

We want to make sure that neither the President who is in the White House today nor the next President nor the President after that can admit China or any other country with any other large economy or small economy in the TPP without congressional approval.

We will discuss and debate this amendment more tomorrow.

I thank Senator WYDEN and Senator HATCH for moving this process forward and bringing up many amendments to debate.

The PRESIDING OFFICER. The Senator from Oregon.

AMENDMENT NO. 1227 TO AMENDMENT NO. 1221

(Purpose: To make trade agreements work for small businesses)

Mr. WYDEN. Mr. President, on behalf of Senator SHAHEEN, I call up her amendment, which is amendment No. 1227.

The PRESIDING OFFICER. The clerk will report.

The senior assistant legislative clerk read as follows:

The Senator from Oregon [Mr. WYDEN], for Mrs. SHAHEEN, proposes an amendment numbered 1227 to amendment No. 1221.

Mr. WYDEN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The amendment is printed in the RECORD of May 14, 2015, under "Text of Amendments.")

AMENDMENT NO. 1327 TO AMENDMENT NO. 1221

Mr. WYDEN. Mr. President, on behalf of Senator WARREN, I call up amendment No. 1327.

The PRESIDING OFFICER (Mr. DAINES). The clerk will report.

The senior assistant legislative clerk read as follows:

The Senator from Oregon [Mr. WYDEN], for Ms. WARREN, proposes an amendment numbered 1327 to amendment No. 1221.

Mr. WYDEN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To prohibit the application of the trade authorities procedures to an implementing bill submitted with respect to a trade agreement that includes investor-state dispute settlement)

At the end of section 106(b), add the following:

(7) FOR AGREEMENTS THAT THREATEN UNITED STATES SOVEREIGNTY.—The trade authorities procedures shall not apply to an implementing bill submitted with respect to a trade agreement or trade agreements entered into under section 103(b) if such agreement or agreements, the implementing bill, or any statement of administrative action described in subsection (a)(1)(E)(ii) proposed to implement such agreement or agreements, includes investor-state dispute settlement.

The PRESIDING OFFICER. The Senator from Utah.

MORNING BUSINESS

Mr. HATCH. Mr. President, I ask unanimous consent that the Senate

proceed to a period of morning business, with Senators permitted to speak therein for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. LANKFORD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

COMMEMORATING 35 YEARS SINCE THE ERUPTION OF MOUNT ST. HELENS

• Ms. CANTWELL. Mr. President, today marks the 35th anniversary of one of the largest and most devastating volcanic eruptions in the history of our Nation—the 1980 eruption of Mount St. Helens. Today, the people of my State continue to embrace the mountain's beauty, but retain a profound respect for its power given the potential for a recap of the 1980 eruption and the devastation that it brought.

On the morning of May 18, 1980, small eruptions and earthquakes finally culminated in a destructive eruption that changed surrounding geography and rendered the neighboring ridges void of life. David Johnston, a scientist with the U.S. Geological Survey was conducting measurements on the mountain. At 8:32 a.m., as an earthquake brought magma to St. Helens surface, Johnston sent the now infamous radio transmission: "Vancouver, Vancouver. This is it!" Sadly, just seconds later, Johnston was engulfed by the explosion and the ensuing landslide that swept laterally from the mountain at speeds as high as 670 miles per hour. Tragically, 57 lives were lost as a result of the eruption and 200 homes were destroyed along with bridges, roads, and railways in the vicinity. And the blast incinerated 100-year-old trees and all forms of plant life within the blast zone. Estimates put the total loss of trees at 4 billion board feet.

In the 35 years since the eruption, the private sector and the Federal Government's approach to forestry has changed significantly. Following the eruption, Congress directed the Forest Service to embark on a new approach to forest management. In 1982, Congress created the Mount Saint Helens National Volcanic Monument. This 110,000 acre designation has created a kind of "biological laboratory" at the site of the eruption to let nature take its course. That foresight has allowed ecologists to learn that forests didn't regenerate from clearings the way scientists had believed for almost a century. We also learned the importance of leaving behind a legacy of dead trees

to serve as homes for birds and that patches of remnant areas existed which supported sporadic groups of live trees. The learnings from this natural disaster shaped the forest policy that we see throughout much of Washington and the country today.

Now, as residents in Washington and around the country are witnessing unusually large forest fires—the Federal Government needs to take the lessons learned following the Mount St. Helens eruptions and apply them to this new challenge. The government needs to do its part to rapidly provide the emergency services communities need after large fire and natural disasters. But we also need to stabilize slopes to prevent mudslides through investments in seismic monitoring equipment and Light Detection and Ranging or LiDAR. Just as we learned in the Mount St. Helens experiment, a great deal of wildlife thrive in the early forest conditions that come after a wildfire. Those areas need to be considered as managers look at what's the best for our Federal lands. And what better place to visit that conversation, than on the National Forest that houses the ecological record of the Mount St. Helens eruption of 35 years ago.

Seismic activity in the Pacific Northwest isn't just a once in a generation event, but an ever present reality in Washington State. The eruption of Mount St. Helens provides a clear reminder of the value of early earthquake monitoring and warning systems. The Pacific Northwest Seismic Network offers early warning systems and comprehensive seismic monitoring that can warn communities up to a minute before an earthquake occurs, or even future volcanic eruptions. With constant seismic activity throughout much of Washington State, including at volcanos such as Glacier Peak in the Cascades, we must continue to make the vital investments in these early warning systems.

I look forward to taking lessons learned on Mount St. Helens and applying them to a new approach to forest policy. I have also called for us as legislators and constituents to begin a conversation around what we want our national forests to look like over the next 50 years. What is working well, and what problems we do not want to see as we think about our 21st century vision for our national forests.

As we reflect today on the tragic and watershed event that happened on Mount St. Helens 35 years ago, we must work to put our forests on a long-term track to successfully delivering the things we expect from them—quality recreation, clean water, clean air, wildlife habitat, and a sustainable supply of wood products.●

TRIBUTE TO WALTON GRESHAM

• Mr. COCHRAN. Mr. President, I am pleased to commend Walton Gresham of Indianola, MS, for his service and
