

many parents are deciding upon this option as a way to help them move on and assist with the grieving process.

Another negative effect of gender selection is the opening of new doors and new possibilities when choosing a gender. How far could it go? Maybe as far as choosing hair color, eye color, intelligence, height, and ability, who knows? People will do anything for perfection. This is basically “commodifying children”, says Gender Selection of Babies, and this could lead to a whole revolution in baby making. People wouldn’t be unique anymore; the natural process of development would become obsolete. The unforeseen repercussions of gender selection could further harm society.

Gender selection, although it can be helpful, has more negative effects than positive and should not be a decision made lightly. Gender Selection has made the country think having a baby in a different way. Now for many having a child could turn into some sort of shopping spree for the newest and best item/baby. However, this process has helped Americans and many others around the world choose the sex they want. Not only has it also allowed families, who didn’t believe it was possible, to have children but it has also given them the choice to save a life and chose what they want. Gender selection has changed America, and will continue to help stop the abortion of unwanted children.
