Section 3 of the conference agreement states that, unless expressly provided otherwise, any reference to “this Act” contained in any division shall be treated as referring only to the provisions of that division.

Section 4 provides a statement of appropriations.

The conference agreement does not contain any congressional earmarks, limited tax benefits, or limited tariff benefits as defined by clause 9 of rule XXI of the Rules of the House of Representatives.

DIVISION A—DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2019

The conference agreement on the Department of Defense Appropriations Act, 2019, incorporates some of the provisions of both the House and Senate versions of the bill. The language and allocations set forth in House Report 115–769 and Senate Report 115–290 should be complied with unless specifically addressed in the accompanying bill and statement of the managers to the contrary.
DEFINITION OF PROGRAM, PROJECT, AND ACTIVITY

For the purposes of the Balanced Budget and Emergency Deficit Control Act of 1985 (Public Law 99–177), as amended by the Balanced Budget and Emergency Deficit Control Reaffirmation Act of 1987 (Public Law 100–119), and by the Budget Enforcement Act of 1990 (Public Law 101–508), the terms “program, project, and activity” for appropriations contained in this Act shall be defined as the most specific level of budget items identified in the Department of Defense Appropriations Act, 2019, the related classified annexes and explanatory statements, and the P–1 and R–1 budget justification documents as subsequently modified by congressional action.

The following exception to the above definition shall apply: the military personnel and the operation and maintenance accounts, for which the term “program, project, and activity” is defined as the appropriations accounts contained in the Department of Defense Appropriations Act.

At the time the President submits the budget request for fiscal year 2020, the Secretary of Defense is directed to transmit to the congressional defense committees budget justification documents to be known as the “M–1” and the “O–1” which shall identify, at the budget activity, activity group, and sub-activity group level, the amounts requested by the President to be appropriated to the Department of Defense for military personnel and operation and maintenance in any budget request, or amended budget request, for fiscal year 2020.

REPROGRAMMING GUIDANCE

The Secretary of Defense is directed to continue to follow the reprogramming guidance for acquisition accounts as specified in the report accompanying the House version of the Department of Defense Appropriations bill for Fiscal Year 2008 (House Report 110–279). The dollar threshold for reprogramming funds shall be $10,000,000 for military personnel; $15,000,000 for operation and maintenance; $20,000,000 for procurement; and $10,000,000 for research, development, test and evaluation.

Also, the Under Secretary of Defense (Comptroller) is directed to continue to provide the congressional defense committees annual DD Form 1416 reports for titles I and II and quarterly, spreadsheet-based DD Form 1416 reports for Service and defense-wide accounts in titles III and IV of this Act. Reports for titles III and IV shall comply with guidance specified in the explanatory statement accompanying the Department of Defense Appropriations Act, 2006. The Department shall continue to follow the limitation that prior approval reprogrammings are set at either the specified dollar threshold or 20 percent of the procurement or research, development, test and evaluation line, whichever is less. These thresholds are cumulative from the base for reprogramming value as modified by any adjustments. Therefore, if the combined value of transfers into or out of a military personnel (M–1), an operation and maintenance (O–1), a procurement (P–1), or a research, development, test and evaluation (R–1) line exceeds the identified threshold, the Secretary of Defense must submit a prior approval reprogramming to the congressional defense committees. In addition, guidelines on
the application of prior approval reprogramming procedures for congressional special interest items are established elsewhere in this statement.

FUNDING INCREASES

The funding increases outlined in the tables for each appropriation account shall be provided only for the specific purposes indicated in the tables.

CONGRESSIONAL SPECIAL INTEREST ITEMS

Items for which additional funds have been provided or items for which funding is specifically reduced as shown in the project level tables or in paragraphs using the phrase “only for” or “only to” are congressional special interest items for the purpose of the Base for Reprogramming (DD Form 1414). Each of these items must be carried on the DD Form 1414 at the stated amount, as specifically addressed in the explanatory statement.

CLASSIFIED ANNEX

Adjustments to classified programs are addressed in the accompanying classified annex.

OTHER TRANSACTION AUTHORITY

The conferees support the use of Other Transaction Authority (OTA) pursuant to section 2371b of title 10, United States Code for prototyping projects to enhance the mission effectiveness of the Department of Defense. However, the conferees are concerned with the lack of transparency surrounding the employment of OTA, particularly for follow-on production. Therefore, the conferees direct the Secretary of Defense to provide quarterly reports to the House and Senate Appropriations Committees not later than 30 days after the close of each fiscal quarter, detailing the Department’s execution of funds for OTA prototype projects. Such reports shall be submitted beginning with the first quarter of fiscal year 2019 and shall include a classified annex, if necessary. The report shall list each active OTA agreement characterized by Service or agency, major command, contracting activity, appropriation, budget line item, minimum and maximum award value, vendor, obligations and expenditures to date, product service code, and period of performance. Other Transaction Authority agreements that include an option for follow-on production shall be clearly annotated in the report and include a description of the scope of the follow-on production, including estimated cost, period of performance, deliverables, delivery dates, and source of funding.

Further, the conferees direct the Comptroller General to review the Department’s use of OTA pursuant to section 2371b of title 10, United States Code to determine whether the Department’s employment of this authority conforms to applicable statutes and Departmental guidelines, to include the identification of any potential conflicts with section 1301 of title 31, United States Code. As part of this review, the Comptroller General shall also report on the extent that OTAs have been utilized since fiscal year 2016 and quantify OTA prototype agreements, including those with
options for follow-on production, by Service or agency, appropriation, and other characteristics, as appropriate. The Comptroller General shall provide the congressional defense committees the assessment not later than 180 days after the enactment of this Act.

INDIRECT FIRE PROTECTION CAPABILITY

In support of the Indirect Fire Protection Capability (IFPC) program of record, the Army’s fiscal year 2019 budget includes procurement requests totaling $173,204,000 for AIM–9X interceptors, Multi-Mission Launcher (MML) components, and other ancillary costs. This request is in addition to $50,056,000 of fiscal year 2018 funding that remains unexecuted. The request also includes $208,740,000 for continued research, development, test and evaluation of the current IFPC program of record, while prior year funding also remains available due to the decision not to award the IFPC milestone B Engineering and Manufacturing Development contract.

The conferees note that following the submission of the fiscal year 2019 budget request, the Army initiated reviews of the existing IFPC program of record and alternate courses of action (COA) prior to the milestone B decision. These alternate COA include the development and integration of an alternate interceptor to the previously proposed AIM–9X interceptor with modifications to the MML, as well as the analysis of at least two other distinct weapons systems. The conferees further note that section 112 of the John S. McCain National Defense Authorization Act for Fiscal Year 2019 directs the Army to deploy two batteries of an interim, fixed site cruise missile defense capability by September 30, 2020, subject to the availability of appropriations.

The conference agreement supports the Army’s pursuit of this defensive capability; however, the conferees remain concerned that the current budget request does not support any change in acquisition strategy or procurement and integration of available interim defense capabilities and is unexecutable as requested. The conferees direct the Secretary of the Army to provide a report to the congressional defense committees not later than 30 days after the enactment of this Act that details the results of the Army’s internal review, revised acquisition strategy, and resulting resourcing requirements. The report shall also include an analysis and recommendations on the multiple COA under review; the supporting cost estimates for each COA across the future years defense program (FYDP); a program schedule for the selected COA; an analysis and recommendations for interim capabilities and proposed acquisition schedule; the proposed execution of prior year available balances and current IFPC resources by appropriation, budget line, and project across the FYDP for both the program of record and interim capabilities; and a plan to resource any identified shortfalls for the selected program of record COA and interim capabilities that will be pursued through the reprogramming of available resources and other means, as necessary.

CLOUD COMPUTING

The conferees believe cloud computing, if implemented properly, will have far reaching benefits for improving the efficiency of
day-to-day operations of the Department of Defense, as well as enabling new military capabilities critical to maintaining a tactical advantage over adversaries. The conference agreement includes a general provision directing the Secretary of Defense to provide a comprehensive strategy for cloud computing and to propose a plan for a budget accounting system that provides greater transparency to evaluate the cost and progress of transitioning to a cloud computing environment. The conferees are not suggesting that the Department implement a separate, new financial management system for cloud computing, but urge the Secretary of Defense to adapt the current system to provide reliable and timely data on the budgets requested and funds expended to procure cloud computing services, and the budgets requested and funds expended to prepare and implement legacy systems for migration to the cloud environment.

ADVANCED BATTLE MANAGEMENT SYSTEM

The conferees support the Air Force’s new approach to battle management, the Advanced Battle Management System (ABMS), but are concerned with the near-term risks in cancelling the Joint Surveillance Target Attack Radar System recapitalization program. The conferees direct the Secretary of the Air Force to submit a report to the congressional defense committees not later than 90 days after the enactment of this Act on a revised ABMS plan and execution strategy, updated costs and schedules of each activity within the ABMS plan, and a gap and threat assessment of both the ground moving target indicator and battle management command and control mission areas.

CIVILIAN PAY RAISE

The conference agreement includes sufficient funding to provide for a 1.9 percent pay raise for civilian employees of the Department of Defense and other agencies funded by this Act, if authorized by another provision of law.

ARMY CORPS OF ENGINEERS RESTRUCTURING

On July 30, 2018, the Secretary of Defense approved a Secretary of the Army memorandum identifying specific actions the Army will take in support of the Administration’s proposed reorganization of the United States Army Corps of Engineers’ (USACE) Civil Works Program. The reorganization includes taking the Civil Works program out of the Army Corps of Engineers with navigation going to the Department of Transportation for infrastructure grants and the remaining accounts to the Department of the Interior.

The conferees are opposed to the reorganization as it could ultimately have detrimental readiness and operational impacts on Department of Defense functions and activities, to include USACE support to ongoing military operations, international partners, and support to United States military installations around the world.
The conferees are extremely concerned that the Secretary of the Army failed to provide any notification or engage in any discussion with Members of Congress, the House and Senate Appropriations Committees, or their staff on an action of this magnitude, which crosses multiple jurisdictional lines and has far-reaching consequences. This type of proposal, as the Department is well aware, will require legislative language which has not been proposed or requested to date. Therefore, no funds provided in this Act or any previous Act shall be used by the Department or the Secretary to plan, prepare, or implement this proposal.

The conference agreement provides the resources required for an additional 15,600 active forces and 800 selected reserve forces above fiscal year 2018 levels, as requested and authorized by current law, in order to meet operational needs for fiscal year 2019. The conference agreement also provides the funding necessary to support a 2.6 percent pay raise for all military personnel, as authorized, effective January 1, 2019.

REPROGRAMMING GUIDANCE FOR MILITARY PERSONNEL ACCOUNTS

The Secretary of Defense is directed to submit the Base for Reprogramming (DD Form 1414) for each of the fiscal year 2019 appropriations accounts not later than 60 days after the enactment of this Act. The Secretary of Defense is prohibited from executing any reprogramming or transfer of funds for any purpose other than originally appropriated until the aforementioned report is submitted to the House and Senate Defense Appropriations Subcommittees.

The Secretary of Defense is directed to use the normal prior approval reprogramming procedures to transfer funds in the Services’ military personnel accounts between budget activities in excess of $10,000,000.

MILITARY PERSONNEL SPECIAL INTEREST ITEMS

Items for which additional funds have been provided or have been specifically reduced as shown in the project level tables or in paragraphs using the phrase “only for” or “only to” in the explanatory statement are congressional special interest items for the purpose of the Base for Reprogramming (DD Form 1414). Each of these items must be carried on the DD Form 1414 at the stated amount as specifically addressed in the explanatory statement. Below Threshold Reprogrammings may not be used to either restore or reduce funding from congressional special interest items as identified on the DD Form 1414.

RESERVE OFFICER TRAINING CORPS

The conferees support Reserve Officer Training Corps (ROTC) programs at universities and colleges. The ROTC program provides necessary tools for young men and women to serve in the military. The House included two provisions which would ban the termination or closure of Senior ROTC or ROTC programs at Historically Black Colleges, Hispanic or Tribal Universities/Colleges. The Department of Defense has advised the conferees that they have not initiated any efforts for the past several years to terminate these programs and/or units. The conferees urge the Secretary of Defense to continue to foster these programs, especially at Historically Black Colleges, Hispanic or Tribal Universities/Colleges, to ensure the best and brightest remain interested in military service.

BLENDED RETIREMENT SYSTEM

Pursuant to sections 631 through 635 of the National Defense Authorization Act for Fiscal Year 2016, the Department of Defense began modernizing the retirement system for members of the uni-
formed services by implementing a Blended Retirement System (BRS) that incorporates Thrift Savings Plan (TSP) contributions, Continuation Pays (CP), and a reduced-rate version of the traditional defined-benefit pension. Servicemembers who enter military service on or after January 1, 2018 are covered automatically by BRS. Those who began serving prior to December 31, 2017 are grandfathered under the legacy retirement system, with the ability to opt-in to the BRS from January 1, 2018 through December 31, 2018, if the member has less than 12 years of service in active duty or has accumulated less than 4,320 points for reserve members. For servicemembers separating from the military with fewer than 20 years, the new system provides for retirement benefits outside of the standing defined-benefit pension, enabling a larger population of servicemembers to obtain retirement benefits.

The fiscal year 2018 budget submission was the Department’s first opportunity to request appropriations for TSP and CP requirements. Initial estimates were consistent across the military Services based on budgeting assumptions informed by valuations of the military retirement system via the Department of Defense Office of the Actuary. Following the markup of the Department of Defense Appropriations Acts by the House and Senate Appropriations Committees, the Department submitted an omnibus reprogramming request identifying $1,679,947,000 in base military personnel funding available for realignment to higher priorities, of which the Department identified $442,475,000 as excess to need due to overestimation of BRS. In addition, another $77,000,000 was identified as BRS resources available for a future reprogramming action.

The conferees understand that this new approach to military retirement will take the Department time to educate and enroll participants, gather data, formulate revised assumptions, and more accurately inform budget projections. However, given that the fiscal year 2019 budget request was formulated by applying similar BRS assumptions as those used in fiscal year 2018, the Department has revised its fiscal year 2019 BRS projection and identified an estimated $732,000,000 asset based on current actuals experienced in the year of execution. As such, the associated reductions have been distributed throughout the military personnel appropriation accounts and redistributed to title II in a general provision to mitigate higher than anticipated fuel costs. The conferees expect budgeting for the BRS will become more accurate over time.

The Secretary of Defense is prohibited from executing any reprogramming or transfer of funds for any purpose other than originally appropriated until the aforementioned report is submitted to the House and Senate Defense Appropriations Subcommittees.

The Secretary of Defense is directed to use the normal prior approval reprogramming procedures to transfer funds in the Services’ operation and maintenance accounts between O–1 budget activities, or between sub-activity groups in the case of Operation and Maintenance, Defense-Wide, in excess of $15,000,000. In addition, the Secretary of Defense shall follow prior approval reprogramming procedures for transfers in excess of $15,000,000 out of the following readiness sub-activity groups:

Additionally, the Secretary of Defense is directed to use normal prior approval reprogramming procedures when implementing transfers in excess of $15,000,000 into the following budget sub-activities:

Operation and Maintenance, Army:
Recruiting and advertising

Operation and Maintenance, Army National Guard:
Other personnel support/recruiting and advertising

OPERATION AND MAINTENANCE SPECIAL INTEREST ITEMS

Items for which additional funds have been provided or have been specifically reduced as shown in the project level tables or in paragraphs using the phrase “only for” or “only to” in the explanatory statement are congressional special interest items for the purpose of the Base for Reprogramming (DD Form 1414). Each of these items must be carried on the DD Form 1414 at the stated amount as specifically addressed in the explanatory statement. Below Threshold Reprogrammings may not be used to either restore or reduce funding from congressional special interest items as identified on the DD Form 1414.

REPROGRAMMING GUIDANCE FOR SPECIAL OPERATIONS COMMAND

The Secretary of Defense is directed to submit a baseline report that shows the Special Operations Command’s operation and maintenance funding by sub-activity group for the fiscal year 2019 appropriation not later than 60 days after the enactment of this Act. The Secretary of Defense is further directed to submit quarterly execution reports to the congressional defense committees not later than 45 days after the end of each fiscal quarter that addresses the rationale for the realignment of any funds within and between budget sub-activities and the movement of any base funds used to support overseas contingency operations. Finally, the Secretary of Defense is directed to notify the congressional defense committees 30 days prior to the realignment of funds in excess of $15,000,000 between sub-activity groups.

ADVERTISING SPENDING TO SMALL AND DISADVANTAGED BUSINESSES

The conferees direct the Secretary of Defense to submit a report to the congressional defense committees not later than 90 days after the enactment of this Act which estimates the portion of the Department of Defense advertising budget that is spent on advertising and public relations contracts with socially and economically disadvantaged small businesses and women, low-income veteran, and minority entrepreneurs and business owners at the prime and subcontracting levels.
ENVIRONMENTAL RESTORATION FUNDING

The conference agreement provides the maximum executable level of funding for the Services to address costs associated with remediating contamination caused by perfluorinated chemicals, as well as additional funding to address other high-priority environmental restoration projects across the Department.

LEAD IN MILITARY PRIVATIZED HOUSING

Section 8132 of the Senate-passed Defense Appropriations bill directs the Comptroller General, in consultation with the Secretary of Defense and the Service Secretaries, to provide a report on the monitoring compliance and remediation of lead in military housing. The conferees are concerned that servicemembers and their families residing in on-post military housing may have been exposed to toxic levels of lead based paint. The conferees understand that military installations around the country possess housing units containing lead based paint levels exceeding the federal threshold for acceptable levels, which could have negative health implications for servicemembers and their families. The conferees direct the Comptroller General to conduct an investigation and submit a report to the congressional defense committees on toxic lead levels at military housing on all installations not later than 120 days after the enactment of this Act.

E–8C MAINTENANCE

The conferees direct the Comptroller General to submit a report to the congressional defense committees not later than January 31, 2019 on E–8C Joint Surveillance Target Attack Radar System (JSTARS) maintenance. The report shall compare the cost expenditures of organic industrial depot maintenance of the E–8C JSTARS fleet versus contracted or non-organic maintenance and the cost variance and cost savings of different programmed depot maintenance cycles or procedures for the E–8C fleet, including comparisons to such other platforms as the Comptroller General considers appropriate.

REPUBLIC OF PALAU

The conference agreement provides $9,700,000 to reimburse the Republic of Palau for land acquisition costs to enable the installation of critical defense assets. The conferees note that this one-time investment will provide a measurable advantage in United States strategic posture.

OPERATION AND MAINTENANCE, DEFENSE-WIDE

The agreement provides $35,613,354,000 for Operation and Maintenance, Defense-Wide, as follows:

SECURITY ASSISTANCE PROGRAMS

The conferees recognize and appreciate the efforts made in the National Defense Authorization Act for Fiscal Year 2017 and the John S. McCain National Defense Authorization Act for Fiscal Year 2019 to reform several programs that provide security assistance to international partners. Changes have touched on several Department of Defense programs, including the Coalition Support Fund, border security programs, and building partner capacity/security cooperation programs.

While largely supportive of these efforts, the conferees are concerned that confusion exists, within the Department of Defense and among recipient countries, about the remaining disparate and still-changing authorities. The conferees are also concerned with the lack of stability, transparency, and fungibility of funds appropriated for security assistance activities and believe that changes may be needed in various appropriations to ensure that appropriate levels of funding are provided for each newly authorized or modified program.

Therefore, the conferees direct the Secretary of Defense to conduct a review of security assistance programs, including, but not limited to, security cooperation programs authorized in Section 333 of the National Defense Authorization Act for Fiscal Year 2017, border security assistance programs authorized by Section 1226 of the National Defense Authorization Act for Fiscal Year 2016 as modified, and the Coalition Support Fund authorized by Section 1223 of the National Defense Authorization Act for Fiscal Year 2008 as modified. The review should include a survey of Department of Defense security assistance requirements of each combatant command and a study of whether existing authorities are sufficient to meet the security assistance needs of the Department of Defense, including whether funding limitations inhibit security assistance requirements.

The conferees direct that the results of the review be submitted to Congress with the fiscal year 2020 budget request submission, and include proposals for any needed modifications to security assistance authorities and appropriations funding levels or language.

The conferees further direct the Director of the Defense Security Cooperation Agency, in conjunction with the geographic combatant commanders, to provide a spend plan for fiscal year 2019, by combatant command, for security assistance funding to the congressional defense committees not later than 30 days after the enactment of this Act. The spend plan should be provided in a form that compares the plans for both the base and overseas contingency operations requests and provides an annual comparison for the preceding five years. A similar plan shall be provided outlining fiscal year 2020 requirements concurrent with the submission of the fiscal year 2020 budget request.

BACKGROUND INVESTIGATIONS

The Administration has announced plans to wholly transfer the National Background Investigations Bureau (NBIB) to the Department of Defense. The conferees expect the Department of De-
Defense will use the existing NBIB skilled workforce as part of the plan to maintain continuity and to support a successful transition of services. The conferees recognize the importance of this workforce in reducing the backlog of investigations and in establishing new processes for streamlining the current system.

DEFENSE SECURITY SERVICE

The Defense Security Service (DSS) is preparing to accept responsibility for all civilian and defense agency background investigations. The conferees note with concern that DSS provided multiple and amended budget documents during the fiscal year 2019 budget cycle, which indicate changing plans and corresponding budget requirements. The conferees expect that DSS will improve its resource planning to ensure future budget requests support a consistent strategy. The conferees direct the Director of DSS to provide quarterly execution briefings to the congressional defense committees on activities related to background investigations during fiscal year 2019.

COMMEMORATING THE ANNIVERSARY OF THE END OF WORLD WAR II

The United States will celebrate the occasion of the seventy-fifth anniversary of the end of World War II in 2020. In order to honor the nation’s veterans, educate the public, and recognize the contributions of the home front and allies during the war, the conferees urge the Secretary of Defense to evaluate ways in which the Department can support the commemoration, to include providing resources for related activities.

CYBERSPACE SOLARIUM COMMISSION

Section 1652 of the John S. McCain National Defense Act for Fiscal Year 2019 establishes the Cyberspace Solarium Commission to develop a consensus on a strategic approach to defending the United States in cyberspace against cyber attacks of significant consequences. The conferees encourage the Secretary of Defense to provide the resources necessary to support this effort.

REPROGRAMMING GUIDANCE FOR ACQUISITION ACCOUNTS

The Secretary of Defense is directed to continue to follow the reprogramming guidance as specified in the report accompanying the House version of the Department of Defense Appropriations bill for Fiscal Year 2008 (House Report 110–279). Specifically, the dollar threshold for reprogramming funds shall remain at $20,000,000 for procurement and $10,000,000 for research, development, test and evaluation.

Also, the Under Secretary of Defense (Comptroller) is directed to continue to provide the congressional defense committees quarterly, spreadsheet-based DD Form 1416 reports for Service and defense-wide accounts in titles III and IV of this Act. Reports for titles III and IV shall comply with the guidance specified in the explanatory statement accompanying the Department of Defense Appropriations Act, 2006. The Department shall continue to follow the limitation that prior approval reprogrammings are set at either the specified dollar threshold or 20 percent of the procurement or research, development, test and evaluation line, whichever is less. These thresholds are cumulative from the base for reprogramming value as modified by any adjustments. Therefore, if the combined value of transfers into or out of a procurement (P–1) or research, development, test and evaluation (R–1) line exceeds the identified threshold, the Secretary of Defense must submit a prior approval reprogramming to the congressional defense committees. In addition, guidelines on the application of prior approval reprogramming procedures for congressional special interest items are established elsewhere in this statement.

FUNDING INCREASES

The funding increases outlined in these tables shall be provided only for the specific purposes indicated in the tables.

PROCUREMENT SPECIAL INTEREST ITEMS

Items for which additional funds have been provided as shown in the project level tables or in paragraphs using the phrase “only for” or “only to” in the explanatory statement are congressional special interest items for the purpose of the Base for Reprogramming (DD Form 1414). Each of these items must be carried on the DD Form 1414 at the stated amount as specifically addressed in the explanatory statement.

Reimbursable to direct conversions unaccounted for
Following the submission of the fiscal year 2019 budget request, the Chief of Staff of the Army approved an Army Requirements Oversight Counsel (AROC) decision to upgrade and pure fleet all Flat-Bottom Hull (FBH) Stryker combat vehicles to the Double V-Hull A1 variant (DVHA1) in an effort to improve troop survivability and mobility. The Army’s fiscal year 2019 budget request includes $21,900,000 to upgrade three FBH Stryker vehicles to DVHA1 variants. Subsequent to the AROC decision, the Army requested a funding transfer of $149,390,000 to fund additional conversions. With the transfer, the Army can resource 53 DVHA1 conversions totaling $171,290,000. The conferees have also included a congressional adjustment of $94,000,000 for 29 additional conversions.

The conferees note that there is a fiscal year 2018 reprogramming request to repurpose $285,000,000 of congressionally directed funding for 91 DVHA1 conversions. If the reprogramming action is approved by the congressional defense committees, the Army will have sufficient resources to fund conversions for half the vehicles in a Stryker Brigade Combat Team (SBCT), which is the Army’s optimal rate of modernization.

The conferees support the net-zero fiscal year 2019 transfer request, reprogramming action, and additional funding for DVHA1 conversions. However, the conferees are concerned that the Army decision on Stryker modifications are not being synchronized with the budget cycle, are currently under-resourced, and have been subject to sudden change. The conferees direct the Secretary of the Army to submit a report outlining the revised acquisition strategy for Stryker vehicles, to include a resourcing strategy for funding Stryker DVHA1 conversion at a rate of one-half of a SBCT per year, an explanation of Stryker lethality requirements, an acquisition and resourcing strategy for fielding required lethality modifications, and an explanation and cost estimate for any validated requirements for Stryker modifications. This report shall be submitted to the congressional defense committees not later than 90 days after the enactment of this Act.

This language replaces the language under the heading “Stryker” in House Report 115–769 and under the heading “Army Stryker Double-V Hull A1” in Senate Report 115–290.

TOMAHAWK PRODUCTION AND NEXT GENERATION LAND ATTACK WEAPON

The conferees are concerned by the Navy’s management of the Tomahawk missile program. In the previous two fiscal years, the Congress has added funding above the budget requests for the Tomahawk program due to the fact that the Navy has requested fewer missiles than necessary to maintain a minimum sustainment rate of production while missiles have continued to be expended in the Central Command area of operations. The Department of Defense Appropriations Act, 2018, provided $102,000,000 above the request to procure additional munitions pursuant to the Navy’s fiscal year 2018 enhancement request following enactment of the Bipartisan Budget Act of 2018. However, despite the request by the Navy and the direction by the Congress to procure additional munitions, the Navy has proposed to repurpose the congressionally provided funding for various activities, negating congressional intent. Therefore, the agreement includes a rescission of $115,657,000 of fiscal year 2018 funds from the Tomahawk program.

The fiscal year 2019 budget request for Tomahawk does not include funding for new production of all up rounds, reflecting the Navy’s strategy to transition from new production to recertification and modernization activities. The conferees direct the Secretary of the Navy to conduct a full review of the Tomahawk program including the current inventory requirement and stockpiled levels of munitions; an analysis of the viability of new production in fiscal year 2020; an analysis of the capacity for concurrent new production and recertification activities within existing facilities; revised cost and schedule projections for modification and recertification activities, to include alternatives with and without concurrent new production; a detailed review of the execution of the fiscal year 2017 and 2018 new production congressional adds; an analysis of surface and sub-surface launched land attack weapons inventory and requirements projections through the Next Generation Land Attack Weapon initial operational capability date, to include other weapons systems that may provide an interim capability. The Secretary of the Navy shall provide a report detailing the results of the review to the congressional defense committees not later than 90 days after the enactment of this Act.

Additionally, the reporting requirements related to the Long Range Anti-Ship Missile included under the heading “Next Generation Land Attack Weapon (NGLAW) and Interim Capabilities” in Senate Report 115–290 are still valid.

This language replaces the language under the heading “Tomahawk Production” in House Report 115–769 and under the heading “Next Generation Land Attack Weapon (NGLAW) and Interim Capabilities” in Senate Report 115–290.

FORD CLASS AIRCRAFT CARRIER PROCUREMENT

The conferees include a proviso consistent with section 121 of the John S. McCain National Defense Authorization Act for Fiscal Year 2019, which allows the Secretary of the Navy to potentially use fiscal year 2019 funds to enter into a contract for an aircraft carrier designated CVN–81 if certain requirements are met by the Secretary of Defense.

However, the conferees note that the congressional defense committees have not received information justifying the validity of a proposed “two carrier block buy,” including an Independent Cost Estimate, an analysis of the impact on other Navy shipbuilding programs, an updated future years defense program, or an extended planning range budget.

This language replaces the language under the heading “CVN 80” in Senate Report 115–290.

OTHER PROCUREMENT, NAVY

The agreement provides $9,097,138,000 for Other Procurement, Navy, as follows:

The conference agreement provides $1,300,000,000 for National Guard and Reserve Equipment. Of that amount $421,000,000 is designated for the Army National Guard; $421,000,000 for the Air National Guard; $180,000,000 for the Army Reserve; $65,000,000 for the Navy Reserve; $13,000,000 for the Marine Corps Reserve; and $200,000,000 for the Air Force Reserve.

This funding will allow the reserve components to procure high priority equipment that may be used for combat and domestic response missions. Current reserve component equipping levels are among the highest in recent history, and the funding provided by the agreement will help ensure component interoperability and sustained reserve component modernization.

The conferees direct the Secretary of Defense to ensure that the account be executed by the Chiefs of the National Guard and reserve components with priority consideration given to the following items: acoustic hailing devices; active electronically scanned array radars; arctic sustainment packages; cold weather and mountaineering gear and equipment; commercial off-the-shelf training systems and simulation devices; crashworthy, ballistically tolerant auxiliary fuel systems for ground and air; digital radar warning receivers for F–16s; fifth generation certified wireless mobile mesh self-healing tamper-proof network systems; HMMWV rollover mitigation; joint threat emitters; modular small arms ranges and simulation; MQ–9 deployable launch and recovery element mission support kits; personal dosimeters; radic sets; secure voice, text, and data communications for joint response and operations; sense and avoid systems; small unit support vehicles; and unstabilized gunnery trainers and upgrades.

REPROGRAMMING GUIDANCE FOR ACQUISITION ACCOUNTS

The Secretary of Defense is directed to continue to follow the reprogramming guidance as specified in the report accompanying the House version of the Department of Defense Appropriations bill for Fiscal Year 2008 (House Report 110–279). Specifically, the dollar threshold for reprogramming funds shall remain at $20,000,000 for procurement and $10,000,000 for research, development, test and evaluation.

Also, the Under Secretary of Defense (Comptroller) is directed to continue to provide the congressional defense committees quarterly, spreadsheet-based DD Form 1416 reports for Service and defense-wide accounts in titles III and IV of this Act. Reports for titles III and IV shall comply with the guidance specified in the explanatory statement accompanying the Department of Defense Appropriations Act, 2006. The Department shall continue to follow the limitation that prior approval reprogrammings are set at either the specified dollar threshold or 20 percent of the procurement or research, development, test and evaluation line, whichever is less. These thresholds are cumulative from the base for reprogramming value as modified by any adjustments. Therefore, if the combined value of transfers into or out of a procurement (P–1) or research, development, test and evaluation (R–1) line exceeds the identified threshold, the Secretary of Defense must submit a prior approval reprogramming to the congressional defense committees. In addition, guidelines on the application of prior approval reprogramming procedures for congressional special interest items are established elsewhere in this statement.

FUNDING INCREASES

The funding increases outlined in these tables shall be provided only for the specific purposes indicated in the tables.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION SPECIAL INTEREST ITEMS

Items for which additional funds have been provided as shown in the project level tables or in paragraphs using the phrase “only for” or “only to” in the explanatory statement are congressional special interest items for the purpose of the Base for Reprogramming (DD Form 1414). Each of these items must be carried on the DD Form 1414 at the stated amount as specifically addressed in the explanatory statement.

BLAST EXPOSURE RESEARCH

The conferees understand that further research is necessary regarding blast exposure on the cellular level of the brain in order to develop blast protection requirements for helmets and other personal protective equipment. The conferees encourage the Secretary of Defense to increase efforts to develop a predictive traumatic brain injury model for blast. Such research may help reveal the cellular response to blast impulses and the interaction of the human brain and protective equipment related to blast exposure.
The 2018 National Defense Strategy addresses the increasingly complex global threat environment driven in part by rapid technological advancements. The fiscal year 2019 budget request proposes investments in several programs that support a more capable and lethal force to prepare for this threat environment, including directed energy, hypersonics, advanced computing, big data analytics, artificial intelligence, autonomy, and robotics programs.

The conferees believe that concurrent with investments in leap-ahead technological advancements, an investment in the Department of Defense test and evaluation infrastructure is required to increase testing range space and availability and to ensure continued independent and objective assessments of weapon system capabilities. Therefore, after consultation with the Under Secretary of Defense (Research and Engineering) and the Director, Operational Test and Evaluation, the conferees recommend increases for the Air Force, and Office of the Director, Operational Test and Evaluation to modernize the Department of Defense test and evaluation infrastructure in areas such as hypersonics, directed energy, augmented intelligence, machine learning, robotics, and cyberspace.

The conferees direct the Under Secretary of Defense (Research and Engineering), in conjunction with the Director, Operational Test and Evaluation, and the Secretaries of the Army, Navy, and Air Force, to conduct an in-depth assessment of the Department of Defense test and evaluation infrastructure and to identify improvements required to address future warfighting capabilities. The assessment shall be provided to the congressional defense committees not later than with the submission of the fiscal year 2020 budget request and shall include proposed coordinated investments by warfighting area in priority order and with associated cost estimates.

**F–35 JOINT STRIKE FIGHTER DEVELOPMENTAL TEST FLEET**

The conferees agree to modify a provision proposed by the House allowing the Secretary of Defense to use funds appropriated in this Act for F–35 procurement and research, development, test and evaluation to modify up to six aircraft, including two aircraft of each variant, to a test configuration. The conferees understand that the cost of modifying each aircraft is approximately $5,000,000. The conferees direct the Secretary of Defense, with the concurrence of the Secretary of the Air Force and the Secretary of the Navy, to notify the congressional defense committees not fewer than 30 days prior to obligating and expending funds for this purpose. The notification shall contain the costs of modifying the aircraft, the sources of funding by account and the reasons for their availability, and a statement that the use of such funds will not adversely affect the F–35 operational fleet. The conferees expect that any such use of funds will not unduly hinder or harm other critical aspects of the Joint Strike Fighter program. Finally, the conferees direct that normal reprogramming procedures be followed as necessary to execute funding for this purpose.
ENERGETICS RESEARCH

The conferees direct the Under Secretary of Defense (Research and Engineering) to submit a report to the congressional defense committees not later than 120 days after the enactment of this Act on current investments of the Department of Defense in energetics research. The report shall include a comparison of investments in energetics among the Services as well as a strategic roadmap for future energetics research.

HYPERSONICS RESEARCH PARTNERSHIPS

The conferees support hypersonics partnerships between the Defense Advanced Research Projects Agency and the military Services and recommend fully funding these partnerships. The conferees understand that the development of hypersonic weapons will require a long-term vision, beyond the Services' current mission needs and capabilities. Therefore, the conferees encourage the Under Secretary of Defense (Research and Engineering) to consider establishing a partnership with one or more universities focused on hypersonics research and education with the mission of developing next-generation hypersonics capabilities and building a highly-skilled, technically-trained workforce.

ACCELERATED ACQUISITIONS

The fiscal year 2019 budget request includes $1,402,333,000, an increase of 150 percent over amounts enacted in fiscal year 2018, for programs designated as accelerated acquisitions in accordance with Chief of Naval Operations and Secretary of the Navy Instructions 5000.53 and 5000.42, respectively. The conferees support efforts to rapidly deliver capability to the warfighter in a responsible manner and recommend $1,072,585,000 for these programs in fiscal year 2019.

The conferees are concerned by repeated instances in which the designation as an accelerated acquisition program has led to imprudent program management decisions affecting contracting actions and funding execution.

Therefore, the conferees direct the Assistant Secretary of the Navy (Research, Development and Acquisition) and the Assistant Secretary of the Navy (Financial Management and Comptroller) to submit a report to the congressional defense committees, not later than 30 days after the enactment of this Act, on acquisition strategy management and fiscal controls in place to ensure the appropriate management of resources for Navy accelerated acquisition programs.

The conferees direct the Assistant Secretary of the Navy (Research, Development and Acquisition) to provide the congressional defense committees with the submission of the fiscal year 2020 budget request, the acquisition strategy for each designated accelerated acquisition program. The conferees further direct the Assistant Secretary of the Navy (Financial Management and Comptroller) to certify that the fiscal year 2020 budget request fully funds such acquisition strategies, to include the associated test requirements identified in the detailed test approach developed for each program, as agreed to by the Chief of Naval Operations, the Assistant Secretary of the Navy (Research, Development and Acquisition), and the Director, Operational Test and Evaluation per previous congressional direction. The conferees reiterate previous congressional direction with respect to the role of the Director, Operational Test and Evaluation under accelerated acquisition and rapid prototyping, to include early insight into service acquisition intentions.

Finally, the conferees direct the Assistant Secretary of the Navy (Research, Development and Acquisition) to identify to the congressional defense committees with the fiscal year 2020 budget submission, any additional training requirements levied on the acquisition workforce associated with the execution of accelerated acquisition programs.

TEST AND EVALUATION SUPPORT

The conference agreement provides funding as requested within the Major Test and Evaluation Investment program element for the planning and design of three military construction projects under the Defense Laboratory Modernization Pilot Program authorized by the National Defense Authorization Act for Fiscal Year 2016. These specific projects are authorized by the National Defense Authorization Act for Fiscal Year 2019, but the conferees understand that funding for construction will be requested in fiscal year 2020. This language replaces the language under the heading “Test and Evaluation Support” in House Report 115–769.

SPACE SOLAR POWER PROGRAM

The conferees understand that the Space Solar Power Program is a priority for the Air Force but have concerns that the submitted budget justification materials do not include sufficient requirements, scheduling, or cost detail to adequately judge the merits of rapid acquisition or the ability of the Space Rapid Capabilities Office to achieve it. Consequently, the conference agreement reduces funding for the program’s air demonstration by $105,000,000 and designates the program as a new start and congressional special interest item. The conferees direct the Secretary of the Air Force to submit detailed funding plans for the Space Solar Power Program with the fiscal year 2020 budget request submission.

RESEARCH, DEVELOPMENT, TEST AND EVALUATION, DEFENSE-WIDE

The agreement provides $23,691,836,000 for Research, Development, Test and Evaluation, Defense-Wide, as follows:
## RESEARCH, DEVELOPMENT, TEST AND EVALUATION (RDT&E), DEFENSE-WIDE

REPROGRAMMING GUIDANCE FOR THE DEFENSE HEALTH PROGRAM

The conferees remain concerned about the transfer of funds from the In-House Care budget sub-activity group to pay for contractor-provided medical care and the reprogramming of funds from the Private Sector Care budget sub-activity group to Department priorities outside of the Defense Health Program. To limit such transactions and improve oversight within the Defense Health Program operation and maintenance account, the conferees direct that the In-House Care and Private Sector Care budget sub-activities remain designated as congressional special interest items. Any transfer of funds into or out of these sub-activities requires the Secretary of Defense to follow prior approval reprogramming procedures. This should not be interpreted as limiting the amount of funds that may be transferred to the In-House Care budget sub-activity from other budget sub-activities within the Defense Health Program.

Additionally, the conferees direct the Assistant Secretary of Defense (Health Affairs) to provide quarterly reports to the congressional defense committees on budget execution data for all of the Defense Health Program budget activities and to adequately reflect changes to the budget activities requested by the Services in future budget submissions.

CARRYOVER

The conferees recommend one percent carryover authority for the operation and maintenance account of the Defense Health Program. The conferees direct the Assistant Secretary of Defense (Health Affairs) to submit a detailed spending plan for any fiscal year 2018 designated carryover funds to the congressional defense committees not less than 30 days prior to executing the carryover funds.

PEER-REVIEWED CANCER RESEARCH PROGRAM

The conference agreement provides $90,000,000 for the peer-reviewed cancer research program to research cancers not addressed in the breast, prostate, ovarian, kidney, lung, and melanoma cancer research programs.

The funds provided in the peer-reviewed cancer research program are directed to be used to conduct research in the following areas: bladder cancer, blood cancers, brain cancer, colorectal cancer, immunotherapy, listeria vaccine for cancer, liver cancer, lymphoma, mesothelioma, neuroblastoma, pancreatic cancer, pediatric brain tumors, stomach cancer, rare cancers, and cancer in children, adolescents, and young adults.

The reports directed under this heading in House Report 115–769 and Senate Report 115–290 are still required.

PEER-REVIEWED MEDICAL RESEARCH PROGRAM

The conference agreement provides $350,000,000 for a peer-reviewed medical research program. The conferees direct the Secretary of Defense, in conjunction with the Service Surgeons General, to select medical research projects of clear scientific merit and direct relevance to military health. Research areas considered
under this funding are restricted to the following areas: acute lung injury, antimicrobial resistance, arthritis, burn pit exposure, cardiomyopathy, cerebellar ataxia, chronic migraine and post-traumatic headache, congenital heart disease, constrictive bronchiolitis, diabetes, dystonia, eating disorders, emerging infectious diseases, epidermolysis bullosa, focal segmental glomerulosclerosis, frontotemporal degeneration, Guillain-Barre syndrome, hemorrhage control, hepatitis B, hereditary angioedema, hydrocephalus, immunomonitoring of intestinal transplants, inflammatory bowel diseases, interstitial cystitis, lung injury, metals toxicology, mitochondrial disease, musculoskeletal disorders, myotonic dystrophy, nanomaterials for bone regeneration, nutrition optimization, pathogen-inactivated blood products, polycystic kidney disease, post-traumatic osteoarthritis, pressure ulcers, pulmonary fibrosis, resilience training, respiratory health, Rett syndrome, rheumatoid arthritis, scleroderma, sleep disorders, spinal muscular atrophy, tinnitus, tissue regeneration, tuberculosis, vascular malformations, and women’s heart disease. The additional funding provided under the peer-reviewed medical research program shall be devoted only to the purposes listed above.

ELECTRONIC HEALTH RECORDS

The conferees direct the Program Executive Officer (PEO) for Defense Healthcare Management Systems (DHMS), in conjunction with the Director of the Interagency Program Office (IPO), to provide quarterly reports to the congressional defense committees on the cost and schedule of the electronic health record program, to include milestones, knowledge points, and acquisition timelines, as well as quarterly obligation reports. These reports should also include any changes to the deployment timeline, including benchmarks, for full operating capability and the total lifecycle cost of the project; and the progress toward developing, implementing, and fielding the interoperable electronic health record throughout the medical facilities of the Department of Defense and the Department of Veterans Affairs. The PEO DHMS is further directed to continue briefing the House and Senate Defense Appropriations Subcommittees on a quarterly basis, coinciding with the report submission.

The conferees also direct the Director of the IPO to continue to provide quarterly reports to the House and Senate Appropriations Committees, Subcommittees on Defense and Military Construction, Veterans Affairs, and Related Agencies on the progress of interoperability between the two Departments.

Additionally, the conferees direct the Comptroller General to perform a review of the implementation of MHS GENESIS at the four currently active sites and submit a report to the House and Senate Appropriations Committees not later than 180 days after the enactment of this Act. The report should include, but not be limited to, how MHS GENESIS is addressing the concerns raised by the Initial Operational Test and Evaluation report; the performance of MHS GENESIS in meeting the demands of each of the medical facilities; underlying issues with implementation; anticipated delays in implementation; and the impact on the execution
of funds. The conferees also direct the Comptroller General to perform quarterly reviews of the electronic health record deployment.

**COMBAT READINESS MEDICAL RESEARCH**

The conference agreement provides $15,000,000 for Combat Readiness Medical Research. The conferees direct the Assistant Secretary of Defense (Health Affairs) to competitively award this funding to support the activities described under the heading “Joint Warfighter Medical Research Program” of House Report 115–769.

**TRAUMA TRAINING**

The conferees direct the Secretary of Defense to submit a report to the congressional defense committees not later than 180 days after the enactment of this Act on improving trauma training for trauma teams of the Department of Defense, including through the use of the Joint Trauma Education and Training Directorate established under section 708 of the National Defense Authorization Act for Fiscal Year 2017. The report should include recommendations on how to best coordinate trauma teams of the Department of Defense with trauma partners in the civilian sector, including evaluating how trauma surgeons and military physicians can best partner with civilian level I trauma centers that are verified by the American College of Surgeons, including those that are linked to a burn center that offer burn rotations and clinical experience, to provide adequate training and readiness of the next generation of medical providers to treat critically injured burn patients and other military trauma victims.

**LEAD ASSESSMENTS AND TESTING FOR INFANTS**

The conferees recognize the importance of screening and testing children for elevated blood lead levels to prevent childhood lead toxicity. Therefore, the conferees direct the Secretary of Defense to provide risk assessments and targeted blood testing for elevated blood lead levels to all TRICARE beneficiary children during their 12-month and 24-month wellness checks or annual physical examinations.

**CHEMICAL AGENTS AND MUNITIONS DESTRUCTION, DEFENSE**

The Peshmerga forces of the Kurdistan Region of Iraq have made, and continue to make, significant contributions to the United States-led campaign to degrade, dismantle, and ultimately defeat the Islamic State of Iraq and Syria (ISIS) in Iraq. A lasting defeat of ISIS is critical to maintaining a stable and tolerant Iraq in which all faiths, sects, and ethnicities are afforded equal protection and full integration into the government and society of Iraq.

In support of counter-ISIS operations and in conjunction with the central government of Iraq, the United States should provide the Ministry of Peshmerga forces of the Kurdistan Region of Iraq $290,000,000 in operational sustainment, so that the Peshmerga forces can more effectively partner with the Iraqi Security Forces, the United States, and other international coalition members to consolidate gains, hold territory, and protect infrastructure from ISIS and its affiliates in an effort to deal a lasting defeat to ISIS and prevent its reemergence in Iraq.

AFGHANISTAN SECURITY FORCES FUND BUDGET SUBMISSION REQUIREMENTS

The conferees appreciate the efforts of the Department of Defense to comply with prior year direction to provide detailed execution information concurrent with the budget request and Financial Activity Plan (FAP) submissions for the Afghanistan Security Forces Fund (ASFF) appropriation. However, the Department remains unable to provide an accurate accounting of current and prior year spending at the budget justification request line level, which challenges effective congressional budget analysis and oversight. The conferees are also concerned that the budget flexibility allowed with the ASFF appropriation has led to unclear funding requirements and a lack of budget discipline and risks wasteful spending.

Therefore, the conferees continue to direct that the Secretary of Defense shall provide budget justification materials that include the budget request amount, the prior year appropriated amount, and the actual obligation amount by line item for the prior two years. In addition, concurrent with the submission of each FAP, the Secretary of Defense shall provide the congressional defense committees with line item detail of planned funding movements within each ASFF sub-activity group using line item titles from the appropriate year’s budget justification submission. Any line item that did not appear in the budget justification submission shall be delineated as a new line item in the line item detail accompanying the FAP.

The conferees agree to forgo the more stringent reprogramming requirements outlined in Senate Report 115–290 in order to provide the Department more time to improve the ASFF budget submission. However, the House and Senate Appropriations Committees intend to revisit this issue during the fiscal year 2020 budget appropriation process if budget justification material continues to be deficient.
The agreement provides $12,627,028,000 for Procurement, as follows:

The conferees continue the commitment to funding research on Alzheimer’s disease and increase funding by $425,000,000 to a total of $2,340,000,000 in fiscal year 2019; increase funding for the All of Us precision medicine initiative by $86,000,000; increase funding for the Brain Research through Advancing Innovative Neurotechnologies (BRAIN) Initiative by $29,000,000; and increase funding for the Cancer Moonshot by $100,000,000. Other increases are described in the Institute and Center headings below. In addition, the conferees provide a funding increase above fiscal year 2018 to every Institute and Center to continue investments in research that will save lives, lead to new drug and device development, reduce health care costs, and improve the lives of all Americans.

The conferees appropriate funds authorized in the 21st Century Cures Act (P.L. 114–255). Per the authorization, $400,000,000 is transferred to the National Cancer Institute (NCI) for cancer research; $57,500,000 to the National Institute of Neurological Disorders and Stroke (NINDS) and $57,500,000 to the National Institute on Mental Health (NIMH) for the BRAIN Initiative; and $196,000,000 will be allocated from the NIH Innovation Fund for the Precision Medicine Initiative cohort ($186,000,000) and regenerative medicine research ($10,000,000).

The Common Fund is supported as a set-aside within the Office of the Director at $606,566,000, plus an additional $12,600,000
to support pediatric research as authorized by the Gabriella Miller Kids First Research Act (P.L. 113–94).

NATIONAL CANCER INSTITUTE (NCI)

Access to Clinical Trials.—The conferees direct NCI to conduct a study to investigate the impact of providing navigation and direct patient expense reimbursement associated with participation in cancer clinical trials on enrollment, retention, patient outcomes, and research outcomes, including among underrepresented and minority communities. NCI shall assess the impact on the overall cost of cancer clinical trials as a component of this study. NCI is encouraged to develop the study in consultation with NCI-designated Cancer Centers, the National Clinical Trials Network, the NCI Community Research Program, and non-profit foundations currently working in this area. The conferees direct NIH to provide a description of NCI’s plans for this study to the Committees on Appropriations of the House of Representatives and the Senate within 90 days from the date of enactment of this Act.

NATIONAL INSTITUTE OF NEUROLOGICAL DISORDERS AND STROKE (NINDS)

Opioids Research.—The conferees continue to provide $500,000,000 in dedicated funding for research related to opioid addiction, development of opioid alternatives, pain management, and addiction treatment. Funding is provided equally to NINDS and the National Institute on Drug Abuse (NIDA) and is in addition to the $774,000,000 NIH is expected to spend in base funding for opioid misuse and addiction treatment as well as pain research.

NATIONAL INSTITUTE OF ALLERGY AND INFECTIOUS DISEASES (NIAID)

Combating Antibiotic-Resistant Bacteria.—The conferees provide $550,000,000 for antibiotic resistance research, an increase of $37,000,000 above fiscal year 2018.

Universal Influenza Vaccine.—The conferees direct NIAID to allocate not less than $140,000,000, an increase of $40,000,000, in fiscal year 2019 to advance basic, translational, and clinical research necessary to develop a universal influenza vaccine. The conferees encourage NIAID to continue to prioritize investment in the basic and clinical scientific research necessary to develop a universal influenza vaccine.

NATIONAL INSTITUTE OF GENERAL MEDICAL SCIENCES (NIGMS)

Institutional Development Awards (IDeA).—The conferees provide $361,573,000 for IDeA, an increase of $10,998,000.

NATIONAL INSTITUTE ON DRUG ABUSE (NIDA)

Opioids Research.—The conferees continue to provide $500,000,000 in dedicated funding for research related to opioid addiction, development of opioid alternatives, pain management, and addiction treatment. Funding is provided equally to NINDS and NIDA and is in addition to the $774,000,000 NIH is expected to spend in base funding for opioid misuse and addiction treatment as well as pain research.
Research Centers in Minority Institutions (RCMIs).—The conferees continue to support the core mission of RCMIs to enhance the research capacity of minority serving institutions to conduct world-class biomedical research that emphasizes minority health and health disparities and to develop new investigators in this area. The conferees expect RCMIs to receive not less than the fiscal year 2018 level with an increase commensurate with the general increase for NIMHD.

NATIONAL CENTER FOR ADVANCING TRANSLATIONAL SCIENCES

Clinical and Translational Science Awards (CTSA).—The conferees provide $559,736,000 for the CTSA program, an increase of $17,025,000 above fiscal year 2018.

Cures Acceleration Network.—The conferees provide up to $80,000,000 for the Cures Acceleration Network.

OFFICE OF THE DIRECTOR (OD)

Frontotemporal Degeneration (FTD).—The conferees encourage NIH to maintain and expand a multi-site infrastructure and network of clinical sites to extend the study of genetic and sporadic FTD cohorts. By supporting this research, researchers may increase our knowledge of the natural history of the disease and build an infrastructure for biomarker discovery and clinical trials in defined FTD cohorts. A key component of this will be to leverage recent advances in information technology to create an infrastructure for FTD research that will collect and record data and samples in a uniform manner, incorporate patient-reported data, and take advantage of new technologies that enable remote monitoring. Development of a data biosphere that supports broad sharing of robust datasets, generated with powerful -omic platforms, will enable the broader community of researchers, including younger investigators and scientists from a wide array of fields, to bring their expertise and intellectual curiosity to bear on the challenges currently confronting the Alzheimer’s disease and related dementias disorders. In this way, the conferees hope to accelerate the understanding of basic disease mechanisms that may be common across forms of dementia and speed the translation of this information into much-needed therapeutics.

Gabriella Miller Kids First Research Act.—The conferees continue bill language for specific funds authorized by the Gabriella Miller Kids First Research Act (P.L. 113–94) within the Common Fund to support the fifth year of the 10-year Pediatric Research Initiative. The conferees request an update in the fiscal year 2020 Congressional Justification on this effort as described in the House and Senate Reports.

OIG Oversight.—The conferees direct the OD to transfer $5,000,000 to the HHS Office of Inspector General (OIG) to support increased oversight of NIH’s grant programs. These funds are in addition to the resources OIG currently dedicates to oversight of NIH. The conferees direct the Inspector General to submit a comprehensive audit plan for its oversight of NIH for fiscal years 2019
and 2020 to the Committee on Appropriations of the House of Representatives and the Senate, the Senate Committee on Health, Education, Labor and Pensions, and the House Committee on Energy and Commerce not later than 60 days from the date of enactment of this Act, and to brief the Committees on its implementation. In particular, the conferees direct the OIG to examine NIH's oversight of its grantees' compliance with NIH policies, including NIH efforts to ensure the integrity of its grant application evaluation and selection processes. The conferees also direct the OIG to examine the effectiveness of NIH's and grantee institutions' efforts to protect intellectual property derived from NIH-supported research.

Portfolio Analysis.—The conferees direct the NIH Director to conduct a comprehensive study and submit a report to Congress not later than one year from the date of enactment of this Act that: (1) includes a portfolio analysis of current funding levels for mental health and substance use disorder, and (2) identifies the process by which the NIH set funding priorities for mental health and substance use disorder programs, including how NIH takes into account newly developed public health needs, disease burden, emerging scientific opportunities, and scientific progress.

Executive Employee Performance Bonuses.—The conferees direct the NIH Director to provide the Committees on Appropriations of the House of Representatives and the Senate with information not later than ten days from the date of enactment of this Act showing the bonus that each NIH executive employee was eligible to receive in fiscal years 2015, 2016, and 2017, and the portion of that bonus that each executive ultimately received in each of those three years. In addition, the conferees direct NIH to list all of the employees who report directly to the Director, and describe the formal and informal processes the Director uses to provide regular feedback to his direct reports and assess their performance. Finally, the conferees direct NIH to describe the process it relies upon to ensure executive performance plans are as much as possible based upon specific performance results and measurable outcomes.

Trisomy 21.—The conferees applaud the NIH for significantly increasing its investment in Down syndrome research and for the NIH Director’s leadership in advancing the trans-NIH initiative the Committees included in the fiscal year 2018 appropriation. The conferees direct NIH to continue to make investments in Down syndrome research that prioritize funding for both research grants and early-stage investigators that will expand the current pipeline of Down syndrome research, as well as the implementation of the new trans-NIH initiative. In addition, the conferees encourage NIH to prioritize funding for research for emerging scientific opportunities to improve the health and neurodevelopment of individuals with Down syndrome and typical individuals at risk for immune system dysregulation, Alzheimer's disease, cancer, cardiovascular disease, and autism.

Valley Fever.—The conferees understand that based on the recommendation of the independent Data and Safety Monitoring Board (DSMB) for the Valley Fever Randomized Controlled Trial (RCT), NIAID has halted enrollment in the RCT due to lack of pa-
tient enrollment, primarily those with Valley Fever. In light of this, the DSMB recommended revising the study protocol. Accordingly, the conferees direct NIAID to revise expeditiously the study design to address the critical need for effective treatment of Valley Fever in order to restart enrolling patients before the end of 2018, including increasing the number of participating healthcare provider enrollment sites. Furthermore, the conferees direct NIAID to work with stakeholders to develop and implement a plan to maximize the number of health care provider patient enrollment sites and raise awareness of this study with the broader public with the goal of increasing patient enrollment. The conferees direct NIAID to provide updates on the Valley Fever RCT revisions on a quarterly basis to the Committees on Appropriations of the House of Representatives and the Senate until patient enrollment is restarted, as well as a report on maximizing health care provider enrollment sites and public awareness plans to increase patient enrollment in the revised RCT within 90 days from the date of enactment of this Act.

SUBSTANCE ABUSE AND MENTAL HEALTH SERVICES ADMINISTRATION (SAMHSA)

The conferees strongly encourage SAMHSA to include as eligible applicants in new funding opportunity announcements, States, political subdivisions of States, Indian tribes or tribal organizations, health facilities, or programs operated by or in accordance with a contract or grant with the Indian Health Service, or other public or private nonprofit organizations. The conferees strongly encourage SAMHSA to exercise maximum flexibility when developing funding opportunity announcements to ensure that all eligible applicants may apply.

MENTAL HEALTH

Certified Community Behavioral Health Clinics.—The conferees include $150,000,000 for the Certified Community Behavioral Health Clinics program. SAMHSA should award funds in accordance with the directives found under this heading in Senate Report 115–289.

National Child Traumatic Stress Initiative.—The conferees include an increase of $10,000,000 for the National Child Traumatic Stress Initiative. This increase is for the following activities, which are subject to the first proviso under this heading in the accompanying bill language: (1) $4,000,000 for mental health services for unaccompanied alien children, with a special focus on children who were separated from a parent or family unit and subsequently classified as unaccompanied alien children, (2) $3,000,000 for mental health services for children in Puerto Rico, (3) $1,000,000 to expand access to tribal populations, and (4) $2,000,000 for activities authorized under section 582(d) and (e) of the Public Health Service Act. In order to award funds not later than December 1, 2018, the conferees direct SAMHSA to take administrative action that would provide supplemental awards to existing grantees in the National Child Traumatic Stress Network who have already received Federal funding through a competitive process.
Within the total provided for Mental Health Programs of Regional and National Significance (PRNS), the conferees include the following amounts:

The conferees include an increase of $50,000,000 for the Low Income Home Energy Assistance Program. This program provides critical assistance with home energy costs to low-income households, with a focus on seniors and homes with young children. Such assistance can be particularly valuable for geographic regions that experience extreme temperatures in the winter and summer months.

**REFUGEE AND ENTRANT ASSISTANCE**

The conferees note that the front matter of this joint explanatory statement establishes that language included in the House and Senate Reports should guide the Department. In cases where either the House or Senate Report address a particular issue not addressed in this joint explanatory statement, the House or Senate Report language is deemed to carry the same emphasis as language included in this joint explanatory statement. Accordingly, the conferees expect the Department to adhere to all directives and reporting requirements in House Report 115–862 and Senate Report 115–289 related to the Unaccompanied Alien Children and refugee and
entrant assistance programs. The conferees request an update on all reporting requirements in the fiscal year 2020 Congressional Justification.

Refugee Support Services.—Given recent fluctuations in refugee arrivals, consolidation of programs administered by the Office of Refugee Resettlement, and announced policy changes to State Department programs related to national resettlement networks, the Committees on Appropriations of the House of Representatives and the Senate request a briefing not later than 45 days after the date of enactment of this Act. Such briefing shall address the Office of Refugee Resettlement’s plans to ensure adequate services for eligible populations, to include refugees, asylees, trafficking victims, Cuban or Haitian entrants, and Special Immigrant Visa holders.

Stop, Observe, Ask, Respond (SOAR) Program.—The conferees include not less than the fiscal year 2018 level to carry out the SOAR to Health and Wellness Program to train health care and social service providers on how to identify, treat, and respond appropriately to human trafficking.

Unaccompanied Alien Children and the Administration of Medication.—Except in the case of a medical emergency, the Office of Refugee Resettlement of the Administration for Children and Families shall assure that prior to being dispensed psychotropic medication, an unaccompanied alien child (as defined in section 462(g)(2) of the Homeland Security Act of 2002 (6 U.S.C. 279(g)(2))) in the care of such Office receives a physical and mental health evaluation, including by a qualified pediatric mental health professional, including a trauma assessment and an assessment for comorbidities.

Unaccompanied Alien Children and Questions Relating to Religion.—None of the funds made available by this Act may be used by the Office of Refugee Resettlement of the Administration for Children and Families, or any contractor of such Office, to ask any question or to gather any information relating to the religion, the practice of religion, or the frequency of religious observation of a child who was separated from a parent or legal guardian and sub-
sequently classified as an unaccompanied alien child (as defined in section 462(g)(2) of the Homeland Security Act of 2002 (6 U.S.C. 279(g)(2))) or of that child’s parent or legal guardian, during the process of reunifying such a child with that parent or legal guardian, except for the purpose of accommodating the religious preferences of the child or parent or legal guardian, or for the purpose of a claim of the child or parent or legal guardian under the immigration laws (as such term is defined in section 101 of the Immigration and Nationality Act (8 U.S.C. 1101)) related to persecution on the basis of religion.

Victims of Trafficking.—The conferees include $19,000,000 for services for foreign national victims and $7,755,000 for services for U.S. citizens and legal permanent residents.

The conferees direct ACF to provide technical assistance to States on best practices and evidence-based interventions in this area to help address the health, safety, and substance use disorder treatment needs of the child and family, and to evaluate State’s activities on plans of safe care.

Child Abuse Reporting.—In order to improve compliance with the State assurance in regards to section 106(b)(2)(B)(i) of the Child Abuse Prevention and Treatment Act, the conferees strongly support efforts by HHS to develop evidence-informed best practices in State training and procedures to improve reporting of suspected or known incidents of child abuse or neglect to the appropriate law enforcement or child welfare agency (as applicable under State law) and, if applicable, to the individual’s supervisor or employer, including reporting by individuals employed by or volunteering in youth-serving organizations. The conferees request an update in the fiscal year 2020 Congressional Justification on this topic and a briefing on ACF’s child abuse programs within 90 days after the date of enactment of this Act.

Child Abuse Discretionary Activities.—Within the funding for Child Abuse Discretionary Activities, the conferees include $1,000,000 to continue support for an innovation grant to develop text- and online chat-based intervention and education services through a national child abuse hotline for child abuse victims and concerned adults. In addition to funds previously provided for this purpose, the conferees direct ACF to obligate the entire funding to support one additional year of the grant.

Native American Programs.—The conferees include $12,000,000 for Native American language preservation activities, including $3,000,000 for Generation Indigenous, and not less than $4,000,000 for language immersion programs authorized by section 803C(b)(7)(A)–(C) of the Native American Programs Act.

Runaway and Homeless Youth.—The conferees include $120,280,000 for the Runaway and Homeless Youth program. The conferees direct the Department to provide funding to the grantees whose awards end on March 31, 2019 to continue services through the end of fiscal year 2019. ACF may use any remaining funding for new awards after funds have been reserved for completing extensions to ensure grantees awarded grants in fiscal year 2014 are able to operate through the end of fiscal year 2019.

PROMOTING SAFE AND STABLE FAMILIES

Kinship Navigator Programs.—The conferees continue $20,000,000 in temporary bridge funding for kinship navigator programs in fiscal year 2019 because the Department has not yet identified which evidence-based programs are eligible for funding or issued other guidance to States about how to claim the IV–E matching funds for this purpose. The conferees expect HHS to identify eligible approaches and issue guidance in time for States to use IV–E funds for kinship programs.

Regional Partnership Grants.—The conferees include $20,000,000 for Regional Partnership Grants to improve the coordination of services for children and families affected by opioid and other substance use disorders. The conferees strongly encourage ACF to prioritize applicants who will focus on preparing programs to qualify as evidence-based foster care prevention services under the Family First Prevention Services Act (P.L. 115–123), to include family-focused residential treatment programs, which help families remain together safely while parents receive treatment.

Education Innovation and Research (EIR).—Within the total for EIR, the conferees include $60,000,000 for STEM education activities, including computer science.

Charter Schools Program.—The conferees include $135,000,000, an increase of $15,000,000, for replicating and expanding high-quality charter school models; $235,000,000, an increase of $19,000,000, for grants to State entities to support high-quality charter schools; and $55,000,000 for facilities financing assistance, of which not less than $45,000,000 shall be for the Credit Enhancement program. In addition, the conferees include up to $7,500,000 for developer grants to establish or expand charter schools in underserved, high-poverty, rural areas, as described in Senate Report 115–289.

SAFE SCHOOLS AND CITIZENSHIP EDUCATION

Within School Safety National Activities, not more than $10,000,000 may be for a demonstration program to test and evaluate innovative partnerships between institutions of higher education and States or high-need local educational agencies to train school counselors, social workers, psychologists, or other mental health professionals qualified to provide school-based mental health services, with the goal of expanding the pipeline of these workers into low-income public elementary schools and secondary schools in order to address the shortages of mental health service professionals in such schools.

SPECIAL EDUCATION

Within the total for Technical Assistance and Dissemination, $17,583,000 is for education activities authorized under P.L. 108–406, as amended.
SPECIAL INSTITUTIONS

The conferees include funding for regional partnerships under the headings American Printing House for the Blind, National Technical Institute for the Deaf, and Gallaudet University in the amounts and as described in Senate Report 115–289.

CAREER, TECHNICAL AND ADULT EDUCATION

The conferees agree that the Secretary should use the authority in the Carl D. Perkins Career and Technical Education Act to award innovation and modernization grants. These grants can support coding programs that can be particularly important in rural and underserved areas that do not have access to coding resources.

STUDENT FINANCIAL ASSISTANCE

The conferees include a $100 increase in the discretionary maximum Pell grant award, increasing the total maximum award, including additional mandatory funding, to $6,195 in award year 2019–2020.

HIGHER EDUCATION

GEAR UP.—The conferees direct the Department to announce Notices Inviting Applications for New Awards for State Grants and Partnership Grants in the Federal Register. In such notice for State grants, the conferees direct the Department to uphold the long-standing guidance that States may only administer one active State GEAR UP grant at a time. The Secretary is directed to provide written guidance in the Federal Register notifying applicants that only States without an active State GEAR UP grant, or States that have an active State GEAR UP grant that is scheduled to end prior to October 1, 2019, will be eligible to receive a new State GEAR UP award funded in whole or in part by this appropriation.

Federal TRIO Programs.—The conferees reiterate concerns communicated in both the House and Senate reports related to the allocation of the fiscal year 2018 funding for TRIO programs. The Department’s plan disregarded House direction to allocate funding in the same ratio as the prior fiscal year. In addition, there is also concern that the Department may be placing burdensome requirements for the existing awardees in order for them to receive any additional funding. The conferees direct the Department to include in its fiscal year 2020 Congressional Justification information about how these additional funds were awarded, including a detailed budget justification. Additionally, the conferees expect plans for funding allocations by activity within the TRIO programs to be included in the operating plan required under section 516 of this Act. Last, the conferees direct the Department to brief the Committees on Appropriations of the House of Representatives and the Senate on final funding allocations at least 30 days prior to the awarding of additional funding and/or the posting of a Notice Inviting Applications for New Awards.

Open Textbooks Pilot.—The conferees recommend that the Secretary award the funds provided in this Act through a new competition and make not less than 20 new grants with individual
The conferees recommend that the application deadline for the notice inviting grant applications for fiscal year 2019 be not less than 60 days from the date the notice is published. Further, any tools, technologies, or other resources that are created, developed, or improved wholly or in part with Pilot funds for use with an open textbook must be licensed under a worldwide, non-exclusive, royalty-free, perpetual, and irrevocable license to the public to exercise any of the rights under copyright conditioned only on the requirement that attribution be given as directed by the copyright owner.

**Historically Black College and University Capital Financing Program**

The conferees include additional funding for the deferment of outstanding loans for private historically Black colleges and universities. Based on current estimates, the conferees expect this funding will allow the Department to fund all 13 eligible requests for loan deferment it received during fiscal year 2018.

**Institute of Education Sciences**

The conferees direct the National Assessment Governing Board to brief the Committees on Appropriations of the House of Representatives and the Senate within 60 days from the date of enactment of this Act on the resources required to administer a long-term trend assessment by 2021.

**Departmental Management**

The conferees note that the front matter of this joint explanatory statement establishes that the Department should be guided by language included in the House and Senate Reports, and when the House or Senate Report address a particular issue not addressed in this explanatory statement, the House or Senate Report should carry the same emphasis as language included in this explanatory statement.

The conferees reiterate concern expressed in Senate Report 115–289 regarding the Department’s responsiveness to technical assistance requests and continues to note that it expects the Department to comply in a timely manner with its requests for technical assistance and information, consistent with past practice including timely answers that respond to any specific inquiries.

**Computer Science Education.**—The conferees agree that computer science education programs, including coding academies, can provide important benefits to local industries and the economy and help meet in-demand workforce needs. Therefore, the Departments of Labor and Education should work together with industry to improve and expand computer science education programs and opportunities, including through apprenticeships.

**Reorganization.**—The conferees acknowledge the Department’s efforts to brief congressional committees on its reorganization plans. However, concerns remain that the views of stakeholders are not being adequately addressed. In particular, the conferees recognize the value of the Office of English Language Acquisition and the Office of Career, Technical and Adult Education (OCTAE) and
are concerned that the elimination or consolidation of either office will undermine the ability of the Department to fulfill not only its mission, but also congressional directives to implement relevant programs and purposes. Further, the conferees note that OCTAE is authorized expressly in statute and cannot be consolidated or reorganized except by specific authority granted by Congress.

**STEM Education.**—The conferees direct the Secretary to submit the report described in section 313 of division B of H.R. 6157 as passed by the Senate on August 23, 2018.

**Study on School Facilities.**—The conferees delete without prejudice section 315 of the Senate bill and direct the Comptroller General of the United States to conduct a study on the condition of the public school facilities (including charter schools) of the United States and their adequacy to support a 21st century education as described in section 315 of division B of H.R. 6157 as passed by the Senate on August 23, 2018.

**GENERAL PROVISIONS**

The conferees include a new provision allowing administrative funds to cover outstanding Perkins loans servicing costs.

The conferees include a new provision allowing for loan deferment for borrowers with certain medical conditions.

The Railroad Retirement Board is directed to continue to submit quarterly updates to the Committees on Appropriations of the House of Representatives and the Senate on the project status, completed and remaining activities, timelines to completion, and the total cost of development until project completion.

SOCIAL SECURITY ADMINISTRATION (SSA)

LIMITATION ON ADMINISTRATIVE EXPENSES

Administrative Law Judges.—It is vital that Administrative Law Judges (ALJs) be independent, impartial, and selected based on their qualifications. The conferees expect SSA to maintain a high standard for the appointment of ALJs, including the requirement that ALJs have demonstrated experience as a licensed attorney and pass an ALJ examination administered by the Office of Personnel Management.

Consultative Examinations.—The conferees support efforts by SSA to pursue, where practicable, and in conjunction with State Disability Determination Services, pilot demonstrations that would evaluate the feasibility of, potential administrative savings from, and potential for improvements in the quality of consultative examinations from the implementation of contracts for consultative examinations. In addition, the conferees request SSA include in its fiscal year 2020 Congressional Justification the following information: (1) annual number of consultative examinations, including the number for each State, (2) the percentage of applicants who require a consultative exam, and the share of those exams which are conducted by the treating medical provider, nationally and for each state, (3) the number of days for consultative examination comple-
tion nationally, including the number of days for each State, and (4) the total cost of consultative examinations nationally, including the cost of consultative examinations by State.

Disability Case Processing System (DCPS).—The conferees support efforts to modernize the case processing systems used by State Disability Determination Service agencies. Division H of the Consolidated Appropriations Act, 2018 underscored States’ ability to select from all available options to modernize their case processing systems. The conferees remain concerned with the progress of the DCPS upgrade. Within 90 days from the date of enactment of this Act, SSA shall submit a report to the Committees on Appropriations of the House of Representatives and the Senate and the authorizing committees of jurisdiction. Such report shall include: (1) an update on the actions taken by SSA to permit States the ability to select from available options, including commercial off the shelf (COTS) solutions, to modernize their case processing systems, so long as the selected option has similar or better functionality as DCPS without imposing costs that are higher than using DCPS, (2) actions taken by SSA to enable COTS field production deployment, and (3) a description of any challenges, cost constraints, or legal barriers to implementation from available options.

Work Incentives Planning and Assistance (WIPA) and Protection and Advocacy for Beneficiaries of Social Security (PABSS).—The conferees include $23,000,000 for WIPA and $7,000,000 for PABSS.
