### 3 **SEC. 2. FINDINGS.**

4 Congress makes the following findings:

5 (1) Fish and wildlife are important natural re-  
 6 sources of the United States. They belong to all citi-  
 7 zens, and are managed in perpetuity by State and  
 8 Federal conservation agencies, often with significant  
 9 assistance from universities, zoos, aquariums, and  
 10 nonprofit and nongovernmental organizations.

11 (2) Wildlife and zoological veterinarians are the  
 12 primary source of essential health care for wild ani-  
 13 mals in their natural habitat and in captivity in fa-  
 14 cilities such as zoos, wildlife refuges, breeding re-  
 15 serves, and aquariums.

1           (3) Wildlife and zoological veterinarians have  
2           the resources and expertise necessary to help re-  
3           spond to environmental disasters and address short-  
4           term and long-term impacts on wildlife and their  
5           habitats. Wildlife and zoological veterinarians have  
6           proven to be essential to the rescue and rehabilita-  
7           tion efforts in the Gulf of Mexico region following  
8           the Deepwater Horizon oil spill that began on April  
9           20, 2010.

10          (4) According to the Department of the Inte-  
11          rior, wildlife disease expertise and resources are crit-  
12          ical to protecting both human and animal life.

13          (5) Wildlife veterinarians have been actively in-  
14          volved in preventing, detecting, and responding to  
15          such important exotic, dangerous, and zoonotic dis-  
16          eases as anthrax, avian influenza, brucellosis, tuber-  
17          culosis, West Nile virus, SARS, chronic wasting dis-  
18          ease, and foot and mouth disease.

19          (6) Globalization, climate change, and wildlife  
20          habitat loss and alteration, along with a growing  
21          interface among humans, livestock, and wildlife have  
22          increased the threat posed by emerging infectious  
23          diseases to humans, domestic animals, and wildlife.

24          (7) According to the February 2009 report by  
25          the Government Accountability Office entitled “Vet-

1        erinarian Workforce: Actions Are Needed to Ensure  
2        Sufficient Capacity for Protecting Public and Ani-  
3        mal Health”, the Nation is facing a growing short-  
4        age of veterinarians, and the Federal Government  
5        may not have the necessary veterinarian workforce  
6        to control pandemic and large-scale outbreaks of dis-  
7        ease.

8            (8) There is a shortage of positions for wildlife  
9        and zoological veterinarians at the State, Federal,  
10       nonprofit, and university levels due to inadequate  
11       funding. According to the American Veterinary Med-  
12       ical Association (“AVMA”), less than one percent of  
13       AVMA members identify themselves as wildlife or  
14       zoological veterinarians.

15           (9) According to the AVMA, a growing number  
16       of students enter veterinary schools with an interest  
17       in wildlife or zoological veterinary medicine, but  
18       choose different fields of study and practice due to  
19       the small number of positions available for wildlife  
20       and zoological veterinarians upon graduation.

21           (10) Veterinary students face large educational  
22       debt upon graduation. According to the AVMA,  
23       graduating student loan debt averaged \$151,672 in  
24       2012, a 6.4 percent increase from 2011.

1           (11) According to the American Association of  
2       Wildlife Veterinarians (“AAWV”) and National As-  
3       sociation of Federal Veterinarians (“NAFV”), sala-  
4       ries for wildlife and zoological veterinarians are rel-  
5       atively low compared to the average salaries of vet-  
6       erinarians in companion animal medicine. Lower sal-  
7       aries, combined with high educational debt and the  
8       small number of positions available in wildlife and  
9       zoological veterinary medicine, discourage students  
10      from pursuing careers in wildlife or zoological veteri-  
11      nary medicine.

12           (12) According to the AAWV and NAFV, most  
13      schools and colleges of veterinary medicine lack both  
14      a comprehensive curriculum and sufficient numbers  
15      of formal educational programs specializing in wild-  
16      life or zoological veterinary medicine to adequately  
17      prepare graduates for a competitive workplace.

18           (13) According to the AVMA, while some train-  
19      ing opportunities exist for aspiring wildlife and zoo-  
20      logical veterinarians, such opportunities are not  
21      available each year, pay low salaries or stipends, if  
22      any, and are highly competitive.

23 **SEC. 3. PURPOSES.**

24      The purposes of this Act are—

1           (1) to create new funded positions for wildlife  
2           and zoological veterinarians;

3           (2) to limit the amount of educational debt for  
4           veterinary medicine students while providing incen-  
5           tives to study and practice wildlife or zoological vet-  
6           erinary medicine;

7           (3) to help schools and colleges of veterinary  
8           medicine develop or improve pilot curricula special-  
9           izing in wildlife and zoological veterinary medicine;  
10          and

11          (4) to expand the number of training programs  
12          in wildlife or zoological veterinary medicine for vet-  
13          erinary students.

14 **SEC. 4. DEFINITIONS.**

15          For purposes of this Act, the following definitions

13 (D) how the wildlife or veterinary institu-  
14 tion will use funds awarded under a grant.

15 (b) AWARD.—The Secretary shall establish proce-  
16 dures to ensure that, under this section, proposals are rig-

 10 uate degree in veterinary medicine  
 11 under subsection (b)(2); and

12 (II) enters into the agreement  
 13 under subsection (a).

14 (d) PREFERENCE.—In making payments under this  
 15 section, the Secretary shall give preference to an eligible  
 16 individual who—

17 (1) holds or is pursuing a doctoral or graduate

21                      the eligible individual has participated;

22                      (iii) the total loan balance paid by the  
23                      eligible individual;

24                      (iv) the extent to which such deter-  
25                      mination affects the ability of the Sec-

retary to maximize the number of agreements that can be provided under this section from the amounts appropriated for such agreements; and

(v) the extent to which such determination provides an incentive to serve as a wildlife or zoological veterinarian.

(B) LIMITATIONS.—Payments on behalf of an eligible individual under this section shall not exceed, for each year of service under subsection (c)(2)(B)(i)—

(i) \$35,000 in aggregate; or

2       determined by the Secretary, not to exceed the total  
3       amount of any payments made by the Secretary on  
4       behalf of the eligible individual under this section,  
5       and for interest on such amount at the maximum  
6       legal prevailing rate, as determined by the Treasurer

15       (3) WAIVER OR SUSPENSION OF LIABILITY.—  
16       The Secretary shall provide for the partial or total  
17       waiver or suspension of liability under paragraph

19 (g) AUTHORIZATION OF APPROPRIATIONS.—There is  
20 authorized to be appropriated to carry out this section

8 gram”, under which the Secretary shall enter into agree-  
9 ments with eligible students to award such eligible stu-
