

with the other, literally. We must come to address the insufficient funding caps in the BCA, and we must do so for both defense and nondefense accounts.

Since the Budget Control Act was enacted in 2011, we have made repeated incremental changes to the discretionary budget caps for both defense and nondefense accounts. We have done so in order to provide some budgetary certainty to the Department of Defense and also to domestic agencies. I believe that if defense funds are increased, funding for domestic agencies must also be increased because they, too, are suffering from the same severe budget that the Defense Department has suffered over the last several years. In addition, at this point, I think all of us acknowledge our national security is broader than simply the accounts in the Department of Defense. It is the FBI, the Department of Homeland Security, State Department, and many other agencies that contribute to our national security.

In fact, in the wake of Hurricane Harvey and Hurricane Irma, we have seen the Centers for Disease Control dispatched, EPA individuals dispatched to evaluate, in the Harvey situation, threats to the environment, and in case of Irma, to try to prevent the threats by being deployed before the storm actually struck. So our national security, our public safety, all these issues involve not just the Department of Defense but the whole array of government enterprise. We understand that the well-being of our Nation—and what our men and women in uniform are fighting for—depends on funded and functioning domestic agencies, not just the Department of Defense. For example, as I have said before, with these two hurricanes, tens of thousands of Americans have needed help, these Federal agencies have come forward, and I will mention them: the Centers for Disease Control, Environmental Protection Agency, the Federal Aviation Administration, the Federal Communications Commission, the Small Business Administration, the Nuclear Regulatory Commission, and the Social Security Administration. Those are just a handful. Providing for the security of Americans requires the whole of government, and it should all be funded fairly. We should remain responsible stewards of taxpayers' money while also ensuring we provide sufficient funds to meet the needs of our Nation.

Let me conclude by once again thanking Chairman MCCAIN and my colleagues for working thoughtfully and on a bipartisan basis to develop this important piece of legislation. I would also like to thank the staff who worked tirelessly on this bill throughout the year. I look forward to a thoughtful debate on the issues that face our Department of Defense and national security.

With that, I yield the floor.

The PRESIDING OFFICER (Mr. SULIVAN). The majority leader.

REMEMBERING PETE DOMENICI

Mr. MCCONNELL. Mr. President, it is with deep regret that I announce to the Senate the passing of our dear friend and colleague Senator Pete Domenici.

Pete had a long and notable career, one that took him from pitching on the baseball diamond to teaching mathematics at an Albuquerque junior high school, from city politics to the U.S. Senate.

In fact, when he ran for the Senate in 1972, Domenici became the first Republican elected from his home State in nearly four decades. By the time he retired, he did so as the longest serving Senator in New Mexico history. Like others in this Chamber, I served for a number of years with Senator Domenici. I came to know him as smart, hard-working, dedicated and as a very strong advocate for his home State of New Mexico.

We are all saddened by this news today. The Senate offers its condolences to Senator Domenici's family and especially his wife Nancy.

The PRESIDING OFFICER. All time has expired.

The question occurs on agreeing to the motion to proceed.

The motion was agreed to.

Mr. MCCAIN. For the information of my colleagues, in approximately 45 minutes, the Senate will have a vote on a motion to table the Paul amendment, which means around 12:15 p.m.

The PRESIDING OFFICER. The Senator from Maryland.

Mr. CARDIN. Mr. President, earlier this week, we commemorated the 16th anniversary of the attack on our country on September 11. It was a day that I think none of us will ever forget. We were attacked, and we wanted to take all necessary action to protect our country and go after those who perpetrated this attack against America.

I was part of the Congress at that time and was part of the Congress that passed the 2001 authorization for the use of military force that was targeted toward Afghanistan, and I was part of the Congress that when we took up the 2002 authorization for use of military force against Iraq, I voted against that authorization.

It has now been 14 years after the U.S. invasion of Iraq and the end of the Saddam Hussein regime. Yet we still have the authority for the use of military force against Iraq, and it is still being used. It is time for that authorization to end. I take this time to support Senator PAUL's efforts to put a termination date on the 2002 authorization and to put a termination date on the 2001 authorization.

The 2001 authorization was the first we passed. It was done virtually unanimously. There was some objection, but very few, because we wanted our country to hold those responsible in Afghanistan for the attack against America. That authorization is now 16 years

old. Let me read for my colleagues exactly what that authorization said, what we passed 16 years ago:

That the President is authorized to use all necessary and appropriate force against those Nations, organizations, or persons he determines planned, authorized, committed, or aided the terrorist attacks that occurred on September 11, 2001, or harbored such organizations or persons, in order to prevent any future acts of international terrorism against the United States by such nations, organizations or persons.

That is the authorization. It is pretty specific. It is pretty specific to go after those who were responsible for the attack against the United States that was centered in Afghanistan, and it was used for that purpose. Our military took action against Afghanistan as a result of the attack against our country, and that was authorized by Congress.

It is hard to understand how you can get from the reading of this authorization of the use of military force today as congressionally authorized against ISIS in the Middle East, in Africa, or anywhere in the world, but that is the interpretation that has been given to the action of Congress in 2001. I think that interpretation cannot be defended.

Congress has a responsibility to act. We have a responsibility to specifically authorize the new threats that we have against our country and what military force is appropriate. That is our responsibility. This is a different threat than we saw 16 years ago. It is our responsibility to give congressional authorization for the use of military force. Some say it cannot be done. Well, if it can't be done, then we don't agree on the authorization of force.

Let me just remind my colleagues that the Senate Foreign Relations Committee, over 3 years ago, passed an authorization for the use of military force. We came together in our committee, and I know Senator KAINE and Senator FLAKE have worked on a proposal that is certainly much more focused toward the current circumstances. Some of us may have amendments to that, some of us may disagree with it, but that is the debate we should be having. There should be no debate that the 2001 authorization does not apply to our current circumstances.

We should pass an authorization that is tailored to allow the President to effectively go after the direct threats to the United States. That is our responsibility. We owe it to the American people and we owe it to the men and women who serve in our military to give them clear authority from Congress in their military operations. There clearly needs to be direction given by Congress. We have seen an abuse of the 2001 authorization, so we need to be pretty clear.

I must tell you that I have heard over and over again from our generals that there is no military-only victory against ISIS. We can't win this by a military victory alone. We need to make sure that there are leaders in

countries that protect their citizens, not only their physical security but good governance in their human rights.

We have new challenges we need to deal with—cyber threats against the United States. We are concerned about a physical caliphate; now we are concerned about a virtual caliphate as we take more and more of the territory away from the ISIS forces. So that is what we need to do.

Senator PAUL's amendment gives us that opportunity by saying quite clearly that the 2001 and 2002 authorizations need to end—need to end—that we don't today have clear authorization from Congress to pursue the military campaign against ISIS, and we need to have that.

There are some who say: Well, what happens if we don't meet that deadline? Well, let me tell you something. The President has plenty of authority. Read article 2 of the Constitution. He has the inherent power to protect our country and our national security, and he can take action in order to do that.

I was particularly struck as to why we need the Paul amendment when I received a letter in my capacity on the Senate Foreign Relations Committee from Secretary Mattis and Secretary Tillerson. You see, the Senate Foreign Relations Committee was having meetings, trying to figure out how to proceed on the authorization for the use of military force. During one of those meetings, we had the opportunity to have Secretary Mattis and Secretary Tillerson before us, and we had a candid discussion about what type of authorization would make sense. It was done in a closed setting so we could have a candid discussion, and I am not going to reveal the specifics because I thought that is what we should be doing. But I can tell you, I left with the impression that there was room for Congress to work with the administration on the authorization of force, and I was hopeful that we were going to have an open hearing in the Senate Foreign Relations Committee, the committee of jurisdiction, on the AUMF.

We had similar discussions under the Obama administration. As a result of those discussions, President Obama submitted to Congress what he believed would be an appropriate authorization for the use of military force. That authorization was never taken up, but he asked for it.

Well, just recently, we received notice from Secretary Tillerson and Secretary Mattis that the President does not want Congress to adjust the authorizations because he has adequate authority to do what he wants to do. I understand that. If you take their interpretation—it is not just this administration; it is prior administrations' interpretation of the AUMF—they have a blank check. But that is not our responsibility being carried out.

We are the ones who are responsible for the authorization of force, not the President of the United States, and ac-

cording to this President, he has blank-check authorization from Congress.

So it is our responsibility to make sure that when our men and women are sent into harm's way, they have direct authorization from the Congress of the United States unless, by the way, there is an urgent situation that requires the President to act, which he can do under article 2.

So I urge my colleagues that we have a chance to start this debate right here and now by supporting the Paul amendment, and I intend to do that.

With that, I yield the floor.

The PRESIDING OFFICER. The minority whip.

Mr. DURBIN. Mr. President, I want to stand in support of the statement just made by my colleague from the Commonwealth of Maryland. He knows, as I know, that our responsibilities as U.S. Senators include important votes. Some of the votes we cast will blur into history, and we will be hard pressed to remember them. But certainly any vote involving sending America to war is a vote you will never forget—at least not this Senator. Many of those votes cast over the years in the House and the Senate have created sleepless nights before the vote because you understand that even under the best of circumstances, people will die as a result of your vote. Not just the enemy but even our own risk their lives and die in defense of the United States.

It was 9/11/2001 when this U.S. Senate was faced with the awesome responsibility of voting to go to war. There were two votes. The first was on the invasion of Iraq. There were 23 of us—22 Democrats and 1 Republican—who voted against the authorization for the use of force and the invasion of Iraq. I continue to believe that when it comes to foreign policy, it is the most important vote that I have ever cast. Twenty three of us voted no.

The second vote was on the invasion of Afghanistan and a different vote completely. We had just gone through 9/11, and 3,000 innocent Americans had been killed. The images are still in my mind—and will be until I die—of what I saw as a result of that heinous attack, that atrocious attack by terrorists on the World Trade Center, on the Pentagon, and, of course, what happened in the fields of Pennsylvania.

So the vote came to the floor, and they basically said: When it comes to the invasion of Afghanistan, we are going after the people responsible for 9/11. I joined every other U.S. Senator of both political parties in voting yes. We had to make clear to terrorists around the world that when you strike the United States, you will pay a price. We will hunt you down, we will find you, we will bring you to justice or bring you to your end on Earth. I voted for it, and I knew it was the right thing to do. That is what I was sent here to do.

Little did I realize, having cast that vote 15 or 16 years ago, that I wasn't

just voting to go after the terrorists responsible for 9/11; I was voting for the longest war in the history of the United States of America, a war that continues to this day in Afghanistan. I don't think there was a single member of the Senate—either party on the floor—who would have believed that was what we were voting for. It has happened.

To date we have lost almost 2,400 American lives, tens of thousands have been injured in Afghanistan, billions and billions of dollars have been spent, and there is no end in sight. Who is responsible for that? Ultimately, Congress is responsible for that. The Constitution and the people who wrote it made it clear that we have the responsibility to declare war. It is a responsibility that may have clarity in the Constitution, but it is one that we don't accept willingly in most circumstances. Most Members of the Senate will acknowledge that constitutional opportunity and authority, but they don't want to cast a vote for fear that they are going to vote an incorrect way as history will judge.

Now we have a proposal by Senator PAUL of Kentucky. It is one that I think should be supported by every Member of the Senate. What it says is this: Within 6 months, the authorization for the use of military force we voted for so long ago is going to be eliminated, and we, in that period of time, have to come up with a new authorization that reflects the new reality of the threat against the United States. That is our constitutional responsibility. The President, as Commander in Chief, always must step up and defend America, but when it comes to the declaration of war, that is the responsibility of Congress.

I will be supporting this effort by Senator PAUL. I believe it is consistent with our constitutional responsibility, and I believe it is also time for us to renew the debate as to our future in Afghanistan, a war that has claimed so many American lives, created so many casualties, and cost us so dearly. It is time for us, on behalf of the American people, to engage in that debate again.

I yield the floor.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. MURPHY. Mr. President, first let me lend my support to efforts to bring amendments before the floor later today or later this week with respect to strengthening our Nation's "Buy American" laws. This has been a cause that I have been working on for almost my entire career in the U.S. Congress, and it is about time we start making sure that when we are spending billions of dollars for the U.S. military, we prioritize American companies so that we don't allow for those dollars to flow overseas when we have companies in Connecticut, North Carolina, and Illinois that can do the work. This is important, and I hope we take some votes on these measures that I think will draw bipartisan support either this week or next.

I do rise, though, to lend my voice, as well, to the amendment being offered by Senator PAUL. Let me stipulate that this is an extraordinary amendment to sunset an authorization of military force that currently provides the legal authorization for our continuing military efforts to take out al-Qaida as they try to plan attacks against the United States and our allies. It is time for extraordinary measures because we have simply not done our constitutional duty in declaring and authorizing war.

I would argue, as many of my colleagues do, that no matter how necessary it is for the United States to take the fight to ISIS, as we have in Iraq and Syria and other places around the world, that is not currently authorized by the U.S. Congress, and it is a fairly extraordinary leap of statutory interpretation to think that an authorization to attack al-Qaida, the perpetrators of the attacks on 9/11, allows you then to conduct a global war with almost no limits against this new enemy.

To me, if we don't reauthorize military action against ISIS, perhaps against other foes that we confront, then I am not sure the Congress will ever again authorize war. Why? It is a lot harder to authorize military action today than it was a century ago or 50 years ago. We aren't marching conventional armies across a field against one another. We aren't signing neat peace treaties that provide a clear end to hostilities. The enemy is shadowy and diffuse and perpetual, and victory now is harder to define than ever before. It is very easy for the U.S. Congress to just step back and say that authorizing military force is too hard. It is too difficult, so we outsource it to the executive branch to decide who we fight, where we fight, when we fight, and how we fight. That is not what the Founding Fathers imagined, and, in fact, there is very good reason to vest in the Congress the sole authority to declare war. If I thought that we were going to do this without the sunset of the existing AUMFs, then I wouldn't support this extraordinary measure. I have been here long enough to know that it is far too easy and convenient for this Congress to allow for an Executive, whether it be a Republican or Democratic Executive, to define the parameters of war and to name new enemies who have not been before this body for debate.

So I think it is time for us to sunset these authorizations, and I do think that with that pressure, we will be able to come up with a new authorization that gives our military and our Executive what they need in order to continue the fight against groups like ISIS, while protecting the interests of our constituents, who, frankly, by and large, no matter what State they are from, do not want the President of the United States—this or any other—to have an unchecked ability to bring the fight to anyone, anywhere around the globe.

I will just state, take a look at the way in which the President suggested he was authorized to take action against the Assad regime as evidence of how unending the current interpretation can be. The justification for that action was because it was next to action being taken against ISIS, which was authorized because ISIS has some familial relationship to al-Qaida. That is three or four steps removed from any debate this body has ever had. That is not what the Founding Fathers intended.

I am going to support Senator PAUL's amendment. I will then vigorously work with my colleagues to try to craft an authorization that gets the job done. It is about time.

I yield the floor.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. MORAN. Mr. President, thank you.

Prior to arriving in the U.S. Senate after the election of 2010, I was a Member of the House of Representatives, and I am one of the 30 percent of us in Congress today who were here in 2001 and approved the use of military force in response to the terrorist attacks of 9/11.

I hate to say this at this moment because the vote is so closely pending, but I don't know what the right answer to this question is—the one we face today. I firmly believe that it is the U.S. Senate and U.S. Congress's authority and constitutional responsibility to declare war. I worry that the resolution that is before us only eliminates the current resolutions, only eliminates the current authority. What is missing is the followup.

I just heard my colleague from Connecticut indicate that he will work vigorously to see that we have the opportunity to vote for a resolution authorizing force, but in some ways we have the cart ahead of the horse.

I will be the one who will always argue that it is our responsibility, it is Congress's responsibility to make these decisions as determined by the U.S. Constitution. It gives us that authority and that responsibility. The question in my mind is, Is it prudent to eliminate the authorization today before we have a new authorization in place? And I don't know the answer to that question.

While I have heard my colleagues say we will work to accomplish that, having experienced the U.S. Senate now for the last 7 years, I worry that a 6-month opportunity will be forgone, those authorizations may not occur, and, at best, once again the U.S. Senate may be presented with a fait accompli, which is, here is a resolution authorizing force. We are out of time. The 6 months is gone. Take it or leave it.

We will have a gun to our heads to approve, in an expeditious way, something that is not really what I would be supportive of. Once again, I will have

the dilemma: Do I vote for some authorization of force even though it is not the one that is well thought out?

If I thought we were going to do an authorization of force, I would have expected it to have occurred already. I commend Senator CORKER, the chairman of the committee, and many of my colleagues who have worked to put an authorization—a resolution in place and voted it out of committee, but no vote has occurred on the U.S. Senate floor, and no vote has occurred in the U.S. House of Representatives. I don't know whether we are setting the stage for us to be once again in a position of "Here it is; take it or leave it," or worse than that, I suppose, is leaving those who serve our country in a position of not knowing whether their Congress supports their efforts.

It is not as if this is prospective; we already have troops on the ground in Afghanistan. I just returned from Afghanistan. That was my fourth visit there. I was there over the Labor Day weekend. I came to the conclusion that we belong in Afghanistan. I don't believe this is about rebuilding Afghanistan as much as it is about protecting Americans. There are 21 terrorist organizations at work in Afghanistan, out to kill citizens of the United States, attack us, and we have the Government of Afghanistan allowing us the opportunity to be engaged in a battle to defeat those terrorist organizations.

The idea that we would walk away—in fact, I heard my colleagues earlier talk about how long we have been there. Does anybody talk about how long terrorism is going to be with us? So the idea that we should set a parameter for our timeframe, knowing that we are engaged in a great battle for the future of our Nation with terrorist organizations that want us dead, seems to be the wrong way to look at this issue. I don't know what the right timeframe is, and I am saddened that we are still there, but it is not a matter of time, it is a matter of accomplishment of the mission of ending terrorist attacks against the United States. Nine-eleven remains fresh in my mind.

So the issue we face is, Does this resolution offered by the Senator from Kentucky put us in a position in which we finally do what we are supposed to do, which, in my view, is authorize, declare war—not necessarily an authorization of use of force, but whatever that mechanism of authorization is, does this resolution, this vote we will take today, does it put us in a position to take advantage of the circumstance in which Congress finally utilizes its authority and accepts its responsibility? I don't know the answer to that question.

We are making progress in Afghanistan. The greatest evidence of that to me was my visit to Bagram, to the hospital, during which I learned that 84 percent of the patients at the hospital are Afghani, not Americans.

I support the statement of strategy by the administration in regard to our

efforts in Afghanistan and particularly the need to deal with Pakistan as a sanctuary.

The last thing I would want to do, having just returned from visiting with troops, including many Kansans, is make a decision today that they are no longer supported by Congress.

Going to war is something that, in my view, has been too easy in the United States, and we have had Presidential leadership for a long time that has downplayed the importance of war. We have been told that it will be easy, that oil revenues will pay for the war. It seems as if our political leadership in this country wants the American citizens to believe that we can go to war and that they will not suffer any consequence or participate in any way.

Declaring war and the authorization of use of military force by Congress brings the American people into this, rather than downplaying the significance and sacrifice. It makes certain that others, not just our military men and women and their families, make a sacrifice, that we are all in this together, and would involve Congress making a decision that this endeavor, whatever it is, is worth the potential loss of life by Americans who serve in our military.

These are difficult and challenging but important decisions, and I want to work with my colleagues to find the right solution—not just to walk away from a resolution but to make sure we have in place something that gives the authority to our troops to succeed.

Mr. President, I ask unanimous consent that Senator MCCAIN be recognized prior to Senator CORKER's speaking time.

The PRESIDING OFFICER. Is there objection?

Mr. REED. Mr. President, reserving the right to object, I ask if the Senator from Kansas would modify the request and I be allowed to speak for up to 5 minutes before Senator MCCAIN?

Mr. MORAN. Mr. President, I modify my request and ask unanimous consent that Senator MCCAIN and Senator REED be recognized prior to Senator CORKER's speaking time.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

The Senator from Kentucky.

Mr. PAUL. Mr. President, for the first time in 15 years, we are debating the congressional role in the declaration of war.

We have fought the longest war in U.S. history under an original authorization to go after the people who attacked us on 9/11. That war is long since over, the war has long since lost its purpose, and it is long past time that we have a debate in Congress about whether we should be at war.

It is the constitutional role of Congress. Interestingly, the folks you have heard on either side of the issue have said it is our job. It is what we should be doing. Yet we haven't done it for 16 years. Who in their right mind thinks

that Congress is actually going to do their job without being forced to do their job?

My resolution is actually silent on whether we should still be at war. My resolution simply says that the resolutions we have previously passed will expire. I don't believe they have anything to do with the seven wars we are involved with currently, anyway, but if we were to force them to expire, we would then have a debate.

But for those who say: Yes, Congress should exert its authority; Congress should be involved in the initiation of war—they don't really believe that unless they are going to vote that way. What will happen is the continuation of the same—that we abdicate that role and let the President do whatever he wants.

It is worse than that. Let's say that we were to vote for my resolution and that the authorization to go to war after 9/11 expired. Do you think any of the wars would end? No. The neoconservatives and the neoliberals believe the President has unlimited authority. They call it article II authority for war. There is some authority given to the President—an enormous amount of authority—to execute the war but not to initiate the war. The sole duty of initiation of war was given specifically to Congress.

So if these authorities were to expire—the President already says: I have all the authority I want under the Constitution to do whatever I want. But that is not what our Founders wanted. Madison, if he were here, would vehemently disagree. Madison wrote that the executive branch is the branch most prone for war; therefore, the Constitution, with studied care, vested that power in the legislature. It was supposed to be difficult to go to war.

Some wrung their hands and said: Oh, the Senate can never agree on any authorization to go to war. How long did it take us after Pearl Harbor? Twenty-four hours, and we declared war on Japan. How long did it take us after 9/11? It took 3 days. We can come together as a body when we are attacked, when we are unified in purpose. But guess what—after 16 years, it is difficult to determine the purpose in Afghanistan.

Also, those who say: We need a new authorization, but it is going to authorize war anywhere, anytime, with no geographic limit and no time limit—basically they would be authorizing everything we are doing now and not putting any limitations on it. We are in Yemen. We are aiding and abetting the Saudi war in Yemen. Yet there has been no vote on it. Seventeen million people live on the edge of starvation because of the Saudi blockade and bombing campaign. We are aiding and abetting that. Yet there has been no vote here in Congress.

Look, we have problems here at home. These wars are costing trillions of dollars. They are unauthorized. We

have not voted on them. And I say, look, let's pay attention to some of the problems we have here at home. We are going to have a \$150 billion tab for the Hurricane Harvey damage in Texas. Yet we continue with unauthorized, unconstitutional, undeclared war. I think it is time to think about the problems we have here at home. I think it is time to think about the \$20 trillion debt we have. But we still have this wringing of hands and gnashing of teeth, saying: What if Congress doesn't do its job? What if we allowed this authorization of force to expire and we didn't get another one?

The thing is, that is abdicating your constitutional duty. The duty is to do what is within your constitutional duty. It is not to say: Well, the other Congressmen won't do their job, so I am not going to do my job.

Our job is to enforce, obey, and execute the Constitution. The Constitution says Congress shall declare war. It doesn't say the President can go to war anytime, anywhere around the globe. It says Congress shall declare war. So for the first time in 15 years, we are debating whether Congress has a role in this.

Those who vote no against my resolution are basically voting—even though they will say otherwise, they are voting to say: Well, let's just let the status quo go on. The President can do what he wants. It is too emotional, it is too controversial to debate war. So we will keep letting the President do whatever he wants.

My vote is to grab power back. My vote is to say: The Senate has prerogative here. The Constitution gives the power to the legislature. That is what this vote is about. It is about grabbing back the power to declare war and saying this is a Senate prerogative. So the majority, in all likelihood, will say: No, we do not want to do that. We think that would risk some war somewhere, sometime.

That is the point. We should be debating where we should be at war. Should we be at war in Somalia? Should we be at war in Libya? Should we be at war in Yemen? Should we be at war in Iraq, in Syria, in Afghanistan?

Look, President Obama ran on ending the wars; yet he ended up taking the war and bombing campaign to seven countries without his having any authorization. Intriguingly, the left was relentless in criticizing George Bush; yet George Bush did come to Congress. We had a vote to go after those who attacked us on 9/11. We had an ill-fought campaign with regard to the Iraq war, but we did actually vote on it. We have not voted for a generation. Should one generation be able to bind another generation?

Realize that, if we do not force these authorizations to expire, this war could go on forever. This is 1984. This is George Orwell's saying that Oceania has always been at war with East Asia and then, a month later, his saying that Oceania has always been at war

with Eurasia—because no one is stepping up to say no. That is what Congress is supposed to do. We are supposed to be a voice that debates and asks: Should we go to war? It is part of doing our job, but the only way to get Congress to do its job is to actually let these expire.

We should have a full-throated debate over who initiates war. There is no murkiness to the Constitution. The Constitution is explicit. The power of the initiation of war—the declaration of war—lies with Congress, but the war in Afghanistan has gone on for 16 years now. Our young men and women who will be fighting in the war in the next year or so were not yet born on 9/11. We have long since killed the people who perpetrated 9/11. With the killing of bin Laden, there is no person left in the leadership of al-Qaida or the Taliban who was around at that period of time. Yet we say: Well, it is still the Taliban. If you are going to say that we are going to fight until the end of time—that we are going to have a perpetual war until the end of time—and that we are going to kill every radical Islamist in the world, it is an impossibility.

I would say, at the very least, let's have a debate. If that is your purpose, if that is your goal, and if that is what you stand for, step forward, and let's have a debate. Let's debate the war in Yemen. Let's debate the war in Somalia. Let's debate whether we should be bombing people in Nigeria. Let's debate whether we should be in Syria, Iraq, Iran, Afghanistan. Let's have a debate about all of these different wars. Let's not just muddle on and say: Oh, the President can do what he wants.

Realize that the people in this body who are for perpetual war do not even think we should have any role in it. They tell me quietly every day that the President can do whatever he wants under article II of the Constitution. That is absolutely false. Read the Federalist Papers. There is extensive debate over the war-making power. From Washington, to Adams, to Jefferson, to Madison, they all said very explicitly: We give this power to Congress because we fear the perpetual wars that we have seen in Europe. We fear the wars of brother fighting brother and brother fighting cousin within these royal disputes that went on endlessly in Europe. He set up our founding document to try to make war difficult, but when we have been attacked, it has been easy to come together. For 9/11, virtually unanimously, we came together within 3 days. For Pearl Harbor, it was within 24 hours.

What I would say to my colleagues is: Do your job. This is your constitutional role. Let's let these expire, and over the next 6 months, let's debate whether we should be at war and where.

I, for one, am one who says that we should oppose unauthorized, undeclared, unconstitutional war. At

this particular time, there are no limits on war. The 9/11 proclamation has been interpreted so widely that it could mean anything. You have people who interpret it widely, but you also have people who say that the Constitution says that the President can do anything. This is not what our Founding Fathers intended.

I am proud to be a part of and an instigator of the debate. For the first time in 15 years, the full Senate will vote on whether we have a role in initiating war, whether we should continue to be at war, or whether we should even vote on whether we should continue to be at war.

I urge the Senate to adopt my amendment, which would be a 6-month moratorium—a 6-month sunset—on the 2001 and 2002 resolution so that we could then have the real debate. But mark my words: Those who will come out and say that they are for the real debate are not really for it unless they are willing to sunset it, because we have been going for 16 years without having a real debate. There will be no real debate on war unless we pass this resolution.

I yield back my time.

The PRESIDING OFFICER (Mrs. ERNST). The Senator from Rhode Island.

Mr. REED. Madam President, Senator PAUL has been relentless in doing something that has to be done, which is the revision of the AUMFs from 2001 and 2002. Yet there is sort of a simple notion that you cannot replace something with nothing, and we have nothing. This is 6 months of more time when, in the last 16 years, even at the request of a President, we have not been able to come together as a Senate. I don't know where the House is on this, but I think that it is equally befuddled in providing the kind of specific language we need for an AUMF.

This would be a different debate and a different vote if we were to have before us an actual AUMF that would immediately supersede the existing authorities. Without such an AUMF, we are going to cause confusion, and we are going to cause disruption among our forces and our allies. In my having spent a little bit of time in the Service, when there is a possibility that in 6 months you will have to cease operations, you begin planning almost immediately for those operations. By the time we get around to actually even considering this—since I do not think there are any plans to do it immediately—we could see 3 or 4 of those months evaporate. With each passing day, the concerns about redeployment and repositioning and authorities become more pressing to the military. Not only that, but even if they are sophisticated in understanding that it is not yet the law of the United States, our allies will read this—will see it—as a signal that we are weakening in our cooperation.

What we have seen over the last several months, in Iraq particularly, has

been effective Iraqi indigenous forces in close cooperation with U.S. special operations and other forces, and they have made progress. They will have political blowback in Baghdad and Kabul, especially if this provision passes. Then I think, very adroitly, our adversaries will take advantage of this. The newspapers and the social media that they control—and, unfortunately, they control a great deal in all parts of the world—will make this very simple: the United States to leave, the United States restricting authority. Those are the practical consequences.

Again, this would be an entirely different debate and an entirely different vote, I think, if we were looking at a real replacement for the AUMFs of 2001 and 2002. So I would urge my colleagues to think not just about the constitutional imperatives—the congressional authorities to declare war, the Presidential authorities under article II—but to think about the practical and almost immediate consequences to those in the field, to our allies, and also of the possible ways in which this act could be used by our adversaries.

I yield the floor.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. MCCAIN. Madam President, I want to discuss the amendment, which has to do with the importance of the authorization for use of military force in the ongoing U.S. operations against violent extremist organizations.

First of all, it is important to acknowledge why our current fight against terrorism is necessary. Earlier this week, we commemorated the anniversary of the September 11 terrorist attacks, which took the lives of thousands of innocent Americans, shook our Nation to its core, and, importantly, brought us together in common resolve to make sure that kind of tragedy would never, ever happen again.

In pursuit of that noble goal, thousands of brave men and women in uniform are currently deployed in Afghanistan, Iraq, and many other places. No matter what else we do in this body and on this legislation, we must always ask ourselves if we are doing everything we can to support those servicemembers as they risk their lives to defend us.

At the same time, we must recognize the ways in which the current conflict is different from when Congress passed the first authorization for use of military force in 2001. The landscape of the global fight against terrorism has changed dramatically with the emergence of ISIS and the spread of the threat beyond Afghanistan and Iraq. That is why I and many others have long called for updating the AUMFs.

Yet the nature of the conflict remains the same: Terrorist organizations continue to warp the religion of Islam and promote a radical ideology to recruit new fighters and plot violent attacks as part of their jihad against the United States of America and all that we stand for.

As chairman of the Senate Armed Services Committee, I am open to a process that would develop a new AUMF specific to the current fight against ISIS and other terrorist organizations as identified by the administration. I would be very willing to work with my colleagues, including the chairman and ranking member of the Foreign Relations Committee, as well as the Senator from Kentucky, to ensure that the legislation proceeded under regular order and included hearings, a committee markup, and a floor amendment process that ensured that each Member of this body was able to have his or her voice heard.

Haven't we had enough of bringing things to the floor without hearings, without amendments, without debate? I am confident that an overwhelming bipartisan majority of my colleagues would agree to approve the use of military force against the vicious, brutal enemy that we face in ISIS and its associated forces.

The amendment before us now falls far, far short of that process. Repealing the 2001 and 2002 AUMFs without simultaneously passing a new authorization would be premature, it would be irresponsible, it would threaten U.S. national security, and it would inhibit our democracy-building efforts abroad.

As we speak, we have troops deployed overseas who are engaged in the fight against ISIS, al-Qaida, the Taliban, and other violent extremist organizations. Repealing the existing AUMFs without having a replacement would jeopardize the legal authority for ongoing military operations. I cannot stand by silently as this body considers taking any action that would put our currently deployed servicemembers at risk.

It is also important to recognize that adopting this amendment would embolden our enemies and would send a signal to the members of the U.S. Armed Forces who are serving in Afghanistan, Iraq, and elsewhere that Congress and the American public no longer support their mission and their sacrifice. We cannot send that message, because it is not true.

In closing, I agree with those who support this amendment that the time has come for a new authorization for use of military force in the global fight against terrorism, but this amendment is, simply, not the way to do it. Rather than repealing the existing AUMFs without passing a new authorization, I urge my colleagues to work together on a new, bipartisan AUMF that addresses the threats we face today.

There are many Members on both sides of the aisle who have been working together on AUMFs, including the chairman of the Foreign Relations Committee. That is a process in which I would be proud to participate, and it is one that would honor those who are currently deployed in harm's way, fighting to make sure that our Nation never sees another day like 9/11. But I cannot support anything that fails to

provide our men and women in uniform with everything they need—including the legal authority—to keep our Nation safe.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. CORKER. Madam President, I agree with so much of what the Senator from Arizona just said.

We are getting ready to go through a procedural motion that I just want to briefly explain. Senator PAUL has offered an amendment. I would prefer that we have an up-or-down vote on this, personally. I do not support the amendment for many of the reasons that Senator MCCAIN just laid out. But in order for Senator PAUL—I am doing this out of respect for his desire to have a recorded vote. I am going to move to table his amendment, which allows him, per Senate rules, to actually get a vote. If it were just a straight up-or-down vote, he would have to have unanimous consent for this to occur. He cannot get that. So this is not a hostile act. He is sitting right beside me, and he understands what I am doing.

I am going to move to table this shortly. I do not support the substance of this amendment. I agree that we need to take action on an AUMF, even though the administration believes—and I agree with them—that they have a legal basis to do what they are doing now against ISIS, per the 2001 and 2002 AUMFs. I agree with that.

I am all for updating the AUMFs. Our committee intends to do so. There has been a bipartisan amendment offered by committee members wherein we hope to take up an AUMF. But doing away with the legal basis by which we are going against ISIS today, before we have implemented and put in place another one, to me, is not prudent. It would mean we would immediately need to begin winding down our operations, and it is not in our national security interests to do so.

So out of a courtesy to the Senator from Kentucky, who serves on our committee, I move to table the Paul amendment No. 871, and I ask for the yeas and nays.

This will allow him to have a recorded vote.

With that, I yield the floor.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The question is on agreeing to the motion.

The clerk will call the roll.

The bill clerk called the roll.

Mr. CORNYN. The following Senator is necessarily absent: the Senator from Florida (Mr. RUBIO).

Further, if present and voting, the Senator from Florida (Mr. RUBIO) would have voted "yea."

Mr. DURBIN. I announce that the Senator from New Jersey (Mr. MENENDEZ) and the Senator from Florida (Mr. NELSON) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 61, nays 36, as follows:

AMENDMENT NO. 545 TO AMENDMENT NO. 1003

Mr. MCCONNELL. Madam President, I call up amendment No. 545.

The PRESIDING OFFICER. The clerk will report.

The senior assistant legislative clerk read as follows:

The Senator from Kentucky [Mr. MCCONNELL], for Mr. MCCAIN, proposes an amendment numbered 545 to amendment No. 1003.

Mr. MCCONNELL. Madam President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

(Purpose: To strike the section relating to the treatment of storm water collection systems as utility systems)

Strike section 2814.

The PRESIDING OFFICER. The majority whip.

HURRICANE HARVEY DEVASTATION

Mr. CORNYN. Madam President, the rain is no longer falling in Houston, but the streets are still being flooded as the Corps of Engineers lets water that threatens the integrity of dams located north of Houston out of those dams, actually reflooding some of the neighborhoods that previously have been flooded, even after the rain has stopped for a number of days now.

The weight of Hurricane Harvey is still pressing down on my home State of Texas, where many are struggling for some good news and a breath of fresh air. The latest numbers that I have seen are that roughly 100,000 people

have lost their homes, 70,000 are still living in shelters or in motel rooms, others are living with friends and family, and more than 700,000 people have registered for individual assistance with the Federal Emergency Management Agency—more than 700,000.

With the water drained in most parts of the city and the area, mold is the next thing that pops up in buildings and houses, and then come the mosquitoes. The mosquitoes aren't just a nuisance. They are a public health hazard as well. We happen to live in an area of the United States where the particular mosquito that carries the West Nile virus and the Zika virus is present. So this represents a public health challenge as well.

These are just some of the aftereffects that I heard about as I traveled the State last week. Those are the more localized problems. As we know, there are others that spread far beyond brick homes and ranches with barbed-wire fences. For example, the challenges, the coordination, and the logistical support among many actors were usually some of the biggest problems that we saw demonstrated with Hurricane Katrina.

Having learned the lessons of Hurricane Katrina, I can't tell you how proud I am of the great collaboration, consultation, and support that we have gotten from the President at the Federal level and all the way down to the State and local leadership, which have stepped up and I think made all of us proud.

While some say it takes a village, my experience in Texas is that it also takes an army. Indeed, Harvey's devastation has been so vast across swaths of the State that we have called in help from our Armed Forces. Members of our military have served crucial roles throughout the storm and continue to do so now that the waters have begun to recede. These include the U.S. Coast Guard, Marine Corps, Army, Navy, and Air Force. More than 12,000 Texas National Guardsmen were activated by Governor Abbott alone, and thousands more have been sent from other States to help out in the rescue and recovery effort.

What did these troops do in their Humvees, helicopters, their amphibious boats, and warships? They did a lot. The Army National Guard alone delivered more than 75,000 pounds of hay to flooded ranches and stranded cattle. Other troops showed up to provide medical services and disaster relief supplies. They assisted with debris management, route clearance, and—in scenes we have all seen on TV—heroic search and rescue operations. That is not all. They provided surveillance aircraft so that imagery could be provided to FEMA of the impact area while State Guard members ensured that people who were evacuated were part of an emergency tracking system. These members of our military are responding to Hurricane Irma in Florida as well.

Earlier this week, the Pentagon sent ships, aircraft, and, of course, fuel to the region to help. So our military has helped in ways that perhaps most of us don't really appreciate. They don't exist just to fight and win our wars; they respond to natural disasters like Hurricanes Harvey and Irma as well. And thank goodness they are there to do that. As the past few weeks have shown, there is always a risk of unforeseen events, and with them, our troops are being stretched awfully thin.

We know the importance of making sure that this week and next, we do everything we can to demonstrate our real support for our men and women in uniform by passing the National Defense Authorization Act. That is why this is so important this week, because not only does it affect our readiness, as I said earlier, to fight and win our Nation's wars in places around the world, it is also important to our ability to respond to natural disasters like Irma and Harvey.

The NDAA, in addition to natural disasters, allows us to address ongoing readiness challenges that we have inherited in the attempt once again to cash the peace dividend when there is no peace.

My colleague and friend MAC THORNBERRY, chairman of the House Armed Services Committee, has spoken about just how dire this situation is. He is just one of many voices on this topic. He calls past inaction a "funding paralysis." The financial straitjacket he is referring to, I might add, is one we desperately need to break out of when it comes to funding and equipping and training and preparing our military to be ready when we call them.

Today, I want to emphasize several amendments I plan to file to the NDAA, the National Defense Authorization Act. They will help make sure that America is safer and, importantly, take steps to correct some of the foreign policy mistakes we saw under the previous administration. Let me talk about three of those amendments.

The first amendment focuses on countering the world's foremost sponsor of terrorism—Iran. The amendment targets Mahan Air, that country's largest commercial airline. That airline has repeatedly played a role in exporting terrorism to other places around the world.

Mahan is a government-controlled airline parading as a commercial enterprise. You can go online right now and purchase a ticket to fly to nearly 40 international airports on Mahan Airline, including ones in countries with which we have a visa waiver agreement. Yet Mahan Air supports the efforts of Iran's Islamic Revolutionary Guard to ferry weapons and personnel to Syria and Iraq and supports Hezbollah as well. In order to operate, it bypasses normal security procedures, omits information from flight manifests, and falsifies documents for maintenance purposes. In so doing, it undercuts the interests of the United States

and, of course, our ally in the region, Israel.

Today, Mahan Air is working to add more international airports to its flight patterns, including several in Europe. Given its links to terrorist activity, we have to consider the potential security risks to Americans who fly in and out of airports where Mahan operates.

My amendment would require the Department of Homeland Security to compile and make public a list of airports where Mahan Air operates and would require the Department of Homeland Security to assess what added security measures should be imposed on those flights.

I hope my colleagues would agree that this is a commonsense proposal, and I hope they will join me in supporting it.

The second amendment I want to talk about involves a different kind of flight risk. This one is domestic instead of international. It addresses the development and the deployment of wind turbines and other structures surrounding our military installations, particularly where our pilots train and fly. Some of them are being built along flight routes in Wichita Falls, Corpus Christi, and elsewhere, both in Texas and in other States, such as New York.

Currently, base commanders have no say and have no real opportunity to indicate the risks these wind farms, which are in close proximity to military training, pose to pilot training and other operations. Commanders are really in the best position to understand the nature of the training that needs to be done and to offer suggestions about how risks can be mitigated, if not eliminated entirely.

My amendment would preserve the voices of the base commanders in the evaluation process. It would require those base commanders impacted by a proposed wind turbine project to weigh in explicitly regarding possible risks, including risks to our ability to train and make ready our pilots but also problems with radar and other ways that it is not only a danger to our military men and women but also to civilian aircraft as well. Clearly, base commanders have expertise and knowledge that must be considered during the proposed construction projects in close proximity to their installations. Their voices are vital.

I hope our colleagues will join me in supporting this amendment and ensuring that our base commanders are always heard when it comes to security risks and threats to readiness.

Finally, the third amendment I want to talk about is one that would grant tax-free status to U.S. troops deployed in the Sinai Peninsula in Egypt.

Last year, with the House Homeland Security Committee, I had the chance to visit an international peacekeeping force comprised largely of American troops deployed to the Sinai. I can tell you from having spoken to them, our troops there play a strategic role in

maintaining the peace in that critical region. Their work is often difficult, and it is always dangerous. The North Camp is located just 15 miles from the Gaza Strip. Troops there face mortars, rockets, and explosive attacks, and a number have been wounded during patrols.

By granting our troops on the Sinai tax-free status, we can put them on equal footing with other American troops who are deployed in war zones like Afghanistan and Iraq and other similarly dangerous hot spots around the globe. All of them enjoy the same tax benefit when stationed in those combat zones, and what we would like to do is establish equal footing and parity for these Americans troops engaged in international peacekeeping missions there in the Sinai. Extending this measure of our appreciation will also serve to bolster morale, you can believe me.

Colleagues, I hope you will join me in supporting these Sinai peacekeeping servicemembers, who put their lives on the line to keep the peace, by passing this measure.

I hope that after an open amendment process, we will be able to get other commonsense amendments added to this legislation before we pass it next week.

I know that Senator MCCAIN, the chairman of the Armed Services Committee, always says we have never failed to pass a national defense authorization bill, and we shouldn't start this week or next. I hope we will pass the bill. I am glad to offer these three amendments and would welcome support from all of our colleagues.

With that, I yield the floor.

I suggest the absence of a quorum.

THE PRESIDING OFFICER (Mr. SULLIVAN). The clerk will call the roll.

The senior assistant legislative clerk proceeded to call the roll.

Mr. COONS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

THE PRESIDING OFFICER. Without objection, it is so ordered.

Mr. COONS. Mr. President, I would like to speak briefly about the amendment just voted upon by this Chamber, an amendment brought forward by Senator PAUL.

As my colleagues know, the Paul amendment would have repealed the 2001 authorization for the use of military force, or so-called AUMF, which authorized military operations against al-Qaida and the Taliban. It would also repeal the 2002 AUMF, which authorized operations against Saddam Hussein and Iraq. These repeals would take effect 6 months after the adoption of the 2018 National Defense Authorization Act.

Senators of both parties owe it to the men and women of our Armed Forces to debate in public the merits of continued conflict against ISIS, al-Qaida, and the Taliban in places such as Afghanistan, Iraq, and Syria, where the brave men and women who serve us and

keep us safe are currently engaged in service to our Nation and our security.

I am very sympathetic to my colleagues' concerns about the potential consequences of repealing the 2001 and 2002 authorizations. I don't want our troops fighting overseas to see our debate on this amendment as a lack of support for their vital mission. I don't want to see our enemies emboldened.

I, however, chose to support the Paul amendment, but my commitment to our troops and my commitment to defeating our enemies is as strong as ever. This body can and must immediately get to work to craft a legal authorization relevant to our current conflict. That is why I supported the Paul amendment, which would have provided a 6-month window to allow Congress to demonstrate oversight, vigorous review of the status of our military operations around the world, and to pass a new authorization relevant to our current national security threats. In other words, it would have required Congress to do its job.

Although the Paul amendment was tabled, I look forward to continuing to discuss this important and pressing issue with my colleagues on the Foreign Relations Committee, where it should more appropriately be debated, and bringing it forward for a final vote in this Chamber.

If we are to do our job under the Constitution of the United States, we owe those who fight and serve and strive to keep us safe nothing less than clarity about Congress's willingness to do its job under the Constitution and our willingness to consent to the actions that are essential to keeping us safe.

DACA

Mr. President, debating and passing a new AUMF is not the only policy area in which Congress needs to get to work. Because of the difficult decision by the Trump administration to end the Deferred Action for Childhood Arrivals Program, or DACA Program, Congress has just 6 months to pass a legislative fix for the nearly 800,000 Dreamers in the United States today.

Let me start by thanking many other colleagues who have already come to the floor to give a voice to our Nation's Dreamers. I am proud to stand with them and speak to this important issue today.

Since 2012, the DACA Program has helped more than 750,000 Dreamers work, study, and contribute to our society free of the constant fear of being forced to leave the only home they have ever known. Many of these young men and women are our classmates, coworkers, colleagues, and folks who are just as American as any one of us because that is what it means to be an American, whether you have been here a month, a year, a decade or seven generations. Those who are willing to serve, to contribute, to engage in our society, to pay taxes, to play by the rules, we welcome as Americans. These are people who were brought to our country as children without authorization but through no fault of their own.

In my view, they deserve the opportunity to demonstrate that they want to contribute to our community and our country and to come forward and live their lives out of the shadows and as proud Americans.

DACA provided these Dreamers with that security, but the President's announcement to end the program has left them in a state of uncertainty and fear. I am eager and willing to work with my colleagues on both sides of the aisle to pass comprehensive immigration reform, but targeting this group of overwhelmingly hard-working and tax-paying Dreamers is not the way to fix our broken immigration system. In my view, it is, in some ways, a capitulation to the harshest, most nativist, anti-immigrant forces in our country.

I believe Americans are strengthened by welcoming immigrants and refugees into our country. I believe this as someone who understands that immigration has strengthened our economy. I believe this because I know America was founded largely as a nation of immigrants and thrives because of its diversity, not in spite of it. I believe this as well because of my faith, which calls on all of us to welcome the stranger and the foreigner. Dreamers frankly aren't strangers at all. They are already our neighbors whose lives and freedom are now in jeopardy. We are talking about young men and women serving in our military, graduating near the top of their classes, working as doctors, teachers, engineers, and first responders.

When we talk about Dreamers, I think it is important to talk about specific people, so allow me to share with you the stories of three young Dreamers in Delaware. First, we are talking about Estephany Martinez-Gonzalez, a current sophomore at Delaware State University who is studying criminal justice and plans to join our law enforcement community as a police officer. She was brought to Winder, GA, in 2003, when she was just 8 years old. She and her sisters today are all enrolled in college, and Estephany even earned a scholarship due to her high achievements in high school.

When we talk about Dreamers, we are talking about Roman Guadarrama, a 30-year-old Delawarean who has been in the United States since 1994. A young soccer star, he was being scouted for collegiate scholarships while in high school, but he never saw college as a possibility for him because he knew he was undocumented. In 2013, taking advantage of the opportunity offered by the previous administration, he stepped forward and enrolled in DACA, was able to obtain a driver's license and take classes at Del Tech College in my home State of Delaware. The DACA Program, he says, gave him a whole new outlook on his future and allowed him to finally pursue his dreams in the country he knows as home.

When we talk about Dreamers, we are talking about people like Indira

Islas, pictured here to my right. Indira came to the United States at 6 years old, in 2004, with her parents and two younger sisters. Now a college student at Delaware State University, Indira has said:

Home to me is Gainesville, Georgia. It always has been and it always will be. It is home because I poured out my heart into that town.

She is studying in Delaware to become a pediatric oncologist, as her own parents once were, but fears that her family could be torn apart before she is able to fulfill her dream of treating children with cancer.

Delaware alone, our small State—one of the smallest of the 50—is home to 1,400 Dreamers just like Estephany, Roman, and Indira. Without them, the United States would lose nearly \$90 billion in GDP every single year. Let me say that again, without the Dreamers, studies suggest that we would lose tens of billions of dollars in American GDP every year. The economic impact would be significant in every State across the Nation because of the role Dreamers have played in our Nation's economic, social, and cultural fabric. Now, some States may be more remote and rural and have a smaller population of Dreamers; whereas, in others they are very large, but across the country as a whole, it is undeniable they have contributed to our economy.

Just listen to the American CEOs who came forward last week to voice their support for finding some legal path forward for these Dreamers. From the Koch brothers to Mark Zuckerberg, U.S. business leaders respect and appreciate the hard work, the contributions, and the potential of our immigrant brothers and sisters known as Dreamers.

It is not just their economic contributions that moves me to speak this morning; Dreamers also help keep us safe. That is because approximately 900 men and women in the U.S. Armed Forces are able to participate in serving our Nation because of the DACA Program. Most of these individuals applied for the Military Accessions Vital to the National Interest, or MAVNI, pilot program which selects immigrants who possess vital skills for our national security to serve in the military. These very individuals include physicians, nurses, and those with skills in critical Middle Eastern and Asian languages like Arabic and Chinese. They are vital to the success of the U.S. military and to our national security. Should we have recruited them, trained them, supported them, deployed them, and now because of an abrupt change in national policy reject them and deport them? I think not.

Dreamers like Indira are American. They grew up here, they have gone through a rigorous process to become a part of this program, and they want, from this point forward, to play by the rules and to succeed. I am calling on my colleagues in Congress to protect the lives of our Dreamers and pass the

Dream Act. I am grateful to Senators Durbin and Graham for their bipartisan efforts to move this bill forward, and I am proud to join them in supporting this effort.

We know we can't count on the administration at this point to protect the 800,000 Dreamers who know no home but the United States. As is appropriate, the job falls to us, to Congress, to take up this issue, to act, and to legislate. We cannot let them down.

Thank you.

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The senior assistant legislative clerk proceeded to call the roll.

Mr. THUNE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

TAX REFORM

Mr. THUNE. Mr. President, last week I came down to the Senate floor to talk about the need for tax reform. One of the most important things we can do to help our economy and American families recover from years of economic stagnation under the previous administration is to reform our Tax Code.

The Tax Code affects every aspect of our economy. It affects how much money you have left over to save or invest. It affects whether a new business can get off the ground. It affects whether an existing business might have the money to raise wages or to hire new employees. It is often the determining factor in whether American jobs go overseas.

Right now our Tax Code isn't doing much to help anybody. It is increasingly strangling our economy, depressing job and wage growth and new business creation, pushing American jobs overseas, and is placing a heavy burden on working families who see far too much of their paychecks going to Washington, DC.

That is why Republicans are making tax reform a priority this fall, and we are hoping the Democrats will join us. Last week I mentioned the five principles that will guide any Republican tax reform legislation. Any bill we pass will have to do these things: No. 1, result in increasing wage and economic growth; No. 2, provide tax relief for the middle class; No. 3, keep good-paying jobs here at home; No. 4, increase American competitiveness in the global economy; and, finally, it has to simplify the Tax Code.

Last week I spent some time discussing the first principle, which is increasing wages, jobs, and economic growth. This week I would like to take a few minutes to focus on the second; that is, providing tax relief for the middle class.

Hard-working Americans have had a hard time of it in recent years. Wage growth was almost nonexistent during the Obama administration. A recent

survey found that 50 percent of people in this country consider themselves to be living paycheck to paycheck. Families who once looked forward to a secure future have found themselves wondering where the next mortgage or rent payment is coming from or if they will be able to afford to put anything toward their kids' college savings or toward their retirement. Fortunately, there are a lot of tax relief measures we can take that will help middle-income families, and any plan for relief has to start with lowering tax rates for the middle class. The Federal Government is simply taking too much money each month from working families.

We need to fix that. American families can do a much better job spending their money than Washington bureaucrats. Any new tax bill needs to leave more money in Americans' wallets—money they can put toward their family's needs in paying for a child's braces or saving for college.

Relief for American families starts with lowering the tax rate, but it doesn't end there. There are other things we can do to help hard-working families. Closing loopholes and ending a variety of special interest tax breaks will boost our efforts to significantly lower rates. Also, simplifying family-focused provisions of the Tax Code will make them easier for families to access.

We need to look at provisions like the earned-income tax credit and the child tax credit to make sure they are delivering the tax relief Congress intended and to look for ways to make them more efficient and effective.

Education tax benefits are another example of an area in which tax reform can deliver for middle-income families. Currently, there are more than a dozen separate tax provisions relating to education, from the American opportunity tax credit to 529 savings accounts, and, of course, these provisions come with approximately 100 pages of IRS instructions, special forms, and schedules, not to mention the professional tax preparer whom too many families have to hire to figure it all out. We can certainly do a better job than that. Simplifying and possibly consolidating the education provisions of the Tax Code could allow more families to take advantage of these provisions, and it could significantly reduce the time families have to spend in trying to obtain these benefits.

Another thing we can do is make sure the Tax Code encourages savings and investment. We will be taking a look at the tax treatment of retirement savings to ensure that it maximizes the ability of individuals to achieve secure retirements.

Another thing we need to do is to finally do away with the alternative minimum tax. This tax, which was originally designed to hit the very wealthiest Americans, eventually ballooned to ensnare huge numbers of the middle class.

While Congress has partially fixed this problem, too many families still

have to waste time in calculating their taxes twice—once for their regular returns and once to see if they have to pay the alternative minimum tax. Imagine the frustration of having to do this extra calculation, only to find out that you do not owe the alternative minimum tax. But if you do not spend the time or hire a professional to figure it out and decide to take your chances, you will certainly hear about it from the IRS if you guess wrong, usually with penalties and interest.

While Congress has acted to protect a lot of middle-income taxpayers, there are still middle-class families who find themselves having to pay the alternative minimum tax. It is time to eliminate this tax, which has long outlived its original purpose.

There are a lot of other things we can do to make the Tax Code better for middle-class families, and throughout this process, Republicans are going to make sure that hard-working Americans are at the forefront of our efforts. We know that American families do the best job of spending their own money, and any tax reform bill we pass will allow them to keep more of their hard-earned dollars.

Mr. President, before I close, I would like to spend a couple of minutes talking about the National Defense Authorization Act, which we are considering here this week.

Our military often got the short end of the stick during the Obama administration, and we have a lot of work to do in order to bring our military back up to full readiness and to modernize our resources. Recent events, from the increased aggression of the North Korean regime to the anniversary of September 11, remind us of the importance of making sure our military is ready to meet any threat.

A key element of keeping the peace is in making sure we have the military strength to deter aggressors. Take North Korea. Our main focus needs to be on a diplomatic solution to the growing tensions in the region, but, as the President has made clear, the full strength of the U.S. military is and has to be at the ready to protect American interests and those of our allies. The Air Force has conducted show-of-force exercises, which have featured B-1 bombers from South Dakota, to deter North Korean aggression.

While we continue with our diplomatic efforts, we need to make sure we project the kind of overwhelming strength that would make North Korea think twice before trying to engage the United States. Needless to say, we also need to maintain robust capabilities on the defensive side. That is why I have submitted an amendment to the National Defense Authorization Act to require that we test our ground-based midcourse defense anti-ballistic missile system twice a year. Yes, tests may fail, but an increased test pace will lead to improvements and will ultimately ensure the reliability of our missile interception defenses.

In addition to North Korea, we are still dealing with continued threats and instability in the Middle East. U.S.-led efforts against ISIS have had significant success on the ground, especially in Iraq, but ISIS's recruitment networks remain active and ever more dangerous, as evidenced by attacks in Europe. There are also still complex security challenges on the ground in Syria and Afghanistan, and we are continuing to deal with an Iran that has grown more defiant in the wake of President Obama's nuclear deal.

On top of all of this, Russia and China continue to take advantage of regional instability to project power and challenge the United States and its allies. Russia continues to occupy Ukraine and challenge NATO, and it has propped up the Assad regime in Syria. Meanwhile, China is only halfheartedly working to keep North Korea in check, all the while expanding its presence in the Pacific by militarizing reefs in disputed waters and building up its forces.

All of these threats underscore the importance of restoring our military readiness and modernizing our capabilities, and this year's National Defense Authorization Act takes significant steps toward achieving those goals.

This bill sets policy and authorizes significant resources that will work to strengthen our military readiness. It includes critical funds for combat aircraft and munitions, new ships, and advanced technology development and next-generation capabilities to ensure that our military is the strongest fighting force in the world. It also includes critical funding to boost the end strength of the Army and the Marine Corps.

This bill also authorizes a 2.1-percent across-the-board pay raise for the dedicated men and women of our military, and the bill contains a number of measures to improve the quality of life for soldiers and their families and Department of Defense civilian employees.

This legislation also ends troubled and redundant programs and reduces unnecessary expenditures to ensure that taxpayer dollars are not being wasted and to free up funding for military priorities.

I have introduced two other amendments to this bill to help further boost readiness.

The first of these amendments seeks to optimize special use airspaces for our military pilots. My amendment would require a report on the management of special use airspaces and their use for training, with the goal of improving the coordination and utilization of these airspaces in order to meet current and future training needs.

Additionally, so as to better position the United States to meet ever-changing cyber threats, I have introduced an amendment to establish a pilot program for a cyber ROTC. With the President's elevating CYBERCOM to a combatant command, it is essential that

the Department of Defense establish additional pipelines to train more men and women in uniform in order to counter the mounting cyber attacks we are facing.

I am grateful to Senator McCAIN and other Senators on the Armed Services Committee for their work on this bill. This bill is an important step forward in making sure our Nation is secure and capable of meeting and deterring threats.

I yield the floor.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. BLUNT. Mr. President, I join my colleague Senator THUNE in talking about the Defense Authorization Act, which is the bill that is before the Senate right now.

The preamble to the Constitution says that one of the purposes of the founding of the government was to "provide for the common defense." I believe that the No. 1 priority of the Federal Government is to do that job. There have been lots of arguments about what level of government can better do lots of other things, but I do not hear many arguments about what the job of defending the country is all about or who has to do that job.

When we send our troops into harm's way, it is our job to ensure that they have the tools they need and that they have the resources they need to carry out their missions. That is what Chairman McCAIN has done in this authorization bill that is before the Senate today.

Senate passage of this bill would mark the 56th year in a row that Congress has passed the National Defense Authorization Act. It should give one some indication of how serious that job is. There are very few things the Congress manages to do every year, but as for the authorization of how we do what we do, this authorization bill provides the authorities that the military needs for it to defend the Nation.

The world is a rapidly changing place. Our responsibility to defend freedom in that world and the freedom of Americans is something that, every year, needs to be carefully looked at and recalculated and recalibrated, which is what Chairman McCAIN and his committee have done with this bill.

I support the bill, and I want to talk about some of the key provisions in the bill.

First of all, Senator THUNE just mentioned a pay raise of 2.1 percent for our troops. It is a pay raise they rightfully deserve. It is a pay raise because of the demands on the military today—the time spent and what we expect our military to do with fewer resources and fewer people. We expect them to do a bigger job, and I want to talk about that a little later. A 2.1-percent pay raise is a pay raise that is richly deserved by those who defend us.

The bill enhances the capability of our military to defeat ISIS, to defeat al-Qaida, and to defeat other enemies. Even though this is 16 years after 9/11,

we still have a hard time fully understanding the emerging threat of these enemies—the nontraditional threat, the nontraditional combatant. These are things we need to continue to look at carefully, to adjust to, to understand their prowess on social media and other places and to understand what could happen there.

This bill focuses on terrorism, cyber warfare, and the proliferation of weapons of mass destruction and their means of delivery.

By the way, on cyber, the Missouri National Guard has one of the leading cyber defense units anywhere in the country. As I have said about this program before, this is a place at which the Reserves and National Guard can particularly do a great job because they go in and out of a different environment every day—going to work defending the utility grid, defending the financial grid—and know what those attacks are like as they step up and do their work as reservists or guardsmen.

This bill ensures that our men and women in uniform have the equipment they need to succeed, including looking at the growing capacity of our enemies. We never want people who are defending us to be in a fair fight. We always want them to be in an unfair fight, and we want any advantage that could possibly be given to be on the side of those who defend our country and defend freedom.

I am glad that this bill projects some of the vital things that happen in our State and, of course, in the Presiding Officer's State. Lots of things happen in Alaska, as they do in Missouri.

This bill further advances the need to replace the national geospatial facility in St. Louis, where 30-plus percent of the people work who monitor our defense posture from the air. They are looking to see what is happening, when it is happening, and how it is happening. It is fully redundant with the facility in Springfield, VA. If one of those does not work for whatever reason, the other one becomes the 100-percent provider of our geospatial activity that goes on all of the time.

There is a new hospital at Fort Leonard Wood in this bill. It has been the No. 1 medical priority for the Defense Department for about a decade. This funds the first phase of the replacement of that facility.

There is an Air National Guard training facility at Rosecrans in St. Joseph where our NATO allies go to learn. In recent times, 19 countries have come and learned the lift capacity—how to use those C-130s in the most effective and efficient way. That is recognized in this bill.

The AVCRAD, which is the aviation repair facility in Springfield, MO, is where a \$34 million investment would return \$62 million in the first year. They are saving about \$111 million at that facility every year now, but phase 3 in that facility would return \$62 million the first year. I do not know that I have ever talked about a government

investment before from which in the first 6 months you get all of the money back in a week or so.

The bill also provides robust funding for A-10 maintenance. That A-10 Reserve unit at Whiteman is where the Secretary of the Air Force just was, and when you are talking to troops on the ground, they would always like the A-10 in the air, supporting them on the ground.

There is money here for Super Hornets to go on our aircraft carriers. It does not matter how many aircraft carriers you have if you do not have the planes to put on the aircraft carriers, and this bill recognizes that.

Something that I have worked for for some time—and I know the Presiding Officer understands so well—is the Military Family Stability Act. It is in this bill, and it was in the Senate bill last year. It was not able to be in the final bill, but it will be in the final bill that the House and Senate pass this year. I am confident. The Secretary of Defense supports it; all of the Joint Chiefs support it; and our House colleagues have supported it. This is the bill that I filed with Senator GILLIBRAND about 3 years ago, which simply provides more flexibility for our military families.

The strength of the military is in the military family structure. This allows the family to either move early or stay longer at these assignments. Normally, they are 2-year to 3-year assignments. Lots can happen in 2 or 3 years, but not everything else perfectly works out in 2 or 3 years. So for employment reasons or for education reasons, if a family decides it is to their advantage to use the family support the military provides, with housing and other benefits, and they stay another 2 months to finish school, for a teaching contract to end, or for some other spouse activity to come to a reasonable conclusion or, frankly, to do just the opposite—to go to the new assignment that you know you already have, but to do that just a little bit earlier so that it works better for the family—to start school on time, to start a job on time, a job that just has to start when that job has to start—they can do that. As we have more dual-career families in the military, this is one of the things we can do.

So this allows up to 6 months for the person in the service to determine where they would like their family benefit to be used, and then they become responsible for their own upkeep while they have either gone early or stayed late. But usually that is available. Bachelor officers' quarters are available at barracks on the base. Because of that, there is no cost to the Defense Department in doing the right thing.

I want to thank Chairman McCAIN for the work he has done on this particular addition to the bill, as well as Samantha Clark on his staff, who has worked hard to see to it that this could be not only workable but easily understandable by the military. I also want

to thank Congressman JOE WILSON and Congresswoman SUSAN DAVIS, who were key to including these provisions in the House National Defense Authorization Act. So families will see something—an opportunity here for them that they haven't seen in the past.

This year's Defense authorization takes the steps necessary to rebuild our military, but we still have more work ahead of us.

Sadly, this summer, we lost more than 40 servicemembers in accidents related to readiness challenges that are impacting the military. Sailors were killed aboard the USS *Fitzgerald* and the USS *John S. McCain*. Marines were killed after a C-130 aircraft crashed in Mississippi and an MV-22 Osprey crashed off the coast of Australia. Soldiers have been lost in helicopter accidents in Hawaii and Yemen.

Just last week, Mackenzie Eaglen with AEI wrote: "Troops are now more likely to die in 'peacetime' incidents than active hostilities or combat."

That is absolutely and totally unacceptable.

Total casualties in Afghanistan, for example, in 2015 were 22, in 2016 were 14, and in 2017 were 11. They were all respected, and it is regrettable that those lives were lost. In those same years, the Department of the Navy lost 28 people, 22 people, and this year—not even over yet—43 people in accidents. We cannot let this continue.

We have asked the military to do too much with too little for too long, and this bill addresses that.

So there are numerous threats to our Nation, and it is critical that we not waste any more time in working to resolve our budget issues. We need to pass this legislation and come up with the appropriations that then support the authorizing bill and go back to the No. 1 priority of the Federal Government, which is to defend the country.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from South Dakota.

Mr. ROUNDS. Mr. President, as the Senate considers the National Defense Authorization Act, or the NDAA, I rise today to discuss a simple amendment in support of my constituents in South Dakota who are military retirees, as well as those in many other States who find themselves in a similar circumstance.

These retirees may be disproportionately and unfairly impacted by increases in the TRICARE prescription drug copay increases that we find within the bill that we are considering today. Specifically, provisions in this bill will increase cost-sharing amounts for the TRICARE pharmacy benefits program for the years 2018 through the year 2026.

Now, the rationale for the increases in the bill that we are considering today are that the savings generated from pharmaceutical cost-share increases can be used to improve healthcare outcomes and the experience of care for beneficiaries in the

military health system, and I support that. I believe in improving the care for beneficiaries in the military health system. But in this particular case, the increased TRICARE pharmacy copays must be carefully considered to make certain that they could not disproportionately impact one part of the beneficiary population.

Unfortunately, that would be the case for South Dakota and for other largely rural States with large military retiree populations that live too far away from military treatment facilities to easily travel to these facilities and to make themselves available for the prescriptions that are available at those facilities. Instead, these military retirees and their families are compelled to use the TRICARE mail order system or the retail pharmacies in their local communities and, in both cases, they would have to pay higher copays. In other words, if you live close to the facility, you can go to the facility and receive those medicines, those pharmaceuticals. But if you are farther away and you have to use a retail shop in your own community or use mail order, you would be subject, under this bill, to a higher copay cost.

For example, a copay for a generic drug ordered through the TRICARE mail order system will increase by \$10 in fiscal year 2018. Now, while this does not seem like a lot of money, those costs can add up rapidly if a military retiree or his family is required to make multiple copays for multiple prescriptions. Simply put, our military retirees who live more than 40 miles away from a military treatment facility should not be unfairly forced to pay higher copays on prescription drugs just because of where they choose to live.

Under my amendment, we would take a step back. The amendment would freeze copay increases for TRICARE retirees and their families who live more than 40 miles from a military treatment facility. Additionally, the amendment would require the Department of Defense to actually assess the financial impact of the higher copays on these beneficiaries.

Now, the 40-mile figure that I have chosen was not done without some thought. I think we were careful in how we chose the 40-mile figure. Forty miles is the distance used by both the Department of Defense and the Department of Veterans Affairs as a boundary for reasonable access to a healthcare facility. The Department of Defense TRICARE Prime program, in which care is primarily delivered through a military treatment facility, is available to individuals who reside within prime service areas, or PSAs. PSAs are locations that are within 40 miles of a military treatment facility.

Similarly, the VA Choice Program, which allows veterans access to healthcare in local communities rather than waiting for a VA appointment or traveling to a VA facility, is available to those whose residence is more than

40 miles driving distance from the closest VA medical facility.

My amendment would also set a deadline of 60 days after the enactment of this legislation for the Department of Defense to report on the financial impact of the copay increases on military retirees and their families.

With the information provided by the Department of Defense, Congress can then rationally assess the impact of the copay increases on beneficiaries who live distant from military treatment facilities and incorporate appropriate provisions in future legislation.

I appreciate the opportunity to discuss my amendment, which would rectify this unintended effect to military retirees and their families who live in rural parts of our country.

Thank you, Mr. President.

I yield the floor.

The ACTING PRESIDENT pro tempore. The Senator from Georgia.

Mr. ISAKSON. Mr. President, I rise for two purposes—principally, to support this legislation and to thank Ranking Member REED and Chairman MCCAIN and the other Members of the Senate for the contributions they have made in the reauthorization of the National Defense Authorization Act.

In particular, I want to thank our men and women in uniform, our command and control, our military intelligence, our weather systems in the military, for the tremendous aid they have provided to us in Georgia, to the people of Florida, the people of Alabama, the people of Texas, the people of Louisiana, and the people of Mississippi during two tragic hurricanes that have taken place in the last weeks. We think of our men and women in uniform every day for what they have sacrificed for us to defend our country and to keep us safe, but sometimes we forget all of the things they do to help us when we have times of trouble. If there were ever times of trouble, Hurricane Harvey in Texas and what happened in Florida with Hurricane Irma are certainly that. Some of those assets are based in my State of Georgia, like the search and rescue mission that works out of Moody Air Force Base in South Georgia, which has been invaluable in rescue efforts in the State of Florida.

So as I come to support the NDAA reauthorization, I come also to pay tribute to our men and women in uniform for all they do for us in so many ways, not just to keep us safe but also in seeing to it that, in times of trouble, they are there for us.

I want to thank my Governor, Nathan Deal, for the advanced planning they did to lead up to the recovery from the hurricane. In Georgia we lost three lives, which is tragic. We are sorry for each one, and our hearts go out to those families.

Preparation by our leader, Nathan Deal, and others in the State saw to it that our reaction and our timeliness was excellent. I thank Governor Deal for doing that, as well as Georgia

Emergency Management, in coordination with FEMA. Everywhere in Georgia where we had danger, we also had response for our people and for our State.

I also want to talk for a second about something called JSTARS. JSTARS is an asset of our U.S. military and our intelligence agencies and a capability that is second to none in the world. JSTARS stands for Joint Surveillance and Target Attack Radar System, or JSTARS, and it is headquartered in Warner Robins, GA, at Robins Air Force Base.

In particular, since the Gulf war and everything that has happened in the Middle East and ensued since then, it has been invaluable in command and control capabilities on the ground. It is an intelligence system that is unmatched by any other military of our adversaries in the world.

We were informed a couple of years ago, when we started the effort to recapitalize the JSTARS, that there may be some movement to move away from JSTARS as a system to protect ourselves and have at our disposal for risk reconnaissance and recovery and battle management and battle control. I had a visit today, as a matter of fact, from the Secretary of the Air Force, Heather Wilson, a great lady and former Member of the House of Representatives, with whom I served, as well as an outstanding soldier and an outstanding person serving as the Secretary of the Air Force and part of the Joint Chiefs of Staff. She told me that the Air Force was looking at different ways that they might deploy recapitalization for JSTARS and other ways to deliver those services to our military personnel, which sends a signal to me that our JSTARS may be in trouble. The reasons for this are inexplicable when talking to anybody who is talking about doing it and inexplicable to me as an individual who knows that system well.

Our country and our soldiers and our warfighters have benefited greatly on the ground and in the air from JSTARS surveillance capabilities. It is an aging system, but it is a great system. It is a system that has coordinated and delivered the coordinated messages that we can get nowhere else. I would submit that, if the Air Force were to decide that, rather than recapitalizing the existing JSTARS program, as we have been working toward over the last few years, they go to an alternative delivery system, it is probably giving up security for our country, intel for our men and women on the ground, battlefield coordination you cannot replace in any other way, and an asset that we have taken for granted for far too long in this country.

So for Chairman MCCAIN, whose service I appreciate, as well as his commitment to NDAA, I come to the floor to say I am with you and I will support you, but I want to make sure we do everything we can to ensure that the JSTARS and the capabilities of that

mission are recapitalized and are there for our soldiers in the future and our military in the future. For us to fail to do so, to my way of thinking, would be bad for our soldiers, bad for our security, and bad for our country.

I thank Ranking Member REED and Chairman MCCAIN for the effort they have put into this. I thank members of the committee for all the efforts they have made.

I thank our men and women in uniform. I am glad we got a pay raise. It is not as much as I would have liked to see, but I am glad we got one. I am glad we are making a bigger investment in our military, but no investment that we give in money can match the investment of spirit, capabilities, and commitment of the men and women of the Armed Forces of the United States of America. I commend them today, praise them for their effort, and tell them: I am with you all the way.

I yield the floor.

I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. WICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. WICKER. Mr. President, at some point during the course of this debate on the National Defense Authorization Act, the Senate may have an opportunity to vote on a McCain amendment authorizing a base realignment and closure round.

As Members know, I have the utmost respect for the chairman of our committee, and I hold him in high regard. But I will certainly be voting against the McCain amendment because I do not believe authorizing a base realignment and closure round at this particular time is in the best interests of the United States or the security of Americans. I do that for two reasons.

No. 1, whether you agree or not that base closings are a savings in the long run, almost everyone will agree that in the short term, a base closing round costs money. So it would be costly in the next fiscal year and in the fiscal year after that to have a base closing round. This is the very time when we don't need an additional expense, because we are dealing with the readiness problem we have in our various branches right now.

As chairman of the Seapower Subcommittee, I can tell you that we have readiness problems with our fleet; we have readiness problems in the Marine Corps—those services in which I have a particular interest in my subcommittee. We need that money for readiness, and we need it in this fiscal year and in the next fiscal year. So for reasons of the short-term costs that BRAC would cause us to incur, I urge my colleagues to vote no on the McCain amendment.

Further, it is my understanding that the wording of this particular amendment takes away the commission part of a base realignment and closure round. If you do believe we ought to move toward this concept—which I do not believe we should do at this point—but if you do believe that, then we ought to at least have the independence that a commission gives to the process. It is the sort of process we have had time and again when we have had a BRAC round. It is what we had the last time the U.S. Congress faced a base realignment and closure round.

So for those two reasons, I submit to my colleagues that a “no” vote is called for. This is something we may need to discuss in 2020. It may be something we need to do later on, and I will be open to suggestions about that. But when we have a readiness crisis facing U.S. security at this moment, this is no time to be taking money away from those immediate needs. For that reason, I will be voting no on the McCain amendment, and I urge my colleagues to do the same.

I yield the floor.

I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Ms. KLOBUCHAR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Ms. KLOBUCHAR. Mr. President, I rise to discuss a very important amendment that has broad support. That is the Klobuchar-Graham amendment on election cyber security. It is an amendment that Senator LINDSEY GRAHAM and I are working to include in the National Defense Authorization Act. Senator MCCAIN is supportive of this bill, and I understand why he is, and that is because he understands that our election infrastructure is a major part of our national security. If we can allow foreign countries to influence our elections, to hack into our local, State election equipment, then we do not have a secure America.

As we know, recent reports show there were 21 different States in which Russians attempted to hack into their actual election software and their equipment. This is not the focus on fake news right now. This is not the focus on emails. This is a focus on actual attempts to hack into State election equipment. It is very straightforward, and that is why there is bipartisan support to pass this amendment to help States to simply strengthen their election equipment. This is not a partisan amendment. Some that come before this body are. As you will soon find out, this has broad support on the Republican side. I am asking my colleagues to help me pass it, to overcome the objections from one Senator.

First of all, I would like to thank my colleagues Senator LINDSEY GRAHAM,

Senator KAMALA HARRIS, and Senator LANKFORD for their work on this important issue. Senators HARRIS and LANKFORD have been working with us, with Senator GRAHAM and me, and I really appreciate their work on this issue.

Senator SCHUMER mentioned this bill in his remarks yesterday. He said securing our election infrastructure is a top priority, and I am thankful he is a champion for this amendment. As I mentioned, Chairman MCCAIN and Ranking Member REED, who are the two top Senators on the Armed Services Committee—that should matter—I appreciate their work for our Nation's defense and their work on the NDAA and the fact that the legislation today includes an important provision championed by Senator MCCAIN. That provision says it is the policy of the United States to defend against and respond to cyber threats to our democratic system, to our system of democracy.

Senator MCCAIN understands that election security is national security. They are forever intertwined. If the people of this country do not have the freedom to have their say in who should be elected—Democrat, Republican, Independent—then we have a breach to our national security. That is why we have such broad support to simply authorize State grants so they can upgrade the security of their election equipment.

I am here to fight for a vote, a simple up-or-down vote—which, yes, I am well aware this will pass—but a simple up-or-down vote, supported by this amendment, both Members who lead this committee. Our election systems have been under attack. They have been under attack, and it will happen again.

If this body wants to sit here and pretend it didn't happen, pretend not to believe 17 intelligence agencies and everything else, that is up to them, but I am not going to go home and tell my constituents I didn't try everything I could to get this amendment included.

According to the Department of Homeland Security, Russian hackers attempted to hack at least 21 States' election systems in 2016. Earlier this year, we also learned that Russia launched cyber attacks against a U.S. voting software company and the emails of more than 100 local election officials.

Last month, the Chicago Board of Elections reported that names, addresses, birth dates, and other sensitive information from about 1.8 million registered voters were exposed.

U.S. national security officials have been sounding the alarms that our voting systems will continue to be a target in the future. The former Director of National Intelligence, James Clapper, recently testified that Russia will continue to interfere in our political system. As Senator RUBIO noted, maybe one time it was one party and one candidate and the next time it will be another. This is what former Director James Clapper said:

I believe Russia is now emboldened to continue such activities in the future both here and around the world, and to do so even more intensely. If there has ever been a clarion call for vigilance and action against a threat to the very foundation of our democratic political system, this episode is it.

Vigilance—that is what this is all about.

In order to safeguard future elections, State and local officials must have the tools and resources they need to prevent hacks and safeguard election infrastructure from foreign interference. They don't need those resources in 2025, they need these resources now.

The next Federal election is just 419 days away. No, we cannot wait another year to do this. We cannot wait 2 years to do this. We cannot see if some of our States that have less money and less resources are able to do this on their own. This is a national issue. Four hundred and nineteen days might sound like a lot of time to some people, but it isn't. It takes time for State and local election officials to come up with plans for their best practices, to shore up their cyber security, to buy new election equipment, to hire cyber experts to make sure their systems are secure.

Do you want to go vote and not know if the Russians are hacking into your elections, into your data, and finding out your address and whom you voted for? I don't think so. Time is of the essence, if we want to improve election cyber security ahead of 2018 and 2020. That is why I am fighting so hard for a vote on this amendment. It is that simple. If we do not act now, we leave State election officials—the people on the frontlines of our democratic process—without the resources they need to combat cyber attacks. That is not just wrong, that is unconscionable, and it is against the very principles of our Constitution. We are supposed to be a government for the people, by the people, not by a foreign entity.

In order to protect our election systems, we need to do three key things. First, we need to bring State and local election officials, cyber security experts, and national security personnel together to provide guidance to our States on how they can best protect themselves from cyber attacks.

Just try to picture a local official in Deep River Falls, MN, or Lanesboro, MN. Are they supposed to have the most updated data on how they protect their elections and what they are supposed to do? No, they need guidance from the Federal Government. Those recommendations should be easily accessible so that every information officer and election official in the country can access them. Many State officials I have talked to feel as though they are in the dark about threats to our election system. That can't continue.

We need our national security officials to be sharing information about the potential for attacks with State officials in real time. By the way, a lot of those States that were hacked into still don't know it. They still don't

have the information. I was just talking to Senator WARNER, ranking member of the Intelligence Committee, about this, and that information still is not out there as it should be. So this means creating a framework for information sharing that acts as an alarm system against cyber intruders. We put alarm systems in our homes but not on our election equipment. Our amendment would establish that alarm system.

Second, the Federal Government must provide States with the resources to implement the best practices developed by States and cyber security experts. A meaningful effort to protect our election systems will require some resources. I think most Americans would agree with me when I say that protecting our democracy from foreign cyber attacks will be money well spent.

Think about the money we put into our national defense. It is important. We want to have a strong defense. We want to have those aircraft carriers. Think about that and how important that is and how much money that costs, and then just think about these ballot boxes in local places where, literally, a foreign entity can just hack in—like that.

Finally, we need better auditing of our elections. That means voter-verified paper ballot backup systems in every State. This is fundamental to protecting our elections and improving public confidence in the reliability of elections. Our amendment would accelerate the move to paper ballots—a backup—by providing States with the resources they need to get there. In short, our amendment would help States block cyber attacks, secure voter registration logs and voter data, upgrade election auditing procedures, and create secure and useful information sharing about threats.

This is a bipartisan amendment. I keep saying that because so often this discussion of the elections has turned partisan on both sides. This is bipartisan. I am doing this with Senator GRAHAM, and we are not alone. Senator HARRIS of California and Senator LANKFORD of Oklahoma are also pushing for the Senate to do its job and address election cyber security. Representative MEADOWS, the leader of the House Freedom Caucus, and Democratic Congressman JIM LANGEVIN introduced companion legislation in the House—the leader of the Freedom Caucus. Why do you think they are interested in this bill that I am doing with LINDSEY GRAHAM? Because they believe in the idea that States should be able to have their own elections, and it shouldn't be federalized. They believe we should have safe and secure elections.

There is strong bipartisan support for this effort outside the Halls of Congress as well. Dozens of former Republican national security officials are pushing for the Senate to pass this amendment. They have written op-eds, called their representatives, and

worked to inform the public about the need to take action now. Michael Chertoff, who served as Secretary of Homeland Security under President George W. Bush, published a piece this month in the Wall Street Journal calling on Congress to take action. He noted that our amendment, the Klobuchar-Graham amendment, would address the cyber security challenge in a way that is “fiscally responsible, respectful of states’ policy-making powers, and proactive in dealing with the most pressing vulnerabilities.”

Bruce Fein, a former Reagan Department of Justice official said “the amendment would enormously strengthen defenses against cyberattacks that could compromise the integrity of elections in the United States and undermine legitimacy of government.”

A bipartisan group of former national security officials sent a letter to Senate leadership pushing for a vote on this amendment. They noted that attacks on U.S. voting systems threaten the most basic underpinnings of American self-government. These attacks are growing in sophistication and scale.

States administer elections. If you talk to a local election official—and I have done this throughout my State—you will find out they are adamant about protecting States’ rights in this area. Guess what. No surprise—we have their support too. A bipartisan group of 10 Secretaries of State sent a letter urging the Senate to pass this amendment. They want this amendment to pass because it would provide vital resources to States to support the growing security demands of our Nation’s election infrastructure.

The National Association of Counties, a group that unites America’s 3,069 counties—these are county governments big and small that serve people on the grassroots level, that know what it means to be having people sitting at those election booths, doing their job for little pay, just making sure that we have free American elections. They support this too. They need resources and cyber expertise, and they need them now.

Our decentralized election system is both a strength and a weakness. It is a strength because we have multiple systems and all of our information isn’t in one place. Right? So if there is a hack in Ohio, maybe you don’t have a hack in Minnesota. If there is a hack in one State, one city, maybe you don’t have it in another. But we don’t want to have a hack anywhere.

American elections are increasingly an easy target because, on the other hand, many local election systems are using election technology that is completely outdated. Forty-three States rely on electronic voting or tabulation systems that are at least 10 years old.

Think about it. We want to have these decentralized elections. That is what we want, but we simply have to make sure that when citizens are vot-

ing in both State and Federal elections for Senator, for Governor, for their local mayor, for their school board, their State’s election equipment is safe and secure. That is where we come in. We don’t run their local elections. I think a lot of Americans wouldn’t want us to run their local elections, but what we do is make sure that elections are safe because those hackers over there in Russia or wherever they are—the thousand people who were operating in that warehouse to try to influence our election—don’t know jurisdictional boundaries. Right? They will commit crimes across State lines, across county lines, across Federal lines, across international lines. They don’t care. So we have to allow our State and local elections and the people who run them to be as sophisticated as the Russians who are trying to break our backs. That is what this is about.

The fact that we have so many security experts supporting this, so many local election people supporting this, and the fact that Senator MCCAIN is more than happy to have this included in his bill because he sees it as a national security issue—how can one Senator stand up and say no to this amendment? That is what the American people should be asking. Local election officials are the place to start. They are passionate about keeping the Federal Government out of State elections, and they support our amendment because it strikes the balance that our Federal system demands when it comes to the administration of elections.

Despite the strong bipartisan support for this amendment—again, I ask the people or person that is blocking this vote to allow this bill to go forward. I am simply outraged by this. I think this is an embarrassment to this body if we allow this to continue. Republican and Democratic Senators support this amendment. Cyber security experts support this amendment. Republican and Democratic major national security officials support this amendment. The Freedom Caucus supports this amendment. This is a bipartisan amendment in the House, so why is it being blocked? I actually can’t tell you. It is not one of those things where someone says: Oh, it isn’t worth putting millions of dollars into this. No, when you look at all the money we are spending on other forms of defense, this is dwarfed by that. No one can actually in good faith say that is the reason, and they are actually not saying that is the reason. They are giving me no reason.

I think they need to come out and tell us why they are against securing our elections. I think the American people deserve an answer for that.

The integrity of our election system is the cornerstone of our democracy. The freedom to choose our leaders, knowing with full confidence that those leaders were chosen in free and fair elections, is something that Americans have fought and died for since

our country was founded. That is why our country came into existence. We didn’t want to have another country control our citizens’ economy. We didn’t want them to control where they went to school. My relatives came over from Slovenia and other places because they wanted to be able to choose where their kids went to school. That is the freedom of voting, and that is what this amendment is about.

Members standing in the way of this bipartisan amendment to protect our election infrastructure are literally committing malpractice on our Constitution. They will have to explain to the American people and to the Freedom Caucus and all the supporters we have across the aisle why they didn’t just stand up, why they didn’t just do something, why they stood idly by and ignored the warnings of our intelligence officials. Do you know what? They are not going to, next summer, be able to say: I guess I was wrong. I will do something now.

It will be too late then. This is the time to authorize this and then to get the money in place by the end of the year. It is the only legal way we can do this.

When it comes to our election infrastructure, we are only as strong as our weakest link. A threat to one county, to one city, to one State’s election infrastructure is an assault on our entire system because it fundamentally threatens the very foundation of our political system. We must be a united front in fighting against those who interfere with our democracy, and we must do everything in our power to prevent foreign interference from ever happening again.

In the 21st century, our adversaries will continue to use cyber warfare. Everyone knows that. Anyone who has had an account at a store hacked into, anyone who has had someone get into their account with spam or send them some fake address, a fake link—everyone knows this is happening. In the 21st century, our adversaries will use cyber warfare, and we need to be prepared to defend our networks against this growing threat to our democracy, especially the most fundamental part of our political system: our elections.

Our attitude must be to roll up our sleeves to get this done. Whoever is blocking this bill better come forward and explain why because the American people are going to demand an answer now, but they are really going to demand an answer when things go bad.

Thank you.

I yield the floor.

The PRESIDING OFFICER (Mr. TOOMEY). The Senator from Montana.

WESTERN WILDFIRES

Mr. TESTER. Mr. President, thank you for the opportunity to speak on the floor.

The images and stories we have witnessed in the aftermath of Hurricanes Harvey and Irma are devastating. I want to thank every American and every Montanan who has pitched in,

who has volunteered, who has donated to help the recovery efforts in Texas and Florida.

I rise today to remind the country there is another devastating and ongoing natural disaster that is impacting thousands of families, costing taxpayers billions of dollars, and draining local economies. As the eyes of the Nation were on Florida this weekend—and rightfully so—Montana wildfires consumed another 150,000 acres.

To date, we have seen over 1.1 million acres burned in Montana this summer. This is more than three times the 10-year average and nearly the size of the State of Delaware. The impact is widespread.

The wildfires have burned farming and grazing land that is used to help feed this country and valuable timber that sustains good jobs in mills across the State. The 1.1 million acres we lost includes world-class hunting, fishing, and hiking land, where families can escape and grandparents can take their grandkids to their favorite fishing hole. The fires have consumed favorite hiking trails and public access sites that help drive our outdoor economy in our State, which sustains over 70,000 jobs a year in Montana alone. The smoke from these fires has put our health at risk—the health of our kids and our neighbors exposed to the smoke that covers the State of Montana.

In addition to burning nearly 2,000 square miles, these fires are burning a hole in our budget. As of this morning, taxpayers have paid nearly \$350 million to fight the wildfires of Montana alone. Across the West, that number is well over \$2 billion. To make matters worse, the Forest Service is borrowing \$300 million from other accounts to help fight wildfires. The Forest Service is forced to rob Peter to pay Paul—money that should be used to prevent fire seasons, maintain and improve forest trails and roads, research and development for better forest management policies, and to fund the work that must get done to make our forests more resilient—I am talking about thinning, cutting, removing debris. The Forest Service is also spending money that should be used to mitigate wildfire risk to fight fire.

Yes, you heard me correctly. We have again entered into a vicious cycle, where we take money from wildfire mitigation and the preparedness accounts in order to pay for the fighting of wildfires that exist today. Each year, we spend more money to fight wildfires, which leaves less money to prevent wildfires. Now, this is nothing new. Fire borrowing is a trend we have seen for the last 20 years. With each passing year, as fire seasons get longer and more intense, our fire borrowing practice leaves an entire agency with almost no budget certainty or flexibility to complete its core mission. Congress has already paid the Forest Service more than 300 million additional dollars to fight fire, but I think

we are going to blow well past that number. That might be enough for Montana alone, but we also need to be able to help the firefighters in California, Montana, Oregon, Washington, Idaho, and across the West.

In the meantime, forest management on the ground is hamstrung, and we have no long-term fix for this problem. As a result, we are investing less in active forest management, which then leaves our forests even more vulnerable to catastrophic wildfires. Frankly, the Forest Service is becoming a fire-fighting agency, not a forest management agency.

When the fire season ends, our restorative work begins but only if there is money in the bank to do that restorative work. I am concerned that without immediate action from Congress, the Forest Service's hollowed-out budget will not provide adequate resources to restore streams and prepare for spring runoffs. If the Forest Service budget leaves Forest Service employees handcuffed this fall, our clean water, along with our blue-ribbon trout streams, will be put at risk, but that isn't all. The impact of this fire season has been felt far beyond our forests.

This devastating fire season has undercut Montana's employees and put jobs at risk. I have heard from small business owners who have seen their bottom line slashed during this fire season. A bad fire launches a ripple effect in the region that results in empty booths at the family restaurants and vacant rooms at local motels.

Wildfires have left our air quality so hazardous that school recesses have been canceled, high school football and soccer games have been moved hundreds of miles away, and folks wear breathing masks when they go pick up their mail.

Farmers and ranchers have lost infrastructure to fire, and extreme drought transformed a very promising spring into an underwhelming harvest. These impacts are real, and unfortunately they are not temporary. Folks in Montana will be dealing with the impacts of this recordbreaking fire season for many months and, in some cases, many years to come.

As Congress works again to get Florida and Texas the help they deserve, I am here to ensure that Montanans get the resources they need too. Here is what this Senate and Congress must do.

The Forest Service must be fully reimbursed for every dime they remove from maintenance, mitigation, and restoration accounts to fight wildfires. To repeat, the Forest Service must be fully reimbursed for every dime that was removed from maintenance, mitigation, and restoration accounts to fight wildfires. Why? We cannot leave the Forest Service with a hollowed-out budget. It is critical they have the resources they need to help communities recover from catastrophic wildfires. The Forest Service must have the tools to go through a public process so we

can cut more trees and remove the dead and dying debris that fueled these fires.

Congress must pass legislation to end the broken way we fund wildfires so we can treat wildfire funding just like the natural disaster it is.

The third thing is, every small business and family farm or ranch in Montana that has suffered loss related to wildfires must have urgent access to the available resources at the Small Business Administration and at the USDA. I have personally contacted the administration to ensure that resources remain available for Montanans because our needs don't end after the wildfires are put out.

The fourth thing is, the Senate must fast-track legislation that provides local governments the additional resources and mitigation efforts they need to recover from these wildfires. I am working on a bill with other western Senators to ensure States like Montana and other States impacted by devastating wildfires have access to adequate recovery resources.

Finally, after a month of record-breaking hurricanes and historic drought and wildfires, it is long past time for the Senate to have an honest debate about climate change. Back home in Montana, we are in the middle of September and there are still 21 priority fires burning and there are still many Montanans who need help.

So over the coming weeks and months, as we take steps to recover from other natural disasters around the country, we need to work together to not only help those in desperate need but also move forward with long-term solutions, solutions that will help us deal with the catastrophes, whether it is floods, hurricanes, droughts, or wildfires. If we are able to work together and get that done, we will indeed have done our job in the U.S. Senate.

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

The PRESIDING OFFICER. The Senator from Wyoming.

Mr. BARRASSO. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

HEALTHCARE

Mr. BARRASSO. Mr. President, I think it is clear to people all across America that the U.S. healthcare system needs reform. Premiums for health insurance are going up by double digits across the country. People living in almost half of the country only have one company selling ObamaCare plans. Millions of people are struggling. They are struggling to get coverage they can afford so they can get the care they need. I will state that it is all because of the healthcare law that the Democrats wrote and passed in Congress and inflicted upon the American people,

which raised the costs for people all across the country and limited their choices.

Today the Senator from Vermont, Mr. SANDERS, and other Democrats said they want to take this failing healthcare system even further. They call their plan “Medicare for all.” Don’t be fooled. They want to take a plan that has government much more involved in the healthcare of the American people and go much further. I don’t believe it is actually a serious plan to help fix the challenges we are facing in this country, but it is now the new litmus test for the liberal left. If this idea were ever to become law, it would mean worse care and it would be outrageously expensive.

The plan the Democrats are talking about would amount to complete Washington control over the healthcare of every man, woman, and child in America, and taxpayers would have to pick up the tab.

Supporters of putting the Federal Government in Washington, DC, in charge of personal healthcare decisions like to claim that this is the way that other countries do it as well. They like to cite as an example the United Kingdom. Well, a lot of people in the United Kingdom see their system of nationalized healthcare entering a death spiral, and it looks a lot like what has happened to ObamaCare.

The waiting lines in England have recently gotten a lot longer for people waiting to get care. They are actually setting new records for how long you have to wait in line to get care in England. For emergency care, they have more people waiting in line in the emergency room for 12 hours or longer. Those numbers have gone up—12 hours or longer—and it has gotten worse.

Let’s say you have a chronic condition, a long-term medical condition. To start treatment for long-term medical conditions, the number of people having to wait 18 weeks or longer has gone up. If Democrats get their way, the American people will have the same kinds of delays. It is inevitable. The problem isn’t just the delays. If Washington pays all of the bills, Washington will want much tighter control over care.

The Democrats’ new scheme will come with a much more powerful rationing board. You can see it coming. In England, the rationing of healthcare means that certain medications are not allowed. There are limits on things like knee and hip operations. The same thing is true in Canada. Medical boards in some parts of the country have banned surgeries for people who are obese or who are smokers. How do you think that would work in the United States? Close to 40 percent of Americans are now considered obese. Would they all be blocked from getting operations that would help improve their health and quality of life? It is only if the rationing board were to say so.

The British have to ration healthcare partly because of the enormous cost of

so-called free medical care. They also have a shortage of people who actually provide the care. Since 2016, there has been a net loss of more than 5,000 nurses and midwives across the British healthcare system. More than a quarter of the nurses who quit cited disillusionment over the quality of care provided to patients. Nurses are quitting because of the poor quality of care provided to patients. It is a great concern.

The United Kingdom ranks 20th out of 24th among Western countries for breast cancer survival. For survival, the United States is first. If you are a woman with breast cancer or a man with prostate cancer, your chances of survival and successful treatment are much, much greater in the United States than they are in Great Britain. It is not that the doctors in this country are that much smarter. It is that people get care sooner. There are not all these long waiting lines. But that will happen if the plan endorsed by 15 Democrats in the Senate and the majority of the Democrats in the House were to ever become law.

Let’s talk about stroke. For the most common kind of stroke, the United Kingdom is 25th out of 30 countries in terms of recovery, solutions, and success. The United States is fourth.

Of course, all of what the Democrats are proposing will not come cheap. Democrats in California had their own scheme earlier this year. When the group that looks at what the cost is going to be reviewed it—and I was in the State senate in Wyoming, and in any key piece of legislation, we would have to do a fiscal note, which is what it is going to cost—in California what they proposed would cost about \$400 billion a year. So how much does the entire State of California pay to run the whole State over the course of a year? What is their budget for the year? It is less than half that amount. So what they are proposing on healthcare is double what they pay for everything that the State of California does.

Last year, Senator SANDERS gave a rough sketch of his plan as part of his Presidential campaign. It would have raised Washington’s total healthcare expenditures by \$32 trillion over just the first 10 years. To pay for it, he wanted to raise taxes, including higher payroll taxes on workers. The problem was that all of these new taxes would pay for less than half of the government’s new spending. The legislation written and cosponsored by Democrats in the House says that it would be paid for by things like—and this is in their words—“a modest tax on unearned income” and a “small tax on stock and bond transactions.”

Remember how President Obama promised that his healthcare law wouldn’t raise taxes on middle-class families—in his words—by a single dime? It turns out that the law included dozens of taxes on American working families, certainly including middle-class Americans all across the country.

Democrats say that total Washington control over healthcare would make things so efficient, that it would save a whole lot of money. Does anyone believe that is ever going to happen?

A lot of people have the stress of dealing between their doctor and their insurance company, and there are a lot of problems out there. Nothing in the Democrats’ takeover of healthcare changes any of that. It just means that the people will be caught in the middle between a fight with their government and a bunch of unaccountable bureaucrats in Washington, DC. How is that better? Where will we see savings from that? The Democrats have no real answers, just empty promises.

You can tell that it is not a real plan because when Democrats had a chance to actually vote on this idea in the Senate, they took a pass. In July, the Senate voted on a bill written by House Democrats. We brought it to the floor of the Senate during the healthcare debate and put it up for a vote. As to the bill that half of the Democrats in the House had cosponsored, they said: Let’s give the Senators an opportunity. Every Republican voted against it, and 43 Democrats voted present. Democrats had a chance to stand up and vote for the idea that they love to talk about, but not a single Senator voted for it, including Senator SANDERS.

Now some of us suspected that this was where the debate over ObamaCare was headed all along. The healthcare law, as passed years ago, was so obviously flawed that there was no way it would work the way the Democrats promised. You had to wonder if Democrats actually wanted it to fail so they could push for more Washington control, more government control over your healthcare.

You can call it the old Potomac two-step. When we were debating ObamaCare in 2009, Senator SANDERS came to the floor of the Senate and said that a full Washington takeover of healthcare was the way to go. Today he is taking his shot. The ObamaCare markets are in shambles. There is no denying that ObamaCare failed to keep its promises. The American people are paying a very steep price for the failures of the law.

The promises that Democrats are making about their new healthcare scheme are even more outlandish. When it fails, the damage will be catastrophic. We cannot allow that to happen to the American people.

Thank you, Mr. President.

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HATCH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The remarks of Mr. HATCH pertaining to the introduction of S. 1803

are printed in today's RECORD under "Statements on Introduced Bills and Joint Resolutions.")

Mr. HATCH. Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Michigan.

Ms. STABENOW. Mr. President, the National Defense Authorization Act before us is more than just an important defense policy bill; it shows what we value as a nation.

In Michigan, we value our freedom. We cherish the rights we enjoy as citizens of this great country. Above all, we honor those brave men and women who are willing to lay down their lives to protect our freedom and defend our rights.

We also value our workers and our businesses. You put Michigan's workers and entrepreneurs on a level playing field, and they will out-work, out-build, and out-imagine anybody anywhere.

I am standing here today because within the NDAA is an important opportunity to not just meet the needs of our national defense but also to help create good-paying American jobs in Michigan and across the country. It is true that we can't have a strong economy without a strong military, but it is also true that when we invest in businesses that are creating good-paying jobs here at home, we are improving our own security. I have seen evidence of this in Michigan.

In 2015, I was honored to lead the first-ever instate Michigan delegation to tour all of our State's military installations. We started at Selfridge Air National Guard Base, which has just celebrated 100 great years of service to our Nation. We then went to TACOM/TARDEC, which—both are the people on the front lines for our Army with research as well as making sure they have the vehicles and the supplies and everything they need to be able to do their jobs and protect us. We went to Camp Grayling, Battle Creek, and Fort Custer. We saw firsthand how critical their work is, not just for our national defense but also to Michigan's economy and jobs.

During the past 2 years, I have had the opportunity to visit over 120 small businesses all around Michigan. That is a very inspiring thing to do—talking with people who put their own dollars and sweat and tears into creating a business, products and services they care deeply and passionately about.

One of those visits really stood out to me—the connection between our defense and jobs. R.A. Miller Industries—RAMI for short—is a Grand Haven manufacturer of high-tech products for our military, including very high-tech antennas. Clear communication—the kind provided by RAMI's talented workforce—is critical to the success of military missions.

RAMI's CEO told me that the Buy American Act—a law passed in 1933 that gives priority to American companies when the Federal Government pur-

chases goods—was no longer working. We checked into it, and it turns out that he was absolutely right.

This is no small deal. The U.S. Federal Government is the single largest purchaser of goods and services in the world, spending some \$450 billion annually on everything from file folders to fighter jets. "Buy American" rules exist because we as a nation believe that when we invest taxpayer dollars to buy products, we ought to be supporting American companies that are creating good-paying American jobs. It is simple common sense, but over time, we seem to have lost some of that sense.

Thanks to loopholes and waivers, American workers are missing out on a whole lot of jobs they could be doing, things they could be making. The biggest of these loopholes allows the Department of Defense to waive "Buy American" rules for products used overseas. Yes, the DOD uses a whole lot of products overseas. In fact, between 2001 and 2016, the Department of Defense spent more than \$35 billion on over 150,000 items—including motorcycles and radios and even airplane engines—that didn't meet "Buy American" rules. That is 150,000 motorcycles, radios, airplane engines, and more that could have been made by American companies like RAMI and by American workers in Michigan and across the country.

That is not right. It is not smart. It makes no sense for American workers—certainly not for the people I represent in Michigan, where we know how to make a lot of different kinds of things very well—and it makes no sense for American taxpayers. That is why I am introducing three amendments to toughen up our "Buy American" requirements so that American workers and businesses come first, where they belong.

The first amendment is simple. It would stop the overseas exemption in the Buy American Act and require the Department of Defense to prioritize products made in the United States. We know there are from time to time reasons why maybe we need a waiver, but we should not have this gigantic hole in "Buy American" provisions by having these overseas exemptions. In Michigan, our defense industry supports more than 105,000 jobs. It is only right that we should invest in American companies, not the competition.

My second amendment would require the Government Accountability Office to review "Buy American" training practices so that contracts and personnel can better comply with current law.

The third amendment would require the Department of Defense to work with the Manufacturing Extension Partnership, which I was pleased to help create years ago, to identify more small- and medium-sized manufacturers that can provide products that comply with "Buy American" standards.

I know we have the businesses and the workers. We need to be paying attention to this and making it a priority.

When a mom and dad in Saginaw sit down to do their taxes, I want them to know the hard-earned money they are spending for our national defense is creating jobs here at home—preferably in Michigan. At the same time, I want businesses and workers from Mackinaw City to Macomb County, Muskegon to Grand Marais, to have the opportunity to contribute to not just our economy but our national security.

We all talk about how America's workers are the best in the world. It is time to prove that we mean it.

The father of a former Member of this Chamber had a great way of saying this, and I would like to end by quoting him. This is former Vice President Joe Biden: "My dad used to have an expression. Don't tell me what you value. Show me your budget, and I'll tell you what you value."

Unfortunately, loopholes like the overseas exemption suggest that we don't value American jobs, American workers, American businesses. They suggest that we think it is no big deal to buy products from a company in another country that can be made in Battle Creek, MI, or Detroit or Flint or Grand Rapids or anywhere across Michigan or anyplace in the country, for that matter. They suggest that we think it is fine to create jobs for workers in Munich when we have workers in Marquette, MI, who are just as talented, just as able, and just as ready—I would argue more so—to get to work to keep us safe.

Michigan workers—American workers will out-work, out-build, and out-imagine anyone. It is time to make sure that they are at the front of the line for good-paying jobs, that we are focused on making sure they have jobs, and that we are putting them to work.

I am hopeful that colleagues on both sides of the aisle will support these amendments to move us a step forward in that direction.

Mr. President, I yield the floor.

I suggest the absence of a quorum.

Mr. DONNELLY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GARDNER). Without objection, it is so ordered.

Mr. DONNELLY. Mr. President, I rise to discuss my legislation, which seeks to prevent American workers from losing their jobs and having them shipped to other countries.

I have always fought to protect American workers and ensure we have Federal policies that benefit our workers in Indiana and across the country. In my home State of Indiana, our workers are being hit particularly hard by jobs being lost and shipped out of

America. Recently, more than 300 workers at the Carrier plant in Indianapolis were laid off, and hundreds more are slated to lose their jobs just days before Christmas. They are not alone. Over 2,000 Hoosier jobs have been or are scheduled to be eliminated and outsourced at nine different companies.

These are more than just statistics. These are moms and dads, sisters and brothers, husbands and wives, our friends, our neighbors, and folks we go to church with, men and women who get up in the dark and go home in the dark, working hard every single day to take care of their families, to give everything they have to try to make their company a success.

These men and women, as I said, work hard every single day. They make quality products, they support their families, they pay their bills, and are working hard to save enough to retire with dignity, and now they are losing their jobs because those already highly profitable companies would rather squeeze out that last dollar in profits by paying less to foreign workers. I have met and spent time with Hoosier workers whose jobs are being outsourced. They are not looking for a handout. They just want an equal shot, a level playing field, and the opportunity to provide for their families.

I met them on the Sunday after the announcements were initially made at Carrier. I spent time with them, talked to them. One of our young men in a military uniform of our country, standing up and serving our Nation, had just been laid off, with his job being shipped elsewhere. He and fellow workers have fulfilled their part of the American promise—a promise that if you work hard and you help your company succeed, you will be able to keep your job, you will earn a decent living, you will be able to put a roof over your family's head, and you can send your kids to school to have an even greater shot at the American dream than you and then retire with dignity.

This is the basic promise of America—the promise of shared success of our workers and our companies. It is now in question. American companies need to live up to their part of the bargain as well, and many already do.

As a U.S. Senator, I have a responsibility to working families, to taxpayers, and to our economy. It is critical our laws and policies encourage businesses to invest in American workers and American communities and penalize those who ship jobs to foreign countries. That is why, earlier this year, I introduced the End Outsourcing Act, which is based on three principles:

First, Federal contracts, funded by taxpayers, should go to companies that employ American workers. This ensures that Federal contracting policy takes into consideration whether companies have outsourced domestic jobs.

Second, companies that do send jobs to foreign countries should forfeit tax breaks and incentives. It is fundamen-

tally unfair that when companies leave for a foreign country, they can then write off the moving costs involved and hand the bill to American taxpayers for their very costs of heading out the door. This legislation claws back incentives and prohibits companies from receiving tax breaks for outsourcing jobs.

Third, Federal policy should encourage businesses to invest here at home, in our towns and in our cities—not only in Indiana but across the country. My legislation creates tax incentives for companies that relocate foreign jobs back to rural or struggling communities. We should encourage job growth in these towns and these places. When companies bring jobs back home, we should support them for helping spur economic investments and growth.

I have spoken with President Trump about this several times, even as recently as last night, and he has been very supportive.

Today I am offering a simple amendment—an amendment which would require companies bidding for Federal defense contracts to disclose in their proposals whether they have outsourced more than 50 jobs to a foreign country in the previous 3 years, and it would allow contracting officers to take into consideration a company's outsourcing practices when awarding Federal contracts—just like price, just like quality, just like delivery. It would be one more element so the people of America can get the very best deal.

Put simply, our tax dollars should go to companies that invest in and support American workers. If we are going to effectively address the jobs going overseas, the jobs leaving our plants, the workers like the ones at Carrier who were laid off and the devastating impact on families across our country, we need to take action here. We can start with the Senate passing my amendment. Preventing the outsourcing of these jobs and investing in our workers should be a bipartisan priority. Protecting American jobs and encouraging businesses to invest in the United States shouldn't be any controversy at all. In fact, it should be easy.

While there is no single solution to prevent companies from shipping jobs to foreign countries, hardworking taxpayers deserve to know our policies line up to promote the American economy and American workers, investing in our workers, strengthening our middle class. We call that Hoosier commonsense, and there is a lot more wisdom in Indiana and in other States than there is in Washington, DC. In Indiana, this makes sense.

I urge my colleagues to support the End Outsourcing Act when it comes up for a vote.

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The senior assistant legislative clerk proceeded to call the roll.

Ms. BALDWIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Ms. BALDWIN. Mr. President, I rise to speak about an amendment that I have submitted to restore “Buy American” standards that support our workers and our national defense. My amendment presents an opportunity to work across party lines to strengthen our national security and to support the hard-working men and women in Wisconsin and across the country.

In fact, President Trump supports exactly what my amendment seeks to achieve. In addition, the Parliamentarians have confirmed that my amendment is germane postclosure. Given that the President agrees with me and the amendment is germane, I am calling on the Republican leadership to schedule an up-or-down vote on my amendment so that Senators have a chance to show their support for the workers who help keep America secure.

Let me explain what my amendment would do. The National Defense Authorization Act would eliminate a number of important “Buy American” laws for certain critical defense components for Navy ships and other defense programs.

My amendment, entitled the Supporting America's Defense Workers Act, would prevent the elimination of these critical “Buy American” protections, which give preference to American companies for government contracts funded with taxpayer dollars. It is a commonsense “Buy American, Hire American” policy that supports our domestic industrial base, our workers, and our national and economic security.

Current law requires that certain critical components like valves, air circuit breakers, machine tools, anchor chains, propellers, passenger buses, chemical weapons antidotes, and photovoltaic devices be supplied by American companies or certain qualified companies located in closely allied countries, such as Canada.

Section 863 of the Defense bill would enact a harmful sunset provision on these current requirements, eliminating them entirely at the end of fiscal year 2018 and consequently opening up taxpayer-funded defense contracts to unfairly subsidized foreign competition and placing American jobs at risk.

Opening these procurements up to foreign sources would have the additional effect of undercutting American steel and iron producers because foreign manufacturers of these components do not use U.S.-sourced raw materials. Section 863 would weaken these sectors of the U.S. defense industrial base and jeopardize the stability of companies located in States across this country and the manufacturers of those components. This would, in turn, harm our military's ability to rely on secure and stable sources of critical defense components in an increasingly

dynamic global security environment. If domestic sources for critical defense components exit the market, our military could be forced into relying on countries that don't share our interests, including strategic adversaries like China or Russia, for parts and supplies.

I want to emphasize that my amendment does not add any new requirements or preferences to defense acquisitions. Rather, it maintains the existing requirements that have worked for years to create a secure supply of critical parts for our Nation's defense.

Again, to be clear, my amendment does not force the Department of Defense or the individual services to do anything that they are not already doing. Indeed, DOD and the services have complied with these requirements for years without complaint and without injury, and it is important to note that these domestic content requirements can be waived. They can be waived for cost; they can be waived for schedule or noncompetitive reasons. In other words, the government retains flexibility under these laws.

Strengthening our defense industrial base should be a bipartisan issue. In fact, as I mentioned earlier, President Trump has said that he agrees with me. He registered his opposition to section 863 in his Statement of Administration Policy, which states: "The Administration strongly objects to Section 863."

The Trump administration goes on to say:

The existing procurement requirements act as a key guarantor of strategic supply chain security. They protect DOD's ability to reliably source goods such as chemical weapons antidotes and components for naval vessels, among others.

Eroding "Buy American" requirements also runs counter to two Presidential initiatives—President Trump's Executive order directing the Pentagon to strengthen domestic manufacturing capabilities and his "Buy American and Hire American" Executive order to better enforce current domestic content laws.

I believe we must take steps to ensure that American products are prioritized when American tax dollars are being spent. Domestic preferences help our manufacturing sector and ensure that critical products meet our high standards. This is particularly important when we are talking about defense products used to ensure that our servicemembers are safe and effective.

In sum, voting for my amendment means voting not only for the creation of well-paying American jobs but also for ensuring that the items used by our men and women in the military are of the highest quality and will continue to be available.

This amendment is supported by the American Shipbuilding Suppliers Association and the Alliance for American Manufacturing.

A strong defense industrial base means a strong and secure America. My amendment has the bipartisan sup-

port of President Trump, and I believe it deserves a vote and the support of all of my colleagues in the Senate.

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The senior assistant legislative clerk proceeded to call the roll.

Mr. BLUMENTHAL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. LEE). Without objection, it is so ordered.

DACA

Mr. BLUMENTHAL. Mr. President, we have seen the chaos and confusion created by the President's rescission of DACA that has created a humanitarian crisis in our country. That statement may seem like an exaggeration, but, for me, it is very clearly a statement of fact. I know it because I have seen it.

I held an emergency field hearing on Monday morning, and I listened to the stories of Dreamers—young people brought to this country, many of them before they could even say their own names, let alone know where they were going. This country has given them education, a place to live, a sense of freedom, and a sense of future. That future now is cut short. They have been threatened with deportation in just 6 months. Their employers, their universities, their communities have no idea whether they can stay and continue their lives, productively and importantly to them and their communities, those workplaces and schools where they currently give back. They not only live and work here, but they give back.

Maybe, most importantly, there is the promise that has been made to them—the promise that was made to them when they came forward and they provided the United States of America with information—some of the most personal information that exists—about their Social Security number, their birth date, their address, and their family. The promise to them was that information would never be used against them and that they had a place here for the time that DACA guaranteed it. That promise now is about to be broken.

Great countries do not break promises. The United States is the greatest country in the history of the world. It should not be breaking promises to innocent young men and women who know only this country, speak only this language, have friends here alone, and actually families here. This rescission of DACA threatens to tear apart families, decimate lives, and create disarray and derailed futures. We are a country that is better than this rescission. We are and remain a country that keeps its promises.

At our hearing, I heard from young men and women like Carolina Bortolletto, originally from Brazil, brought to the United States when she was 9. She has lived in Connecticut for 19 years. She knew she was undocu-

mented, but what she didn't know was that getting a job after school, a driver's license, applying for scholarships and financial aid for colleges would be out of bounds for her.

Seven years ago, she graduated from college with a degree in biology, but she was stuck. She had a diploma but couldn't use it. To fight for others like her, she cofounded CT Students for a DREAM. That organization has grown and become a formidable and powerful advocate for Dreamers.

When DACA was adopted in 2012, it changed the lives of young people like Carolina. It opened a new vista. She could get a driver's license and a job at a nonprofit where she was volunteering. She testified that she finally felt free and independent. She could be the person she wanted to be and the person the United States wanted her to be because she was contributing to our great Nation.

What we know of the Dreamers is that there are many like Carolina and like Alejandra. Alejandra Villamares was brought to the United States from Mexico at age 1. She and her family first settled in a small town in Colorado. She recounted in her testimony difficult memories of growing up undocumented. She remembers her older sister coming home from first grade crying because she had been bullied by other students. She was bullied because she couldn't speak English. Her teachers also couldn't understand or help. She remembers her mother's anguish and pain when she heard about this bullying. Alejandra later encountered the same problems as her sister did.

When she was 11, her father was deported to Mexico. Her mother ran into the threat of financial problems, and the threat of deportation always lingered. She told us at this hearing about this life story, powerful and moving, but with a seemingly happy ending because she was able to go to Wesleyan, one of the best colleges in the country, and major in film studies with a certificate in international relations.

President Trump has put a target on the backs of these young people. Alejandra's happy ending will be dashed. It will be a nightmare and a tragedy if this order truly goes into effect.

President Trump has thrown this ticking timebomb into the lap of Congress. It has potential real effects on real lives like Alejandra's and Carolina's and 10,000 like them in Connecticut—800,000 around the country—people whom the President has described as incredible and terrific, people whom he said he loves.

It would be the height of hypocrisy and inhumanity to deport them. It would be unprecedented in our history to have this kind of massive ejection from this country by plane, by boat, by car, by walking. It would be shameful and shocking for America to force this massive deportation, but it would also be an absolutely reprehensible and unforgivable violation of our promise,

breaking our word, and violating certainly morality, if not law, and there would be legal claims based on due process and other rights that could be violated.

As I said, Carolina Bortolletto is originally from Brazil, but she was brought to the United States when she was 9. She has lived in Connecticut for 19 years. Growing up, she knew that she was undocumented, but she didn't know what that meant until high school, when she saw the opportunities that her classmates could have and that she couldn't—things like getting an after-school job, a driver's license, applying for scholarships and financial aid in college.

Seven years ago, she graduated from college with a degree in biology, but she felt stuck. She had a diploma but couldn't use it. To fight for others like her, she cofounded Connecticut Students for a DREAM, which has grown into a formidable organization that advocates on behalf of immigrants.

When DACA was enacted in 2012, it changed Carolina's life. She got a driver's license, a car, a job at a nonprofit where she had been volunteering. She told me that she finally felt free—that she finally felt independent. She told me that she could be the person that she had always wanted to be. Finally, she could plan for her future with certainty. Excited about what was to come, she went to graduate school for a Master's in Public Health.

She was on cloud nine—until last week, when President Trump made the decision to rescind DACA, threatening to take away all that Carolina has worked for—if we don't act.

In New Haven on Monday, I also heard from a girl who has requested that I don't mention her name here. She is from Canada. When she was 4 years old, her mother passed away in a terrible car accident. She was brought here with her grandmother, a hard-working nurse, who later also passed away. She has had to endure unimaginable loss at such a young age.

She was tremendously lucky that her aunt and uncle took her in as one of their own. She has grown into a leader at home who helps take care of her cousins, acting like a second mom to them. Her dream is to become a lawyer, and she works hard every single day toward that goal.

If Congress doesn't act, this ambitious young girl—who has already endured so much pain and suffering in her life—will be torn from everyone she knows. The children she helps to take care of will lose a mother figure. America will be robbed of a bright new lawyer.

I have heard some people treating Dreamers as bargaining chips in a political battle between the two parties. I have also heard that this is just about “handouts” for a particular group of people.

That is simply not true. Let me tell you what I know: The Dreamers I have met represent some of the best of

America—young men and women who have pulled themselves up by the bootstraps, eager to build bright futures, and prosper, and give back to the only country that they have called home. They want to stay here, and we need them.

The statistics reinforce this point: If Congress doesn't pass the Dream Act, we will lose nearly \$500 billion over 10 years. We will lose \$25 billion in Medicare and Social Security taxes. In my home State alone, we stand to lose over \$300 million a year.

It is time to do away with the myth that the Dreamers work on the sidelines of American society. They are woven into the fabric of this Nation. They drive our economy.

As I said, Alejandra Villamares was brought to the United States from Mexico at age 1. She and her family first settled into a small town in Colorado.

Alejandra recounted difficult memories of growing up undocumented. She remembers her older sister coming home from the first grade, crying because she had been bullied by other students because she could not speak English. Her teachers did not understand her either and couldn't help. She remembers her mother's anguish at the pain and bullying her daughters endured. As Alejandra entered kindergarten, she began to go through the same struggle.

When she was 11, her father was deported to Mexico. Her mother ran into financial problems. The threat of deportation was always lingering in the back of her mind. Things weren't looking good.

And yet, she told me on Monday, “I wanted this to be my country so badly. One thing I knew from the bottom of my heart was that I wanted to stay here, and that I was an American.”

In 2012, when DACA came into effect, she got her chance. She earned admission to Wesleyan, one of the best colleges in Connecticut, and she followed her artistic passions by majoring in film studies with a certificate in international relations.

She felt more empowered to speak up and help others. She held sessions for her peers at her high school to tell them about the college application process, and later became a program coordinator of an educational non-profit to mentor over 200 kids to navigate the college application process.

President Trump is putting a target on the backs of Alejandra and others like her. They will be deported if we do not pass the Dream Act.

In just a week, the President's decision has already sown confusion and chaos. There have been reports of ICE temporarily detaining DACA recipients, including reportedly 9 in Texas on Monday. Hurricanes Harvey and Irma have devastated Texas and Florida, but the White House has not announced any extension to the DACA renewal deadline.

The administration has also been torn between two messages. The Presi-

dent has toed an apologetic line, telling Dreamers that they have “nothing to worry about” and that he will “revisit the issue” if Congress doesn't act—and yet his Department of Homeland Security has said that Dreamers should prepare to leave. If Congress does not pass the Dream Act, Alejandra, Carolina, and others will be at the mercy of a fickle administration. Their lives will be thrown into chaos.

In the stories of the Dreamers, I see my father, who fled Nazi Germany when he was 17 with little more than the clothes on his back. He didn't know anyone, and he didn't speak English. He still believed in the promise of this country. These Dreamers believe in the promise of America, too.

The character of our Nation is at stake. We must act now.

Mr. President, I am convinced these stories are evidence that will be persuasive and convincing to my colleagues and that we cannot shirk our responsibility. We have a public trust to make America worthy of the American dream, to make that dream a reality for these young people, to make sure the Dreamers are protected against this cruel and irrational action that has threatened them.

We are the greatest Nation in the history of the world. We do keep our promises. We must enable the Dreamers to stay. We must pass the Dream Act, without encumbrances or poison pills or extraneous amendments. We must pass the Dream Act now.

Thank you, Mr. President.

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MCCAIN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

SEC. 235. SENSE OF CONGRESS ON HYPERSONIC WEAPONS.

(a) **FINDINGS.**—Congress makes the following findings:

(1) The United States has gained a thorough understanding of hypersonic technology over the course of seven decades of experimentation.

(2) The requirements for technological breakthroughs in hypersonics have largely been established, allowing pursuit of hypersonic glide weapons without a prohibitive budget effect.

(3) The Department of Defense has several hypersonic research and development efforts underway, including conventional prompt global strike (CPS) weapons system, the Hypersonic Air-Breathing Weapon Concept, and the Tactical Boost Glide program.

(4) In testimony before the Committee on Armed Services of the Senate on April 4, 2017, the Commander of United States Strategic Command, General John Hyten, identified the conventional prompt global strike weapons system as the “leading technology maturation effort in the realm of hypersonics” and stated that his command sees “an operational need for a CPS capabilities by the mid-2020s.”

(5) Hypersonic weapons present a radical change in warfare, because they can circumvent many of the challenges associated with contested warfare and integrated air defenses.

(6) Hypersonic weapons may provide solutions to difficult problem sets, such as anti-access area denial schemes, deeply buried or hardened target sets, and mobile high value target sets.

(7) Other countries are aggressively pursuing hypersonic weapons at an alarming rate that threaten to outpace the United States if the United States does not more aggressively pursue development of hypersonic weapons.

(8) The Air Force has a \$10,000,000 requirement on the Unfunded Priority List for hypersonic prototyping.

(b) **SENSE OF CONGRESS.**—It is the sense of Congress that—

(1) the Department of Defense should expedite testing, evaluation, and acquisition of hypersonic weapon systems to meet the stated needs of the warfighter;

(2) testing of such weapon systems should include flight testing, ground based testing, and underwater launch testing;

(3) the Department of Defense should adhere to the requirement in section 1688 of the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114-328) to proceed to a Milestone A decision on the conventional prompt global strike weapons system not later than September 30, 2020, or the date that is 240 days after the successful completion of intermediate range flight 2 of such system;

(4) the United States cannot afford to lose its advantage over foreign countries in developing hypersonic weapons; and

(5) the Department of Defense should focus on the next generation of weapon systems, including third offset technologies, such as hypersonics.

(1) The Armed Forces, the Department of State, the United States Agency for International Development, and other agencies and departments of the United States rely on the services of Afghan nationals in a variety of sensitive and trusted capacities to support the operations of the United States Government in Afghanistan.

(2) Afghans who have supported the United States Government in Afghanistan face grave threats from the Taliban and other terrorist groups as a result of their service.

(3) Commander of the United States Central Command, General Joseph L. Votel, warned in a June 14, 2017, letter that “curtailing or abandoning” the special immigrant visa program for Afghans carried out under the Afghan Allies Protection Act of 2009 (8 U.S.C. 1101 note) “would risk significantly undermining years of progress and goodwill and could serve to tip the balance in favor of malign actors”.

(4) Commander of Resolute Support and United States Forces-Afghanistan, General John W. Nicholson Jr., warned in a June 12, 2017, letter that if such program “is not fully resourced it could significantly undermine our credibility and the 16 years of tremendous sacrifice by thousands of Afghans on behalf of Americans and Coalition partners”.

(5) All visas allocated for such program are projected to be exhausted and all visa issuances for principal applicants will cease in October 2017, if additional visas are not authorized.

(6) The cessation of the issuance of special immigrant visas for Afghans is likely to cause panic among the Afghans who are assisting the United States, often at great personal risk, and could significantly affect the operations of the United States Government in Afghanistan.

(b) SENSE OF CONGRESS.—It is the sense of Congress that an additional 4,000 visas should be made available for principal aliens who are eligible for special immigrant status under the Afghan Allies Protection Act of 2009 (8 U.S.C. 1101 note) to prevent harm to the operations of the United States Government in Afghanistan.

SEC. 1248. SUPPORT OF EUROPEAN DETERRENCE INITIATIVE TO DETER RUSSIAN AGGRESSION.

(a) **FINDINGS.**—Congress makes the following findings:

(1) Military exercises, such as Exercise Nifty Nugget and Exercise Reforger during the Cold War, have historically made important contributions to testing operational concepts, technologies, and leadership approaches; identifying limiting factors in the execution of operational plans and appropriate corrective action; and bolstering deterrence against adversaries by demonstrating United States military capabilities.

(2) Military exercises with North Atlantic Treaty Organization (NATO) allies enhance the interoperability and strategic credibility of the alliance.

(3) The increase in conventional, nuclear, and hybrid threats by the Russian Federation against the security interests of the United States and allies in Europe requires substantial and sustained investment to improve United States combat capability in Europe.

(4) The decline of a permanent United States military presence in Europe in recent years increases the likelihood the United States will rely on being able to flow forces from the continental United States to the European theater in the event of a major contingency.

(5) Senior military leaders, including the Commander of United States Transportation Command, have warned that a variety of increasingly advanced capabilities, especially the proliferation of anti-access, area denial (A2/AD) capabilities, have given adversaries of the United States the ability to challenge the freedom of movement of the United States military in all domains from force deployment to employment to disrupt, delay, or deny operations.

(b) **SENSE OF CONGRESS.**—It is the sense of Congress that, to enhance the European Deterrence Initiative and bolster deterrence against Russian aggression, the United States, together with North Atlantic Treaty Organization allies and other European partners, should demonstrate its resolve and ability to meet its commitments under Article V of the North Atlantic Treaty through appropriate military exercises with an emphasis on participation of United States forces based in the continental United States and testing strategic and operational logistics and transportation capabilities.

(c) **REPORT.**—

(1) **IN GENERAL.**—Not later than March 1, 2018, the Secretary of Defense shall submit to the congressional defense committees a report setting forth the following:

(A) An analysis of the challenges to the ability of the United States to flow significant forces from the continental United States to the European theater in the event of a major contingency.

(B) The plans of the Department of Defense, including the conduct of military exercises, to address such challenges.

(2) **FORM.**—The report required by paragraph (1) shall be submitted in unclassified form, but may include a classified annex.

SEC. 1249. SENSE OF CONGRESS ON THE EUROPEAN DETERRENCE INITIATIVE.

It is the sense of Congress that—

(1) the European Deterrence Initiative will bolster efforts to deter further Russian aggression by providing resources to—

(A) train and equip the military forces of North Atlantic Treaty Organization (NATO) and non-North Atlantic Treaty Organization partners in order to improve responsiveness, expand expeditionary capability, and strengthen combat effectiveness across the spectrum of security environments;

(B) enhance the indications and warning, interoperability, and logistics capabilities of Allied and partner military forces to increase their ability to respond to external aggression, defend sovereignty and territorial integrity, and preserve regional stability;

(C) improve the agility and flexibility of military forces required to address threats across the full spectrum of domains and effectively operate in a wide array of coalition operations across diverse global environments from North Africa and the Middle East to Eastern Europe and the Arctic; and

(D) mitigate potential gaps forming in the areas of information warfare, Anti-Access Area Denial, and force projection;

(2) investments that support the security and stability of Europe, and that assist European nations in further developing their security capabilities, are in the long-term vital national security interests of the United States; and

(3) funds for such efforts should be authorized and appropriated in the base budget of the Department of Defense in order to ensure continued and planned funding to address long-term stability in Europe, reassure the European allies and partners of the United States, and deter further Russian aggression.

SEC. 1250. ENHANCEMENT OF UKRAINE SECURITY ASSISTANCE INITIATIVE.

“(12) Treatment of wounded Ukraine soldiers in the United States in medical treatment facilities through the Secretarial Designee Program, and transportation, lodging, meals, and other appropriate non-medical

support in connection with such treatment (including incidental expenses in connection with such support).”.

SEC. 1251. SENSE OF CONGRESS ON THE IMPORTANCE OF THE NORTH ATLANTIC TREATY ORGANIZATION INTELLIGENCE FUSION CENTER.

(a) **FINDINGS.**—Congress makes the following findings:

(1) The North Atlantic Treaty Organization (NATO) Intelligence Fusion Center provides a crucial contribution to the North Atlantic Treaty Organization alliance and the national security of the United States.

(2) The fast-paced evolution of the security situation throughout Europe and its periphery, as well as a marked increase in conventional, nuclear, and hybrid threats from the Russian Federation, require optimized efforts to track and attribute critical threats to the security and stability of Europe and United States national security interests.

(3) The ability of the North Atlantic Treaty Organization Intelligence Fusion Center to leverage strategic intelligence partnerships with the United States and other allies facilitates daily and direct collaboration that provides operational advantages and efficiencies needed to ensure the rapid and proper response by the North Atlantic Treaty Organization to Russian aggression in the conventional, nuclear, and hybrid domains.

(4) The collocation of the North Atlantic Treaty Organization Intelligence Fusion Center with the Joint Intelligence Analysis Complex of the United States European Command facilitates the sharing and fusion of intelligence, contributes to filling intelligence gaps within both the North Atlantic Treaty Organization and the United States European Command, and supports a common intelligence picture for the North Atlantic Council, which is essential to establishing political consensus on evaluating, analyzing, and attributing existing and emerging threats.

(5) The North Atlantic Treaty Organization Intelligence Fusion Center and its collocation with the Joint Intelligence Analysis Complex contribute significantly to providing the North Atlantic Treaty Organization alliance and the United States European Command timely and effective indications and warnings of threats emanating from within and around Europe.

(b) **SENSE OF CONGRESS.**—It is the sense of Congress that the collocation of the North Atlantic Treaty Organization Intelligence Fusion Center with the Joint Intelligence Analysis Complex of the United States European Command provides the optimal solution to intelligence and operational requirements, while fostering critical diplomatic relationships, and is the most efficient configuration of the intelligence enterprise.

SEC. 1265. UNITED STATES POLICY WITH RESPECT TO FREEDOM OF NAVIGATION OPERATIONS AND OVERFLIGHT BEYOND THE TERRITORIAL SEAS.

(a) **FINDINGS.**—Congress makes the following findings:

(1) Since the Declaration of Independence in 1776, which was inspired in part as a response to a “tyrant” who “plundered our seas, ravaged our Coasts” and who wrote laws “for cutting off our Trade with all parts of the world”, freedom of seas and promotion of international commerce have been core security interests of the United States.

(2) Article I, section 8 of the Constitution of the United States establishes enumerated powers for Congress, which include regulating commerce with foreign nations, punishing piracies and felonies committed on the high seas and offenses against the law of nations, and providing and maintaining a Navy.

(3) For centuries, the United States has maintained a commitment to ensuring the right to freedom of navigation for all law-abiding parties in every region of the world.

(4) In support of international law, the longstanding United States commitment to freedom of navigation and ensuring the free access to sea lanes to promote global commerce remains a core security interest of the United States.

(5) This is particularly true in areas of the world that are critical transportation corridors and key routes for global commerce, such as the South China Sea and the East China Sea, through which a significant portion of global commerce transits.

(6) The consistent exercise of freedom of navigation operations and overflights by United States naval and air forces throughout the world plays a critical role in safeguarding the freedom of the seas for all lawful nations, supporting international law, and ensuring the continued safe passage and promotion of global commerce and trade.

(b) **DECLARATION OF POLICY.**—It is the policy of the United States to fly, sail, and operate throughout the oceans, seas, and airspace of the world wherever international law allows.

(c) **IMPLEMENTATION OF POLICY.**—In furtherance of the policy set forth in subsection (b), the Secretary of Defense shall—

(2) execute, in such critical transportation corridors, routine and regular naval presence missions and maritime freedom of navigation operations throughout the year;

(3) in addition to the operations executed pursuant to paragraph (2), execute routine and regular maritime freedom of navigation operations throughout the year, in accordance with international law, including the use of expanded military options and maneuvers beyond innocent passage; and

(4) to the maximum extent practicable, execute freedom of navigation operations pursuant to this subsection with regional partner countries and allies of the United States.

SEC. 1266. SENSE OF CONGRESS ON THE IMPORTANCE OF THE RULE OF LAW IN THE SOUTH CHINA SEA.

It is the sense of Congress that—

(1) the South China Sea is a vitally important waterway for global commerce and for regional security, with almost 30 percent of the maritime trade of the world transiting the South China Sea annually;

(2) the People's Republic of China is undermining regional security and prosperity and challenging international rules and norms by engaging in coercive activities and attempting to limit lawful foreign operations in the South China Sea;

(3) a tribunal determined “that China had violated the Philippines’ sovereign rights in its exclusive economic zone by (a) interfering with Philippine fishing and petroleum exploration, (b) constructing artificial islands and (c) failing to prevent Chinese fishermen from fishing in the zone,” and that “Chinese law enforcement vessels had unlawfully created a serious risk of collision when they physically obstructed Philippine vessels”;

(4) the arbitral tribunal award of July 2016 stated that there is “no legal basis for China to claim historic rights to resources within the sea areas falling within the nine-dash line”; and

(3) the alliance between the United States and Japan is essential for ensuring maritime security and freedom of navigation, commerce, and overflight in the waters of the East China Sea;

(4) Japan, a cornerstone of peace in the Asia-Pacific region, stands as a strong partner of the United States in efforts to uphold

respect for the rule of law and to oppose the use of coercion, intimidation, or force to change the regional or global status quo, including in the East China Sea and the South China Sea, which are among the busiest waterways in the world;

(5) the United States and Japan are committed to working together towards a world in which the Democratic People's Republic of Korea (DPRK) does not threaten global peace and security with its weapons of mass destruction and illicit activities, and in which it respects human rights and its people can live in freedom;

(6) the alliance between the United States and Japan should be strengthened to maintain peace and stability in the Asia-Pacific region and beyond, to confront emerging challenges, and to safeguard maritime security and ensure freedom of navigation, commerce, and overflight in the East China Sea and the South China Sea;

(7) although the United States Government does not take a position on sovereignty of the Senkaku Islands, the United States acknowledges that the islands are under the administration of Japan and opposes any unilateral actions that would seek to undermine their administration by Japan; and

(8) the unilateral actions of a third party will not affect the United States acknowledgment of the administration of Japan over the Senkaku Islands, and the United States remains committed under the Treaty of Mutual Cooperation and Security with Japan to respond to any armed attack in the territories under the administration of Japan.

(5) The Government of North Korea has provided technical support and conducted destructive and coercive cyberattacks including against Sony Pictures Entertainment and other United States persons.

It is the sense of Congress that—

(1) the nuclear and missile program of North Korea is one of the most dangerous national security threats facing the United States today; and

(2) given the threat posed by North Korea to our allies, the Republic of Korea and Japan, the Nuclear Posture Review that will occur this year should fully consider the perspectives of key allies and partners of the United States in East Asia, including the Republic of Korea and Japan.

SEC. 1284. SENSE OF CONGRESS ON REAFFIRMING STRATEGIC PARTNERSHIPS AND ALLIES.

(a) FINDINGS.—Congress makes the following findings:

(1) Since World War II, the United States has sought partnership and cooperation in establishing a rules-based international order which has resulted in one of the most prosperous periods of human history.

(2) The United States is signatory to seven mutual defense treaties with 56 different countries.

(3) One of the United States defense alliances is the 29-nation-strong North Atlantic Treaty Organization (NATO) which is celebrating its 68th anniversary.

(4) The United States has not faced a more diverse and complex array of crises and threats, including the emergence of competitors like Russia and China, increasingly unstable threats from North Korea and Iran, and the continued threat from transnational violent extremist groups like the Islamic State and al-Qaeda.

(5) The strain of a decreased military budget has decreased capability at precisely the time when demand for United States military strength has increased.

(6) Fifteen years of continuous war has stymied military modernization, focused training on asymmetrical warfare over large-scale conflicts.

(7) Secretary of Defense James Mattis stated that “alliances provide avenues for peace,

fostering the conditions for economic growth with countries that share the same vision, while tempering the plans of those who would attack other nations or try to impose their will over the less powerful”.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the United States is an ally rich nation and our potential competitors—such as Russia, China, and North Korea—are ally poor;

(2) United States allies and partners are critical to defending peace and prosperity throughout the world;

(3) the rules-based international order supported by the United States and its allies has endured—and will continue to promote—an international system that benefits all nations;

(4) throughout the world, the United States will continue to foster relationships with nations of like minds and beliefs;

(5) as the United States manages multiple strategic challenges, our enduring strength remains in alliances such as the North Atlantic Treaty Organization; and

(6) the United States will continue to deepen alliances and expand them, and will take no ally for granted.

“§ 109. Maritime Administration

“(a) ORGANIZATION AND MISSION.—The Maritime Administration is an administration in the Department of Transportation. The mission of the Maritime Administration is to foster, promote, and develop the merchant maritime industry of the United States.

The Secretary shall carry out appropriate activities and programs of the Maritime Administration through the regional offices.

“(f) INTERAGENCY AND INDUSTRY RELATIONS.—The Secretary shall establish and maintain liaison with other agencies, and with representative trade organizations throughout the United States, concerned with the transportation of commodities by water in the export and import foreign commerce of the United States, for the purpose of securing preference to vessels of the United States for the transportation of those commodities.

During the period of a detail, the Secretary shall pay the officer an amount that, when added to the officer's pay and allowances as an officer in the Armed Forces, makes the officer's total pay and allowances equal to the amount that would be paid to an individual performing work the Secretary considers to be of similar importance, difficulty, and responsibility as that performed by the officer during the detail.

“(h) CONTRACTS, COOPERATIVE AGREEMENTS, AND AUDITS.—

“(1) CONTRACTS AND COOPERATIVE AGREEMENTS.—In the same manner that a private corporation may make a contract within the scope of its authority under its charter, the Secretary may make contracts and cooperative agreements for the United States Government and disburse amounts to—

SEC. 6213. SUPPORT OF EUROPEAN DETERRENCE INITIATIVE TO DETER RUSSIAN AGGRESSION.

(1) Military exercises, such as Exercise Nifty Nugget and Exercise Reforger during the Cold War, have historically made important contributions to testing operational concepts, technologies, and leadership approaches; identifying limiting factors in the execution of operational plans and appropriate corrective action; and bolstering deterrence against adversaries by demonstrating United States military capabilities.

(2) Military exercises with North Atlantic Treaty Organization (NATO) allies enhance the interoperability and strategic credibility of the alliance.

(3) The increase in conventional, nuclear, and hybrid threats by the Russian Federation against the security interests of the United States and allies in Europe requires substantial and sustained investment to improve United States combat capability in Europe.

(4) The decline of a permanent United States military presence in Europe in recent years increases the likelihood the United States will rely on being able to flow forces from the continental United States to the European theater in the event of a major contingency.

(5) Senior military leaders, including the Commander of United States Transportation Command, have warned that a variety of increasingly advanced capabilities, especially the proliferation of anti-access, area denial (A2/AD) capabilities, have given adversaries of the United States the ability to challenge the freedom of movement of the United States military in all domains from force deployment to employment to disrupt, delay, or deny operations.

(b) **SENSE OF CONGRESS.**—It is the sense of Congress that, to enhance the European Deterrence Initiative and bolster deterrence against Russian aggression, the United States, together with North Atlantic Treaty Organization allies and other European partners, should demonstrate its resolve and ability to meet its commitments under Article V of the North Atlantic Treaty through appropriate military exercises with an emphasis on participation of United States forces based in the continental United States and testing strategic and operational logistics and transportation capabilities.

(C) improve the agility and flexibility of military forces required to address threats across the full spectrum of domains and effectively operate in a wide array of coalition operations across diverse global environments from North Africa and the Middle East to Eastern Europe and the Arctic; and

(D) mitigate potential gaps forming in the areas of information warfare, Anti-Access Area Denial, and force projection;

(2) investments that support the security and stability of Europe, and that assist European nations in further developing their security capabilities, are in the long-term vital national security interests of the United States; and

TITLE CIII—OPERATION AND MAINTENANCE

SEC. 10301. REPORT ON RELEASE OF RADIUM OR RADIOACTIVE MATERIAL INTO THE GROUNDWATER NEAR THE INDUSTRIAL RESERVE PLANT IN BETHPAGE, NEW YORK.

Not later than 120 days after the date of the enactment of this Act, the Secretary of Defense shall submit to Congress an addendum to the report submitted to Congress in June 2017 entitled “2017 Annual Report For Groundwater Impacts at Naval Weapons Industrial Reserve Plant Bethpage, New York” that would detail any releases by the Department of Defense of radium or radioactive material into the groundwater within a 75-mile radius of the industrial reserve plant in Bethpage, New York.

SEC. 10302. SENSE ON CONGRESS ON THE SMALL TURBINE ENGINE INDUSTRIAL BASE.

(a) FINDINGS.—Congress makes the following findings:

(1) The United States small turbine engine industry has been innovating, developing, producing, and sustaining small gas turbine engines in a competitive market for more than 75 years.

(2) The United States small turbine engine industrial base has made the United States the knowledge leader in low cost, no maintenance engine designs with unmatched field reliability.

(3) The United States small turbine engine industrial base is at a critical juncture, as military requirements have tapered and missile programs, in misguided attempts to save money, are narrowing production contracts to a single vendor causing two of the three existing small turbine engine manufacturers to go out of business.

(4) The departure of these companies from the United States small turbine engine industry will leave only one viable, proven source for small turbine engines for the Department of Defense.

(5) In 2016, a number of engine failures were encountered that severely diminished the throughput of the F107-WR-101 engine maintenance process for the AGM-86 Air Launched Cruise Missile (ALCM), thereby putting the weapon system at major readiness risk.

(6) The narrowing of the United States small turbine engine industrial base would leave the Department with a sole source United States supplier resulting in a loss of manufacturing and testing capability that would be extremely detrimental to both the United States industrial base and national security by creating a single point of failure, increasing engine procurement and testing prices by eliminating competition, raising new engine development and air vehicle program risk, and eliminating capabilities and expertise that would require decades and millions of dollars to reconstitute.

(b) SENSE OF CONGRESS.—It is the sense of the Congress that the Department of Defense should—

(1) allocate sufficient funding to properly sustain the F107 turbine engine in order to ensure this vital weapon is viable until a replacement is fielded; and

(2) contract with multiple, capable engine manufacturers to stabilize and revitalize the

United States small turbine engine industrial base.

SEC. 10303. REPORT ON OPTIMIZATION OF TRAINING IN AND MANAGEMENT OF SPECIAL USE AIRSPACE.

(1) Best practices for the management of special use airspace including such practices that—

(A) result in cost savings relating to training;

(B) increase training opportunities for airmen;

(C) increase joint use of such airspace;

(D) improve coordination with respect to such airspace with—

(i) the Federal Aviation Administration;

(ii) Indian tribes; and

(iii) private landowners and other stakeholders; or

(E) improve the coordination of large force exercises, including the use of waivers or other exceptional measures.

(2) An assessment of whether the capacity of ranges, including limitations on flight operations, is adequate to meet current and future training needs.

(3) An assessment of whether the establishment of a dedicated squadron for the purpose of coordinating the use of a special use airspace at the installation located in that airspace would improve the achievement of the objectives described in subparagraphs (A) through (E) of paragraph (1).

(4) Recommendations for improving the management and utilization of special use airspace to meet the objectives described in subparagraphs (A) through (E) of paragraph (1) and to address any gaps in capacity identified under paragraph (2).

(b) SPECIAL USE AIRSPACE DEFINED.—In this section, the term “special use airspace” means special use airspace designated under part 73 of title 14, Code of Federal Regulations.

(2) CONTENTS.—The exposure assessment required under this subsection shall—

(A) include—

Mr. MCCAIN. Mr. President, I again thank my friend and colleague, Senator JACK REED, for the continued cooperation which has characterized our work together.

First, I wish to say that this modification to the substitution amendment that I am offering, with the agreement and support of Senator REED, includes 48 amendments from both Republicans and Democrats that will help improve this legislation. The modification submitted this morning included 56 amendments, also evenly divided between Republicans and Democrats. I want to emphasize that these amendments which were just included are the result of bipartisan agreement on both sides. They would not have been proposed if they hadn't already been agreed to.

This means that now we have incorporated 104 bipartisan amendments in this legislation. The amendments have the support of both Republicans and Democrats in strengthening this legislation, making the NDAA more reflective of the voices and opinions of all Members of the Senate. So I thank all of my colleagues on both sides of the aisle for allowing us—helping us come up with these amendments which tremendously improve the underlying legislation.

But I must say that we are at an impasse on about four amendments, all four of which are very important amendments, and we simply can't get agreement, which will probably call for the majority leader to file cloture.

I really wish we weren't filing cloture. I wish we were treating amendments the way we treated the Chair's amendment earlier today. Every Senator should have the right to speak and to vote on any issue that comes before this body, and that includes amendments.

Unfortunately, the majority leader will have to file cloture, we will go through a period of time, and then we will move forward with the bill, which, in my view, could be finished tomorrow.

The bad news is that not every Senator is able to be heard and able to file amendments—second-degree, whatever it is. They are going to be shut out by the cloture procedure. That is not right. It is not right. Every one of these 100 Senators should be able to vote, to amend, and to debate. That is what the Senate is supposed to be all about.

There are four basic amendments, and I won't describe them, but I hope that overnight my colleagues on both sides can sit down and figure out, as we

have on a number of amendments, a way that we can reach a point where we can have up-or-down votes on these amendments, which are important to the Nation, particularly when we are talking about the National Defense Authorization Act.

So I again thank the Senator from Rhode Island, my partner. I thank him for all the work he is doing and ask him if he has any suggestions or ideas.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. REED. Mr. President, first, let me once again commend the chairman for working collaboratively and cooperatively to include in this legislation over 100 amendments that have improved a very good piece of legislation. It also represents the input of the vast majority of our colleagues in the Senate. But I think, too, that we should have opportunities to debate and vote, which was typical in previous considerations of the National Defense Authorization Act. We are still considering the possibility of such votes, and I hope we can reach an appropriate conclusion to have votes and debates. But to this point, again, let me thank the chairman for his leadership and take his wise advice to think seriously about how we proceed forward with this legislation.

Mr. President, I yield back.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. MCCAIN. Mr. President, I thank my friend from Rhode Island, and I thank him for the relationship we have developed over the years.

Here is the deal: We have basically four amendments—which are important amendments, and I don't mean in any way to denigrate their importance—that are forcing us to go to a mode where there will be no other amendments voted on. By failing to reach an agreement, we are shutting out our colleagues on both sides of the aisle and preventing them from having their amendments considered. That is why cloture is not a good thing. Cloture should be an act of desperation, and we should not be shutting out debate or amendments by any Member of the Senate.

I have talked a lot about the need to work on a bipartisan basis. I have talked a lot—let's do the regular order, committee markups, debate, legislation to the floor, debate, amendments, and then sent to the President of the United States. I believe we can still do that. I believe the progress we have made on this bill indicates that. But I hope my colleagues think about the fact that we ought to be able to decide, as we have on numerous aspects of this bill on a bipartisan basis, either to agree or to have those amendments debated and voted on. What we do when we invoke cloture is we silence Senators. That is not the way our Founding Fathers envisioned the Senate would function.

But I also would like to say that there are 104 amendments that we did

agree to in a bipartisan fashion. I think we can be very happy about that. But there are still three or four salient issues that I wish we could just go ahead and debate and vote on, as we already have on a couple of very tough issues.

I thank all my colleagues for their cooperation. I thank them for our ability to get in all of these amendments. I am grateful for the votes we have taken. I hope that overnight, even though the majority leader will file cloture—and I support that—we should think overnight if there are ways of resolving the existing differences—not in agreement but to move forward with debate and votes.

Mr. President, I thank my colleagues. I thank my friend from Rhode Island. I hope we keep upmost in mind that what we are doing here affects the lives, the welfare, the benefits, and the capabilities of the finest in our society, the finest in America—the men and women in uniform.

Mr. President, I yield the floor.

Mr. REED. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. WHITEHOUSE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HOEVEN). Without objection, it is so ordered.

CLIMATE CHANGE

Mr. WHITEHOUSE. Mr. President, as the Senate considers the annual authorization of our military and national defense programs, I am here for my 178th "Time to Wake Up" speech, to discuss the security risks climate change presents to our Nation. I urge my colleagues to heed the warnings from our national security experts, not just the self-serving propaganda of the fossil fuel industry that blankets us. What are these national security risks?

A first order of security risk is the physical damage climate change is causing in our atmosphere, oceans, and environment. Science and our senses are already perceiving this damage, indeed already measuring this damage. This order of security risk—risk to the Earth's natural order—will hurt farming communities, coastal communities, fishing communities, and anyone vulnerable to wildfires and extreme weather all around the world. Of course, the poorer you are, the more vulnerable you are to this risk.

The second order of security risk from climate change is the consequences in human society from those physical, biological, and chemical changes in our Earth's environment. As farms or fisheries fail, people are impoverished and dislocated. Scarcity of resources leads to conflicts and confrontations. Storms and fires and floods can make the suffering acute. People who are hungry or dislocated or

torn from their roots can become desperate, can become radicalized and violent. That is why the Department of Defense has for many years called climate change a “catalyst of conflict.”

Researchers from NASA and the University of Arizona determined that drought in Syria was very likely the worst in a thousand years. Massive crop failures and livestock losses moved farmers into stressed cities, where popular protests met brutal violence from the Assad regime. The tide of refugees from that chaos swamped Europe. To the extent the droughts in Syria were a root cause of the discontent that led to the conflict, and ultimately to the flight of refugees, European governments have seen this second order of security risk up close.

There is a third order of security risk, and that is damage to the keystone institutions of our present world order—market capitalism and democratic government. We depend for the quality of life we enjoy on market capitalism and democratic governance, and those institutions—capitalism and democracy—in turn depend on popular approval and confidence. But if you are a person whose livelihood has been harmed by the first-order environmental effects of climate change or if you are a person swept up in the second-order societal effects of climate change or even if you are simply a person who is dismayed as you witness the suffering and harm caused by climate change around you, you will want answers. It is human nature to want answers. When people are hurt, they want a reckoning. When that reckoning comes, the discredit to institutions like capitalism and democracy could be profound for having failed to act in face of a known risk.

Add to that failure to act a moral failure—why the failure to act? Fossil fuel companies, corporate entities, are knowingly causing this harm, and at least in the United States, they are aggressively fighting political solutions to the problem. They are fighting with professionally administered misinformation. Climate denial is the original fake news—with an absurd arsenal of political money.

Companies not in the fossil fuel industry often have excellent climate policies within their corporate fence lines and sometimes even for their supply chains. But as we know in this building, these good companies collectively take essentially no action, particularly here in Congress, to offset the political force of the fossil fuel industry. Indeed, many companies with good climate policies nevertheless support industry organizations that are the instruments of the fossil fuel companies in preventing solutions. This all stands to be a lasting and dangerous discredit to the corporate sector and to market capitalism generally, and the discredit will worsen as the danger worsens.

In Congress, we have nothing to brag about. We have shown ourselves unable to resist the fossil fuel industry, de-

spite knowing it to be deeply burdened with obvious and enormous conflicts of interest and despite clear and repeated warnings from our national security experts. They could not have made it plainer. The Pentagon’s 2014 Quadrennial Defense Review described climate change as a “global threat multiplier,” warning that “the pressures caused by climate change will influence resource competition while placing additional burdens on economies, societies, and governance institutions around the world.” Similar were the 2010 QDR and our national intelligence reviews.

During his Senate confirmation process, Secretary of Defense James Mattis told this body:

Climate change is impacting stability in areas of the world where our troops are operating today. It is appropriate for the Combatant Commands to incorporate drivers of instability that impact the security environment in their areas into their planning.

That is, climate change needs to be a part of command planning.

In response to a question from the Armed Services Committee, he testified:

I agree that the effects of a changing climate—such as increased maritime access to the Arctic, rising sea levels, desertification, among others—impact our security situation. I will ensure that the Department continues to be prepared to conduct operations today and in the future, and that we are prepared to address the effects of a changing climate on our threat assessments, resources, and readiness.

Former Admiral Samuel Locklear, as head of U.S. Pacific Command, warned in 2013 that climate change was the biggest long-term security threat in his area of operation, noting the need for the military to organize for “when the effects of climate change start to impact these massive populations.”

“If it goes bad,” he said, “you could have hundreds of thousands or millions of people displaced and then security will start to crumble pretty quickly.”

The Government Accountability Office is our Federal Government’s watchdog. GAO has warned that climate change could affect military testing, training, and operating activities, hampering readiness and mission continuity. They have also warned of DOD’s “fiscal exposure” to climate change. GAO says that climate change is already affecting our defense infrastructure around the globe—555,000 facilities and 28 million acres of land, with a replacement value of close to \$850 billion. For instance, the Army’s Fort Irwin, CA, is susceptible to heavy rain and flooding. Air Force radar installations in Alaska stand on unstable, thawing permafrost. The Diego Garcia installation in the Indian Ocean and Naval Station Norfolk in Virginia each face rising seas.

In his new book “The Water Will Come,” author Jeff Goodell quotes the former Norfolk naval station commander, Joe Bouchard. The commander said:

It was not a nuisance problem—it was not a minor operational issue. Sea-level rise was

interfering with the combat readiness for the Atlantic fleet.

I repeat: Sea-level rise was interfering with the combat readiness of our Atlantic fleet.

The Navy is spending hundreds of millions of dollars to raise piers and other infrastructure above the rising waters. Goodell writes:

But a base like Norfolk . . . is the hub of an entire ecosystem that has grown up around it . . . fuel suppliers and electrical lines and railroad tracks and repair shops and . . . housing . . . and . . . schools. . . . You can’t just move all this to some random spot.

What is happening in Norfolk is pretty damn serious.

In 2015, Secretary of State John Kerry went to Norfolk, and he asked officers there how long they thought the base could hold out. “Twenty to 50 years,” Captain J. Pat Rios replied. Goodell describes it as what he calls “an extraordinary moment in the annals of American military history: A U.S. naval captain had just told the Secretary of State that the strategically important base, home to six aircraft carriers and key to operations in Europe and the Middle East, would be essentially inoperable in as little as 20 years.”

The bill approved by the Armed Services Committee recognizes this and requires the Pentagon to submit a “comprehensive threat assessment,” describing the climate risks to military missions and the climate-related vulnerabilities of that massive DOD infrastructure. The Department is further directed to submit an “implementation master plan,” detailing the steps that DOD will take to mitigate climate-related mission risks, incorporate climate-related events in combatant commanders’ theater campaign plans, address military infrastructure vulnerabilities, update military construction standards for predicted flooding and extreme weather, and evaluate DOD’s progress adapting to climate change. I commend Chairman JOHN MCCAIN and Ranking Member JACK REED, my senior Senator, for seeing to it that this language was included in this bill.

I also commend my House colleague JIM LANGEVIN for getting similar language into the House version. The House provision states—by the way, this was a big bipartisan provision when it was voted on in the House. It states: “Climate change is a direct threat to the national security of the United States,” and it further requires that the Department of Defense be “prepared to address the effects of a changing climate on threat assessments, resources, and readiness.”

In the shadow of Harvey and Irma, storms that were amped up by warmed seas and that flooded further inland due to risen seas and that held and dumped more rain because of warmed air, and watching the unprecedented fires blazing across the American West and with these bipartisan provisions agreed to in the NDAA bills, I hope we

may be on the brink of finally freeing ourselves from the relentless, remorseless political pressures of the fossil fuel industry. They have had their way around here long enough. We need to have a long overdue discussion of the effects of climate change on our national security, on our health, on our economy, and, ultimately, on our national reputation.

Pope Francis has reminded us that we have "a moral responsibility. We have to take it seriously."

He said: "You can see the effects of climate change and scientists have clearly said what path we have to follow."

He went on: "If someone is doubtful that this is true, they should ask scientists. They are very clear. They are not opinions made on the fly. They are very clear."

Pope Francis is a scientist himself, and having heard plenty of confessions, he is also a man of the world, and he understands the weakness of humankind. He understands political pressures. "When you don't want to see, you don't see," he said. But he reminds us that "history will judge the decisions."

America is an exemplary Nation. As an exemplary Nation, one that projects power by example and not just by force, America will be stronger and more respected if we pull together and craft American climate solutions. For a country that seeks to stand as an example in this world—a city on a hill, we often say—and a country that benefits from the power of that example, this shaming display of out-of-control special interest influence will have consequences. The world is watching. We have a role to play in this world, we Americans, and it is time we got about it before the consequences of climate change become, to quote Donald Trump in 2009, "catastrophic and irreversible."

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MCCONNELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

UNANIMOUS CONSENT AGREEMENT—EXECUTIVE CALENDAR

Mr. MCCONNELL. Mr. President, I ask unanimous consent that at a time to be determined by the majority leader, in consultation with the Democratic leader, the Senate proceed to executive session for consideration of Calendar No. 109, the nomination of Pamela Patenaude to be Deputy Secretary of the Department of Housing and Urban Development. I further ask that there be 40 minutes of debate on the nomination, equally divided in the usual form; that following the use or yielding back of time, the Senate vote on the confirmation with no intervening action or debate; and that, if confirmed, the motion to reconsider be considered made and laid upon the table and the President be immediately notified of the Senate's action.

Mr. MCCONNELL. Mr. President, I ask unanimous consent that the Senate proceed to executive session for consideration of Calendar No. 293.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the nomination. The legislative clerk read the nomination of Douglas W. Domenech, of Virginia, to be an Assistant Secretary of the Interior.

Thereupon, the Senate proceeded to consider the nomination.

There being no further debate, the question is, Will the Senate advise and consent to the Domenech nomination? The nomination was confirmed.

LEGISLATIVE SESSION

The PRESIDING OFFICER. The Senate will now resume legislative session.

MORNING BUSINESS

Mr. MCCONNELL. Mr. President, I ask unanimous consent that the Senate be in a period of morning business, with Senators permitted to speak therein for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Oregon.

Mr. WYDEN. Mr. President, I am going to make remarks on two subjects and I believe I will go a bit longer than 10 minutes. I ask unanimous consent to speak for up to 20 minutes as in morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

WESTERN WILDFIRES

Mr. WYDEN. Thank you very much, Mr. President.

I am going to talk first about the devastating fires that are pounding my State, and then I am going to talk about the new legislation introduced earlier today by our colleagues Senator GRAHAM, Senator CASSIDY, and Senator HELLER.

With respect to the fires, I spent much of last weekend essentially going from one base camp to another, visiting six counties to get updates at fire camps and emergency operation centers. In these travels, I saw major fires burning in Oregon from our northern border with Washington State to our southern border with California. Two of these fires were so large that they covered more than one county. So I believed it was important to visit both their eastern and their western fronts. Doing so in each case took almost 2 hours of driving from just one side of the fire to the other.

Of the 1.5 million acres burning in the West last weekend, almost 500,000
