S. accession to the Law of the Sea Convention have on ongoing and emerging maritime disputes such as in the South China Sea and in the Arctic?

Answer. Accession would improve our ability to shape the outcome of ongoing and emerging maritime disputes. Our position to influence these key interests is diminished when we seek to enforce the Convention's navigation and over flight rights guaranteed to all nations when we are one of a very small group of nations that is not a party. In the Arctic, we are the only Arctic nation that is not a party to the Convention. As a non-party to the Convention, the United States cannot utilize the Convention's mechanisms to gain international recognition of its ECS.

DETAINEE TREATMENT POLICY

Question. Recent Department of Defense operations in Iraq and Syria highlight the need for a continued detention capability for both interrogation and law of war detention.

What recommendations do you have for ensuring that the Department of Defense maintains sufficient detention capabilities for capture operations against ISIL and other affiliated terrorist groups to remain a viable option?

Answer. I believe that the Department will continue to require a detention capability. If confirmed, I will advocate to civilian and military leadership to provide commanders on the ground the ability to lawfully detain as part of future capture operations.

Question. Do you support the policy set forth in the July 7, 2006, memorandum issued by the Deputy Secretary of Defense stating that all relevant DOD directives, regulations, policies, practices, and procedures must fully comply with Common Article 3 of the Geneva Conventions?

Answer. Yes.

Question. Do you support the standards for detainee treatment specified in the revised Army Field Manual on Interrogations, FM 2–22.3, issued in September 2006, and in DOD Directive 2310.01E, the Department of Defense Detainee Program, dated August 19, 2014?

Answer. Yes.

Question. If confirmed, will you ensure that all DOD policies promulgated and plans implemented related to intelligence interrogations, detainee debriefings, and tactical questioning comply with the Common Article 3 of the Geneva Conventions and the Army Field Manual on Interrogations?

Answer. Yes.

Question. Do you share the view that standards for detainee treatment must be based on the principle of reciprocity, that is, that we must always keep in mind the risk that the manner in which we treat our own detainees may have a direct impact on the manner in which U.S. Soldiers, Sailors, Airmen or Marines are treated, should they be captured in future conflicts?

Answer. Yes.

OFFSET TECHNOLOGIES

Question. During the Cold War, the DOD pursued three key technologies to offset the numerical superiority of Soviet conventional forces: precision guided munitions, stealth technology, and satellite-based navigation. These three technologies have given U.S. forces unparalleled superiority until now. However, with advancements by our emerging adversaries, it seems like the military technological superiority is beginning to erode. As a result, it is critical that the United States once again focus on offsetting the technology advantages being gained by our adversaries. Which technology priorities do you believe the Department of Defense should be pursuing to maintain the military technological superiority of the United States?

Answer. As anti-access and area-denial weapons and other advanced technologies proliferate, the Department will likely turn to breakthrough technologies in the fields of robotics, autonomous systems, miniaturization, big data, and additive manufacturing to restore our military advantage.

Question. What strategies would you recommend that Secretary Carter implement to develop these technology priorities?

Answer. The purpose of the Defense Innovation Initiative strategy laid out by Secretary Carter is to develop our future technology priorities. Complimenting this effort by the warfighters is the development of new innovative operational concepts. If confirmed, I will make sure that the investments in operation concepts and human capital—as our greatest asset will always be our servicemembers—proceed apace with our efforts to pursue innovative solutions through technological means.

Question. What role do the services have to play in their development?

Answer. By identifying, experimenting, and wargaming combinations of new and existing technologies necessary to project power globally, the Services in partnership with the Defense Innovation Initiative team will help steer the development of future technology priorities.

SCIENCE AND TECHNOLOGY

Question. One of the main objectives of the defense research enterprise is to develop advanced technologies that will be of benefit to the warfighter. In this regard, it is critical that advancements quickly transition from the development phase into testing and evaluation and ultimately into a procurement program for the warfighter. What are some of the challenges you see in transitioning technologies effectively from research programs into programs of records?

Answer. Moving an advanced technology from a research program into a program of record requires carving out room in the budget based upon a compelling need. Once in the budget, maintaining momentum with a particular technology is chal-

lenging as it must continue to compete against other “good ideas” year after year in our resourcing process. The final challenge, ensuring an advanced technology meets its promise in a timely and cost-effective manner as we transition the technology into a warfighting capability.

Question. As the Vice Chairman of the Joint Chiefs of Staff, what steps will you take to ensure that the services are benefitting more quickly and directly from the research being performed by the defense research enterprise?

Answer. In my roles as a Defense Innovation Initiative “core group” member and Chairman of the JROC, I will ensure that the resourcing and acquisition processes are well-informed on the priority and timing of capability needs. In collaboration with the Chairman, I will also continue to use the Chairman’s Gap Assessment and the Chairman’s Program Recommendation to communicate directly to Secretary Carter my thoughts on promising research performed by the research enterprise.

Question. Do you feel that defense technologies and systems, especially in areas such as mobile communications, computing, and robotics, are keeping pace with global and commercial technological advances? If not, what do you suggest that the Department do to keep up with the pace of global technological change?

Answer. Keeping pace with global and commercial technology is challenging the Department. If confirmed, I will support the Secretary’s Defense Innovation Initiative to focus the Department on maintaining our military’s technological edge in an increasingly competitive technology environment.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this Committee and other appropriate committees of the Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this Committee and other appropriate committees of the Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the Administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this Committee, or designated members of this Committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as Chairman of the Joint Chiefs of Staff?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this Committee and its staff and other appropriate Committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted Committee, or to consult with the Committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR TOM COTTON

DISMANTLEMENT OF RETIRED NUCLEAR WARHEADS

1. SENATOR COTTON. General Selva, in your responses to the advance questions to the committee regarding your priorities for the Nuclear Weapons Council (NWC), you indicated that accelerated dismantlement of retired warheads was among those top priorities. If our modernization commitments were falling behind, would you agree that fully funding those commitments is a higher priority than accelerating dismantlement of current warheads?

GENERAL SELVA. Yes.

2. SENATOR COTTON. General Selva, in his testimony before this committee, General Dunford, the nominee to be the Chairman of the Joint Chiefs of Staff, called Russia an existential threat. Do you agree with General Dunford’s assessment, and if you do, do you still think that accelerating dismantlement should be a priority?

GENERAL SELVA. Russia’s nuclear capability does pose an existential threat to the United States. Accelerating dismantlement is a priority, as long as it does not constrain the resources and infrastructure required to meet U.S. nuclear weapons em-

ployment planning, achieve deployed stockpile requirements, and address stockpile aging and life extension program needs.

DISTRIBUTED COMMON GROUND/SURFACE SYSTEM-ARMY (DCGS-A)

3. SENATOR COTTON. General Selva, in your role as the Chairman of the Joint Requirements Oversight Council (JROC), you have stated to the committee that the JROC “trip-wire” process has altered performance or procurement quantities after programmatic reviews. One particular program, the Distributed Common Ground/Surface System-Army (DCGS-A) has been going down the wrong road for too long. Are you aware that DCGS-A has serious capability gaps, and that the Army’s leadership has consistently downplayed warfighter concerns?

GENERAL SELVA. The Joint Staff carefully monitors all major weapon systems development to ensure not only the Services’, but Joint Forces’ requirements are thoroughly considered in future system development.

4. SENATOR COTTON. General Selva, what will you do, as JROC chairman, to ensure that DCGS-A meets real world requirements as testified by the warfighter?

GENERAL SELVA. The Joint Staff expends considerable effort to ensure Service provided capabilities meet warfighter requirements. On 7 July 2015, the JROC validated the conversion of the DCGS-A Capability Development Document (CDD) to an Information System (IS) CDD. The approved CDD includes an Ease of Use/Usability Key System Attribute (KSA). The Ease of Use/Usability KSA provides a way to ensure warfighter requirements are met.

5. SENATOR COTTON. General Selva, would you be willing to update the guidance from the Joint Capabilities Integration and Development System and direct the program to reassess requirements based on warfighter input?

GENERAL SELVA. The JCIDS guidance documents are updated regularly to support deliberate, emergent and urgent requirements. The last formal review and update to the JCIDS guidance documents, to include the JCIDS Manual, was completed in February 2015. Corrections and amplifying details to these guidance documents are maintained in an online resource and will be incorporated in a future formal review and update.

6. SENATOR COTTON. General Selva, Army Secretary John McHugh has readily admitted that on major acquisitions the Army scorecard is 0-26. What will you do to ensure that the entrenched bureaucracy that has produced this record will adopt reform and adopt commercial off-the-shelf systems such as Palantir?

GENERAL SELVA. On 7 July 2015, the JROC validated the Information System (IS) Capability Development Document (CDD) for DCGS-A and endorsed the Army acquisition strategy featuring open competition for future capabilities. DCGS-A already leverages numerous commercially available products from over 40 vendors and has committed to continue to incorporate commercial products that are available and meet requirements.

The Army and Palantir entered into a Cooperative Research and Development Agreement (CRADA) in May 2012 with the objective of collaboratively developing and demonstrating new technologies.

7. SENATOR COTTON. General Selva, critics within the Army bureaucracy describe Palantir as a “front-end” or user interface analytical solution, but I know that to be untrue. Are you aware that Palantir is in fact a complete solution for data integration?

GENERAL SELVA. Palantir is a commercial off the shelf data analysis tool with software specialized for visualization of different types of data in support of situational awareness, network link analysis, and targeting analysis support. It provides some of the capabilities resident in three of the nine components of DCGS-A, but I do not believe it can replace DCGS-A.

8. SENATOR COTTON. General Selva, are you aware that the Army has used time and resources to fight against Palantir while persisting with DCGS-A with its record of failure and wasted taxpayer dollars?

GENERAL SELVA. The Army has adopted an open source acquisition model and invited commercial vendors with capabilities that resolve known gaps to participate. The Army and Palantir entered into a Cooperative Research and Development Agreement (CRADA) in May 2012 with the objective of collaboratively developing and demonstrating new technologies that are relevant to the warfighter and U.S. Army Programs of Record (PORs) with the intent to enhance operational capabilities.

9. SENATOR COTTON. General Selva, more than 30 Army units, most of them Brigade and above representing half of the total Army, have requested the comparable system Palantir since 2009. Commanders and warfighters are sending a clear message that has not been heard by the Army leadership. An April 2012 Army Test

and Evaluation Command Report cited that 96 percent of surveyed warfighters stated, "Palantir is effective in supporting my mission." Shouldn't we procure programs like Palantir's that exceed the performance and expectations of an internal build like DCGS-A?

GENERAL SELVA. From 2011 thru April 2015, 19 deploying Army units have submitted 28 requests for commercial, advanced analytic capabilities to augment DCGS-A. All but three of those 19 have been provided Palantir capability. Three units were not approved due to a change in mission, receipt of an updated version of DCGS-A, or insufficient time remaining in their deployment to procure Palantir software/hardware and train the unit.

10. SENATOR COTTON. General Selva, at the end of the day, the true test for any capability is user adoption, so why would you expect the Army to force an inferior, failing, over-priced program on the warfighter, especially when it has consistently been the solution of choice for the Federal Bureau of Investigation (FBI), Department of Homeland Security (DHS), Securities and Exchange Commission (SEC), Internal Revenue Service (IRS), Defense Intelligence Agency (DIA), and the financial sector?

GENERAL SELVA. The Army is not forcing a particular system, application, or capability on its units. In fact, senior Army leadership provided written guidance stating, "units in combat currently depend on a diverse range of systems . . . these include the Army's current enterprise intelligence system, DCGS-A, and Palantir . . ." The Army has reviewed and assessed every operational requirement for Palantir and provided requesting units with Palantir if validated by Army G3/5/7. DCGS-A provides an extremely large and diverse set of Intelligence tools across a broad range of intelligence disciplines, and relies heavily on soldier feedback to ensure warfighter requirements are met.

[The nomination reference of General Paul J. Selva, USAF, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
May 21, 2015.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment as the Vice Chairman of the Joint Chiefs of Staff and appointment in the United States Air Force to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., sections 601 and 154:

To Be General

General Paul J. Selva, 0000

[The biographical sketch of General Paul J. Selva, USAF, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF PAUL J. SELVA, USAF

General Paul J. Selva is commander, U.S. Transportation Command, Scott Air Force Base, Illinois. USTRANSCOM is the single manager for global air, land and sea transportation for the Department of Defense.

General Selva graduated from the U.S. Air Force Academy in 1980, and completed undergraduate pilot training at Reese AFB, Texas. He has held numerous staff positions and has commanded at the squadron, group, wing and headquarters levels. Prior to his current assignment General Selva was the Commander, Air Mobility Command, Scott AFB, Illinois.

General Selva is a command pilot with more than 3,100 hours in the C-5, C-17A, C-141B, KC-10, KC-135A and T-37.

Education:

- 1980 Bachelor of Science in Aeronautical Engineering, U.S. Air Force Academy, Colorado Springs, CO.
- 1983 Squadron Officer School, Maxwell AFB, AL.

- 1984 Master of Science in Management and Human Relations, Abilene Christian University, Abilene, Texas 1992 Air Command and Staff College, Maxwell AFB, AL., distinguished graduate.
- 1992 Master of Science in Political Science, Auburn University, Montgomery, AL.
- 1996 National Defense Fellow, Secretary of Defense Strategic Studies Group, Rosslyn, VA.

Assignments:

1. June 1980–July 1981, student, undergraduate pilot training, Reese AFB, Texas.
2. July 1981–December 1984, co-pilot and aircraft commander, 917th Air Refueling Squadron, Dyess AFB, Texas.
3. January 1984–December 1988, co-pilot, aircraft commander, instructor pilot, and flight commander, 32nd Air Refueling Squadron, Barksdale AFB, LA.
4. January 1989–July 1991, company grade adviser to Commander, Strategic Air Command, later, manager of offensive aircraft systems and executive officer, Deputy Chief of Staff, Plans and Resources, Headquarters Strategic Air Command, Offutt AFB, NE.
5. August 1991–July 1992, student, Air Command and Staff College, Maxwell AFB, AL.
6. July 1992–June 1994, instructor pilot and flight commander, 9th Air Refueling Squadron, later, Commander, 722nd Operations Support Squadron, March AFB, CA.
7. June 1994–June 1995, Commander, 9th Air Refueling Squadron, later, Deputy Commander, 60th Operations Group, Travis AFB, CA.
8. July 1995–June 1996, National Defense Fellow, Secretary of Defense Strategic Studies Group, Rosslyn, VA.
9. July 1996–August 1998, assistant to the Director, Office of the Secretary of Defense for Net Assessment, the Pentagon, Washington, DC.
10. August 1998–July 2000, Commander, 60th Operations Group, Travis AFB, CA.
11. July 2000–June 2002, Commander, 62nd Airlift Wing, McChord AFB, WA.
12. June 2002–June 2003, Vice Commander, Tanker Airlift Control Center, Scott AFB, IL.
13. June 2003–November 2004, Commander, Tanker Airlift Control Center, Scott AFB, IL.
14. December 2004–August 2006, Director of Operations, U.S. Transportation Command, Scott AFB, IL.
15. August 2006–June 2007, Director, Air Force Strategic Planning, Deputy Chief of Staff for Strategic Plans and Programs, Headquarters U.S. Air Force, Washington, DC.
16. June 2007–October 2008, Director, Air Force Strategic Planning, Deputy Chief of Staff for Strategic Plans and Programs, Headquarters U.S. Air Force, and Director, Air Force QDR, Office of the Vice Chief of Staff, Washington, DC.
17. October 2008–October 2011, Assistant to the Chairman of the Joint Chiefs of Staff, Washington, DC.
18. October 2011–November 2012, Vice Commander, Pacific Air Forces, Joint-Base Pearl Harbor-Hickam, Hawaii.
19. November 2012–May 2014, Commander, Air Mobility Command, Scott AFB, IL.
20. May 2014–Present, Commander, U.S. Transportation Command, Scott AFB, IL.

Summary of Joint Assignments

1. September 1996–August 1998, Assistant to the Director, Office of the Secretary of Defense for Net Assessment, the Pentagon, Washington, D.C., as a lieutenant colonel.
2. November 2004–July 2006, Director of Operations and Logistics, U.S. Transportation Command, Scott AFB, Ill., as a brigadier general.
3. October 2008–October 2011, Assistant to the Chairman of the Joint Chiefs of Staff, Washington, D.C., as a lieutenant general.
4. May 2014–Present, Commander U.S. Transportation Command, Scott AFB, Ill.

Flight Information

Rating: Command pilot
 Hours flown: More than 3,100
 Aircraft flown: C-5, C-17A, C-141B, KC-10, KC-135A and T-37.

Major Awards and Decorations

Defense Distinguished Service Medal.

Distinguished Service Medal.
 Defense Superior Service Medal.
 Legion of Merit with two oak leaf clusters.
 Defense Meritorious Service Medal.
 Meritorious Service Medal with three oak leaf clusters.
 Air Force Commendation Medal.
 Air Force Achievement Medal.
 Joint Meritorious Unit Award.
 Combat Readiness Medal with oak leaf clusters.
 National Defense Service Medal with bronze star.
 Armed Forces Expeditionary Medal with two bronze stars.
 Southwest Asia Service Medal with bronze star.
 Global War on Terrorism Service Medal Armed Forces Service Medal.

Effective Dates of Promotion

Second Lieutenant, May 28, 1980.
 First Lieutenant, May 28, 1982.
 Captain, May 28, 1984.

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by General Paul J. Selva, USAF, in connection with his nomination follows:]

UNITED STATES SENATE
 COMMITTEE ON ARMED SERVICES
 ROOM SR-228
 WASHINGTON, DC 20510-6050
 (202) 224-3871
 COMMITTEE ON ARMED SERVICES FORM
 BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
 NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed, use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in Committee offices for public inspection prior to the hearing and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
 Paul J. Selva.

2. **Position to which nominated:**
 Vice Chairman of the Joint Chiefs of Staff.

3. **Date of nomination:**
 21 May 2015.

4. **Address:** (List current place of residence and office addresses.)
 [Nominee responded and the information is contained in the committee's executive files.]

5. **Date and place of birth:**
 27 September 1958, Biloxi, MS.

6. **Marital status:** (Include maiden name of wife or husband's name.)
 Ricki S. Selva (maiden name: Smith).

7. Names and ages of children:

None.

8. Government experience: List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.

None.

9. Business relationships: List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, firm, partnership, or other business enterprise, educational or other institution.

None.

10. Memberships: List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable and other organizations.

Air Force Association—Member.

Airlift Tanker Association—Member.

National Defense Transportation Association—Member.

11. Honors and Awards: List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

None.

12. Commitment to testify before Senate committees: Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes.

13. Personal views: Do you agree, when asked before any duly constituted committee of the Congress, to give your personal views, even if those views differ from the Administration in power?

Yes.

[The nominee responded to Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee’s answers to Parts B–E are contained in the committee’s executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

GENERAL PAUL J. SELVA, USAF

This 5th day of May, 2015

[The nomination of General Paul J. Selva, USAF was reported to the Senate by Chairman McCain on July 23, 2015, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on July 27, 2015.]

[Prepared questions submitted to General Darren W. McDew, USAF by Chairman McCain prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. The Goldwater-Nichols Department of Defense Reorganization Act of 1986 and the Special Operations reforms have strengthened the warfighting readiness of our Armed Forces. They have enhanced civilian control and clearly delineated the operational chain of command and the responsibilities and authorities of the combatant commanders, and the role of the Chairman of the Joint Chiefs of

Staff. They have also clarified the responsibility of the Military Departments to recruit, organize, train, equip, and maintain forces for assignment to the combatant commanders.

Do you see the need for modifications of any Goldwater-Nichols Act provisions? Answer. At this point, I don't see the need for any significant changes. Over the last three decades Goldwater-Nichols has led to an unprecedented level of integration and cooperation among the Services. This has not only yielded a far more effective fighting force, it has positioned us well to maintain that effectiveness as we face an increasingly constrained fiscal environment and diverse array of threats. However, to build on this success and guarantee a cadre of joint officers in the future I do believe we need to continually review joint officer requirements to ensure we are building the most qualified joint forces for the future.

Question. If so, what areas do you believe might be appropriate to address in these modifications?

Answer. JPME is essential to building a cadre of joint professionals prepared to meet the challenges of the future strategic environment. Expanding access to JPME to the Total Force community through advanced learning technologies is one area for consideration. If confirmed, I will work with Congress, the Secretary of Defense and other senior leaders of our military to ensure Goldwater-Nichols continues to meet the needs of our armed forces, and will support any changes to the legislation that might become necessary.

DUTIES

Question. What is your understanding of the duties and functions of the Commander, U. S. Transportation Command?

Answer. The Commander, United States Transportation Command (USTRANSCOM), is responsible for providing air, land and sea transportation for the DOD, in peace, crisis and war. USTRANSCOM depends on three Component Commands to accomplish this mission: Air Mobility Command (AMC), Military Sealift Command (MSC), and the Military Surface Deployment and Distribution Command (SDDC). The Commander is assigned multiple responsibilities in the Unified Command Plan (UCP) to include: the Distribution Process Owner (DPO) mission to improve the worldwide DOD distribution system; DOD single manager for global patient movement; Global Distribution Synchronizer (GDS) mission to synchronize planning for worldwide distribution operations; and facilitating the rapid establishment of joint force headquarters for combatant commanders through its Subordinate Command, the Joint Enabling Capabilities Command. The USTRANSCOM team employs a mix of active and Reserve military members, government civilians and commercial industry partners to execute the Command's missions in support of the full range of military operations.

Question. What background and experience do you possess that you believe qualifies you to perform these duties?

Answer. Throughout my 33 years in uniform, I have had held numerous positions in and out of the Department of Defense that have prepared me, if confirmed, to perform the duties as the Commander of USTRANSCOM. I was fortunate enough to be selected to spend a year as a Secretary of Defense Corporate Fellow at Sun Microsystems. During that year in the Silicon Valley, I was exposed to companies with reputations for insightful long-range planning, organizational and management innovation, and implementation of new information and other technologies.

As the Director of Public Affairs, Office of the Secretary of the Air Force, I was responsible for providing trusted counsel to the Secretary of the Air Force, the Chief of Staff, and all other principal military and civilian leaders of the Department of the Air Force concerning Public Affairs activities to assist in building public support and achieving the Air Force core competencies. I became adept at working with the civilian press, DOD and Congressional inquiries.

While still at the Pentagon, I was chosen as the Vice Director for Strategic Plans and Policy on the Joint Staff. In this role, I helped provide strategic direction, policy guidance, and planning focus to develop and execute the National Military Strategy. Through the Director, I enabled the Chairman of the Joint Chiefs of Staff to provide military advice to the President, the Secretary of Defense and the National Security Council.

Finally, I served as Commander of the 18th Air Force which I was responsible for providing worldwide rapid, global mobility and sustainment for America's Armed Forces through airlift, aerial refueling, aeromedical evacuation, and contingency response. This position directly led to my selection as Commander, AMC. I command over 118,000 Airmen from across our Air Force, Active, Reserve, and Air National Guard who provide worldwide cargo and passenger delivery, aerial refueling, special

air mission and aeromedical evacuation. This includes the crucial role of humanitarian assistance and disaster relief to victims of natural disasters both at home and around the world.

Question. Do you believe that there are any steps that you need to take to enhance your expertise to perform the duties of the Commander, U. S. Transportation Command?

Answer. As the current AMC Commander I am aware of the breadth of USTRANSCOM's worldwide responsibilities. If confirmed, I will engage with all of USTRANSCOM's component commands, DOD agencies, and our commercial partners to guarantee I fully understand the range of challenges they face in order to accomplish USTRANSCOM's crucial mission.

RELATIONSHIPS

Question. Section 162(b) of title 10, United States Code, provides that the chain of command runs from the President to the Secretary of Defense and from the Secretary of Defense to the combatant commands. Other sections of law and traditional practice, however, establish important relationships outside the chain of command. Please describe your understanding of the relationship of the Commander, U. S. Transportation Command to the following offices:

The Deputy Secretary of Defense.

Answer. The Deputy Secretary of Defense has full power and authority to act for the Secretary of Defense when serving as his designated representative in the Secretary's absence. As such, the USTRANSCOM Commander will report to and through the Deputy Secretary when serving in that capacity. The Deputy Secretary also is the Chief Management Officer of the Department, responsible for optimizing the business environment across the Defense enterprise. USTRANSCOM strongly supports these optimization efforts as we strive to improve our support to the other Combatant Commands and Defense agencies in a cost-effective and operationally efficient manner.

Question. The Under Secretaries of Defense.

Answer. Under Secretaries of Defense coordinate and exchange information with DOD components, including Combatant Commands, which have collateral or related functions. In practice, this coordination and exchange is normally routed through the Chairman of the Joint Chiefs of Staff. In addition, as the Distribution Process Owner, the USTRANSCOM commander receives oversight from the Under Secretary of Defense for Acquisition, Technology, and Logistics in his role as the Defense Logistics Executive via the Defense Logistics Board. This relationship works very well. If confirmed as a combatant commander, I look forward to the continuing collaboration.

Question. The Chairman of the Joint Chiefs of Staff.

Answer. As specified in title 10, the Chairman is the principal military advisor to the President, the National Security Council, the Homeland Security Council and Secretary of Defense. The Chairman serves as an advisor, and is not, by law, in the chain of command, which runs from the President through the Secretary to each Combatant Commander. The President normally directs communications between himself and the Secretary of Defense to the combatant commanders via the Chairman of the Joint Chief of Staff. This keeps the Chairman fully involved and allows the Chairman to execute his other legal responsibilities. A key responsibility of the Chairman is to speak for the combatant commanders, especially on operational requirements. If confirmed, I will keep the Chairman and the Secretary of Defense fully informed regarding USTRANSCOM matters.

Question. The Vice Chairman of the Joint Chiefs of Staff.

Answer. Although the Vice Chairman does not fall within the Combatant Command chain of command, he is delegated full power and authority to act for the Chairman in the Chairman's absence. If confirmed as a Combatant Commander, when he is representing the Chairman, I will keep the Vice Chairman informed as I would the Chairman.

Question. The Director of the Joint Staff.

Answer. The Director of the Joint Staff assists the Chairman in managing the Joint Staff. The Director of the Joint Staff does not fall within the Combatant Commander's chain of command. However, he enables important decisions to be made as the Combatant Commander's staff interacts with the Joint Staff. The Director is also a key interface with Office of the Secretary of Defense Principals and inter-agency leadership, and can assist combatant commanders working issues below the Chairman's level.

Question. The Secretaries of the Military Departments.

Answer. Each Service Secretary is responsible for equipping, training, maintaining and administering forces belonging to that Service. Close coordination with each Service Secretary providing forces to USTRANSCOM is essential to ensure that there is no infringement upon the lawful responsibilities held by a Service Secretary.

Question. The Chiefs of Staff of the Services.

Answer. The Chiefs of Staff of the Services organize, train, and equip their respective forces. No Combatant Commander can ensure preparedness of assigned forces without the full cooperation and support of the Service Chiefs and their respective Reserve Components. As members of the Joint Chiefs of Staff, the Service Chiefs have a lawful obligation to provide military advice. The experience and judgment the Service Chiefs provide is an invaluable resource for every Combatant Commander. If confirmed, as Commander USTRANSCOM, I will continue my predecessors' frank and productive dialogue with the Service Chiefs and the Commandant of the U.S. Coast Guard.

Question. The other combatant commanders.

Answer. USTRANSCOM's primary mission is to support each of the combatant commanders in accomplishing the responsibilities they are assigned in the Unified Command Plan. Given the complexity of today's security environment, it is essential that all the combatant commanders work together to execute U.S. national security policy. If confirmed, I will continue to build upon the trust and mutual support my predecessors have fostered with the other Combatant commanders.

MAJOR CHALLENGES AND PRIORITIES.

Question. In your view, what are the major challenges confronting the next Commander, U.S. Transportation Command?

Answer. Currently, the Command's number one priority is "Readiness" for the enterprise. USTRANSCOM has the capability to meet existing surge requirements; however, major future challenges may erode our key, asymmetric military transportation and logistics advantages. These challenges include: maintaining assured Command and Control (C2) in a contested cyber domain; impending mobility capability degradation due to reduced budgets, a shrinking force structure, diminished cargo volumes, and increasingly dynamic commercial market trends; and, also, growing peer and near-peer adversary's anti-access and area denial capabilities.

Additionally, USTRANSCOM focuses on providing both effective and efficient transportation solutions for all its customers. Future budget challenges may reduce Enterprise readiness and flexibility, subsequently degrading the Defense Transportation System to be less responsive and less resilient. While these challenges are formidable, given the talents of the USTRANSCOM team, they are not insurmountable.

Question. If confirmed, what plans do you have for addressing these challenges?

Answer. If confirmed, I will work with my fellow combatant commanders to assess risk from these challenges and collaboratively develop mitigation strategies to ensure USTRANSCOM will meet its steady state and surge requirements. I will advance USTRANSCOM's cyber defenses to protect DOD networks and systems, partnering with other U.S. government departments, agencies, and the private sector to improve our cyber security. To overcome readiness challenges, we will work within the constraints of Public Law and National policy to leverage operations and implement transportation solutions that preserve readiness for both our organic forces and the critical surge capacity provided by commercial transportation providers.

In order to ensure our global distribution network, I will work with USTRANSCOM's commercial partners and the interagency to continue USTRANSCOM's global efforts to secure diplomatic and physical accesses to ground and airspace infrastructure for logistics. I will work to improve USTRANSCOM's global ability to deliver to the point of need in the most effective and cost-effective ways possible—projecting American influence and power when and where our national interests dictate. This includes collaboratively developing, in concert with our fellow Combatant Commands, Services and agencies, innovative concepts and capabilities to overcome the anti-access/area denial efforts of our peer and near-peer adversaries.

Question. If confirmed, what broad priorities would you establish?

Answer. If confirmed, I will immediately become familiar with the all aspects of the defense transportation enterprise with a focus on preserving readiness of the Defense Transportation System to meet national objectives and to support the Joint Force into the future. Always mindful of our obligation to make the most of our existing resources, I intend to seek process improvement and enterprise synchroni-

zation efforts through relationships within the Department, across the U.S. Government, and with commercial and international partners.

Question. What do you consider to be the most serious problems in the performance of the functions of the Commander, U. S. Transportation Command?

Answer. As Commander, I will focus on operating a Combatant Command with global responsibilities in a challenging environment of declining budgets, smaller forces, reduced resources, and global rebalance of force posture. I will ensure synchronization of the entire Joint Deployment and Distribution Enterprise—a vast network of organizations both in and out of the Department of Defense that relies heavily on commercial partnerships with industry. Additionally, I will address the challenges with operating aging transportation fleets and port infrastructure worldwide.

Question. If confirmed, what management actions and time lines would you establish to address these problems?

Answer. If confirmed, I will continue the focus on preserving readiness and aligning resources for mission success and to further enhance USTRANSCOM's operational resiliency. USTRANSCOM has made great strides in improving economies and efficiencies. I will continue this work by managing readiness, cost, and time variables to deliver effective and efficient deployment and distribution solutions commensurate with assigned authorities and available resources. While the near future poses many challenges, we must balance costs and benefits, matching our actions to available resources in the near term and adapting our efforts for greater economies and efficiencies in the long term.

EXPERIENCE IN MANAGING LOGISTICS OPERATIONS

Question. You have served as the Commander of the Air Mobility Command.

What steps do you believe you need to take to achieve a more complete understanding of the logistics operations of the other component commands of the U. S. Transportation Command?

Answer. As the current AMC Commander, I am aware of the missions, roles and responsibilities of the elements of the USTRANSCOM team. If confirmed, I will make it a priority to better understand the capabilities and challenges of the component commands. I will engage with the component commanders, DOD agencies, and commercial partners to address the issues they face, work together to resolve logistics challenges, and to better accomplish USTRANSCOM's vital worldwide mission.

CIVIL RESERVE AIR FLEET

Question. The military services rely heavily on the Civil Reserve Air Fleet (CRAF) to supplement its organic airlift in order to meet its wartime and peacetime transportation requirements.

What is your assessment of the CRAF's ability to meet requirements to transport any equipment, materials, or commodities for the use of U.S. military operations and respond to a humanitarian disaster?

Answer. Our commercial partners are an integral part of providing global air mobility assets to support military operations and response to humanitarian disasters. The combined capability of military and commercial lift gives us the ability to transport any equipment, materials, personnel, or commodities the warfighter will need to execute their mission to any point on the globe. If confirmed, I will continue to work with our CRAF partners to ensure the business relationships remain solid and the contracts continue to support DOD requirements.

Question. Do the changes in the commercial airline industry, characterized by bankruptcies and a move toward smaller and shorter-range aircraft, impact the future viability of the CRAF?

Answer. The commercial airline industry is a dynamic market and always has been. We have adapted to carriers' fleet changes and benefited by having a commercial augmentation capability ready to answer the call when needed. It is an accurate assessment that there are fewer carriers now in the CRAF program than there have been in the last decade. I have met with several airline executives over the past 15 months, and they have all said they will continue to support the DOD and CRAF program because it is the right thing to do for our Nation. As we drew down forces from Afghanistan, carriers made expected adjustments to capacity to right size their fleets for the new business environment. Through Air Mobility Command's sponsored research, conducted as part of an extensive CRAF Study, we foresaw these changes and have adapted the program. Based on these efforts, we are confident the CRAF program will remain viable and capable to meet operational requirements in the future.

Question. Do you think it is important to maintain an adequate industrial base for CRAF carriers?

Answer. Yes. CRAF provides a capability no other nation can replicate and ensures we can meet national requirements that our organic assets alone cannot provide in times of crisis or conflict. It is critical we maintain both an organic airlift capability and commercial augmentation capability that is “ready” to answer the call when the next crisis arises. It is important that our CRAF partners sustain necessary capacity to provide the support we foresee to support the National Defense Strategy.

Question. How much should we be relying on CRAF to meet our peacetime and wartime airlift requirements?

Answer. The CRAF program is a critical component in this Nation’s ability to rapidly deploy forces and equipment in times of crisis and peace. Because of the CRAF program, we can deploy forces more rapidly and more efficiently than any other nation in the world. In peacetime, this workload changes from year-to-year due to dynamic customer requirements. Our forecast requirements are expected to be much lower starting in fiscal year 2016 compared to the past 13 years, which will impact both military and commercial capacity. We will continue to strive for the balance between military and commercial capacity while trying to garner more business into the Defense Transportation System through such recent changes as competitive rates for Foreign Military Sales and non-DOD U.S. Government organizations.

Question. What changes, if any, do you think need to be made to CRAF—authorities, requirements, composition?

Answer. AMC, in coordination with USTRANSCOM, chartered a study of the CRAF program to look at these specific issues. Throughout the study, we engaged industry experts for their advice on where the airline industry is headed and what to expect. The study team provided recommendations to senior leadership and industry executives, which we expect to implement in Fiscal Year 2016. Additionally, USTRANSCOM has begun an Integrated Airlift Management (IAM) approach to balance commercial and organic workload and associated risks. This approach ensures active and reserve component readiness through execution of the flying hour program, provides appropriate commercial airlift augmentation opportunities to retain necessary commercial airlift capacity, reduces the long-term cost of sustaining the organic airlift fleet by placing the minimum time on airframes necessary and supports “global agility” by creating a buffer capacity for adaptable military response to priority, short-notice missions. I am confident that these changes will help to maintain the program’s viability despite the decrease in available business.

Question. According to the Comptroller General, “DOD does not use its process for monitoring flying hours to determine when it will exceed required training hours and allocate eligible airlift missions to CRAF participants. Therefore, it cannot determine whether it is using CRAF to the maximum extent practicable. As a result, DOD may be using its military fleet more than necessary—which officials say is less economical—while risking reduced CRAF participation.”¹

Do you agree with GAO’s conclusion with regard to flying hours for CRAF?

Answer. There is a balance between ensuring sufficient training for crews, much of which comes from operational missions, meeting the needs of the combatant commander and balancing the use of organic versus CRAF-provided airlift.

I agree with the need to maintain readiness of all assets required to support national security, including all military and commercial airlift capabilities.

Question. If so, what steps would you take to better manage these training hours?

Answer. AMC recently created a process that surveys the number of crew members per flying unit and applies seasoning model criteria that ensure aging rates and specific flying currency requirements are met. The output of that model is then put into our commanders’ apportionment and allocation process which balances readiness against actual combatant commander and mission requirements directing the excess to our commercial partners. This Total Force effort has proven successful in responding to the readiness needs of all assets used to support the defense transportation system.

In addition, TRANSCOM has created a readiness and distribution allocation process that looks across all transportation modes to balance readiness needs. One outcome of this process has been an effort to begin buying commercial airlift using forecasts.

Question. Also, according to GAO, the number of carriers and aircraft for cargo in CRAF appear to be dropping from 175 in 2011 to 162 aircraft in 2013—this is

¹GAO Report 13–564, “DOD Needs to Take Steps to Manage Workload Distributed to the Civil Reserve Air Fleet,” Page 9, Government Accountability Office, June 2013, <http://www.gao.gov/assets/660/655338.pdf>.

in Table 1 on page 16.² More recent documents show this may be as low as 144 as of late last year.

Why is the number of aircraft participating in CRAF dropping? At what level does CRAF become at risk for being too small to meet the military's airlift needs.

Answer. We do not measure the capability of the CRAF fleet based on number of aircraft, but rather the capacity those aircraft provide. Under the new Defense Strategy, the Wide Body Equivalent (WBE) requirement for cargo aircraft in the long range international segment of CRAF is 144 and for passenger aircraft it is 104 WBE. At these levels, the CRAF program is not at risk for meeting our military airlift needs.

CYBERSECURITY

Question. U.S. Transportation Command (USTRANSCOM) must communicate over the unclassified Internet with many private-sector entities that are central to DOD's force generation and deployment operations—in the transportation and shipping industries in particular. Much of the rest of the critical communications and operations of the Defense Department can be conducted over the classified DOD internet service, which is not connected to the public Internet and is therefore much more protected against eavesdropping, espionage, and/or disruption by computer network attacks.

The Senate Armed Services Committee's inquiry into U.S. Transportation Command (USTRANSCOM) determined that it was subjected to many cyber intrusions that were not reported. USTRANSCOM also suffered from a lack of awareness by other law enforcement and national security agencies regarding cyber intrusions on USTRANSCOM contractors as well as misunderstandings by USTRANSCOM personnel on the rules and processes for sharing cyber intrusion-related information with necessary officials.

Have you reviewed this report?

Answer. Yes, I have reviewed the report and from my experience as the AMC Commander I understand the importance of Cyber security related to our ability to project forces in support of global requirements.

Question. Are you concerned about the level of reporting of cyber events by command contractors or other U.S. Government agencies to USTRANSCOM?

Answer. I am concerned, and if confirmed, I will continue to build upon the plan of action resulting from the Senate Armed Services Committee report and the resulting Cyber Mission Analysis Task Force held 14–15 April 2015 at Scott Air Force Base. Information sharing across the inter-agency process is key for USTRANSCOM to continuously assess risk to our operational missions. Communicating our need to be informed about cyber intrusions with our commercial contractors is essential. We will continue to address our concerns through contract language and forums such as the Defense Industrial Base and the National Defense Transportation Association's cyber security group.

Question. Do you feel that the Department of Defense is responding appropriately given recent events such as the threat nation intrusions into databases on U.S. personnel, including DOD employees?

Answer. I believe the Department's response has been holistic in nature, continuing our focus on strengthening cyber readiness, enforcing cyber discipline among our users, and providing emphasis and education regarding protection of personal information. The recently published DOD cyber strategy provides an appropriately broad approach for protecting the Department's information within our systems and networks, as well as defending the U.S. homeland and national interests, and providing the President with cyber options necessary to support potential military operations. As we learn more with concerning these intrusions, we must continue to inform our people with regard to prudent mitigation actions.

Question. What actions do you plan to take, if confirmed, as Commander, USTRANSCOM, to ensure that DOD reduces the risk of cyber intrusions?

Answer. If confirmed, I will strongly support efforts to implement the Department's Cyber Strategy, support movement of our critical information towards swift realization of the Joint Information Environment, and continue our efforts across the inter-agency process to address the need to share information concerning commercial provider cyber intrusions, enabling us to address mission assurance on multiple fronts from a cyber-perspective.

²GAO Report 13–564, “DOD Needs to Take Steps to Manage Workload Distributed to the Civil Reserve Air Fleet,” Page 16, Government Accountability Office, June 2013, <http://www.gao.gov/assets/660/655338.pdf>.

Question. Do you believe that the current posture of USTRANSCOM and the Department of Defense is sufficient to deter adversaries in cyber space?

Answer. As in any domain, and especially in cyber, we must continuously assess our ability to maneuver, as an enabler to successful operations. In cyberspace, the cost of entry for an adversary is relatively low when compared with the domains of air, land, sea, and space. In addition, the ability of an adversary (state or non-state), to acquire ever-evolving and sophisticated technical capabilities increases almost daily, and our ability to attribute an adverse cyber action is very difficult. As a result, the ever-increasing cyber threat becomes potentially more complex and potentially dangerous on a daily basis. Therefore, we must continue to press forward with our ability to detect, deter, protect, and when necessary, respond with appropriate authority in this domain.

Question. What do you believe are the critical needs of USTRANSCOM for cyber security?

Answer. USTRANSCOM relies upon the integrity of the information exchanged between military and commercial partners in its role as the distribution process owner for the Department. Our ability to command and control is highly dependent upon getting the right information to the right people at the right time, while protecting it from our adversaries. If confirmed, I will continue the important efforts to protect the command's information equities by working closely with our agency and commercial providers to further define roles, responsibilities, relationships and authorities for cyber security and to build trust and enhance information sharing.

Question. How important is it that USTRANSCOM be aware of cyber intrusions by advanced persistent threat (APT) actors into the networks of airlines, shippers, and other defense contractors that enable TRANSCOM operations?

Answer. Compromise of a commercial partners' networks by an APT, is a potential cyber security issue that provides insight into USTRANSCOM operations. Awareness of these intrusions is paramount so that we can mitigate their operational impacts. Commercial partners are integral to our mission and ability to provide volume, velocity and efficiency of operations. Vulnerabilities within any organization's infrastructure, including cyber vulnerabilities, are a risk for all mission partners.

Question. When USTRANSCOM becomes aware of an APT intrusion into an operationally critical contractor, what steps should the command take to determine whether operational plans should be adjusted to mitigate the risk of the intrusion affecting military operations?

Answer. As a result of the report and the Cyber Mission Analysis Task Force, USTRANSCOM has developed a mission risk assessment process that will enable us to consider appropriate operational and technical mitigation actions when we are made aware of such intrusions. The level of reporting continues to be a concern and is key to our ability to assess potential operational impact. USTRANSCOM has overcome some of these challenges with its cyber contract language and partnering efforts. If confirmed, I will continue to work with all stakeholders, government, military, and commercial partners to continuously assess our ability to adjust to cyber-attacks, including APT intrusions.

PERSONALLY-OWNED VEHICLE TRANSPORTATION ISSUES

Question. Last year, USTRANSCOM awarded a contract to ship privately-owned vehicles for servicemembers, the Global Privately Owned Vehicle Contract III, to a company without prior experience in this area. This award was followed by a protest from the incumbent contractor. During the summer peak moving season, the new contractor was late in delivering several hundred vehicles late and, in some cases, the vehicles of servicemembers were damaged. USTRANSCOM took an active role in increasing oversight and creating task forces to address the problems related to the change in contractors.

What lessons has USTRANSCOM learned from this experience to prevent the re-occurrence of these problems in the future?

Answer. USTRANSCOM originally planned for a contract transition during the non-peak season. Due to multiple protests the contract transitioned with no overlap and at the beginning of the 2014 peak season. This experience confirmed that the ideal transition time is in the winter months. In the future USTRANSCOM will consider the impact of unexpected extensions of the transition timeline when determining the contract transition period.

Question. Under the current contract, Global Privately Owned Vehicle Contract III, how is USTRANSCOM able to hold contractors accountable for poor performance? What changes, if any, would you implement to improve accountability?

Answer. The contract contains several performance objectives, with the primary performance measure being on-time delivery. If the contractor does not deliver a vehicle within the required delivery date, they will incur a monetary reduction ranging from as low as \$30/day per vehicle up to the entire transportation cost of a vehicle if it is delivered 60 or more days late. In addition, the contractor must also pay inconvenience claims directly to the customer for rental cars, lodging, etc. required as a result of a late delivery. TRANSCOM continues to seek ways to improve accountability, such as increasing the number of Contracting Officer Representatives (COR)s and supplementing COR training.

Question. Given the fact that servicemembers today are more likely to be married with dependents, what else should USTRANSCOM do to reduce the impact of a lost vehicle or delayed deliveries on military families?

Answer. USTRANSCOM will continue to partner with the Military Surface Deployment and Distribution Command (SDDC), the business process owner for the Global Privately Owned Vehicle Contract III. SDDC maintains a continuous dialogue with the Service Headquarters in order to ensure visibility of their servicemember concerns and remediation of those concerns. Since servicemember entitlements for inconvenience have not been adjusted for many years, it is time to evaluate and consider entitlement changes due to financial impact to the servicemembers.

SUPPORT OF TROOPS IN AFGHANISTAN

Question. Earlier this year the President stated his intention to keep 9,800 U.S. servicemembers in Afghanistan instead of the originally planned force level of 5,500.

What do you see as the major challenges to USTRANSCOM and the services for maintaining this higher troop level?

Answer. The capacity of the Afghanistan distribution network has diminished since our peak in 2010–11 when we supported a force of approximately 100,000. The current transportation network of air and surface lines of communication remains robust and more than capable of supporting the 9,800 U.S. Force structure in Afghanistan.

USTRANSCOM, as the Department of Defense distribution process owner, is compelled daily by the nature of our customer base, to view requirements through the joint lens. As active members of the Joint Team, Service requirements are communicated and met through a healthy variety of Joint efforts. Although Service challenges exist, none have proven too difficult for the Joint Team, through healthy communications and cross-seam coordination, to resolve.

Question. How will you ensure that our deployed troops in Afghanistan receive the support they require as the Department's attention turns towards other national security situations elsewhere in the world?

Answer. USTRANSCOM is the world-wide distribution process owner, and delivers passengers and cargo daily to U.S. force locations regardless of the size of force or the remoteness of their location. USTRANSCOM delivers everywhere, to everyone, all the time. With this in mind, globally integrated operations between the Department of Defense, Department of State and other federal agencies will be required to maintain complex political and military relationships. These relationships, as well as those of partner nations, support the lines of communication which provide USTRANSCOM the flexibility and agility to meet ongoing and emergent requirements.

PEACETIME-WARTIME LOGISTICS MANAGEMENT

Question. Our transportation and logistics systems have been significantly altered over time to reduce organic military air and sealift capacity and rely on commercial aircraft and sealift as well as commercial supply chains to deliver spare parts to deployed forces. This was done to reduce costs as well as increase buying power and flexibility for the military.

How does TRANSCOM plan for the risk that this change in providing equipment and logistics to deployed forces thousands of miles away in potential combat zones?

Answer. Commercial providers help mitigate risk of access to challenging theaters such as Afghanistan through their ability to leverage intermodal networks—the Northern Distribution Network (NDN), which is primarily commercial, is a good example of mitigating risk to access Afghanistan by surface means in case the Pakistan ground lines of communication (PAK GLOC) is not available.

When deploying and sustaining forces in a combat zone, where the threat level prevents commercial assets from delivering to those locations, in general, commercial providers would move requirements to enroute locations, and military assets would move those requirements into the theater of operations in order to mitigate the risk to commercial providers while leveraging their capabilities.

Question. How does TRANSCOM utilize commercial partners for logistics in a wartime environment? How do you plan to balance logistics capacity between commercial and military logistics systems?

Answer. When operating in a non-permissive (wartime) environment, USTRANSCOM has an outstanding track record of balancing commercial and organic logistics systems. In general, commercial providers move requirements to enroute locations outside of the threat environment, and military assets move those requirements into the theater. This practice has proven to be cost effective while meeting Combatant Commander needs and also ensures commercial providers assume minimal risk in transporting military cargo and personnel.

Question. The military relies on an extensive network of logistics facilities overseas to support our deployed forces. These overseas depots enable our deployed forces to remain on station longer without having to be supported directly from CONUS. These depots are in host nations, which are U.S. friends and allies.

What is the resiliency of these overseas depots, particularly in places near ongoing political instability?

Answer. USTRANSCOM does not own or operate overseas depots. However, as the Distribution Process Owner and Global Distribution Synchronizer, USTRANSCOM does collaborate closely with Geographic Combatant Commands, Military Services, Defense Logistics Agency, and other strategic partners to develop and maintain an agile, secure and resilient distribution network to support and sustain overseas depots. We constantly monitor the operational environment and respond to challenges, as appropriate, with the use of alternate distribution routes and logistics nodes to ensure the continued viability of those depots.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this Committee and other appropriate committees of the Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this Committee and other appropriate committees of the Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the Administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this Committee, or designated members of this Committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as the Commander, U. S. Transportation Command?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this Committee and its staff and other appropriate Committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted Committee, or to consult with the Committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

QUESTIONS SUBMITTED BY SENATOR KIRSTEN GILLIBRAND

KC-46A

1. SENATOR GILLIBRAND. General McDew, I recognize that U.S. Transportation Command (TRANSCOM) and Air Mobility Command (AMC) will be making decisions regarding how to meet refueling needs in light of the U.S. Air Force's planned retirement of the KC-10, and potential delays in the KC-46A procurement schedule. Do you anticipate reassignment and continued use of any KC-135 displaced by KC-46A delivery will be necessary to meet refueling demands?

GENERAL MCDEW. The United States Air Force (USAF) will re-address the KC-135 retirement flow in combination with a potential KC-10 retirement flow in a future Program Objective Memoranda (POM) cycle. Although overall air refueling capability includes some risk, I am confident that the KC-46 development and delivery schedule along with disposition of the KC-135 fleet will continue to meet all USTRANSCOM mission requirements.

2. SENATOR GILLIBRAND. General McDew, in assessing current and future refueling demands and the possible need for KC-135 capabilities, can you please address these three requirements: Regional Air Refueling Receiver Demand requirements within CONUS; support of the Air Bridge to Europe; and support of the overall “pivot” to the Pacific theater and Asia?

GENERAL MCDEW. Our aerial refueling capabilities are not solely dedicated to specific regions or missions sets; however, they are managed holistically in an effort to respond expeditiously and effectively to support all Combatant Command requirements. These requirements include CONUS Refueling Receiver Demand and support to deployment bridges to both Europe (eastbound) and Asia (westbound). The FY 2016 President’s Budget includes an end-state fleet of 479 tanker aircraft to meet air mobility operational requirements with moderate risk. The development and delivery of the KC-46 combined with the capabilities of the existing tanker fleet will reduce risk in aerial refueling capability and ensure the ability to meet all worldwide commitments.

ARCTIC

3. SENATOR GILLIBRAND. General McDew, as you know, the Arctic is emerging as a strategic region of the world for vessel commerce as well as the production of oil, gas, and minerals. TRANSCOM is tasked with the coordination of people and transportation assets to allow the United States to project and sustain forces, whenever, wherever, and for as long as they are needed. How important is the Arctic to U.S. national security interests and what role do you think TRANSCOM will play in future Arctic operations?

GENERAL MCDEW. The United States is an Arctic Nation with permanent, vital national security interests in the Arctic Region. USTRANSCOM will play an increasingly important role in the Arctic Region as commercial sealift vessels, scientific operations, and national defense assets transit the Arctic Region. To the extent military cargo workload permits, USTRANSCOM supports U.S. security and economic interests in the Arctic and other navigable areas around the globe to assure freedom of navigation in support of United States interests.

4. SENATOR GILLIBRAND. General McDew, do you believe we currently have the resources and capabilities needed to ensure the nation’s military presence in the Arctic?

GENERAL MCDEW. USTRANSCOM has sufficient resources to support the current military presence and similar levels of effort for future contingencies in the Arctic. As demands change, we will continue to engage with United States Northern Command, European Command and Pacific Command to ensure we have adequate resources to meet those requirements.

5. SENATOR GILLIBRAND. General McDew, I am concerned that the U.S. Coast Guard now only has one operational heavy icebreaker in its fleet. Russia currently has six heavy icebreakers and another currently under construction. Do you have any concerns about TRANSCOM’s ability to project and sustain forces in the Arctic based on the current composition of the U.S. Coast Guard’s icebreakers?

GENERAL MCDEW. The United States has enduring national, strategic, and economic interests in the Arctic. United States Northern Command establishes requirements for USTRANSCOM’s transportation and distribution capabilities in the Arctic. Although current icebreaker resources meet projected near-term requirements, USTRANSCOM supports DOD and DoT efforts to ensure future access and freedom of navigation throughout the Arctic region.

6. SENATOR GILLIBRAND. General McDew, New York’s 109th Airlift Wing is home to the only LC-130 Ski Birds in the U.S. Air Force. Their unique ability to provide air lift on snow and ice has made them a valuable resource for the National Science Foundation supporting science missions in Greenland and Antarctica. Based on the current types of threats you see in the Arctic, how important is this type of air lift capability to the future success of TRANSCOM in Arctic?

GENERAL MCDEW. The ski-equipped LC-130s from the 109th Airlift Wing in Schenectady, NY, does indeed provide our Nation a very unique capability. Their ability to operate on the snow and ice makes them one of only a few organizations in the world capable of airlifting assets in and out of the Arctic. The capabilities provided by the 109th Airlift Wing will continue to be of value to the USTRANSCOM mission.

7. SENATOR GILLIBRAND. General McDew, do you think we will need more of this capability in the future as our Arctic presence increases?

GENERAL MCDEW. Based on current requirements in the Arctic, I have no reason to believe USTRANSCOM needs more of this capability at this time. Should USTRANSCOM be called upon in the future to provide an increased level of support

in the Polar Regions, I would advocate for the resources needed to ensure we provide the appropriate level of support.

[The nomination reference of General Darren W. McDew, USAF, follows:]

NOMINATION REFERENCE AND REPORT

AS IN EXECUTIVE SESSION,
SENATE OF THE UNITED STATES,
June 4, 2015.

Ordered, That the following nomination be referred to the Committee on Armed Services:

The following named officer for appointment in the United States Air Force to the grade indicated while assigned to a position of importance and responsibility under title 10, U.S.C., section 601:

To Be General

General Darren W. McDew, 0000

[The biographical sketch of General Darren W. McDew, USAF, which was transmitted to the committee at the time the nomination was referred, follows:]

BIOGRAPHICAL SKETCH OF GENERAL DARREN W. MCDREW, USAF

General Darren W. McDew is Commander, Air Mobility Command, Scott Air Force Base, Illinois. Air Mobility Command's mission is to provide rapid, global mobility and sustainment for America's armed forces. The command also plays a crucial role in providing humanitarian support at home and around the world. The men and women of AMC active duty, Air National Guard, Air Force Reserve and civilians—provide airlift, aerial refueling, special air mission and aeromedical evacuation.

General McDew was commissioned in 1982 following his graduation from Virginia Military Institute. He began his flying career at Loring Air Force Base, Maine. His staff assignments include serving as a member of the Air Force Chief of Staff Operations Group, Air Force aide to the President, and Chief of the U.S. Air Force Senate Liaison Division, Washington, D.C. and the Director of Public Affairs, Office of the Secretary of the Air Force, Washington, D.C. As part of the Joint Staff at the Pentagon, General McDew also served as Vice Director for Strategic Plans and Policy. He has served as the Vice Commander of the 18th Air Force, Scott AFB, Illinois, and has commanded at the squadron, group and wing levels as well as an Air Force direct reporting unit. He has deployed in support of ongoing operations in Central and Southwest Asia as an air expeditionary group commander and later as the Director of Mobility Forces. Prior to his current assignment, General McDew was the Commander of the 18th Air Force, Scott AFB, Illinois.

Education

1982 - Bachelor of Science degree in civil engineering, Virginia Military Institute, Lexington 1985 Squadron Officer School, Maxwell AFB, AL.

1994 - Master of Science degree in aviation management, Embry-Riddle Aeronautical University 1995 Air Command and Staff College, by correspondence

2000 - Secretary of Defense Corporate Fellowship, Sun Microsystems Inc., Palo Alto, Calif.

2003 - National Security Studies, Maxwell School of Citizenship and Public Affairs, Syracuse University, NY.

2005 - Leadership Development Program, Center for Creative Leadership, Greensboro, N.C.

2008 - Senior Joint Information Operations Applications Course, Air University, Maxwell AFB, AL.

2008 - Air Force Enterprise Leadership Seminar, University of North Carolina at Chapel Hill, NC.

2011 - Department of Defense National Security Studies Program, Defense Policy Seminar, Elliott School of International Affairs, Washington, DC.

2012 - Joint Task Force Commander Training Course, Colorado Springs, CO.

2013 - Pinnacle Course, Bolling AFB, Washington, DC.

2013 - Joint Force Air Component Commander Course, Air University, Maxwell AFB, AL.

2014 - Leadership at the Peak Course, Colorado Springs, CO.

2014 - Cyberspace Operations Executive Course, Air University, Maxwell AFB, AL.

Assignments

1. October 1982–October 1983, Student, undergraduate pilot training, Williams AFB, AZ.

2. March 1984–June 1989, Standardization and Evaluation Copilot, Aircraft Commander, Instructor Pilot and Flight commander, 42nd Air Refueling Squadron, Loring AFB, ME.

3. July 1989–June 1992, Combat Crew Training School examiner and Instructor Pilot, Assistant Deputy Wing Inspector and Wing Executive Officer, 93rd Bomb Wing, Castle AFB, CA.

4. July 1992–April 1994, Rated Force Planner, Directorate of Personnel Plans; member, Air Force Chief of Staff Operations Group, Headquarters U.S. Air Force, Washington, DC.

5. April 1994–June 1996, Air Force aide to the President, White House, Washington, DC.

6. October 1996–June 1997, Assistant Operations Officer, 14th Airlift Squadron, Charleston AFB, SC.

7. June 1997–June 1999, Commander, 14th Airlift Squadron, Charleston AFB, SC.

8. August 1999–July 2000, Secretary of Defense Corporate Fellow, Sun Microsystems Inc., Palo Alto, CA.

9. July 2000–January 2002, Commander, 62nd Operations Group, McChord AFB, WA (September 2001–December 2001, Commander, 60th Air Expeditionary Group, Southwest Asia).

10. January 2002–July 2003, Commander, 375th Airlift Wing, and Installation Commander, Scott AFB, IL.

11. July 2003–January 2005, Chief, U.S. Air Force Senate Liaison Division, Secretary of the Air Force, Washington, DC.

12. January 2005–July 2006, Commander, 43rd Airlift Wing, and Installation Commander, Pope AFB, NC. (January 2006–May 2006, Director of Mobility Forces, Southwest Asia).

13. July 2006–November 2007, Vice Commander, 18th Air Force, Scott AFB, IL.

14. November 2007–February 2009, Director of Public Affairs, Office of the Secretary of the Air Force, the Pentagon, Washington, DC.

15. February 2009–December 2010, Vice Director for Strategic Plans and Policy, Joint Staff, the Pentagon, Washington, DC.

16. December 2010–August 2012, Commander, Air Force District of Washington, Andrews AFB, MD.

17. August 2012–April 2014, Commander, 18th Air Force, Scott AFB, IL.

18. May 2014–present, Commander, Air Mobility Command, Scott AFB, IL.

Summary of Joint Assignments

1. April 1994–June 1996, Air Force aide to the President, White House, Washington, DC, as a major.

2. February 2009–December 2010, Vice Director for Strategic Plans and Policy, Joint Staff, the Pentagon, Washington, DC, as a major general.

Flight Information

Rating: command pilot.

Flight hours: more than 3,300.

Aircraft flown: T-37B, T-38A, KC-135A/R, C-17A, C-141B, C-9, C-21, C-130E/H, and UH-1 N.

Major Awards and Decorations

Distinguished Service Medal.

Defense Superior Service Medal with oak leaf cluster.

Legion of Merit with two oak leaf clusters.

Meritorious Service Medal with four oak leaf clusters.

Army Commendation Medal.

Air Force Achievement Medal.

Joint Meritorious Unit Award with oak leaf cluster.

Air Force Outstanding Unit Award with nine oak leaf clusters.

Air Force Organizational Excellence Award with three oak leaf clusters

Combat Readiness Medal with three oak leaf clusters.

National Defense Service Medal with bronze star.
 Armed Forces Expeditionary Medal.
 Kosovo Campaign Medal with bronze star.
 Global War on Terrorism Expeditionary Medal.
 Global War on Terrorism Service Medal.
 Armed Forces Service Medal.

Effective Dates of Promotion

Second Lieutenant May 15, 1982.
 First Lieutenant May 15, 1984.
 Captain July 13, 1986.
 Major March 1, 1994.
 Lieutenant Colonel Jan. 1, 1997 Colonel April, 2000.
 Brigadier General Sept. 2, 2006.
 Major General Dec. 9, 2008.
 Lieutenant General Aug. 6, 2012 General May 5, 2014.
 (Current as of November 2014).

[The Committee on Armed Services requires certain senior military officers nominated by the President to positions requiring the advice and consent of the Senate to complete a form that details the biographical, financial, and other information of the nominee. The form executed by General Darren W. McDew, USAF in connection with his nomination follows:]

UNITED STATES SENATE
 COMMITTEE ON ARMED SERVICES
 ROOM SR-228
 WASHINGTON, DC 20510-6050
 (202) 224-3871

COMMITTEE ON ARMED SERVICES FORM
 BIOGRAPHICAL AND FINANCIAL INFORMATION REQUESTED OF
 NOMINEES

INSTRUCTIONS TO THE NOMINEE: Complete all requested information. If more space is needed, use an additional sheet and cite the part of the form and the question number (i.e. A-9, B-4) to which the continuation of your answer applies.

PART A—BIOGRAPHICAL INFORMATION

INSTRUCTIONS TO THE NOMINEE: Biographical information furnished in this part of the form will be made available in Committee offices for public inspection prior to the hearing and will also be published in any hearing record as well as made available to the public.

1. **Name:** (Include any former names used.)
Darren W. McDew.
2. **Position to which nominated:**
Commander, United States Transportation Command.
3. **Date of nomination:**
4 June 2015.
4. **Address:** (List current place of residence and office addresses.)
[Nominee responded and the information is contained in the committee's executive files.]
5. **Date and place of birth:**
29 September 1960; Rantoul, IL.
6. **Marital status:** (Include maiden name of wife or husband's name.)
Evelyn K. McDew (maiden name: Massenburg).
7. **Names and ages of children:**

[Nominee responded and the information is contained in the committee's executive files.]

8. **Government experience:** List any advisory, consultative, honorary or other part-time service or positions with Federal, State, or local governments, other than those listed in the service record extract provided to the committee by the executive branch.

N/A.

9. **Business relationships:** List all positions currently held as an officer, director, trustee, partner, proprietor, agent, representative, or consultant of any corporation, firm, partnership, or other business enterprise, educational or other institution.

N/A.

10. **Memberships:** List all memberships and offices currently held in professional, fraternal, scholarly, civic, business, charitable and other organizations.

Life Member, Air Force Association.

Life Member, Daedalians.

Air Force Sergeants Association.

American Association of Retired Persons.

National Society of Black Engineers.

11. **Honors and Awards:** List all scholarships, fellowships, honorary society memberships, and any other special recognitions for outstanding service or achievements other than those listed on the service record extract provided to the committee by the executive branch.

Boys and Girls Club Hall of Fame.

National Society of Black Engineers Lifetime Achievement Award.

12. **Commitment to testify before Senate committees:** Do you agree, if confirmed, to appear and testify upon request before any duly constituted committee of the Senate?

Yes.

13. **Personal views:** Do you agree, when asked before any duly constituted committee of the Congress, to give your personal views, even if those views differ from the Administration in power?

Yes.

[The nominee responded to Parts B–E of the committee questionnaire. The text of the questionnaire is set forth in the Appendix to this volume. The nominee's answers to Parts B–E are contained in the committee's executive files.]

SIGNATURE AND DATE

I hereby state that I have read and signed the foregoing Statement on Biographical and Financial Information and that the information provided therein is, to the best of my knowledge, current, accurate, and complete.

GENERAL DARREN W. McDEW

This 7th day of May, 2015

[The nomination of General Darren W. McDew, USAF was reported to the Senate by Chairman McCain on July 23, 2015, with the recommendation that the nomination be confirmed. The nomination was confirmed by the Senate on July 27, 2015.]

**NOMINATION OF GENERAL MARK A. MILLEY,
USA, TO BE CHIEF OF STAFF OF THE ARMY**

TUESDAY, JULY 21, 2015

U.S. SENATE,
COMMITTEE ON ARMED SERVICES,
Washington, DC.

The committee met, pursuant to notice, at 9:31 a.m. in room SH-216, Hart Senate Office Building, Senator John McCain (chairman) presiding.

Committee members present: Senators McCain, Inhofe, Wicker, Ayotte, Fischer, Rounds, Ernst, Tillis, Sullivan, Lee, Reed, McCaskill, Manchin, Gillibrand, Donnelly, Hirono, and King.

OPENING STATEMENT OF SENATOR JOHN MCCAIN, CHAIRMAN

Chairman MCCAIN. Good morning.

The Senate Armed Services Committee meets this morning to consider the nomination of General Mark Milley to be the Chief of Staff of the U.S. Army.

We welcome you, General Milley, as well as members of the Milley family. As is our tradition, at the beginning of your testimony, we invite you to introduce the members of your family who are joining you. We know the sacrifices your family has made, and we are grateful to them for their continued support of our Nation.

General MILLEY. Thank you, Chairman McCain, and thank you, Ranking Member Reed, and distinguished members of the Senate Armed Services Committee for the privilege and opportunity to appear before you today.

I also appreciate the confidence of the President of the United States.

Chairman MCCAIN. General, I was going to—

General MILLEY. Oh, I am sorry, sir.

Chairman MCCAIN.—ask if you would like to introduce your family. First, Senator Reed and I have to emote for a while.

General MILLEY. In that case, I shall introduce my family.

[Laughter.]

My wife is here, Hollyanne, off to my left over here sitting next to General Richardson, and my son and daughter are not here. They are both working. My son Peter is down in Texas working in the oil industry, and my daughter is also working in the oil industry and she is based out of Chicago. I am very, very fortunate to have Hollyanne by my side for the last 30 consecutive years of service.

Chairman MCCAIN. Well, thank you, General, and thank you.

You come before this committee as part of a major transition of American military leadership. If confirmed as Army Chief of Staff, you will serve alongside a new Chairman and Vice Chairman of the Joint Chiefs of Staff and new Service Chiefs for the Navy and Marine Corps.

As part of this team, you will lead an Army of volunteer soldiers that has proven itself time and again over a decade of war in Afghanistan and Iraq. The Army has endured 70 percent of the casualties in those wars, and as we all know, the untold sacrifices of our soldiers and their families did not end with their mission.

As our Nation confronts the most diverse and complex array of global crises since the end of World War II, the next Chief of Staff of the Army will be responsible for ensuring the total Army—Active, Guard, and Reserve—remains the most decisive land force in the world. Unless Washington wakes up to the damage being done to our military right now by drastic reductions in defense spending, the Army will be forced to carry out its mission with fewer dollars, fewer soldiers, and aging equipment.

Over the past few years, the Army's end strength has been reduced from a peak of 570,000 Active Duty personnel to 490,000 troops this year. Just last week, the Army announced it would cut an additional 40,000 troops over the next 2 years, reducing its end strength down to 450,000. If defense spending cuts continue, there is even talk that the Army could shrink to 420,000 troops. What is worse, only one-third of the Army's brigade combat teams are ready for deployment and decisive operations. In short, the Army is facing a downward spiral of military capacity and readiness that increases the risk that, in a crisis, we will have too few soldiers who could enter a fight without proper training or equipment.

We are not cutting the Army because the world has become safer or threats to our security have been reduced. In fact, the opposite is true. As you have stated, General Milley, this is a budget-driven force level reduction, and it rested on a series of assumptions, that we were getting out of Iraq and Afghanistan and stepping back from the Middle East more broadly, that Europe was secure, and United States forces could depart the continent, and that there was no need for significant deployments to Africa. Instead, we have seen the rise of ISIL [the Islamic State of Iraq and the Levant], Russia's invasion of Ukraine, the outbreak of Ebola, and the growing tensions in the Asia-Pacific region.

I think you would agree, General, that when our assumptions about the world change, we must either adapt our conclusions to the new realities or scale back our ambitions to meet our reduced means. Instead, the administration and many in the Congress are trying to have it both ways: asking our soldiers to take on a growing set of missions with fewer and fewer resources. This is not just about reversing the effects of sequestration. It is about replacing the arbitrary spending cuts on defense that were imposed under the Budget Control Act of 2011. That is the only way we will get back to a truly strategy-driven defense budget.

While I believe there is no strategic rationale for the Army's end strength to fall below its pre-September 11 level of 490,000 troops, in recent years, the Army's headquarters and administrative staff have grown at the same time it has cut brigade combat teams.

That too is wrong, and it only hurts the Army's credibility. This committee is embarking on a multiyear effort to make major reductions in headquarters and administration across the Department of Defense. If confirmed, General, I want you to be a relentless partner in this effort.

Another priority for the next Army Chief of Staff is modernizing the force. The Army faces an enormous challenge in replacing, repairing, and reconditioning its equipment after 14 years of sustained combat. At the same time, the Army must continue to modernize to meet future threats. Programs like the Joint Light Tactical Vehicle and Armored Multi-Purpose Vehicle aim to enhance tactical mobility, command and control, medical evacuation, and other critical combat functions while significantly improving the protection and safety of our soldiers.

Accomplishing these goals will require additional resources, to be sure. Perhaps more importantly, it requires the Army to learn the lessons of its failed acquisition programs, a record that has been particularly dismal. From Comanche to Crusader, Future Combat System to the Ground Combat Vehicle, billions of dollars have been wasted on programs that never became operational. These and other failures also reflect the inefficiency and dysfunction that have crippled our defense acquisition system more broadly: unwarranted optimism of cost and schedule estimates, funding instability, requirements creep, immature technology, excessive risk-taking, and concurrency between testing and production.

There are diverse views on acquisition reform, but one thing is for sure: the *status quo* is unacceptable. To provide our soldiers the equipment they need to defend the Nation, we simply cannot continue to have blurred lines of accountability and evasions of responsibility inside the defense acquisition system. That is why in this year's National Defense Authorization Act, this committee adopted reforms to increase the role of the Military Services in the acquisition process and to create new mechanisms to ensure accountability for results. Among these reforms is an enhanced role for the Service Chiefs. The Army must ensure that its acquisition programs stay on schedule, within cost, and perform to expectations. If that does not happen, General, we will be calling you.

General, thank you again for appearing before this committee today, and we look forward to your testimony.

Senator Reed?

STATEMENT OF SENATOR JACK REED

Senator REED. Thank you very much, Mr. Chairman. I want to join you in welcoming General Milley this morning. I would like to thank him for his many years of service to our Nation and to the Army and for his willingness to continue to serve. General Milley is joined this morning by his wife Hollyanne. Thank you, ma'am, for your service to the Nation and to the Army. I also wanted to acknowledge Mary and Peter and wish them well.

General Milley, if confirmed, you will oversee the Army during a time when the United States faces a multitude of challenges abroad. While the conflict areas around the world continue to increase, the amount of resources devoted to the Army continue to decrease. Earlier this month, it was announced that over the next

2 years, the Army would convert two infantry brigade combat teams to battalion task forces. These changes were necessary in order for the Army to continue to reduce its end strength, with a final goal of 450,000 soldiers by the end of fiscal year 2017. In addition to these reductions, the Army also intends to cut approximately 17,000 civilian personnel, although it is my understanding that the Army has not identified which installations will be impacted by these reductions.

If sequestration funding levels remain in place, the situation becomes much more ominous for the Army. Without any relief from the budget caps, the Army will need to reduce its end strength further to a level of 420,000 soldiers in the coming years. General, I hope you will share with us your views today on how to manage these reductions, if in fact they are called for, and what, if any, impact these reductions would have on the readiness of the Army.

In addition to managing end strength reductions, the Army is grappling with how to modernize the force and increase readiness levels. In recent years, the Army has had to make tough choices on its major modernization programs. As the Army Equipment Modernization Strategy, released in March 2015, acknowledges, "The Army cannot afford to equip and sustain the Total Army with the most modern equipment; therefore, we must acknowledge fiscal realities and we will selectively modernize equipment and formations."

At the same time, the Army continues to cope with reduced readiness levels. General Odierno, the current Chief of Staff of the Army, testified before the Senate Appropriations Subcommittee on Defense in March of this year that readiness levels are at historically low levels. Specifically he stated that "today, only 33 percent of our brigades are ready, when our sustained readiness rate should be closer to 70 percent."

General Milley, I look forward to hearing your thoughts on how the Army can make targeted investments in modernization while also restoring readiness levels.

The National Guard, has always been an integral component to our Nation's defense. In fact, today they are probably more integral than at any time in our history. They serve as the first line of defense when there is a natural disaster at home, and they perform a vital homeland security mission. Without question, the role of the National Guard and Reserve component played in both Afghanistan and Iraq was critical to our success on the ground.

However, as the Army draws down and resources become more limited, there has been tension between the Active and Reserve components, the most notable example being the Army restructuring initiative. To ensure that the Army does not make any irrevocable force structure changes, last year, Congress created the National Commission on the Future of the Army to undertake a comprehensive review of the size and force structure of the Army. The commission has been working diligently meeting with stakeholders, performing site visits, and conducting hearings in order to provide their report to Congress by February 1, 2016.

General Milley, if confirmed, you will be working with General Grass, Chief of the Army National Guard Bureau, and I look forward to hearing from you on how you envision the relationship be-

tween the Active Army and the National Guard and Reserve components and what, if anything, can be done to strengthen that relationship.

Finally, I have repeatedly stated that sequestration is a senseless approach to addressing our Nation's fiscal challenges and it undermines our national security and our military readiness. Defense budgets should be based on a long-term military strategy, not sequestration-level budget caps. The chairman has made this point eloquently and consistently. I hope you will share your thoughts on this topic with the committee today.

Again, General, thank you for your service.

Chairman MCCAIN. General, there are standard questions that are asked of all military nominees, and I would like to proceed with those before your opening statement.

The questions are as follows.

In order to exercise its legislative and oversight responsibilities, it is important that this committee and other appropriate committees of the Congress are able to receive testimony, briefings, and other communications of information. Have you adhered to applicable laws and regulations governing conflicts of interest?

General MILLEY. I have, Mr. Chairman.

Chairman MCCAIN. Do you agree, when asked, to give your personal views, even if those views differ from the administration in power?

General MILLEY. I do, Mr. Chairman.

Chairman MCCAIN. Have you assumed any duties or undertaken any actions which would appear to presume the outcome of the confirmation process?

General MILLEY. I have not, Mr. Chairman.

Chairman MCCAIN. Will you ensure your staff complies with deadlines established for requested communications, including questions for the record in hearings?

General MILLEY. I will, Mr. Chairman.

Chairman MCCAIN. Will you cooperate in providing witnesses and briefers in response to congressional requests?

General MILLEY. Yes, Mr. Chairman.

Chairman MCCAIN. Will those witnesses be protected from reprisal for their testimony or briefings?

General MILLEY. Yes, they will, Mr. Chairman.

Chairman MCCAIN. Do you agree, if confirmed, to appear and testify, upon request, before this committee?

General MILLEY. I do, Mr. Chairman.

Chairman MCCAIN. Do you agree to provide documents, including copies of electronic forms of communications, in a timely manner when requested by a duly constituted committee or consult with the committee regarding the basis for any good faith delay or denial in providing such documents?

General MILLEY. I do, Mr. Chairman.

Chairman MCCAIN. Thank you. Welcome and please proceed.

STATEMENT OF GEN MARK A. MILLEY, USA, TO BE CHIEF OF STAFF OF THE ARMY

General MILLEY. Thanks, Chairman McCain and Ranking Member Reed and distinguished members of the Senate Armed Services

Committee for the privilege and opportunity to appear before you today. I appreciate the confidence the President of the United States and the Secretary of Defense have shown by nominating me to be the next Chief of Staff of the U.S. Army.

Thank you all for your continued and unwavering support and commitment to the soldiers and civilians and families of what is your Army. As your Army is the strength of our Nation, our soldiers are the strength of our Army, and all of their families are the strength of our soldiers.

Likewise, my family has been my strength throughout my life. Both my mother and father served our Nation in World War II as part of the greatest generation, with my mother attending the medical needs of soldiers, sailors, airmen, and marines from the Pacific at a military hospital near Seattle, WA, while my father served with the 4th Marine Division in the Central Pacific, making the assault landings on Kwajalein, Saipan, Tinian, and the bloody battle of Iwo Jima as a young 19- and 20-year-old.

Sadly, my mother passed over 20 years ago and my father passed just last April, a week shy of his 91st birthday. I am absolutely sure that they are both very proud from above of their soldier son and will always be a source of leadership and guidance for me in the years ahead.

I am also unbelievably lucky to have by my side, as I previously introduced, for the last 30 consecutive years of my service the most dedicated and strongest woman in the world, my wife Hollyanne. She, like my parents, is a constant source of inspiration and love. For many years, during seven contingency deployments on various operations and thousands of days of training, Hollyanne has essentially been like so many Army spouses, a single parent, who has raised two wonderful children who are now young adults, our daughter, Mary Margaret, and our son Peter, who unfortunately could not be with us today. It is for them and for all of our children and the future generations that I and all of us in uniform continue to serve and are willing to go into harm's way to give our todays for their tomorrows.

I would like to just take a moment to recognize Hollyanne as a representative of all the Army families, of all the Army spouses, and for their incredible resilience, service and sacrifice.

I would also like to congratulate my predecessor, General Ray Odierno, and his wife Linda, who have given over 39 consecutive years of distinguished service to our great Nation. I want to personally thank them both for their tremendous leadership as our Chief of Staff and leading spouse. Our Nation has been well served by this selfless soldier and his entire family.

Chairman, Senators, service in the U.S. Army is a privilege. It is a distinct privilege. It is not a right. It is a privilege and it is earned the old-fashioned way, through hard work and meeting exacting standards of discipline and excellence.

Your Army's contract with the American people is a combat-ready force built around our Nation's most valuable asset, our sons and daughters who become soldiers of character and the best trained and best equipped Army in the world. Our fundamental task is like no other. It is to win and to win in the unforgiving crucible of ground combat. There are many other tasks and roles and

missions that your Army can do as part of our joint force, and we perform those every day in support of our Nation's interest. We assure allies. We deter adversaries. We shape outcomes and build partner capacity and provide foundational capabilities to enable other joint forces in a variety of ways. We have provided needed help to victims of disaster.

Our reason for being, our very reason for being at the very core of what it means to have an Army, it is to win and to win decisively in ground combat against the enemies of our country so that American citizens can enjoy life, liberty, and the pursuit of happiness. Every year, 120,000 of America's sons and daughters raise their right hand to take an oath of allegiance to serve our Nation in the uniform of your U.S. Army. In return, we make the commitment to develop them as soldiers, as leaders, and importantly as citizens. These soldiers are the core of our All-Volunteer Army, made up of three components: the Active, the National Guard, and the Reserve. We are a total Army. We are in fact one Army. We are America's Army. All of us from private to general come from the people, and we are dedicated to give our life and our limb to serve the people. We do it with great pride and a cause that transcends ourselves.

I have huge confidence in our Army today. I have served in it in both peace and war. Right now, we have the most skilled and combat-experienced Army in the Nation's history. In this time of increasing instability, of increasing uncertainty throughout the globe, we must squarely face and solve significant challenges as, Chairman, you mentioned, in manpower, readiness, and modernization.

If confirmed as the Chief of Staff of the U.S. Army, I look forward to working with this committee to get the Army the resources it needs. I also pledge to be a careful steward on behalf of the American taxpayer whom we recognize we all serve as well.

Finally, if confirmed as Chief of Staff, I want to ensure that the Army meets the expectations of the American people. The American people have expected your Army to fight and win our Nation's wars at any time, any place, and your soldiers are ready to do that today, as we have done for 240 consecutive years.

Today we have a great Army and we stand on the shoulders of those who came before us. It would be a tremendous honor to lead our soldiers of today as their Chief of Staff. I thank each of you, without whom we would not even have an Army.

I thank you for the opportunity to appear here today, and I look forward to your questions.

Chairman MCCAIN. Thank you, General. Thank you for your strong statement.

As you know, last week there were four unarmed marines and one sailor in Chattanooga, TN, who were murdered. What steps do you believe should be put in place immediately to improve the security of Army personnel in the United States, especially at facilities like recruiting stations?

General MILLEY. Senator, first as a son of someone who served in the 4th Marine Division, I want to publicly extend my condolences to the families of the four marines and one sailor who were killed. It is a horrible tragedy.

Force protection is a key task for any commander, as it is for all of the leaders in the Army and throughout the military. Specifically, there is a wide variety of both active and passive measures. As you may know, Admiral Gortney, Commander of NORTHCOM [U.S. Northern Command], issued out some increased force protection measures, which I will not discuss publicly exactly what those are.

From my view, there is a variety of both active and passive. From the passive standpoint, there is a variety of hardening things we can do, bulletproof glass, *et cetera*. Actively we can increase patrols, work closely with the law enforcement.

As far as arming recruiters go, I think that is complicated legally, and there are issues involved throughout the country, but we will have to come to grips with that, and it certainly should be—

Chairman MCCAIN. The legal part of it can be resolved. Do you think that they should, under certain conditions, be armed?

General MILLEY. I think under conditions, both on military bases and in out-stations, recruiting stations, Reserve centers, that we should seriously consider it. In some cases, I think it is appropriate.

Chairman MCCAIN. As regards Afghanistan, should we withdraw according to a preordained calendar-based plan or a condition-based plan?

General MILLEY. I am in favor of a conditions-based plan.

Chairman MCCAIN. Which right now would you say that the situation would warrant evaluation and revision of the President's plan by 2017 to have an embassy-based force?

General MILLEY. Right now, I think talking with John Campbell, General Campbell, the Commander of the force in Afghanistan, it is my understanding that the plan is continually under review and that we will execute based on conditions on the ground.

Chairman MCCAIN. That is your view.

General Dunford has testified before this committee that even with the \$38 billion addition, that our Nation's military, "would remain at the lower ragged edge of manageable risk in our ability to execute the defense strategy." Do you agree with that?

General MILLEY. I do with respect to the Army as we look out, and I concur with General Odierno's assessment.

Chairman MCCAIN. That we would be at the lower ragged edge?

General MILLEY. I would probably agree with that, yes, Senator. Then I think he testified to significant risk, and if we go to 420,000, as Senator Reed mentioned earlier, we would be shifting into high risk.

Chairman MCCAIN. Do you believe that we should arm the Ukrainians with counter-battery systems with which to defend themselves from Russian artillery and rocket strikes?

General MILLEY. Senator, I think providing nonlethal equipment is already being done, and I think lethal equipment—

Chairman MCCAIN. I am asking about lethal equipment.

General MILLEY. Yes. Lethal equipment I think is something we should consider, and I would be in favor of lethal defensive equipment.

Chairman MCCAIN. In your view, do we have a strategy to defeat ISIS [the Islamic State of Iraq and Syria]?

General MILLEY. Senator, there is a strategy. I think you are familiar with the nine lines of effort. The military has two. Currently there is a strategy.

Chairman MCCAIN. That strategy also applies to Syria?

General MILLEY. Syria is part of the overall strategy with respect to ISIS, as I understand it.

Chairman MCCAIN. You believe that we do have a strategy to defeat ISIS.

General MILLEY. I think there is a strategy, yes.

Chairman MCCAIN. Do you think it will defeat ISIS?

General MILLEY. Right now, the way the strategy is laid out, as I understand it, is that it is going to take a considerable amount of time, measured in years, to defeat ISIS if we execute the strategy as it is currently designed.

Chairman MCCAIN. Maybe you could tell me a little bit about that strategy because the President said they have not developed it yet.

General MILLEY. As I understand it, there are nine lines of effort. The two that concern the military are providing a variety of enabler capabilities to the Iraqi military and also to provide security force assistance and building partner capacity with the Iraqi military.

Chairman MCCAIN. In your experience, do you believe that we need forward air controllers?

General MILLEY. In my experience, having forward air controllers forward with units provides more effective close air support.

Chairman MCCAIN. Well, I thank you, General, and thank you for your service. We look forward to moving forward with your nomination. Congratulations, and all of us would also agree that your predecessor is also an outstanding soldier. I thank you.

General MILLEY. Thank you, Chairman.

Senator REED. Well, thank you very much, Mr. Chairman.

Again, thank you, General Miley—Milley, for your testimony. I get confused because up our way it is usually “Miley.” I do not know what happened.

General MILLEY. That is in Rhode Island, Senator.

Senator REED. I know. You are from Massachusetts, I know.

[Laughter.]

Forgive me if I mispronounce things.

General MILLEY. As long as we both like the Red Sox, we are good, sir.

Senator REED. We like the Red Sox and the Bruins. Well, I will stop right there and ask a service question, General.

You are facing force reductions, 450,000 Active Forces, which leads to the question of how do you ensure that you can meet all the requirements that are facing the Army. Several possibilities that you can comment on—is a much smoother closer integration with National Guard and Reserve Forces so they can come into the fight earlier. That is one. Two, obviously, continuing to operate jointly and train jointly with the Marine Corps, which is a way to augment land forces. Three, to continue or to increase, in fact, joint operations with foreign militaries that are our allies. Could you comment on those approaches? Will that in any way help sort of offset the decline in manpower?

General MILLEY. Well, first, Senator, I think that the reduction in manpower down to 450,000 for the Active Force, 920,000 or 980,000 overall for the total force—and I agree with the current Chief of Staff's assessment that places the Nation at significant risk, given our global commitments. In order to mitigate that risk, incorporating elements of the National Guard and Reserve component are key, and then working with allies is fundamental. I think all of those are necessary to mitigate some of the risk.

Senator REED. Specifically with respect to the National Guard, what is your approach? You know, we speak of one Army, and frankly, looking back 30 or more years, it is now much more one Army than it was previously. What are you going to do to make sure that is more than rhetoric, that there really is one consistent Army—National Guard and Reserve, Active Force?

General MILLEY. We are already doing many things. As the Commander of Forces Command, I have got training readiness, oversight for the Guard and actual command of the Reserves. There are many things we are doing right now. We integrate at both of our combat training centers down at Fort Polk, LA, and out in California National Training Center. We are fully integrated with Reserve component and National Guard elements. Integration of those forces is key, and we will sustain that and increase that over time.

The second big one I think is we have partnerships. All of our Active Component forces are partnered with National Guard units, and they are fully integrated for home station training and support each other.

Senator REED. One of the areas of concern—and this has been led by Senator McCain's efforts over many years—has been acquisition reform. He, frankly, indicated a long litany of major systems where the Army could not get off the drawing board literally. There are proposals today to involve the chiefs more directly not only with authority but responsibility.

Can you comment about the acquisition process and what you would like to do as Service Chief in making it more effective?

General MILLEY. Thanks, Senator.

In my view, I think the Service Chiefs should have an increased role across the entire acquisition process where we are responsible for and held accountable for linking the requirements, which we do play—the Service Chiefs play a role in that right now. We are not or the Service Chiefs are not as engaged as could be with respect to the resources and decisions of actual acquisition. Those three pieces, linking resources, the requirements, and the actual acquisition—in my view the Chiefs should have increased authority to link all three of those throughout the entire process. Not just the inputs of requirements but also the outputs of acquisition.

Senator REED. Just a final point very quickly is that we have consistently pointed out that readiness is being challenged in terms of brigades when 30 percent of our Army brigades are ready to go, and that is way below. That requires some either massive budget relief or internal reallocation of resources. If you do not get the budget relief, what kind of resources are you prepared to reallocate to get training done?

General MILLEY. Really, there are three pieces, three levers that any Chief of Staff can use. One is end strength. The other is modernization, and the other is readiness. Our obligation as an Army or any service is to ensure that we have ready forces. There is no soldier, sailor, airman, or marine who should ever go into harm's way not fully manned, equipped, well let, *et cetera*. No one should ever go in harm's way unready. Readiness is the number one priority. It is my number one priority, if confirmed, and it will remain the number one priority.

That leaves only end strength and modernization. Right now, the Army has taken a lot of cuts in modernization over time, and then we have end strength. If confirmed, I am going to have to take a hard look to make sure that we balance those three components as we go forward.

Senator REED. Thank you very much.

Thank you, Mr. Chairman.

Chairman MCCAIN. Senator Fischer?

Senator FISCHER. Thank you, Mr. Chairman.

Thank you, General, for being here today.

When we met earlier this month you mentioned two of your priorities. As you just said, the first one was readiness, and you also said investing in future needs.

Do you believe that the future needs will require the Army to primarily focus on modernizing its current capabilities, or do you see a shift to new missions and new capabilities? I know there has been a lot of talk about the Army's role in coastal defense. Where do you see that headed?

General MILLEY. Thanks, Senator.

As you said, two priorities exist for any Chief of Staff really. One is maintaining readiness of the force. Second is to posture the force to be ready at some point in the future. The period of time that I would be looking at in the future, if I were confirmed, would be the 2025-2030-2035 timeframe. Right now our modernization strategy is to incrementally improve existing systems. That is okay for right now. There are a wide variety of emerging technologies that we may or may not have military application 15 to 20 years from now. We are going to take a look at those. We are going to explore all of those, ask the right questions and see which ones of those apply to ground forces. Many already apply to air and naval forces. Emerging technology is an area we are going to take hard look at, Senator.

Senator FISCHER. Do you see a shift, though, to any new missions that are going to be necessary for the Army to acquire?

General MILLEY. I think the fundamental missions that currently exist in the variety of strategic documents that are out there will remain consistent, and I do not see a fundamental shift in the mission for the Army.

Senator FISCHER. Even with the advancement of new technologies by people who are not our friends? Do you see the Army playing any role in that on new missions?

General MILLEY. The only one that is coming to mind right now is cyber. We definitely have increased our capabilities in cyber across the joint force, and the Army is building a cyber force. We

are going to continue to look at that because that is critical for the defense of the Nation and for the Army's capabilities.

Senator FISCHER. As the current Commander of the Army's Forces Command (FORCECOM), I know that you are responsible for providing Army units so you can fulfill the combatant commanders' requirements. We heard a little bit about the force reduction and the impact that that may have. Right now, are you able to fulfill the combatant commanders' requirements? Where will it be when we look at a force that is reduced to 450,000?

General MILLEY. As Commander of FORSCOM [U.S. Army Forces Command], right now we are able, Senator, to fulfill the combatant commanders' requests for forces that have come in. As we continue to draw down to 450,000 by 2017–2018, I think we are going to incur increased risk, as the current chief has mentioned, at the end of it, it will be significant risk.

We will have to see. We do not know what the future requirements are going to be. Senator McCain mentioned you got issues in eastern Europe. You got issues with ISIS. There is a wide variety of other security challenges around the world. If demand continues to increase that it has in the last year, unanticipated demand, then I think we will have to reassess our risk assessment.

Senator FISCHER. SOCOM [U.S. Special Operations Command] is one of the combatant commands that you support as well. I have been concerned that reductions across the services are going to impact the conventional force enablers that our special ops guys rely upon. How do you work with them to manage that collateral damage that reductions are going to have on their capabilities?

General MILLEY. We are very, very closely tied as you might imagine, with Special Operations Command. 80 percent of U.S. special operations comes from the Army. We are very closely tied at Fort Bragg. FORSCOM headquarters is also the headquarters for the U.S. Army Special Operations Command. We are joined at the hip.

One of the big lessons learned that has come out of the last 10 to 15 years of conflict has been the synergistic effect that we have gotten from the interdependence of both conventional and special operations. We will continue to work with them very, very closely. We have them integrated in all of our major exercises at the combat training centers. We work with them on acquisition development, and obviously, we provide a wide variety of enablers that support special operations. We will keep that linkage. That will not break.

Senator FISCHER. Thank you, sir. I appreciate your commitment to making sure that our military men and women are able to perform the missions that they are given. Thank you.

General MILLEY. Thank you, Senator.

Chairman MCCAIN. Senator Manchin?

Senator MANCHIN. Thank you, Mr. Chairman.

Thank you, General. I want to thank you for your service to our country and to your family's support of that service you have given us.

Sir, you and I have had a good conversation on quite a few things, and I will ask you the same question I have asked most of

our conferees. What do you consider the greatest threat that the United States of America faces?

General MILLEY. As a soldier—

Senator MANCHIN. The national security for our country.

General MILLEY. As a soldier, as a military officer, I would have to say that it is Russia, and let me explain that and why. Russia is the only country on Earth that retains a nuclear capability to destroy the United States. It is an existential threat to the United States. It has capability.

Intent? I do not know. The activity of Russia since 2008 has been very, very aggressive. They have attacked and invaded Georgia. They have seized the Crimea. They have attacked into the Ukraine. That is worrisome. I would put Russia right now from a military perspective as the number one threat.

I would also add China, North Korea, and ISIS, along with Iran, including the recent agreement that was signed the other day. Those countries—I would not put them in any particular order. Each in their own different way represents security threats to the United States.

Senator MANCHIN. Also, we talked about the obstacles that you are facing or that we are facing by using the National Guard to the full extent, especially the day-to-day operations. If you could expand on that. What are the obstacles that prevent the Army from using its Army National Guard to the extent that they should be, as well trained as they are today?

General MILLEY. As you know, Senator, the National Guard has been key over the last decade and a half and have served very proudly and honorably in both Afghanistan and Iraq, and they are fully integrated in a lot of our training operations here in the continental United States. It would help if we had greater access to the Guard. Right now, the Guard has state partnership programs overseas with a wide variety of countries. There is a lot of exercises in support of combatant commanders that we could use Guard Forces for. Its operations, current operations. Some are peacekeeping, peace enforcement such as Kosovo and the Sinai. Others are more active in Afghanistan and Iraq. Fundamentally access to the Guard is key.

That all links back to the budget. Right now we can only pay for bringing Guard units, mobilizing them, bringing them on under OCO [Overseas Contingency Operations] funding, and many of these operations are, in fact, exercises for the COCOMs [combatant commands] and they are not covered with OCO funding. Access and funding.

Senator MANCHIN. I am sure we look forward to working with you on making that available because I think our Guard could be used more effectively than what they are right now, other than private contractors that we are using. That would bring me right up to the auditing. What is your understanding of where the Army stands in terms of being ready for a full audit by the end of fiscal year 2017?

General MILLEY. I have been briefed that both as a FORSCOM Commander but also through the pre-confirmation hearing preparation and briefings I got from the Army staff that the Army is on track and will be ready for the full auditing in 2017.

Senator MANCHIN. If confirmed, will you make improving the Army's acquisition system a priority?

General MILLEY. Absolutely.

Senator MANCHIN. I think you would understand the concerns that we have with the procurement system that we have right now, and it does not seem to work very functionally as far as effective or cost-effective especially. Changing those systems—again, it all ties back to the auditing as quickly as that can be done.

Also, do you have any idea on the amount of contractors that we have or the Army is using—contract forces?

General MILLEY. I do not know right this minute Army-wide. I do know, for example, I recently commanded in Afghanistan and there were one and a half contractors to every soldier that was deployed over there. The amount of contractors that we use is significant. I can get you the exact number.

Senator MANCHIN. If you could, sir, I would appreciate that because I think the cost of the contractors versus using our own National Guard and Reserves—it makes more sense to use, in my estimation, people in uniform versus people that basically have been in uniform and left for the higher pay that the contractors are receiving. That is the rub I have had all along. If you could help with that, I would appreciate it.

General MILLEY. Absolutely. We will do that.

[The information referred to follows:]

According to United States Forces-Afghanistan (USFOR-A), which does not break out the numbers by Service, as of August 17, 2015, there are 10,917 United States contractors in country and another 7,016 Other Country Nationals for a total of 17,933 contractors.

Senator MANCHIN. Thank you, sir.

Chairman MCCAIN. Senator Ayotte?

Senator AYOTTE. Thank you, Mr. Chairman.

Thank you, General, and I want to thank your family for their service as well to our Nation.

I wanted to follow up. You confirmed today what General Dunford had also testified to this committee before, that Russia is our greatest national security threat. I noticed also in your advance policy questions that you stated unambiguously that the Army in Europe does not have what it needs. What does EUCOM [U.S. European Command] need that it does not have, and how important is this as we think about Russia as the most significant threat that we are facing?

General MILLEY. I think there are two parts to that. One is to assure our allies, and the other is to deter Russian aggression. I think in both cases additional ground capabilities are necessary. The Army is already moving out on that to place activity sets over there and preposition equipment to either reinforce capabilities that are there, forces that are there, or to use that equipment for a variety of exercises. There are a lot of tools in the kit bag we can use, but I do think we need to increase ground forces on a temporary rotational basis in order either to deter Russia or assure our allies.

Senator AYOTTE. Thank you.

I wanted to follow up. You, in answer to Senator Manchin, had talked about access to the Guard. One of the things that we have

seen is a program with the Air Force that is called Total Force Enterprise Active Associate Unit. In other words, it is total force. At Pease in New Hampshire, we have had an Active Duty association between Active Duty Air Force and our Guard there that has been really effective.

I wanted to ask you if that is something that you would take a look at as actually actively partnering certain units together to have these Active Duty associations because I think this model—the Air Force has had some good success with it and recognizes, as well, as you have already indicated today, we would not have been able to fight the wars in Iraq or Afghanistan without the Guard and Reserve. Being able to actually do some training and work together with certain units I think makes some sense. I wanted to get your thought on that and if that is something you would look at as a possibility.

General MILLEY. It is, Senator. In fact, I met with your TAG [Adjunct General] from New Hampshire, along with all the other TAGs east of the Mississippi, about—I guess it was—6–8 weeks ago, and they brought that up. I am going to try to take a look at that and see where it applies to the Army, if that Air Force model can apply for greater and fuller integration.

As you know, the Guard and Reserve were integrated under General Abrams when he was Chief of Staff right following Vietnam. The Abrams doctrine has served the Nation well, and we intend to fully implement that.

Senator AYOTTE. Well, certainly it is a total force needs in terms of what we need to do to defend the Nation. I appreciate your careful examination of that program which has been very successful at Pease.

I wanted to also follow up, General. How important is effective and reliable air missile defense to Army operations? Because one thing that has been brought to my attention, we have the Patriot. Thirteen of our allies also rely on the Patriot to protect their forces. Some of our allies have more modern and advanced versions of the Patriot than our troops have. I do not agree with that, and I think this committee very clearly in the defense authorization—actually the Army requested \$106 million for Patriot improvement to upgrade our use of the Patriot, and that was actually accepted by this committee.

I wanted to get your sense based on your service in the Army. What is your assessment of the Patriot air missile defense system, and do you fully support the improvement funding that the Army requested for this? How important is this to our troops?

General MILLEY. Well, Senator, let me take the last part first, how important it is. To my knowledge—I am not a military historian, but I do not think the U.S. Army has come under enemy air attack consistently since the invasion of Normandy, and that is because of two things. One, we have the most dominant Air Force, both naval aviators and the U.S. Air Force pilots and capabilities. We want to retain that forever. The other piece is because we have a very robust air defense capability that is capable of shooting down incoming aircraft.

Since the modern development of missile technology, that is another component. We have come under missile threat. We were

under missile threat in the first Gulf War and even in the second Gulf War. Patriot plays a key role in not only acquiring and then destroying incoming fixed-wing aircraft, but also in intercepting and destroying incoming missiles. Patriot is a very, very key system to the air defense of our allies and our own soldiers on the ground.

Senator AYOTTE. Thank you.

Chairman MCCAIN. Senator Hirono?

Senator HIRONO. Thank you, Mr. Chairman, and thank you, General, to you and your family for your service.

I appreciated the great conversation we had last week, and should you be confirmed, I look forward to, of course, working with you during your tenure.

I know that you realize, General, the importance of MILCON [military construction] funding for readiness, particularly for Hawaii in light of the rebalance to the Asia-Pacific. In fact, I spent some 4 hours at Schofield Barracks recently and saw the direct effect on facilities there when MILCON funding is cut or deferred. Should you be confirmed, I hope you will work with USARPAC [U.S. Army, Pacific] to ensure that their facilities are maintained and modernized where appropriate so that our troops have the facilities necessary to efficiently perform the important tasks we ask of them.

General MILLEY. I will certainly do that, Senator.

Senator HIRONO. Thank you.

I also know that you share my view that the rebalance to the Asia-Pacific is more than just rhetoric. The Navy's intentions, for example, are to place 60 percent of its ships in this area of responsibility. What do you see as the major components of our rebalance strategy?

General MILLEY. Well, I think that right now, as I mentioned earlier, two of that list of threats that were asked to me of Senator Manchin included both China and North Korea. The United States Army plays a key role. Eight of the 10 largest armies in the world are in the Pacific. Clearly, Navy and Air Force and Marines are fundamental to success for U.S. national security in the Pacific, but the Army is too. We currently have forward-deployed forces in Korea that have made a significant contribution to keeping the peace for the last 60 years since the end of the Korean War. We also have forces, as you are well aware in Alaska, at Joint Base Lewis-McChord in Washington State, and most importantly, in the State of Hawaii. There is a considerable amount of Army capabilities in the Pacific that play a key role in supporting Admiral Harris as the combatant commander and supporting Admiral Harris' PACOM [U.S. Pacific Command] strategy.

Senator HIRONO. Well, we recognize that because of the budget issues that certain force reductions were inevitable, sad to say. Of course, while unfortunate, I do appreciate the consideration that was given to the rebalance to the Asia-Pacific and Hawaii's strategic location and the decisions that were made regarding the cuts to our Army.

Can I expect that, if confirmed, you will continue to give ample consideration to our strategic position—and that, of course, includes Alaska—and to the importance of the rebalance?

General MILLEY. Absolutely, Senator. As we go forward, balancing of the disposition of the Army forces in accordance with the National strategy and balancing that against risk is the key task for the Chief of Staff and I will take that.

Senator HIRONO. This committee has spent considerable time on the issue of sexual assault in the military, and it still, of course, occurs and harassment persists in our military. From your testimony and our meeting, I know you find it totally unacceptable as well.

However, while efforts are being made to support and encourage victims to come forward, we are becoming more aware of the problem of retaliation.

Can you share with us some of your specific plans to reduce not only sexual assault but also to stop the further abuse by retaliation?

General MILLEY. Well, Senator, as you mentioned, sexual assault is just—there is no place for it at all in a disciplined military force. 2 years ago, there were, I think it was, 24,000 reports of sexual assault. That is an Army corps. It is wrong. It is just not acceptable and we cannot accept those kinds of casualties. Really that is what they are. Victims become casualties. We cannot accept a corps? worth of casualties and think we are going to have a ready Army that can deal with the threats that were mentioned earlier. It is unacceptable.

The Army has done a lot over the last many years here, and there has been some progress. It is not nearly enough, and I am fully committed, if confirmed as Chief of Staff, to continue to work the entire problem of sexual assault and bring that to zero.

Retaliation is a problem that has recently surfaced in the last year or so. I saw the recent study which indicated that 60 percent of victims report that they have been retaliated against, some by chain of command, others by peers. I think that by chain of command retaliation, we can get after that pretty fast through a variety of tools and holding commanders accountable. Peer-on-peer is a little bit more complex, and I am going to have to study that to figure out exactly what techniques can be used to eliminate peer-on-peer retaliation.

Senator HIRONO. Thank you. This will be an ongoing area of concern for many of us on this committee. Thank you for whatever can do to improve the situation vastly. Thank you.

Chairman MCCAIN. Senator Ernst?

Senator ERNST. Thank you, Mr. Chairman.

Thank you, General Milley. It is great to have you in front of the committee today. I want to thank your wife for being here as well. Thank you for the support that you have given over 34 years or 30 years for your husband. Thank you.

I will not ask about the National Guard. We have had some very in-depth discussions in my office, and I thank you for your willingness to work with our wonderful National Guard and all of those great young men and women that provide a great support system to our Active component members. Thank you for that.

I just wanted to mention we do have—you mentioned the ties between our Active component and the Guard, and we do have our second BCT [brigade combat team] from Iowa, the Iowa Army Na-

tional Guard, rotating through JRTC [Joint Readiness Training Center] right now. We do appreciate that partnership.

I want to tag on with a little bit on what Senator Hirono had also brought up, was the cases of sexual assault in the military. I was at the West Point Board of Visitors meeting yesterday, and this is a topic that we discussed. You have over 34 years of experience in the Army, and so you have seen a lot of changes through the years. When it comes to sexual assault and the way the Army reports this, prosecutes this, we have seen some changes in recent years. I would like your takeaway from what we have seen just in the last few years. With those changes, what do you see? Is it improving? The areas where you think we have seen the most impact. If you could just expound on that a little bit please.

General MILLEY. Thanks, Senator.

As I mentioned, there has been some improvement. It is not good enough, though, but there has been some improvement over the last couple of years. We know that the prevalence of incidents appears to be down and the numbers of reporting is up. It indicates some shift in trust to the chain of command.

I think the key is to prevent and/or intervene upfront, and that comes with a change of culture and fully educating the force, a wide variety of training. If an incident does occur, though, the first responsibility for that chain of command is to protect that victim and then investigate fully with professional investigators, CID [Army Criminal Investigation Division] investigators, and then hold those perpetrators accountable. I think the entire key is within the hands of the chain of command, and that is staff sergeants and platoon sergeants up through first sergeants and company commanders, all the way up through general officers. All of us have to be fully engaged in order to get after that.

A couple of things over 35 years that I have used and seen and have emphasized.

One is the role of the commander, absolutely fundamental. An engaged commander makes the difference between success and lack of success.

Second I would say is operate in buddy teams. There is great value in operating and using buddy team approaches like you would in combat.

Third is control of the terrain, which is the barracks. We cannot necessarily control outside the forts, but we surely as commanders can control the barracks. Maintaining good order and discipline is fundamental to the barracks. Lastly is alcohol. We know that in many, many cases of sexual assault, alcohol is a contributing factor. Maintaining good order and discipline again in the proper use of alcohol is fundamental.

I think commanders and the chain of command, the sergeants and the captains and the colonels and the generals, are fundamental to getting after sexual assault and bringing it to an end in our Army.

Senator ERNST. I appreciate that very much. I do see where we seem to have a lower level of incidents. We have a very, very long way to go with this.

One of the points that we raised yesterday at West Point with the Board of Visitors is that it is really difficult when you have

someone like yourself or even me with a lot of gray hair standing there telling these young soldiers do not do this, do not do this. I think where we can see a lot of shift in the culture and the environment is when their peers are stepping up and saying do not do it. We have talked about “not in my squad.” I think that is an important step.

We have a long ways to go, General. I look forward to working with you on this very important topic and protecting our sons and daughters as they serve. Thank you very much.

General MILLEY. Thank you, Senator.

Senator ERNST. Thank you, Mr. Chairman.

Chairman MCCAIN. Senator King?

Senator KING. Thank you, Mr. Chairman.

General Milley, first I want to commend you on your statement. I think it is one of the best statements I have ever heard about the role and mission of the Army. It should be required reading I think for every member of the Army today.

One of the questions you answered to the chairman was that would you commit to provide your personal views, even if those views differ from the administration in power. You said yes to that question. I want to underline the importance of that question. All of your experience, all of your knowledge, all of your wisdom that you have accumulated over the years are of no value if you do not share them. You will be operating in the highest levels of our Government in a situation that often can be intimidating. I want to encourage you to remember that question, and when in doubt, speak up. You are where you are because of your knowledge and experience, and you have to share it and sometimes share it aggressively. I hope you will remember that question and remember the commitment you made. I think you have a great deal to offer this country, and I just want to be sure it gets to the table.

General MILLEY. Senator, I guarantee that. I have been in a lot of combat, and I will be intimidated by no one.

Senator KING. I believe that, having met you, General.

A more specific question. Are the Iraqi Security Forces willing to fight?

General MILLEY. When we left in 2011—I was not there in 2011 but was there shortly before that—and the Iraqi Security Forces were willing to fight. In the years between 2011 and today, their chains of command have been decimated and they were not getting proper pay and training went down the tubes. Bottom line is that if 3 or 4 years go by and you lack training, you lack money, you lack equipment, you lack spare parts, and most importantly you lack a competent, capable, committed leadership, then you can certainly understand why units fell apart last year during the ISIS offensive.

I think there is nothing inherently prohibiting the Iraqi Security Forces from a will to fight with the exception of a lack of proper leadership. That is fundamental from where I sit, and I would like to get a trip over there and talk to our commanders on the ground, talk to General Austin, talk to General Clark, and others. My assessment is they have the potential and the capability to fight, but they must be led just like any army must be led to close with and destroy the enemies of their country.

Senator KING. It seems to me that when we think about the strategic challenges of Afghanistan, Iraq, Syria, the Ukraine, all of those are local troops with United States support in one way or another. One of the key challenges is how do you teach the will to fight. How do you train? Have we learned that? Are we at a place where we know what the pressure points are to develop, for example, the command mentality that is necessary? Because we are in a series of disputes around the world, none of which involve directly many, if any, U.S. troops. We are at the mercy of how these local people perform. I am wondering about the Army's sort of thinking about how to do training. That may be one of the most essential tasks that the new Army has.

General MILLEY. We in the Army think that we do know how to develop leaders. The Army does many, many things and does many things well, but we definitely produce lots of good leaders throughout our force on a day-to-day basis. We know also how to do that with other armies, with foreign armies, specifically as you mentioned, both Afghanistan and Iraq. We think we can do that.

Well, how do you do that? Leaders have to have confidence in their personal skills and their competence. That is fundamental. No soldier is going to follow a leader who is constantly lost, who is incompetent, who is a cement head out there and does not know how to shoot, move, communicate, and bring fire on the enemy. No soldier is ever going to follow that leader. Competence is key and teaching them the military skills necessary at the level they are at.

The other piece is the leader has to demonstrate compassion and love for their soldiers. If they see a leader who does not actually care for them, they are not going to follow him.

The third piece I think is a committed leader, a leader who is committed to the cause for which they fight.

If those three elements are combined together in Iraqi leadership at the small unit tactical level and at the strategic level, then I think the Iraqi Security Forces have a good chance of prevailing.

Senator KING. A year or so ago, Senator Kaine and I were in Lebanon, and we saw the training program that involves bringing foreign officers to the United States and also providing the kind of training that you are talking about. That struck us as a very cost-effective technique, particularly bringing them here because they get a lot from their peers when they are at Fort Benning or at Fort Hood or wherever they are. Is that a program that you think should be continued, strengthened, emphasized?

General MILLEY. Yes, I so, Senator, absolutely. It has been valuable in the past over many, many decades with many armies around the world, and doing foreign military exchange and our education system is value added for foreign armies.

Senator KING. I am a little bit over time, but a very short question. How long would it take us to go from a 450,000 back to, say, 550,000 if, God forbid, circumstances required it? What is the lead time?

General MILLEY. Yes, I would have to take that one for the record for the analysis and get back to you. I would like an opportunity to study that.

To build a brigade, for example, a brigade combat team, call it 3,500–4,000 soldiers—it depends on the type of brigade you have.

To build that from scratch is about a 3- or 4-year period to really get them certified and ready to engage in ground combat operations. To regenerate that force from 450,000 to 550,000—it can be done, but it is not going to be done in a very, very short amount of time.

[The information referred to follows:]

It would take three to five years to grow the Active component back to 550,000 with sufficient funding for incentives and recruitment.

Senator KING. Thank you. Thank you, General.

Thank you, Mr. Chairman.

Chairman MCCAIN. Senator Wicker?

Senator WICKER. Thank you, Mr. Chairman.

General, thank you for your testimony and thank you for coming by to see many of us before the testimony.

I want to ask you about the National Commission on the Future of the Army, which was established by the National Defense Authorization Act of 2015 [NDAA], and the Army's Aviation Restructure Initiative (ARI).

The National Commission's mandate is to evaluate future missions, evaluate the force mix of the total Army, and evaluate whether combat aviation assets from the Army National Guard should be transferred to the Army.

I understand from sources within the Pentagon that the Army intends to implement certain elements of the Army's ARI as early as October 1st of this year. As I expressed to you, making these irreversible force structure changes to the Guard before we have had a chance to see what the Commission has to say about ARI would not be advisable and does not make sense to me. The intent of Congress was clear. There should be no transfers of helicopters away from the Guard until Congress receives and reviews the findings of the Army Commission.

As such, I would like to know your opinion of the ARI plan, which would remove all combat aviation from the Army National Guard. Do you support halting transfers of helicopters away from the Guard until the Army Commission reports back in February of next year?

General MILLEY. Thanks, Senator.

It is my understanding that the transfer by October is in accordance with last year's 2015 NDAA, and the 2016 NDAA and the one that is under debate right now is the one that is talking about halting them. The Army is actually executing their last written order, which was last year's authorization, as I understand it. I will look into that, though.

As far as do I support it or not, there are puts and takes to this ARI thing. I think the National Guard has some good points. The National Guard makes some points that they are concerned that it is a slippery slope. I am going to take combat capabilities away from them and they will not be able to be the strategic and operational Reserve. Fair enough.

There are also key points on the Army side. One is fiscal. There is a billion-dollar a year savings and \$12 billion over time. I think that is not insignificant given the current crunch with sequester, *et cetera*. Most importantly, I think there is a readiness issue. If we do not execute this ARI, then I think three of the divisions, the

1st Infantry Division, the 10th Mountain Division, 25th Division in Hawaii, are not going to have armed reconnaissance capability, and we are going to blind 3 out of the 10 Active Duty division commanders with inability to be able to see a battlefield if they were thereby committed.

On balance, I would favor the transfer. However, I am going to await the results of the Commission and I am going to pay attention to their recommendations very closely. I will remain continually engaged with the Guard and try to do the right thing for the total Army.

Senator WICKER. Well, I am glad to know you are going to await the findings of the Commission.

I would just say to you a couple of things.

From my conversations with many of our people in the Guard, they believe that for many of the States, such as Mississippi, our program would be set back for a decade. It would take us 10 years to get over the loss of these Apaches, and I think would do great harm to what we have had over the past, and that is that the Active Army and the National Guard units have operated seamlessly as one team since September 11 and it has been good for the country. I think it is unfortunate that policy fights and distrust between the Guard and Active Army have become prevalent over the past five years.

What is your assessment of the current relationship between the Army and the Army National Guard? Will you acknowledge that the relationship has deteriorated to a point where actually it is unseemly?

General MILLEY. Well, Senator, as Commander of Forces Command, I deal with the National Guard and the U.S. Army Reserve on a frequent basis. I am coming at this from an operational force point of view, from the fielded forces. I do not see that friction in the fielded forces. We train together. We operate together. We have partnerships together. I have commanded National Guard forces in both Iraq and Afghanistan.

Senator WICKER. You do not see that in the field.

General MILLEY. I do not see that in the field. That is correct.

Senator WICKER. You see it here in the city, do you not?

General MILLEY. Maybe some things happen when people come to Washington, DC. I do not know. Perhaps there is tension—

Senator WICKER. I have heard that.

General MILLEY. As I understand it, there is tension here amongst some of the senior leaders. I will work, along with General Grass and General Kadavy, to patch up whatever issues there are.

From a personal perspective, I think there is one Army. That is it. There is one Army. We all wear the same uniform and it says U.S. Army on our chest, and that is the way we have to approach it. The U.S. Army cannot conduct combat operations in a sustained way overseas without the use of the National Guard and the Reserve. We just cannot do it. We can do short-term operations, but sustained ops cannot be done without the Guard and Reserve. It is one Army. They are critical to our success.

Senator WICKER. Well, thank you very much for that. This conversation will continue. We had it privately in my office. We are discussing it publicly today. I think we can acknowledge that the

National Guard is a very integral part of what your mission will be. I hope these issues can be resolved in a mutually satisfactory manner.

Thank you very much for your service.

General MILLEY. Thanks, Senator.

Chairman MCCAIN. Senator Donnelly?

Senator DONNELLY. Thank you, Mr. Chairman.

General, thank you and your family for all you have done for our country. Thanks for taking the time to come to my office. I just wanted to follow up on that discussion.

In regards to military suicides, we talked about the importance of pushing situational awareness down the chain of command. When I met with the Israeli Defense Forces, they said what was critical in reducing suicides was pushing it down the chain of command so the squad leader, the platoon leader, who could identify it right on the spot, could help. I was wondering what your plans are to make sure that at the squad level, the platoon leader, the leaders of those squads and platoons are aware of the challenge and are ready to try to help in eliminating it.

General MILLEY. Thanks, Senator.

I have been in command a lot, and suicide is a horrible, tragic thing to see in a unit. The effects, obviously, on the family, the unit, *et cetera* are just like you would have a killed in action in combat. It is terrible. It is horrible.

I think in terms of how we get after it, situational awareness is key. Because the Army has done a lot over the last couple years to increase situational awareness of the signs and the symptoms and then the techniques of intervention, our numbers have dropped considerably in suicide. That is one point is to continue sustaining and actually increasing situational awareness.

The second is to continue to reduce the stigma. Behavioral health, mental health—my view is there but for the grace of God, go I. The human psyche is a very fragile thing, and any one of us, regardless of how many patches or Ranger tabs or anything else anyone has, is not so hard, not so tough that they cannot break under a certain, correct combination of stressors and pressures. We have to be alert to those signs and symptoms, and we have to reach out and be literally our brother and sister's keeper.

That attitude has to happen throughout the force. It has happened considerably better than it was in previous years. In the last few years, it has improved significantly, and that is what I think is contributing to the reduction in suicides is the increase in situational awareness, the reduction of stigma, and then the intervention on the part of junior soldiers at the most junior level.

Senator DONNELLY. Well, I would encourage you in your new position to really birddog this and to make sure that the squad leaders and the platoon leaders know, hey, let us know if you see something going sideways for one of the guys, one of the men and women, let them know there is no stigma and that they should get help. I know you will do that.

I wanted to switch to Iraq. I was there recently, met with your folks, our whole team. It was right before the push into Ramadi and Fallujah began. The discussion was just as you said. It is a question of good leadership for the ISF, the Iraq Security Forces.

As opposed to this plan or that plan, I would love to hear your unvarnished advice on what you think our role should be in helping the ISF, the Iraqi Security Forces, get their leadership back together. What can we do best to help them do that?

General MILLEY. Senator, I would like also the opportunity to get over and visit and talk to the guys on the ground to answer that question in a more informed and holistic sort of way.

Based on what I know now and my own experience in both Iraq and Afghanistan, there is a wide variety of things we need to and should do to help the Iraqi Security Forces in our “advise and assist” levels of effort. As I understand it, the constraint right now is not so much on what we are doing, but on the amount of trainees the Iraqi Security Forces are providing for our trainers to do. Maintaining a robust train, advise, and assist effort, Security Forces assistance effort, with the Iraqi Security Forces over a considerable length of time is going to go a long way to shoring them up.

What Senator McCain mentioned earlier about JTAC’s [joint terminal attack controller] forward I think is something that should be seriously considered to improve the effectiveness of the enablers, the close air support that is being provided. I think advisors going forward with units again is something that should be seriously considered. However, there are lots of issues with that with security of our people and the risk associated with it, *et cetera*.

Bottom line is there are things we can do. I would like an opportunity, though, Senator, to talk that over with commanders on the ground and give you a more informed answer at a later date.

Senator DONNELLY. Great.

I am about out of time. I would just ask you to remember in regards Iraq—and I know you will—when you said the Army’s mission is to win. We have to win there too in order to have success in Syria and to help the Iraqi Forces have that kind of leadership.

The last thing I will say is our Article 5 responsibilities under NATO [North Atlantic Treaty Organization] with Latvia, Estonia, Lithuania. In Korea, their motto is “fight tonight.” We have to make sure we have the same kind of readiness in those areas because we have the same obligations to those countries. They have said they would stand with us. We need to do the same for them.

Thank you, Mr. Chairman.

Chairman MCCAIN. Senator Tillis?

Senator TILLIS. Thank you, Mr. Chairman.

General Milley and Mrs. Milley, congratulations. Thank you for your service.

General Milley, I want to start maybe with going back to something that the chairman mentioned in his opening comments. Incidentally, I am sorry I had to step out. I have a competing committee meeting over in Judiciary that I have to go back to.

We have sequestration, which I think to a person we all recognize is devastating. We have to get rid of it. It is bad policy. It should have never been implemented.

What are your thoughts, though, about ways that we can save money? In new your position—and I look forward to supporting you in this nomination. What areas in your opinion do we have the opportunity to bend the cost curve or increase productivity, and how would you go about doing that in your new role?

General MILLEY. I think there are at least three areas that should be seriously considered. Senator McCain has already referenced them. One is I think we have to take a hard look at overhead. The Army, but not just the Army, the military across the board, all the services, to include Department of Defense are a very, very large organization with a big bureaucracy with a significant overhead.

Second is acquisition. As already previously mentioned, there is a considerable amount of cost, and in many cases waste, in the acquisition process. We need to get that under control.

A third and final piece that I think is worth taking a look at, there is a wide variety of emerging technologies that could, in the out-years, 15–20 years from now, lend itself to automated processes and reducing either manpower or manpower costs, compensation costs, over time.

Those would be three pretty big areas that I would want to take a look at if confirmed.

Senator TILLIS. Thank you.

We have Russia creating a looming threat in Europe. We have the Pacific and China's expansion or, I should say, increased activities there. We have the ongoing war in the Middle East, the fight against Islamic extremism.

General Odierno, I believe said that a 50-brigade Army should be adequate to keep these threats in check. Now we are on a trajectory for about a 33-brigade Army. Do you think that managing or facing those threats is possible with a 33-brigade Army?

General MILLEY. Senator, are you talking Active brigades? Are you talking the total Army brigades? Because right now, total Army, we have 60 brigades today. We have 32 in the Active component today. The plan that was announced a week or 2 ago will take us down to 30 brigades, Active component, and we will lose 2 out of the Guard. The bottom line is—

Senator TILLIS. That was the Active, the 33 brigades.

General MILLEY. I think from a total Army perspective, we have adequate capacity, numbers, of brigade combat teams to handle the contingencies that are currently on the books. If we do not drop below the 980 force, we have adequate capacity, size, but that is with significant risk. That risk is incurred in terms of time, the time to the fight, the time to mobilize Guard units, the time to get them trained, certified, *et cetera*, and get them to the fight. Then it is also significant risk and potential casualties.

The second piece is not just capacity but capability, the readiness of the force and how capable it is to handle that type of fight, which is a different fight than what we have been dealing with for the last decade and a half.

We have got a ways to go in terms of improving our readiness with respect to the higher end type of combat operations.

Senator TILLIS. General Milley, I just want to close by saying I look forward to you being in this role. You were one of the first people to reach out to me back before I was even sworn in to offer information and help me ramp up. You were very generous with your time when I spent several days down at Fort Bragg, and you have been up here several times. I know you to be a very approachable,

direct person. I think you are going to be a great addition as the Chief of Staff.

Thanks again to you and your family.

Chairman MCCAIN. Senator McCaskill?

Senator MCCASKILL. Thank you, Mr. Chairman.

General, thank you. As everyone has expressed, we appreciate you coming by our offices and a chance to visit one on one, and I certainly appreciated that.

I want to talk about the cuts and sequestration and the issue that we have in front of us in the next 90 to 120 days here in Congress.

The installation-level cuts that the Army announced earlier this month are based, of course, on us shrinking to 450,000 soldiers. As you know and have talked about this morning, there is a significant risk that these cuts will not be the last. If Congress does not provide some relief from sequester-level caps, the Army will be forced to cut an additional 30,000 Active Duty soldiers.

This year, the Republicans are attempting to get around the statutory budget caps by using the Overseas Contingency Operations, or the war fund, which does not have to be paid for. It can be put on a credit card. Would you buy back force structure using this war fund?

General MILLEY. Senator, we would prefer, if possible, the budget be in the base. As the recipient of the money, we will take the OCO if that is the only mechanism that we can in order to sustain readiness, end strength, and modernization.

Senator MCCASKILL. Let me ask one that I think is even more difficult because then it kind of tramps on whether or not the OCO is being used appropriately because there is also an obligation you have to only use the Overseas Contingency fund for what it was designed to be and that is, an off-the-budget, unpaid-for, on the credit card to be used in an emergency for the purposes of a contingency operation. That is why it is called the Contingency Operations.

In your advance policy question for this hearing, you noted that our technological advantage over current and potential adversaries are at risk. We invested in the base budget in technology and research for decades to get us to the point that we are today where we are the most technologically force in the world. If we want the young men and women we will send to war in the future to have the same advantages that the men and women have today with our technological superiority, can you make long-term research and development investments using a fund that was designed only to apply to a contingency?

General MILLEY. I would have to get back to you on the actual legal use of that fund relative to long-term research. I think the answer would be no. I think OCO funds are specifically targeted to named operations, overseas contingency operations. I would have to get back to you to see if that could be used. I do not think it could, but I will check and get back to you, Senator.

[The information referred to follows:]

No. Legally, we can only use OCO funds in this manner if appropriated for this purpose by Congress. Current OCO rules and practices stipulate that research and development funds are for projects required for combat operations in the theater

that can be delivered in 12 months. In this context, 12 months is considered to be a short-term effort.

Senator MCCASKILL. The frustrating part of this is the only difference between the commitment to put this \$40 billion in the budget between my friends and colleagues and us on this side of the aisle is the willingness to acknowledge that we are spending the money, is the willingness to say this belongs in the base budget, let us put it in the base budget, let us not use an artifice, a gimmick, phoniness, to pretend that somehow we are not making an investment in the base needs of our military but rather in an overseas contingency operation.

It remains a great frustration to me and one that I am hopeful that we can work out so that we do not go down this path and create this precedent that I think is very dangerous for the long-term stability of our military and you all's abilities to do your jobs in terms of planning and coordinating and having what you need going forward. I just think it is a very, very irresponsible precedent.

On sexual assault, I know that several members have talked about it to you already. I do want to mention I know you are getting after the retaliation. I will continue to monitor that.

I want to mention briefly at the end of my time the incredible training that is going on at Fort Leonard Wood for the investigators of sexual assault. This is a special set of training that must occur, and I would like your commitment. The forensic experimental trauma interview is now being trained throughout the military and frankly in the civilian world. The expertise that has been developed at the fort on this is unparalleled in terms of how you get after a sexual assault investigation, particularly interviewing a victim. I would like your commitment to familiarize yourself with that training and a commitment that you will continue to fight for the adequate funding so we can actually get these perpetrators behind bars so they are not, in fact, besmirching the amazing and wonderful military that we have in this country.

General MILLEY. I will absolutely take a deep look at that. As I understand it from reports I have, it is the best practice and it leads the Nation in its skills.

Senator MCCASKILL. It does. It does, in fact.

My thanks to you and your family for your service.

Chairman MCCAIN. Senator Sullivan?

Senator SULLIVAN. Thank you, Mr. Chairman.

General Milley, good to see you. Thank you for your 35 years of service and to your family who I know has sacrificed a lot.

I wanted to talk—I have a number of questions, as you can imagine—about the Army's decision to cut 40,000 troops recently. I know that you were not in the ultimate decisionmaking but you are going to be tasked with implementing this and maybe relooking at it. I would appreciate some of your thoughts and views.

You know, General Dunford last week talked about the importance of the military and DOD [Department of Defense] focusing on and implementing the defense guidance from the Congress. I gave examples of if the CNO [Chief of Naval Operations] was told by Congress 11 carriers we need or the Chief of Staff of the Air Force,

we need A-10s, even though the service does not like it, they do it.

One of the things that I am concerned about is in the current NDAA, we have a lot of focus on the Pacific rebalance, and there is very strong language, very directive language. The U.S. forces under the OPCON [Operational Command] of PACOM [U.S. Pacific Command] should be increased. Any withdrawal of the U.S. forces outside the continental U.S. Asia-Pacific region would therefore seriously undermine the rebalance. A lot of focus on the rebalance. It was put in there to provide credibility to strategy that this Congress bipartisan supports.

I have been quite concerned that the Army's decision pretty much ignores this. With all due respect to Senator Hirono, I do not think the decisions were inevitable. As a matter of fact, I think that what was just announced takes a huge chunk, not only increasing forces, not only keeping them the same, but dramatic increase. As a matter of fact, of the 40,000, a huge proportion was from the Asia-Pacific region.

The idea of fighting tonight, maintaining the rebalance—I think it is all undermined. I think it is dramatically undermined. I think our allies are going to see it undermined.

Do you think that the President's rebalance strategy has been undermined by dramatically reducing forces despite this Congress' defense guidance to the Department of Defense to not do that?

General MILLEY. I do not think it has necessarily been undermined, Senator. From an Army perspective, about 20 percent of the Army's combat power is in the Pacific, even with the reductions.

More to your point, though, I agree that the Sense of Congress should absolutely inform decisionmaking, and we should take that seriously and I think we will.

Senator SULLIVAN. It does not look like you did in this case.

General MILLEY. Well, as you know, I was not in this—

Senator SULLIVAN. I know. Again, General, I have the utmost respect for you. I am talking about the Army's decision which now you are going to have to defend. The Department of Defense, the Army did not—did not—abide by the defense guidance of Congress. Period. If they read that NDAA amendment.

General MILLEY. I will take a hard look at the entire issue, and I look forward to working with you on it. I do think, Senator, that the Army has substantial capabilities committed to the Pacific.

Senator SULLIVAN. They have been significantly increased in the last 2 weeks, according to this decision. The only airborne combat brigade in the entire Asia-Pacific has now been gutted.

General MILLEY. I would say that the airborne brigade was brought down to a battalion task force with the specific intent and design that it could be reversed if funding becomes available over the next couple of years. That brigade does not go to a battalion, I do not think, until late 2016 or 2017. It is designed to go to a battalion task force with the intent of reversing it if funding is made available.

Senator SULLIVAN. Do you think our allies were supportive of this? I mean, the idea of fighting tonight in Korea—that BCT was the Reserve cavalry for any contingency in Korea that can get there in 7 hours, a very capable, mountain, cold weather unit. Do you

think that our capability in Korea has been decreased by this decision?

General MILLEY. The Army, Marines, both have significant ground capabilities that are positioned throughout the continental United States, Hawaii, Alaska, Fort Lewis, Washington, and Okinawa that can respond. We think that it is a capable response to mitigate the threat given the current situation.

Senator SULLIVAN. Mr. Chairman, I will have more questions in the second round. Thank you.

Chairman MCCAIN. Senator Gillibrand?

Senator GILLIBRAND. Thank you, Mr. Chairman and Mr. Ranking Member, for this hearing.

Thank you so much, General Milley, for your service. Thanks to your family. You have done extraordinary things, and I am so grateful that you are continuing to serve our country.

I want to talk a little bit about combat integration. I want to applaud the Army for taking steps towards eliminating combat exclusion policies for women by opening up over 20,000 combat engineer and associated skill positions to female soldiers in June.

As you look at the positions that still remain closed, what reasons might there be for the Army to ask for an exception to policy for a position?

General MILLEY. The only reason at all, Senator—and there has been no decision yet, but everything revolves around standards and readiness. The military occupational specialties that remain closed currently are infantry armor, some forward observers in the field artillery, and then special operations, special forces.

There is a gender integration study ongoing right now by Training and Doctrine Command. There is a similar study ongoing by the Marines. They are both crosswalking their data. I expect to see that information, if I am confirmed, probably in September/October and will have to make a decision or a recommendation to the Secretary of Defense whether to seek a waiver or not. I will take a hard look at all that data and make that call at that time.

Senator GILLIBRAND. Well, we have seen the success of the cultural support teams in Afghanistan and how vital women were to those missions to gather vital intelligence as to where terrorists were, where weapons were being housed from women and children in those homes. I do hope you will focus every effort to make sure our best and brightest and all of our best and brightest are serving.

I was concerned about the recent news regarding the eight women who failed the first phase of the Army Ranger School for the second time due to their inability to accomplish subjectively evaluated leadership tasks. These women were already officers, ranging from captains to majors with years of leadership experience. Why do you think that class of women—why do you think these women were in such a historically high attrition rate? Do you find it alarming that the U.S. military academy at West Point is graduating leaders who, after 5 to 6 years of service, are not able to complete leadership tasks that are successfully accomplished by specialists and private first classes?

General MILLEY. Senator, Ranger School is a very, very hard course, male, female, no matter who you are. That is a hard course with a high attrition rate. The women that failed—one of the key

tasks that they failed were patrolling tasks, leadership skills, which because they are not in the infantry already, they have had a limited opportunity to train to those. I expect that those skills would improve over time. Right now we have three women who are in the mountain phase, as of yesterday anyway—still in the mountain phase of Ranger School, and we are observing that to see how that goes.

The broader issue of women in the infantry, women in armor, *et cetera*—again, there is a very detailed study going on. I want to take a hard look at all that and make sure that the standards are being met in the readiness force.

As to whether women can fight or not, there is no doubt. I have seen it personally, up close and real. There is no doubt in my mind that women can engage in ground combat with the enemies of our Nation because they have done it. They have been doing it for 10 years.

Senator GILLIBRAND. I also want to associate myself with the remarks from Senator Ernst, Hirono, and McCaskill about sexual assault in the military and how important it is for this committee that we solve that problem.

I do want to just note one thing from your testimony. Retaliation is not a new issue. In fact, we have been measuring retaliation over the last several years because of our DOD surveys. One of the biggest challenges we have and why Senator McCaskill raised it is this year's survey—62 percent of survivors were retaliated against, perceived retaliation, because they reported these crimes. That is the same statistic as 2 years ago. It is the same as the 2012 survey. We have a real challenge here with retaliation.

To be clear, the retaliation is fairly diverse. 62 percent is—53 percent is social retaliation, peer-to-peer. 35 percent is administrative action. 32 percent is professional retaliation. 11 percent is punishment for an infraction. If you look at all those factors, 35, 32, and 11, arguably more than half of the retaliation is through the chain of command. Please do study that because there is an issue of perception by female members of the military of discrimination. They said in 60 percent of sexual harassment cases and sexual discrimination cases, it came from the immediate commander. You are talking about unit commanders who are perhaps creating a toxic climate. That command climate really needs to be looked at aggressively to make sure that these female soldiers know that they can succeed and that their immediate supervisor does not have it out for them.

General MILLEY. I will make that a focus area, Senator.

Senator GILLIBRAND. Thank you.

Chairman MCCAIN. Senator Lee?

Senator LEE. Thank you, Mr. Chairman.

Thank you, General Milley, for your service to our country and for your willingness to be considered for this position.

I really enjoyed our visit last week when we met and enjoyed getting to know you a little bit better.

I want to first join my colleagues in condemning the deplorable attacks against our servicemembers in Chattanooga last week. I pray for the friends and family members and the colleagues of the

five servicemembers who lost their lives, and I pray for a quick recovery for those who were injured.

The attacks in Chattanooga last week were the latest in a string of deadly assaults on military personnel in facilities in the United States, including Fort Hood and the Navy Yard, as well as a number of attacks that were planned but that, quite fortunately, were disrupted before they could be carried out. In the coming months, I hope our military leaders and Congress can work together and work in an efficient, effective manner to figure out how we can better protect our men and women in uniform from these types of attacks in the future.

One of the concerns that I have heard repeatedly from servicemembers in Utah and elsewhere is that they feel inadequately informed by military leadership about some of the persistent threats against themselves, their families, and the facilities where they happen to work. They see threats on the news or through social media, but they do not feel like they have been given enough information about what is being done to protect them or proper guidance on how to protect themselves at or away from their workplace.

General, what is your assessment of how such information is being disseminated through the Army and, if confirmed, what you might do to improve the effectiveness of information and guidance that is coming from Army leadership on these threats to our Homeland and to our servicemembers in particular?

General MILLEY. Senator, unfortunately, in today's world, there is no rear area in this battle against the terrorists of ISIS or any other terrorist organization. The rear area of the United States is, in fact, vulnerable, and we have to do a better job at making sure that vulnerability assessments, information awareness is out there with our soldiers and their families. There is no doubt in my mind we have to increase that throughout the force, throughout the total Army, and indeed, throughout the entire military, those things like what to look for, signs, indicators of warnings, of reconnaissance and surveillance by the enemy, by the terrorists on a particular compound or against a particular person.

Unfortunately, though, a lot of these type of attacks are very ambiguous. This one in Chattanooga may or may not have had recon ahead of time or any kind of indicators ahead of time, may or may not have been a lone wolf. We do not know yet. It is too early in the investigation. A lot of times, these things are very ambiguous. Both active and passive defensive measures at all of our installations, with all of our families, with all of our soldiers, sailors, airmen, and marines is going to be a necessary requirement in the current environment.

Senator LEE. Thank you. I appreciate your insight on that.

I next wanted to follow up on some questions that Senator Wicker asked and some comments that he made.

Among the most contentious issues in this committee over the past 2 years has involved the Army's Aviation Restructuring Initiative. Now, I understand the Army has been put in a difficult position by budget reductions, and over the past several years has been exploring a number of options to maximize combat power while at the same time figuring out how to cut costs.

Congress has similarly been taking a hard look at this, which is why the Commission on the Structure of the Army was established in the NDAA.

If confirmed, will you commit to thoroughly reviewing the Army's Aviation Restructuring Initiative and working closely with Congress, once the Commission report is delivered next year, to help us figure out the best path forward on restructure issues?

General MILLEY. I absolutely will, and I look forward to reviewing that Commission report.

Senator LEE. What do you think are the biggest threats that, should you be confirmed, you will have to prepare the Army to address in the coming decade?

General MILLEY. I think the Army's fundamental mission of engaging in ground combat, winning in ground combat—I think that mission remains sound, and I anticipate that mission will remain so in the future.

Senator LEE. The three key tasks in the national security documents that are out there is to assure our allies, deter opponents, and if necessary, fight and win on the ground. All of those are going to be challenges in the years ahead as we go forward.

Thank you very much. I see my time has expired. Thank you, Mr. Chairman.

Chairman MCCAIN. Senator Sullivan?

Senator SULLIVAN. Thank you, Mr. Chairman.

General, you talked about budget constraints and looking at ways to reduce those. One that you did not mention is making sure there is no overlap in terms of core competencies and missions. I am assuming you think a core competency of the Army—I certainly do—is the airborne brigade task force, the ability to deploy anywhere on a moment's notice, kick in the door.

General MILLEY. Airborne operations are a core competency in the U.S. Army. That is correct.

Senator SULLIVAN. One of the things that I have been somewhat concerned about is when you look at the Army's Pacific Pathways mission—my office has been asking the Army for weeks now on what the costs of that are. We have not been able to get any answers on that. To me, do you see the value, in terms of our Nation's defense, of BCT with regard to the Army or putting soldiers on naval shipping with helicopters and doing expeditionary maneuvers throughout the Pacific? What is a higher value for the Army?

General MILLEY. I think they are both of value to the Army. I do think that Army forces on shipping and moving them around the Pacific has been done really for over a century. That is how the Army moves, by air and by ship.

Senator SULLIVAN. You do not see that as redundant to the Marine Corps' mission in the Asia-Pacific?

General MILLEY. No, not at all. The reason I say that is because they complement each other, but the Marine Corps core competency is amphibious assault not just movement by sea. What we are really talking about for Pacific Pathways is the strategic movement of Army forces over the ocean. We are not using any gray hulls anyway to do that. We are using black and green hulls to do that.

Senator SULLIVAN. If you had to choose, though, in austere budget times, would the Army want to focus on airborne core competencies or a mission that in some people's view looks somewhat redundant to another service's?

General MILLEY. Well, frankly, Senator, the Army has to do both.

Senator SULLIVAN. No, but I am just asking if you had to choose. In this kind of austere budget, you have to choose.

General MILLEY. We have to be able to do both. We have to. We do not have a choice. We have to maintain both capabilities, forced entry capability for vertical insertion airborne assault, and we have to be able to move forces, both air and sea, to reinforce in a variety of contingencies.

Senator SULLIVAN. We would appreciate it—I would appreciate if we can get some numbers on the Pacific Pathways in terms of costs.

General MILLEY. Sure, absolutely.

[The information referred to follows:]

The Army plans to conduct three Pathways per year, with a projected estimated total cost of \$45 million per year or an estimated average cost of \$15 million per Pathway.

Senator SULLIVAN. I want to turn to another issue, kind of emerging threat issues. You and many others who have testified have talked about Russia as a principal threat, and certainly that is the case in the Ukraine.

I want to emphasize and talk a little bit more about the Arctic. You have probably seen in the last just few weeks there have been articles. I just got this in the airport today. Russia has made military buildup in the Arctic a strategic priority. There is article after article about the Russians moving huge force posture, huge force structure, four new BCTs, big operations that nobody is even aware of that are taking us by surprise all through the Arctic.

You have probably seen this map that has new airfields, 11 new airfields, 40 Arctic icebreakers, some nuclear-powered. The United States has these forces here. That is it. This recent decision we are going to remove a key capability of these and we have this as our strategy. This is the 2013 DOD Arctic Strategy. It mentions climate change five times and in a footnote mentions Russia. This is a joke of a strategy.

I think during our deliberations for the NDAA, the Congress recognized that this is a serious issue, a serious new threat environment. We had an amendment that came through the NDAA that focused on our interest in the Arctic, the need for a much broader assessment, for a much more serious look in terms of OPLANS [Operation Plan in Complete Format], in terms of a military strategy. That passed unanimously.

What I was wondering, when you look at—so the Secretary of Defense has to put forward this strategy within the next year. Our most capable Arctic forces, before we even do the analysis, before we do the planning, before we do the OPLAN, we are going to remove the most capable, indeed the most lethal Arctic warriors that we have. General, it takes a long time to become proficient in the Arctic.

I am wondering what your thought on that is, and if confirmed, I think it make sense to do the analysis first, to do the OPLAN

first, to do the strategy first before we move any force structure. Would you commit to work with this committee to hold off on moving Arctic forces, particularly given the dramatic threat increase until after the Secretary of Defense and others have put together an Arctic Strategy, has defense guidance from this committee and this Congress? Do you think that that is the most logical way to do the planning?

General MILLEY. I appreciate that, Senator. I agree with you. I think that having an OPLAN first and then figuring out your task organization second is the right sequence, and I think that is in fact what is about to happen. I think as you already mentioned, the Arctic OPLAN, the Arctic Strategy is going to get reviewed by OSD [Office of the Secretary of Defense], and General Dunford mentioned that the other day.

Senator SULLIVAN. Well, there is no OPLAN [Operation Plan in Complete Format]. There is no strategy unless you want to call this a strategy. I mean, there is a lot of work that needs to be done.

General MILLEY. There is a lot of work that needs to be done, and it is under review, as I understand it. I think you asked General Dunford to produce an OPLAN, and I think he committed to doing that and I look forward to participating in that and will work with that over the course of the next year.

The forces in Alaska do not get reduced, according to the decision I think I heard, until end of 2016 and 2017. An OPLAN first, reduction of forces second if still required. I will work with you on that.

Senator SULLIVAN. Good, because to me, again, I think it makes strategic sense to put together the plan, see what the combatant commanders need in terms of troops, see what the new threat level is, and then make the plan on troop levels once you are informed by a real strategy, not a 13-page document. Thank you.

Chairman MCCAIN. General, I just would like to say that Senator Sullivan raises this whole issue of the Arctic and the recent Russian moves in that region. We need to pay a lot more attention to it. We see our friends in Norway, in particular, but also Sweden, Finland, those nations there that are experiencing things like Russian overflights and Russian submarine activities and other—I believe that the Russians have—what is it, Senator Sullivan, 50-some icebreakers?

Senator SULLIVAN. Close to 40.

Chairman MCCAIN. Close to 40 icebreakers. I think we have one. Is that correct?

Senator SULLIVAN. Yes, sir.

Chairman MCCAIN. We have got a very full agenda, but the Arctic I think is another area that we have to be concerned, particularly given Russian behavior. Even Sweden, which is traditionally, as we know, a very neutral nation, has become extremely concerned about Russian activity in their territorial waters. As we see climate change—as we see areas of the Arctic opening up to being areas of navigation, this is an area that I hope we will spend some time on. I thank Senator Sullivan for his attention and involvement in what is, I view, a looming situation with Russia.

I thank you, General.

The committee is adjourned.

[Whereupon, at 11:21 a.m., the committee adjourned.]

[Prepared questions submitted to Gen. Mark A. Milley, USA by Chairman McCain prior to the hearing with answers supplied follow:]

QUESTIONS AND RESPONSES

DEFENSE REFORMS

Question. Do you see the need for modifications of any Goldwater-Nichols Department of Defense Reorganization Act of 1986 provisions?

Answer. I do not currently anticipate the need to modify the Goldwater-Nichols Act of 1986.

Question. If so, what modifications do you believe would be appropriate?

Answer. I do not currently anticipate the need to modify the Goldwater-Nichols Act.

DUTIES AND QUALIFICATIONS

Question. Section 3033 of title 10, United States Code, establishes the responsibilities and authority of the Chief of Staff of the Army.

What is your understanding of the duties and functions of the Chief of Staff of the Army?

Answer. The Chief of Staff of the Army is the senior military advisor to the Secretary of the Army and the senior military officer of the Army. In addition to his role as an advisor, the Chief of Staff is responsible for the effective and efficient functioning of Army organizations and commands in executing their statutory missions. The Chief of Staff also performs the duties prescribed for him as a member of the Joint Chiefs of Staff under section 151 of title 10.

Question. Assuming you are confirmed, what duties do you expect the Secretary of the Army to prescribe for you?

Answer. If confirmed, I would serve as the senior military advisor to the Secretary of the Army and the senior military officer of the Army and all its components. I would expect the Secretary of the Army to assign me the following duties:

- (a) Preside over the Army Staff;
- (b) Transmit the plans and recommendations of the Army Staff to the Secretary of the Army and advise the Secretary of the Army on those plans and recommendations;
- (c) Act as the agent of the Secretary of the Army in carrying into effect the plans and recommendations of the Army Staff that the Secretary of the Army has approved;
- (d) Perform other duties assigned by the President, Secretary of Defense or the Secretary of the Army;
- (e) Represent the Army in areas related to my functions and responsibilities, including to the public and the Department of Defense as the Army's military representative to appropriate Department of Defense councils;
- (f) Communicate and advocate for Army policies, plans and programs to external audiences, including Congress, interagency partners, foreign governments, nongovernmental organizations and the public;
- (g) Assist the Secretary of the Army in fulfilling his compliance functions, including directing the Inspector General to perform inspections and investigations as required; and
- (h) Assist the Secretary of the Army in the performance of the following acquisition related functions:
 - a. The development of requirements relating to the defense acquisition system;
 - b. The coordination of measures to control requirements creep in the defense acquisition system;
 - c. The development of career paths in acquisition for military personnel; and
 - d. The assignment and training of contracting officer representatives when such representatives are required to be members of the armed forces because of the nature of the contract concerned.
- (i) Serve as a member of the Joint Chiefs of Staff and provide independent military advice to the Secretary of Defense, Congress, National Security Council and the President. To the extent such action does not impair my independence in my performance as a member of the Joint Chiefs of Staff, I would keep the Secretary of the Army informed of military advice that the Joint Chiefs of Staff

render on matters affecting the Army. I would inform the Secretary of the Army of significant military operations affecting his duties and responsibilities, subject to the authority, direction, and control of the Secretary of Defense;

- (j) Represent Army capabilities, programs, policy, and requirements in Joint forces;
- (k) Supervise the execution of Army policies, plans, programs, and activities and assess the performance of Army commands in the execution of their assigned statutory missions and functions; and
- (l) Task and supervise the Vice Chief of Staff, Army, the Army Staff and, as authorized by the Secretary of the Army, elements of the Army Secretariat to perform assigned duties and responsibilities.

Question. What background and experience do you have that you believe qualifies you for this position?

Answer. I am privileged to have over 35 years of service in our Army, during which I have commanded at every level from Platoon to U.S. Army Forces Command including command of the 10th Mountain Division and the III Armored Corps. Of note, I had the honor to lead soldiers in combat as a Captain and Major along with combat leadership as a Brigade Commander, Division Deputy Commander, and Corps Commander. With service in Special Forces and conventional units, as well as operational experience in a variety of contingencies around the globe, I have a comprehensive perspective of the Army, its processes and capabilities. My experience includes operations in the Sinai, Somalia, Panama, Haiti, the Balkans, Afghanistan, and Iraq, along with tours in Korea and Columbia. I have participated in Humanitarian Service, Peacekeeping, Peace Enforcement and multiple combat operations. During my most recent deployment, as the Commanding General of III Corps and ISAF Joint Command, I had the opportunity to apply the full range of Army, joint, combined and coalition capabilities in complex environments on my third tour in Afghanistan while commanding all the ground forces in combat and security force assistance operations. Additionally, I have considerable experience on the Joint Staff and Office of the Secretary of Defense Staff where I saw firsthand the importance of teamwork across the Department of Defense and working with Congress. Finally, as the Commanding General of U.S. Army Forces Command, I am responsible for the training and readiness of the entire U.S. Army's Operational Force based in the Continental United States, which includes most of the Army National Guard, U.S. Army Reserve and Active component Regular Army—roughly about 70–80 percent of the Total Army. If confirmed, the combination of all of these assignments as well as the honor of serving closely with our dedicated soldiers, will enable me to lead our Army as it meets our Nation's requirements in a complex world.

Question. Do you believe that there are actions you need to take to enhance your ability to perform the duties of the Chief of Staff of the Army?

Answer. If confirmed, my tenure as Chief of Staff will be marked by continuous self-assessment of my ability to perform my duties. As I believe necessary, I will employ measures that will improve my ability to lead the Army. It is essential in this complex environment that we continue to learn and adapt to ensure that our skills remain current and able to meet our future challenges.

Question. What duties and responsibilities would you plan to assign to the Vice Chief of Staff of the Army?

Answer. If confirmed as Chief of Staff of the Army, I would ensure the Vice Chief of Staff is responsible for providing me advice and assistance in the execution of my duties, specifically with regard to manpower and personnel; logistics; operations and plans; requirements and programs; intelligence; command, control and communications; and readiness. I will review other duties and responsibilities for the Vice Chief of Staff of the Army as appropriate after discussions with him and the Secretary of the Army.

RELATIONSHIPS

Question. If confirmed, what would be your working relationship with:

- a. The Secretary of Defense.

The Chief of Staff of the Army must have a close working relationship with the Secretary of Defense. If confirmed, I will be responsible to the Secretary of Defense and his Deputy, through the Secretary of the Army, for the operation of the Army in accordance with the Secretary of Defense's guidance and direction. If confirmed, as a member of the Joint Chiefs of Staff, I will serve as a military adviser to the President, the National Security Council, and the Secretary of Defense as appropriate. I will cooperate fully with the Secretary of Defense to ensure that the Army properly implements the policies established by his office. In coordination with the

Secretary of the Army, I will communicate with the Secretary of Defense in articulating the views of the Army.

b. The Deputy Secretary of Defense.

The Deputy Secretary of Defense performs such duties and exercises such power as the Secretary of Defense may prescribe. If confirmed, I will be responsible to the Secretary of Defense, and his deputy, through the Secretary of the Army, for the operation of the Army in accordance with the Secretary's guidance and direction. Also, in coordination with the Secretary of the Army, I will communicate with the Deputy Secretary in articulating the views of the Army. I will work closely with all to ensure that the Army is administered in accordance with the guidance and direction issued by the Office of the Secretary of Defense.

c. The Under Secretaries of Defense.

Acting on behalf of the Secretary of Defense, the Under Secretaries perform responsibilities that require them, from time to time, to issue guidance and instruction as approved by the Secretary of Defense—and in the case of the Under Secretary of Defense for Acquisition, Technology, and Logistics, direction—to the Military Departments. If confirmed, in coordination with the Secretary of the Army, I will communicate with the Under Secretaries in articulating the views of the Army. I will work closely with the Under Secretaries to ensure that the Army is administered in accordance with the Office of the Secretary of Defense's guidance and direction.

d. The Chairman of the Joint Chiefs of Staff.

The Chairman of the Joint Chiefs of Staff is the principal military advisor to the President, the National Security Council, and the Secretary of Defense. Subject to the authority, direction, and control of the President and the Secretary of Defense, the Chairman plans the strategic direction and contingency operations of the armed forces; advises the Secretary of Defense on requirements, programs, and budgets that the combatant commanders identify; develops doctrine for the joint employment of the Armed Forces; reports on assignment of functions (or roles and missions) to the Armed Forces; provides for representation of the United States on the Military Staff Committee of the United Nations; and performs such other duties as the law or the President or Secretary of Defense may prescribe.

In conjunction with the other members of the Joint Chiefs, the Chief of Staff of the Army assists the Chairman in providing military advice to the President, the National Security Council, and the Secretary of Defense. If confirmed as a member of the Joint Chiefs of Staff, I will provide my individual military advice to the President, the National Security Council, and the Secretary of Defense. If confirmed, it would be my duty as a member of the Joint Chiefs of Staff to provide frank and timely advice and opinions to the Chairman to assist him in his performance of these responsibilities. If confirmed, and as appropriate, I will also provide advice in addition to or in disagreement with that of the Chairman. I will establish and maintain a close and professional relationship with the Chairman, and I will communicate directly and openly with him on any policy matters impacting the Army and the Armed Forces as a whole.

e. The Vice Chairman of the Joint Chiefs of Staff.

The Vice Chairman of the Joint Chiefs of Staff assists the Chairman in providing military advice to the Secretary of Defense and the President. If confirmed, it would be my duty as a member of the Joint Chiefs of Staff to ensure that the Vice Chairman receives my frank views and opinions to assist him in performing his responsibilities.

f. The Chiefs of the Other Services.

If confirmed, as a member of the Joint Chiefs of Staff, it would be my duty to engage in frank and timely exchanges of advice and opinions with my fellow Service Chiefs. I look forward to developing strong working relationships with these colleagues, if I am confirmed.

g. The Combatant Commanders.

The combatant commanders are responsible to fight our wars and conduct joint military operations around the world. Title 10, U.S. Code, section 165 provides that, subject to the authority, direction and control of the Secretary of Defense, and subject to the authority of the combatant commanders, the Service Secretaries are responsible for administration and support of forces that are assigned to unified and specified commands. If confirmed, I will cooperate fully with the combatant commanders in performing these administrative and support responsibilities. I will establish close, professional relationships with the combatant commanders and I will communicate directly and openly with them on matters involving the Department of the Army and Army forces and personnel assigned to or supporting the combatant commands.

h. The Army Component Commanders of the Combatant Commands

The Army component commanders of the combatant commands exercise command and control under the authority and direction of the combatant commanders to whom they are assigned and in accordance with the policies and procedures established by the Secretary of Defense. The combatant commanders normally delegate operational control of Army forces to the Army Component Commander. The Secretary of the Army generally delegates administrative control of Army forces assigned to the combatant commander to the Army component commander of that combatant command. The Army Component Commander is responsible for recommendations to the Joint Force Commander on the allocation and employment of Army forces within the combatant command. If confirmed, I will cooperate fully with the combatant commanders and Army Component Commanders in performing these responsibilities.

i. The Secretary of the Army.

If confirmed, I will establish a close, direct, and supportive relationship with the Secretary of the Army. Within the Department of the Army, my primary responsibilities as Chief of Staff are to perform all duties assigned to me by the Secretary and to serve as the Secretary's principal military adviser. My responsibilities would also involve communicating the Army Staff's plans to the Secretary and supervising the implementation of the Secretary's decisions through the Army Staff, commands, and agencies. My actions would be subject to the authority, direction, and control of the Secretary. In my capacity as a member of the Joint Chiefs of Staff, I would also be responsible for appropriately informing the Secretary about conclusions reached by the Joint Chiefs of Staff and about significant military operations, to the extent this would not impair my independence in performing my duties as a member of the Joint Chiefs of Staff. If confirmed, I look forward to working closely and in concert with the Secretary of the Army to establish the best policies for the Army, taking into account national interests.

j. The Under Secretary of the Army.

The Under Secretary of the Army is the Secretary's senior civilian assistant and principal adviser on matters related to the management and operation of the Army. The Under Secretary of the Army performs such duties and exercises such powers as prescribed by the Secretary of the Army. The Under Secretary's responsibilities require him, from time to time, to issue guidance and direction to the Army Staff. If confirmed, I will be responsible to the Secretary and to the Under Secretary for the operation of the Army in accordance with such directives. I will cooperate fully with the Under Secretary to ensure that the policies that the Office of the Secretary of the Army establishes are implemented properly. I will communicate openly and directly with the Under Secretary in articulating the views of the Army Staff, commands, and agencies.

k. The Vice Chief of Staff of the Army.

The Vice Chief of Staff of the Army serves as the principal advisor and assistant to the Chief of Staff. If confirmed, I will establish and maintain a close, professional relationship with Vice Chief of Staff of the Army.

l. The Assistant Secretaries of the Army.

The Assistant Secretaries of the Army have functional responsibilities that, from time to time, require them to issue guidance to the Army Staff and to the Army as a whole. If confirmed, I will establish and maintain close, professional relationships with the Assistant Secretaries in order to foster an environment of cooperative teamwork between the Army Staff and the Army Secretariat as we address the Army's day-to-day management and long-range planning requirements.

m. The General Counsel of the Army.

The General Counsel is the legal counsel to the Secretary of the Army and the chief legal officer of the Department of the Army. The duties of the General Counsel include coordinating legal and policy advice to all members of the Department regarding matters of interest to the Secretariat, as well as determining the position of the Army on any legal question or procedure, other than military justice matters, which are assigned to The Judge Advocate General. If confirmed, I will establish and maintain a close, professional relationship with the General Counsel to assist in the performance of these important duties.

n. The Inspector General of the Army.

The Inspector General reports to the Secretary of the Army and is responsible for inspections and certain investigations within the Department of the Army, such as inquiring into and reporting to the Secretary of the Army and the Chief of Staff regarding discipline, efficiency, and economy of the Army with continuing assessment of command, operational, logistical, and administrative effectiveness; and serving as the focal point for the Department of the Army regarding Department of Defense Inspector General inspections and noncriminal investigations, as well as the Department of Defense inspection policy. If confirmed, I will establish and maintain a

close, professional relationship with the Inspector General of the Army to ensure effective accomplishment of these important duties.

o. The Judge Advocate General of the Army.

The Judge Advocate General is the military legal advisor to the Secretary of the Army and all officers and agencies of the Department of the Army. The Judge Advocate General provides legal advice directly to the Chief of Staff and to the Army Staff in matters concerning military justice; environmental law; labor and civilian personnel law; contract, fiscal, and tax law; international law; and the worldwide operational deployment of Army forces. The Chief of Staff does not appoint The Judge Advocate General, and does not have the personal authority to remove her. This enables The Judge Advocate General to provide independent legal advice. If confirmed, I will establish and maintain a close, professional relationship with The Judge Advocate General as my legal advisor and I will assist her in the performance of her important duties as the legal advisor to the Secretary of the Army.

p. The Chief of the National Guard Bureau.

The Chief of the National Guard Bureau heads a joint activity of the Department of Defense and is the senior uniformed National Guard officer responsible for formulating, developing, and coordinating all policies, programs, and plans affecting more than half a million Army and Air National Guard personnel. Appointed by the President, he serves as principal advisor to the Secretary of Defense through the Chairman of the Joint Chiefs of Staff on National Guard matters. He is also the principal advisor to the Secretary and Chief of Staff of the Army and the Secretary and Chief of Staff of the Air Force on all National Guard issues. As National Guard Bureau Chief, he serves as the department's official channel of communication with the Governors and Adjutants General. As a member of the Joint Chiefs of Staff, the Chief of the National Guard Bureau has the specific responsibility of addressing matters involving non-Federalized National Guard forces in support of homeland defense and civil support missions. If confirmed, I will establish and maintain a close, professional relationship with the Chief, National Guard Bureau to foster an environment of cooperative teamwork between the Army Staff and the National Guard Bureau, as we deal together with the day-to-day management and long-range planning requirements facing the Army.

q. The Director of the Army National Guard.

The Director, Army National Guard is responsible for assisting the Chief, National Guard Bureau in carrying out the functions of the National Guard Bureau, as they relate to the Army National Guard. If confirmed, I will establish and maintain a close, professional relationship with the Director, Army National Guard to foster an environment of cooperative teamwork between the Army Staff and the National Guard Bureau. This will be essential as we deal together with the day-to-day management and long-range planning requirements facing the Army to sustain and improve the Army National Guard's operational capabilities.

r. The Chief of the Army Reserve.

Appointed by the President, the Chief, Army Reserve is the advisor to the Chief of Staff of the Army on Army Reserve matters, and is responsible for justifying and executing the Army Reserve's personnel, operation and maintenance, and construction budgets. As such, the Chief, Army Reserve is the director and functional manager of appropriations made for the Army Reserve in those areas. In addition, the Chief, Army Reserve is responsible for managing the Army Reserve's Full Time Support Program and submitting an annual report on the state of the Army Reserve through the Secretary of the Army to the Secretary of Defense. If confirmed, I will establish and maintain a close, professional relationship with the Chief, Army Reserve as we deal together with the Army's day-to-day management and long-range planning requirements in order to sustain and improve the Army Reserve's operational capabilities.

VISION FOR THE FUTURE

Question. What is your vision for the Army of today and the future?

The U.S. Army is and must remain the world's premier ground combat force capable of conducting sustained campaigns on land to achieve U.S. National Security objectives and remain true to our national values. The Army is the force, an all volunteer force, uniquely capable of winning a decision favorable to the U.S. In order to sustain our edge over any adversary, the U.S. Army must be lethal, agile, adaptive, innovative, and expeditionary; armed with leader, technological and training overmatch. Additionally, the Army, combined with the effects of the Navy, Air Force, Marines, Cyber, Space, and Special Operations Forces, must present our opponent with overwhelming simultaneous multiple dimension problems that paralyze and cause his defeat.

Question. Given your vision, is the Army ready to meet current demands from combatant commanders, downsize the force, modernize and improve readiness while transforming? How will you balance these competing demands?

Answer. I recognize, in the face of increasing demands and declining resources, we will be forced to assume risk in some areas. If confirmed, I will ensure we make those hard decisions through a rigorous and deliberate process with the assistance and input of Congress. I am concerned that the Army has been required to assume future risk by underfunding modernization, and if confirmed, I will work to ensure that the Army has the resources to meet the current demands of the combatant commanders while transforming and modernizing to be successful in the future.

I have no illusion that balancing competing demands to fulfill the National Security Strategy and the combatant commander's requirements while significantly downsizing the force in a fiscally constrained and uncertain environment will be exceptionally difficult. However the Army, as we have for 240 years, will meet the challenge with innovative and adaptive leadership and with disciplined and committed soldiers. If confirmed, readiness will remain an inviolate benchmark and #1 priority—no American soldier must ever deploy to combat unready. It is my solemn commitment that our troops will be rigorously trained, possess the best equipment and be led by leaders of character, competence and courage.

Question. Across the continuum of conflict, as described in the National Military Strategy in what areas is the Army currently best prepared for? Is this where the Army needs to be given emerging and future threats?

As the Nation's principal ground military force, the Army has the obligation to be ready to conduct sustained land operations across the spectrum of conflict and win in ground combat. We cannot allow ourselves to focus too narrowly on any one scenario. Right now, the U.S. Army is highly skilled in counterterrorist and contingency operations along with advisory skills and building partner capacity. Given emerging and future threats, we will need to sustain our counterterrorist, counterinsurgency, advisory, and build partner capacity skills while rebuilding our combined arms conventional warfighter skills for offense, defense, and stability. Further, we must improve our mission command, aviation, fire support, engineer, and sustainment skills. Lastly, we must develop our cyber force to a much higher level of capability. If confirmed, I will continually assess and collaborate with the other Service Chiefs and adapt the Army to first meet current needs and position itself for the future.

MAJOR CHALLENGES AND PRIORITIES

Question. In your view, what are the major challenges that will confront the next Chief of Staff of the Army?

Russia, China, North Korea, Iran, ISIS and radical violent extremist organizations currently challenge the United States each in their own way and will likely continue for some time into the future. These security challenges exist within a wider context of rapid technological change, significant demographic change, global economic uncertainty, and geostrategic power shifts of historic proportions. Right now the level of uncertainty, the velocity of instability, and potential for significant inter-state conflict is higher than it has been since the end of the Cold War in 1989–91. These challenges and global context unfold while the U.S. is likely to continue fiscal uncertainty and the U.S. Army will continue to shrink. However, as a result of the global situation, the demand for ground forces will continue to increase even more so since many of our longstanding allies have significantly reduced their military forces over the last 25 years. Maintaining both capacity and capability in all three components of the U.S. Army in a rapidly changing and volatile security and fiscal environment will be our greatest challenge while simultaneously posturing the Army for the future beyond 2020. The next four years will bring to the forefront the challenge of maintaining tactical and operational advantage over our adversaries. The Army currently benefits from an overmatch that enables a historically small number of soldiers to accomplish significant operations while minimizing casualties. This advantage has a shelf life; the technologies that gave us the advantage today are increasingly available to state and non-state adversaries at dramatically lower cost than even a decade ago. As that overmatch degrades, the risk to soldiers increases. Maintaining readiness in the near term and retaining capacity while creating capability for the mid and long term will be the Army's greatest challenge given the threat, global context, and domestic fiscal environment.

Question. Assuming you are confirmed, what plans do you have for addressing these challenges?

Recognizing the environment we are in, I see two near term imperatives for the Army. First, we must build and maintain readiness across the Total Force. This

readiness must reflect both sufficient capacity to meet the demand for Army forces and proficiency in the multitude of capabilities that enable the Army to accomplish its diverse missions. Second, we must plan and invest for the future. I see this done through a deliberate science and technology strategy that seeks to exploit research that has the potential for leap ahead capabilities in the areas of “shoot, move, communicate, and mission command.”

If confirmed, I will continue to work closely with Congress and address these challenges. We will continue to refine and update our training programs to ensure all our soldiers are fully prepared to deploy to combat. We will continue to review our reset, force modernization and acquisition programs in order to more efficiently meet the needs and requirements of today and the future threat. I will work closely with the Secretary of Defense, Secretary of the Army and the combatant commanders to identify those capabilities needed to provide depth and versatility to the joint force in order to provide more effective and flexible forces for employment. I will continue to review and adjust leader development programs in order to develop thinking, adaptable, agile decision makers necessary to operate in an increasingly complex and unpredictable environment. I will review our soldier and Family Programs to ensure we are meeting their needs.

Question. What do you consider to be the most serious problems in the performance of the functions of the Chief of Staff of the Army?

At this point, I am not aware of any problems that would impede the performance of the Chief of Staff of the Army.

Question. If confirmed, what management actions and time-lines would you establish to address these problems?

If confirmed, I will vigorously uphold the standards expected by the American people and undertake a deliberate review of key policies to ensure that the Army is meeting its current responsibilities and is postured to meet the challenges of the future. I will work to maintain open lines of communication with this committee, and Congress writ large, so that I might benefit from the collective wisdom and experience.

I will also remain committed to improve, and if necessary, establish management systems that provide good stewardship of the precious, limited and valuable resources that the American people have given us to accomplish our mission.

Question. If confirmed, what broad priorities will you establish?

I will work closely with the Secretary of the Army to establish Army priorities within the guidelines of the President and Secretary of Defense. Within that framework, my #1 priority, if confirmed, will be readiness across the Total Force. When the Nation calls, the Army must be ready with soldiers that are confident they are well trained, well armed, and well led. At the same time, our #2 priority is to invest in the technologies, organization, and doctrine that will allow us to maintain overmatch against future adversaries while retaining the ability to adapt to unforeseen challenges. Additional priorities will include:

- Keep faith with the All Volunteer Force.
- Maintain our values and close relationship with the American People.
- Protect the Force—Our most valuable asset is our people—soldiers, families, civilians—and each deserve to be treated with dignity and respect and be afforded the best quality of life and an equal opportunity to excel based on their merit.
- Develop leaders of character, competence and resilience that are fit, agile, adaptive, and innovative.

ORGANIZE, TRAIN, AND EQUIP RESPONSIBILITY

Question. The Chief of Staff is responsible for organizing, training and equipping forces provided to fleet and component commanders, including the prioritization of funding and effort to meet these needs in the near term, while developing capabilities for the far term.

How would you characterize your experience in force management and capability requirement decisions?

Answer. While leading Forces Command it is my job to ensure that the Army is able to provide a sustained supply of highly capable land forces to combatant commanders. In that role, I became intimately familiar with both the combatant commanders' requirements and the Army forces ready to meet them. Additionally, my time serving on the Joint Staff and as the Military Assistant to the Secretary of Defense provided me significant experiences with the longer term challenges facing our military and the critical investment decisions that must be made now to ensure we have the capabilities we will need in the future.

Question. What innovative ideas are you considering for organizing, training and equipping the Army?

Answer. A decade and a half of war has taught us that the Army must continually adapt to the missions assigned and the operating environment. The Army will continue to innovate as we did in Iraq and Afghanistan, focusing our efforts on what soldiers and commanders need to accomplish their missions. Our organizational structures need agility in order to meet the combatant commanders' request for forces; our training must be realistic so that it meets the unique needs of the units' assigned mission, while developing the skills to fight and win future wars as part of the Joint Force. We need to procure equipment that is technologically feasible so that we can quickly and cost effectively provide incremental improvements to the field.

There are a wide variety of emerging technologies that may have significant impact on ground warfare including technologies in communications for mission command, robotics, nano-technologies, human performance, explosives and propellants, hypersonics, directed energy, cyber, protective materials for personnel and equipment, and a variety of developments in weapons technologies. All of these and more are areas of innovation the Army will explore in depth to assess applicability at affordable cost.

SECURITY STRATEGIES AND GUIDANCE

Question. How would you characterize current trends in the range and diversity of threats to national security we face today?

Answer. The range and diversity of potential threats is increasing concurrent with increasing instability in many parts of the world. Our adversaries—both state and non-state—recognize the limits of our capabilities and capacity. Both state and non-state adversaries have employed novel capabilities, created by combining increasingly available military and commercial technologies. Accordingly, our enemies are increasingly using “hybrid” warfare methods that blend aspects of conventional and irregular warfare. This creates ambiguity and achieves adversary gains below the threshold that has historically triggered a U.S. or Allied military response. However, given the increased uncertainty, and velocity of global instability converging with rapid technological, demographic, economic, and geo-strategic power shifts, it is my view that significant conflict with adversary-state or non-state actors threatening vital U.S. interests is increasing in all likelihood.

Question. The Defense Strategic Guidance issued January 2012 took into account a \$487 billion dollar reduction in defense resources.

With the additional \$500 billion in cuts to the Department of Defense as a result of sequestration, is the Defense Strategic Guidance still valid?

Answer. No. The additional cuts imposed by sequestration would impose a significant departure from the level of resources that the Defense Strategic Guidance (DSG) assumed. Sequestration will force the Army to reduce end strength, readiness, and nearly halt modernization. The consequences of these forced actions would degrade our ability to provide the trained and ready forces that the DSG requires and increase risk to the point where the U.S. Army could not fulfill the missions assigned to us in our National Security strategic guidance documents. In short, our ways and means will be significantly out of balance with our stated ends, which will increase risk to an unacceptable level for the Nation. If confirmed, I will provide my best military advice to properly balance the national strategic ends-ways-means in order to maintain National Security risk at acceptable levels.

Question. In your view, as the Defense Strategic Guidance was issued in January 2012, is that strategic guidance still appropriate for the threats we face today or do you think an update is warranted?

Answer. The 2012 Defense Strategic Guidance was based upon a number of assumptions, such as the duration of conflicts, the contributions of our allies, and the nature and location of future threats. Some of these assumptions now appear optimistic, particularly in light of the rise of ISIL, a resurgent Russia, Iran's actions in the Middle East, and challenges in the Pacific region. If confirmed, I will provide my best military advice to inform policy and guidance as we move forward to confront current and future threats.

Question. In your view, is our defense strategy and current establishment optimally structured, with the roles and missions of the Military Departments appropriately distributed, and U.S. forces properly armed, trained, and equipped to meet security challenges the Nation faces today and into the next decade?

Answer. I believe the structure of the defense establishment and the roles and missions of the services are sound. In my view, we need to continually reassess our defense strategy in order to update it to account for the changing security environ-

ment. Resourcing levels must also remain predictable and aligned with our national objectives. I am concerned that we may underestimate the degree of readiness, end strength, and modernization required to confront current and future security challenges.

Question. If confirmed, what changes, if any, would you propose to the capabilities, structure, roles, and missions of the Army?

Answer. If confirmed, I will conduct a deliberate strategic assessment to identify any needed changes to the Total Army's capabilities, structure, roles, and missions. Such assessments will also evaluate capacity. In doing so, I will work with the Chairman, Joint Chiefs of Staff, Services Chiefs, and combatant commanders along with both the Secretary of the Army and Defense to ensure the Army is the right size, with the right structure, and doing the right mission to protect the Nation.

MILITARY CAPABILITIES IN SUPPORT OF DEFENSE STRATEGY

Question. In your opinion, do current military plans include the necessary capabilities to meet the defense strategy stated in the 2014 Quadrennial Defense Review (QDR) and the 2015 National Military Strategy? Please identify areas of higher risk.

Answer. The defense strategy provides that the Army, as part of the Joint Force, has to accomplish three tasks. The first priority is to defend the homeland; the Army can meet our responsibilities in this mission set. The second task is build security globally. While we have the capability required, increasing demand for Army forces, while our force is getting smaller, strains capacity. We remain engaged in Afghanistan, Iraq, Korea, Europe, the greater Middle East, Africa, South America, and the Pacific region. The stress of increased missions on a smaller force is something I am especially concerned about. Tempo will likely increase given the instability around the world and the reduction of defense spending by our allies and partners. Lastly, the defense strategy tasks the Army to project power and win decisively. Here, the risk is significant and trending higher as we train our decisive action capability and meet warplan requirements with a smaller, less resourced force.

Question. Does the 2014 QDR specify the correct set of capabilities to decisively win in future state to state conflict?

Answer. The 2014 QDR was based on a set of facts and assumptions that did not include the current situation in Eastern Europe and Russia, the rise and spread of ISIS along with the disintegration of the nation-state in the Middle East, and the increasing military capability and foreign policy assertiveness of China. In short, the world has become more uncertain and unstable since the 2014 QDR was written and consequently we need to review the global assumptions and calculations embedded in the 2014 QDR in order to ensure the capabilities and priorities align to the realities of the emerging situation.

Question. According to the force sizing construct in the 2014 QDR, American forces should be able to "defeat a regional adversary in a large-scale multi-phased campaign, and deny the objectives of—or impose unacceptable costs on—another aggressor in another region."

In your opinion, is the Army adequately sized to meet the Department's force sizing construct in order to address the country's current threat environment?

Answer. The current Chief of Staff of the Army, General Ray Odierno, has testified that the Army size in PB16 of 450,000 Regular Army, 335,000 Army National Guard, and 195,000 U.S. Army Reserve is adequate to meet the demands of the current and future threats but at "significant risk."

If confirmed, I pledge to work closely with the Secretary of Defense, the Secretary of the Army, the Chairman of the Joint Chiefs, and our combatant commanders to match end strength, structure, and tempo in our Army Force Generation rotational model to meet global demands as they change. I will continually evaluate the size and capability of the Total Army against emerging threats and provide candid assessments on our risk to our senior civilian leadership including the President, The Secretary of Defense, The Secretary of the Army, the National Security Council, and Members of the U.S. Congress.

Question. If the Army cannot meet the demands placed on it, how will you address this issue?

Answer. If confirmed, if I ever believe that in my professional military judgment that the Army cannot meet the demands in place, I will inform the Chairman of the Joint Chiefs, the Secretary of the Army, the Secretary of Defense and, if necessary, in my role as a member of the Joint Chiefs, the President. As a Nation, we must build our strategy based on the threat, resources available, and tolerance for risk. I will always provide my candid best military advice to protect our Nation.

SEQUESTERED BUDGET CONTROL ACT DISCRETIONARY CAPS STARTING IN FISCAL YEAR
2016 ONWARD?

Question. The fiscal year 2016 budget request assumes that the Budget Control Act will be amended in fiscal year 2016. The fiscal year 2016 Budget Resolution passed by the Senate and House of Representatives do not assume this, but instead provides \$38 billion of the requested spending through the Overseas Contingency Operations (OCO) budget.

Should this OCO funding not be available, what recommendations would you have, if confirmed, for how the Army should manage additional cuts for fiscal year 2016?

Answer. This \$38 billion constitutes the difference between the Fiscal Year 2016 President Budget request for Base requirements and the BCA funding level for DOD (\$538 billion–\$500 billion). The Army's portion of this \$38 billion is \$6 billion (\$126 billion–\$120 billion). For comparison, the fiscal year 2015 Base funding level is \$120.6 billion, an amount that has created resourcing and readiness challenges this year.

The President's Budget request represents the minimum resources necessary for the Army to support the National Security Strategy. A sequestered level budget will further reduce readiness and disrupt modernization efforts. Should the government not provide the \$38 billion through additive OCO funding or another source, the Army would have no alternative than to further reduce structure, unit readiness and will all but stop investment in its Research, Development and Acquisition programs. The Army already reduced its force structure and military endstrength to the extent possible in fiscal year 2016. Impacts to readiness will include cancellation of home-station training, reduced maintenance and upkeep of facilities infrastructure; reduced logistics and maintenance readiness and IT & Cyber security would be further marginalized. The Army would reduce its investment account funding by approximately 12 percent of its requested amount, spread across its RDTE and procurement accounts.

Question. What are your views on the impact that these cuts could have on readiness for the Army?

Answer. The Budget Control Act degrades Army readiness. In the context of increased, unforecasted global demand, it creates the single greatest risk by undermining the Army's ability to provide the necessary capacity and capabilities for contingency operations, forcing the Army to ration readiness. Regardless of funding levels, if confirmed, I will keep training opportunities at our Combat Training Centers (CTCs) a priority. The trade off will mean significant reductions to home-station training, except for brigades going to CTCs, which will compound the readiness reductions. Subsequent decisions to commit Army forces will come with high risk and force senior leaders to choose between: committing Army units at lower readiness levels or delaying military operations. Long term consequences of underfunding are significant as operational readiness requires a cumulative investment and consistent funding. The Army needs consistent and predictable funding year after year to ensure it maintains a level of readiness commensurate with the current operational demands; we don't have the luxury of long train-up times to react to the emerging and immediate contingencies in the current security environment.

Question. What are your views on the impact that these cuts could have on Army capabilities?

Answer. Sequestration-level cuts leave the Army unable to meet Defense Strategic Guidance, including our ability to shape and prevent conflict in Europe and the Pacific and to deter adversaries across the globe.

Budget Control Act funding reductions will require the Army to further reduce force structure and end strength, and readiness levels and further delay modernization. My concern is the smaller force will lack the capacity to meet the Nation's security needs as currently outlined in the National Defense Strategy. Furthermore, modernization reductions will diminish equipping capacity and capability well into the future.

HEADQUARTERS STREAMLINING

Question. The Senate-passed Fiscal Year 2016 National Defense Authorization Act directs reforms to consolidate the headquarters functions of the Department of Defense and the Military Departments.

If confirmed, and if the provisions in the bill become law, what would be your role in streamlining functions, as well as identifying and implementing reductions in the Army headquarters?

Answer. Over the course of the last two years, the Army assessed all of its Department Headquarters functions as required by the Department of Defense. Plan-

ning and implementation for reductions is already well underway. Associated with these reductions, each element of the Headquarters has closely examined the functions they perform with an eye towards streamlining, modernizing or eliminating the function. Should legislation impose further reductions, I would expect, if confirmed as Chief of Staff, that I would play a key role in advising the Secretary of the Army where I believe we can and cannot accept additional risk in our key Headquarters missions.

Question. What areas and functions, if any, do you consider to be priorities for possible consolidation or reductions within the Army?

Answer. As a result of continued downward trends in our funding, the Army has, over the last four years, made great strides in eliminating unnecessary functions and organizations. I am proud of what the Army has been able to accomplish despite losing billions of dollars of base budget funding. Having said that, there are always ways to streamline processes and functions. If confirmed, I will continue to push for smarter ways of doing business in order to apply maximum resources toward increased readiness. In pursuing these opportunities, the Army needs to go where the best value lies, examining each situation with a clear-eyed cost/benefit perspective. If confirmed, I intend to continue reducing Headquarters size and functions in order to optimize the tooth-to-tail ratio in favor of combat power in the Operating Force.

Question. To the extent that the Army has functions that overlap with the Department of Defense, Joint Staff, or other Military Departments, what would be your approach to consolidating and reducing redundancy?

Answer. The Army cannot avoid making tough choices in this budget environment. If confirmed, my priorities will be the readiness of our forces and the care and support of our soldiers, their families and our great civilian workforce. If another element of DOD can better accomplish a function currently performed by the Army, then I will so advise the Secretary of the Army. Similarly, if a function currently performed by another element of DOD can be better performed by the Army, it should be looked at as well. The Army cannot afford to be bound by the way functions and processes have been performed in the past and must make the best decisions for our Nation and our Armed Forces.

Question. Given the plan the Army announced on July 9, 2015, to downsize the regular Army by 40,000 soldiers, is headquarters downsizing a component of this plan? If so, what are the goals?

Answer. The reduction of headquarters is part of the Army downsizing; the planning and implementation of this is well underway. The goal is to reduce all 2-star and above headquarters, both military and civilian, as directed by the Secretary of the Army. If confirmed, I plan to further review this plan and continue to streamline headquarters strengths in order to retain as much combat power as possible and further reduce the Army's tooth-to-tail ratio.

INTERNATIONAL PARTNERSHIPS

Question. Interactions between the land forces of different countries are often negotiated at the Chief of Staff level, including international exercises, Foreign Military Sales, educational exchanges, and protocols for operations.

If confirmed, how do plan to ensure the U.S. Army continues to build strong partnerships, overcome challenges, and exploit opportunities in international cooperation?

Answer. If confirmed, I will emphasize our support to the combatant commanders as well as other international engagement programs. These include bilateral staff talks with more than two dozen allies and partners; adequate resourcing for our regionally aligned forces to participate in international exercises; sustaining foreign student attendance at the War College and Command and Staff College and other professional military education; maximizing U.S. participation at their schools through the Schools of Other Nations Program; continuing to expand the Military Personnel Exchange Program; and continuing to invest in the Army's Foreign Area Officer program. Maintaining strong allied partnerships will be one of my goals as Chief of Staff and I recognize that Allies are key to the long-term national security of the United States.

Question. How would you characterize your familiarity with international military leaders, forums, and processes?

Answer. At almost every rank over the course of my 35 year career, I have had the opportunity to work closely with our international partners during exercises and contingency operations and developed insights into foreign militaries and processes. As a Captain, I worked closely with the Colombian Army for nearly eight months. As a Special Forces Captain I worked closely with indigenous forces in Somalia. As

a Major, I was the S-3 Operations Officer for 2nd BCT, 10th Mountain Division, during Operation Uphold Democracy in Haiti and worked with multiple allied partners to include Argentinean leaders and those from six Caribbean nations. As a Lieutenant Colonel Battalion Commander in Korea, I worked closely with the 1st ROK Division along the DMZ. As a Colonel in command of the 2nd BCT, 10th Mountain Division, I worked closely with multiple armies in Afghanistan, to include international NATO Partners and the Afghan National Security Forces. In Iraq, in command of the same brigade, I worked closely with United Kingdom and Polish Forces, along with Iraqi Security Forces. As Deputy Commanding General for Regional Command-East in Afghanistan, I worked closely with multiple NATO allies, our Afghan Partners, and Pakistani military. As the Commanding General of ISAF Joint Command in Afghanistan, I was responsible for the planning and operations of coalition partners across the country. The coalition included over approximately 50 nations and my staff included senior leaders from many of these countries allowing me to incorporate several staff systems from partner nations. Most recently, as the Commanding General of United States Army Forces Command, I visited the United Kingdom and observed their force generation processes and operational systems and have had visits from several other key allies including Japan. If confirmed, I plan to continue to work closely with our international partners and allies throughout the world.

JOINT OPERATIONS

Question. How would you characterize your familiarity with other Services' capabilities including how they organize, train and equip their forces?

Answer. During my 35 years in uniform and through multiple joint assignments in addition to seven contingency deployments, I have had the opportunity to serve with and develop deep appreciation for the other Services' unique capabilities. I have worked very closely with the U.S. Air Force, Navy, Marines, and Coast Guard over many years in multiple capacities. If confirmed, I look forward to deepening my understanding by working closely with the fellow Service Chiefs as part of the Joint Chiefs of Staff.

Question. Are there other innovative ideas you are considering to increase Joint interoperability and ensure opportunities to improve cross-domain capability and capacity are not missed?

Answer. The Army is actively involved in joint concept development, war-gaming, and experimentation, all designed to improve cross-domain capability and capacity. If confirmed, I will work to ensure that sufficient resources are applied to implement change and enhance joint interoperability. This is a key task—the Army will always operate as part of the U.S. Joint Force.

UNITED STATES FORCE POSTURE IN THE ASIA-PACIFIC REGION

Question. The Department continues the effort to rebalance toward the Asia-Pacific as announced in the January 2012 Strategic Defense Guidance.

Are you satisfied with the rebalance efforts to date?

Answer. Yes, I am satisfied with the Army's rebalance efforts to the Asia-Pacific region to date and I will continue to emphasize the importance of the Asia-Pacific region if confirmed. Approximately 20 percent of the Active Army is assigned to U.S. Pacific Command. This includes one Corps Headquarters, two Division Headquarters, five Brigade Combat Teams and one Armored Brigade Combat Team's worth of equipment prepositioned on the Korean Peninsula. We are replacing forward stationed units with ready rotational units. For example, the Army is providing USPACOM with rotational forces, such as Terminal High Altitude Area Defense missile batteries and an Armored Brigade Combat Team. Shaping activities such as Pacific Pathways builds partner-nation capacity and multinational interoperability while also enhancing U.S. Army unit readiness and fostering an expeditionary mindset across the force. Both the size and importance of the Asia-Pacific region defines an integrated multi-service approach as a near imperative. Consistent with the Army's Regionally Aligned Forces policy, the Army's current force posture in the Asia-Pacific ensures that it is prepared to set the theater, shape the security environment and respond to contingencies across the full range of military operations in support of the combatant commander and National Strategic objectives.

Question. What do you see as the United States security priorities in the Asia-Pacific region over the next couple of years and what specific Army capabilities or enhancements are needed in to meet those priorities?

United States security priorities in the Asia-Pacific over the next several years are to maintain a credible deterrent posture and provide reassuring military presence in the region in order to maintain regional stability. The United States should

also work to strengthen and advance alliances and partnerships, continue to mature our military relationships, and maintain peace on the Korean Peninsula. We must work with our interagency and multinational partners to bring about the verifiable elimination of North Korea's nuclear weapons program. I also believe that the United States should continue to mature its strategic relationship with India, and work with our interagency and multinational partners in the region to counter transnational threats.

The Army contributes to rebalancing these priorities with a variety of Army Forces committed to the region in Korea, Japan, Hawaii, Alaska, and at Joint Base Lewis-McChord, along with rapid deployment capabilities in the Global Response Force. Through routine exercises and engagements such as Pacific Pathways and forward deployed forces in the Republic of Korea and Japan, the Army assures allies, deters adversaries and remains capable of responding to contingencies if required.

Question. Do the budget cuts and resource constraints associated with sequestration threaten the Army's ability to execute the rebalance to the Pacific?

Answer. Yes, budget cuts and resource constraints associated with the Budget Control Act and sequestration require the Army to reduce force structure, limit training and curtail modernization programs. The United States will continue to maintain a robust military footprint and pursue international agreements in key locations, to include the Asia-Pacific. Even in smaller numbers, the presence of soldiers is a strong security guarantee to U.S. allies and partners. Further, initiatives like Pacific Pathways demonstrate the United States' commitment to its Allies and partners by establishing a dynamic presence in the region. I am confident that our partners in the region want us to stand by our commitments to them.

RUSSIA

Question. What additional steps, if any, are likely to prove most effective at deterring Russian aggression in Eastern Europe?

Answer. To best deter Russian aggression, the United States must continue to work with allies using all the elements of national power. Militarily, I think it prudent for the Army to continue to work with NATO to strengthen its European posture and demonstrate the combined ability to respond with capable ground forces in Eastern Europe through a variety of exercises and prepositioning equipment contingency stocks. If confirmed, I would ensure that the Army supports NATO and EUCOM efforts to maintain and adapt capabilities, readiness, and responsiveness in our commitment to the sovereignty and security of every ally. In my view, we should also continue to fund European Reassurance Initiative at current or increased levels.

Question. What is the Army doing to help NATO? What more can the Army do?

Answer. The Army is supporting NATO with a number of initiatives. First, the Army demonstrates the United States' continued commitment to NATO through Operation Atlantic Resolve (OAR) actions and exercises designed to deter further Russian aggression and reassure NATO Allies and partners by maintaining a persistent Army presence in Central and Eastern Europe. Second, the Army uses European Reassurance Initiative (ERI) funds to increase the Army's presence and improve military infrastructure on NATO's eastern flank (to include the creation of a complete armored brigade combat team equipment set). Third, the Army supports NATO's Readiness Action Plan (RAP) with forces for the NATO Response Force (NRF). Last, the Army has a forward 2-star command post to assist USEUCOM in force employment and mission command of OAR exercises.

To do more, the Army can expand its support of OAR with additional rotations, leverage future ERI investments such as additional prepositioned equipment sets, and enhance the NRF by providing enablers. Like USPACOM, resource limitations have also affected the Army's support to USEUCOM. The Army can provide more support to Europe by redistributing forces from other theaters, or improve the readiness of uncommitted forces that could respond to Europe. Funding for increased readiness (through ERI) would allow the Army to increase the number of rotational forces. Specifically, the Army could increase the number of exercises and deploy staff expertise to augment our Allied and U.S. headquarters in Europe. Finally, establishing OAR as a "named operation" could allow funds to be used to pay for mobilization and deployment of Army National Guard to Europe as part of an overall program to use conventional ground forces to deter Russian aggression.

Question. Does the Army, as part of a combined joint force, have what it needs in Europe?

Answer. No, because of security condition changes in Europe, the current United States Army posture does not support a comprehensive response according to nec-

essary timelines. However, working with USEUCOM, we are in the process of addressing this posture shortfall and European Reassurance Initiative funding is critical to supporting that effort.

CHINA

Question. What is your assessment of the current state of the United States-China military relationship?

Answer. The United States-China military-to-military relationship is important to the overall bi-lateral relationship. The current state of United States-Sino military relations is stable with elements of both cooperation and competition.

Question. What are your views regarding China's interest in, and commitment to, improving military relations with the United States?

Answer. I am of the opinion all countries act in what they define to be in their national interests. In this respect, I believe China recognizes that it is in its interest to have a positive relationship with the United States military. I support those actions that lead to improved United States-China relations, of which the military plays a part. If confirmed, I am committed to improving military-to-military relations with China. Improved United States-China military-to-military relationships can increase that stability and reduce miscalculations during any crisis or incident situation.

Question. What is your view of the purpose and relative importance of sustained military-to-military relations with China?

Answer. The purpose of sustained military-to-military relations with China is to enable a stable, secure, and prosperous Asia-Pacific region in which the United States, as an enduring Pacific power, is a key leader. This is of particular significance to our five treaty partners in the region, and the relative importance of the region to the U.S. in economic, diplomatic, and military terms.

I believe we should continue to use our military engagement with China to establish deeper cooperation where there is clear, mutual benefit and to enhance dialogues to reduce risk and manage our differences.

Question. What role do you see for the Chief of Staff of the Army in this process?

Answer. If confirmed, my primary role will be to provide trained and ready forces to the combatant commander. Beyond that, the Chief of Staff of the Army's responsibilities include Army to Army engagements, both with China as well as with our treaty allies and partners in the region. As the Department continues to develop the military-to-military relationship with China, it will be important to also deepen cooperation with our allies and partners to maintain a stable and secure Asia-Pacific region.

STRATEGIC LEADERSHIP

Question. How do you plan to foster a dedicated, educated, and assigned group of strategic thinkers and planners who rise to the rank of general officer within the Army?

Answer. Developing strategic thinkers, planners, and leaders is one of the most important things we do, and is grounded in the best possible training, education, and experiences. If confirmed, I will work closely with the Secretary of the Army to make appropriate investments in our officer corps to ensure we provide opportunities for advanced civil schooling, training with industry, joint assignments, multinational experience, and other broadening assignments.

OFFSET TECHNOLOGIES

Question. During the Cold War, the DOD pursued three key technologies to offset the numerical superiority of Soviet conventional forces: precision guided munitions, stealth technology, and satellite-based navigation. These three technologies have given U.S. forces unparalleled superiority until now. However, with advancements by our emerging adversaries, it seems like the military technological superiority is beginning to erode. As a result, it is critical that the United States once again focus on offsetting the erosion of our technology advantages being achieved by our potential adversaries.

Which technology priorities do you believe the Army should be pursuing to maintain the military technological superiority of the United States?

Answer. I understand the concept of the Third Offset Strategy, emphasizing advanced emerging technologies to maintain a qualitative edge over any opponent and I strongly support the Secretary of Defense's Defense Innovation Initiative. The Army's technology priorities enable our future land combat role in the joint fight and align to the Army Operating Concept. If confirmed, my priorities will be to look at increased range and effectiveness; increased use of autonomy to augment existing

capabilities; and technology and approaches that drive down the cost of our systems. Specifically, the Army will explore emerging technologies in:

- Robotics
- Autonomous systems
- Cyber
- Big Data
- IT/Communications/Mission Command
- Human Performance
- Directed Energy weapons/Railguns
- Advanced explosives and propellants
- Nano technology/miniaturization
- Additive manufacturing and 3D printing
- Advanced materials for mobility and protection

Question. What strategies would you recommend be implemented to develop these technology priorities?

Answer. If confirmed, I will review the Army's long range thirty-year planning process and determine if our current investment strategies are appropriate for the future or need to be adjusted.

Question. What role should the Army play in their development?

Answer. The Army must remain globally aware of where and what technology is being developed and be ready to refine, leverage, adapt and/or acquire those that are necessary to retain dominance. If confirmed, I will ensure the Army remains a proponent for the development of these needed technologies—whether they are developed within our own Science and Technology laboratories/Engineering Centers, our sister Service/Agency labs, academia, industry or by our allies.

MODERNIZATION

Question. Is the Army fully modernized to execute its Operating Concept “Win in a Complex World”?

Answer. The Army equipment modernization program is designed in conjunction with the Army Operating Concept to enhance the lethality, mobility, and protection for all of our units and to give them the situational awareness they need in the future. Today, the Army continues to balance requirements for end strength, current readiness, and modernization under the Budget Control Act by accepting risk in equipment modernization. The Army cannot afford to fully equip and sustain the Total Army with the most modern equipment; therefore, we acknowledge fiscal realities by selectively modernizing equipment and formations across the Total Army.

The Army will mitigate future risk to our forces and mission accomplishment through sustained S&T investments, leveraging our current fleets by investing in incremental improvements, and building new by exception. Given fiscal constraints, the Army will likely have to continue to delay our next generation of platforms until they are cost effective and affordable in order to sustain readiness of the force, and maintain sufficient capacity to meet the demands of our National Security Strategy and combatant commanders' requirements.

Question. If it is not, are current acquisition plans adequate to achieve this goal?

Answer. The Army continues to develop acquisition strategies to address the gaps and required capabilities that support the Army Operating Concept (AOC). The acquisition strategies are dependent on stable and predictable resources. Approval of funding levels programmed for this requirement will determine how soon we can meet the approved AOC. If confirmed, I will work closely with Congress to facilitate support for the resourcing and acquisition efforts needed to enable implementation of the AOC.

Question. Does the Army have adequate funding for needed research, development test and evaluation?

Answer. The Army has been forced to make some difficult decisions—balancing force structure, operational readiness, and modernization. Given these three requirements, modernization is the near-term offset for the other two. Within the modernization accounts, I fully support the Army's continued investment in science and technology. Given the fiscal realities facing the Department, I believe that this strategy of spending our diminished modernization budget on science and technology is appropriate as the seed corn that will enable the Army to maintain the overmatch it has today.

Question. Is the Army at risk of being out matched by superior capabilities and weapons?

Answer. Proliferation of advanced technologies and information operations are leveling the playing field and the Army is at risk of being matched by near-peer competitors in the outyears. Additionally, the proliferating commercially available

technology is increasingly user-friendly and has empowered the individual, providing access to capabilities that were once the exclusive domain of countries and their militaries.

SCIENCE AND TECHNOLOGY

Question. One of the main objectives of the defense research enterprise is to develop advanced technologies that will be of benefit to the warfighter. In this regard, it is critical that advancements quickly transition from the development phase into testing and evaluation and ultimately into a procurement program for the warfighter.

What are some of the challenges you see in transitioning technologies effectively from research programs into programs of records?

Answer. In my view, the current acquisition system has not evolved sufficiently to keep pace with technological advances in the defense industry and the pace of the global commercial market. The rates of technological advancement and associated adaptation in today's environment have increased exponentially. I think it is prudent and necessary to adapt our acquisition system and procurement policies accordingly. I look forward to working with OSD and Congress in this important area.

Question. As the Chief of Staff, what steps will you take to ensure that the services are benefitting more quickly and directly from the research being performed by the defense research enterprise?

Answer. If confirmed, I will review the Army's long-range planning process and will encourage this process to look holistically at incorporating the capabilities being developed within the broader defense research enterprise as part of the Army strategy. As necessary, in conjunction with the other Service Chiefs, I will pursue recommendations that will enable the Department to take advantage of advanced technologies and make the process more timely and effective.

Question. Do you feel that defense technologies and systems, especially in areas such as mobile communications, computing, and robotics, are keeping pace with global and commercial technological advances? As you know, robust investment in S&T underpins technological advances in our military capabilities and is vital for maintain our military technological superiority over emerging adversaries.

Answer. I concur that robust investment in S&T underpins technological advances in our military capabilities and is vital to maintaining technological superiority. While keeping pace with advances in technology is critical in some areas, there are steps to help offset advances in other areas. The Army leverages the latest commercial technologies and invests in critical enabling technologies that are not available off-the-shelf. The Army has protected its S&T investments in this fiscally challenging environment. If confirmed, I will continue to support a robust S&T investment.

Question. If confirmed, what metrics would you use to assess whether the Army is investing adequately in S&T programs?

Answer. The Army measures how well S&T transitions into a program, which provides some indication of whether we are investing our dollars wisely. If confirmed, I will require our S&T community to appropriately address the most critical needs of our Army and establish firm metrics to ensure our soldiers dominate the battlefield.

Question. How would you assess the value and appropriate investment level for basic research programs?

Answer. The Army's investment in basic research helps to investigate fundamental science that can be used to develop novel and innovative capabilities that benefit the Army. The Army included \$425.1 million for basic research in the Fiscal Year 2016 President's Budget request. This is approximately 19 percent of the Army's S&T budget. I have been advised that a reasonable range of investment levels for basic research is approximately 16–20 percent of the Army S&T budget and if confirmed, I will continue to support strong basic research.

Question. What tools would you use to ensure that appropriate technologies are transitioning quickly into programs of record?

Answer. If confirmed, I will review the LIRA (Long-Range Investment Requirements Analysis) which maps resources to requirements, programs, S&T and logistics. This planning tool, which looks out over 30 years, was designed to ensure that a defined plan with resources is in place to connect our valuable S&T efforts into our programs at the quickest point possible. I will ensure the LIRA provides a systematic planning of technology insertion into programs of record.

TECHNICAL WORKFORCE

A significant challenge facing the Department of Defense today is an impending shortage of high quality scientific and engineering talent to work at Defense laboratories and technical centers.

Question. In your view, what are the pros and cons of having Active Duty Army personnel trained and working as scientists and engineers within the Army research and acquisition system?

Answer. My view is that Active Duty Army personnel trained and working as scientists and engineers in Army research and acquisition can help operationalize technologies from a soldier's perspective. The cost, however, requires the Army to commit to advanced civil education for these personnel to ensure necessary professional qualifications. The benefit, in my view, outweighs the cost.

Question. How would you ensure that directors of labs in your service have the tools they need to dynamically shape their S&T workforce?

Answer. I understand that Congress has already provided significant tools to the Army that enables the directors of the labs to shape their science and technology workforce through various National Defense Authorization Act authorities. Those authorities allow additional capabilities such as direct hire authority for qualified science and engineering candidates and managing performance through alternative personnel systems. If confirmed, I will encourage and support appropriate additional authorities the Army may require.

TEST AND EVALUATION ISSUES

Question. Are you satisfied with the Army's test and evaluation capabilities, including workforce and infrastructure?

Answer. Based on what I know now, the Army has sufficient infrastructure and the appropriate workforce to provide services to all test customers. In my view, test and evaluation is critical to ensuring the Army continues to reduce program life-cycle cost, as well as to ensure future weapon systems are suitable, survivable and effective to improve the capabilities of soldiers. If confirmed, I will work closely with the Army test and evaluation community and the Office of the Secretary of Defense test and evaluation leadership to ensure the Army's test and evaluation infrastructure maintains necessary test capabilities and processes.

Question. In which areas, if any, do you feel the Army should be developing new test and evaluation capabilities?

Answer. I have been advised the Army is investing in new test capabilities to support unmanned and autonomous systems, survivability, hypersonics, directed energy and cyber. The Army is also examining opportunities to upgrade existing test capabilities to reduce high-cost drivers to make current testing methods more efficient. If confirmed, I will work closely with the Army test and evaluation community and in concert with the Deputy Under Secretary of the Army and the Office of the Secretary of Defense test and evaluation leadership to ensure the Army's test and evaluation infrastructure maintains necessary test capabilities and processes.

Question. What are your views on the appropriate roles of OSD developmental and operational testing organizations with respect to testing of Army systems?

Answer. It is my understanding that by law, OSD developmental and operational test and evaluation organizations are responsible for overseeing all major defense acquisition programs, major automated information systems, and other acquisition programs. The OSD testing organizations ensure appropriate testing is being conducted and that the right questions at the each level have been asked and answered.

RECRUITING AND RETENTION

Question. What do you consider to be the key to the Army's success in recruiting the highest caliber American youth for service and retaining the best personnel for leadership responsibilities?

Answer. The key to successful recruiting is explaining the Army in a manner that resonates with "today's" talented youth. Serving on a cohesive team with trusted professionals could be one of the most important things they ever do is a key message to today's youth who want to serve a purpose greater than themselves. If confirmed, I will work closely with the Secretary of the Army to ensure sustaining the All-Volunteer Force remains a strategic imperative for our Army.

Question. What steps, if any, do you feel should be taken to ensure that current operational requirements and tempo do not adversely impact the overall readiness, recruiting, retention, and morale of soldiers?

Answer. We must ensure that soldiers have the time and resources to prepare for and recover from their operational missions. With an appropriately sized force we can ensure soldiers have adequate dwell time between deployments. Additionally, quality leadership, training, meaningful work, and just compensation contribute to overall readiness, recruiting, retention, and soldier morale. If confirmed, I will work closely with the Secretary of the Army to provide the necessary resources to commanders so they can ensure overall readiness, recruiting, retention and morale of their soldiers.

Question. What impact, if any, do you believe the Department's proposals aimed at slowing the growth of personnel and health care costs will have on recruiting and retention in the Army?

Answer. I need to study the longer-term institutional implications of the personnel and health care costs, to include how these may affect recruiting and retention. On health care, we must continue to find ways to deliver high quality healthcare to our soldiers and families in effective and economical ways without degrading readiness.

Question. The Army requested a provision for enhanced recruiting authorities for the fiscal year 2016 National Defense Authorization Act. What programs does the Army plan to implement and what specific recruiting needs will those programs address?

Answer. No response required; question withdrawn.

Question. If confirmed, will you review the Department of the Army, to include the Army National Guard, use of sports marketing and advertising purchases as a means of recruitment?

Answer. Yes, if confirmed, I will work with the Secretary of the Army and the Director of the Army National Guard to review sports marketing and advertising to ensure our expenditures in this area are effective, efficient, and ethical in recruiting the high quality soldiers we need.

MILITARY COMPENSATION

Question. What is your assessment of the adequacy of military compensation?

Answer. My sense is that current military compensation is adequate. If confirmed, I will work with the Secretary of the Army to re-evaluate and assess compensation to ensure we sustain a high quality All-Volunteer Force.

Question. What recommendations would you have for controlling the rising cost of personnel?

Answer. Controlling the rising cost of personnel will require a holistic look at how we compensate our personnel (both monetary and non-monetary). What I know is that we must continue to provide fair compensation to our soldiers that is competitive with other opportunities. If confirmed, I will work closely with the Secretary of the Army to establish a total compensation package that is competitive and maintains a high quality All-Volunteer Force.

Question. Do you support the Department's compensation and health care proposals?

Answer. Yes, I support the Department's plans for recommendations that preserve compensation, health care, and quality of life for soldiers, retirees and their families. I think it is important to honor our previous commitments to serving soldiers and veterans.

Question. What is your assessment of military compensation as compared to civilian compensation?

Answer. Military compensation, in general, is adequate, when compared to civilian compensation. However, the nature of the work and the sacrifice demanded from our soldiers and their families does not compare to the civilian sector. If confirmed, I will work closely with the Secretary of the Army, to ensure the Army can continue to attract our Nation's top talent and compensate them appropriately.

Question. What areas of military compensation, if any, do you believe warrant improvement or modernization?

Answer. I am interested in the details of the Military Compensation and Retirement Commission, specifically the reforms for blended retirement options. Whatever decisions are made must be accompanied with a robust training and education program so that our soldiers can make informed financial decisions for themselves and their Families. If confirmed, I will work closely with the Secretary of the Army and the other Service Chiefs to implement any final decisions.

EDUCATION FOR SOLDIERS

Question. An important feature of the Post-9/11 GI Bill is the ability of career-oriented servicemembers to transfer their earned benefits to spouses and dependents.

Answer. What is your assessment of the effect of the Post-9/11 GI Bill on recruiting and retention of soldiers?

Answer. I think the Post 9/11 GI Bill is a valuable incentive and helps the Army attract and retain quality soldiers.

Question. In your view, what has been the effect of the transferability option on retention and career satisfaction of soldiers?

Answer. I believe a soldier's ability to transfer his/her Post 9/11 GI Bill benefit helps the Army retain quality mid-grade and career soldiers.

Question. How important do you believe tuition assistance benefits are to young soldiers, and what trends do you see in the Army's ability to pay for such programs at current levels over the FYDP?

Answer. The ability to educate our soldiers is an important benefit and I believe it's one of the primary reasons our young Americans join the military. It is a key benefit and incentive to sustain the All Volunteer Force. There are several education benefits available, of which tuition assistance is one. In today's era of reduced budgets, we must balance benefits against the money available. If confirmed, I will strive to ensure we balance the benefits desired by soldiers with the funding provided to us by the Congress.

Question. What changes, if any, would you recommend to current eligibility criteria for tuition assistance?

Answer. Tuition Assistance is both a valuable benefit to our soldiers and our Army and evidences our commitment and investment in their future. If confirmed, I will work closely with the Secretary of the Army to explore potential improvements and ensure policy changes do not adversely affect the force.

Question. Do you believe that tuition assistance should be used to enhance a soldier's career while he or she is in the Army?

Answer. Absolutely. Tuition assistance is a valuable benefit to our soldiers and our Army and supports our culture and beliefs in life-long learning.

Question. Do you agree with the Military Compensation and Retirement Modernization Commission that tuition assistance should be limited to courses and education that contribute to a soldier's professional growth?

Answer. In principle, I generally agree; however, I am concerned about too narrow a scope in defining "courses and education that contribute to a soldier's professional growth." The Army's current TA policy requires soldiers to first meet with a counselor in order to establish a degree plan before taking courses and receiving benefits; continued TA benefit receipt is contingent upon working toward that degree plan. We want all our soldiers to aspire to be lifelong learners.

ASSIGNMENT POLICIES FOR WOMEN IN THE MILITARY

Question. As you know, two years ago, the Department rescinded the policy restricting the assignment of women to certain units which have the primary mission of engaging in direct ground combat operations, and has given the Military Services until January 1, 2016, to open all positions currently closed to women, or to request an exception to policy to keep a position closed beyond that date, an exception that must be approved by the Chairman of the Joint Chiefs of Staff and the Secretary of Defense. The services have opened a large number of positions to service by women and continue to work to develop gender-free physical and mental standards for all military occupations, presumably with the goal of allowing individuals, regardless of gender, to serve in those positions if they can meet those standards.

If confirmed, what role, if any, will you play in the development of these standards?

Answer. My basic position is that all people should be afforded equal opportunity to rise in accordance with their merit. Currently, U.S. Army Training and Doctrine Command is working to validate the standards for all Army occupations. If confirmed, I will work with the Secretary of the Army and the other Services Chiefs to ensure that the Army has the appropriate mental and physical standards for all military occupations.

Question. Will you ensure that the standards will be realistic and will preserve, or enhance, military readiness and mission capability?

Answer. Yes, I am committed to ensuring the standards are realistic for every occupation and that soldiers have the opportunity to serve to their full potential. If confirmed, I will work closely with the Secretary of the Army and the other Service Chiefs to ensure that the standards are realistic and will preserve and enhance military readiness and mission capability.

Question. Do you believe that decisions to open positions should be based on bona fide military requirements, and that assignment decisions should be made solely on

the basis of a servicemember's ability to meet validated gender-neutral occupational standards?

Answer. Yes, positions should be opened based on validated military requirements, tied to specific capabilities, skill sets, and established gender-neutral standards.

Question. If so, what steps will you take, if confirmed, to ensure that such decisions are made on this basis?

Answer. If confirmed, I will work with the Secretary of the Army to ensure decisions are made based on validated military and force readiness requirements.

Question. To what extent is the Army coordinating with the Marine Corps in this effort? Are results from the assessments being shared between services?

Answer. The Army and the Marine Corps have collaborated and shared information on their efforts. It is my understanding that the Army has shared results with all the Services when preparing the recommendations to open positions, units or occupations.

Question. If the Marine Corps were to make the decision to not open all positions as of January 1, 2016, what effect, if any, will that have on the Army's decision?

Answer. If the USMC decides not to open all positions, and if I am confirmed, I will work closely to understand the other Services' position and rationale in order to provide a fully informed recommendation to the Secretary of the Army. That said, my recommendation to the Secretary of the Army will be based on my best military judgment about what is best for the Army. My recommendation will be based on standards and readiness requirements.

Question. What is your position on whether the Selective Service Act should be opened to all genders if the decision is made to open all units on January 1, 2016?

Answer. I believe in maintaining the All-Volunteer Force and that we must do everything in our power to preserve it. The opening of previously closed positions to women is a step in the right direction for women who can meet the physical and mental standards. If confirmed, I will review if there is a need to change the Selective Service Act and provide my military advice to the Secretary of the Army.

FORCE MANAGEMENT

Question. Modularity refers to the Army's fundamental reconfiguration of the force from a division-based to a brigade-based structure. Although somewhat smaller in size, modular combat brigades are supposed to be just as, or more, capable than the divisional brigades they replace because they will have a more capable mix of equipment—such as advanced communications and surveillance equipment. To date, the Army has established over 90 percent of its planned modular units, however, estimates on how long it will take to fully equip this force as required by its design have slipped to 2019.

What is your understanding and assessment of the Army's modularity transformation strategy?

Answer. My understanding is the Army has completed modular transformation of combat and support brigades. Modular Transformation reorganized the Army's Operating Force from large division-sized formations designed to defeat traditional threats in conventional campaigns to more versatile and deployable brigade-sized units designed to support joint force requirements for full spectrum operations. Importantly, modularity has allowed the Army to organize as we fight, and standardized our brigade combat teams into three configurations—Armored, Infantry, or Stryker, and established adaptive, Joint Task Force capable headquarters at the 2-star level.

Question. If confirmed, what actions or changes, if any, would you propose relative to the Army's modular transformation strategy?

Answer. The Army is constantly changing. If confirmed, I will continue to assess the requirements of the national strategy against known and emerging requirements and threats to ensure the Army provides the best force structure (both capacity and capability) to support combatant commanders and the Nation.

Question. What is your understanding and assessment of the employment and performance of modular combat brigades and supporting units in Operations Iraqi Freedom, New Dawn, and Enduring Freedom?

Answer. I commanded modular brigade combat teams (BCTs) of all types in both Iraq and Afghanistan. The modular BCTs have greater utility across a broader range of military operations than those of previous brigade designs. In Iraq and Afghanistan, modular BCTs were effective during both combat and stability operations and far better at integrating the capabilities of other tactical elements of the Joint Force. Command and control functions are streamlined through the permanent task organization of critical core components such as engineer, field artillery, and mili-

tary intelligence. Additionally, the standardized designs facilitated transitions and streamlined logistics.

Question. What changes, if any, would you propose to the modular design, the mix of combat and supporting brigades, or modular unit employment to improve performance or reduce risk?

Answer. Currently, I have no proposals to change the Army's modular designs. As a matter of routine, the Army analyzes and assesses requirements, threats, performance and risk the optimal force mix and equipment, spread across the Total Force. The results of this analysis will continue to inform Total Force Policy, design and structure. If confirmed, I will continually review the designs of our units to ensure the proper force mix delivers the right capability at the right time to the combatant commanders.

Question. With respect to the Army's modular combat brigade force structure design, General Dempsey's June 2011 pamphlet titled "CSA's Thoughts on the Army's Future," directs the Army to assess the feasibility of adding a third maneuver battalion to each heavy and infantry brigade.

What is your understanding and assessment of the need to add a third maneuver battalion to the modular heavy and infantry brigades?

Answer. Adding a third maneuver battalion to our brigade combat teams increases the Army's operational capability and flexibility and is the direct result of the lessons of 14 years of war and operations around the world. The change makes the brigade more lethal, flexible, and agile. The reorganization also represents a transition to a force that is prepared to effectively operate across a broader range of potential missions.

Question. If confirmed, will you continue to implement the decision to add a third maneuver battalion to the heavy and infantry combat brigades? What force structure or capabilities would you propose to reduce in order to increase maneuver forces within the combat brigades?

Answer. Yes, conversion will continue and is planned to be complete in the Active Component by the end of fiscal year 2015. The addition of the third maneuver battalion is nearly complete in the Active Component and will begin next year for the Army National Guard. I believe the third maneuver battalion in a Brigade Combat Team provides the combat power necessary to dominate the battlefield at the tactical level.

Question. How will you manage this given the current drawdown of the Active Army?

Answer. If confirmed, I will assess combatant commander requirements to ensure that we provide the best possible mix of capabilities within our end strength to support the National Military Strategy. The addition of a third maneuver battalion has been underway for years, and as a result, our brigade combat teams (BCTs) are more capable. Recent force structure reductions will diminish the aggregate capacity of the Army without affecting the remaining BCT's capability.

AVIATION RESTRUCTURING INITIATIVE

Question. The Aviation Restructuring Initiative is intended to fully modernize Total Army Aviation by 2028 and reorganize by 2019. Is this effort on track? If not, what challenges do you face?

Answer. The Aviation Restructuring Initiative is on track to ensure our Total Army Aviation Force is fully modernized, ready, and tailored to meet mission demand in all three components. However, fiscal and resource constraints have limited the Army's flexibility.

Any significant changes to the proposed realignment of aircraft and units, or an increase in Army Acquisition Objectives will have an adverse effect on unit readiness, modernization programs, and industry partners. Current and projected Army force structure and funding levels and current Congressional appropriations allow us to keep the best, most modern aircraft; standardize the structure of our aviation brigades; and balance the capabilities across the components.

TOTAL ARMY END STRENGTH

Question. Is the Total Army large enough to execute the National Military Strategy?

Answer. The current CSA has testified "yes, but with significant risk." The level of resourcing provided under the President's Budget, the Army has sufficient capacity, although the ability to execute the strategy depends on more than end strength alone. Maintaining adequate readiness and capability are also necessary components. Readiness, capacity, and capability require sufficient, predictable budgets to plan against.

Question. Is an Active Duty Army of 450,000 large enough to execute all potential missions for the operational force while maintaining required capabilities in the institutional force?

Answer. A 450,000 Active Army, 980,000 Total Army force provides the minimum capacity to execute the missions envisioned in the current national strategy at significant risk, while maintaining the required level of generating forces in the institutional Army. The risk to the force and missions increases if assumptions in the Defense Strategic Guidance (regarding the duration of conflicts, the contributions of our allies, and the nature and location of future threats) are invalidated.

Question. Can the Active Duty Army successfully execute its mission at an end strength of 420,000?

Answer. The U.S. Army cannot execute the missions currently assigned in the National Security strategic guidance documents if the total Army is reduced to 920,000 (420,000 Active Component, 315,000 ARNG, 185,000 USAR).

THE NATIONAL COMMISSION ON THE FUTURE OF THE ARMY

Question. Will you be prepared to receive and act on recommendations from the national commission in 2016?

Answer. Yes.

“INSTITUTIONALIZING” SUPPORT FOR IRREGULAR WARFARE

Question. A major objective of the Department over recent years has been increasing emphasis on lower-end, irregular, counterinsurgency, and stability type operations—all of which are areas that place a high premium and demands on Army capabilities. In order to ensure that a rebalance achieves this objective, and perhaps more importantly is then sustainable, senior leaders have stressed the need for the Department to “institutionalize and finance” the support necessary for the irregular warfare capabilities that have been developed over the last several years and will be needed in the future.

What, in your view, does it mean to “institutionalize” capabilities and support for irregular warfare capabilities in the Army?

Answer. The Army is institutionalizing capabilities and support for Irregular Warfare through the development of appropriate doctrine, organizations, training, materiel, leadership and education, personnel, facilities and policy (DOTMLPF-P) across the Army. Building on our experience of the last 14 years, Irregular Warfare has been institutionalized into doctrine, leader development and individual and collective training. The DOTMLPF-P is an ongoing and standing process.

Question. What is your understanding and assessment of Army efforts to date to institutionalize and support these capabilities?

Answer. The last 14 years has demonstrated the Army’s ability to identify and adapt needed capabilities. A key component to institutionalizing any capability is to appoint a lead office with responsibility and authority for its oversight. The Army has established the following leads for the core activities constituting Irregular Warfare:

- 1) The U.S. Army Special Operations Command (counterterrorism, unconventional warfare, foreign internal defense)
- 2) The U.S. Army War College’s Peacekeeping and Stability Operations Institute (stability operations)
- 3) TRADOC’s Combined Arms Center (counterinsurgency, security force assistance, asymmetric warfare).

The Army also serves as the Executive Agent for the Joint Center for International Security Force Assistance which supports the Joint Force. The Center for Army Lessons Learned, the Stability Operations Lessons Learned and Information Management System ensure that the capabilities and skill sets developed over the last 14 years of conflict remain relevant. If confirmed, I will continue to assess our progress and make any necessary adjustments going forward.

Question. In your view, what are the obstacles, if any, to institutionalizing this kind of support, and what will be necessary to overcome them?

While force structure and program changes may be necessary, they are unlikely to prove sufficient to achieve full institutionalization. The greater challenge may be found in changing Army culture, attitudes, management, and career path requirements and choices, for example through adjustments to organization, training, doctrine, and personnel policies.

Answer. Fiscal uncertainty and the subsequent need to downsize remain the biggest obstacles to institutionalize and support these capabilities. As pressures for cuts in defense spending and force structures increase, the Army has to assess which of these capabilities it must retain and at what level. Finding the right bal-

ance is a challenge. Maintaining our doctrine and lessons learned databases is achievable, but retaining all of the necessary force structure will be more challenging. The Army requires consistent, on-time funding to maintain readiness, achieve efficiencies, and ensure that the Total Force is prepared to meet the Defense Strategic Guidance and win in a complex world.

Question. In your view, what are the most important changes, if any, that might be necessary to complement programmatic changes in support of the further institutionalization of capabilities for irregular warfare in the Army?

Answer. The most important changes are how we educate our leaders about the conduct of Irregular Warfare, to include Counterinsurgency (COIN), Unconventional Warfare (UW), Counterterrorism (CT), Foreign Internal Defense (FID), Stability Operations (SO), and Security Force Assistance (SFA). Through our professional military education, we must maintain competent and committed leaders of character with the skills and attributes necessary to meet the warfighting challenges of a complex world.

Question. Institutionalizing support for irregular, counterinsurgency, and stability capabilities in the force does not mean ignoring the requirement for the Army to be trained, equipped, and ready for major combat at the high-end of the full spectrum of operations.

If confirmed, how would you propose to prioritize and allocate the Army's efforts and resources to ensure that the force is prepared for major combat while at the same time it increases and institutionalizes support for irregular, counterinsurgency, and stability operations?

Answer. Current global instability reinforces that irregular, asymmetric and hybrid threats will continue to be central to the future operating environment. Consequently, in accordance to the Army Operating Concept, we must train and educate our leaders to operate effectively in the spectrum of conflict against multiple conflict forms. In the training environment, we are replicating those threats and conditions to ensure the Army is able to operate in the increasingly complex global security environment. We maintain a responsive training system underpinned by a robust lessons learned process and professional military education that incorporates both regular and irregular war to ensure the Army is ready. In light of changing threats and the evolving operating environment, we continuously review all areas in the span of DOTMLPF-P to ensure the Army remains well set to face emerging challenges. This ensures the Army is able to respond rapidly to crises and skillfully transition between types of military operations as the threat changes.

EQUIPMENT REPAIR/RESET

Question. In your view, is this level of funding sufficient to not only prepare Army forces for operations in Afghanistan but to also improve the readiness of non-deployed forces for other potential contingencies?

Answer. From my understanding, the Army requested the funding it needs to restore combat capability to the equipment returning from Afghanistan, commensurate with the Army's enduring need for this equipment.

Question. Is it your understanding that our repair depots are operating at full capacity to meet rebuild and repair requirements for reset?

Answer. From my understanding, our repair depots are meeting our rebuild and repair requirements.

Question. What additional steps, if any, do you believe could be taken to increase the Army's capacity to fix its equipment and make it available for operations and training?

Answer. If confirmed, I will assess the Army's current capacity to repair and replace equipment and make recommendations if necessary. The Army will continue to explore new technologies and emerging methods to fix equipment and support logistic operations.

Question. What impact is this level of funding likely to have, if any, on the ability of Army National Guard units to respond to Homeland Defense and support to civil authorities' missions?

Answer. Support to the homeland is the Total Army's highest priority. Homeland defense and support to civil authorities centers on the Army National Guard but utilizes assets from all components. Since the Army National Guard is a component of the Total Army, it will be affected by decreases in the levels of funding. Decreased funding will have a negative impact on the Total Army (Active, National Guard, and USAR) readiness levels with decreased capability to respond to Homeland Defense and Support to Civil Authorities.

SPECIAL OPERATIONS ENABLING CAPABILITIES

Question. If confirmed, how would you work with the Commander of USSOCOM to address the enabling requirements of Army SOF throughout the deployment cycle?

Answer. The Army works closely with the Joint Staff and USSOCOM in the Global Force Management process to ensure resources are provided to Geographic Combatant Commanders in accordance with Department of Defense priorities. Additionally, Army SOF and conventional interoperability training remains a top priority at the Combined Training Centers to ensure units maintain the level of shared understanding developed throughout the last 14 years of conflict. We value our relationship with USSOCOM and continue to evaluate the way we support all Geographic Combatant Commands. The continued refinement of the Regionally Aligned Force concept and establishment of a Department of the Army level liaison cell within USSOCOM should optimize the support the service can provide. Sustaining the close relationship that conventional forces and SOF have developed during combat operations over the past decade and a half is a key training priority.

Question. Do you agree that Army special operations personnel should be managed by U.S. Special Operations Command? Please explain.

Answer. No, the Army has considerable interaction with the U.S. Special Operations Command related to the assignment and development of its personnel. If confirmed, I will work with the Secretary of the Army to ensure current personnel management policies related to all combatant commands are adequate.

ACTIVE ARMY READINESS

Question. Does the Army have adequate readiness levels? If not, why?

Answer. As a result of the Budget Control Act and increased global demand, the Army implemented a sustained readiness approach to maintain a contingent response capability and fulfill current requirements. With the implementation of the Budget Control Act, the Army has only been able to sustain approximately one-third of the Regular Army (Active Component) at acceptable combat readiness standards. Our objective is to maintain two-thirds of the Active component at combat ready standards. Similarly, we have not been able to maintain Army National Guard units at acceptable levels of readiness. The principal driver for this status is inadequate funding to maintain appropriate levels of capacity, readiness, and modernization.

Question. What must be done to improve readiness levels of the Active Army?

Answer. Consistent and predictable funding is necessary to restore the appropriate balance between modernization, procurement, end-strength and force structure. This will stabilize the resource elements of Army Readiness: Manning, Equipment, Sustainment, Training and Installation Support. This stability coupled with continued gains in training proficiency over time will allow the Army to address current global demand, while maintaining the readiness required to support National Military Strategy contingency requirements.

Question. What percentage of Active Army units must be fully ready?

Answer. Readiness requirements are determined across the Total Force based on time, capacity, and capability—against planning contingencies, combatant command requirements, and resources. Because of the constrained fiscal environment, only about 30 percent of Army brigades are at acceptable levels of combat readiness. The U.S. Army BCT combat readiness rate should be between 60–70 percent.

Question. How would you characterize Army readiness in its deployed and non-deployed units?

Answer. All Army units and soldiers actively supporting combatant commands deploy at the highest levels of assigned mission readiness. Outside of deployed forces, the Army has had to focus resources on a small number of non-deployed brigade combat teams and enabling forces for the global response force. For those non-deployed units at lower readiness levels, it will take longer to get them ready to get to the fight, potentially losing opportunities with rapid deployment, or sending those units quickly but less ready and risking higher casualties.

118. Do you believe the current state of Army readiness is acceptable?

Answer. The CSA, GEN Odierno, has testified that currently the Army provides a sufficient amount of forces to fulfill all the requirements of the Defense Strategic Guidance but at “significant risk” due to readiness. Given current readiness levels and uncertain global demands, if confirmed, I will assess our readiness levels closely as our #1 priority and provide candid military advice on our capability to meet requirements.

Question. How do you see operations in Iraq and Afghanistan impacting the readiness of Army forces that may be called upon to respond to an attack or another contingency?

Answer. Global demand for Army forces continues to consume resources needed to rebuild Army readiness required for contingency plans. Iraq and Afghanistan are not the sole source of demand. Reductions in planned demand have been supplanted by growth in un-forecasted global requirements. With decreasing force structure capacity and resources, the Army prioritizes readiness efforts for Iraq, Afghanistan, and elsewhere at the expense of the non-deployed force readiness. The Army will need more time to ready and deploy additional forces to meet contingencies, potentially incurring higher casualties or jeopardizing mission accomplishment.

RESERVE COMPONENTS AS AN OPERATIONAL RESERVE

Question. What is your understanding and assessment of the Army's Reserve components in regard strategic depth?

Answer. I am mindful that, as established in federal statute, the purpose of our Reserve Components—the Army National Guard of the United States and the United States Army Reserve—is to provide trained units and qualified persons for Active Duty whenever more units and persons are needed than can be provided by the Regular Army. As such, our Reserve Components fulfill many operational demands as well as providing strategic depth. If confirmed, I will continue to ensure the Total Army is ready to meet the needs of combatant commanders.

Question. In your view, what are the major challenges to maintaining and enhancing the Army Reserve and Army National Guard as a relevant and capable operational Reserve?

Answer. As resources and opportunities for training and operational deployments decrease, our principal challenges for preserving the Reserve components as an operational Reserve are retaining relevant operational experience and readiness. Both the Army National Guard and the U.S. Army Reserve are critical to the Nation's defense to provide strategic depth and as an operational Reserve. I am, therefore, deeply committed to maintaining their readiness as a top priority.

Question. What are your views about the optimal role for the Reserve Component forces in meeting combat missions?

Answer. Combat missions are conducted by all types of units from all three of our components—Regular Army, Army National Guard, and the U.S. Army Reserve. The Army must retain the authority to integrate personnel and units from all three components to provide our Joint force commanders with the best Army force mix for the job at hand. In some cases, depending on the types of units required and the specific mission, our Reserve and Guard forces can effectively fulfill early deploying requirements. In other cases, they are better suited for providing operational and strategic depth. The optimal role for Reserve component forces will depend on the specific mission requirement generated by the combatant commanders and requires careful analysis of mission, enemy, terrain, troops available, and significantly, the time required to respond to the combatant commander requirement.

Answer. No. The Nation needs the flexibility to employ personnel and units from all three components to fulfill the operational demands of our state governors and combatant commanders.

Question. In your view, how will predictable cycles of 1 year mobilized to 5 years at home affect the viability and sustainability of the all-volunteer Reserve force?

Answer. Soldiers, families, and employers have shown strong support for the one year mobilized to five years at home rotation rate goals as established by the Secretary of Defense. Additionally, mobilization experience from the last decade substantiates this as well. The viability of the All Volunteer Force is inextricably linked across all components. Sustainment of the All Volunteer Force across all three Army components—Regular Army, Army National Guard, and U.S. Army Reserve—is critical to the long term security of the United States. If confirmed, I will remain committed to ensure the operational tempo of all three Army components is structured at a pace to sustain the All Volunteer Force.

Question. Advocates for the National Guard and Reserve assert that funding levels do not meet the requirements of the Reserve components for operational missions.

Do you agree that the Army's Reserve components are inadequately resourced, particularly in view of the commitment to maintaining an operational Reserve?

Answer. No, but I do agree that the spending caps under the Budget Control Act have placed significant downward pressure on our budget such that a number of hard choices have been made and will need to be made if relief does not come. Most of those hard choices have been disproportionately taken in the Total Army by the Active Component. In fact, as Total Army resources have been reduced since 2011, the proportional share of available Total Army resources allocated to our Reserve and Guard forces has increased. According to Army projections for fiscal year 2021,

Reserve and Guard shares of the Army budget will have increased by 12.7 percent and 27.8 percent, respectively, since fiscal year 2001. Resourcing of any Army component or any Army program is a reflection of the total resources provided to Department of the Army to fulfill its statutory and strategic roles and responsibilities. If confirmed, I will work to ensure that our Reserve Components are resourced to provide the Army both operational Reserve and strategic depth as we train to confront current and future threats.

NATIONAL GUARD

Question. What is your understanding and assessment of changes in the global and domestic roles and missions of the Army National Guard and the National Guard Bureau in the last decade?

Answer. The Army National Guard of the United States remains one of two viable and important reserve components in the Army. As the Army's global and domestic roles and missions change, the personnel and units from all three components will be employed to meet demand. The experiences of the last decade illustrate this. We have learned that "reserve" is no longer solely defined by geography, but also includes both capacity and response time.

Question. What is your understanding and assessment of the Army's commitment to fully fund Defense Department requirements for Army National Guard equipment?

Answer. PB16 funds Total Army endstrength of 980,000. General Odierno assesses this as "significant risk" and sufficient to fulfill the 2012 DSG but at "significant risk." PB16 does not fully fund modernization. These shortages are shared across the Total Force.

At this time, the Army cannot afford to fully fund requirements, to include equipment for any of the components—Regular Army, Army National Guard, and U.S. Army Reserve. If confirmed, I will work to balance forces, readiness, and modernization across the Total Army to best fulfill our responsibilities within the Defense Strategy given the resources we are given.

Question. In your view, do Army processes for planning, programming, budgeting, and execution sufficiently address these requirements for National Guard equipment?

Answer. Requirements for National Guard equipment and the two other Army components are driven by the process of "Total Army Analysis" of how the Army will fulfill the National Military Strategy. The challenge is managing risk by balancing forces, modernization, and readiness across all components to fulfill Army roles and responsibilities for national defense.

The PPBE process is adequate for the Total Force to include the National Guard. What is lacking is sufficient funds for all the components. Shortages reflect resourcing shortfalls vice processes.

Question. If confirmed, how would you ensure that these equipment needs of the Army National Guard are fully considered and resourced through the Army budget process? In your view, what is the appropriate role for the Chief of the National Guard Bureau in this regard?

Answer. If confirmed, I would work closely with the Secretary of the Army to fulfill the strategic and fiscal guidance provided by the President and the Secretary of Defense within the resource levels provided. Federal statute clearly defines the advisory role of the Chief of the National Guard Bureau. The Director of the Army National Guard, on behalf of the Chief of the National Guard Bureau, is a full participant in the discussions and deliberations of how we equip the Army and if confirmed, I will work closely with the Director of the National Guard to meet the Total Army resourcing challenges.

Question. What is your understanding and assessment of the role and authority of the Director of the Army National Guard, and, in your view, how does this compare with the role and authority of the Chief of the Army Reserve?

Answer. The Chief of the Army Reserve is also the Commanding General of U.S. Army Reserve Command, and exercises command authority over all U.S. Army Reserve personnel and units assigned to the command. As such, the Chief of the Army Reserve can more readily adapt Army Reserve forces and programs to dynamic strategic and fiscal guidance. The Director of the Army National Guard on the other hand does not command the Army National Guard. By law, when not federalized, personnel and units of the Army National Guard are controlled by the Governors of the 54 states and territories to which they are apportioned. When federalized, they usually fall under the command of the Commander, U.S. Army Forces Command, before they are provided to a combatant commander in response to a request

for Army forces. The Director of the Army National Guard assists the Chief of the National Guard Bureau in the performance of his or her duties.

FAMILY READINESS AND SUPPORT

Question. Soldiers and their families in both the Active and Reserve components have made, and continue to make, tremendous sacrifices in support of operational deployments. Senior military leaders have warned of concerns among military families as a result of the stress of deployments and the separations that go with them.

What do you consider to be the most important family readiness issues for soldiers and their families?

Answer. If confirmed, I will continue to maintain Family readiness by fully supporting the important range of services and programs that provide soldiers peace of mind that their Families are being cared for during long deployments, changes of station and continued times of high operational tempo. At issue here is adequacy of funding to enable our support. I will sustain the Army's commitment to a high quality of life for soldiers, families and civilians. Our program for this is Total Army Strong, which provides commanders the ability to tailor services and programs to meet the needs of local military community.

Programs and services such as the Exceptional Family Member Program (considers family members with special needs during the assignments process), Child Development Centers (provides soldiers with affordable, quality day care), and the Financial Readiness Program (offers soldiers financial counseling throughout their careers) are just a few examples of the different ways the Army enables soldier and family readiness.

Question. How would you address these family readiness needs in light of future reductions in end strength?

Answer. If confirmed, my goal would be to maintain an Army of strong and resilient soldiers and families. I would, however, as a result of the Army's upcoming end-strength reductions, focus on the Army's Soldier for Life (SFL) initiative that emphasizes the Army's commitment to those who serve from the day the recruit reports for duty through transition and continued service as a veteran. The SFL program will provide many opportunities for soldiers and families leaving the Army as a result of the drawdown.

MILITARY QUALITY OF LIFE

Question. The Committee is concerned about the sustainment of key quality of life programs for military families, such as family support, child care, education, employment support, health care, and morale, welfare and recreation services, especially as DOD faces budget challenges.

If confirmed, what further enhancements, if any, to military quality of life programs would you consider a priority in an era of intense downward pressure on budgets?

Answer. With the restructuring of the Army and the current fiscal climate, if confirmed, I would apply resources to programs and services that have the greatest impact on sustaining soldier and family resilience and thereby Army readiness. I would also look to partner with the other Military Departments and local communities to assist the Army in ensuring availability of key programs as reasonable cost to all soldiers and families, and to strengthen the Army's Soldier for Life initiative. If confirmed, I would also want to hear from our soldiers and families about those programs that are most important to them and those services that they need but we are not providing.

SUICIDE PREVENTION

Question. What is your assessment of the Army's suicide prevention program?

Answer. We need to do more for our soldiers and family members when it comes to preventing suicide and mitigating the factors of suicide and other high risk behaviors. Our Ready and Resilient efforts deliver training, tools, and resources to improve soldiers performance, strengthen their resilience and make them stronger and the Army has made good progress in the last few years. However, more work needs to be done. If confirmed, I will work with the Secretary of the Army to continually assess this program to ensure we are meeting the needs of our soldiers and that we continue to understand the myriad of causes that lead to self-harm. I am committed to prevention and intervention to help soldiers who are suffering and risk harm to self.

Question. In your view, what role should the Chief of Staff of the Army play in shaping policies to help prevent suicides and to increase the resiliency of all servicemembers and their families?

Answer. If confirmed, my role is to work with the Secretary of the Army to provide policy and resources to Commanders to help them prevent suicides and increase resiliency in the force. In my view, suicide preventions continue to be a priority mission for all commanders and soldiers.

Question. If confirmed, what actions will you take to ensure that sufficient mental health resources are available to servicemembers in theater, and to the servicemembers and their families upon return to home station?

Answer. If confirmed, I will ensure that soldiers and their family members have access to quality mental health care. As one of my priorities, the Army will continue to make quality behavioral health care available in innovative ways, such as embedded providers with combat units in theater and at home station. We will continue to lead the DOD in placing providers where soldiers' families can also easily access mental health care. It is critical that soldiers view seeking mental health care as a sign of strength. I will maintain the focus on mental health care and take every opportunity to improve on the gains made in the past several years.

MEDICAL CARE FOR WOUNDED SOLDIERS

Question. Is the Army adequately resourced to provide all needed combat medical support in our active theaters?

Answer. At the current rate of combatant commander demand, we are adequately resourced to provide the needed combat medical support in our active theaters. The nature of the strategic environment requires the Army to continuously assess its capabilities and force requirements. It has taken years to achieve the medical size, structure, and capability required. Total Army Analysis has resulted in a medical force sufficient to support combatant commands, that best meets guidance under established resource constraints, and that fulfills the roles and missions we ask of these key battlefield enablers.

Question. Is the Army adequately resourced to care for soldiers in the continental United States and overseas garrisons?

Answer. Current funding levels provide adequate resources to sustain medical readiness and provide quality healthcare for soldiers worldwide. Army Medicine continues to seek efficiencies and opportunities to collaborate with other services, the Veteran's Affairs, and the private sector to minimize costs. The successful transition to a System for Health is vitally important to the survival of Army Medicine as an affordable and viable means to maintain the force.

Question. How does the Army provide follow-on assistance to wounded personnel who have separated from Active service?

Answer. The Army's primary system to assist our wounded personnel separating from Active service is through the Soldier for Life Transition Assistance Program (SFLTAP). This program provides points of contact for assistance once out of the military. For the population consisting of the most seriously wounded soldiers, they may qualify for the Army Wounded Warrior Program, whose cadre maintains contact with seriously injured veterans to provide a continuum of care and support as well as smooth transition to the Department of Veteran Affairs. We also refer Wounded Warriors who qualify to the Veterans Affairs Vocational Rehabilitation and Employment program that further assists in the transition process.

Question. If confirmed, are there additional strategies and resources that you would pursue to increase the Army's support for wounded personnel, and to monitor their progress in returning to duty or to civilian life?

Answer. Warrior care will remain an Army priority; it is an enduring mission and our sacred obligation. The Army will remain committed to ensuring our wounded, ill, and injured soldiers have the best health care possible to either successfully remain on Active Duty or transition from Military Service and into communities as productive Veterans. Additionally, we will continue our collaboration efforts with Veterans Affairs to facilitate the seamless transition for our Wounded.

Question. What is your understanding and assessment of the Army's disability evaluation system?

Answer. The Army is committed to ensuring that all soldiers receive the care they need and the benefits they have earned through their selfless service. It is my understanding that the disability evaluation system (DES) is approaching a steady state balance, as soldier disability cases are completed at a rate equal to or greater than cases being enrolled on a monthly basis. Collaboration between the Physical Disability Agency, Medical Command/Office of the Surgeon General and the Veteran's Affairs, and the application of increased manpower and resources have dramatically improved capacity, created efficiencies and reduced timelines. Average time of completion for Active and Reserve Component Soldier cases now meets and exceeds OSD Warrior Care Policy goals. The DES Dashboard provides transparency

and predictability for soldiers, families and commanders and soldiers are increasingly satisfied with their understanding of the process and the amount of time it takes to complete DES. My assessment is that maintaining timelines and improvements will require continued commitment of resources in order to care for our most precious asset—our soldiers. If confirmed, I will be committed to ensuring we sustain our progress and continue to improve where possible.

Question. Is the Total Army Health care system adequate to meet the health care needs of soldiers, families and retirees?

Answer. Army Medicine is well prepared to support the health care needs of soldiers, families and retirees. The Army direct care system is made up of 32 primary military treatment facilities and smaller clinics across our camps, posts and stations. There is also care available through TRICARE contracts near military bases. In addition, beneficiaries may access care through non-contracted providers in the areas not supported by TRICARE contracts. There are also virtual resources available to beneficiaries, such as nurse advice line, that supplement face to face care.

PREVENTION OF AND RESPONSE TO SEXUAL ASSAULTS

Question. The Fiscal Year 2014 Department of Defense Annual Report on Sexual Assault in the Military reflects that substantiated reports of sexual assault in the Army resulting in preferal of court-martial charges increased by 56 percent from 272 reports in fiscal year 2013 to 424 reports in fiscal year 2014.

What is your assessment of this report?

Answer. Any sexual assault in the U.S. Army is unacceptable. Recent survey data estimates that the prevalence of sexual assault in the military is decreasing. At the same time, reports of sexual assault have seen unprecedented increases in the last three fiscal years. The Army views these results as indicators of a continued growing trust and confidence in our system, as more victims are reporting. However, if confirmed, this issue will have my full attention and continued intense focus on this issue by commanders at all levels.

Question. What is your assessment of the problem of sexual assaults in the Army?

Answer. Sexual assault has no place in our Army and I am personally committed to its elimination. Sexual assault not only has a long-lasting effect on the individual victim, but it also erodes unit readiness and command climate. If confirmed, this issue will have my full attention.

Question. What is your assessment of the Army sexual assault prevention and response program?

Answer. As I said earlier, any sexual assault is unacceptable. I see some positive progress and have been told the Army Sexual Harassment/Assault Response and Prevention (SHARP) Program is moving in the right direction. However, I also believe that there is still much work to be done. We must continue to increase reporting and eradicate prevalence. We must focus on the issue of retaliation to ensure that victims feel safe in reporting and that we have established a command climate that demands dignity and respect for all soldiers, civilians and family members. This issue will have my personal attention.

Question. What is your view of the provision for restricted and unrestricted reporting of sexual assaults?

Answer. Protecting and supporting the victim of sexual assault is imperative. Though Army policy favors unrestricted reporting as a bridge to offender accountability, I understand that some victims do not want an investigation for a variety of personal reasons. In those instances, restricted reporting is a vital avenue to allow these soldiers to obtain advocacy, medical, mental health, and legal services. If we do this right, the services and support provided to victims who initially make a restricted report will provide those victims with the confidence to convert to an unrestricted report. I believe that allowing victims options and multiple avenues for reporting sexual assault has been and will remain critical to our progress.

Question. What is your view about the role of the chain of command in providing necessary support to victims of sexual assault?

Answer. Commanders and anyone in a leadership position must set, teach, and enforce the best possible standards for supporting victims of sexual assault. Specifically, committed, engaged leadership and grass-roots prevention campaigns at the squad leader level are critical to providing the necessary support to victims of sexual assault. Commanding officers are also responsible for setting positive command climates that not only help prevent the crime of sexual assault but also provide a safe environment where victims feel confident coming forward to report. The entire chain of command is absolutely critical in creating a climate that prevents sexual assault, protect the victims, and hold the perpetrators fully accountable in accordance with appropriate legal processes. Our current focus is on the challenge of retaliation.

Commanders must have visibility of any potential retaliation or reprisal and must monitor investigations to ensure appropriate accountability.

Question. What is your understanding of the adequacy of Army resources and programs to provide victims of sexual assault the medical, psychological, and legal help they need?

Answer. The Army provides several resources to aid victims of sexual assault, including local Medical Treatment Facilities, Sexual Assault Response Coordinators (SARCs), Victim Witness Liaisons (VWLs), family advocacy, social services, chaplain services, and legal services. Army psychiatric counselors and chaplains are confidential counseling channels.

The Army has transformed response services over the past years, including professionalizing the Sexual Assault Response Coordinators and Victim Advocate education, implementing the Special Victim Counsel (SVC) program, and establishing one-stop shops for victims in SHARP Resource Centers. The U.S. Army Medical Command sexual assault medical management team is designed to provide immediate and long-term patient care, which includes assessment and treatment of acute medical injuries, assessment of risk for pregnancy, options for emergency contraception, assessment of risk of sexually transmitted infections, including HIV prophylaxis, to necessary follow-up care and services. All patients are offered a referral to behavioral health at their first medical encounter and are encouraged to receive psychological care and victim advocacy support. In addition, there are long-term care plans tailored to meet the individual's patient's medical and behavioral health care needs.

The Army SVC Program makes available to all sexual assault victims a specially trained and certified military attorney to represent the victim during all phases of a case, including investigation, military justice and administrative proceedings. The SVC is also a legal assistance attorney who provides both independent representation to the victim in the military justice context, and help with any legal issues the victim might have. This allows victims to form an attorney-client relationship with one attorney to whom they can turn for all their legal needs. To provide maximum coverage across the force and facilitate face-to-face communication between the SVC and victim, the Army maintains approximately 75 SVC stationed at 35 locations. I believe this is the right model for the Army and adequately protects the legal interest of sexual assault victims.

Question. What is your view of the steps the Army has taken to prevent additional sexual assaults both at home station and deployed locations?

Answer. The Army has made significant, measurable progress to prevent sexual assaults both at home and in deployed locations, but there is much more work to be done. I have been and will remain committed to combating this serious crime. If confirmed, I will build on the hard work that has been done and will ensure that Army leaders and soldiers across all our formations know that preventing sexual assault is one of my highest priorities.

Question. What is your view of the adequacy of the training and resources the Army to investigate and prosecute allegations of sexual assault?

Answer. The Army has one of, if not the best training programs for sexual assault investigators in the Nation. The basic two-week course is taught by nationally recognized civilian experts in trauma, alcohol facilitated sexual assaults, and the psychological effects of sexual assault. Course instructors also include experts in the medical aspects associated with child sexual assault, and renowned civilian police experts from highly regarded special victim investigative units. Additionally, I have been informed that the course's lead instructor, Mr. Russ Strand, developed the Forensic Experiential Trauma Interview (FETI) technique. This innovative interview technique has been crucial to obtaining thorough and detailed testimonial evidence from victims of sexual assault, thereby setting the stage for successful prosecution. Mr. Strand was recognized with the Visionary Award by the Ending Violence Against Women International Association for his work on this advancement. Furthermore, the sexual assault investigation course and training are being taught to civilian law enforcement agencies, and college campus police, throughout the United States and Canada. The training has been nominated for the 2015 International Association of Chiefs of Police/Thomson Reuters Award for Excellence in Criminal Investigations. I have been informed that over half of the Army investigators in the field have received this training, and are employing its principles and processes daily, worldwide. Follow-on training courses focus on domestic violence, child abuse and advanced forensic crime scene processing. As a result, the Army's investigators bring unmatched investigative capabilities to the installations' special victim teams. Furthermore, it is my understanding that the Army has resourced its Criminal Investigation Command, with 30 specially trained, expert civilian Sexual Assault Investigators (SAIs), and stationed them at key locations around the world. Each SAI

brings the wealth of his/her training and expertise to every sexual assault investigation. Additionally, the SAIs use their knowledge and expertise to mentor less experienced investigators. Working hand-in-hand with specially trained sexual assault prosecutors, the special victim capability teams on each Army installation work tirelessly to ensure that all available evidence is collected and recorded to ensure successful prosecutions.

The military justice system has undergone the most comprehensive revision since its implementation more than 50 years ago. Time is needed to implement and assess these changes. The training and resourcing of specially-selected and trained investigators and prosecutors has been a focus of Army efforts and has resulted in improved proficiencies for accountability. If confirmed, I will ensure that the Army continues to focus on these critical functions.

Question. What is your view about the role of the chain of command in changing the military culture in which these sexual assaults occur?

Answer. I firmly believe the role of the commander is central to sexual assault prevention within the military including those behaviors and actions that could lead to sexual assault. The commanding officer of every unit is the centerpiece of an effective and professional warfighting organization. They are charged with building and leading their teams to withstand the rigors of combat by establishing the highest level of trust throughout their unit.

Commanding officers are responsible for setting and enforcing a command climate that demands dignity and respect for all soldiers. Trust in the commander and fellow soldiers is the essential element in everything we do. Developing this trust, dedication, and esprit de corps is the responsibility of the commanding officer. They do this by setting standards, training to standards, and enforcing standards that clearly demonstrate intolerance to sexual assault. If confirmed, I will ensure standards for sexual assault prevention are met.

Question. Surveys report that up to 62 percent of victims who report a sexual assault perceive professional or social retaliation for reporting. If confirmed, what will you do to address the issue of retaliation for reporting a sexual assault?

Answer. The issue of professional or social retaliation is deeply concerning and the Army has been working proactively to address what is a complex and challenging aspect of changing a culture. Past efforts have included the expedited transfer program and the implementation of the Special Victim Counsel. Most recently, the Army has spoken with and surveyed victims, implemented policy to prohibit retaliation, developed training to assist soldiers in identifying and preventing retaliation, and implemented policy to investigate and monitor all allegations of retaliation.

Based on recent surveys, the Army has sharpened its focus on addressing retaliation. The Army has implemented policy, adapted training, and begun collecting data for analysis. Committed, engaged leadership and grass-roots prevention campaigns at the squad leader level are critical to solving the problem of retaliation.

Question. Sexual assault is a significantly underreported crime in our society and in the military. If confirmed, what will you do to increase reporting of sexual assaults by military victims?

Answer. Recent survey data shows the Army is making significant progress in strengthening the Army culture in order to reinforce positive command climates where victims: are encouraged to report sexual assaults; know they will receive the best medical care and support services; their incidents will be thoroughly investigated by independent law enforcement experts in coordination with specially trained and selected Special Victim Prosecutors; and feel confident that offenders will be held appropriately accountable.

Indicators of this progress include a significant decrease in prevalence, particularly for female soldiers, combined with an unprecedented increase in reporting. In the past year, the Army also experienced the highest conversion rate from restricted to unrestricted reports (triggering command notification and law enforcement investigation) since the inception of restricted reporting in 2005. The Army has also seen a substantial increase in the percentage of male victims reporting, an encouraging trend in one of the most challenging aspects of this fight given the complex nature of male on male assault.

Question. In your view, what would be the impact of requiring a judge advocate outside the chain of command, instead of a military commander in the grade of O-6 or above as is currently the Department's policy, to determine whether allegations of sexual assault should be prosecuted?

Answer. The Commander is responsible for everything the unit does and fails to do. This responsibility cannot be overstated. I strongly support the Department's current policy. The Uniform Code of Military Justice operates both as a criminal justice system and a critical component of a commander's authority to maintain good order and discipline. I believe our soldiers and national security interests are best

served by retaining the military commander's key role in the military justice decision process. While I greatly value the advice and recommendations of our highly proficient judge advocates, I firmly believe the military commander's role is indispensable in the prosecutorial process. With this responsibility comes accountability. I also strongly support holding those few commanders who fall short of their responsibilities accountable for their actions or inaction.

When a unit enters combat, success is directly dependent on the Commander's ability to enforce his or her orders and standards. The Commander's authority to refer charges to court-martial, especially for the most serious offenses such as sexual assault, is essential.

Question. What additional steps would you take, if confirmed, to address the problem of sexual assaults in the Army?

Answer. I am encouraged by the progress the Army has made, but there is much more work to be done. If confirmed, I am committed to sustaining the momentum and progress. We have focused significant efforts on senior leadership engagement to address this cultural issue. To achieve continued progress we will place additional emphasis on junior leader/first line leaders taking ownership and helping to achieve the culture of dignity and respect required to eradicate sexual assault in our Army.

Question. What is your assessment of the effect, if any, of recent legislation concerning sexual assault on the capability of Army commanders to prosecute sexual assault cases, including cases where prosecution is declined by civilian prosecutors?

Answer. The Army is in the process of implementing all the requirements of the fiscal year 2014 NDAA concerning sexual assault and the capability of Army commanders to prosecute sexual assault cases. It is too soon in the process to evaluate the effects of all of the changes. The Army, like the other Services, will be carefully studying the effects, both intended and unintended, of all of the rapid and robust changes to the military justice system over the past few years and we will share our observations with Congress.

RELIGIOUS GUIDELINES

American military personnel routinely deploy to locations around the world where they must engage and work effectively with allies and with host-country nationals whose faiths and beliefs may be different than their own. For many other cultures, religious faith is not a purely personal and private matter; it is the foundation of their culture and society. Learning to respect the different faiths and beliefs of others, and to understand how accommodating different views can contribute to a diverse force is, some would argue, an essential skill to operational effectiveness.

Question. In your view, do policies concerning religious accommodation in the military appropriately accommodate the free exercise of religion and other beliefs, including individual expressions of belief, without impinging on those who have different beliefs, including no religious belief?

Answer. A number of religious (and belief) accommodation protections are afforded to soldiers beginning with the First Amendment and proceeding through title 10, DOD Directives, and Army policies. Yes, I believe our current protections appropriately balance the Army's compelling interest in unit cohesion and good order and discipline, on the one hand, and soldiers' adherence to their religious beliefs, on the other.

Question. Under current law and policy, are individual expressions of belief accommodated so long as they do not impact unit cohesion and good order and discipline?

Answer. Yes, current law and policy appropriately balance unit cohesion and good order and discipline with individual expressions of belief. Leaders at all levels develop soldiers to embody Army values, which emphasize the importance of treating others with dignity and respect. These values help create a culture of respect for the religious rights and expressions of others, including those who hold to no religious beliefs.

Question. In your view, does a military climate that welcomes and respects open and candid discussions about personal religious faith and beliefs in a home-port environment contribute in a positive way to preparing U.S. forces to be effective in overseas assignments?

Answer. It has been my experience that being tolerant and accepting of differences is a virtue valued by our soldiers, and I believe this has been the case since our Nation's founding. America's soldiers are diverse. Treating others respectfully clearly has a positive impact on operations within or outside of our Nation.

Question. Would a policy that discourages open discussions about personal faith and beliefs be more or less effective at preparing servicemembers to work and operate in a pluralistic environment?

Answer. In my opinion, denying varying attitudes or opinions does not provide an opportunity to work through any differences that may exist. The Army develops leaders and builds teams. Part of that process involves respecting each other's values and beliefs as Americans, without forcing others to accept those values or beliefs.

Question. In your view, when performing official military duties outside a worship service, should military chaplains be encouraged to express their personal religious beliefs and tenets of their faith freely, or must they avoid making statements based on their religious beliefs?

Answer. As I understand current legal protections, all servicemembers' beliefs and the expression of those beliefs are protected. When opinions are expressed, religious or otherwise, in thoughtful consideration of those hearing the discussion or comment, an opportunity for meaningful dialogue is opened. All soldiers must treat each other with dignity and respect within The Army Profession.

Question. Do you believe chaplains should be tasked with conducting non-religious training in front of mandatory formations, even if they may be uniquely qualified to speak on the particular topic, such as suicide prevention or substance abuse? If so, do you believe guidance provided to those chaplains on what they should and should not say with respect to their faith is adequate?

Answer. If confirmed, I will seek the advice of the Chief of Chaplains, the member of the Army Staff charged with advising me on these and other matters. Chaplains serve in two distinct roles as officers in our Army, both as staff officers and religious leaders. Chaplains have historically maintained a balance in both of those roles and in their functions of providing religious support and advising commanders. If confirmed, I will review the guidance on this topic and assess if it is adequate.

JOINT OFFICER MANAGEMENT

Question. What is your assessment of the effectiveness of the Goldwater-Nichols-required Joint Qualification System?

Answer. Without question, Goldwater-Nichols has brought a joint mindset to military operations and in doing so improved the Department of Defense. Clearly collaboration among Services has improved. If confirmed, I will work with the Secretary of the Army to determine to what extent Goldwater-Nichols supports the Force of the Future and what, if any changes might be needed.

Question. Do you think additional changes in law or regulation are needed to respond to the unique career-progression needs of Army officers?

Answer. While I do not now see any urgent need for change, if confirmed, I will work with the Secretary of the Army to determine to what extent the current laws and regulations support the Force of the Future in a changing environment.

Question. In your view, are the requirements associated with becoming a Joint Qualified Officer, including links to promotion to general officer rank, consistent with the operational and professional demands of Army line officers?

Answer. Yes, in my judgment, it is important that Army General Officers be joint qualified.

Question. If not, what modifications, if any, to the requirements for joint officer qualifications are necessary to ensure that military officers are able to attain meaningful joint and service-specific leadership experience and professional development?

Answer. I feel the joint requirements are adequate today and, if confirmed, I will work with the Secretary of the Army to manage the officer corps so as to preserve the joint qualification process in the future.

Question. In your view, what is the impact of joint qualification requirements on the ability of the services to select the best qualified officers for promotion and to enable officer assignments that will satisfy service-specific officer professional development requirements?

Answer. I feel the joint requirements are adequate today and help identify the best officers for promotion. If confirmed, I will work with the Secretary of the Army to manage the impacts on the officer corps.

Question. Do you think a tour with a combatant command staff should count toward the Joint tour requirement?

Answer. Yes. Combatant commanders are inherently joint and provide a rich professional experience.

DEPARTMENT OF THE ARMY CIVILIAN PERSONNEL

Question. The committee continues to have an acute interest in the Department of Defense civilian and contractors who support our soldiers.

What is your assessment of the current morale of the Department of the Army civilian and contractor workforces?

Answer. The Army civilian workforce has been nothing short of stellar and steadfast in support of our Army at war. That said, I am concerned with the impact on morale of several years of pay freezes, a year without performance bonuses, two rounds of furloughs, and messages about downsizing. If confirmed, I will work with the Secretary of the Army to ensure we maintain visibility on morale of our workforce. Maintaining positive civilian morale is as important as soldier morale to the readiness of the Total Force.

Question. What do you believe is the appropriate proper balance of manpower between Department of the Army for uniformed personnel, civilian Department employees, and contractor personnel?

Answer. The appropriate balance should reflect the primacy of the warfighter; the Army needs sufficient civilian employees and contract support to ensure the most efficient and effective use of uniformed personnel. That differs at each echelon of command and by installation and organization. If confirmed, I will work with the Secretary of the Army to ensure we maintain an appropriate balance of manpower which provides the Nation the most effective use of all available resources.

Question. What workforce flexibilities do you consider necessary for the Department of the Army to better manage its workforce?

Answer. The Army requires greater flexibility from Recruiting and Accession to Development, Employment, and Transition to better manage its workforce. If confirmed, I'll work closely with the Secretary of the Army to examine the policies and resources required to obtain this flexibility that allows us to retain top talent.

Question. How will you manage the further reduction of civilian employees?

Answer. As needed, the Army will continue to promote voluntary measures as much as possible to reduce the civilian workforce. Commands are encouraged to use reshaping tools such as release of temporary employees, not extending temporary and term employees, separation of highly qualified experts (HQE), separation of re-employed annuitants, attrition, management-directed reassignments, hiring controls, the Department of Defense Priority Placement Program and Voluntary Early Retirement. If confirmed, I will work with the Secretary of the Army to manage reductions in a responsible and compassionate manner.

ACQUISITION

Question. Has acquisition as currently conducted provided the Army weapons, equipment and supplies effectively and in a cost efficient manner?

Answer. The defense acquisition system needs to improve in timeliness and cost effectiveness in order to provide our soldiers with the systems, technologies, and equipment to dominate our adversaries.

Question. Does the current acquisition system ensure the Army is fully modernized in a timely manner?

Answer. The complexity of processes and rules in the defense acquisition system limit flexibility and add time and cost to the process of developing and fielding new warfighting capabilities. While all involved strive to ensure our soldiers have the best equipment, the acquisition process could be simplified and streamlined while retaining emphasis on sound program planning and risk mitigation. To achieve this goal and ensure our systems can be developed and fielded more quickly, we must reduce redundant documentation, provide more flexibility to program managers, and place greater emphasis on sound acquisition planning. This will inject much-needed agility and flexibility into the process while maintaining robust oversight of taxpayer dollars.

Question. Should the Chief of Staff of the United States Army have the authority and responsibility to control Army acquisition programs?

Answer. The Chief of Staff of the Army plays a critical role in the development of Service requirements and the allocation of funding necessary to successfully develop and field programs. The operational experience and leadership of Service Chiefs are invaluable to generating and stabilizing achievable requirements and ensuring the resources necessary to achieve these capabilities. Additionally, the Service Chiefs are ideally positioned to provide strategic priorities and areas of emphasis in the development of warfighting capabilities that respond to current and emerging operational threats. If confirmed, I will work with the Secretary of the Army to explore opportunities for an increased role in the acquisition process in order to drive requirements, resources, and acquisition to ensure our soldiers have the best possible equipment in a timely manner.

Question. How will you meet your responsibilities to ensure Army acquisition programs stay on schedule, within cost and perform to expectations?

Answer. Achievable and affordable requirements, as well as stable and predictable funding, are critical to the success of acquisition programs. As a representative of

our soldiers' needs, if confirmed, I will work to validate and prioritize realistic requirements and request stable and sufficient funding be provided to successfully meet our capability gaps. This role is especially important during times of decreased budgets, such as now, when the Department must implement investment decisions with limited resources. Additionally, acquisition programs cannot be successful without a trained, professional, and experienced workforce. If confirmed, I will promote the qualifications, expertise and capability of the acquisition workforce by focusing on the recruitment, development, and retention of individuals with critical acquisition skill sets in order to provide the Army essential capabilities for continued success.

CONGRESSIONAL OVERSIGHT

Question. In order to exercise its legislative and oversight responsibilities, it is important that this Committee and other appropriate committees of the Congress are able to receive testimony, briefings, and other communications of information.

Do you agree, if confirmed for this high position, to appear before this Committee and other appropriate committees of the Congress?

Answer. Yes.

Question. Do you agree, when asked, to give your personal views, even if those views differ from the Administration in power?

Answer. Yes.

Question. Do you agree, if confirmed, to appear before this Committee, or designated members of this Committee, and provide information, subject to appropriate and necessary security protection, with respect to your responsibilities as Chief of Staff of the Army?

Answer. Yes.

Question. Do you agree to ensure that testimony, briefings and other communications of information are provided to this Committee and its staff and other appropriate Committees?

Answer. Yes.

Question. Do you agree to provide documents, including copies of electronic forms of communication, in a timely manner when requested by a duly constituted Committee, or to consult with the Committee regarding the basis for any good faith delay or denial in providing such documents?

Answer. Yes.

[Questions for the record with answers supplied follow:]

 QUESTIONS SUBMITTED BY SENATOR JIM INHOFE

READINESS OF THE FORCE

1. Senator INHOFE. General Milley, how do lower readiness levels and a smaller force impact our ability to deter aggression?

General MILLEY. In order to deter aggression, our capability and capacity to rapidly deploy and conduct combat operations to defeat enemy objectives must be understood and believed by our opponents. Readiness is the core requirement, which underpins deterrence of rational opponents. High readiness will result in an increased likelihood of deterrence. Size, skills, capability and capacity are required to deter rational adversaries. Lower readiness levels and a smaller force decrease the likelihood of deterrence and increase the likelihood of aggression with respect to rational actors.

2. Senator INHOFE. General Milley, if a major or even minor contingency operation were executed today given the Army's current state of readiness and current global commitments, is it possible the Army would have to send forces into combat that are not fully trained and ready?

General MILLEY. The possibility that the Army would have to send forces into combat that are not fully trained depends greatly on the nature of the contingency, combatant commander timelines, and national priorities on our ability to re-allocate forces. Given current readiness levels and uncertain global demands, if confirmed, I will assess our readiness levels closely as my top priority. I will provide candid military advice on our capability to meet requirements to avoid having to send forces into combat that are not fully trained and ready.

3. Senator INHOFE. General Milley, should the United States be postured to fight two Major Contingency Operations simultaneously? What is the impact of only being postured to fight one Major Contingency Operation?

General MILLEY. Yes, the U.S. should be postured to fight two major contingency operations simultaneously, which is in accordance with the 2014 QDR. The 2014 QDR asserts that U.S. forces must be capable of defeating a regional adversary in a large-scale, multi-phased campaign and denying the objectives of—or imposing unacceptable cost on—a second aggressor in another region. Being postured to fight two major contingency operations simultaneously prevents potential adversaries from exploiting a crisis to pursue their objectives and allows us to mitigate the risk of unanticipated crises and requirements. Being postured to fight only one major contingency operation could force undesirable choices between vital national interests and leave the U.S., allies, and partners at risk.

4. Senator INHOFE. General Milley, does priority for readiness, training and equipment go to deployed/forward stationed forces followed by forces getting ready to deploy? If so, how does that impact the readiness of follow on forces back in the U.S. and their ability to respond to unforeseen crisis?

General MILLEY. All Army units and soldiers actively supporting combatant commands deploy at the highest levels of assigned mission readiness. Outside of deployed forces, the Army has had to focus resources on a small number of non-deployed brigade combat teams and enabling forces to preserve a small contingency response capability. For non-deployed units at lower readiness levels, it takes longer to get them ready to respond to an unforeseen crisis, undermining the advantages of rapid deployment.

FORCE STRUCTURE

5. Senator INHOFE. General Milley, the Army recently announced its plan to cut 40,000 soldiers, many having served multiple combat tours in Iraq and Afghanistan, and will announce specifics on a cut of 17,000 civilians from its ranks in Sep. Is this the correct size for our Army given threats around the world and demands for ground forces everywhere?

General MILLEY. This personnel drawdown supports the President's Fiscal Year 2016 Budget and is part of the Army's effort to rebalance endstrength, readiness, and modernization efforts to shape a 980,000 Total Army (450,000 AC, 335,000 ARNG, and 195,000 USAR). This force is capable of supporting the Defense Strategy, but at a "significant" level of risk. I believe that a 1.045M Total Force (490,000 AC, 350,000 ARNG, and 205,000 USAR) at a level of funding adequate to balance end strength, readiness, and modernization could better address an increasingly unpredictable future security environment.

6. Senator INHOFE. General Milley, there are currently just over 20,000 soldiers in South Korea alone. If the Army had to respond to a Korea scenario today given its reduced readiness and force structure, would the Army be able to source all its combat ready forces from the U.S. or it have to take forces from other theaters such as EUCOM and CENTCOM, who are already short of forces and resources?

General MILLEY. If confirmed, I will thoroughly review the forces required in the event of a Korea contingency. However, it is my current understanding, in the event of crisis or conflict in Korea, we would first deploy ready units not already committed to other operations in other theaters. The sourcing of forces for contingency operations (such as the Korea scenario) is dependent on the state of readiness and commitment of all forces in the Army inventory at the time of execution. The possibility exists that the Army would have to draw forces away from other combatant commands, such as EUCOM or CENTCOM, in order to respond to a Korea scenario.

7. Senator INHOFE. General Milley, how do you see the three components of the Army contributing most effectively to this Nation's land power requirements? How important is it to balance the three components?

General MILLEY. Balancing the three distinct and equally important components of the Total Army is critical. The optimal blend of each component will depend on the specific mission requirement generated by the combatant commanders and requires careful mission analysis and, significantly, the time required to respond to the combatant commanders' requirement. If confirmed, I will assess the Total Army force structure and recommend adjustments as necessary.

8. Senator INHOFE. General Milley, do you believe our Army has the force structure, training and equipment to meet all the requirements in the National Military Strategy today?

General MILLEY. As outlined in the 2014 QDR, the Army (as part of the Joint Force) has to accomplish the three tasks of the defense strategy: defend the homeland, build security globally, and project power and win decisively. The Army has the force structure, training, and equipment to accomplish the first mission, but the second and third missions present growing challenges. The Army has the capability to build security globally, but ongoing force reductions place a greater strain on that capacity. Emergent demands and decreased resources may change underlying assumptions, increasing risk to our ability to project power and win decisively as our capacity and resources continue to decrease.

9. Senator INHOFE. General Milley, do you think the Army is accepting too much risk given the growing instability around the globe?

General MILLEY. I concur with GEN Odierno's assessment that a 980,000 Total Army (450,000 AC, 335,000 ARNG, and 195,000 USAR) will be capable of executing the defense strategy outlined in the 2014 QDR at a "significant" level of risk. The 2014 QDR, however, did not account for the growing instability that we now see in Russia's aggression in the Ukraine, the rise of ISIL, the Ebola crisis, and increasing challenges in the Pacific region.

10. Senator INHOFE. General Milley, how will you know when our military has accepted too much risk?

General MILLEY. I will know we have accepted too much risk when the risk to mission or risk to force is unacceptable. If the Army's capacity (i.e., number of troops available) is insufficient to meet the National Security and combatant commander requirements, to include war plan contingencies, we have reached an unacceptable level of risk to mission. If the Army has the capacity, but not the capability (i.e., skills and readiness) and is not resourced to fix that shortfall before deploying the force, we will have reached an unacceptable level of risk to the force. In either case, I will know our Nation has accepted too much risk.

11. Senator INHOFE. General Milley, what are the indicators that you look for?

General MILLEY. Indicators I look for include the capacity and capability of the force to accomplish the mission. Capacity is measured by the force's size; capability by its skill and readiness, where readiness is a function of manning, training, equipping, and leading. A decrease of any of these indicators illustrates or creates increased risk. Additionally, any change in the global security environment (e.g., increasing instability or volatility) is an indicator of risk. Lastly, any increase in our adversaries' relative capability or capacity is an indicator of increasing risk.

SECURITY OF THE FORCE

12. Senator INHOFE. General Milley, what are your thoughts regarding the security status of Army personnel serving at locations both on and off-post?

General MILLEY. Force protection is a key task for any commander, and there are a wide variety of active and passive measures commanders can employ. In all environments, leaders must balance force protection with mission accomplishment. As with everything that we do, Army leaders at all levels conduct risk analysis to ensure that we mitigate risk as low as possible while still maintaining the ability to accomplish our missions. For example, commanders can harden structures, e.g. bulletproof glass, increase patrols, and coordinate closely with federal and civilian law enforcement. It is especially necessary to reevaluate all measures due to the recent shootings in Tennessee, as DOD is currently doing.

13. Senator INHOFE. General Milley, do we need to reassess our security levels, rules of engagement, training requirements, ability to increase manning of armed security personnel, and authorization for military personnel to carry government firearms both concealed and openly carry to and from duty?

General MILLEY. Yes. If confirmed, I will work with OSD to assess all those factors. The Army is currently evaluating our options for increasing the security posture of our personnel to include both active and passive security measures. Arming well-trained soldiers would fall into the active measure category while increasing additional security layers to facility access points qualify as passive measures. Any option considered must comply with existing law. Whichever option we decide upon must take into consideration not only the safety and security of our soldiers but the communities in which they work.

QUESTIONS SUBMITTED BY SENATOR KELLY AYOTTE

SHORTFALLS IN EUROPE—DETECTING PUTIN

14. Senator AYOTTE. General Milley, in your advance policy question responses, you stated that the Army in Europe does not have what it needs. Specifically, what does EUCOM need that it does not have?

General MILLEY. EUCOM needs additional assets, permanent or rotational, to deter Russian aggression and assure allies. The Army is in the process of placing activity sets and pre-positioned equipment in Europe manned with forces rotating on a temporary basis to assist with this mission. I have been briefed that EUCOM is estimating it needs additional armor, sustainment, engineering, intelligence, medical, fires, and signal; furthermore EUCOM may require additional military police assets. If confirmed, I will continue to work with EUCOM to further develop these requirements.

NH ARMY NATIONAL GUARD MILITARY CONSTRUCTION

15. Senator AYOTTE. General Milley, in times of fiscal strain, one of the first things that gets cut or delayed is military construction. The problem is that these cuts exact a growing readiness toll over time. For that reason, I continue to be troubled by the condition of New Hampshire Army National Guard readiness centers—a trend that I know is reflected around the country. However, the condition of readiness centers in New Hampshire is particularly unacceptable. According to the Army National Guard Readiness Center Transformation Master Plan final report to Congress last year, the average condition index (CI) of New Hampshire Army National Guard readiness centers is Poor (64 out of a 100 scale), ranking New Hampshire 51 out of the 54 states and territories evaluated nationwide.

In total, the New Hampshire Army National Guard has 1 readiness center rated 'Fair', 12 rated 'Poor', and 3 rated 'Failing'.

The Manchester readiness center was constructed in 1938 and does not comply with building code standards—as well as life, health, safety and Anti-terrorism Force Protection standards. Members of the New Hampshire Army National Guard—and servicemembers like them around the country—deserve better.

I am pleased that the Department is finally requesting funding for New Hampshire Army National Guard vehicle maintenance shops in Hooksett and Rochester for fiscal year 2017, as well as readiness centers in Pembroke and Concord for fiscal years 2018 and 2020, respectively. Considering the poor state of New Hampshire Army National Guard facilities, it is essential that these projects not be postponed and that they go forward as currently scheduled.

When confirmed, will you examine the allocation of military construction dollars not only between the Active and Reserve component, but also the allocation among the state Army National Guards to ensure the optimal allocation?

General MILLEY. Yes, if confirmed, I will examine the allocation of military construction resources across the Total Army, to include New Hampshire Guard facilities.

ENDSTRENGTH REDUCTIONS—STRATEGIC RATIONALE?—HOW MANY INVOLUNTARY SEPARATIONS?

16. Senator AYOTTE. General Milley, under the current plan, the Army will have to cut about 40,000 Active Duty soldiers in the next couple of years in order to reach an Active Duty endstrength of 450,000 soldiers. In your responses to the advance policy questions, you said, "Right now the level of uncertainty, the velocity of instability, and potential for significant inter-state conflict is higher than it has been since the end of the Cold War in 1989–91." You also note that, "the demand for ground forces will continue to increase even more so since many of our longstanding allies have significantly reduced their military forces over the last 25 years." What is the strategic rationale for cutting the size of our Active Duty Army by 40,000 soldiers (8 percent) in the next two years?

General MILLEY. The Army was forced to make reductions as a result of the Budget Control Act. Within those resource constraints, the Army developed a plan to maintain a balance between endstrength, readiness, and modernization. The reductions were informed based on a comprehensive analysis of mission requirements and installation capabilities.

17. Senator AYOTTE. General Milley, if defense sequestration is not reversed and the Army must go down to 450,000 or even 420,000 Active Duty soldiers, how many well-performing non-commissioned officers and officers will have to be involuntarily separated (given pink slips)?

General MILLEY. The Army anticipates that as it reduces from 490,000 to 450,000 in the Active Component, it will have to involuntarily separate approximately 15,000 Noncommissioned Officers and Officers. If the Army is directed to go to 420,000, it will have to involuntarily separate an additional 13,000 Noncommissioned Officers and Officers (28,000 total).

18. Senator AYOTTE. General Milley, we talk about not breaking faith with our soldiers. When we give a well-performing soldier who has deployed (often multiple times) a pink slip simply to meet a budget-drive endstrength reduction, I think that is breaking faith. I hope Congress will provide the funding necessary to maintain the Army endstrength our national security interests require. When confirmed, will you work to minimize the use of involuntary separations of well-performing soldiers?

General MILLEY. Yes.

POOR ARMY READINESS

19. Senator AYOTTE. General Milley, in your responses to the advance policy questions, you said that “only about 30 percent of Army brigades are at acceptable levels of combat readiness.” You note that number should be between 60–70 percent. What is the primary reason for this poor readiness, and what can Congress do to help improve Army readiness?

General MILLEY. The primary reason is the budget reduction driven requirement to make unforecasted trade-offs between endstrength, readiness, and modernization and resulting budget uncertainty. Congress can assist by providing the predictable funding necessary to restore the appropriate balance between modernization, endstrength, and readiness.

20. Senator AYOTTE. General Milley, what is the optimal balance between having the number of personnel the Army needs and having the right equipment to achieve today’s strategy?

General MILLEY. The optimal balance, informed by resourcing, weighs readiness, modernization, and endstrength against National Security Requirements. If confirmed, I will ensure no soldier is deployed in harm’s way without the proper training and equipment. Right now, within PB16, the Army can, with “significant risk,” field a 980,000 Total Army (450,000 AC, 335,000 ARNG, and 195,000 USAR). If the current Budget Control Act funding levels remain in place, I will have to work with the Secretary of the Army to reduce the Army, perhaps to 920,000 Total Army (420,000 AC, 315,000 ARNG, and 185,000 USAR) in order to ensure we have the right balance of readiness, modernization, and endstrength.

21. Senator AYOTTE. General Milley, there has been discussion recently about the balance between light infantry forces, medium forces, and heavy forces. In view of requirements and likely missions in the future, what do you believe is the optimal balance of these types of forces?

General MILLEY. The Army continually reassesses mission requirements to inform decisions regarding force structure. If confirmed, I will review the COCOM operational planning requirements to ensure the Army has the appropriate force mix.

ARMY MODERNIZATION PROGRAMS

22. Senator AYOTTE. General Milley, how should the Army balance developing and fielding new systems such as the Future Fighting Vehicle versus modernizing existing systems such as the Abrams tank and the Bradley Fighting Vehicle.

General MILLEY. Deployed soldiers must always have the most advanced capabilities available while the Army must also prepare for future threats. To accomplish this, the Army modernization strategy mixes limited development of new capabilities with incremental upgrades to existing platforms while also investing in key enabling technologies to support future efforts.

In the current fiscal environment, the Army’s Combat Vehicle Modernization Strategy focuses on cost-effective replacement of obsolete vehicles, maintenance and improvement of proven platforms to ensure relevance, and aggressive pursuit of technology development to fill anticipated capability gaps. Until resources are available to fully develop a Future Fighting Vehicle, the Army will continue Science and Technology investment in Infantry Fighting Vehicle enabling technologies while focusing its vehicle modernization efforts on procurement of the Armored Multi-Purpose Vehicle and incremental upgrades to the Abrams, Bradley, and Stryker families of vehicles.

QUESTIONS SUBMITTED BY SENATOR JONI ERNST

DRAWDOWN IN FORCES

23. Senator ERNST. In light of troop reductions and growing threats, what recommendations do you have for developing the Army of the future that allows fighting units to be scalable and expeditionary for a variety of missions?

General MILLEY. The U.S. Army is and must remain the world's premier ground combat force, capable of conducting sustained campaigns on land to achieve U.S. National Security objectives while remaining true to our national values. Individual and collective training creates capable formations and develops leaders as the source of future flexibility. Army units are designed to be scalable and expeditionary in order to execute a variety of missions. The Army traditionally task organizes forces based on mission analysis and deploys/employs only those units necessary for mission accomplishment. Brigade Combat Teams, for example, can be task organized by capability, by capacity, or by function to execute a variety of missions, from support and assistance to major combat operations. If confirmed, I will continually assess and collaborate with the other Service Chiefs and adapt the Army to meet current needs and position itself for the future.

24. Senator ERNST. How will a reduction in forces affect readiness in the future?

General MILLEY. The National Military Strategy requires the Army to simultaneously defend the homeland, assure our allies, deter adversaries and, when required, defeat one regional aggressor and deny an aggressor in another region. Lower readiness levels, constant demand and a smaller force will erode readiness for surge missions. The Army is prioritizing current operations and shaping over-surge capacity. As a result, senior leaders responding to future contingencies will soon be forced to decide between committing forces at lower readiness levels and partially incurring higher casualties, or delaying the deployment of forces to build readiness, jeopardizing mission accomplishment.

25. Senator ERNST. In conversations with soldiers from the non-commissioned officer to field grade levels, I am told our soldiers are concerned with the operational tempo of the Active Duty force. Some of these soldiers claimed Army leaders were failing soldiers by not scaling the amount of requirements to the reduced size of the force. How will you ensure unit commanders are accurately portraying their ability to accomplish assigned tasks and protecting the long-term readiness of the force?

General MILLEY. The Army relies on the Commander's Unit Status Report (USR) to show the unit's ability to accomplish assigned tasks. This report requires standard entries which indicate unit readiness trends over time and also allows the commander to raise any concerns. Long-term readiness trends of the force are reflected in performance trends at Army training venues, like maneuver combat training centers. The Army strives to communicate combatant command operational tempo with the Joint Staff and OSD so that we can prioritize missions for a decreasing Army force. Finally, the Army has multiple forums to synchronize, manage and distribute mission assignments across the force. If confirmed, I will work with the Chairman, Secretary of Defense, and Congress on balancing demand with the supply of Army forces. I will also personally stress to our commanders that I will accept nothing less than their honest assessments on the USR.

WORLDWIDE THREATS

26. Senator ERNST. If Russia represents our greatest threat, what recommendations would you offer to deter Russia and reassure allies?

General MILLEY. I would recommend that our Army continue to support the combatant commander's plans and requirements by increasing our posture on NATO's eastern flank, providing additional rotational forces and prepositioned stocks, and building additional combat power capacities to support multilateral training exercises and enable rapid force projection. In my judgment, only a strong posture and close cooperation with regional allies will provide this level of both assurance and deterrence. Continued funding of the European Reassurance Initiative is critical to effect this and support the combatant commander's strategy.

27. Senator ERNST. During your testimony, you said that Russia was the greatest existential threat to the United States. How will you improve the Army's support to U.S. Army Europe with respect to enhancing military intelligence support to operations and force protection?

General MILLEY. The Army currently provides military intelligence support, including counterintelligence force protection, at the strategic level with intelligence

personnel assigned to the United States Army NATO Brigade and the 650th Military Intelligence Group (Supreme Headquarters Allied Powers Europe; and at the operational level through the assignment to U.S. European Command (EUCOM) of the 66th Military Intelligence Brigade. The 66th has the ability to downward reinforce tactical units operating within EUCOM area of responsibility, and is currently doing so in the form of counterintelligence support to the units forward deployed to the Baltics in support of Operation Atlantic Resolve. Additionally, the Army has regionally aligned the 4th Infantry Division with EUCOM, which provides additional intelligence support and analytic capacity to EUCOM through reachback and through a forward deployed detachment of intelligence officers and analysts in Germany. Finally, the 902nd Military Intelligence Group, part of the Army Intelligence and Security Command, provides general support to counterintelligence efforts as required. If confirmed, I will assess whether this level of support meets the combatant commander's needs.

28. Senator ERNST. During your testimony, you said that Russia was the greatest existential threat to the United States. How will you enhance the Army's support to U.S. Army Europe (USAREUR) with respect to enhancing USAREUR's ability to reassure our allies and deter Russian aggression through the training of Ukrainian forces?

General MILLEY. While the Army is enhancing the U.S. Army Europe's (USAREUR) efforts to build Ukrainian capacity within their National Guard security forces through a moderate training and equipping package, we will remain prepared to increase our assistance to Ukraine by providing similar support to the Ukrainian armed forces, if authorized. These efforts, if expanded beyond their police-like National Guard, will certainly improve their interoperability with NATO and build capacity to protect their borders and defend their sovereignty, assuring our allies and further deterring Russia. If confirmed, I will work closely with USAREUR to ensure we are poised to provide ready forces at the right time to meet emerging requirements.
