

I am introducing the bipartisan Personalize Your Care Act 2.0, legislation that will strengthen end-of-life care by establishing new models of care delivery that will better manage advanced illness, improve quality of care, and enhance training, resources, and tools for providers, patients, and their families.

Ideally, health care should work in sync with social, psychological, and spiritual support as the end of life approaches. Care near the end of life must be patient-centered and family-oriented. This legislation is supported by patient advocates, physicians, nurses, and the faith community, who understand how advance care planning fundamentally improves quality of care and quality of life. To that end, I ask my colleagues to join me and support this important piece of legislation.
