

church and community events. Pleasant Hope is not just a building, but it is a body of Baptized Believers whose facility is being used by God as a gateway for glorifying and praising the Lord.

Mr. Speaker, I ask my colleagues to join me in recognizing Pleasant Hope Missionary Baptist Church for its dedication for serving our great people.

CONGRATULATING UT  
SOUTHWESTERN MEDICAL CENTER

**HON. EDDIE BERNICE JOHNSON**

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 4, 2018*

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Speaker, I rise today to praise UT Southwestern Medical Center, which has retained its status as the top hospital in the Dallas-Fort Worth area.

U.S. News & World Report annually reviews the best hospitals in the U.S. The publication analyzes data from nearly 5,000 medical centers and survey responses from more than 30,000 physicians to rank hospitals in 16 adult specialties.

As UT Southwestern celebrates its 75th anniversary, they have been recognized as the top hospital in the Dallas-Fort Worth area, the second best in Texas and nationally ranked in seven specialties, including Geriatrics, Neurology & Neurosurgery, Diabetes & Endocrinology, Nephrology, Urology, Pulmonology, and Orthopedics.

Nationally, only 158 hospitals ranked in at least one of the specialties in 2018–19.

U.S. News & World Report also gave UT Southwestern high-performing ratings in the areas of cancer, cardiology and heart surgery, gastroenterology and GI surgery, and ophthalmology, as well as for procedures for abdominal aortic aneurysm repair, heart failure, colon cancer surgery, lung cancer surgery, and chronic obstructive pulmonary disease. UT Southwestern received excellent ratings for patient satisfaction for all nine categories of procedures reviewed.

Recognition comes as UT Southwestern continues to expand access to its distinctive academic medicine through new facilities and partnerships that find innovative approaches to improving efficiencies and lowering the overall costs of care.

UT Southwestern is expanding to meet the needs of North Texas by adding 300 new beds to the existing 460, making it among the largest medical facilities in the nation. In addition, scheduled to open in 2020, a 12-story, third tower will serve as a clinical home for neurological care, consolidated acute inpatient care services, additional operating rooms, interventional suites, expanded Emergency Department care, and two new parking structures.

Earlier this year, U.S. News & World Report ranked UT Southwestern Medical School as one of the top 20 medical schools for primary care and the top 30 for research in the United States. Among medical specialties, UT Southwestern nationally ranked 14th among internal medicine programs and 18th among obstetrics and gynecology programs.

In addition, UT Southwestern's residency program for Internal Medicine was ranked 8th in the nation by Doximity's 2018–2019 Residency Navigator. UT Southwestern Graduate School of Biomedical Sciences ranked 18th in the nation among graduate schools for biological sciences and 41st for chemistry, according to U.S. News & World Report. In Chemistry, UT Southwestern ranked 13th for biochemistry.

UT Southwestern ranked No. 1 in the world among peer institutions in the "healthcare" research category on the Nature Index 2018 Annual Tables, which evaluates publication of high-quality research. UT Southwestern also ranks fifth in the world in the number of published research articles cited as significant sources in third-party patent applications, used to evaluate an institution's impact and influence on industrial innovation—how a scientific discovery leads to, or plays a part in, the development and commercialization of new products and services.

UT Southwestern is one of the premier academic medical centers in the nation. The facility integrates pioneering biomedical research with exceptional clinical care and education. The institution's faculty has received six Nobel Prizes, and includes 22 members of the National Academy of Sciences, 16 members of the National Academy of Medicine, and 15 Howard Hughes Medical Institute Investigators. The faculty of more than 2,700 is responsible for groundbreaking medical advances and is committed to translating science-driven research quickly to new clinical treatments. UT Southwestern physicians provide care in about 80 specialties to more than 100,000 hospitalized patients, 600,000 emergency room cases, and oversee approximately 2.2 million outpatient visits a year.

It is my honor to share the successes of UT Southwestern and my privilege to congratulate them on earning this prestigious recognition.

RECOGNIZING MR. KYLE ENG

**HON. JACKY ROSEN**

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 4, 2018*

Ms. ROSEN. Mr. Speaker, I rise today to honor the life of Officer Kyle Eng, a longtime Las Vegas resident and devoted family man.

Kyle was a beloved father to his three daughters and husband to Arlyn Eng. He was known for his love of sports and dedication to his family.

Kyle worked as a truck driver for a Las Vegas dairy company for over 20 years. During that span, he was known as an extremely reliable manager and hard worker and was said to never have missed a day of work. At the age of 50, Kyle decided to leave his job and pursue his lifelong dream of becoming a police officer. Kyle wanted to prove to his children and grandchildren that it's never too late to chase your dream.

Through his perseverance and determination, Kyle successfully became a Corrections Officer for the City of Las Vegas. Kyle's cheerful spirit, his caring nature, and his persistence to live out his dreams will always be celebrated and remembered by his family and loved ones.

URGING FOR RELEASE OF MICHAEL PHUONG MINH NGUYEN FROM DETENTION IN VIETNAM

**HON. ZOE LOFGREN**

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 4, 2018*

Ms. LOFGREN. Mr. Speaker, I rise today to urge our government to use all of its available resources to ensure the safe and timely release of United States citizen Michael Phuong Minh Nguyen from detention in Vietnam.

Michael was captured by Vietnamese authorities on July 7th while touring Vietnam and visiting elderly relatives. He is being investigated for "engaging in activity against the People's Government" and is being held at the Phan Dang Luu Detention Center in the Binh Thanh District of Ho Chi Minh City.

Despite having been detained for almost a month, the Vietnamese communist government has not brought any formal charges against Michael. He has only been allowed to visit with the United States Consulate once and has not been allowed to communicate at all with his family and friends. The Vietnamese government may continue its investigation for several months, during which time Michael will have limited due process rights, including limited communication privileges, according to Vietnam's laws.

Michael's wife, Helen, wrote to me from our home state of California where she and Michael have raised four children, to ask for assistance with her husband's case. In her letter to me, Helen said: "Our biggest concern is that without representation, the Vietnamese government will continue to hold him without probable cause, assess bogus and unwarranted charges, resulting in serious ramifications."

The government of Vietnam has a history of arbitrarily detaining those who have peacefully exercised their legal rights and has been cracking down even harder, recently, with longer sentences. Michael Nguyen's case is a disturbing example of this, but this time the Vietnamese authorities have detained and captured one of our own citizens. As a beacon of freedom and democracy, we cannot let such arbitrary detention of one of our own citizens to stand.

I join my colleagues, who have also called for Michael Nguyen's release, in urging our government to make Michael Nguyen's release a priority and ensure his safe return home to the United States.

PERSONAL EXPLANATION

**HON. MIKE BOST**

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Tuesday, September 4, 2018*

Mr. BOST. Mr. Speaker, had I been present, I would have voted YEA on Roll Call No. 378 and YEA on Roll Call No. 379.
