

The yeas and nays were ordered.

AMENDMENT NO. 1931 TO AMENDMENT NO. 1930

Mr. McCONNELL. Mr. President, I have a second-degree amendment at the desk.

The PRESIDING OFFICER. The clerk will report.

The senior assistant legislative clerk read as follows:

The Senator from Kentucky [Mr. McCONNELL] proposes an amendment numbered 1931 to amendment No. 1930.

The amendment is as follows:

At the end add the following.

“This Act shall take effect 1 day after the date of enactment.”

MOTION TO REFER WITH AMENDMENT NO. 1932

Mr. McCONNELL. Mr. President, I move to refer the House message on H.R. 1892 to the Committee on Appropriations to report back forthwith with instructions.

The PRESIDING OFFICER. The clerk will report the motion.

The senior assistant legislative clerk read as follows:

The Senator from Kentucky [Mr. McCONNELL] moves to refer the House message to accompany H.R. 1892 to the Committee on Appropriations to report back forthwith with instructions, being amendment numbered 1932.

The amendment is as follows:

At the end add the following.

“This Act shall take effect 2 days after the date of enactment.”

Mr. McCONNELL. I ask for the yeas and nays on my motion.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The yeas and nays were ordered.

AMENDMENT NO. 1933

Mr. McCONNELL. Mr. President, I have an amendment to the instructions.

The PRESIDING OFFICER. The clerk will report.

The senior assistant legislative clerk read as follows:

The Senator from Kentucky [Mr. McCONNELL] proposes an amendment numbered 1933 to the instructions of the motion to refer H.R. 1892.

Mr. McCONNELL. I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike “2” and insert “3”

Mr. McCONNELL. I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There appears to be a sufficient second.

The yeas and nays were ordered.

AMENDMENT NO. 1934 TO AMENDMENT NO. 1933

Mr. McCONNELL. Mr. President, I have a second-degree amendment at the desk.

The PRESIDING OFFICER. The clerk will report.

The senior assistant legislative clerk read as follows:

The Senator from Kentucky [Mr. McCONNELL] proposes an amendment numbered 1934 to amendment No. 1933.

Mr. McCONNELL. I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike “3 days” and insert “4 days”

Mr. McCONNELL. I ask unanimous consent that the mandatory quorum call be waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### MORNING BUSINESS

Mr. McCONNELL. Mr. President, I ask unanimous consent that the Senate be in a period of morning business, with Senators permitted to speak therein for up to 10 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

#### OFFSHORE OIL AND GAS DRILLING

Ms. COLLINS. Mr. President, I wish to join my colleagues in expressing my serious concern with the 5-year oil and gas leasing plan released by the Interior Department that proposes opening up vast portions of U.S. waters for possible oil exploration and development, including along the Atlantic seaboard and the coast of Maine.

I am opposed to any effort to open waters off the coast of Maine or any proximate area to offshore drilling, which could negatively affect the health of Maine’s fisheries and other coastal resources, threatening to harm not only the environment but the State’s economy as well. The Maine lobster industry, for example, has an estimated \$1.7 billion impact to the State’s economy annually, not to mention the many other fishing, aquaculture, and coastal tourism industries that help to drive the State’s economy. These critical industries are dependent on Maine’s pristine waters, and even a minor spill could damage irreparably the ecosystem in the gulf of Maine and create serious economic disruption.

I look forward to working with the administration to ensure that the Interior Department’s plan is revised to pose no unnecessary threats to the economy and way of life in coastal Maine.

#### DARPA’S 60TH ANNIVERSARY

Mr. REED. Mr. President, today I pay tribute to DARPA, the Defense Advanced Research Projects Agency, on the 60th anniversary of its inception. After the Soviet Union launched Sputnik I, President Eisenhower determined that the United States would never again be caught off guard by technological surprise. DARPA was established to anticipate new technological capabilities and pursue strategic technological surprise for our military forces.

DARPA works collaboratively with academic institutions, corporate and government R&D labs, and small business enterprise. While the primary

focus is to discover fundamental new concepts that lead to breakthrough technologies for national security, many of DARPA’s advances also benefit greater society. Some well-known examples include precision-guided weapons systems with miniaturized GPS components also found on many consumer products; the internet, used initially to link DARPA with performer partners, now widely used in commerce and every aspect of our lives; advanced antenna systems enabling more efficient warfighter communications and satellite signal reception for consumers; new breakthroughs in robotic technology for national security applications and the development of advanced prosthetic arms for wounded warriors and civilians alike. The list goes on.

By not accepting the parameters of what is widely accepted as the known possible, DARPA has proven that amazing achievements can be had by stretching to reach for what was once deemed impossible. In the realm of national defense, DARPA has pursued new systems, including unmanned aerial and underwater vehicles, hypersonic flight research, and new frontiers in biomedical research. From the giant engines of the Saturn V rocket that took Americans to the Moon to the smallest microelectronics that populate our smartphones, DARPA has been ahead of the cutting edge of technological innovation.

By focusing its efforts at the boundaries of fundamental research in physics, chemistry, biology, mathematics, materials science, electronics, and engineering, DARPA has helped create new communities of scientists and engineers, both inside and beyond the traditional defense community. Along the way, new businesses and sometimes entire industries have sprung from DARPA-funded research, reflecting the Agency’s commitment to pursue its ideas all the way from initial concept to demonstration of practical feasibility through prototype development.

DARPA programs are led by program managers who come from universities, industry, national laboratories, and other parts of government for limited postings that typically last 3 to 5 years—a time limit that helps drive the Agency’s signature sense of urgency. Recognizing that some revolutionary goals inevitably prove unachievable, DARPA carefully manages risk by establishing appropriate milestone procedures and redirecting or discontinuing programs when further advancement stalls.

I congratulate DARPA for its many achievements over the past 60 years. The true assets that enable this kind of achievement are the men and women who work to make the visions of tomorrow become today’s reality.

As DARPA moves into the future, I encourage my colleagues to join with me in recognizing this milestone and
