

Adam's prints, negatives and equipment; restoring an 18th century South Carolina plantation house; preserving the ruins at Colorado's Mesa Verde National Park; and repairing and preserving the 1812 flag that flew over Fort McHenry that inspired the Star Spangled Banner.

In my Minnesota congressional district, a \$150,000 SAT grant matched by community contributions helped to fund a sprinkler system in the longest serving Czech-Slovak Hall in the U.S. built in 1879. This grant saved the Sokol Hall while other ethnic halls have been lost to fire. On Saturday I'll be attending an event at the Sokol Hall and it is a wonderful center of community activity.

SAT has been an example of a public-private partnership that keeps history, culture, identity, and democracy vibrant and sustainable in towns and cities all across America.

In my view SAT grants have acted as venture capital that sparks a community into action. It is an investment that inspires a community and donors to invest time, money, volunteer support—all to the benefit of the project. A good project with an SAT grant becomes a great project. Without that federal support many projects will never get done and national treasures are now being lost forever.

I am passionate about restoring federal funding for SAT because I have a partner that shares my enthusiasm. That partner is the American Architectural Foundation. The National Park Service is SAT's lead federal agency while AAF is SAT's official non-profit partner.

Other federal partners include the National Endowment for the Arts, the National Endowment for the Humanities, and the Institute of Museum and Library Services. They all have valuable technical capacity to contribute—if federal funds are made available.

In 2016 our nation will celebrate the 50th anniversary of the National Historic Preservation Act of 1966. Next year also marks the 100th anniversary of our National Parks. As citizens who care about historic preservation, now is the time to get organized and energized. Working together, we need to get Congress investing once again in Saving America's Treasures.

I am thrilled to be working with AAF and other partners who share the vision that preserving America's past helps to build America's future.

It has been wonderful being here with you. Thank you AAF for the invitation to be here today.

Thank you.

MANNINGTON MILLS ONE HUNDRED YEARS OF BUSINESS IN SOUTH JERSEY

**HON. FRANK A. LOBIONDO**

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 1, 2015*

Mr. LOBIONDO. Mr. Speaker, I come to the floor today to celebrate the One Hundredth Anniversary of Mannington Mills, Inc. Located in my district in Salem, New Jersey, Mannington Mills is a leader in the manufacturing of residential and commercial flooring.

Mannington Mills has expanded significantly since its founding in 1915, growing from a small roots family business in South Jersey to a global industry leader today. This organization has been very successful in extending their services outside of New Jersey, recently expanding into Georgia, Alabama, North Carolina, and Florida where they invested in new

facilities that helped to create several hundred new jobs in each state.

The company's many years of success has allowed them to expand internationally as well. In 2012 Mannington Mills acquired Amtico International, a producer of luxury vinyl flooring headquartered in England. This new location provided many more business opportunities and allowed the company to bring its hometown brand overseas.

Mannington Mills' commitment to social responsibility makes this company stand out among others. Chairman of the Board, Keith Campbell is a firm believer in the "Do the Right Thing" philosophy that the company and family has kept with them since they first opened. This has ensured a strong community connection, and only adds to their success.

Over the last century, Mannington Mills has built a reputation of quality products in southern New Jersey and the United States. Ignoring pressure to move out of state, Mannington Mills' unwavering support to the local economy and its employees is a testament to the organization's founding principles that has spanned four generations. The company, family, and employees can take great pride in this remarkable milestone.

My sincere congratulations and best wishes for many more years of success.

IN OPPOSITION TO S.J. RES. 23  
AND S.J. RES. 24

**HON. ANNA G. ESHOO**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 1, 2015*

Ms. ESHOO. Mr. Speaker, I rise in strong opposition to both resolutions before us today. Congress has a constitutional duty to conduct oversight of the Executive Branch, and the Congressional Review Act is an important tool in our toolbox. However, these resolutions are nothing more than partisan attempts to nullify the EPA's Clean Power Plan, sending a message to countries around the world of political discord in the United States as global climate change negotiations are taking place in Paris.

Climate change is real and it is a threat to the entire world. The first nine months of 2015 were the warmest on record and these higher temperatures have contributed to the drought and wildfires that have ravaged my home state of California over the past five years.

It's also a fact that the costs of failing to address climate change—both human and economic—grow with every year we fail to take action. A recently released United Nations report revealed that in the past two decades weather-related disasters have killed more than 600,000 people and cost trillions of dollars in economic losses. The report cited rising ocean temperatures and melting glaciers as two main drivers of extreme weather events which have increased at an alarming rate. The White House Council on Economic Advisers also calculated that failing to meet our climate goals will cost the U.S. \$150 billion per year in reduced economic output. For each decade we ignore climate change, the costs of mitigation increase by 40 percent, which works out to approximately a \$500 tax on every American each year, increasing by 40 percent every ten years.

With Congress failing to act on climate change, the Administration is taking strong ac-

tion which I support. As we speak, representatives from over 190 countries are working to produce a landmark agreement in Paris to cut greenhouse gas (GHG) emissions on a global scale and invest in clean energy technologies. Even before the negotiations began, countries that make up nearly 90 percent of global GHG output submitted pledges to cut their emissions, including major polluters such as China, India, and the United States. In the U.S., the Clean Power Plan is projected to reduce GHG emissions by 32 percent by 2030.

There is global recognition of the threat of climate change and the two resolutions before the House today would invalidate a key part of our nation's responsibility to reduce global GHG emissions by preventing any future EPA regulation of carbon emissions from power plants. This is a blatantly transparent attempt to influence the Paris negotiations on behalf of the status quo and the special interests in the fossil fuel industry. I believe the mere consideration of these resolutions diminishes U.S. leadership and this institution in the eyes of the world community, and it condemns us to a future of even higher risks.

I urge my colleagues to oppose these resolutions of disapproval.

OUR UNCONSCIONABLE NATIONAL  
DEBT

**HON. MIKE COFFMAN**

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 1, 2015*

Mr. COFFMAN. Mr. Speaker, on January 20, 2009, the day President Obama took office, the national debt was \$10,626,877,048,913.08.

Today, it is \$18,782,451,267,806.04. We've added \$8,155,574,218,892.96 to our debt in 6 years. This is over \$8 trillion in debt our nation, our economy, and our children could have avoided with a balanced budget amendment.

RECOGNIZING THE RETIREMENT  
OF DR. CHARLES MOJOCK,  
PRESIDENT OF LAKE-SUMTER  
STATE COLLEGE

**HON. DANIEL WEBSTER**

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, December 1, 2015*

Mr. WEBSTER of Florida. Mr. Speaker, it is my pleasure to recognize a close friend and highly accomplished leader in education, Dr. Charles Mojock, on his upcoming retirement. On December 31, 2015, Dr. Mojock will retire as President of Lake-Sumter State College.

Under Dr. Mojock's leadership, Lake-Sumter State College has transitioned from a community college to a state college, undergone a name change, joined the Central Florida Higher Education Consortium and DirectConnect to UCF, and launched Associate of Science degree programs in Health Information Technology, Computer Information Technology and Environmental Science. During his tenure, Dr. Mojock witnessed the growth and expansion
