IN THE HOUSE OF REPRESENTATIVES

Mr. GRIJALVA (for himself and Mr. THOMPSON of Mississippi) introduced the following bill; which was referred to the Committee on Education and Labor

A BILL

To provide grants to States to ensure that all students in the middle grades are taught an academically rigorous curriculum with effective supports so that students complete the middle grades prepared for success in secondary school and postsecondary endeavors, to improve State and local educational agency policies and programs relating to the academic achievement of students in the middle grades, to develop and implement effective middle grades models for struggling students, and for other purposes.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Success in the Middle
5 Act of 2019”.

6 **SEC. 2. FINDINGS.**

7 Congress finds the following:

8 (1) Research shows that Federal funding for
9 students in middle school and high school, particu-
10 larly grades 6 through 12, is significantly lower than
11 funding for elementary and postsecondary students.

12 (2) International comparisons indicate that stu-
13 dents in the United States do not start out behind
14 students of other nations in mathematics and
15 science, but that they fall behind by the end of the
16 middle grades.

17 (3) Approximately 65 percent of students in
18 grade 8 read below the proficient level on the 2017
19 National Assessment of Educational Progress. A lit-
20 tle over one-third of students in grade 8 in the
21 United States, and approximately 5 percent of such
22 students who are English learners, can read with
23 proficiency, according to the 2017 National Assess-
24 ment of Educational Progress.

1 (4) In mathematics, 37 percent of students in
2 grade 8 show skills at or above the proficient level
3 on the 2017 National Assessment of Educational
4 Progress. However, the percentage of students in
5 grade 4 at or above the proficient level on such As-
6 sessment was 40 percent. In grade 8, the gaps be-
7 tween the average mathematics scores of White and
8 Black students and between White and Hispanic
9 students were approximately as wide in 2017 as in
10 2015.

11 (5) By grade 6, a student who attends school
12 less than 80 percent of the time, receives unsatisfac-
13 tory marks for mild but sustained misbehavior, or
14 who fails English or mathematics, has only a 10 to
15 20 percent chance of graduating on time. Without
16 effective interventions and proper supports, these
17 students are at risk of subsequent failure in sec-
18 ondary school, or of dropping out.

19 (6) Approximately 55 percent of students in
20 grades 5 through 12 are engaged in the learning
21 process, while 28 percent are unengaged or mentally
22 checked out and 17 percent are actively disengaged
23 and feel negatively about school, according to a 2013
24 Gallup Student Poll. Additionally, 54 percent of stu-
25 dents are hopeful, while 32 percent feel stuck and

1 14 percent feel discouraged, about their future suc-
2 cess at school and beyond.

3 (7) Student transitions from elementary school
4 to the middle grades and to secondary school are
5 often complicated by poor curriculum alignment, in-
6 adequate counseling services, and unsatisfactory
7 sharing of student performance and academic
8 achievement data between grades.

9 (8) Middle grades improvement strategies
10 should be tailored based on a variety of performance
11 indicators and data, so that—

12 (A) educators can create and implement
13 successful school improvement strategies to ad-
14 dress the needs of the middle grades; and

15 (B) teachers can provide effective instruc-
16 tion and adequate assistance to meet the needs
17 of at-risk students.

18 (9) Middle grade teachers face unique chal-
19 lenges due to the increased individual subject matter
20 focus of the curriculum combined with the physical,
21 intellectual, and emotional changes faced by early
22 adolescents transitioning from elementary school to
23 high school.

24 (10) Combining measures of academic achieve-
25 ment and motivation, social engagement, and self-

1 regulation—the behavioral domains essential for suc-
2 cess across the school and work continuum—pro-
3 vides a more holistic picture of students, including
4 their likelihood of enrolling in an institution of high-
5 er education following high school graduation. This
6 information, available in middle school, allows for
7 early identification of and intervention with students
8 who may be less likely to complete secondary school
9 and attend an institution of higher education.

10 (11) Appropriate academic accommodations,
11 age-appropriate discipline, access to assistive tech-
12 nology, and evidence-based interventions must be
13 used with students with disabilities, particularly in
14 the middle grades, as—

15 (A) the dropout rate for learning disabled
16 students is nearly 3 times the dropout rate of
17 all students;

18 (B) more than half of young adults with
19 learning disabilities have been involved in the
20 justice system; and

21 (C) students with disabilities have a grad-
22 uation rate nearly 20 percentage points lower
23 than the graduation rate for general education
24 students.

1 (12) Local educational agencies and State edu-
2 cational agencies often do not have the capacity to
3 provide support for school improvement strategies.
4 Successful models do exist for turning around low-
5 performing middle grades, and Federal support
6 should be provided to increase the capacity to apply
7 promising practices based on evidence from success-
8 ful schools.
