^{115TH CONGRESS} 2D SESSION H.R. 5086

AN ACT

To require the Director of the National Science Foundation to develop an I-Corps course to support commercialization-ready innovation companies, and for other purposes.

- 1 Be it enacted by the Senate and House of Representa-
- 2 tives of the United States of America in Congress assembled,

1 SECTION 1. SHORT TITLE.

2 This Act may be cited as the "Innovators to Entre-3 preneurs Act of 2018".

4 SEC. 2. FINDINGS.

5 Congress finds the following:

6 (1) The National Science Foundation Innova-7 tion Corps Program (hereinafter referred to as "I-8 Corps"), created administratively by the Foundation 9 in 2011 and statutorily authorized in the American 10 Innovation and Competitiveness Act, has succeeded 11 in increasing the commercialization of Government-12 funded research.

(2) I-Corps provides valuable entrepreneurial
education to graduate students, postdoctoral fellows,
and other researchers, providing formal training for
scientists and engineers to pursue careers in business, an increasingly common path for advanced degree holders.

(3) The I-Corps Teams program is successful in
part due to its focus on providing the specific types
of education and mentoring entrepreneurs need
based on the early stage of their companies, however
the program does not provide similar support to
them at later stages.

25 (4) The success of I-Corps in the very early
26 stages of the innovation continuum should be ex•HR 5086 EH

panded upon by offering additional entrepreneurship
 training to small businesses as they advance toward
 commercialization.

4 (5) The excellent training made available to
5 grantees of participating agencies through the I6 Corps Program should be made available to all Fed7 eral grantees as well as other businesses willing to
8 pay the cost of attending such training.

9 (6) The success of the I-Corps Program at pro-10 moting entrepreneurship within research institutions 11 and encouraging research commercialization has 12 been due in part to the National Science Founda-13 tion's efforts to date on building a national network 14 of science entrepreneurs, including convening stake-15 holders, promoting national I-Corps courses, cata-16 loguing best practices and encourage sharing be-17 tween sites and institutions, and developing a men-18 tor network.

(7) As the I-Corps Program continues to grow
and expand, the National Science Foundation should
maintain its focus on networking and information
sharing to ensure that innovators across the country
can learn from their peers and remain competitive.
