Subtitle C—Navy Programs

SEC. 121. AIRCRAFT CARRIERS.

(a) Sense of Congress on Increase in Number of Operational Aircraft Carriers.—

(1) Findings.—Congress finds the following:

(A) Aircraft carriers are an essential element of the Navy’s core missions of forward presence, sea control, ensuring safe sea lanes, and power projection, and provide the flexibility and versatility necessary for the execution of a wide range of additional missions.

(B) Forward airpower is integral to the security and joint forces operations of the United States. Carriers play a central role in delivering forward airpower from sovereign territory of the United States in both permissive and non-permissive environments.

(C) Aircraft carriers provide the Nation the ability to rapidly and decisively respond to national threats, to conduct worldwide, on-sta-
tion diplomacy, and to deter threats to allies, partners, and friends of the United States.

(D) Since the end of the cold war, aircraft carrier deployments have increased while the aircraft carrier force structure has declined.

(E) Due to the increased array of complex threats across the globe, the Navy’s aircraft carriers are operating at maximum capacity, increasing deployment lengths and decreasing maintenance periods in order to meet operational requirements.

(F) To meet global peacetime and wartime requirements, the Navy has indicated a requirement to maintain two aircraft carriers deployed overseas and to have three additional aircraft carriers capable of deploying within 90 days. However, the Navy has indicated that the existing aircraft carrier force structure cannot support these military requirements.

(G) Despite the requirement to maintain an aircraft carrier strike group in both the United States Central Command and the United States Pacific Command, the Navy has been unable to generate sufficient capacity to support combatant commanders and has devel-
oped significant carrier gaps in these critical areas.

(H) The continued use of a diminished aircraft carrier force structure has resulted in extensive maintenance availabilities which typically exceed program costs and increase time in shipyards. These expansive maintenance availabilities exacerbate existing carrier gaps.

(I) Because of maintenance overhaul extensions, the Navy is truncating basic aircraft carrier training to expedite the deployment of available aircraft carriers. Limiting aircraft carrier training decreases operational capabilities and increases risks to sailors.

(J) Despite the objections of the Navy, the Under Secretary of Defense for Acquisition, Technology, and Logistics directed the Navy on August 7, 2015, to perform shock trials on the U.S.S. Gerald R. Ford (CVN–78). The Assistant Deputy Chief of Naval Operations for Operations, Plans and Strategy indicated that this action could delay the introduction of the U.S.S. Gerald R. Ford (CVN–78) to the fleet by up to two years, exacerbating existing carrier gaps.
(K) The Navy has adopted a two-phase acquisition strategy for the U.S.S. John F. Kennedy (CVN–79), an action that will delay the introduction of this aircraft carrier by up to two years, exacerbating existing carrier gaps.

(L) Developing an alternative design to the Ford class aircraft carrier is not cost beneficial. A smaller design is projected to incur significant design and engineering cost while significantly reducing magazine size, carrier air wing size, sortie rate, and on-station effectiveness among other vital factors as compared to the Ford class. Furthermore, a new design will delay the introduction of future aircraft carriers, exacerbating existing carrier gaps and threatening the national security of the United States.

(M) The 2016 Navy Force Structure Assessment states “A minimum of 12 aircraft carriers are required to meet the increased warfighting response requirements of the Defense Planning Guidance Defeat/Deny force sizing direction.” Furthermore, a new National Defense Strategy is being prepared that will assess the defeat/deny force sizing direction and
may increase the force structure associated with
aircraft carriers.

(2) Sense of Congress.—It is the sense of
Congress that—

(A) the United States should expedite de-
ivery of 12 aircraft carriers;

(B) an aircraft carrier should be author-
ized every three years;

(C) shock trials should be conducted on
the U.S.S. John F. Kennedy (CVN–79), as ini-
tially proposed by the Navy;

(D) construction for the U.S.S. John F.
Kennedy (CVN–79) should be accomplished in
a single phase; and

(E) the United States should continue the
Ford class design for the aircraft carrier des-
ignated CVN–81.

(b) Increase in Number of Operational Air-
craft Carriers.—

(1) Increase.—Section 5062(b) of title 10,
United States Code, is amended by striking “11
operational aircraft carriers” and inserting “12
operational aircraft carriers”.

HR 2810 PCS
(2) Effective date.—The amendment made by paragraph (1) shall take effect on September 30, 2023.

(c) Shock Trials for CVN–78.—Section 128 of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114–92; 129 Stat. 751) is amended—

(1) by striking subsections (a) and (b); and

(2) by redesignating subsections (c) and (d) as subsections (a) and (b), respectively.

(d) Procurement Authority for Aircraft Carrier Programs.—

(1) Procurement authority in support of construction of Ford class aircraft carriers.—

(A) Authority for economic order quantity.—The Secretary of the Navy may procure materiel and equipment in support of the construction of the Ford class aircraft carriers designated CVN–81 and CVN–82 in economic order quantities when cost savings are achievable.

(B) Liability.—Any contract entered into under subparagraph (A) shall provide that any obligation of the United States to make a payment under the contract is subject to the avail-
ability of appropriations for that purpose, and
that total liability to the Government for termi-
nation of any contract entered into shall be lim-
ited to the total amount of funding obligated at
time of termination.

(2) Refueling and Complex Overhaul of
Nimitz Class Aircraft Carriers.—

(A) In General.—The Secretary of the
Navy may carry out the nuclear refueling and
complex overhaul of each of the following Nim-
itz class aircraft carriers:

(i) U.S.S. John C. Stennis (CVN–74).
(ii) U.S.S. Harry S. Truman (CVN–
75).
(iii) U.S.S. Ronald Reagan (CVN–
76).
(iv) U.S.S. George H.W. Bush (CVN–
77).

(B) Use of Incremental Funding.—
With respect to any contract entered into under
subparagraph (A) for the nuclear refueling and
complex overhaul of a Nimitz class aircraft car-
rrier, the Secretary may use incremental funding
for a period not to exceed six years after ad-
vance procurement funds for such nuclear re-
fueling and complex overhaul effort are first ob-
ligated.

(C) CONDITION FOR OUT-YEAR CONTRACT
PAYMENTS.—Any contract entered into under
subparagraph (A) shall provide that any obliga-
tion of the United States to make a payment
under the contract for a fiscal year after fiscal
year 2018 is subject to the availability of appro-
priations for that purpose for that later fiscal
year.

SEC. 122. PROCUREMENT AUTHORITY FOR ICEBREAKER
VESSELS.

in which the Coast Guard is operating may enter into a
contract or other agreement with the Secretary of the
Navy under which the Navy shall act as general agent for
the Department in which the Coast Guard is operating
for the purpose of entering into a contract on behalf of
such Department, beginning with the fiscal year 2018 pro-
gram year, for the procurement of the following:

(1) Not more than three heavy icebreaker ves-
sels.

(2) Not more than three medium icebreaker
vessels.
(b) **Condition for Out-year Contract Payments.**—A contract entered into under subsection (a) shall provide that any obligation of the United States to make a payment under the contract for a fiscal year after fiscal year 2018 is subject to the availability of appropriations for that purpose for such later fiscal year.

(c) **Definitions.**—In this section:

mine a baseline estimate for the submarine in accordance with section 2435 of title 10, United States Code.

(c) LIMITATION.—The Secretary of the Navy may not enter into a contract for the procurement of a Virginia class submarine under subsection (a) if the contract would increase the cost of the submarine by more than 10 percent above the baseline estimate for the submarine determined under subsection (b).

(d) AUTHORITY FOR ADVANCE PROCUREMENT.—The Secretary may enter into one or more contracts, beginning in fiscal year 2018, for advance procurement—

(1) associated with the vessels for which authorization to enter into a multiyear procurement contract is provided under subsection (a); and

(f) DEFINITIONS.—In this section:

(1) COVERED PERIOD.—The term “covered period” means the 5-year period beginning with the
fiscal year 2019 program year and ending with the
fiscal year 2023 program year.

(2) Virginia class submarine.—The term
“Virginia class submarine” means a block V config-
ured Virginia class submarine.

SEC. 125. MULTIYEAR PROCUREMENT AUTHORITY FOR
ARLEIGH BURKE CLASS DESTROYERS AND
ASSOCIATED SYSTEMS.

the Secretary of the Navy may enter into one or more
multiyear contracts, beginning with the fiscal year 2018
program year, for the procurement of—

(1) up to 15 Arleigh Burke class Flight III
guided missile destroyers at a rate of not more than
three such destroyers per year during the covered
period; and

(2) the Aegis weapon systems, AN/SPY–6(v)
air and missile defense radar systems, MK 41
vertical launching systems, and commercial
broadband satellite systems associated with such ves-
sels.

(b) Baseline Estimate.—Before entering into any
contract for the procurement of an Arleigh Burke class
destroyer under subsection (a), the Secretary of Navy
shall determine a baseline estimate for the destroyer in accordance with section 2435 of title 10, United States Code.

(c) LIMITATION.—The Secretary of the Navy may not enter into a contract for the procurement of a Arleigh Burke class destroyer or any major subprogram under subsection (a) if the contract would increase the cost of the destroyer by more than 10 percent above the baseline estimate for the destroyer determined under subsection (b).

(a) LIMITATION.—None of the funds authorized to be appropriated by this Act or otherwise made available for fiscal year 2017 for procurement, that are unobligated as of the date of the enactment of this Act, may be obligated or expended to procure an Arleigh Burke class destroyer (DDG–51) unless the two covered destroyers include an AN/SPY–6(V) air and missile defense radar system.

(b) WAIVER.—The Secretary of the Navy may waive the limitation in subsection (a) if the Secretary determines that the cost or schedule risk associated with the integration of the AN/SPY–6(V) air and missile defense radar is unacceptable or incongruous with a business case that relies on stable design, technology maturity, and realistic cost and schedule estimates.

(c) COVERED DESTROYER DEFINED.—In this section, the term “covered destroyer” means an Arleigh Burke class destroyer (DDG–51) for which funds were authorized to be appropriated by the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114–328) and that was fully funded.
(d) Sense of Congress.—It is the sense of Congress that—

(1) destroyers authorized to be appropriated by the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114–92) should be configured as Arleigh Burke class Flight IIA guided missile destroyers, as initially authorized in section 123 of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112–239; 126 Stat. 1655); and

(2) the Department of the Navy should bear the majority risk associated with the share line on a covered destroyer.

fiscal year 2018 is subject to the availability of appropriations or funds for that purpose for such later fiscal year.

SEC. 129. LIMITATION ON AVAILABILITY OF FUNDS FOR THE ENHANCED MULTI MISSION PARACHUTE SYSTEM.

(a) LIMITATION.—None of the funds authorized to be appropriated by this Act or otherwise made available for the Department of Defense for fiscal year 2018 for the enhanced multi mission parachute system may be used to enter into, or to prepare to enter into, a contract for the procurement of such parachute system until the date on which the Secretary of the Navy submits to the congressional defense committees the certification described in subsection (b) and the report described in subsection (c).

(b) CERTIFICATION.—The certification described in this subsection is a certification by the Secretary of the Navy that—

(1) neither the Marine Corps’ currently fielded enhanced multi mission parachute system nor the Army’s RA–1 parachute system meet the Marine Corps requirements;

(2) the Marine Corps’ PARIS, Special Application Parachute does not meet the Marine Corps requirements;
(3) the testing plan for the enhanced multi mission parachute system meets all regulatory requirements; and

(4) the Department of the Navy has performed an analysis and determined that a high glide canopy parachute system is not more prone to malfunctions than the currently fielded free fall parachute systems.

(e) REPORT.—The report described in this subsection is a report that includes—

(1) an explanation of the rationale for using the Parachute Industry Association specification normally used for sports parachutes that are employed from relatively slow flying civilian aircraft at altitudes below 10,000 feet for a military parachute;

(2) an inventory and cost estimate for any new equipment and training that the Marine Corps will have to be acquire in order to employ a high glide parachute;

(3) an explanation of why the Department of the Navy is conducting a paper down select and not conducting any testing until first article testing; and

(4) a discussion of the risk assessment for high glide canopies, and specifically how the Department
of the Navy is mitigating the risk for malfunctions
experienced in other high glide canopy programs.

Subtitle D—Air Force Programs

SEC. 131. STREAMLINING ACQUISITION OF INTERCONTINENTAL BALLISTIC MISSILE SECURITY CAPABILITY.

(a) FINDINGS.—Congress finds the following:

(1) On September 25, 2014, then Secretary of the Air Force, Deborah Lee James, submitted a report to Congress on the replacement strategy of the Air Force for the UH–1N helicopter, which included the following information:

(A) On the age of the airframe: “The UH–1N is a versatile utility helicopter that was accepted into service from 1968-1969.”.

(B) On the ability to meet requirements: “The entire fleet supports five general homeland security missions. . .The ability of the UH–1N to accomplish these missions was evaluated in 2006, and the aircraft was found to be ‘not effective.’ The shortcomings of the UH–1N were derived from specific mission requirements for carrying capacity, airspeed, unrefueled endurance, mission range, force protection for the floor, specific protection for all aircrew and pas-
sengers, survivability, and materiel availability.’’.

(C) Regarding previous efforts to acquire a replacement aircraft, the report identified efforts that date back to 2006, including—

(i) an initial analysis of alternatives by Air Force Space Command in 2006;

(ii) the common vertical lift support platform program, which was cancelled in 2013;

(iii) two RAND corporation studies funded in 2013; and

(iv) the then-current proposal of the Air Force to procure modified Army UH–60 helicopters.

(2) On February 24, 2016, at a hearing before the Committee on Armed Services of the House of Representatives, in response to concerns related to lift, capacity, and hover time of the UH–1N, then Commander of the United States Strategic Command, Admiral Cecil Haney stated: “Congressman, absolutely, in terms of thinking very crisply associated with what we need to do to improve security of our missile fields... the attributes you listed are
the attributes that concern me in terms of the capability, not just now, but into the future.”.

(3) On March 2, 2016, at a hearing before the Committee on Armed Services of the House of Representatives, the Commander of Air Force Global Strike Command, General Robin Rand stated: “We will not meet the emergency security response with the present helicopter.”.

(4) On April 4, 2017, at a hearing before the Committee on Armed Services of the Senate, the Commander of the United States Strategic Command, General John E. Hyten stated: “Of all the things in my portfolio, I can’t even describe how upset I get about the helicopter replacement program. It’s a helicopter, for gosh sakes. We ought to be able to go out and buy a helicopter and put it in the hands of the people that need it. And we should be able to do that quickly. We’ve been building combat helicopters for a long time in this country. I don’t understand why the heck it is so hard to buy a helicopter.”.

(b) SENSE OF CONGRESS.—It is the sense of Congress that, based on the findings under subsection (a), the Secretary of Defense should have the authority to expedite
the procurement of a replacement aircraft for the UH–1N helicopter.

(c) WAIVER AND CONTRACT AUTHORITY.—Subject to subsection (d), in procuring a replacement aircraft for the UH–1N helicopter, the Secretary of Defense may—

(1) waive any provision of law requiring the use of competitive procedures for the procurement; and

(2) enter into a contract for the procurement on a sole-source basis.

(d) NOTICE AND CERTIFICATION.—Not later than 15 days before exercising the authority under subsection (c), the Secretary shall submit to the congressional defense committees, in writing—

(1) notice of the intent of the Secretary to exercise such authority; and

(2) a certification that—

(A) the Secretary has reviewed—

(i) the threshold requirements for the UH–1N replacement aircraft program; and

(ii) any delays that may have occurred while the Air Force pursued strategies for the procurement of such aircraft on an other than sole-source basis; and

(B) after conducting such review, the Secretary has determined that entering into a con-
tract on a sole-source basis under subsection (e)—

(i) is in the national security interests of the United States; and

(ii) is necessary to ensure that a UH–1N replacement aircraft enters service by not later than September 30, 2020.

SEC. 132. LIMITATION ON SELECTION OF SINGLE CONTRACTOR FOR C–130H AVIONICS MODERNIZATION PROGRAM INCREMENT 2.

(a) LIMITATION.—The Secretary of the Air Force may not select only a single prime contractor to carry out increment 2 of the C–130H avionics modernization program until the Secretary submits to the congressional defense committees a written certification that, in selecting such a single prime contractor—

(1) the Secretary will ensure, to the extent practicable, that commercially available off-the-shelf items are used under the program, including technology solutions and nondevelopmental items; and

(2) excessively restrictive military specification standards will not be used to restrict or eliminate full and open competition in the selection process.

(b) DEFINITIONS.—In this section, the terms “commercially available off-the-shelf item”, “full and open com-
petition”, and “nondevelopmental item” have the meanings given the terms in chapter 1 of title 41, United States Code.

SEC. 133. LIMITATION ON AVAILABILITY OF FUNDS FOR EC–130H COMPASS CALL RECAPITALIZATION PROGRAM.

(a) LIMITATION.—None of the funds authorized to be appropriated by this Act or otherwise made available for any fiscal year for the EC–130H Compass Call recapitalization program of the Air Force may be obligated or expended until a period of 30 days has elapsed following the date on which the Under Secretary of Defense for Acquisition, Technology, and Logistics submits to the congressional defense committees the certification described in subsection (b).

(b) CERTIFICATION.—The certification described in this subsection is a written statement certifying that—

(1) an independent review of the acquisition process for the EC–130H Compass Call recapitalization program of the Air Force has been conducted; and

(2) as a result of such review, it has been determined that the acquisition process for such program complies with all applicable laws, guidelines, and best practices.
SEC. 134. COST-BENEFIT ANALYSIS OF UPGRADES TO MQ–9 REAPER AIRCRAFT.

(a) IN GENERAL.—The Secretary of Defense, in consultation with the Secretary of the Air Force, shall conduct an analysis that compares the costs and benefits of the following:

(1) Upgrading fielded MQ–9 Reaper aircraft to a Block 5 configuration.

(2) Proceeding with the procurement of MQ–9B aircraft instead of upgrading fielded MQ–9 Reaper aircraft to a Block 5 configuration.

(b) REPORT REQUIRED.—

(1) IN GENERAL.—Not later than 180 days after the date of the enactment of this Act, the Secretary of Defense shall submit to the congressional defense committees a report that includes the results of the cost-benefit analysis conducted under subsection (a).

(2) FORM OF REPORT.—The report required by paragraph (1) shall be submitted in unclassified form, but may include a classified annex.

SEC. 135. INCREASE IN AMOUNTS FOR ENHANCING INTELLIGENCE, SURVEILLANCE, AND RECONNAISSANCE CAPABILITY.

(a) INCREASE.—Notwithstanding the amounts set forth in the funding tables in division D, the amount au-
authorized to be appropriated in section 101 for aircraft procurement, Air Force, as specified in the corresponding funding table in division D, for BA 05: Modification of Inservice Aircraft: E-8 (line 056) is hereby increased by $23,091,000.

(b) OFFSET.—Notwithstanding the amounts set forth in the funding tables in division D, the amount authorized to be appropriated in section 101 for aircraft procurement, Air Force, as specified in the corresponding funding table in division D, for BA 05: Modification of Inservice Aircraft / BSA 5: Other Aircraft (line 050) is hereby reduced by $23,091,000.

(a) AUTHORITY FOR PROCUREMENT OF ECONOMIC ORDER QUANTITIES.—Subject to subsection (c), the Secretary of Defense may enter into one or more contracts, beginning with the fiscal year 2018 program year, for the procurement of economic order quantities of the material and equipment described in subsection (b).
(b) Material and Equipment Described.—The material and equipment described in this subsection is material and equipment—

(1) that has completed formal hardware qualification testing for the F-35 aircraft program; and

(2) is to be used in procurement contracts to be awarded under the F-35 aircraft program in fiscal years 2019 and 2020.

(c) Limitations.—

(1) Maximum Amount.—Of the funds authorized to be appropriated by this Act or otherwise made available for the Department of Defense for fiscal year 2018 or any fiscal year thereafter for the F-35 aircraft program, not more than $661,000,000 may be obligated or expended to enter into contracts under subsection (a).

(2) Certification.—The Secretary of Defense may not enter into a contract under subsection (a) until a period of 15 days has elapsed following the date on which the Secretary submits to the congressional defense committees a written certification that the contract to be entered into under such subsection meets the following conditions:

(A) The contract will result in significant cost savings as compared to the total antici-
pated costs of procuring the property through contracts that are not for economic order quantities.

(B) The estimates of the cost of the contract and the anticipated cost savings resulting from the contract are realistic.

(C) The minimum need for the property that is to be procured under the contract is expected to remain substantially unchanged during the contract period.

(D) There is a reasonable expectation that, throughout the contract period, the head of the relevant military department or defense agency will request funding for the contract at the level required to avoid contract cancellation.

(E) The design of the property that is to be procured under the contract is expected to remain substantially unchanged and the technical risks associated with such design are not excessive.

(F) Entering into the contract will promote the national security interests of the United States.

(G) The contract satisfies the conditions described in subparagraphs (C) through (F) of
SEC. 142. LIMITATION ON DEMILITARIZATION OF CERTAIN CLUSTER MUNITIONS.

(a) LIMITATION.—Except as provided in subsection (c), the Secretary of Defense may not demilitarize any cluster munitions until the date on which the Secretary of Defense submits to the congressional defense committees the certification described in subsection (b).

(b) CERTIFICATION.—The certification described in this subsection is a written certification that the Department of Defense has an inventory of covered munitions that meets not less than 75 percent of the operational requirements of the Department with respect to cluster munitions across the full range of military operational environments.

(c) EXCEPTION FOR SAFETY.—The limitation under subsection (a) shall not apply to the demilitarization of cluster munitions that the Secretary determines—

(1) are unserviceable as a result of an inspection, test, field incident, or other significant failure to meet performance or logistics requirements; or

(2) are unsafe or could pose a safety risk if not demilitarized or destroyed.

(d) DEFINITIONS.—In this section:
(1) Cluster munition.—The term “cluster munition” means a munition that is composed of a nonreusable canister or delivery body that contains multiple, conventional submunitions, without regard to the mode by which the munition is delivered. The term does not include—

(E) non-explosive kinetic effect submunitions;

(F) electronic effects; or

(G) landmines.

(2) Covered munitions.—The term “covered munitions” means cluster munitions containing submunitions that, after arming, do not result in more than 1 percent unexploded ordnance (as that term is defined in section 101(e)(5) of title 10, United States Code) across the range of intended operational environments.

(3) Demilitarize.—The term “demilitarize”, when used with respect to a cluster munition or components of a cluster munition—
(A) means to destroy the military offensive or defensive advantages inherent in the munition or its components; and

(B) includes any mutilation, scrapping, melting, burning, or alteration that prevents the use of the munition or its components for the military purposes for which the munition or its components was designed or for a lethal purpose.

(1) Secretary of Defense James Mattis has stated: “It is appropriate for the Combatant Commands to incorporate drivers of instability that impact the security environment in their areas into their planning.”.

(2) Secretary of Defense James Mattis has stated: “I agree that the effects of a changing climate — such as increased maritime access to the
Arctic, rising sea levels, desertification, among others — impact our security situation.”.

(3) Chairman of the Joint Chiefs of Staff Joseph Dunford has stated: “It’s a question, once again, of being forward deployed, forward engaged, and be in a position to respond to the kinds of natural disasters that I think we see as a second or third order effect of climate change.”.

(4) Former Secretary of Defense Robert Gates has stated: “Over the next 20 years and more, certain pressures-population, energy, climate, economic, environmental-could combine with rapid cultural, social, and technological change to produce new sources of deprivation, rage, and instability.”.

(5) Former Chief of Staff of the U.S. Army Gordon Sullivan has stated: “Climate change is a national security issue. We found that climate instability will lead to instability in geopolitics and impact American military operations around the world.”.

(6) The Office of the Director of National Intelligence (ODNI) has stated: “Many countries will encounter climate-induced disruptions—such as weather-related disasters, drought, famine, or damage to infrastructure—that stress their capacity to respond, cope with, or adapt. Climate-related impacts will also
contribute to increased migration, which can be par-

(7) The Government Accountability Office
(GAO) has stated: “DOD links changes in precipita-
tion patterns with potential climate change impacts
such as changes in the number of consecutive days
of high or low precipitation as well as increases in
the extent and duration of droughts, with an associ-
ated increase in the risk of wildfire. . . this may re-
sult in mission vulnerabilities such as reduced live-
fire training due to drought and increased wildfire
risk.”

(8) A three-foot rise in sea levels will threaten
the operations of more than 128 United States mili-
tary sites, and it is possible that many of these at-
risk bases could be submerged in the coming years.

(9) As global temperatures rise, droughts and
famines can lead to more failed states, which are
breeding grounds of extremist and terrorist organi-
izations.

(10) In the Marshall Islands, an Air Force
radar installation built on an atoll at a cost of
$1,000,000,000 is projected to be underwater within two decades.

(11) In the western United States, drought has amplified the threat of wildfires, and floods have damaged roads, runways, and buildings on military bases.

(12) In the Arctic, the combination of melting sea ice, thawing permafrost, and sea-level rise is eroding shorelines, which is damaging radar and communication installations, runways, seawalls, and training areas.

(13) In the Yukon Training Area, units conducting artillery training accidentally started a wildfire despite observing the necessary practices during red flag warning conditions.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) climate change is a direct threat to the national security of the United States and is impacting stability in areas of the world both where the United States Armed Forces are operating today, and where strategic implications for future conflict exist;

(2) there are complexities in quantifying the cost of climate change on mission resiliency, but the Department of Defense must ensure that it is pre-
pared to conduct operations both today and in the future and that it is prepared to address the effects of a changing climate on threat assessments, resources, and readiness; and

(3) military installations must be able to effectively prepare to mitigate climate damage in their master planning and infrastructure planning and design, so that they might best consider the weather and natural resources most pertinent to them.

(c) REPORT.—

(1) REPORT REQUIRED.—Not later than one year after the date of the enactment of this Act, the Secretary of Defense shall submit to the Committees on Armed Services of the Senate and the House of Representatives a report on vulnerabilities to military installations and combatant commander requirements resulting from climate change over the next 20 years.

ing, drought, desertification, wildfires, thawing permafrost, and any other categories the Sec-
retary determines necessary.

(B) An overview of mitigations that may be necessary to ensure the continued oper-
ational viability and to increase the resiliency of the identified vulnerable military installations and the cost of such mitigations.

(C) A discussion of the climate-change re-
lated effects on the Department, including the increase in the frequency of humanitarian as-
sistance and disaster relief missions and the theater campaign plans, contingency plans, and global posture of the combatant commanders.

(1) In General.—Not later than 60 days after the date of the enactment of this Act, the Secretary of Defense shall provide a briefing to the Committee on Armed Services of the House of Representatives on a strategy to ensure that there is sufficient exper-

SEC. 1036. RESTRICTION ON USE OF CERTAIN FUNDS PENDING SOLICITATION OF BIDS FOR WESTERN PACIFIC DRY DOCK.

(a) FINDINGS.—Congress makes the following findings:

(1) Following closure of the Department of the Navy ship repair facility in Guam in 1997 following the Base Realignment and Closure round of 1995, operation of the facility was turned over to a private company.

(2) While streamlining operations, resulting in savings to the Navy of approximately $38,000,000
each year, the company was able to maintain the
depot-level capabilities of the facility with dry-dock-
ing capability that had existed in Apra Harbor since
World War II.

(3) From 1997 to 2012, the private operator
successfully performed 28 major overhauls with dry-
dockings of Navy, Military Sealift Command, and
Coast Guard vessels, 27 mid-term availabilities, as
well as the emergency dry-docking of USS San
Francisco (SSN-711) after the nuclear powered sub-
marine collided with a seamount off the coast of
Guam in 2005.

(4) While the privately owned dry-dock, Ma-
chinist, was undergoing upgrades and refurbishment
in 2013, the Navy announced that it would split the
long-standing depot-level capability in Guam into
two pieces, awarding an initial contract for pier-side
ship repair, to be followed by a contract for dry-dock
ship repair.

(5) At this time, the Committee on Armed
Services of the House of Representatives, including
the Delegate from Guam, as well as the Governor of
Guam, objected to this plan, and a conditional
agreement was made wherein the Navy committed to
restoring dry-docking capabilities expeditiously fol-
lowing issuance of the pier-side contract.

(6) Despite repeated requests from the Com-
mittee on Armed Services of the House of Rep-
resentatives, the Delegate from Guam, and the Gov-
ernor of Guam over the past four years, the Sec-
retary of the Navy has failed to issue the dry-dock
contract.

(7) The Navy conducted a business case anal-
ysis to assess options for a dry-docking capability in
Guam in 2014 and agreed to provide a copy of the
report to Congress upon completion. The draft busi-
ness case analysis was provided to the Committee on
Armed Services of the House of Representatives on
March 3, 2016, but a final document was not pro-
duced.

(8) The draft business case analysis evaluated
200 potential options for restoring a dry-docking ca-
pability in Guam, recommending seven potential
courses of action, with estimated costs ranging from
$324,000,000 to $398,000,000 over a 50-year life
cycle. The business case analysis concluded that any
of these options are significant savings when com-
pared with the cost of not having a dry-docking ca-
pability in Guam, which exceeds $700,000,000 over a 50-year period.

(9) The Navy has removed machinery and equipment needed to perform major overhauls from the former ship repair facility, and shifted ship repair work previously performed in Guam to various foreign locations in the Western Pacific. The total cost of Navy ship repair contracts in Guam have gone from $45,000,000 in 2010 to $16,000,000 in 2016.

(10) As a result of Navy actions over the past five years, the number of skilled workers engaged in ship repair in Guam has been reduced from a combined total of approximately 550 at three ship-repair companies in Guam to the current level of 150. Due to this degraded workforce and equipment capabilities, the Navy is now forced to rely almost exclusively on foreign ship repair instead at a time when the Committee believes tensions and threats of crisis in the Western Pacific can put access to foreign shipyards at risk.

(11) Navy leadership has long acknowledged the importance of a depot-level, dry-docking capability in Guam, as evidenced by the following:
(A) “Robust depot-level ship repair capability in Guam is a matter of strategic importance and remains an operational necessity because ships of the 7th Fleet have high operational tempo and experience vast distances between repair facilities.” (Letter from the Commander of the Pacific Fleet to the Governor of Guam, dated February 15, 2013).

(B) “We must maintain a viable ship maintenance capability in Guam to include dry-docking in support of operations and contingency plans (OPLANs and CONPLANs) and the U.S. Navy rebalance to the Pacific. Guam is a strategic in-theater location for depot-level ship maintenance on sovereign U.S. territory. This is a significant factor given that commercial dry docks available in foreign countries considered friendly to the United States may become unavailable to SEVENTH Fleet ships in time of crisis or war. Availability of CPF ships would be stressed if assets are required to dry dock in CONUS due to the non-availability of a secure dry docking capability in the Western Pacific. Dry-docking in Guam is a critical component of depot-level ship repair. The capability
must be maintained and regularly exercised so that a capability and expertise are available to support ships of the SEVENTH Fleet in peace and war.” (Letter from the Commander of the Pacific Fleet to the Chief of Naval Operations, dated February 7, 2014).

(C) On February 24, 2016, in testimony before the Committee on Armed Services of the House of Representatives, Admiral Harry Harris, Commander of the United States Pacific Command, affirmed that he continues to view robust ship repair capabilities as a matter of strategic importance and an operational priority for United States Pacific Fleet.

(12) The Navy currently has four fast-attack nuclear submarines homeported in Guam.

(13) The Navy homeports submarine squadrons at seven locations in the United States, each of which has a dry-docking capability, with the exception of Guam.

(14) The Committee on Armed Services of the House of Representatives believes that dry-docking capability in Guam is a strategic requirement and a cost-effective means of ensuring the Forward De-
ployed Fleet has depot-level repair capabilities at a
United States port in the Western Pacific.

(15) Amounts were authorized to be appro-
niated in the National Defense Authorization Act
for Fiscal Year 2017 (Public Law 114–328) and ap-
propriated in the Consolidated Appropriations Act,
2017 (Public Law 115–31) for funds be applied to
chartering a dry dock to meet fleet maintenance re-
quirements in the Western Pacific.

(b) LIMITATION ON USE OF FUNDS.—Not more than
75 percent of the funds authorized to be appropriated or
otherwise made available for the Office of the Secretary
of the Navy may be obligated or expended until the Sec-
retary submits to Congress notice that a request for pro-
posals has been issued to solicit bids for the chartering
of a dry dock in the Western Pacific that satisfies the min-
imum requirements for heavy ship depot-level repair.

SEC. 1066. SENSE OF CONGRESS REGARDING AIRCRAFT
CARRIERS.

(a) Findings.—Congress makes the following find-
ings:

(1) Naval aviation was born in the United
States when Eugene Ely launched from the deck of
a United States Navy ship on November 14, 1910,
in a Curtiss Model D.

(2) In 1915, Cpt. Henry C. Mustin made the
first catapult launch and first take off in a ship un-
derway in a Curtiss Model AB-2, beginning a cen-
tury of technological advancements that have led to
today’s Electromagnetic Aircraft Launch System
which has replaced the steam pistons with powerful
magnets to launch jet aircraft.

(3) In 1924, Lt. Dixie Kiefer made the first
night catapult launch in a Vought UO-1 in San
Diego harbor, leading to today’s aircraft carriers
being a floating city at sea with a 24-hour airport.

(4) The first nuclear-powered aircraft carrier,
USS Enterprise (CVN 65), was commissioned in
1961, ushering in a new era of the world’s most
dominant and capable warships.

(5) In 2013, the first of the next generation of
aircraft carriers, Gerald R. Ford, was christened,
marking a continuation of the innovative naval ava-
tion spirit, technological advancement, and war
fighting capabilities of aircraft carriers.

(6) In 2013, aircraft carrier USS George Wash-
ington (CVN 73) provided humanitarian assistance,
medical supplies, food, and water to the victims in
the Philippines of Super Typhoon Haiyan, once
again demonstrating versatility of the aircraft car-
rier for combat, diplomatic and humanitarian oper-
ations.
(7) For over 70 years, aircraft carriers have been employed in every major and many smaller conflicts, including World War II, Korea, Vietnam, Grenada, Lebanon, Libya, Operation Desert Storm, Afghanistan, Iraq, and the fight against terrorism.

(8) The United States Navy’s aircraft carriers are a cornerstone of the Nation’s ability to project its power and strength.

(9) When aircraft carriers sail the globe they are a statement of national purpose and a symbol of the Nation’s industrial strength, competitive edge, and economic prosperity.

(10) Aircraft carriers are 4.5 acres of sovereign United States territory enabling the Nation to reduce its dependency on other nations while it pursues its national security interests.

(11) Aircraft carriers enable the United States Armed Forces to carry out operations from international waters, avoiding the complications of securing fly-over rights and land-base rights from other nations.

(12) Aircraft carriers are a modern, very mobile United States military base complete with airfield, hospital, and communications systems from which the United States can strike at its enemies.
(13) Over 90 percent of world trade is moved by sea, including much of the world’s gas and oil supply, and aircraft carriers and their strike forces are constantly on patrol in vital regions of the world to keep shipping lanes open and protect the interests of the United States and its allies.

(14) There are more than 2,450 companies in 48 States and over 364 congressional districts, and more than 13,100 shipbuilders who proudly contribute to the construction and maintenance of these complex and technologically advanced ships.

(15) Thousands of members of the United States Armed Forces have served the Nation aboard aircraft carriers in war, peace, and times of crisis.

(16) When crisis occurs the first question that comes to everyone’s lips is “Where is the nearest carrier?”.

(b) Sense of Congress.—It is the sense of Congress that—

(1) United States aircraft carriers are the pre-eminent power projection platform and have served the Nation’s interests in times of war and in times of peace, adapting to the immediate and ever-changing nature of the world for over 90 years;
(2) aircraft carrier contributions and heritage should be celebrated; and

(3) the people of the United States should be encouraged to celebrate the history of aircraft carriers in the United States and to always remember the vital role these vessels play in defending the Nation’s freedom.

SEC. 1068. Sense of Congress Recognizing the United States Navy Seabees.

(a) Findings.—Congress makes the following findings:

(1) On March 5, 1942, Navy Construction Battalion personnel were officially named Seabees by the Navy Department.

(2) The purpose of the Navy Seabees is to build, maintain, and support base infrastructure in remote locations for the Navy and Marine Corps, while simultaneously being capable of engaging in combat operations.
(3) The Navy Seabees dual-role is exemplified by the Seabee motto *Construimus, Batuimus*: We Build, We Fight.

(4) Throughout their history, the Navy Seabees have answered the call of duty to protect the United States and its democratic values both in times of war and peace.

(5) The Navy Seabees support United States national security at combatant commands worldwide, through the construction, both on land and underwater, of bases, airfields, roads, bridges, and other infrastructure.

(6) Members of the Navy Seabees and their families have demonstrated unmatched courage and dedication to sacrifice for the United States, from service in World War II, Korea, and Vietnam to the recent conflicts in Afghanistan, Iraq, and elsewhere.

(7) The Navy Seabees exhibit honor, personal courage, and commitment as they sacrifice their personal comfort to keep the United States safe from threats.

(8) The Navy Seabees continue to display strength, professionalism, and bravery in the all-volunteer force.
(b) SENSE OF CONGRESS.—Congress recognizes the 
United States Navy Seabees and the Navy personnel who 
comprise the construction force for the Navy and the Ma-
rine Corps as critical elements in deterring conflict, over-
coming aggression, and rebuilding democratic institutions.

SEC. 1069. RECOGNITION OF THE UNITED STATES SPECIAL 
OPERATIONS COMMAND.

(a) FINDINGS.—Congress makes the following find-
ings:

(1) On April 16, 1987, Congress required the 
establishment of a Special Operations Command, 
which was to be an elite fighting force drawn from 
all of the branches of the Armed Forces.

(2) As a headquarters organization, USSOCOM 
comprises four service-component commands, con-
sisting of the United States Army Special Oper-
ations Command, United States Naval Special War-
fare Command, United States Marine Corps Forces 
Special Operations Command, and United States Air 
Force Special Operations Command, and includes 
various sub-unified commands.

(3) Each service-component command has sub-
component commands consisting of—
(A) Army Special Forces (Green Berets), Rangers, Special Operations Aviation, Civil Affairs, Military Information Support Operations;
(B) Navy SEALs and Special Warfare Combatant-Craft Crewmen;
(C) Air Force Commandos and Special Tactics Airmen;
(D) Marine Raiders; and
(E) other Joint Special Operations Forces;
(4) USSOCOM protects and defends the United States in a variety of ways, including direct action, special reconnaissance, unconventional warfare, foreign internal defense, civil affairs operations, counterterrorism, military information support operations, counter-proliferation of weapons of mass destruction, security force assistance, counterinsurgency, hostage rescue and recovery, foreign humanitarian assistance, and other missions as assigned.
(5) USSOCOM has an unequaled ability to analyze and respond to terrorist threats and USSOCOM has led many successful missions globally.
(6) Many USSOCOM missions are classified, so the American people may never know the details and extent of the bravery of Special Operations Forces, but a sample of missions provide a glimpse into the
bravery and talents of these members of the Armed Forces:

(A) On May 2, 2011, Osama bin Laden was killed in a special operations mission in Pakistan, for which the outstanding men and women in America’s intelligence and Armed Forces, especially those from SOCOM, remained focused on bringing Osama bin Laden to justice, and on May 2, 2011, justice was done.

(B) On April 12, 2009, the Maersk Alabama was rescued unharmed in a special operations mission in the Indian Ocean, after a five-day standoff between the United States Navy and Somali pirates.

(C) On April 1, 2003, Jessica Lynch, a United States Army clerk taken prisoner for nine days in Iraq, was rescued by Special Operations Forces during a night raid in the hospital where she was being held.

(D) On December 13, 2003, in Operation Red Dawn, Special Operations Forces captured deposed Iraqi president Saddam Hussein, who was hiding in a spider hole.
(E) On January 17, 1991, as Operation Desert Storm began, Special Operations Forces slipped hundreds of miles into Iraq to identify Iraqi Scud missiles as targets for American fighter jets.

AFRIDI.

(a) FINDINGS.—Congress finds the following:

(1) The attacks of September 11, 2001, killed approximately 3,000 people, most of whom were Americans, but also included hundreds of individuals with foreign citizenships, nearly 350 New York Fire Department personnel, and about 50 law enforcement officers.

(2) Downed United Airlines flight 93 was reportedly intended, under the control of the al-Qaeda high-jackers, to crash into the White House or the Capitol in an attempt to kill the President of the United States or Members of the United States Congress.

(3) The September 11, 2001, attacks were largely planned and carried out by the al-Qaeda terrorist network led by Osama bin Laden and his deputy Ayman al Zawahiri, after which Osama bin Laden enjoyed safe haven in Pakistan from where he continued to plot deadly attacks against the United States and the world.

(4) Since 2001, the United States has provided more than $30 billion in security and economic aid to Pakistan.
(5) The United States very generously and swiftly responded to the 2005 Kashmir Earthquake in Pakistan with more than $200 million in emergency aid and the support of several United States military aircraft, approximately 1,000 United States military personnel, including medical specialists, thousands of tents, blankets, water containers and a variety of other emergency equipment.

(6) The United States again generously and swiftly contributed approximately $150 million in emergency aid to Pakistan following the 2010 Pakistan flood, in addition to the service of nearly twenty United States military helicopters, their flight crews, and other resources to assist the Pakistan Army’s relief efforts.

(7) The United States continues to work tirelessly to support Pakistan’s economic development, including millions of dollars allocated towards the development of Pakistan’s energy infrastructure, health services and education system.

(8) The United States and Pakistan continue to have many critical shared interests, both economic and security related, which could be the foundation for a positive and mutually beneficial partnership.
(9) Dr. Shakil Afridi, a Pakistani physician, is a hero to whom the people of the United States, Pakistan and the world owe a debt of gratitude for his help in finally locating Osama bin Laden before more innocent American, Pakistani and other lives were lost to this terrorist leader.

(10) Pakistan, the United States and the international community had failed for nearly 10 years following attacks of September 11, 2001, to locate and bring Osama bin Laden, who continued to kill innocent civilians in the Middle East, Asia, Europe, Africa and the United States, to justice without the help of Dr. Afridi.

(11) The Government of Pakistan’s imprisonment of Dr. Afridi presents a serious and growing impediment to the United States’ bilateral relations with Pakistan.

(12) The Government of Pakistan has leveled and allowed baseless charges against Dr. Afridi in a politically motivated, spurious legal process.

(13) Dr. Afridi is currently imprisoned by the Government of Pakistan, a deplorable and unconscionable situation which calls into question Pakistan’s actual commitment to countering terrorism.
and undermines the notion that Pakistan is a true ally in the struggle against terrorism.

(b) Sense of Congress.—It is the sense of Congress that Dr. Shakil Afridi is an international hero and that the Government of Pakistan should release him immediately from prison.

SEC. 1233. STATEMENT OF POLICY ON THE RUSSIAN FEDERATION.

(a) Findings.—Congress makes the following findings:

(1) The Russian Federation, under the leadership of President Vladimir Putin, continues to demonstrate its malign activities to expand its sphere of influence and undermine international norms and institutions both regionally and globally, including through the following activities:

(B) The Russian Federation has interfered in the April 2017 election and runoff election in May 2017 of the French Presidential elections. As confirmed by Admiral Mike Rogers, Director of the National Security Agency, at a Senate Committee on Armed Services hearing on May 9, 2017, “If you look at the French elections . . . we had become aware of Russian activity.”

(C) The Russian Federation has threatened stability in their sphere of influence. As stated by General Curtis M. Scaparrotti, Commander of the United States European Command, in testimony at a House Committee on Armed Services hearing on March 28, 2017, “In the east, a resurgent Russia has turned from partner to antagonist. Countries along Russia’s periphery, especially Ukraine and
Georgia, are under threat from Moscow's mali-

(D) The Russian Federation has occupied

(E) The Russian Federation has employed

hybrid warfare tactics, including cyber warfare,
electronic warfare, and information warfare to
gain influence. This includes the use of hybrid
tactics in assisting combined Russian-separatist
forces in eastern Ukraine and, in 2008, the
Russian incursion in Georgia.

(F) Military intervention in the civil war in

Syria.

(2) Both the Secretary of Defense, James
Mattis, and the Chairman of the Joint Chiefs of
Staff, General Joseph Dunford, highlight the Rus-
sian Federation as the number one geo-strategic
threat to the United States.

(3) The Government of the Russian Federation
continues its decades’ long modernization of its con-
ventional military force with the buildup of large
numbers of professionalized forces on Russia’s bor-
ders with Europe, re-establishing military presence
in the Arctic, investment in its nuclear triad, ad-
vanced weapons systems, fighter jets, and naval ves-

sels.

(4) In June 2016, the Center for Strategic and
International Studies released its report, “Evalu-
ating U.S. Army Force Posture in Europe: Phase
II”, which included the recommendation that an
Armed Brigade Combat Team and a combat aviation
brigade should be permanently assigned to Europe.
The report also recommends additional prepositioned
equipment in Western Europe.

(5) In January 2016, the National Commission
on the Future of the Army released its findings and
recommendations, which included Recommendation
14, calling for permanently stationing an Armored
Brigade Combat Team Forward in Europe and Rec-
ommendation 15 calling for the conversion of Army
Europe Aviation Headquarters to a warfighting mis-

sion command.

(6) In the National Defense Authorization Act
for Fiscal Year 2015 (Public Law 113–291), the
National Defense Authorization Act for Fiscal Year
2016 (Public Law 114–92), and the National De-
fense Authorization Act for Fiscal Year 2017 (Pub-
lic Law 114–328), Congress authorized approxi-
mately $5,200,000 for the European Reassurance
Initiative, now the European Deterrence Initiative, to reassure partners and allies and begin building a credible deterrence to the Russian Federation through—

(A) large increases in conventional resources, including additional rotational deployments of United States troops and prepositioning of equipment into Europe; and

(B) increased funding for unconventional warfare resources, including cyber and special operations forces, and for intelligence and indicators and warnings.

(b) Statement of Policy.—

(1) In General.—It is the policy of the United States to develop, implement, and sustain credible deterrence against aggression by the Government of the Russian Federation, in order to enhance regional and global security and stability.

(2) Conduct of Policy.—The policy described in paragraph (1) shall, among other things, be carried out through a comprehensive defense strategy and guidance to outline and resource the necessary defense capabilities in the European theater. Such policy shall include the following:
(A) Increased United States presence in Europe through additional permanently stationed forces.

(B) Continued United States presence in Europe through additional rotational forces.

(C) Increased United States prepositioned military equipment to include logistics enablers and a division headquarters.

(D) Sufficient and necessary infrastructure additions and improvements throughout the European theater.

(E) Increased investment and priority to counter unconventional methods of warfare, including sufficient cyber warfare resources, information operations resources, and intelligence resources.

(F) Effective security cooperation resources and opportunities with partners and allies, including NATO member countries.

SEC. 1235. LIMITATION ON AVAILABILITY OF FUNDS RELATING TO IMPLEMENTATION OF THE OPEN SKIES TREATY.

(a) LIMITATION ON CONDUCT OF FLIGHTS.—

(1) IN GENERAL.—None of the funds authorized to be appropriated by this Act or otherwise
made available for any fiscal year after fiscal year 2017 for the Department of Defense for operation and maintenance, Defense-wide, or operation and maintenance, Air Force, may be obligated or expended to conduct any flight during such fiscal year for purposes of implementing the Open Skies Treaty until the date that is seven days after the date on which the President submits to the appropriate congressional committees a plan described in paragraph (2) with respect to such fiscal year.

(c) Open Skies Treaty Defined.—In this section, the term “Open Skies Treaty” means the Treaty on Open Skies, done at Helsinki March 24, 1992, and entered into force January 1, 2002.

SEC. 1236. Sense of Congress on Importance of Nuclear Capabilities of NATO.

(a) Findings.—Congress finds the following:

(1) The Warsaw Summit Communique, issued on July 9, 2016, by the North Atlantic Treaty Organization (in this section referred to as “NATO”) clearly defines the need for, and the importance of, the nuclear mission of NATO.

(2) The Warsaw Summit Communique states—

(A) with respect to the nuclear deterrence capability of NATO, “As a means to prevent conflict and war, credible deterrence and defence is essential. Therefore, deterrence and defence, based on an appropriate mix of nuclear, conventional, and missile defence capabilities, remains a core element of our overall strategy. . . The fundamental purpose of NATO’s nuclear capability is to preserve peace, prevent coercion, and deter aggression. Nuclear weapons are unique. Any employment of nuclear weapons against NATO would fundamentally
alter the nature of a conflict. The circumstances in which NATO might have to use nuclear weapons are extremely remote’’;

(B) with respect to the nature of the nuclear deterrence posture of NATO, “NATO must continue to adapt its strategy in line with trends in the security environment—including with respect to capabilities and other measures required—to ensure that NATO’s overall deterrence and defence posture is capable of addressing potential adversaries’ doctrine and capabilities, and that it remains credible, flexible, resilient, and adaptable.”; and

(C) with respect to the importance of contributions to the nuclear deterrence mission from across the NATO alliance, “The strategic forces of the Alliance, particularly those of the United States, are the supreme guarantee of the security of the Allies. The independent strategic nuclear forces of the United Kingdom and France have a deterrent role of their own and contribute to the overall security of the Alliance. These Allies’ separate centres of decision-making contribute to deterrence by complicating the calculations of potential adversaries.
NATO’s nuclear deterrence posture also relies, in part, on United States’ nuclear weapons forward-deployed in Europe and on capabilities and infrastructure provided by Allies concerned. These Allies will ensure that all components of NATO’s nuclear deterrent remain safe, secure, and effective. That requires sustained leadership focus and institutional excellence for the nuclear deterrence mission and planning guidance aligned with 21st century requirements. The Alliance will ensure the broadest possible participation of Allies concerned in their agreed nuclear burden-sharing arrangements.”

(3) Secretary of Defense James Mattis, in response to the advance policy questions for his Senate confirmation hearing on January 12, 2017, stated that—

(A) “NATO’s nuclear deterrence posture relies in part on U.S. nuclear weapons forward-deployed in Europe and on capabilities and infrastructure provided by NATO allies. These capabilities include dual-capable aircraft that contribute to current burden-sharing arrangements within NATO. In general, we must take care to maintain this particular capability, and
to modernize it appropriately and in a timely fashion.”; and

(B) the role of the nuclear weapons of the United States is “to deter nuclear war and to serve as last resort weapons of self-defense. In this sense, U.S. nuclear weapons are fundamental to our nation’s security and have historically provided a deterrent against aggression and security assurance to U.S. allies. A robust, flexible, and survivable U.S. nuclear arsenal underpins the U.S. ability to deploy conventional forces worldwide.”.

(4) On March 28, 2017, General Curtis Scaparrotti, Commander of the United States European Command and the Supreme Allied Commander, Europe, testified to the Committee on Armed Services of the House of Representatives that “NATO and U.S. nuclear forces continue to be a vital component of our deterrence. Our modernization efforts are crucial; we must preserve a ready, credible, and safe nuclear capability.”.

(5) The Russian Federation is currently undergoing significant modernization and recapitalization of all three legs of its nuclear triad, continues to field and modernize a large variety of non-strategic
nuclear weapons, and is developing and deploying new and unique nuclear capabilities.

(6) Russia remains in violation of the INF Treaty due to the development, testing, and, most recently, the operational deployment of ground-launched cruise missiles in violation of the INF Treaty.

(7) On March 28, 2017, General Paul Selva, Vice Chairman of the Joint Chiefs of Staff, described the security consequences of the deployment of such INF Treaty-violating missiles, testifying to the Committee on Armed Services of the House of Representatives that “our assessment of the impact is that it more threatens NATO and infrastructure within the European continent than any other...area of the world that we have national interests in or alliance interests in.”.

(8) On March 28, 2017, General Curtis Scaparrotti, in testimony before the Committee on Armed Services of the House of Representatives, responded to a question asking if Russia intends to return to compliance with the INF Treaty by stating, “I don’t have any indication that they will at this time.”.
(9) Rhetoric from Russian officials has demonstrated that Moscow has sought to leverage its nuclear arsenal to threaten and intimidate neighboring countries, including members of NATO, as was the case when the Russian Ambassador to Denmark stated, “Danish warships will be targets for Russian nuclear missiles” in response to Denmark’s potential cooperation in the NATO missile defense system.

(b) Sense of Congress.—It is the sense of Congress that—

(1) the nuclear and conventional deterrence capabilities of NATO are of critical importance to the security of the United States and of the NATO alliance, and must continue to adapt to the changed security environment in Europe;

(2) the ability of the United States to forward-deploy dual-capable aircraft and nuclear weapons, and of select members of NATO to participate in the nuclear deterrence mission of NATO by hosting forward-deployed nuclear weapons of the United States or operating dual-capable aircraft, is central to the credibility of the nuclear deterrence and defense posture of NATO;

(3) the strategic forces of the United States, the independent nuclear forces of the United King-
dom and the French Republic, and the dual-capable aircraft operated by the United States and other members of NATO constitute foundational elements of the nuclear deterrence and defense posture of NATO;

(4) NATO should modernize its nuclear-related infrastructure to ensure the highest-level of safety and security;

(5) effective deterrence requires NATO to conduct nuclear planning and exercises aligned with 21st century requirements and modernize nuclear-related capabilities and infrastructure, including dual-capable aircraft, command and control networks, and facilities; and

(6) to ensure the continued credibility of the deterrence and defense posture of NATO, the planned completion of F–35A aircraft development and testing, as well as the delivery of such aircraft to members of NATO, must not be delayed.

(c) INF Treaty Defined.—In this section, the term “INF Treaty” means the Treaty Between the United States of America and the Union of Soviet Socialist Republics on the Elimination of Their Intermediate-Range and Shorter-Range Missiles, commonly referred to as the “Intermediate-Range Nuclear Forces (INF) Treaty”,

(1) Georgia is a valued friend of the United States and has repeatedly demonstrated its commitment to advancing the mutual interests of both countries, including the deployment of Georgian forces as part of the NATO-led International Security Assistance Force (ISAF) in Afghanistan and the Multi-National Force in Iraq.

(2) The European Deterrence Initiative builds the partnership capacity of Georgia so it can work more closely with the United States and NATO, as well as provide for its own defense.

Support Mission in Afghanistan with the second
largest contingent on the ground.

(b) SENSE OF CONGRESS.—Congress—

(1) The Baltic States of Estonia, Latvia, and

States, and they have repeatedly demonstrated their
commitment to advancing our mutual interests as
well as those of the NATO Alliance.

(2) Operation Atlantic Resolve is a series of ex-
ercises and coordinating efforts demonstrating the
United States’ commitment to its European partners
and allies, including the Baltic States of Estonia,
Latvia, and Lithuania, with the shared goal of peace and stability in the region. Operation Atlantic Re-
solve strengthens communication and understanding, and is an important effort to deter Russian aggres-
sion in the region.

(3) Through Operation Atlantic Resolve, the European Deterrence Initiative undertakes exercises, training, and rotational presence necessary to reas-
sure and integrate our allies, including the Baltic States, into a common defense framework.

(4) All three Baltic States contributed to the NATO-led International Security Assistance Force in Afghanistan, sending disproportionate numbers of troops and operating with few caveats. The Baltic States continue to engage in Operation Resolute Support in Afghanistan.

(b) SENSE OF CONGRESS.—Congress—

(1) reaffirms its support for the principle of col-
lective defense in Article 5 of the North Atlantic Treaty for our NATO allies, including Estonia, Latvia, and Lithuania;

ritorial integrity, and inviolability of Estonia, Latvia, and Lithuania as well as their internationally recog-
nized borders, and expresses concerns over increas-
ingly aggressive military maneuvering by the Russian Federation near their borders and airspace;

(3) expresses concern over and condemns subversive and destabilizing activities by the Russian Federation within the Baltic States; and

(4) encourages the Administration to further enhance defense cooperation efforts with Estonia, Latvia, and Lithuania and supports the efforts of their Governments to provide for the defense of their people and sovereign territory.

(1) Economic sanctions.

(2) Diplomacy.

(3) Additional deployment of ballistic or cruise missile defense capabilities, or other United States capabilities that would offset any potential Russian military advantage from such a failure.
(4) Redeployment of United States nuclear forces beyond the levels required by the New START Treaty, and the associated costs and impacts on United States operations.

(5) Legal countermeasures available under other treaties between the United States and Russia, including under the Treaty on Open Skies, done at Helsinki March 24, 1992, and entered into force January 1, 2002.

c (c) NEW START TREATY.—In this section, the term “New START Treaty” means the Treaty between the United States of America and the Russian Federation on Measures for the Further Reduction and Limitation of Strategic Offensive Arms, signed at Prague April 8, 2010, and entered into force February 5, 2011.

SEC. 1241. SHORT TITLE.

This subtitle may be cited as the “Intermediate-Range Nuclear Forces (INF) Treaty Preservation Act of 2017”.

SEC. 1242. FINDINGS.

Congress makes the following findings:
(1) The 2014, 2015, and 2016 Department of State reports entitled, “Adherence to and Compliance with Arms Control, Nonproliferation, and Disarmament Agreements and Commitments”, all stated that the United States has determined that “the Russian Federation is in violation of its obligations under the INF Treaty not to possess, produce, or flight-test a ground-launched cruise missile (GLCM) with a range capability of 500 km to 5,500 km, or to possess or produce launchers of such missiles”.

(2) The 2016 report also noted that “the cruise missile developed by Russia meets the INF Treaty definition of a ground-launched cruise missile with a range capability of 500 km to 5,500 km, and as such, all missiles of that type, and all launchers of the type used or tested to launch such a missile, are prohibited under the provisions of the INF Treaty”.

(3) Potential consistency and compliance concerns regarding the INF Treaty noncompliant GLCM have existed since 2008, were not officially raised with the Russian Federation until 2013, and were not briefed to the North Atlantic Treaty Organization (NATO) until January 2014.
(4) The United States Government is aware of other consistency and compliance concerns regarding Russia actions vis-à-vis its INF Treaty obligations.

(5) Since 2013, senior United States officials, including the President, the Secretary of State, and the Chairman of the Joint Chiefs of Staff, have raised Russian noncompliance with the INF Treaty to their counterparts, but no progress has been made in bringing the Russian Federation back into compliance with the INF Treaty.

(6) In April 2014, General Breedlove, the Supreme Allied Commander Europe, correctly stated, "A weapon capability that violates the INF, that is introduced into the greater European land mass, is absolutely a tool that will have to be dealt with . . . It can’t go unanswered.”.

(7) The Department of Defense in its September 2013 report, Report on Conventional Prompt Global Strike Options if Exempt from the Restrictions of the Intermediate-Range Nuclear Forces Treaty Between the United States of America and the Union of Soviet Socialist Republics, stated that it has multiple validated military requirement gaps due to the prohibitions imposed on the United States as a result of its compliance with the INF Treaty.
(8) It is not in the national security interests of the United States to be unilaterally legally prohibited from developing dual-capable ground-launched cruise missiles with ranges between 500 and 5,500 kilometers, while Russia makes advances in developing and fielding this class of weapon systems, and such unilateral limitation cannot be allowed to continue indefinitely.

(9) Admiral Harry Harris, Jr., Commander of the United States Pacific Command, testified before the Senate Armed Services Committee on April 27, 2017, that “[W]e’re in a multi-polar world where we have a lot of countries who are developing these weapons, including China, that I worry about. And I worry about their DF-21 and DF-26 missile programs, their anti-carrier ballistic missile programs, if you will. INF doesn’t address missiles launched from ships or airplanes, but it focuses on those land-based systems. I think there’s goodness in the INF treaty, anything you can do to limit nuclear weapons writ-large is generally good. But the aspects of the INF Treaty that limit our ability to counter Chinese and other countries’ land-based missiles, I think, is problematic.”.
A material breach of the INF Treaty by the Russian Federation affords the United States the right to invoke legal countermeasures which include suspension of the treaty in whole or in part.

Article XV of the INF Treaty provides that “Each Party shall, in exercising its national sovereignty, have the right to withdraw from this Treaty if it decides that extraordinary events related to the subject matter of this Treaty have jeopardized its supreme interests.”.

SEC. 1243. COMPLIANCE ENFORCEMENT REGARDING RUSSIAN VIOLATIONS OF THE INF TREATY.

(a) Statement of United States Policy.—It is the policy of the United States as follows:

(1) The actions undertaken by the Russian Federation in violation of the INF Treaty constitute a material breach of the treaty.

(2) In light of the Russian Federation’s material breach of the INF Treaty, the United States is legally entitled to suspend the operation of the INF Treaty in whole or in part for so long as the Russian Federation continues to be in material breach.

(3) For so long as the Russian Federation remains in noncompliance with the INF Treaty, the United States should take actions to encourage the
Russian Federation return to compliance, including by—

(A) providing additional funds for the capabilities identified in section 1243(d) of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114–92; 129 Stat. 1062); and

(B) seeking additional missile defense assets in the European theater to protect United States and NATO forces from ground-launched missile systems of the Russian Federation that are in noncompliance with the INF Treaty.

(b) Authorization of Additional Appropriations.—

(1) In general.—Of the funds authorized to be appropriated by this Act for fiscal year 2018 for research, development, test, and evaluation, as specified in the funding table in division D, $50,000,000 shall be made available for—

(A) the development of active defenses to counter ground-launched missile systems with ranges between 500 and 5,500 kilometers;

(B) counterforce capabilities to prevent attacks from these missiles; and
(C) countervailing strike capabilities to enhance the capabilities of the United States identified in section 1243(d) of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114–92; 129 Stat. 1062).

(2) DEVELOPMENT.—Of the amount authorized to be appropriated by paragraph (1), $25,000,000 is authorized to be appropriated for activities undertaken to carry out section 1244(a), including with respect to research and development activities.

SEC. 1244. DEVELOPMENT OF INF RANGE GROUND-LAUNCHED MISSILE SYSTEM.

(a) ESTABLISHMENT OF A PROGRAM OF RECORD.—The Secretary of Defense shall establish a program of record to develop a conventional road-mobile ground-launched cruise missile system with a range of between 500 to 5,500 kilometers.

(b) REPORT.—Not later than 120 days after the date of the enactment of this Act, the Secretary of Defense shall submit to the congressional defense committees, the Committee on Foreign Affairs of the House of Representatives, and the Committee on Foreign Relations of the Senate a report on the cost, schedule, and feasibility to modify existing and planned missile systems, including the tomahawk land attack cruise missile, the standard missile-3,
the standard missile-6, and Army tactical missile system
missiles for ground launch with a range of between 500
and 5,500 kilometers in order to provide any of the capa-
bilities identified in section 1243(d) of the National De-
fense Authorization Act for Fiscal Year 2016 (Public Law

SEC. 1245. NOTIFICATION REQUIREMENT RELATED TO RUS-
SIAN FEDERATION DEVELOPMENT OF NON-
COMPLIANT SYSTEMS AND UNITED STATES
ACTIONS REGARDING MATERIAL BREACH OF
INF TREATY BY THE RUSSIAN FEDERATION.

(a) Declaration of Policy.—Congress declares
that because of the Russian Federation’s violations of the
INF Treaty, including the flight-test, production, and pos-
session of prohibited systems, its actions have defeated the
object and purpose of the INF Treaty, and thus constitute
a material breach of the INF Treaty.

(b) Notification by Director of National In-
telligence.—

(1) In General.—The Director of National In-
telligence shall notify the appropriate congressional
committees of any development, deployment, or test
of a system by the Russian Federation that the Di-
rector determines is inconsistent with the INF Trea-
ty.
(2) **DEADLINE.**—A notification under this subsection shall be made not later than 15 days after the date on which the Director makes the determination under this subsection with respect to which the notification is required.

(c) **REPORT BY PRESIDENT.**—Not later than 15 months after the date of the enactment of this Act, the President shall submit to the appropriate congressional committees a report that contains a determination of the President of whether the Russian Federation has flight-tested, produced, or is in possession of a ground-launched cruise missile or ground-launched ballistic missile with a range of between 500 and 5,500 kilometers during each of the three consecutive 120-day periods beginning on the date of the enactment of this Act.

(d) **UNITED STATES ACTIONS.**—If the determination of the President contained in the report required to be submitted under subsection (c) is that the Russian Federation has flight-tested, produced, or is in possession of any missile described in subsection (c) during each of the periods described in subsection (c), the prohibitions set forth in Article VI of the INF Treaty shall no longer be binding on the United States as a matter of United States law.
SEC. 1246. LIMITATION ON AVAILABILITY OF FUNDS TO EXTEND THE IMPLEMENTATION OF THE NEW START TREATY.

None of the funds authorized to be appropriated or otherwise made available for fiscal year 2018 for the Department of Defense may be obligated or expended to extend the implementation of the New START Treaty unless the President certifies to the appropriate congressional committees that the Russian Federation has verifiably eliminated all missiles that are in violation of or may be inconsistent with the INF Treaty.

SEC. 1247. REVIEW OF RS–26 BALLISTIC MISSILE.

(a) IN GENERAL.—The President, in consultation with the Secretary of State, the Secretary of Defense, the Chairman of the Joint Chiefs of Staff, and the Director of National Intelligence, shall conduct a review of the RS–26 ballistic missile of the Russian Federation.

(b) REPORT REQUIRED.—Not later than 90 days after the date of the enactment of this Act, the President, in consultation with the Secretary of State, the Secretary of Defense, the Chairman of the Joint Chiefs of Staff, and the Director of National Intelligence, shall submit to the appropriate congressional committees a report on the review conducted under subsection (a). The report shall include—
(1) a determination whether the RS–26 ballistic missile is covered under the New START Treaty or would be a violation of the INF Treaty because Russia has flight-tested such missile to ranges covered by the INF Treaty in more than one warhead configuration; and

(2) if the President determines that the RS–26 ballistic missile is covered under the New START Treaty, a determination whether the Russian Federation—

(A) has agreed through the Bilateral Consultative Commission that such a system is limited under the New START Treaty central limits; and

(B) has agreed to an exhibition of such a system.

(c) EFFECT OF DETERMINATION.—If the President, with the concurrence of the Secretary of State, the Secretary of Defense, the Chairman of the Joint Chiefs of Staff, and the Director of National Intelligence, determines that the RS–26 ballistic missile is covered under the New START Treaty and that the Russian Federation has not taken the steps described under subsection (b)(2), the United States Government shall consider for purposes of all policies and decisions that the RS–26 ballistic mis-
sile of the Russian Federation is a violation of the INF Treaty.

Subtitle F—Fostering Unity
Against Russian Aggression Act
of 2017

SEC. 1251. SHORT TITLE.

This subtitle may be cited as the “Fostering Unity
Against Russian Aggression Act of 2017”.

SEC. 1252. FINDINGS AND SENSE OF CONGRESS.

(a) FINDINGS.—Congress finds the following:

(1) General Curtis M. Scaparrotti, Commander
of the United States European Command, testified
before the House Armed Services Committee on
March 27, 2017, that “Today we face the most dy-
namic European security environment in history.” and that “Russia’s malign actions are supported by its diplomatic, information, economic, and military initiatives.”.

(2) The Russian Federation has shifted to a military doctrine that envisions using nuclear weapons in an attempt to end a failing regional conventional conflict. On June 25, 2015, Deputy Secretary of Defense Robert Work and then-Vice-Chairman of the Joint Chiefs of Staff Admiral James Winnefeld testified before the House Armed Services Committee that “Russian military doctrine includes what some have called an ‘escalate to de-escalate’ strategy—a strategy that purportedly seeks to deescalate a conventional conflict through coercive threats, including limited nuclear use. We think that this label is dangerously misleading. Anyone who thinks they can control escalation through the use of nuclear weapons is literally playing with fire. Escalation is escalation, and nuclear use would be the ultimate escalation.”.

(3) General Scaparrotti noted in his March 27, 2017, testimony before the House Armed Services Committee that “Moscow’s provocative rhetoric and
nuclear threats increase the likelihood of misunder-
standing and miscalculation.”.

(4) The Russian Federation continues to con-
duct ongoing influence campaigns aimed at under-
mining democracies around the world. According to
an assessment by the intelligence community, “Rus-
sian President Vladimir Putin ordered an influence
campaign in 2016 aimed at the U.S. presidential
election”, which included the use of the Russian
campaign in 2016 aimed at the U.S. presidential
election”, which included the use of the Russian
military intelligence organization. The intelligence
community also assessed that Russia would apply
lessons learned to future influence efforts worldwide,
including against United States allies and their elec-
tion systems.

(5) The Russian Federation continues its ag-
gression on its periphery. In 2008, the Russian Fed-
eration fomented conflict in Georgia. Further, the
Russian Federation is directing combined Russian-
Separatist units in eastern Ukraine, actively inciting
violence and prolonging the most significant conflict
in Europe.

(6) The investment of over $5 billion in the Eu-
ropean Reassurance Initiative (ERI), now the Euro-
pean Deterrence Initiative (EDI), has proven suc-
cessful in significantly enhancing the ability of
United States forces, NATO allies, and regional partners to deter Russian aggression. EDI has not only assured our European allies and partners but supported essential investments in NATO’s military capacity, interoperability, and agility.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the risks of miscalculation in a crisis are exacerbated by the Russian Federation’s shift to a military doctrine of “escalate to de-escalate”, lowering the threshold for Russian use of nuclear weapons and thereby increasing the risk of using nuclear weapons, potentially escalating into a massive nuclear exchange;

(2) subversive and destabilizing activities by the Russian Federation targeting NATO allies and partners causes concern and should be condemned;

(3) European Deterrence Initiative (EDI) investments are long-term and, as such, Congress expects future budgets to reflect United States commitment by planning for funding in the base budget, and further EDI should build on United States presence by increasing the United States permanent force posture; and
(4) credible deterrence requires steadfast co-
operation and joint action with NATO allies and
partners and other United States allies and partners
in Europe.

(e) **Sense of Congress.**—It is the sense of Congress that concerns persist over the growing sophistication of unconventional and hybrid state-sponsored threats by the Russian Federation as demonstrated through its advancement and integration of conventional warfare, economic warfare, cyber and information operations, intelligence operations, and other activities to undermine United States national security objectives.
SEC. 1256. PLAN TO INCREASE CYBER AND INFORMATION OPERATIONS, DETERRENCE, AND DEFENSE.

(a) Plan.—The Secretary of Defense and the Secretary of State shall jointly develop a plan to—

(3) identify potential areas of cybersecurity collaboration and partnership capabilities with NATO and other European allies and partners of the United States.

(b) Briefing.—Not later than 180 days after the date of the enactment of this Act, the Secretary of Defense shall provide to the appropriate congressional committees a briefing on the plan required under subsection (a).

SEC. 1257. SENSE OF CONGRESS ON ENHANCING MARITIME CAPABILITIES.

Congress notes the 2016 Force Structure Assessment (FSA) that increased the requirement for fast attack submarine (SSN) from 48 to 66 and supports an acquisition
plan that enhances maritime capabilities that address this requirement.

**SEC. 1258. PLAN TO REDUCE THE RISKS OF MISCALCULATION AND UNINTENDED CONSEQUENCES THAT COULD PRECIPITATE A NUCLEAR WAR.**

(a) **FINDINGS.**—Congress finds that—

(1) the Russian Federation has adopted a dangerous nuclear doctrine that includes a strategy of “escalate to de-escalate”, which could lower the threshold for Russian use of nuclear weapons in a regional conflict; and

(2) such nuclear doctrine exacerbates the risks of miscalculation and unintended consequences that could precipitate a nuclear war.

(b) **PLAN REQUIRED.**—

(1) **IN GENERAL.**—Not later than March 1, 2018, the Secretary of Defense, in coordination with the Chairman of the Joint Chief of Staff, the Commander of the United States Strategic Command, and the Commander of the United States European Command, shall submit to the congressional defense committees a plan that includes options to reduce the risk of miscalculation and unintended consequences that could precipitate a nuclear war.

SEC. 1264. EXTENDED DETERRENCE COMMITMENT TO THE
ASIA-PACIFIC REGION.

(a) FINDINGS.—Congress finds the following:

(1) The 2010 Nuclear Posture Review re-affirmed the commitment of the United States to ex-
tended deterrence and continued protection of the
treaty allies of the United States under the United
States nuclear umbrella.

(2) The United States-Republic of Korea Deter-
rence Strategy Committee and the United States-
Japan Extended Deterrence Dialogue provide valu-
able communication channels for ensuring the com-
mitment of the United States to the policy of ex-
tended nuclear deterrence and allow for bilateral dis-
cussions on how United States capabilities can be le-
veraged to credibly deter, and if necessary, defeat,
North Korean nuclear weapons, weapons of mass de-
struction, and missile threats and aggression.

(3) Statements by officials of the United States
have consistently emphasized the United States com-
mitment to providing extended deterrence and de-
fense across the full spectrum of military capabili-
ties, including nuclear capabilities.

(4) On September 9, 2016, President Obama
responded to a North Korean nuclear test by issuing
the following statement, “I restated to President
Park and Prime Minister Abe the unshakable U.S. commitment to take necessary steps to defend our allies in the region, including through our deployment of a Terminal High Altitude Area Defense (THAAD) battery to the ROK, and the commitment to extended deterrence, guaranteed by the full spectrum of U.S. defense capabilities.”.

(5) On October 14, 2016, Chairman of the Joint Chiefs of Staff, General Joseph Dunford, “re-affirmed the ironclad commitment of the U.S. to defend both the ROK and Japan and provide extended deterrence guaranteed by the full spectrum of U.S. military capabilities, including conventional, nuclear, and missile defense capabilities”.

(6) On October 19, 2016, Secretary of Defense Ashton Carter, stated, “the U.S. commitment to the defense of South Korea is unwavering. This includes our commitment to provide extended deterrence, guaranteed by the full spectrum of U.S. defense capabilities. Make no mistake: Any attack on America or our allies will not only be defeated, but any use of nuclear weapons will be met with an overwhelming and effective response.”.

(7) On October 19, 2016, Secretary of State John Kerry, during a joint press conference with the
South Korean Foreign Minister, confirmed the United States would “defend South Korea through a robust combined defense posture and through extended deterrence, including the US nuclear umbrella, conventional strike and missile defense capabilities.”.

(8) On February 3, 2017, Secretary of Defense James Mattis, during a visit to South Korea, stated, “America’s commitments to defending our allies and to upholding our extended deterrence guarantees remain ironclad: Any attack on the United States, or our allies, will be defeated, and any use of nuclear weapons would be met with a response that would be effective and overwhelming.”.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the defense of the Republic of Korea and Japan must remain a top priority for the administration;

(2) the United States maintains an unwavering and steadfast commitment to the policy of extended deterrence, especially with respect to South Korea and Japan;

(3) bilateral extended deterrence dialogues and discussions with South Korea and Japan are of
great value to the United States and its partners and must remain a central component of these relationships;

(4) the United States must sustain and modernize current United States nuclear capabilities to ensure the extended deterrence commitments of the United States remain credible and executable; and

(5) the timely development, production, and deployment of modern nuclear-capable aircraft are fundamental to ensure that the United States remains able to meet extended deterrence requirements in the Asia-Pacific region far into the future.

(e) RULE OF CONSTRUCTION.—Nothing in this section may be construed to alter the shared goal of the United States, South Korea, and Japan for a denuclearized Korean Peninsula or to change the United States nuclear posture in the Asia-Pacific region.

SEC. 1265. AUTHORIZATION OF APPROPRIATIONS TO MEET UNITED STATES FINANCIAL OBLIGATIONS UNDER COMPACT OF FREE ASSOCIATION WITH PALAU.

Any reference in such Instruction to the Under Secretary of Defense for Acquisition, Technology, and Logistics shall be deemed to be a reference to the Under Secretary of Defense for Research and Engineering, including with respect to the Under Secretary serving as the chairman of the Missile Defense Executive Board.
SEC. 1682. PRESERVATION OF THE BALLISTIC MISSILE DEFENSE CAPACITY OF THE ARMY.

(a) Limitation.—None of the funds authorized to be appropriated by this Act or otherwise made available for fiscal year 2018 or any fiscal year thereafter for the Army may be obligated or expended to demilitarize any GEM–T interceptor or remove any such interceptor from the operational inventory of the Army until the date on which the Secretary of the Army submits to the congressional defense committees the evaluation conducted under subsection (b).

(b) Evaluation.—The Secretary and the Chief of Staff of the Army shall jointly conduct an evaluation of the ability of the Army to meet warfighter requirements and operational needs if GEM–T interceptors are removed from the operational inventory of the Army. In conducting such evaluation, the Secretary and the Chief of Staff shall evaluate whether the Army can maintain an inventory of interceptors necessary to retain the capability provided by GEM–T interceptors and to meet such operational needs by either—

(1) recertifying GEM–T interceptors (either with or without modification); or

(2) developing, testing, and fielding a new low-cost interceptor that can be placed on the oper-

SEC. 1685. DEFENSE OF HAWAII FROM NORTH KOREAN BALLISTIC MISSILE ATTACK.

(a) FINDINGS; SENSE OF CONGRESS.—

(1) FINDINGS.—Congress finds the following:

(A) The North Korean ballistic missile threat to the United States, including Hawaii, is growing rapidly.

(B) Since Kim Jong-un took power in 2012, North Korea has conducted 78 ballistic missile tests, of which 61 are considered to have been successful.

(C) The existing ballistic missile defense protection for Hawaii, including the ground-based midcourse defense system in Alaska, and the sea-based x-band radar, provide limited ballistic missile defense capabilities today.

(D) Through use of existing ballistic missile defense assets, including AN/TPY–2 radars
and the Aegis Ashore Site located on the Pacific Missile Range Facility, the ballistic missile defense of Hawaii could benefit from a near-term improvement by adding a layer of defense.

(E) The proposed program of record for a medium range discriminating radar to be fully mission capable after 2023 would leave the defense of Hawaii dependent only on the ground-based midcourse defense system in Alaska, and the sea-based x-band radar until that time, while the threat to the United States, including Hawaii, from North Korean ballistic missiles continues to grow.

(F) The National Defense Authorization Act for Fiscal Year 2017 (Public Law 114–328) required that the Missile Defense Agency plan to provide additional ballistic missile defense sensor coverage for the defense of Hawaii and “field such radar or equivalent sensor by not later than December 31, 2021”.

(G) When asked at a hearing of the Committee on Armed Services of the House of Representatives on April 26, 2017, about the threat to Hawaii from North Korean ballistic missiles, the Commander of the United States Pacific
Command, Admiral Harry Harris, testified that “Kim Jong-un is clearly in a position to threaten Hawaii today. . .I believe that our ballistic missile (defense) architecture is sufficient to protect Hawaii today. But it can be overwhelmed” and “I think that we would be better served, my personal opinion, is that we would be better served with a defensive Hawaii radar and interceptors in Hawaii. I know that is being discussed”.

(2) SENSE OF CONGRESS.—It is the sense of Congress that Congress supports assessing the feasibility of improving the missile defense of Hawaii from the evolving ballistic missile threat, including from North Korea, through a permanent missile defense sensor capability and the possible introduction of interim missile defense coverage.

(b) SEQUENCED APPROACH.—The Secretary of Defense shall protect the test and training operations of the Pacific Missile Range Facility, and assess the siting and functionality of a discrimination radar for homeland defense throughout the Hawaiian Islands before assessing the feasibility of improving the missile defense of Hawaii by using existing missile defense assets that could materially improve the defense of Hawaii.
(c) Test.—The Director of the Missile Defense Agency shall—

(1) not later than 270 days after the date of the enactment of this Act, conduct a test to evaluate and demonstrate, if technologically feasible, the capability to defeat a simple intercontinental ballistic missile threat using the standard missile 3 block IIA missile interceptor; and

(2) as part of the integrated master test plan for the ballistic missile defense system, develop a plan to demonstrate a capability to defeat a complex intercontinental ballistic missile threat, including a complex threat posed by the intercontinental ballistic missiles of North Korea.

(d) Report.—Not later than 120 days after the date of the enactment of this Act, the Secretary of Defense shall submit to the congressional defense committees a report—

(1) that indicates whether demonstrating an intercontinental ballistic missile defense capability against North Korean ballistic missiles by the standard missile 3 block IIA missile interceptor poses any risks to strategic stability; and

(2) if the Secretary determines under paragraph (1) that such demonstration poses such risks
to strategic stability, a description of the plan developed and implemented by the Secretary to address and mitigate such risks, as determined appropriate by the Secretary.

SEC. 1686. AEGIS ASHORE ANTI-AIR WARFARE CAPABILITY.

The Secretary shall ensure the deployment of such capabilities—

(1) at such sites in Romania by not later than one year after the date of the enactment of this Act; and

(2) at such sites in Poland by not later than one year after the declaration of operational status for such sites.

(b) REPROGRAMMING AND TRANSFERS.—Any reprogramming or transfer made to carry out subsection (a) shall be carried out in accordance with established procedures for reprogramming or transfers.

Subtitle B—Program Authorizations, Restrictions, and Limitations

SEC. 3111. NUCLEAR SECURITY ENTERPRISE INFRASTRUCTURE RECAPITALIZATION AND REPAIR.

(a) FINDINGS.—Congress finds the following:

(1) On September 7, 2016, during testimony before the Subcommittee on Strategic Forces of the Committee on Armed Services of the House of Representatives—

(A) the Administrator for Nuclear Security, Frank Klotz, said—

(i) “Our infrastructure is extensive, complex, and, in many critical areas, several decades old. More than half of NNSA’s approximately 6,000 real property assets are over 40 years old, and nearly 30 percent date back to the Manhattan Project era. Many of the enterprise’s critical utility, safety, and support systems are failing at an increasing and unpredictable
rate, which poses both programmatic and safety risk.”; and

(ii) “I can think of no greater threat to the nuclear security enterprise than the state of NNSA’s infrastructure.”;

(B) the President and Chief Executive Officer of Consolidated Nuclear Security, Morgan Smith, said, “Many key facilities at both [Pantex and Y–12] were constructed in the 1940s and were intended to operate for as little as one decade. Many facilities and their supporting infrastructure have exceeded or far exceeded their expected life, and major systems within the facilities are beginning to fail.”; and

(C) the Director of Los Alamos National Laboratory, Dr. Charlie McMillan, said, “One of the things that keeps me up at night is the realization that essential capabilities are held at risk by the possibility of such failures; in many cases, our enterprise has a single point of failure.”.

(2) In a letter sent on December 23, 2015, by the Secretary of Energy, Ernest Moniz, to the Director of the Office of Management and Budget, Shaun Donovan, the Secretary said, “A majority of the Na-
tional Nuclear Security Administration’s (NNSA) facilities and systems are well beyond end-of-life. . . Infrastructure problems such as falling ceilings are increasing in frequency and severity, unacceptably risking the safety and security of both personnel and material at NNSA facilities, as well as in some instances, potential offsite risks. The entire complex could be placed at risk if there is a single failure where a single point would disrupt a critical link in infrastructure.”.

(3) The Nuclear Posture Review published in April 2010 stated that “In order to sustain a safe, secure, and effective U.S. nuclear stockpile as long as nuclear weapons exist, the United States must possess a modern physical infrastructure. . . Today’s nuclear complex, however, has fallen into neglect. Although substantial science, technology, and engineering investments were made over the last decade under the auspices of the Stockpile Stewardship Program, the complex still includes many oversized and costly-to maintain facilities built during the 1940s and 1950s. Some facilities needed for working with plutonium and uranium date back to the Manhattan Project. Safety, security, and environmental issues associated with these aging facili-
ties are mounting, as are the costs of addressing them.”.

(4) In 2009, the bipartisan Congressional Commission on the Strategic Posture of the United States established by section 1062 of the National Defense Authorization for Fiscal Year 2008 (Public Law 110–181; 122 Stat. 319) stated, with regards to key production facilities, that “existing facilities are genuinely decrepit and are maintained in a safe and secure manner only at high cost”.

(5) Previous efforts to address the deferred maintenance and repair challenges within the nuclear security enterprise, such as the Facilities Infrastructure and Recapitalization Program and the recent halt in the growth of backlog metrics, are laudable but insufficient for the magnitude of the problem.

(6) Recent figures provided by the Administrator for Nuclear Security estimate the backlog of deferred maintenance and repair needs of the nuclear security enterprise to be approximately $3,700,000,000.

(b) FACILITIES AND INFRASTRUCTURE RECAPITALIZATION AND REPAIR PROGRAM.—
(1) Establishment.—Not later than 30 days after the date of the enactment of this Act, the Administrator for Nuclear Security shall establish and carry out a program known as the Facilities and Infrastructure Recapitalization and Repair Program to reduce the backlog of deferred maintenance and repair needs of the nuclear security enterprise (as defined in section 4002(6) of the Atomic Energy Defense Act (50 U.S.C. 2501(6))). The Administrator shall ensure that, by not later than five years after the date of the enactment of this Act, the program achieves the goal of reducing such backlog of deferred maintenance and repair needs by 50 percent.

(2) Authorities.—

(A) Process.—

(i) In general.—The Secretary of Energy shall provide to the Administrator a process that will enhance or streamline the ability of the Administrator to carry out the program under paragraph (1) in an efficient and effective manner, including with respect to—

(I) the demolition or construction of non-nuclear facilities of the Administration that have a total estimated
project cost of less than $100,000,000; and

(II) the decontamination, decommissioning, and demolition (to be performed in accordance with applicable health and safety standards used by the Defense Environmental Cleanup Program) of process-contaminated facilities of the Administration that have a total estimated project cost of less than $50,000,000.

(ii) FUNDING.—Clause (i) may be carried out using amounts authorized to be appropriated for fiscal year 2018 or any subsequent fiscal year.

(B) APPLICATION OF CERTAIN REQUIREMENTS.—For purposes of the Management Procedures Memorandum 2015-01 of the Office of Management and Budget, or such successor memorandum, in carrying out the program under paragraph (1), the Administrator may—

(i) perform new construction during a fiscal year that differs from the fiscal year of corresponding facility demolition;
(ii) perform demolition of different facility category codes and have that demolition credit count towards the construction of new facilities with a different facility category code; and

(iii) have the net reduction in infrastructure footprint for the five fiscal years prior to the date of the enactment of this Act, and the demolition during the five fiscal years following such date of enactment, considered as a factor for the purpose of meeting the intent of such memorandum.

(3) PLAN.—Together with the budget of the President submitted to Congress under section 1105(a) of title 31, United States Code, for fiscal year 2019, the Secretary and the Administrator shall jointly submit to the Committees on Armed Services of the House of Representatives and the Senate a plan to carry out the program under paragraph (1) to achieve the goal specified in such paragraph. Such plan shall include—

(A) the funding required to carry out the program during the period covered by the future-years nuclear security program under sec-
tion 3253 of the National Nuclear Security Administration Act (50 U.S.C. 2453); (B) the criteria for selecting and prioritizing projects within the program under paragraph (1); (C) mechanisms for ensuring the robust management and oversight of such projects; (D) a description of the process provided to the Administrator to carry out the program pursuant to paragraph (2)(A); (E) a description of any legislative actions the Secretary recommends to further enhance or streamline authorities or processes relating to the program; and (F) a certification by the Secretary that such budget will enable the program to meet the goal specified in paragraph (1). (4) TERMINATION.—The Administrator shall terminate the program under paragraph (1) on the date that is five years after the date of the enactment of this Act. (c) INCLUSION IN BIENNIAL DETAILED REPORT.—Section 4203(d)(4) of the Atomic Energy Defense Act (50 U.S.C. 2523) is amended—
(1) in subparagraph (B), by striking ‘‘; and’’ and inserting a semicolon;

(2) in subparagraph (C), by striking the period at the end and inserting ‘‘; and’’; and

(3) by adding at the end the following new sub-
paragraph:

“(D)(i) a description of—

“(I) the metrics (based on industry best practices) used by the Administrator to determine the infrastructure deferred maintenance and repair needs of the nu-
clear security enterprise; and

“(II) the percentage of replacement plant value being spent on maintenance and repair needs of the nuclear security enterprise; and

“(ii) an explanation of whether the annual spending on such needs complies with the rec-
ommendation of the National Research Council of the National Academies of Sciences, Engi-
neering, and Medicine that such spending be in an amount equal to four percent of the replace-
ment plant value, and, if not, the reasons for such noncompliance and a plan for how the Ad-
ministrator will ensure facilities of the nuclear
security enterprise are being properly sustained.”.

(d) Requirements Relating to Critical Decisions.—

(1) In general.—Subtitle A of title XLVII of
the Atomic Energy Defense Act (50 U.S.C. 2741 et
seq.) is amended by adding at the end the following
new section:

“SEC. 4715. MATTERS RELATING TO CRITICAL DECISIONS.

“(a) Post-critical Decision 2 Changes.—After
the date on which a plant project specifically authorized
by law achieves critical decision 2, the Administrator may
not change the requirements for such project if such
change increases the scope, schedule, or budget of such
project unless—

“(1) the Administrator submits to the congres-
sional defense committees—

“(A) a certification that the Administrator,
without delegation, authorizes such proposed
change; and

“(B) a cost-benefit and risk analysis of
such proposed change, including with respect
to—
“(i) the effects of such proposed change on the project cost and schedule; and

“(ii) any mission risks and operational risks from making such change or not making such change; and

“Sec. 4715. Matters relating to critical decisions.”.

(e) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the nuclear security enterprise, comprised of the infrastructure and capabilities of the laboratories and plants coupled with the dedicated and talented scientists, engineers, technicians, and administrators who form the backbone of the enterprise, are a central component of the nuclear deterrent of the United States;
(2) if left unaddressed, the state of the infrastructure within the nuclear security enterprise represents a direct, long-term threat to the credibility of the nuclear deterrent of the United States;

(3) both Congress and the President must take strong, sustained action to recapitalize and repair this infrastructure;

(4) the Administrator must continue to carry out expeditious demolition of old facilities of the Administration to reduce long-term costs and improve safety; and

(5) each budget of the President submitted to Congress under section 1105(a) of title 31, United States Code, for fiscal year 2019 and each fiscal year thereafter during the life of the program established pursuant to subsection (b)(1) should include funding in an amount sufficient to carry out the program to achieve the goal specified in such subsection.

SEC. 3112. INCORPORATION OF INTEGRATED SURETY ARCHITECTURE IN TRANSPORTATION.

subsection, the Administrator shall submit such determination to the congressional defense committees, including the results of an analysis conducted pursuant to paragraph (2).

“(2) Each determination made under paragraph (1) shall be based on a documented, system risk analysis that considers security risk reduction, operational impacts, and technical risk.

SEC. 3121. DESIGN COMPETITION.

(a) FINDINGS.—Congress finds the following:

(1) In January 2016, the co-chairs of a congressionally-mandated study panel from the National Academies of Science testified before the House Committee on Armed Services that:

(A) “The National Nuclear Security Administration (NNSA) complex must engage in robust design competitions in order to exercise the design and production skills that underpin stockpile stewardship and are necessary to meet evolving threats.”

(B) “To exercise the full set of design skills necessary for an effective nuclear deterrent, the NNSA should develop and conduct the first in what the committee envisions to be a series of design competitions that integrate the full end-to-end process from novel design conception through engineering, building, and non-nuclear testing of a prototype.”

(2) In March 2016 testimony before the House Committee on Armed Services regarding a December 2016 Defense Science Board (DSB) report titled,
“Seven Defense Priorities for the New Administration”, members of the DSB said:

(A) “A key contributor to nuclear deterrence is the continuous, adaptable exercise of the development, design, and production functions for nuclear weapons in both the DOD and DOE... Yet the DOE laboratories and DOD contractor community have done little integrated design and development work outside of life extension for 25 years, let alone concept development that could serve as a hedge to surprise.”

(B) “The Defense Science Board believes that the triad’s complementary features remain robust tenets for the design of a future force. Replacing our current, aging force is essential, but not sufficient in the more complex nuclear environment we now face to provide the adaptability or flexibility to confidently hold at risk what adversaries value. In particular, if the threat evolves in ways that favorably change the cost/benefit calculus in the view of an adversary’s leadership, then we should be in a position to quickly restore a credible deterrence posture.”
(3) In a memorandum dated May 9, 2014, then-Secretary of Energy Ernie Moniz said:

(A) “If nuclear military capabilities are to provide deterrence for the nation they need to be relevant to the emerging global strategic environment. The current stockpile was designed to meet the needs of a bipolar world with roots in the Cold War era. A more complex, chaotic, and dynamic security environment is emerging. In order to uphold the Department's mission to ensure an effective nuclear deterrent... we must ensure our nuclear capabilities meet the challenges of known and potential geopolitical and technological trends. Therefore we must look ahead, using the expertise of our laboratories, to how the capabilities that may be employed by other nations could impact deterrence over the next several decades.”

(B) “We must challenge our thinking about our programs of record in order to permit foresighted actions that may reduce, in the coming decades, the chances for surprise and that buttress deterrence.”

(b) DESIGN COMPETITION.—
(1) IN GENERAL.—In accordance with paragraph (2), the Administrator for Nuclear Security, in coordination with the Chairman of the Nuclear Weapons Council, shall carry out a new and comprehensive design competition for a nuclear warhead that could be employed on ballistic missiles of the United States by 2030. Such competition shall—

(A) examine options for warhead design and related delivery system requirements in the 2030s, including—

(i) life extension of existing weapons;

(ii) new capabilities; and

(iii) such other concepts that the Administrator and Chairman determine necessary to fully exercise and create responsive design capabilities in the enterprise and ensure a robust nuclear deterrent into the 2030s;

(B) assess how the capabilities and defenses that may be employed by other nations could impact deterrence in 2030 and beyond and how such threats could be addressed or mitigated in the warhead and related delivery systems;
(C) exercise the full set of design skills necessary for an effective nuclear deterrent and responsive enterprise through production of conceptual designs and, as the Administrator determines appropriate, production of non-nuclear prototypes of components or subsystems; and

(D) examine and recommend actions for significantly shortening timelines and significantly reducing costs associated with design, development, certification, and production of the warhead, without reducing worker or public health and safety.

(2) TIMING.—The Administrator shall—

(A) during fiscal year 2018 develop a plan to carry out paragraph (1); and

(B) during fiscal year 2019 implement such plan.

(c) BRIEFING.—Not later than March 1, 2018, the Administrator, in coordination with the Chairman of the Nuclear Weapons Council, shall provide a briefing to the Committees on Armed Services of the Senate and House of Representatives on the plan of the Administrator to carry out the warhead design competition under subsection (b). Such briefing shall include an assessment of
the costs, benefits, risks, and opportunities of such plan, particularly impacts to ongoing life extension programs and infrastructure projects.

“SEC. 3237. SECURITY CLEARANCE FOR DUAL NATIONALS OF HIGH THREAT FOREIGN STATES.

“(a) IN GENERAL.—In the case of an individual who is a United States national who also has the nationality of a foreign state that is on the list maintained by the Secretary of Energy under subsection (a) and who is appointed to or hired for a position designated by the Office of Personnel Management as critical sensitive or special sensitive, the Secretary shall provide additional review before approving a security clearance for such individual.

“(b) WAIVER.—

“(1) WAIVER AUTHORITY.—In the case of a person who is a United States national who also has the nationality of a foreign state identified under paragraph (2), the Secretary may waive the requirement under subsection (a).

“(2) FOREIGN STATES.—The Director of National Intelligence shall identify foreign states that permit citizens or nationals of the United States to serve in positions of trust equivalent to positions identified by the Office of Personnel Management as critical sensitive or special sensitive.”.

(b) Elements.—

(1) In General.—Each report under subsection (a) shall specify, for each unfunded priority covered by such report, the following:

(A) A summary description of such priority, including the objectives to be achieved if such priority is funded (whether in whole or in part).

(B) The additional amount of funds recommended in connection with the objectives under subparagraph (A).

(C) Account information with respect to such priority.
(2) Prioritization of Priorities.—Each report shall present the unfunded priorities covered by such report in order of urgency of priority.

(c) Unfunded Priority Defined.—In this section, the term “unfunded priority”, in the case of a fiscal year, means a program, activity, or mission requirement that—

(1) is not funded in the budget of the President for the fiscal year as submitted to Congress pursuant to section 1105 of title 31;

(2) is necessary to fulfill a requirement associated with the National Nuclear Security Administration; and

(3) would have been recommended for funding through the budget referred to in paragraph (1) by the Administrator in connection with the budget if—

(A) additional resources had been available for the budget to fund the program, activity, or mission requirement; or

(B) the program, activity, or mission requirement has emerged since the budget was formulated.

SEC. 3125. Plutonium Capabilities.

(a) Report.—Not later than 30 days after the date of the enactment of this Act, the Administrator for Nuclear Security shall submit to the congressional defense
committees, the Secretary of Defense, and the Comptroller General of the United States a report on the recommended alternative endorsed by the Administrator for recapitalization of plutonium science and production capabilities of the nuclear security enterprise. The report shall identify the recommended alternative endorsed by the Administrator and contain the analysis of alternatives, including costs, upon which the Administrator relied in making such endorsement.

(b) Certification.—Not later than 60 days after the date on which the Secretary of Defense receives the notification under subsection (a), the Chairman of the Nuclear Weapons Council shall submit to the congressional defense committees the written certification of the Chairman regarding whether the recommended alternative endorsed by the Administrator—

(1) is acceptable to the Secretary of Defense and the Nuclear Weapons Council and meets the requirements of the Secretary for plutonium pit production capacity and capability;

(2) is likely to meet the pit production timelines and milestones required by section 4219 of the Atomic Energy Defense Act (50 U.S.C. 2538a);
(3) is likely to meet pit production timelines and requirements responsive to military requirements;

(4) is cost effective and has reasonable near-term and lifecycle costs that are minimized, to the extent practicable, as compared to other alternatives, and has tested and documented the sensitivity of the cost estimates for each alternative to risks and changes in key assumptions;

(5) contains minimized and manageable risks as compared to other alternatives;

(6) can be acceptably reconciled with any differences in the conclusions made by the Office of Cost Assessment and Program Evaluation of the Department of Defense in the business case analysis of plutonium pit production capability issued in 2013; and

(7) has documented the assumptions and constraints used in the analysis of alternatives.

(c) FAILURE TO CERTIFY.—If the Chairman is unable to submit the certification under subsection (b), the Chairman shall submit to the congressional defense committees and the Administrator written notification describing why the Chairman is unable to make such certification and what steps the Administrator should take to improve
the plan of the Administrator to recapitalize plutonium pit
production capacity and capability to enable certification.

(d) ASSESSMENT.—Not later than 120 days after the
date on which the Comptroller General receives the notifi-
cation under subsection (a), the Comptroller General shall
provide to the congressional defense committees a briefing
containing the assessment of the Comptroller General of
the analysis of alternatives conducted by the Adminis-
trator to select a preferred alternative for recapitalizing
plutonium science and production capabilities.

SEC. 3126. PLAN FOR VERIFICATION, DETECTION, AND
MONITORING OF NUCLEAR WEAPONS AND
FISSILE MATERIAL.

(a) FINDINGS AND SENSE OF CONGRESS.—

(1) FINDINGS.—Congress finds the following:

(A) A January 2014 Defense Science
Board report found that “The nuclear future
will not be a linear extrapolation of the
past. . . [and] [t]he technologies and processes
designed for current treaty verification and in-
spections are inadequate to future monitoring
realities”.

(B) Section 3133 of the Carl Levin and
Howard P. “Buck” McKeon National Defense
Authorization Act for Fiscal Year 2015 (Public
Law 113–291) required an interagency plan for nuclear monitoring of nuclear weapons and fissile material, and section 3132 of the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114–328) required an update of such plan. In both instances, the reports submitted failed to answer the congressional requirements, and instead provided only a brief summary of the National Security Council structure and processes.

(2) Sense of Congress.—It is the sense of Congress that verification, detection, and monitoring of nuclear weapons and fissile material should be a priority for national security, and that the reports submitted to date do not reflect this priority, or the current and planned initiatives related to nuclear verification and detection.

(b) Plan.—The President, in consultation with the Secretary of State, the Secretary of Defense, the Secretary of Energy, the Secretary of Homeland Security, and the Director of National Intelligence, shall develop a plan for verification and monitoring relating to the potential proliferation of nuclear weapons, components of such weapons, and fissile material.
(c) ELEMENTS.—The plan developed under subsection (b) shall include the following:

(1) A plan and road map for verification, detection and monitoring, with respect to policy, operations, and research, development, testing, and evaluation, including—

(A) identifying requirements;

(B) costs and funding requirements over 10 years for such nuclear verification, detection and monitoring; and

(C) identifying and integrating roles, responsibilities, and planning for such nuclear verification, detection and monitoring.

(2) A detailed international engagement plan for building cooperation and transparency, including bilateral and multilateral efforts, to improve inspections, detection, and monitoring.

(3) A detailed description of—

(A) current and planned research and development efforts to improve monitoring, detection, and in-field inspection and analysis capabilities, including persistent surveillance, remote monitoring, and rapid analysis of large data sets, including open-source data; and
(B) measures to coordinate technical and operational requirements early in the process.

(4) Engagement of relevant departments and agencies of the Federal Government and the military departments (including the Open Source Center and the United States Atomic Energy Detection System), national laboratories, industry, and academia.

(d) DESIGNATION OF DOE.—The President shall designate the Department of Energy as the lead agency for development of the plan under subsection (b).

(e) BRIEFING.—Not later than 30 days after the date of the enactment of this Act, the Secretary of Energy, acting through the Administrator for Nuclear Security, shall provide to the appropriate congressional committees an interim briefing on the plan under subsection (b).

(f) LIMITATION.—Of the funds authorized to be appropriated by this Act or otherwise made available for fiscal year 2018 for the Department of Defense for supporting the Executive Office of the President, $10,000,000 may not be obligated or expended until the date on which the President submits to the appropriate congressional committees the plan under subsection (g)(1).

(g) SUBMISSION.—
(1) **DEADLINE.**—Not later than April 15, 2018, the President shall submit to the appropriate congressional committees the plan developed under subsection (b).

(2) **FORM.**—The plan under subsection (b) shall be transmitted in unclassified form, but, consistent with the protection of intelligence sources and methods, may include a classified annex.

(h) **APPROPRIATE CONGRESSIONAL COMMITTEES DEFINED.**—In this section, the term “appropriate congressional committees” means the following:

(1) The congressional defense committees.

(2) The Select Committee on Intelligence of the Senate and the Permanent Select Committee on Intelligence of the House of Representatives.

(3) The Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House of Representatives.

(4) The Committee on Homeland Security and Governmental Affairs of the Senate and the Committee on Homeland Security of the House of Representatives.

(5) The Committee on Commerce, Science, and Transportation of the Senate and the Committee on

SEC. 3132. ASSESSMENT OF MANAGEMENT AND OPERATING

CONTRACTS OF NATIONAL SECURITY LABORATORIES.

(a) Assessment.—Not later than 30 days after the

date of the enactment of this Act, the Administrator for

Nuclear Security shall seek to enter into a contract with

a federally funded research and development center to con-

efficiency, and effectiveness of the strategy of the Adminis-
trator with respect to management and operating con-
tracts for national security laboratories. The Adminis-
