PETITIONS AND MEMORIALS

The following petition or memorial was laid before the Senate and was referred or ordered to lie on the table as indicated:

POM-303. A joint resolution adopted by the Legislature of the State of California urging the President of the United States and the United States Congress to work together to implement grid hardening measures and to help ensure our nation's critical electrical infrastructure is protected from threats from electromagnetic pulses and physical attacks on the infrastructure; to the Committee on Energy and Natural Resources.

SENATE JOINT RESOLUTION NO. 20

Whereas, Geomagnetic storms are natural phenomena involving disturbances in the earth's geomagnetic field caused by solar activity; and

Whereas, Disruptions of electrical power caused by geomagnetic storms, such as the collapse of the Hydro-Quebec grid during the geomagnetic storm of 1989, have occurred many times in the past; and

Whereas, The congressionally mandated Commission to Assess the Threat to the United States from Electromagnetic Pulse Attack found, in its report delivered in July of 2004, that an enemy using a low-yield nuclear weapon detonated at a high altitude above the United States could carry out an electromagnetic pulse (EMP) attack against the United States, and that an EMP attack has the potential to place our society at risk and to defeat the Armed Forces of the United States; and

Whereas, Congress has commissioned numerous other hearings and reports on this issue, including the House of Representatives National Security Committee hearing on the EMP threat in 1997, the House of Representatives Military Research and Development Subcommittee hearing on the threat to the United States of potential EMP attacks in 1999, the creation of the Commission to Assess the Threat to the United States from Electromagnetic Pulse Attack in 2001, the congressional commission report, "Critical National Infrastructures," issued in 2008, the United States Navy Naval Sea Systems Command EMP program in 2010, the North American Electric Reliability Corporation/federal Department of Energy report, "High-Impact, Low-Frequency Event Risk to the North American Bulk Power System," issued in 2010, and the federal Department of Home-

land Security testimony to the House of Representatives Committee on Homeland Security, "The Electromagnetic Pulse (EMP) Threat: Examining the Consequences," in 2012; and

Whereas, In April 2013, an electrical substation in San Jose, California, was attacked with gunfire, leaving transformers disabled for nearly four weeks in an apparent attempt to disrupt power to Silicon Valley, raising questions about the vulnerability of power grids across the United States; now, therefore, be it

Resolved by the Senate and the Assembly of the State of California, jointly, That the Legislature urges the President and the Congress of the United States to work together to implement grid hardening measures and to help ensure our nation's critical electrical infrastructure is protected from threats from electromagnetic pulses and physical attacks on the infrastructure; and be it further

Resolved, That the Secretary of the Senate transmit copies of this resolution to the President and the Vice President of the United States, to the Speaker of the House of Representatives, to the Majority Leader of the Senate, and to each Senator and Representative from California in the Congress of the United States.
