Congress finds the following:

(1) An estimated 2,000,000 individuals with serious mental illnesses are booked into jails each year, resulting in prevalence rates of serious mental illness in jails that are 3 to 6 times higher than in the general population. An even greater number of individuals who are detained in jails each year have mental health problems that do not rise to the level of a serious mental illness but may still require a resource-intensive response.

(2) Adults with mental illnesses cycle through jails more often than individuals without mental illnesses, and tend to stay longer (including before trial, during trial, and after sentencing).

(3) According to estimates, almost ¾ of jail detainees with serious mental illnesses have co-occurring substance use disorders, and individuals with mental illnesses are also much more likely to have serious physical health needs.

(4) Among individuals under probation supervision, individuals with mental disorders are nearly twice as likely as other individuals to have their community sentence revoked, furthering their involvement in the criminal justice system. Reasons for revocation may be directly or indirectly related to an individual’s mental disorder.
