SEC. 6213. SUPPORT OF EUROPEAN DETERRENCE INITIATIVE TO DETER RUSSIAN AGGRESSION.

(1) Military exercises, such as Exercise Nifty Nugget and Exercise Reforger during the Cold War, have historically made important contributions to testing operational concepts, technologies, and leadership approaches; identifying limiting factors in the execution of operational plans and appropriate corrective action; and bolstering deterrence against adversaries by demonstrating United States military capabilities.

(2) Military exercises with North Atlantic Treaty Organization (NATO) allies enhance the interoperability and strategic credibility of the alliance.

(3) The increase in conventional, nuclear, and hybrid threats by the Russian Federation against the security interests of the United States and allies in Europe requires substantial and sustained investment to improve United States combat capability in Europe.

(4) The decline of a permanent United States military presence in Europe in recent years increases the likelihood the United States will rely on being able to flow forces from the continental United States to the European theater in the event of a major contingency.

(5) Senior military leaders, including the Commander of United States Transportation Command, have warned that a variety of increasingly advanced capabilities, especially the proliferation of anti-access, area denial (A2/AD) capabilities, have given adversaries of the United States the ability to challenge the freedom of movement of the United States military in all domains from force deployment to employment to disrupt, delay, or deny operations.

(b) **SENSE OF CONGRESS.**—It is the sense of Congress that, to enhance the European Deterrence Initiative and bolster deterrence against Russian aggression, the United States, together with North Atlantic Treaty Organization allies and other European partners, should demonstrate its resolve and ability to meet its commitments under Article V of the North Atlantic Treaty through appropriate military exercises with an emphasis on participation of United States forces based in the continental United States and testing strategic and operational logistics and transportation capabilities.

(C) improve the agility and flexibility of military forces required to address threats across the full spectrum of domains and effectively operate in a wide array of coalition operations across diverse global environments from North Africa and the Middle East to Eastern Europe and the Arctic; and

(D) mitigate potential gaps forming in the areas of information warfare, Anti-Access Area Denial, and force projection;

(2) investments that support the security and stability of Europe, and that assist European nations in further developing their security capabilities, are in the long-term vital national security interests of the United States; and

TITLE CIII—OPERATION AND MAINTENANCE

SEC. 10301. REPORT ON RELEASE OF RADIUM OR RADIOACTIVE MATERIAL INTO THE GROUNDWATER NEAR THE INDUSTRIAL RESERVE PLANT IN BETHPAGE, NEW YORK.

Not later than 120 days after the date of the enactment of this Act, the Secretary of Defense shall submit to Congress an addendum to the report submitted to Congress in June 2017 entitled “2017 Annual Report For Groundwater Impacts at Naval Weapons Industrial Reserve Plant Bethpage, New York” that would detail any releases by the Department of Defense of radium or radioactive material into the groundwater within a 75-mile radius of the industrial reserve plant in Bethpage, New York.

SEC. 10302. SENSE ON CONGRESS ON THE SMALL TURBINE ENGINE INDUSTRIAL BASE.

(a) **FINDINGS.**—Congress makes the following findings:

(1) The United States small turbine engine industry has been innovating, developing, producing, and sustaining small gas turbine engines in a competitive market for more than 75 years.

(2) The United States small turbine engine industrial base has made the United States the knowledge leader in low cost, no maintenance engine designs with unmatched field reliability.

(3) The United States small turbine engine industrial base is at a critical juncture, as military requirements have tapered and missile programs, in misguided attempts to save money, are narrowing production contracts to a single vendor causing two of the three existing small turbine engine manufacturers to go out of business.

(4) The departure of these companies from the United States small turbine engine industry will leave only one viable, proven source for small turbine engines for the Department of Defense.

(5) In 2016, a number of engine failures were encountered that severely diminished the throughput of the F107-WR-101 engine maintenance process for the AGM-86 Air Launched Cruise Missile (ALCM), thereby putting the weapon system at major readiness risk.

(6) The narrowing of the United States small turbine engine industrial base would leave the Department with a sole source United States supplier resulting in a loss of manufacturing and testing capability that would be extremely detrimental to both the United States industrial base and national security by creating a single point of failure, increasing engine procurement and testing prices by eliminating competition, raising new engine development and air vehicle program risk, and eliminating capabilities and expertise that would require decades and millions of dollars to reconstitute.

(b) **SENSE OF CONGRESS.**—It is the sense of the Congress that the Department of Defense should—

(1) allocate sufficient funding to properly sustain the F107 turbine engine in order to ensure this vital weapon is viable until a replacement is fielded; and

(2) contract with multiple, capable engine manufacturers to stabilize and revitalize the

United States small turbine engine industrial base.

SEC. 10303. REPORT ON OPTIMIZATION OF TRAINING IN AND MANAGEMENT OF SPECIAL USE AIRSPACE.

(1) Best practices for the management of special use airspace including such practices that—

(A) result in cost savings relating to training;

(B) increase training opportunities for airmen;

(C) increase joint use of such airspace;

(D) improve coordination with respect to such airspace with—

(i) the Federal Aviation Administration;

(ii) Indian tribes; and

(iii) private landowners and other stakeholders; or

(E) improve the coordination of large force exercises, including the use of waivers or other exceptional measures.

(2) An assessment of whether the capacity of ranges, including limitations on flight operations, is adequate to meet current and future training needs.

(3) An assessment of whether the establishment of a dedicated squadron for the purpose of coordinating the use of a special use airspace at the installation located in that airspace would improve the achievement of the objectives described in subparagraphs (A) through (E) of paragraph (1).

(4) Recommendations for improving the management and utilization of special use airspace to meet the objectives described in subparagraphs (A) through (E) of paragraph (1) and to address any gaps in capacity identified under paragraph (2).

(b) **SPECIAL USE AIRSPACE DEFINED.**—In this section, the term “special use airspace” means special use airspace designated under part 73 of title 14, Code of Federal Regulations.

(2) **CONTENTS.**—The exposure assessment required under this subsection shall—

(A) include—

Mr. MCCAIN. Mr. President, I again thank my friend and colleague, Senator JACK REED, for the continued cooperation which has characterized our work together.

First, I wish to say that this modification to the substitution amendment that I am offering, with the agreement and support of Senator REED, includes 48 amendments from both Republicans and Democrats that will help improve this legislation. The modification submitted this morning included 56 amendments, also evenly divided between Republicans and Democrats. I want to emphasize that these amendments which were just included are the result of bipartisan agreement on both sides. They would not have been proposed if they hadn't already been agreed to.

This means that now we have incorporated 104 bipartisan amendments in this legislation. The amendments have the support of both Republicans and Democrats in strengthening this legislation, making the NDAA more reflective of the voices and opinions of all Members of the Senate. So I thank all of my colleagues on both sides of the aisle for allowing us—helping us come up with these amendments which tremendously improve the underlying legislation.

But I must say that we are at an impasse on about four amendments, all four of which are very important amendments, and we simply can't get agreement, which will probably call for the majority leader to file cloture.

I really wish we weren't filing cloture. I wish we were treating amendments the way we treated the Chair's amendment earlier today. Every Senator should have the right to speak and to vote on any issue that comes before this body, and that includes amendments.

Unfortunately, the majority leader will have to file cloture, we will go through a period of time, and then we will move forward with the bill, which, in my view, could be finished tomorrow.

The bad news is that not every Senator is able to be heard and able to file amendments—second-degree, whatever it is. They are going to be shut out by the cloture procedure. That is not right. It is not right. Every one of these 100 Senators should be able to vote, to amend, and to debate. That is what the Senate is supposed to be all about.

There are four basic amendments, and I won't describe them, but I hope that overnight my colleagues on both sides can sit down and figure out, as we

have on a number of amendments, a way that we can reach a point where we can have up-or-down votes on these amendments, which are important to the Nation, particularly when we are talking about the National Defense Authorization Act.

So I again thank the Senator from Rhode Island, my partner. I thank him for all the work he is doing and ask him if he has any suggestions or ideas.

The PRESIDING OFFICER. The Senator from Rhode Island.

Mr. REED. Mr. President, first, let me once again commend the chairman for working collaboratively and cooperatively to include in this legislation over 100 amendments that have improved a very good piece of legislation. It also represents the input of the vast majority of our colleagues in the Senate. But I think, too, that we should have opportunities to debate and vote, which was typical in previous considerations of the National Defense Authorization Act. We are still considering the possibility of such votes, and I hope we can reach an appropriate conclusion to have votes and debates. But to this point, again, let me thank the chairman for his leadership and take his wise advice to think seriously about how we proceed forward with this legislation.

Mr. President, I yield back.

The PRESIDING OFFICER. The Senator from Arizona.

Mr. MCCAIN. Mr. President, I thank my friend from Rhode Island, and I thank him for the relationship we have developed over the years.

Here is the deal: We have basically four amendments—which are important amendments, and I don't mean in any way to denigrate their importance—that are forcing us to go to a mode where there will be no other amendments voted on. By failing to reach an agreement, we are shutting out our colleagues on both sides of the aisle and preventing them from having their amendments considered. That is why cloture is not a good thing. Cloture should be an act of desperation, and we should not be shutting out debate or amendments by any Member of the Senate.

I have talked a lot about the need to work on a bipartisan basis. I have talked a lot—let's do the regular order, committee markups, debate, legislation to the floor, debate, amendments, and then sent to the President of the United States. I believe we can still do that. I believe the progress we have made on this bill indicates that. But I hope my colleagues think about the fact that we ought to be able to decide, as we have on numerous aspects of this bill on a bipartisan basis, either to agree or to have those amendments debated and voted on. What we do when we invoke cloture is we silence Senators. That is not the way our Founding Fathers envisioned the Senate would function.

But I also would like to say that there are 104 amendments that we did

agree to in a bipartisan fashion. I think we can be very happy about that. But there are still three or four salient issues that I wish we could just go ahead and debate and vote on, as we already have on a couple of very tough issues.

I thank all my colleagues for their cooperation. I thank them for our ability to get in all of these amendments. I am grateful for the votes we have taken. I hope that overnight, even though the majority leader will file cloture—and I support that—we should think overnight if there are ways of resolving the existing differences—not in agreement but to move forward with debate and votes.

Mr. President, I thank my colleagues. I thank my friend from Rhode Island. I hope we keep upmost in mind that what we are doing here affects the lives, the welfare, the benefits, and the capabilities of the finest in our society, the finest in America—the men and women in uniform.

Mr. President, I yield the floor.

Mr. REED. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. WHITEHOUSE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HOEVEN). Without objection, it is so ordered.

CLIMATE CHANGE

Mr. WHITEHOUSE. Mr. President, as the Senate considers the annual authorization of our military and national defense programs, I am here for my 178th "Time to Wake Up" speech, to discuss the security risks climate change presents to our Nation. I urge my colleagues to heed the warnings from our national security experts, not just the self-serving propaganda of the fossil fuel industry that blankets us. What are these national security risks?

A first order of security risk is the physical damage climate change is causing in our atmosphere, oceans, and environment. Science and our senses are already perceiving this damage, indeed already measuring this damage. This order of security risk—risk to the Earth's natural order—will hurt farming communities, coastal communities, fishing communities, and anyone vulnerable to wildfires and extreme weather all around the world. Of course, the poorer you are, the more vulnerable you are to this risk.

The second order of security risk from climate change is the consequences in human society from those physical, biological, and chemical changes in our Earth's environment. As farms or fisheries fail, people are impoverished and dislocated. Scarcity of resources leads to conflicts and confrontations. Storms and fires and floods can make the suffering acute. People who are hungry or dislocated or

torn from their roots can become desperate, can become radicalized and violent. That is why the Department of Defense has for many years called climate change a “catalyst of conflict.”

Researchers from NASA and the University of Arizona determined that drought in Syria was very likely the worst in a thousand years. Massive crop failures and livestock losses moved farmers into stressed cities, where popular protests met brutal violence from the Assad regime. The tide of refugees from that chaos swamped Europe. To the extent the droughts in Syria were a root cause of the discontent that led to the conflict, and ultimately to the flight of refugees, European governments have seen this second order of security risk up close.

There is a third order of security risk, and that is damage to the keystone institutions of our present world order—market capitalism and democratic government. We depend for the quality of life we enjoy on market capitalism and democratic governance, and those institutions—capitalism and democracy—in turn depend on popular approval and confidence. But if you are a person whose livelihood has been harmed by the first-order environmental effects of climate change or if you are a person swept up in the second-order societal effects of climate change or even if you are simply a person who is dismayed as you witness the suffering and harm caused by climate change around you, you will want answers. It is human nature to want answers. When people are hurt, they want a reckoning. When that reckoning comes, the discredit to institutions like capitalism and democracy could be profound for having failed to act in face of a known risk.

Add to that failure to act a moral failure—why the failure to act? Fossil fuel companies, corporate entities, are knowingly causing this harm, and at least in the United States, they are aggressively fighting political solutions to the problem. They are fighting with professionally administered misinformation. Climate denial is the original fake news—with an absurd arsenal of political money.

Companies not in the fossil fuel industry often have excellent climate policies within their corporate fence lines and sometimes even for their supply chains. But as we know in this building, these good companies collectively take essentially no action, particularly here in Congress, to offset the political force of the fossil fuel industry. Indeed, many companies with good climate policies nevertheless support industry organizations that are the instruments of the fossil fuel companies in preventing solutions. This all stands to be a lasting and dangerous discredit to the corporate sector and to market capitalism generally, and the discredit will worsen as the danger worsens.

In Congress, we have nothing to brag about. We have shown ourselves unable to resist the fossil fuel industry, de-

spite knowing it to be deeply burdened with obvious and enormous conflicts of interest and despite clear and repeated warnings from our national security experts. They could not have made it plainer. The Pentagon’s 2014 Quadrennial Defense Review described climate change as a “global threat multiplier,” warning that “the pressures caused by climate change will influence resource competition while placing additional burdens on economies, societies, and governance institutions around the world.” Similar were the 2010 QDR and our national intelligence reviews.

During his Senate confirmation process, Secretary of Defense James Mattis told this body:

Climate change is impacting stability in areas of the world where our troops are operating today. It is appropriate for the Combatant Commands to incorporate drivers of instability that impact the security environment in their areas into their planning.

That is, climate change needs to be a part of command planning.

In response to a question from the Armed Services Committee, he testified:

I agree that the effects of a changing climate—such as increased maritime access to the Arctic, rising sea levels, desertification, among others—impact our security situation. I will ensure that the Department continues to be prepared to conduct operations today and in the future, and that we are prepared to address the effects of a changing climate on our threat assessments, resources, and readiness.

Former Admiral Samuel Locklear, as head of U.S. Pacific Command, warned in 2013 that climate change was the biggest long-term security threat in his area of operation, noting the need for the military to organize for “when the effects of climate change start to impact these massive populations.”

“If it goes bad,” he said, “you could have hundreds of thousands or millions of people displaced and then security will start to crumble pretty quickly.”

The Government Accountability Office is our Federal Government’s watchdog. GAO has warned that climate change could affect military testing, training, and operating activities, hampering readiness and mission continuity. They have also warned of DOD’s “fiscal exposure” to climate change. GAO says that climate change is already affecting our defense infrastructure around the globe—555,000 facilities and 28 million acres of land, with a replacement value of close to \$850 billion. For instance, the Army’s Fort Irwin, CA, is susceptible to heavy rain and flooding. Air Force radar installations in Alaska stand on unstable, thawing permafrost. The Diego Garcia installation in the Indian Ocean and Naval Station Norfolk in Virginia each face rising seas.

In his new book “The Water Will Come,” author Jeff Goodell quotes the former Norfolk naval station commander, Joe Bouchard. The commander said:

It was not a nuisance problem—it was not a minor operational issue. Sea-level rise was

interfering with the combat readiness for the Atlantic fleet.

I repeat: Sea-level rise was interfering with the combat readiness of our Atlantic fleet.

The Navy is spending hundreds of millions of dollars to raise piers and other infrastructure above the rising waters. Goodell writes:

But a base like Norfolk . . . is the hub of an entire ecosystem that has grown up around it . . . fuel suppliers and electrical lines and railroad tracks and repair shops and . . . housing . . . and . . . schools. . . . You can’t just move all this to some random spot.

What is happening in Norfolk is pretty damn serious.

In 2015, Secretary of State John Kerry went to Norfolk, and he asked officers there how long they thought the base could hold out. “Twenty to 50 years,” Captain J. Pat Rios replied. Goodell describes it as what he calls “an extraordinary moment in the annals of American military history: A U.S. naval captain had just told the Secretary of State that the strategically important base, home to six aircraft carriers and key to operations in Europe and the Middle East, would be essentially inoperable in as little as 20 years.”

The bill approved by the Armed Services Committee recognizes this and requires the Pentagon to submit a “comprehensive threat assessment,” describing the climate risks to military missions and the climate-related vulnerabilities of that massive DOD infrastructure. The Department is further directed to submit an “implementation master plan,” detailing the steps that DOD will take to mitigate climate-related mission risks, incorporate climate-related events in combatant commanders’ theater campaign plans, address military infrastructure vulnerabilities, update military construction standards for predicted flooding and extreme weather, and evaluate DOD’s progress adapting to climate change. I commend Chairman JOHN MCCAIN and Ranking Member JACK REED, my senior Senator, for seeing to it that this language was included in this bill.

I also commend my House colleague JIM LANGEVIN for getting similar language into the House version. The House provision states—by the way, this was a big bipartisan provision when it was voted on in the House. It states: “Climate change is a direct threat to the national security of the United States,” and it further requires that the Department of Defense be “prepared to address the effects of a changing climate on threat assessments, resources, and readiness.”

In the shadow of Harvey and Irma, storms that were amped up by warmed seas and that flooded further inland due to risen seas and that held and dumped more rain because of warmed air, and watching the unprecedented fires blazing across the American West and with these bipartisan provisions agreed to in the NDAA bills, I hope we

may be on the brink of finally freeing ourselves from the relentless, remorseless political pressures of the fossil fuel industry. They have had their way around here long enough. We need to have a long overdue discussion of the effects of climate change on our national security, on our health, on our economy, and, ultimately, on our national reputation.

Pope Francis has reminded us that we have "a moral responsibility. We have to take it seriously."

He said: "You can see the effects of climate change and scientists have clearly said what path we have to follow."

He went on: "If someone is doubtful that this is true, they should ask scientists. They are very clear. They are not opinions made on the fly. They are very clear."

Pope Francis is a scientist himself, and having heard plenty of confessions, he is also a man of the world, and he understands the weakness of humankind. He understands political pressures. "When you don't want to see, you don't see," he said. But he reminds us that "history will judge the decisions."

America is an exemplary Nation. As an exemplary Nation, one that projects power by example and not just by force, America will be stronger and more respected if we pull together and craft American climate solutions. For a country that seeks to stand as an example in this world—a city on a hill, we often say—and a country that benefits from the power of that example, this shaming display of out-of-control special interest influence will have consequences. The world is watching. We have a role to play in this world, we Americans, and it is time we got about it before the consequences of climate change become, to quote Donald Trump in 2009, "catastrophic and irreversible."

I yield the floor.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MCCONNELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

WESTERN WILDFIRES

Mr. WYDEN. Thank you very much, Mr. President.

I am going to talk first about the devastating fires that are pounding my State, and then I am going to talk about the new legislation introduced earlier today by our colleagues Senator GRAHAM, Senator CASSIDY, and Senator HELLER.

With respect to the fires, I spent much of last weekend essentially going from one base camp to another, visiting six counties to get updates at fire camps and emergency operation centers. In these travels, I saw major fires burning in Oregon from our northern border with Washington State to our southern border with California. Two of these fires were so large that they covered more than one county. So I believed it was important to visit both their eastern and their western fronts. Doing so in each case took almost 2 hours of driving from just one side of the fire to the other.

Of the 1.5 million acres burning in the West last weekend, almost 500,000

were burning in my home State alone. Now, there are 17 fires burning in Oregon. Thousands of Oregonians have been evacuated this summer, and thousands more are facing the prospect of evacuation.

Thousands of firefighters from Oregon and all over this country have been putting themselves in harm's way to help Oregon battle these infernos. From the Columbia River Gorge on the Washington border to Oregon's southwest corner, hundreds of miles away on the California border, I felt it was an enormous honor just to be able to say thank you to the thousands of hard-working men and women who are battling these life-threatening blazes.

I met with emergency service responders on the Eagle Creek fire in the gorge. The Chetco Bar fire in Southwestern Oregon that stretches across Jackson and Josephine Counties, the Jones fire in Lane County, and the Miller Complex fire in Jackson County. In each of these settings, I met men and women who exemplify what I call the Oregon way. The Oregon way isn't written down anywhere. It isn't a law or a rule, it is an ethic. It is an ethic where Oregonians step up and make sure friends and neighbors aren't in jeopardy, and the Oregon way is all about Oregonians staying on the job until it is finished.

I was also very moved by the presence of those from all over the country who came to our State, sometimes from thousands of miles away, to help save Oregon treasures—people from California, Arizona, all the way from the east coast and many points in between who came to Oregon to help out. It was just stunning to meet folks from Florida who, while worrying about their friends and loved ones in the path of Hurricane Irma, were up and working on our natural disaster, which is wildfire.

To get this job done right for generations to come, you have to recognize the inescapable proposition that the fires are getting hotter, they are getting bigger, and they are getting much more dangerous to fight. In one example, I heard how the Eagle Creek fire raced 13 miles in 15 hours, and it burned with such ferocity, with high winds, that it jumped the Columbia River. It jumped the river to start a fire on the Washington side of the gorge. For those who might not be familiar with normal fire behavior, I want to just take a minute and say how serious that is. Usually a river, and certainly a river as large as the Columbia, acts as a natural fire break, but these fires we are seeing today are not normal fires. These are not your grandfather's fires. These are gargantuan, dangerous fires. I haven't seen anything like it, along with my friend who has been on the Natural Resources Committee for a long time. This year is on track to be the worst fire in history in terms of total acres burned.

The Washington Post newspaper on Friday reported that with the dozens of

fires that have spread across the West, an area larger than the size of Maryland has been burned straight through.

The way the Federal Government has historically paid for fighting fires is just plain wrong, and it leads to a cycle that adds fuel to these exceptionally dangerous fires. I have been on this floor raising this issue. I served as the chairman of the Energy and Natural Resources Committee not too long ago. Our committee has heard in hearings again and again about the dangers fires pose to our community, but the system for funding fire prevention in a timely way before our country has to spend so much more money for putting the fires out hasn't been fixed. That system is still broken as we discuss it here today.

Last week, I came to the Senate floor and talked about this subject the same day Congress passed legislation to keep the government open for 3 more months and provide aid for the recovery efforts after Hurricane Harvey. Thankfully, that legislation also included funding to ensure the Forest Service can refill the funds the agency is being forced to borrow from fire prevention accounts to fight the fires now, but that funding, certainly necessary now, doesn't fix the long-term problem.

The Congress must make sure the Forest Service has the resources it needs to treat the forest before they burn, to help deal with this issue before the forest burns, because that will make them more flame resistant and stronger in terms of the capacity to deal particularly with the heat and lightning strikes and fuel buildup.

Let me lay out the steps the Congress needs to take in the coming days. First, Congress needs to lock in disaster funding to get the communities devastated by wildfires back on their feet. They are facing destroyed homes and businesses. Recreational areas that are the lifeblood of a lot of western communities have been destroyed. They lost timber revenue. The cleanup and restoration efforts are going to be tough and costly. So that is step 1 on this to-do list.

Step 2 is fixing the broken disaster fueling budget system known in the West as fire borrow. As the government spends more on fighting fires, it has stolen, in the past, funds that are supposed to go to fire prevention so the money isn't there to thin out the dead and dying material from our forests, and all it takes is one spark to start an inferno. The problem is only going to get bigger year after year as climate change roasts the landscapes across the West and wreaks havoc across the Nation. This has gone on for years. It is leading to bigger, more threatening fires, and it is critical that this Congress put a stop to it.

Other parts of our Nation faced horrible natural disasters over the last several weeks with hurricanes battering Texas, Florida, and much of the South. The way the government pays for firefighting right now would be like funding emergency hurricane response

teams with the money that is supposed to pay for levies and sandbags for the next storm. The practice of fire borrowing that has plagued so many western communities just defies common sense.

Years ago, along with my colleague from Idaho, Senator CRAPO, I introduced a fix to this problem with the Wildfire Disaster Funding Act. Senator CRAPO and I feel like we have been at it longer than the Trojan War. We have been at this year after year, and now we have the support of 261 groups and experts, folks in the forestry industry, environmental folks, scientists. Senator CRAPO, as chairman of the Banking Committee, has another bill that, in effect, builds on this work we have done for years. I support his sensible proposal as well.

The bottom line is, the West cannot wait any longer for Congress to send them help and repair for the long term, which is fixing this broken system that shortchanges prevention and adds fuel to the raging wildfires. There is bipartisan commitment to solving this crisis, and I know Senators across the West, where these fires are burning, have been going on exactly the same kind of tours I went on last weekend. I am sure they met, as I did, these incredibly dedicated, courageous firefighters who are just working themselves to exhaustion. I am sure they heard from many of the same types of operations teams about the fight they are facing.

Those men and women on the frontlines fighting fire are doing their part. It is time for the Congress to do ours. Let's make sure our communities have the funds they need to fight fires, put the fires out. Once and for all, let us end this bizarre, commonsense-defying budget process called fire borrowing that, in effect, has the Federal Government consistently shorting prevention and then having to spend more down the road when we have these enormous fires as a result of the fact that you haven't gone in there to clean out that dead material.

HEALTHCARE

Mr. WYDEN. Mr. President, I would like to turn to healthcare. For me, healthcare has always been the most important issue. It goes back to my days when I was director of the Oregon Gray Panthers. I have always felt, as a general proposition, that it is extraordinarily important for us to pursue bipartisan approaches in this space. I have focused on that, and, frankly, I got a lot of welts on my back to show for it.

I was very proud last night to be able to work with Chairman HATCH, and we have, in effect, announced the beginning of an agreement to deal with the Children's Health Insurance Program, a bipartisan approach, and do it in a responsible way. Obviously, there are other steps to go, but I think it reflects, again, a big, important issue in

polarized political times—the Finance Committee trying to find common ground.

The reality is, the principles around which healthcare reform has traditionally been based are still pretty valid. I believe, as the ranking Democrat on the Senate Finance Committee, that healthcare is a basic human right. I also believe our colleagues on the other side of the aisle have valid points as well about having a role for the private sector in the delivery of healthcare. So I have long used those kind of bedrock principles to guide me with respect to healthcare, and that is why I wanted to come to the floor today to talk about what was just announced by Republican Senators—Republican Senators only—to make one last attempt to roll back Americans' healthcare before they lose the opportunity to take advantage of the special rules that would allow partisan-only approaches, and they expire at the end of the month.

As I said, my focus—as was the case last night with Chairman HATCH, and we are far from done here—was to find common ground with respect to a critical program for children.

Earlier today, our colleagues, Senators GRAHAM, Cassidy, and HELLER, introduced a partisan bill that, in my view, might be the most harmful version of TrumpCare yet, so I wanted to take a few minutes this evening to explain why this type of legislation is still a bad deal for American families.

This legislation that has been authored by the three Republican Senators gives a super block grant—a blank check—to the States so that they can do whatever they want to Americans' healthcare. Based on everything else I have seen this year, that is going to mean an awful lot of pain for vulnerable people and an open door to the worst abuses of insurance companies, which had been relegated to the history books when the Affordable Care Act was passed. My view is that this is probably the largest healthcare devolution in history, which is pretty much sending it to the States and saying: Have at it.

First of all, the bill ends Medicaid as Americans know it today. This year's debate over healthcare made one matter clear—that Medicaid matters. It pays for the healthcare of America's most vulnerable and serves as a safety net for the people who might not think they will need it. It covers nursing home care for older Americans who spend down their hard-earned savings. It pays for addiction treatment services for those who are struggling with opioids, as millions of Americans are today. It helps Americans with disabilities live healthy, productive lives in their communities rather than in institutions. That is just the tip of the iceberg of the good work Medicaid does for those from Portland, OR, to Portland, ME. Under the legislation that I am discussing—Graham-Cassidy-Heller—that is gone.

The plan ends the expanded Medicaid coverage that 11 million Americans

count on today. It puts a cap on Medicaid and offers hundreds of billions less in support from the Federal Government. It is essentially telling States "good luck" and is asking them to make all of the hard decisions about which Americans will get adequate healthcare and which people will go without. History tells us that the most vulnerable Americans who are without a voice or a powerful lobby are inevitably going to be the ones worse off.

There is one more step that this bill takes that is different from previous versions of TrumpCare and similar proposals. Rather than reducing the tax credits that help Americans get help, which is similar to earlier Republican approaches, this bill just gets rid of them. It gets rid of them completely. That means asking States to use their Federal health block grants to cover Medicaid, nursing home care, care for those with disabilities, addiction treatment, tax credits for healthcare, and more—and all from the same pot of money. To me, that is a recipe for a healthcare disaster.

This proposal also opens up loopholes for the big insurance companies to undermine key consumer protections—those that bar discrimination against those who have preexisting conditions and set essential benefits that all Americans are entitled to receive.

I thought we were done with those days—the days when, in effect, healthcare worked for the healthy and the wealthy and when we had discrimination against those with preexisting conditions. Basically, unless you were healthy and did not have a preexisting condition or unless you were wealthy and could pay for your healthcare costs, you were really in deep trouble. As far as I can tell, this new proposal undermines those key consumer protections that bar discrimination against those who have preexisting conditions, and it takes us back.

Mr. President, I ask unanimous consent to proceed for up to 10 more minutes.

The PRESIDING OFFICER (Mr. CASSIDY). Without objection, it is so ordered.

Mr. WYDEN. Mr. President and colleagues, thank you for your courtesy.

During the TrumpCare debate, it was clear that unraveling the consumer protections that Americans count on today causes the whole system to come apart at the expense of those who need healthcare the most.

I have heard the authors of this bill argue that the States will be able to keep the Affordable Care Act or do it their own way, but this bill asks each State to do a whole lot more with a whole lot less. That does not sound like a prescription for State innovation; it sounds like more of the same failed, partisan approach that the public witnessed earlier this year.

I know a bit about State innovation and have enjoyed talking with the distinguished President of the Senate about it. I wrote the provision that is

currently in law that says that States have a chance to do better, not worse. What the States have been most interested in up until now is something called reinsurance, and the States that have been making headway in terms of their getting the green light from the Federal Government have used the existing law that I wrote. Yet the idea of letting States do worse is a different story, and it sure looks to me as if we will be seeing benefits cut and insurance plans being worth little more than the paper on which they are written. On top of that, Americans in red States should not be subjected to worse healthcare than those in blue States simply on the basis of their ZIP Codes.

So I come back to the bottom line in terms of bipartisanship in healthcare. I think that the way one makes lasting change in the American healthcare system is to find common ground across the aisle. I talked about some of the key principles behind it. I mentioned the fact that Chairman HATCH and I came together last night on a general framework for the children's health insurance bill.

Now, I have been approached by colleagues about this legislation, so I can only assume that means it is going to be pushed forward through the deeply partisan process known as reconciliation. That did not end well previously, and I am sure going to fight with everything I have to block partisan reconciliation tactics in the days ahead.

I close by saying let's try to pick up on the kind of approach Chairman HATCH and I tried to pursue last night—with a bipartisan effort on CHIP. Let's try to find common ground. I think healthcare is a basic human right. I also think Republicans have valid points with respect to there being a significant role for the private sector. I am interested in approaches that give all Americans the ability to have affordable, good-quality healthcare, and I think that we get it best if we pursue bipartisan approaches. I believe many of my colleagues here in the Senate share these views, and I hope the Senate will not have yet another knockdown, drag-out battle over a partisan reconciliation bill that will harm the American people but will instead pick up on the kind of bipartisan principles I have discussed tonight.

I thank the Presiding Officer and Senator HOEVEN for the courtesy of having the additional time.

I yield the floor.

(At the request of Mr. CORNYN, the following statement was ordered to be printed in the RECORD.)

NATIONAL DEFENSE AUTHORIZATION BILL

• Mr. RUBIO. Mr. President, due to ongoing and urgent recovery efforts from Hurricane Irma, which devastated many parts of Florida, I am staying in my State to assess the damage and help marshal the full capacity of recovery resources available to us. Congress

has passed authorizations for use of military force, AUMFs, that the President is using to fight the war on terror and conduct counterterrorism operations against our enemies. This includes the Islamic State, which the State Department recently reaffirmed is guilty of genocide, and other terrorist groups that continue to pose grave and persistent threats to the United States and our allies.

Paul amendment No. 871 would repeal these critical congressionally passed AUMFs, so I therefore oppose this amendment.●

(At the request of Mr. SCHUMER, the following statement was ordered to be printed in the RECORD.)

VOTE EXPLANATION

● Mr. MENENDEZ. Mr. President, I was unavoidably absent for rollcall vote No. 195, the motion to table Paul amendment No. 871 to H.R. 2810, the National Defense Authorization Act for 2018. Had I been present, I would have voted nay.●

HUMAN PERFORMANCE OPTIMIZATION

Mr. TILLIS. Mr. President, I am honored to represent over half of all U.S. Special Forces. I would like to address the topic of working to close a growing gap in understanding, assessment, and prediction between traditional and nontraditional strategies for human performance optimization as it relates to our military servicemembers and overall readiness.

I support Department of Defense efforts designed to simultaneously improve the overall health and wellness of uniformed personnel and sustain the operational readiness levels of the respective military services. I am encouraged by efforts initiated at both Special Operations Command, SOCOM, and the respective SOCOM component commands and am requesting that these commands consider additional steps to incorporate new ideas for the troops.

I would like to see the Department of Defense examine the impact of recent trends in the health and performance industry to emphasize greater reliance on natural movement, full-range body motion, nontraditional gravity-aided suspension exercises, and nontraditional resistance training for optimizing an individual's state of fitness, long-term durability, resilience, and overall wellness. It is important to note that such approaches can produce significant and measurable improvements in muscular strength, endurance, motor control, and the maximum cognitive and workload performance of individual military operators.

The potential for an improvement in comprehensive readiness and lethality of Special Forces is significant. Efforts to improve muscular strength, endurance, and the workload performance for individuals under more natural and

realistic training scenarios coupled with the establishment and documentation of optimum and minimum physical thresholds can improve overall unit readiness and sustainability among and throughout the ranks of special operations forces.

Therefore, I would encourage the Department of Defense, and especially Marine Corps Forces Special Operations Command, MARSOC, to identify and describe common denominators with respect to key performance indicators, KPI, among MARSOC operators, develop algorithmic tools for predicting appropriate individual physical and cognitive loads, and examine the efficacy of potential intervention programs to minimize discriminatory KPI gaps among MARSOC personnel. Let's close the gap in understanding between traditional and emerging strategies for human performance optimization. I strongly believe it could have a positive impact on the readiness of our honorable men and women in uniform to win conflicts.

REMEMBERING PETE DOMENICI

Mr. MCCAIN. Mr. President, I was deeply saddened to hear about the passing of my friend and former colleague, Senator Pete Domenici, a great American who dedicated his life and career to public service. I had the great privilege of serving alongside Pete for many years and knew him as a gentleman who always behaved in the highest traditions of the Senate. Pete was a knowledgeable and pragmatic leader who knew how to reach across the aisle to advance bipartisan solutions to the Nation's biggest problems. Perhaps the best example of his skill for compromise was when he negotiated the Nation's last balanced budget in 1997. Pete represented the very best ideals of the U.S. Senate and left an indelible mark on this Chamber. Cindy and I extend our deepest condolences to Nancy and the entire Domenici family as they mourn the loss of a great man.

ADDITIONAL STATEMENTS

150TH ANNIVERSARY OF THE ELGIN FIRE DEPARTMENT

● Ms. DUCKWORTH. Mr. President, today I wish to recognize the Elgin Fire Department's 150th anniversary and congratulate the brave men and women who protect the 100,000 residents living in Elgin, IL.

For more than 100 years, the Elgin Fire Department has worked to preserve the safety and well-being of Illinoisans. Firefighters are the first responders who often put themselves in danger to rescue citizens from emergency situations involving extensive smoke and fire. The medical treatment responders save numerous lives, which may have been lost without prehospital care.

The Elgin Fire Department continues to serve its community by providing

fire safety education, fire inspection, and domestic preparedness planning, among other community outreach efforts, to increase community readiness. The department's stellar service ensures that the families and friends of Elgin are prepared for any emergency.

I extend my best wishes for a remarkable and memorable anniversary. Thank you for your selfless work to Elgin, IL.●

RECOGNIZING THE GUADALUPE CENTERS

● Mrs. MCCASKILL. Mr. President, I ask the Senate to join me today in recognizing the work of the Guadalupe Centers in Kansas City, MO. Their mission is to improve the quality of life for individuals in the Latino communities of greater Kansas City, and they excel at their mission. Many Kansas City families view Guadalupe Centers as a pillar in their lives. I am here today to honor the Guadalupe Centers as the standard all community organizations should strive to become.

Founded in 1919, the Guadalupe Centers originally served as a safe haven for Mexican immigrants who experienced discrimination, poverty, and lack of social services following the Mexican revolution. During the subsequent decades, the centers expanded its services to include English classes, boys' and girls' clubs, adult education classes, and home economics. Much of this expansion came under the leadership of Dorothy Gallagher, known as the Godmother of Guadalupe.

While the Guadalupe Centers continue to assist members of the Latino community balance life in the United States while maintaining their cultural heritage to this day, it has also expanded significantly. As Kansas City's Latino population grew and prospered, the centers added employment assistance programs, a credit union, a health center, counseling, youth programs, a preschool program, and the Alta Vista Charter High School. In 2013, the Missouri Public Charter School Association recognized Alta Vista High School as the "Missouri Charter of the Year."

To kick off Hispanic Heritage Month each year, the Guadalupe Centers host the Blanco y Negro Awards gala in Kansas City. While honoring individuals and institutions critical to the growth and development of the organization, the gala also assists with funding the nonprofit. Last year alone, the Guadalupe Centers served over 9,268 individuals and families through its variety of programs and services. It will be my honor to attend the Blanco y Negro Awards gala on September 15 to support the Guadalupe Centers and honor the beginning of Hispanic Heritage Month.

Since 1988, we have celebrated Hispanic Heritage Month from September 15 to October 15. Each year, we take these 30 days to commemorate the significant contributions of Hispanic and

Latino Americans to our country. Our 58 million Latino colleagues, neighbors, and friends teach our children, enhance our economy, and honorably serve in our military. Hispanic Americans have embodied our entrepreneurial spirit and influenced our communities since America's inception.

America's annual tribute to Hispanic heritage reminds us of the extraordinary impact those in the Latino community have made to our Nation. Without vital organizations like the Guadalupe Centers fostering communal development, the American Dream might be out of reach for many.

I ask that the Senate join me in commending the Guadalupe Centers on their 98 years of providing education, youth development, and health and social services to the greater Kansas City Latino community, along with celebrating the beginning of Hispanic Heritage Month.●

FORT PIERRE BICENTENNIAL ANNIVERSARY

Mr. ROUNDS. Mr. President, today I wish to recognize the history, culture, and community of Fort Pierre as we celebrate its bicentennial anniversary.

Located at the confluence of the Missouri River and the Bad River, the current location of Fort Pierre had long been occupied by Native Americans, including the Lakota and Arikara. In 1743, the French explorers Francois and Louis-Joseph Verendrye first encountered this area. Six decades later, Captains Meriwether Lewis and William Clark made their first contact with the Lakota Nation at the Bad River Gathering in present-day Fort Pierre, and it soon became a prominent fur trading center. Its proximity and ease of access to the Missouri River helped Fort Pierre grow from a fur trading settlement into a regional hub and a prosperous community.

Fort Pierre remains the oldest continuous area of European settlement in South Dakota. Today Fort Pierre is still fiercely independent, the place where the East meets the Old West. The rugged cowboy spirit remains strong and cattle still outnumber people. The legacy of self-reliant pioneers and entrepreneurs who founded this community is evident yet today. With its river breaks and wide-open plains, locals enjoy many outdoor adventures, including fishing and boating, a weekend rodeo, or conversations around the campfire. Hunting is a big part of the culture, and Stanley County is home to some of the best hunting land in the State.

As residents of Fort Pierre, Jean and I are happy to call this vibrant community our home. I congratulate the city of Fort Pierre on celebrating its 200th anniversary and wish it all the best in the years to come.●

40TH ANNIVERSARY OF THE ALLIANCE TO SAVE ENERGY

● Mrs. SHAHEEN. Mr. President, today I wish to recognize the achievements of the Alliance to Save Energy over its 40-year history of working with Presidents of both political parties and Members of Congress on both sides of the aisle to advance Federal energy efficiency policy.

In 1977, Senators Charles Percy and Hubert Humphrey—a Republican from Illinois and a Democrat from Minnesota—founded the alliance as the leading energy efficiency coalition of businesses, governments, environmental groups, and consumer advocates. The goal of the alliance from the start has been simple: “Use less and do more.” In the wake of the oil embargoes and energy shortages of the 1970s, that message resonated loud and clear, and it still does.

Energy efficiency is America's largest energy resource, contributing more to our Nation's energy needs over the last 40 years than any other fuel source. Without the economy-wide improvements in energy efficiency made since 1973, it is estimated that today's economy would require 60 percent more energy than we consume now. In fact, savings from energy efficiency improvements over the last 40 years have reduced our national energy bill by an estimated \$800 billion, all while growing and expanding our economy. Energy efficiency saves money, improves national security, reduces pollution, encourages innovation, boosts U.S. competitiveness, and creates jobs.

For 40 years, the alliance has taken great care to cultivate and maintain bipartisan support for policies supporting energy efficiency. Maybe the best example—certainly for me the most personal example—is the alliance's steadfast support and continued advocacy for the Energy Savings and Industrial Competitiveness Act, bipartisan energy efficiency legislation I have introduced along with my friend and partner, Senator ROB PORTMAN. They recognize, as I do, that to accomplish anything in Washington, you must have friends and supporters across the entire political spectrum. The alliance's commitment to bipartisanship is not simply rooted in their history, but is also as a matter of practicality. In a Congress that is divided along partisan lines on so many issues, energy efficiency is one priority that can bring us together on a bipartisan, bicameral basis to get big things done.

The alliance also prides itself on its ability to bring businesses together alongside public and consumer advocates. The business case for energy efficiency is unimpeachable. Energy efficiency is the largest sector within the U.S. clean energy economy, employing nearly 2.2 million Americans nationwide—the majority of whom work for small businesses. American companies are leading the way in innovation and technological advancements in lighting, appliances, and building materials,

to name a few. By working collaboratively with businesses and consumer leaders, the alliance is helping to improve energy efficiency across all sectors of the economy and develop new ways to bring new products and services to market.

Today the alliance is led by President Kateri Callahan, and the fiduciary board is chaired by Gil Quiniones, who is president and chief executive officer of the New York Power Authority. It is my privilege to serve as the honorary cochair of the alliance. I am joined by Honorary Vice Chairs Senators ROB PORTMAN and CHRIS COONS, as well as Senators LAMAR ALEXANDER, SUSAN COLLINS, ED MARKEY, LISA MURKOWSKI, MARK WARNER, and RON WYDEN, as well as Representatives MICHAEL BURGESS, ADAM KINZINGER, DAVID MCKINLEY, DAVE REICHERT, PAUL TONKO, and PETER WELCH. The alliance is rightfully proud of their storied bipartisan traditions, and this ideologically diverse and talented roster is a testament to the possibilities to make positive change when we listen to one another and work together.

I would like to close today by recognizing the past contributions of members who previously served on the alliance honorary board: Senators Jeff Bingaman, Larry Craig, Alan Cranston, Byron Dorgan, John Heinz, Jim Jeffords, Bennett Johnston, Richard Lugar, Mark Pryor, Mark Udall, and Timothy Wirth, along with Representatives Ralph Hall, Steve Israel, John Edward Porter, and Zach Wamp. I had the good fortune of working alongside many of these distinguished public servants. I am proud to be part of the shared legacy of this collection of energy-efficiency champions.

I congratulate the alliance on all they have accomplished since it was founded in 1977. Now, the alliance stands at the precipice of the next 40 years, which will undoubtedly usher in unforeseeable challenges and opportunities in the energy sector. I stand with them today, energized by their success so far, and ready for the next set of energy efficiency policies we need to succeed.

Thank you.●

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HATCH (for himself, Mr. SCHATZ, Mr. GARDNER, Mr. COONS, and Mr. TILLIS):

S. 1803. A bill to improve medical research on marijuana; to the Committee on the Judiciary.

Mr. HATCH. Mr. President, today, I am introducing a proposal that could substantially improve America's healthcare. Despite what some of my colleagues believe, it does not take a sweeping overhaul of ObamaCare to do this. Sometimes, even small changes can have a huge impact on people's lives.

That is why, throughout my four decades of public service, I have worked to shine a light on the need for innovative treatments to help those who suffer from debilitating illness and rare diseases. In that same spirit, I am joining Senator SCHATZ today to introduce the Marijuana Effective Drug Studies Act, or MEDS Act, which has the potential to benefit millions of Americans who are suffering from a wide range of conditions, including cancer, severe epilepsy, post-traumatic stress disorder, residual effects after a stroke, or chronic pain.

It is high time to address research into medical marijuana. Our country has experimented with a variety of State solutions without properly delving into the weeds on the effectiveness, safety, dosing, administration, and quality of medical marijuana.

Now, all puns aside, it will surprise no one that I am strongly against the use of recreational marijuana. I worry, however, that in our zeal to enforce the law, we too often blind ourselves to the medicinal benefits of natural substances, like cannabis. While I certainly do not support the use of marijuana for recreational purposes, the evidence shows that cannabis possesses medicinal properties that can truly change people's lives for the better, and I believe we would be remiss if we threw out the baby with the bath water.

In many cases, the compounds found in cannabis are the only hope for Americans who suffer from chronic medical conditions, such as severe epilepsy. Take the difficult case of a young man from Eagle Mountain, UT, who suffers from a number of different epileptic disorders and developmental ailments. My friend regularly takes 17 pills on a daily basis. Yet he continues to have seizures regularly. The current treatment for his condition, with no guarantee of success, would be invasive brain surgery.

This poor family is seeking help, yearning for a way for their child to live a safe and healthy life. Compounds found in marijuana could significantly mitigate the severity of my friend's seizures and even help him lead a normal life, but current regulations prevent the development of any such treatment from going forward. So this young man is left to suffer. Luckily,

the MEDS Act changes that. It updates the law for the 21st century, allowing for groundbreaking research on the potentially lifesaving benefits of medical marijuana.

Compounds found in marijuana have shown promise for treating a wide range of diseases and disorders, but because of bureaucratic redtape and fear, there is a lack of sufficient evidence about the safety and efficacy of these compounds. As a result, millions of Americans are using marijuana for medicinal purposes without there being the rigorous scientific evidence that we require all medications to have before we allow them to be prescribed in this country. There are currently no Federal quality control measures for marijuana grown for medicinal purposes, nor is there any quality control for the marijuana-based medications that patients eventually use.

Prescribers do not have guidance on appropriate doses, routes of administration, or even the safety of this medication for populations such as children or the elderly. This lack of oversight creates a dangerous environment that puts American lives at risk. As we continue to encourage the development of new therapies for those with severe medical problems, we must be unrelenting in our insistence on scientific rigor. Using only anecdotal information poses a significant public health risk.

We lack the science to support the use of medical marijuana products like CBD oils, not because researchers are unwilling to do the work but because of bureaucratic redtape and overregulation. Under current law, those who want to complete research on the benefits of medical marijuana must engage in a complex application process and interact with several Federal agencies. These regulatory acrobatics can take researchers over a year, if not more, to complete, and the longer researchers have to wait, the longer patients have to suffer.

Currently, the FDA estimates that a drug takes a minimum of 7 years to move from initial studies to FDA approval. The regulatory hoops that researchers have to jump through significantly delay the production of potentially life-changing medications that Americans need.

To develop more information about marijuana's therapeutic potential, we need robust basic and clinical research. The MEDS Act would encourage this research through reduced regulatory interference, and it would expand sources of research-grade marijuana with the assurance of a quality-controlled product. My proposal would also allow for the commercial production of drugs developed from marijuana once they have been approved by the FDA.

I am pleased with the legislation that Senator SCHATZ and I have been able to craft surrounding CBO oil and medical research. We are committed to seeing that this bill becomes law.

Before I yield the floor, I would like to take a moment to share my perspective on the broader discussion of medical marijuana and its implications in my home State of Utah. In Utah and across the Nation, opioid abuse continues to ravage good, hard-working families who have fallen captive to the tyranny of addiction. While some people are using these prescription drugs appropriately, others are abusing them at alarming rates. Because Utahns have watched their family members, friends, and neighbors grapple with this epidemic, many are seeking non-narcotic alternatives that can help with pain. Medical marijuana is just one such alternative, and after careful, deliberative thought, I have concluded that it is an alternative worth pursuing.

Now let me be clear. My support for medical marijuana research does not mean that I believe that marijuana is a harmless substance. Much to the contrary, I continue to believe that marijuana can lead to broader drug abuse, and I am deeply concerned by the cottage industries that are springing up in States in which marijuana has been legalized both for medical and recreational use.

So let me be clear. I am still very much opposed to the legalization of recreational marijuana, but I strongly support research into the medicinal benefits of marijuana, and I remain committed to helping patients find the help they need, whether they suffer from cancer, severe seizures, or any other chronic disorder.

In crafting a new regulatory framework to harvest the medicinal benefits of marijuana while also mitigating its harmful effects, we must ensure that any marijuana-derived medications are prescribed by qualified physicians or other healthcare providers. Also, if we make medical marijuana accessible to those who really need it, we should not increase access to recreational marijuana, nor should we do anything to promote the industry that has developed around marijuana dispensaries.

The recreational marijuana industry has its fair share of budding entrepreneurs, but these men and women are in no way qualified to issue prescriptions or give any medical advice whatsoever to people who are suffering from chronic conditions. Only experienced medical professionals who have undergone years of education and formal training are qualified to consult patients who are seeking a marijuana-derived treatment. Only licensed professionals know how to accurately diagnose illnesses and use approved medical treatments to safely treat disease.

Our purpose in advancing medical marijuana research should be to help doctors help patients, not to help dispensaries turn a profit. To that end, I also believe that treatment options should focus on noncombustive forms of marijuana. Our ability to isolate helpful compounds is advanced enough to make this plan a reality.

I understand that medical marijuana is a difficult issue. I understand that it is not an issue without controversy, but we cannot shrink from our duties simply because they require us to make hard choices. At present, we have a duty to help the thousands of Americans who are suffering from debilitating seizures and chronic pain, who desperately want help but do not know where to find it. Passing the MEDS Act is the first step in giving these men and women the reprieve they need.

I hope my colleagues will not shy away from making the hard choices that will improve people's lives. The bill Senator SCHATZ and I introduce today represents what our two parties can accomplish when we work together in good faith. I hope my colleagues will join us in supporting this commonsense proposal.

SEC. 235. SENSE OF CONGRESS ON HYPERSONIC WEAPONS.

(a) FINDINGS.—Congress makes the following findings:

(1) The United States has gained a thorough understanding of hypersonic technology over the course of seven decades of experimentation.

(2) The requirements for technological breakthroughs in hypersonics have largely been established, allowing pursuit of hypersonic glide weapons without a prohibitive budget effect.

(3) The Department of Defense has several hypersonic research and development efforts underway, including conventional prompt global strike (CPS) weapons system, the Hypersonic Air-Breathing Weapon Concept, and the Tactical Boost Glide program.

(4) In testimony before the Committee on Armed Services of the Senate on April 4, 2017, the Commander of United States Strategic Command, General John Hyten, identified the conventional prompt global strike weapons system as the “leading technology maturation effort in the realm of hypersonics” and stated that his command sees “an operational need for a CPS capabilities by the mid-2020s.”.

(5) Hypersonic weapons present a radical change in warfare, because they can circumvent many of the challenges associated with contested warfare and integrated air defenses.

(6) Hypersonic weapons may provide solutions to difficult problem sets, such as anti-access area denial schemes, deeply buried or hardened target sets, and mobile high value target sets.

(7) Other countries are aggressively pursuing hypersonic weapons at an alarming rate that threaten to outpace the United States if the United States does not more aggressively pursue development of hypersonic weapons.

(8) The Air Force has a \$10,000,000 requirement on the Unfunded Priority List for hypersonic prototyping.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the Department of Defense should expedite testing, evaluation, and acquisition of hypersonic weapon systems to meet the stated needs of the warfighter;

(2) testing of such weapon systems should include flight testing, ground based testing, and underwater launch testing;

(3) the Department of Defense should adhere to the requirement in section 1688 of the

National Defense Authorization Act for Fiscal Year 2017 (Public Law 114-328) to proceed to a Milestone A decision on the conventional prompt global strike weapons system not later than September 30, 2020, or the date that is 240 days after the successful completion of intermediate range flight 2 of such system;

(4) the United States cannot afford to lose its advantage over foreign countries in developing hypersonic weapons; and

(5) the Department of Defense should focus on the next generation of weapon systems, including third offset technologies, such as hypersonics.

(2) Afghans who have supported the United States Government in Afghanistan face grave threats from the Taliban and other terrorist groups as a result of their service.

(3) Commander of the United States Central Command, General Joseph L. Votel, warned in a June 14, 2017, letter that “curtailing or abandoning” the special immigrant visa program for Afghans carried out under the Afghan Allies Protection Act of 2009 (8 U.S.C. 1101 note) “would risk significantly undermining years of progress and goodwill and could serve to tip the balance in favor of malign actors”.

(4) Commander of Resolute Support and United States Forces-Afghanistan, General John W. Nicholson Jr., warned in a June 12, 2017, letter that if such program “is not fully resourced it could significantly undermine our credibility and the 16 years of tremendous sacrifice by thousands of Afghans on behalf of Americans and Coalition partners”.

(5) All visas allocated for such program are projected to be exhausted and all visa issuances for principal applicants will cease in October 2017, if additional visas are not authorized.

(6) The cessation of the issuance of special immigrant visas for Afghans is likely to cause panic among the Afghans who are assisting the United States, often at great personal risk, and could significantly affect the operations of the United States Government in Afghanistan.

(b) **SENSE OF CONGRESS.**—It is the sense of Congress that an additional 4,000 visas should be made available for principal aliens who are eligible for special immigrant status under the Afghan Allies Protection Act of 2009 (8 U.S.C. 1101 note) to prevent harm to the operations of the United States Government in Afghanistan.

(a) **ANNUAL REPORT REQUIRED.**—Not later than March 31 each year, the Secretary of Defense shall submit to the congressional defense committees a report on attempts by the Russian Federation, or any foreign person acting as an agent of or on behalf of the Russian Federation, during the preceding year to knowingly disseminate Russian Federation-supported disinformation or propaganda, through social media applications or related Internet-based means, to members of the Armed Forces with probable intent to cause injury to the United States or advantage the Government of the Russian Federation.

SEC. 1248. SUPPORT OF EUROPEAN DETERRENCE INITIATIVE TO DETER RUSSIAN AGGRESSION.

(a) **FINDINGS.**—Congress makes the following findings:

(1) Military exercises, such as Exercise Nifty Nugget and Exercise Reforger during the Cold War, have historically made important contributions to testing operational concepts, technologies, and leadership approaches; identifying limiting factors in the execution of operational plans and appropriate corrective action; and bolstering deterrence against adversaries by demonstrating United States military capabilities.

(2) Military exercises with North Atlantic Treaty Organization (NATO) allies enhance the interoperability and strategic credibility of the alliance.

(3) The increase in conventional, nuclear, and hybrid threats by the Russian Federation against the security interests of the United States and allies in Europe requires substantial and sustained investment to improve United States combat capability in Europe.

(4) The decline of a permanent United States military presence in Europe in recent years increases the likelihood the United States will rely on being able to flow forces from the continental United States to the European theater in the event of a major contingency.

(5) Senior military leaders, including the Commander of United States Transportation Command, have warned that a variety of increasingly advanced capabilities, especially the proliferation of anti-access, area denial (A2AD) capabilities, have given adversaries of the United States the ability to challenge the freedom of movement of the United States military in all domains from force deployment to employment to disrupt, delay, or deny operations.

(b) **SENSE OF CONGRESS.**—It is the sense of Congress that, to enhance the European Deterrence Initiative and bolster deterrence against Russian aggression, the United States, together with North Atlantic Treaty Organization allies and other European partners, should demonstrate its resolve and ability to meet its commitments under Article V of the North Atlantic Treaty through appropriate military exercises with an emphasis on participation of United States forces based in the continental United States and testing strategic and operational logistics and transportation capabilities.

(c) **REPORT.**—

(1) **IN GENERAL.**—Not later than March 1, 2018, the Secretary of Defense shall submit to the congressional defense committees a report setting forth the following:

(A) An analysis of the challenges to the ability of the United States to flow significant forces from the continental United States to the European theater in the event of a major contingency.

(B) The plans of the Department of Defense, including the conduct of military exercises, to address such challenges.

(2) **FORM.**—The report required by paragraph (1) shall be submitted in unclassified form, but may include a classified annex.

SEC. 1249. SENSE OF CONGRESS ON THE EUROPEAN DETERRENCE INITIATIVE.

It is the sense of Congress that—

(1) the European Deterrence Initiative will bolster efforts to deter further Russian aggression by providing resources to—

(A) train and equip the military forces of North Atlantic Treaty Organization (NATO) and non-North Atlantic Treaty Organization partners in order to improve responsiveness, expand expeditionary capability, and strengthen combat effectiveness across the spectrum of security environments;

(B) enhance the indications and warning, interoperability, and logistics capabilities of Allied and partner military forces to increase their ability to respond to external aggression, defend sovereignty and territorial integrity, and preserve regional stability;

(C) improve the agility and flexibility of military forces required to address threats across the full spectrum of domains and effectively operate in a wide array of coalition operations across diverse global environments from North Africa and the Middle East to Eastern Europe and the Arctic; and

(D) mitigate potential gaps forming in the areas of information warfare, Anti-Access Area Denial, and force projection;

(2) investments that support the security and stability of Europe, and that assist European nations in further developing their security capabilities, are in the long-term vital national security interests of the United States; and

(3) funds for such efforts should be authorized and appropriated in the base budget of the Department of Defense in order to ensure continued and planned funding to address long-term stability in Europe, reassure the European allies and partners of the United States, and deter further Russian aggression.

SEC. 1250. ENHANCEMENT OF UKRAINE SECURITY ASSISTANCE INITIATIVE.

SEC. 1251. SENSE OF CONGRESS ON THE IMPORTANCE OF THE NORTH ATLANTIC TREATY ORGANIZATION INTELLIGENCE FUSION CENTER.

(a) FINDINGS.—Congress makes the following findings:

(1) The North Atlantic Treaty Organization (NATO) Intelligence Fusion Center provides a crucial contribution to the North Atlantic Treaty Organization alliance and the national security of the United States.

(2) The fast-paced evolution of the security situation throughout Europe and its periphery, as well as a marked increase in conventional, nuclear, and hybrid threats from the Russian Federation, require optimized efforts to track and attribute critical threats to the security and stability of Europe and United States national security interests.

(3) The ability of the North Atlantic Treaty Organization Intelligence Fusion Center to leverage strategic intelligence partnerships with the United States and other allies facilitates daily and direct collaboration that provides operational advantages and efficiencies needed to ensure the rapid and proper response by the North Atlantic Treaty Organization to Russian aggression in the conventional, nuclear, and hybrid domains.

(4) The collocation of the North Atlantic Treaty Organization Intelligence Fusion Center with the Joint Intelligence Analysis Complex of the United States European Command facilitates the sharing and fusion of intelligence, contributes to filling intelligence gaps within both the North Atlantic Treaty Organization and the United States European Command, and supports a common intelligence picture for the North Atlantic Council, which is essential to establishing political consensus on evaluating, analyzing, and attributing existing and emerging threats.

(5) The North Atlantic Treaty Organization Intelligence Fusion Center and its collocation with the Joint Intelligence Analysis Complex contribute significantly to providing the North Atlantic Treaty Organization alliance and the United States European Command timely and effective indications and warnings of threats emanating from within and around Europe.

(b) SENSE OF CONGRESS.—It is the sense of Congress that the collocation of the North Atlantic Treaty Organization Intelligence Fusion Center with the Joint Intelligence Analysis Complex of the United States European Command provides the optimal solution to intelligence and operational requirements, while fostering critical diplomatic relationships, and is the most efficient configuration of the intelligence enterprise.

SEC. 1265. UNITED STATES POLICY WITH RESPECT TO FREEDOM OF NAVIGATION OPERATIONS AND OVERFLIGHT BEYOND THE TERRITORIAL SEAS.

(a) **FINDINGS.**—Congress makes the following findings:

(1) Since the Declaration of Independence in 1776, which was inspired in part as a response to a “tyrant” who “plundered our seas, ravaged our Coasts” and who wrote laws “for cutting off our Trade with all parts of the world”, freedom of seas and promotion of international commerce have been core security interests of the United States.

(2) Article I, section 8 of the Constitution of the United States establishes enumerated powers for Congress, which include regulating commerce with foreign nations, punishing piracies and felonies committed on the high seas and offenses against the law of nations, and providing and maintaining a Navy.

(3) For centuries, the United States has maintained a commitment to ensuring the right to freedom of navigation for all law-abiding parties in every region of the world.

(4) In support of international law, the longstanding United States commitment to freedom of navigation and ensuring the free access to sea lanes to promote global commerce remains a core security interest of the United States.

(5) This is particularly true in areas of the world that are critical transportation corridors and key routes for global commerce, such as the South China Sea and the East China Sea, through which a significant portion of global commerce transits.

(6) The consistent exercise of freedom of navigation operations and overflights by United States naval and air forces throughout the world plays a critical role in safeguarding the freedom of the seas for all lawful nations, supporting international law, and ensuring the continued safe passage and promotion of global commerce and trade.

(b) **DECLARATION OF POLICY.**—It is the policy of the United States to fly, sail, and operate throughout the oceans, seas, and airspace of the world wherever international law allows.

(c) **IMPLEMENTATION OF POLICY.**—In furtherance of the policy set forth in subsection (b), the Secretary of Defense shall—

(2) execute, in such critical transportation corridors, routine and regular naval presence missions and maritime freedom of navigation operations throughout the year;

(3) in addition to the operations executed pursuant to paragraph (2), execute routine and regular maritime freedom of navigation operations throughout the year, in accordance with international law, including the use of expanded military options and maneuvers beyond innocent passage; and

(4) to the maximum extent practicable, execute freedom of navigation operations pursuant to this subsection with regional partner countries and allies of the United States.

SEC. 1266. SENSE OF CONGRESS ON THE IMPORTANCE OF THE RULE OF LAW IN THE SOUTH CHINA SEA.

It is the sense of Congress that—

(1) the South China Sea is a vitally important waterway for global commerce and for regional security, with almost 30 percent of the maritime trade of the world transiting the South China Sea annually;

(2) the People's Republic of China is undermining regional security and prosperity and challenging international rules and norms by engaging in coercive activities and attempting to limit lawful foreign operations in the South China Sea;

(3) a tribunal determined “that China had violated the Philippines’ sovereign rights in its exclusive economic zone by (a) interfering with Philippine fishing and petroleum exploration, (b) constructing artificial islands and (c) failing to prevent Chinese fishermen from fishing in the zone,” and that “Chinese law enforcement vessels had unlawfully created a serious risk of collision when they physically obstructed Philippine vessels”;

(4) the arbitral tribunal award of July 2016 stated that there is “no legal basis for China to claim historic rights to resources within the sea areas falling within the nine-dash line”; and

(3) the alliance between the United States and Japan is essential for ensuring maritime security and freedom of navigation, commerce, and overflight in the waters of the East China Sea;

(4) Japan, a cornerstone of peace in the Asia-Pacific region, stands as a strong partner of the United States in efforts to uphold

respect for the rule of law and to oppose the use of coercion, intimidation, or force to change the regional or global status quo, including in the East China Sea and the South China Sea, which are among the busiest waterways in the world;

(5) the United States and Japan are committed to working together towards a world in which the Democratic People's Republic of Korea (DPRK) does not threaten global peace and security with its weapons of mass destruction and illicit activities, and in which it respects human rights and its people can live in freedom;

(6) the alliance between the United States and Japan should be strengthened to maintain peace and stability in the Asia-Pacific region and beyond, to confront emerging challenges, and to safeguard maritime security and ensure freedom of navigation, commerce, and overflight in the East China Sea and the South China Sea;

(7) although the United States Government does not take a position on sovereignty of the Senkaku Islands, the United States acknowledges that the islands are under the administration of Japan and opposes any unilateral actions that would seek to undermine their administration by Japan; and

(8) the unilateral actions of a third party will not affect the United States acknowledgment of the administration of Japan over the Senkaku Islands, and the United States remains committed under the Treaty of Mutual Cooperation and Security with Japan to respond to any armed attack in the territories under the administration of Japan.

(ii) by shelling Yeonpyeong Island and killing 4 South Korea civilians on November 23, 2010; and

(iii) by its involvement in the “DarkSeoul” cyberattacks against the financial and communications interests of the Republic of Korea on March 20, 2013.

(4) North Korea maintains a system of brutal political prison camps that contain as many as 200,000 men, women, and children, who are—

(A) kept in atrocious living conditions with insufficient food, clothing, and medical care; and

(B) under constant fear of rape, torture, or arbitrary execution.

(5) The Government of North Korea has provided technical support and conducted destructive and coercive cyberattacks including against Sony Pictures Entertainment and other United States persons.

(F) the people of North Korea.

(b) **SENSE OF CONGRESS.**—It is the sense of Congress that, in order to achieve the peaceful disarmament of North Korea, the United States should—

(2) support ongoing efforts to strengthen the alliance between the United States and the Republic of Korea alliance, to protect the 28,500 members of the United States Armed Forces stationed on the Korean Peninsula, and to defend the alliance against any and all provocations committed by the North Korea regime; and

SEC. 1269. SENSE OF CONGRESS ON EXTENDED DETERRENCE FOR THE KOREAN PENINSULA AND JAPAN.

It is the sense of Congress that—

(1) the nuclear and missile program of North Korea is one of the most dangerous national security threats facing the United States today; and

(2) given the threat posed by North Korea to our allies, the Republic of Korea and Japan, the Nuclear Posture Review that will occur this year should fully consider the perspectives of key allies and partners of the United States in East Asia, including the Republic of Korea and Japan.

SEC. 1284. SENSE OF CONGRESS ON REAFFIRMING STRATEGIC PARTNERSHIPS AND ALLIES.

(a) **FINDINGS.**—Congress makes the following findings:

(1) Since World War II, the United States has sought partnership and cooperation in establishing a rules-based international order which has resulted in one of the most prosperous periods of human history.

(2) The United States is signatory to seven mutual defense treaties with 56 different countries.

(3) One of the United States defense alliances is the 29-nation-strong North Atlantic Treaty Organization (NATO) which is celebrating its 68th anniversary.

(4) The United States has not faced a more diverse and complex array of crises and threats, including the emergence of competitors like Russia and China, increasingly unstable threats from North Korea and Iran, and the continued threat from transnational violent extremist groups like the Islamic State and al-Qaeda.

(5) The strain of a decreased military budget has decreased capability at precisely the time when demand for United States military strength has increased.

(6) Fifteen years of continuous war has stymied military modernization, focused training on asymmetrical warfare over large-scale conflicts.

(7) Secretary of Defense James Mattis stated that “alliances provide avenues for peace,

fostering the conditions for economic growth with countries that share the same vision, while tempering the plans of those who would attack other nations or try to impose their will over the less powerful”.

(b) **SENSE OF CONGRESS.**—It is the sense of Congress that—

(1) the United States is an ally rich nation and our potential competitors—such as Russia, China, and North Korea—are ally poor;

(2) United States allies and partners are critical to defending peace and prosperity throughout the world;

(3) the rules-based international order supported by the United States and its allies has ensured—and will continue to promote—an international system that benefits all nations;

(4) throughout the world, the United States will continue to foster relationships with nations of like minds and beliefs;

(5) as the United States manages multiple strategic challenges, our enduring strength remains in alliances such as the North Atlantic Treaty Organization; and

(6) the United States will continue to deepen alliances and expand them, and will take no ally for granted.

SEC. 6213. SUPPORT OF EUROPEAN DETERRENCE INITIATIVE TO DETER RUSSIAN AGGRESSION.

(a) FINDINGS.—Congress makes the following findings:

(1) Military exercises, such as Exercise Nifty Nugget and Exercise Reforger during the Cold War, have historically made important contributions to testing operational concepts, technologies, and leadership approaches; identifying limiting factors in the

execution of operational plans and appropriate corrective action; and bolstering deterrence against adversaries by demonstrating United States military capabilities.

(2) Military exercises with North Atlantic Treaty Organization (NATO) allies enhance the interoperability and strategic credibility of the alliance.

(3) The increase in conventional, nuclear, and hybrid threats by the Russian Federation against the security interests of the United States and allies in Europe requires substantial and sustained investment to improve United States combat capability in Europe.

(4) The decline of a permanent United States military presence in Europe in recent years increases the likelihood the United States will rely on being able to flow forces from the continental United States to the European theater in the event of a major contingency.

(5) Senior military leaders, including the Commander of United States Transportation Command, have warned that a variety of increasingly advanced capabilities, especially the proliferation of anti-access, area denial (A2/AD) capabilities, have given adversaries of the United States the ability to challenge the freedom of movement of the United States military in all domains from force deployment to employment to disrupt, delay, or deny operations.

(b) SENSE OF CONGRESS.—It is the sense of Congress that, to enhance the European Deterrence Initiative and bolster deterrence against Russian aggression, the United States, together with North Atlantic Treaty Organization allies and other European partners, should demonstrate its resolve and ability to meet its commitments under Article V of the North Atlantic Treaty through appropriate military exercises with an emphasis on participation of United States forces based in the continental United States and testing strategic and operational logistics and transportation capabilities.

(c) REPORT.—

(B) enhance the indications and warning, interoperability, and logistics capabilities of Allied and partner military forces to increase their ability to respond to external aggression, defend sovereignty and territorial integrity, and preserve regional stability;

(C) improve the agility and flexibility of military forces required to address threats across the full spectrum of domains and effectively operate in a wide array of coalition

operations across diverse global environments from North Africa and the Middle East to Eastern Europe and the Arctic; and

(D) mitigate potential gaps forming in the areas of information warfare, Anti-Access Area Denial, and force projection;

(2) investments that support the security and stability of Europe, and that assist European nations in further developing their security capabilities, are in the long-term vital national security interests of the United States; and

(3) funds for such efforts should be authorized and appropriated in the base budget of the Department of Defense in order to ensure continued and planned funding to address long-term stability in Europe, reassure the European allies and partners of the United States, and deter further Russian aggression.

At the end of subtitle E of title III, add the following:

SEC. . SECURE ENERGY FOR READINESS AND NATIONAL SECURITY.

(a) **FINDINGS.**—Congress makes the following findings:

(1) Secretary of Defense James Mattis testified in writing to the Senate Armed Services Committee in March of this year that “climate change can be a driver of instability and the Department of Defense must pay attention to potential adverse impacts generated by this phenomenon.” The Department of Defense must not only prepare for the impacts of climate change, but also implement sustainable energy projects to fight climate change and to enhance force readiness and national security.

(2) Department of Defense Directive 4715.21, Climate Change Adaptation and Resilience, states that the Department of Defense must adapt current and future operations to address the impacts of climate change in order to maintain an effective and efficient United States military.

(3) According to the U.S. Energy Information Agency, the Department of Defense accounts for more than 75 percent of all energy consumed by the Federal Government, and fully 30 percent of Department of Defense energy costs are related to the operation of military installations. The Energy Independence and Security Act of 2007 included goals to reduce energy intensity in Federal buildings.

(4) The Office of the Deputy Assistant Secretary of Defense for Installation Energy has outlined a strategy to—

(A) reduce demand for military installation energy through conservation and efficiency;

(B) expand the supply of distributed (on-site) energy for mission assurance;

(C) improve the energy grid and storage resilience of installations; and

(D) leverage advanced technology for energy resource efficiencies and increased security.

(5) The rising costs of fossil fuel derived energy will continue to cause budgetary pressures on the operation of United States military bases.

(6) The United States Armed Forces have begun to implement important alternative energy projects and energy efficiency programs. However, the Department of Defense needs to do much more to contain energy costs and improve access to reliable and sustainable energy sources.

(7) Efficient lighting reduces energy costs, enables backup power to work more efficiently during disruptions to the electrical grid, and the payback periods are short. These projects enable critical functions to continue longer in a state of electrical emergency.

(8) In the face of growing national security and climate crises, the United States Armed Forces require emergency power backup, independent of the power grid, to confront threats from sabotage, cyberattack, terrorism, extreme weather, or mechanical failure. Currently, most bases depend on fossil fuel backup generation, and as was evident during Hurricanes Harvey and Irma, fuel supplies are likely to be interrupted during and immediately after extreme weather events and other emergencies.

(9) Our Armed Forces require new and more reliable forms of electric backup, including locally generated solar, wind, or geothermal power with an uninterruptible power supply, available instantly whenever other power sources fail.

(10) By reducing energy use, generating electrical energy from both solar photovoltaic panels and wind sources, and storing that energy in state-of-the-art batteries, these projects will enhance the continuity of critically important military functions in times of crisis, including the defense of the homeland.

(b) **DEFINITIONS.**—In this section:

(1) **DISTRIBUTION ELECTRIC UTILITY.**—The term “distribution electric utility” means a distribution utility providing retail electric service.

(2) **GEOTHERMAL HEATING SYSTEM.**—The term “geothermal heating system” means a system that uses the heat from ground water for heating applications.

(3) **GEOTHERMAL POWER SYSTEM.**—The term “geothermal power system” means—

(A) a generator that creates electricity from the heat of ground water; and

(B) the accompanying hardware enabling that electricity to flow—

(i) onto the electric grid; or

(ii) into an uninterruptible power supply.

(4) **HIGHER-EFFICIENCY LIGHT BULBS.**—The term “higher-efficiency light bulbs” means light bulbs that are more efficient than bulbs currently installed.

(5) **NET METERING.**—The term “net metering” refers to a system that allows excess electricity to be sold to a distribution electric utility or transmission electric utility so that the Department of Defense customer may either receive payment or credit on their utility bill.

At the end of subtitle E of title III, add the following:

SEC. . SECURE ENERGY FOR READINESS AND NATIONAL SECURITY.

(a) **FINDINGS.**—Congress makes the following findings:

(1) Secretary of Defense James Mattis testified in writing to the Senate Armed Services Committee in March of this year that “climate change can be a driver of instability and the Department of Defense must pay attention to potential adverse impacts generated by this phenomenon.” The Department of Defense must not only prepare for the impacts of climate change, but also implement sustainable energy projects to fight climate change and to enhance force readiness and national security.

(2) Department of Defense Directive 4715.21, Climate Change Adaptation and Resilience, states that the Department of Defense must adapt current and future operations to address the impacts of climate change in order to maintain an effective and efficient United States military.

(3) According to the United States Energy Information Agency, the Department of Defense accounts for more than 75 percent of all energy consumed by the Federal Government, and fully 30 percent of Department of Defense energy costs are related to the operation of military installations. The Energy Independence and Security Act of 2007 included goals to reduce energy intensity in Federal buildings.

(4) The Office of the Deputy Assistant Secretary of Defense for Installation Energy has outlined a strategy to—

(A) reduce demand for military installation energy through conservation and efficiency;

(B) expand the supply of distributed (on-site) energy for mission assurance;

(C) improve the energy grid and storage resilience of installations; and

(D) leverage advanced technology for energy resource efficiencies and increased security.

(5) The rising costs of fossil fuel derived energy will continue to cause budgetary pressures on the operation of United States military bases.

(6) The United States Armed Forces have begun to implement important alternative energy projects and energy efficiency programs. However, the Department of Defense needs to do much more to contain energy costs and improve access to reliable and sustainable energy sources, including at Air National Guard facilities.

(7) Efficient lighting reduces airfield energy costs, enables backup power to work more efficiently during disruptions to the electrical grid, and the payback periods are short. These projects enable critical functions to continue longer in a state of electrical emergency.

(8) In the face of growing national security and climate crises, the Air National Guard requires emergency power backup, independent of the power grid, to confront threats from sabotage, cyberattack, terrorism, extreme weather, or mechanical failure. Currently, most bases depend on fossil fuel backup generation, and as was evident during Hurricanes Harvey and Irma, fuel supplies are likely to be interrupted during and immediately after extreme weather events and other emergencies.

(9) Our Armed Forces require new and more reliable forms of electric backup, including locally generated solar, wind, or geothermal power with an uninterruptible power supply, available instantly whenever other power sources fail.

(10) By reducing energy use, generating electrical energy from both solar photovoltaic panels and wind sources at Air Guard bases, and storing that energy in state-of-the-art batteries, these projects will enhance the continuity of critically important Air Guard functions in times of crisis, including the defense of the homeland.

PART II—REAUTHORIZATION OF NORTH KOREAN HUMAN RIGHTS ACT OF 2004

SEC. 1294. SHORT TITLE.

This part may be cited as the “North Korean Human Rights Reauthorization Act of 2017”.

SEC. 1295. FINDINGS.

Congress makes the following findings:

(1) In 2014, the United Nations Commission of Inquiry (in this section referred to as the “COI”) on Human Rights in the Democratic People's Republic of Korea found that the grave human rights violations still being perpetrated against the people of the Democratic People's Republic of Korea, due to policies established at the highest level of the state, amount to crimes against humanity. Crimes include forced starvation, sexual violence against women and children, restrictions on freedom of movement, arbitrary detention, torture, executions, and enforced disappearances, among other hardships.

(2) The COI also noted that the Government of the People's Republic of China is aiding and abetting in crimes against humanity by forcibly repatriating North Korean refugees back to the Democratic People's Republic of Korea. Upon repatriation,

North Koreans are sent to prison camps, tortured, or even executed. The Government of the People's Republic of China's forcible repatriation of North Korean refugees violates its obligation to uphold the principle of non-refoulement, under the United Nations Convention Relating to the Status of Refugees, done at Geneva July 28, 1951 (as made applicable by the Protocol Relating to the Status of Refugees, done at New York January 31, 1967 (19 UST 6223)).

(3) Estimates from the COI suggest that between 80,000 and 120,000 people are believed to be imprisoned in political prison camps in the Democratic People's Republic of Korea. Another 70,000 are believed to be held at other detention facilities. Prisoners in both situations are subject to harsh conditions, limited food, sexual abuse, and in most cases hard labor.

(4) One of the most overlooked findings of the COI report was the persecution of religious minorities, especially Christians. There is effectively no freedom of religion in the Democratic People's Republic of Korea, only worship of the Kim family. Christians are subjected to particularly acute persecution. It has been reported that Christians in the Democratic People's Republic of Korea have been tortured, forcibly detained, and even executed for possessing a Bible or professing Christianity.

(5) The Democratic People's Republic of Korea profits from its human rights abuses. One report from the Asan Institute for Policy Studies suggests that there are nearly 50,000 North Korean workers forced to labor overseas, sometimes without compensation, and for as much as 20 hours at a time. Workers that received compensation were not to be paid more than \$150 per month, which is between 10 to 20 percent of the value of the labor they performed. Based on this report, the regime may profit as much as \$360,000,000 annually from just 50,000 laborers.

(6) On July 6, 2016, the United States imposed sanctions on North Korean leader Kim Jong Un and other senior North Korean officials for human rights violations as required by the North Korea Sanctions and Policy Enhancement Act of 2016 (Public Law 114-122). This was the first time that the United States had designated North Korean entities for human rights abuses.

(7) The North Korea Sanctions and Policy Enhancement Act of 2016 (Public Law 114-122) requires the President to impose mandatory penalties under United States law on any person that "knowingly engages in, is responsible for, or facilitates serious human rights abuses by the Government of North Korea".

(8) Although the United States Refugee Admissions Program remains the largest in the world by far, the United States has resettled only 174 refugees from the Democratic People's Republic of Korea between January 2008 and January 2017. Since the enactment of the North Korea Human Rights Reauthorization Act of 2008 (Public Law 110-346), the United States has resettled a total of 212 refugees from the Democratic People's Republic of Korea.

SEC. 1296. SENSE OF CONGRESS.

It is the sense of Congress that—

(1) the United States Government should continue to make it a priority to improve information access in the Democratic People's Republic of Korea by exploring the use of new and emerging technologies and expanding nongovernmental radio broadcasting to the Democratic People's Republic of Korea, including news and information, to increase information dissemination in the Democratic People's Republic of Korea;

(2) in an effort to more efficiently and actively participate in humanitarian burden-

sharing, the Governments of the United States and the Republic of Korea should commit to revisit and explore new opportunities for coordinating efforts to plan for a potential humanitarian and human rights disaster;

(3) the United Nations has a significant role to play in promoting and improving human rights in the Democratic People's Republic of Korea and should press for access for the Special Rapporteur on the situation of human rights in the Democratic People's Republic of Korea as well as the United Nations High Commissioner for Human Rights;

(4) because refugees among North Koreans fleeing into the People's Republic of China face severe punishments upon their forcible return, the United States should urge the Government of the People's Republic of China to—

(A) immediately halt its forcible repatriation of North Koreans;

(B) fulfill its obligations pursuant to the 1951 United Nations Convention Relating to the Status of Refugees, the 1967 Protocol Relating to the Status of Refugees, and the 1995 Agreement on the Upgrading of the UNHCR Mission in the People's Republic of China;

(C) allow the United Nations High Commissioner for Refugees (UNHCR) unimpeded access to North Koreans inside China to determine whether they are refugees and whether they require assistance;

(D) address the concerns of the United Nations Committee against Torture by incorporating the principle of non-refoulement into domestic legislation; and

(E) recognize the legal status of North Korean women who marry or have children with Chinese citizens, and ensure that all such children are granted resident status and access to education and other public services in accordance with Chinese law and international standards;

(5) the President should continue to designate all individuals found to have committed violations described in section 104(a) of the North Korea Sanctions and Policy Enhancement Act of 2016 (22 U.S.C. 2914(a)), regarding complicity in censorship and human rights abuses; and

(6) United States citizens should not travel to the Democratic People's Republic of Korea, and the Department of State should launch a public awareness campaign about the risks and dangers of such travel.

EXTENSIONS OF REMARKS

NATIONAL HISPANIC HERITAGE MONTH

HON. PETER J. VISCLOSKY

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 13, 2017

Mr. VISCLOSKY. Mr. Speaker, it is with great respect and sincere appreciation that I rise to celebrate National Hispanic Heritage Month and its 2017 theme, Shaping the Bright Future of America. From September 15, 2017, through October 15, 2017, in honor of Hispanic Heritage Month, the people of the United States will once again celebrate the cultures and traditions and reflect on the many outstanding contributions our Hispanic brothers and sisters have made throughout our country's history.

Hispanic Heritage Month, which begins each year on September 15, recognizes the anniversaries of the independence of five Latin American countries: Costa Rica, El Salvador, Guatemala, Honduras, and Nicaragua. Mexico and Chile observe their independence days on September 16 and September 18. Since its inception as National Hispanic Heritage Week in 1968, which later became National Hispanic Heritage Month in 1988, Americans have taken this time to not only honor the rich culture and traditions of Hispanic Americans, but also to reflect on the tremendous impact Hispanic Americans have had within their communities and throughout our nation. The tireless efforts of generations of Hispanic Americans have resulted in a better America.

America's success is reliant upon the rich heritage and cultural diversity of its people. Hispanic Heritage Month celebrates the many Hispanic leaders and members of our communities who have added to the prosperity of the United States in every facet of our society. This year's theme also focuses on our nation's future and the immense impact Hispanic Americans will continue to have on creating a better tomorrow.

Mr. Speaker, at this time, I ask you and my other distinguished colleagues to once again join me in recognizing Hispanic Heritage Month. Throughout America's history, present, and future, the Hispanic community has played and will continue to play a major role in enriching the quality of life for the people of the United States, and for their outstanding contributions they are worthy of our respect and gratitude.

HONORING THE VICTIMS AND HEROES OF THE TERRORIST ATTACKS OF SEPTEMBER 11, 2001

HON. PETER T. KING

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 13, 2017

Mr. KING of New York. Mr. Speaker, today I rise to commemorate the sixteenth anniver-

sary of the September 11th terrorist attacks and to remember the nearly 3,000 innocent victims killed that day in New York City, at the Pentagon, and in Shanksville, Pennsylvania.

While September 11th is a day shrouded in unspeakable tragedy, it was also a time of unsurpassed courage. Many of the first responders, who heroically rushed to rescue victims, continue to die from exposure to Ground Zero toxins. These firefighters, police officers, and other emergency workers, rely on the Federal government to provide medical care they so desperately need and will require support for years to come.

I am grateful to the men and women of law enforcement, the Armed Forces and our Intelligence Community who work tirelessly every day to keep our country safe. As we celebrate their efforts, we must remain vigilant against terrorists who seek to destroy our country and way of life.

We must never forget the catastrophic events and lives lost on that tragic day in our Nation's history.

HONORING ELGIN FIRE DEPARTMENT'S 150TH ANNIVERSARY IN ELGIN, ILLINOIS ON SEPTEMBER 16TH

HON. RAJA KRISHNAMOORTHY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 13, 2017

Mr. KRISHNAMOORTHY. Mr. Speaker, today I honor the Elgin Fire Department for celebrating its 150th anniversary. Since Elgin's first fire station was established in 1867, it has made an exceptional impact on Elgin and its surrounding communities.

The Elgin Fire Department currently has over 133 sworn firefighters who provide life-saving care to a community of more than 180,000 people. This includes the historic downtown area, two major medical facilities, two college campuses, multiple industrial and office parks, a growing commercial area, and countless homes.

Over the past 150 years, the Elgin Fire Department has been a rich part of Illinois' history. In July 1869, the Elgin Fire Department purchased the James T. Gifford fire engine, which put the Department on the front lines of the Greater Chicago Fire in October 1870. To

this day, the Elgin Fire Department continues to protect the city of Elgin and its neighboring communities as well.

Additionally, the Elgin Fire Department has provided Illinoisans the opportunity to immerse themselves in Elgin history. Since 1987, the fire department has operated a museum looking back on the remarkable work Elgin firefighters have done.

The Elgin Fire Department touches countless lives every day, and has done exceptional work over the last 150 years in the Chicagoland area. Mr. Speaker, I am extremely grateful for their work, and I hope for their continued success in the future.

I honor the Elgin Fire Department in Elgin, Illinois on September 16th.

HONORING THE LIFE OF JOSE GUADALUPE RAMOS

HON. GRACE F. NAPOLITANO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 13, 2017

Mrs. NAPOLITANO. Mr. Speaker, it is with great sadness that I rise to honor the life of Jose Guadalupe Ramos, a beloved Vietnam veteran, Purple Heart recipient and veterans' advocate who passed away on September 3, 2017.

Mr. Ramos was born on September 17, 1948, in East Los Angeles, California. He attended Garfield High School and enlisted in the Army in 1965.

Mr. Ramos served bravely in Vietnam from 1967 to 68, where he was an Army medic exposed to the horrors of war while caring for fellow soldiers wounded on the battlefield. He himself was awarded the Purple Heart after being shot in the leg.

When Mr. Ramos returned from Vietnam, he and his fellow veterans were ignored by an American public disillusioned with the Vietnam War. The trauma they witnessed abroad was exacerbated by the disrespect and insults made against Vietnam veterans at the time. Even while suffering from his own mental and physical wounds, Mr. Ramos continued to care for others by working in emergency rooms in Los Angeles County hospitals.

Mr. Ramos' compassion for helping others did not end there. He had a desire to heal the mental wounds that his fellow Vietnam veterans still lived with when they were not given a proper welcome home. Mr. Ramos led an effort to get local, state, and federal governments to honor these heroes with a "Welcome Home Vietnam Veterans Day." He convinced the State of California to recognize March 30th as Welcome Home Vietnam Veterans Day. His efforts were a part of getting 38 states, Puerto Rico, and the U.S. Congress to observe Welcome Home Vietnam Veterans Day.

Mr. Ramos carried this message across the United States by biking multiple times from Los Angeles to Washington, D.C. to build support for recognition of a Welcome Home Vietnam Veterans Day. He also biked through

Vietnam with veterans from both sides of the conflict to promote healing and peace.

I was blessed to have known Mr. Ramos, and to have worked with him in our community and during his visits to Washington to help Vietnam veterans get the recognition, respect and care that they deserve.

Mr. Ramos alleviated the suffering of his fellow soldiers wounded on the field of battle, he alleviated the suffering of his fellow Angelenos in the emergency rooms of Southern California, and he alleviated the suffering in the hearts and minds of veterans who bore invisible wounds from Vietnam and their return to the United States.

Mr. Speaker, I ask that my colleagues join me in honoring Jose Ramos for his courage, character and commitment to supporting his fellow veterans. We extend our deepest sympathies to Mr. Ramos' family and friends for their loss. He was a model citizen and a hero for our community, our state and our nation.

HONORING MR. ROBERT FISHMAN

HON. ELIZABETH H. ESTY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 13, 2017

Ms. ESTY of Connecticut. Mr. Speaker, I rise today to honor Robert "Bob" Fishman for his decades of leadership at the Jewish Federation Association of Connecticut. Bob recently retired as the Executive Director of JFACT after 23 years with the organization, leaving a legacy of strong relationships between Connecticut's civic and faith leaders.

Bob has been a leading advocate for Connecticut's Jewish community. Through JFACT, he maintained close ties with the Jewish communities across Connecticut and ensured all their voices were represented in the organization's work. Those who have worked with Bob know him for his tireless dedication to strengthening our community.

As Executive Director, Bob worked closely with leaders in state government and our federal delegation on a number of issues critical to the Jewish community and Connecticut as a whole. He was instrumental in the creation of the annual Holocaust Remembrance Day at the State Capitol, which ensures that we remember the horror of hatred and genocide and that we educate future generations about its impact on our world. Through the 80s and 90s, Bob worked tirelessly to support the resettlement of refugees from the former Soviet Union and ensured they could begin their American Dream.

Mr. Speaker, Bob Fishman has been a dedicated civic and spiritual leader within our state, and it is therefore fitting and proper that we honor him here today. He serves as a role model for everyone in public service as someone who puts his faith into action to improve our state and our country. I am proud to call him a friend.

HONORING LARRY POOLE, GILLSVILLE'S MAYOR

HON. DOUG COLLINS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 13, 2017

Mr. COLLINS of Georgia. Mr. Speaker, I rise today to recognize my northeast Georgia neighbor, Mr. Larry Poole. For 24 years, he served as the Mayor of Gillsville, giving both his time and effort to the place that he calls home.

When Larry first became mayor, his mission was to use his role to amplify the voices in his community. Throughout his tenure, Mayor Poole was able to help his friends and neighbors and improve their community through servant leadership.

As Mayor of Gillsville, Larry exemplified such leadership each day, even on the day that he resigned. By choosing to fill a vacant seat on the city council, he put the needs of his community first, giving up his title in order to allow a new leader to add to the vision of Gillsville.

Mr. Speaker, I thank Larry for his dedication to northeast Georgia, and want to wish him the best as he assumes his new role on the city council. Northeast Georgia will always find a friend and leader in Larry Poole.

ACKNOWLEDGING RENIE PETERSON

HON. MIKE COFFMAN

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 13, 2017

Mr. COFFMAN. Mr. Speaker. I rise today to express my gratitude to Renie Peterson, the Aurora City Councilwoman for Ward II, for her extraordinary work and dedication to the City of Aurora. Her leadership has contributed to many of Aurora's most successful programs and initiatives.

I first met Renie Peterson when we both attended high school almost 50 years ago. In 1969, the City of Aurora was not the incredibly diverse community it is today. Yet, years later as a City Council Member, Renie not only recognized how Aurora has changed since we were growing up here, she fully embraced the "new" Aurora and founded the City of Aurora Global Fest which celebrates the vast array of

different cultures and ethnicities that now make up our great city. Renie was awarded the Dr. Martin Luther King, Jr. Chairman's Award for her commitment to diversity, equity, and inclusion in our community. She has shown throughout her decade of dedicated service as a City of Aurora Council Member her enthusiasm and commitment to better our community.

In addition, as Councilwoman Peterson sought to advance this city to its greatest potential, she served the City of Aurora and Adams County for over twenty years as a Board Member for several intergovernmental groups such as, Adams County Economic Development, Urban Drainage and Flood Control, Sand Creek Regional Greenway, and is the founder of the Aurora Public Schools' Wish List Project.

Mr. Speaker, Councilwoman Renie Peterson has enhanced the quality of life for every resident in the City of Aurora. Her leadership helped make the City of Aurora the great place it is today. I believe that Renie Peterson is among the very best, and I am very grateful for her unyielding dedication to our community.

DEPARTMENT OF THE INTERIOR, ENVIRONMENT, AND RELATED AGENCIES APPROPRIATIONS ACT, 2018

SPEECH OF

HON. DAVID N. CICILLINE

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, September 12, 2017

The House in Committee of the Whole House on the state of the Union had under consideration the bill (H.R. 3354) making appropriations for the Department of the Interior, environment, and related agencies for the fiscal year ending September 30, 2018, and for other purposes:

Mr. CICILLINE. Mr. Chair, I rise in support of my amendment which supports expanding access to Naloxone for first responders.

Equipping police officers and EMTs with Naloxone means they can immediately save the life of a person who is overdosing.

Although drug overdose deaths rose by 33 percent in the past five years, states, like Rhode Island, Maryland and Pennsylvania, are experiencing severe shortages of Naloxone. The cost of Naloxone has skyrocketed—rising by thousands of dollars in some cases—and it only has a shelf life of 18 to 24 months.

States have had to find alternate sources of funding, including tapping into emergency funds and cutting state programs, just to keep Naloxone in stock.

Some communities have also had to make extremely tough choices, like rationing funds and deciding how many lives they will save.

We must make additional investments in Naloxone for our first responders in order to stem the rising tide of opioid deaths.

I urge my colleagues to support my amendment.

CONGRATULATING JOE AND ELAINE GIALLANZA UPON THE OCCASION OF THEIR 60TH WEDDING ANNIVERSARY

HON. BRIAN HIGGINS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 13, 2017

Mr. HIGGINS of New York. Mr. Speaker, I rise today to commemorate the 60th wedding anniversary of Joseph and Elaine Giallanza, which will be celebrated on September 21, 2017.

Born in the 1930s Depression-era times, Joe and Elaine were married on September 21, 1957. Once married, Joe and Elaine employed a tremendous professional and personal work ethic, eventually founding the Giallanza Corporation, which developed and built residential housing throughout Western New York.

But from their home in Elma, Joe and Elaine enjoyed their most prized possessions—the members of the large family they were proud to call their own. Joe and Elaine raised six children: Michael, Theresa, Thomas, Mary, Peterson and the late Joseph Giallanza. Theirs was a warm home full of laughter and affection, bound together by the examples of love, faith and hard work that Joe and Elaine set for their children. Today, Joe and Elaine are the proud grandparents of 13 grandchildren who will help them celebrate their anniversary on September 21.

Mr. Speaker, I ask that you join with me and all of our colleagues to wish Joe and Elaine Giallanza a very happy and healthy 60th wedding anniversary, and to extend to the Giallanza family the very best of health and happiness in the days, months and years to come.

COMMEMORATING HEALTHCARE SIMULATION WEEK

HON. ANDY HARRIS

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 13, 2017

Mr. HARRIS. Mr. Speaker, to commemorate Healthcare Simulation Week, which makes its debut September 11–15, 2017, I would like to share with you my views as a physician on the importance of simulation in healthcare.

Simulation is a technique creating a situation or environment that allows people to experience a representation of a real event to practice, learn, be tested or to understand systems and human actions.

Using simulation, similar to that for pilots and flight crews in aviation, learners address hands-on and thinking skills, including procedures, real-time decision-making and communication. Critical teamwork actions such as managing a high workload, adapting to unexpected changes, and coordinating under stress are practiced. Simulation-based training encompasses a broad range of experiences, including the use of task trainers, live actors, mannequins, 3D and computer modeling, and even virtual reality.

Healthcare Simulation Week, sponsored by the Society for Simulation in Healthcare, celebrates professionals who use simulation to im-

pact the safety, effectiveness, and efficiency of healthcare delivery.

As a physician and Navy man, I am well aware of the benefits that simulation brings to patient safety and to the financial interests of healthcare institutions. According to a study cited in Modern Healthcare magazine, anesthesiologists who took part in simulation-based training on how to properly wean patients from cardiopulmonary bypass performed better in real-life procedures than those who received traditional interactive seminars. And, Dr. Christine Park, President of the Society for Simulation in Healthcare, says that numerous studies demonstrate that simulation more effectively prepares all types of providers, including physicians, nurses, first responders and others across the full spectrum of experience. Simulation provides the opportunity to learn, analyze error, and maintain life-saving skills before working on actual patients.

In a Gallup poll on the subject, 92 percent of the American public believed that simulation-based education for board-certified physicians was important.

Healthcare Simulation Week is an excellent opportunity for my physician and nursing colleagues and every member of Congress to recognize that the quality of health care for all patients, including ourselves, can be greatly improved through new advances in simulation, and that simulation should be included in all aspects of healthcare education. We believe that a system-wide embedding of simulation in hospitals and systems should be the norm and should appear in an assessment of hospital rankings.

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 6, 2017

The House in Committee of the Whole House on the state of the Union had under consideration the bill (H.R. 3354) making appropriations for the Department of the Interior, environment, and related agencies for the fiscal year ending September 30, 2018, and for other purposes:

Mr. McCAUL. Mr. Chair, I include in the RECORD the following exchange of letters regarding H.R. 3354.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON HOMELAND SECURITY,
Washington, DC, September 8, 2017.

Hon. JOHN CARTER,
Chairman, House Committee on Appropriations,
Subcommittee on Homeland Security, Wash-
ington, DC.

Hon. LUCILLE ROYBAL-ALLARD,
Ranking Member, House Committee on Approp-
riations, Subcommittee on Homeland Secu-
rity, Washington, DC.

DEAR CHAIRMAN CARTER, AND RANKING MEMBER ROYBAL-ALLARD: I write to convey our mutual understanding regarding Section 503(a)(5) of Title E of the Rules Committee Print for H.R. 3354, the Make America Secure and Prosperous Appropriations Act. Specifically, this section does not authorize the Department of Homeland Security (DHS) to utilize section 872 of the Homeland Security Act of 2002 to use appropriated funds to reorganize DHS organizational units.

As Chairman of the House Homeland Security Committee, I strongly believe that any significant reorganization of components within the Department should be subject to specific statutory authorization. Toward that end, last month, the House passed H.R. 2825, the Department of Homeland Security Authorization Act of 2017, which strikes section 872. As the Department has matured, it is no longer necessary for DHS to have unilateral authority to reorganize its organizational units. I appreciate your commitment to making DHS a more efficient and effective organization.

Respectfully,

MICHAEL T. McCAUL,
Chairman.

BENNIE G. THOMPSON,
Ranking Member.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON APPROPRIATIONS,
Washington, DC, September 12, 2017.

Hon. MICHAEL T. McCAUL,
Chairman, House Committee on Homeland Secu-
rity, Washington, DC.

Hon. BENNIE THOMPSON,
Ranking Member, House Committee on Home-
land Security, Washington, DC.

DEAR CHAIRMAN McCAUL: We write to confirm our mutual understanding regarding Section 503(a)(5) of Title E of the Rules Committee Print for H.R. 3354, the Make America Secure and Prosperous Appropriations Act. Specifically, this section does not provide any new authority for the Department of Homeland Security (DHS) to reorganize DHS organizational units. Any such reorganization authority is limited to existing authority under section 872 of the Homeland Security Act of 2002.

We appreciate your efforts to authorize DHS and look forward to working with you to further the Department's vital homeland security mission.

Respectfully,

JOHN R. CARTER,
Chairman, Sub-
committee on Home-
land Security.

LUCILLE ROYBAL-ALLARD,
Ranking Member, Sub-
committee on Home-
land Security.

TRIBUTE TO KIMBERLY BAETH AND GOLDEN OPENINGS, INC.

HON. DAVID YOUNG

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 13, 2017

Mr. YOUNG of Iowa. Mr. Speaker, I rise today to recognize and congratulate Kimberly

Baeth and her team at small business, Golden Openings, Inc.—located in Urbandale, Iowa, for receiving the U.S. Chamber of Commerce's 2017 Dream Big Small Business of the Year Award and the Community Excellence Award presented last evening here in Washington, D.C.

Golden Openings, Inc. provides area businesses with the tools necessary to make their grand openings memorable. From ribbon cutting to groundbreaking, they have over 20 years of experience that has helped them earn these prestigious honors. Their unique capabilities and products give new businesses a foundation upon which they can build a successful future. Winners of the Dream Big Small Business of the Year Award must display a commitment to innovation, entrepreneurship, and individual initiative. Golden Openings, Inc. is the epitome of these qualities as they focus on engaging their community, providing unparalleled customer service, and constantly finding new ways to grow their business.

It was quite the evening for Kimberly and her team as they were also awarded the Community Excellence Award. Recipients of this award must show leadership within their community and display a willingness and commitment to improving the quality of life for all of its residents. These qualities were on full display in 2016 after two police officers were tragically killed in the Des Moines metro area. Golden Openings, Inc. was able to bring together over 35,000 yards of blue ribbon that residents and businesses alike hung in memory of the two officers. As you drove through the metro area you could see how the entire community was embracing the friends and families of the two officers. It is because of businesses like Golden Openings, Inc. and community leaders like Kimberly that I'm proud to represent our great state.

Mr. Speaker, it is an honor to serve leaders like Kimberly and her entire team in the United States Congress, and it is with great pride that I recognize them all today for receiving these esteemed designations. I ask that my colleagues in the United States House of Representatives join me in congratulating them on receiving these awards, and in wishing them nothing but continued success.

COMMENDING GUAM SPEAKER BENJAMIN J.F. CRUZ FOR HIS TIRELESS ADVOCACY FOR CANCER RESEARCH, EDUCATION AND OUTREACH

HON. MADELEINE Z. BORDALLO

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 13, 2017

Ms. BORDALLO. Mr. Speaker, I rise today to commend and congratulate my good friend and the Speaker of the 34th Guam Legislature, Benjamin J.F. Cruz, on being awarded the American Cancer Society Cancer Action Network's National Distinguished Advocacy Award. This is the Cancer Action Network's highest national advocacy honor and Speaker Cruz is being presented with this award for his lifetime of advocacy for cancer research, education, and outreach, as well as the introduction and passage of the Youth Protection Act of 2017 in the 34th Guam Legislature, which

raised the minimum age to purchase or access tobacco products on Guam to 21 years. On March 24, 2017, Speaker Cruz's measure became the first bill enacted into law during the 34th Guam Legislature and made Guam the third jurisdiction nationwide to enact legislation raising the age to purchase tobacco products to 21 years.

Speaker Cruz's bill furthers efforts on Guam to reduce smoking on Guam and raise awareness among youth and young adults of the harmful effects that smoking and tobacco products have on a person's health. On Guam cancer is one of the leading causes of death in our community. Numerous community organizations, non-profits, and government agencies have partnered to promote research and community engagement to assist cancer patients and their families. Increased educational campaigns have also been ongoing to raise awareness of cancer and ways to reduce risks. Speaker Cruz's bill is an important compliment to these efforts, and I commend him, his staff, and all community stakeholders who were critical to its passage.

I have had the pleasure of working with BJ on numerous policy initiatives and joined him in supporting many of Guam's community organizations and the causes for which they advocate. As a former attorney, judge, and Chief Justice of Guam, and now as a legislator and current Speaker of the Guam Legislature, he has been a true public servant and champion for our island.

I join the American Cancer Society Cancer Action Network in commending Guam Speaker BJ Cruz for his advocacy for cancer research, outreach, and education, and for the enactment of the Guam Child Protection Act of 2017. On behalf of the people of Guam, I congratulate him, as well as his entire staff and policy team, on this award, and I look forward to our continued work together for our island and community.

CELEBRATING THE CITY OF LYNCH'S 100TH BIRTHDAY

HON. HAROLD ROGERS

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 13, 2017

Mr. ROGERS of Kentucky. Mr. Speaker, I rise today in honor of the centennial birthday celebration of the City of Lynch on September 16, 2017, a remarkable milestone for a historic coal mining camp in Harlan County, Kentucky. I include in the RECORD, an article published in the Lexington Herald Leader on February 24, 2017, which provides a detailed overview of our historic coal town in a story written by reporter Bill Estep entitled, It was the world's largest company coal town. As it turns 100, it fights to stay alive.

In 1917, U.S. Steel purchased 19,000 acres of land in Harlan County at the base of Black Mountain, Kentucky's highest peak, to produce the coal needed to make steel during World War I. By the 1940s, Lynch, Kentucky was the "largest company-owned coal town in the world," boasting unmatched water and sewer infrastructure in the area, a local hospital, schools, retail stores, recreational activities and a diverse workforce.

While our storied coal town has suffered tremendous losses over the last century with the

coal industry's decline, it hasn't terminated their pride for the City of Lynch. The citizens have honorably preserved the historic efforts of local workers and immigrants from more than 30 foreign countries who tirelessly worked miles underground, producing enough coal to power our nation for generations.

Today, the City of Lynch is embracing its heritage and working to boost tourism to capture the historic treasures of this community that served as the epicenter of coal production 100 years ago. I applaud the local leaders and entrepreneurs who are reimagining the future of coal country and working to integrate this small, rural town into the digital economy.

Mr. Speaker, our Appalachian heritage is uniquely defined by the sheer grit of the mountain people who are determined to not only survive, but thrive, in our small, rural American towns. I am proud to join the City of Lynch in celebrating its 100th birthday.

[From Lexington Herald Leader, Feb. 24, 2017]

IT WAS THE WORLD'S LARGEST COMPANY COAL TOWN. AS IT TURNS 100, IT FIGHTS TO STAY ALIVE

(By Bill Estep)

LYNCH.—The valley along Looney Creek in Harlan County was a wooded wilderness in 1917 when U.S. Steel, hungry for coal to make steel during World War I, bought 19,000 acres and set about creating the largest company-owned coal town in the world.

The company built an entire town from scratch—hundreds of houses, stores, schools, a hotel, a hospital, a baseball field, a fire station, water and power plants and industrial buildings, including a machine shop and the highest-capacity coal tippie anywhere.

Despite the buzz of work and grand intentions, some thought the town would be a flash in the pan.

The L&N Railroad refused to extend tracks to Lynch from Benham, a coal town about a mile away, because officials felt the town would die after the war when demand for steel went down, according to one history by a U.S. Steel official.

The company built its own tracks, and Lynch survived. The town at the foot of Kentucky's highest peak, Black Mountain, turns 100 this year.

In that century, Lynch has mirrored the history of Eastern Kentucky as coal jobs swung up and down and families moved out to find work during hard times.

More than half the coal jobs in Eastern Kentucky have disappeared since a precipitous slide started in 2012. At the end of 2016, there were fewer miners on the job in all of Eastern Kentucky than there were at the U.S. Steel mines at Lynch at their peak.

The town's population has declined to less than 800 from a peak of 10,000, and a third of the houses are vacant, according to U.S. Census figures.

Now, like the rest of the region, Lynch is looking for a new way forward. Residents are trying to promote tourism and small businesses to create jobs, and a study about the possibility of merging with two nearby towns is underway.

The challenges from an anemic economy and a declining tax base are steep, but many in Lynch have a fierce pride in the historic town and are determined to breathe new life into it.

A committee of volunteers is working to schedule events each month to mark the anniversary. On Jan. 1, local churches rang their bells for 100 seconds, and in February, residents put up red ribbons around town. The big event will be in September, with plans for a car show, vendors, family games and performances by several bands.

Residents also have set up a Facebook page where they are posting historic photos and trivia about the town's past.

The hope is that the centennial will be a springboard for efforts to keep Lynch from withering away.

"The city was built by coal but it can be maintained by something else," said Rev. Ronnie Hampton, a retired mine inspector who was the town's first black mayor. "As long as we've got breath, we won't give up."

Coal companies built hundreds of towns in Southern Appalachia in the early 1900s. Many were thrown together with cookie-cutter houses, poor sanitation and few amenities.

Lynch, however, was considered a model town, with better-built houses of varying styles; health care better than that available to most people in the region; recreation opportunities that included lighted tennis courts, the baseball field, a bowling alley and dances at the hotel ballroom; paved streets; a sewage system; and a company commissary that was reputed to be the best department store in Eastern Kentucky, according to historians.

Italian immigrants used sandstone quarried from the nearby hills to build impressive public buildings.

"None of them rivaled Lynch," James B. Goode, a retired community college professor who grew up in the neighboring coal town of Benham and has studied the history of Lynch, said of other coal towns.

The thought was that keeping miners content would enhance production and keep down problems.

'A LOT OF FUN HERE'

Lynch resident Irene Florek, who is 100, arrived in town with her family when she was a few months old. Her father had moved from a U.S. Steel coal town in West Virginia to work at the new Lynch mines.

Florek lived near the baseball field and remembers frequent activities including games and parades. One local history recounts that the company would close off the street to the hotel when it snowed so kids could go sledding.

"It was a lot of fun here at that time," Florek said.

The company history recounts milestones from Lynch's first 40 years, including a meningitis epidemic that hit the area in early 1936. U.S. Steel banned church services and public gatherings to try to limit the spread, and set up a temporary hospital.

Six of the 100 Lynch residents who got sick died, but the death rate was 80 percent or more in nearby communities, according to the company history, which attributed the relatively few deaths in town to the good medical care from company doctors.

In the Depression, people relied on gardens to help get by and the Red Cross gave out flour and other commodities, the history said.

Lynch was a classic melting pot of white people from the region, black people from the South and immigrants of more than 30 nationalities. In 1921, nearly 60 percent of the outgoing mail was to Europe, according to one history.

U.S. Steel recruited black workers from Alabama and other Southern states who were looking for better work than sharecropping, including some recruited from older mines in the Birmingham area.

The company also had recruiters at Ellis Island who used ship manifests to identify European immigrants with mining experience that they could hire, Goode said.

The first load of coal left Lynch in November 1917. By June of 1920, the Lynch mines

employed 2,300 men and the population of the town had already reached 5,350, according to a company history.

"It was hustle and bustle here," said Mike O'Bradovich, a first generation American whose father came to Lynch from what became Yugoslavia and whose mother was from Germany.

O'Bradovich followed his father into the mines, working from 1974 to 2002.

The sense of pride many in Lynch felt was rooted in immigrants making their way in a new country, O'Bradovich said.

"The pride started when these people were coming over, becoming Americans," he said.

Generations of black residents have maintained ties to Lynch through the Eastern Kentucky Social Club, which has chapters around the country and sponsors a Labor Day reunion each year, and through a homecoming to Lynch each Memorial Day.

When a former city clerk was charged in 2009 with stealing \$137,000 from the city, leaving it strapped, the city council appointed Hampton to steer the city through the crisis.

Hampton sent letters to Eastern Kentucky Social Club members and former residents seeking help, which brought in thousands in donations.

Lynch was segregated until the 1960s. Black and white employees worked together in the mines, but black miners could not move up to supervisory positions until winning a lawsuit in the 1970s, and schools and entertainment were segregated.

There was racial violence directed at black residents in the Appalachian coalfields, especially in the early days, but there was a relatively high degree of harmony between the races at a personal level, historian Ron Eller wrote in his 1982 book "Miners, Millhands and Mountaineers: Industrialization of the American South 1880-1930."

Whites and blacks in the mines had to rely on each other for their safety, and there were not major differences in pay or living conditions for miners of different races, Eller said.

When the schools integrated in the mid-1960s, U.S. Steel "made it seamless," said Dwain Morrow, whose father, William Morrow, retired after working 40 years for the company.

'VIRTUAL REIGN OF TERROR'

Labor relations were another matter.

Harlan County had some of the most widely reported labor clashes in the country between the world wars. Coal operators used control over the county's economy and politicians to beat back organizing efforts, evicting union members from company houses, blacklisting them from getting jobs and paying the salaries of sheriff's deputies who intimidated miners.

Lynch was not immune from the violence associated with those struggles that cemented the nickname "Bloody Harlan."

There were shootings in Lynch, including one fight at the bathhouse in which two men died, Goode said.

"They didn't hesitate to resort to violence," he said of the union organizers and the coal companies.

U.S. Steel and other coal companies exerted authoritarian control over employees and the economic, political and social life in the county. John W. Hevener said in his 1978 account of the labor battles of the 1930s, "Which Side Are You On?"

When the United Mine Workers of America tried in 1935 to sign up members at U.S. Coal and Coke, the U.S. Steel division that operated Lynch, the company laid in a supply of

tear gas and extra ammunition, barred organizers and followed union members and destroyed their literature, Hevener wrote.

A state commission later said that a "virtual reign of terror" existed in the county, financed by coal operators in collusion with public officials, and that miners had been evicted, beaten and mistreated.

Goode said U.S. Steel eventually accepted the UMW at Lynch in the late 1930s, deciding that the cost wouldn't be onerous.

Pay and benefits for miners improved under the union, said William Morrow, 94, who lied about his age to go to work for U.S. Steel at 16.

"It made it better," Morrow said.

By the late 1950s, mechanization had eliminated many miners' jobs and railroads and factories switched to other fuel sources, reducing demand for coal.

Coal production hit a 50-year-low in Harlan County in 1960, and the county's population dropped by nearly half between 1950 and 1970 as people left to find work, according to Census figures.

U.S. Steel and other companies, including International Harvester at neighboring Benham, decided it was too costly to maintain company-owned towns. They tore down many houses, sold others to residents, turned over schools to county districts and gave offices and other buildings to the towns, keeping only their mining operations.

U.S. Steel eventually ended its involvement in Lynch after more than six decades, selling its mines to Arch Coal in 1984.

These days, the city is living month to month financially and operates in the red at times, said Mayor John Adams.

"Getting by—that would be optimistic," Adams said.

Arch stopped mining around town in the late 1980s, cutting a key source of revenue for the city from selling water to the mines.

Adams said the city needs more employees but can't afford to hire. When both of its water-plant operators quit in January, the mayor pressed his sons into service to keep the plant going.

UNTAPPED POTENTIAL

But residents say Lynch also has assets to develop its tourism economy, including the beauty of the mountains, a fascinating history and its coal-camp houses and buildings.

Some of the original buildings in town are still in use, such as the hospital and a building that was a bank and post office, which now holds City Hall.

Kitty Dougoud, administrator of the Kentucky Main Street Program at the Kentucky Heritage Council, said she was not aware of a more intact coal town.

"The potential is there," Dougoud said.

Neighboring Benham is home to the Kentucky Coal Museum in the renovated coal-company commissary and other historic buildings, including the School House Inn, which was a high school for decades beginning in the 1920s but was converted to a hotel.

Cumberland, Benham and Lynch have been designated as trail towns. They are working to develop hiking and horse trails, and Lynch has started work on a campground.

The city received a grant to renovate the old coal-camp fire station, which now houses Fire House Gifts and Crafts, and a Christian service organization called Meridzo Center Ministries financed the renovation of a building that housed a popular restaurant in the 1920s across from the portal of a mine in the center of town. The Lamp House Coffee shop is in the building now.

There has been interest for years in restoring more of the town's old stone buildings, but not enough money to match the interest.

The town did receive financing to create a unique attraction at the Portal 31 exhibition mine. Visitors tour a restored section of an underground mine where workers produced more than 100 million tons of coal from 1917 to the early 1960s.

Recordings and animatronic displays tell the story of mining and the town over decades, covering technology, safety concerns, union organizing, and the rise and fall of Lynch.

'HERE TO HELP PEOPLE'

Residents say Meridzo also is a key resource for the town.

In addition to renovating the building for the coffee shop, the ministry operates a convenience store, a gym, a veterinary clinic, retreat centers and a stable in Harlan and Letcher counties.

Meridzo sees its mission as helping people with practical needs, including jobs, and in the process share the Gospel of Christ, said Lonnie Riley, who founded the ministry with his wife, Belinda, in 1999.

"We're here to help people," Riley said.

Meridzo is working to recruit a chiropractor, and has started a facility to grow shiitake mushrooms in sections of hardwood logs in the old bathhouse where miners cleaned up before going home.

There also is an effort underway to develop a customer-service center to provide jobs locally.

Betsy Shirey, who is developing the project, said her idea is a center where employees would field telephone calls and emails for other companies, and could provide other services, such as bookkeeping and marketing.

Shirey works for Humana, but after visiting Lynch on mission trips coordinated by Meridzo, she felt a spiritual calling to try to bring jobs to the area.

She can do her job from home, so she bought a house in Lynch and moved from Louisville.

Shirey said the lack of jobs in the area has helped create an attitude of entrenched hopelessness for many people.

"We've got to build up some infrastructure of meaningful work for people," Shirey said.

MERGER AHEAD?

Some think merging services for Lynch, Benham and Cumberland—or even merging local governments—would put all three on better footing.

The three lie end to end over a space of a few miles and have been known as the Tri-Cities for decades, but grew up as distinct places, with their own schools and competing sports teams, and have always maintained separate city services.

With all three stretched thin, however, their councils agreed to a merger study proposed by the Tri-City Chamber of Commerce, which said in its application for a grant that with declining populations and tax bases, the three towns "have struggled mightily in their efforts to maintain basic services to their citizens."

The study will focus on how the towns could form one government, how services could be combined, potential savings and how layoffs would be handled if needed.

W. Bruce Ayers, former president of Southeast Community and Technical College in Cumberland and head of the chamber, said many members believe merger is needed.

A merger would reduce costs, increase efficiency and give the unified city a better shot at government grants, Ayers said.

"I really fear for their existence unless they are willing to come together and work as one," Ayers said.

It will probably be next year before the study is done and the towns have to decide on merging.

Even if they do, Lynch won't lose its identity in its second century, said Mary Jo O'Bradovich, who with her husband Mike is involved in the centennial committee.

"After 100 years, I don't think anyone is going to say, 'I am from the Tri-Cities,'" she said. "Lynch will be Lynch."

CONGRATULATIONS TO HANNAH ADAMS

HON. TED S. YOHO

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 13, 2017

Mr. YOHO. Mr. Speaker, I rise today to congratulate, honor and thank Ms. Hannah Adams, a young constituent from my district, for her exemplary service as a National Youth Ambassador for the Hyundai Hope On Wheels foundation to fight pediatric cancer.

Ms. Adams, a 14-year-old childhood cancer survivor from Middleburg, Florida, was selected to serve as a Hyundai Hope On Wheels National Youth Ambassador in March 2016.

Since that time, Ms. Adams has traveled across the country to share her story of courage and hope and to inspire others to join in the fight against cancer.

Ms. Adams joined Hyundai Hope On Wheels in its mission to educate people about pediatric cancer and to raise money—over \$130 million since 1998—to find a cure.

Over the last two years, Ms. Adams visited many children's hospitals and attended events to stand in solidarity with other children and families who are battling cancer or who have been impacted by the disease.

Ms. Adams was only five years old when she was diagnosed with a Stage 3 Wilms tumor that enveloped her kidney, and she has become one tough cancer survivor.

Ms. Adams is an inspiring example of bravery for all of us, and I am exceptionally proud of her for giving others hope. It is critical that we encourage and support the kind of selfless contributions this young woman has made.

Ms. Adams gives me hope for a better tomorrow and a future where no child has to hear the words, "You have cancer."

I wish Ms. Adams the best of luck with all her future endeavors, and I urge my colleagues here in the U.S. House of Representatives to join me in congratulating her as she completes her service as a 2016–2017 Hyundai Hope On Wheels National Youth Ambassador.

TRIBUTE TO TRUDY CALDWELL

HON. GWEN MOORE

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 13, 2017

Ms. MOORE. Mr. Speaker, I rise to bring best wishes and birthday greetings to Trudy Caldwell as she celebrates her 50th Birthday.

She is an inspirational role model for those who aspire to accomplish goals that may seem impossible. She has shown a passion for public service as demonstrated through her committed and dedicated military career of 20 years. Further, Trudy has continued service to our country as a civilian employee in the Department of the Army. Trudy is one of the few individuals to have served both as an enlisted soldier and an Officer, ultimately retiring with the rank of Lieutenant Colonel. This is quite an achievement; she has no doubt, overcome barriers to realize these accomplishments as both an African American and a woman. Trudy's academic achievements include completing both a Bachelor's and Master's Degree. Additionally, she has been awarded numerous civic honors.

Trudy Caldwell's military assignments have taken her all over the United States and the world. She has taken command on various levels including teaching newly commissioned officers at the Quartermaster Center and School, served on the Joint Staff which is the highest level staff in the Defense Department, served with a team of staff officers to work directly with members of the Joint Staff 9–11 Commission, and served on the staff of the Army's Congressional Liaison Office. I am pleased to say this is where I met Trudy Caldwell during my first term in office. Shortly afterward while Trudy was attending graduate school at Georgetown University, I was fortunate enough to have Trudy spend a few days a week as a "Graduate Intern" working in my Washington, D.C. Office.

I am proud to call Trudy Caldwell my friend and I am proud that she originally comes from my district where her mother and other family members still reside. I know that this is only the beginning for Trudy; she has a prosperous life ahead of her. I know that she will continue to enrich the lives of future generations by bringing new experiences and renewed hope for those who aspire and dream of a better tomorrow through the nonprofit she has formed to assist youth.

May Trudy continue to bring joy to the countless lives she has touched throughout her life. She has been a true blessing to the 4th Congressional District and this nation. Mr. Speaker, for these reasons I rise to give tribute to Trudy Caldwell. I wish her a wonderful celebration on her birthday and many more years filled with good health and happiness. It is a privilege to have this opportunity to celebrate and congratulate her on this special day.

SPECIAL TRIBUTE CELEBRATING THE UNVEILING OF PONSIE B. HILLMAN WAY

HON. JERROLD NADLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 13, 2017

Mr. NADLER. Mr. Speaker, the newly-christened Ponsie B. Hillman Way in Manhattan's Upper West Side celebrates a woman who dedicated her life to social justice. This well-deserving recognition will honor the indelible impact Mrs. Hillman left on New York and underserved communities around the country.

Having faced personal discrimination as a young African-American teacher in Maryland, Mrs. Hillman's earliest activism in the 1940s and 1950s focused on education equity. After Prince Edward County, Virginia closed its schools in an attempt to evade desegregation orders following the landmark Brown vs. Board of Education ruling, Mrs. Hillman traveled to Virginia with the American Federation of Teachers to teach students without pay.

After moving to New York City in 1965, Mrs. Hillman immediately stepped into multiple community organizing roles. She was elected to the Executive Board of the NAACP in Manhattan, and worked on affordable housing, education, and health projects. Mrs. Hillman also served as a leader of the local labor movement. As a member of the New York City Central Labor Council's Black Trade Unionist Leader Committee, Mrs. Hillman dedicated many years of hard work to increasing leadership opportunities for African-Americans in their union branches. Over the course of her life, Mrs. Hillman was recognized for her activism by the U.S. Secretary of Labor, American Federation of Teachers, and the New York City Central Labor Council, among others.

I am incredibly proud to represent so many institutions and community groups that were the recipients of Mrs. Hillman's service. The renaming of West 71st Street and Columbus Avenue on the Upper West Side, Mrs. Hillman's long-time neighborhood, will stand as a testament to her important work as an educator, civil rights activist, and New York communal leader. I wish her family heartfelt congratulations on this special occasion.

CELEBRATING THE RETIREMENT OF DEBORAH HEARN SMITH AFTER 47 YEARS OF SERVICE TO THE GIRL SCOUTS OF CENTRAL INDIANA

HON. SUSAN W. BROOKS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 13, 2017

Mrs. BROOKS of Indiana. Mr. Speaker, I rise today to honor Deborah Hearn Smith of the Girl Scouts of Central Indiana. For over four decades Smith facilitated the opportunity for our daughters in Central Indiana to become confident young leaders through engaging the world around them and building positive relationships with their peers and themselves. Smith's exemplary leadership and dedication to the Girl Scouts of Central Indiana has enriched the lives of over one million young women in our community, building generations of confident, courageous, and principled Hoosiers. The people of Indiana's Fifth Congressional District are forever grateful for Deborah Hearn Smith's commitment to making Central Indiana, a welcoming place of opportunity for our young women.

A life-long Hoosier from Indianapolis, Smith attended IPS 60, then went on to Shortridge High School. She graduated in the class of 1966. And she was later inducted into the IPS Alumni Hall of Fame in 2015 for her outstanding leadership. Following graduation from high school she attended Kentucky State University to study English, History, and Political Science. There she met her husband Ebenezer Smith. She went on to later earn her

MBA from Indiana Wesleyan University and a Nonprofit Management Certificate from Harvard University. She has been a part of Girl Scouts on a professional level since the early 1970's; but, became involved in Girl Scouts much earlier in life. She became a Brownie at age 5 and then a Girl Scout at age 7. As a young adult, she served as a day camp counselor and director. At 17, she earned the Curved Bar (now known as the Gold Award) which is the highest achievement a Girl Scout can earn.

Smith's professional career with the Girl Scouts began after graduation from Kentucky. Initially only intending to help out that summer for camping trips, the opportunity arose to be a permanent member of the organization as a field executive. She soon became the director of camping services after two short years later, a position she held until 1991. In 1991 she was promoted to Director of Facilities and Technology. Smith was named CEO of the Girl Scouts of Hoosier Capital Council in 2001 and became CEO of Girl Scouts of Central Indiana in 2007, the first African American in the Indianapolis region to be named to this position, after the reorganization and merger of five local Girl Scouts councils into one. The merger, overseen by Smith, saves over \$1 million dollars annually in administrative costs and has made possible more program opportunities, greater community outreach, as well as maintaining the tools necessary for adult volunteers to ensure the girls continue to grow and develop within the Girl Scouts. She leads an organization that employs 200 permanent and seasonal staff and operates on a \$10 million budget. In September of 2016, Smith moved the headquarters to a permanent home on the west side of Indianapolis. The 7-million-dollar Leadership and Learning Center boasts over 30,000 square feet and is located on the Camp Dellwood campus. It provides space for permanent staff and administrative offices as well as room for leadership training events and a dedicated annual cookie distribution location. This new facility will serve nearly 40,000 Girl Scouts and 18,000 adult volunteers and staff, annually.

During her time as CEO of the largest girl serving non-profit in the state, Smith has focused on prioritizing diversity and inclusion. Through initiatives such as Latinas Taking the Lead, Smith sought to foster a culture of inclusion and to further the Girl Scouts' mission to build girls of courage, confidence, and character, who make the world a better place. Her work has taken the Girls Scouts to create dedicated relationships with local housing projects and often offers the only outlet for the young women who live there. She has been dedicated to providing any interested girl the chance to experience the benefits of Girl Scouts, regardless of their circumstances by adhering to her philosophy that all girls, regardless of ability or background, should have a chance to succeed. As of 2011, in Indiana thanks to her leadership, one in six Hispanic girls and one in eight African American girls are involved in Girls Scouts.

In 2014, Smith earned the Women of Influence Award from the Indianapolis Business Journal for her work in removing barriers and reaching out to poor and underserved communities. This award was given to only 20 women to recognize them for their outstanding contributions to business, the arts and community and public service in central Indiana.

Other awards include the Indiana Commission for Women Torchbearer Award, Kiwanis Club of Indianapolis Civic Award, Martin University's President's Award, Black Police Association's Community Service Award, and Women's Empowerment Leadership Award.

Deborah Hearn Smith has impacted the lives of nearly one million girls through the Girl Scouts. Smith has dedicated her life to fostering courage, confidence and character in the young women of our community. Thanks to Smith, many generations of Hoosier girls are prepared for their future as well-educated, civically engaged, and philanthropic women. On behalf of all Hoosiers, I wish to extend a heartfelt thank you to Deborah Hearn Smith for her 47 years of service. I wish the very best to Smith, her husband, two children Lawrence and Jason, and her four grandchildren in her well-deserved retirement as well as in the next exciting chapter of her life.

PRAY FOR BRECKLYNN

HON. DOUG COLLINS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 13, 2017

Mr. COLLINS of Georgia. Mr. Speaker, in honor of Childhood Cancer Awareness Month, I rise today to recognize Ms. Brecklynn Allgood, a young neighbor of mine from Gainesville who has been battling cancer since 2015.

Since her initial diagnosis, Brecklynn has endured multiple surgeries and dozens of radiation treatments. Each day that she spends inside the hospital deprives her of the normal life that she has longed for—a life that includes simple joys like playing with her friends and learning at preschool.

Despite her limitations, Brecklynn is a fighter who welcomes each oncoming battle with a smile on her face. I know this because her positive attitude and determination have inspired thousands of Georgians, who now regularly send their love through Facebook and show their support through "Pray for Breck" yard signs and bumper stickers.

Mr. Speaker, I voted in favor of the Gabriella Miller Kids First Act in 2014, a bill that supports pediatric cancer research, and I will continue to commit myself to supporting legislation that brings our nation closer to a cure.

For now, I ask that we pray for Brecklynn and all other children battling cancer, for their steadfast recovery and for their bright futures. Brecklynn's courage and persistence remain an example for us all, and she will be in my thoughts and prayers as she fights to beat her cancer.

RECOGNIZING SEPTEMBER AS PROSTATE CANCER AWARENESS MONTH

HON. PETER T. KING

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, September 13, 2017

Mr. KING of New York. Mr. Speaker, I rise today to recognize National Prostate Cancer Awareness Month this September and the es-

timated 26,000 men who will die from this disease by year's end.

Prostate cancer is a disease that develops in the male reproductive system located in the prostate. Among American males, prostate cancer is the most diagnosed cancer and has the second highest cancer-related cause of death. My own father died of prostate cancer. However, like many other forms of cancer, early detection is vital to successful treatment.

As a nation, we have a duty and responsibility to serve and save the American public. Federal funding for prostate cancer research has accounted for, on average, only 5 percent of our nation's annual cancer research budget even though it is responsible for about 26 percent of all cancer cases and about 9 percent of cancer deaths in men. I encourage my fellow Members of Congress in joining me to make prostate cancer awareness, research, and early detection a national health care priority by ensuring adequate resources are readily available to save American lives. When it comes to saving Americans, we must see to that everyone has a clean bill of health.

Our efforts to bring awareness to prostate cancer must continue beyond the month of September. Mr. Speaker, I am honored to help raise and maintain awareness for this humane cause and invite my colleagues on both sides of the aisle to join me in this fight. Though the number of American men diagnosed with prostate cancer has fallen by nearly 6 percent each year over the past decade, we still have a long ways until a cure can be found.
