(6) Rev. James E. Lawson, Jr., a leading theorist and strategist, helped spread the philosophy and doctrine of nonviolence by organizing and teaching workshops to young activists during the American Civil Rights Movement.

(7) During his Presidency, Nelson Rolihlahla Mandela expanded the spirit of ubuntu, the African philosophy of the interconnectedness, caring, shar-
ing, and harmony of humanity, throughout the world.

(8) According to the 2019 Global Peace Index, violence cost $14,100,000,000 in constant purchasing power parity terms or $1,853 per person in 2018. The fiscal loss resulting from conflict greatly exceeds investments in peacebuilding and peacekeeping.

(9) Given its proven success and evolution, the philosophy and doctrine of nonviolence can and should play an important role in breaking the cycle and reducing the frequency of violence throughout the United States and as a model to the global community.

(10) These lessons, principles, and practices should be made available to Americans of all ages and backgrounds in all parts of the country.

Subtitle C—Local Public Health
And Safety Protection

SEC. 10301. SHORT TITLE.

This subtitle may be cited as the “Local Public Health And Safety Protection Act”.

SEC. 10302. FINDINGS.

Congress finds the following:

(1) When it comes to gun violence, local laws serve the important purpose of addressing the unique issues and dangers facing each different community.

(2) Most State constitutions generally allocate authority to local governments to regulate in the interests of the public health, safety, and welfare. States that have removed authority from local governments to regulate guns and ammunition have created a dangerous exception to the traditional rule of local authority.

(3) Broad State preemption statutes ignore important local variations that may necessitate distinct approaches to the problem of gun violence. State preemption statutes threaten public safety because they prevent local governments from implementing customized solutions to gun violence in their communities.
(4) By mandating a one-size-fits-all approach to firearms regulation, preemption statutes deprive the public of a critical problem-solving resource—local innovation. Local governments are often the source of cutting-edge laws to reduce gun violence, which are proven successful and later adopted at the statewide level.

(5) State preemption statutes impede local government’s ability to fill regulatory gaps created by inaction at the State and Federal level. Restrictions on State and Federal resources also make an extra level of local involvement necessary to properly enforce many gun laws. For example, local law enforcement may provide much needed oversight of gun businesses, which the Bureau of Alcohol, Tobacco, Firearms & Explosives is too underfunded to provide.

(6) States should not prohibit or restrict a local government from imposing or implementing laws that are more restrictive than the laws of the relevant State with respect to—

(A) any background check requirement in relation to any firearm transaction;
(B) the ability to carry a firearm in public places or in locations owned or controlled by a unit of local government;

(C) any requirement relating to the sale of ammunition, such as a limitation on the amount an individual is allowed to purchase at one time;

(D) any additional requirements relating to licensing or permitting the purchase of a firearm;

(E) any requirement that firearm owners safely store their firearms, or prevent children or any other unauthorized person from accessing their firearms;

(F) taxes on the sale of firearms and ammunition, unless the State prohibits or restricts local governments from imposing such taxes on most other consumer products;

(G) the sale, transfer, or possession of specific types of unusually dangerous firearms and accessories, such as assault weapons, bump stocks, and high capacity magazines;

(H) the discharge of firearms in public parks and other public places;

(I) zoning restrictions on gun dealers; and
(J) purchasing or obtaining a firearm on behalf of a third party.

Subtitle P—Beyond the Box for Higher Education

SEC. 11601. SHORT TITLE.

This subtitle may be cited as the “Beyond the Box for Higher Education Act of 2020”.

SEC. 11602. FINDINGS.

Congress finds the following:

(1) An estimated 70,000,000 Americans have some type of arrest or conviction record that would appear in a criminal background check.

(2) Each year, more than 600,000 people return to society from State or Federal prison.

(3) Nearly 11,000,000 Americans are admitted to city and county jails each year, with an average daily population of more than 700,000 people.
(4) An estimated 2,100,000 youth under the age of 18 are arrested every year in the United States.

(5) 1,700,000 juvenile delinquency cases are disposed of in juvenile courts annually.

(6) Juvenile records are not always confidential; many States disclose information about youth involvement with the juvenile justice system or do not have procedures to seal or expunge juvenile records.

(7) The compounding effects of collateral consequences due to criminal justice involvement hinder the ability of individuals to reenter society successfully.

(8) People of color and low-income people are disproportionately impacted by the collateral consequences of criminal justice involvement.

(9) Incarceration leads to decreased earnings, unemployment, and poverty.

(10) Upon reentry, lower educational attainment, a lack of work skills or history, and the stigma of a criminal record can hinder a formerly incarcerated person’s ability to return to their communities successfully.
(11) One way to improve reentry outcomes is to increase educational opportunities for people with a criminal or juvenile justice history.

(12) By reducing rearrests and reconvictions, and by increasing educational attainment, formerly incarcerated individuals are better situated to find stable employment, contributing to their communities.

“(B) If an institution of higher education determines that it is appropriate to remove criminal or juvenile justice questions from the institution’s application for admissions process, it is recommended that the institution comply with the following:

“(i) If criminal or juvenile justice questions are necessary for the other aspects of the institution’s interactions with applicants, identify those specific interactions in which it is appropriate to ask such questions.

“(ii) In nonadmissions interactions, inquire about criminal or juvenile justice
history transparently and clearly inform applicants as early as possible how to respond to the inquiry.

“(iii) In nonadmissions inquiries about criminal or juvenile justice history, ensure the questions are specific and narrowly focused, and make it clear that answering the questions may not negatively impact applicants’ chances of enrollment.

“(iv) In nonadmissions inquiries about criminal or juvenile justice history, give applicants the opportunity to explain criminal or juvenile justice involvement and preparedness for postsecondary study.

“(v) Provide staff of the institution who have access to a prospective or current student’s criminal or juvenile justice history, the necessary and proper training on the effective use of criminal or juvenile justice history data, including the problems associated with this information, the types of supporting documents that may need to be obtained, and the appropriate privacy protections that must be put in place.
“(C) If an institution of higher education determines that it is necessary to inquire about the criminal or juvenile justice history of applicants for admission, it is recommended that the institution comply with the following:

“(i) Delay the request for, or consideration of, such information until after an admission decision has been made to avoid a chilling effect on applicants whose criminal or juvenile justice involvement may ultimately be determined irrelevant by the institution.

Subtitle Q—Community Reentry

SEC. 11701. SHORT TITLE.

This subtitle may be cited as the “Community Reentry Act of 2020”.

SEC. 11702. FINDINGS.

Congress finds as follows:

(1) Researchers find that visitation from family and community members help mitigate recidivism rates among incarcerated individuals. Removing geographical barriers for inmates hoping to stay in touch with their families or members of their community may help lower recidivism rates. These continued relationships alleviate the risk of challenges such as unemployment, homelessness, and debt upon release.

(2) In a study of inmates jailed close to home, the Vera Institute of Justice found that most participants rely on family support to stay off of drugs and maintain requirements of parole as well as care for children.

(3) According to the Vera study, more than 80 percent of jailed respondents rely on family for support and more than 70 percent rely on friends. Even while incarcerated, inmates continue to rely heavily
on their family and community outside of prison for basic needs and survival.

(4) Family members report that distance is the greatest barrier to visiting incarcerated relatives while costs, such as transportation, follows. By removing geographical and cost barriers, family members of the incarcerated may have an opportunity to maintain a relationship with their incarcerated loved one.

(5) Incarcerated persons should be afforded opportunities to change and heal. Strengthening relationships between inmates and the family and community members they have left behind will help decrease recidivism rates and heal fragmented familial and community relationships.

SEC. 11703. PRERELEASE CUSTODY.

Section 3624(c)(1) of title 18, United States Code, is amended by adding at the end the following: “Subject to the availability of appropriations and of bed space availability, the Director shall place a prisoner in a residential reentry center that is within 50 miles of the prisoner’s previous or anticipated permanent legal address, except when the prisoner waives his right to be placed in such a center for reasons such as—

“(A) safety of the prisoner or his family;
“(B) physical or mental health; or
“(C) any other reason deemed to be acceptable by the Director.”.

SEC. 11902. STANDARDS FOR DHS DETENTION FACILITIES.

Not later than one year after the date of the enactment of this Act, the Secretary of Homeland Security shall, by rulemaking, establish detention standards for each facility at which aliens in the custody of the Department of Homeland Security are detained. Such standards shall provide, at a minimum, the level of protections for detainees described in the American Bar Association’s Civil Immigration Detention Standards (adopted in August 2012, and as amended in August 2014). On a biennial basis, the Secretary shall review and update such standards, as appropriate.

(a) Periodic Inspections.—

(1) In general.—On a periodic basis, and not less than annually, the Inspector General of the Department of Homeland Security shall conduct an unannounced inspection of each facility at which aliens in the custody of the Department of Homeland Security are detained in order to ensure that each such facility is in compliance with the standards under section 11902. (2) Failure to comply with standards.—

(A) Initial failure.—In the case that the Inspector General determines that a facility has failed to comply with the standards under section 11902 for the first time during any 2-year period, and that such noncompliance constitutes a deficiency that threatens the health, safety, or the due process rights of detainees, the Inspector General shall notify the Secretary...
of Homeland Security of such finding, and the
Secretary shall—

(i) in the case of a facility that is not
owned by the Department of Homeland
Security, impose a meaningful fine of not
less than 10 percent of the value of the
contract with the facility; and

owned by the Department of Homeland
Security—

(I) issue a written warning to the
facility not later than 30 days after
receiving such notification from the
Inspector General, which shall include
remedial measures to be carried out
not later than 60 days after the
issuance of the warning; and

(II) not later than 60 days after
the issuance of the warning described
in subclause (I), certify to the Inspec-
tor General that the remedial meas-
ures have been carried out.

(B) Subsequent failures.—In the case
that the Inspector General determines that a
facility has failed to comply with the standards
under section 11902 in two investigations under
paragraph (1) during any 2-year period, and
that such noncompliance constitutes a defi-
ciency that threatens the health, safety, or the
costitutional rights of detainees, the Inspector
General shall notify the Secretary of Homeland
Security of such finding, and the Secretary
shall—

(i) in the case of a facility that is not
owned by the Department of Homeland
Security, not later than 30 days after re-
ceiving such notification, transfer each de-
tainee to a facility that does so comply,
and terminate the contract with the owner
of the facility; and

(ii) in the case of a facility that is
owned by the Department of Homeland
Security, not later than 60 days after re-
ceiving such notification, transfer each de-
tainee to a facility that does so comply,
and suspend the use of such facility until
such time as the Inspector General cer-

(e) Investigations on Death in Custody.—Not later than 30 days after the death of an alien in the custody of the Department of Homeland Security, the Secretary of Homeland Security shall conduct an investigation into that death, which shall include a root cause analysis that identifies any changes to policies, practices, training curricula, staffing, or potential system-wide errors that could reduce the probability of such an event in the future. Not later than 60 days after such a death, the Secretary shall make a report describing the results of such investigation publicly available on the website of the Department of Homeland Security. The root cause analysis described in the previous sentence must include
appropriately qualified personnel, which, at a minimum,
will consist of a medical professional qualified in any field
germane to the death, and shall be performed in accordance with professional medical standards for investigating
sentinel events in medical care facilities, including the
Sentinel Event Policy promulgated by The Joint Commis-

The Secretary of Homeland Security shall make rules to ensure that any alien who is detained in the custody of the Department of Homeland Security, who is required to appear in Federal or State court (including family court) for another matter, is transported by an officer or employee of the Department of Homeland Security to such court proceeding.

SEC. 11907. PROCEDURES FOR DETAINING ALIENS.

(a) PROBABLE CAUSE AND CUSTODY DETERMINATION HEARINGS.—Section 236 of the Immigration and Nationality Act (8 U.S.C. 1226) is amended—

(1) by amending subsection (a) to read as follows:

“(a) ARREST, DETENTION, AND RELEASE.—On a warrant issued by an immigration judge, or pursuant to section 287(a)(2), the Secretary of Homeland Security may arrest an alien, and in accordance with this section, detain the alien or release the alien on bond, subject to conditions, or recognizance, pending a decision on whether the alien is to be removed from the United States.”;

(2) by striking subsections (b), (c), (d), and (e);
(3) by adding at the end the following:

“(b) Bond Determination.—In the case that an immigration judge makes a determination to release an alien on bond under this section, the immigration judge shall consider, for purposes of setting the amount of the bond, the alien’s financial position and ability to pay the bond without imposing financial hardship on the alien, and set bond at no amount greater than necessary to ensure the alien’s appearance for removal proceedings.

“(c) Custody Determination.—

“(1) Initial Determination.—Not later than 48 hours after taking an alien into custody under the authority provided by this section or section 235 of this Act, or those subject to a reinstated order of removal pursuant to section 241(a)(5) who have been found to have a credible or reasonable fear of return, the Secretary of Homeland Security shall make an initial custody determination with regard to that alien, and provide that determination in writing to the alien. If the Secretary determines that the release of an alien will not reasonably ensure the appearance of the alien as required or will endanger the safety of any other person or the community, the custody determination under this paragraph will im-
pose the least restrictive conditions, as described in
paragraph (4).

“(2) Timing.—If an alien seeks to challenge
the initial custody determination under paragraph
(1), the alien shall be provided with the opportunity
for a hearing before an immigration judge to deter-
mine whether the alien should be detained, which
hearing shall occur not later than 72 hours after the
initial custody determination.

“(3) Presumption of release.—In a hearing
under this subsection, there shall be a presumption
that the alien should be released. The Secretary of
Homeland Security shall have the duty of rebutting
this presumption, which may only be shown based on
clear and convincing evidence, including credible and
individualized information, that the use of alter-
 natives to detention will not reasonably ensure the
appearance of the alien at removal proceedings, or
that the alien is a threat to another person or the
community. The fact that an alien has a criminal
charge pending against the alien may not be the sole
factor to justify the continued detention of the alien.

“(4) Least restrictive conditions re-
quired.—If an immigration judge determines pur-
suant to a hearing under this section that the re-
lease of an alien will not reasonably ensure the appearance of the alien as required or will endanger the safety of any other person or the community, the immigration judge shall order the least restrictive conditions, or combination of conditions, that the judge determines will reasonably ensure the appearance of the alien as required and the safety of any other person and the community, which may include release on recognizance, secured or unsecured release on bond, or participation in a program described in subsection (f). Any conditions assigned to an alien pursuant to this paragraph shall be reviewed by the immigration judge on a monthly basis.

“(5) SPECIAL RULE FOR VULNERABLE PERSONS AND PRIMARY CAREGIVERS.—In the case that the alien who is the subject of a custody determination under this subsection is a vulnerable person or a primary caregiver, the alien may not be detained unless the Secretary of Homeland Security demonstrates, in addition to the requirements under paragraph (3), that it is unreasonable or not practicable to place the individual in a community-based supervision program.

“(6) DEFINITIONS.—In this subsection:
“(A) MATERIAL WITNESS.—The term ‘material witness’ means an individual who presents a declaration to an attorney investigating, prosecuting, or defending the workplace claim or from the presiding officer overseeing the workplace claim attesting that, to the best of the declarant’s knowledge and belief, reasonable cause exists to believe that the testimony of the individual will be relevant to the outcome of the workplace claim.

“(B) PRIMARY CAREGIVER.—The term ‘primary caregiver’ means a person who is established to be a caregiver, parent, or close relative caring for or traveling with a child.

“(x) has been determined by an immigration judge or the Secretary of Homeland Security to be experiencing severe trauma or to be a survivor of torture or gender-based violence, based on information obtained during intake, from the alien’s attorney or legal service provider, or through credible self-reporting.

“(D) WORKPLACE CLAIM.—The term ‘workplace claim’ means any written or oral claim, charge, complaint, or grievance filed with, communicated to, or submitted to the employer, a Federal, State, or local agency or
court, or an employee representative related to
the violation of applicable Federal, State, and
local labor laws, including laws concerning
wages and hours, labor relations, family and
medical leave, occupational health and safety,
civil rights, or nondiscrimination.

“(7) Subsequent determinations.—An
alien who is detained under this section shall be pro-
vided with a de novo custody determination hearing
under this subsection every 60 days, as well as upon
showing of a change in circumstances or good cause
for such a hearing.

“(d) Release upon an order granting relief
from removal.—In the case of an alien with respect to
whom an immigration judge has entered an order pro-
viding for relief from removal, including an order granting
asylum, or providing for withholding, deferral, or cancella-
tion of removal, which order is pending appeal, the Sec-
retary of Homeland Security shall immediately release the
alien upon entry of the order, and may impose only rea-
sonable conditions on the alien’s release from custody.

“(e) Prohibition on detention of children.—
Notwithstanding any other provision of this Act, the Sec-
retary of Homeland Security is prohibited from detaining
anyone under the age of 18 in a facility operated or contracted by U.S. Immigration and Customs Enforcement.

“(f) ALTERNATIVES TO DETENTION.—

“(1) IN GENERAL.—The Secretary of Homeland Security shall establish programs that provide alternatives to detaining aliens, which shall offer a continuum of supervision mechanisms and options, including community-based supervision programs and community support. The Secretary may contract with nongovernmental community-based organizations to provide programs, which may include case management services, appearance assistance services, and screenings of aliens who have been detained.

“(2) INDIVIDUALIZED DETERMINATION REQUIRED.—In determining whether to order an alien to participate in a program under this subsection, the Secretary, or the immigration judge, as appropriate shall make an individualized determination to determine the appropriate level of supervision for the alien. Participation in a program under this subsection may not be ordered for an alien for whom it is determined that release on reasonable bond or recognizance will reasonably ensure the appearance of
the alien as required and the safety of any other
person and the community.

“(3) Prohibition on fees for monitoring
devices.—In a case in which an alien is required to
wear an ankle monitor or other homing device as an
alternative to detention, the alien may not be
charged any fee associated with such monitor or de-
vice that exceeds the cost of maintaining and oper-
ating such monitor or device.”; and

(4) by striking “Attorney General” each place
such term appears and inserting “Secretary of
Homeland Security”.

(b) Probable Cause Hearing.—Section 287(a)(2)
of the Immigration and Nationality Act (8 U.S.C.
1357(a)(2)) is amended by striking “but the alien arrested
shall be taken without unnecessary delay for examination
before an officer of the Service having authority to exam-
ine aliens as to their right to enter or remain in the United
States” and inserting “but the alien arrested shall be pro-
vided with a hearing before an immigration judge not later
than 48 hours after being taken into custody to determine
whether there is probable cause to believe that the alien
does not have the right to enter or remain in the United
States, which burden to establish probable cause shall be
on the Secretary of Homeland Security”.

Subtitle X—Creating a Respectful and Open World for Natural Hair

SEC. 12401. SHORT TITLE.

This subtitle may be cited as the “Creating a Respectful and Open World for Natural Hair Act of 2020” or the “CROWN Act of 2020”.

SEC. 12402. FINDINGS; SENSE OF CONGRESS; PURPOSE.

(a) FINDINGS.—Congress finds the following:

(1) Throughout United States history, society has used (in conjunction with skin color) hair texture and hairstyle to classify individuals on the basis of race.
Like one’s skin color, one’s hair has served as a basis of race and national origin discrimination. Racial and national origin discrimination can and do occur because of longstanding racial and national origin biases and stereotypes associated with hair texture and style.

For example, routinely, people of African descent are deprived of educational and employment opportunities because they are adorned with natural or protective hairstyles in which hair is tightly coiled or tightly curled, or worn in locs, cornrows, twists, braids, Bantu knots, or Afros.

Racial and national origin discrimination is reflected in school and workplace policies and practices that bar natural or protective hairstyles commonly worn by people of African descent.

For example, as recently as 2018, the United States Armed Forces had grooming policies that barred natural or protective hairstyles that servicewomen of African descent commonly wear and that described these hairstyles as “unkempt”.

In 2018, the United States Armed Forces rescinded these policies and recognized that this description perpetuated derogatory racial stereotypes.
(8) The United States Armed Forces also recognized that prohibitions against natural or protective hairstyles that African-American servicewomen are commonly adorned with are racially discriminatory and bear no relationship to African-American servicewomen’s occupational qualifications and their ability to serve and protect the Nation.

(9) As a type of racial or national origin discrimination, discrimination on the basis of natural or protective hairstyles that people of African descent are commonly adorned with violates existing Federal law, including provisions of the Civil Rights Act of 1964 (42 U.S.C. 2000e et seq.), section 1977 of the Revised Statutes (42 U.S.C. 1981), and the Fair Housing Act (42 U.S.C. 3601 et seq.). However, some Federal courts have misinterpreted Federal civil rights law by narrowly interpreting the meaning of race or national origin, and thereby permitting, for example, employers to discriminate against people of African descent who wear natural or protective hairstyles even though the employment policies involved are not related to workers’ ability to perform their jobs.

(10) Applying this narrow interpretation of race or national origin has resulted in a lack of Federal
civil rights protection for individuals who are discriminat
ed against on the basis of characteristics that are commonly 
associated with race and national origin.

(11) In 2019, State legislatures and municipal bodies through-
out the United States have introduced and passed legisla-
tion that rejects certain Federal courts’ restrictive inter-
pretation of race and national origin, and expressly clas-
sifies race and national origin discrimination as inclusive 
of discrimination on the basis of natural or protective 
hairstyles commonly associated with race and national 
origin.

(b) SENSE OF CONGRESS.—It is the sense of Con-
gress that—

(1) the Federal Government should acknowledge that individuals who have hair texture or wear a 
hairstyle that is historically and contemporarily associated with African Americans or persons of Af-
rican descent systematically suffer harmful discrimi-
nation in schools, workplaces, and other contexts based upon longstanding race and national origin stereotypes and biases;

(2) a clear and comprehensive law should address the systematic deprivation of educational, em-
ployment, and other opportunities on the basis of
hair texture and hairstyle that are commonly associated with race or national origin;

(3) clear, consistent, and enforceable legal standards must be provided to redress the widespread incidences of race and national origin discrimination based upon hair texture and hairstyle in schools, workplaces, housing, federally funded institutions, and other contexts;

(4) it is necessary to prevent educational, employment, and other decisions, practices, and policies generated by or reflecting negative biases and stereotypes related to race or national origin;

(5) the Federal Government must play a key role in enforcing Federal civil rights laws in a way that secures equal educational, employment, and other opportunities for all individuals regardless of their race or national origin;

(6) the Federal Government must play a central role in enforcing the standards established under this subtitle on behalf of individuals who suffer race or national origin discrimination based upon hair texture and hairstyle;

(7) it is necessary to prohibit and provide remedies for the harms suffered as a result of race or
national origin discrimination on the basis of hair
texture and hairstyle; and

(8) it is necessary to mandate that school,
workplace, and other applicable standards be applied
in a nondiscriminatory manner and to explicitly pro-
hibit the adoption or implementation of grooming re-
quirements that disproportionately impact people of
African descent.

(e) PURPOSE.—The purpose of this subtitle is to in-
stitute definitions of race and national origin for Federal
civil rights laws that effectuate the comprehensive scope
of protection Congress intended to be afforded by such
laws and Congress’ objective to eliminate race and na-
tional origin discrimination in the United States.

Subtitle BB—Gun Violence
Research

SEC. 12801. SHORT TITLE.

This subtitle may be cited as the “National Gun Vio-
ence Research Act”.

SEC. 12802. FINDINGS.

Congress makes the following findings:

(1) In the last 50 years, more individuals in the
United States have died from gunshots than in all
wars in which the United States was a combatant,
combined.

(2) The rate of gun violence deaths in the
United States is more than double that of other
high-income nations.

(3) Guns accounted for 74 percent of homicides
and 51 percent of suicides in 2016, totaling over
37,000 deaths in the United States.

(4) Gun violence disproportionately affects ra-
cial minorities, with African Americans comprising
nearly 60 percent of homicide victims and 22 per-
cent of unintentional injury deaths in 2016.

(5) Provisions in appropriations Acts dating
back to 1996 have had a chilling effect on Federal
funding for research on gun violence across the Federal Government and, as a result, research on gun violence is significantly underfunded relative to other leading causes of death.

(6) Research examining the nature, causes, consequences, and prevention of gun-related violence, suicide, and unintentional injury and death does not constitute advocacy in support of, or opposition to, gun control policies or regulations.

(7) More research and high-quality data relating to gun violence are needed to inform the development of effective strategies to reduce the incidence of gun-related injury and death.

wars in which the United States was a combatant,
combined.

(2) The rate of gun violence deaths in the
United States is more than double that of other
high-income nations.
(3) Guns accounted for 74 percent of homicides and 51 percent of suicides in 2016, totaling over 37,000 deaths in the United States.

(4) Gun violence disproportionately affects racial minorities, with African Americans comprising nearly 60 percent of homicide victims and 22 percent of unintentional injury deaths in 2016.

(5) Provisions in appropriations Acts dating back to 1996 have had a chilling effect on Federal funding for research on gun violence across the Federal Government and, as a result, research on gun violence is significantly underfunded relative to other leading causes of death.

(6) Research examining the nature, causes, consequences, and prevention of gun-related violence, suicide, and unintentional injury and death does not constitute advocacy in support of, or opposition to, gun control policies or regulations.

Subtitle MM—Corey Jones

SEC. 13901. SHORT TITLE.

This subtitle may be cited as the “Corey Jones Act”.

SEC. 13902. FINDINGS.

Congress finds the following:
(1) Corey Jones of Lake Worth, Florida, was shot and killed by a plainclothes law enforcement officer operating an unmarked vehicle on October 18, 2015.

(2) Mr. Jones was legally and peacefully pulled to the side of the road while he awaited roadside assistance at approximately 3 a.m. in the morning because his car had broken down.

(3) While Mr. Jones awaited roadside assistance, he was approached by a law enforcement officer driving an unmarked van and dressed in plainclothes.

(4) Mr. Jones would not have had any reasonable reason to believe that the person in plainclothes driving the unmarked vehicle was a law enforcement officer.

(5) Any confusion as to the nature of the law enforcement officer’s interaction with Mr. Jones could likely have been avoided had a uniformed officer in a marked vehicle been called to the scene.

(6) Tragic incidents like the death of Mr. Jones can easily be avoided by prohibiting law enforcement officers in plainclothes or law enforcement officers in plainclothes and unmarked vehicles from engaging in routine traffic stops.
SEC. 13903. ENSURING THE SAFETY OF THE PUBLIC AND LAW ENFORCEMENT OFFICERS DURING ROUTINE TRAFFIC STOPS INVOLVING UNMARKED VEHICLES AND PLAINCLOTHES OFFICERS.

(B) in paragraph (11), by striking the period and inserting “; and” at the end; and

(C) by adding at the end the following:

“(12) certify that no law enforcement agency that will receive grant funds from the applicant allows law enforcement officers to engage in routine traffic stops while in plainclothes or while in plainclothes and in a police vehicle that is unmarked or that otherwise is not clearly identified as a police vehicle.”; and

(2) in subsection (d)—

(A) in paragraph (1), by inserting after “1 or more of the requirements of subsection (c)” the following “(other than paragraph (12))”;

(B) in paragraph (2), by inserting after “1 or more of the requirements of subsection (c)”
the following “(other than paragraph (12)”; and

(C) by adding at the end the following:

“(3) NO WAIVER OF PLAINCLOTHES CERTIFICATION.—The Attorney General may not waive the requirement under subsection (c)(12).”.

(b) CIVIL ACTION.—If the Attorney General determines, as a result of the reviews required by section 1705 of the Omnibus Crime Control and Safe Streets Act of 1968, that a law enforcement officer has engaged in conduct that violates a certification under section 1702(c)(12) of such Act applicable to that law enforcement officer, and such conduct has resulted in serious injury or death to any person, that person may bring a civil action against that law enforcement officer and any grantee under part Q of title I of such Act that is a grantee that is a State, unit of local government, Indian tribal government, or other entity with direct authority over that law enforcement officer.

Subtitle NN—Break the Cycle of Violence Act

SEC. 14001. SHORT TITLE.

This subtitle may be cited as the “Break the Cycle of Violence Act”.

SEC. 14002. FINDINGS.

Congress finds the following:

(1) Gun violence is a significant public health and safety concern nationwide and is a leading cause of death for people in the United States of nearly all ages.

(2) From 2012 to 2017, over 105,000 people in the United States were murdered. Nearly ¾ of these victims were murdered with a gun. Hundreds of thousands more were hospitalized or treated in emergency departments after surviving life-changing gunshot injuries.

(3) Gun violence has sharply increased in the United States in recent years. Gun homicide rates spiked by 30 percent between 2014 and 2017, driven by large spikes in violence in some cities in the United States.
(4) Shootings, homicides, and group-related violence are disproportionately concentrated in the poorest and most segregated urban areas of the Nation, and have an enormously disproportionate impact on young people of color in particular. From 2012 to 2017, African-American children and teens were 14 times as likely to be shot to death as their White peers. Hispanic children and teens and Native American children and teens were both nearly 3 times as likely to be shot to death as their White peers.

(5) African-American men make up just 6 percent of the population in the United States, but account for more than 50 percent of all gun homicide victims each year.

(6) Violence is responsible for half of all deaths among young African-American men, ages 15 through 24, as many as every other cause of death combined.

(7) This violence imposes enormous human, social, and economic costs. Nationwide, the annual societal cost of firearm violence was estimated at $229,000,000,000 per year in 2012. Economists estimate that each firearm homicide generates hun-
dreds of thousands of dollars in direct public costs, including medical care and criminal justice expenses.

(8) Several evidence-based violence intervention strategies have demonstrated remarkable success at interrupting entrenched cycles of violence, victimization, and retaliation. These strategies reflect the important fact that in most cities, the vast majority of violence is perpetrated by a relatively small number of identifiable groups or individuals that comprise less than 0.5 percent of the city’s total population.

(9) When properly implemented and consistently funded, coordinated, evidence-based strategies focused on interrupting cycles of violence among individuals at highest risk can produce life-saving and cost-saving results in a short period of time without contributing to mass incarceration. Multiple cities have substantially reduced community violence in recent years by implementing such strategies, including the following:

(A) Hospital-based violence intervention programs (referred to in this section as “HVIP”), which work to break cycles of violence by providing intensive counseling, peer support, case management, mediation, and social services to patients recovering from gunshot
wounds and other violent injuries. Research has shown that violently injured patients are at high risk of retaliating with violence themselves and being revictimized by violence in the near future. Evaluations of HVIPs have found that patients who received HVIP services were 4 times less likely to be convicted of a violent crime and roughly 4 times less likely to be subsequently reinjured by violence than patients who did not receive HVIP services.

(B) Evidence-based street outreach programs, which treat gun violence as a communicable disease and work to interrupt its transmission among community members. These public health-centered initiatives use street outreach workers to build relationships with high-risk individuals in their communities and connect them with intensive counseling, mediation, peer support, and social services in order to reduce their risk of violence. Evaluations have found that these programs are associated with significant reductions in gun violence, with some sites reporting up to 70-percent reductions in homicides or assaults.
(C) Strategies, including group violence interventions (referred to in this section as “GVI”), which are a form of problem-oriented policing that provides targeted social services and support to individuals at highest risk for involvement in community violence, and a process for community members to voice a clear demand for the violence to stop. This approach coordinates law enforcement, service providers, and community engagement efforts to reduce violence among a small, identifiable segment of the population that is responsible for the vast majority of gun violence in most cities. In one evaluation of the GVI program in Boston, researchers found a 63-percent reduction in youth homicides and a 25-percent decline in monthly gun assaults across the city. Other studies have found that GVI programs were associated with homicide reductions of up to 60 percent.

(10) These strategies are often most effective when local officials and dedicated staff work to coordinate stakeholders, relevant public agencies, and service providers. Mayors in cities like Los Angeles and New York have established city departments that are primarily dedicated to violence prevention,
and their offices have played a critical role in ensuring cross-agency collaboration and information-sharing.

(11) These strategies are also most effective when they receive consistent funding. For example, large cuts in funding for violence prevention programs in Chicago in 2008, 2012, and 2015 through 2016 corresponded with large spikes in homicides in those years. Similarly, the city of Stockton, California, saw an increase in homicides after discontinuing funding for its highly successful GVI program. When Stockton’s funding was restored, homicides decreased.

(12) A national strategy for reducing gun violence must include substantial and targeted Federal funding to expand and replicate the most effective strategies in communities most impacted by violence.

(13) At present, however, these strategies are implemented in only a handful of cities and are funded through an unreliable patchwork of discretionary grant programs. The current level of Federal funding to support the scaling of these strategies is woefully inadequate.

(14) Intentional and sustained investments in evidence-based violence reduction strategies can re-
verse recent crime trends, help to heal impacted
communities, and reduce the enormous human and
financial costs of violence, without contributing to
mass incarceration.

victimized by violent crime and gun and group-re-
lated violence in particular, but are frequently un-
derserved by the victim services field.

Subtitle PP—Resources for Victims of Gun Violence Act 2020

SEC. 14201. SHORT TITLE.
This subtitle may be cited as the “Resources for Victims of Gun Violence Act of 2020”.

SEC. 14202. FINDINGS.
Congress finds the following:

(1) In the United States, approximately 100 individuals are killed with guns every day, and more than 36,000 individuals die from gun violence every year. Approximately 100,000 more individuals survive gun-related injuries every year.

(2) The approximately 100,000 individuals who survive gun-related injuries every year in the United States face a life-long process of physical and emotional healing, in addition to the heavy economic costs faced by those survivors, their families and communities, and society as a whole. According to a recent national poll, 4 percent of adults alive in the United States as of the date of the poll, or an estimated 10,000,000 people, have been shot and injured in their lifetimes.

(3) Nearly two-thirds of gun-related deaths in the United States are suicides. Suicide attempts involving firearms are uniquely lethal: while less than
5 percent of suicide attempts not involving a firearm result in death, approximately 85 percent of suicide attempts involving a firearm end in death. According to a 2018 report by the Department of Veterans Affairs, veterans are about 1.5 times as likely as civilians to die by suicide, and 69.4 percent of veteran suicides in 2016 resulted from a firearm injury.

(4) More than one-third of gun-related deaths in the United States are homicides, and in 2010, the gun homicide rate in the United States was 25.2 times higher than in 22 other high-income countries.

(5) Gun homicides in the United States occur disproportionately in cities, particularly in racially segregated neighborhoods with high rates of poverty. Gun homicide disproportionately affects communities of color, and Black Americans represent the majority of gun homicide victims.

(6) More than 325 mass shootings took place in the United States in 2018, and more than 1,900 mass shootings have taken place since the shooting at Sandy Hook Elementary School in Newtown, Connecticut, in 2012. Fifty-four percent of mass shootings are related to domestic or family violence.

(7) Firearms are the second leading cause of death for children and teenagers and the first lead-
ing cause of death for Black children and teenagers in the United States. Every year, nearly 3,000 children and teenagers are shot and killed, and approximately 15,600 are shot and injured.

(8) During an average year in the United States, more than 600 women are shot to death by an intimate partner, and many more women are shot and injured by an intimate partner. Nearly 1,000,000 women in the United States who are alive as of the date of enactment of this Act have been shot or shot at by an intimate partner, and approximately 4,500,000 women alive as of that date have been threatened with a gun by an intimate partner.

(9) More than 10,300 violent hate crimes committed in the United States in an average year involve a gun, or more than 28 each day. The vast majority of hate crimes are directed against communities of color, religious minorities, and lesbian, gay, bisexual, transgender, and queer (commonly known as “LGBTQ”) people.

PART 7—ECONOMIC SECURITY FOR VICTIMS

SEC. 14671. FINDINGS.

Congress finds the following:

(1) Over 1 in 3 women experience sexual violence, and 1 in 5 women have survived completed or attempted rape. Such violence has a devastating impact on women’s physical and emotional health, financial security, and ability to maintain their jobs, and thus impacts interstate commerce and economic security.

(2) The Office on Violence Against Women of the Department of Justice defines domestic violence as a pattern of abusive behavior in any relationship that is used by one intimate partner to gain or maintain power and control over another intimate partner. Domestic violence can include physical, sexual, emotional, economic, or psychological actions or threats of actions that influence another person. Domestic violence includes any behaviors that intimidate, manipulate, humiliate, isolate, frighten, terrorize, coerce, threaten, blame, hurt, injure, or wound an individual.

(3) The Centers for Disease Control and Prevention report that domestic violence or intimate partner violence is a serious public health issue for millions of individuals in the United States. Nearly
1 in 4 women and 1 in 9 men in the United States have suffered sexual violence, physical violence, or stalking by an intimate partner.

(4) Transgender and gender non-conforming people face extraordinary levels of physical and sexual violence.

(5) More than 1 in 4 transgender people have faced bias-driven assault, and this rate is higher for trans women and trans people of color.

(6) The American Foundation for Suicide Prevention has found that transgender and gender non-conforming people had an elevated prevalence of suicide attempts, especially when they have suffered physical or sexual violence.

(7) Homicide is one of the leading causes of death for women on the job. Domestic partners or relatives commit 43 percent of workplace homicides against women. One study found that intimate partner violence resulted in 142 homicides among women at work in the United States from 2003 to 2008, a figure which represents 22 percent of the 648 workplace homicides among women during the period. In fact, in 2010, homicides against women at work increased by 13 percent despite continuous declines in overall workplace homicides in recent years.
(8) Women in the United States are 11 times more likely to be murdered with guns than women in other high-income countries. Female intimate partners are more likely to be murdered with a firearm than all other means combined. The presence of a gun in domestic violence situations increases the risk of homicide for women by 500 percent.

(9) Violence can have a dramatic impact on the survivor of such violence. Studies indicate that 44 percent of surveyed employed adults experienced the effect of domestic violence in the workplace, and 64 percent indicated their workplace performance was affected by such violence. Another recent survey found that 78 percent of offenders used workplace resources to express anger, check up on, pressure, or threaten a survivor. Sexual assault, whether occurring in or out of the workplace, can impair an employee’s work performance, require time away from work, and undermine the employee’s ability to maintain a job. Nearly 50 percent of sexual assault survivors lose their jobs or are forced to quit in the aftermath of the assaults.

(10) Studies find that 60 percent of single women lack economic security and 81 percent of households with single mothers live in economic inse-
curity. Significant barriers that survivors confront include access to housing, transportation, and child care. Ninety-two percent of homeless women have experienced domestic violence, and more than 50 percent of such women cite domestic violence as the direct cause for homelessness. Survivors are deprived of their autonomy, liberty, and security, and face tremendous threats to their health and safety.

(11) The Centers for Disease Control and Prevention report that survivors of severe intimate partner violence lose nearly 8 million days of paid work, which is the equivalent of more than 32,000 full-time jobs and almost 5,600,000 days of household productivity each year. Therefore, women disproportionately need time off to care for their health or to find safety solutions, such as obtaining a restraining order or finding housing, to avoid or prevent further violence.

(12) Annual costs of intimate partner violence are estimated to be more than $8,300,000,000. According to the Centers for Disease Control and Prevention, the costs of intimate partner violence against women in 1995 exceeded an estimated $5,800,000,000. These costs included nearly $4,100,000,000 in the direct costs of medical and
mental health care and nearly $1,800,000,000 in the indirect costs of lost productivity. These statistics are generally considered to be underestimated because the costs associated with the criminal justice system are not included.

(13) Fifty-five percent of senior executives recently surveyed said domestic violence has a harmful effect on their company’s productivity, and more than 70 percent said domestic violence negatively affects attendance. Seventy-eight percent of human resources professionals consider partner violence a workplace issue. However, more than 70 percent of United States workplaces have no formal program or policy that addresses workplace violence, let alone domestic violence. In fact, only four percent of employers provided training on domestic violence.

(14) Studies indicate that one of the best predictors of whether a survivor will be able to stay away from his or her abuser is the degree of his or her economic independence. However, domestic violence, dating violence, sexual assault, and stalking often negatively impact a survivor’s ability to maintain employment.

(15) Abusers frequently seek to exert financial control over their partners by actively interfering
with their ability to work, including preventing their partners from going to work, harassing their partners at work, limiting their partners’ access to cash or transportation, and sabotaging their partners’ child care arrangements.

(16) Economic abuse refers to behaviors that control an intimate partner’s ability to acquire, use, and maintain access to, money, credit, ownership of assets, or access to governmental or private financial benefits, including defaulting on joint obligations (such as school loans, credit card debt, mortgages, or rent). Other forms of such abuse may include preventing someone from attending school, threatening to or actually terminating employment, controlling or withholding access to cash, checking, or credit accounts, and attempting to damage or sabotage the creditworthiness of an intimate partner, including forcing an intimate partner to write bad checks, forcing an intimate partner to default on payments related to household needs, such as housing, or forcing an intimate partner into bankruptcy.

(17) The Patient Protection and Affordable Care Act (Public Law 111–148), and the amendments made by such Act, ensures that most health plans must cover preventive services, including...
screening and counseling for domestic violence, at no additional cost. In addition, it prohibits insurance companies from discriminating against patients for preexisting conditions, like domestic violence.

(18) Yet, more can be done to help survivors. Federal law in effect on the day before the date of enactment of this Act does not explicitly—

(A) authorize survivors of domestic violence, dating violence, sexual assault, or stalking to take leave from work to seek legal assistance and redress, counseling, or assistance with safety planning activities;

(B) address the eligibility of survivors of domestic violence, dating violence, sexual assault, or stalking for unemployment compensation;

(C) provide job protection to survivors of domestic violence, dating violence, sexual assault, or stalking;

(D) prohibit insurers and employers who self-insure employee benefits from discriminating against survivors of domestic violence, dating violence, sexual assault, or stalking and those who help them in determining eligibility,
rates charged, and standards for payment of claims; or

(E) prohibit insurers from disclosing information about abuse and the location of the survivors through insurance databases and other means.

(19) This Act aims to empower survivors of domestic violence, dating violence, sexual assault, or stalking to be free from violence, hardship, and control, which restrains basic human rights to freedom and safety in the United States.

PART 9—SAFETY FOR INDIAN WOMEN

SEC. 14691. FINDINGS AND PURPOSES.

(a) FINDINGS.—Congress finds the following:

(1) American Indians and Alaska Natives are
2.5 times as likely to experience violent crimes—and
at least 2 times more likely to experience rape or
sexual assault crimes—compared to all other races.

(2) More than 4 in 5 American Indian and
Alaska Native women, or 84.3 percent, have experi-
enced violence in their lifetime.

(3) The vast majority of Native victims—96
percent of women and 89 percent of male victims—
report being victimized by a non-Indian.
(4) Native victims of sexual violence are three times as likely to have experienced sexual violence by an interracial perpetrator as non-Hispanic White victims and Native stalking victims are nearly 4 times as likely to be stalked by someone of a different race.

(5) While tribes exercising jurisdiction over non-Indians have reported significant successes, the inability to prosecute crimes related to the Special Domestic Violence Criminal Jurisdiction crimes continues to leave Tribes unable to fully hold domestic violence offenders accountable.

(6) Tribal prosecutors report that the majority of domestic violence cases involve children either as witnesses or victims, and Department of Justice reports that American Indian and Alaska Native children suffer exposure to violence at rates higher than any other race in the United States.

(7) Childhood exposure to violence has immediate and long-term effects, including: increased rates of altered neurological development, poor physical and mental health, poor school performance, substance abuse, and overrepresentation in the juvenile justice system.
(8) According to the Centers for Disease Control and Prevention, homicide is the third leading cause of death among American Indian and Alaska Native women between 10 and 24 years of age and the fifth leading cause of death for American Indian and Alaska Native women between 25 and 34 years of age.

(9) On some reservations, Indian women are murdered at more than 10 times the national average.

(10) According to a 2010 Government Accountability Office report, United States Attorneys declined to prosecute nearly 52 percent of violent crimes that occur in Indian country.

(11) Investigation into cases of missing and murdered Indian women is made difficult for tribal law enforcement agencies due to a lack of resources, such as—

(A) necessary training, equipment, or funding;

(B) a lack of interagency cooperation; and

(C) a lack of appropriate laws in place.

(12) Domestic violence calls are among the most dangerous calls that law enforcement receives.
(13) The complicated jurisdictional scheme that exists in Indian country—

(A) has a significant negative impact on the ability to provide public safety to Indian communities;

(B) has been increasingly exploited by criminals; and

(C) requires a high degree of commitment and cooperation among tribal, Federal, and State law enforcement officials.

(14) Restoring and enhancing local, tribal capacity to address violence against women provides for greater local control, safety, accountability, and transparency.

(15) In States with restrictive land settlement acts such as Alaska, “Indian country” is limited, resources for local tribal responses either nonexistent or insufficient to meet the needs, jurisdiction unnecessarily complicated and increases the already high levels of victimization of American Indian and Alaska Native women. According to the Tribal Law and Order Act Commission Report, Alaska Native women are over-represented in the domestic violence victim population by 250 percent; they comprise 19 percent of the State population, but are 47 percent
of reported rape victims. And among other Indian
Tribes, Alaska Native women suffer the highest
rates of domestic and sexual violence in the country.

(b) PURPOSES.—The purposes of this title are—

(1) to clarify the responsibilities of Federal,
State, tribal, and local governments with respect to
responding to cases of domestic violence, dating vio-
ence, stalking, trafficking, sexual violence, crimes
against children, and assault against tribal law en-
forcement officers and murdered Indians;

(2) to increase coordination and communication
among Federal, State, tribal, and local law enforce-
ment agencies;

(3) to empower tribal governments with the re-
sources and information necessary to effectively re-
pond to cases of domestic violence, dating violence,
stalking, sex trafficking, sexual violence, and missing
and murdered Indians; and

(4) to increase the collection of data related to
missing and murdered Indians and the sharing of in-
formation among Federal, State, and tribal officials
responsible for responding to and investigating cases
of missing and murdered Indians.

Subtitle E—Environmental Justice and Environmental Justice Advocates

SEC. 20601. FINDINGS.

Congress finds that—

(1) environmental injustice exists whenever governmental action or inaction causes environmental risks or harms to fall unfairly and disproportionately upon a particular group or community;

(2) racial minority, low-income, rural, indigenous, and other often-marginalized communities are especially likely to face environmental injustice;

(3) limited resources and lack of political power ensure that marginalized communities host pollution-producing or potentially toxic facilities, including power plants, pipelines, industrial sites, garbage transfer stations, incinerators, landfills, and sewage treatment plants, at disproportionate rates;

(4) marginalized communities suffer from systemic governmental failures to adequately invest in the kind of infrastructure and services that reduce the risk of environmental accidents or disasters, and that facilitate swift, effective responses to such occurrences;
(5) the presence of pollution-producing sites can compromise public health, safety, property values, and quality of life even if no accident or disaster occurs;

(6) air and water quality are often especially poor in marginalized communities, and governmental permitting and investment decisions directly contribute to this inequity;

(7) scientific evidence increasingly links poor environmental quality with disabilities and chronic illnesses, including cancer, asthma, neurobehavioral disorders, learning disabilities, and abnormal hormone functioning;

(8) environmental justice exists when public policies successfully prevent or correct unfair disparities in environmental quality, and resultant disparities in public health and quality of life;

(9) environmental justice is possible only if vulnerable groups and marginalized communities can express their needs and concerns, and only then if policymakers listen;

(10) the environmental justice movement seeks to address the unjust social, economic, and political marginalization of minority, low-income, rural, and indigenous communities;
(11) environmental justice advocates seek healthy home, work, and recreational environments for all human beings, and healthy habitats for non-human life;

(12) community health depends in part upon factors like adequate transit options, walkable neighborhoods, and other public goods that marginalized communities are often denied;

(13) environmental justice requires responsible and balanced use of land and resources, in a way that does not unfairly burden marginalized communities;

(14) environmental justice can only be achieved and sustained in the context of a greener economy;

(15) “greening” the economy requires concrete governmental actions, including investments in clean technologies; in sustainable, low-carbon transportation and energy production systems; and in workforce training initiatives that prepare citizens for well-paying jobs in new or evolving industries;

(16) environmental justice requires fair processes and a good-faith approach to public policy, including regulatory decision making;

(17) in the 1990s, in response to the environmental justice movement, Federal agencies were di-
rected to incorporate environmental justice goals into their programs and activities;

(18) vulnerable populations and marginalized communities continue urgently to need fairer environmental policies, and more inclusive and equitable processes; and

(19) all Americans would be better served by a policymaking process that did not unfairly prioritize the comfort and health of some groups or communities at the expense of others.

SEC. 20602. SENSE OF CONGRESS.

Congress—

(1) reaffirms the vital importance of clean air, clean water, resource conservation, and other policy goals that spurred lawmakers to enact existing environmental and public health protections;

(2) affirms that the need for adequate environmental and public health protections is inextricably linked with the need for a more sustainable economy and greener, more livable communities;

(3) affirms that environmental and public health policies should adequately and equally protect all Americans, and that equal protection is possible only in a context of environmental justice;
(4) commends environmental justice advocates for their continuing struggle to achieve fairer, healthier, more sustainable policies and outcomes;

(5) acknowledges the prevalence of environmental injustices that directly affect the health and well-being of individuals and communities across the country, especially racial minority, rural, indigenous, and low-income communities; and

(6) affirms its commitment to ameliorating existing environmental injustices, and to preventing future injustices, by supporting greater objectivity, transparency, and outreach in policymaking at all levels of government; by supporting improved two-way communication between policymakers and those affected by their decisions; and by supporting processes that ensure policymakers give due consideration not just to the effects of their decisions, but to how those effects are distributed and by whom they are borne.

Subtitle F—Endometrial Cancer Research and Education

SEC. 20701. SHORT TITLE.

This subtitle may be cited as the “Endometrial Cancer Research and Education Act of 2020”.
SEC. 20702. FINDINGS.

Congress finds the following:

(1) Endometrial cancer is cancer of the lining of the uterus (or endometrium) and is the most common form of uterine cancer.

(2) Endometrial cancer is the fourth most common cancer diagnosed in women, after breast, lung, and colon cancer.

(3) Endometrial cancer mainly affects post-menopausal women, with most women diagnosed between age 55 and 64.

(4) Women with polycystic ovary syndrome (PCOS) and uterine leiomyoma have an increased risk of developing endometrial cancer.

(5) Unlike most other types of cancer, the incidence of endometrial cancer, particularly aggressive subtypes of such cancer, has been increasing in the United States among all women, particularly among African-American and Asian women, with a 2.5 annual percent change for both groups.

(6) In comparison to non-Hispanic White women, African-American women have significantly higher incidence rates of aggressive endometrial cancers.
(7) Such incidence rates for Hispanic and Asian women are equal to or lower than such incidence rates for non-Hispanic White women.

(8) Although non-Hispanic White women are more likely to be diagnosed with endometrial cancer in comparison to African-American women, the rate of mortality is higher for African-American women.

(9) Currently, the cause of such disparity is unknown. Researchers have studied the disparity in relation to the time between diagnosis and treatment of endometrial cancer, including socioeconomic factors.

Such outreach and educational activities shall be provided in a manner that is culturally and linguistically appropriate to the needs of the populations being served by the Exchange (including hard-to-reach populations, such as racial and sexual minorities, limited English proficient populations, individuals residing in areas where the unemployment rates exceeds the national average unemployment rate, individuals in rural areas, veterans, and young adults) and shall be provided to populations residing in high health disparity
areas (as defined in subparagraph (E)) served by the Exchange, in addition to other populations served by the Exchange.

“(C) NON-ACA COMPLIANT HEALTH INSURANCE COVERAGE.—For purposes of subparagraph (B):

“(i) The term ‘non-ACA compliant health insurance coverage’ means health insurance coverage, or a group health plan, that is not a qualified health plan.

“(ii) Such term includes the following:

SEC. 21044. SHORT-TERM LIMITED DURATION INSURANCE RULE PROHIBITION.

(a) FINDINGS.—Congress finds the following:
(1) On August 3, 2018, the Administration issued a final rule entitled “Short-Term, Limited-Duration Insurance” (83 Fed. Reg. 38212).

(2) The final rule dramatically expands the sale and marketing of insurance that—

(A) may discriminate against individuals living with preexisting health conditions, including children with complex medical needs and disabilities and their families;

(B) lacks important financial protections provided by the Patient Protection and Affordable Care Act (Public Law 111–148), including the prohibition of annual and lifetime coverage limits and annual out-of-pocket limits, that may increase the cost of treatment and cause financial hardship to those requiring medical care, including children with complex medical needs and disabilities and their families; and

(C) excludes coverage of essential health benefits including hospitalization, prescription drugs, and other lifesaving care.

(3) The implementation and enforcement of the final rule weakens critical protections for up to 130 million Americans living with preexisting health conditions and may place a large financial burden on
those who enroll in short-term limited-duration in-
surance, which jeopardizes Americans’ access to
good, affordable health insurance.

(b) **Prohibition.**—The Secretary of Health and
Human Services, the Secretary of the Treasury, and the
Secretary of Labor may not take any action to implement,
enforce, or otherwise give effect to the rule entitled
38212 (August 3, 2018)), and the Secretaries may not
promulgate any substantially similar rule.

**SEC. 21045. PROTECTION OF HEALTH INSURANCE COV-
ERAGE IN CERTAIN EXCHANGES.**

In the case of an Exchange that the Secretary of
Health and Human Services operates pursuant to section
1321(c)(1) of the Patient Protection and Affordable Care
Act (42 U.S.C. 18041(c)(1)), the Secretary may not im-
plement any process that would terminate the health in-
surance coverage of an enrollee solely because such en-
rollee did not actively enroll during the most recent open
enrollment period.

**SEC. 21046. SENSE OF CONGRESS RELATING TO THE PRAC-
TICE OF SILVER LOADING.**

It is the sense of Congress that the Secretary of
Health and Human Services should not take any action
to prohibit or otherwise restrict the practice commonly

•HR 8352 IH
known as ‘‘silver loading’’ (as described in the rule entitled ‘‘Patient Protection and Affordable Care Act; HHS Notice of Benefit and Payment Parameters for 2021’’ published on April 25, 2019 (84 Fed. Reg. 17533)).

(C) navigators;
(D) agents and brokers;
(E) the enrollment assistant program;
(F) directly from issuers or web brokers;
and
(G) other means.

(b) OPEN ENROLLMENT AFTER ACTION REPORT.—
For plan year 2021 and each subsequent year, the Sec-
retary, in coordination with the Secretary of the Treasury
and the Secretary of Labor, shall publish an after action
report not later than 3 months after the completion of the
annual open enrollment period regarding the performance
of the Federal Exchange for the applicable plan year.
Each such report shall include a summary, including in-
formation on a State-by-State basis where available, of—

(1) the open enrollment data reported under
subsection (a) for the entirety of the enrollment pe-
period; and

(2) activities related to patient navigators de-
scribed in section 1311(i) of the Patient Protection
and Affordable Care Act (42 U.S.C. 18031(i)), in-
cluding—
(A) the performance objectives established by the Secretary for such patient navigators;

(B) the number of consumers enrolled by such a patient navigator;

(C) an assessment of how such patient navigators have met established performance metrics, including a detailed list of all patient navigators, funding received by patient navigators, and whether established performance objectives of patient navigators were met; and

   (ii) how the Secretary worked with patient navigators to establish such objectives; and

SEC. 21102. DISTRIBUTION OF ADDITIONAL RESIDENCY POSITIONS.
(a) IN GENERAL.—Section 1886(h) of the Social Security Act (42 U.S.C. 1395ww(h)) is amended—

(1) in paragraph (4)(F)(i), by striking “paragraphs (7) and (8)” and inserting “paragraphs (7), (8), and (9)”;

(2) in paragraph (4)(H)(i), by striking “paragraphs (7) and (8)” and inserting “paragraphs (7), (8), and (9)”;

(3) in paragraph (7)(E), by inserting “paragraph (9),” after “paragraph (8),”; and

(4) by adding at the end the following new paragraph:

“(9) DISTRIBUTION OF ADDITIONAL RESIDENCY POSITIONS.—

“(A) ADDITIONAL RESIDENCY POSITIONS.—

“(i) IN GENERAL.—For each of fiscal years 2022 through 2026 (and succeeding
fiscal years if the Secretary determines that there are additional residency positions available to distribute under clause (iv)(II), the Secretary shall, subject to clause (ii) and subparagraph (D), increase the otherwise applicable resident limit for each qualifying hospital that submits a timely application under this subparagraph by such number as the Secretary may approve for portions of cost reporting periods occurring on or after July 1 of the fiscal year of the increase.

“(ii) Number available for distribution.—For each such fiscal year, the Secretary shall determine the total number of additional residency positions available for distribution under clause (i) in accordance with the following:

“(I) Allocation to hospitals already operating over resident limit.—One-third of such number shall be available for distribution only to hospitals described in subparagraph (B).
“(II) AGGREGATE LIMITATION.—
Except as provided in clause (iv)(I), the aggregate number of increases in the otherwise applicable resident limit under this subparagraph shall be equal to 3,000 in each such year.

“(iii) PROCESS FOR DISTRIBUTING POSITIONS.—

“(I) ROUNDS OF APPLICATIONS.—The Secretary shall initiate 5 separate rounds of applications for an increase under clause (i), 1 round with respect to each of 2022 through 2026.

“(II) NUMBER AVAILABLE.—In each of such rounds, the aggregate number of positions available for distribution in the fiscal year under clause (ii) shall be distributed, plus any additional positions available under clause (iv).

“(III) TIMING.—The Secretary shall notify hospitals of the number of positions distributed to the hospital under this paragraph as a result of an
increase in the otherwise applicable resident limit by January 1 of the fiscal year of the increase. Such increase shall be effective for portions of cost reporting periods beginning on or after July 1 of that fiscal year.

“(iv) Positions not distributed during the fiscal year.—

“(I) In general.—If the number of resident full-time equivalent positions distributed under this paragraph in a fiscal year is less than the aggregate number of positions available for distribution in the fiscal year (as described in clause (ii), including after application of this subclause), the difference between such number distributed and such number available for distribution shall be added to the aggregate number of positions available for distribution in the following fiscal year.

“(II) Exception if positions not distributed by end of fiscal year 2026.—If the aggregate number
of positions distributed under this paragraph during the 5-year period of fiscal years 2022 through 2026 is less than 15,000, the Secretary shall, in accordance with the provisions of clause (ii) and subparagraph (D) and the considerations and priority described in subparagraph (C), conduct an application and distribution process in each subsequent fiscal year until such time as the aggregate amount of positions distributed under this paragraph is equal to 15,000.

“(B) Allocation of distribution for positions to hospitals already operating over resident limit.—

“(i) In general.—Subject to clauses (ii) and (iii), in the case of a hospital in which the reference resident level of the hospital (as specified in subparagraph (G)(iii)) is greater than the otherwise applicable resident limit, the increase in the otherwise applicable resident limit under subparagraph (A) for a fiscal year described in such subparagraph shall be an
amount equal to the product of the total number of additional residency positions available for distribution under subparagraph (A)(ii)(I) for such fiscal year and the quotient of—

“(I) the number of resident positions by which the reference resident level of the hospital exceeds the otherwise applicable resident limit for the hospital; and

“(II) the number of resident positions by which the reference resident level of all such hospitals with respect to which an application is approved under this paragraph exceeds the otherwise applicable resident limit for such hospitals.

“(ii) REQUIREMENTS.—A hospital described in clause (i)—

“(I) is not eligible for an increase in the otherwise applicable resident limit under this subparagraph unless the amount by which the reference resident level of the hospital exceeds the otherwise applicable resident limit
is not less than 10 and the hospital trains at least 25 percent of the full-time equivalent residents of the hospital in primary care and general surgery (as of the date of enactment of this paragraph); and

“(II) shall continue to train at least 25 percent of the full-time equivalent residents of the hospital in primary care and general surgery for the 5-year period beginning on such date.

In the case where the Secretary determines that a hospital described in clause (i) no longer meets the requirement of subclause (II), the Secretary may reduce the otherwise applicable resident limit of the hospital by the amount by which such limit was increased under this subparagraph. *(iii) Clarification regarding eligibility for other additional residency positions.—Nothing in this subparagraph shall be construed as preventing a hospital described in clause (i) from applying for and receiving additional residency positions under this paragraph that*
are not reserved for distribution under this subparagraph.

“(C) Distribution of other positions.—For purposes of determining an increase in the otherwise applicable resident limit under subparagraph (A) (other than such an increase described in subparagraph (B)), the following shall apply:

“(i) Considerations in distribution.—In determining for which hospitals such an increase is provided under subparagraph (A), the Secretary shall take into account the demonstrated likelihood of the hospital filling the positions made available under this paragraph within the first 5 cost reporting periods beginning after the date the increase would be effective, as determined by the Secretary.

“(ii) Priority for certain hospitals.—Subject to clause (iii), in determining for which hospitals such an increase is provided, the Secretary shall distribute the increase in the following priority order:
“(I) First, to hospitals in States with—

“(aa) new medical schools that received ‘Candidate School’ status from the Liaison Committee on Medical Education or that received ‘Pre-Accreditation’ status from the American Osteopathic Association Commission on Osteopathic College Accreditation on or after January 1, 2000, and that have achieved or continue to progress toward ‘Full Accreditation’ status (as such term is defined by the Liaison Committee on Medical Education) or toward ‘Accreditation’ status (as such term is defined by the American Osteopathic Association Commission on Osteopathic College Accreditation); or

“(bb) additional locations and branch campuses established on or after January 1, 2000, by medical schools with ‘Full Ac-
creditation’ status (as such term is defined by the Liaison Committee on Medical Education) or ‘Accreditation’ status (as such term is defined by the American Osteopathic Association Commission on Osteopathic College Accreditation).

“(II) Second, to hospitals with which the Secretary cooperates under section 7302(d) of title 38, United States Code.

“(III) Third, to hospitals that emphasize training in community-based settings or in hospital outpatient departments.

“(IV) Fourth, to hospitals that are not located in a rural area and operate an approved medical residency training program (or rural track) in a rural area or an approved medical residency training program with an integrated rural track.

“(V) Fifth, to all other hospitals.
“(iii) DISTRIBUTION TO HOSPITALS IN HIGHER PRIORITY GROUP PRIOR TO DISTRIBUTION IN LOWER PRIORITY GROUPS.—

The Secretary may only distribute such an increase to a lower priority group under clause (ii) if all qualifying hospitals in the higher priority group or groups have received the maximum number of increases under such subparagraph that the hospital is eligible for under this paragraph for the fiscal year.

“(iv) REQUIREMENTS FOR USE OF ADDITIONAL POSITIONS.—

“(I) IN GENERAL.—Subject to subclause (II), a hospital that receives such an increase shall ensure, during the 5-year period beginning on the effective date of such increase, that—

“(aa) not less than 50 percent of the positions attributable to such increase that are used in a given year during such 5-year period are used to train full-time equivalent residents in a shortage specialty residency program (as
defined in subparagraph (G)(iv)),
as determined by the Secretary
at the end of such 5-year period;

“(bb) the total number of
full-time equivalent residents, ex-
cluding any additional positions
attributable to such increase, is
not less than the average number
of full-time equivalent residents
during the 3 most recent cost re-
porting periods ending on or be-
fore the effective date of such in-
crease; and

“(cc) the ratio of full-time
equivalent residents in a shortage
specialty residency program (as
so defined) is not less than the
average ratio of full-time equiva-
lent residents in such a program
during the 3 most recent cost re-
porting periods ending on or be-
fore the effective date of such in-
crease.

“(II) REDISTRIBUTION OF POSI-
TIONS IF HOSPITAL NO LONGER
MEETS CERTAIN REQUIREMENTS.—

With respect to each fiscal year de-
scribed in subparagraph (A), the Sec-
retary shall determine whether or not
a hospital described in subclause (I)
meets the requirements of such sub-
clause. In the case that the Secretary
determines that such a hospital does
not meet such requirements, the Sec-
retary shall—

“(aa) reduce the otherwise
applicable resident limit of the
hospital by the amount by which
such limit was increased under
this paragraph; and

“(bb) provide for the dis-
tribution of positions attributable
to such reduction in accordance
with the requirements of this
paragraph.

“(D) LIMITATION.—A hospital may not re-
cieve more than 75 full-time equivalent addi-
tional residency positions under this paragraph
for any fiscal year.
“(E) Application of per resident amounts for primary care and nonprimary care.—With respect to additional residency positions in a hospital attributable to the increase provided under this paragraph, the approved FTE per resident amounts are deemed to be equal to the hospital per resident amounts for primary care and nonprimary care computed under paragraph (2)(D) for that hospital.

“(F) Permitting facilities to apply aggregation rules.—The Secretary shall permit hospitals receiving additional residency positions attributable to the increase provided under this paragraph to, beginning in the fifth year after the effective date of such increase, apply such positions to the limitation amount under paragraph (4)(F) that may be aggregated pursuant to paragraph (4)(H) among members of the same affiliated group.

“(G) Definitions.—In this paragraph:

“(i) Otherwise applicable resident limit.—The term ‘otherwise applicable resident limit’ means, with respect to a hospital, the limit otherwise applicable under subparagraphs (F)(i) and (H) of
paragraph (4) on the resident level for the hospital determined without regard to this paragraph but taking into account paragraphs (7)(A), (7)(B), (8)(A), and (8)(B)."

"(ii) Reference resident level.—Except as otherwise provided in subclause (II), the term ‘reference resident level’ means, with respect to a hospital, the resident level for the most recent cost reporting period of the hospital ending on or before the date of enactment of this paragraph, for which a cost report has been settled (or, if not, submitted (subject to audit)), as determined by the Secretary.

"(iii) Resident level.—The term ‘resident level’ has the meaning given such term in paragraph (7)(C)(i).

"(iv) Shortage specialty residency program.—The term ‘shortage specialty residency program’ means any approved residency training program in a specialty identified in the report entitled ‘The Physician Workforce: Projections and Research into Current Issues Affecting Supply and Demand’, issued in December
2008 by the Health Resources and Services Administration, as a specialty whose baseline physician requirements projections exceed the projected supply of total active physicians for the period of 2005 through 2021.”.

“(C) Limited funding for special rules.—Subparagraphs (A) and (B), and the provision of medical assistance for covered part D drugs to low-income part D eligible individuals for a State and period under this subsection, is limited to the amount specified in paragraph (3) for such State and period.”.

SEC. 21844. ACCESS TO COVERAGE FOR INDIVIDUALS IN CERTAIN AREAS WITHOUT ANY AVAILABLE EXCHANGE PLANS.

Part 2 of subtitle D of title I of the Patient Protection and Affordable Care Act (42 U.S.C. 18031 et seq.) is amended by adding at the end the following:

“SEC. 1314. ACCESS TO COVERAGE FOR INDIVIDUALS IN CERTAIN AREAS WITHOUT ANY AVAILABLE EXCHANGE PLANS.

“(a) In General.—

“(1) Coverage through DC SHOP Exchange.—Not later than 3 months after the date of enactment of this section, the Secretary, in consultation with the Secretary of the Treasury and the Director of the Office of Personnel Management, shall establish a mechanism to ensure that, for any plan year beginning on or after the date described in subsection (d), any individual described in paragraph (2) may enroll in health insurance coverage in the small group market through the Exchange operating in the District of Columbia, including the health ins-
insurance coverage that is available to Members of Congress and congressional staff (as defined in section 1312(d)(3)(D)).

“(2) INDIVIDUAL DESCRIBED.—An individual described in this paragraph is any individual who—

“(A) is not eligible to enroll in an employer-sponsored health plan (excluding such a plan that would not be considered minimum essential coverage due to the application of subparagraph (C) of section 36B(c)(2) of the Internal Revenue Code of 1986 if such subparagraph applied to such plan); and

“(B) is a bona fide resident of any possession of the United States (as determined under section 937(a) of the Internal Revenue Code of 1986).

“(3) POSSESSION OF THE UNITED STATES.—

“(c) TREATMENT OF POSSESSIONS.—

“(1) PAYMENTS TO POSSESSIONS.—

“(A) MIRROR CODE POSSESSION.—The Secretary of the Treasury shall periodically (but not less frequently than annually) pay to each possession of the United States with a mirror code tax system amounts equal to the loss to that possession by reason of the application of this section (determined without regard to paragraph (2)) with respect to taxable years beginning after the date described in subsection (d). Such amounts shall be determined by the Secretary of the Treasury based on information
provided by the government of the respective
possession.

“(B) Other possessions.—The Sec-
retary of the Treasury shall periodically (but
not less frequently than annually) pay to each
possession of the United States which does not
have a mirror code tax system amounts esti-
mated by the Secretary of the Treasury as
being equal to the aggregate benefits that would
have been provided to residents of such posses-
sion by reason of the application of this section
for any taxable years beginning after the date
described in subsection (d) if a mirror code tax
system had been in effect in such possession.
The preceding sentence shall not apply with re-
spect to any possession of the United States un-
less such possession has a plan, which has been
approved by the Secretary of the Treasury,
under which such possession will promptly dis-
tribute such payments to the residents of such
possession.

“(2) Coordination with credit allowed
against United States income taxes.—No cred-
it shall be allowed against United States income
taxes for any taxable year under section 36B of the Internal Revenue Code of 1986 to any person—

“(B) who is eligible for a payment under a plan described in paragraph (1)(B) with respect to such taxable year.

“(3) MIRROR CODE TAX SYSTEM.—For purposes of this subsection, the term ‘mirror code tax system’ means, with respect to any possession of the United States, the income tax system of such possession if the income tax liability of the residents of such possession under such system is determined by reference to the income tax laws of the United States as if such possession were the United States.

“(4) TREATMENT OF PAYMENTS.—For purposes of section 1324(b)(2) of title 31, United States Code, or any similar rule of law, the payments under this subsection shall be treated in the same manner as a refund due from the credit allowed under section 36B of the Internal Revenue Code of 1986.
“(d) DATE DESCRIBED.—The date described in this subsection is the date on which the Secretary establishes the mechanism described in subsection (a)(1).”.

SEC. 21845. EXTENSION OF FAMILY-TO-FAMILY HEALTH INFORMATION CENTERS PROGRAM TO TERRITORIES.

Section 501(c)(3)(C) of the Social Security Act (42 U.S.C. 701(c)) is amended by striking “years 2018 and 2019” and inserting “year 2018 and each fiscal year thereafter”.

Subtitle R—Maternal Care Access and Reducing Emergencies

SEC. 21901. SHORT TITLE.

This subtitle may be cited as the “Maternal Care Access and Reducing Emergencies Act” or the “Maternal CARE Act”.

SEC. 21902. FINDINGS.

Congress finds the following:

(1) In the United States, maternal mortality rates are among the highest in the developed world and increased by 26.6 percent between 2000 and 2014.

(2) Of the 4,000,000 American women who give birth each year, about 700 suffer fatal complications during pregnancy, while giving birth, or during the
postpartum period, and an additional 50,000 are severely injured.

(3) It is estimated that about 60 percent of the maternal mortalities in the United States could be prevented and half of the maternal injuries in the United States could be reduced or eliminated with better care.

(4) Data from the Centers for Disease Control and Prevention show that Black women are 3 to 4 times more likely to die from pregnancy-related causes than White women. There are 42.8 deaths per 100,000 live births for Black women, compared to 13 deaths per 100,000 live births for White women and 17.2 deaths per 100,000 live births for women nationally.

(5) Black women’s risk of maternal mortality has remained higher than White women’s risk for the past 6 decades.

(6) Black women in the United States suffer from life-threatening pregnancy complications twice as often as their White counterparts.

(7) High rates of maternal mortality among Black women span income and education levels, as well as socioeconomic status; moreover, risk factors such as a lack of access to prenatal care and phys-
ical health conditions do not fully explain the racial disparity in maternal mortality.

(8) A growing body of evidence indicates that stress from racism and racial discrimination results in conditions—including hypertension and pre-eclampsia—that contribute to poor maternal health outcomes among Black women.

(9) Pervasive racial bias against Black women and unequal treatment of Black women exist in the health care system, often resulting in inadequate treatment for pain and dismissal of cultural norms with respect to health. A 2016 study by University of Virginia researchers found that White medical students and residents often believed biological myths about racial differences in patients, including that Black patients have less-sensitive nerve endings and thicker skin than their White counterparts. Providers, however, are not consistently required to undergo implicit bias, cultural competency, or empathy training.

(10) North Carolina has established a statewide Pregnancy Medical Home (PMH) program, which aims to reduce adverse maternal health outcomes and maternal deaths by incentivizing maternal health care providers to provide integral health care
services to pregnant women and new mothers. According to the North Carolina Department of Health and Human Services Center for Health Statistics, the pregnancy-related mortality rate for Black women was approximately 5.1 times higher than that of White women in 2004. Almost a decade later, in 2013, the pregnancy-related mortality rates for Black women and White women were 24.3 and 24.2 deaths per 100,000 live births, respectively. The PMH program has been credited with the convergence in pregnancy-related mortality rates because the program partners each high-risk pregnant and postpartum woman that is covered under Medicaid with a pregnancy care manager.

(B) completes training to provide culturally and linguistically competent care;

(3) under the program, each pregnancy medical home is required to conduct a standardized medical, obstetric, and psychosocial risk assessment for every patient of the medical home who is pregnant at the patient’s first prenatal appointment with the medical home;
(4) under the program, a care manager—

(A) is assigned to each pregnancy medical home; and

(B) coordinates care (including coordinating resources and referrals for health care and social services that are not available from the pregnancy medical home) for each patient of a pregnancy medical home who is eligible for services under the program; and

(5) the program prioritizes pregnant and postpartum women who are uninsured or enrolled in the State Medicaid plan under title XIX of the Social Security Act (42 U.S.C. 1396 et seq.), or a waiver of such plan.

(3) PRIORITIZATION.—In awarding grants under this section, the Secretary shall give priority to the States with the greatest racial disparities in maternal mortality and severe morbidity rates.

(d) REPORT ON GRANT IMPACT AND DISSEMINATION OF BEST PRACTICES.—Not later than 1 year after all the
grant periods awarded under this section have ended, the Secretary shall—

(1) submit a report to Congress that describes—

(A) the impact of the grants awarded under this section on maternal and child health;

(B) best practices and models of care used by recipients of grants under this section; and

(C) obstacles faced by recipients of grants under this section in delivering care, improving maternal and child health, and reducing racial disparities in rates of maternal and infant mortality and morbidity; and

(2) disseminate information on best practices and models of care used by recipients of grants under this section (including best practices and models of care relating to the reduction of racial disparities in rates of maternal and infant mortality and morbidity) to interested parties, including health providers, medical schools, relevant State and local agencies, and the general public.

(e) AUTHORIZATION.—There are authorized to be appropriated to carry out this section, $25,000,000 for each of fiscal years 2022 through 2026, to remain available until expended.

Subtitle S—Reducing Mortality and Morbidity Among All Women and Honoring Mothers

SEC. 22001. FINDINGS.

Congress finds that—

(1) the pregnancy-related mortality ratio, defined as the number of pregnancy-related deaths per 100,000 live births, more than doubled between 1987 and 2016;

(2) the United States is the only developed country whose maternal mortality rate has increased over the last several decades;
(3) of all pregnancy-related deaths between 2011 and 2015—

(A) nearly 31 percent occurred during pregnancy;

(B) about 36 percent occurred during childbirth or the week after childbirth; and

(C) 33 percent occurred between 1 week and 1 year postpartum;

(4) more than 60 percent of maternal deaths in the United States are preventable;

(5) in 2014 alone, 50,000 women suffered from a “near miss” or severe maternal morbidity, which includes potentially life-threatening complications that arise from labor and childbirth;

(6) 28 percent of women who gave birth in a hospital in the United States reported experiencing 1 or more types of mistreatment, such as—

(A) loss of autonomy;

(B) being shouted at, scolded, or threatened; and

(C) being ignored or refused or receiving no response to requests for help;

(7) certain social determinants of health, including bias and racism, have a negative impact on maternal health outcomes;
(8) significant disparities in maternal health exist, including that—

(A) Black women are more than 3 times as likely to die from a pregnancy-related cause as are White women;

(B) American Indian and Alaska Native women are more than 2 times as likely to die from a pregnancy-related cause as are White women;

(C) Black, American Indian, and Alaska Native women with at least some college education are more likely to die from a pregnancy-related cause than are women of all other racial and ethnic backgrounds with less than a high school diploma;

(D) Black, American Indian, and Alaska Native women are about 2 times as likely to suffer from severe maternal morbidity as are White women;

(E) women who live in rural areas have a greater likelihood of severe maternal morbidity and mortality compared to women who live in urban areas;

(F) nearly 50 percent of rural counties do not have a hospital with obstetric services;
(G) counties with more Black and Hispanic residents and lower median incomes are less likely to have access to hospital obstetric services;

(H) more than 50 percent of women who live in a rural area must travel more than 30 minutes to access hospital obstetric services, compared to 7 percent of women who live in urban areas; and

(I) American Indian and Alaska Native women living in rural communities are twice as likely as their White counterparts to report receiving late or no prenatal care;

(9) more than 40 States have designated committees to review maternal deaths;

(10) State and local maternal mortality review committees are positioned to comprehensively assess maternal deaths and identify opportunities for prevention;

(11) more than 25 States are participating in the Alliance for Innovation on Maternal Health, which promotes consistent and safe maternity care to reduce maternal morbidity and mortality;

(12) community-based maternal health care models, including midwifery childbirth services,
doula support services, community and perinatal health worker services, and group prenatal care, in collaboration with culturally competent physician care, show great promise in improving maternal health outcomes and reducing disparities in maternal health outcomes;

(13) many organizations have implemented initiatives to educate patients and providers about—

(A) all causes of, contributing factors to, and disparities in maternal mortality;

(B) the prevention of pregnancy-related deaths; and

(C) the importance of listening to and empowering all women to report pregnancy-related medical issues;

(14) the Centers for Disease Control and Prevention (in this Resolution, referred to as the “CDC”), for the first time in over a decade, released a report on January 30, 2020, assessing the United States maternal mortality rate that—

(A) found in 2018, the maternal mortality rate was 17.4 maternal deaths per 100,000 live births;

(B) found the maternal mortality rate for non-Hispanic Black women was more than dou-
ble that of non-Hispanic White women at 37.1
deaths per 100,000 live births compared to
14.7, and 3 times the rate of Hispanic women
(11.8); and

(C) while using a new standardized meth-
odology to improve the accuracy of States re-
porting maternal deaths, still has potential
methodological concerns with the reporting of
maternal mortality data, such as the CDC re-
port excluding mothers over the age of 44 and
only accounting for deaths within 42 days of
giving birth, potentially omitting later
postpartum deaths; and

(D) several States, communities, and orga-
nizations recognize January 23 as “Maternal
Health Awareness Day” to raise awareness
about maternal health and promote maternal
safety.

SEC. 22002. SENSE OF CONGRESS.

Congress—

(1) acknowledges the United States deeply trou-
bling maternal health crisis and supports expedited
Federal action on reducing the rates of maternal
mortality in the United States, including—
(A) raising public awareness about maternal mortality, maternal morbidity, and disparities in maternal health outcomes; and

(B) encouraging the Federal Government, States, territories, Tribes, local communities, public health organizations, physicians, health care providers, and others to take action to reduce adverse maternal health outcomes and improve maternal safety;

(2) promotes initiatives—

(A) to address and eliminate disparities in maternal health outcomes; and

(B) to ensure respectful and equitable maternity care practices;

(3) honors the mothers who have passed away as a result of pregnancy-related causes;

(4) supports collecting better data on maternal mortality and morbidity; and

(5) supports and recognizes the need for further investments in efforts to improve maternal health, eliminate disparities in maternal health outcomes, and promote respectful and equitable maternity care practices.
Subtitle T—Collecting and Analyzing Resources Integral and Necessary for Guidance for Social Determinants

SEC. 22101. SHORT TITLE.

This subtitle may be cited as the “Collecting and Analyzing Resources Integral and Necessary for Guidance for Social Determinants Act of 2020” or the “CARING for Social Determinants Act of 2020”.

SEC. 22102. FINDINGS; PURPOSE.

(a) FINDINGS.—Congress makes the following findings:

(1) Social determinants of health are the conditions in which people are born, grow, live, play, work and age; they include factors like socioeconomic status, education, housing, transportation, nutrition and literacy.

(2) Research has shown that addressing social determinants of health is important for improving overall health and reducing health inequities.

(3) Social determinants that negatively impact health can have harmful neurodevelopmental and biological consequences that develop in childhood and manifest in adulthood.
(4) There is a growing body of evidence suggesting that policies that specifically address social needs, including policies targeting children and families, can improve community health outcomes and have the potential to reduce health care spending.

(5) Some State Medicaid programs have begun testing innovative delivery and payment models designed to improve health outcomes and reduce costs by implementing strategies to address social determinants of health under existing Medicaid authorities as well as through the use of waivers, though payment incentives linked to social determinant of health are not common.

(6) Despite a growing focus on social determinants of health in State managed care contracts, most States do not provide necessary guidance for managed care organizations as to how they may use existing authority under Federal law to provide patients with services that can improve health by addressing social determinants.

(7) Centers for Medicare & Medicaid Services guidance and technical assistance are critical tools that could increase adoption of strategies to address social determinants of health among State Medicaid agencies.
(b) PURPOSES.—It is the purpose of this subtitle to provide States with additional operational clarity and examples of the strategies they can leverage through existing authority and waivers to address social determinants of health for the Medicaid population.

SEC. 22103. REQUIREMENT TO ISSUE GUIDANCE TO CLARIFY STRATEGIES TO ADDRESS SOCIAL DETERMINANTS OF HEALTH IN THE MEDICAID PROGRAM AND THE CHILDREN'S HEALTH INSURANCE PROGRAM.

Not later than 2 years after the date of the enactment of this Act, the Secretary of Health and Human Services shall issue and disseminate guidance to States to clarify strategies to address social determinants of health under the Medicaid program and the Children’s Health Insurance Program. Such guidance shall include the following:

(1) Guidance and technical assistance to State Medicaid agencies regarding the strategies that States can implement under existing authorities under title XI, XIX, or XXI of the Social Security Act, or through waivers, to address social determinants of health in the provision of health care, including strategies specifically targeting the pediatric population.
(2) Guidance and technical assistance on how States can encourage and incentivize managed care organizations to address social determinants of health through contracts with such organizations.

(3) A compendium of examples from States with respect to how States are currently addressing social determinants of health in the provision of health care under the Medicaid program and the Children’s Health Insurance Program, including through payment models.

Subtitle U—Equal Access to Abortion Coverage in Health Insurance

SEC. 22201. SHORT TITLE.

This subtitle may be cited as the “Equal Access to Abortion Coverage in Health Insurance (EACH Woman) Act of 2020”.

SEC. 22202. FINDINGS.

Congress makes the following findings:

(1) Affordable, comprehensive health insurance that includes coverage for a full range of pregnancy-related care, including abortion, is critical to the health of every person regardless of actual or perceived race, color, national origin, immigration status, sex (including sexual orientation, gender iden-
tity, pregnancy, childbirth, a medical condition relating to pregnancy or childbirth, or sex stereotyping), age, or disability status.

(2) Neither a woman’s income level nor her type of insurance should prevent her from having access to a full range of pregnancy-related care, including abortion services.

(3) No woman should have the decision to have, or not to have, an abortion made for her based on her ability or inability to afford the procedure.

(4) Since 1976, the Federal Government has withheld funds for abortion coverage in most circumstances, affecting women of reproductive age in the United States who are insured through the Medicaid program, as well as women who receive insurance or care through other federal health plans and programs. Of women aged 15–44 enrolled in Medicaid in 2017, 55 percent lived in the 35 States and the District of Columbia that do not cover abortion, except in limited circumstances. This amounts to roughly 7.3 million women of reproductive age, including 3.1 million women living below the Federal poverty level. Women of color are disproportionately likely to be insured by the Medicaid program: Nationally, 32 percent of Black women and 27 percent
of Hispanic women aged 15–44 were enrolled in Medicaid in 2017, compared with 16 percent of White women.

(5) Moreover, 26 States also prohibit abortion coverage in private insurance plans within or beyond health insurance marketplaces under the Patient Protection and Affordable Care Act.

(6) Restrictions on abortion coverage interfere with a woman’s personal decision making, with her health and well-being, and with her constitutionally protected right to a safe and legal medical procedure.

(7) Restrictions on abortion coverage have a disproportionate impact on low-income women, women of color, immigrant women, and young women. These women are already disadvantaged in their access to the resources, information, and services necessary to prevent an unintended pregnancy or to carry a healthy pregnancy to term.

SEC. 22203. ABORTION COVERAGE AND CARE REGARDLESS OF INCOME OR SOURCE OF INSURANCE.

(a) Ensuring Abortion Coverage and Care Through the Federal Government in Its Role as an Insurer, Employer, or Health Care Provider.—The Federal Government shall—
(1) ensure coverage for abortion care in public health insurance programs including Medicaid, Medicare, and the Children’s Health Insurance Program;

(2) in its role as an employer or health plan sponsor, ensure coverage for abortion care for participants and beneficiaries; and

(3) in its role as a provider of health services, ensure abortion care is made available to individuals who are eligible to receive services in its own facilities or in facilities with which it contracts to provide medical care.

(b) Prohibiting Restrictions on Private Insurance Coverage of Abortion Care.—

(1) Federal restrictions.—The Federal Government shall not prohibit, restrict, or otherwise inhibit insurance coverage of abortion care by State or local government or by private health plans.

(2) State and local government restrictions.—State and local governments shall not prohibit, restrict, or otherwise inhibit insurance coverage of abortion care by private health plans.

SEC. 22204. SENSE OF CONGRESS.

It is the sense of the Congress that—
(1) the Federal Government, acting in its capacity as an insurer, employer, or health care provider, should serve as a model for the Nation to ensure coverage of abortion care; and

(2) moreover, restrictions on coverage of abortion care in the private insurance market must end.

**SEC. 22205. RULE OF CONSTRUCTION.**

Nothing in this subtitle shall be construed to have any effect on any Federal, State, or local law that includes more protections for abortion coverage or care than those set forth in this subtitle.

**SEC. 22206. SEVERABILITY.**

If any portion of this subtitle or the application thereof to any person or circumstances is held invalid, such invalidity shall not affect the portions or applications of this subtitle which can be given effect without the invalid portion or application.

Subtitle W—Sickle Cell Trait Research, Surveillance, and Public Education and Awareness

Sec. 22401. Findings.

Congress finds—

(1) sickle cell disease is the most common inherited blood disorder in the United States, affecting approximately 100,000 people in the United States;

(2) more than 3,000,000 people in the United States have the sickle cell trait, and many are unaware of their status;
(3) in 2010, the total number of babies born with sickle cell trait was estimated to have exceeded 60,000, and the total United States incidence estimate was 15.5 cases per 1,000 births;

(4) sickle cell disease occurs in about 1 out of every 365 Black or African-American births and 1 out of every 16,300 Hispanic-American births;

(5) individuals who have sickle cell trait have a 50-percent chance of passing on the abnormal sickle cell gene to future offspring and 25-percent chance of having future children with sickle cell disease if both parents have the trait;

(6) sickle cell disease can be identified before birth by testing a sample of amniotic fluid or tissue from the placenta;

(7) individuals with sickle cell trait have the same life expectancy as the general population, but are at risk for certain conditions, including blood in the urine, kidney cancer, complications with trauma to the eye, and tissue death in the spleen at high altitudes, or may have a false positive A1C test;

(8) during the 115th Congress, Public Law 115–327 reauthorized a sickle cell disease prevention and treatment demonstration program and provided
for sickle cell research, surveillance, prevention, and
treatment;

(9) following the enactment of Public Law 115–
327, the National Institutes of Health launched the
Cure Sickle Cell Initiative aimed at bringing genetic
therapies into first-in-human clinical trials within
five years and moving newly developed genetic thera-
pies, including gene-editing approaches, into clinical
research;

(10) communication of a screening result con-
sistent with sickle cell trait should always be accom-
panied by appropriate counseling on the implica-
tions, provided by an individual with adequate train-
ing and understanding of the information;

(11) the limited research on the communication
of sickle cell trait test results to patients dem-
onstrates that there is a high prevalence of mis-
leading information being communicated during
counseling sessions for sickle cell trait following new-
born screening by clinicians; and

(12) no studies have examined whether infor-
mation on sickle cell trait test results is being accu-
rately transmitted to an individual, whether by a
family member or health care provider, prior to a
person’s reproductive years.
CONGRESS—

(1) recognizes the importance of ensuring that people in the United States can make informed decisions as a result of awareness of their sickle cell trait status;

(2) recognizes the ongoing challenges in addressing health outcomes among people with sickle cell trait and sickle cell disease;

(3) recognizes the importance of the development of, and access to, new treatments for sickle cell disease;

(4) encourages the medical community, in coordination with State and Federal Government, to work to ensure that all individuals are made aware of their sickle cell trait status by developing a common strategy for dissemination of screening results, education, and counseling to parents and families in collaboration with all 50 States’ newborn screening programs;

(5) calls on the Department of Health and Human Services, in collaboration with experts, to develop a surveillance and public awareness campaign regarding the importance of knowing one’s sickle cell trait status and to gain knowledge on
sickle cell disease for all racial and ethnic groups in the United States;

(6) commits to build on the progress of Public Law 115–327 which reauthorized a sickle cell disease prevention and treatment demonstration program and provided for sickle cell research, surveillance, prevention, and treatment;

(7) calls on the Department of Health and Human Services to expand access for screening and appropriate counseling for carriers of sickle cell trait;

(8) commits to ensuring support for research that expands our understanding of the health outcomes and other implications of sickle cell trait and the health outcomes associated with sickle cell disease; and

(9) commits to ensuring equitable access among economic, racial, and ethnic groups to new treatments in order to improve health outcomes for those with sickle cell disease.

Subtitle X—National Youth HIV & AIDS Awareness Day

SEC. 22501. FINDINGS.

Congress finds that—
(1) National Youth HIV & AIDS Awareness Day is a nationwide observance that calls on people to take action to invest in the health, education, and leadership of young people;

(2) more than 30 years into the epidemic, the Centers for Disease Control and Prevention (CDC) estimates that in the United States more than 1,200,000 people are living with HIV, and every year approximately 40,000 people acquire HIV;

(3) in the United States, almost 40 percent of new HIV infections are young people ages 13 to 20;

(4) young people ages 13 to 24 account for one in five of the estimated 40,000 new HIV cases diagnosed each year in the United States;

(5) 41 percent of HIV-positive youth ages 13 to 24 do not know they carry the HIV virus;

(6) African-American youth bear a disproportionate burden of the epidemic, representing 57 percent of new infections in young people ages 13 to 24;

(7) young African-American men who have sex with men (MSM) ages 13 to 24 comprise 34 percent of new infections among all Black males;
(8) the Division of Adolescent and School Health (DASH) is the only Federal program supporting HIV prevention for adolescents in schools;

(9) the Nation’s largest Federal program dedicated to providing care and treatment for people living with HIV was named after Ryan White, a teenager from Indiana who helped educate a Nation about HIV and AIDS in the 1980s;

(10) the Ryan White Part D Program is one of the national efforts to link HIV-positive youth to medical care and support services;

(11) the Patient Protection and Affordable Care Act (PPACA) provides youth, including those at risk for and living with HIV/AIDS, better access to health care coverage, more health insurance options, additional funding for sex education, a prohibition against denying people living with HIV access to health care, and expanded access to Medicaid which will help more HIV-positive youth receive care; and

(12) April 10 of each year is now recognized as National Youth HIV & AIDS Awareness Day.

SEC. 22502. SENSE OF CONGRESS.

Congress—
(1) supports the goals and ideals of National Youth HIV & AIDS Awareness Day;

(2) encourages State and local governments, including their public health agencies, education agencies, schools, and media organizations to recognize and support such a day;

(3) promotes effective and comprehensive HIV prevention education programs both in and out of schools as a tool to ensure that all people in the United States are educated about HIV, as called for in the National HIV/AIDS Strategy;

(4) urges youth-friendly and accessible health care services to better provide for the early identification of HIV through voluntary routine testing, and to connect those in need to clinically and culturally appropriate care and treatment as early as possible;

(5) commends the work of AIDS service organizations, community and faith-based organizations, and school-based health centers that are providing youth-friendly, effective, prevention, treatment, care, and support services to young people living with and vulnerable to HIV/AIDS;

(6) recognizes the importance of interventions that address young people’s structural barriers to
living healthy lives, including accessible health care, safe and inclusive schools and communities, family acceptance, secure housing, excellent education, employment and legal protections, and poverty reduction initiatives;

(7) prioritizes youth leadership and development in order to ensure youth involvement in decisions which impact their health and well-being as a necessary means to achieving an AIDS-free generation;

(8) requires the full implementation of the National HIV/AIDS Strategy and its goals to reduce new HIV infections, increase access to care and improve health outcomes for people living with HIV, reduce HIV-related disparities and health inequities, and achieve a more coordinated national response to the HIV/AIDS epidemic;

(9) recommends a comprehensive prevention and treatment strategy that empowers young people, parents, public health workers, educators, faith leaders, and other stakeholders to fully engage with their communities and families to help decrease violence, discrimination, and stigma towards individuals who disclose their sexual orientation or HIV status; and
(10) calls for an AIDS-free generation that prioritizes youth leadership and development in order to ensure youth involvement in decisions which impact their health and well-being as well as advance a pipeline for the next generation of HIV/AIDS doctors, advocates, educators, researchers, and other professionals.

Subtitle Y—National Black HIV/AIDS Awareness Day

SEC. 22601. FINDINGS.

Congress finds that—

(1) the Centers for Disease Control and Prevention (CDC) estimates that in the United States more than 1,100,000 people are living with HIV, and 15 percent do not know they are infected;

(2) in 2017, approximately 38,739 people were diagnosed with HIV in the United States;

(3) since the beginning of the HIV/AIDS epidemic in the United States, racial and ethnic minorities have been disproportionately affected by the disease;

(4) African Americans are diagnosed with AIDS later than their White counterparts, are confronted with greater barriers in accessing care and
treatment, and face higher morbidity and mortality outcomes;

(5) African Americans account for nearly half of all those with AIDS who have died in the United States since the beginning of the epidemic;

(6) in 2015, 3,379 African Americans died of HIV or AIDS, accounting for 52 percent of total deaths attributed to the disease that year;

(7) in 2014, HIV/AIDS was the 6th leading cause of death for Black men overall and for Black women ages 25–34, and the 5th for Black men ages 35–44 and 4th for Black women ages 35–44 in 2014, ranking higher than their respective counterparts in any other racial/ethnic group;

(8) in 2016, African Americans represented 44 percent of all people living with HIV in the United States, despite comprising just 12 percent of the United States population;

(9) in 2016, over 17,000 African Americans were diagnosed with HIV;

(10) African-American gay and bisexual men are more affected by HIV than any other group in the United States, accounting for a higher proportion of HIV diagnoses, those living with HIV, those
ever diagnosed with AIDS, and HIV/AIDS-related
deaths;

(11) in 2016, more than half of African Ameri-
cans diagnosed with HIV were gay or bisexual men;

(12) in 2016, among all gay and bisexual men
who had received an HIV diagnosis, African Ameri-
cans accounted for the highest number (38 percent);

(13) according to a 2016 study by the CDC, an
estimated half of Black gay men will be diagnosed
with HIV in their lifetime, if current HIV diagnoses
rates persist;

(14) homophobia, stigma, and discrimination
pose major obstacles to HIV testing, treatment and
other prevention services for gay and bisexual Afri-
can-American men;

(15) among all women diagnosed with HIV in
2016, 61 percent were African American, despite
comprising only 14 percent of the female population
in the United States;

(16) African-American women face the highest
risk of HIV and other sexually transmitted infec-
tions (STIs) compared with women of other groups;

(17) the HIV diagnosis rate for African-Amer-
ican women remains 16 times as high as that of
White women, and almost five times that of Hispanic women;

(18) among African-American women, the leading transmission category of HIV infection is heterosexual contact, followed by intravenous drug use;

(19) research indicates that the high incarceration rates of Black men may contribute to the disproportionate rates of HIV infections among Black women;

(20) in 2010—the most recent data available—there were more than 20,000 inmates with HIV/AIDS in State and Federal prisons, a prevalence that is 4 times the rate of HIV in the general population;

(21) among incarcerated populations, African-American men are 5 times as likely as White men, and twice as likely as Hispanic/Latino men, to be diagnosed with HIV;

(22) among incarcerated populations, African-American women are more than twice as likely to be diagnosed with HIV as White or Hispanic/Latino women;

(23) transgender women in the United States are at high risk for HIV;
(24) more than half of all transgender people diagnosed with HIV are Black or African American; 

(25) the Southern United States now experiences the highest burden of the HIV/AIDS epidemic; 

(26) in 2017, the South made up 52 percent of the new HIV diagnoses in the United States; 

(27) African Americans are severely and disproportionately affected by HIV in the South, accounting for 53 percent of all new HIV infections in the region; 

(28) socioeconomic issues impact the rates of HIV infection among African Americans in the South and throughout the United States; 

(29) socioeconomic factors like income inequality, poverty, and lack of access to HIV prevention education and basic health services, and cultural factors like homophobia, transphobia, and racism all pose significant challenges to combating the HIV/AIDS epidemic; 

(30) we are seeing signs of progress; 

(31) from 2011 to 2015, HIV diagnoses among African-American women fell by nearly 20 percent and have also fallen sharply among African Americans who inject drugs;
(32) testing, education, counseling, and harm reduction practices are all critical to prevent HIV;

(33) life-saving treatment is also a proven prevention tool, and research shows that antiretroviral drugs can reduce the amount of virus to undetectable levels (also known as viral suppression), effectively resulting in no risk of transmission of HIV;

(34) in 2012, the Food and Drug Administration approved pre-exposure prophylaxis (PrEP) as prevention for people who are HIV-negative;

(35) PrEP can reduce the risk of HIV infection for HIV-negative people by up to 99 percent;

(36) in 1998, Congress and the Clinton administration created the National Minority AIDS Initiative to help coordinate funding, build capacity, and provide prevention, care, and treatment services within the African-American, Hispanic, Asian Pacific Islander, and Native American communities;

(37) the National Minority AIDS Initiative assists with leadership development of community-based organizations (CBOs), establishes and links provider networks, builds community prevention infrastructure, promotes technical assistance among
CBOs, and raises awareness among African-American communities;

(38) 2019 marks the twenty-first year of the National Minority AIDS Initiative which has successfully established life-saving services and programs to address the needs of those communities, families, and individuals most impacted and burdened HIV;

(39) in 2010, the Obama administration unveiled the first National HIV/AIDS Strategy, which identified a set of priorities and strategic action steps tied to measurable outcomes for moving the Nation forward in addressing the domestic HIV epidemic;

(40) in 2013, the National Association for the Advancement of Colored People (NAACP) released a manual of best practices for faith leaders to mobilize communities, advocate for community support for people infected with and affected by HIV/AIDS, and organize dialogues on HIV/AIDS as a social justice issue as part of “The Black Church and HIV: The Social Justice Imperative”;

(41) in July 2015, the “National HIV/AIDS Strategy for the United States: Updated to 2020”
was released and included actions and goals in order
to reduce HIV-related disparities and inequalities;
(42) the Affordable Care Act’s expansion of
Medicaid and reforms to the individual insurance
market have helped lower the uninsured rates for
nonelderly African Americans by more than one-
third between 2013 and 2016, leading to better
health outcomes for African Americans living with or
at risk of HIV;
(43) National Black HIV/AIDS Awareness Day
was founded by 5 national organizations in 1999 to
provide capacity-building assistance to Black com-
unities and organizations; and
(44) each year on February 7, individuals, or-
ganizations, and policy makers across the Nation
participate in National Black HIV/AIDS Awareness
Day to promote HIV education, testing, community
involvement, and treatment in Black communities.

SEC. 22602. SENSE OF CONGRESS.

Congress—
(1) supports the goals and ideals of National
Black HIV/AIDS Awareness Day;
(2) encourages State and local governments, in-
cluding their public health agencies, and media orga-
nizations to recognize and support such day, to pub-
licize its importance among their communities, and
to encourage individuals, especially African Ameri-
cans, to get tested for HIV;

(3) commends the work of AIDS service organi-
zations, community-based organizations, faith-based
organizations providers, community health centers
and health departments that are providing effective,
evidence-based, prevention, treatment, care, and sup-
port services to people living with and vulnerable to
HIV/AIDS;

(4) supports the implementation of the National
HIV/AIDS Strategy and its goals to reduce new
HIV infections, increase access to care and improve
health outcomes for people living with HIV, reduce
HIV-related disparities and health inequities, and
achieve a more coordinated national response to the
HIV/AIDS epidemic;

(5) supports reducing the impact of incarcer-
ation as a driver of new HIV infections within the
African-American community;

(6) supports reducing the number of HIV infec-
tions in the African-American community resulting
from intravenous drug use;

(7) supports effective and comprehensive HIV
prevention education programs to promote the early
identification of HIV through voluntary routine testing, and to connect those in need to clinically and culturally appropriate care and treatment as early as possible;

(8) supports appropriate funding for HIV/AIDS prevention, care, treatment, research, and housing, including community-based approaches to fight stigma, discrimination, racism, sexism, homophobia, and transphobia; and

(9) encourages comprehensive prevention, treatment, and care strategies that empower public health workers, educators, faith leaders, and other stakeholders to engage their communities to help decrease violence, discrimination, and stigma towards individuals who disclose their sexual orientation, gender identity, or HIV status.

Subtitle Z—Repeal Existing Policies That Encourage and Allow Legal HIV Discrimination

SEC. 22701. SHORT TITLE.

This subtitle may be cited as the “Repeal Existing Policies that Encourage and Allow Legal HIV Discrimination Act of 2020” or the “REPEAL HIV Discrimination Act of 2020”.

•HR 8352 IH
SEC. 22702. FINDINGS.

The Congress makes the following findings:

(1) At present, 34 States and 2 United States territories have criminal statutes based on perceived exposure to HIV, rather than behaviors motivated by an intent to harm, presenting a significant risk of transmission and resulting in actual transmission of HIV to another. Eleven States have HIV-specific laws that make spitting or biting a felony, even though it is not possible to transmit HIV via saliva. Twenty-four States require persons who are aware that they have HIV to disclose their status to sexual partners, regardless of whether they are non-infectious. Fourteen of these 24 States also require disclosure to needle-sharing partners. Twenty-five States criminalize one or more behaviors that pose a low or negligible risk for HIV transmission.

(2) HIV-specific criminal laws are classified as felonies in 28 States; in three States, a person’s exposure to another to HIV does not subject the person to criminal prosecution for that act alone, but may result in a sentence enhancement. Eighteen States impose sentences of up to 10 years per violation; seven impose sentences between 11 and 20 years; and five impose sentences of greater than 20 years.
(3) When members of the Armed Forces acquire HIV, they are issued orders that require them to disclose and use a condom under all circumstances including when the known risk of transmission is zero. Failure to disclose can result in prosecution under the Uniform Code of Military Justice (UCMJ).

(4) The number of prosecutions, arrests, and instances where HIV-based charges are used to induce plea agreements is unknown. Because State-level prosecution and arrest data are not readily available in any national legal database, the societal impact of these laws may be underestimated and most cases that go to trial are not reduced to written, published opinions.

(5) State and Federal criminal law does not currently reflect the three decades of medical advances and discoveries made with regard to transmission and treatment of HIV/AIDS.

(6) According to CDC, correct and consistent male or female condom use is very effective in preventing HIV transmission. However, most State HIV-specific laws and prosecutions do not treat the use of a condom during sexual intercourse as a miti-
gating factor or evidence that the defendant did not intend to transmit HIV.

(7) Criminal laws and prosecutions do not take into account the benefits of effective antiretroviral medications, which suppress the virus to extremely low levels and further reduce the already low risk of transmitting HIV to near zero.

(8) In addition to HIV-specific criminal laws, general criminal laws are often misused to prosecute people based on their HIV status. Although HIV, and even AIDS, currently is viewed as a treatable, chronic, medical condition, people living with HIV have been charged under aggravated assault, attempted murder, and even bioterrorism statutes because prosecutors, courts, and legislators continue to view and characterize the blood, semen, and saliva of people living with HIV as a “deadly weapon”.

(9) Multiple peer-reviewed studies demonstrate that HIV-specific laws do not reduce risk-taking behavior or increase disclosure by people living with or at risk of HIV, and there is increasing evidence that these laws reduce the willingness to get tested. Furthermore, placing legal responsibility for preventing the transmission of HIV and other pathogens that can be sexually transmitted exclusively on people di-
agnosed with a sexually transmitted infection under-
mines the public health message that all people are
responsible for practicing behaviors that protect
themselves from HIV and other sexually transmitted
infections. Unfortunately, some State laws create an
expectation of disclosure work against public health
communication and discourage risk-reduction meas-
ures that could prevent transmission as a result of
those who are acutely infected and unaware of their
status.

(10) The identity of an individual subject to an
HIV-based prosecution is broadcast through media
reports, potentially destroying employment opportu-
nities and relationships and violating the person’s
right to privacy.

(11) Individuals who are convicted after an
HIV-based prosecution often must register as sex of-
fenders even in cases involving consensual sexual ac-
tivity. Their employability is destroyed, and their
family relationships are fractured.

(12) The United Nations, including the Joint
United Nations Programme on HIV/AIDS
(UNAIDS), urges governments to “limit criminaliza-
tion to cases of intentional transmission.” This re-
quirement would limit prosecutions to situations
“where a person knows his or her HIV-positive status, acts with the intention to transmit HIV, and does in fact transmit it”. UNAIDS also recommends that criminal law should not be applied to cases where there is no significant risk of transmission.

(13) In 2010, the Federal Government released the first ever National HIV/AIDS Strategy (NHAS), which addressed HIV-specific criminal laws, stating: “While we understand the intent behind these laws, they may not have the desired effect and they may make people less willing to disclose their status by making people feel at even greater risk of discrimination. In some cases, it may be appropriate for legislators to reconsider whether existing laws continue to further the public interest and public health. In many instances, the continued existence and enforcement of these types of laws run counter to scientific evidence about routes of HIV transmission and may undermine the public health goals of promoting HIV screening and treatment.”. The NHAS also states that State legislatures should consider reviewing HIV-specific criminal statutes to ensure that they are consistent with current knowledge of HIV transmission and support public health approaches to preventing and treating HIV.
(14) The Global Commission on HIV and the Law was launched in June 2010 to examine laws and practices that criminalize people living with and vulnerable to HIV and to develop evidence-based recommendations for effective HIV responses. The Commission calls for “governments, civil society and international bodies to repeal punitive laws and enact laws that facilitate and enable effective responses to HIV prevention, care and treatment services for all who need them”. The Commission recommends against the enactment of “laws that explicitly criminalize HIV transmission, exposure or non-disclosure of HIV status, which are counter-productive”.

(15) In February 2019, the Department of Health and Human Services (HHS) launched “Ending the HIV Epidemic: A Plan for America,” a new initiative with an ambitious goal to end the domestic HIV epidemic in ten years by reducing new cases of HIV by 75 percent by 2025 and by 90 percent by 2030. In this plan, HHS notes that stigma “can be a debilitating barrier preventing people living with, or at risk for, HIV from receiving the health care, services, and respect they need and deserve.” Many of the States and jurisdictions identified as a pri-
ority for the first five years of the plan have stigma-
based criminal statutes for perceived exposure to
HIV. These statutes run counter to the goals of this
new initiative and stand in the way of ending the do-
mestic HIV epidemic.

SEC. 22703. SENSE OF CONGRESS REGARDING LAWS OR
REGULATIONS DIRECTED AT PEOPLE LIVING
WITH HIV.

It is the sense of Congress that Federal and State
laws, policies, and regulations regarding people living with
HIV—

(1) should not place unique or additional bur-
dens on such individuals solely as a result of their
HIV status; and

(2) should instead demonstrate a public health-
oriented, evidence-based, medically accurate, and
contemporary understanding of—

(A) the multiple factors that lead to HIV
transmission;

(B) the relative risk of demonstrated HIV
transmission routes;

(C) the current health implications of liv-
ing with HIV;
(D) the associated benefits of treatment and support services for people living with HIV; and

(E) the impact of punitive HIV-specific laws, policies, regulations, and judicial precedents and decisions on public health, on people living with or affected by HIV, and on their families and communities.

SEC. 22704. REVIEW OF FEDERAL AND STATE LAWS.

(a) REVIEW OF FEDERAL AND STATE LAWS.—

(1) IN GENERAL.—Not later than 90 days after the date of the enactment of this Act, the Attorney General, the Secretary of Health and Human Services, and the Secretary of Defense acting jointly (in this section referred to as the "designated officials") shall initiate a national review of Federal and State laws, policies, regulations, and judicial precedents and decisions regarding criminal and related civil commitment cases involving people living with HIV/AIDS, including in regard to the Uniform Code of Military Justice (UCMJ).

(2) CONSULTATION.—In carrying out the review under paragraph (1), the designated officials shall seek to include diverse participation from, and consultation with, each of the following:
(A) Each State.

(B) State attorneys general (or their representatives).

(C) State public health officials (or their representatives).

(D) State judicial and court system officers, including judges, district attorneys, prosecutors, defense attorneys, law enforcement, and correctional officers.

(E) Members of the United States Armed Forces, including members of other Federal services subject to the UCMJ.

(F) People living with HIV/AIDS, particularly those who have been subject to HIV-related prosecution or who are from minority communities whose members have been disproportionately subject to HIV-specific arrests and prosecution.

(G) Legal advocacy and HIV/AIDS service organizations that work with people living with HIV/AIDS.

Subtitle CC—Study, Treat, Observe
and Prevent Neglected Diseases
of Poverty Act (short Title STOP
Neglected Diseases of Poverty
Act)

SEC. 23001. SHORT TITLE.
This Act may be cited as the “Study, Treat, Observe,
and Prevent Neglected Diseases of Poverty Act” or the
“STOP Neglected Diseases of Poverty Act”.

SEC. 23002. FINDINGS.
Congress finds as follows:

(1) Neglected diseases of poverty, many of
which are also known as “neglected tropical dis-
eseases”, are a group of diseases that disproportion-
ately affect vulnerable populations living in extreme
poverty.

(2) More than 1,000,000,000 people worldwide
are affected by neglected diseases of poverty.
(3) Neglected diseases of poverty can be transmitted—

(A) through contaminated food, water, and soil;

(B) through parasites, insects, blood transfusion, and organ transplant; and

(C) in some cases, congenitally.

(4) Neglected diseases of poverty have a high rate of morbidity and mortality and can lead to health complications such as heart disease, epilepsy, asthma, blindness, developmental delays, stillbirth, low birthweight, and gastrointestinal disorders.

(5) Some neglected diseases of poverty can be asymptomatic at the outset, but debilitating or dangerous symptoms can emerge over time or under certain conditions, such as pregnancy. It is estimated that millions of people are living with these diseases and are not aware that they are infected.

(6) For tens of thousands of individuals, diseases of poverty that are chronic and neglected can manifest into severe illness later in life.

(7) Neglected diseases of poverty place a significant financial burden on affected individuals and communities due to the health care costs associated with these diseases and because these diseases limit
individuals' productivity and ability to be active contributors to their communities. This burden could largely be prevented through early screening and treatment, which are highly cost effective.

(8) Since its inception in 2006, the Neglected Tropical Diseases Program at the United States Agency for International Development and its partners, including the Centers for Disease Control and Prevention, have delivered more than 1,600,000,000 treatments to more than 743,000,000 people.

(9) Due to the support provided by the United States Agency for International Development and its partners, 140,000,000 people live in regions where they are no longer at risk of contracting lymphatic filariasis, and 65,000,000 people live in regions where they are no longer at risk of contracting trachoma.

(10) Although the exact prevalence and burden of these diseases in the United States is unknown because of stigma and limited reporting, surveillance, and awareness, one study estimates that there are 12,000,000 individuals living with a neglected disease of poverty throughout the country. These diseases disproportionately affect racial and ethnic
minorities living in poverty and in regions where water quality and sanitation are substandard.

(11) The major neglected diseases of poverty in the United States that predominantly occur among those living in poverty are the following: Toxocariasis, cysticercosis, Chagas disease, toxoplasmosis, trichomoniasis, and Dengue Fever.

(12) There is a lack of diagnostic and treatment programs, including for early diagnosis and treatment, for neglected diseases of poverty. These programs would be highly cost effective and would significantly reduce the burden of morbidity and mortality of these diseases.

(13) Funding for research, preventive strategies, and the development of treatments and diagnostic tests for neglected diseases of poverty in the United States is limited.

SEC. 23003. SENSE OF CONGRESS.

It is the sense of Congress that there is a need to study the prevalence and incidence of neglected diseases of poverty in the United States, identify preventive methods to combat neglected diseases of poverty, conduct research that will lead to more treatments and diagnostic tests for neglected diseases of poverty, and supply health care providers, public health professionals, and affected in-
individuals and communities with educational resources on
neglected diseases of poverty.

SEC. 23004. DEFINITION OF NEGLECTED DISEASES OF POVERTY.

In this Act, the term “neglected diseases of poverty”
has the meaning given such term in section 399OO(e) of
the Public Health Service Act, as added by section 23005.

Subtitle F—Reducing COVID–19 Disparities by Investing in Public Health

SEC. 30601. SHORT TITLE.

This subtitle may be cited as the “Reducing COVID–19 Disparities by Investing in Public Health Act”.

SEC. 30602. FINDINGS.

The Congress finds the following:

(1) Funding under this subtitle is essential to core efforts at the Department of Health and Human Services and in local and State health departments to prevent and control the spread of chronic disease and conditions. The National Center for Chronic Disease Prevention and Health Promotion works to raise awareness of health disparities faced by minority populations of the United States such as American Indians, Alaska Natives, Asian Americans, African Americans, Latino Americans, and Native Hawaiians or other Pacific Islanders. One of the primary functions of the Center is to reduce risk factors for groups affected by health disparities.

(2) Six in ten Americans live with at least one chronic disease, like heart disease and stroke, cancer, or diabetes. These and other chronic diseases
are the leading causes of death and disability in America. Specifically, chronic diseases are responsible for 7 in 10 deaths each year. According to the Centers for Disease Control and Prevention ("CDC"), individuals who are at high risk for severe illness from COVID–19 are people with chronic lung disease or moderate to severe asthma, people with serious heart conditions, people who are immunocompromised—sometimes because of cancer or HIV/AIDS, people with diabetes, people with liver disease, people with severe obesity, and people with chronic kidney disease undergoing dialysis.

(3) According to hospital data from the first month of the COVID–19 epidemic in the United States released by the CDC, roughly 1 in 3 people who required hospitalizations from COVID–19 were African American. While 33 percent of total hospitalized patients are Black, African Americans constitute just 13 percent of the entire American population. Early data released by States and municipalities show that African Americans suffer higher mortality rates from COVID–19. Socioeconomic factors further contribute to racial disparities seen in both prevalence of chronic conditions and exposure to COVID–19. Individuals in low-income communities
and people of color are more likely to have many of the chronic health conditions that have been identified as risk factors for complications from COVID–19, yet suffer decreased access to care, compounded by a decreased likelihood of undergoing appropriate treatment.

(4) According to the American Diabetes Association, 12.1 percent of Hispanic Americans, 12.7 percent of African Americans, 8 percent of Asian Americans, and 15.1 percent of American Indians/Alaska Natives have been diagnosed with diabetes, compared to just 7.4 percent of White Americans. The CDC calculated that compared to non-Hispanic Whites, Hispanics are 40 percent more likely to die from diabetes, African Americans are twice as likely to die from diabetes, and American Indians/Alaska Natives are almost twice as likely to die from the disease.

(5) According to the National Institutes of Health, African Americans are more than 30 percent more likely to die from heart disease, are twice as likely to have a stroke—which tends to be more severe with a higher morbidity and results in higher mortality, are 40 percent more likely to have high blood pressure, and have a higher rate of hyper-
tension and heart failure than their White counterparts.

(6) Minority groups suffer from asthma at a disproportionate rate, have the highest number of emergency room visits and hospital stays due to asthma, and have higher mortality rates from asthma than their White counterparts. The prevalence of childhood asthma for African Americans is 12.7 percent compared to 8 percent for White Americans, while mortality rates in children and adults are eightfold and threefold higher, respectively, for African Americans compared to White Americans.

(7) President Trump has consistently proposed budgets that would cut the Chronic Disease Prevention and Health Promotion Fund. In fiscal year 2021, the President proposed to consolidate the CDC's primary chronic disease prevention activities, including tobacco, diabetes, heart disease, and stroke, and nutrition and physical activity, into a single block grant to States, while proposing a $427,000,000 cut to the account. In fiscal year 2020, the President proposed a $236,500,000 cut to the account. In fiscal year 2019, the President proposed a $138,300,000 cut to the account. In fiscal
year 2018, the President proposed a $222,300,000 cut to the account.

(8) Cuts to this Fund and other public health prevention efforts undermine efforts to create an affordable and accessible health care system, and a better quality of life for Americans of all ethnic, racial, and socioeconomic backgrounds. Cuts to this Fund would also exacerbate existing disparities and underlying health conditions that have created seemingly vast disparities in hospitalization and mortality rates due to COVID–19.

(9) Prevention efforts have proven to be effective. Funding increases for community-based public health programs reduce preventable disease caused by diabetes, cancer, and cardiovascular disease. Improved access to intervention, treatment, and affordable care is also proven to mitigate the development of associated chronic diseases and mortality rates.

(10) Increasing the Chronic Disease Prevention and Health Promotion Fund funding to $2,400,000,000 annually will allow the Fund to invest in more innovative, evidence-based public health programs, maintain and expand investments in programs with demonstrated success, and help reduce racial health disparities and rates of chronic disease
that can put persons of color at greater risk of hospitalization or death from COVID–19.

(11) Further, the Office of Minority Health in the Office of the Secretary of Health and Human Services (established by section 1707 of the Public Health Service Act (42 U.S.C. 300u–6)) was designed for the purpose of “improving minority health and the quality of health care minorities receive, and eliminating racial and ethnic disparities”. The Office of Minority Health and Health Equity at the CDC serves to decrease health disparities, address social determinants of health, and promote access to high-quality preventative health care. The Office of Minority Health and Health Equity at the Food and Drug Administration promotes and protects the health of diverse populations through research and communication of science that addresses health disparities. The National Institute on Minority Health and Health Disparities leads scientific research that advances understanding of minority health and health disparities.

(12) Increasing funding for these and other critical health programs will enable the United States and State departments of public health to
better combat disparities that have emerged during the COVID–19 crisis and beyond.

SEC. 31701. SHORT TITLE.

This subtitle may be cited as the “Ending Health Disparities During COVID–19 Act of 2021” or the “EHDC Act of 2020”.

PART 1—RACIAL AND ETHNICITY DATA COLLECTION

Subpart A—Collection and Reporting

SEC. 317101. EQUITABLE DATA COLLECTION AND DISCLOSURE ON COVID–19 ACT.

(a) FINDINGS.—Congress makes the following findings:

(1) The World Health Organization (WHO) declared COVID–19 a “Public Health Emergency of International Concern” on January 30, 2020. By late March 2020, there have been over 470,000 confirmed cases of, and 20,000 deaths associated with, COVID–19 worldwide.
(2) In the United States, cases of COVID–19 have quickly surpassed those across the world, and as of April 12, 2020, over 500,000 cases and 20,000 deaths have been reported in the United States alone.

(3) Early reporting on racial inequities in COVID–19 testing and treatment have renewed calls for the Centers for Disease Control and Prevention and other relevant subagencies within the Department of Health and Human Services to publicly release racial and demographic information to better inform the pandemic response, specifically in communities of color and in Limited English Proficient (LEP) communities.

(4) The burden of morbidity and mortality in the United States has historically fallen disproportionately on marginalized communities (those who suffer the most from great public health needs and are the most medically underserved).

(5) Historically, structures and systems, such as racism, ableism and class oppression, have rendered affected individuals more vulnerable to inequities and have prevented people from achieving their optimal health even when there is not a crisis of pandemic proportions.
(6) Significant differences in access to health care, specifically to primary health care providers, health care information, and greater perceived discrimination in health care place communities of color, individuals with disabilities, and LEP individuals at greater risk of receiving delayed, and perhaps poorer, health care.

(7) Stark racial inequities across the United States, including unequal access to stable housing, quality education, and decent employment significantly impact the ability of individuals to take care of their most basic health needs. Communities of color are more likely to experience homelessness and struggle with low-paying jobs or unemployment. To date, experts have cited that 2 in 5 Latino residents in New York City, the current epicenter of the COVID–19 pandemic, are recently unemployed as a direct consequence of COVID–19. And at a time when sheltering in place will save lives, less than 1 in 5 Black workers and roughly 1 in 6 Latino workers are able to work from home.

(8) Communities of color experience higher rates of chronic disease and disabilities, such as diabetes, hypertension, and asthma, than non-Hispanic White communities, which predisposes them to
greater risk of complications and mortality should they contract COVID–19.

(9) Such communities are made even more vulnerable to the uncertainty of the preparation, response, and events surrounding the pandemic public health crisis, COVID–19. For instance, in the recent past, multiple epidemiologic studies and reviews have reported higher rates of hospitalization due to the 2009 H1N1 pandemic among the poor, individuals with disabilities and preexisting conditions, those living in impoverished neighborhoods, and individuals of color and ethnic backgrounds in the United States. These findings highlight the urgency to adapt the COVID–19 response to monitor and act on these inequities via data collection and research by race and ethnicity.

(10) Research experts recognize that there are underlying differences in illness and death when each of these factors are examined through socioeconomic and racial or ethnic lenses. These socially determinant factors of health accelerate disease and degradation.

(11) Language barriers are highly correlated with medication noncompliance and inconsistent engagement with health systems. Without language ac-
cessibility data and research around COVID–19, these communities are less likely to receive critical testing and preventive health services. Yet, to date, the Centers for Disease Control and Prevention do not disseminate COVID–19 messaging in critical languages, including Mandarin Chinese, Spanish, and Korean within the same timeframe as information in English despite requirements to ensure limited English proficient populations are not discriminated against under title VI of the Civil Rights Act of 1964 and subsequent laws and Federal policies.

(12) Further, it is critical to disaggregate data further by ancestry to address disparities among Asian American, Native Hawaiian, and Pacific Islander groups. According to the National Equity Atlas, while 13 percent of the Asian population overall lived in poverty in 2015, 39 percent of Burmese people, 29 percent of Hmong people, and 21 percent of Pacific Islanders lived in poverty.

(13) Utilizing disaggregation of enrollment in Affordable Care Act-sponsored health insurance, the Asian and Pacific Islander American Health Forum found that prior to the passage of the Patient Protection and Affordable Care Act (Public Law 111–148), Korean Americans had a high uninsured rate
of 23 percent, compared to just 12 percent for all Asian Americans. Developing targeted outreach efforts assisted 1,000,000 people and resulted in a 56-percent decrease in the uninsured among the Asian, Native Hawaiian, and Pacific Islander population. Such efforts show that disaggregated data is essential to public health mobilizations efforts.

(14) Without clear understanding of how COVID–19 impacts marginalized racial and ethnic communities, there will be exacerbated risk of endangering the most historically vulnerable of our Nation.

(15) The consequences of misunderstanding the racial and ethnic impact of COVID–19 expound beyond communities of color such that it would impact all.

(16) Race and ethnicity are valuable research and practice variables when used and interpreted appropriately. Health data collected on patients by race and ethnicity will boost and more efficiently direct critical resources and inform risk communication development in languages and at appropriate health literacy levels, which resonate with historically vulnerable communities of color.
(17) To date, there is no public standardized and comprehensive race and ethnicity data repository of COVID–19 testing, hospitalizations, or mortality. The inconsistency of data collection by Federal, State, and local health authorities, and the inability to access data by public research institutions and academic organizations, poses a threat to analysis and synthesis of the pandemic impact on communities of color. However, research and medical experts of Historically Black Colleges and Universities, academic health care institutions which are historically and geographically embedded in minoritized and marginalized communities, generally also possess rapport with the communities they serve. They are well-positioned, as trusted thought leaders and health care service providers, to collect data and conduct research toward creating holistic solutions to remedy the inequitable impact of this and future public health crises.

(18) Well-designed, ethically sound research aligns with the goals of medicine, addresses questions relevant to the population among whom the study will be carried out, balances the potential for benefit against the potential for harm, employs
study designs that will yield scientifically valid and significant data, and generates useful knowledge.

(19) The dearth of racially and ethnically disaggregated data reflecting the health of communities of color underlies the challenges of a fully informed public health response.

(20) Without collecting race and ethnicity data associated with COVID–19 testing, hospitalizations, morbidities, and mortalities, as well as publicly disclosing it, communities of color will remain at greater risk of disease and death.

(b) EMERGENCY FUNDING FOR FEDERAL DATA COLLECTION ON THE RACIAL, ETHNIC, AND OTHER DEMOGRAPHIC DISPARITIES OF COVID–19.—To conduct or support data collection on the racial, ethnic, and other demographic implications of COVID–19 in the United States and its territories, including support to assist in the capacity building for State and local public health departments to collect and transmit racial, ethnic, and other demographic data to the relevant Department of Health and Human Services agencies, there is authorized to be appropriated—

(1) to the Centers for Disease Control and Prevention, $12,000,000;
(2) to State, territorial, and Tribal public health agencies, distributed proportionally based on the total population of their residents who are enrolled in Medicaid or who have no health insurance, $15,000,000;

(3) to the Indian Health Service, Indian Tribes and Tribal organizations (as defined in section 4 of the Indian Self-Determination and Education Assistance Act), and urban Indian organizations (as defined in section 4 of the Indian Health Care Improvement Act), $3,000,000;

(4) to the Centers for Medicare & Medicaid Services, $5,000,000;

(5) to the Food and Drug Administration, $5,000,000;

(6) to the Agency for Healthcare Research and Quality, $5,000,000; and

(7) to the Office of the National Coordinator for Health Information Technology, $5,000,000.

“(A) IN GENERAL.—The Secretary shall, sub-
ject to subparagraph (B), require an Ex-
change to provide—

“(i) for a special enrollment period
during the emergency period described in
section 1135(g)(1)(B) of the Social Secu-
ritv Act—

“(I) which shall begin on the
date that is one week after the date of
the enactment of this paragraph and
which, in the case of an Exchange es-
established or operated by the Secretary
within a State pursuant to section
1321(e), shall be an 8-week period;
and

“(II) during which any individual
who is otherwise eligible to enroll in a
qualified health plan through the Ex-
change may enroll in such a qualified
health plan; and

“(ii) that, in the case of an individual
who enrolls in a qualified health plan
through the Exchange during such enroll-
ment period, the coverage period under
such plan shall begin, at the option of the
individual, on April 1, 2021, or on the first
day of the month following the day the in-
dividual selects a plan through such special
enrollment period.

“(B) EXCEPTION.—The requirement of
subparagraph (A) shall not apply to a State-op-
erated or State-established Exchange if such
Exchange, prior to the date of the enactment of
this paragraph, established or otherwise pro-
vided for a special enrollment period to address
access to coverage under qualified health plans
offered through such Exchange during the
emergency period described in section
1135(g)(1)(B) of the Social Security Act.”.

(b) FEDERAL EXCHANGE OUTREACH AND EDU-
CATIONAL ACTIVITIES.—Section 1321(c) of the Patient
Protection and Affordable Care Act (42 U.S.C. 18041(c))
is amended by adding at the end the following new paragraph:

“(3) OUTREACH AND EDUCATIONAL ACTIVITIES.—

“(A) IN GENERAL.—In the case of an Exchange established or operated by the Secretary within a State pursuant to this subsection, the Secretary shall carry out outreach and educational activities for purposes of informing potential enrollees in qualified health plans offered through the Exchange of the availability of coverage under such plans and financial assistance for coverage under such plans. Such outreach and educational activities shall be provided in a manner that is culturally and linguistically appropriate to the needs of the populations being served by the Exchange (including hard-to-reach populations, such as racial and sexual minorities, limited English proficient populations, and young adults).

“(B) LIMITATION ON USE OF FUNDS.—No funds appropriated under this paragraph shall be used for expenditures for promoting non-ACA compliant health insurance coverage.
“(C) **NON-ACA COMPLIANT HEALTH INSURANCE COVERAGE.**—For purposes of subparagraph (B):

“(i) The term ‘non-ACA compliant health insurance coverage’ means health insurance coverage, or a group health plan, that is not a qualified health plan.

“(ii) Such term includes the following:

“(I) An association health plan.

“(II) Short-term limited duration insurance.

“(D) **FUNDING.**—There are appropriated, out of any funds in the Treasury not otherwise appropriated, $25,000,000, to remain available until expended—

“(i) to carry out this paragraph; and

“(ii) at the discretion of the Secretary, to carry out section 1311(i), with respect to an Exchange established or operated by the Secretary within a State pursuant to this subsection.”.

(e) **IMPLEMENTATION.**—The Secretary of Health and Human Services may implement the provisions of (including amendments made by) this section through subregulatory guidance, program instruction, or otherwise.
SEC. 317503. MOMMA'S ACT.

(a) SHORT TITLE.—This section may be cited as the “Mothers and Offspring Mortality and Morbidity Awareness Act” or the “MOMMA’s Act”.

(b) FINDINGS.—Congress finds the following:

(1) Every year, across the United States, 4,000,000 women give birth, about 700 women suffer fatal complications during pregnancy, while giving birth or during the postpartum period, and 70,000 women suffer near-fatal, partum-related complications.

(2) The maternal mortality rate is often used as a proxy to measure the overall health of a population. While the infant mortality rate in the United States has reached its lowest point, the risk of death for women in the United States during pregnancy, childbirth, or the postpartum period is higher than such risk in many other developed nations. The estimated maternal mortality rate (per 100,000 live births) for the 48 contiguous States and Washington, DC increased from 18.8 percent in 2000 to 23.8 percent in 2014 to 26.6 percent in 2018. This estimated rate is on par with such rate for underdeveloped nations such as Iraq and Afghanistan.

(3) International studies estimate the 2015 maternal mortality rate in the United States as 26.4
per 100,000 live births, which is almost twice the
2015 World Health Organization estimation of 14
per 100,000 live births.

(4) It is estimated that more than 60 percent
of maternal deaths in the United States are prevent-
able.

(5) According to the Centers for Disease Con-
trol and Prevention, the maternal mortality rate var-
ies drastically for women by race and ethnicity. There are 12.7 deaths per 100,000 live births for
White women, 43.5 deaths per 100,000 live births
for African-American women, and 14.4 deaths per
100,000 live births for women of other ethnicities.
While maternal mortality disparately impacts Afri-
can-American women, this urgent public health crisis
traverses race, ethnicity, socioeconomic status, edu-
cational background, and geography.

(6) African-American women are 3 to 4 times
more likely to die from causes related to pregnancy
and childbirth compared to non-Hispanic White
women.

(7) The findings described in paragraphs (1)
through (6) are of major concern to researchers,
academics, members of the business community, and
providers across the obstetrical continuum rep-
resented by organizations such as March of Dimes; the Preeclampsia Foundation; the American College of Obstetricians and Gynecologists; the Society for Maternal-Fetal Medicine; the Association of Women’s Health, Obstetric, and Neonatal Nurses; the California Maternal Quality Care Collaborative; Black Women’s Health Imperative; the National Birth Equity Collaborative; Black Mamas Matter Alliance; EverThrive Illinois; the National Association of Certified Professional Midwives; PCOS Challenge: The National Polycystic Ovary Syndrome Association; and the American College of Nurse Midwives.

(8) Hemorrhage, cardiovascular and coronary conditions, cardiomyopathy, infection, embolism, mental health conditions, preeclampsia and eclampsia, polycystic ovary syndrome, infection and sepsis, and anesthesia complications are the predominant medical causes of maternal-related deaths and complications. Most of these conditions are largely preventable or manageable.

(9) Oral health is an important part of perinatal health. Reducing bacteria in a woman’s mouth during pregnancy can significantly reduce her risk of developing oral diseases and spreading decay-causing bacteria to her baby. Moreover, some evi-
Evidence suggests that women with periodontal disease during pregnancy could be at greater risk for poor birth outcomes, such as preeclampsia, pre-term birth, and low-birth weight. Furthermore, a woman’s oral health during pregnancy is a good predictor of her newborn’s oral health, and since mothers can unintentionally spread oral bacteria to their babies, putting their children at higher risk for tooth decay, prevention efforts should happen even before children are born, as a matter of pre-pregnancy health and prenatal care during pregnancy.

(10) The United States has not been able to submit a formal maternal mortality rate to international data repositories since 2007. Thus, no official maternal mortality rate exists for the United States. There can be no maternal mortality rate without streamlining maternal mortality-related data from the State level and extrapolating such data to the Federal level.

(11) In the United States, death reporting and analysis is a State function rather than a Federal process. States report all deaths—including maternal deaths—on a semi-voluntary basis, without standardization across States. While the Centers for Disease Control and Prevention has the capacity and
system for collecting death-related data based on
death certificates, these data are not sufficiently re-
ported by States in an organized and standard for-
mat across States such that the Centers for Disease
Control and Prevention is able to identify causes of
maternal death and best practices for the prevention
of such death.

(12) Vital statistics systems often underesti-
mate maternal mortality and are insufficient data
sources from which to derive a full scope of medical
and social determinant factors contributing to ma-
ternal deaths. While the addition of pregnancy
checkboxes on death certificates since 2003 have
likely improved States’ abilities to identify preg-
nancy-related deaths, they are not generally com-
pleted by obstetrical providers or persons trained to
recognize pregnancy-related mortality. Thus, these
vital forms may be missing information or may cap-
ture inconsistent data. Due to varying maternal
mortality-related analyses, lack of reliability, and
granularity in data, current maternal mortality
informatics do not fully encapsulate the myriad med-
ic and socially determinant factors that contribute
to such high maternal mortality rates within the
United States compared to other developed nations.
Lack of standardization of data and data sharing across States and between Federal entities, health networks, and research institutions keep the Nation in the dark about ways to prevent maternal deaths.

(13) Having reliable and valid State data aggregated at the Federal level are critical to the Nation’s ability to quell surges in maternal death and imperative for researchers to identify long-lasting interventions.

(14) Leaders in maternal wellness highly recommend that maternal deaths be investigated at the State level first, and that standardized, streamlined, de-identified data regarding maternal deaths be sent annually to the Centers for Disease Control and Prevention. Such data standardization and collection would be similar in operation and effect to the National Program of Cancer Registries of the Centers for Disease Control and Prevention and akin to the Confidential Enquiry in Maternal Deaths Programme in the United Kingdom. Such a maternal mortalities and morbidities registry and surveillance system would help providers, academicians, law-makers, and the public to address questions concerning the types of, causes of, and best practices to
thwart, pregnancy-related or pregnancy-associated mortality and morbidity.

(15) The United Nations’ Millennium Development Goal 5a aimed to reduce by 75 percent, between 1990 and 2015, the maternal mortality rate, yet this metric has not been achieved. In fact, the maternal mortality rate in the United States has been estimated to have more than doubled between 2000 and 2014. Yet, because national data are not fully available, the United States does not have an official maternal mortality rate.

(16) Many States have struggled to establish or maintain Maternal Mortality Review Committees (referred to in this section as “MMRC”). On the State level, MMRCs have lagged because States have not had the resources to mount local reviews. State-level reviews are necessary as only the State departments of health have the authority to request medical records, autopsy reports, and police reports critical to the function of the MMRC.

(17) The United Kingdom regards maternal deaths as a health systems failure and a national committee of obstetrics experts review each maternal death or near-fatal childbirth complication. Such committee also establishes the predominant course of
maternal-related deaths from conditions such as preeclampsia. Consequently, the United Kingdom has been able to reduce its incidence of preeclampsia to less than one in 10,000 women—its lowest rate since 1952.

(18) The United States has no comparable, coordinated Federal process by which to review cases of maternal mortality, systems failures, or best practices. Many States have active MMRCs and leverage their work to impact maternal wellness. For example, the State of California has worked extensively with their State health departments, health and hospital systems, and research collaborative organizations, including the California Maternal Quality Care Collaborative and the Alliance for Innovation on Maternal Health, to establish MMRCs, wherein such State has determined the most prevalent causes of maternal mortality and recorded and shared data with providers and researchers, who have developed and implemented safety bundles and care protocols related to preeclampsia, maternal hemorrhage, and the like. In this way, the State of California has been able to leverage its maternal mortality review board system, generate data, and apply those data to effect changes in maternal care-related protocol.
To date, the State of California has reduced its maternal mortality rate, which is now comparable to the low rates of the United Kingdom.

(19) Hospitals and health systems across the United States lack standardization of emergency obstetrical protocols before, during, and after delivery. Consequently, many providers are delayed in recognizing critical signs indicating maternal distress that quickly escalate into fatal or near-fatal incidences. Moreover, any attempt to address an obstetrical emergency that does not consider both clinical and public health approaches falls woefully under the mark of excellent care delivery. State-based maternal quality collaborative organizations, such as the California Maternal Quality Care Collaborative or entities participating in the Alliance for Innovation on Maternal Health (AIM), have formed obstetrical protocols, tool kits, and other resources to improve system care and response as they relate to maternal complications and warning signs for such conditions as maternal hemorrhage, hypertension, and preeclampsia.

(20) The Centers for Disease Control and Prevention reports that nearly half of all maternal deaths occur in the immediate postpartum period—
the 42 days following a pregnancy—whereas more than one-third of pregnancy-related or pregnancy-associated deaths occur while a person is still pregnant. Yet, for women eligible for the Medicaid program on the basis of pregnancy, such Medicaid coverage lapses at the end of the month on which the 60th postpartum day lands.

(21) The experience of serious traumatic events, such as being exposed to domestic violence, substance use disorder, or pervasive racism, can over-activate the body’s stress-response system. Known as toxic stress, the repetition of high-doses of cortisol to the brain, can harm healthy neurological development, which can have cascading physical and mental health consequences, as documented in the Adverse Childhood Experiences study of the Centers for Disease Control and Prevention.

(22) A growing body of evidence-based research has shown the correlation between the stress associated with one’s race—the stress of racism—and one’s birthing outcomes. The stress of sex and race discrimination and institutional racism has been demonstrated to contribute to a higher risk of maternal mortality, irrespective of one’s gestational age, maternal age, socioeconomic status, or indi-
vidual-level health risk factors, including poverty, limited access to prenatal care, and poor physical and mental health (although these are not nominal factors). African-American women remain the most at risk for pregnancy-associated or pregnancy-related causes of death. When it comes to preeclampsia, for example, which is related to obesity, African-American women of normal weight remain the most at risk of dying during the perinatal period compared to non-African-American obese women.

(23) The rising maternal mortality rate in the United States is driven predominantly by the disproportionately high rates of African-American maternal mortality.

(24) African-American women are 3 to 4 times more likely to die from pregnancy or maternal-related distress than are White women, yielding one of the greatest and most disconcerting racial disparities in public health.

(25) Compared to women from other racial and ethnic demographics, African-American women across the socioeconomic spectrum experience prolonged, unrelenting stress related to racial and gender discrimination, contributing to higher rates of
maternal mortality, giving birth to low-weight babies, and experiencing pre-term birth. Racism is a risk-factor for these aforementioned experiences. This cumulative stress often extends across the life course and is situated in everyday spaces where African-American women establish livelihood. Structural barriers, lack of access to care, and genetic predispositions to health vulnerabilities exacerbate African-American women’s likelihood to experience poor or fatal birthing outcomes, but do not fully account for the great disparity.

(26) African-American women are twice as likely to experience postpartum depression, and disproportionately higher rates of preeclampsia compared to White women.

(27) Racism is deeply ingrained in United States systems, including in health care delivery systems between patients and providers, often resulting in disparate treatment for pain, irreverence for cultural norms with respect to health, and dismissiveness. Research has demonstrated that patients respond more warmly and adhere to medical treatment plans at a higher degree with providers of the same race or ethnicity or with providers with great ability to exercise empathy. However, the pro-
vider pool is not primed with many people of color, nor are providers (whether student-doctors in training or licensed practitioners) consistently required to undergo implicit bias, cultural competency, or empathy training on a consistent, on-going basis.

fore the first day of the first calendar
quarter beginning after the close of the
first regular session of the State legislature
that begins after the date of enactment of
this Act. For purposes of the previous sen-
tence, in the case of a State that has a 2-
year legislative session, each year of the
session shall be considered to be a separate
regular session of the State legislature.

sultation with such other agency heads as the Secretary
determines appropriate, shall award cooperative agree-
ments for the establishment or support of regional centers

petency in patient-provider interactions education for the
purpose of enhancing and improving how health care pro-
professionals are educated in implicit bias and delivering culturally competent health care.

(a) FINDINGS.—Congress finds the following:

(1) Healthy People 2020 defines social determinants of health as conditions in the environments in which people live, learn, work, play, worship, and age that affect a wide range of health, functioning, and quality-of-life outcomes and risks.

(2) One of the overarching goals of Healthy People 2020 is to “create social and physical environments that promote good health for all”.

(3) Healthy People 2020 developed a “place-based” organizing framework, reflecting five key areas of social determinants of health namely—

(A) economic stability;

(B) education;

(C) social and community context;

(D) health and health care; and

(E) neighborhood and built environment.
(4) It is estimated that medical care accounts for only 10 to 20 percent of the modifiable contributors to healthy outcomes for a population.

(5) The Centers for Medicare & Medicaid Services has indicated the importance of the social determinants in its work stating that, “As we seek to foster innovation, rethink rural health, find solutions to the opioid epidemic, and continue to put patients first, we need to take into account social determinants of health and recognize their importance.”

(6) The Department of Health and Human Services’ Public Health 3.0 initiative recognizes the role of public health in working across sectors on social determinants of health, as well as the role of public health as chief health strategist in communities.

(7) Through its Health Impact in 5 Years initiative, the Centers for Disease Control and Prevention has highlighted nonclinical, community-wide approaches that show positive health impacts, results within five years, and cost effectiveness or cost savings over the lifetime of the population or earlier.

(8) Health departments and the Centers for Disease Control and Prevention are not funded for such cross-cutting work.

**SEC. 317909. COVID–19 DESIGNATION OF IMMEDIATE SPECIAL AUTHORITY OF SPECTRUM FOR TRIBES’ EMERGENCY RESPONSE IN INDIAN COUNTRY.**

(a) **Findings.**—Congress finds the following:

(1) The immediate grant of emergency special temporary authority of available spectrum that will efficiently support temporary wireless broadband networks and allow Indian Tribes to provide Tribal members with wireless broadband service over Tribal lands or Hawaiian Home Lands during the COVID–19 crisis due to the increased demand for tele-
communications and disproportionate impacts of the COVID–19 pandemic in Indian Country is essential.

(2) Reservations are the most digitally disconnected areas in the United States that lack basic access to broadband and wireless services at rates comparable to, and in some cases lower than, third-world countries.

(3) In 2018, the Government Accountability Office and the Federal Communications Commission reported that only 65 percent of American Indian and Alaska Natives (AI/ANs) living on Tribal lands had access to fixed broadband services, and only 68 percent of AI/AN households on rural Tribal lands had telephone services. This is a stark comparison to only 8 percent of the national average that lacks access to fixed broadband services.

(4) Indian Tribes have previously encountered substantial barriers to accessing broadband and other communications services on Tribal lands to deploy telecommunication services for the safety and well-being of Tribal members and to decrease the alarming rates of unnecessary loss of lives that AI/ANs disproportionately experience, especially through the lack of access to health care services and emergency resources, as demonstrated during
the COVID–19 pandemic that continues to dis-
proportionately impact Indian Country.

(5) Indian Tribes’ lack of access to broadband
services on Tribal lands and Hawaiian Home Lands
during the COVID–19 pandemic further highlights
the digital divide in Indian Country.

(6) The Government Accountability Office
found that health information technology systems at
the Indian Health Service rank as the Federal Gov-
ernment’s third-highest need for agency system mod-
ernization, since 50 percent of Indian Health Service
facilities depend on outdated circuit connections
based on one or two TI circuit lines (3 Mbps), cre-
ating slower response times than any other health
facility system in the United States.

(7) A 2018 Tribal health reform comment filed
with the Federal Communications Commission has
further stated that approximately 1.5 million people
living on Tribal lands lack access to broadband and,
of the 75 percent of rural Indian Health Service fa-
cilities, many still lack reliable broadband networks
for American Indians and Alaska Natives (AI/ANs)
to access telehealth or clinical health care services,
which is a critical need in the most geographically
isolated areas of the country with some of the high-
est poverty rates, and lack of access to reliable transportation.

(8) The Bureau of Indian Education has stated that recent estimates from 142 out of 174 schools have indicated that approximately 15 to 95 percent of students do not have access to internet services at home depending on Bureau school location and limitations on data caps during the COVID–19 crisis.

(b) DEPLOYMENT OF WIRELESS BROADBAND SERVICE ON TRIBAL LANDS AND HAWAIIAN HOME LANDS.—

(1) Funding of grants for immediate deployment of wireless broadband service on tribal lands and Hawaiian Home Lands.—In addition to any other amounts made available, out of any money in the Treasury of the United States not otherwise appropriated, there are appropriated—

(A) $297,500,000 for grants under the community facilities grant program under section 306(a)(19) of the Consolidated Farm and Rural Development Act to Indian Tribes, qualifying Tribal entities, and the Director of the Department of Hawaiian Home Lands, for the immediate deployment of wireless broadband service on Tribal lands and Hawaiian Home
Lands, respectively, through the use of emergency special temporary authority granted under paragraph (2) of this subsection, including backhaul costs, repairs to damaged infrastructure, the cost of the repairs to which would be less expensive than the cost of new infrastructure and would support the emergency special temporary use, and the Federal share applicable to grants from such amount shall be 100 percent, which amount shall remain available for one year from the enactment of this Act; and

(B) $3,000,000 for grants under the community facilities technical assistance and training grant program under section 306(a)(26) of such Act, without regard to sections 306(a)(26)(B) and 306(a)(26)(C) of such Act, to assist Indian Tribes, qualifying Tribal entities, and the Director of the Department of Hawaiian Home Lands in preparing applications for the grants referred to in subparagraph (B) of this paragraph, which amount shall remain available for one year from the enactment of this Act.
Grants referred to under subparagraph (B) shall be available to Indian Tribes, qualifying Tribal entities and shall also be available to inter-Tribal government organizations, universities, and colleges with Tribal serving institutions for the purposes stated herein.

(2) **Emergency Special Temporary Authority To Use Available and Efficient Spectrum On Triballands and Hawaiian Home Lands.**

(A) **Grant of Authority.**—Not later than 10 days after receiving a request from an Indian Tribe, a qualifying Tribal entity, or the Director of the Department of Hawaiian Home Lands for emergency special temporary authority to use electromagnetic spectrum described in subparagraph (C) for the provision of wireless broadband service over the Tribal lands over which the Indian Tribe or qualifying Tribal entity has jurisdiction or (in the case of a request from the Director of the Department of Hawaiian Home Lands) over the Hawaiian Home Lands, allowing unlicensed radio transmitters to operate for such provision on such spectrum at locations on such Tribal lands or Hawaiian Home Lands where such spectrum is not being
used, the Commission shall grant such request on a secondary non-interference basis.

(B) DURATION.—A grant of emergency special temporary authority under subparagraph (A) shall be for a period of operation to begin not later than 6 months after the date of the enactment of this Act and to remain in operation for not longer than 6 months, absent extensions granted by the Commission pursuant to the procedures of the Commission relating to special temporary authority.

(C) ELECTROMAGNETIC SPECTRUM DESCRIBED.—The electromagnetic spectrum described in this subparagraph for utilization on the temporary basis is any portion of the electromagnetic spectrum—

(i) that is—

(II) in the white spaces of the television broadcast spectrum between the frequencies of 470 megahertz and 790 megahertz, inclusive, excluding those frequencies utilized for other
purposes under subpart H of part 15
of title 47, Code of Federal Regula-
tions;

(III) between the frequencies of
5925 megahertz and 7125 megahertz,
inclusive; or

TITLE IV—ENVIRONMENTAL
JUSTICE
Subtitle A—100% Clean Economy

SEC. 40101. SHORT TITLE.
This subtitle may be cited as the “100% Clean Econ-
omy Act of 2020”.

SEC. 40102. NATIONAL GOAL.
It is hereby declared that it is the national goal for
the United States to achieve a 100 percent clean economy
by not later than 2050.

SEC. 40103. FINDINGS.
Congress makes the following findings:
(1) In 2018, the United Nations Intergovern-
mental Panel on Climate Change released a report
which projected that the global mean surface tem-
perature of the Earth could rise 1.5 °C above
preindustrial levels as early as 2030. Increases be-
yond this threshold would likely have devastating ef-
fects on our society.

(2) The 2018 report indicates that to prevent
1.5 °C of warming above preindustrial levels, emis-
sions from human sources must be reduced by 40 to
60 percent from 2010 levels by 2030, and to net
zero emissions by 2050.

(3) The Federal Government can and must play
a leading role in global efforts to minimize climate
change and to mitigate its worst effects. By achiev-
ing a 100 percent clean economy by 2050, the
United States can take a critical step toward meet-
ing that obligation.

(4) Greenhouse gas pollution, like many other
forms of pollution, adversely affects human beings
on both local and global scales. These effects are
intersectional and accretive, and the cumulative im-
pact of past and present pollution has fallen dis-
proportionately upon already-vulnerable and
-marginalized communities, including communities of
color, Tribal and indigenous communities, low-in-
come communities, and rural communities. Current
and future effects of climate change, including ad-
verse health effects and other harms, are being and
will likely continue to be felt first and most severely in many of these same vulnerable communities.

(5) Governmental action to correct environmental injustice is morally imperative and necessary for public health. Federal policy can and should acknowledge, and make use of, the intersections between the interlinked challenges of correcting environmental injustice and reducing greenhouse gas pollution.

(6) At the same time, American workers and communities are also suffering from economic inequality and wages are not keeping up with the cost of living for healthcare and other necessities. The trend downward in union representation and the bargaining power that provides for workers has corresponded with an increase in income going to the top 10 percent of earners. Federal climate policy can and should be shaped to diminish economic inequality and expand the rights of workers.

(7) All people deserve clean air, clean water, a life free from toxic pollution that endanger public health or welfare, and to share in the benefits of a 100 percent clean economy.

(8) Sound climate policies to achieve a 100 percent clean economy will spur the development and
manufacturing of new technologies, the construction
and repair of infrastructure, the restoration of nat-
ural systems for resilience and carbon sequestration,
and the creation of new high-quality jobs. These in-
vestments can help ensure the competitiveness of the
United States in the global economy.

(9) As the Federal Government seeks to combat
climate change, these new resources and opportuni-
ties should be concentrated, as quickly as possible
and to the greatest extent practicable, in commu-
nities that are currently experiencing or potentially
face disproportionate harm from pollution, and that
face greater challenges in the transition to a 100
percent clean economy.

SEC. 40104. FEDERAL AGENCY PLANS.

(a) Plan Development.—The head of each Federal
agency shall, in accordance with this section, develop a
plan for actions to be taken by the Federal agency, con-
sistent with the Federal agency’s mission and exclusively
through authorities vested in the Federal agency by provi-
sions of law other than this subtitle, to achieve, in com-
bination with the other Federal agencies, the national goal
declared by section 40102. Each Federal agency’s plan
shall include actions that will—
(1) make significant and rapid progress toward meeting such national goal; and

(2) constitute a substantial change from business-as-usual policies and practices of such Federal agency.

(b) ACTIONS TO MEET GOALS.—

(1) IN GENERAL.—Actions selected by the head of a Federal agency to include in a plan developed under subsection (a) may include issuing regulations, providing incentives, carrying out research and development programs, reducing the greenhouse gas emissions of such Federal agency itself, and any other action the head of the Federal agency determines appropriate to achieve the national goal declared by section 40102.

(2) SELECTION.—In selecting actions to include in a plan developed under subsection (a), the head of each Federal agency shall select actions designed to—

(A) improve public health, resilience, and environmental outcomes, especially for rural and low-income households, communities of color, Tribal and indigenous communities, deindustrialized communities, and communities
that are disproportionately vulnerable to the impacts of climate change and other pollution;

(B) provide benefits for consumers, small businesses, farmers and ranchers, and rural communities;

(C) prioritize infrastructure investment that reduces emissions of greenhouse gases and other pollutants, creates quality jobs, and makes communities more resilient to the effects of climate change;

(D) enhance quality job creation and raise labor standards across the United States economy, including removing policy barriers to labor union organizing, protecting labor agreements, applying prevailing wage, safety and health protections, domestic content, and other provisions;

(E) lead in clean and emerging technology production and manufacturing across the supply chain and align policies to ensure United States companies retain their competitive edge in a clean economy;

(F) ensure fairness and equity for workers and communities affected by the transition to a 100 percent clean economy; and
(G) prepare communities for climate change impacts and risks.

(c) PROPOSED PLAN.—

(1) PUBLIC COMMENT.—Not later than 6 months after the date of enactment of this Act, the head of each Federal agency shall make the proposed plan of the Federal agency developed under subsection (a) available for public comment.

and in combination with the proposed plans of
other Federal agencies, sufficient to achieve the
national goal declared by section 40102 and ad-
vance the objectives listed in subsection (b)(2).

(d) SUBMISSION.—Not later than 15 months after
the date of enactment of this Act, the head of each Federal
agency shall make public and submit to Congress—

incorporates revisions to the proposed plan, as ap-
propriate, to address the recommendations provided
by the Administrator under subsection (c);

(2) the recommendations provided by the Ad-
ministrator under subsection (c); and

additional authority for the Federal agency, if any,
that would be helpful for such Federal agency, in

achieve the national goal declared by section 40102.

consultation with the Secretary as appropriate, shall pro-

The head of each Federal agency shall include the conclusion of each such review and any revised plan resulting from such review in the next annual report required under subsection (h).

Sec. 40226. Certain menstrual products misbranded if labeling does not include ingredients.

Sec. 40227. Support by National Institute of Environmental Health Sciences for research on health disparities impacting communities of color.

Sec. 40229. Economic revitalization for fossil fuel dependent communities.

Sec. 40230. Evaluation by Comptroller General of the United States.

(c) FINDINGS.—Congress finds the following:

(1) Communities of color, low-income communities, Tribal and indigenous communities, fossil fuel-dependent communities, and other vulnerable populations, such as persons with disabilities, children, and the elderly, are disproportionately burdened by environmental hazards that include exposure to polluted air, waterways, and landscapes.

(2) Environmental justice disparities are also exhibited through a lack of equitable access to green spaces, public recreation opportunities, and information and data on potential exposure to environmental hazards.

(3) Communities experiencing environmental injustice have been subjected to systemic racial, social, and economic injustices and face a disproportionate burden of adverse human health or environmental effects, a higher risk of intentional, unconscious, and structural discrimination, and disproportionate energy burdens.
(4) Environmental justice communities have been made more vulnerable to the effects of climate change due to a combination of factors, particularly the legacy of segregation and historically racist zoning codes, and often have the least resources to respond, making it a necessity for environmental justice communities to be meaningfully engaged as partners and stakeholders in government decision-making as our nation builds its climate resilience.

(5) Potential environmental and climate threats to environmental justice communities merit a higher level of engagement, review, and consent to ensure that communities are not forced to bear disproportionate environmental and health impacts.

(6) The burden of proof that a proposed action will not harm communities, including through cumulative exposure effects, should fall on polluting industries and on the Federal Government in its regulatory role, not the communities themselves.

(7) Executive Order 12898 (59 Fed. Reg. 32, relating to Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations) directs Federal agencies to address disproportionately high and adverse human health or environmental effects of its programs, but
Federal agencies have been inconsistent in updating their strategic plans for environmental justice and reporting on their progress in enacting these plans.

(8) Government action to correct environmental injustices is a moral imperative. Federal policy can and should improve public health and improve the overall well-being of all communities.

(9) All people have the right to breathe clean air, drink clean water, live free of dangerous levels of toxic pollution, and share the benefits of a prosperous and vibrant pollution-free economy.

(10) A fair and just transition to a pollution-free economy is necessary to ensure that workers and communities in deindustrialized areas have access to the resources and benefits of a sustainable future. This transition must also address the economic disparities experienced by residents living in areas contaminated by pollution or environmental degradation, including access to jobs, and members of those communities must be fully and meaningfully involved in transition planning processes.

(11) It is the responsibility of the Federal Government to seek to achieve environmental justice, health equity, and climate justice for all communities.
SEC. 40202. STATEMENT OF POLICY.

It is the policy of Congress that each Federal agency should—

(1) seek to achieve environmental justice as part of its mission by identifying and addressing, as appropriate, disproportionately adverse human health or environmental effects of its programs, policies, practices, and activities on communities of color, low-income communities, and Tribal and indigenous communities in each State and territory of the United States;

(2) promote meaningful involvement by communities and due process in the development, implementation, and enforcement of environmental laws;

(3) provide direct guidance and technical assistance to communities experiencing environmental injustice focused on increasing shared understanding of the science, laws, regulations, and policy related to Federal agency action on environmental justice issues;

(4) cooperate with State governments, Tribal Governments, and local governments to address pollution and public health burdens in communities experiencing environmental injustice, and build healthy, sustainable, and resilient communities; and
(5) recognize the right of all people to clean air, safe and affordable drinking water, protection from climate hazards, and to the sustainable preservation of the ecological integrity and aesthetic, scientific, cultural, and historical values of the natural environment.

Subtitle F—Supporting the Teaching of Climate Change in Schools

SEC. 40601. FINDINGS.

Congress finds the following:

(1) More than 80 percent of parents in the United States support the teaching of climate change.

(2) 86 percent of teachers in the United States feel that climate change should be taught in schools.

(3) 17 percent of teachers say they either do not have materials to teach climate change or they do not know enough about the subject to teach it.
(4) Climate change is not a partisan or political issue.

(5) There is a broad consensus among climate scientists that the human activities contributing to increases in greenhouse gas emissions are the dominant cause of climate change.

(6) To meaningfully act upon our changing climate and changed world, young people need education about its causes, consequences, anticipated future impacts, and possible solutions.

(7) Climate change is a social justice, racial justice, and human rights issue.

(8) According to the National Center for Science Education, 37 States and the District of Columbia recognize human-caused climate change in their science education standards.

(9) The National Science Teaching Association, the National Association of Geoscience Teachers, the National Association of Biology Teachers, and other professional organizations have called for greater support for science educators in teaching climate science and climate change.

(10) In 2015, the California State PTA declared climate change a children’s issue.
(11) In 2019, the California Association of School Psychologists declared climate change a potential threat to the psychological and social development of children.

(12) Climate change is threatening students’ communities with intensifying natural disasters, increasing temperatures, rising sea levels, and other extreme weather threats.

(13) Climate change disproportionately affects students of color and students in poverty, thereby exacerbating existing inequalities and limiting equality of opportunity.

(14) Children represent a particularly vulnerable group because greenhouse gases emitted into the atmosphere will continue to accumulate over the coming decades and cause negative health outcomes.

(15) Children are more vulnerable to the effects of criteria air pollutants emitted during the burning of fossil fuels.

(16) Americans must unify behind addressing climate change for the good of this generation and all subsequent generations.

(17) School districts should explore district-wide sustainability initiatives to educate students and reduce their carbon footprint.
(18) Teaching climate change in schools will help students understand the human impact of climate change.

(19) Teaching climate change in schools will help students understand that life on Earth depends on, is shaped by, and affects our climate.

(20) Teaching climate change will help students develop energy literacy and may stimulate interest in STEM careers.

(21) Teaching climate change will have consequences for Earth, human lives, and ecosystems around the world.

(22) When students engage in a climate change curriculum, they can develop a greater sense of efficacy with respect to their capacity to address critical social and environmental issues.

(23) The global impact of climate change and the urgency and magnitude of the challenge of addressing climate change will eventually fall on current students.

SEC. 40602. SENSE OF CONGRESS.

The Congress—

(1) supports teaching climate change in public and private schools at all grade levels;
(2) encourages the Federal Government, States, localities, nonprofit organizations, schools, and community organizations to teach climate change in appropriate programs and activities, with the goal of increasing public knowledge on the impacts that humans have on the climate; and

(3) encourages school districts to provide robust resources to teachers and students so they can learn about climate change in a safe and open learning environment.

Subtitle G—Women and Climate Change

SEC. 40701. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This subtitle may be cited as the “Women and Climate Change Act of 2020”.

(b) TABLE OF CONTENTS.—The table of contents for this subtitle is as follows:

Sec. 40701. Short title; table of contents.
Sec. 40702. Findings.
Sec. 40703. Definitions.
Sec. 40704. Statement of policy.

Part 1—Strategies, Policies, and Programs

Sec. 40711. Federal Interagency Working Group on Women and Climate Change.
Sec. 40712. Development and implementation of strategy and policies to prevent and respond to the effects of climate change on women globally.

Part 2—Oversight and Accountability

Sec. 40721. Senior Coordinator for Women and Climate Change.
Sec. 40722. Briefing and report.
SEC. 40702. FINDINGS.

Congress makes the following findings:

(1) Women in the United States and around the world are the linchpin of families and communities and are often the first to feel the immediate and adverse effects of social, environmental, and economic stresses on their families and communities.

(2) The United Nations has recognized, as one of the central organizing principles for its work, that “no enduring solution to society’s most threatening social, economic and political problems can be found without the full participation, and the full empowerment, of the world’s women”.

(3) The United Nations Development Programme 2013 Human Development Report has found that the number of people living in extreme poverty could increase by up to 3,000,000,000 by 2050 unless environmental disasters are averted by coordinated global action.

(4) Climate change is already forcing the most vulnerable communities and populations in developing countries to face unprecedented climate stress, including water scarcity and drought, as well as severe weather events and floods, which can lead to reduced agricultural productivity, food insecurity, and increased disease.
(5) Climate change exacerbates issues of scarcity and lack of accessibility to primary natural resources, forest resources, and arable land for food production, thereby contributing to increased conflict and instability, as well as the workload and stresses on women farmers, who are estimated to produce 60 to 80 percent of the food in most developing countries.

(6) Women will disproportionately face harmful impacts from climate change, particularly in poor and developing nations where women regularly assume increased responsibility for growing the family’s food and collecting water, fuel, and other resources.

(7) Epidemics, such as malaria and zika, are expected to worsen and spread due to variations in climate, putting women (especially pregnant mothers and women who hope to become pregnant) and children without access to prevention and medical services at risk.

(8) The direct and indirect effects of climate change have a disproportionate impact on marginalized women, such as environmental refugees and displaced persons, migrants, religious, racial, or ethnic minorities, adolescent girls, lesbian and trans
women, women living in poverty, and women and
girls with disabilities and those who are living with
HIV.

(9) Conflict has a disproportionate impact on
the most vulnerable communities and populations,
including women, and is fueled in the poorest re-
gions of the world by harsher climates, leading to
migration, refugee crises, and conflicts over scarce
natural resources, including land and water.

(10) Displaced, refugee, and stateless women
and girls face extreme violence and threats, includ-
ing—

(A) being forced to exchange sex for food
and humanitarian supplies;

(B) being at increased risk of rape, sexual
exploitation, and abuse; and

(C) being at increased risk for HIV, sexu-
ally transmitted infections (STIs), unplanned
pregnancy, and poor reproductive health.

(11) It is predicted that climate change will
lead to increasing frequency and intensity of extreme
weather conditions, precipitating the occurrence of
natural disasters around the globe.

(12) The relocation and death of women, and
especially mothers, as a result of climate-related dis-
asters often has devastating impacts on social support networks, family ties, and the coping capacity of families and communities.

(13) The ability of women to adapt to climate change is constrained by a lack of economic freedoms, property and inheritance rights, and access to financial resources, education, family planning and reproductive health, and new tools, equipment, and technology.

(14) Despite having a unique capacity and knowledge to promote and provide for adaptation to climate change, women often have insufficient resources to undertake such adaptation.

(15) Women are shown to have a multiplier effect because women use their income and resources, when given the necessary tools, to increase the well-being of their children and families, and thus play a critical role in reducing food insecurity, poverty, and socioeconomic effects of climate change.

(16) Women are often underrepresented in the development and formulation of policy regarding mitigation and adaptation to climate change, even though women are often in the best position to provide and consult on adaptive strategies.

Subtitle J—Clean Air Sharp Minds Act

SEC. 41001. SHORT TITLE.

This subtitle may be cited as the “Clean Air Sharp Minds Act”.

SEC. 41002. PURPOSES.

The purposes of this subtitle are—

(1) to improve the health and academic achievement of students in highly polluted environments;

(2) to demonstrate the impacts of clean air at school on student learning and well-being; and

(3) to support the Nation’s schools to advance environmental justice.

SEC. 41003. FINDINGS.

Congress finds the following:

(1) Substantial research demonstrates that air pollution negatively impacts health and cognition.

(2) More than 1 in 5 public schools in the United States are located within a mile of a toxic re-
lease site. Nearly 1 in 11 public schools, serving 4,400,000 students, are less than 500 feet from a major road.

(3) According to a 2017 report, 4 percent of schools serving predominantly White students are next to major roads, while 15 percent of schools serving largely students of color are next to major roads.

(4) Indoor levels of air pollutants can be 2 to 5 times higher, and sometimes 100 times higher, than outdoor levels. In 2014, nearly half of schools in the United States reported having problems related to indoor air quality.

(5) Schools in poor repair may have additional air quality problems, including lead, asbestos, dust, and radon contamination.

(6) Poor indoor air quality increases the risk of severe asthma attacks and allergic reactions. Asthma is the leading cause of missed school days in the United States.

(7) High-performance air filters can decrease indoor particulate matter by 90 percent.

(8) Research demonstrates the potential for school air filters to improve student learning. In 2016, commercial air filters were installed in every
classroom, office, and common area of 18 public
schools in Los Angeles. Controlling for student de-
mographics, mathematics test scores at these schools
improved dramatically, nearly matching the impact
of reducing class sizes by a third, and gains per-
sisted the following the year.

Nothing in
this subtitle shall be construed to interfere with
a collective bargaining agreement.

subclause, the term ‘individual, durable, voter-verified, paper ballot’ means a paper ballot marked by the voter by hand or a paper ballot marked through the use of a nontabulating ballot marking device or system, so long as the voter shall have the option to mark his or her ballot by hand.

“(II) The voting system shall provide the voter with an opportunity to correct any error on the paper ballot before the permanent voter-verified paper ballot is preserved in accordance with clause (ii).

“(III) The voting system shall not preserve the voter-verified paper ballots in any manner that makes it possible, at any time after the ballot has been cast, to associate a voter with the record of the voter’s vote without the voter’s consent.

“(ii) Preservation as official record.—The individual, durable, voter-verified, paper ballot used in accordance with clause (i) shall constitute the official ballot and shall be preserved and used as the official ballot for purposes of any recount or audit conducted with respect to
any election for Federal office in which the voting system is used.

“(iii) Manual counting requirements for recounts and audits.—(I) Each paper ballot used pursuant to clause (i) shall be suitable for a manual audit, and shall be counted by hand in any recount or audit conducted with respect to any election for Federal office.

“(II) In the event of any inconsistencies or irregularities between any electronic vote tallies and the vote tallies determined by counting by hand the individual, durable, voter-verified, paper ballots used pursuant to clause (i), and subject to subparagraph (B), the individual, durable, voter-verified, paper ballots shall be the true and correct record of the votes cast.

“(iv) Application to all ballots.—The requirements of this subparagraph shall apply to all ballots cast in elections for Federal office, including ballots cast by absent uniformed services voters and overseas voters under the Uniformed
and Overseas Citizens Absentee Voting Act
and other absentee voters.

spect to any election for Federal of-

cce; and

“(II) it is demonstrated by clear
and convincing evidence (as deter-
mined in accordance with the applica-
ble standards in the jurisdiction in-
volved) in any recount, audit, or con-
test of the result of the election that
the paper ballots have been com-
promised (by damage or mischief or
otherwise) and that a sufficient num-
ber of the ballots have been so com-
promised that the result of the election could be changed,
the determination of the appropriate remedy with respect to the election shall be made in accordance with applicable State law, except that the electronic tally shall not be used as the exclusive basis for determining the official certified result.

“(ii) Rule for consideration of ballots associated with each voting machine.—For purposes of clause (i), only the paper ballots deemed compromised, if any, shall be considered in the calculation of whether or not the result of the election could be changed due to the compromised paper ballots.”.

```
“(B) 2-year delay for jurisdictions using certain paper record printers or certain systems using or producing voter-verifiable paper records in 2018.—

“(i) Delay.—In the case of a jurisdiction described in clause (ii), subparagraph (A) shall apply to a voting system in the jurisdiction as if the reference in such subparagraph to ‘2020’ were a reference to ‘2024’, but only with respect to the following requirements of this section:

“(I) Paragraph (2)(A)(i)(I) of subsection (a) (relating to the use of voter-marked paper ballots).

“(II) Paragraph (3)(B)(ii)(I) and (II) of subsection (a) (relating to access to verification from and casting of the durable paper ballot).

Subtitle G—Democracy Restoration

SEC. 50701. SHORT TITLE.

This subtitle may be cited as the “Democracy Res-
toration Act of 2020”.

•HR 8352 IH
SEC. 50702. FINDINGS.

Congress makes the following findings:

(1) The right to vote is the most basic constitutive act of citizenship. Regaining the right to vote reintegrates individuals with criminal convictions into free society, helping to enhance public safety.

(2) Article I, section 4, of the Constitution grants Congress ultimate supervisory power over Federal elections, an authority which has repeatedly been upheld by the United States Supreme Court.

(3) Basic constitutional principles of fairness and equal protection require an equal opportunity for citizens of the United States to vote in Federal elections. The right to vote may not be abridged or denied by the United States or by any State on account of race, color, gender, or previous condition of servitude. The 13th, 14th, 15th, 19th, 24th, and 26th Amendments to the Constitution empower Congress to enact measures to protect the right to vote in Federal elections. The 8th Amendment to the Constitution provides for no excessive bail to be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted.

(4) There are 3 areas in which discrepancies in State laws regarding criminal convictions lead to unfairness in Federal elections—
(A) the lack of a uniform standard for voting in Federal elections leads to an unfair disparity and unequal participation in Federal elections based solely on where a person lives;

(B) laws governing the restoration of voting rights after a criminal conviction vary throughout the country and persons in some States can easily regain their voting rights while in other States persons effectively lose their right to vote permanently; and

(C) State disenfranchisement laws disproportionately impact racial and ethnic minorities.

(5) State disenfranchisement laws vary widely. Two States do not disenfranchise individuals with criminal convictions at all. In 34 States, individuals with convictions may not vote while they are on parole and 30 of those States disenfranchise individuals on felony probation as well. In 12 States, a conviction can result in lifetime disenfranchisement.

(6) Several States deny the right to vote to individuals convicted of certain misdemeanors.

(7) In 2016, an estimated 6,100,000 citizens of the United States, or about 1 in 40 adults in the United States, could not vote as a result of a felony
conviction. Of the 6,100,000 citizens barred from voting then, only 22 percent were in prison. By contrast, 77 percent of persons disenfranchised then resided in their communities while on probation or parole or after having completed their sentences. Approximately 3,100,000 citizens who had completed their sentences were disenfranchised due to restrictive State laws. As of November 2018, the lifetime ban for persons with certain felony convictions was eliminated through a Florida ballot initiative. As a result, as many as 1,400,000 people are now eligible to have their voting rights restored. In 6 States—Alabama, Florida, Kentucky, Mississippi, Tennessee, and Virginia—more than 7 percent of the total population is disenfranchised.

(8) In those States that disenfranchise individuals post-sentence, the right to vote can be regained in theory, but in practice this possibility is often granted in a non-uniform and potentially discriminatory manner. Disenfranchised individuals sometimes must either obtain a pardon or an order from the Governor or an action by the parole or pardon board, depending on the offense and State. Individuals convicted of a Federal offense often have additional barriers to regaining voting rights.
(9) State disenfranchisement laws disproportionately impact racial and ethnic minorities. As of 2016, more than 7 percent of the voting-age African-American population, or 2,200,000 African-Americans, were disenfranchised. One out of every 13 African-Americans were unable to vote because of felony disenfranchisement, which is a rate more than 4 times greater than non-African-Americans. 7.4 percent of African-Americans were disenfranchised whereas 1.8 percent of non-African-Americans were. In 2016, in 4 States—Florida (23 percent), Kentucky (22 percent), Tennessee (21 percent), and Virginia (20 percent)—more than 1 in 5 African-Americans were unable to vote because of prior convictions.

(10) Latino citizens are also disproportionately disenfranchised based upon their disproportionate representation in the criminal justice system. If current incarceration trends hold, the lifetime likelihood of incarceration for males born in 2001 is 17 percent for Latinos, in contrast to less than 6 percent for non-Latino White men. When analyzing the data across 10 States, Latinos generally have disproportionately higher rates of disenfranchisement compared to their presence in the voting age population.
In 6 out of 10 States studied in 2003, Latinos constituted more than 10 percent of the total number of persons disenfranchised by State felony laws. In 4 States (California, 37 percent; New York, 34 percent; Texas, 30 percent; and Arizona, 27 percent), Latinos were disenfranchised by a rate of more than 25 percent.

(11) Disenfranchising citizens who have been convicted of a criminal offense and who are living and working in the community serves no compelling State interest and hinders their rehabilitation and reintegration into society.

(12) State disenfranchisement laws can suppress electoral participation among eligible voters by discouraging voting among family and community members of disenfranchised persons. Future electoral participation by the children of disenfranchised parents may be impacted as well.

(13) The United States is the only Western democracy that permits the permanent denial of voting rights for individuals with felony convictions.

SEC. 50703. RIGHTS OF CITIZENS.

The right of an individual who is a citizen of the United States to vote in any election for Federal office shall not be denied or abridged because that individual has
been convicted of a criminal offense unless such individual
is serving a felony sentence in a correctional institution
or facility at the time of the election.

Subtitle J—Deceptive Practices and Voter Intimidation Prevention

SEC. 51001. SHORT TITLE.

This subtitle may be cited as the “Deceptive Practices and Voter Intimidation Prevention Act of 2020”.

SEC. 51002. FINDINGS.

Congress makes the following findings:

(1) The right to vote by casting a ballot for one’s preferred candidate is a fundamental right ac-
corded to United States citizens by the Constitution, and the unimpeded exercise of this right is essential to the functioning of our democracy.

(2) Historically, certain citizens, especially racial, ethnic, and language minorities, were prevented from voting because of significant barriers such as literacy tests, poll taxes, and property ownership requirements.

(3) Some of these barriers were removed by the 15th, 19th, and 24th Amendments to the Constitution.

(4) Despite the elimination of some of these barriers to the polls, the integrity of today’s elections is threatened by newer tactics aimed at suppressing voter turnout. These tactics include “deceptive practices”, which involve the dissemination of false or misleading information intended to prevent voters from casting their ballots, prevent voters from voting for the candidate of their choice, intimidate the electorate, and undermine the integrity of the electoral process.

(5) Furthermore, since the decision in Shelby County v. Holder in which the Supreme Court struck down the coverage formula used by the Voting Rights Act of 1965 to determine which States
with a history of racial discrimination must affirmatively receive government permission before changing local voting laws, there have been Federal court decisions finding or affirming that States or localities intentionally discriminated against African Americans and other voters of color.

(6) Denials of the right to vote, and deceptive practices designed to prevent members of racial, ethnic, and language minorities from exercising that right, are an outgrowth of discriminatory history, including slavery. Measures to combat denials of that right are a legitimate exercise of congressional power under article I, section 4 and article II, section 1 of, and the 14th and 15th Amendments to, the United States Constitution.

(7) For the last few decades, there have been a number of instances of deceptive or intimidating practices aimed towards suppressing minority access to the voting booth that demonstrates the need for strengthened protections.

(8) In addition, in at least one instance in 1990, thousands of voters reportedly received postcards providing false information about voter eligibility and warnings about criminal penalties for
voter fraud. Most of the voters who received the postcards were African American.

(9) During the 2004 elections, Native American voters in South Dakota reported being required to provide photographic identification in order to vote, despite the fact that neither State nor Federal law required such identification.

(10) In the 2006 midterm elections, thousands of Latino voters received mailings warning them in Spanish that voting in a Federal election as an immigrant could result in incarceration—despite the fact that any immigrant who is a naturalized citizen of the United States has the same right to vote as any other citizen.

(11) In 2008, fliers were distributed in predominantly African-American neighborhoods falsely warning that people with outstanding warrants or unpaid parking tickets could be arrested if they showed up at the polls on Election Day. In the same year, there were reports of people receiving text messages on Election Day asking them to wait until the following day to vote.

(12) In 2012, there were reports of voters receiving calls falsely informing them that they could vote via telephone.
(13) In the 2016 elections, there were reports of students receiving fliers stating that in order to vote in a local precinct, they had to pay to change their driver’s license and re-register vehicles in the city in which the precinct was located.

(14) Those responsible for these and similar efforts should be held accountable, and civil and criminal penalties should be available to punish anyone who seeks to keep voters away from the polls by providing false information.

(15) Moreover, the Federal Government should help correct such false information in order to assist voters in exercising their right to vote without confusion and to preserve the integrity of the electoral process.

(17) The First Amendment does not preclude the regulation of some intentionally false speech, even if it is political in nature. As the Supreme Court of the United States has recognized, “[t]hat speech is used as a tool for political ends does not
automatically bring it under the protective mantle of
the Constitution. For the use of the known lie as a
tool is at once at odds with the premises of demo-
cratic government and with the orderly manner in
which economic, social, or political change is to be
effect ed . . . . Hence the knowingly false statement
and the false statement made with reckless disregard
of the truth, do not enjoy constitutional protection.”.

Subtitle M—VoteSafe

Sec. 51301. Short Title.

This subtitle may be cited as the “VoteSafe Act of 2020”.

•HR 8352 IH
SEC. 51302. FINDINGS.

Congress finds the following:

(1) The right to vote is the foundation of American democracy. Voting provides the citizenry with a vital check on their elected officials and grants people the political power necessary to exercise and defend the rights guaranteed by the United States Constitution.

(2) The Elections Clause of the United States Constitution gives Congress sweeping power to regulate the time, place, and manner of Federal elections (Article I, section 4 of the Constitution of the United States; see also Arizona v. Inter Tribal Council of Arizona, Inc., 570 U.S. 1 (2013)). Congress also has enforcement power under the Fourteenth and Fifteenth Amendments of the Constitution of the United States.

(3) As Dr. Martin Luther King, Jr., explained in a speech delivered on May 17, 1957, “So long as I do not firmly and irrevocably possess the right to vote I do not possess myself. I cannot make up my mind—it is made up for me. I cannot live as a democratic citizen, observing the laws I have helped to enact—I can only submit to the edict of others.”.

(4) The right to vote was not guaranteed to all Americans at our Nation’s founding. The ratification
of the Fifteenth and Nineteenth Amendments, the civil rights movement’s struggle for justice and equality, and the enactment of the Voting Rights Act of 1965 and its subsequent amendments succeeded in expanding access to the franchise.

(5) Unfortunately, the barriers faced by voters who have historically experienced the greatest obstacles to voting are exacerbated by the coronavirus (COVID–19) pandemic.

(6) Strategies to mitigate the spread of COVID–19 include “social distancing”, a practice that requires individuals to maintain a distance between themselves and other people in order to avoid acquiring or transmitting the virus. The need to embrace such precautions will require States to quickly modify voting processes to minimize person-to-person contact.

(7) Voting by mail is a critical part of the solution and must be expanded as quickly as possible, not simply as a means of ensuring access during public health emergencies, but also as a means of expanding access to the franchise to those whose work, health, or ability to access the ballot may be limited.

(8) However, safe and secure in-person voting remains vitally important for large groups of voters,
including voters with disabilities, language minority voters, American Indian and Alaska Native voters, and African-American voters.

(9) The Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and the Rehabilitation Act of 1973 (29 U.S.C. 701 et seq.) require that individuals with disabilities have equal access to every aspect of the voting process. Vote-by-mail poses various accessibility challenges for voters with disabilities, including blind, low-vision, or other print-disabled voters who may require in-person voting or assistive technology in order to privately and independently mark their ballots. Remedies for voters with disabilities require an investment of resources to ensure State and local election websites, online voter registration portals, and vote-by-mail systems are accessible; that in-person voting locations permit a safe, dignified, and accessible voting experience; and that the right of voters with disabilities to a secret ballot is not sacrificed due to the pandemic.

(10) Language minority voters face unique barriers to voting that require additional resources and support to ensure full and equal access, including additional resources to ensure local compliance with
the language minority voting protections in section 203 of the Voting Rights Act of 1965 (52 U.S.C. 10503) and greater language assistance services, including additional bilingual or multilingual poll workers and election workers.

(11) American Indian and Alaska Native voters face unique obstacles in a vote-by-mail system. Tribal communities in rural areas often do not have traditional residential mailing addresses and have limited access to transportation. Tribal members have distant rural post offices, slow mail routes, limited numbers of post office operation, and too few post office boxes. As a result, rural Tribal communities require distinct voting accommodations to ensure participation in a vote-by-mail system.

(12) Finally, in-person voting holds great significance for African-American voters, for whom the right to vote was hard won. African Americans have been excluded from the franchise through State and local laws, poll taxes, voting literacy tests, physical violence, and lynchings. For many African-American voters today, casting a ballot at one’s polling place is a solemn ritual that honors those who sacrificed their safety and their lives in order to secure the right to vote. However, COVID–19 poses substantial
risks to the African-American population and has infected and killed African Americans in the United States at disproportionately high rates, highlighting longstanding inequalities in resources and access to health care.

(13) Social distancing designed to curb the COVID–19 pandemic will also greatly impact in-person voter registration efforts, including voter registration drives and voter registration services required by the National Voter Registration Act. Many government offices, like State departments of motor vehicles, are currently closed to in-person traffic and are likely to remain closed for an indefinite period of time in 2020.

(14) Therefore, it is appropriate for Congress to expand no-excuse absentee vote-by-mail while also ensuring the safety and accessibility of in-person voting and voter registration during exigent circumstances, including the current pandemic.

voting booths;

(a) CALCULATION OF REVOCATION BASELINE.—

(1) GENERAL RULE.—The Director of the Administrative Office of the United States Courts, in consultation with the Director of the Bureau of Prisons and the United States Sentencing Commission,
shall calculate for each Federal judicial district a baseline revocation rate.

(2) Method of Calculation.—The baseline revocation rate for a judicial district is the percentage equivalent of the ratio of the total number of adult supervisees sent to prison from that district during the baseline period to the total number of adult supervisees sent to prison nationally during the same period.

(3) Definitions.—In this subsection—

(A) the term “sent to prison” means sent to Federal or State prison—

(3) **District Revocation Rates.**—For each judicial district, the district’s revocation rate, which is calculated as the number of supervisees from that district sent to prison in the previous year as a percentage of the district’s supervision population as of June 30th of that year.

(4) **Reduction in Revocation Rate.**—For each judicial district, the reduction in revocation rate is the number of adult supervisees from each district not revoked to prison, which is calculated based on the reduction in the district’s revocation rate as calculated under paragraph (3) from the district’s baseline revocation rate as calculated under
subsection (a). In making this estimate, the Director of the Administrative Office of the United States Courts, in consultation with the Director of the Bureau of Prisons and the Judicial Conference of the United States, may adjust the calculation to account for changes in each district’s caseload in the most recent completed year as compared to the district’s adult supervision population during the years 2012 through 2014.

The tiers are defined for the purposes of this subtitle as follows:

(2) Revocation reduction incentive payments for tier 2 districts.—For a tier 2 judicial district, its revocation rate shall equal the estimated number of supervisees successfully prevented from being sent to prison, as defined by section 60201(b)(4) multiplied by 40 percent of the costs to the Bureau of Prisons to incarcerate in prison a supervisee whose supervision is revoked.

(b) Distribution of grants for high-performing districts.—

(1) Funding reserved for high-performing districts.—Annually, the Director of the Administrative Office of the United States Courts, in consultation with the Director of the Bureau of Prisons and the United States Sentencing Commission, shall calculate 5 percent of the total savings attributed to those districts that successfully reduce the number of supervisees revoked to prison for the purposes of providing high-performance grants.

(2) Eligibility.—A judicial district is eligible for a high-performance grant if it is a district—

(A) with supervisee revocation rates more than 50 percent below the nationwide average in the most recently completed calendar year; and
(B) that has not exceeded the national revocation rate for the past three calendar years.

(3) ADMINISTRATION OF GRANTS FOR HIGH-PERFORMING DISTRICTS.—

(A) The Administrative Office of the United States Courts may make a high performance grant to a district in a year in which that district does not also receive a supervision revocation reduction payment under subsection (a).

(B) The chief probation officer, in consultation with the chief judge, in a judicial district that qualifies for both a high performance grant and a supervision revocation reduction payment shall inform the Administrative Office of the United States Courts, by a date designated by the Administrative Office of the United States Courts, whether the judicial district should receive the high performance grant or the supervision failure reduction incentive payment.

(C) The Administrative Office of the United States Courts shall seek to ensure that each qualifying judicial district that submits a qualifying application for a high performance
grant receives a proportionate share of the grant funding available, based on the population of adults age 18 to 25, inclusive, in that judicial district.

(c) Payments.—The Administrative Office of the United States Courts shall disburse the revocation reduction incentive payments and high performance grants calculated for any calendar year to judicial districts in the following fiscal year.

SEC. 60203. USE OF PERFORMANCE INCENTIVE FUNDING.

(a) Establishment of a Supervision Performance Incentive Fund.—Each district probation office is hereby authorized to establish a Supervision Performance Incentive Fund (hereinafter in this section referred to as the “Fund”), to receive all amounts allocated to the judicial district for the purposes of implementing this section. In any fiscal year for which a district probation office receives sums to be expended for the implementation of this section, those sums, including any interest, shall be made available to the chief probation officer of that district probation office, not later than 30 days after the deposit of those moneys into the fund.

(b) Authorized Use of Funds.—Funds received through appropriations for the purposes of this subtitle shall be used by the chief probation officer or his designee

(1) Implementing and expanding evidence-based risk and needs assessments.

(2) Implementing and expanding the use of graduated sanctions pursuant to [section 3609].

(3) Implementing and expanding treatment and services associated with problem-solving courts that are proven to reduce recidivism among the targeted population.

(4) Expanding the availability of evidence-based rehabilitation programs, including drug and alcohol treatment, mental health treatment, employment programs, services for victims of domestic violence, services for veterans, and cognitive behavioral therapy.

(5) Expanding the availability, in terms of hours and geographic locations, of day reporting centers and the reporting hours of existing probation offices to accommodate supervisees’ work, education, and/or child care schedules.
(6) Hiring social workers to assist supervisees in applications for social services and programs on the local, State, and Federal level.

(7) Evaluating the effectiveness of rehabilitation and supervision programs and ensuring program fidelity.

(c) MANDATORY EVALUATION.—

(1) IN GENERAL.—Except as provided in paragraph (2), the chief probation officer, in consultation with the chief judge of the judicial district, shall devote at least 5 percent of all funding received through the Fund to evaluate the effectiveness of those programs and practices implemented or expanded with the funds provided pursuant to this section.

(2) WAIVER OF REQUIREMENT.—A chief probation officer may petition the Administrative Office of the United States Courts for waiver of this restriction, and the Administrative Office of the United States Courts shall have the authority to grant such a petition, if the Chief Probation Officer can demonstrate that the department is already devoting sufficient funds to the evaluation of these programs and practices.
(d) **ACCOUNTING.**—The head of each district probation office receiving amounts from the Fund shall provide for a separate accounting of those amounts sufficient to evaluate the effectiveness of each program.

Subtitle C—Addressing Information Disparity and Accuracy in Criminal Prosecutions to Protect Innocence More Robustly and to Reduce the Number of Wrongful Convictions

SEC. 60301. FINDINGS AND DECLARATIONS.

The Congress finds and declares the following:

(1) The goal of a law enforcement investigation is to apprehend the person or persons responsible for the commission of a crime.

(2) Mistaken eyewitness identification has been shown to have contributed to the wrongful conviction in 72 percent of the Nation’s 330 DNA exonerations of innocent persons, including 20 who served time on death row and 30 who pled guilty. These innocents served an average of 13.5 years in prison before exoneration and release. No one benefits from a wrongful conviction—except the real perpetrator,
who remains free to commit additional crimes. In
half of the exoneration cases, the process of settling
the innocence claim led to the identification of the
real perpetrator. Over 140 violent crimes could have
been prevented had the real perpetrator been identi-
fied instead of the innocent.

(3) Over the past 30 years, a large body of
peer-reviewed, scientific research and practice has
emerged showing that simple systemic changes can
protect the innocent and the public by increasing the
accuracy of the evidence used to support a conviction
beyond a reasonable doubt. These reforms are—

(A) improving the accuracy of eyewitness
identification;

(B) preserving and analyzing forensic evi-
dence;

(C) recording confessions and interroga-
tions;

(D) regulating, disclosing, and video re-
cording informant or cooperator testimony;

(E) improving the quality of defense coun-
sel;

(F) providing for post-conviction DNA
testing for all applicants for whom DNA has
the potential to prove innocence; and
(G) increasing compensation to the wrong-
fully convicted.

(4) Policies and procedures to improve the ac-
curacy of eyewitness identifications such as those
recommended by the National Academy of Sciences,
the United States National Institute of Justice, the
International Association of Chiefs of Police, and the
American Bar Association are readily available.

(5) More accurate eyewitness identifications in-
crease the ability of police and prosecutors to convict
the guilty and protect the innocent.

(6) The integrity of the criminal justice process
is enhanced by adherence to best practices in evi-
dence gathering.

(7) Federal, State, and local governments will
benefit from the improvement of the accuracy of eye-
witness identifications.

(8) The value of properly preserved biological
evidence has been enhanced by the discovery of mod-
ern DNA testing methods, which, coupled with a
comprehensive system of DNA databases that store
crime scene and offender profiles, allow law enforce-
ment to improve its crime-solving potential.

(9) Tapping the potential of preserved biological
evidence requires the proper identification, collection,
preservation, storage, cataloguing and organization of such evidence.

(10) Law enforcement agencies indicate that “cold” case investigations are hindered by an inability to access biological evidence that was collected in connection with criminal investigations.

(11) Innocent people mistakenly convicted of the serious crimes for which biological evidence is probative cannot prove their innocence if such evidence is not accessible for testing in appropriate circumstances.

(12) It is well established that the failure to update policies regarding the preservation of evidence squanders valuable law enforcement resources, manpower hours and storage space.

(13) Simple but crucial enhancements to protocols for properly preserving biological evidence can solve old crimes, enhance public safety and settle claims of innocence.

(14) Existing Federal, State, and local laws still erect procedural hurdles that result in some potentially innocent applicants being barred from seeking DNA testing after a conviction has been imposed despite enduring probative value of DNA evidence.
(15) During his 2005 State of the Union address, President George W. Bush urged that, "[i]n America, we must make doubly sure no person is held to account for a crime he or she did not commit, so we are dramatically expanding the use of DNA evidence to prevent wrongful conviction”.

(16) United States Attorney General Eric Holder expressed his hope, in the interest of justice and identifying the true perpetrators of crimes, that “all levels of government will follow the Federal Government’s lead by working to expand access to DNA evidence”.

(17) Emerging DNA testing technologies can enhance the quality of justice.

(18) The scientifically reliable results of DNA testing provide the certainty and finality that bolster the public’s trust in our Federal, State, and local criminal justice systems.

(19) In addition to the wrongfully convicted and their families, crime victims, law enforcement, prosecutors, courts and the public are harmed whenever individuals guilty of crimes elude justice while innocent individuals are imprisoned for crimes they did not commit.
(20) Our Federal, State, and local governments must enhance their technology to increase the amount of testable, biological evidence and enhance their existing post-conviction DNA testing statutes so that all applicants for whom DNA testing has the potential to prove a claim of innocence will have the opportunity to obtain such testing.

(21) Properly audio and video recorded custodial interrogations provide the best evidence of the communications that occurred during an interrogation; prevent disputes about how an officer conducted himself or treated a suspect during the course of an interrogation; prevent disputes about the account of events the defendant originally provided to law enforcement; spare judges and jurors the time necessary and need to assess which account of an interrogation to believe; and enhance public confidence in the criminal process. It is therefore the Congress’ intent to require the video and audio recording of all custodial interrogations in Federal law enforcement agencies.

(22) An informant is a person who was not a victim of a crime who offers to provide information or assistance to law enforcement in exchange for leniency or some other benefit. The testimony of in-
formants, who have reason to seek leniency from the criminal justice system in exchange for their testimony, is inherently suspect. However, truthful informant testimony may still be important in solving crimes.

(23) Rewarding informants, either tacitly or explicitly, by the Government produces dangerous incentives to manufacture or fabricate testimony. Thus, it is incumbent upon the judicial system to assess whether informant testimony is reliable.

(24) The use of informant testimony without a system to properly assess its reliability or corroborate its substance provides fertile ground for obstruction of the fair administration of justice.

(25) Therefore, a system to properly assess the reliability of informant testimony, including, but not limited to audio and video recording of all statements provided by informants, should be developed.

(26) The failure to properly educate law enforcement, defense lawyers, prosecutors, judges, juries, and other fact investigators and fact finders about the vulnerabilities inherent in informant testimony enables improper consideration of such testimony, which can seriously undermine the integrity of our criminal justice system.
SEC. 60302. ACCURACY AND RELIABILITY OF EVIDENCE IN CRIMINAL CASES; ADDRESSING INFORMATION DISPARITY IN CRIMINAL CASES.

(a) IN GENERAL.—Not later than 180 days after the date of enactment of this Act, the Attorney General shall, in consultation with the Federal Public or Community Defender from the Defender Services Advisory Group, the American Bar Association, the American Law Institute, and other expert organizations, including the Innocence Project and the National District Attorneys Association, create training and best practices to be implemented by Federal prosecutors and law enforcement officers prior to trial, consistent with the constitutional rights of the defendant, that increase protection for the innocent by reducing the inaccuracy and unreliability of evidence relied upon in criminal cases, including—

(1) procedures and protocols for collecting, marking, preserving, cataloguing, and handling evidence;

(2) training on interrogation to eliminate coercive tactics that lead to false or unreliable confessions;

(3) training on interviewing witnesses to eliminate suggestive tactics that lead to false or unreliable identifications and memories;
(4) training to eliminate cross-racial identification mistakes and collaborating on the criteria for expert testimony and parameters for model jury instructions on cross-racial identification;

(5) training to avoid and discourage the use of unreliable informant or cooperator testimony;

(6) requiring audio and video recording of all interviews and interrogations in connection with any defendant’s prosecution;

(7) promoting a fair and expeditious disposition of the charges, whether by diversion, plea, or trial, consistent with defendants’ constitutional rights;

(8) providing the defendant with sufficient information to make an informed plea;

(9) permitting the defendant to thoroughly prepare for trial and minimize surprise at trial by providing prompt discovery to the defendant;

(10) reducing interruptions and complications during trial to the extent practicable and avoid unnecessary and repetitious trials by identifying and resolving evidentiary disputes prior to trial;

(11) increasing the funding and resources for court-appointed counsel to minimize the procedural and substantive inequities among similarly situated defendants, particularly between defendants rep-
resented by court-appoint counsel, pursuant to 18 U.S.C. 3006A, and defendants represented by privately retained counsel; and

(12) minimizing the burden upon victims, witnesses, counsel, and the taxpayer.

(b) Initial Disclosure to Defendants.—The Attorney General shall instruct Federal prosecutors and law enforcement agents, upon request by the defendant and not later than 14 days after such request, to permit the defendant to inspect and to copy or photograph the full contents of all investigative and case files, excepting only privileged material or attorney work product, to permit inspection, copying, testing, and photographing of disclosed documents or tangible objects, including the following documents or tangible objects:

(1) All relevant recorded, written, and oral statements of the defendant or of any codefendant that are within the possession or control of the Government, and any documents relating to the acquisition of such statements.

(2) The names and addresses of all persons known to the Government to have information concerning the offense charged, together with all written statements of any such person that are within the possession or control of the Government and
that relate to the subject matter of the offense charged.

(3) The identity of persons the Government intends to call as witnesses at trial.

(4) Any information regarding any inquiry, solicitation, or agreement between the Government and any individual that constitutes an inquiry into or solicitation of cooperation or testimony of the individual.

(5) Any reports or written statements of any expert the Government intends to call as a witness at trial, including results of physical or mental examinations, scientific tests, experiments, comparisons, a written description of the substance of the proposed testimony of the expert, the expert’s opinion, and the underlying basis of that opinion, if that report or written statement of the expert is material to preparing the defense or the Government intends to use the item in its case-in-chief at trial. At the defendant’s request, the Government must give to the defendant a written summary of any testimony that the Government intends to use under the Federal Rules of Evidence during its case-in-chief at trial. If the Government requests discovery under rule 16(b)(1)(C)(ii) of the Federal Rules of Criminal
Procedure and the defendant complies, the Government must, at the defendant’s request, give to the defendant a written summary of testimony that the Government intends to use the Federal Rules of Evidence as evidence at trial on the issue of the defendant’s mental condition. The summary provided under this paragraph must describe the witness’s opinions, the bases and reasons for those opinions, and the witness’s qualifications.

(6) Any tangible objects, including books, papers, documents, photographs, buildings, places, or any other objects, which pertain to the case or which were obtained from or belong to the defendant, and the identity of any tangible objects if the item is material to preparing the defense or the Government intends to use the item in its case-in-chief at trial.

(7) Any record of prior criminal convictions, pending charges, or probationary status of the defendant or of any codefendant or cooperating witness, and insofar as known to the Government, any record of convictions, pending charges, or probationary status that may be used to impeach of any witness to be called by either party at trial.

(8) Any material, documents, or information relating to lineups, showups, and picture or voice iden-
tifications, if it is relevant to preparing the defense
or the Government intends to use the item in its
case-in-chief.

(9) Any material or information within the Gov-
ernment’s possession or control which tends to ne-
gate the guilt of the defendant as to the offense
charged or would tend to mitigate punishment of the
defendant.

(10) Any evidence of character, reputation, or
other conduct of the defendant that the Government
has investigated.

(11) If the defendant’s conversations or prem-
ises were subject to electronic surveillance (including
wiretapping) in connection with the investigation or
prosecution of the case, any transcripts, notes,
memos, recordings, or other materials derived from
such surveillance.

(12) Any tangible object obtained through a
search and seizure, including any information, docu-
ments, or other material relating to the acquisition
of that object, if the object, information, or docu-
ment, or material is material to preparing the de-
fense or the Government intends to use that object,
information, document, or material in its case-in-
chief.
(13) Any evidence that a forensic technician, laboratory, or facility involved in the case has been responsible for an unreliable forensic analysis or questionable conviction in the past.

(c) Prompt Disclosure of Additional Information Later Added to the Investigative or Case File.—Upon completing the initial disclosure required under subsection (b), the Government shall, not later than 14 days after information of the sort described in subsection (b) is added to the investigative or case file, disclose the full contents of that additional information, excepting only privileged material or attorney work product, to permit inspection, copying, testing, and photographing of disclosed documents or tangible objects, including the documents or tangible objects described in subsection (b), irrespective of whether the Government intends to rely on such information at trial and irrespective of whether or not the Government considers such information material or exculpatory.

(d) Protective Order.—

(1) In general.—Upon written application by the Government, the court may grant a protective order limiting the scope or timing of disclosure required by this section, or limiting the persons to whom such disclosure may be made or disseminated.
(2) Requirements for granting.—The application shall be granted only to the extent the Government demonstrates that such disclosure would cause—

(A) a particularized and substantial risk of physical harm or intimidation to any person;

(B) the release of information that would compromise a significant national security interest; or

(C) the violation of privacy rights, protected by Federal law, of a non-law-enforcement witness.

(3) Nature of order if granted.—If granted, the protective order shall be narrowly tailored to limit the scope, timing or extent of disclosure only to the extent necessary to address the particularized need for delayed, limited or nondisclosure, while protecting the defendant’s right to prepare for trial or sentencing to the extent possible.

(4) Application may be ex parte.—The written application may be made ex parte so long as the Government provides notice to the defendant of the general nature of the application, and the defendant is given an opportunity to be heard on whether an ex parte application is necessary, wheth-
er any protective order is warranted, and the param-
eters of any protective order. If the application re-
mains sealed, it shall be preserved in the record for
appellate review.

SEC. 60303. NOTIFICATION RELATING TO FORENSIC, PROS-
ECUTORIAL, OR LAW ENFORCEMENT MIS-
CONDUCT.

(a) NOTICE.—Not later than 30 days after a finding
by the Attorney General that a Federal prosecutor or law
enforcement officer involved in a Federal criminal case has
engaged in misconduct or a Federal forensic facility or
technician has provided flawed analysis or testimony, the
Attorney General shall inform each defendant in whose
case that prosecutor, law enforcement officer, forensic fa-
cility, or forensic technician was involved.

(b) ACCESS TO EVIDENCE AND CASE Files FOR NO-
tIFIED PERSONS.—The Attorney General shall permit no-
tified defendants and their counsel access to—

(1) the forensic evidence underlying the defend-
ant’s case to be re-tested by another validated Gov-
ernment facility as well as by the defendant’s inde-
pendent forensic expert at the Government’s ex-
 pense; and
(2) the investigative and prosecutorial case file in the defendant’s case, including any attorney work product.

(e) Failure To Comply.—The Attorney General’s failure to comply with any requirement of this section entitles the defendant to appropriate judicial relief.

(d) Habeas Relief.—A defendant who receives a notice under subsection (a) and whose conviction has become final is entitled to seek judicial relief under section 2255 of title 28, United States Code, notwithstanding any procedural limitation or bar to such relief, so long as the defendant exercised due diligence in seeking relief after receiving the notice described in subsection (a).

SEC. 60304. REMEDIES.

(a) Within the Department of Justice.—The Attorney General shall take appropriate disciplinary measures to sanction any failure of a Federal prosecutor or law enforcement officer to comply in good faith with the procedures and requirements created by or under this subtitle.

(b) Judicial Remedy.—The court may exclude from trial any evidence involved in a failure of a Federal prosecutor or law enforcement officer to comply in good faith with the procedures and requirements created by or under this title.
SEC. 60305. TOOLKITS FOR STATE AND LOCAL GOVERNMENT.

Not later than 180 days after the date of the enactment of this Act, the Attorney General shall provide toolkits regarding training in best practices developed under this title to State and local governments and encourage them to adopt these practices to reduce the likelihood of wrongful conviction.

SEC. 60613. SUPPORTING SAFE LAW ENFORCEMENT.

(a) Findings.—Congress finds the following:

(1) Most law enforcement officers walk into risky situations and encounter tragedy on a regular basis. Some, such as the police who responded to the carnage of the Sandy Hook Elementary School, witness horror that stays with them for the rest of their lives. Others are physically injured in carrying out
their duties, sometimes needlessly, through mistakes made in high stress situations. The recent notable deaths of officers are stark reminders of the risk officers face. As a result, physical, mental, and emotional injuries plague many law enforcement agencies. However, a large proportion of officer injuries and deaths are not the result of interaction with offenders but the outcome of poor physical health due to poor nutrition, lack of exercise, sleep deprivation, and substance abuse. Yet these causes are often overlooked or given scant attention. Many other injuries and fatalities are the result of vehicular accidents. The wellness and safety of law enforcement officers is critical not only to themselves, their colleagues, and their agencies, but also to public safety.

(2) Officer suicide is also a problem. Police died from suicide 2.4 times as often as from homicides. And though depression resulting from traumatic experiences is often the cause, routine work and life stressors—serving hostile communities, working long shifts, lack of family or departmental support—are frequent motivators too.

(3) According to estimates of the United States Bureau of Labor Statistics, more than 100,000 law enforcement professionals are injured in the line of
duty each year. Many are the result of assaults, which underscores the need for body armor, but most are due to vehicular accidents.

(b) AUTHORIZED USES.—Funds obligated, but subsequently unspent and deobligated, may remain available, to the extent provided in appropriations Acts, for use as specified under this section in ensuing fiscal years. The Attorney General shall take all practicable steps to use such funds as soon as practicable to carry out programs that are consistent with the purposes of this title. Such programs include—

(1) a national “Blue Alert” warning system to enlist the help of the public in finding suspects after a law enforcement officer is killed in the line of duty;

(2) counseling and support services for family members of law enforcement officers who are killed in the line of duty;

(3) national toll-free mental health hotline specifically for law enforcement officers, which is both anonymous and peer-driven and has the ability and resources to refer the caller to professional help if needed;

(4) continuing research in the efficacy and implementation of an annual fitness, resilience, nutri-
tion, and mental health check, in recognition that
many health problems afflicting law enforcement of-
ficers, notably cardiac issues, are cumulative;

(5) expanding Federal pension plans and
incentivizing State and local pension plans to recog-
nize fitness for duty exams as definitive evidence of
valid duty or nonduty related disability in recogni-
tion of the fact that officers injured in the line of
duty are often caught in limbo, without pay, unable
to work but also unable to obtain benefits because
“fitness for duty” exams are not recognized as valid
proof of disability and because they cannot receive
Social Security;

(6) implementing research-based findings into
the number of hours an officer should work consecu-
tively and in total within a 24–48 hour period, in-
cluding special findings on the maximum number of
hours an officer should work in a high-risk or high-
stress environment (e.g. public demonstrations or
emergency situations) by implementing those find-
ings federally and providing incentives for State and
local law enforcement to do the same;

(7) providing individual tactical first-aid kits
that contain tourniquets, an Olaes modular bandage,
and QuickClot gauze, and training in hemorrhage
control to every law enforcement officer on the Federal level and providing incentives for State and local enforcement agencies to do so;

(8) providing antiballistic vests and body armor to every law enforcement officer on the Federal level, and providing incentives for State and local law enforcement agencies to do so;

(9) researching and providing training, including protocols for use and consequences of misuse, prior to providing oleoresin capsicum (OC) spray—commonly called pepper spray—to every correctional worker in medium, high, and maximum security Federal prisons as well as Federal Medical Centers, Federal Detention Centers, and jail units operated by the Bureau of Prisons and instituting a training program to educate workers on how to use the spray responsibly and effectively for self-defense purposes only, and providing incentives for State and law enforcement agencies to do so;

(10) requiring the Director of the Bureau of Prisons to ensure that each chief executive officer of a Federal penal or correctional institution provides a secure storage area located outside the secure perimeter of the institution for employees to store firearms, or allowing employees to store firearms in a
vehicle lockbox approved by the Director of the Bu-
reau of Prisons;

(11) researching and/or developing the design
specifications or modifications for body-worn cam-
eras with the input of Federal, State, and local law
enforcement leaders and providing the devices or
funding to purchase the device and funding for re-
lated costs to implementation and storage costs to
every Federal law enforcement and correctional
agency and State and local officer, in recognition of
the fact that these devices reduce unwarranted com-
plaints against officers while also vindicating civil-
ians who have been mistreated;

(12) researching, developing, and providing best
practices for Federal, State, and local law enforce-
ment on the acquisition, use, retention, and dissemi-
nation of auditory, visual, and biometric data from
law enforcement in a constitutional manner and in
light of privacy concerns, in consultation with the
Bureau of Justice Assistance, civil rights and civil
liberties organizations, as well as law enforcement
research groups and other experts;

(13) hiring of social workers by the Bureau of
Prisons and providing incentives for State and local
governments to do so because social workers are
uniquely qualified to address the release preparation needs of aging inmates, such as aftercare planning and ensuring continuity of medical care;

(14) providing funding and training federally and to State and local law enforcement agencies on community-based policing principles to repair and rebuild trust and collaborative relationships;

(15) providing funding to Federal, State, and local law enforcement agencies to eliminate the DNA backlog, in recognition that repeat, violent offenders, in particular sex offenders, would be identified and prevented from committing additional crimes;

(16) implementing requested and recommended mental health treatments to Federal law enforcement and correctional officers and providing incentives to State and local law enforcement and corrections agencies to do the same;

(17) providing incentives and support services to State and local law enforcement agencies to enhance the reporting to and usage of the National Incident-Based Reporting System, which collects data on each single incident and arrest within 22 offense categories made up of 46 specific crimes that are the major ones facing law enforcement today, including terrorism, white collar crime, weapons offenses,
missing children in which criminality is involved, drug offenses, hate crimes, spousal/child/elder abuse, gang crimes, organized crime, sexual exploitation, DUI and alcohol-related offenses;

(18) providing medication-assisted treatment for individuals struggling with heroin, opioid, or alcohol abuse in residential substance abuse treatment programs and providing funding to State and local governments to do so;

(19) providing funding to State and local governments and law enforcement agencies to implement the Attorney General’s best practices on information and resource parity and innocence protection, including sharing the toolkits referenced in section 60305 of this title to reduce the likelihood of wrongful convictions, “open file” discovery practices, evidence preservation, training on interrogation to avoid coercive tactics that lead to false or unreliable confessions, training on interviewing witnesses to avoid suggestive tactics that lead to false or unreliable identifications, and training on the cross-racial misidentification probability;

(20) investing in research and training in non-lethal tools of policing that provide a greater range
of law enforcement response, including to de-escalate
situations and reduce deadly uses of force;

(21) investing in research and training in im-
licit bias for local, State, and Federal law enforce-
ment personnel and developing comprehensive stra-
gies to recognize and reduce incidences of implicit
bias;

(22) investing in evidence-based programs to
assist communities in developing comprehensive re-
sponses to youth violence through coordinated pre-
vention and intervention initiatives;

(23) hiring social workers, psychologists, psy-
chiatrists, therapists, and counselors for Federal
prisons and providing funding to State and local
governments to do the same as they are uniquely
qualified to address the release preparation needs of
inmates;

(24) providing funding to State and local law
enforcement agencies to provide incentives for offi-
cers with undergraduate and graduate degrees;

(25) providing additional funding to Federal,
State, and local government agencies to provide com-
petent and effective counsel for persons financially
unable to obtain legal representation;
(26) providing additional funding for the grant program established by the Second Chance Act (Public Law 110–199) to prevent recidivism and improve public safety;

(27) providing funding for Federal, State, and local law enforcement leaders to attend the FBI National Academy to share best practices and support national coherence on important policing issues in this ever-changing field;

(28) crime-reducing education grants, Federal pretrial diversion programs, Federal problem-solving courts, the elimination of mandatory minimums in the Federal law, and the Innocence Protection Act of 2004; and

(29) providing funding for a competitive 5-year grant to a nationally recognized, nonpartisan, scientifically sound, research organization, with an advisory board comprised of local, State, and Federal law enforcement leaders, and subject matter experts, to create a national nonpunitive, forward-focused peer review, training, and improvement center with the goal of improved safety outcomes for officers and civilians that would—

(A) establish a “critical incident review” mechanism, similar to those used in medicine
and aviation, as a comprehensive, protective, and accurate way of examining the circumstances surrounding an incident to accurately identify problems on a systemic level to reduce the number and types of problems, to improve policing outcomes, refine policies and practices, and build upon meaningful conversations and research to develop what improvements with cooperation of the law enforcement agencies involved;

(B) establish a data input form and infrastructure of a “near miss” database and for every policing incident in which an officer or civilian life is lost or substantial force is used to review knowledge gained from past tragedies in order to disseminate it to prevent future ones and to encourage new learning and sustainable, stakeholder-driven change;

(C) study, recommend, and establish an “officer-involved shooting database” for use when firearms have been used against law enforcement officers and where officers have used firearms against civilians to review knowledge gained from past tragedies to distinguish between actual risk versus perceived risk on the
part of the civilian or officer and to develop
best practices;

(D) advance training, technical assistance
and knowledge regarding mental health issues
that occur within the criminal justice system,
including providing training and funding for de-
escalation techniques, coordination among gov-
ernment agencies, information-sharing, diver-
sion initiatives, jail and prison strategies, estab-
ishment of learning sites, suicide prevention,
and assistance and infrastructure for calls for
service and law enforcement triage capabilities;

(E) study, invest in, and apply policing re-
search tools that develop forecasts based upon
evolving technology, social movements, environ-
mental changes, economic factors, and political
events; and

(F) educate and facilitate the advance of
evidence-based policing to encourage use of the
best available scientific evidence to control
crime and disorder and enhance officer safety
and wellness.

(e) FUNDS TO SUPPLEMENT, NOT SUPPLANT, EX-
ISTING FUNDS.—Funds disbursed pursuant to this section
shall not be used to supplant existing State or local funds utilized for these purposes, but rather to supplement them.

(d) ACCOUNTING.—Every year, the Department of Justice shall provide an accounting of the reprogrammed funds to ensure that the funds are disbursed and expended in a manner to maximize public safety and make needed improvements to the criminal justice system. The Attorney General shall report the findings to the Judiciary, Oversight, and substantive congressional committees.
