

every bit as much American as you or I or our children.

Pictured next to me is Itzel Campos of El Paso, Texas, a 15-year-old sophomore at Franklin High School, who came to a townhall meeting that we had last night where 300 El Pasoans came out to either tell their stories or show support for DREAMers.

We want to make sure that the President-elect and that the Congress that we have here and the one that will be seated in January do everything within their power to keep these DREAMers in our country, who will earn more than \$4 trillion in taxable income during their lives but, more importantly, will contribute to the American Dream, will improve communities like mine, which happens to be the safest city in America in large part because of the immigrants, and especially these DREAMers who call El Paso home, and to give people like Itzel every chance to succeed, to improve their lives and the course of this country.

#### CONGRATULATIONS TO GOVERNOR NIKKI HALEY

(Mr. WILSON of South Carolina asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WILSON of South Carolina. Mr. Speaker, President-elect Donald Trump nominated South Carolina Governor Nikki Haley to be America's Ambassador to the United Nations.

President-elect Trump has announced:

Governor Haley has a proven record of bringing people together regardless of background or party affiliation to move critical policies forward for the betterment of her State and country. She is also a proven dealmaker, and we look forward to making plenty of deals. She will be a great leader representing us on the world stage.

Governor Haley has led the people of South Carolina through trying times, such as the historic thousand-year flood last year, Hurricane Matthew flooding this year, and the tragic shooting at Mother Emanuel Church in Charleston. She has promoted a pro-business and pro-job environment by recruiting major companies such as Boeing and Volvo, along with Michelin, BMW, and Bridgestone expansions. Governor Haley will be a strong and effective voice for America, advancing freedom and democracy around the world.

Congratulations to Governor Haley and her husband, Michael, and children, Rena and Nalin, on this achievement. Your Lexington County neighbors are very proud of you.

In conclusion, God bless our troops, and may the President, by his actions, never forget September the 11th in the global war on terrorism.

#### REDUCING RED TAPE

(Mr. LAMALFA asked and was given permission to address the House for 1

minute and to revise and extend his remarks.)

Mr. LAMALFA. Mr. Speaker, I am pleased that the House Subcommittee on Federal Lands is holding a hearing soon on H.R. 5129, the Guide and Outfitter Act—we call it the GO Act—which I have sponsored to make it easier for Americans to access and enjoy their public lands.

I began working on this legislation after an annual endurance run in my district, which had been held for years, was canceled after Federal agencies demanded a costly new study of the event's environmental impacts, a study the small, nonprofit group that held the event couldn't afford. That's right, Federal agencies were concerned that people running on existing trails could have negative impacts on the environment.

The GO Act cuts this red tape by creating a categorical exclusion to ensure activities which have already been permitted do not need duplicative studies in order to continue. It creates a one-stop joint permitting system so races and other events that might stretch across Forest Service lands, BLM, and National Park land, et cetera, don't need to repeat the permit process over and over and over with every single agency.

The bill caps fees to keep them affordable and allows existing permits to be easily extended so that public access and events can continue.

I am proud to say this bill will help get more Americans outside, Mr. Speaker, for less money and with less red tape. That is a goal every Member of this body can support.

#### AVOIDING TRUMP ADMINISTRATION CONFLICTS OF INTEREST

(Ms. KAPTUR asked and was given permission to address the House for 1 minute.)

Ms. KAPTUR. Mr. Speaker, I am one of those Americans who is very concerned about the conflict of interest that the President-elect faces as he assumes office. I don't think we have ever elected someone to office in this country with his vast wealth, but I must say, as ranking member on the Energy and Water Development, and Related Agencies Subcommittee of the Committee on Appropriations, let me give you one area which causes me concern: where he will separate his private interest from the public interest.

The committee on which I rank handles the Army Corps of Engineers' budget, and we don't have enough money to deal with all the projects around the country, some of which are backed up 20 years. What happens if Mar-a-Lago in Florida faces flooding—or any of the other coastal properties that the President-elect owns—and the Army is trying to make a decision on where to place Federal funds? Will his properties take precedence over thousands of other projects around the country that have been backlogged for years?

I think it is really important that the President-elect create a blind trust and put all of his assets in there. Obviously, he will have a good life in the years ahead, but we simply must not allow the private interests of any American to pollute the public decisions that this country must make.

#### CLIMATE CHANGE

The SPEAKER pro tempore. Under the Speaker's announced policy of January 6, 2015, the gentleman from Michigan (Mr. BENISHEK) is recognized for 60 minutes as the designee of the majority leader.

Mr. BENISHEK. Mr. Speaker, as a lifelong resident of northern Michigan, I know how important it is to protect and conserve our precious natural resources. Northern Michigan's economy depends on our Great Lakes and our outdoor spaces for tourism, agriculture, and sporting activities.

Generations of people in my district have grown up experiencing the outdoors from the shores of Sleeping Bear Dunes National Lakeshore to Isle Royale National Park. However, we need to make sure that there is a balance and that we do not undertake rash and unproven regulatory policies that are almost guaranteed to negatively impact our economy in the hope of some potential—and often unquantifiable—environmental gain.

I just got back from northern Michigan. As a matter of fact, I was in Ottawa National Forest hunting. What strikes me about the regulatory nature of the Federal Government is it doesn't really take into account what is happening in the wild. The Ottawa National Forest, for example, hasn't been properly managed. The regulations as far as managing the forest make it so difficult that the forest is aging and the trees are actually falling down and rotting rather than being harvested. This is just one of the policies of this administration, and I am really hoping, now that we have a new administration coming forward, there will be a lot of change in the regulatory policies to actually develop policies that make sense for our environment and make sense for our people. That is why I wanted to speak tonight about many of these policies that affect our environment and global warming.

A lot of policies of the last administration, even the administration before that, really don't have the globe at the forefront of solving these problems. What they have been doing is just writing more and more regulations that stop whatever we are doing, and they don't have any particular effect on the global environment.

I am bringing this up for a reason. I just brought this little pollution-by-country chart, and this is the global pollution for the whole world. We know the United States is a pretty big part of that. The EU is a big part of that. India is big, and China is the biggest. The rest of the world provides, probably, the largest. But what strikes me
