The SPEAKER pro tempore (Mr. HARDY). Pursuant to the rule, the gentleman from Texas (Mr. BRADY) and the gentleman from New York (Mr. ROGEL) each will control 20 minutes.

Mr. BRADY. Of Texas. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and to include extraneous material on H.R. 2570, currently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. BRADY of Texas. Mr. Speaker, I yield myself such time as I may consume.

I stand in strong support of H.R. 2570, the Strengthening Medicare Advantage through Innovation and Transparency for Seniors Act.

This package is comprised of two policies, and I will let the sponsors, who have worked so hard, speak to them in more depth.

The Electronic Health Fairness Act of 2015, as marked up by the committee back in February, brings fairness to physicians who are practicing in the ASC setting by reducing meaningful use burdens for sites of service that were left out of the EHR technology requirements. This exemption only lasts until the ASCs are able to catch up, and then everybody will be on equal footing regarding meaningful use requirements.

The bill then establishes a new demonstration program based on value-based insurance design. This proposal would give plans the ability to adjust benefits based on their enrollees’ needs. The one-size-fits-all policies in Medicare Advantage create the need for different types of plans that wouldn’t be necessary if regular Medicare Advantage plans could adjust their benefit structures to better serve our seniors.

Reducing copays or cost sharing for beneficiaries for the sake of better healthcare outcomes is right in line with the principles that I support as all Members should consider.

The Speaker. Pursuant to the rule, the gentleman from Texas?

The SPEAKER pro tempore (Mr. ROGEL). Pursuant to the rule, the gentleman from Texas (Mr. BRADY) and the gentleman from New York (Mr. ROGEL) each will control 20 minutes.
The policy does take away the potential that these rates could change significantly in the future by exempting the drugs from DME competitive bidding. I am committed to ensuring that beneficiaries who need these drugs are able to continue to get them in their homes and I will certainly monitor the impact.

I want to thank Ways and Means member Mrs. Black of Tennessee and Mr. Blumenauer of Oregon for their continued leadership in improving Medicare Advantage. Their very hard work will ensure that seniors, for years to come, will enjoy better healthcare choices and more options at that.

Mr. Speaker, I reserve the balance of my time.

Mr. Rangel. Mr. Speaker, I yield myself such time as I may consume.

I join with the gentleman from Texas in supporting H.R. 2570. Representative Diane Black and Representative Earl Blumenauer have worked hard on this issue.

This legislation will allow the Secretary of HHS to conduct a demonstration, giving managed care organizations the ability to offer plans with a variety of benefit structures that would promote non-drug cost sharing for high-value service. We think it makes a lot of sense, and I concur.

I reserve the balance of my time.

Mr. Brady of Texas. Mr. Speaker, I yield 2 minutes to the gentlewoman from Tennessee (Mrs. Black), a key member of the Committee on Ways and Means and a healthcare professional herself.

Mrs. Black. Mr. Speaker, as a nurse for over 40 years, I understand the challenge of helping Americans find affordable healthcare coverage, but the sad truth is, even for those who do have health coverage, high deductibles and out-of-pocket costs can leave too many Americans functionally uninsured.

When families are forced to choose between buying groceries and filling a prescription, their health is sidelined, and they risk facing even higher medical costs down the road. That is why I authored H.R. 2570, the Strengthening Medicare Advantage Through Innovation and Transparency for Seniors Act. Our bill directs CMS to set up a pilot project for what is known as Value-Based Insurance Design, or otherwise known as VBID.

Instead of the current one-size-fits-all approach to cost sharing, VBID embraces the idea that by lowering a patient’s out-of-pocket costs for essential prescription drugs and services, customers will then be motivated to stick with their regimen and stay healthier. This will, in turn, decrease the overall long-term costs to our healthcare system and provide a higher quality of care for our patients.

My bill also helps our providers by offering ambulatory surgical centers relief from the electronic health records’ meaningful use mandate.

While this recordkeeping system may make sense in a hospital setting, it doesn’t always work for a small, outpatient surgical facility. Providers who practice medicine in these settings should not be penalized as a result.

I urge a “yes” vote on H.R. 2570.

Mr. Rangel. I yield myself the balance of my time.

Mr. Speaker, at this time I concur with the gentleman from Texas. Members have worked hard in perfecting these bills, and I support H.R. 2570.

I yield back the balance of my time.

Mr. Brady of Texas. Mr. Speaker, I yield myself such time as I may consume.

This is a very good bill. It is a good improvement to Medicare Advantage, and it is really a case of Republicans and Democrats finding common ground and doing it in a way that helps seniors with their choices and really tailoring healthcare to them.

I strongly urge support for this bill.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. Brady) that the House suspend the rules and pass the bill, H.R. 2570, as amended.

The question was taken; and (two-thirds being in the affirmative) the rules were suspended and the bill, as amended, was passed.

The title of the bill was amended so as to read: “A bill to amend title XVIII of the Social Security Act with respect to the treatment of patient encounters in ambulatory surgical centers in determining meaningful EHR use, establish a demonstration program requiring the utilization of Value-Based Insurance Design to demonstrate that reducing the copayments or coinsurance charged to Medicare beneficiaries for selected high-value prescription medications and clinical services can in turn ultimately improve clinical outcomes and lower health care expenditures, and for other purposes.”

A motion to reconsider was laid on the table.

INCREASING REGULATORY FAIRNESS ACT OF 2015
