Management Agency, part of the Department of Homeland Security, is falling far short on disaster relief in Puerto Rico. In fact, I think one could say they are actually perilously short on helping the people, our fellow citizens, in Puerto Rico.

It has now been 22 days, that is 528 hours, since Hurricane Maria destroyed Puerto Rico. Hundreds of thousands of our fellow citizens in Puerto Rico still—still—have no fresh water, no power, without many still without electricity. Many have no dry cots or even dry sleeping bags to replace the wet mattresses and moldy surroundings that characterize the Puerto Rico of today. Let me say that Puerto Rico is not a large island. It is a little over 100 miles wide, not much larger than my congressional district in Ohio which extends from Cleveland to Toledo. The difference with Puerto Rico is the topography is much more hilly.

I ask myself the question: Why hasn’t FEMA had airdrops of vital sustenance from the very start? Where is that help to these far-flung villages that have been cut off because, when the rains came, they washed out bridges and roads that make all these tiny towns inaccessible? Inaccessible.

Fresh water packets can be airdropped. Our military does that all over the world. Why can’t those fresh water packets be dropped in Puerto Rico? We can drop packets with peanut butter and bread. We do that all over the world. Why can’t we do that in Puerto Rico? Why can’t we airdrop food?

Citizens in Ohio with families and friends in Puerto Rico about whom they are desperately worried have been told that many smaller towns where they have relationships lack relief and any assistance now 528 hours, 22 days, into this deep human tragedy. I want to place in the RECORD, and I hope FEMA is listening, names of some of the villages that are completely cut off because roads and bridges were destroyed and no relief has come. No relief has come.

Ponce, in the south, is one. Utuado, Jayuya, Arecibo, Yauco, Corozal, Comerio, Loiza, Toa Baja, Cabo Rojo, and Llanadases. Those are names we have been given. Aid to these pockets of desperation is almost 3 weeks overdue. People need relief now.

FEMA also needs a better plan. In fact, they need a plan. I don’t think they have any plan to immediately evacuate people to the mainland for respite, Places like Cleveland, Lorain, and Toledo, Ohio, we could accept people who now are living in conditions you would wish on no American.

We cannot risk more illness and death. Children should not be missing school after the horror they have experienced. We shouldn’t have the level of hardship that has been subjected to people who are still enduring the devastation of Maria. What is happening there is inhumane.

Most of the television stations are down in San Juan, and that is where the Governor of Puerto Rico is most of the time when our codews go down there, but the desperation is in the countryside. It is outside of San Juan, which is inaccessible.

President Trump, the people of America and, let me tell you, those in Ohio need you to help their families and countrymen now. FEMA can do so much better for our fellow Americans. FEMA’s initials stand for Federal Emergency Management Agency. Where is the emergency? Where is the management? And where is the Federal reputation for excellence and leaving no man or woman behind?

FEMA, shape up. America demands more, and Americans deserve more.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will remind all persons in the gallery that they are here as guests of the House and that any manifestation of approval or disapproval of proceedings is in violation of the rules of the House.

THE IRAN NUCLEAR DEAL WAS A GIANT MISTAKE

The SPEAKER pro tempore. The Chair recognizes the gentleman from Indiana (Mr. MESSER) for 5 minutes. Mr. MESSER. Mr. Speaker, I rise today to urge President Trump to decertify the disastrous Iran nuclear deal. There are reports that decertification may come as early as tomorrow, and I certainly hope so.

The Iran nuclear deal was a giant mistake. It has been bad for America’s national security, bad for our ally Israel’s national security, and bad for the world.

By decertifying the flawed Iran nuclear deal before October 15, the administration has a chance to send a strong message that the United States will not sit idly by while the Iranian threat continues to grow.

The deal was premised on a naive notion that Iran would somehow evolve into a peaceful global partner, but that couldn’t have been further from the truth. Make no mistake about it: Iran is not our friend, does not share our values, and should not have been trusted.

For decades, Iran has called the United States the Great Satan, and their leadership continues to call for the total annihilation of our ally Israel. Iran remains the largest state sponsor of terrorism in the world and is actively working towards obtaining a nuclear bomb.

This much is clear: Iran has not upheld the spirit of this deal. Now is the time to reassert our authority on the world stage and hold Iran accountable.

I look forward to working with President Trump to keep America, our allies, and the rest of the world safe from Iranian aggression.

HONORING THE DISCOVERY OF HERNANDO DE SOTO’S 1539 ENCAMPMENT AND THE LOST NATIVE AMERICAN TOWN OF POTANO

The SPEAKER pro tempore. The Chair recognizes the gentleman from Florida (Mr. Yoho) for 5 minutes.

Mr. Yoho. Mr. Speaker, today on the House floor, I rise to honor the discovery of Hernando de Soto’s 1539 encampment and the lost Native American town of Potano, by the University of Florida professors, Dr. Fred White and Dr. Michele White, of the University of Florida and student Ethan White. This newly discovered archaeological site is the oldest confirmed New World contact site in the United States.

In one of the most important events in U.S. history, Soto was the first European to discover the Mississippi River and explore an area that today would hold 10 States. Until this incredible archaeological discovery, there was no physical evidence of de Soto’s 4,000-mile journey. The collection of artifacts recovered near Orange Lake, Florida, includes very rare King Ferdinand coins, Queen Isabella coins, and a King Enrique IV of Castile coin that is the oldest dated European artifact ever unearthed in the United States.

Other rare items include Murano glass beads and Spanish weapons and armor dated from the early 1500s. The artifacts were excavated in the lost ancient Native American town of Potano. Also discovered in the town of Potano were the remains of the first location of the San Buenaventura Franciscan mission built there in the 1580s. Within the floors of the 16th century mission, the recent scientific findings were published in the peer-reviewed International Journal of Archaeology and with the Florida Department of State, Division of Historical Resources, Bureau of Archaeological Research in Tallahassee, Florida. The collection of artifacts is at the Florida Museum of Natural History on the campus of my alma mater, the University of Florida.

ACKNOWLEDGMENT

Mr. Speaker, additionally, I would like to recognize today is National Farmers Day, a day when we say thanks to all of our farmers and ranchers for the work they do. Our agricultural industry, in a lot of ways, is the backbone of this country. It feeds our Nation and a big portion of the world, and accounts for 11 percent of overall employment.

Most people don’t realize how farmers affect their life, but it is important to note the dependence between rural and urban life.

People often associate Florida with tourism, but agriculture is actually...
