“(5) NON-FUNCTIONAL CONSTITUENT.—The term ‘non-functional constituent’ means any substance that is an incidental component of an ingredient, a breakdown product of an ingredient or a by-product of the manufacturing process that has not been intentionally added as a separate substance and serves no technical function in the cosmetic.

istration shall annually select and complete
a review of at least 5 cosmetic ingredients
or non-functional constituents that were

“(ii) CONSIDERATIONS.—The determination of which ingredients or functional ingredients will be reviewed in a given year shall be publicized in annual reports to Congress and the public, in accordance with section 618, and subject to consultation as provided for in clause (iii). The review of any cosmetic ingredient or non-functional constituent shall commence with a public announcement by the Food and Drug Administration and the opening of a docket as required under paragraph (2).

“(iii) CONSULTATION.—The Food and Drug Administration shall establish a Cosmetics Safety Advisory Committee, which shall include equal numbers of individuals from the cosmetics industry and consumer groups, and other individuals, as the Food

of the ingredient or non-functional constituent. If
the Food and Drug Administration determines that
there is adequate evidence, the Food and Drug Ad-
ministration shall issue a final administrative order
and shall post such order on the Internet website of
the Food and Drug Administration, notwithstanding
subchapter II of chapter 5 of title 5, United States
Code.

same time as publication of the notice under sub-
section (d)(6), publish a proposed order identifying
dates by which use of the ingredient or non-func-

with the final administrative order, and provide 60
days for public comment, including comment on
whether compliance is feasible within the proposed
dates. After considering comments on the proposed
order, the Food and Drug Administration shall pub-
lish in the Federal Register a final order.

“(2) CONTENT.—The public notice information
regarding the final order under paragraph (1) shall
include a summary that is written in plain and un-

The summary shall include information on any conditions of use or warnings required under section 614, including the application to vulnerable populations, the types of safety studies evaluated, and any additional relevant information that was part of the review process.

“(f) MODIFICATION OF AN ORDER.—An order issued under subsection (d) or (e) may be modified or revoked by the Food and Drug Administration on the initiative of the Food and Drug Administration or in response to a petition.

“(g) INADEQUATE EVIDENCE.—

“(A) publish such finding on the Internet website of the Food and Drug Administration not later than 90 days after the close of the relevant comment period for the ingredient or non-functional constituent under subsection
(a)(2), in the case of a proposed order, or subsection (d)(2), in the case of a final order; and

“(B)(i) include a notice providing interested persons an additional 30 days from the notice date to provide additional data and information; and

“(ii) if, after the 30-day period under clause (i), the Food and Drug Administration determines that additional safety substantiation with respect to such ingredient or non-functional constituent is necessary to make a safety determination—

“(I) include a notice specifying an additional time period, not to exceed 18 months from the notice date, during which time the determination made by a responsible person under subsection (a) or (b) of section 609 with respect to the safety of such cosmetic ingredient or non-functional constituent shall be deemed to be in compliance with the requirements of this Act, but shall not affect final determinations of safety under subsection (d); and

“(II) plan to obtain such data and information.
“(2) Determination; order.—

“(A) Inadequate data and information.—If the Food and Drug Administration determines, after considering any additional data and information submitted under paragraph (1)(B), that the available data and information still are not adequate to make a determination regarding safety under subsection (d)(4), the Food and Drug Administration shall, within 90 days of the close of the additional time period provided under paragraph (1)(B), issue a proposed order or a final administrative order—

“(i) making a determination that the ingredient or non-functional constituent has not been shown to be safe in cosmetic products; and

“(ii) explaining why the available data and information are not adequate to assess the safety of the ingredient or non-functional constituent.

“(B) Adequate data and information.—If the Food and Drug Administration determines, after considering any additional data and information submitted under para-
graph (1)(B), that the available data and information are adequate to make a determination regarding safety under subsection (d)(4), the Food and Drug Administration shall, within 180 days of the close of the comment period, issue a proposed order, followed by a final order, on such cosmetic ingredient or non-functional constituent, in accordance with such subsection.

“(h) SAFETY ASSESSMENT.—

“(1) IN GENERAL.—In assessing the safety of an ingredient or non-functional constituent, the Food and Drug Administration shall consider whether there is adequate evidence to support a reasonable certainty among competent scientists that the ingredient is not harmful under the recommended or suggested conditions of use or customary or usual use, or that a non-functional constituent is not harmful under the recommended or suggested tolerance levels or the level at which it is customarily or usually present. The Food and Drug Administration may not consider an ingredient or non-functional constituent harmful solely because it can cause minor adverse health reactions, such as minor transient al-
lergic reactions or minor transient skin irritations, in some users.

“(2) FACTORS.—In assessing the safety of an ingredient or non-functional constituent, the Food and Drug Administration shall consider, among other relevant factors, the following:

“(A) The probable human exposure to the ingredient or non-functional constituent from expected use in cosmetics.

“(B) The probable cumulative and aggregate effect in humans of relevant exposure to the ingredient or non-functional constituent or to any chemically or pharmacologically related substances from use in cosmetics or other products with similar routes of exposure under recommended or suggested conditions of use or their customary use, to the extent adequate data is available for analysis. In appropriate cases, the Food and Drug Administration may consider available information on the total exposure to an ingredient or non-functional constituent from all sources.

“(C) Whether warnings or recommendations in a product label required under section 614, as part of any conditions of use or toler-
ances imposed by the Food and Drug Administration, would be necessary and appropriate to help ensure the safety of the ingredient or non-functional constituent.

“(3) DATA AND INFORMATION.—

“(A) REQUIRED INFORMATION.—A determination that an ingredient or non-functional constituent is safe in cosmetics shall be based upon adequate evidence submitted or otherwise known to the Food and Drug Administration, which shall include full reports of all available studies, published or unpublished, that are adequately designed to show whether the ingredient or non-functional constituent is safe. Such studies may include in vitro and in silico studies and epidemiological studies, biomonitoring studies, and studies focused on various points during the lifespan of the subject, that use scientifically valid methodology.

“(B) ADDITIONAL RELEVANT INFORMATION.—The Food and Drug Administration shall consider any other relevant information related to the safety of the ingredient or non-functional constituent, including—

“(i) adverse event reports;
“(ii) findings and information from State, Federal, national, and international entities and other bodies composed of scientific and medical experts;

“(iii) if the ingredient or non-functional constituent is lawfully used or present in other products regulated by the Food and Drug Administration, the scientific basis for such use; and

“(iv) experience with the ingredient or non-functional constituent in products that are distributed in the United States or in other countries, if such experience is well-documented and has resulted in substantial human exposure to the ingredient or non-functional constituent over time.”.

“SEC. 609. SAFETY OF FINISHED COSMETIC PRODUCTS.

“(a) DETERMINATION.—

“(1) IN GENERAL.—Each responsible person for a finished cosmetic product, before first introducing or delivering for introduction into interstate commerce, or, in the case of such a product in interstate commerce on the date of enactment of the Personal Care Products Safety Act, not later than the date on which registration is first required under
subsection 605(b), shall make a written determination that the product is safe under the conditions of use recommended in the labeling of the product. Such determination shall be based on adequate evidence that each ingredient in the finished product is safe for the use recommended or suggested in the labeling of the product and that the finished product is safe.

“(2) NEW INFORMATION.—If new information relevant to the determination becomes available, the responsible person shall promptly update the determination to address that information.

“(3) SAFETY WITH RESPECT TO RANGES OF POSSIBLE AMOUNTS.—In the case of a cosmetic product for which there is a range of possible amounts of cosmetic ingredients included in the cosmetic ingredient statement, as described in section 606(c)(2)(E), the safety determination under paragraph (1) shall include substantiation of the safety of the full range in the finished product.

“(4) SMALL BUSINESSES.—A small business registrant (as defined in section 605(e)(2)(B)(ii)) may satisfy the requirements of this section by using the ingredients in concentrations recommended by available medical or scientific guidelines, or cosmetic
manufacturing reference, and following any other specific instructions for use recommended by the ingredient manufacturer.

“(b) Presumption of Adequate Evidence.—

“(1) In general.—Except as provided in subsection (c), a determination made under subsection (a) shall be presumed to be based on adequate evidence if it is supported by—

“(A) with respect to each ingredient in the finished product—

“(i) references to an official statement by one or more expert medical or scientific bodies that the ingredient is safe under the conditions of use recommended or suggested in the product’s labeling; or

“(ii) appropriate safety testing of the ingredient; and

“(B) appropriate safety substantiation of the finished product beyond the safety substantiation of individual ingredients and consideration of the combination of ingredients.

“(2) Statement of an expert medical or scientific body.—For purposes of this section, a statement of an expert medical or scientific body is an official statement of that body, if—
“(A) the medical or scientific body is a Federal, State, national, or international entity with recognized expertise in chemical or cosmetic safety, or other similarly recognized body composed of scientific and medical experts;

“(B) the statement is based upon adequate data to support the finding of safety, and such data are available to the Food and Drug Administration; and

“(C) the statement is published and endorsed by the medical or scientific body and is not a statement of an employee of such body made in the individual capacity of the employee.

“(c) REBUTTAL OF PRESUMPTION.—Notwithstanding subsection (b), a determination under subsection (a) will not be presumed to be based on adequate evidence if—

“(1) the Food and Drug Administration issues an order under section 608 that an ingredient or non-functional constituent in the finished product is not safe under the product’s conditions of use or customary or usual use; or

“(2) the Food and Drug Administration has provided the manufacturer with notice that—
“(A) the manufacturer has not met the criteria for a presumption of adequate information under subsection (b); or

“(B) the Food and Drug Administration has information that raises significant questions about the safety of the product or any of its ingredients.

“(d) **TIMELY UPDATE.**—Upon notice of inadequate evidence under subsection (c), the responsible person shall have 10 days to submit additional evidence to the Food and Drug Administration regarding the safety of an ingredient, non-functional constituent, or the entire cosmetic product, and the Food and Drug Administration shall have 30 days from the date of receipt of such additional evidence to provide the responsible person with notice that the criteria under subsection (b) have been met or not met.

“(e) **RECORDS MAINTENANCE.**—The responsible person shall maintain records documenting the determination required under this section and the information on which such determination is based until 5 years after the finished product is no longer marketed, except that a responsible person for a domestic company whose sales are under $2,000,000 per year shall maintain such records for at least 2 years after the finished product is no longer marketed.
“(f) Submission of Records.—

“(1) In General.—The records required under subsection (e) shall, upon the written request of the Food and Drug Administration to the responsible person, be provided to the Food and Drug Administration within a reasonable timeframe not to exceed 60 days, in either electronic or paper form.

“(2) Criteria.—The Food and Drug Administration may require records under paragraph (1) if—

“(A) the Food and Drug Administration has a reasonable belief, described in written notice, that—

“(i) the finished product may be harmful based on adverse event reports or other scientific information;

“(ii) scientific information raises credible and relevant questions about the safety of the product or any of its ingredients;

“(iii) the responsible person has not made the determination required under subsection (a), or such determination is not supported by adequate evidence; or

“(iv) one or more of the criteria to establish a presumption of adequate evidence
of safety in subsection (b) has not been satisfied;

“(B) the Food and Drug Administration, an expert regulatory body, or an expert body composed of scientific and medical experts finds an ingredient in the product to be unsafe under the conditions of use of the product; or

“(C) the Food and Drug Administration concludes that submission of the records will serve the public health or otherwise enable the Food and Drug Administration to fulfill the cosmetic safety purposes of this section.

“(g) GUIDANCE AND REGULATIONS.—

“(1) IN GENERAL.—The Food and Drug Administration shall issue guidance describing the evidence necessary to support a determination under subsection (a), and may, by regulation, establish exemptions to the requirements of this section, if the Food and Drug Administration determines that such exemptions are supported by adequate evidence and would have no adverse effect on public health.

“(2) SMALL BUSINESSES.—The Food and Drug Administration shall, after consultation with the Small Business Administration and small businesses that manufacture cosmetics, provide additional guid-
ance for small businesses on compliance with the requirements of this section that would apply to small business registrants. Such guidance shall include specific examples of options for compliance that do not place an undue burden on small businesses.”.

(b) **Effective Date.**—Section 609 of the Federal Food, Drug, and Cosmetic Act, as added by subsection (a), shall take effect 180 days after the date of enactment of this Act.

**SEC. 103. GOOD MANUFACTURING PRACTICES FOR COSMETICS.**

“(a) **In General.**—The Food and Drug Administration shall review national and international standards for cosmetic good manufacturing practices that are in existence on the date of enactment of the Personal Care Products Safety Act and shall develop and implement, through regulations, standards consistent, to the extent the Food and Drug Administration determines practicable and appropriate, with such national and international standards
for cosmetic good manufacturing practices to ensure that
requirements of this chapter with respect to the manufac-

“(a) IN GENERAL.—With respect to any cosmetic
product distributed in the United States, the responsible
person shall submit to the Food and Drug Administration
a report of any serious adverse event associated with such
cosmetic product, when used in the United States, accom-
panied by a copy of the label on or with the retail pack-
aging of the cosmetic, any new medical information, re-
lated to a submitted serious adverse event report that is
received by the responsible person, and an annual report
for all adverse events received by the responsible person.

“(b) DEFINITIONS.—In this section:
“(1) An ‘adverse event’ for a cosmetic product is a health-related event associated with the use of this product that is adverse.

“(2) A ‘serious adverse event’ for a cosmetic product is an adverse event that—

“(A) results in—

“(i) death;

“(ii) a life-threatening experience;

“(iii) inpatient hospitalization;

“(iv) a persistent or significant dis-

ability or incapacity;

“(v) congenital anomaly or birth de-

fect; or

“(vi) significant disfigurement, includ-

ing serious and persistent rashes or infec-

tions and significant hair loss; or

“(B) requires, based on appropriate med-

ical judgment, a medical or surgical interven-

tion to prevent an outcome described in sub-

paragraph (A).

“(c) SUBMISSION OF REPORTS.—

“(1) SERIOUS ADVERSE EVENT REPORTS.—Ex-

cept as provided in paragraph (2), with respect to a cosmetic product distributed in the United States, the responsible person shall submit a serious adverse
event report to the Food and Drug Administration not later than 15 business days after information concerning the adverse event is received. If a serious adverse event report for a cosmetic with drug properties is filed using Form FDA 3500A (or any successor form developed for such purpose) or its electronic equivalent for over-the-counter drugs, the responsible person shall not have to submit a duplicative serious adverse event report under this section.

“(2) NEW MEDICAL INFORMATION.—The responsible person shall submit to the Food and Drug Administration any new medical information, related to a submitted serious adverse event report that is received by the responsible person within 1 year of the initial report, and shall submit such information not later than 15 business days after the new information is received by the responsible person.

“(3) ANNUAL REPORT.—

“(A) IN GENERAL.—Not later than March 1 of each year, except as provided under subparagraph (C), the responsible person shall submit an electronic report for the prior calendar year for each cosmetic product marketed during that year.
“(B) CONTENTS.—Each report under this paragraph shall contain a summary of all adverse events received during the reporting period, a complete list of individual reports, and an estimate of the total number of product units estimated to have been distributed to consumers during such period. The report shall not include consumer complaints that are solely regarding efficacy and do not contain any information about an adverse event. The Food and Drug Administration shall further specify the contents of the annual electronic report by regulation or guidance.

“(C) SMALL BUSINESS EXCEPTION.—In the case of a domestic facility for which the average gross annual sales in cosmetic products in the United States over the previous 3-year period is not more than $2,000,000, the responsible person is not required to submit an annual report under this paragraph.

“(4) EXEMPTION.—The Food and Drug Administration may establish by regulation an exemption to any of the requirements under this subsection if the Food and Drug Administration determines that such exemption is supported by adequate
evidence and would have no adverse effect on public health.

“(d) Requirements.—

“(1) In general.—Each serious adverse event report under this section shall be submitted to the Food and Drug Administration using an electronic system of the Food and Drug Administration. The Food and Drug Administration shall make such electronic system available not later than 1 year after the date of enactment of the Personal Care Products Safety Act.

“(2) Modification.—The format of the reporting system may be modified by the Food and Drug Administration and the reports may include additional information. The Food and Drug Administration may, in guidance, further specify the format and contents of required reports.

“(3) Scope of serious adverse event report.—A serious adverse event report (including all information submitted in the initial report or added later) submitted to the Food and Drug Administration under subsection (a) includes—

“(A) a report under section 756 with respect to safety and related to a specific cosmetic product;
“(B) a record about an individual who suffered the serious adverse event under section 552a of title 5, United States Code;

“(4) Responsibility to Gather Information.—After an individual initiates the reporting of a serious adverse event, the responsible person for the cosmetic product shall actively gather all of the information to complete and file the report with the Food and Drug Administration.

“(5) No Adverse Events to Report.—The Food and Drug Administration shall provide an option as part of the electronic registration process for the responsible person to indicate if such responsible person had no adverse events to report over the previous year. With respect to a responsible person who received no adverse event reports for a year, the annual adverse event report requirement may be met
by indicating no such events on the annual registration form.

“(e) Limitation With Respect to Adverse Event Reports.—The submission of an adverse event report in compliance with subsection (a) shall not constitute an admission that the cosmetic involved caused or contributed to the adverse event.

“(f) Contact Information.—The label of a cosmetic shall bear the domestic telephone number or electronic contact information, and it is encouraged that the label include both the telephone number and electronic contact information, through which the responsible person may receive a report of an adverse event.

“(g) Maintenance of Records.—The responsible person shall maintain records related to each report of an adverse event received by the responsible person for a period of 6 years.

“(h) Availability to States.—The Food and Drug Administration shall make available records submitted under this section to any State, upon request. “(1) all records maintained under section 611 and in accordance with the rules promulgated by the Food and Drug Administration under section 610, as applicable; and
“(2) except as provided in subsection (b), all other records, if the Food and Drug Administration—

“(A) has a reasonable belief that the cosmetic—

“(i) is adulterated;

“(ii) has caused a reportable serious adverse event; or

“(iii) contains an ingredient that substantial new scientific information shows may be unsafe when present in a cosmetic; and

“(B) provides written notice of the basis for the Food and Drug Administration’s reasonable belief described in subparagraph (A).

“(b) EXCLUSIONS.—No inspection authorized by this section shall extend to financial data, pricing data, personnel data (other than data as to qualification of technical and professional personnel performing functions subject to this Act), research data (other than safety data), or sales data other than shipment data.

“(c) SCOPE.—The requirements under subsection (a) apply to records maintained by or on behalf of such person in any format (including paper and electronic formats) and at any location.
“(d) Protection of Sensitive Information.—

The Food and Drug Administration shall take appropriate measures to ensure that there are effective procedures to prevent the unauthorized disclosure of any trade secret or confidential information that is obtained by the Food and Drug Administration pursuant to this section. Information disclosed to a State that is exempt from disclosure under section 552(b)(4) of title 5, United States Code, shall be treated as a trade secret and confidential information by the State.

“(e) Limitations.—This section shall not be construed—

“(1) to limit the authority of the Food and Drug Administration to inspect records or to require establishment and maintenance of records under any other provision of this Act; or

“(2) to have any legal effect on section 552 of title 5, United States Code, or section 1905 of title 18, United States Code.”.

“Sec. 613. Mandatory Recall Authority.

“(a) Voluntary Procedures.—If the Food and Drug Administration determines that there is a reasonable probability that a cosmetic is adulterated under section 601 or misbranded under section 602 and the use of or exposure to such cosmetic is likely to cause serious adverse

portunity to voluntarily cease distribution and recall such
article.

“(b) PREHEARING ORDER TO MANDATORILY CEASE

metic.

“(2) REQUIRED ADDITIONAL INFORMATION.—
“(A) IN GENERAL.—If a cosmetic covered by a recall order issued under paragraph (1)(B) has been distributed to a warehouse-based third-party logistics provider without providing such provider sufficient information to know or reasonably determine the precise identity of such cosmetic covered by a recall order that is in its possession, the notice provided by the responsible person subject to the order issued under paragraph (1)(B) shall include such information as is necessary for the warehouse-based third-party logistics provider to identify the cosmetic.

“(B) RULES OF CONSTRUCTION.—Nothing in this paragraph shall be construed—

“(i) to exempt a warehouse-based third-party logistics provider from the requirements of this chapter, including the requirements of this section and section 612; or

“(ii) to exempt a warehouse-based third-party logistics provider from being the subject of a mandatory recall order.

“(3) DETERMINATION TO LIMIT AREAS AFFECTED.—If the Food and Drug Administration re-
quires a responsible person to cease distribution under paragraph (1)(A) of a cosmetic, the Food and Drug Administration may limit the size of the geographic area and the markets affected by such cessation if such limitation would not compromise the public health.

“(c) HEARING ON ORDER.—The Food and Drug Administration shall provide the responsible party subject to an order under subsection (b) with an opportunity for an informal hearing, to be held as soon as possible, but not later than 2 days after the issuance of the order, on the actions required by the order and on why the cosmetic that is the subject of the order should not be recalled.

“(d) POST-Hearing RECALL ORDER AND MODIFICATION OF ORDER.—

“(1) AMENDMENT OF ORDER.—If, after providing opportunity for an informal hearing under subsection (c), the Food and Drug Administration determines that removal of the cosmetic from commerce is necessary, the Food and Drug Administration shall, as appropriate—

“(A) amend the order to require recall of such cosmetic or other appropriate action;

“(B) specify a timetable in which the recall shall occur;
“(C) require periodic reports to the Food
and Drug Administration describing the
progress of the recall; and
“(D) provide notice to consumers to whom
such cosmetic was, or may have been, distrib-
uted.

“(2) VACATING OF ORDER.—If, after such hear-

that adequate grounds do not exist to continue the
actions required by the order, or that such actions
should be modified, the Food and Drug Administra-
tion shall vacate the order or modify the order.

“(e) COOPERATION AND CONSULTATION.—The Food
and Drug Administration shall work with State and local
public health officials in carrying out this section, as ap-

“(f) PUBLIC NOTIFICATION.—In conducting a recall
under this section, the Food and Drug Administration
shall—

“(1) ensure that a press release is published re-

garding the recall, and that alerts and public notices
are issued, as appropriate, in order to provide notifi-
cation—
“(A) of the recall to consumers and retailers to whom such cosmetic was, or may have been, distributed; and

“(B) that includes, at a minimum—

“(i) the name of the cosmetic subject to the recall;

“(ii) a description of the risk associated with such article; and

“(iii) to the extent practicable, information for consumers about similar cosmetics that are not affected by the recall; and

“(2) ensure publication on the Internet website of the Food and Drug Administration an image of the cosmetic that is the subject of the press release described in paragraph (1), if available.

“(g) No DELEGATION.—The authority conferred by this section to order a recall or vacate a recall order shall not be delegated to any officer or employee other than the Commissioner.

“(h) EFFECT.—Nothing in this section shall affect the authority of the Food and Drug Administration to request or participate in a voluntary recall, or to issue an order to cease distribution or to recall under any other

“(d) **Internet Sales.**—In the case of Internet sales of cosmetics, each Internet website offering a cosmetic product for sale to consumers shall provide the same information that is included on the packaging of the cosmetic product as regularly available through in-person sales, except information that is unique to a single cosmetic product sold in a retail facility, such as a lot number or expiration date, and the warnings and statements described in subsection (c) shall be prominently and conspicuously displayed on the website.

“(e) **Contact Information.**—The label on each cosmetic shall bear the domestic telephone number or electronic contact information, and it is encouraged that the label include both the telephone number and electronic contact information, that consumers may use to contact the responsible person with respect to adverse events. The contact number shall provide a means for consumers to obtain additional information about ingredients in a cosmetic, including the ability to ask if a specific ingredient may be present that is not listed on the label, including whether a specific ingredient may be contained in the fra-
grance or flavor used in the cosmetic. The manufacturer
of the cosmetic is responsible for providing such informa-

“(a) IN GENERAL.—To minimize the use of animal
testing for safety of cosmetic ingredients, non-functional
constituents, and finished cosmetic products, the Food and Drug Administration shall—

“(A) not involve the use of an animal to test a chemical substance for safe use in cosmetics; or

“(B) use fewer animals than conventional animal-based tests for safe use in cosmetics when non-animal methods are impracticable; and
