

Shaun and Lacey have shared their livelihood with countless local students who have toured their ranch and wind turbine facility. The students who visit their ranching operation gain valuable insight into the origin of their food and electricity. In addition to educating students, the Sims have also taught the teachers by hosting the Wyoming Ag in the Classroom Teacher Institute. As Amy Hendrickson, executive director of the Wyoming Wool Growers Association observed, "They have served as educators, mentors, and leaders on a variety of important issues affecting Wyoming's agriculture industry, and their example of true leadership serves as a model for others."

Shaun and Lacey have served in various capacities whenever they have been called upon. Shaun's service extends from his 14-year tenure with the Uinta County Conservation District Supervisors to his election on the National Association of Conservation Districts Executive Board. As president of the Wyoming Association of Conservation Districts, Shaun often sacrifices valuable time on his home ranch to attend all meetings for Uinta County and the State association. Shaun's dedication to the State and the industry has not gone unnoticed. He was recently appointed to a second term on the Wyoming Board of Agriculture.

Like her husband, Lacey has been an active agricultural advocate in Wyoming. Lacey received the Masters of Beef Advocacy certification through the National Cattlemen's Beef Association and was appointed by Wyoming Governor Matt Mead to serve on the statewide Wyoming Beef Council. Lacey has combined her passion for agriculture with her growing photography business to tell the story of agriculture through an artistic lens. By highlighting the beauty and importance of Wyoming agriculture, she is able to capture in photos what words often fail to convey. Patrick Zimmerer, with the Wyoming Board of Agriculture stated, "Lacey tells and advocates the story of Wyoming agriculture through her lens as a photographer and through social media, telling and highlighting the importance of Wyoming agriculture to a broad audience of followers."

Shaun and Lacey Sims represent every positive attribute of leaders in Wyoming agriculture. Together, side by side, they have represented Wyoming's interests with dedication and honor. It is because of people like them that the agricultural community in Wyoming has a bright and productive future. My wife, Bobbi, joins me in congratulating these outstanding individuals, Shaun and Lacey Sims, who are 2015 inductees into the Wyoming Agriculture Hall of Fame.

DUNBARTON, NEW HAMPSHIRE 250TH ANNIVERSARY

• Ms. AYOTTE. Mr. President, I honor Dunbarton, NH—a town in Merrimack County that is celebrating the 250th anniversary of its founding. I am proud to join citizens across the Granite State in recognizing this special milestone.

Dunbarton, previously known by many names, including Starkstown, was incorporated in 1765 by Colonial Governor Benning Wentworth and was officially renamed Dunbarton.

The town's population has grown since then to over 2,700 residents. With more than 1,600 acres of protected land, Dunbarton is located on the Merrimack River watershed and is rich in natural beauty. Based upon its latitude and longitude, Dunbarton is known as the true center of New England.

The patriotism and commitment of the people of Dunbarton is reflected in part by their record of service in defense of our Nation. Revolutionary War General John Stark, his wife Molly and son Caleb, all lived in Dunbarton. Another Dunbarton native was Robert Roger, famed Commander of Roger's Rangers during the French and Indian War who was instrumental in developing military tactics still used to this day. Additionally, John Ordway, who helped lead the Lewis and Clark Expedition, made his way back home to Dunbarton after the expedition had finished.

The spirit of community and volunteerism is strong in Dunbarton as evidenced by the hard work and dedication of all involved with the planning and celebration of the annual Old Home Day festival, as well as this special sescentennial anniversary.

Dunbarton is a place that has greatly contributed to the life and spirit of New Hampshire. I am pleased to extend my warm regards to the people of Dunbarton as they celebrate this special day.●

TRIBUTE TO BRIAN MURPHY

• Ms. AYOTTE. Mr. President, I congratulate Brian Murphy of Dover, NH. On May, 29 2015, Brian reached an important career milestone by working his 250th National Hockey League play-off game as a linesman.

Born on December 13, 1964, Brian has been a lifelong resident of Dover. He graduated from Dover High School in 1982 and continued his education by attending the University of New Hampshire, where he earned a degree in business administration in 1986. Brian was then hired by the NHL in September 1988. His first game was on October 7, 1988 between the Pittsburgh Penguins and the Washington Capitals.

Linesmen have a difficult and often thankless job. While referees officiate the game and call penalties, linesmen break up fights between players, drop

the puck for face-offs and have to keep up with the pace of the game to make offside calls—all while avoiding interference. Brian has excelled in every aspect of his career and is one of only 13 U.S. born NHL officials. Most officials who work for the NHL are Canadian nationals who have relocated.

During Brian's 27 years as an on-ice official, he has worked 1713 regular season NHL games and the men's hockey games at the 2010 Vancouver Winter Olympics. More recently, Brian was selected for the 7th Stanley Cup Finals between the victorious Chicago Blackhawks and the Tampa Bay Lightning in June of this year.

As the former president of the National Hockey League Officials Association, Brian understands the sacrifices and hard work that are necessary to perform his job. I ask my colleagues to join me today in celebrating Brian's career as a linesman. I am delighted to congratulate him on reaching this important career milestone and I wish him many more years of success.●

RECOGNIZING THE ASSOCIATION FOR FACILITIES ENGINEERING

• Ms. AYOTTE. Mr. President, I wish to recognize the 100th anniversary of the Association for Facilities Engineering. The organization began in Framingham, MA when Henry "Harry" S. Dennison, president of the Factory Managers Association, saw a need for increased information-sharing within the engineering world. Because of this, Dennison invited a group of 25 mechanics and engineers from the greater Boston area to attend the organization's first informal meeting. On June 9, 1915, the organization's constitution was approved, their officers were elected and they began their history as a working, professional consortium for engineers and mechanics alike.

Years later in 1954, a group of engineering clubs associated with the organization came together and changed the organization's name to the American Institute of Plant Engineers, AIPE. AIPE became the hub for countless engineering societies in New England and elsewhere, including the New England Chapter of AIPE, comprised of New Hampshire and five other States. In May of 1996, AIPE's board of directors voted to change their name to the Association for Facilities Engineering or AFE, in an effort to include more than just plant engineers, and to focus on buildings and facilities as a whole.

Wayne Saya of Nashua serves among the leaders and board members of AFE. As AFE's executive director, Wayne is personally committed to furthering the message and continued success of the association. He believes that the chapters of AFE have the best tools for problem solving and often cites his motto during mediations: "Chapters may not always be right, they are just never wrong!" His continued advocacy is a vital tool for engineers, mechanics
