PROCEEDINGS AND DEBATES OF THE 114th CONGRESS, FIRST SESSION

Vol. 161 WASHINGTON, MONDAY, JULY 27, 2015 No. 119

Senate

The Senate met at 2 p.m. and was called to order by the President pro tempore (Mr. HATCH).

PRAYER

The Chaplain, Dr. Barry C. Black, offered the following prayer:

Let us pray.

Eternal God, incline Your ear and hear our prayer, for without Your presence and power, our striving is in vain. Preserve us with Your loving providence, guiding us through each season of life's sojourn.

Lord, teach our lawmakers Your way, illuminating their path with the lamp and light of Your truth. Remind them that true greatness comes through service, as they remember to esteem others as better than themselves.

You, O Lord, are a God full of compassion. You are gracious, long-suffering, and abundant in mercy and truth.

We praise Your matchless Name. Amen.

PLEDGE OF ALLEGIANCE

The President pro tempore led the Pledge of Allegiance, as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDING OFFICER (Mr. JOHNSON). The majority leader is recognized.

THE HIGHWAY BILL

Mr. MCCONNELL. Mr. President, ''there is no such thing as a Republican road or a Democrat road.'' That is what Chairman INHOFE said a few days ago, and he is absolutely right. No wonder Republicans and Democrats continue to rally around a bipartisan, multiyear highway measure that is fiscally responsible and will not raise taxes.

The bill before us would streamline regulations, advance research and innovation in transportation, modernize infrastructure and transportation systems, and inject new accountability measures so Americans can get a better handle on how their tax money is actually being spent.

This multiyear bill also reverses the trend of short-term temporary patches, giving State and local Governments the certainty and the stability they need to better plan road and bridge projects. On top of that, the bill would also provide State and local Governments with more flexible options for stretching those transportation dollars.

So this is a good bill for our country. Substantial numbers of Republicans and Democrats continue to support it. But time is running out to get this bill through Congress. We are up against a deadline at the end of the week. Jobs are on the line. Important infrastructure projects are too. So we have to get the job done—and we are.

We have had to navigate some especially difficult political terrain to get this far already. It hasn't always been easy, but we are now nearing completion of the Senate's work on this bill.

If the bipartisan coalition supporting this fiscally responsible, multiyear bill continues to cooperate and work hard, I know we can get there.

I want to thank every colleague who has worked so hard already on this bill, particularly Chairman INHOFE and Senator BOXER, who have really done magnificent work to get us to this point. Let's hope we can all get it across the finish line.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. The Democratic leader is recognized.

ORDER OF BUSINESS

Mr. REID. Mr. President, I choose not to speak today. So I would ask the Chair to announce the business of the day.

RESERVATION OF LEADER TIME

The PRESIDING OFFICER. Under the previous order, the leadership time is reserved.

HIRE MORE HEROES ACT OF 2015

The PRESIDING OFFICER. Under the previous order, the Senate will resume consideration of H.R. 22, which the clerk will report.

The senior assistant legislative clerk read as follows:

A bill (H.R. 22) to amend the Internal Revenue Code of 1986 to exempt employees with health coverage under TRICARE or the Veterans Administration from being taken into account for purposes of determining the employers to which the employer mandate applies under the Patient Protection and Affordable Care Act.

Pending:

McConnell modified amendment No. 2266, in the nature of a substitute.

McConnell (for Kirk) amendment No. 2327 (to amendment No. 2266), to reauthorize and reform the Export-Import Bank of the United States.

McConnell amendment No. 2328 (to amendment No. 2327), to repeal the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010 entirely.

McConnell amendment No. 2329 (to the language proposed to be stricken by amendment No. 2266), of a perfecting nature.

McConnell amendment No. 2330 (to amendment No. 2329), to change the enactment date.

The PRESIDING OFFICER. The Senator from Illinois.

25TH ANNIVERSARY OF THE AMERICANS WITH DISABILITIES ACT

Mr. DURBIN. Mr. President, there are no ideas more central to America's democracy and identity than liberty

● This "bullet" symbol identifies statements or insertions which are not spoken by a Member of the Senate on the floor.

and equality. The Declaration of Independence lists liberty among mankind's inalienable rights and states: ''All men are created equal.'' But it wasn't until 1870 that the 15th Amendment to the Constitution was ratified, extending the vote to African-American men, and women were not given the right to vote in America until 1920, when the 19th Amendment was ratified.

America's democracy has indeed been imperfect, but throughout our history, we have sought to address our imperfections. After all, the story of America is not the story of a perfect nation. It is the story of a nation in pursuit of a more perfect nation.

So it is sobering but not surprising that it took us nearly to the end of the 20th century to expand and acknowledge the rights of another group of Americans who suffered discrimination through history—people with disabilities.

This Sunday we mark the 25th anniversary of one of the most important civil rights victories in our nation's history—the enactment of the Americans with Disabilities Act. The Americans with Disabilities Act set forth four great goals for people with disabilities: equal opportunity, full participation, independent living, and economic self-sufficiency. But the fundamental goal of the ADA is simple. In the words of one activist, the ADA is about securing for people with disabilities the most fundamental of rights: ''the right to live in the world.''

It is worth remembering that this was a bipartisan victory. Senator Bob Dole, a Republican and a veteran wounded by German machine gun fire in World War II, and Tom Harkin, a Democrat from Iowa, teamed up to get this done.

When President George H.W. Bush signed the ADA into law, he said: ''Today's legislation brings us closer to that day when no Americans will ever again be deprived of their basic guarantee of life, liberty, and the pursuit of happiness.''

Tom Harkin called the day the ADA passed the proudest day of his legislative career. I remember a story he told the Senate a few years ago. When he was first elected to the Senate, his whole family came for the swearing-in ceremony. They sat up in the gallery right behind me. He even arranged a sign language interpreter for his older brother Frank, who was deaf. But he was told by the guard outside of the gallery door that the interpreter was not allowed to stand in the gallery and interpret.

Tom Harkin could not believe it. He came down to the floor and told the majority leader, Bob Dole, the situation. Senator Dole said: ''I will take care of it.'' And he did. It was the first thing they did together. It sure wasn't the last. Five years later they watched President Bush sign the ADA into law.

I want to give credit to some tireless advocates who helped make that a reality: Justin Dart, the ''Father of the ADA,'' who has passed on, and my great friend from Chicago, Marca Bristo, President and CEO of Access Living.

In 1977, Marca had a serious accident and broke her neck, leaving her paralyzed from the chest down. She lost her job, her house, and her health insurance. A lot of people would have given up—but not Marca Bristo. She led an army of people who could not see, hear, walk, and talk to mobilize and pass the most comprehensive civil rights law since the Civil Rights Act of 1964.

Marca is a force of nature. Every day, Marca and her team are on the frontlines helping people with disabilities. They help people such as Michael Grice. He uses a power wheelchair and has been involved with disability activism for many years. He has a bright personality that draws many people to him.

He speaks with passion and compassion. He calls himself a very active person. He was living on his own in an apartment in Hyde Park on the South Side of Chicago until health complications led him into a group home, where he lived for more than a year. His health continued to deteriorate, and he moved into a nursing home.

Michael and the group home staff planned for him to stay at the nursing home for 6 to 8 weeks and then move back on his own. Those 6 to 8 weeks became nearly 3 years. Michael grew more frustrated. That is when Marca Bristo and Access Living came to the rescue, and they helped Michael find a new place so he could live on his own. Last year Michael was able to move from the nursing home into his own apartment.

I am proud of activists such as Michael and Marca and the folks at Access Living. We owe them a debt of gratitude for helping America realize our full potential.

It is hard to imagine, but before the Americans with Disabilities Act, people with disabilities were denied the opportunity to participate fully in society. Back then, very few transit systems had buses or trains equipped for wheelchairs. If you needed a haircut or to see a doctor or just wanted to meet a friend for a cup of coffee, you probably had to rely on family and friends or a social service agency.

The Americans with Disabilities Act has changed that. The Americans with Disabilities Act has changed America. Every day you can see how far we have come as you walk down the street—with curb cuts, ramps, braille signs, and assisted listening devices. Because of the ADA, thousands of Americans with disabilities get to go to school, get a good education, and enter the workforce.

We still have a long way to go. The unemployment rate for people with disabilities is still too high. Most people with disabilities want to work and have to work. When they do work, that can impact our communities in ways that are hard to imagine.

Let me tell you about the late Bob Greenberg, a legendary sportscaster at WBEZ radio in Chicago. For his loyal Chicago radio audience, Bob described sporting events that they couldn't see. But Bob's story is unique because Bob couldn't see them either. Bob Greenberg was blind. But that didn't stop him from achieving his dreams.

In the early 1980s, Hall of Fame basketball player Kareem Abdul-Jabbar was taking questions from reporters after a hard game. He turned to Bob, who was holding a white cane and a microphone and he said: How did you get here?

It wasn't hard, Bob said. He then explained how he knew the exact number of steps from his home to the Lake Street ''L,'' how he felt for the right combination of coins to put in the turnstile, and then how he knew the exact number of steps to take along West Madison to Chicago Stadium.

Kareem Abdul-Jabbar paused to take that in and finally said: Ask your question, sir.

It was clear. Bob Greenberg worked hard to get where he was.

There is no doubt that laws such as the ADA helped Bob. I just wish we had passed it sooner. Maybe Bob's road to achieving his dream could have been a little smoother.

Let me close by noting this. I wonder if the Americans with Disabilities Act were called before the Senate today, if it would pass. We know how great it is. We know what it has done for America. But there were also always voices then—and there are voices now—that question whether Government ought to have that big a say, that big a role, that big a voice in our private lives and our public lives. Thank goodness Bob Dole, a Republican, and Tom Harkin, a Democrat, put together a coalition that realized that at some moments in history we have to move together as an American family to solve a problem. We use our Government to achieve that goal.

The day the ADA passed, Senator Harkin stood at this podium in the Chamber and gave his entire speech in sign language. Afterward, he said it was the first time anyone ever gave a long-winded speech on the Senate floor and no one ever heard him. He was wrong. His brother Frank heard him. Marca Bristo heard him, Michael Grice heard him, Bob Greenberg heard him, and millions of others with disabilities heard that speech.

Before leaving the Senate, Senator Harkin taught me a wonderful sign for the word ''America.'' It is this: All ten fingers joined together, rotating in a circle around your chest. That is sign language for ''America.'' That is the America that we all are striving to become, a place where no one is left out, where we are all included within the circle of equal opportunity. That is how we honor our Constitution and our great Nation—with liberty and justice for all.

SYRIAN SAFE ZONE ANNOUNCEMENT

Mr. President, I recently spoke on the floor about the terrible humanitarian crisis in Syria. If you had to pick out one place in the world today where more innocent people are dying, it is hard to think of any place that matches Syria. Over 200,000 people have died during the course of the Syrian war, and up to 12 million Syrians have been displaced.

I have a friend of mine in Chicago, he is a Syrian American doctor, Dr. Sahloul, who comes to see me regularly and brings photos back from Syria. They are heartbreaking photos.

Dr. Sahloul and his friends literally sneak across the border into Syria to treat the casualties in this war. He shows me pictures of surgeries performed on the floors of schools and on card tables, and he shows me those who have been maimed and killed by the barrel bombs of Bashar Assad and by the ravages of war.

We will be judged as a generation as to whether we have responded properly to this humanitarian challenge.

In April, Senators KAINE, GRAHAM, and MCCAIN joined me on a letter to President Obama urging him to work with other world leaders to create no-fly zones within Syria where modern medical treatment can be provided and displaced persons can safely escape.

I have raised this with many involved in this extremely difficult issue, including Gen. John Allen, Retired, U.N. Special Envoy for Syria Staffan de Mistura, the Turkish Ambassador, and National Security Advisor Susan Rice.

So, I was heartened today—in fact, exhilarated—to read in the morning paper that the United States is now working with Turkey and other countries to establish a humanitarian safe zone in the northern part of Syria to try to find one patch of real estate in that war-ravaged country where these children, their mothers, families, elderly people, and those who have been hurt can go and safely—safely—be treated and live.

We have to do this. The Turks are going to lead the way. We are going to support them, but it is a challenge not just to our two countries—to us and to Turkey—but to the world to step up and put an end to this bloody, terrible, ruthless war.

There have been so many casualties. The United States—our good people who reach out to help those around the world—should stand and be counted when it comes to the establishment of this humanitarian zone to try to bring some peace to some part of the population living in war-torn Syria.

This won't solve the larger crisis right away, which ultimately will require a political transition in Syria. Without a political dialogue, there is no long-term hope for Syria, only short-term relief.

But this announcement does have the possibility to bring the Syrian civil war one step closer to an end.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Mississippi.

Mr. WICKER. Mr. President, I once again come to the floor to talk about a Feinstein-Wicker amendment to this Transportation bill, which I hope we can have a vote on and dispose of and let the U.S. Senate work its will on, either late tonight or perhaps tomorrow after the pending business is taken care of.

I would begin by quoting from an editorial that was in yesterday's Post-Gazette, the daily newspaper in Pittsburgh, where it says: ''The tractor-trailer roaring by you on the highway could be 9 feet longer next year.'' It could be this long, as shown on this chart I have in the Chamber. It could be mandated by this Congress on 39 States that do not want it.

The editorial goes on to point out there is legislation pending that would force these longer trucks on these 39 States—on all 50 States—11 of them already allow it, but 39 do not. Unless we act and adopt the Feinstein-Wicker amendment on this bill, a provision in the Transportation appropriations bill will go forward and is likely to be signed into law requiring this. This will have been done, I might add, without a full debate, without a hearing being held in any committee of the Senate on this issue.

So what are we talking about? I have in the Chamber a poster that says: ''Would You Feel Safe Driving Next to a Double 33?'' As shown here, this is the size of the proposed new longer trucks that we would mandate on all 50 States. As you can see on the chart, here is the size of a typical passenger car. Here is the comparative size of a motorcycle, a bicycle, and, of course, here is a defenseless pedestrian. Compared to the pedestrian down to the passenger car, this Federal mandate that I am trying to at least give a timeout to would mandate on States that they allow these twin 33 trailers, and they would be driving along next to this car that my kids are going to be driving in and my grandchildren are going to be riding in. I do not think it is a good idea.

But I would point out, if a State does think it is a good idea, I am not going to stand in their way. Some 11 States have decided they are willing to take this risk—many of them out in the wide-open spaces of the West. But it is worth saying that these 39 States do not allow longer tandem trucks, and we should ask ourselves whether Congress knows better than these States.

These States do not allow them: Alabama, Alaska, Arkansas, California, Colorado, Connecticut, Delaware, Georgia, Hawaii, and Illinois. As a matter of fact, we have a unanimous resolution from the Illinois State Senate, a bipartisan, unanimous resolution from the Illinois State Senate, saying: Do not mandate these double 33s on us. I go on: Kansas, Kentucky, Louisiana, Maine, Maryland, Michigan, Minnesota, my home State of Mississippi, Missouri, Nebraska, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Vermont, Virginia, Washington, West Virginia, and Wisconsin, Mr. President. None of those States allows twin 33s now, but there is a proposal I am trying to stop that would mandate that these States must allow for the longer and, I believe, more dangerous trucks.

The editorial goes on to quote the former head of the National Highway Traffic Safety Administration, who ''likens the massive trucks to 'trains on highways' that would damage roads and endanger motorists.'' I think it makes a lot of sense. I think it would damage roads. I think it would endanger motorists.

Now, if my State of Mississippi, with the considered judgment of the Mississippi Department of Transportation and their commission, the Mississippi Sheriffs' Association, the Mississippi Association of Chiefs of Police—if all of those people are advising us against this, why should we as a Congress tell these States that we know better than they do?

I will just quote one final statement from the editorial before I ask it be printed in the RECORD. The editorial concludes: ''With its bridges already in the worst shape in the nation, Pennsylvania doesn't need longer trucks on its roads.''

Mr. President, I ask unanimous consent that this editorial be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Pittsburgh Post-Gazette, July 26, 2015]

BIGGER'S NOT BETTER: LONGER TRACTOR-TRAILERS SPELL TROUBLE ON THE ROAD

(By the Editorial Board)

The tractor-trailer roaring by you on the highway could be 9 feet longer next year if Congress approves a measure backed by FedEx and other shippers, who want bigger trucks so they can haul more stuff. It's a bad idea everywhere in the nation, but particularly in Pennsylvania with its poorly maintained roads and bridges.

The legislation would force states to allow ''twin 33s''—trucks that pull two trailers, each 33 feet long. Only 11 states allow them now, and Pennsylvania is not among them. Double trailers here cannot be more than 28 feet, 6 inches, and single trailers can be no more than 53 feet long.

Supporters say the change would eliminate 6 million trips each year, improve the environment and cut down on crashes. But anyone who has ever held his breath as a massive truck comes within inches of his car while making a turn would be hard to convince that bigger is better.

The former head of the National Highway Traffic Safety Administration likens massive trucks to ''trains on highways'' that would damage roads and endanger motorists. Trucks weigh 20 to 30 times more than cars, and they take longer than cars to come to a stop, particularly on wet and slippery roads. A U.S. Department of Transportation study found that the twin 33s require 22 more feet

for braking than the current trucks on the road. In 2013, 3,964 people died in crashes involving large trucks.

Pennsylvania Sen. Bob Casey, a Democrat who is crusading against the change, says longer trucks would cause more than $2 billion in damage to the nation's roads and bridges. With it bridges already in the worst shape in the nation, Pennsylvania doesn't need longer trucks on its roads.

Mr. WICKER. Once again, I stress the point, this is Pennsylvania specific. Pennsylvania has made a considered decision not to allow these. I think it ill-behooves us as a Congress to say we know better about the roads and the condition of the bridges in the State of Pennsylvania than the local authorities do.

So in the interest of deferring to the States, I think we should adopt the Feinstein-Wicker amendment not to mandate these longer trucks on States that do not want them.

Also, I do want to stress a few things. If this goes forward, it will have been done with no hearings in this Congress in any committee. The Appropriations Committee, which voted on this, did not have a hearing. The transportation committee, which I serve on, did not have a hearing. The commerce committee, which is another committee of jurisdiction on this matter, never had a hearing about this. Wouldn't it be a good idea—before we tell States they have to do this—to get proponents of this Federal mandate before us to answer questions about it—perhaps opponents of this Federal mandate to come and give us their considered opinion, experts about the safety issues, experts about what this will do to bridges, about what it will do to tear up our highways. Wouldn't that be a good idea before we decide in our wisdom inside the beltway in Washington, DC, that we know better than 39 States? I think it would be a good idea.

We might want to hear from AAA. We might want to hear from officials of the State of Missouri who have memorialized this Congress not to mandate this on the very people whom they are trying to represent on a State-by-State basis. I would like to get the Mississippi Trucking Association here. They have come out against this Federal mandate. They are in favor of the Feinstein-Wicker amendment to continue to leave this up to the States. I would like to get them before a hearing and hear them out. Perhaps Members of Congress and members of the various committees could be convinced, as I have become convinced, that they are correct.

Why would any trucker be opposed to this? I will simply tell you, a lot of truckers are small businesspeople. We honor small business people. We know they are the engine of job creation in the United States of America. Many of the small truckers have told me—and they make up organizations like the Mississippi Trucking Association—they cannot compete in an environment in which this becomes the norm. The big guys can easily move to the tandem 33 trailers, but the small business people cannot. It is much harder for them to get a loan. It is much harder for them to come up with the capital expenditure of moving to this, and many of them feel as though they will be put out of business.

So I think we should be very careful about saying we are going to run over the considered opinion of people in 39 States, we are going to disregard the Mississippi Association of Chiefs of Police and a host of other State chiefs of police associations, we are going to disregard the Mississippi Sheriffs' Association and a laundry list of other sheriffs associations from all around the United States of America.

I think the better approach is the Feinstein approach, which lost on a tie vote in the Appropriations Committee. The Feinstein approach says: Let's make sure we have a full and comprehensive study about this and get back to us, and if we implement it, let's do it in the normal course of events with the rulemaking process and comments from all sides.

So all this Feinstein-Wicker amendment does is say we cannot mandate this this year. Instead, we are going to ask the leading experts in this city to come back to us and tell us if, in their opinion, this is safe, to tell us, in their opinion, what this will do to bridges and infrastructure. I think that is the better approach.

There were 30 members of the Appropriations Committee who voted on this issue—exactly 30. Let me make sure I am precise. The Feinstein amendment lost on a vote of 15 to 15. Now, should that go forward as the policy of this U.S. Senate? I do not think so. I think we owe it to the American people, on an issue that involves safety, on an issue that involves infrastructure, and on an issue that involves deferring to the States to make the best decisions for their people—I think we owe it to them to have a full vote and not let something go forward on a virtual tie vote.

The provision that is now in the appropriations bill was adopted 16 to 14 in the Appropriations Committee with no hearings. I simply ask my colleagues, is that the way to make a major safety decision, an infrastructure decision for the American people?

So we are nearing the time when supporters of the Feinstein-Wicker amendment are hoping for a vote. I was heartened to hear the conversation of the majority leader yesterday that he certainly hoped we would be able to have votes on germane amendments like this. I appreciate the efforts of the ranking member of the committee, a friend of mine from California, in saying she is going to do whatever she can to get us a vote on this. So I do appreciate it.

I would say to Members listening today, it is time to get informed on this issue. It is time to find out what the facts are, to realize this appropriations decision that I am trying to reverse and put the brakes on, to a certain extent, is not permissive in nature. It is a requirement. If it goes through, we will be telling 39 States they are wrong, somehow we are right here in Washington, DC.

So I hope, first of all, we can get an amendment on the floor, and I hope Members will search their consciences and decide that indeed this is something which at least ought to be thoroughly studied. We ought to have all of the facts. More than that, this is something where we don't need to run over the 39 States that happen to feel otherwise.

I thank the Presiding Officer and yield the floor.

The PRESIDING OFFICER. The Senator from California.

Mrs. BOXER. Mr. President, I appreciate the presentation by my friend. He is absolutely right and my colleague Senator FEINSTEIN is absolutely right on this point.

I think the American truckers are saying, I say to my friend from Mississippi, that this is a modest extension, a 5-feet extension, but it is 5 times 2, as my staff pointed out, so this is a 10-foot extension. And many of our States are already in trouble. Many of our bridges are structurally obsolete. So the American truckers are pushing hard for this. But I think my friend is right. I think States ought to be able to decide the condition of their roads, the condition of their bridges, and if they feel this type of increase is going to jeopardize safety, I don't think Uncle Sam ought to be telling them what to do.

Mr. WICKER. If my friend will yield briefly.

Mrs. BOXER. Yes.

Mr. WICKER. I know she wants to talk about the larger issue. If it is, in fact, a modest and relatively harmless extension of the size, then I think perhaps States might want to make that decision themselves. They may very well conclude—39 have not made that decision, but 11 States have made that decision. And even though some may consider this a modest extension, I think modesty and the length of the trucks and the safety thereof is really in the eye of the beholder, and the State of Mississippi might feel very different than one of the wide-open Western States.

I thank my friend for her comments.

Mrs. BOXER. I thank my friend, and I agree with him. If each of us had written the bill that is before us, it wouldn't look the way it looks. Clearly, if my friend had written it, this wouldn't be in there. If I had written it, this wouldn't be in there and a lot of other things would.

I am so happy Chairman INHOFE has arrived. I am the ranking member on the Environment and Public Works Committee. Our title is responsible for 70 percent of the spending in this legislation. We knew that everyone had a wish list. We knew that if one Senator got everything he or she wanted, we

wouldn't have a bill, and if I got everything I wanted, we wouldn't have a bill. We had to meet in the middle, and we had to withhold on some of the items on our wish list. Frankly, I think that is the story of legislating a huge and important bill such as this, and it is an important bill.

Before I came over here, I say to my friend Senator INHOFE, I read that the whip over in the House, who comes from California, said: The Senate should not send the bill over to the House.

My response to that is, if we have a bill, we are sending it.

He said: We are leaving, and that is it.

If the House chooses to go out on vacation, a work period, or whatever they do, that is their business, but it is our job to fix the problems we are facing.

With the help of my friend Chairman INHOFE, I have a couple of pictures to show everyone.

The first picture is my photograph of the bridge collapse on Interstate 10 at the Arizona-California border. Years ago they said this bridge was functionally obsolete. In other words, when it was built, nobody thought so much traffic would be traveling on it. Later they gave it an A, but it was determined to be obsolete.

The reason bridges like this aren't getting fixed is we just haven't had enough funds to do it. In this bill, it is true—we stayed away from a tax gas increase, and we found a way to get enough for what I consider to be a very solid funding bill.

I will show everyone some other bridges that have collapsed, and there are so many. Here is Washington State. The Skagit River Bridge collapsed. Look at this. It is unbelievable. There are cars down below that have crashed. This is pathetic. This isn't a third-world Nation; this is America, and a Washington State bridge collapsed. How are we going to get the money for it? We need to pass a long-term bill.

If we pass a 5-month bill the way some of our opponents are calling for here and in the House, we won't have a dime to fix any bridge. All we are doing is, at the bare minimum, extending the program. Nobody is going to undertake any type of long-term fix on these bridges.

This is the Arlington Memorial Bridge. It was built in 1932. We know about it; it is right here. It is deteriorating. It is in trouble. We are trying to avoid a collapse. We need this bill to do that.

So when I talk about this bill—these bridges are in trouble.

Here is a picture of another bridge that actually did collapse. This is in Minnesota. This started the whole thing, and it was in 2007. It was unbelievable what happened there, and we can see the devastation. This is why Senator INHOFE is doing this. It is the reason I am doing this. It is the reason Senator MCCONNELL is doing this. It is the reason DICK DURBIN is doing this. It is the reason so many of our colleagues on both sides of the aisle are willing to admit that while this isn't a perfect bill, we cannot sustain this. Either bridges are crumbling or they are collapsing.

There are other examples. I will keep up the California bridge collapse so everybody can see it. It is the one I know the best because it is in my State. As I have said, and I ask rhetorically, how much business are we losing when we have cars and cargo having to go 400 miles out of the way to get from California to Arizona or Arizona to California? This is a nightmare.

As I understand it, we found some emergency funds, and so now we need to try to figure this out. Should we close part of it down or keep part of it open? It is not that safe to do, and there is no reason why we should have a situation such as this.

It may surprise everyone to hear how many bridges are deficient and in need of repair. In Kentucky, the Brent Spence Bridge; in Louisiana, the Calcasieu River Bridge; in Maine, the Piscataqua River Bridge; in Maryland, the Chesapeake Bay Bridge; in Massachusetts, the I–95 Bridge in Middlesex; in Michigan, the I–75 Rouge River Bridge; in Minnesota, the I–35 East Bridge over Pennsylvania Avenue; in Mississippi, the Vicksburg Bridge; in Missouri, the I–270 East Bridge over Conway Road; in Nevada, the Virginia Street Bridge in Reno; in New Hampshire, the I–293 Bridge in Hillsborough.

When I am done reading this, I will have the whole list printed in the RECORD.

In New Jersey, the Garden State Parkway in Union County; in New Mexico, the Main Street Bridge; in New York, the Brooklyn Bridge.

These are iconic structures, and they need to be fixed. They are deficient.

In North Carolina, the Greensboro Bridge; in Ohio, the John Roebling Suspension Bridge; in Oklahoma, the I–40 Bridge over Crooked Oak Creek; in Oregon, the Columbia River Crossing; in Pennsylvania, the Benjamin Franklin Bridge.

Do you think we ought to fix the Benjamin Franklin Bridge?

In Rhode Island, the I–95 Viaduct in Providence; in South Carolina, the I–85 Bridge in Greenville; in Texas, the I–45 Bridge; in Utah, the I–15 Bridge; in Washington, the Evergreen Point River Bridge; in Wisconsin, the US–41 Bridge; Alabama; Arizona; Arkansas; and California.

Mrs. BOXER. Mr. President, if ever there were a bipartisan issue, it is this one. When Republican President Dwight Eisenhower was running for office, he was shocked at the condition of our roads and the fact that we really didn't have roads that were in good shape connecting one State to the next.

This is the United States of America. We are a large and sprawling nation. He said that ''a network of modern roads is as necessary to defense as it is to our national economy and our personal safety.'' This is Dwight Eisenhower. ''A network of modern roads is as necessary to defense as it is to our national economy and our personal safety.'' He was referring to the fact that we really couldn't move easily between the States if there was some type of national emergency.

I was a little girl when Eisenhower ran, and my father was a lifelong Democrat, but he was for Ike. One of the

reasons he was for Ike was because he knew we needed this kind of network. It appealed to him. He knew how important it was.

If we look at the groups that are supporting us in this effort, I will just say they represent America. They are everyone from the U.S. Conference of Mayors to the Brotherhood of Carpenters; from the Chamber of Commerce to the International Union of Operating Engineers; from AAA—and most of us belong to AAA because we are worried something is going to happen on one of these bridges or one of these roadways that are filled with obstacles and we could get in a crash. People belong to the AAA, and they support us. Also, the Laborers' International Union, Mothers Against Drunk Driving, the American Council of Engineering Companies.

Let's put up some more. Again, these are unusual allies. Usually they are fighting each other. The National Association of Counties agrees with the National Association of Manufacturers, and they agree with the Truck Stop Operators and the National Governors Association. The National League of Cities agrees with the National Ready Mixed Concrete Association; the National Stone, Sand, and Gravel Association; the Owner-Operator Independent Drivers Association; the Portland Cement Association; and the retail industry leaders. Why did they come together for this? If you are in the retail business and people cannot get to your store, you will not be there for very long. They may say it is just not worth it and will buy online.

The fact is that we need to fix our roads.

The American Highway Users Alliance agrees with the American Society of Civil Engineers and the Associated General Contractors.

I want to make a point. On Tuesday the Associated General Contractors—the AGC—put out a very important and alarming study. Construction employment declined in 25 States between May and June. They went on to explain to the press that there were monthly construction employment declines as Congress continued to search for ways to pay for new highway and transit investments. The monthly construction employment figures are troubling.

Investing in transportation infrastructure will make it easier for many firms involved in highway and transit construction to add new jobs.

There are certain States that are worse than others. Illinois lost 2.2 percent of its construction jobs—they shed so many jobs—followed by New Jersey. New Jersey had the second-most shedding of jobs, 4,600; Ohio shed 3,700 jobs; Florida, 3,100 jobs; Rhode Island, 700 jobs.

I heard my colleagues say: Well, Vermont lost 500 jobs. Here is the situation. I have heard my colleagues say: We don't like the way this is paid for. We have better ideas. I agree with them. I have better ideas too. I have 10 or 11 or 12, but I am not the only one putting this together. We have to find that magic sweet spot where we can get 60 votes here in the Senate.

I am thinking if they vote no on this but it passes, when they go to meet one of these workers and the worker says: Thank you so much; we got this job because we got a 3-year funding bill, what are they going to say? I didn't vote for it because I didn't think the funding was right? I wanted it to be done a different way? I am sure the worker would say, I appreciate that, but I am working. I am working. I am feeding my family.

I understand why people want a better source of funding, and we have tried. As my chairman knows, we have tried so hard. I know he wants to speak now, so I will close down my time with this——

Mr. INHOFE. Madam President, will the Senator yield?

Mrs. BOXER. I will yield.

(Mrs. ERNST assumed the Chair.)

Mr. INHOFE. I am not attempting to get the floor. I think what the Senator from California has said is very significant.

I think people realize—and I have said several times that the Senator from California and I are about as far apart philosophically as any two people can be. She is a very proud liberal. I am a very proud conservative. We disagree on a lot of issues on the committee which the Senator from California used to chair when the Democrats were in the majority and which I chair now, but during all that time and up to the present time, we have agreed on this.

When I see people saying they don't want—I am very disturbed by what the House is doing right now. If we don't have a long-term bill, then we will go right back to what we have done since 2009.

The Senator from California and I remember when we passed the 2005 transportation authorization. That was huge. We have had things that have happened in Oklahoma now as a result of that legislation that are saving lives. As I have mentioned before, remember the bridge when a chunk of concrete fell off and killed a mother of three. That happened right up toward the 2005 bill.

I can't imagine we are going to be in a position where we go back to increase the number of short-term—we have had 33 short-term extensions since 2009. I can't imagine we will go back to that. If we do that, we don't get the reforms. A lot of the reforms, I say to my friend from California, were reforms where she had a hard sell. She had a hard time doing it. There are a lot of things—I wanted to change the 80–20 federal share. In some areas it was 60–40, and then 70–30. We couldn't do it. We compromised. I remember there was quite a bit said about that, so that was one of my losses that wasn't necessarily one of the Senator's gains.

The bottom line is we have a bill that is going to be before the people who have a chance to vote on it. This is the last chance we have to get off of the part-time extensions.

I would ask my good friend from California if she is observing the same circumstances that I am.

Mrs. BOXER. Madam President, I am observing it exactly the same way. I said before that we have a very honest relationship in terms of where we can find that common ground, and it is in this arena.

As the Senator from Oklahoma has pointed out, he reads the Constitution and I read the Constitution. He has said many times—and he has addressed people who have heard the Senator say this—that this is a constitutional responsibility to make sure we have roads, bridges, highways, and we can move interstate commerce. From my perspective, not only do I agree with that, but I also think it is a very important way while we are taking care of the people to see that people have good, decent jobs, and that businesses prosper.

We have never had a problem working together on this. I hope our working together brings liberals, conservatives, moderates, and everybody in between to tonight's votes.

I don't know what the vote is going to be, I would say to my dear friend, but I do know this. The House is saying through their whip that they are leaving. Well, that is up to them. We all know, from the Association of General Contractors, it is stated right here that in 25 States we are seeing layoffs right now in the construction arena because we have not acted.

Madam President, I ask unanimous consent that their statement be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Associated General Contractors, July 21, 2015]

CONSTRUCTION EMPLOYMENT DECLINES IN HALF OF THE STATES BETWEEN MAY AND JUNE AS CONGRESS SEEKS NEW WAY TO PAY FOR NEEDED TRANSPORTATION UPGRADES

Illinois and Rhode Island Have Biggest Declines for the Month, Delaware and New York Have Largest Gains between May and June; Ohio and West Virginia Have Biggest Annual Declines, Idaho and California Add Most.

Construction employment declined in 25 states between May and June even as 39 states and the District of Columbia added construction jobs between June 2014 and June 2015, according to an analysis today of Labor Department data by the Associated General Contractors of America. Association officials noted that the monthly construction employment declines come as Congress continues to search for ways to pay for new highway and transit investments.

''While the year-over-year totals remains relatively positive, the monthly construction employment figures are troubling,'' said Ken Simonson, the association's chief economist. ''Investing in transportation infrastructure will make it easier for many firms involved in highway and transit construction to add new staff.''

Illinois (−4,700 jobs, −2.2 percent) shed more construction jobs during the past

month than any other state, followed by New Jersey (−4,600 jobs, −3.0 percent); Ohio (−3,700 jobs, −1.9 percent) and Florida (−3,100 jobs, −0.7 percent). Rhode Island (−4.5 percent, −700 jobs) list the highest percentage of construction jobs between May and June, followed by Vermont (−3.3 percent, −500 jobs); New Jersey and New Mexico (−2.7 percent, −1,100 jobs).

Twenty-four states added construction jobs between May and June, while construction employment was unchanged in Wyoming and the District of Columbia. New York (3,300 jobs, 0.9 percent) added the most construction jobs. Other states adding a high number of construction jobs included Minnesota (2,600 jobs, 2.4 percent) and Connecticut (2,200 jobs, 3.8 percent). Delaware (4.3 percent, 900 jobs) added the highest percentage of construction jobs during the past month followed by Connecticut, Hawaii (3.7 percent, 1,200 jobs) and Arkansas (3.5 percent, 1,700 jobs).

Eleven states shed construction jobs during the past 12 months with West Virginia (−12.8 percent, −4,300 jobs) losing the highest percent of construction jobs. Other states that lost a high percentage of jobs for the year included Rhode Island (−9.6 percent, −1,600 jobs); Mississippi (−7.9 percent, −3,900 jobs) and Ohio (−7.9 percent, −3,900 jobs). The largest job losses occurred in Ohio, West Virginia and Mississippi.

California added more new construction jobs (47,000 jobs, 7.0 percent) between June 2014 and June 2015 than any other state. Other states adding a high number of new construction jobs for the past 12 months included Florida (25,200 jobs, 6.4 percent), Texas (18,900 jobs, 2.9 percent), Washington (15,300 jobs, 9.7 percent) and Michigan (14,000 jobs, 9.8 percent). Idaho (12.9 percent, 4,600 jobs) added the highest percentage of new construction jobs during the past year, followed by Nevada (11.1 percent, 7,000 jobs); Michigan; Arkansas (9.7 percent, 4,400 jobs) and North Carolina.

Association officials said one of the challenges facing the construction industry is uncertainty about future federal funding levels for highway and transit repairs and improvements. Noting that the Senate is expected to vote on a new long-term surface transportation bill later today, they urged members of both parties to work together to address growing problems with the country's aging transportation infrastructure.

''Passing a long-term highway and transit bill will provide the kind of funding certainty many construction firms need to expand payrolls and invest in new equipment,'' said Stephen E. Sandherr, the association's chief executive officer. ''The series of short-term transportation funding extensions Congress has passed has clearly had a negative impact on the construction industry's recovery.''

Mrs. BOXER. That is tragic. What happens when people are laid off? We know what happens. We are getting out of this tough recession, and none of us wants to walk down the path of a short-term solution.

So I say to my friend, I am going to finish my remarks in about 2 minutes and when I yield the floor to him, I look forward to hearing his remarks.

We have work to do tonight. We have to get 60 votes.

Mr. INHOFE. Madam President, if the Senator from California will yield, let me make one statement, and then I will be coming back later to talk about some of these amendments that will be coming up.

One issue we need to clarify with our people on our side is that the conservative position is to support this. Our good friend, our mutual friend Gary Ridley, said that the extensions cost about 30 percent off the top—30 percent. In fact, I will say this, after our 27-month bill, we went over it in the House, and I had requested an audience with the entire—all 33 Republicans on the appropriate committees, and all 33 agreed that it was a conservative position. All 33 voted for the bill. I think we have the opportunity to make that happen again.

Mrs. BOXER. Madam President, reclaiming my time, my friend is right. This is an area where conservatives, progressives, liberals, moderates—what we call ourselves doesn't matter. We need to have a good, strong highway system. We need to fix the bridges. We need transportation. That is what we do here.

In closing, I wish to make this point. Each of our States has relied on the highway trust fund since Eisenhower was President. I have a list, and I think I put it in the RECORD yesterday so I don't have to put it in the RECORD again, but it shows how much each State relies on the highway trust fund. I will pull out a few States because it is interesting. I know my own State is 49 percent. We raise the rest of the money, but that 49 percent is huge, and if it were to disappear, we simply could not do what we need to do. So my State is about 50 percent.

Here are some of the States: Rhode Island, 100 percent of its program is funded by the Federal highway trust fund. Alaska, 93 percent is funded by the Federal highway trust fund. Vermont, 86 percent is funded by the Federal highway trust fund. South Carolina, 79 percent; Hawaii, 79 percent; North Dakota, 78 percent; South Dakota, 71 percent; Connecticut, 71 percent; New Mexico, 70 percent.

Now, from that list—that is, everybody who is 70 percent and over—those are red States, those are blue States, those are purple States.

My point is exactly what Senator INHOFE said yesterday. The fact is, there is no such thing as a Democratic road or a Republican road or an Independent road or a progressive road or a liberal road or a conservative road. We all use the roads, unfortunately, increasingly, at our peril—at our peril.

Idaho, 68 percent; Alabama, 68 percent; New Hampshire, 68 percent; Missouri, 65 percent; Minnesota, 64 percent; Oklahoma, 63 percent; Georgia, 62 percent; Iowa, 59 percent; Ohio, 58 percent; Virginia, 57 percent; Wisconsin, 55 percent; Oregon, 54 percent, and it goes on.

Every single one of our States is waiting. The lowest, as I understand it, looks to be New Jersey at 35 percent, but the fact is whether it is 35 percent or 45 percent or 90 percent or 100 percent, they all rely on the Federal highway trust fund. All of our people pay into it through the gas tax.

We have a responsibility. We are moving forward if we get the votes tonight. Again, we don't know that we will get them. We are working hard to get them. Hopefully, we will move forward with a good transportation bill and, for the first time in 10 years, we will have a long-term bill.

Now, the Washington Post did an interesting editorial. They don't adore this bill. They found problems with it, as we all do, but they said it is a sensible plan by Senators BOXER and INHOFE—if we worked it out—that it provides 3 years of guaranteed funding, that it would be a significant improvement from what we have done in Congress for the past decade. They said lawmakers fumbled from short-term funding patch to short-term funding patch—a nonstrategy that often relied on budget gimmicks and made it difficult for transportation officials to conduct long-term planning.

The New York Times said on Tuesday what I said before: Construction employment fell in 25 States this summer as State agencies awaited word from Congress on the future of the highway and transit spending. We also know there are well over one-half million unemployed construction workers—one-half million. Now they are starting to get laid off again.

I don't know what else to say to Members. The biggest reason they are voting no that I heard is they would like to find a better funding source. Well, all of us would, and if we had our way—the Presiding Officer would come up with her funding source. I love mine, which is a refundable gas tax increase, but I can't get a lot of votes for that. People won't give me the votes for that. So what do I do, throw up my hands and say we will have another short-term extension? No. I sat down with Senator INHOFE, I sat down with Senator DURBIN, I talked to Senator REID and Senator SCHUMER, of course, and all of my leadership over here, and I did my best. I think everyone has to understand, it is either this way or we will have to do a short-term patch.

I will predict—right now, seven States have shut down their program completely. If we don't find a solution, we are going to be looking at each other in a month, 2 months, and we are going to see programs shut down. I often use this analogy, so if my colleagues have heard it before, I apologize in advance. But if you go to the bank, you want to buy a house; they say: Great news, you qualify, and they only give you a 5-month mortgage. Are you going to buy the house? Of course you are not. Are our States going to build a highway if all they have is funding for 5 months? No. That is why the private sector that gets this money from the States—that is why they are laying people off.

Now, I want to say, working with Senator INHOFE, we were able to create a new National Freight Program and a new program called Assistance for Major Projects. This means that every

one of our States would be eligible. It is exciting to have those kinds of programs. The freight program will provide funds for all States. All States are going to get part of this formula to improve their goods movement, to reduce the costs, and improve performance for business. It expands flexibility for rural and urban areas to designate key freight corridors. This is exciting. The program is supported by the Coalition for America's Gateways and Trade Corridors, as well as business groups such as the National Association of Manufacturers.

Now, under the Assistance for Major Programs, this was something Senator WHITEHOUSE of Rhode Island worked very hard on. The bill provides support for major projects of high importance to a community, a region, or the Nation, through a competitive grant program. It includes a set-aside for rural areas and ensures an equitable geographic distribution of funds along with strong transparency provisions.

Now, these programs are exciting news. Whether one is from Iowa or California, we are all going to get these funds and locally, we will decide how to spend them.

Our bill passed the committee 20 to 0. What a great moment that was, and the reason is we knew we had to compromise. So the part of this bill from EPW was a compromise. The part of the bill from the commerce committee was a little bit trickier because it did come out on a partisan vote, but we have been working—Senator NELSON and Senator THUNE, Senator BLUMENTHAL, and others—on that to make it a better title. And I think it is moving in that direction. As to the banking bill, Senator BROWN's staff worked very hard on this with Senator SHELBY's staff, and I believe it has clearly been improved since it was first released. The Finance Committee was tough. Senator WYDEN tried hard. I put some ideas out there. It was tough to get them done. But somehow we have managed to put together the funding. It does clear the CBO. We are in surplus for 3 years in the highway trust fund. We haven't done that. It has been 10 years since we had more than a 2-year extension. This is real.

I just say to my friends from the House that I know you want to get out of town. Everybody does. It is August, and we have plans. A lot of us are going to go around the world and do our job that way, have community meetings, and take a week of vacation with our families as every family wants to do. But we are staying an extra week in August. You can stay an extra week in August. That is not such a terrible thing.

I get an announcement from the whip over there, Representative MCCARTHY from my State. He says: Don't send us a bill because we are going home.

Well, that is their choice.

There are so many good organizations. I am going to put this list up again and share it because I think it is so important. It is tough to put together a bill that the U.S. Chamber of Commerce supports, along with the International Union of Operating Engineers, the Laborers' International Union of North America, the U.S. Conference of Mayors, and AAA, not to mention Mothers Against Drunk Driving.

I will show you some others. It is exciting to see the National Association of Counties. I started off as a county supervisor. I was in local government. You know, to have us agree with the National Association of Manufacturers, the truckstop operators, the National Governors Association, the National League of Cities, the concrete people, and the gravel people—there is one more here—what you see is that everybody supports this—the American Public Transportation Association, the American Trucking Association, the Associated General Contractors of America. The Associated General Contractors of America has warned us if we don't get this done, it is going to be a real problem.

So for the sake of every single person in America, I hope we have the 60 votes we need tonight, and I hope we get this moving. There are a lot of people who are slowing this bill down. I understand they are upset about everything. Look, we each can be upset. I mean every day we can be upset, but we have to try to find common ground. Sometimes it is very hard to find it.

Certainly, Senator WICKER was here. He and Senator FEINSTEIN have an amendment. I support it. It is unfortunate that Senator WICKER's opinion didn't hold sway in the Appropriations Committee. It is hard. It is difficult. I personally think he is right. He didn't win in the Appropriations Committee. So now we are trying to fix the problem. We may not have the votes, but what we do have before us—and I will conclude with this—is a solid bill with increases so we can fix these bridges.

I want you to see the last image, which is the collapse of this bridge in California. It just happened a few weeks ago or less. What we had here was a bridge that was called functionally obsolete. What they said was that when it was built there was very little comment on it. But now it is a very important bridge because we have to take the goods from Arizona over to California and from California over to Arizona, and it has collapsed.

Senator INHOFE and I talk a lot about why we do what we do. He had a devastating bridge collapse—a devastating bridge collapse where a mother of three was killed just walking by the bridge. That is when he and I said enough is enough. We simply cannot handle it. It is our job.

Once I was told this when I was a county supervisor. If you know there is a problem and people are in danger—this is what they told us way back in the day because we had an earthquake problem with the building we were in and the county council said to the five supervisors: You know this is a problem. If you don't fix it, there is an argument to be made that you are personally liable. Now, I am not suggesting at all that Senators be held personally liable for a bridge collapse, but I am talking about the moral issue. We do know we have problems. We were fortunate that no one was killed in this collapse, and it was kind of a miracle. But we do know there is a problem. So while we don't have a legal obligation to step up to the plate—and I know Senator INHOFE agrees with me—we believe there is a moral obligation.

There is this list of bridges. There are three pages of bridges that we know are in trouble. We know that 50 percent of our roads are deficient. Isn't that enough for us to come together tonight—it will probably be late in the evening, I expect—and vote to move forward with this bill and get it done, send it to the House, and hopefully, they will decide in the same session and decide to pass it? There will be a celebration across this Nation. It will be a celebration by workers who want to fix these problems, by businesses who want to fix these problems, by people who drive who want to see these problems fixed. It is a win-win for our Nation.

I thank you so much, Madam President.

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HOEVEN. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HOEVEN. Madam President, I ask unanimous consent to speak as in morning business for up to 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

VOLUNTARY COUNTRY OF ORIGIN LABELING AND TRADE ENHANCEMENT ACT

Mr. HOEVEN. Madam President, I come to the floor this afternoon to talk about a program called Product of Canada. Product of Canada, you might ask what it is. The Product of Canada Program is the voluntary food labeling program they have in Canada. So no one has to participate in this program in Canada, but if they want to, they can. It is just that, a voluntary food labeling program they call Product of Canada.

What does that mean? Well, just taking from one of the Web sites where we looked it up, the ''Product of Canada'' label can only be applied to animals that are born, raised, and slaughtered in Canada with some exceptions. Now, they also have labeling as far as prepacked products. That is actually mandatory labeling. Under their mandatory labeling it says: All prepackaged food products sold in Canada must be labeled with the name and address of the company. Also, it says: If

manufactured outside of Canada, the label must reflect it is imported. It is mandatory to state the country of origin on some specific imported prepackaged products such as wine and brandy, dairy products, honey, fish, and seafood products, fresh fruit and vegetables, eggs shelled, eggs processed, meat products, maple products, processed fruits and vegetables.

The program goes on, but the important point I want to make is they have some mandatory aspects to their prepackaged products and their prepackaged products program as I mentioned. But the Product of Canada Program and the ''Product of Canada'' label, that is a voluntary program. It is animals that are born, raised, and slaughtered in Canada. Why do I come to the floor of the Senate to point out that Canada has a voluntary meat labeling program, a Product of Canada Program? For the simple reason that we are and have been engaged in what do we do about COOL, the Country of Origin Labeling Program in the United States.

I have offered bipartisan legislation, legislation with Senator DEBBIE STABENOW of Michigan, who is the lead Democrat on the legislation, bipartisan legislation that includes a majority of the agricultural committee in the Senate. So what we are trying to do is solve the country-of-origin labeling dispute or disagreement by creating bipartisanship and passing a bill that addresses the underlying problem. So what is the problem?

The problem is that the WTO court, the World Trade Organization court has determined that a mandatory food labeling program, COOL, does not meet the WTO requirements. So the House of Representatives, led by the agriculture chairman, MIKE CONAWAY, who is an outstanding ag chairman in the House, passed a bill that repeals mandatory COOL.

You know what. We took that bill and we have included it in our legislation which we call the Voluntary Country of Origin Labeling and Trade Enhancement Act of 2015—we took the very same legislation, and we are trying to pass it here. We are trying to pass the same—we did not take anything out of Representative CONAWAY's bill, passed in the House. We took that bill. We are trying to pass it here to address the issue of mandatory food labeling, mandatory COOL.

But we also added a voluntary program, just as Canada has a voluntary Product of Canada Program. So there are just a few basic logical questions I would ask. First, we are repealing the mandatory program. So when somebody says: Well, you have to repeal mandatory COOL, and you cannot have anything else, we have to repeal mandatory COOL, that is exactly what we do. We pass the Conaway bill. We repeal mandatory COOL. That is a fact. Facts are stubborn things. So let's be clear on that. We do. We pass the House bill, and we add to it a voluntary program, similar to the Product of Canada Program because there are people in this country who want voluntary labeling. They want a voluntary country-of-origin labeling program. They want a program, which as Canada has—Product of Canada is a voluntary program.

At the end of the day, to get this done, to avoid any countervailing duty or tariffs under the WTO ruling, we need to repeal mandatory COOL, which we do, and we put in place the voluntary COOL, which we need to do to get bipartisan support in the Senate and the House and pass the legislation we need to pass. We need to do it in that way in order to get it done timely—certainly before we go on the August recess.

So this is a clear opportunity to come together in a bipartisan way and solve a problem and solve it in a way that makes sense. We reach out to our House counterparts. We reach out to our counterparts in the House and we say: You did good work. You did hard work. You passed a repeal of mandatory COOL.

That is fine. We are passing your bill. At the same time, because there are advocates for labeling, we pass a voluntary program so we can actually move the bill through the Senate, get into conference with the House, and get their work done now rather than waiting. The voluntary program is the same thing Canada does. So how can our very good friends in Canada say to us: Well, it is OK for Canada to have a voluntary program and, yes, we get that you are fully repealing mandatory COOL, but, gee, even though we in Canada have a voluntary program, gosh, we don't think you ought to have one in the United States. It does not make sense.

Come on. Let's get together. Let's find a way to get together in a bipartisan way, move this legislation, get together with the House and get this done. That is all we are asking. We have a good start on this bill. We have a majority on our ag committee. Sponsoring the legislation along with Senator STABENOW and me are Senator JOHN THUNE, Republican; Senator AMY KLOBUCHAR, Democrat; Senator CHUCK GRASSLEY, Republican; Senator HEIDI HEITKAMP, Democrat; Senator MIKE ENZI, Republican; Senator SHERROD BROWN, a Democrat. That is bipartisan. It is common sense.

It is a simple solution. We are saying: OK. We get it. Canada won in the WTO court. We cannot have a mandatory program. We follow the House's lead. We pass their legislation. At the same time, we put in place a voluntary program similar to Canada's. We are reaching out to our friends and neighbors in Canada and saying: Hey, we want to work with you. Please work with us. That is what we do in this legislation.

So I hope Senators will join together with us in a bipartisan—I emphasize that again—in a bipartisan way. That is what it takes in the Senate. It takes 60 votes to pass legislation. You cannot do it with just one party or the other. It takes 60 votes. You have to have bipartisan legislation.

I call on my colleagues to get together with us. Let's move this legislation. Let's get together with the House and our friends from Canada and get this done. We can do it. We can do it now in a timely way, and we can make sure we not only don't have any countervailing duty or tariffs on our exports, but we can also have a voluntary labeling program which many in this country want: consumers, producers, our farmers, our ranchers, retailers, some processors.

But you know what. If somebody does not want to participate, that is fine, hence the word ''voluntary.'' That is the American way. I have had the good fortune to work with Representative CONAWAY. I certainly appreciate him and his hard work. I have also had the opportunity to work with our good friends north of the border. We have no better friend and ally than Canada. We should be able to get together with our Canadian friends and say: Look, we are absolutely doing what the WTO court requires. We are repealing mandatory COOL. We are passing the House bill.

But at the same time, there are a lot of people in this country whom we have to be fair to who want a voluntary program. There is no reason in the world to hold up solving this problem by not allowing them to have a voluntary program, similar to the voluntary program Canada has, Product of Canada.

I also would note that my cosponsor on the legislation is on the floor. I greet her and thank her for her hard, bipartisan work to solve this challenge in a very commonsense way.

With that, I yield the floor.

The PRESIDING OFFICER. The Senator from Michigan.

Ms. STABENOW. Madam President, first, let me say that it is always a pleasure to work with the senior Senator from North Dakota. We partnered on a number of different things, including efforts on the farm bill.

So it is with great pleasure that I am partnering with him again to solve this problem and to make sure that we eliminate any possibility of retaliation on our businesses and solve a problem in a way that meets our trade obligations and also makes sure that we are standing up for our farmers and our consumers in America. That is really the goal.

I appreciate Senator HOEVEN's leadership and commonsense approach to actually solving the problem. It is always great to be with the Senator.

As Senator HOEVEN did say, we have put together a thoughtful and bipartisan bill, the voluntary COOL and trade enforcement act. We are very ''COOL'' here in the country of origin labeling act.

I also thank our cosponsors. We have Senators GRASSLEY, HEITKAMP, KLOBUCHAR, THUNE, BROWN, ENZI, CASEY,

ROUNDS, MURRAY, BALDWIN, and WYDEN, and we are adding more people every day. So we are pleased to have the majority of the Agriculture Committee standing with us on this bipartisan effort.

Let me start by saying as well that while I disagree with the WTO's conclusion and I am disappointed at the final outcome of the case, I respect the decision and acknowledge that we have to act. We have to act in a responsible way to address this and live up to our trade allegations.

The potential impact on the economy and other industries demands that we give this issue our full attention, and that is what we are doing. Our legislation offers something that is common sense. It is trade compliant, and it is a path forward.

First, the bill repeals mandatory country-of-origin labeling. This is what we have to do to meet our trade obligations to Canada and Mexico. There is no way around it, certainly on beef and pork, in order to come together to be able to address this quickly. In fact, we have in our bill the same language as in the House. So we have the same language as the House and the same language as the amendment put forward by our chairman, Senator ROBERTS, and others.

No. 1, we all agree on what it takes to address the trade case and get that off the table.

No. 2, now it becomes this: What do we want to do as Americans? What do we want to do? This is not a realm where Canada or Mexico really has a voice. Once we meet the trade obligation, we have met the test. What do we want to do?

I remember during the farm bill, when we were talking about changes we needed to make to address the Brazil case on cotton, where they won a case against us, and I asked folks: Well, what do the Brazilians think?

I was told by members of the committee, many of whom are now saying we have to give Canada veto power or Mexico veto power, that Brazil can't have veto power over the United States on cotton and that is up to the United States.

We proceeded with a path that we believed met WTO rules and met the needs of American producers. Now we have some of the same folks saying: Oh, no, we can't do anything unless this is something that Mexico likes or Canada likes. So I would argue that we deal with that—with the trade decision in WTO—in all three bills. Now the question is this: What do we want to do for our consumers and to support American farmers?

So, second, we establish a voluntary ''Product of the United States'' label defined as born, raised, and slaughtered in the United States. So you can have whatever labels are appropriate to have, but if you want to have a label that says ''Product of the United States,'' you have to meet the integrity of that label.

If the consumer is seeking to purchase a product of the United States, a packer is willing to provide it, and they decide they want to do that—farmers want to do that; they want to provide that—then there should be an accurate label. They can look at all the pros and cons of doing that. Then they should be able to do that on a voluntary basis. That is all we are saying.

Anyone who has watched this issue over the years knows that both sides have become very entrenched, and we understand that. But our approach is to say now that we will agree with the House, we will agree with those who always opposed a mandatory country-of-origin labeling, and we will agree on repeal. However, we need to make sure, on behalf of American consumers, that for American farmers and processors it would give them a tool—a voluntary tool—they can use if they wish to do that.

Now, what is very interesting is the fact that back when the mandatory country-of-origin labeling bill was on floor and was being passed by the House and the Senate, the people who opposed that at the time introduced S. 1333, the Meat Promotion Act, which would ''establish a voluntary program for country of origin labeling of meat.'' It was introduced by the same people who are now saying we cannot do that—Senators CORNYN, ROBERTS, HATCH, ALEXANDER, and others—all of whom were arguing that we should have a voluntary program, not a mandatory program.

So now here we are. You would think this would be easy. You would think this would be a slam dunk. What we are suggesting, in fact, is something that was in a bill—a voluntary ''Product of the United States'' label for meat from animals born, raised, and slaughtered in the United States. At the time, it was broadly supported by the meatpacking industry as well as the largest organization of cattlemen in the United States. At the same time, they argued they thought this proposal was a smart way to promote U.S. meat products while also supporting international trade—the same people who are now working against us.

In fact, as it turns out, they were in the spot where we are now understanding we need to land. But instead of agreeing and saying to us that it is about time you got here, embracing it and saying let's do this very quickly so we can put other businesses where may face retaliation in a position of confidence so that is not going to happen—we thought this would be a no-brainer; take the bill that was already introduced, and take the language passed by the House—now we are seeing that, in fact, the same people who wanted S. 1333 are now saying that in the world it will start a trade war and all kinds of other things.

But let's talk about that for a moment. Even as recently as last August, Canadian officials openly discussed a voluntary COOL program as a way to address their trade concerns, and they said: ''If you do a voluntary label, which we do in Canada under product of Canada, you don't have that trade sanctioned problem.'' That was in August of 2014, Gerry Ritz, Agriculture Minister of Canada.

Next, in 2012, the WTO Appellate Body report quoted both Canada and Mexico, suggesting that the United States switch from a mandatory to a voluntary labeling program to move ''beyond the dispute.'' So, again, this was from Canada: ''Expanded as required to meet consumer interest, voluntary labelling can provide as much consumer information on origin to interested consumers as the COOL measure.'' That was in 2012, suggesting that was the tool that the United States should use.

Then, this is from our Mexican friends:

> Mexico submits that there are at least four alternative measures. . . . The first alternative is a voluntary country of origin labelling scheme, which in Mexico's view, could maintain the same labelling criteria on origin as the COOL measure—that is, born, raised, and slaughtered [in the United States].

That is 2012, Mexico.

So we clearly know that both Canada and Mexico have considered voluntarily labeling as the responsible approach. In fact, they have suggested we do that. So while both countries have been vocal, it still does not change the fact that Canada and Mexico are not entitled to veto what the Congress of the United States of America chooses to do with our laws, as long as we are compliant with our trade obligations.

Clearly, I understand politics—Lord knows we do. We understand politics, we understand elections, and we understand negotiations. We understand. If you can put the United States in a position to voluntarily stand down and not let consumers know on a voluntary basis what is a product of the United States, that is great for competition, if you are Canada or Mexico. And if they can bully us into doing that—well, shame on us if they can bully us into doing that.

The fact of the matter is our legislation, which I believe clearly has the majority of votes in the Senate and certainly on the agriculture committee, not only meets the trade requirements of the dispute—which we lost, we know it, and we have to address it—but stands up for American consumers, American farmers, and processors who choose to use the tool of a voluntary label.

WTO rules are very clear that a country should not proceed with retaliation if the underlying law has been made WTO-consistent. So folks can stomp around and threaten. We understand negotiations. We all negotiate with people who stomp around a lot.

But the reality is that if we take that away and we are now trade compliant, they no longer can legally proceed. The Office of the U.S. Trade Representative

has also stated that our approach would be just as WTO-consistent as the repeal bills alone: ''We believe both options—repealing the mandatory labeling scheme or repealing the mandatory labeling regime and replacing it with a voluntary labeling system—have the potential to constitute compliance with U.S. WTO obligations.''

There is no difference—no difference. And this is a few days ago—July 23, 2015.

It really comes down to the fact that if Canada has its own voluntary label for meat produced in Canada, how in the world can they argue with the United States of America that our farmers and consumers should not have the same label?

I think what it boils down to is competition. I do, because it starts as a trade case. We meet our trade obligations. We address what we have to do legally. Now the question is this: Can they bully us into a position to actually stand down so we cannot brag about the great meat that we have in this country and let consumers know about it?

I understand that the Canadians are afraid to compete head-to-head with products that are 100-percent born, raised, and harvested here in the United States. We do a pretty good job. Our farmers and our ranchers do a very good job, actually. After all, there is no safer, more abundant food supply produced anywhere in the world than in the United States. The American public deserves to know if they choose to look for that label and purchase that label. They should have the opportunity to do that. Certainly, when our friends in Canada—and they are our friends; we work on many issues together in a wonderful way. But on this one, I have to say I think this is very much about competition. And we need to be able to compete economically with them in the same way they compete with us. If they have a ''Made in Canada'' label, we need to be able to have a ''Product of the United States'' label.

So I would ask that we stop with all the rhetoric on the floor by folks who sponsored a voluntary label with the same definition a few years ago; stop the rhetoric by our friends from Canada and Mexico about how the world will come to an end if the United States has a voluntary program that meets our trade obligations. We need to just take a deep breath and make sure that we solve the trade case, that we do what we need to do and then have the USDA in America—the U.S. Department of Agriculture—allow all of us to decide what we want to do about voluntary labeling of our meat—or anything else, for that matter.

We are not interested in starting a trade war, and it seems pretty silly when I hear the hot rhetoric that tries to claim that. What we are wanting to do is solve a problem that relates to international trade that we all agree needs to be resolved. We must resolve it, we must make sure those not involved in the dispute don't somehow pay a penalty through retaliation, and then respect our own consumers enough—our own families, our own farmers, our own processors enough—to give them a tool, if they decide they wish to use it, to have the integrity of a product of the United States labeled.

It would be a sad day and I believe irresponsible on our part if we move back to the days prior to COOL where we were labeling meat that was born in a foreign country and spent most of its life in the foreign country but then could somehow come in and be harvested here and be called a product of the United States. Talk about something that is a problem—that is a problem. That is a problem. And American consumers deserve better than that. Our own processors and farmers who are competing with those in other countries deserve better than that.

We have the opportunity to embrace a proposal that, frankly, in my judgment, should be a no-brainer for us given all of the information and the case for why this works.

So, Madam President, I am looking forward to working with colleagues on both sides of the aisle to actually get this done. We should get it done quickly so that we can move on to a whole series of issues that need to be addressed.

I yield the floor.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. MCCAIN. Madam President, I ask unanimous consent to address the Senate as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

FEDERAL ENVIRONMENTAL REGULATIONS

Mr. MCCAIN. Madam President, all Americans but especially Arizonans should be concerned about the crushing wall of Federal environmental regulations that President Obama has been announcing is coming our way.

Politico recently noted, ''Two years [after the President originally announced his intent to take executive action on climate change], scarcely a week goes by without the administration unveiling a new climate change initiative.'' Common among all these regulations is their complete disregard for how businesses really operate and how they will adversely affect those businesses and their consumers.

According to a report recently released by the American Action Forum, just the 18 ''economically significant'' regulations the White House announced before Memorial Day will saddle the Nation's slowly recovering economy with more than $110 billion in potential cost, with billions more in unknown burdens. If left uncorrected, these regulations will unfairly impact Arizona consumers and businesses and, in the view of the Arizona Chamber of Commerce, ''cause significant economic harm to our state.''

One of the most alarming of these new regulations is the Environmental Protection Agency's so-called clean water rule or waters of the United States rule—a Federal regulation of almost unprecedented scope. The EPA has claimed this rule would just let it stop construction activities that disturb small, environmentally sensitive streams and wetlands, but when you dive into the rule's 299 pages, you will find it actually expands EPA's authority to roughly 60 percent of all ''waters of the United States,'' including irrigation ditches, stock ponds, and even dry desert washes.

This is bad news for Arizona agriculture and homebuilding sectors, which combined account for most of all economic activity in my State. If a farmer wants to build or repair a canal, the EPA could block it. A community that wants to build a school or a church near a dry wash will have to beg for EPA's permission. The EPA can even go after property owners if the Agency thinks water historically flowed across their land, even when there is no visible evidence.

Ultimately, water is the last thing the EPA will be worried about once their clean water rule becomes effective; they will be drowning in lawsuits.

Another proposed rule by the EPA—the ''Clean Power Plan rule''—would place new limits on greenhouse gas emissions that would prevent the use of coal and result in the elimination of 36 percent of Arizona's electric power generation. Of course, the billions of dollars that would be needed to comply with the plan would be passed on to consumers. Estimates are that utility rates could increase up to 13 percent in Arizona. If you are a small business owner and you don't have the luxury to pass on these costs, this dramatic increase in your utility bill could prevent replacing old equipment or hiring new employees or otherwise expanding your business.

In addition to being a job killer, this rule will impact Arizona's water supply, which in many cases is moved through the State by energy derived from coal-fired plants, negatively affecting consumers and commerce throughout the State.

This rule also threatens default on hundreds of millions of dollars in taxpayer-backed USDA rural utility service loans around the country which are critical to providing rural residents with affordable energy and reliable, good-paying jobs.

Another rule, which would revise ozone regulations, may also disproportionately impact Arizona, especially her rural communities. Failing to acknowledge qualities unique to Arizona regarding ozone concentrations in the State—for example, altitude, topography, lightning, and wildfires—this rule would undermine the State's continuing attractiveness to business by creating construction restrictions, permitting delays, and reduced Federal transportation funding.

So what can be done about all of this? Well, that depends. For those

rules that have been finalized, we can start looking at legislatively repealing them, as a bill Senator FLAKE and I recently sponsored would do with the clean water rule, or we can pass resolutions of disapproval under the Congressional Review Act to help bring public attention to them. For those rules that haven't been finalized yet, we can consider including riders in appropriations bills to disrupt their implementation.

Madam President, we need to be very clear on what is going on here. These regulations don't represent a good-faith effort by President Obama to work with Congress to legislate transparently with care and acuity to help the States ensure the health, welfare, and safety of our citizens; rather, like the President's Executive order on immigration, they are an example of his insistence on using his ''pen and phone'' to unconstitutionally and unilaterally forge a legacy—a legacy that will, in fact, have a chilling impact on economic growth and prosperity.

The fact is, after years of economic recession, the Arizona economy is showing signs of recovery. But with Arizona's growing slower than the rest of the country, with only a 1.1-percent increase in real gross State product compared to 2.2 nationwide and 65,500 fewer people working in Arizona compared to 8 years ago, Washington has to be focused on doing everything it can to unburden small business owners and promote entrepreneurialism. These regulations would do just the opposite.

For these reasons, it will be important for all Arizonans and all affected Americans to make their concern and outrage heard. For Arizona, Senator FLAKE and I join our colleagues representing other affected States and will continue to exercise our constitutional oversight prerogative to keep the Executive in check and help educate the American people about what is coming and how it will affect all of us.

Madam President, I ask unanimous consent to have printed in the RECORD the Arizona Republic's editorials on this issue that appeared yesterday and on June 30, 2015; the op-ed from me and Senator FLAKE in the Arizona Republic entitled ''We're standing up against regulation-happy Obama''; the two oversight letters we recently sent relevant Agency heads on the Clean Power Plan rule and the clean water rule; and the op-ed from Arizona Chamber of Commerce president Glenn Hamer in the Yuma Sun entitled ''List of examples of federal overregulation is way too long.''

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NEW EPA CLEAN-AIR RULES THREATEN RURAL POWER CO-OPS

(By the Editorial Board)

OUR VIEW: COAL IS ON THE WAY OUT, BUT THE FEDS NEED TO ACKNOWLEDGE ECONOMICS.

By this fall, the federal Environmental Protection Agency is expected to march the nation's energy consumers into new territory on the frontier of controlling carbon emissions.

Representatives of the big power companies are flooding Washington, D.C., in a desperate effort to mitigate the impact of the EPA's venture, known as the Clean Power Plan.

Debates between environmental activists and politicians over its implications are heating up.

But few have looked at the EPA's new carbon plan with quite the riveted sense of alarm as small utility companies that serve rural customers.

The president of a small cooperative serving rural customers in Arizona, New Mexico and Nevada is blunt about that impact:

''The people throughout rural Arizona that we serve will be screwed more than anybody else in the country,'' Patrick Ledger, CEO of the Arizona Generation and Transmission Cooperatives, told the Environment and Energy news service.

Unless the EPA's plan includes substantial revisions. Ledger is not exaggerating.

His energy co-op, serving some 500,000 rural customers, operates one natural-gas-fired and two coal-fired units at the Apache Generating Station in southeastern Arizona.

One of the coal-fired units is scheduled to convert to gas in 2018 to accommodate recent EPA rules governing haze. But under the draft plan proposed by the EPA, the co-op would be forced to shutter its coal-fired unit altogether, stranding around $230 million in recent upgrades and investment.

In addition, the co-op would have to take on between $450 million and $600 million in additional debt to rebuild capacity to serve its customers.

All told, that would push the price of the energy Ledger's cooperative sells to distributive cooperatives to 38 percent above market rates. And that, says Ledger, spells the end.

''We will be put out of business,'' Ledger told the Republic editorial board last week. We go into bankruptcy.''

Arizona Generation's debt is owed to another federal agency. Repeat this story with multiple rural co-ops, and taxpayers will be stuck with an enormous bill.

Ledger and his colleagues understand that coal's future is limited, so they are lobbying the EPA to give the nation's 100 smallest utilities more flexibility in meeting the carbon goals.

Ledger doesn't hold much hope for that, so he's also working with Arizona's other utilities. This state faced the most ambitious goal to reduce carbon under the draft plan; utilities are urging the EPA to give them a longer glide path to ease the transition away from coal.

Concerns over enormous amounts of stranded debt is a near-universal one as the Clean Power Plan approaches.

Arizona's major utility companies, including Salt River Project and Arizona Public Service Co., recently invested hundreds of millions of dollars to bring their coal-fired plants into compliance with existing EPA regulations.

Much of that investment will be lost if the EPA does not revise the draconian carbon reductions written into the Clean Power Plan, much of which the agency expects to occur no later than 2020.

A battle among giants, the debate over the Clean Power Plan is scarcely considering the dire consequences for little-guy energy providers like the Arizona Generation and Transmission Cooperatives.

It needs to start.

WE HAVE THE RIGHT TO KNOW COST OF NEW EPA RULES

(By the Editorial Board)

OUR VIEW: HOW MUCH WILL NEW CARBON RULES COST YOU? THE SUPREME COURT SAYS TAXPAYERS SHOULD BE ABLE TO FIND OUT

Within months, maybe weeks, the Environmental Protection Agency will release new rules governing carbon dioxide emissions from energy plants.

The rules will constitute the most sweeping assertion ever of the EPA's regulatory power. And it is only the beginning. The EPA in the fall is expected to alter its standard for what constitutes unhealthy ground-level ozone pollution, which would require significant, economy-wide investment in ozone-pollution control measures.

That's a lot of unprecedented action. This would be a good time for an honest talk about the balance between the costs of these policies and their benefits.

The Supreme Court is strongly suggesting that conversation take place.

In a 5–4 vote, the high court on Monday said the EPA must reconsider a rule governing mercury emissions, mostly from coal-fired power plants, because it did not weigh the costs and benefits of the rule change before issuing it. The rule is estimated to cost $9.6 billion annually.

The decision is considered a setback for the Obama administration's all-but acknowledged mission to retire the majority of the nation's coal-fired electric plants.

But not necessarily a major setback. The court's decision does not throw out the mercury-emissions standards. It just requires the agency to recalculate the rule while considering more closely the price tag of implementing it.

Most importantly, it leaves the EPA in charge of determining anticipated costs and benefits.

In the coming debate over the EPA's Clean Power Plan mandates, Arizonans deserve to know exactly what environmental benefits they are getting and whether the costs of implementing these new emissions standards are reasonable.

The EPA's self-analysis of the costs and benefits of its mercury-pollution rule, however, suggests an honest report may not be in the cards.

According to the EPA, its mercury emissions rule would cost the energy industry (which is to say, consumers) $9.6 billion annually. That figure, however, doesn't take into account significant factors like the higher costs of additional borrowing the industry would have to incur, or the potential economic drag.

NERA Economic Consulting of Washington, D.C., calculated the rule's annual cost at $16 billion.

However, the EPA gets really creative in naming the ledger's benefits.

According to the EPA's figures, the mercury rule generates a direct economic benefit of less than $7 million annually. Part of that is derived from the 15 percent of pregnant women in Wisconsin the agency assumes catch and eat at least 300 pounds of lake fish per year.

The EPA also calculated that secondary impacts of the mercury rule—infinitely more malleable ''improvements to the public health''—would boost it's ''economic'' value to between $24 billion and $80 billion per year.

Bingo. Economic justification.

We are talking about a significant financial investment to achieve far less impressive results.

As long as the EPA is in control of economically certifying its own rules, it will be

impossible to seriously judge whether the upcoming Clean Power Plan emissions rules are justified. That stands in opposition to the court's direction.

In Monday's Michigan vs. EPA decision, the high court's majority concluded that federal administrative agencies ''are required to engage in 'reasoned decision-making.' ''

That means honestly assessing costs.

WE'RE STANDING UP AGAINST REGULATION-HAPPY OBAMA

(By John McCain and Jeff Flake)

SENATORS: THIS ADMINISTRATION INTENDS TO REWRITE ENVIRONMENTAL POLICY WITH NO THOUGHT TO THE COSTS

A few days ago, the U.S. Supreme Court delivered a victory for businesses and consumers when it turned back the Obama administration's regulate-at-all-cost proposal for controlling power plant emissions.

In Michigan v. Environmental Protection Agency, the court held that the EPA failed to consider the potentially exorbitant cost its regulation would impose on the economy. The EPA's rationale? The costs are ''irrelevant'' to the decision to regulate.

We strongly disagree.

This is one of several new regulations the White House has imposed over the past two years with no regard for how businesses really operate. According to the American Action Forum, 37 major regulations the White House recently announced it is planning on releasing will saddle the nation's recovering economy with more than $110 billion in potential costs—hardly ''irrelevant.''

If left unchecked, those regulations will unfairly impact Arizonans and, according to the Arizona Chamber of Commerce, ''cause significant economic harm to our state.''

One of the most alarming new regulations is the Environmental Protection Agency's so-called Waters of the United States Rule. The EPA claims the rule protects only waters that ''have historically been covered by the Clean Water Act'' and that it ''protects clean water without getting in the way of farming, ranching, and forestry.''

But, dive into the rules 299 pages and you'll find it actually enshrines the EPA's authority to regulate nearly everything that is considered a ''tributary,'' including irrigation ditches and dry desert washes.

While this rule was supposed to be based on science, there are glaring omissions in how Arizona's arid landscape was considered. An analysis of U.S. Geological Survey stream maps projects that Arizona would see a 200 percent increase in river miles subject to the EPA's jurisdiction.

This is bad news for Arizona's agriculture and home-building sectors, which are vital to the state's economy. The federal government could block farmers from building or repairing canals, communities from building schools or churches near dry washes, or even private property owners from developing on their own land if the agency believes water historically flowed there, despite no visible evidence that it still does.

When this massive regulatory expansion becomes effective, Arizonans will be drowning in consultants' fees and lawyers bills. We have introduced legislation halting this rule until the scientific analysis of intermittent and ephemeral streams is complete.

We are also pushing back against the federal government's water grab in other ways. Recently, the Forest Service formally withdrew its groundwater directive, something we asked it to do last October. For now, at least, private property rights that could have been impacted by that rule are safe.

But another proposed rule by the EPA, the ''Clean Power Plan,'' would place new limits on greenhouse gas emissions, including preventing the use of coal, which produces 36 percent of Arizona's electric power generation. The billions of dollars necessary to comply with this plan would be passed on to consumers through increased utility rates.

This rule will most negatively impact those least able to afford such a rate hike. Likewise, small-business owners who don't have the luxury of passing on dramatic utility-price increases could have trouble replacing old equipment or hiring employees.

These regulations are not intended to bolster our economy or get Arizonans back to work. They are an assertion of executive power by a president intent on rewriting environmental policy, not a thoughtful attempt to help states ensure the health, welfare and safety of their citizens.

It is essential that those of us who represent Arizona in Congress exercise our constitutional oversight prerogative to keep the executive branch in check, and to help educate Americans about what's coming and how it will affect us all.

Given what is at stake here, we certainly will.

U.S. SENATE,
Washington, DC, July 8, 2015.

Hon. GINA MCCARTHY,
Administrator, Environmental Protection Agency, Washington, DC.

Hon. TOM VILSACK,
Secretary, U.S. Department of Agriculture, Washington, DC.

Hon. SHAUN DONOVAN,
Director, Office of Management and Budget, Washington, DC.

DEAR ADMINISTRATOR MCCARTHY, SECRETARY VILSACK, AND DIRECTOR DONOVAN, We write to express deep concern with President Obama's attempt to bypass Congress and commandeer the state regulatory process to impose unduly burdensome carbon-emissions regulations at existing power plants; the so-called Clean Power Plan (CPP). Our fear is that the CPP would create significant technological and economic challenges that disproportionately affect Arizonans.

As proposed, the CPP would force Arizona, unlike almost any other state, to achieve a 52% reduction in its carbon-emissions by 2030, with nearly 90% of that reduction (equivalent to re-dispatching all of Arizona's coal-fired baseload generation) coming within five years. The plan effectively ignores Arizona's zero-emission nuclear asset, Palo Verde Generating Station, and gives little credit for the widespread deployment of renewable technology throughout the state. Instead, the plan charges head long toward dictating Arizona's resource portfolio and regulating beyond the fence line.

Shrouded by the veil of choice, EPA contends that Arizona can use a combination of options (aka ''building blocks'') to achieve these targets. In reality, the CPP treats Arizona so harshly that it would be compelled to maximize the use of all its building block ''options'' just to comply with the rule. This is hardly a choice. Rather, as explained by Harvard law professor Laurence Tribe, the proposed plan would effectively dictate the energy mix in each state, allowing a federal commandeering of state governments and violating principles of federalism that are basic to our constitutional order.

As an example, EPA expects Arizona to redispatch coal-fired generation almost entirely with increased natural gas generation. Yet, EPA ignores that more than half of the state's existing natural gas capacity is merchant capacity, not owned by Arizona utilities. Moreover, Arizona's natural gas generating units are often used to manage the diverse energy portfolio, including renewable supplies, meaning that increased baseload use of those resources limits their ability to assist with intermittent generation. Mistakenly, EPA assumes that Arizona can quickly transition from coal generation to natural gas generation by making greater use of existing natural gas facilities. The EPA is not taking into consideration the peak customer energy demands the state requires in the summer months or the current natural gas infrastructure in place.

Converting coal resources to natural gas will also leave millions of dollars in stranded assets in which plants are forced to close before their useful life. As you are well aware, utilities throughout the state have recently retrofitted a number of these units to comply with other EPA regulations, such as the regional haze rule. It is unreasonable for EPA to compel utilities and their ratepayers to comply with one rule, only to render those investments wasted just a couple of years later under a different rule.

Utilities and pipeline providers would, therefore, be forced to spend billions of dollars on new energy infrastructure which could take years to plan, implement, and negotiate. The state's year-round energy needs simply cannot be replaced by natural gas-fired plants in time for the CPP's 2020 interim deadline.

As the Supreme Court recently found, these types of economic issues are not ''irrelevant'' to the rulemaking process. They must be considered, rather than marginalized. And, in this case, it is not simply the stranded cost of investing in new emissions technology or the increased rates; it is also the impact on other areas of the state's economy, such as water deliveries that depend on energy. An increase in water-delivery costs, particularly during the ongoing drought, will only serve to further harm consumers.

This situation is no doubt exacerbated by the possibility that taxpayers could also pay more for this rule, as it threatens to cause default on over $250 million in taxpayer-backed Rural Utilities Service (RUS) loans in Arizona. But, Arizona's coal plants, including those with expensive air pollution controls, will not operate long enough under the CPP to pay these loans back. Shuttering Arizona's coal plants before their useful life is completed will challenge rural electric cooperative's ability to pay back those loans.

In an effort to address many of these concerns, on December 1, 2014, the Arizona Department of Environmental Quality (ADEQ) in concert with the Arizona Utility Group, proposed a compliance plan that would work for Arizona. They suggested narrowly modifying EPA's CPP to allow newer, more efficient coal-fired power plants to continue to fully operate after 2030. This more gradual plan would ensure that investments in expensive emission control technologies will not be stranded and that the CPP's impact on Arizonans will be mitigated.

With the proposed final rule currently pending before OMB, we would appreciate your consideration of the Arizona Utility Group proposal and our concerns, as well as a written response to the following questions no later than July 27, 2015:

1. What cost-benefit analysis was conducted in connection with the Administration's decision to go forward with this rule? Specifically, what is the expected aggregate economic impact of this rule on Arizona businesses and consumers?

2. The USDA has indicated that $254.8 million is held through RUS loans in Arizona. What is the value of these loans that USDA holds nationally?

3. Is the OMB taking the significant loss of taxpayer investment in these loans into consideration of the EPA's final rule?

4. If the rule is approved and Arizona's rural energy providers are forced out of business, what happens to the existing loans?

Thank you for your attention to this matter, I look forward to your response.

Sincerely,

JOHN MCCAIN.
JEFF FLAKE.

U.S. SENATE,
Washington, DC, July 23, 2015.

Hon. GINA MCCARTHY,
Administrator, Environmental Protection Agency, Pennsylvania Ave. NW., Washington, DC.

DEAR ADMINISTRATOR MCCARTHY: I'm writing concerning the Environmental Protection Agency's (EPA) Clean Water Rule that was signed on May 27, 2015. As you know, I've written you before opposing the rule and I've cosponsored several bills in the Senate to block it because of the damage it will inflict on job creation and economic recovery in Arizona.

The Clean Water Rule will extend Clean Water Act jurisdiction to roughly 60-percent of all ''waters of the United States,'' effectively allowing EPA to regulate small streams like it currently does large rivers. But the rule can also apply to ephemeral streams, irrigation ditches, stock ponds, and even dry desert washes that are common in Arizona. As such, the rule disproportionately impacts Arizona farmers, cattlemen, developers and other key sectors of Arizona's economy historically and moving forward into the 21st century. Please bear in mind that agriculture makes up about 30-percent of the economy in my home state, and that construction jobs account for roughly 13-percent of new jobs created in Arizona during the economic recovery.

In recent years, the EPA has, unfortunately, succeeded in building a track record of unilaterally reinventing federal statutes, like the Clean Air Act and Clean Water Act, to advance politically-sensational regulations. What follows is not genuine environmental protection, which is vitally important, but a stigmatization of EPA and its restrictive regulations, which are criticized and then litigated for their blatant disregard for their economic harmfulness. This pattern recently forced the hand of the Supreme Court in Michigan et al. v Environmental Protection Agency, in which it rejected EPA's new rule on mercury and air toxic Standards because the agency had not justified the economic cost-benefit of the rule.

Against this backdrop, I respectfully request that you respond to the following questions:

1. Explain on what basis the EPA has concluded that its economic-impact analysis for the final Clean Water Rule determined that this rule is ''appropriate and necessary?''

2. What economic-impact analysis, if any, did the EPA conduct in connection with the Clean Water Rule that took into account Arizona businesses and consumers in particular?

3. Following the Supreme Court's ruling in Michigan et al. v EPA, do you believe EPA sufficiently calculated the rule's cost considering that the Small Business Administration's Office of Advocacy's requested that the EPA withdraw the rule because it ''will have a direct and potentially costly impact on small business'' and requested further review by the SBA? Please explain your answer.

Thank you for your attention to this request.

Sincerely,

JOHN MCCAIN,
United States Senator.

GUEST COLUMN: LIST OF EXAMPLES OF FEDERAL OVERREGULATION IS WAY TOO LONG

(By Glenn Hamer)

During an address before a joint session of the Indiana State Legislature, Ronald Reagan once quipped, ''If the Federal Government had been around when the Creator was putting His hand to this State, Indiana wouldn't be here. It'd still be waiting for an environmental impact statement.'' These remarks were from a speech given in 1982, and although tongue-in-cheek, their meaning unfortunately still rings true 33 years later.

The federal government continues to roll out rules and regulations that are often overly burdensome and unnecessary. This has a particularly chilling effect on business and economic growth. What's more, the Arizona business community is increasingly concerned that the regulatory agenda of the current administration unfairly impacts Arizona, and has the potential to cause significant economic harm to our state.

Last week I sent a letter to Sen. John McCain outlining five federal rules, primarily driven by the Environmental Protection Agency (EPA), that illustrate this concern:

First up, the EPA's carbon emission rule for electric power plants. In this proposed rule, the EPA has assigned Arizona one of the most stringent reduction goals in the country—52 percent carbon emission reduction by 2030, with an aggressive interim goal to achieve more than three-quarters of that reduction by 2020. Arizona's utilities would need to retire a majority of the coal-fired generating facilities in the state to meet this goal, This transition is not economically feasible and would threaten the reliability of Arizona's electricity supply.

Next, the EPA and the U.S. Army Corps of Engineers (USACE) issued a final rule changing the definition of ''waters of the United States,'' under the Clean Water Act. This brings vast swaths of land under the federal government's jurisdiction and disproportionately impacts Arizona as a result of our unique landscape and infrastructure. For example, Arizona's canal systems, drainage systems, ditches, and private property will be subject to federal government control, which limits our ability to manage water allocation and usage locally. According to a recent economic analysis, our system of canals is responsible for 30 percent of Arizona's gross state product, yet the EPA found the definitional change would ''not have a significant economic impact.''

The EPA is also considering a rule that would lower the air quality standard for ozone. Under the EPA's proposed range, the entire state of Arizona stands to be classified as a non-attainment area. Such a designation brings significant consequences, including permitting delays, restrictions on construction, and threats to our federal transportation funding, all of which will undoubtedly make it more difficult for Arizona to attract and retain businesses.

Arizona is further disadvantaged by these environmental regulations because of the cost of proving so-called ''exceptional events'' and their frequency in our state. As we all know, Arizona is home to frequent dust storms during the summer months. These exceptional events occur regularly in Arizona and contribute to artificially poor air quality readings. Under the EPA's current Exceptional Events Rule, a state can be subject to a non-attainment designation and other significant consequences unless it can prove that a poor air quality reading is the result of an exceptional event.

Finally, the federal Endangered Species Act lists hundreds of species as endangered or threatened, many dozens in Arizona. This results in high costs to industry by hindering development and economic growth and imposing exorbitant compliance costs even when the designation does not give an accurate picture of the species' status.

Government regulation and oversight serves an important purpose. However, the federal government has a responsibility to ensure the regulations it promulgates are fair, equally applied, and result in an articulable benefit. Recent environmental regulations demonstrate a failure to recognize the limits of federal authority and to meaningfully engage the states to develop regulatory schemes that safeguard public health and safety, acknowledge the unique qualities of the individual states, and support a robust and growing economy.

Mr. MCCAIN. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CASSIDY. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

HONORING THE MEMORY AND LEGACY OF THE TWO LOUISIANA CITIZENS WHO LOST THEIR LIVES IN THE ATTACK OF JULY 23, 2015, IN LAFAYETTE, LOUISIANA

Mr. CASSIDY. Madam President, last week a terrible tragedy occurred in Lafayette, LA, when a mentally ill gunman opened fire in a movie theater filled with innocent people.

Jillian Johnson was a talented artist, successful entrepreneur, and an active member of the Lafayette community. Jillian played in a local all-female band, co-owned a gift and toy shop, and often organized community projects that benefited all. She was a kind and charitable soul, described by her husband as a loving friend, daughter, sister, and wife.

Mayci Breaux was an incredible young lady with a bright future ahead of her. A student of Louisiana State University, Mayci was studying to be a medical radiology technician and was engaged to her high school sweetheart, planning to marry after she graduated. Mayci worked at a local fashion boutique, where her customers and coworkers remember her generous smile and wonderful optimism.

These two women exemplify the kindness and essence of the Lafayette community. Although they were taken from us far too quickly, their memories live on.

Let's also take a moment to thank the heroes in this tragedy—the Lafayette police, Acadian Ambulance, the employees of the Grand 16 movie theater, and other first responders who acted bravely and quickly to stop the shooter and aid the injured. We are grateful for their service, and we honor them today.

I also acknowledge by name Jena Meaux and Ali Martin. Their quick

thinking and courageousness saved lives when they crawled across the movie theater floor to pull the fire alarm to alert authorities.

Lafayette and Louisiana are resilient. In times of tragedy and pain, we come together to support and care for one another. The love we have for each other, even in the darkest of times, will help Lafayette, our State, and our community recover.

The events that transpired in Lafayette last week are a reminder of the long road we must take to reform our mental health system. Too many innocent lives are being taken from us in senseless attacks in movie theaters, schools, churches, and other places where we should feel safe. The common denominator in these tragedies is all too often untreated mental illness.

As public servants, we should seek to keep the public safe, but our mental health system is badly broken and fails to do so, and reforms are coming too slowly. It doesn't make sense that parents caring for a mentally ill child cannot be part of medical decisionmaking that could prevent horrendous tragedies like these. I can go down the list of reforms that need to be made to improve our mental health system. I am working with my good friend Senator CHRIS MURPHY on legislation that will help reform our mental health system and make it easier for those in need to get the help that could potentially avert a future tragedy like this.

I finish by saying once more that our thoughts and prayers are with the families and loved ones of Jillian and Mayci and all those wounded who are suffering. May they know God's comfort at a time when it may be otherwise impossible for them to feel comforted.

I yield to my fellow Senator and good friend, Senator VITTER.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. VITTER. Madam President, I come to the Senate floor sadly, in light of this tragedy, to join my colleague Senator CASSIDY in expressing these heartfelt thoughts. We rise today to express our deepest sympathy for the victims of this horrible shooting in Lafayette. The hearts of all of Lafayette and Louisiana go out to all of the families involved in this tragic incident.

As Senator CASSIDY suggested, we lost two enormously talented, unique, and irreplaceable individuals, and we certainly pay tribute to them.

As Senator CASSIDY suggested, Mayci was a student at Louisiana State University, full of life, full of hope, full of promise. She was studying to become an ultrasound and radiology technician. She was scheduled to begin her training just a few days after her tragic death. She was at the movies with her boyfriend, Matthew Rodriguez, who was among the nine wounded.

Jillian was the owner of Parish Ink, a T-shirt printing company specializing in old Acadiana verities. She and her husband also owned the Red Arrow Workshop, a gift and toy shop in Lafayette. She also was full of life, full of talent, full of vigor and happiness. She played the ukulele and guitar for The Figs, an all-female sextet from Lafayette.

These are two individuals who are completely irreplaceable, and they will be sorely missed.

I also join Senator CASSIDY in recognizing and thanking the heroic actions of those two teachers from Jeanerette High School in Iberia Parish, Jena Meaux and Ali Martin. According to several reports, Ali jumped in front of Jena to shield her from the shooting, very likely saving her life; it caused the bullet to hit Jena's leg instead of Ali's head. Ali was shot in the leg in the process. Despite her injuries, Jena courageously pulled the fire alarm, alerting the whole movie theater and certainly saving lives. So we pay tribute and remember them as well.

We also pause and remember and continue praying for the recovery of nine other individuals who were wounded in that horrible incident: I mentioned Matthew Rodriguez, the boyfriend of Mayci Breaux; Morgan Julia Egedahl; Dwight ''Bo'' Ramsey and his wife Gerry—cousins of Congressman BOUSTANY, by the way, and good friends of mine and Senator CASSIDY's; Ali Viator Martin, an English teacher at Jeanerette Senior High School, and Jena Legnon Meaux, whom I mentioned as true heroes in this incident.

On Saturday evening, Lafayette residents gathered downtown to honor particularly the two victims who lost their lives. During the vigil, one Lafayette resident certainly stated it well:

We can't let evil win. We as a community have to rise above that and move forward.

Well, we do, but as we do, Senator CASSIDY and I rise today to honor the victims, to remember them—particularly Mayci and Jillian—and to certainly recommit ourselves to the important work at hand, including regarding mental illness, as Senator CASSIDY suggested.

We have prepared a Senate resolution commemorating the victims of this horrible event.

Madam President, I ask unanimous consent that the Senate proceed to the consideration of S. Res. 231, submitted earlier today.

The PRESIDING OFFICER. The clerk will report the resolution by title.

The legislative clerk read as follows:

A resolution (S. Res. 231) honoring the memory and legacy of the two Louisiana citizens who lost their lives, recognizing the heroism of first responders and those on the scene, and condemning the attack of July 23, 2015, in Lafayette, Louisiana.

There being no objection, the Senate proceeded to consider the resolution.

Mr. VITTER. Madam President, I ask unanimous consent that the resolution be agreed to, the preamble be agreed to, and the motions to reconsider be laid upon the table with no intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The resolution (S. Res. 231) was agreed to.

The preamble was agreed to.

(The resolution, with its preamble, is printed in today's RECORD under ''Submitted Resolutions.'')

Mr. VITTER. Madam President, again, we all hold these families, particularly the two victims and their families, in our prayers and our continuing thoughts and our love. It was a horrible incident. But I know the community of Lafayette well, I know the State well, and it certainly will not stop with the pure tragedy. Certainly folks will hold up these families in love and support and prayer and work toward far better resolution of issues involved, as the one Senator CASSIDY mentioned.

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. INHOFE. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

HIRE MORE HEROES ACT OF 2015—Continued

Mr. INHOFE. Madam President, I see there is kind of a lull here. We are waiting around for a vote to take place at 10 or 10:30 tonight, I think it is, and I thought I would share.

There are still some uncertainties on the bill, the Transportation reauthorization bill. It is one I am very proud to be the author of. In fact, I was privileged to be the author the last long-term reauthorization in 2005. At that time, I was working very closely with someone, with a fellow Member who is the least likely to be working with me on anything. By her own admission, Senator BOXER is a very proud liberal and I am a very proud conservative, but we do agree there is that old, worn-out document that nobody reads anymore called the Constitution, and it tells us what we are supposed to be doing here. It says, defend America and build our roads and bridges. That is what we are doing. That is what this is all about.

We received a disturbing message from the House about an hour ago saying they would not take up our bill. We are going to pass this bill, but they say they are not going to take it up. That means there is a dilemma because at the end of this month, there is no longer any money in the highway trust fund, and things will stop.

I don't know whether their intention is to give a short-term extension and go home or—of course, I am still thinking brighter minds will prevail and they will realize we have a long-term, 6-year highway authorization bill because the things you can't do in this

country, you can't do with the short-term extensions.

Yesterday, I listed many of the bridges that were in terrible shape and the fact that we could not address those problems unless we pass a long-term highway reauthorization bill. I mentioned also that someone I knew—it was right around the 2005 bill—a mother and three children were driving under a bridge in Oklahoma City. It was far out of its extended life, its warranty period, if you will, and a chunk of concrete fell off and killed her. This is happening all over America. We saw what happened in Minnesota when that disaster occurred, all the pictures of the people who died and were injured.

We are going to be looking at a lot of amendments. I heard there is one amendment that Senator MANCHIN along with Senator BOOZMAN are putting together to adopt the Pilot's Bill of Rights 2, which is appropriate. It may not be as germane as we would like it to be, but it is still transportation.

The Pilot's Bill of Rights 1 was passed 2 years ago. In fact, they would not even take it up in committee, but I had 67 cosponsors to the bill. I was very thankful at that time. Of course, the Democrats were in the majority. I went to HARRY REID's office and said: It doesn't seem fair to me that we have 67 cosponsors, and they will not even take it up in the committee.

He said: Well, that isn't right.

We came down to the floor, we rule XIV'd it, and passed it. It does show that sometimes when things get really outrageous, people tend to work together. That was on an issue that just a handful of people are aware of, but anyone who is a licensed pilot knows, in their minds, that was the most significant thing that was going on.

I have been flying for a lot more years than most people in this Chamber have been alive. Because I have been an active pilot—I have been in aviation for many years—the people who have problems with the FAA would come to me to help them with their problems. I found this to be true back when I was mayor of Tulsa. We had a police force, a very good police force. There are a few bad guys who get in there. The same thing is true with the FAA. You have a few people who take advantage of the power they have and take licenses away from people.

I remember 10 years ago, Bob Hoover—I bet none of you ever heard of Bob Hoover. Bob Hoover was arguably the best pilot in the history of aviation. He had a Shrike. A Shrike is a twin-engine Aero Commander. He would put a glass of water on the dash, and he would start doing barrel rolls and would not spill his glass of water. I would do barrel rolls, but I would spill my glass of water. This guy was really good.

There was an inspection in the field, and Bob Hoover lost his pilot's license. There was no reason for it. In order to get it back, I actually had to go to the floor, and it took a year to pass legislation that would stop that abuse from going on. That has continued. I have always helped people until it happened to me, and then that had a whole new feeling because people who are involved in aviation—the one thing they don't want to lose is their pilot's license.

For many years, I was a builder and developer in South Padre Island, TX. We are on the east coast now. Nobody knows where Texas is here. They think there is no such thing as a nice coast with beaches and all of that unless it is on the east coast, but there is the Padre Island area of Texas. It has beautiful beaches.

I was in the building business. We built condos and townhouses, and I always enjoyed that. Keep in mind this is the southern tip of Texas. It is just as far south as Key West, FL, is, but it is in the middle of the country. We would go down there. I would fly my plane probably once a week for quite a number of years. I went down, and I was making a normal landing. It is not a controlled field. You have your approach controls that control it. The approach control from valley approach—I am getting a little technical here, but I have a reason for telling this story.

He said: All right, you are clear to land on runway 1–3 in Cameron County. I went up to land. Just before I touched down, with six passengers—so it was too late for a go-around—I saw that there were a bunch of people working on the runway. There wasn't a big X on the runway, which is required. They claimed there was. They quickly painted one on right after that.

Everyone started criticizing me. I remember there was a front-page cartoon in the New York Times. Everyone was having a good time with that. The bottom line is, I didn't do anything. They claimed there was a NOTAM. That is short for Notice to Airmen. The Notice to Airmen says that if you check your notice before you land on the field, you will find out if there is construction on the runway, if lights are out or something else. Of course, we did that. There was no NOTAM. They claimed there was a NOTAM—the FAA did. They never could find it.

Anyway, to bring us up-to-date, I introduced and we passed the Pilot's Bill of Rights. In our system, our legal holdout was where you are guilty until you are proven innocent if you are a pilot. That is the last—because one man's accusation can turn into the revocation of a license, so we introduced the Pilot's Bill of Rights. We gave an opportunity, if they disagree with the FAA, if an accusation is made—or the NTSB—they can go to the Federal district court. That seemed to work out.

The bill forced the FAA to put NOTAMs in one secure place where everybody would have access to it, and all of these complaints that were made were dealt with, but a lot of the things we wanted to happen wouldn't happen.

In case you are wondering—I will take it off now since there is no reason to keep it on. Do you know what that is? That is the pass to get into Oshkosh. The Chair knows this because the Chair's husband has an FBO operation in Western Iowa. Anyway, I have gone to the largest aviation event worldwide in Oshkosh. It is the last weekend of July of every year. I have been to every one of those, along with my sons, for 36 years. I never missed one. I didn't miss one last week either. Some things are really important.

I went there with the idea that we have the Pilot's Bill of Rights 2 in order to correct the areas where the FAA is either not complying with the intent of the law or even the Federal district courts are not accepting cases. We are going to correct that.

First of all, if it happens that Senator MANCHIN and Senator BOOZMAN offer their amendments, then I will be supporting their amendments. I am going to go over why it is important, but if as a result of the announcement that was made by the House of Representatives 2 hours ago we are not going to be having amendments, it is still introduced as a freestanding bill. I have 56 cosponsors. That is a lot of cosponsors. If that happens, I want to mention a couple of things that are on here.

There is a problem with the third-class medical. So 10 years ago, a decision was made, and it was a good decision. They took the light aircraft, and they said if you can drive a car, you can fly an airplane. They went ahead, and we have had 10 years' experience now without a third-class medical certificate. There has not been one accident in 10 years where it was due to the fact that they didn't have any third-class medical certificates.

In this bill, we are taking that up to include a larger number of pilots, and to include airplanes as heavy as 6,000 pounds, carrying six passengers, not exceeding 250 knots, and several requirements like that in giving them the same opportunities the pilots of the light aircraft have. That is a part of this bill. I know there are a lot of people in this Chamber because I have talked with them, not a whole lot because we have 56 cosponsors, but there are a lot of them who really believe that would somehow be dangerous. For that purpose, we have made several exceptions to it. I will outline these because I know there are some Members of this body that if this comes up as an amendment, they need to know this.

First of all, on a third-class medical, we have the requirement for an online medical education course every 2 years. This will make sure the pilots coming up for renewal of their certificate are up-to-date on all of the new things that have transpired since the last time in the new medical requirements.

The second thing it does is anyone who is a new pilot just coming on, he has to have a thorough examination that now you have to have every couple of years. That hasn't changed.

And then the third would be the self-certification that takes place every 5

years, which could actually be done with your own doctor. Those are some of the changes that have been made to make it a little bit easier for some Senators who will be voting on this legislation.

The second area where the Pilot's Bill of Rights did not—they addressed it, but there are two Federal judges. You are supposed to be able to go from the FAA to the NTSB, the National Transportation Safety Board, and then to the Federal District Court. What has happened in the past is that the NTSB has rubberstamped anything the FAA does, so really the FAA is making those decisions without proper due course which other people are entitled to.

What we have done with this is—there are a couple of Federal judges who said they are not going to take a case on a pilot until they have exhausted all of the administrative remedies that come from the FAA and the NTSB. We have a solution to that in this bill so this actually explicitly states the pilots will have an option to appeal the FAA enforcement action directly to the Federal courts for a guaranteed de novo trial. De novo means, instead of taking the conclusions of the investigation from the FAA and risking rubber stamping it, they have to have a trial from the beginning. That is a very significant change we are making.

The other thing we neglected to do is include certificate holders other than pilots. You could be a mechanic, a flight attendant, or any number of things, and not be included in these legal opportunities, so the Pilot's Bill of Rights 2 allows all certificate holders to have this.

The third area is the access to the flight records. In my case, I could not get access as to what the FAA was accusing me of. We thought we had this corrected in the Pilot's Bill of Rights, but it still needs to be strengthened, so we have a section in the Pilot's Bill of Rights 2 that requires the FAA to notify a certificate holder that he is being investigated and clarify the incident being used to begin enforcement proceedings so that person will know what he has been accused of and can address it.

The fourth area has to do with document requests. The FAA has retaliated against pilots because the Pilot's Bill of Rights 1 requested broad documents from them, which can be very time consuming and very costly, and it is not necessary at all. The solution to that is that we explicitly rein in the ability of the FAA to initiate the expansive document request and limit them to the pertinent issues being investigated by the FAA. That should correct that.

We have several other items too. If somebody has a minor infraction in a car, then after 90 days, or so many days, it would be taken from their record. That is the way it used to be prior to 1996 when they had the Pilot Records Improvement Act of 1996, and now we will go back to where we were before that.

Many of these issues that were problems before and weren't corrected with the Pilot Bill of Rights are corrected, and I feel very comfortable with it.

The reason I have all of this in my mind now is that I just came back from Oshkosh. Although I was there only 2 days, I was able to give 10 presentations, and there were a little less than a half-million pilots there at the time, so I am sure I got to all half-million of those pilots collectively with all of those events that we had.

It is kind of interesting because for someone who is a pilot, that is the most important thing. We are not talking about Democrats, Republicans, or things that are controversial. It is just that when you go to Oshkosh and you see what people have accomplished through experimentation and the technology that has developed—it used to be that all planes had to be made out of aluminum, and this all changed with new types of things that were discovered at Oshkosh. People are building planes behind their garages.

Well, anyway, so much for that. We have a good solution for all of these problems, and I will say to the 56 members that they are certainly very popular among the pilots and the group I spent the last 2 days with.

I mentioned that only because in the event that they change the rules around here, and we are allowed to have amendments that are not germane, that would be one of the amendments that I would offer, and I want to be sure that we are at least getting things into the RECORD so people are aware of it. While there are no Members here right now, the staff is monitoring everything that is going on, so I want to make sure people know that is an issue we may or may not be dealing with.

It would be a surprise to me if the House of Representatives said: Well, we are just going to go home, and we are not going to pass this bill after we go through all of the trouble of passing it. I think there are ample votes to pass this legislation. Long-term reauthorization is a very important thing back in the States.

The coalitions which are coming together on this legislation include the Department of Transportation for every State, along with the labor unions. They are supporting this legislation because it will provide a lot of jobs. The Chambers of Commerce are all involved; the farmers are all involved. This has the most popular support of anything that we will deal with all year long, so we really need to have this bill. I am having a hard time believing that if we go through the trouble of having a reauthorization bill, the House is not going to take it up, but that statement was made 2 hours ago, and that may be the situation.

I can remember in the earlier days when the highway trust fund had one big problem: They always had a surplus. They had too much money, but that has changed with the increased efficiency of cars. Electric vehicles are using highways, but they are not paying the gas tax. Consequently, we have a real problem with funding this legislation.

If we take the total amount of revenues that come from the gas tax, let's say over the next 6 years because this is a 6-year bill, each year falls short by $15 billion. So we are looking at being short $90 billion over a 6-year period.

I can say this because I think I may be ranked as the most conservative Member for a longer period of time than anybody else in the Senate. I can talk about this because this is a conservative position. The conservative position is to have a long-term bill because if we do short-term fixes, it costs—and this is irrefutable and no one disagrees with this—an additional 30 percent off the top if we do short-term extensions, and that is what we have been doing. We have had 33 short-term extensions since the 2005 bill that we passed expired in 2009, and that has used a very large amount of the money that was there to take care of the problems with the roads and the highways.

We do have problems out there, and it is going to take a long-term bill to take care of it. I have a feeling, since the money runs out on the last day of this month, that the House, if they are not going to take up our bill, they may just pass a short-term extension and then go home. That is not the way I think it should be done, we have to get this long-term bill.

This is something that doesn't happen very often, but now and then it does. We went through the same thing with the other big bill, which was the Defense authorization bill over the last 3 or 4 years, and they didn't bring it up as they should have early in the year. I remember 2 years ago we passed our Defense authorization bill in June, and the leadership didn't bring it up until December. If we hadn't brought it up, then the kids who are out there risking their lives would lose their reenlistment bonuses, their hazard pay, and a lot of things would have happened. Just before the end of December, we were able to get it done. It is not the way things are supposed to be done around here. I certainly don't want that done with the highway reauthorization bill, but that is what very likely could happen if the House does what they say they are going to do.

With that, I do want to come back and go over some of the larger problems that cannot be addressed unless we pass a long-term highway reauthorization bill.

I will say this: There is a very fine FBO operation in Western Iowa called Red Oak. It just so happens that my son just left Red Oak on his way back from Oshkosh. It also happens that Red Oak is owned by the husband of a very prominent Senator in this body who happens to be presiding now.

With that, I will come back later, and we will be talking about these things because I understand the next thing we are going to do is a vote at 10 tonight, unless some time is yielded back. I hope they will yield back their time. They are not down here talking, so there is no reason not to yield back time. If time is not yielded back, I will talk about some of the projects that will not be done unless we have a long-term reauthorization bill.

With that, I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The senior assistant legislative clerk proceeded to call the roll.

Mr. JOHNSON. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

HONORING MARINE SERGEANT CARSON HOLMQUIST

Mr. JOHNSON. Madam President, I come to the floor to pay tribute to one of America's sons who has fallen in the line of duty. Sgt Carson Holmquist was a 25-year-old marine from Grantsburg, WI, who lost his life tragically as a result of the heinous act committed by a terrorist on July 16 in Chattanooga.

Sergeant Holmquist was one of the finest among us. He gave his life to preserve the liberties upon which America was founded. He was a son, a husband, a father, and a very proud marine.

He also must have been a great friend to all the people he knew and a man who was respected by many people he didn't know.

I was honored to attend his funeral this past Saturday, and I was witness to a tremendous outpouring of support. I saw a line—probably about 2 blocks long, three or four people wide—of citizens from all across Wisconsin and from several other States.

Some of these people were Sergeant Holmquist's relatives, some were his friends, many were brothers-in-arms, both past and present. Still others were citizens who had no personal connection to Sergeant Holmquist. They came simply to pay their respects to a man who swore to support and defend the Constitution of the United States.

They came to honor a man who so loved America that he chose to serve in faraway lands. He revered freedom, so he sacrificed his own freedom that we may be free. He defended our right to live as individuals by yielding his own individuality in that noble cause. He valued life. Yet he bravely readied himself to lay down his own life in humble service to his comrades-in-arms, to his family, and to his Nation.

For 239 years, our service men and women have served as guardians of our freedom. The cost of that vigilance has been high. Since the Revolutionary War, more than 42 million men and women have served in our military, and more than 1 million of those selfless heroes have given their lives. Wisconsin has borne its share of that sacrifice. Since statehood, more than 27,000 of Wisconsin's sons and daughters have died in military service. Statistics cannot possibly convey the weight of these losses. Statistics are merely numbers that could never fully communicate the qualities of promising lives which were cut far too short. Statistics say nothing of unfulfilled hopes and dreams.

So instead of numbers such as 1 million or 27,000, I ask everyone to think for a moment about a much smaller but yet even more staggering number—simply the number one. Sergeant Holmquist was one man, loved and cherished by family and friends. He was one man whose loss is a tremendous blow to Wisconsin and to this great Nation.

He was one man, but his sacrifice was not his alone. His parents Thomas and LaBrenda, his wife Jasmine, his son Wyatt, and every other relative and friend left behind are experiencing profound loss and grief. But tragedy multiplies. It is not contained. For those left behind, the pain may slowly subside, but the wound will never heal.

The Holmquist family loved Carson dearly, and our hearts go out to them. I pray they will find peace and comfort amid overwhelming tragic loss.

The torch of freedom burns brightly because of men like Sergeant Holmquist. May God bless and comfort the sergeant's loved ones. May He watch over those who have answered the Nation's call. May God bless America.

I yield the floor.

Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The senior assistant legislative clerk proceeded to call the roll.

Mr. MENENDEZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. COATS). Without objection, it is so ordered.

TRAFFICKING IN PERSONS REPORT

Mr. MENENDEZ. Mr. President, I rise because I am deeply and profoundly disappointed in this year's ''Trafficking in Persons Report'' that was released today. By upgrading Malaysia and Cuba, which were at tier 3—the worst tier at which any country could be considered—the administration has turned its back on the victims of trafficking and turned a blind eye to the facts and politicized the report, and they completely ignored the calls from Congress, from leading human rights advocates, from the realities on the ground in Cuba, and from Malaysian Government officials themselves to preserve the integrity of this exceedingly important report. They have succeeded in elevating political considerations and political goals above the most fundamental principles of basic human rights.

I heard Secretary Kerry, in his presentation of the report, say something to the extent that we should not put a price on our fellow human beings' freedom. Well, it seems we have in this case. In arbitrarily upgrading Malaysia and Cuba, they are clearly politicizing the report, giving an undeserved stamp of approval to countries that have failed to take the basic actions that would merit this upgrade. This flies in the face of what Malaysians themselves want. In Malaysia, members of the Parliament, the legal profession, and human rights activists have urged the United States to support their efforts to maintain the tier 3 ranking they tell us Malaysia deserves. Today we have failed them.

In Cuba, adults and children are subjected to sex trafficking, and the government continues perpetrating abusive practices of forced labor. The administration's decision to upgrade Cuba defies common sense. In the State Department's own words, Cuba is a source country where adults and children—children—are subjected to sex trafficking and forced labor.

In the case of forced labor, the Castro regime itself is the single greatest perpetrator of forced labor in Cuba. Every year the Cuban Government coerces tens of thousands of its own doctors and medical professionals to serve in foreign missions under conditions that violate international norm. The Castro regime restricts the movement of its doctors while they are overseas, takes their passports from them, and often prevents family visits. Additionally, the Cuban Government garnishes its doctors' wages by more than 70 percent, using what should be a humanitarian mission as a means to fill its own coffers.

This gross violation of international standards is so bad that the United States has a specific parole program for Cuban doctors who have been subjected to forced labor conditions by the Castro regime. We have our own special parole program for Cuban doctors who have been subjected to forced labor conditions by the Castro regime. Thousands of Cuban doctors have come to the United States as a result.

So at a time when these doctors are being received into the United States on humanitarian parole, we are going to turn a blind eye to the fact that the Castro regime is the sole responsible actor. This raises one question. Is this yet another emerging detail of something that the administration and the Cuban Government have been discussing in recent months, another demand of the Castro regime that the United States had to agree to in the name of normalizing the relations? They are willing to look the other way on human rights in order to normalize relations? As the State Department's own report recognizes, there has been no progress—no progress—on forced labor in Cuba. Given that reality, any upgrade of the country's ranking challenges common sense.

So I intend to use all the tools at my disposal—from hearings, to a call for

investigations, to legislation—to challenge these upgrades. The credibility and commitment of the United States to fighting the scourge of modern-day slavery is on the line. We spent an enormous amount of time in this Senate on the legislation Senator CORNYN had, along with others, on modern-day slavery, spent a lot of time on it in the Foreign Relations Committee on which I am privileged to serve under Senator CORKER, who had his own legislation about how we deal with human trafficking in the world—modern-day slavery, as he calls it. So we need to make clear that the ''Trafficking in Persons Report'' must not be subjected to political manipulation.

I am utterly dismayed at the administration's decision to upgrade Malaysia and Cuba under these circumstances. It represents a bastardization of the trafficking-in-persons ranking process and calls into question the credibility of the ''Trafficking in Persons Report,'' and it takes away the power to incentivize real progress. The administration's upgrade of Malaysia as well as Cuba compromises American values in the interest of promoting a trade agenda with a country that has consistently failed to uphold human rights. One can only characterize this action as a cynical maneuver to get around the clear intent of Congress with no regard for the effect on a key measurement tool of a country's human trafficking record. This not only represents the latest release of the ''Trafficking in Persons Report'' in the history of its publication—nearly a full 2 months' overdue—but calls into question this administration's commitment to uphold human rights.

We all know that the Malaysian Government has not undertaken a consistent, serious effort that would warrant an upgrade.

As I have noted before on other occasions, on April 17 of this year, the U.S. Ambassador to Malaysia—our Ambassador to Malaysia—said that the Malaysian Government needs to show greater political will in prosecuting human traffickers and protecting their victims if the country hopes to improve on its current lowest ranking in the ''Trafficking In Persons Report.'' This is the person on the ground in Malaysia representing the U.S. Government who has eyes on what is happening, and he said on April 17 that, in fact, the Malaysian Government needs to show greater political will in prosecuting human traffickers and protecting their victims if the country wanted to rise from tier 3 to a better tier 2 standard.

On June 1, the Assistant Secretary of State for Population, Migration and Refugees, Anne Richard, reaffirmed that ''this year's report covers up to March 2015, which means Malaysia's handling of the Rohingya refugee crisis will only be reflected in the 2016 report.'' According to the Assistant Secretary, then, actions taken after March of this year, good or bad, should certainly not be reflected in this year's evaluation.

Well, if you are not going to reflect the mass graves of Rohingya Muslims and what the Government of Malaysia did or did not do—the holding pens of humans—because it came after the reporting period, then you can't claim that the government's action to pass a law that has no teeth, no enforcement, and that hasn't even been put into effect after the date—the same date that you say you cannot consider the plight of hundreds who lost their lives—then you can't consider the passage of a hollow bill. It doesn't work both ways.

Even the Malaysian Bar, the Malaysian association of legal professionals, stated in a letter last week: ''If there is any lesson to be learnt from recent experience, it must be that the government has an excellent record of drafting written plans, but a less than satisfactory record of implementing them. As such, the upgrade of Malaysia, if it were to occur, would be premature and undeserved.''

The fact is, by the admission of the ''Trafficking in Persons Report,'' the Malaysian Government had only three human rights convictions in 2014—a two-thirds decrease from the last report. So compared to the last ''Trafficking in Persons Report,'' they had a two-thirds decrease in their convictions of human rights abuses. Yet they get an upgrade. Wow. That is a surefire way to send a message across the world that we are serious about human trafficking. Frankly, that is beyond comprehension and common sense.

There can be no clearer statement nor a more compelling statement that we have lowered the bar on human trafficking and lessened the value of the one report the world relies on to evaluate the behavior of nations. The events of recent months have clearly shown that the Malaysian Government has not even begun to adequately address its human trafficking problem. Thousands of victims continue to be exploited through sex trafficking and forced labor. And it was unnecessary to do this, having passed an amendment that said tier 3 countries in the ''Trafficking in Persons Report'' of the State Department would not be allowed preferential access to the U.S. market unless they cleaned up their record, which had strong bipartisan support of the members of the Senate Finance Committee and ultimately was incorporated in the TPA, the trade promotion authority legislation that passed the Senate and was sent to the House. In good faith, because of concerns that maybe that would undermine the Trans-Pacific Partnership, in good faith I negotiated an amendment—a provision to change it in the amendment that would have said you could still negotiate with Malaysia, but they had to clean up their act if you concluded that negotiation and they were part of TPP. They had to clean up their act on human trafficking before they got the preferential access to U.S. markets. I thought it was a significant give on my part, considering the vote of the Senate, but it was a good-faith effort. So this wasn't even necessary to do unless you just want to give Malaysia a pass. The goal was to take the full weight of the TPP deal off of the ''Trafficking in Persons Report'' process.

Instead of choosing the route we worked out together, requiring the President to testify in writing that Malaysia has taken concrete steps to deal with its very serious human trafficking problem, the administration backed out. I therefore see no reason why the comprehensive ban on fast-track for tier 3 human traffickers should now be amended. I see no reason why my willingness to accommodate should be amended.

This underscores the need for further oversight of the trafficking in persons process, both legislatively and through the noble work of human rights groups here in Washington and out in the field.

I plan to work with my colleagues to advance my amendment to the State authorization bill passed by the Senate Foreign Relations Committee last month which requires the State Department to notify Congress of all trafficking in persons upgrades and downgrades 30 days prior to the release of the report.

I am looking forward to speaking to the chairman of the Senate Foreign Relations Committee to see if he, within a very busy schedule because we have all of the Iran nuclear review—but it seems to me this merits a congressional hearing to determine what went on here. If I, for some reason, cannot achieve that, then I may very well turn to the inspector general of the Department to seek a report as to what went on.

Despite the clear will of Congress, this administration has made a mistake and will now have to answer questions as to its ability to objectively evaluate global human trafficking. The hard-working, committed NGOs that labor in the field to fight human trafficking and the countless victims who continue to suffer deserve an honest reflection of American values, not an arbitrary determination based upon expediency in achieving a limited political objective rather than a real solution.

I look forward to working with all of the groups that have been instrumental in shining a light on the continued human rights abuses that take place in Malaysia, in Cuba, and elsewhere, to ensure that the integrity of the ''Trafficking in Persons Report'' is restored.

Thousands and thousands of men, women, and children around the world who are the victims of human trafficking—it is on their behalf that I come to the floor. It is in their interest and in the interest of responsible trade policy that recognizes there can be no reward to nations that ignore those types of trafficking in persons and do

nothing to end the scourge of what amounts to modern-day slavery, one of the great moral challenges of our time.

It is for the world's 50 million refugees and displaced people—the largest number since World War II, many of whom are targets of traffickers. Because they are displaced, have nowhere to go, they are preyed upon. We have the largest number since World War II of refugees in the world. It is for the 36 million women and 5 million children around the world subjected to involuntary labor or sexual exploitation. For the victims of these crimes, the term ''modern slavery'' more starkly describes what is happening around the world.

I will continue to fight against human trafficking in all its forms. I intend to fight for the integrity of a report that is a critical tool for us to be able to not only cast the light upon human trafficking in the world but to get countries to understand they must meet this great moral challenge and change the course of events in their country. That is why I come so incredibly upset to the Senate floor on something I never thought would have happened, but it has. We need to change it and change the course of events.

I suggest the absence of a quorum.

CYBER SECURITY

Mr. DAINES. Mr. President, today I rise to speak about the Nation's cyber security. Prior to being elected to the Senate, I spent nearly 12 years working at a cloud computing company. This is a company we started from virtually nothing. We took the company public, and we grew to over 1,000 employees. It became a leading cloud computing company in the customer experience sector. I have seen firsthand the opportunities created by advances in technology, but I have also seen the power Big Data holds because our information becomes currency for both companies and for hackers.

These risks are even greater when they impact our children, and as the daddy of four children, I know the importance of maintaining a close relationship between the parents and their children's school. Today, student electronic records are used in schools across the country, and updates can be easily made and can follow a student from one school to another. This more accurately reflects the nature of students' movements within the school system.

But at a time when overseas hackers are fighting to gain access to any information they can, these technological gains also come with some risks. Securing students' digital information is critical to ensuring that our kids' privacy is protected. That is why I am grateful and proud to announce that I joined Senator BLUMENTHAL in introducing the SAFE KIDS Act.

The Safeguarding American Families from Exposure by Keeping Information and Data Secure—the SAFE KIDS Act—protects student privacy by establishing clear parameters for third-party operators when using data collected from students. This bipartisan legislation empowers parents to control access to their children's information because keeping personally identifiable information secure will lead to a uniform way to secure our students' data. By placing that power back in the hands of the students, in the hands of the parents, and in the hands of the schools, we can make progress toward protecting the privacy of our children because our schools and our kids aren't the only ones at risk for a serious breach.

This week we are debating ways to provide the certainty and resources needed to improve our Nation's infrastructure—our roads, our bridges, our ports, our highways—but recent news reminds us that we must also consider the security of the cars that are driving on our roadways. In fact, just in the past week, news broke that Fiat Chrysler announced a recall of 1.4 million vehicles due to a vulnerability that could allow hackers to disable the vehicles on the highways. In fact, through the radio of a Jeep Cherokee, hackers disabled the vehicle's transmission as a driver drove onto a public highway in St. Louis. This episode is telling in that cyber hacks can affect every sector of our economy, from the financial sector to our automotive manufacturers.

Our military installations across the globe are also vulnerable to an attack, according to a new report from the GAO. In fact, our utility systems that provide water, electricity, and other essential services to our military installations worldwide have limited defenses against cyber attacks. Report details that the industrial control system—ICS—the computers that monitor or operate physical utility infrastructure, ''have very little in the way of security controls and cybersecurity measures in place.'' In fact, in a recent July 25 Military Times article, they cite: ''An example of a successful cyber-physical attack through an ICS was the 'Stuxnet.''' It was a computer virus that was used to attack Iranian centrifuges in 2010. By hacking the Iranian nuclear facility's ICS, the centrifuges were made to operate incorrectly, causing extensive damage.

The fears of a massive cyber security breach don't only rest in the Pentagon. Just yesterday, Attorney General Loretta Lynch said on ABC's ''This Week'' that a cyber attack by the Islamic State is one of the terrorist group's biggest emerging threats to our country. In fact, during the interview, Attorney General Lynch noted that the terrorist group now boasts over 20,000 English language Twitter followers. Our country's most sensitive data can be in the hands of our enemies at the mere click of a button or press of a screen.

As I speak today, we have yet to obtain answers from the Obama administration on the scope and the perpetrators from the massive hack at the Office of Personnel Management. This attack has paralyzed the Obama administration. They haven't put in place any real, meaningful reforms at OPM. I have called for Chief Information Officer Donna Seymour's resignation since June 24. Yet she still remains in her post and we still don't have any concrete answers for the 21 million-plus Federal employees who were victims of this attack.

We must do more. We must act more quickly and more nimbly than those seeking to wage a terror attack on our Nation's cyber security infrastructure.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. THUNE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THUNE. Mr. President, I rise to speak about the freight division of the DRIVE Act, the highway transportation bill that is under consideration before us at the moment.

The freight provisions represent the combined efforts of both the Commerce Committee, which I have the honor of chairing, and the Committee on Environment and Public Works. To create this division, we incorporate a number of provisions from legislation offered by Senator CANTWELL, Senator MARKEY, Senator BOOKER, Senator MURRAY, and the administration's GROW AMERICA Act proposal. We worked very hard to incorporate and make this a bipartisan product. We took into consideration suggestions that were made by our colleagues, many of whom serve on the Commerce Committee and some who don't, but we got to a point where we feel as if we had a good product that incorporates the best ideas—not everything, obviously, that everybody wanted but that addressed many of the issues that pertained to our particular part of this legislation.

The language included in the Commerce Committee's freight program also drew from recommendations made by the Department of Transportation's nonpartisan National Freight Advisory Committee—another entity we looked to and consulted with respect to these particular provisions of the bill.

Because of our Nation's vast transportation network, freight can move by rail, it can move by aircraft, it can move by truck, and it can move by ship. It is multimodal. Under the bipartisan legislation before the Senate, freight-planning efforts will be concentrated under the Secretary of

Transportation. This is to reflect the multimodal nature of how goods are transported and to ensure the involvement of various agencies which regulate different forms of transportation is properly coordinated.

Because freight moves from truck to rail to port, freight planning must consider these connections, and it must include the development of a strategy to expand capacity and to increase efficiency to meet growing demand. This is especially true when it comes to focusing infrastructure investment decisions. Growing demand indicates and fuels a growing economy. We need a plan to handle the significant growth of freight traffic we expect in the coming years.

The Department of Transportation notes that, by 2040, our transportation system is projected to haul an additional 9 billion tons of freight. That represents a 45 percent increase over what we move today. As our economy recovers and continues to grow, we will continue to need additional freight infrastructure. The freight network serves our import and export needs and is a critical element of our economic competitiveness.

Bottlenecks and delays have significant economic cost. Freight is, by nature, not just a highway problem. Airports, ports, and railroads connect farms, manufacturing centers, and the markets they serve.

Freight needs are not just urban issues. They are also very important for rural America. Advancing agricultural freight projects is necessary for the economies of many States, so ensuring planning and funding for these projects is also critical. Keeping freight transportation costs low keeps American farmers competitive in the global marketplace.

In the winter of 2014, South Dakota faced significant challenges moving grain from the State due to congestion in the rail network. When the freight couldn't move, farmers weren't getting paid. Commodities faced spoilage due to a lack of available storage space.

Agriculture is the leading driver of South Dakota's economy. Delays and the significant increased costs of moving grain by rail negatively impacted the pocketbooks of many of the farmers in my State. This, in turn, reduced Main Street's bottom line as well.

More recently, the West Coast port slowdowns delayed shipments to and from stores in South Dakota and across the country. Agricultural products for export were delayed, and imports of products from lumber, medical supplies, and automobiles to basic retail goods were delayed. This was an unforced error that harmed our economy for way too many months.

This labor strife underscored the interconnected nature of our transportation system and how vital our freight infrastructure is to each and to every State in this country. In fact, the resulting strife was widely cited as a contributing cause of the U.S. economy actually shrinking in the first quarter of 2015.

Protecting our competitiveness is at the core of this legislation's freight program that was developed between the Commerce, Science, and Transportation Committee and my colleagues on the Environment and Public Works Committee.

Planning for and fixing our freight network will create and maintain jobs over the long term. Reducing delays and lowering the price of freight transportation serves the entire supply chain and, ultimately, the American consumer.

That is why the freight division in the DRIVE Act is so important. The bill improves the planning process, engaging States and stakeholders to help plan for future freight needs. States will provide a forward-looking plan to address these freight needs step by step. These plans will develop investment strategies and prioritize projects for funding.

The bill's consolidated strategy that plans for both highway projects and multimodal projects is a significant improvement over what we have today—or the status quo. In addition, the Environment and Public Works Committee developed a highway trust fund formula program that will support critical projects in every State. In the first year alone, the bill provides $450 million of grant funding to assist with these critical investments.

Projects to improve rail grade crossings, port facilities, and connections between freight modes of transportation will have access to these new resources. This will reduce the time and the cost of moving goods.

The Coalition for America's Gateways and Trade Corridors noted that the planning and strategy outlined in the bill is ''a significant step forward for multimodal freight planning and policy.'' The American Association of Port Authorities says: ''Elevating a policy for freight within your legislation sends a strong message that freight must continue to be a priority and that planning, funding, and the establishment of a multimodal freight network are critical for the economic growth of our nation.''

Mr. President, I ask unanimous consent to have printed in the RECORD the full statements of these two organizations I just mentioned.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

GOODS MOVEMENT COALITION APPLAUDS COMMERCE FREIGHT POLICY, CALLS FOR FREIGHT FUNDING

(By Executive Director Elaine Nessle)

WASHINGTON, DC.—Yesterday the Senate Committee on Commerce, Science, and Transportation approved a six-year transportation bill, the Comprehensive Transportation and Consumer Protection Act of 2015, S.1732. Included in the bill is a freight chapter, providing a focus on multimodal freight planning and policy.

The Comprehensive Transportation and Consumer Protection Act of 2015 is a significant step forward for multimodal freight planning and policy. I commend Chairman Thune and the Committee members for developing policy that incorporates the many modes of transportation that move freight. The proposal contains several policy objectives held by the Coalition for America's Gateways and Trade Corridors, including creation of a multimodal national freight policy and the call for designation of a multimodal national freight network to inform transportation planning and improve investment decision making.

While this proposal is a step in the right direction, dedicated freight funding is necessary to make targeted system improvements. The Coalition has long called for a minimum annual investment of $2 billion in addition to current programs of funding. A freight investment grant program, with multimodal project eligibility that distributes funding on a competitive basis, is needed to make strategic investments. Businesses and agricultural producers rely on our national multimodal freight system to move goods to market and support growth. To remain competitive in the global market place, we must invest in the system that moves our nation's commerce.''

Demonstrating the large number of projects that stand to benefit from a competitive grant approach, CAGTC published in April a booklet titled ''Freight Can't Wait.'' The booklet contains a sampling of significant freight infrastructure projects that could be realized with federal resources, like funding distributed through a competitive freight investment grant program.

AMERICAN ASSOCIATION OF PORT AUTHORITIES,
Alexandria, VA, July 23, 2015.

Hon. JOHN THUNE,
Chairman, Committee on Commerce, Science and Transportation, U.S. Senate, Washington, DC.

Hon. JAMES M. INHOFE,
Chairman, Committee on Environment and Public Works, U.S. Senate, Washington, DC.

Hon. BILL NELSON,
Ranking Member, Committee on Commerce, Science and Transportation, U.S. Senate, Washington, DC.

Hon. BARBARA BOXER,
Ranking Minority Member, Committee on Environment and Public Works, U.S. Senate, Washington, DC.

DEAR CHAIRMAN THUNE, CHAIRMAN INHOFE, RANKING MEMBER NELSON AND RANKING MINORITY MEMBER BOXER: On behalf of the American Association of Port Authorities (AAPA) I want to thank you for your leadership on the freight policy and funding provisions included in Division D of the DRIVE Act (H.R. 22) that will be considered on the Senate floor over the next week.

AAPA is the unified and collective voice of the seaport industry in the Americas. AAPA empowers port authorities, maritime industry partners and service providers to serve their global customers and create economic and social value for their communities. Our activities, resources and partnerships connect, inform and unify seaport leaders and maritime professionals in all segments of the industry around the western hemisphere. This letter is on behalf of our U.S. members.

The approach of grouping the Environment and Public Works and Commerce Committees' jurisdictions into one division within the DRIVE Act is a positive step forward. This grouping reinforces a top AAPA priority—that freight policy must be integrated as well as intermodal in order to be efficient, safe and secure. In the past, freight policy and funding measures have been fragmented.

Elevating a policy for freight within your legislation sends a strong message that freight must continue to be a priority and that planning funding and the establishment of a multimodal freight network are critical for the economic growth of our nation.

We look forward to continuing to work with you on building the freight provisions in the DRIVE Act as the legislation moves forward.

Sincerely,

KURT NAGLE,
President and CEO.

Mr. THUNE. Mr. President, the legislation before the Senate is a critically important part of addressing our Nation's current and future transportation investments. As Senator CANTWELL often says: Freight can't wait.

The DRIVE Act includes these critical freight provisions that will help our economy and lead to job creation. Strengthening our freight program is yet one more reason to support this legislation.

Mr. President, I hope before all is said and done in the Senate we will complete action on this legislation this week and get many of these provisions, which are so important to our economy, so important to jobs, and so important to America's competitiveness, passed into law.

Of course, first we have to get action by the House of Representatives in order to get it to the President's desk, but the work that has gone into this is the product of a lot of various Members and committees, those from the stakeholder community offering their input and consultation to get us to the point we are today where I think we have a product we can be proud of and that we can say actually will help address the freight challenges and the needs we have across this country and make our economy even more competitive.

Mr. President, I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PORTMAN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 2327

Mr. PORTMAN. Mr. President, I rise today with regard to one of the parts of the highway bill we are talking about, and that is the Export-Import Bank, otherwise known as Ex-Im.

I rise today as somebody who feels strongly we need to have a long-term highway bill. I am glad we are on the floor with that because it is about jobs and crumbling infrastructure. I am also pleased that within this bill there is some regulatory reform on the permitting process, and I thank the authors for including my permitting reform bill. But I also am pleased by the fact we also voted to add as an amendment the reauthorization of this Bank called the Export-Import Bank.

If I may, let me talk about why this is so important to Ohio jobs and to jobs around this country and to keeping our economy from falling behind. Some people say: Well, why do we need the government involved in this business of providing financing or credit to companies that do business overseas? Well, frankly, it is because often these are relatively high-risk ventures, so companies cannot get the credits, the guarantees or the loans from private-sector companies.

I will give a few examples of this in a minute, but it is also because of the fact that other countries all over the world have these export credit subsidies. In fact, we are pikers. We have a lot less than our competitors. On average, our competitors do a lot more in terms of supporting their exports than we do.

So we need to have this in order to ensure that we don't lose jobs in this country. By our unilaterally saying we are not going to help our companies to export, we are shooting ourselves in the foot.

Now, if these other countries around the world were to say, you know what, we are going to back off on our export financing, that would be great. When I was U.S. Trade Representative back in the Bush administration, that is what I pushed for. I think we should be getting rid of these subsidies.

By the way, also in terms of agriculture subsidies and others, if there were a level playing field, where our competitors were not doing this, it would be a different world. I will note one thing I like about the amendment that was adopted—or at least the cloture vote here and the amendment that is likely to be adopted to this bill on the Export-Import Bank—is that it requires, as one of the reforms—and, yes, I think it should be reformed—that the administration begin the process of an international negotiation to get rid of these export subsidies all over the world.

In the meantime, if we as the United States of America say unilaterally that we are going to stop these export subsidies through this financing mechanism, we are going to lose jobs. It is not just we are not going to create jobs that would be otherwise created by these projects, it is the fact that some companies will actually move overseas to take advantage of the export subsidies in other countries. They have told me this, and I am sure they have told other Senators this, and Senators know this.

I view this in pretty simple terms: No. 1, this program actually puts money back into the coffers every year rather than taking money out. I think it added about $650 million or so to our surplus last year. Over time it has added billions of dollars, so it is not costing taxpayer money. It brought $7 million in profits to the U.S. Treasury since 1992. Last year it generated $675 million in profits, and by the way, it created 164,000 jobs and $27 billion in exports. So No. 1, it is not one of these government programs that is costing the taxpayer.

No. 2, other countries are doing it, and if we don't do it, they will continue to do it and we will lose out on jobs, on contracts. I am told, for instance, that right now, while this program is in flux—where we are not sure whether it will go forward or not because it has already technically expired—there are 100 transactions sitting in the pipeline worth more than $9 billion, and those transactions won't go forward unless we take action. So again, this is one where the United States of America would be shooting itself in the foot by saying we are not going to expand exports to the detriment of our workers.

Then No. 3, yes, we ought to get busy on reforms to the Export-Import Bank, to make it more transparent. I think that is good. One of the reforms in here, as I said earlier, is to ensure the President submits a strategy for ending government supported export subsidies internationally. The Obama administration should be more aggressive at that. I believe that is appropriate, and they should be doing it.

By the way, it also creates a risk management committee to oversee the Bank's risk exposure. It also sets up a new nonpolitical chief ethics officer to provide oversight with regard to the ethics practices of Bank employees. That is all important, and I support all those reforms. I could probably support some more, too, but let us not shoot ourselves in the foot and lose these good-paying jobs we have in this country.

I view it frankly a lot like the trade debate we just had. What we want to do in trade is have a balance, where we are sending more exports overseas, creating more jobs in this country—in my State of Ohio, in the Presiding Officer's State of Indiana, and other States around this country—at the same time leveling the playing field by increasing our enforcement and stopping the unfair imports from other countries—the dumping and the subsidies.

In the trade bill—we talked a lot about this over the last month—we actually got in place a new amendment to help companies be able to deal with unfairly traded imports, to get a remedy right away, and it is already working. SHERROD BROWN, my colleague from Ohio, and I put together an amendment. It is part of the trade bill that was passed. Already, tire workers in Ohio, United Steelworkers union employees in Ohio have been able to take advantage of that because they got a positive determination from the International Trade Commission, in part because we gave them better tools. We improved the law to be able to more easily show they have been injured by these unfairly traded imports that are sold below cost or dumped or subsidized and so that they can get the relief needed to avoid losing so many jobs that they go out of business.

That is one thing we ought to be doing to expand exports—more trade. Another thing we ought to be doing is ensuring we aren't pulling back on this

export financing—again, it doesn't cost the taxpayers anything—at a time when we are under-exporting compared to what we should be doing as a country.

When we look at our exports per capita in the United States of America, I think we are somewhere between Tonga and Ethiopia in terms of our exports per capita. Other countries depend a lot more on trade than we do.

We need to export more. Why? It creates good jobs—jobs that pay 13 percent to 15 percent more on average and offer better benefits. The last thing we want to do is to pull the rug out from under these exporters by saying we are going to change the law to make it even harder to export and put American workers at a disadvantage vis-a-vis the rest of the world.

It is the same thing with regard to trade policy, generally. Let's expand exports by opening up markets for our products through good trade agreements, and let's enforce the laws and increase the enforcement, as we did with regard to the amendment I talked about earlier. That makes it easier for those tire workers at Cooper Tire in Ohio and around the country to be able to say: This isn't fair. The Chinese tires—in this case—are coming in under cost and are being subsidized. We want our government to stand up for us so we can compete and so we can export more of our product.

So if we were not to allow this Export-Import Bank to continue, it would be running counter to everything we just did in the trade bill. We want more exports.

The final thing I have to say, again, is if we don't allow American companies to compete globally as American workers making products here in America, some of these companies are going to go overseas. A lot of them already have production overseas. Let's be honest. A lot of these U.S. multinational companies make things all over the world on two, three, four continents. They can shift production overseas, and then they take advantage of the export guarantees in that country. That is what some of them have told me they are likely to do if we don't have an export guarantee in this country and we don't do anything about the international situation, where these other countries do more than we do.

That reminds me of another topic we ought to be taking up here on the floor of the Senate, and that is tax reform, because our Tax Code does the same thing. Our Tax Code says to an American company: You can't compete fairly. You have to compete with one hand tied behind your back. It is the American workers who are hurt by this because our tax rate is so high. Because of the way we tax internationally, we make it an advantage to be a foreign company. That is why so many U.S. companies are becoming foreign companies. Last year there were twice as many transactions in dollar terms—twice as many as the year before—of foreign companies taking over U.S. companies, driven largely by our inefficient and out-of-date Tax Code.

So if we combine all of these—if we combine what is going on with trade, if we combine what is going on with our tax system—we certainly don't want to put our workers at a further disadvantage by pulling the rug out from under them with regard to this export financing. Yes, let's try to get the rest of the world to do the right thing. But in the meantime, let's not shoot ourselves in the foot.

On many of these projects overseas, there is a de facto requirement that you have to have financing from a government. All these other countries provide it. So whether in Africa, Asia or in some of these other emerging economies, they say: Where is your financing? This is why, as I said, there are about 100 projects in limbo right now.

Let me talk about some of the companies in Ohio that benefit from this Export-Import Bank—again, this bank that actually puts money back into the coffers every year. I have talked to these companies, and I have talked to the workers on the line whose jobs are at stake because of what we are going to decide here in this body.

One is U.S. Bridge. They are in Cambridge, OH. They have been manufacturing and building bridges in America and around the world for 81 years. They are quite a success story. Their global business depends on the financial guarantees of the Export-Import Bank. They can't compete in bidding for these projects around the world without it. Recently, they got a $100 million contract to build bridges in West Africa, but it was immediately put in jeopardy after they got it because Congress refused to move on the Ex-Im Bank one way or the other. We just allowed it to expire without even voting on it. That is one of those projects currently in limbo. They have 150 employees in a very small county with high unemployment in Eastern Ohio.

If they get this job we talked about to build bridges in West Africa, they say they can add up to 50 new manufacturing workers with this one contract. That is a big deal for a family-owned company that has been a cornerstone of the eastern part of Ohio in the small town of Cambridge, which has 10,000 people. That is 50 jobs right there, in a small town in an area of Ohio that has high unemployment, that are at stake if we don't move on Export-Import Bank.

Let me talk about McGregor Metalworking in Springfield, OH. I know a lot about the McGregor family because they are distant cousins of mine. My family was the McCullough family. They came to Springfield from Scotland.

The McGregors run a company that is a staple of the community. They are pillars in the community. They have skilled trade jobs. The workers there get good pay and good benefits. However, they are very concerned about what is going on with the Ex-Im Bank. More than 60 workers at McGregor work directly on products that depend on Ex-Im financing. That is about 16 percent of McGregor's sales. They are not a big company, but they are a really important company to that community, to those workers, and to their families.

So to the people who have stood up on this floor over the last couple of days and said this is not about jobs, this is about jobs, folks. This is not just about big businesses. Yes, it is about them, and that is important too. We want those jobs here as well. It is also about a lot of small businesses.

I recently spoke to some of the workers at McGregor. They told me there are a lot of manufacturing issues they just can't control—their health care costs, which are going up. ObamaCare has not helped. It has made it worse. In Ohio, they are told their costs are going to go up between 10 percent and 33 percent next year. That is what the insurance companies have told them. The price of steel goes up and down. Sometimes it is tough to get the skills to be able to compete and to get these jobs in places such as McGregor. Those are things that are out of their control. But Ex-Im is something they know we can control, and they are wondering why we are making it even more difficult and less predictable for them by not acting.

Let me talk about another small business in Hamilton, OH, called Kaivac. They employ 50 people. They manufacture commercial cleaning machines used to clean floors in schools, museums, stadiums, and airports. They are a kind of modern-day mop and pail.

With the help of Ex-Im, Kaivac grew its international sales by 60 percent last year, exporting their commercial cleaning machines all over the world. But as we have heard repeatedly, this is another company that said they can't do that in the future if they don't get this financing from Ex-Im.

So what will happen to these companies? For a lot of these smaller companies, they will just lose business, and they will lose jobs. They will lose the jobs they already have, and they won't be able to gain the jobs we have talked about today.

For some of the bigger companies, they will be OK. They will move overseas. Frankly, I am not worried about the companies. I am worried about the workers in Ohio—American workers who work hard, play by the rules, and do all the right things. We are going to pull the rug out from under them. That doesn't make any sense to me. We need to stand up for these American workers. Whether it is with regard to trade or whether it is with regard to taxes, as we talked about earlier, Washington is letting them down. We are not doing the basic things we ought to be doing to create the environment for success to allow them to be able to compete and to win.

Today we have the opportunity to stand with American workers. We have the opportunity to move forward—yes, with regard to trade, knocking down barriers to our exports, making sure there is a more level playing field, including the amendment we talked about earlier that allows us now to bring trade cases and get results and help American workers. We have to be sure that we do reform this Tax Code, because if we don't, more American companies and investments are going to go overseas. That is our job. We are letting the American worker down right now.

I see Senator SCHUMER here on the floor. Senator SCHUMER has been working on this international tax reform issue, and his point is a very simple one: We want the jobs and investments here. We are tired of seeing companies get taken over by foreign companies and move their jobs to those other countries. We saw this recently. A pharmaceutical company got bought by a foreign entity. By the way, the foreign company had just left America. They inverted to another country. They then came back and started buying American companies. One third of the workforce of that company bought by the foreign company is now gone—Raleigh, NC, to Canada.

So these are things we can do. It is within our control here in this body for us to pass these kinds of bills and, with regard to Ex-Im, to ensure that we are not shooting ourselves in the foot and shooting American workers in the foot by taking away their opportunity to, yes, win these bids, to win these competitions, to build that bridge in West Africa, to send those cleaning supplies all over the world, to be able to ensure, with regard to McGregor Industries, that the parts they put into those locomotive engines that get sent to developed countries and developing countries can continue to grow.

Our job here is not to make life harder for these workers and these small companies. It is to make it easier for them to compete and to win so that we can begin to bring back not just more jobs but better jobs.

Over the last 6 years, we have seen wages flatten out and on average go down. Economists tell me it is about a 6-percent reduction in real wages. Think about that. This at a time when health care costs are up, in part thanks to ObamaCare, which makes it harder, not easier, to get health care at a reasonable cost. Education costs are up. Electricity costs are going up, in part because of the regulations that the Obama administration is putting on the economy in my home State of Ohio and around the country. That is called the middle-class squeeze. Wages are flat and declining, and expenses going up. That is what the people I represent are experiencing.

Let's not make it more difficult for them. Let's stand up for American workers. Yes, let's tell the Obama administration, as this legislation does: You are required to put more pressure on the international community and other countries to reduce their export subsidies, their guarantees, their credit agencies. But in the meantime, let's be sure we are standing up for the people we represent and doing the right thing for the American worker.

I yield the floor.

Ms. MIKULSKI. Mr. President, I support the reauthorization of the Export-Import Bank and support American manufacturing, because a country that doesn't make something can't make something of itself.

I have seen everything manufactured in Maryland, from crab cakes on Kent Island and ice cream in Laurel to commercial truck engines in Hagerstown and unmanned aircraft in Hunt Valley. I have met with innovative manufacturers who credit the Export-Import Bank with helping them grow their businesses by exporting to new markets overseas.

Through critical assistance, at no cost to taxpayers, these small and medium-sized businesses are able to sell American products around the world.

I visit businesses all over Maryland. I have visited bakeries, microbreweries, factories of small machine tool companies. I visited Main Street, small streets, rural communities. And I have talked with business owners and their employees.

These are ''good guy'' businesses. They work hard and play by the rules. They have jobs right here in the U.S. They want to expand. They want to hire. They need a government on their side and at their side.

Some business owners I met with said that the secure financing at the Export-Import bank helped them strengthen their business and grow.

Selling your products overseas isn't as simple as selling them locally. But getting secure credit insurance helped Maryland manufacturers that relied on cash-in-advance payments for exports expand their businesses by exporting to new markets.

Other business owners I met with said that the Export-Import Bank was a lifeline during a difficult economy. They told me that they relied on private financing before 2008, but during the credit crisis even safe investments couldn't get help from the private sector. The Export-Import Bank helped them weather the storm.

The Export-Import Bank provides critical direct loans and loan guarantees to foreign buyers of U.S.-made goods. The Export-Import Bank also provides working capital loans to small businesses that are exporting. And it provides insurance for exporters in case a foreign buyer fails to pay.

In all these cases the bank is filling gaps in the private market. It is an important tool for U.S. companies that are seeking to compete with foreign firms, and those foreign firms often get aggressive trade financing support from their own national governments.

On July 1, 2015, the authorization for the Export-Import Bank lapsed. Right now, the bank is unable to process applications or engage in new business. The bank cannot authorize any new transaction to do any new lending or help any businesses with any new exports. That puts American jobs at risk. American businesses and workers are missing new opportunities because they can't get the new financing they need to close the deal and make the sale abroad.

A vote to support the Export-Import Bank is a vote to support American manufacturing jobs. Reauthorizing the Export-Import Bank means Maryland will be able to export more, manufacture more, and create more jobs.

The Export-Import Bank helped over $27 billion in export sales in fiscal year 2014 and supported 164,000 jobs nationwide.

Nearly 90 percent of the transactions done by the Export-Import Bank directly supported small businesses.

From 2007 to 2015, the Export-Import Bank financed $2 billion in exports from Maryland.

The Export-Import Bank is about helping Main Street. It is about helping the entrepreneurs with a dream in their heart, with a small business underway, with the grit and determination to be able to create a job for themselves and for others.

I call upon my colleagues to think about where America is going in the 21st century. Where are we going to be? Are we going to create more opportunity? Are we going to create more jobs that pay good wages with good benefits?

I am proud to stand firm in my commitment to manufacturing jobs from Hagerstown to Stevensville and from Baltimore to Easton.

Mr. PORTMAN. I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. LANKFORD). The clerk will call the roll.

The senior assistant legislative clerk proceeded to call the roll.

Mr. SCHATZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCHATZ. Mr. President, I ask unanimous consent to speak for up to 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

CLIMATE CHANGE

Mr. SCHATZ. Mr. President, the facts are undeniable. Climate change is real, it is caused by humans, it is happening now, and, it is solvable.

Today I would like to talk about a noncontroversial way to reduce 10 percent of the world's carbon pollution: fighting deforestation.

Of course, no single action will solve climate change, but stopping deforestation is underrated as a solution, with a high impact and a low cost. While we have been on this floor for years in an intense, often partisan, debate over pipelines and the EPA's rules on coal-fired powerplants, forest conservation

is an area where we have always had strong bipartisan support.

As forests are cut down, two things happen. First, carbon stored in trees is released. Second, the trees stop absorbing carbon from the atmosphere.

Each year, the world loses forests the size of Ohio, and that rate is increasing. Unless we act, an area twice the size of Texas will be lost by the year 2030.

Of course, most deforestation is happening in tropical forests, in the Amazon, the Congo River Basin, and in Southeast Asia. But global demand, including demand from the United States, for palm oil, soy, beef, and timber products greatly contributes to forest loss in these regions.

This is why the United States has to lead in stopping deforestation. There are three things that we can do: First, we have to fully implement and fund the Lacey Act. This law prohibits the import of illegally harvested wood products but has only been in place since 2008. Congress hasn't given the USDA and other agencies the tools to fully implement it. We are good at catching raw products like lumber from illegally harvested forests, but we still need more tools to catch illegal wood, which is in processed products such as furniture.

Full enforcement of the Lacey Act could keep 27 million metric tons of carbon pollution out of the atmosphere each year. This is equivalent to the emissions from more than 5 million cars every year. The Lacey Act is also good for the U.S. timber industry because illegally harvested wood products undercut this industry by $1 billion in 2013 by reducing the competitive advantage of legal timber.

Second, we have to support private sector commitments to stopping deforestation. We have had some recent very good news in this space. Driven by consumer demand, 34 corporations recently committed to cutting deforestation from their products in half by 2020 and ending it by 2030. These are big companies—Walmart, McDonald's, and Unilever, among many others. These businesses were joined by 35 governments, 16 indigenous groups, and 45 NGOs. This was the first time that leaders from developed and developing countries have partnered around a timeline for ending deforestation.

One challenge in meeting these commitments is that we don't have a robust standard to verify that they are being met. Without this, we are merely taking everyone's word for it, but the United States can lead in monitoring and verifying these commitments. Publicly available satellite imagery from NASA and USGS has already allowed forest scientists to measure the magnitude of global deforestation, but we still need more accurate, real-time monitoring of the carbon content in forests, and the technologies do exist.

Finally, we have to provide forested countries with technical and financial support to protect and grow their forests. Absorbing carbon with trees is more cost-effective and more energy efficient than doing so from coal or gas powerplants. This is because trees capture carbon using energy from the Sun and powerplants capture carbon using additional energy from a powerplant.

Despite the ability of forests to capture and store carbon, we can't just tell landowners to stop cutting down their trees. They are often in a very dire financial situation on a personal level. We have to share with them our expertise in sustainable forest management—how to prosper from a forest without cutting it down and moving on to the next stand. The State Department, USAID, and USDA bring sought-after knowledge in this area from how to fight forest fires to how to combat illegal logging.

We also have to provide financial incentives for landowners to protect their forests. The economic benefit of forests is real. They store carbon, filter water, keep soil healthy, and protect against erosion.

The value of a forest's ecological services, not just its raw materials, must be recognized in the global economy. REDD-plus programs—shorthand for reducing emissions from deforestation and forest degradation—provide a mechanism for financially rewarding countries that reduce emissions from deforestation. If we want to lead in solving climate change, we have to contribute our fair share to these programs.

Thankfully, forests in the United States absorb more carbon than they release. However, the U.S. Forest Service estimates that the loss of forests through urban growth and wildfires could make our forests a source of carbon pollution as soon as 2030. We have to ensure that our forests continue to absorb more carbon than they release and work with our allies to protect our forests abroad.

We have solutions on climate change. Stopping deforestation is one of them, and it is one of the solutions I am most excited about because it is an opportunity for bipartisan work. We know what we need to do, and we know how to do it.

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The senior assistant legislative clerk proceeded to call the roll.

Ms. MURKOWSKI. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Ms. MURKOWSKI. Mr. President, we have been discussing the value of having a multiyear transportation bill, a highway bill moving through the Senate. It is something that I, too, would like to see, but as with everything that we do around here, it is important how we do it. When you have a multiyear highway bill, it is important to ask the question, how are we paying for that?

One of the considerations that is in front of this body is to pay for $9 billion of this multiyear highway bill through a selloff of crude oil from our Strategic Petroleum Reserve—SPR.

I have come before this floor several times already during this debate to try to convince colleagues that this is exactly the wrong way to address our transportation priorities by selling off a national energy security priority; basically, an insurance policy that we have for this country, an insurance policy to ensure that at the time that we might be most vulnerable with our energy supplies, we have reserves, we have a safety net we can turn to in the event of an emergency brought about by a hurricane or natural disaster or whether it is a manmade disaster, war or something else that has caused global disruption.

In short, it boggles my mind that we would be willing, so willing and almost eager, to tap into this strategic asset for such short-term and limited gain. In the absence of supply disruption that justifies releasing oil from the SPR, selling our strategic reserves only worsens an existing competitive disadvantage for our American oil producers.

As you know, we have in place an outdated 40-year-old-plus ban on our ability to sell our domestic crude oil overseas. We are limited in our ability to export that. I think that is a wrong and outdated policy, and I am working with many, including the occupant of the chair, to lift this outdated policy. I have introduced legislation to do just that. We will actually have a bill before the banking committee tomorrow to, again, shed some light on the fact that it is so incredibly inconsistent from a policy perspective that we would be talking about lifting the sanctions on Iran, allowing Iran to access the broader global market so they can sell their oil reserves, so they can take advantage of the resources that will come to them to do who knows what mischief, while at the same time prohibiting, further prohibiting in this country our oil producers that opportunity to access the global market. By lifting the sanctions on Iran and keeping the oil export ban in place in this country, we are effectively sanctioning our own U.S. oil producers. That is wrong. Again, we are working to address that.

We are in a situation currently in which American companies cannot sell oil to the same countries that we let Iran sell its own oil to. Now, with this proposal in front of us to sell off some 101 million barrels of oil from the SPR, we are potentially going to saturate a market that is already oversupplied. Think about what that means to those in Oklahoma where the rig count in this country right now is down by half of what it was just last year. We are at a 5-year low with that. Our market is oversaturated.

This morning I introduced yet another white paper out of the energy

committee. It is entitled ''A Turbulent World: In Defense of the Strategic Petroleum Reserve.'' This white paper outlines some of the history behind the SPR, why I feel so strongly and why I will continue to come to this floor to oppose the sale of 101 million barrels of oil from the SPR to pay for a portion of this highway bill.

Let's take a look at the history of when we have had emergency drawdowns. We have had exactly three emergency drawdowns ever. The Strategic Petroleum Reserve has been in place since the mid-1970s. We had a drawdown in 1991 with Desert Storm. We had a drawdown in 2005 when Hurricane Katrina hit and then in Libya in 2011 during their civil war.

This red right here is the 101 million barrels that this legislation seeks to sell off—101 million barrels. The total amount of sales from emergency drawdowns ever combined is 58.9 million barrels.

What we are talking about doing is, in one act, taking 101 million barrels and putting it out there on the market. In the 40 years that we have had access to reserves in the Strategic Petroleum Reserve, we have had three emergency drawdowns—one, a hurricane and, two, in the event of disruption for war, and together, all three of those totaled just shy of 60 million barrels. Yet this proposal is 101 million barrels.

We have exchanged oil out of the SPR a total of 12 times. This was in Hurricanes Isaac, Katrina, Lili, Ivan, Gustav, and Ike. We have created a home heating oil reserve. We have closed some ship channels for accidents. We have imported oil from Mexico. All of those exchanges, not drawdowns, but all of those totaled only 68.9 million barrels. Again, we are talking about a 101-million-barrel sale. We have also done test sales. We have done three test sales. In 1985, in 1990, and then in 2014. We have also closed down a reserve site—Weeks Island. We have sold off some barrels for that. The total for all of that activity was 15 million barrels for all four sales.

I have had people tell me: Oh, don't overreact here; don't overreact. This is no different than what we did with the two sales in 1996 for Federal deficit reduction.

Let's look at that chart. In 1996, we had a deficit reduction in May, which is shown in blue, and then in October we did further reductions, and that is shown in green. Both of those sales totaled 23 million barrels. Again, back in 1996, there was a total of 23 million, and what we are looking at with this legislation is, again, a selloff of 101 million barrels. That is not even a fair comparison. Selling 101 million barrels would be the equivalent of 60 percent of all of the oil that has ever left the SPR.

We have effectively taken out a total of 161 million barrels and moved that out of this SPR since it was created in 1975, about 40 years ago. We have had three emergency drawdowns, we have had the exchanges I talked about, we had test sales, and then we had the sales in 1996 with the Federal deficit reduction. If we take all of that together—everything in the history of the Strategic Petroleum Reserve that we ever sold off or exchanged—it brings us to 161 million barrels, and now we are talking about selling 101 million barrels, which is 60 percent.

I think it is important to put into context because this is a big fat deal. Yet we are acting like this is just another withdrawal from your ATM. Just go down, check the balance, there is enough money in there so it must be OK.

Let's talk about the strategic environment we are operating in right now. There is a nominal drawdown capacity of 4.4 million barrels per day. I mentioned this the last time I was on the floor. The drawdown capacity is subject to some discussion in terms of what we are actually able to pump out, and that is why we do test sales. It is to make sure it works as it was designed.

Secretary of Energy Moniz has suggested that our distribution rate—our ability to move this once we take it out—is significantly less than this nominal drawdown capacity of 4.4 million barrels due to congestion and changes in midstream infrastructure. This is one of the reasons I have been banging the lectern, and Senator CANTWELL, the ranking member on the energy committee, has also been joining me in saying that doing this is not appropriate. We have significant maintenance issues within the SPR that we need to address. There is somewhere between $1.5 billion and $2 billion that it is going to take to address some of the shortcomings we have in the SPR, some of the maintenance and operations aspect of it. As we speak, there is a study underway to determine the right size of the Strategic Petroleum Reserve. What do we need to do in terms of maintenance?

If we go ahead and sell off 60 percent of what we have done historically throughout the whole lifetime of the SPR to fund a highway bill for 6 years—again, it just causes one to wonder why we are doing this because of the strategic environment and the drawdown capacity we have.

We have a pretty volatile world out there, and I think we all know that. We have unplanned disruptions, unplanned production outages, if you will, in Saudi Arabia, Kuwait, Iraq, Nigeria, Libya, and Iran. These are around 2.5 to 3 million barrels per day. These are pretty tense regions of the world, and I don't think anyone would dispute that.

On the next chart what we see is our drawdown rate of 4.4 or thereabouts is greater than the daily production of Iran, Iraq, Venezuela, Nigeria, Algeria or Libya. I don't think anybody would suggest that any of these countries in blue exudes stability or security.

Look at the transit chokepoints. A drawdown rate of 4.4 million barrels per day is bigger, in fairness, than the capacity of some of the other areas that would be clearly noted as these chokepoints. We have the Panama Canal at the end, the Turkish or Danish Straits, and Bab el-Mandab off the coast of Yemen. If something went wrong in more than one of these critical parts of the supply chain at once, we could be overtaken by upheaval in the global oil market without much recourse and our ability to respond would be dramatically lessened. And 4.4 million barrels per day is less than the oil that transships the Suez Canal and its accompanying pipeline. It is a fraction of the oil that goes through the Strait of Malacca or Strait of Hormuz which moves 15 to 17 million barrels per day.

This my central point. Our Strategic Petroleum Reserve is a tremendous national security asset, and we need it because the world is just simply more turbulent. I have been told: Look at what is happening domestically. We are importing less and producing more; therefore, we don't really need all of this. We don't need this safety net. We cannot immunize ourselves from global events and just suggest that somehow or other we need it less. It is like you go to the doctor and get a clean bill of health and you go home and you say: OK. Now I don't need life insurance or health insurance because the doctor just said I am fine. You know what. The world is not fine, and we know that. At a time when spare capacity is low and the global threat environment is heightened, selling 101 million barrels of America's strategic reserve to pay for legislation that makes almost no contribution to improving our energy security, I think, is just a foolish error of historic proportions.

I will restate what we would be doing if we moved forward with the pay-for as has been outlined. We would be conducting the largest sale in the history of the Strategic Petroleum Reserve since it was created in 1975. It would be greater than all of the previous emergency drawdowns combined. We are going into hurricane season. We don't know what may be coming at us in the Middle East. Yet we are proposing to pay for a short-term fix to the highway trust fund with a buyout of unprecedented proportions.

Last time I was on the floor, I said this is like cashing out your homeowner's insurance to pave your driveway. It is not the right pay-for.

Again, I, too, want to make sure we do right by our transportation infrastructure. It is important. It is about jobs and the strength of our economy, but we are also obligated to make sure the decisions we make in this Senate—in this Congress—are there to provide for our security as a nation.

I want to know that if we need these ready resources, we haven't moved precipitously to sell them off. The last time I checked this morning, the price of oil was at about $50 a barrel. Is this really a good time to sell at $50 a barrel?

I thank the Presiding Officer for his attention. I think those of us who have been following this issue with great interest are concerned and are conflicted because we want to make sure we do right by our highway systems, but I also want to make sure we do right by our national energy security, and selling off 101 million barrels of Strategic Petroleum Reserve is foolhardy.

With that, I yield the floor.

I suggest the absence of a quorum.

The senior assistant legislative clerk proceeded to call the roll.

Mr. MCCONNELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

LEGISLATIVE SESSION

The PRESIDING OFFICER. The Senate will now resume legislative session.

NOTICE ACT

Mr. MCCONNELL. Mr. President, I ask unanimous consent that the Committee on Finance be discharged from further consideration of H.R. 876 and the Senate proceed to its immediate consideration.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the bill by title.

The senior assistant legislative clerk read as follows:

A bill (H.R. 876) to amend Title XVIII of the Social Security Act to require hospitals to provide certain notifications to individuals classified by such hospitals under observation status rather than admitted as inpatients of such hospitals.

There being no objection, the Senate proceeded to consider the bill.

Mr. CARDIN. Mr. President, I applaud the Senate passage of H.R. 876, the Notice of Observation Treatment and Implication for Care Eligibility, NOTICE, Act. Representative LLOYD DOGGETT of Texas introduced H.R. 876. Senator ENZI and I introduced an identical companion bill in the Senate, S. 1349, which the Finance Committee reported unanimously by voice vote on June 24, 2015. This important legislation requires hospitals to give notice to Medicare beneficiaries who are classified as ''outpatient observation'' status

for more than 24 hours rather than being admitted to the hospital as inpatients. Being classified as ''outpatient observation'' status may result in higher out-of-pocket costs for Medicare beneficiaries and makes those beneficiaries ineligible for Medicare coverage of post-acute care in a skilled nursing facility after they are discharged from the hospital.

The use of ''outpatient observation'' status has become more prevalent in recent years, and the duration of these ''outpatient observation'' stays has grown longer—meaning that an increasing number of Medicare beneficiaries are spending more and more time in the hospital without being admitted as inpatients. According to the Department of Health & Human Services's, HHS, inspector general, in 2012, Medicare beneficiaries had more than 600,000 ''outpatient observation'' stays that lasted 3 nights or more.

These ''outpatient observation'' stays can have serious financial consequences for seniors. Medicare beneficiaries classified as ''outpatient observation'' status are responsible for outpatient co-payments and prescription drug costs that they would not have had as an inpatient—and there is no out-of-pocket cap on these costs. Perhaps most importantly, Medicare will only cover post-acute care in a skilled nursing facility, SNF, if the beneficiary had 3 consecutive days of hospitalization as an inpatient—even though ''outpatient observation'' patients may spend multiple nights in the hospital and receive the same type and level of care as inpatients. This means Medicare beneficiaries classified as ''outpatient observation'' status who require skilled nursing care after discharge from the hospital must pay the entire cost themselves—an average out-of-pocket cost of more than $10,000 per beneficiary.

Understandably, Medicare beneficiaries spending several nights in the hospital often simply assume that they have been admitted as inpatients. Many seniors are unaware that they have actually been classified as ''outpatient observation'' status and what that means in terms of the financial consequences for them and their families. In some cases, these seniors only become aware of their ''outpatient observation'' status after they receive a bill from the nursing home for tens of thousands of dollars.

Under the NOTICE Act, within 36 hours or, if sooner, upon discharge, hospitals are required to provide written notice to the Medicare beneficiary explaining, No. 1, that he or she has been classified as an outpatient under observation status, instead of being admitted as an inpatient; No. 2, the reason for that classification; and, No. 3, the implications on cost-sharing and eligibility for Medicare coverage of post-acute care in a skilled nursing facility.

The NOTICE Act is a no-cost, commonsense approach that will help ensure our seniors are fully informed about their hospital status and the financial implications. I thank my colleagues for joining with me and Senator ENZI to support this important legislation.

Mr. MCCONNELL. Mr. President, I further ask unanimous consent that the bill be read a third time and passed and the motion to reconsider be considered made and laid upon the table with no intervening action or debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill (H.R. 876) was ordered to a third reading, was read the third time, and passed.

RECESS

Mr. MCCONNELL. Mr. President, I ask unanimous consent that the Senate stand in recess until 9:15 p.m.; further, that all time during the recess count postcloture.

The PRESIDING OFFICER. Without objection, it is so ordered.

Thereupon, the Senate, at 6:57 p.m., recessed until 9:15 p.m. and reassembled when called to order by the Presiding Officer (Mr. BOOZMAN).

MUNCIE, INDIANA 150TH ANNIVERSARY

Mr. DONNELLY. Mr. President, I wish to honor the city of Muncie on its 150th anniversary and to recognize the many contributions of Muncie's citizens to the great State of Indiana and to our country.

Muncie's history dates to the 1790s when the Lenape Native Americans settled the area and named it Wapicamikunk. As early European settlers moved into the area, it was named Munsee Town after the dialect of the Lenape Native Americans, who spoke Munsee. When it was incorporated in 1865, Munsee Town became the city of Muncie.

The gas boom helped establish the city of Muncie as an important manufacturing center for the Nation. In 1880, the Ball brothers founded Ball Corporation where they specialized in manufacturing glass bottles. The company was moved from Buffalo, NY to Muncie in 1887 to take advantage of the ample amounts of available natural gas. The Ball Corporation provided jobs, local business funding, and philanthropy that propelled Muncie into a thriving city.

As business boomed for the Ball Corporation, new businesses opened and Muncie grew. In the early 1900s, manufacturing and industrial companies including Delco Battery, New Venture Gear, BorgWarner, and General Motors opened factories and businesses in Muncie. Muncie is also home to one of the famous early 20th century ''Middletown'' studies, which helped to measure social trends in the U.S.; Muncie is considered one of most studied communities in the country. Over the years, the city continued to grow and innovate with the addition of railroads, higher education institutions, and health care facilities.

Today, Muncie is one of the 10 largest cities in Indiana with a population of more than 70,000 citizens. Top attractions in the Muncie area include the north Walnut Street Fieldhouse, Emens Auditorium, historic downtown Muncie, the National Model Aviation Museum, the Cardinal Greenway trail system, Minnetrista Cultural Center, and Ball State University.

Ball State opened in 1899 as a small, private teacher training school. The university was founded in 1918. Ball State attracts students from around the Nation and 43 different countries, and is currently one of the top employers in the city of Muncie. Ball State is home to about 21,000 current students in undergraduate and graduate programs, and it recently experienced the largest 5-year increase in on-time graduation rates of any Indiana public institution of higher education. A report released by the Indiana Commission for Higher Education found that between 2009–2014, Ball State's 4-year graduation rates increased by 12.1 percentage points. Distinguished Ball State graduates include David Letterman, former host of CBS's Late Show and Jim Davis, creator of the iconic comic strip Garfield—recognized as the world's most widely-syndicated comic strip. With the addition of Ivy Technology Community College and Harrison College, Muncie has shown a continued commitment to higher education.

The city of Muncie reflects our Hoosier values, and its citizens serve as an example of how hard work and dedication lead to success, opportunity, and prosperity. It is a great honor to represent the city of Muncie in the Senate. On behalf of the State of Indiana, I congratulate each and every citizen of Muncie on the city's 150th anniversary and wish you continued success and prosperity in the future.

ADDITIONAL STATEMENTS

ORFORD, NEW HAMPSHIRE 250TH ANNIVERSARY

● Ms. AYOTTE. Mr. President, today I pay tribute to Orford, NH—a town in Grafton County celebrating the 250th anniversary of its founding. I am proud to join citizens across the Granite State in recognizing this historic occasion.

Orford village is the town's main population center and is situated along the Connecticut River. The town lies in the shadow of Sunday Mountain, Cottonstone Mountain, and Mount Cube—Orford's highest peak. The Appalachian Trail runs through the summit of Mount Cube, greatly contributing to the town's natural and scenic treasures.

The town of Orford is named for Robert Walpole, first earl of Orford, and England's first Prime Minister. It was originally chartered by Colonial Governor Benning Wentworth in 1761 and later settled in 1765.

The rich agricultural history of Orford is exemplified by the success of the Mt. Cube Sugar Farm. For over 60 years, the Thomson family has been producing its award-winning maple syrup from the groves located on the farm's namesake mountain.

Orford also boasts an impressive industrial past, including soapstone quarries, sawmills, a tannery, grist mill, and factories that manufactured starch, chairs, doors, boots and shoes. The town is known for its historic ''ridge'' homes and is credited with having one of the finest collections of federal-style houses in the Nation.

As innovators, statesmen and soldiers, Orford residents have been known throughout history for their commitment and sacrifice in the service of our great Nation. Early steamship pioneer Samuel Morey, U.S. Congressman Jeduthun Wilcox, Senators Gilman Marston and Leonard Wilcox, and most notably, New Hampshire's 73rd Governor Meldrim Thomson, Jr., all share ties to Orford.

On behalf of all Granite Staters, I am pleased to offer my congratulations to the citizens of Orford on reaching this special milestone, and I thank them for their many contributions to the life and spirit of New Hampshire.●

TRIBUTE TO RICHARD LAPOINT

● Ms. AYOTTE. Mr. President, today I wish to recognize the exceptional public service of my good friend, Pittsburg Police Chief Richard ''Dick'' Lapoint. Chief Lapoint has worked as a Pittsburg, NH law enforcement officer for more than 40 years. He is retiring on August 16, 2015, the day after Pittsburg's 175th Old Home Day celebration.

Chief Lapoint is a 1968 graduate of Pittsburg High School, and first began his law enforcement career as a part-time officer in August 1975. After working part-time for 11 years, he became a sergeant, and was later promoted to the department's full-time chief on January 16, 1987. Having held the position for more than 28 years, Chief Lapoint is one of the longest serving police chiefs in the Granite State.

Throughout his career, Chief Lapoint has established a reputation not only as a knowledgeable, respected, and compassionate public safety professional, but also as an engaged community member. Chief Lapoint knows that in a small town, public safety means wearing many hats. He was a member of the fire department for 36 years and an emergency medical technician for over 20 years. Known for his advocacy of cooperative North Country policing, he was a leader in uniting local, county, State, and Federal agencies to share information, train, and work together. He also served as the president of the Coos County Chiefs Association, and has built strong partnerships with colleagues throughout the public safety community.

During my time as New Hampshire's attorney general, it was my privilege to work directly with Chief Lapoint on many important law enforcement initiatives. He earned the respect and admiration of his peers across the State, and has been a thoughtful and effective leader in efforts to improve the criminal justice system throughout New Hampshire. Additionally, Chief Lapoint served on the executive board of the New Hampshire Association of Chiefs of Police, and has represented Coos County with professionalism and integrity throughout his entire membership. Making frequent trips to Concord and southern New Hampshire, he ensured that our Great Northern Woods had an important voice on public safety issues.

As Chief Lapoint celebrates his retirement, I want to commend him on a job well done, and ask my colleagues to join me in thanking him for his outstanding service and in wishing him the best in all his future endeavors.●

STENNIS CENTER PROGRAM FOR CONGRESSIONAL INTERNS

● Mr. COCHRAN. Mr. President, this summer marks the 13th year during which Congressional office interns have benefitted from a program operated by the John C. Stennis Center for Public Service Leadership. This 6-week program is designed to enhance the internship experience for exceptional college students by giving them an inside look at how Congress works and a deeper appreciation and understanding for the role that Congress plays in our democracy. Each week, the interns meet with senior congressional staff and other experts to discuss issues including the legislative process, the constitutional power of the purse, our government's separation of powers, the media, and other topics.

Interns are selected based on their college records, community service experience, and interest in a career in public service. This year, 30 outstanding interns participated in the program. Most of them are juniors and seniors in college who are working in Republican and Democratic offices in both the House and Senate, including one intern in my office, John Bartley Boykin of Meridian, MS.

I congratulate the interns for their completion of this special program. I also thank the Stennis Center and the Senior Stennis Fellows for providing a meaningful experience for these young leaders and for encouraging them to consider a future in public service.

TRIBUTE TO CALEY CLARK

● Mr. DAINES. Mr. President, I wish to recognize Caley Clark, an educator from White Sulphur Springs, MT. Ms. Clark has recently been chosen from among more than 300 other applicants to participate this week in the Library of Congress' Teaching with Primary Sources Summer Teacher Institute.

Every year, the Library of Congress hosts five teacher institutes in Washington, DC for a select number of K–12 educators from across the Nation. During the Library's Teaching with Primary Sources Summer Teacher Institute, Ms. Clark will work with education specialists and subject-matter experts about how to best utilize primary sources in the classroom. In doing so, she will explore the world's largest online collection of historical artifacts, and will be able to access millions of unique primary source documents for her work as an educator.

Teaching with primary source documents is an effective way of educating students not just about the history that these firsthand sources give us, but also helps students to develop important skills like critical thinking. Ms. Clark will have the opportunity to bring what she has learned at the Library of Congress back to her students and colleagues at White Sulphur Springs School. I am proud to call Ms. Clark a fellow Montanan, and to recognize her achievement and her contribution to the students of our great State.●

TRIBUTE TO KATIE DECKER

● Mr. HELLER. Mr. President, today, I wish to recognize Principal Katie Decker for her unwavering dedication to the Clark County School District and to the Las Vegas community. Her contributions to the local school district have had tremendous positive impacts, which will be felt by future generations of Clark County students for years to come.

Throughout her 25 years in the district, Principal Decker has worked tirelessly to give students the best opportunity for success. She currently serves as principal of two different elementary schools, Walter Bracken STEAM Academy, Bracken, and Long Elementary School, splitting her days to spend time at each individual institution. Her work at Bracken has been recognized nationally, as Bracken has been named a 2015 Merit School of Excellence. Along with this outstanding achievement, Principal Decker was awarded the Magnet Schools of America Principal of the Year in 2013, the Terrel Bell Award for Outstanding Leadership, and locally by United Way Women's Leadership for commitment to financial stability in 2015. April 15 has also been named ''Katie Decker Day'' by the city of Las Vegas. No amount of recognition could adequately thank Principal Decker for all that she has done.

When Principal Decker initially began at Bracken, the elementary school was one of the lowest performing schools in the district. She worked to improve the climate and academics of the school, spearheading the development of unique magnet programs. Bracken is now a five-star Blue Ribbon magnet school and is one of the top schools offered in the Nation. Recently, a local initiative began to incorporate techniques from highly performing schools, also referred to as franchise schools, into poorly performing schools. Principals from franchise schools were selected to lead poorly performing schools, ultimately introducing successful programs into the curriculum. Principal Decker was one of two principals chosen to participate in the initiative and has been assigned to Long Elementary School, where she is working to bring consistency to the schools she leads and greater opportunity to all of her students. It is because of her consistent academic success with her students that the franchise initiative began. Her Piggy Bank Program was utilized at Bracken and will be expanded to her Franchise School Walter Long STEAM Academy in the fall. Principal Decker has also worked to bring improvement to schools across the district by providing mentoring and administrative help. She teaches student climate classes to administrators, counselors, and teachers and has shared her leadership experience at the State of Nevada Mega Conference. She has also presented her ideas on innovative programs to schools across the country for over 10 years. Her great list of accomplishments is legendary in the Clark County community and remains invaluable to local students.

As a father of four children who attended Nevada's public schools and as the husband of a life long teacher, I understand the important role that educational institutions play in enriching the lives of Nevada's students. Ensuring that America's youth are prepared to compete in the 21st century is critical for the future of our country. The State of Nevada is fortunate to be home to an educator like Principal Decker, whose mission is to prepare our children for their futures.

I ask my colleagues and all Nevadans to join me in thanking Principal Decker for her dedication to enriching the lives of Nevada's students and congratulating her on her many achievements.●

In 2003, he was elected to the Office of Sheriff and has continued to serve the local community in this role ever since.

The D.A.R.E Law Enforcement Executive of the Year is awarded each year by D.A.R.E America and the Drug Enforcement Agency to recognize law enforcement officers who go above and beyond in drug prevention and enforcement. Sheriff Furlong reinstated the D.A.R.E Program during his first term in office and has consistently worked to improve the initiative throughout his tenure, heavily involving local schools and the community. He has expanded the program to cover several topics pertaining to positive decisions in addition to substance abuse. His dedication and commitment to shaping positive futures for Carson City students is undeniable. The efforts made by Sheriff Furlong and the Carson City Sheriff's Office are truly admirable, standing as an example to neighboring communities. Along with the award, Sheriff Furlong will receive $1,000 that he has decided to put back towards the D.A.R.E America Program.

I also commend each contributing organization that has made this important program possible, including Grocery Outlet, the Emblem Club, Northern Nevada Coin, the Elks, the Eagles, and the Downtown Business Association, as well as the local schools that have facilitated the D.A.R.E Program. Through the help of local funding, students learn about peer pressure, resistance strategies, internet use, safety, bullying, violence prevention, and the value in making wise choices. The Carson City Sheriff's Office provides numerous activities and educational opportunities throughout the year to compliment the curriculum and further inform students. This initiative is truly a reflection of Carson City's strong and dedicated community.

Throughout his tenure, Sheriff Furlong has demonstrated professionalism, commitment to excellence, and dedication to the highest standards of the Carson City Sheriff's Department. This program could not have achieved its success without Sheriff Furlong's hard work. I am honored by his service and am proud to call him a fellow Nevadan. Today, I ask all of my colleagues to join me in congratulating Sheriff Furlong on receiving this award, and I give my deepest appreciation for all that he has done to educate our local students on these important topics. I offer him my best wishes on the D.A.R.E Program and in his role to keep Carson City safe for years to come.●

CONGRATULATING CARRIE HAIR AND JAN HRINDO

● Mr. HELLER. Mr. President, today I wish to congratulate Carrie Hair and Jan Hrindo on receiving the Presidential Awards for Excellence in Mathematics and Science Teaching. These awards are truly prestigious, attained by only the most influential educators across the country. The Silver State is fortunate to have both of these successful teachers working at local schools.

The Presidential Awards for Excellence in Mathematics and Science Teaching are considered the Nation's highest honor for kindergarten through high school mathematics and science educators. These teachers stand as role models to their colleagues and are dedicated to the success of Nevada's future generations, particularly in encouraging students to pursue science, technology, engineering, and math. The first teachers to receive these awards were selected in 1983, with 108 recognized annually. These educators go above and beyond in their local schools to implement unique, high-quality curriculum to help students excel in their learning. I am thankful to both Ms. Hair and Mrs. Hrindo for their invaluable educational contributions.

Mrs. Hrindo has been very influential in the lives of students, teaching for a total of 20 years. She has spent the last 15 years at Incline Elementary and Incline Middle School, teaching a variety of different science classes. She also taught at Sierra Nevada College for several years, serving as a mentor to preservice teachers. Mrs. Hrindo currently teaches sixth grade earth science, seventh grade life science, and eighth grade Spanish. Her vast range of knowledge is truly inspirational. She is most recognized for her hands-on labs and activities that provide students with a unique learning experience and for incorporating science into her students' lives outside the walls of the classroom. She has also administrated community science events and science fair workshops. Mrs. Hrindo's work is truly commendable.

Ms. Hair has been a mathematics teacher for 15 years. Her past 4 years have been spent teaching seventh and eighth grade students in Reno at Darrell C. Swope Middle School, a highly successful magnet school. Ms. Hair was a key contributor in developing the curriculum incorporated at several middle magnet schools in Washoe County School District, which aims to enrich student knowledge at an accelerated pace. Ms. Hair is also an active member in the Nevada Math Council and the Northern Nevada Math Council and presents workshops at regional conferences. Her work is greatly appreciated.

As a father of four children who attended Nevada's public schools, and as the husband of a life-long teacher, I understand the important role that teachers play in enriching the lives of Nevada's students. Ensuring that America's youth are prepared to compete in the 21st century is critical for the future of our country. The State of Nevada is fortunate to be home to educators like Ms. Hair and Mrs. Hrindo.

I ask my colleagues and all Nevadans to join me in thanking Ms. Hair and Mrs. Hrindo for their dedication to enriching the lives of Nevada's students and in congratulating them on receiving this incredible award. I wish them well in all of their future endeavors and in creating success for all students who enter their classrooms.●

RECOGNIZING THE NATIONAL WOMEN'S LAW CENTER

● Mrs. MURRAY. Mr. President, I wish to recognize the National Women's Law Center for its longtime leadership and tireless commitment to expanding opportunities for women, girls, and families. The law center's advocacy has made a difference in countless lives for more than 40 years, and I have been proud to work with its members on many issues during my time in the Senate.

On July 30, the Coalition on Human Needs will honor the law center as its 2015 Human Needs Hero, recognizing years of research, analysis, advocacy, and litigation on a wide range of issues at the State and Federal levels. Since its inception in 1972, the law center has been a tireless advocate for women, children, families, and those Americans most in need. It has been at the forefront of many important policy initiatives and a source of insightful information that is essential to promoting and enacting good public policy.

Over the years, I have been proud to work with the law center on important programs and policies—from affordable childcare to expanding tax credits for low- and moderate-income families, increasing the minimum wage, and narrowing the wage gap. The law center's outreach and hard work have educated grassroots advocates and helped convey their views to policymakers for over 40 years—it is truly an invaluable resource.

As a determined and committed defender of the needs of women and families, the law center has earned the admiration of fellow advocacy organizations, the respect of its ideological opponents, and the trust of members of this body, including myself. I congratulate the National Women's Law Center for receiving this important award recognizing its hard work and commitment to social justice. I look forward to continuing to work together for years to come.●

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. KIRK:

S. 1863. A bill to award a Congressional Gold Medal to Timothy Nugent, in recognition of his pioneering work on behalf of people with disabilities, including disabled veterans; to the Committee on Banking, Housing, and Urban Affairs.

Mr. KIRK. Mr. President, today I wish to commemorate the 25th anniversary of the Americans with Disabilities Act, ADA, as well as Timothy Nugent, who has spent the past 70 years as a relentless innovator and tireless advocate for disabled people across the country. Together with Congressman RODNEY DAVIS, I have introduced a bill that would award Mr. Nugent with the Congressional Gold Medal. Mr. Nugent and the ADA have helped millions of Americans live better, more productive lives, improving the United States overall, and making us an example for the world to follow.

Timothy Nugent saw a need for services and accommodations for disabled servicemen when they came home from the battlefields of World War II. Mr. Nugent founded the first higher educational program for wounded and disabled soldiers in the world, and he confronted the bias of the general public by bringing students with disabilities into the mainstream of college campuses and societies. Because of Mr. Nugent's leadership and commitment, the University of Illinois built accommodations for the disabled veteran and created a hospitable environment for our Nation's greatest heroes, providing them the same educational opportunities as others. He also disproved many in the medical community who believed that either rehabilitation and sporting activities were harmful to individuals with severe disabilities or that education was not necessary because of the beliefs at the time was that the lifespan of persons with spinal cord injuries would be too short for them to benefit from college degrees.

Many of the architectural accessibility standards and laws of the United States, including the welcoming Americans with Disabilities Act, trace back directly to innovations created by Nugent. I know firsthand how important this law and Mr. Nugent's actions are to the University of Illinois and the community of 50 million Americans living with a disabilities. Laws like the Americans with Disabilities Act allow all Americans to live life on their own terms, and Mr. Nugent's work on behalf of these individuals is well-deserving of the Congressional Gold Medal.

(C) Congress has received and reviewed testimony and documentation of race and gender discrimination from numerous sources, including congressional hearings and roundtables, scientific reports, reports issued by public and private agencies, news stories, reports of discrimination by organizations and individuals, and discrimination lawsuits, which show that race- and gender-neutral efforts alone are insufficient to address the problem;

(E) the testimony and documentation described in subparagraph (C) provide a strong basis that there is a compelling need for the continuation of the disadvantaged business enterprise program to address race and gender discrimination in surface transportation-related business.

SEC. 12003. FUTURE INTERSTATE STUDY.

(a) FINDINGS.—Congress finds that—

(1) a well-developed system of transportation infrastructure is critical to the economic well-being, health, and welfare of the people of the United States;

(2) the 47,000-mile national Interstate System is the backbone to that transportation infrastructure system; and

(3) as of the date of enactment of this Act—

(A) many segments of the approximately 60- year-old Interstate System are well beyond the 50-year design life of the System and yet these aging facilities are central to the transportation infrastructure system, carrying 25 percent of the vehicle traffic of the United States on just 1 percent of the total public roadway mileage;

(B) the need for ongoing maintenance, preservation, and reconstruction of the Interstate System has grown due to increasing and changing travel demands; and

(C) simple maintenance of the current condition and configuration of the Interstate System is insufficient for the System to fully serve the transportation needs of the United States for the next 50 years.

(b) FUTURE INTERSTATE SYSTEM STUDY.—Not later than 180 days after the date of enactment of this Act, the Secretary shall enter into an agreement with the Transportation Research Board of the National Academies to conduct a study on the actions needed to upgrade and restore the Dwight D. Eisenhower National System of Interstate and Defense Highways to its role as a premier system network that meets the growing and shifting demands of the 21st century and for the next 50 years (referred to in this section as the ''study'').

(c) METHODOLOGIES.—In conducting the study, the Transportation Research Board shall build on the methodologies examined and recommended in the report prepared for the American Association of State Highway and Transportation Officials entitled ''National Cooperative Highway Research Program Project 20–24(79): Specifications for a National Study of the Future 3R, 4R, and Capacity Needs of the Interstate System'' and dated December 2013.

(d) RECOMMENDATIONS.—The study—

(1) shall include specific recommendations regarding the features, standards, capacity needs, application of technologies, and intergovernmental roles to upgrade the Interstate System, including any revisions to law (including regulations) that the Transportation Research Board determines appropriate to achieve the goals; and

(2) is encouraged to build on the robust institutional knowledge in the highway industry in applying the techniques involved in implementing the study.

(e) CONSIDERATIONS.—In carrying out the study, the Transportation Research Board shall determine the need for reconstruction and improvement of the Interstate System by considering—

(1) future demands on transportation infrastructure determined for national planning purposes, including commercial and private traffic flows to serve future economic activity and growth;

(2) the expected condition of the current Interstate System over the next 50 years, including long-term deterioration and reconstruction needs;

(3) those National Highway System routes that should be added to the existing Interstate System to more efficiently serve national traffic flows;

(4) features that would take advantage of technological capabilities to address modern standards of construction, maintenance, and operations, for purposes of safety, and system management, taking into further consideration system performance and cost; and

(5) the resources necessary to maintain and improve the Interstate System, including the resources required to upgrade those National Highway System routes identified in paragraph (3) to Interstate standards.

(f) CONSULTATION.—In carrying out the study, the Transportation Research Board—

(1) shall convene and consult with a panel of national experts including current and future owners, operators, and users of the Interstate System and private sector stakeholders; and

(2) is encouraged to consult with—

(A) the Federal Highway Administration;

(B) States;

(C) planning agencies at the metropolitan, State, and regional levels;

(D) the motor carrier industry;

(E) freight shippers;

''(B) the State does not use more than 10 percent of the basic amount the State receives under a grant awarded under section 31104(a)(1) for enforcement activities relating to noncommercial motor vehicles necessary to promote the safe operation of commercial motor vehicles unless the Secretary determines that a higher percentage will result in significant increases in commercial motor vehicle safety; and

''(i) EVALUATION OF PLANS AND AWARD OF GRANTS.—

''(1) AWARDS.—The Secretary shall establish criteria for the application, evaluation, and approval of State plans under this section. Subject to subsection (j), the Secretary may allocate the amounts made available under section 31104(a)(1) among the States.

(D) The Secretary will subtract the amount in subparagraph (B) from the amount in subparagraph (C) and—

(i) if the number is greater than 0, then the Secretary shall subtract the number from the amount in subparagraph (A); or

(ii) if the number is not greater than 0, then the Secretary shall calculate the maintenance of effort using the methodology in subparagraph (A).

(3) MAINTENANCE OF EFFORT AMOUNT.—

(A) IN GENERAL.—The Secretary shall use the amount calculated in paragraph (2) as the baseline maintenance of effort required in section 31102(f) of title 49, United States Code, as amended by section 32502 of this Act.

(B) DEADLINE.—If a State does not request a waiver or modification under this subsection before September 30 during the first fiscal year that the Secretary implements the new allocation formula under section 32508, the Secretary shall calculate the maintenance of effort using the methodology in paragraph (2)(A) of this subsection.

(4) MAINTENANCE OF EFFORT DESCRIBED.—The maintenance of effort calculated under this section is the amount required under section 31102(f) of title 49, United States Code, as amended by section 32502 of this Act.

(c) TERMINATION OF EFFECTIVENESS.—The authority under this section terminates effective on the date that the new maintenance of effort is calculated based on the

''(A) its main line over which intercity rail passenger transportation or commuter rail passenger transportation (as defined in section 24102) is regularly provided;

''(B) its main line over which poison- or toxic-by-inhalation hazardous materials (as defined in sections 171.8, 173.115, and 173.132 of title 49, Code of Federal Regulations) are transported; and

''(2) INTEROPERABILITY AND PRIORITIZATION.—The plan shall describe how the railroad carrier or other entity subject to paragraph (1) will provide for interoperability of the positive train control systems with movements of trains of other railroad carriers over its lines and shall, to the extent practical, implement the positive train control systems in a manner that addresses areas of greater risk before areas of lesser risk.

''(3) SECRETARIAL REVIEW OF UPDATED PLANS.—

''(A) SUBMISSION OF UPDATED PLANS.—Notwithstanding the deadline set forth in paragraph (1), not later than 90 days after the date of enactment of the Railroad Reform, Enhancement, and Efficiency Act, each Class I railroad carrier or other entity subject to paragraph (1) may submit to the Secretary an updated plan that amends the plan submitted under paragraph (1) with an updated implementation schedule (as described in paragraph (4)(B)) and milestones or metrics (as described in paragraph (4)(A)) that demonstrate that the railroad carrier or other entity will implement a positive train control system as soon as practicable, if implementing in accordance with the updated plan will not introduce operational challenges or risks to full, successful, and safe implementation.

''(B) REVIEW OF UPDATED PLANS.—Not later than 150 days after receiving an updated plan under subparagraph (A), the Secretary shall

review the updated plan and approve or disapprove it. In determining whether to approve or disapprove the updated plan, the Secretary shall consider whether the railroad carrier or other entity submitting the plan—

''(II) the challenges referred to in subclause (I) have negatively affected the successful implementation of positive train control systems;

''(ii) has demonstrated due diligence in its effort to implement a positive train control system;

''(iii) has included in its plan milestones or metrics that demonstrate the railroad carrier or other entity will implement a positive train control system as soon as practicable, if implementing in accordance with the milestones or metrics will not introduce operational challenges or risks to full, successful, and safe implementation; and

''(iv) has set an implementation schedule in its plan that shows the railroad will comply with paragraph (7), if implementing in accordance with the implementation schedule will not introduce operational challenges or risks to full, successful, and safe implementation.

''(C) MODIFICATION OF UPDATED PLANS.—(i) If the Secretary has not approved an updated plan under subparagraph (B) within 60 days of receiving the updated plan under subparagraph (A), the Secretary shall immediately—

''(I) provide a written response to the railroad carrier or other entity that identifies the reason for not approving the updated plan and explains any incomplete or deficient items;

''(II) allow the railroad carrier or other entity to submit, within 30 days of receiving the written response under subclause (I), a modified version of the updated plan for the Secretary's review; and

''(III) approve or issue final disapproval for a modified version of the updated plan submitted under subclause (II) not later than 60 days after receipt.

''(ii) During the 60-day period described in clause (i)(III), the railroad or other entity that has submitted a modified version of the updated plan under clause (i)(II) may make additional modifications, if requested by the Secretary, for the purposes of correcting incomplete or deficient items to receive approval.

''(D) PUBLIC AVAILABILITY.—Not later than 30 days after approving an updated plan under this paragraph, the Secretary shall make the updated plan available on the website of the Federal Railroad Administration.

''(E) PENDING REVIEWS.—For an applicant that submits an updated plan under subparagraph (A), the Secretary shall extend the deadline for implementing a positive train control system at least until the date the Secretary approves or issues final disapproval for the updated plan with an updated implementation schedule (as described in paragraph (4)(B)).

''(F) DISAPPROVAL.—A railroad carrier or other entity that has its modified version of its updated plan disapproved by the Secretary under subparagraph (C)(i)(III), and that has not implemented a positive train control system by the deadline in subsection (a)(1), is subject to enforcement action authorized under subsection (e).

(4) PREFERRED ALTERNATIVE.—With the concurrence of the cooperating agencies with jurisdiction under Federal law and at the discretion of the lead agency, the preferred alternative for a project, after being identified, may be developed to a higher level of detail than other alternatives to facilitate the development of mitigation measures or concurrent compliance with other applicable laws if the lead agency determines that the development of the higher level of detail will not prevent—

(A) the lead agency from making an impartial decision as to whether to accept another alternative that is being considered in the environmental review; and

(B) the public from commenting on the preferred and other alternatives.

(d) ENVIRONMENTAL REVIEW COMMENTS.—

(1) COMMENTS ON DRAFT ENVIRONMENTAL IMPACT STATEMENT.—For comments by an agency or the public on a draft environmental impact statement, the lead agency shall establish a comment period of not less than 45 days and not more than 60 days after the date on which a notice announcing availability of the environmental impact statement is published in the Federal Register, unless—

(B) in the case of an action pertaining to an environmental review conducted under NEPA—

(i) the action is filed by a party that submitted a comment during the environmental review or a party that lacked a reasonable opportunity to submit a comment; and

(ii) a party filed a sufficiently detailed comment so as to put the lead agency on notice of the issue on which the party seeks judicial review.

(2) NEW INFORMATION.—

(A) IN GENERAL.—The head of a lead agency or participating agency shall consider new information received after the close of a comment period if the information satisfies the requirements under regulations implementing NEPA.

(B) SEPARATE ACTION.—If Federal law requires the preparation of a supplemental environmental impact statement or other supplemental environmental document, the preparation of such document shall be considered a separate final agency action and the deadline for filing a claim for judicial review of the agency action shall be 2 years after the date on which a notice announcing the final agency action is published in the Federal Register, unless a shorter time is specified in the Federal law under which judicial review is allowed.

(3) RULE OF CONSTRUCTION.—Nothing in this subsection creates a right to judicial review or places any limit on filing a claim that a person has violated the terms of an authorization.

(b) PRELIMINARY INJUNCTIVE RELIEF.—In addition to considering any other applicable equitable factors, in any action seeking a temporary restraining order or preliminary injunction against an agency or a project sponsor in connection with review or authorization of a covered project, the court shall—

(1) consider the effects on public health, safety, and the environment, the potential for significant job losses, and other economic harm resulting from an order or injunction; and

(2) not presume that the harms described in paragraph (1) are reparable.

(2) creates a presumption that a covered project will be approved or favorably reviewed by any agency.

(1) any practice of seeking, considering, or responding to public comment; or

(2) any power, jurisdiction, responsibility, or authority that a Federal, State, or local governmental agency, metropolitan planning organization, Indian tribe, or project sponsor has with respect to carrying out a project or any other provisions of law applicable to any project, plan, or program.
