

According to the Brookings Institution, the endowment tax in particular, threatens the ability of low-income students to pursue college and graduate studies.

This is because endowments subsidize students from lower-income families, while allowing students across the board to graduate with less debt.

This bill is beyond sinister: the GOP tax bill is written so that in just 10 years, certain tax cuts (benefitting the wealthy) would remain permanent and paid for with other permanent measures that raise revenues or reduce program spending, while letting lower priority tax cuts (typically benefitting lower-income folks) expire.

That is why Americans reject this Republican tax giveaway by an overwhelming 2:1 margin according to a poll released yesterday by Quinnipiac.

Specifically, 61 percent think the Republican tax scam will benefit the wealthy the most; only 16 percent say the plan will reduce their taxes.

59 percent think it a very bad idea to eliminate the deduction for state and local income taxes.

Nearly half of respondents (49 percent) think it a bad idea to lower the corporate tax rate from 35 percent to 20 percent.

In fact, the average annual tax cut for the top one-tenth of one percent is \$320,000; for the top one percent it is \$62,000, and for those earning \$1 million a year it is \$68,000.

Nearly 25 percent of the tax cut goes to households in just the top one-tenth of one percent, who make at least \$5 million a year (2027).

While super-wealthy corporations and individuals are reaping windfalls, millions of middle-class and working families will see their taxes go up:

13 million households face a tax increase next year.

45 million households face a tax increase in 2027.

29 million households (21 percent) earning less than \$100,000 a year see a tax increase.

On average, families earning up to \$86,000 annually would see a \$794 increase in their tax liability, a significant burden on families struggling to afford child care and balance their checkbook.

It is shocking, but not surprising, that under this Republican tax scam, the total value of tax cuts for just the top one percent is more than the entire tax cut for the lower 95 percent of earners.

Put another way, those earning more than \$912,000 a year will get more in tax cuts than 180 million households combined.

Mr. Speaker, an estimated 2.8 million Texas households deduct state and local taxes with an average deduction of \$7,823 in 2015.

But this is not the end of the bad news that will be delivered were this tax scam to become law, not by a long shot.

Equally terrible is that this Republican tax scam drastically reduces the Earned Income Tax Credit, which encourages work for 2.7 million low-income individuals in Texas, helping them make ends meet with an average credit of \$2,689.

The EITC and the Child Tax Credit lift about 1.2 million Texans, including 663,000 children, out of poverty each year.

So to achieve their goal of giving more and more to the haves and the "have mores," our

Republican friends are willing to betray seniors, children, the most vulnerable and needy, and working and middle-class families.

The \$5.4 trillion cuts in program investments that will be required to pay for this tax giveaway to wealthy corporations and individuals will fall most heavily on low-income families, students struggling to afford college, seniors, and persons with disabilities.
