

infrastructure we have in the United States today and opened the door for entrepreneurs to make America's internet economy the best in the world, not by using 1934 regulations that probably regulated telegraphs.

This decision will not take away anyone's privacy or hinder their access to the internet. Instead, it will stop the confusion between two governing bodies: the FCC trying to get in on the action of the Federal Trade Commission, which has always governed internet privacy.

This levels the playing field and keeps competition, instead of the censorship we are seeing on the internet by very few providers. I think this opens the door back up for these wrong-headed regulations of 2015, and gives us all more choices.
