Women bring unique and invaluable skills and experiences to the workplace. Across the country, there are over 9 million women-owned small businesses, and they contribute over a trillion dollars to our national economy.

In Kansas alone, there are more than 73 businesses owned by women, representing industries such as accounting, veterinary medicine, and management consulting.

As I have toured Kansas, I have met with women entrepreneurs in towns like Lebanon and Emporia learning about how these businesses are changing local economies and the positive impact these businesses have on their communities. It is inspiring to see what these women have achieved and to hear their perspective on the challenges that small-business owners face.

I ask my colleagues to join me now in celebrating these women during National Women's Small Business Month.

RECOGNIZING THE KANSAS HEART AND STROKE COLLABORATIVE

Mr. MARSHALL. Mr. Speaker, though mostly known as the top basketball program in the country, I want to acknowledge and salute the University of Kansas and our innovative work through the Kansas Heart and Stroke Collaborative.

The collaborative has worked diligently over the past 3 years to establish a new model and standard for how to effectively care for heart disease and strokes in rural areas. They provide better care in a way that saves overall costs and is truly a win-win.

Fifty-three counties in Kansas, with more than 90 hospitals, clinics, and offices, now are represented in the collaborative care model. Not only do they better the lives of patients in rural Kansas, they do so based on a model that is a poster child for other conservative-style demonstration projects.

In 2014, the University of Kansas partnered with Hays Medical Center and received a $12 million, 3-year innovation grant. Now that 3-year window is closing, and I am pleased to say that the collaborative will continue as a self-sustaining entity.

Let me say that again. This will continue as a self-sustaining entity, continue to provide efficient care, and, literally, save thousands of rural Americans' lives and give them more meaningful life after their stroke or heart attack.

As a physician in rural Kansas for three decades, this is one of the greatest success stories I have ever seen, and it will always hold a special place in my heart, as I have seen it unfold right before my eyes.

The Kansas Heart and Stroke Collaborative provides hope and direction for rural healthcare in Kansas and beyond, and it should be looked at by other States.

ARTICLES OF IMPEACHMENT

The SPEAKER pro tempore. The Chair recognizes the gentleman from Texas (Mr. AL GREEN) for 5 minutes.

Mr. AL GREEN of Texas. Mr. Speaker, I rise today as a proud Member of this House. I am always so honored to be known as a privileged college of standing in the well of the Congress of the United States of America. There are only 435 people who are elected as Members from the various States who have voting rights in Congress and are allowed this privilege, so it is an honor for me to do it. I want people to know that when I stand here, my words are sincere and my efforts are those that I believe can make a difference in the lives of all Americans.

Mr. Speaker, yesterday, I called to the attention of the House of Representatives Articles of Impeachment, and I called these Articles of Impeachment to the House because it is a part of a process. It can be a three-step process, which has been used on multiple occasions in the past, a three-step process that allows the Member to give notice. After the Member gives notice, the Member does not have to allow a vote to take place immediately.

The Member can decide, rather than have the vote take place within 2 days, the Member can give notice a second time and then allow that process to move forward, and the Speaker can then set a time for the Member to give a final notice, or present the actual Articles of Impeachment.

I have chosen to use the three-step process: initial notice; thereafter to come back before this House, which every Member has the privilege of doing and which has been done before, and again notice the House; and, thereafter, the actual Articles of Impeachment.

Mr. Speaker, I don't think it is any secret that I have indicated that the President should be impeached. It is no secret that I have indicated that the President is guilty of high crimes and misdemeanors, and that is what it means—I never use the B word. I never use profanity. But I want you to know this: I am going to move forward with those Articles of Impeachment, and motherhood is sacred.

The SPEAKER pro tempore. Members are reminded to refrain from engaging in personalities toward the President.

RECOGNIZING MATT BELLINA

The SPEAKER pro tempore. The Chair recognizes the gentleman from Pennsylvania (Mr. FITZPATRICK) for 5 minutes.

Mr. FITZPATRICK. Mr. Speaker, I rise today to share the story of my constituent, Matt Bellina, of Holland, Pennsylvania.

On April 9, 2014, at the age of 30, Matt was diagnosed with ALS, otherwise known as Lou Gehrig's disease. ALS attacks the nerve cells in the brain and the spinal cord, causing muscles with ALS to lose control of their muscles.

Matt graduated from Virginia Tech in May 2005 and received his commission into the U.S. Navy as a naval aviator. Following the onset of his symptoms, which include cramping hands, twitching arms, stiffness in his legs, Matt was grounded from flying. He continued to serve in the Navy in an administrative capacity until he medically retired in 2014, with the rank of lieutenant commander.

As a physician in rural Kansas for three decades, this is one of the greatest success stories I have ever seen, and it will always hold a special place in my heart, as I have seen it unfold right before my eyes.
