SUMMARY AND PURPOSE OF LEGISLATION

H.R. 5925, the Coordinated Response through Interagency Strategy and Information Sharing Act, or the CRISIS Act, reauthorizes the Office of National Drug Control Policy (the Office) and changes the name of the Office to the Office of National Drug Control, to reflect the fact the Office’s responsibilities extend beyond policy-making. The bill adds a new chapter 10 to title 31, United States Code. The new chapter 10 establishes and details the Office’s responsibilities and authorities, which are based on the previous authorizing statute. Chapter 10 also reauthorizes and codifies the High Intensity Drug Trafficking Areas Program and the Drug-Free Communities Support Program and directs the Office to issue an Opioid Response Plan not later than 60 days after enactment.

BACKGROUND AND NEED FOR LEGISLATION

Thirty years ago, the Anti-drug Abuse Act of 1988 established the Office to set the Nation’s drug control policy and priorities and to coordinate and oversee government-wide implementation of the National Drug Control Program.¹ The unified drug control policy and the Office’s coordinating role are critical to ensure federal drug control efforts are effective and to prevent unnecessary duplication and waste. The National Drug Control Program includes nearly 40 designated executive departments, agencies, or components; elements of the Judicial branch; and at least 130 distinct programs.² The President’s fiscal year 2019 budget requests \$29.9 billion for the drug control efforts of National Drug Control Program agencies.³

The objectives of the National Drug Control Program generally focus on reducing the supply of, and demand for, illicit drugs, and cover a spectrum of activities, including prevention, treatment, interdiction, domestic law enforcement, and international coordination.

SUBSTANCE USE DISORDER EPIDEMIC

In December 2017, the Centers for Disease Control and Prevention (CDC) reported life expectancy in the United States dropped for the second year in a row, primarily due to drug overdoses.⁴ The CDC also reported that in 2016, nearly 64,000 Americans died from drug overdoses⁵—a figure that rivals the peak death figures from

HIV/AIDS in the mid-1990s.⁶ The Department of Health and Human Services estimates more than 20 million adults in the United States have substance use disorders.⁷ The availability of evidence-based treatment is critically important to addressing this epidemic, but a wide treatment gap exists. According to the President’s Commission on Combating Drug Addiction and the Opioid Crisis (the President’s Commission), “[t]oday, only 10.6% of youth and adults who need treatment for a substance use disorder receive that treatment.”⁸

Opioids—prescription and illicit—are a leading contributor to the increase in drug overdose deaths in the United States. Opioids are a class of drugs that includes hydrocodone, oxycodone, heroin, and synthetic analogs such as fentanyl.⁹ Opioids are most often prescribed to relieve or manage pain. Opioids have also been heavily marketed by pharmaceutical companies and are highly addictive.¹⁰ A dramatic increase in the prescription rates for opioids in recent years has contributed to unprecedented levels of dependency and misuse.¹¹ According to the President’s Commission, “sales of prescription opioids in the U.S. nearly quadrupled from 1999 to 2014.”¹²

As the medical community has become more aware of the dangers of prescription opioids and has begun altering prescribing practices, there has been a dramatic increase in the use of non-prescription opioids, which are less expensive and easier to obtain.¹³ For example, since 2010, heroin-related overdose deaths have increased fivefold.¹⁴ Synthetic opioids like fentanyl, which is 30 to 50 times more potent than heroin,¹⁵ accounted for more than 20,000 overdose deaths in 2016.¹⁶

The opioid crisis in the United States appears to be worsening. Every day, 175 Americans die from a drug overdose, 115 of which are from opioids.¹⁷ In 2016, 2.1 million Americans had an opioid use disorder and 42,249 Americans died from overdosing on

opioids.¹⁸ According to the CDC, from July 2016 through September 2017, emergency room visits “for suspected opioid overdoses” increased 30 percent in the United States.¹⁹ During that period, emergency room visits due to opioid overdoses increased “for men and women, all age groups, and all regions.”²⁰ Dr. Anand Parekh, Chief Medical Advisor for the Bipartisan Policy Center, testified before the Committee, “this crisis, 20 years in the making, will get worse before it gets better.”²¹

The Administration’s Response: A Public Health Emergency and the President’s Commission on Combatting Drug Addiction and the Opioid Crisis

On October 26, 2017, the President directed the Administration to declare a public health emergency to address the growing opioid epidemic.²²

On March 29, 2017, the President issued Executive Order 13784, establishing the President’s Commission on Combating Drug Addiction and the Opioid Crisis. The President charged the Commission with studying the scope and effectiveness of the federal response to drug addiction and the opioid crisis, and making recommendations to improve the federal response.²³ The Office of National Drug Control Policy was responsible for facilitating the work of the Commission, providing administrative support, and ensuring compliance with the *Federal Advisory Committee Act*.²⁴ Chaired by former New Jersey Governor Chris Christie, the Commission held multiple meetings and received testimony from numerous witnesses.²⁵

The Commission issued an interim report containing 9 recommendations and a final report containing 56 recommendations to address the opioid crisis.²⁶ Governor Christie testified to the Committee on November 28, 2017, that the recommendations from both the draft and final reports “should be read together” and constitute the full set of recommendations from the Commission.²⁷ H.R. 5925 addresses findings and recommendations from the Commission’s report by: (1) improving data access, collection, standardization, and requiring ONDCP to use this data to monitor, inform, evaluate, and address the crisis; (2) enhancing coordination efforts among and between states, federal agencies, private sector entities, and nonprofit organizations; and (3) strengthening capacity for

oversight, tracking, and evidence-based decision making in the use of federal resources to combat the opioid epidemic.

THE OFFICE'S ROLE IN THE NATION'S DRUG CONTROL EFFORTS AND ACTIVITIES

Over the last 30 years, the Office has operated under a number of authorizing and appropriating laws. Until 2010, the Director of the Office—often informally referred to as the nation's "Drug Czar"—served on the President's cabinet. The Office's most recent authorization expired in 2010, and annual funding for the Office began to decline from more than \$29.5 million in fiscal year 2010 to \$18.4 million in fiscal year 2018.²⁸

H.R. 5925 reaffirms the role of the Office by increasing its prominence and strengthening its coordinating roles and responsibilities. Prior authorizations, though well intended, have been layered one on top of the other in the statutes at large, creating ambiguity as to the state of current law.²⁹ H.R. 5925 places the Office's authorizing law into the U.S. Code, creating a new chapter 10 in title 31. Putting the office in title 31 places the Office on level ground with the Office of Management and Budget (OMB).

Office structure

Prior authorizations established an Office led by a Director and four deputy directors, including a principal deputy director, a deputy director for demand reduction, a deputy director for supply reduction, and a deputy director for state, local, and tribal affairs. H.R. 5925 aims to respond to the nation's growing drug crisis by strengthening government-wide coordination across agencies working on supply and demand reduction at the federal, state, local, and tribal levels. To that end, H.R. 5925 restructures the Office by reducing the number of deputy directors from four to one.

H.R. 5925 also aims to decrease the potential for the emergence of "silos" within the Office, while ensuring necessary responsibility for, and attention to, the priority objectives of national drug control efforts. The bill creates four new coordinator positions, including: (1) a performance-budget coordinator; (2) an emerging threats coordinator; (3) a state, local and tribal affairs coordinator; and (4) a treatment coordinator. The bill retains the interdiction coordinator position established in the 2006 reauthorization to coordinate interdiction activities under the National Interdiction Command and Control Plan.³⁰ The bill creates a new treatment coordinator to coordinate efforts to expand the availability of evidence-based substance use disorder treatment. The shift from deputy directors to coordinators creates more flexibility in the Office's organizational

²⁹According to the Office of Law Revision Counsel, "A positive law title of the Code is itself a Federal statute. A non-positive law title of the Code is an editorial compilation of Federal statutes." Because of this distinction, non-positive law titles may not reflect the exact letter of the law. For example, section 103(f) of the 2006 reauthorization, which created the role of the Interdiction Coordinator appears intended to replace the prior section 711 of the 1998 reauthorization, which required an interdiction budget, but the 2006 law directed the amendment of section 711 by "by adding at the end" a new section 711. Pub. L. 109–469, 120 Stat. 3507. The Office of Law Revision Counsel's editorial compilation reflects the likely intent of the law, which is to replace the 1998 section 711, but not the actual law, which is to add at the end of section 711. structure while ensuring the Office's activities and resources are focused on key priorities.

National Drug Control Strategy

The Office establishes national drug control policy primarily through the issuance of an annual National Drug Control Strategy (Strategy). The Strategy sets forth goals and performance measures for the National Drug Control Program agencies (NDCP agencies). The Strategy also communicates and reflects national drug control policy developed in coordination with state, local, and tribal governments.

To ensure the Strategy remains current while reducing the sometimes unnecessary burden of annual reconsideration, H.R. 5925 requires the Strategy to be promulgated quadrennially instead of annually. H.R. 5925 does not require the issuance of the Strategy until the second year of a new Presidential term, but requires the Office to issue a policy statement during the first year of a Presidential term. The policy statement is not required to provide the level of detail required of the Strategy. H.R. 5925 retains the requirement to update performance metrics annually, which will enable the Office to more precisely measure progress toward achieving the Strategy's goals and adjust performance targets and indicators appropriately.

National Drug Control Budget

Since 1988, the Office has been responsible for reviewing the budget requests for each NDCP agency to ensure requested funding is adequate to achieve the goals of the Strategy.³¹ The annual cycle is as follows:

1. The Office submits suggested budget requests to each NDCP agency by July 1 of each year;
2. NDCP agencies submit proposed drug control budgets to the Director prior to submission to OMB;
3. The Director determines whether the proposed budget request is adequate to meet the goals of the Strategy and offers recommendations if such proposed budget request is inadequate;
4. NDCP agencies must revise any inadequate budget requests prior to submitting them to OMB;
5. NDCP agencies submit final budget requests to OMB and the Director;
6. The Director conducts a final review of each request submitted to OMB and may decertify budgets that are inadequate to achieve the goals of the Strategy; and
7. The Director submits a consolidated National Drug Control Budget to the President and Congress.

H.R. 5925 strengthens oversight of the budget resources of NDCP agencies by requiring the Office to provide an affirmative statement as to whether each agency's budgetary resources will be sufficient to enable it to meet the goals of the Strategy. The Office then must submit a consolidated budget that indicates the level of funding requested for each agency and a determination of whether the funding level is fully sufficient, partially sufficient, or insufficient

³¹ 21 U.S.C. 1703(c).

to enable the agency to achieve the goals of the Strategy, with a proposal for any additional funding needed to fund the Strategy fully.

Education and Public Awareness Campaign

The President’s Commission recommended a national media campaign as an important initiative to address the opioid epidemic. The Commission recommended the Administration “fund and collaborate with private sector and non-profit partners to design and implement a wide-reaching, national multi-platform media campaign addressing the hazards of substance use, the danger of opioids, and stigma.”³²

H.R. 5925 requires the Office to establish and implement an education campaign focused on preventing substance misuse and raising public awareness of any drug designated as an emerging threat. H.R. 5925 designates opioids as an emerging threat, triggering the requirement for the Office to plan and implement a national evidence-based campaign to educate the public about the hazards of opioids and the availability of substance use disorder treatment. The education and public awareness campaign replaces the previously authorized media campaign—the 1998 National Youth Anti-Drug Media Campaign—which focused on preventing drug use among youth.

While the prior campaign was authorized for \$210 million for fiscal years 2010 and 2011,³³ H.R. 5925 authorizes \$25 million for carrying out the education and public awareness campaign to respond to emerging threats. The authorization covers the range of activities needed to support an effective campaign, including monitoring for emerging threats, developing and implementing the broader emerging threats plan, and ensuring sufficient data sharing and coordination to fulfill the functions of section 1009. The authorization is substantially lower than the previous authorization because the creation of new platforms, such as social media, has enabled information-sharing at a lower cost than traditional media.³⁴

H.R. 5925 expressly requires the Director to ensure the media campaign is modeled on strategies proven to be effective. According to the President’s Commission, “Mass-media campaigns are one of the primary universal prevention strategies for delivering educational messages on health promotion to youth and adults.”³⁵ However, the Commission’s report also stated, “for a mass-media campaign to be effective, it is critical to develop coherent, credible, evidence based-messages that are grounded in behavioral science.”³⁶ The report cites the 1998 National Youth Anti-Drug Media Campaign as an example of an ineffective campaign.³⁷ The media campaign authorized in 2006 was more effective than the

1998 campaign, but it too was found not to have fully achieved its objectives.

Given the lessons learned from prior campaigns and the urgent need for effective solutions in the face of the ongoing opioid epidemic, H.R. 5925 requires the Office to adopt an evidence-based approach at the onset of the Education and Public Awareness Campaign.

Opioid Plan

H.R. 5925 requires the Office to issue a National Opioid Crisis Response Plan (Opioid Plan) within 60 days of the date of enactment to guide efforts to combat the opioid crisis. H.R. 5925 requires the Director to ensure the Opioid Plan addresses several recommendations made by the President's Commission. For example, H.R. 5925 requires the Opioid Plan to provide for the creation of working groups consisting of appropriate stakeholders to support better use of Prescription Drug Monitoring Programs (PDMPs) by improving data sharing, increasing utilization of PDMPs, and supporting the incorporation of available overdose and naloxone deployment data.

The Opioid Plan must include an evaluation of the benefits of drug courts and similar programs, such as pre-trial diversion and reentry programs that have shown promise at ending the cycle of addiction. The Opioid Plan must encourage NDCP agencies and states, through the Model Acts program, to develop sentencing standards or model codes on opioid analog trafficking and advise states on establishing policies based on the President's Commission recommendations.

The Opioid Plan takes an important step to helping ensure that substance use disorder treatments are effective by requiring the establishment of an Advisory Committee on Substance Use Disorder Treatment Standards not later than 120 days after the issuance of the Opioid Plan to promulgate voluntary model evidence-based standards for substance use disorder treatment and recovery facilities. The amendment leaves the Advisory Committee flexibility on which standards to address but such standards could include licensure of treatment programs, credentialing of treatment professionals, and the prevention of patient brokering and fee splitting arrangements between treatment and recovery residence programs, by the appropriate organizations or agencies and at the appropriate level of government.

Nothing in H.R. 5925 prohibits or reduces access to behavior recovery treatment. Evidence-based behavioral recovery treatment, including faith-based programs and treatment, plays an important role in combating substance use disorder. While medication assisted treatment provides an important pathway to recovery, behavioral recovery treatment groups can be important components of long-term, sustained recovery.³⁸ This includes Substance Abuse and Mental Health Services Administration (SAMHSA) list group programs such as Alcoholics Anonymous and other peer-support

³⁸R. Kathryn McHugh et al, *Cognitive-Behavioral Therapy for Substance Use Disorders*, 33 PSYCHIATRIC CLINICS OF N. AM. 511 (2010).

and faith-based, self-help, and group-based addiction recovery support solutions.³⁹

The Office's increased role in information sharing

Many of the Commission's recommendations called for improving the collection, standardization, and dissemination of information. For example, the Commission recommended "a federal effort to strengthen data collection activities enabling real-time surveillance of the opioid crisis at the national, state, local, and tribal levels."⁴⁰

The Government Accountability Office (GAO) also highlighted the need for the Office to strengthen information sharing initiatives in a report issued in March 2018.⁴¹ The report stated, "embarking on a concerted effort to examine and address data related concerns, such as timeliness and accuracy, will allow law enforcement and public health agencies to better share information as they continue to understand and respond to the opioid epidemic."⁴²

GAO recommended the Director, "in collaboration with law enforcement and public health counterparts, lead a review on ways to improve the timeliness, accuracy, and accessibility of fatal and non-fatal overdose data from law enforcement and public health sources that provide critical information to understand and respond to the opioid epidemic."⁴³

H.R. 5925 requires the Director to designate an agency to establish and operate a fusion center—which shall be a federal statistical agency—to work with NDCP agencies to facilitate the sharing of information on the use of illicit drugs, treatment for substance use disorders, and interdiction of illicit drugs.

H.R. 5925 improves the availability of timely data on supply of and demand for illicit drugs by requiring the Office to create a "data dashboard" to provide basic data—updated at least quarterly—on the flows of illicit drugs and on drug use trends, including fatal and nonfatal overdoses. The Office is also required to develop a systematic plan to increase the collection of data to enable real-time tracking of drug trends.

H.R. 5925 authorizes a toxicology screening program to obtain information on trends in the prevalence of drug use by collecting and analyzing urine and other samples that are not identifiable to the individual and otherwise would have been discarded by hospitals, correctional facilities, booking sites, probation programs, drug courts, and coroners and medical examiners. The Office must consider existing resources, expertise, and capabilities when designating an agency to house the fusion center, with an eye toward limiting additional costs and burdens associated with establishing and operating the center. The authorization for the fusion center includes important privacy protections regarding anonymization and use of data obtained through the toxicology screening program.

H.R. 5925 requires the Director to establish a working group of federal agencies and state, local, and tribal government health and law enforcement agencies, data experts, and other stakeholders to

GRANT PROGRAMS ADMINISTERED THROUGH THE OFFICE

The Office currently administers two grant programs aimed at reducing illicit drug use and availability at the local level—the Drug Free Communities (DFC) program and the High Intensity Drug Trafficking Areas (HIDTA) program. The DFC program awards grants to community coalitions to prevent substance use among adolescents through community collaboration and organization.⁴⁴ The HIDTA program coordinates federal, state, and local law enforcement efforts to identify and dismantle drug trafficking operations specific to each regionally-designated HIDTA area.⁴⁵ Both programs allow grantees to tailor programs to meet the unique needs of their communities.

Congress has repeatedly expressed its intent for the Office to retain responsibility for administering the DFC and HIDTA programs. The Committee reaffirms this longstanding position by reauthorizing the programs with only minor—primarily technical—changes to previously enacted authorizing law. Each program is authorized to receive appropriated funding to carry out those programs at funding levels established in the FY 2018 Consolidated Appropriations Act.⁴⁶ The Office’s role as a grant administrator is further clarified in new section 1002 as one of the seven principal responsibilities of the Office.

STATEMENT OF OVERSIGHT FINDINGS AND RECOMMENDATIONS OF THE COMMITTEE

In compliance with clause 3(c)(1) of rule XIII and clause (2)(b)(1) of rule X of the Rules of the House of Representatives, the Committee’s oversight findings and recommendations are reflected in the previous section.

STATEMENT OF GENERAL PERFORMANCE GOALS AND OBJECTIVES

In accordance with clause 3(c)(4) of rule XIII of the Rules of the House of Representatives, the Committee’s performance goal or objective of this bill is to codify provisions relating to the Office of National Drug Control.

LEGISLATIVE HISTORY

H.R. 5925 is the product of a thorough examination during the 115th Congress by the Committee on Oversight and Government Reform, the Subcommittee on Government Operations, and the Subcommittee on Healthcare, Benefits, and Administrative Rules. The Committee held a series of hearings to examine reauthorizing the Office and to explore options for more effectively combatting the opioid epidemic.

On July 26, 2017, the Committee held a hearing titled, “Office of National Drug Control Policy: Reauthorization in the 115th Con-

⁴⁴ *Office of Nat’l Drug Control Policy, Grants & Programs*, <https://www.whitehouse.gov/ondcp/grants-programs/> (last visited Apr. 3, 2018).

gress.” The hearing examined options for reauthorizing the Office and discussed the Office’s effort to coordinate drug control policy and spending across the federal government.

On November 28, 2017, the Committee held a field hearing titled, “Combating the Opioid Crisis.” The field hearing was at Johns Hopkins Hospital in Baltimore and discussed findings and recommendations from the President’s Commission.

On April 11, 2018, the Subcommittee on Healthcare, Benefits, and Administrative Rules held a hearing titled, “Local Responses and Resources to Curtail the Opioid Epidemic.” The hearing examined how federal grant programs have assisted state and local communities and explored ways the federal government can effectively assist states in combating the opioid epidemic.

On May 9, 2018, the Committee hosted a roundtable discussion with ONDCP officials to discuss options for empowering the Office to more effectively direct efforts to end the opioid crisis.

On May 17, 2018, the Committee held a hearing titled, “A Sustainable Solution to the Evolving Opioid Crisis: Revitalizing the Office of National Drug Control Policy.” The hearing examined policy proposals for reauthorizing the Office and discussed how evidence-based policymaking and information sharing can be used to identify and respond to emerging drug trends.

Committee staff also conducted field work to inform H.R. 5925. In March 2018, Committee staff traveled to China to investigate the trafficking of illicit fentanyl through the U.S. Postal Service. Staff reviewed the roles of the Department of Homeland Security, the intelligence community, and the U.S. Postal Service to identify opportunities for better coordination and information sharing.

On March 23, 2018, Committee staff conducted a site visit to a newly designated High Intensity Drug Trafficking Area initiative in Greenville, South Carolina within the Atlanta-Carolinas HIDTA region and held a roundtable discussion. Staff met with federal and state law enforcement officials who highlighted the collaborative nature of the HIDTA program and discussed recent accomplishments in disrupting local drug trafficking organizations. For example, during one operation last year, HIDTA participants arrested 40 individuals, seized more than \$1 million, and confiscated 44 kilograms of crystal methamphetamine, 2.6 kilograms of cocaine, and 370 grams of heroin.

On May 23, 2018, Chairman Trey Gowdy (R–SC) introduced H.R. 5925, the Coordinated Response through Interagency Strategy and Information Sharing (CRISIS) Act, with Ranking Member Elijah Cummings (D–MD), Subcommittee on Government Operations Chairman Mark Meadows (R–NC), and Subcommittee on Government Operations Ranking Member Gerald Connolly (D–VA). H.R. 5925 was referred to the Committee on Oversight and Government Reform, with additional referrals to the Committees on Energy and Commerce, Foreign Affairs, the Judiciary, Intelligence (Permanent Select), and Appropriations.

COMMITTEE CONSIDERATION

On May 23, 2018, the Committee met in open session and, with a quorum being present, ordered the bill favorably reported, as amended, by voice vote.

ROLL CALL VOTES

There were no roll call votes requested or conducted during Committee consideration of H.R. 5925.

EXPLANATION OF AMENDMENTS

During Committee consideration of the bill, Representative Elijah Cummings (D–MD), the Ranking Member of the Committee, offered an amendment to add the director of the fusion center to the membership of the emerging threats task force, clarify the emerging threats plan and information sharing requirements to include substance use disorder treatment, and clarify the treatment coordinator section of the bill. The amendment also introduces a new requirement to convene an advisory committee to promulgate standards for substance abuse disorder treatment and recovery facilities. The Cummings amendment was adopted by voice vote.

Representative Stephen Lynch (D–MA) offered an amendment to require the President to notify Congress if the President has not issued the National Drug Control Strategy by the due date. The amendment also requires the President or a designee to appear before the Committee on Oversight and Government Reform of the House of Representatives and the Committee on the Judiciary of the Senate at a hearing not later than the first Monday in March following the failure of the President to submit the Strategy. Representative Gary Palmer (R–AL) offered an amendment to the amendment offered by Representative Lynch to strike the requirement for the President or a designee to appear at a hearing before the first Monday in March following the failure of the President to submit a Strategy, as this requirement is not necessary in order for either Committee to hold such a hearing. The Palmer amendment to the Lynch amendment was adopted by voice vote. The Lynch amendment, as amended, was adopted by voice vote.

Representative Mark DeSaulnier (D–CA) offered an amendment to require the Government Accountability Office to conduct periodic audits on the Office’s programs and operations. The DeSaulnier amendment was adopted by voice vote.

Representative Paul Mitchell (R–MI) offered an amendment with the support of Representative Jamie Raskin (D–MD) to require the Director to establish a system to track federally funded initiatives and grant programs, establish performance metrics and goals for grant programs, develop a common application form for drug control related grant programs, and maintain a comprehensive list of all drug control program grant award opportunities. The amendment was adopted by voice vote.

Pursuant to the unanimous consent agreement during the business meeting, a correction was made to the authorization of appropriations for the Office of National Drug Control’s administration of the Drug Free Communities program in the reported text of section 1038 of Title 31, United States Code. The adopted version of the amendment in the nature of a substitute authorized “\$99,000,000 for fiscal year [sic] 2019 through 2023.” The corrected version in reported text authorizes that amount “for each of fiscal years 2019 through 2023.”

APPLICATION OF LAW TO THE LEGISLATIVE BRANCH

Section 102(b)(3) of Public Law 104–1 requires a description of the application of this bill to the legislative branch where the bill relates to the terms and conditions of employment or access to public services and accommodations. This bill codifies provisions relating to the Office of National Drug Control, and for other purposes. As such, this bill does not relate to employment or access to public services and accommodations.

DUPLICATION OF FEDERAL PROGRAMS

In accordance with clause 2(c)(5) of rule XIII, H.R. 5925 would reauthorize a program the Government Accountability Office (GAO) previously identified as having potential duplication in 2013. Both areas of potential duplication GAO subsequently reported as having been addressed. Specifically, GAO identified “overlap and potential duplication across the fragmented 76 federal drug abuse prevention and treatment programs,” recommending increased coordination.⁴⁷ GAO reported this was fully addressed as of November 19, 2014.⁴⁸ In addition, GAO identified potential inefficiencies from overlap in analytical and investigative support activities.⁴⁹ GAO reported this was fully addressed as of March 21, 2018.⁵⁰

DISCLOSURE OF DIRECTED RULE MAKINGS

This bill directs the completion of specific rule makings within the meaning of section 551 of title 5, United States Code. Section 1021 of title 31, as added in section 2 of H.R. 5925, codifies section 707 of the Office of National Drug Control Policy Reauthorization Act of 1998 as amended by the Office of National Drug Control Policy Reauthorization Act of 2006, which requires the Director to establish and maintain regulations about the process to petition to be designated as a HIDTA. Section 4(b)(2)(B)(iii) requires the Director to issue guidance to agencies on appropriate revisions of regulations pertaining to prescribing guidelines and continuing education requirements.

FEDERAL ADVISORY COMMITTEE ACT

H.R. 5925 establishes an advisory committee within the definition of Section 5(b) of the appendix to title 5, United States Code. Section 4(b)(2)(K) requires the Director of the Office to establish an advisory committee on substance use disorder treatment standards. There is not currently an existing advisory committee charged with developing evidence-based standards for substance abuse disorder treatment and recovery facilities. The advisory committee must comply with the requirements in the Federal Advisory Committee Act (5 U.S.C. App).

H.R. 5925—CRISIS Act

Summary: H.R. 5925 would authorize appropriations for the operations of the Office of National Drug Control Policy (ONDCP) and change the office's name to the Office of National Drug Control (ONDC). The bill would authorize appropriations for programs administered by that office and for other federal anti-drug programs through 2023. Major programs administered by the office include the High-Intensity Drug Trafficking Areas program, the Drug-Free Communities program, and the Emerging Threats and Media Campaign.

Assuming appropriation of the specified amounts, CBO estimates that implementing H.R. 5925 would cost about \$1.5 billion over the 2019–2023 period. Of that total, \$1.1 billion would result from

amounts specifically authorized for the High-Intensity Drug Trafficking Areas program.

Enacting the bill would affect direct spending because it would allow ONDC to accept and spend monetary gifts; therefore, pay-as-you-go procedures apply. However, CBO estimates that the net effect on direct spending would be negligible. Enacting H.R. 5925 would not affect revenues.

CBO estimates that enacting H.R. 5925 would not significantly increase net direct spending or on-budget deficits in any of the four consecutive 10-year periods beginning in 2029.

H.R. 5925 contains no intergovernmental or private-sector mandates as defined in the Unfunded Mandates Reform Act (UMRA).

Estimated cost to the Federal Government: The estimated budgetary effect of H.R. 5925 is shown in the following table. The costs of the legislation fall within budget functions 750 (administration of justice) and 800 (general government).

Estimated Outlays	129	303	332	346	346	1,457

^a Components may not sum to totals because of rounding.

Basis of estimate: For this estimate, CBO assumes that the bill will be enacted near the end of 2018, that the authorized amounts will be provided each year, and that spending will follow historical patterns for ONDCP and its programs.

The bill would reauthorize all the programs of ONDC through 2023. Although the current authorization for ONDCP expired at the end of fiscal year 2011, the office and related programs received funding through 2018, including about \$415 million in fiscal year 2018. The legislation would authorize the appropriation of specific amounts over the next five years for the following programs:

- High-Intensity Drug Trafficking Areas—\$280 million each year for coordinating drug-control efforts among local, state, and federal law enforcement agencies, CBO estimates that implementing this provision would cost \$1.1 billion over the 2019–2023 period and about \$0.3 billion after 2023;
- Emerging Threats and Media Campaign—\$25 million each year for a media campaign about the emerging threats and other anti-drug messages. CBO estimates that implementing

this provision would cost \$123 million over the 2019–2023 period;

- Drug-Free Communities—\$99 million over the 2019–2023 period for the Drug Free Communities program, which would make grants to community coalitions aimed at reducing substance abuse by young people. Assuming the \$99 million is appropriated equally over the five years, CBO estimates implementing this provision would cost \$98 million over the 2019–2023 period;

- Office of National Drug Control—\$18.4 million each year for operation of the ONDC. CBO estimates providing that appropriation would cost \$86 million over the 2019–2023 period; and

- Other Provisions—\$3.25 million each year for the Model Act Program and the Drug Court Training and Technical Assistance Program. CBO estimates implementing those provisions would cost \$16 million over the 2019–2023 period.

Pay-As-You-Go considerations: The Statutory Pay-As-You-Go Act of 2010 establishes budget-reporting and enforcement procedures for legislation affecting direct spending or revenues. H.R. 5925 would allow ONDC to accept and retain gifts; therefore, pay-as-you-go procedures apply. CBO estimates, however, that any net changes in direct spending would be negligible. Enacting the bill would not affect revenues.

Increase in long-term direct spending and deficits: CBO estimates that enacting H.R. 5925 would not increase net direct spending or on-budget deficits in any of the four consecutive 10-year periods beginning in 2029.

Mandates: H.R. 5925 contains no intergovernmental or private-sector mandates as defined in UMRA.

Estimate prepared by: Federal costs: Matthew Pickford; Mandates: Andrew Laughlin.

Estimate reviewed by: Kim P. Cawley, Chief, Natural Resources Cost Estimate Unit; H. Samuel Papenfuss, Deputy Assistant Director for Budget Analysis.

SECTION-BY-SECTION ANALYSIS

Section 1. Short title

Section 1 provides the short title of the bill, the “Coordinated Response through Interagency Strategy and Information Sharing Act” or the “CRISIS Act.”

Section 2. Office of National Drug Control

This section renames the Office of National Drug Control Policy the Office of National Drug Control and creates a new chapter 10 in Title 31, United States Code, as follows:

SUBCHAPTER I—OFFICE

Section 1001. Definitions

Section 1001 defines the terms used in chapter 10 previously defined in the Office of National Drug Control Policy Reauthorization Act of 1998, as amended (Public Law 105–277; 21 U.S.C. 1701 et seq.) (“prior law”), including amendments to the terms “illicit drug

use,” “illegal drug use,” “demand reduction,” “supply reduction,” “emerging threat,” and “substance use disorder treatment.”

Section 1002. Office of National Drug Control

Section 1002 codifies 21 U.S.C. 1702(a), which established the Office, and expands the Office’s responsibilities to include identifying and responding to illicit drug use emerging threats, administering and evaluating grant programs, and facilitating information sharing and data standardization among federal, state, and local entities.

This section also codifies 21 U.S.C. 1702(b), 1703(a), (b)(1), and (b)(5) with changes to the structure of the office. Those changes include requiring the appointment of a director and deputy director, requiring the director to establish policies and objectives for the National Drug Control Program, and requiring the director to consult with state, local, and Tribal governments, and other relevant entities.

Section 1003. Administration of the office

Section 1003 codifies prior law related to the administration of the office—21 U.S.C. 1702(c), 1703(a)(4)–(5), (d)(1), (3)–(4), (6), (e)(1)–(2), and 1704(c)—and prohibits the use of funds authorized under the chapter for campaigns or ballot initiatives.

Section 1004. National Drug Control Program budget

Section 1004 codifies prior law establishing the National Drug Control Program budget process—21 U.S.C. 1703(b)(8) and (c). In addition, Section 1004 requires a certification or decertification for each National Drug Control Program Agency budget request to Congress with a written justification and suggestion for alternative funding levels that may improve progress on achieving the Strategy for any budget request that does not fully fund the National Drug Control Programs of the agency. It requires the Office concurrently submit budget requests to the appropriate congressional committees when requests are submitted to the Office of Management and Budget or the President.

Section 1005. National Drug Control Strategy

Section 1005 codifies prior law requiring the Director to promulgate a National Drug Control Strategy—21 U.S.C. 1705(a)–(b). The section reduces the frequency from an annual requirement to a quadrennial requirement, and requires the release of a statement of drug priority policies in the first calendar year of a new administration and the release of annual performance plan supplement. A new provision requires the Strategy to be based on the best available evidence and to include a description of the current prevalence of illicit drug use and additional details for each Strategy goal. Additional details for each strategy goal must specify how each goal will be achieved, anticipated challenges, and the data necessary to evaluate performance.

This section incorporates into the National Drug Control Strategy the Southwest Border Strategy (*Office of National Drug Control Policy Reauthorization Act of 2006*, Pub. L. No. 109–469) and the Northern Border Strategy (*Northern Border Counternarcotics Strategy Act of 2010*, Pub. L. No. 111–356).

This section also requires the President to notify the appropriate congressional committees if the President fails to submit a Strategy pursuant to the requirements of this section.

Section 1006. Development of an Annual National Drug Control Assessment

Section 1006 codifies prior law requiring an annual assessment of National Drug Control Program Agencies (21 U.S.C. 1703(b)(13)–(14)), with amendments to expand the contents of the assessment to include an accounting of funds distributed, an evaluation of the effectiveness of grant programs, an evaluation of emerging threat plans, and an accounting of funds obligated for the media campaign. This section codifies prior law by requiring a report on consultation (21 U.S.C. 1703(b)(19)) and a performance measurement system (21 U.S.C. 1705(c)–(d)), which are added as requirements for inclusion in the assessment.

This section also requires the Director to designate or appoint a performance-budget coordinator to ensure the Director has sufficient information on each NDCP agency's performance, funding, and contributions to the achievement of the goals of the Strategy. The performance-budget coordinator is also required to advise the Director on agency budget and performance measures and to carry out other duties needed to assess agencies' budgets and performance.

Section 1007. Monitoring and evaluation of National Drug Control Program

Section 1007 codifies requirements for the Director to monitor the activities and funds expended by National Drug Control Program Agencies to ensure implementation of the Strategy—21 U.S.C. 1703(b)(4), (7), (d)(7), and 1704(d).

This section also requires the Director to establish a coordinated tracking system of federally-funded initiatives and grant programs, to develop a plan to standardize the grant application process, to maintain a list of drug control grant award opportunities on the Office's website, and to report on progress under this section and the feasibility of block grants to states.

Section 1008. Coordination and oversight of the National Drug Control Program

Section 1008 codifies prior law requiring the Director to coordinate and oversee implementation by National Drug Control Program Agencies of the Strategy (21 U.S.C. 1703(b)(3)), requiring National Drug Control Program Agencies to notify the Director regarding any proposed policy changes related to a drug control program (21 U.S.C. 1703(d)(9) and (f)), requiring the Director to work in conjunction with the Assistant to the President for National Security Affairs (21 U.S.C. 1704(b)), and authorizing the Director to temporarily detail employees to other agencies (21 U.S.C. 1703(e)), to transfer funds between agencies (21 U.S.C. 1703(d)(8)), and to issue fund control notices to National Drug Control Program Agencies.

This section also expands the authority of the Director to transfer funds for the purpose of implementing an emerging threats plan

under section 1009 and specifies the purposes for which transferred funds may be used.

Section 1009. Emerging threats taskforce, plan, media campaign

This section requires the Director to appoint an emerging and continuing threats coordinator (the Coordinator) to monitor emerging drug threats in the United States by convening a quarterly taskforce with relevant National Drug Control Program Agencies and state, local, and tribal governments to establish evidence-based criteria to identify emerging threats. This section also allows the Director to designate an emerging drug threat and requires a public written statement of any designation or termination of a designation of an emerging threat.

This section requires the Director to publish an Emerging Threat Response Plan within 60 days of the designation of an emerging threat and to update the plan every 90 days until the plan's goals have been achieved. The plan is required to include a comprehensive assessment of the drug threat (including the need for and the availability of evidence-based substance use disorder treatment), goals to address the threat, and performance measures pertaining to the plan's goals. The Director is required to issue implementation guidance within 90 days of the designation of an emerging threat. This section also allows the Director to award contracts or enter into interagency agreements in support of the identification of emerging threats in the plan.

This section also requires the Coordinator to facilitate information sharing and coordination with relevant agencies and entities regarding the identification or status of emerging threats, monitor implementation of emerging threat response plans, and develop reporting systems to support adherence to performance measures. Agencies identified in an emerging threat response plan are required to submit a report to the Coordinator on implementation of the plan within 180 days of designation.

This section revamps prior law (21 U.S.C. 1708)—which required a national youth anti-drug media campaign—by limiting the campaign to emerging drug threats, expanding the focus to education and public awareness, and requiring the campaign be developed in accordance with evidence of effective practices. The Director is required to establish and implement a national education and public awareness campaign to raise awareness of illicit drugs designated as emerging threats and to consult with appropriate National Drug Control Program Agencies, experts, state, local, and tribal governments, Congress, and the public to ensure evidence-based implementation of the campaign. The Director is authorized to accept gifts and donations to support the campaign and must issue an annual report to the appropriate congressional committees to identify the source(s) of any accepted gift or donation. Additionally, the Director is required to establish ethics guidelines to determine whether gifts or donations should be declined.

This section also requires the Director to ensure the media campaign is evidence-based and accurate, meets accepted standards for public awareness campaigns, and utilizes effective strategies. The Director is required to use competitive procedures in selecting entities for the production and design of a campaign.

This section codifies prior law requiring the Director to evaluate the performance of the campaign (21 U.S.C. 1708(h)) but clarifies reporting requirements and aligns the timing with the annual assessment under section 1006. The section also codifies prior law (21 U.S.C. 1708(b)(2)(C)), with the addition of a biennial evaluation of the campaign's effectiveness by an independent entity.

This section codifies prior law establishing prohibitions on the use of funds authorized under this section (21 U.S.C. 1708(e)).

This section also reauthorizes funding for the campaign (Pub. L. No. 109-469) and related emerging threat activities. The section authorizes \$25,000,000 for each fiscal year through 2023, a reduction below the prior authorization of \$195,000,000 for fiscal years 2007 and 2008 and \$210,000,000 for fiscal years 2009 through 2011.

Section 1010. National and international coordination

This section requires the Director to ensure National Drug Control Program Agencies disseminate drug control research and information to state and local governments and other entities involved in demand reduction (21 U.S.C. 1703(b)(15)) and to coordinate with the private sector to promote research and development to treat addiction (21 U.S.C. 1703(b)(16)).

This section also requires the Director to coordinate the development of evidence-based state standards by National Drug Control Program Agencies and other relevant entities for drug control policies, practices, and procedures. The Director is also required to encourage the adoption of state standards by facilitating the dissemination of standards through publications, training seminars, and other means to state and local governments.

This section codifies section 1105 of the Office of National Drug Control Policy Reauthorization Act of 2006, which requires the Director to enter into an agreement with a nonprofit to advise states on establishing laws and policies to address illicit drug use issues. The section authorizes \$1,250,000 for such agreement for each fiscal year through 2023.

This section authorizes, in accordance with Pub. L. No. 115-141, the Director to make a grant to a nonprofit organization to provide training and technical assistance to drug courts and authorizes \$2,000,000 for such grant for each fiscal year through 2023.

This section requires the Director to appoint a state, local, and tribal affairs coordinator to coordinate drug control efforts between federal agencies and state, local, and tribal governments and perform other duties relevant to this section and section 1005.

Section 1011. Interdiction

Section 1011 codifies prior law requiring the designation of an interdiction coordinator, establishment of an Interdiction Committee, and issuance of a Command and Control Plan (21 U.S.C. 1710).

Section 1012. Treatment coordinator

Section 1012 requires the Director to designate or appoint a treatment coordinator to coordinate activities of the National Drug Control Program Agencies to expand the availability of evidence-based substance use disorder treatment, develop and issue a Na-

tional Treatment Plan, assess the sufficiency of resources available for substance use disorder treatment, and encourage the adoption of treatment standards. The Treatment Coordinator is required to develop and issue an annual National Treatment Plan to identify the unmet need for treatment and the resources required to eliminate the unmet need for treatment.

This section establishes a Treatment Committee to review the adequacy of evidence-based substance use disorder treatment, discuss the status of the National Treatment Plan, advise the Director concerning treatment initiatives, and submit an annual report to Congress on the results of the Committee's meetings and any significant findings.

Section 1013. Critical information coordination

Section 1013 requires the Director to designate an agency to establish a National Drug Control Fusion Center as a statistical agency to work with National Drug Control Program Agencies to collect, compile, analyze, and facilitate the sharing of information on the use of illicit drugs, treatment for substance use disorders, and interdiction of illicit drugs. The Fusion Center Director is authorized to establish a toxicology screening program to conduct secondary analysis of urine samples that otherwise would be discarded at hospitals, correctional facilities, and similar institutions and to establish a program allowing state and local jurisdictions to submit up to 20 samples annually to analyze substances found in fatal overdose cases. This section prohibits the use of samples as evidence in any proceeding and requires the Fusion Center comply with the provisions of the *Confidential Information Protection and Statistical Efficiency Act of 2002*.

This section also requires the Director to submit to Congress an annual plan, which must cover a four-year period and be updated annually, for increasing data collection to enable real-time surveillance of drug control threats, developing analysis and monitoring capabilities, and identifying and addressing relevant policy questions.

This section codifies prior law, with amendments, prohibiting the use of federal funds by the Office on any study pertaining to legalization of schedule I substances (21 U.S.C. 1703(b)(12)) and requiring any harm reduction program policies, including syringe exchange programs, to be evidence-based and developed in consultation with the National Institutes of Health and the National Academy of Sciences (21 U.S.C. 1702 paragraph after subsection (a)).

This section also requires the Director to establish and update at least quarterly a dashboard on the Office's website to show data visualizations of key data on illicit drug flows and seizures, fatal and non-fatal overdoses, and availability of substance use disorder treatment.

This section codifies prior law requiring National Drug Control Program Agencies to provide the Director with data and information pertaining to drug control and funding for drug control policy (21 U.S.C. 1704(a)).

This section requires the Director to establish a working group of federal agencies, state, local, and tribal government health and law enforcement agencies, and data governance experts to develop interoperable data exchange standards to improve information

sharing among states, federal agencies, and other relevant drug control data centers. The section authorizes the Director, in consultation with the working group, relevant agencies, and state, local, and tribal governments, to designate data exchange standards for federal reporting and data exchange requirements for National Drug Control Programs.

This section also codifies prior law requiring the reporting of specific data related to the status of drug control efforts (21 U.S.C. 1705(a)(2)).

Section 1014. Annual audit and investigation requirements

Section 1014 codifies section 203(b) of the *Office of National Drug Control Reauthorization of 2006* (Pub. L. No. 109–469), requiring the Government Accountability Office to conduct an annual audit and investigation related to the Office.

Section 1015. Authorization of appropriations

This section authorizes \$18,400,000—the amount appropriated for fiscal year 2018 (Pub. L. No. 115–141)—for the Office for each fiscal year through 2023.

SUBCHAPTER II—HIGH INTENSITY DRUG TRAFFICKING AREAS PROGRAM

Section 1021. High Intensity Drug Trafficking Areas Program

Section 1021 codifies prior law establishing the High Intensity Drug Trafficking Areas (HIDTA) Program (21 U.S.C. 1706). The Section amends prior law to grant discretion to HIDTA Directors to use up to 5 percent of program funding for drug treatment programs, in addition to existing discretionary authority to use up to 5 percent of program funding for drug prevention programs. The Section also consolidates reporting requirements and clarifies at least 2.5 percent of program funding is used in areas with severe neighborhood safety and illegal drug distribution problems for safety and protection programs, including programs to prevent intimidation of potential witnesses. This section also authorizes \$280,000,000—the amount appropriated for fiscal year 2018 (Pub. L. No. 115–141)—for the Office to administer this subchapter for each fiscal year through 2023.

SUBCHAPTER III—DRUG-FREE COMMUNITIES SUPPORT PROGRAM

This subchapter also authorizes \$99,000,000—the amount appropriated for fiscal year 2018 (Pub. L. No. 115–141)—for the Office to administer this subchapter for each fiscal year through 2023.

Section 3. Repeals

Section 3 repeals prior laws—the contents of which are now incorporated into chapter 10 of title 31, as added by section 2. This includes a repeal of the Office of National Drug Control Policy Reauthorization Act of 1998 (Public Law 105–277; 21 U.S.C. 1701 et seq.) and chapter 2 of the National Narcotics Leadership Act of 1988 (Public Law 100–690; 21 U.S.C. 1501 et seq.). These repeals

are included in H.R. 5925, notwithstanding prior repeals of both laws, to dispel any confusion and to ensure non-positive law titles of U.S. Code are updated by the Office of Law Revision Counsel to reflect the repeal of those statutes and accurately reflect current law.

Section 4. Opioid crisis response

This section requires the Director to designate opioids and opioid analogues as an emerging threat in accordance with Emerging Threat provisions under section 1009 and to issue a “National Opioid Response Plan,” which must include the following:

1. Initiatives to increase the screening of mail to prevent illicit drugs from entering the country and designation of the United States Postal Service as a National Drug Control Program Agency;

11. Establishment of an Advisory Committee on Substance Use Disorder Treatment Standards, no later than 120 days after issuance of the plan, which will promulgate evidence-based standards for substance abuse disorder no later than 2 years after the issuance of the plan.

This section also requires the Director to submit a report to Congress on the findings and initiatives on Medication Assisted Treatment research.

Section 5. Exceptions and rules of construction

This section codifies prior law relating to national intelligence (21 U.S.C. 1703(g)–(h)).

Section 6. GAO study and reports

This section requires the Comptroller General to provide an initial report to Congress within three years of the date of enactment and a final report within six years on implementation of the Education and Public Awareness Campaign for Emerging Threat, the Strategy, and the annual assessment.

§ 1021. High intensity drug trafficking areas program

(a) **ESTABLISHMENT.**—

(1) **IN GENERAL.**—There is established in the Office a program to be known as the High Intensity Drug Trafficking Areas Program (in this section referred to as the “Program”).

(2) **PURPOSE.**—The purpose of the Program is to reduce drug trafficking and drug production in the United States by—

(A) facilitating cooperation among Federal, State, local, and Tribal law enforcement agencies to share information and implement coordinated enforcement activities;

(B) enhancing law enforcement intelligence sharing among Federal, State, local, and Tribal law enforcement agencies;

(C) providing reliable law enforcement intelligence to law enforcement agencies needed to design effective enforcement strategies and operations; and

(D) supporting coordinated law enforcement strategies which maximize use of available resources to reduce the supply of illegal drugs in designated areas and in the United States as a whole.

(b) **DESIGNATION.**—

(1) **IN GENERAL.**—The Director, in consultation with the Attorney General, the Secretary of the Treasury, the Secretary of Homeland Security, heads of the National Drug Control Program Agencies, and the Governor of each applicable State, may designate any specified area of the United States as a high intensity drug trafficking area.

(2) **ACTIVITIES.**—After making a designation under paragraph (1) and in order to provide Federal assistance to the area so designated, the Director may—

(A) obligate such sums as are appropriated for the Program;

(B) direct the temporary reassignment of Federal personnel to such area, subject to the approval of the head of the agency that employs such personnel;

(C) take any other action authorized under this chapter to provide increased Federal assistance to those areas; and

(D) coordinate activities under this section (specifically administrative, recordkeeping, and funds management activities) with State, local, and Tribal officials.

(c) **PETITIONS FOR DESIGNATION.**—The Director shall establish and maintain regulations under which a coalition of interested law enforcement agencies from an area may petition for designation as a high intensity drug trafficking area (in this section referred to as

the "HIDTA"). Such regulations shall provide for a regular review by the Director of the petition, including a recommendation regarding the merit of the petition to the Director by a panel of qualified, independent experts.

(d) *FACTORS FOR CONSIDERATION.*—In considering whether to designate an area under this section as a high intensity drug trafficking area, the Director shall consider, in addition to such other criteria as the Director considers to be appropriate, the extent to which—

(1) the area is a significant center of illegal drug production, manufacturing, importation, or distribution;

(2) State, local, and Tribal law enforcement agencies have committed resources to respond to the drug trafficking problem in the area, thereby indicating a determination to respond aggressively to the problem;

(3) drug-related activities in the area are having a significant harmful impact in the area, and in other areas of the country; and

(4) a significant increase in allocation of Federal resources is necessary to respond adequately to drug-related activities in the area.

Where it is impractical for an equal number of representatives of agencies and State, local, and Tribal agencies to attend a meeting of an Executive Board in person, the Executive Board may use a system of proxy votes or weighted votes to achieve the voting balance required by this paragraph.

(4) *NO AGENCY RELATIONSHIP.*—The eligibility requirements of this section are intended to ensure the responsible use of Fed-

eral funds. Nothing in this section is intended to create an agency relationship between individual high intensity drug trafficking areas and the Federal Government.

The Honorable Bob Goodlatte
Chairman, Committee on the Judiciary
U.S. House of Representatives
Washington, D.C. 20515

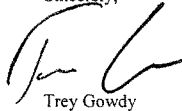

Dear Mr. Chairman:

On May 23, 2018, the Committee on Oversight and Government Reform ordered reported H.R. 5925, the *Coordinated Response through Interagency Strategy and Information Sharing Act*, with an amendment, by voice vote. The bill was referred primarily to the Committee on Oversight and Government Reform, with additional referrals to the Committees on Energy and Commerce, Foreign Affairs, the Judiciary, Intelligence, and Appropriations.

I ask you allow the Committee on the Judiciary to be discharged from further consideration of the bill so it may be scheduled for floor consideration by the Majority Leader. This discharge in no way affects your jurisdiction over the subject matter of the bill, and it will not serve as precedent for future referrals. In addition, should a conference on the bill be necessary, I would support your request to have the Committee on the Judiciary represented on the conference committee. Finally, I would be pleased to include this letter and any response in the bill report filed by the Committee on Oversight and Government Reform, as well as in the *Congressional Record* during floor consideration, to memorialize our understanding.

Thank you for your consideration of my request.

Sincerely,

Trey Gowdy
