

their dreams. A longtime member of the University of Southern California School of Fine Arts' Board of Councilors, Helene and her late husband, Louis, were the driving force behind the construction of USC's Galen Center, an arena that opened in 2006 and has provided the community an incredible venue for sporting events, concerts, and school activities.

A former executive in the retail industry, Helene has used her financial savvy and management experience to benefit a host of charities and institutions. She has served on the boards of the Eisenhower Medical Center, the Palm Springs Art Museum, the McCallum Theatre, and the Palm Springs International Film Festival.

A devoted mother and grandmother, Helene truly embodies the saying in the Jewish tradition, "Whoever saves a life, it is as if that person has saved the whole world." Without a doubt, Helene's work has saved countless lives, and her impact will be felt in California for many years to come.●

#### RECOGNIZING THE ENERGY INNOVATION LABORATORY

● Mr. CRAPO. Mr. President, I wish to commend the Idaho National Lab's Energy Innovation Laboratory, EIL, for the facility's selection as the 2014 Best Green Project in the Nation by the Engineering News-Record.

The recent award is among the growing list of recognitions the EIL is receiving for the innovative work at the lab. Engineering News-Record also recognized EIL as the Best Overall Inter-mountain Project for the States of Idaho, Utah and Montana. Additionally, EIL won the 2014 Go Beyond Award for the team's work to reduce the lab's environmental impacts. The lab is also among fewer than 5 percent of U.S. Green Building Council's Leadership in Energy and Environmental Design, LEED, registry research labs to be Platinum-certified.

EIL was completed in 2013 following the outstanding work of the EIL project team, led by Reed Miller of Ormond Builders and Kath Williams, the LEED coordinator, and in collaboration with INL's Project Management Office, Supply Chain Management and Campus Development Office. The new laboratory provides space for INL researchers to develop solutions to national energy challenges in advanced clean energy and related environmental science while also consolidating some of INL's research and development. I commend all those on the project team—including Ormond Builders Inc.; INL; Plan One/Architects; REL Facilities, LLC; Engineering System Solutions; and others—for their collaborative and conscientious work to establish this exceptional research facility that is mindful of our environment.

Energy efficiencies at the facility have resulted in its energy use being nearly half that of other conventionally-

designed laboratories. In addition to its impressive energy savings, the facility's design also reduces its water usage. Nearly all of the construction waste was recycled, reused or repurposed, and one-third of the facility was constructed using recycled materials.

Idahoans are leading the way in developing technological and scientific advancements that are beneficial around the world. The exceptional research and development being conducted at the Idaho National Laboratory is an asset to our State and Nation. I commend all those on the EIL project team for their forward-thinking work. Congratulations on receiving this award. I look forward to continuing to follow your success.●

#### TRIBUTE TO DR. OLIVIA J. HOOKER

● Mrs. GILLIBRAND. Mr. President, I wish to pay tribute to Dr. Olivia J. Hooker, a leader whose commitment to service has lifted the lives of many Americans. As the first African American woman to serve in Active Duty in the U.S. Coast Guard, and as a survivor of the Tulsa Race Riots and founder of the Tulsa Race Riot Commission, Dr. Hooker is a pioneer and role model for all to follow. I am especially proud to recognize Dr. Hooker on her centennial birthday.

During this momentous occasion, we celebrate the legacy of Dr. Olivia J. Hooker, whose strength and spirit have enriched our society.

Dr. Hooker was born in Oklahoma in 1915. In 1921, her community in Tulsa was destroyed in the worst race riot in United States history. The Tulsa Race Riot caused over 300 fatalities, as well as the burning of over 1,000 homes and businesses.

Following the riot, Dr. Hooker helped found the Tulsa Race Riot Commission. The commission served to draft recommendations for restitution. The advocacy of Dr. Hooker and her allies led them to testify before the Oklahoma State Legislature and U.S. Congress.

Dr. Hooker attended The Ohio State University after her family moved to Columbus, OH. After earning a bachelor's degree, Dr. Hooker applied to join the Navy, but was denied because of her race. Dr. Hooker then applied to join the Coast Guard, and became the first African American female to serve there. In 1942, Federal legislation created the U.S. Coast Guard Women's Reserve—the program known as SPAR. Dr. Hooker separated from the Coast Guard at the rank of petty officer 2nd class, with a Good Conduct Medal.

Dr. Hooker went on to earn her master's degree from Teachers College at Columbia University, and then a doctorate in psychology from the University of Rochester. Dr. Hooker had a long, remarkable career as a professor in New York. After retiring at the age of 87, she continues to inspire and support women joining the military, and

believes our country prospers because of its diversity.

Dr. Hooker broke barriers in our Nation. Her story inspires many people who have faced adversity and discrimination. Dr. Hooker's legacy, accomplishments, and spirit will live on in our Nation.●

#### RECOGNIZING JON PONDER

● Mr. HELLER. Mr. President, I wish to recognize Jon Ponder for his tireless effort in giving others hope for a brighter future. Mr. Ponder has dedicated many years to helping adults exiting various segments of the judicial system successfully reenter the workforce and their local communities, as well as rekindle relationships with their families. He has contributed greatly to the city of Las Vegas by founding HOPE for Prisoners, Inc., HOPE, which gives ex-offenders the support necessary to reduce the likelihood of returning to prison.

Mr. Ponder stands as a shining example of someone who has devoted his life to the betterment of others. He founded HOPE in January of 2012 and has since worked to create a strong program to successfully streamline men and women back into society. The program has graduated over 800 people through its leadership workshop who have gone on to successfully obtain full-time jobs. As founder and CEO, Mr. Ponder has contributed greatly to the success of the program.

HOPE services 12 agencies and offers life-skills training, work-readiness training, and job-development opportunities, encouraging those in the program to work hard to become a positive, contributing member of the community. Mr. Ponder has taken his own life experiences and used them in a positive manner to truly transform the lives of others. His ambition to help others is invaluable. He recently received the Leadership Award from the International Church of Las Vegas, a well-deserved honor for all of his hard work.

I extend my deepest gratitude to Mr. Ponder for his selfless contributions to the Las Vegas community and the individuals that have benefited from HOPE. His service to Nevada places him among the outstanding men and women of the State.

Today, I ask my colleagues and all Nevadans to join me in recognizing Mr. Ponder and his work for HOPE, a program with a mission that is both noble and necessary. I am honored to acknowledge Mr. Ponder and his tireless efforts to give others a second chance in Nevada. Giving these men and women the skills to allow them to change their circumstances is admirable, and I wish the program the best of luck in all of its future endeavors.●
