Subtitle B—Infrastructure Spending Bills to Include Development Programs That Recruit and Train Individuals From Communities With High Unemployment Rates

SEC. 10201. FINDINGS.

The Congress finds the following:

(1) America would need to spend approximately $1.44 trillion over the next 10 years to close the infrastructure gap.
(2) The infrastructure workforce is aging at a rate where approximately 3,000,000 workers will need to be replaced over the next 10 years, compounding America’s infrastructure crisis.

(3) Infrastructure jobs include a wide range of employment opportunities in both the public and private sectors, including design, construction, operation, governance, and maintenance of America’s assets.

(4) Infrastructure jobs provide competitive wages with low barriers to entry, many of which require on-the-job training in lieu of formal higher education.

(5) In spite of rising income inequality, infrastructure jobs paid approximately 30 percent more to low-income individuals than other occupations between the years of 2005 and 2015.

(6) In the fourth quarter of 2016, African-Americans and Hispanics between the ages of 25 and 34 had the highest unemployment levels at 8.6 percent and 5.3 percent, respectively.

(7) The unemployment rate for military veterans serving in conflicts since September 11, 2001, has remained above the national unemployment rate, with the Federal Reserve of Chicago highlighting
how wartime deployment can limit the types of training veterans receive that are transferable to the civilian labor market.

(8) The Federal Government should make concerted efforts, by coordination with State and local governments, workforce development agencies, educational institutions, including Historically Black Colleges and Universities and Hispanic Serving Institutions, to recruit, train, and retain America’s next generation of infrastructure workers to close the workforce gap.

SEC. 10202. SENSE OF CONGRESS.

It is the sense of Congress that—

(1) any infrastructure spending bill enacted during the 116th Congress should include robust investments in workforce development programs that take meaningful actions to recruit and train individuals from communities with high unemployment rates, including African-American communities, Hispanic communities, and American Indian tribal areas;

(2) any infrastructure spending bill enacted during the 116th Congress should include robust investments in workforce development programs that take meaningful actions to recruit and train unem-
ployed veterans that have served in a conflict since September 11, 2001; and

(3) any infrastructure spending bill enacted during the 116th Congress should include meaningful outreach efforts geared toward underrepresented contractors, including minority- and women-owned businesses, veteran owned small businesses, service-disabled veteran owned small businesses, and offerors that employ veterans on a full-time basis.

Subtitle C—Drinking Water Infrastructure for Job Creation

SEC. 10301. SHORT TITLE.

This subtitle may be cited as the “Drinking Water Infrastructure for Job Creation Act”.

SEC. 10302. FINDINGS.

Congress finds the following:

(1) Investments in infrastructure create jobs while fulfilling critical needs in communities throughout the United States.

(2) According to the Brookings Institution, nearly 14.5 million workers—11 percent of the U.S. workforce—were employed in infrastructure jobs in 2013.

(3) According to data from the Brookings Institution, infrastructure occupations often provide more
competitive and equitable wages in comparison to all jobs nationally, consistently paying up to 30 percent more to low-income workers.

(4) The American Society of Civil Engineers gave the infrastructure of the United States an overall grade of “D+” in 2017 and estimated that the United States will need to invest $4.59 trillion by 2025 in order to improve the condition of the Nation’s infrastructure and bring it to a state of good repair.

(5) The American Society of Civil Engineers assigned a “D” grade to the Nation’s drinking water infrastructure and a “D+” grade to the Nation’s wastewater infrastructure and estimated that the United States will need to invest $150 billion by 2025 to bring them to a state of good repair.

(6) According to the American Society of Civil Engineers, there are an estimated 240,000 water main breaks per year in the United States, wasting over two trillion gallons of treated drinking water.

(7) In 2016, the U.S. Environmental Protection Agency (EPA) reported that although exposure to lead can cause serious health problems, including damage to the brain and nervous system in children and kidney problems and high blood pressure in
adults, an estimated 6.5 to 10 million homes nation-
wide receive drinking water through lead service
lines.

(8) Congress created the Drinking Water State
Revolving Funds in 1996 to help eligible public
water systems finance infrastructure projects in
order to comply with Federal drinking water regula-
tions and meet the health objectives of the Safe
Drinking Water Act.

(9) The EPA is required periodically to conduct
a survey of the capital improvement needs of eligible
public water systems and distribute funding appro-
priated for the Drinking Water State Revolving
Funds among the States based on the results of the
most recent survey.

(10) In March of 2018, the EPA issued the
2015 Drinking Water Needs Survey and Assess-
ment, which is the most recent survey of the capital
improvement needs of eligible public water systems
and which estimated that $472.6 billion in improve-
ments are needed for the Nation’s drinking water in-
frastucture over 20 years in order to ensure the
safety of drinking water.

(11) In fiscal year 2018, Congress appropriated
$1.163 billion for the Drinking Water State Revolv-
ing Funds to enable States to provide grants and fi-
ancing assistance to eligible public water systems in
order to improve drinking water infrastructure in
communities throughout the United States.

(12) Past appropriations for the Drinking
Water State Revolving Funds are not sufficient to
address the tremendous need for investments in
drinking water infrastructure in communities
throughout the United States.

(13) Appropriating $7.5 billion in fiscal year
2019 for the Drinking Water State Revolving
Funds, and allowing the funds to remain available
for 6 years, will enable States to begin immediately
to expand investments in drinking water infrastruc-
ture in communities throughout the United States.

(14) Restricting appropriations for the Drink-
ing Water State Revolving Funds through the use of
arbitrary budget caps or sequestration undermines
economic recovery and job creation efforts; disrupts
planning by States, local communities, and eligible
public water systems; and leaves critical infrastruc-
ture needs unmet.

(15) Emergency supplemental appropriations
for the Drinking Water State Revolving Funds, pro-
vided in addition to other appropriations and not
subject to sequestration, will improve drinking water infrastructure and create jobs throughout the United States without reducing funding for other domestic priorities.

(16) An emergency supplemental appropriation of $7.5 billion for the Drinking Water State Revolving Funds to be made available in fiscal year 2019, and to remain available for 6 years, will allow States to begin immediately to distribute funds to eligible public water systems and allow local communities and eligible public water systems to develop and implement plans to improve drinking water infrastructure, thus ensuring an efficient use of funds and timely job creation.

SEC. 10303. SUPPLEMENTAL APPROPRIATIONS FOR THE DRINKING WATER STATE REVOLVING FUNDS.

The following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for fiscal year 2019:

ENVIRONMENTAL PROTECTION AGENCY

STATE AND TRIBAL ASSISTANCE GRANTS

For an additional amount for capitalization grants under section 1452 of the Safe Drinking Water Act in accordance with the provisions under this heading in title VII of division A of Public Law 111–5, $7,500,000,000,
to remain available through September 30, 2024: Provided, That the amount under this heading is designated by the Congress as an emergency requirement pursuant to section 251(b)(2)(A) of the Balanced Budget and Emergency Deficit Control Act of 1985, except that such amount shall be available only if the President subsequently so designates such amount and transmits such designation to the Congress.

SEC. 10304. EXEMPTION FROM SEQUESTRATION.

The appropriation in section 10303 shall be exempt from sequestration under the Balanced Budget and Emergency Deficit Control Act of 1985.

Subtitle D—Build Local, Hire Local

SEC. 10401. SHORT TITLE.

This subtitle may be cited as the “Build Local, Hire Local Act”.

SEC. 10402. FINDINGS.

Congress finds that—

(1) infrastructure plays a vital role in the lives of all people in the United States;

(2) the aging infrastructure of the United States is in need of a significant investment to repair, rebuild, and modernize, and in the process, the Federal Government can take necessary steps to address economic and racial injustices that have lim-
ited opportunities for far too many people of the
United States;

(3) decades of disinvestment and exclusionary
policies have isolated many people of color, low-in-
come people, and disabled individuals in the United
States from opportunity across the urban centers,
deindustrialized cities, rural regions, and Tribal
areas of the United States, including horribly inad-
quate investment to ensure universal access to
clean air and water, safe and reliable transportation,
affordable housing, quality living wage jobs, high-
speed internet, modernized schools, and parks and
community facilities;

(4) while the construction of the National High-
way System remains one of the most transformative
achievements in the history of the United States, it
came at the expense of many low-income commu-
nities as well as minority neighborhoods of all in-
come levels that were destroyed by the construction
and isolated from the broader community and from
economic opportunity;

(5) investing in repairing, rebuilding, and mod-
ernizing the infrastructure of the United States pre-
sents an opportunity to learn from the mistakes of
the past and reimagine how communities can design
and build infrastructure to be more equitable, helping to address structural inequities faced by marginalized communities nationwide, including a lack of good paying jobs, affordable, accessible, and inclusive housing, decaying roads, bridges, and schools, inadequate access to technology, and exposure to toxic emissions and poisoned water;

(6) accessibility to quality infrastructure, training, and jobs is an issue across the United States, spanning from rural and Tribal areas to urban and suburban areas;

(7) transportation infrastructure has a significant impact on access to jobs, education, healthcare, healthy foods, and other essential services;

(8) accessibility to essential services is defined not only by speed, but also by ease of access, which includes the ability to safely and conveniently access services by all modes of travel;

(9) with a shortage of construction firms that are ready and able to take on the large-scale infrastructure projects the United States demands, the close to 478,000 specialty trade contractors in smaller minority, women, and disadvantaged businesses could be supported to meet this demand;
small businesses and under-represented contractors, including minority-, women-, veteran-owned businesses, and businesses owned by disabled individuals should have the opportunity to rebuild their communities and employ hardworking people of the United States along the way;

(11) as of 2018, about \(\frac{1}{4}\) of the infrastructure workforce is projected to retire or permanently leave their jobs over the next decade, compounding the infrastructure crisis in the United States;

(12) as of 2019, the Board of Governors of the Federal Reserve System finds that skilled trades and many occupations that do not require a 4-year degree are not considered to be at significant risk of automation;

(13) infrastructure jobs include a wide range of employment opportunities in both the public and private sectors, including design, manufacturing, construction, operation, governance, and maintenance of infrastructure assets in the United States;

(14) more than 1 in 10 jobs in the United States is a transportation- or infrastructure-related job;

(15) many infrastructure jobs provide competitive wages with low barriers to entry, many of which
require on-the-job training in lieu of formal 4-year
degree higher education programs;

(16) in spite of rising income inequality, infra-
structure jobs paid approximately 30 percent more
to low income individuals than other occupations in
2018;

(17) women, people of color, and particularly
women of color are underrepresented in construction
jobs;

(18) while women across all occupations cur-
rently make up about 50 percent of the workforce,
women in construction and extraction occupations
has hovered around 3 percent for the last 3 decades;

(19) while Black Americans make up about 12
percent of the overall workforce, Black Americans
only represent 7 percent of construction and extrac-
tion occupations;

(20) by focusing on improving workforce devel-
opment systems through targeted employment strat-
egies, the Federal Government can improve the qual-
ity of future projects and better ensure that all com-
munities benefit from investments that—

(A) protect workers;

(B) expand opportunities for advancement;

(C) establish strong labor standards; and
(D) redress discriminatory policies that have unfairly burdened low-income communities and communities of color with pollution of geographic isolation; and

(21) the Federal Government should make concerted efforts to close the workforce gap, through coordination with States and units of local government, workforce development agencies, national and regional nonprofit intermediaries, labor organizations, and institutions of higher education and other educational institutions, including historically Black colleges and universities and Hispanic-serving institutions, to recruit, train, and retain the next generation of infrastructure workers in the United States, with a focus on—

(A) achieving gender, ethnic, racial, and ability diversity; and

(B) recruiting and training individuals from communities with high unemployment rates, including African-American communities, Hispanic communities, Indian Tribes, the disabled community, and the LGBTQ community.

SEC. 10403. DEFINITIONS.

Subtitle E—Transportation Infrastructure for Job Creation

SEC. 10501. SHORT TITLE.

This subtitle may be cited as the “Transportation Infrastructure for Job Creation Act”.

SEC. 10502. FINDINGS.

Congress finds the following:

(1) Investments in infrastructure create jobs while fulfilling critical needs in communities throughout the United States.

(2) According to the Brookings Institution, nearly 14.5 million workers—11 percent of the U.S. workforce—were employed in infrastructure jobs in 2013.

(3) According to data from the Brookings Institution, infrastructure occupations often provide more competitive and equitable wages in comparison to all
jobs nationally, consistently paying up to 30 percent more to low-income workers.

(4) The American Society of Civil Engineers gave the infrastructure of the United States an overall grade of “D+” in 2017 and estimated that the United States will need to invest $4.59 trillion by 2025 in order to improve the condition of the Nation’s infrastructure and bring it to a state of good repair.

(5) The American Society of Civil Engineers assigned a “D” grade to the Nation’s roads, a “C+” grade to the Nation’s bridges, and a “D−” grade to the Nation’s transit systems and estimated that the United States will need to invest $2.04 trillion by 2025 to bring the Nation’s surface transportation infrastructure to a state of good repair.

(6) BUILD is a nationwide competitive grant program that creates jobs by funding investments in transportation infrastructure by States, local governments, and transit agencies.

(7) BUILD is formally known as the Better Utilizing Investments to Leverage Development (BUILD) Transportation Grants program and was previously known as the Transportation Investment
Generating Economic Recovery (TIGER) grant program.

(8) BUILD funds projects that will have a significant impact on the Nation, a metropolitan area, or a region.

(9) In distributing grants under BUILD, the Secretary of Transportation is required to ensure an equitable geographic distribution of funds, a balance in addressing the needs of urban and rural areas, and investments in a variety of modes of transportation.

(10) TIGER or BUILD received an appropriation of $600,000,000 in fiscal year 2014, an appropriation of $500,000,000 in fiscal year 2015, an appropriation of $500,000,000 in fiscal year 2016, an appropriation of $500,000,000 in fiscal year 2017, and an appropriation of $1,500,000,000 in fiscal year 2018.

(11) Past appropriations for TIGER and BUILD are not sufficient to address the need for investments in transportation infrastructure in communities throughout the United States as the amounts only fund a small fraction of the transportation infrastructure projects for which grant applications have been received.
(12) Appropriating $7.5 billion in fiscal year 2019 for BUILD and allowing the funds to remain available for 6 years will enable the Secretary of Transportation to begin immediately to expand investments in transportation infrastructure throughout the United States.

(13) Restricting appropriations for BUILD through the use of arbitrary budget caps or sequestration undermines economic recovery and job creation efforts; disrupts planning by States, local governments, and transit agencies; and leaves critical infrastructure needs unmet.

(14) Emergency supplemental appropriations for BUILD, provided in addition to other appropriations and not subject to sequestration, will improve transportation infrastructure and create jobs throughout the United States without reducing funding for other domestic priorities.

(15) An emergency supplemental appropriation of $7.5 billion for BUILD to be made available in fiscal year 2019 and to remain available for 6 years will allow the Secretary of Transportation to begin immediately to organize new competitions for BUILD grants and allow States, local governments, and transit agencies to prepare grant applications,
thus ensuring an efficient use of funds and timely

job creation.

Subtitle G—Look-back Elimination

SEC. 10701. SHORT TITLE.

This subtitle may be cited as the “Look-back Elimination Act of 2020”.

•HR 8352 IH
SEC. 10702. FINDINGS.

The Congress finds as follows:

(1) As part of President Franklin Delano Roose-
velt’s New Deal, the Social Security Act of 1935
included the creation of the Aid to Dependent Chil-
dren program as a way to provide Federal support
to poor children. Over time, this program became
the Aid to Families with Dependent Children
(AFDC) program and provided assistance to strug-
gling families for over 60 years.

(2) Part E of title IV of the Social Security Act
provides primary Federal funding for child welfare
services. Under that part, the Federal Government
pays a portion of the cost of providing Federal foster
care and adoption assistance benefits for eligible
children.

(3) In 1996, when Congress replaced the AFDC
program with the Temporary Assistance for Needy
Families (TANF) program, Congress also fixed the
income eligibility requirement for Federal foster care
and adoption assistance benefits at a level based on
the income thresholds established by the States
under their former AFDC programs. This income
eligibility requirement is now commonly referred to
as the “AFDC look-back standard”.
(4) At that time, many States had established very strict household income requirements in order for children to be eligible for AFDC benefits. As a result of this very strict requirement, many children in the Federal foster care and adoption assistance programs are ineligible to receive a wide range of Federal benefits, services, and activities. For example, this outdated, restrictive standard prevents the State of Georgia from providing assistance to more than half of the children in the child welfare system.

(5) Forced to adhere to a stagnant standard, States increasingly struggle to administer Federal foster care and adoption assistance programs and provide services to those children most in need. As inflation increases, fewer children are eligible to receive Federal benefits, and States struggle to provide services from other, limited local and State resources.

(6) Although the AFDC look-back standard still applies to the Federal foster care program, the Fostering Connections to Success and Increasing Adoptions Act of 2008 completely eliminated the AFDC look-back standard in the Federal adoption assistance program in 2018.
SEC. 10703. ELIMINATION OF THE AFDC ELIGIBILITY REQUIREMENT IN THE FOSTER CARE MAINTENANCE PAYMENTS PROGRAM.

(a) IN GENERAL.—Section 472(a) of the Social Security Act (42 U.S.C. 672(a)) is amended—

(1) in paragraph (1), by striking “specified” and all that follows and inserting “or caretaker into foster care if the removal and foster care placement met, and continues to meet, the requirements of paragraph (2).”; and

(2) by striking paragraphs (3) and (4).

(b) CONFORMING AMENDMENT.—Section 470 of such Act (42 U.S.C. 670) is amended by striking “who otherwise would have been eligible for assistance under the State’s plan approved under part A (as such plan was in effect on June 1, 1995)”.

SEC. 10704. SENSE OF THE CONGRESS.

It is the sense of the Congress that—

(1) the AFDC eligibility requirement for Federal foster care and adoption assistance benefits should be eliminated and replaced with income eligibility standards that are based on modern, balanced criteria that treat all children equally; and

(2) the Secretary of Health and Human Services should collaborate with Members of Congress...
and child welfare advocates in developing any modified standards.

**Subtitle S—Opening Doors for Youth**

**SEC. 12101. SHORT TITLE.**

This subtitle may be cited as the “Opening Doors for Youth Act of 2020”.

**SEC. 12102. FINDINGS.**

Congress finds the following:

(1) The time between the early teens and mid-twenties represents a critical developmental period in which individuals can gain the education and train-
ing, entry-level work experiences, work-readiness
skills, and social networks needed to smoothly tran-
sition into the labor market and build towards fu-
ture professional success.

(2) Yet, nearly 5 million young people ages 16
to 24 are out of school and unemployed, leaving
them disconnected from the systems and institutions
critical for developing the building blocks of inde-
pendence and self-sufficiency.

(3) Communities of color experience the highest
rates of youth disconnection: 25.4 percent of Native
American youth, 18.9 percent of Black youth, and
14.3 percent of Latino youth between the ages of 16
and 24 were disconnected from school and work in
2015.

(4) Disconnected youth are also three times
more likely than other youth to have a disability,
twice as likely to live below the Federal poverty
threshold, and significantly more likely to live in ra-
cially segregated neighborhoods. Disconnected young
women and girls are three times more likely to have
a child, and young people involved in the juvenile
justice system or aging out of the foster care system
are at high risk of disconnection.
(5) Disconnection from school and work can have significant consequences for youth, including decreased earning power and fewer future employment opportunities. According to the 2012 report, “The Economic Value of Opportunity Youth”, disconnected youth will, on average, earn $392,070 less than the average worker over their lifetimes.

(6) Failure to successfully connect young people to employment and educational opportunities also results in a significant loss in productivity for the overall economy, as well as increases in government spending. According to a recent report from Measure of America, in 2013, youth disconnection resulted in $26.8 billion in public expenditures, including spending on health care, public assistance, and incarceration.

(7) Disconnected young people, commonly referred to as “opportunity youth” because of their tremendous potential, can add great social and economic value to our communities and the economy, if given the appropriate supports and resources. According to the Opportunity Index, an annual measurement of opportunity in a geographic region, the number of opportunity youth, along with educational attainment and poverty rates, are strongly linked to
overall opportunity in communities. When young adults do well, communities do well.

(8) Despite their talent and motivation, many opportunity youth lack access to the training, education, and entry-level jobs that can help them gain the work experience and credentials needed to successfully transition into the labor market.

(9) Lack of access to entry-level jobs can limit a young adult’s ability to accrue early work experience and demonstrate productivity and work readiness to potential employers. Labor market shifts have also limited opportunities for young people without a high school diploma or with limited post-secondary credentials.

(10) Summer and year-round youth employment programs that connect young people with entry-level jobs give youth the work experience and opportunity for skill development needed to transition into the labor market and prevent points of disconnection, such as involvement in the criminal and juvenile justice systems.

(11) Evidence suggests that summer youth employment programs may help in-school youth remain connected to the education system. A 2014 study of the New York City Summer Youth Employment
Program found that after program participation, youth older than 16 increased their school attendance by four or five additional days compared to their previous fall semester attendance. This attendance increase represented 25 percent of the total days students were permitted to miss school and still continue on to the next grade.

(12) Evidence shows that participation in summer youth employment programs also reduces the rate of violent crimes arrests. For example, a 2014 study of Chicago’s One Summer Plus program shows that the program reduced violent crime arrests among at-risk youth by approximately 43 percent, with crime reduction benefits lasting over a year after the program had ended. This reduction can have significant impact for young people, given the impact of a criminal record on future employment prospects and wages.

(13) Despite its benefits, summer youth employment has declined by more than 40 percent during the past 12 years, at a loss of more than 3 million summer jobs for young Americans. A J.P. Morgan Chase study of 14 major U.S. cities found that summer youth employment programs were only able
to provide opportunities for 46 percent of applicants in 2014.

(14) According to research by Measure of America, the overwhelming number of youth disconnected from school and work come from disconnected communities marked by high adult unemployment, poverty, and racial segregation, as well as low levels of adult education attainment. These communities often lack the resources and supports needed to prevent and reverse youth disconnection.

(15) Many at-risk or opportunity youth, finding that traditional pathways to educational attainment or employment are ill-matched to their individual needs, struggle to remain connected or reconnect to school and work.

(16) For some youth, individual barriers—such as unstable housing, lack access to affordable child care or transportation, or involvement in the juvenile or criminal justice system—make it difficult to take advantage of existing employment and education pathways.

(17) According the 2016 report, “Supportive Services in Job Training and Education: A Research Review”, studies suggest that education and training programs that offer supportive services, such as
child care, transportation, and financial assistance, are associated with improved outcomes.

(18) Community-based preventions and interventions can address the distinct problems opportunity youth may face in the local community and provide a connection to the education and training, re-engagement, and supportive services needed to help these young people succeed.

(19) Previous Federal grant programs targeting communities with high rates of poverty have been successful in building such communities’ capacity to improve labor market participation and education attainment rates for young people.

SEC. 14202. FINDINGS.

Congress finds the following:

(1) One of the main missions of the Federal Communications Commission, and a compelling governmental interest, is to ensure that there is a diversity of ownership and viewpoints in the broadcasting industry.

(2) The Commission should continue to collect relevant data and conduct studies on such diversity and make appropriate recommendations to Congress on how to increase the number of minority- and women-owned broadcast stations.

(3) Data from 2014 shows that, of the over 1,700 commercial broadcast television stations in the United States, less than 6 percent are owned by women, and less than 3 percent are minority-owned. With respect to radio stations, women owned approximately 7 percent of FM broadcast radio stations, and minorities owned less than 3 percent of such stations.
(4) Women and minority ownership is 5 to 10 times higher in other industries than in the broadcasting industry.

(5) During the 17 years that a minority tax certificate program was in place at the Commission (from 1978 to 1995), the Commission issued 287 certificates for radio stations and 40 certificates for television stations.

(6) The Commission can also support minority- and women-owned entrants into the broadcasting industry by implementing an incubator program in which existing licensees assist new entrants in the operation of broadcast stations.

SEC. 14203. FCC REPORTS TO CONGRESS.

(a) Biennial Report Containing Recommendations for Increasing Number of Minority- and Women-Owned Broadcast Stations.—Not later than 180 days after the date of the enactment of this Act, and not less frequently than every 2 years thereafter, the Commission shall submit to Congress a report containing recommendations for how to increase the total number of broadcast stations that are owned or controlled by members of minority groups or women, or by both members of minority groups and women.

Subtitle NN—Jobs, On-the-Job “Earn-While-You-Learn” Training, and Apprenticeships for Young African-Americans

SEC. 15201. SHORT TITLE.

This subtitle may be cited as the “Jobs, On-the-Job ‘Earn-While-You-Learn’ Training, and Apprenticeships for Young African-Americans Act”.

SEC. 15202. FINDINGS AND PURPOSE.

(a) Findings.—Congress finds the following:

(1) Young African-American men and women are the hardest hit by economic instability. Declared and affirmed by the Federal Reserve, African Americans face unemployment rates that are two to three
times higher than their White counterparts for the last several decades.

(3) Even during times of economic growth, African-American communities experience prolonged financial vulnerability and delayed recovery. Unemployment rates decline at a slower rate for African-American men, and even a slower rate for African-American women as compared to their White counterparts.

(4) This extraordinarily high unemployment rate has a terrible rippling impact on the breakdown of the family structure, as men and women in this age group are in the primary child-producing ages.

(5) Affirmed by the Department of Labor, diversity and inclusion within the workforce benefits employees and businesses across all industries, including apprenticeship programs, which provide economic mobility to its participants.

(6) Through the combined efforts of building trades unions and community partners at the State and local level, there have been established more
than 150 apprenticeship readiness programs across the United States that focus on creating pathways to Registered Programs for people of color, women, and veterans. Overall, from 2009 to 2019, building trades unions and their signatory contractors have invested over $100,000,000 in outreach efforts targeting under-represented communities to participate in apprenticeship readiness programs. Of the 4,800 individuals who have successfully completed a building trades apprenticeship readiness program since 2016, 70 percent were from communities of color and 22 percent were women.

(7) The disproportionately high-unemployment rates, combined with low participation rates from African Americans in registered apprenticeship programs not only constitute a national crisis but a national tragedy for the young African Americans, many of whom are fathers and mothers who, without jobs, are unable to provide for their families or home.

(b) PURPOSE.—The purpose of this subtitle is to secure jobs, on-the-job training, and apprenticeships for young African Americans ages 18 to 39 with the labor unions, general contractors, and businesses who will re-
build the Nation’s crumbling infrastructure in cities and communities throughout the Nation.

**SEC. 15203. SENSE OF CONGRESS.**

It is the sense of Congress that—

(1) this subtitle, while rebuilding the crumbling infrastructure of this great Nation, will simultaneously help create good paying jobs and job training that will provide young African Americans ages 18 to 39 with the technical skills, computer capabilities, and other skills necessary in this high technology-driven job market, thus providing young African Americans with highly developed skills that will make them very competitive and attractive to many employers;

(2) this subtitle greatly exemplifies and strengthens the high nobility of purpose that is the founding grace of this great Nation; and

(3) the African-American organizations described in section 15204(c) have a long and rich history of working to improve the lives of African Americans, and can be very helpful in successfully reaching, contacting, and recruiting unemployed young African Americans.
SEC. 15204. URGING EMPLOYMENT, ON-THE-JOB TRAINING, AND APPRENTICESHIPS FOR UNEMPLOYED YOUNG AFRICAN AMERICANS IN REBUILDING THE NATION'S CRUMBLING INFRASTRUCTURE.

(a) IN GENERAL.—The Secretary of Labor shall strongly and urgently encourage those labor unions, general contractors, and businesses, who will rebuild the Nation's crumbling infrastructure, transportation systems, technology and computer networks, and energy distribution systems, to actively recruit, hire, train, and provide apprentice programs registered under the National Apprenticeship Act (29 U.S.C. 50 et seq.) to African Americans ages 18 to 39 through their existing jobs and through apprenticeships and earn-while-you-learn programs, registered under such Act. The Secretary shall provide assistance to such labor unions, general contractors, and businesses through every means available under existing law to help coordinate the recruitment of such individuals for such jobs, on-the-job training, and apprenticeships.

(b) COORDINATION.—The jobs, on-the-job training, and apprenticeships made available by labor unions, general contractors, and businesses described in subsection (a) shall be conducted in conjunction with the Secretary of Labor and the labor unions and other associations which the Secretary has identified as those primarily in-
involved in the infrastructure rebuilding described in such subsection. Such coordination shall also be done in conjunction with the National Joint Apprenticeship and Training Committee.

(c) RECRUITMENT.—The Secretary shall coordinate with labor unions, general contractors, and businesses described in subsections (a) and (b) to recruit African Americans for the jobs, on-the-job training, and apprenticeships described in subsection (a) by reaching out and seeking assistance from within the African-American community, churches, and civil rights organizations that can offer valuable assistance to the Secretary of Labor, the labor unions, general contractors, and businesses with identifying, locating, and contacting unemployed young African Americans who want jobs, on-the-job training, and apprenticeships.

Subtitle OO—Media Diversity

SEC. 15301. FINDINGS.

The Congress finds the following:

(1) The principle that an informed and engaged electorate is critical to a vibrant democracy is deeply rooted in our laws of free speech and underpins the virtues on which we established our Constitution, “in Order to form a more perfect Union, establish Justice, insure domestic Tranquility, provide for the
common defences, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our Posterity. . .”.

(2) Having independent, diverse, and local media that provide exposure to a broad range of viewpoints and the ability to contribute to the political debate is central to sustaining that informed engagement.

(3) It is in the public interest to encourage source, content, and audience diversity on our Nation’s shared telecommunications and media platforms.

(4) The survival of small, independent, and diverse media outlets that serve diverse audiences and local media markets is essential to preserving local culture and building understanding on important community issues that impact the daily lives of residents.

(5) Research by the American Society of News Editors, the Radio Television Digital News Association, the Pew Research Center, and others has documented the continued challenges of increasing diversity among all types of media entities.

(6) With increasing media experience and sophistication, it is even more important to have mi-
nority participation in local media to ensure a diverse range of information sources are available and different ideas and viewpoints are expressed to strengthen social cohesion among different communities.

(7) The constriction in small, independent, and diverse media outlets and limited participation of diverse populations in media ownership and decision-making are combining to negatively impact our goal of increasing local civic engagement and civic knowledge through increased voter participation, membership in civic groups, and knowledge of local political and civil information.

SEC. 15302. SENSE OF CONGRESS.

That the Congress—

(1) reaffirms its commitment to diversity as a core tenet of the public interest standard in media policy; and

(2) pledges to work with media entities and diverse stakeholders to develop common ground solutions to eliminate barriers to media diversity.

Subpart B—Youth Prison Reduction Through Opportunities, Mentoring, Intervention, Support, and Education

SEC. 15611. SHORT TITLE.

This subpart may be cited as the “Youth Prison Reduction through Opportunities, Mentoring, Intervention, Support, and Education Act” or the “Youth PROMISE Act”.

SEC. 15612. DEFINITIONS.

In this subpart:

(1) Administrator.—The term “Administrator” means the Administrator of the Office of Juvenile Justice and Delinquency Prevention.

(2) Community.—The term “community” means a unit of local government or an Indian tribe, or part of such a unit or tribe, as determined by
such a unit or tribe for the purpose of applying for
a grant under this Act.

(3) DESIGNATED GEOGRAPHIC AREA.—The
term “designated geographic area” means a 5-digit
postal ZIP Code assigned to a geographic area by
the United States Postal Service.

(4) EVIDENCE-BASED.—

(A) IN GENERAL.—The term “evidence-
based”, when used with respect to a practice re-
lating to juvenile delinquency and criminal
street gang activity prevention and intervention,
means a practice (including a service, program,
activity, intervention, technology, or strategy)
for which the Administrator has determined—

(i) causal evidence documents a rela-
tionship between the practice and its in-
tended outcome, based on measures of the
direction and size of a change, and the ex-
tent to which a change may be attributed
to the practice; and

(ii) the use of scientific methods rules
out, to the extent possible, alternative ex-
planations for the documented change.
(B) **Scientific methods.**—For the purposes of subparagraph (A), the term “scientific methods” means—

(i) evaluation by an experimental trial, in which participants are randomly assigned to participate in the practice that is subject to such trial; or

(ii) evaluation by a quasi-experimental trial, in which the outcomes for participants are compared with outcomes for a control group that is made up of individuals who are similar to such participants.

(5) **Intervention.**—The term “intervention” means the provision of programs and services that are supported by research, are evidence-based or promising practices, and are provided to youth who are involved in, or who are identified by evidence-based risk assessment methods as being at high risk of continued involvement in, juvenile delinquency or criminal street gangs, as a result of indications that demonstrate involvement with problems such as truancy, substance abuse, mental health treatment needs, or siblings who have had involvement with juvenile or criminal justice systems.
(6) JUVENILE DELINQUENCY AND CRIMINAL STREET GANG ACTIVITY PREVENTION.—The term “juvenile delinquency and criminal street gang activity prevention” means the provision of programs and resources to children and families who have not yet had substantial contact with criminal justice or juvenile justice systems, that—

(A) are designed to reduce potential juvenile delinquency and criminal street gang activity risks; and

(B) are evidence-based or promising educational, health, mental health, school-based, community-based, faith-based, parenting, job training, social opportunities and experiences, or other programs, for youth and their families, that have been demonstrated to be effective in reducing juvenile delinquency and criminal street gang activity risks.

(7) PROMISING.—The term “promising”, when used with respect to a practice relating to juvenile delinquency and criminal street gang activity prevention and intervention, means a practice (including a service, program, activity, intervention, technology, or strategy) that, based on statistical analyses or a
theory of change, the Administrator has determined—

(A) has outcomes from an evaluation that demonstrate such practice reduces juvenile delinquency and criminal street gang activity; and

(B) is part of a study being conducted to determine if such a practice is evidence-based.

(8) STATE.—The term “State” means each of the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Northern Mariana Islands, and any other territories or possessions of the United States.

(9) THEORY OF CHANGE.—The term “theory of change” means a program planning strategy approved by the Administrator that outlines the types of interventions and outcomes essential to achieving a set of program goals.

(10) YOUTH.—The term “youth” means—

(A) an individual who is 18 years of age or younger; or

(B) in any State in which the maximum age at which the juvenile justice system of such State has jurisdiction over individuals exceeds
18 years of age, an individual who is such maximum age or younger.

SEC. 15613. FINDINGS.

The Congress finds as follows:

(1) Youth gang crime has taken a toll on a number of communities, and senseless acts of gang-related violence have imposed economic, social, and human costs.

(2) Drug- and alcohol-dependent youth, and youth dually diagnosed with addiction and mental health disorders, are more likely to become involved with the juvenile justice system than youth without such risk factors, absent appropriate prevention and intervention services.

(3) Children of color are over-represented relative to the general population at every stage of the juvenile justice system. Black youth are 17 percent of the United States population, but represent 38 percent of youth in secure placement juvenile facilities, and 58 percent of youth incarcerated in adult prisons.

(4) Research funded by the Department of Justice indicates that gang membership is short-lived among adolescents. With very few youth remaining
gang-involved throughout their adolescent years, ongoing opportunities for intervention exist.

(5) Criminal justice costs have become burdensome in many States and cities, requiring reductions in vital educational, social, welfare, mental health, and related services.

(6) Direct expenditures for each of the major criminal justice functions, police, corrections, and judicial services, have increased steadily over the last 30 years. In fiscal year 2012, Federal, State, and local governments spent an estimated $265,000,000,000 for police protection, corrections, and judicial and legal services, nearly a 213-percent increase since 1982.

(7) Estimates suggest that each year the United States incurs over $8,000,000,000 in long-term costs for the confinement of young people. The average annual cost to incarcerate one youth is $146,302.

(8) Coordinated efforts of stakeholders in the juvenile justice system in a local community, together with other organizations and community members concerned with the safety and welfare of children, have a strong record of demonstrated success in reducing the impact of youth and gang-re-
lated crime and violence, as demonstrated in Boston, Massachusetts; Chicago, Illinois; Richmond, Virginia; Los Angeles, California; and other communities.

(9) Investment in prevention and intervention programs for children and youth, including quality early childhood programs, comprehensive evidence-based school, after school, and summer school programs, mentoring programs, mental health and treatment programs, evidence-based job training programs, and alternative intervention programs, has been shown to lead to decreased youth arrests, decreased delinquency, lower recidivism, and greater financial savings from an educational, economic, social, and criminal justice perspective.

(10) Quality early childhood education programs have been demonstrated to help children start school ready to learn and to reduce delinquency and criminal street gang activity risks.

(11) Evidence-based mentoring programs have been shown to prevent youth drug abuse and violence.

(12) Evidence-based school-based comprehensive instructional programs that pair youth with re-
sponsible adult mentors have been shown to have a strong impact upon delinquency prevention.

(13) After-school programs that connect children to caring adults and that provide constructive activities during the peak hours of juvenile delinquency and criminal street gang activity, between 3 p.m. and 6 p.m., have been shown to reduce delinquency and the attendant costs imposed on the juvenile and criminal justice systems.

(14) States with higher levels of educational attainment have been shown to have crime rates lower than the national average. Researchers have found that a 5-percent increase in male high school graduation rates would produce an annual estimated savings of $18,500,000,000 in crime-related expenses.

(15) Therapeutic programs that engage and motivate high-risk youth and their families to change behaviors that often result in criminal activity have been shown to significantly reduce recidivism among juvenile offenders, and significantly reduce the attendant costs of crime and delinquency imposed upon the juvenile and criminal justice systems.

(16) Comprehensive programs that target kids who are already serious juvenile offenders by ad-
dressing the multiple factors in peer, school, neighborhood, and family environments known to be related to delinquency can reduce recidivism among juvenile offenders and save the public significant economic costs.

(17) There are many alternatives to incarceration of youth that have been proven to be more effective in reducing crime and violence at the National, State, local, and tribal levels, and the failure to provide for such effective alternatives is a pervasive problem that leads to increased youth, and later adult, crime and violence.

(18) Savings achieved through early intervention and prevention are significant, especially when noncriminal justice social, educational, mental health, and economic outcomes are considered.

(19) The prevention of child abuse and neglect can help stop a cycle of violence and save up to $5.00 for every $1.00 invested in preventing such abuse and neglect.

(20) Targeting interventions at special youth risk groups and focusing upon relatively low-cost interventions increases the probability of fiscal benefit.
(21) Evidence-based intervention treatment facilities have been shown to reduce youth delinquency and to be cost-effective.

(22) States, including Wisconsin, Ohio, New York, Texas, and Pennsylvania, have seen a reduction in juvenile incarceration due to a reallocation of criminal justice funds towards prevention programs.

CHAPTER 1—FEDERAL COORDINATION OF LOCAL AND TRIBAL JUVENILE JUSTICE INFORMATION AND EFFORTS

TITLE II—SOCIAL ECONOMIC
Subtitle A—Commission to Study
and Develop Reparation Prop-
osals for African-Americans
SEC. 20101. SHORT TITLE.
This subtitle may be cited as the “Commission to
Study and Develop Reparation Proposals for African-
Americans Act”.
SEC. 20102. FINDINGS AND PURPOSE.
(a) FINDINGS.—The Congress finds that—
(1) approximately 4,000,000 Africans and their
descendants were enslaved in the United States and
colonies that became the United States from 1619 to
1865;
(2) the institution of slavery was constitu-
tionally and statutorily sanctioned by the Govern-
ment of the United States from 1789 through 1865;
(3) the slavery that flourished in the United
States constituted an immoral and inhumane depri-
vation of Africans’ life, liberty, African citizenship
rights, and cultural heritage, and denied them the
fruits of their own labor;

(4) a preponderance of scholarly, legal, commu-
nity evidentiary documentation and popular culture
markers constitute the basis for inquiry into the on-
going effects of the institution of slavery and its leg-
acy of persistent systemic structures of discrimina-
tion on living African-Americans and society in the
United States; and

(5) following the abolition of slavery the United
States Government, at the Federal, State, and local
level, continued to perpetuate, condone and often
profit from practices that continued to brutalize and
disadvantage African-Americans, including share
cropping, convict leasing, Jim Crow, redlining, un-
equal education, and disproportionate treatment at
the hands of the criminal justice system; and

(6) as a result of the historic and continued dis-
crimination, African-Americans continue to suffer
debilitating economic, educational, and health hard-
ships including but not limited to having nearly
1,000,000 black people incarcerated; an unemploy-
ment rate more than twice the current white unem-
ployment rate; and an average of less than 1/16 of
the wealth of white families, a disparity which has
worsened, not improved over time.

(b) PURPOSE.—The purpose of this subtitle is to es-
tablish a commission to study and develop Reparation pro-
posals for African-Americans as a result of—

(1) the institution of slavery, including both the
Trans-Atlantic and the domestic “trade” which ex-
isted from 1565 in colonial Florida and from 1619
through 1865 within the other colonies that became
the United States, and which included the Federal
and State governments which constitutionally and
statutorily supported the institution of slavery;

(2) the de jure and de facto discrimination
against freed slaves and their descendants from the
end of the Civil War to the present, including eco-

(3) the lingering negative effects of the institu-
tion of slavery and the discrimination described in
paragraphs (1) and (2) on living African-Americans
and on society in the United States;

(4) the manner in which textual and digital in-
structional resources and technologies are being used
to deny the inhumanity of slavery and the crime
against humanity of people of African descent in the United States;

(5) the role of Northern complicity in the Southern based institution of slavery;

(6) the direct benefits to societal institutions, public and private, including higher education, corporations, religious and associational;

(7) and thus, recommend appropriate ways to educate the American public of the Commission’s findings;

(8) and thus, recommend appropriate remedies in consideration of the Commission’s findings on the matters described in paragraphs (1), (2), (3), (4), (5), and (6); and

(9) submit to the Congress the results of such examination, together with such recommendations.

(A) the capture and procurement of Africans;

(B) the transport of Africans to the United States and the colonies that became the United States for the purpose of enslavement, including their treatment during transport;

(C) the sale and acquisition of Africans as chattel property in interstate and intrastate commerce;

(D) the treatment of African slaves in the colonies and the United States, including the deprivation of their freedom, exploitation of their labor, and destruction of their culture, language, religion, and families; and

(E) the extensive denial of humanity, sexual abuse and the chattellization of persons.

(2) The role which the Federal and State governments of the United States supported the institution of slavery in constitutional and statutory provisions, including the extent to which such govern-
ments prevented, opposed, or restricted efforts of
formerly enslaved Africans and their descendants to
repatriate to their homeland.

(3) The Federal and State laws that discrimi-
nated against formerly enslaved Africans and their
descendants who were deemed United States citizens
from 1868 to the present.

(4) The other forms of discrimination in the
public and private sectors against freed African
slaves and their descendants who were deemed
United States citizens from 1868 to the present, in-
cluding redlining, educational funding discrepancies,
and predatory financial practices.

tion of slavery and the matters described in para-
graphs (1), (2), (3), (4), (5), and (6) on living Afri-
can-Americans and on society in the United States.

the American public of the Commission’s findings.

questions:
(A) How such recommendations comport with international standards of remedy for wrongs and injuries caused by the State, that include full reparations and special measures, as understood by various relevant international protocols, laws, and findings.

(B) How the Government of the United States will offer a formal apology on behalf of the people of the United States for the perpetration of gross human rights violations and crimes against humanity on African slaves and their descendants.

(C) How Federal laws and policies that continue to disproportionately and negatively affect African-Americans as a group, and those that perpetuate the lingering effects, materially and psycho-social, can be eliminated.

(D) How the injuries resulting from matters described in paragraphs (1), (2), (3), (4), (5), and (6) can be reversed and provide appropriate policies, programs, projects and recommendations for the purpose of reversing the injuries.
(E) How, in consideration of the Commission’s findings, any form of compensation to the descendants of enslaved African is calculated.

(F) What form of compensation should be awarded, through what instrumentalities and who should be eligible for such compensation.

(G) How, in consideration of the Commission’s findings, any other forms of rehabilitation or restitution to African descendants is warranted and what the form and scope of those measures should take.

The Competitive Equality Banking Act of 1987 (Public Law 100–86) and the Financial Institutions Reform, Recovery and Enforcement Act of 1989 (Public Law 101–73) include provisions supporting the intent of the Minority Bank Deposit Program.

(3) The Fiscal Assistant Secretary of the Department of the Treasury is responsible for certi-
fying financial institutions that are eligible for par-

ticipation in the Minority Bank Deposit Program.

(4) Although the program continues today, the

overwhelming majority of financial institutions cer-
tified under the Minority Bank Deposit Program do

not have existing relationships with the Federal

agencies which suggests the need for reforms to in-
crease utilization of eligible institutions.

Subtitle D—Ensuring Diverse Leadership

SEC. 20401. SHORT TITLE.

This subtitle may be cited as the “Ensuring Diverse Leadership Act of 2020”.

SEC. 20402. CONGRESSIONAL FINDINGS.

The Congress finds that—

(1) while significant progress has occurred due to the antidiscrimination amendments to the Federal Reserve Act, barriers continue to pose significant obstacles for candidates reflective of gender diversity and racial or ethnic diversity for Federal Reserve bank president positions in the Federal Reserve System;

(2) the continuing barriers described in paragraph (1) merit the following amendment;

(3) Congress has received and reviewed testimony and documentation of the historical lack of gender, racial, and ethnic diversity from numerous sources, including congressional hearings, scientific reports, reports issued by public and private agencies, news stories, and reports of related barriers by organizations and individuals, which show that race-, ethnicity-, and gender-neutral efforts alone are insufficient to address the problem;
(4) the testimony and documentation described in paragraph (3) demonstrate that barriers across the United States prove problematic for full and fair participation in developing monetary policy by individuals reflective of gender diversity and racial or ethnic diversity; and

(5) the testimony and documentation described in paragraph (3) provide a strong basis that there is a compelling need for the below amendment to address the historical lack of gender, racial, and ethnic diversity in the Federal Reserve regional bank presidents selection process in the Federal Reserve System.

SEC. 30201. SHORT TITLE.

This subtitle may be cited as the “EITC Modernization Act of 2020”.

SEC. 30202. FINDINGS.

Congress finds the following:

(1) The Federal earned income tax credit is a refundable tax credit for lower- and middle-income working individuals and families whose earnings are below an income threshold.

(2) Since its establishment in 1975, the credit has increased family income, reduced child poverty, and promoted employment by supplementing the earnings of low-wage workers, including military families.

(3) The credit has a positive impact on the education and health of children living in poverty.
(4) The credit has a positive economic impact on local economies and businesses because it puts more money in the hands of low- and middle-income working people who spend the money on immediate needs, such as groceries, school supplies, car repairs, rent, and health care.

(5) The widening gap between the incomes of the wealthiest Americans and those of middle- and lower-income Americans is alarming.

(6) There is an urgent need to address that gap, including through measures like this legislation and by raising the Federal minimum wage which together increase the wages of working Americans, widen the path to income stability, and narrow income inequality.

Subtitle J—Protections Against Poverty

SEC. 31001. FINDINGS.

Congress finds the following:

(1) According to the Census Bureau, more than 38,000,000 people, including 12,000,000 children, lived in poverty in 2018 based on the Official Poverty Measure.

(2) More than 17,000,000 people lived in deep poverty, defined as living in a household with a total cash income below 50 percent of its poverty threshold.

(3) Poverty disproportionately impacts communities of color, with the poverty rate at 20.8 percent for Blacks, 17.6 percent for Hispanics, and 10.1 percent for Asians, versus 8.1 percent for non-Hispanic Whites.

(4) The Official Poverty Measure often underestimates the number of people who have trouble making ends meet.

(5) According to a 2020 Federal Reserve report on the economic well-being of United States households, an estimated 37 percent of people cannot cover an unexpected $400 expense.
(6) The top one percent of United States households have experienced income growth before taxes and transfer payments nearly seven times faster than the bottom 20 percent of households since 1979.

(7) Wealth has become even more concentrated than income.

(8) According to the Federal Reserve Bank of St. Louis, the top 10 percent of United States households ranked by wealth own 77 percent of the country’s total wealth while those in the bottom 50 percent own one percent.

(9) A full-time, full-year minimum wage worker at the Federal minimum wage level of $7.25 lives below the poverty line.

(10) A vast majority of low wage earners lack access to paid family leave, leaving them just one accident or illness away from economic devastation.

(11) Unions increase workers’ wages, ensure access to better benefits, address wage inequality, and reduce poverty.

(12) 5,140,000 Americans aged 65 and older lived in poverty in 2018.
(13) According to the United States Census Bureau, 27,500,000 people did not have health insurance at any point in 2018.

(14) According to the Federal Reserve, 25 percent of adults reported skipping medical care, such as a visit to a doctor or dentist, because they were unable to afford the cost in 2019.

(15) Minority and low-income individuals are disproportionately affected by air pollution and are more likely to face health conditions that put them at greater risk when exposed to hazardous air pollution.

(16) Families living in poverty also struggle to afford childcare, housing, utilities, and food expenses.

(17) According to the United States Census Bureau, households with incomes less than the Federal poverty level who pay for childcare spend on average four times the percentage of their income on it as do other families.

(18) In 2017, 83 percent of renter households with incomes below $15,000 paid more than 30 percent of their total household income for housing, experiencing housing costs burdens, and 72 percent
paid more than 50 percent of their income for housing, experiencing severe cost burdens.

(19) Water and wastewater bills are increasingly unaffordable for millions of households nationwide.

(20) According to the Energy Information Administration, nearly one-third of United States households reported facing a challenge in paying energy bills or sustaining adequate heating and cooling in their homes in 2015.

(21) More than 20,000,000 Americans lack access to any broadband whatsoever and many more are unable to adopt broadband, primarily due to prohibitive costs.

(22) Limited access to technology and broadband services makes it difficult for people to apply for jobs online, connect with health insurance, apply for financial aid, telework, or complete online homework.

(23) According to the Department of Agriculture, 37,200,000 people, including 11,200,000 children, lived in food-insecure households in 2018.

(24) 5,600,000 households had very low food security, defined as households in which the food intake of one or more members was reduced and eat-
ing patterns disrupted because of insufficient money
and other resources for food.

(25) According to a 2009 Department of Agri-
culture report on access to affordable and nutritious
food, millions of people live in food deserts, or areas
where they are more than a mile from a super-
market.

(26) Reliable and affordable public transpor-
tation is critical to accessing employment, food,
health care, and education.

(27) The educational level attained by individ-
uals has a dramatic impact on poverty, with 25.9
percent of adults over 25 years old without a high
school diploma in poverty versus 12.7 percent for
those with a high school degree, but no college, and
4.4 percent for those with a college degree.

(28) According to the Government Account-
ability Office, socioeconomic and racial segregation
in schools has increased dramatically in the past
decade.

(29) Low-income individuals are more likely to
be targeted by child welfare services and the crimi-
nal justice system and live in communities with high
rates of violence and heavy police presence.
(30) Low-income parents have their children removed from the household every day, because living in poverty is incorrectly treated as child neglect.

(31) The criminal justice system often punishes poverty, as court fees and fines disproportionately impact the poor.

(32) Police are most likely to use deadly force in low-income, more highly segregated neighborhoods.

(33) Low-income communities often have limited social capital and political voice.

(34) Strict voter ID requirements, closures of polling places, limited access to alternatives to in-person voting and other voter suppression tactics disproportionately impact poor and minority Americans.

(35) The effects of poverty are widespread, long-lasting, and dangerous, and leave families vulnerable to unexpected events.

(36) Adults who were poor during childhood are more likely to experience poverty as adults, are less likely to graduate high school, and are less likely to be consistently employed as young adults.

(37) Lower incomes are associated with shorter life expectancies.
The COVID-19 pandemic threatens to increase health, food, housing, and economic insecurity and push millions of people into poverty.

Low-income and minority communities have long experienced inadequate access to health care, housing, nutritious food, and education and economic opportunity, which increase the prevalence of COVID-19 risk factors, such as diabetes, asthma, heart disease, and high blood pressure.

The COVID-19 pandemic has exposed and exacerbated the inequality and poverty afflicting the United States, as well as underlined the shortcomings of its social safety net programs.

Subtitle N—Pathways Out of Poverty

SEC. 31401. FINDINGS.

Congress finds the following:

(1) The persistence of poverty, and especially intergenerational poverty, in America can be seen as a deep, structural problem that implicates our value system and our educational and economic institutions.

(2) Poverty may be defined as the lack of basic necessities of life such as food, shelter, clothing, health care, education, economic security, and economic opportunity.

(3) Policy initiatives and many safety net programs addressing poverty have not kept pace with the needs of millions of Americans.

(4) The lack of an equitable distribution of housing choices across the country leads to isolation and concentrated poverty.

(5) The number of Americans living in poverty rose by over 2.6 million from 2009 to 2010 (U.S. Census Bureau, September 2011).

(6) There were 46.2 million Americans living in poverty in 2010, consisting of 15.1 percent of the
American people (U.S. Census Bureau, September 2011).

(7) Poverty has a disproportionate impact on minority communities in America with 27.4 percent of African Americans, 26.6 percent of Hispanics, 12.1 percent of Asian Americans, and 9.9 percent of Whites living in poverty in the United States in 2010 (U.S. Census Bureau, September 2011).

(8) In 2010 a family of 4 was considered poor under the U.S. Census Bureau’s official measure if the family’s income was below $22,314.

(9) The economic consequences of poverty in the United States are estimated to be at least $500 billion per year (Center for American Progress, 2007).

(10) Children who grow up in poverty experience higher crime rates, decreased productivity, and higher health costs over their lives (Center for American Progress, 2007).

(11) 3,500,000 seniors lived in poverty in 2010 (U.S. Census Bureau, 2011).

(12) Young Americans, ages 18–24, experience a higher poverty rate than the national average (U.S. Census Bureau, 2011).
(13) 16,400,000 children lived in poverty in 2010—more than one in every five American children (U.S. Census Bureau, 2011).

(15) The 46,180,000 of Americans in poverty in 2010 was the largest number yet recorded in the 52 years for which poverty estimates are available (U.S. Census Bureau, 2011).

(16) The United States overseas territories have high levels of poverty and varying access to Federal anti-poverty programs. Poverty rates in 2009 for people over 18 were 41.4 percent in Puerto Rico, 53.7 percent in Guam, 65.1 percent in the United States Virgin Islands, 66.6 percent in the Commonwealth of the Northern Mariana Islands, and 52.6 percent in American Samoa.

(17) Individuals and families in poverty are more socially vulnerable to natural disasters, extreme weather and impacts of climate change and have greater difficulty preparing for, responding to and recovering from such events (Oxfam America, 2009).
(18) Children who live in families who fall into poverty for even short periods of time are at greater risk of a lifetime of lower earnings, lower educational attainment, and increased reliance on public services and increased rates of incarceration (First Focus, 2008).

(19) It is estimated that the additional 3 million children who were forced into poverty due to the recession of 2008, resulted in $35 billion in economic losses annually, and will cause at least $1.7 trillion in economic losses to the United States during their lifetimes (First Focus, 2008).

(20) Reducing poverty, especially child poverty, not only reduces costs for Federal, State, and local social services and benefits programs, but also increases tax revenue at all levels of government (Children’s Defense Fund, 2009).

(21) The House of Representatives, on January 22, 2008, has resolved that it is the sense of Congress that the United States should set a national goal of cutting poverty in half over the next 10 years.

SEC. 31403. ESTABLISHMENT OF THE FEDERAL INTERAGENCY WORKING GROUP ON REDUCING POVERTY.

(a) Establishment of Federal Interagency Working Group on Reducing Poverty.—There is established within the Department of Health and Human Services, a Federal Interagency Working Group on Reducing Poverty, which shall be chaired by the Secretary of
Health and Human Services, and whose members shall be selected by their respective agency heads from the senior ranks of their agencies, which shall—

(1) develop, within 180 days of enactment, a National Strategy to reduce the number of persons living in poverty in America in half within 10 years of the release of the 2012 Census report on Income, Poverty and Health Insurance Coverage in the United States: 2011, that includes goals and objectives relating to—

(A) reducing in half the number of Americans living in poverty as reported by the 2012 Census report on Income, Poverty and Health Insurance Coverage in the United States: 2011;

(B) eliminating child poverty in America;

(C) eliminating extreme poverty in America;

(D) improving the effectiveness and outcomes of poverty-related programs by improving our understanding of the root causes of poverty, the social, economic, and the cultural contributors to persistent intergenerational poverty;

(E) improving the measure of poverty to include more indicators and measures that can meaningfully account for other aspects relating
to the measure of poverty, such as regional differences in costs of living, the impact of rising income inequality, the impact of the persistent “digital divide”, expanding the understanding of poverty by distinguishing a standard that measures a level of freedom from deprivation versus a standard that measures a standard of economic adequacy provided by a living wage and access to a decent living standard, and the impact of poverty on other measures of economic stability and economic outcomes, such as educational attainment, rates of incarceration, lifetime earnings, access to health care, health care outcomes, access to housing, and including other measures as necessary to improve our understanding of why poverty persists in America;

(F) eliminating the disparate rates of poverty based on race, ethnicity, gender, age, or sexual orientation and identity, especially among children in those households so impacted;

(G) measuring effectiveness of poverty related programs on the basis of long-term outcomes, including the long-term savings and value of preventive practice and policy, and em-
ploying fact-based measures of programs to
make improvements;

(H) improving the accessibility of benefit
and social services programs, reducing the com-
plexity and difficulty of enrollment, and improv-
ing the rates of enrollment in need based pro-
grams for all eligible recipients to maximize the
impact of benefits and social services programs
on reducing the impacts of poverty and improv-
ing economic outcomes;

(I) making more uniform eligibility re-
quirements to improve the coordination of serv-
ice delivery, reduce gaps in eligibility, and im-
prove outcomes of programs addressing poverty
in the Federal Government;

(J) reducing the negative impacts of asset
limits for eligibility which impact Federal, State
and local poverty programs on the effectiveness
of programs where limited eligibility creates
gaps in necessary service and benefit delivery,
and restricts access to benefits as individuals
and families attempt to transition off of assist-
ance programs and which can prevent needy
beneficiaries from improving long-term out-
comes and achieving long-term economic independence from need-based programs;

(K) identifying Federal programs, including those related to disaster relief, hazard mitigation, extreme weather and climate change, and necessary reforms to better target resources towards disproportionately impacted socially vulnerable, low-income and disadvantaged communities may provide greater socio-economic benefits;

(L) improving the ability of community-based organizations to participate in the development, oversight and implementation of Federal poverty-related programs;

(M) improving access to good jobs with adequate wages and benefits by individuals living in poverty, low-income households, and the unemployed;

(N) expanding and stabilizing poor and low-income persons connection to work and access to critical job training and/or skills upgrade training that will lead to re-entry in the workforce;

(O) developing a comprehensive strategy to connect low-income young people and to re-con-
nect currently disconnected youth to education, work, and their community; and

(P) shifting the focus of poverty and means-tested programs across the Federal Government beyond the relief of deprivation and instead setting goals, measures, and outcomes more focused on measuring the success of programs in supporting and improving how capable individuals and families can access educational and economic opportunities to successfully transition away from accessing public assistance and benefits and achieving long-term economic stability which will reduce long-term costs in domestic social needs programs, reduce long-term health care costs due to the improved health of formerly poverty stricken households, increase the number of taxpaying individuals which will increase revenue, and lower the enrollment and costs in need based benefits and services programs, thus improving the economy and reducing long-term deficits for Federal, State, and local governments;

(2) oversee, coordinate, and integrate all policies and activities of the Federal Government, in coordination and consultation with the Domestic Pol-
icy Council and the National Economic Council,
across all agencies relating to reducing the number
of individuals, families, and children living below the
Federal poverty line, in extreme poverty or near pov-
erty and increasing the number of households able
to achieve long-term economic stability with assets
sufficient to maintain a decent living standard with-
out relying on public-support—

(A) economic, commercial, and pro-
grammatic policies that can effect or relieve the
effects of poverty through job creation, and eco-
omic development targeted to low-income, mi-
nority, rural, urban and other populations who
suffer disparate rates of poverty, among Fed-
eral agencies; and

(B) services and benefits including emer-
gency programs, discretionary economic pro-
grams, and other policies and activities nec-
essary to ensure that the Federal Government
is able to mount effective responses to economic
downturns and increases in the rates of poverty;

comply with appropriate guidelines, policies, and di-
rectives from the Federal Interagency Working
Group on Reducing Poverty and the Department of
Health and Human Services and other Federal agencies with responsibilities relating to poverty reduction or improving economic stability and independence;

(5) enact best practices for improved data collection, relevant to—

(A) reducing poverty;
(B) reducing the racial, ethnic, age, gender, and sexual orientation or sexual identity based disparities in the rates of poverty;

(L) improving access to employment-based benefits; and

(6) study the feasibility of and test different interagency, State and local, public/private models of cooperative service and benefit delivery by creating necessary exemptions, waivers and funding sources to allow improved cooperation and innovation in the development of programs, practices, policies and procedures that advance the goal of reducing poverty and increasing economic opportunity.

TITLE IV—HOUSING AND ASSET BUILDING
Subtitle A—Affirming the Right of All Renters to a Safe, Affordable, and Decent Home

SEC. 40101. FINDINGS.

Congress finds the following:

(1) Housing is a basic human right.

(2) Evidence-based research has shown that families with safe, decent, and affordable homes are better able to find employment, achieve economic mobility, perform better in school, and maintain improved health.

(3) Investing in affordable housing strengthens our economy, creates jobs, boosts families’ incomes, and encourages further development.

(4) Far too many families living in urban, suburban, and rural communities struggle to afford their rent each month, putting them at increased risk of eviction and homelessness.

(5) According to the Department of Housing and Urban Development (HUD) point-in-time count of 2016, there were 549,928 people in the United
States experiencing homelessness on any given night, including over 120,000 children.

(6) Homelessness has become so pervasive that some States and cities have declared that homelessness has reached a state of emergency.

(7) Major progress towards the national goals for ending homelessness in our Nation has stalled in the absence of increased funding.

(8) A shortage of affordable housing exists in every State and major metropolitan area.

(9) A full-time worker earning the Federal minimum wage cannot afford a modest two-bedroom apartment in any State, metropolitan area, or county in the United States.

(10) Over half of all renters are cost-burdened, paying more than 30 percent of their income for housing, and 71 percent of extremely low-income households are severely cost-burdened, paying more than half of their income for housing.

(11) Rapidly rising rents across the country have pushed many long-time residents and families out of the communities they call home.

(12) Closed waiting lists and long waits mean only a quarter of the families who qualify for housing assistance actually receive it.
(13) The role of Federal affordable housing investments is even more important given the limited ability of the private market alone to address these needs.

(14) Various programs at the Department of Housing and Urban Development help to subsidize housing for more than 4,000,000 low-income families, including the Public Housing program, the Section 8 Housing Choice Vouchers (HCV) program, the Section 8 Project-Based Rental Assistance program, the Section 202 Supportive Housing for the Elderly program, the Section 811 Supportive Housing for Persons with Disabilities program, and the Housing Opportunities for Persons with AIDS (HOPWA) program.

(15) Despite leveraging billions of dollars in private resources to preserve and expand the supply of affordable housing, affordable housing programs continue to be chronically underfunded despite their success at providing safe housing to families in need.

(16) Chronic underfunding of the Public Housing Capital Fund has led to a backlog of more than $26,000,000,000 in capital repairs and deteriorating conditions for residents.
(17) Without Federal investments, many more families would be homeless, living in substandard or overcrowded conditions, or struggling to meet other basic needs because too much of their limited income would be used to pay rent.

(18) Low Federal spending caps required by the Budget Control Act of 2011 (Public Law 112–25) have decreased funding for affordable housing and community development programs.

(19) These austere spending caps threaten affordable housing and community development for millions of low income families.

(20) Even renters with housing subsidies often face barriers to finding housing providers willing to rent to them.

(21) Under current Federal law, housing discrimination against a renter is illegal if it is based on race, color, religion, sex, familial status, national origin, or disability.

(22) Renters should be protected against housing discrimination through stronger enforcement of fair housing laws.

(23) Despite various clarifying memos from HUD, the re-entry community continues to face bar-
riers in trying to secure access to federally assisted
housing.

SEC. 40102. SENSE OF CONGRESS.

The Congress—

(1) supports lifting the spending caps required
by the Budget Control Act of 2011 and robustly
funding programs to increase access to affordable
housing and address homelessness at the Depart-
ment of Housing and Urban Development (HUD)
and other Federal agencies;

(2) opposes any cuts to Federal investments in
affordable housing programs at the Department of
Housing and Urban Development and other Federal
agencies;

(3) supports increased funding to the Public
Housing Capital Fund to address the backlog of
capital repairs for public housing;

(4) supports expanded funding for the National
Housing Trust Fund to boost the supply of afford-
able housing available to extremely low-income fami-
lies;

(5) supports efforts to preserve and rehabilitate
existing housing to maintain and increase the avail-
able stock of affordable housing and proposals by
local entities to prevent any net loss of overall af-
ordable housing units receiving Federal subsidies;

(6) supports strengthened Federal fair housing
laws;

(7) affirms that renters may not be barred from
federally assisted housing solely on the basis of a
criminal record;

(8) supports expansion of renters’ rights, in-
cluding the right of tenants to organize tenant asso-
ciations; and

(9) affirms that housing is a basic human right.

Subtitle B—Ending Homelessness

SEC. 40201. SHORT TITLE.

This subtitle may be cited as the “Ending Homeless-
ness Act of 2020”.

SEC. 40202. CONGRESSIONAL FINDINGS.

The Congress finds that—

(1) although the United States has experienced
a reduction in veteran homelessness after a surge of
new Federal funding targeted to homeless veterans
starting in fiscal year 2008, major progress towards
the national goals for ending homelessness in our
Nation has virtually stalled in the absence of in-
creased funding;
(2) according to the Department of Housing and Urban Development’s 2016 point-in-time count, there were 549,928 people experiencing homelessness in the United States on any given night, including over 120,000 children;

(3) homelessness in many communities has reached crisis proportions and some cities have declared that homelessness has reached a state of emergency; and

(4) the Federal Government must renew its commitment to the national goals to end homelessness.

**SEC. 40203. EMERGENCY RELIEF FUNDING.**

Title IV of the McKinney-Vento Homeless Assistance Act (42 U.S.C. 11360 et seq) is amended—

(1) by redesignating section 491 (42 U.S.C. 11408; relating to rural housing stability grant program) as section 441;

(2) by redesignating section 592 (42 U.S.C. 11408a; relating to use of FMHA inventory for transitional housing for homeless persons and for turnkey housing) as section 442; and

There is authorized to be appropriated $5,000,000, for each of fiscal years 2022 through 2026 for assistance to the Neighborhood Reinvestment Corporation for mortgage foreclosure mitigation activities, under the following terms and conditions:

(1) MORTGAGE FORECLOSURE MITIGATION COUNSELING.—

(A) The Neighborhood Reinvestment Corporation (in this section referred to as the “NRC”) may make grants under this paragraph to counseling intermediaries approved by the Department of Housing and Urban Development (in this section referred to as “HUD”) (with match to be determined by NRC based on
affordability and the economic conditions of an area; a match also may be waived by NRC based on the aforementioned conditions) to provide mortgage foreclosure mitigation assistance to the 15 States with highest rates of home mortgage defaults and foreclosures, as of January 1, 2018, to help eliminate the default and foreclosure of mortgages of owner-occupied single-family homes that are at risk of such foreclosure and located in metropolitan statistical areas having the greatest such need. Other than areas with high rates of defaults and foreclosures, grants may also be provided to approved counseling intermediaries based on a geographic analysis of the Nation by NRC which determines where there is a prevalence of mortgages that are risky and likely to fail, including any trends for mortgages that are likely to default and face foreclosure. A State Housing Finance Agency may also be eligible where the State Housing Finance Agency meets all the requirements under this paragraph. A HUD-approved counseling intermediary shall meet certain mortgage foreclosure mitigation assistance counseling requirements, as determined by
NRC, and shall be approved by HUD or NRC as meeting these requirements.

(B) Mortgage foreclosure mitigation assistance shall only be made available to homeowners of owner-occupied homes with mortgages in default or in danger of default. These mortgages shall likely be subject to a foreclosure action and homeowners will be provided such assistance that shall consist of activities that are likely to prevent foreclosures and result in the long-term affordability of the mortgage retained pursuant to such activity or another positive outcome for the homeowner. No funds made available pursuant to this paragraph may be provided directly to lenders or homeowners to discharge outstanding mortgage balances or for any other direct debt reduction payments.

(C) The use of mortgage foreclosure mitigation assistance by approved counseling intermediaries and State Housing Finance Agencies shall involve a reasonable analysis of the borrower’s financial situation, an evaluation of the current value of the property that is subject to the mortgage, counseling regarding the assumption of the mortgage by another non-Federal
party, counseling regarding the possible purchase of the mortgage by a non-Federal third party, counseling and advice of all likely restructuring and refinancing strategies or the approval of a work-out strategy by all interested parties.

(D) NRC may provide up to 15 percent of the total funds made available pursuant to this paragraph to its own charter members with expertise in foreclosure prevention counseling, subject to a certification by NRC that the procedures for selection do not consist of any procedures or activities that could be construed as a conflict of interest or have the appearance of impropriety.

(E) HUD-approved counseling entities and State Housing Finance Agencies receiving funds made available pursuant to this paragraph shall have demonstrated experience in successfully working with financial institutions as well as borrowers facing default, delinquency, and foreclosure as well as documented counseling capacity, outreach capacity, past successful performance and positive outcomes with documented counseling plans (including post-mort-
gage foreclosure mitigation counseling), loan workout agreements, and loan modification agreements. NRC may use other criteria to demonstrate capacity in underserved areas.

(F) Of the total amount made available pursuant to this paragraph, up to $250,000 may be made available to build the mortgage foreclosure and default mitigation counseling capacity of counseling intermediaries through NRC training courses with HUD-approved counseling intermediaries and their partners, except that private financial institutions that participate in NRC training shall pay market rates for such training.

(G) Of the total amount made available pursuant to this paragraph, up to 5 percent may be used for associated administrative expenses for NRC to carry out activities provided under this paragraph.

(H) Mortgage foreclosure mitigation assistance grants may include a budget for outreach and advertising, and training, as determined by NRC.

(I) NRC shall report bi-annually to the House and Senate Committees on Appropria-
tions as well as the Senate Banking Committee and House Financial Services Committee on its efforts to mitigate mortgage default.

(2) LEGAL ASSISTANCE.—

(A) The Neighborhood Reinvestment Corporation may make grants to counseling intermediaries approved by HUD or the NRC to hire attorneys to assist homeowners who have legal issues directly related to the homeowner’s foreclosure, delinquency, or short sale.

(B) Such attorneys shall be capable of assisting homeowners of owner-occupied homes with mortgages in default, in danger of default, or subject to or at risk of foreclosure and who have legal issues that cannot be handled by counselors already employed by such intermediaries.

(C) Grants under this paragraph may only be made to counseling intermediaries and legal organizations that (i) provide legal assistance in the 15 States with the highest rates of home mortgage defaults and foreclosures, as of January 1, 2018, and (ii) have the capacity to begin using the financial assistance within 90 days after receipt of the assistance.
(D) No funds made available pursuant to this paragraph shall be used to provide, obtain, or arrange on behalf of a homeowner, legal representation involving or for the purposes of civil litigation.

Subtitle G—Young Americans Financial Literacy

SEC. 40701. SHORT TITLE.

This subtitle may be cited as the “Young Americans Financial Literacy Act”.

•HR 8352 IH
The Congress finds as follows:

(1) That 87 percent of Americans believe finance education should be taught in schools and 92 percent of K–12 teachers believe that financial education should be taught in school, but only 12 percent of teachers actually teach the subject.

(2) According to a 2016 survey, 1 in 3 States require high school students to take a personal finance course, and only 5 States require high school students to take a semester long personal finance course.

(3) The percentage of Americans grading themselves with an A or B in personal finance knowledge has declined from 60 percent in 2013 to 56 percent in 2016. In 2016, 75 percent of Americans admitted they could benefit from additional advice and answers to everyday financial questions from a professional. Most adults feel that their financial literacy skills are inadequate, yet they do not rely on anyone else to handle their finances; they feel it is important to know more but have received no financial education.

(4) It is necessary to respond immediately to the pressing needs of individuals faced with the loss of their financial stability; however increased atten-
tion must also be paid to financial literacy education
reform and long-term solutions to prevent future
personal financial disasters.

(5) Research-based financial literacy education
programs are needed to reach individuals at all ages
and socioeconomic levels, particularly those facing
unique and challenging financial situations, such as
high school graduates entering the workforce, soon-to-be and recent college graduates, young families,
and to address the unique needs of military per-
sonnel and their families.

(6) High school and college students who are
exposed to cumulative financial education show an
increase in financial knowledge, which in turn drives
increasingly responsible behavior as they become
young adults.

(7) Sixty percent of parents identify their teens
as “quick spenders”, and most acknowledge they
could do a better job of teaching and preparing kids
for the financial challenges of adulthood, including
budgeting, saving, and investing.

(8) The majority (52 percent) of young adults
ages 23 through 28 consider “making better choices
about managing money”, the single most important
issue for individual Americans to act on today.
According to the Government Accountability Office, giving Americans the information they need to make effective financial decisions can be key to their well-being and to the country’s economic health. The recent financial crisis, when many borrowers failed to fully understand the risks associated with certain financial products, underscored the need to improve individuals’ financial literacy and empower all Americans to make informed financial decisions. This is especially true for young people as they are earning their first paychecks, securing student aid, and establishing their financial independence. Therefore, focusing economic education and financial literacy efforts and best practices for young people ages 8 through 24 is of utmost importance.

SEC. 40703. AUTHORIZATION FOR FUNDING THE ESTABLISHMENT OF CENTERS OF EXCELLENCE IN FINANCIAL LITERACY EDUCATION.

(6) Conducting ongoing research and evaluation of financial literacy education programs to assure learning of defined skills and knowledge, and retention of learning.

(7) Developing research-based assessment and accountability of the appropriate applications of learning over short and long terms to measure effectiveness of authorized activities.

(1) provide clear definitions of “financial literacy” and “financially literate” to clarify educational outcomes;

Subtitle O—Closing the Racial Wealth Gap

SEC. 41501. SHORT TITLE.

This subtitle may be cited as the “Closing the Racial Wealth Gap Act of 2020”.

SEC. 41502. FINDINGS.

Congress finds that:
(1) Between 1983 and 2016, the median Black family saw their wealth drop by more than half after adjusting for inflation, compared to a 33 percent increase for the median White household.

(2) The Forbes 400 richest Americans own more wealth than all Black households plus a quarter of Latinx households.

(3) Black families are about 20 times more likely to have zero or negative wealth (37 percent) than they are to have $1 million or more in assets (1.9 percent).

(4) Latinx families are 14 times more likely to have zero or negative wealth (32.8 percent) than they are to reach the millionaire threshold (2.3 percent).

(5) White families are equally likely to have zero or negative wealth (about 15 percent) as they are to be a millionaire (15 percent).

(6) The rate of home ownership for Black families is the same today in 2019 as it was before passage of the Fair Housing Act of 1968.

(7) The racial wealth gap is not an accident or the result of inadvisable financial choices by people of color, rather it is the result of the centuries of policies, programs, Supreme Court decisions and in-
institutional practices that were designed to create barriers or to strip wealth from people of color.

(8) Adjustments to Black and Latinx education rates, homeownership, savings and employment do not greatly reduce the racial wealth divide due to the structural underpinnings holding the racial wealth divide in place.

(9) To understand and address the racial wealth gap, many experts believe we need federally funded data collection efforts with the ability to disaggregate sample sizes by race, ethnicity, tribal affiliation, and country of birth.

(10) Analytical tools like the “Racial Wealth Audit” from the Institute on Assets and Social Policy (IASP) and the “Racial Equity Toolkit” from the Government Alliance on Racial Equity (GARE) are needed to provide a framework to assess how legislation will widen or narrow the racial wealth divide.

(11) Changes in individual behavior will not close the racial wealth divide, only structural systemic policy change.
SEC. 41503. DATA COLLECTION ON RACE AND WEALTH.
Section 10 of the Federal Reserve Act (12 U.S.C. 241 et seq.) is amended by inserting before paragraph (12) the following:

SEC. 41701. SHORT TITLE.

“SEC. 36C. RENT PAID FOR PRINCIPAL RESIDENCE.

“(a) In General.—In the case of an individual who leases the individual’s principal residence (within the meaning of section 121) during the taxable year and who pays rent with respect to such residence in excess of 30 percent of the taxpayer’s gross income for such taxable

Subtitle T—Improving FHA Support for Small Dollar Mortgages Act

SEC. 42001. SHORT TITLE.

This subtitle may be cited as the “Improving FHA Support for Small Dollar Mortgages Act of 2020”.

SEC. 42002. REVIEW OF FHA SMALL-DOLLAR MORTGAGE PRACTICES.

(a) CONGRESSIONAL FINDINGS.—The Congress finds that—

(1) affordable homeownership opportunities are being hindered due to the lack of financing available for home purchases under $70,000;

(2) according to the Urban Institute, small-dollar mortgage loan applications in 2017 were denied by lenders at double the rate of denial for large mortgage loans, and this difference in denial rates cannot be fully explained by differences in the applicants’ credit profiles;

(3) according to data compiled by Attom Data solutions, small-dollar mortgage originations have
decreased 38 percent since 2009, while there has
been a 65 percent increase in origination of mort-
gages for more than $150,000;

(4) the FHA’s mission is to serve creditworthy
borrowers who are underserved and, according to the
Urban Institute, the FHA serves 24 percent of the
overall market, but only 19 percent of the small-dol-
lar mortgage market; and

(5) the causes behind these variations are not
fully understood, but merit study that could assist in
furthering the Department of Housing and Urban
Development’s mission, including meeting the hous-
ing needs of borrowers the program is designed to
serve and reducing barriers to homeownership, while
protecting the solvency of the Mutual Mortgage In-
surance Fund.

(b) REVIEW.—The Secretary of Housing and Urban
Development shall conduct a review of its FHA single-
family mortgage insurance policies, practices, and prod-
ucts to identify any barriers or impediments to supporting,
facilitating, and making available mortgage insurance for
mortgages having an original principal obligation of
$70,000 or less. Not later than the expiration of the 12-
month period beginning on the date of the enactment of
this subtitle, the Secretary shall submit a report to the
Congress describing the findings of such review and the actions that the Secretary will take, without adversely affecting the solvency of the Mutual Mortgage Insurance Fund, to remove such barriers and impediments to providing mortgage insurance for such mortgages.

Subtitle U—Rental Eviction Moratorium

SEC. 42101. SHORT TITLE.

This subtitle may be cited as the “Rental Eviction Moratorium Act of 2020”.

SEC. 42102. TEMPORARY MORATORIUM ON EVICTION FILINGS.

(a) CONGRESSIONAL FINDINGS.—The Congress finds that—

(1) according to the 2018 American Community Survey, 36 percent of households in the United States—more than 43 million households—are renters;

(2) in 2019 alone, renters in the United States paid $512 billion in rent;

(3) according to the Joint Center for Housing Studies of Harvard University, 20.8 million renters in the United States spent more than 30 percent of their incomes on housing in 2018 and 10.9 million
renters spent more than 50 percent of their incomes on housing in the same year;

(4) Moody’s Analytics estimates that 27 million jobs in the United States economy are at high risk because of COVID–19;

(5) the impacts of the spread of COVID–19, which is now considered a global pandemic, are expected to negatively impact the incomes of potentially millions of renter households, making it difficult for them to pay their rent on time; and

(6) evictions in the current environment would increase homelessness and housing instability which would be counterproductive towards the public health goals of keeping individuals in their homes to the greatest extent possible.

(b) MORATORIUM.—During the period beginning on the date of the enactment of this subtitle and ending on the date described in paragraph (1) of subsection (d), the lessor of a covered dwelling may not make, or cause to be made, any filing with the court of jurisdiction to initiate a legal action to recover possession of the covered dwelling from the tenant regardless of cause, except when a tenant perpetrates a serious criminal act that threatens the health, life, or safety of other tenants or staff of the property in which the covered dwelling is located.
(c) DEFINITIONS.—For purposes of this section, the following definitions shall apply:

(1) COVERED DWELLING.—The term “covered dwelling” means a dwelling that is occupied by a tenant—

(A) pursuant to a residential lease; or

(B) without a lease or with a lease terminable at will under State law.

(2) DWELLING.—The term “dwelling” has the meaning given such term in section 802 of the Fair Housing Act (42 U.S.C. 3602) and includes houses and dwellings described in section 803(b) of such Act (42 U.S.C. 3603(b)).

(d) SUNSET.—

(1) SUNSET DATE.—The date described in this paragraph is the date of the expiration of the 6-month period that begins upon the termination by the Federal Emergency Management Agency of the emergency declared on March 13, 2020, by the President under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 4121 et seq.) relating to the Coronavirus Disease 2019 (COVID–19) pandemic.

(2) NOTICE TO VACATE AFTER SUNSET DATE.—After the date described in paragraph (1),
the lessor of a covered dwelling may not require the tenant to vacate the covered dwelling before the expiration of the 30-day period that begins upon the provision by the lessor to the tenant, after the date described in paragraph (1), of a notice to vacate the covered dwelling.

**TITLE V—EDUCATION**

**Subtitle A—Computer Science for All**

**SEC. 50101. SHORT TITLE.**

This subtitle may be cited as the “Computer Science for All Act of 2020”.

**SEC. 50102. FINDINGS.**

Congress finds that:

(1) Computer science is transforming industry, creating new fields of commerce, driving innovation, and bolstering productivity.

(2) There are more than 520,000 computing jobs unfilled in the United States as of January 2017. It is projected that there will be 1,400,000 new jobs in the technology sector by 2020; however, 70 percent of those jobs will be unfulfilled at the rate American universities are producing qualified graduates.
(3) Knowledge of computer science and use of technology is increasingly essential for all individuals, not just those working or planning to work in the technology sector.

(4) Providing students with computer science education in elementary school and secondary school is critical for student success, and strengthening the workforce of a 21st century economy.

(5) While an estimated 90 percent of parents want computer science taught in their children’s schools, just 25 percent of all elementary schools and secondary schools offer high-quality computer science instruction that includes programming and coding.

(6) African-Americans, Latinos, Native Americans, and Pacific Islanders are disproportionately underrepresented in the technology sector. About 9 percent of graduates from the Nation’s top computer science programs are from underrepresented minority groups. However, only 5 percent of employees at large tech firms belong to an underrepresented minority group

(7) While underrepresented minority students overall face an opportunity gap in STEAM education, women of color particularly face an achieve-
ment gap in science and engineering education. In 2012, while women received 48.8 percent of all bachelor’s degrees in science and engineering majors, women of color received only 15.7 percent (Black: 5.3 percent; Latino: 5.5 percent; Native American or Alaska Native: 0.3 percent, and Asian or Pacific Islander: 4.6 percent).

(8) Women overall face challenges in accessing computer science education. Only 18 percent of all bachelor’s degrees awarded in computer science in 2012 went to women, and women of color received only 6.6 percent (Black: 3.0 percent; Latino: 1.7 percent; Native American or Alaska Native: 0.1 percent, and Asian or Pacific Islander: 1.8 percent).

(9) Disparities in enrollment and academic achievement start early. In 2016, only 23 percent of students taking the AP Computer Science exam were women, and just 16 percent were African-American or Latino.

(10) Nationwide, only 88 Native American students took the AP Computer Science exam in 2016, a decrease from 2015. This means that while Native Americans make up about 1.1 percent of the U.S. student population, they made up 1/5 of a percent of
students who took AP Computer Science exams in 2016.

SEC. 50103. DEFINITIONS.

**Subtitle C—Ronald V. Dellums Memorial Fellowship for Women of Color in STEAM and National Security**

**SEC. 50301. SHORT TITLE.**

This subtitle may be cited as the “Ronald V. Dellums Memorial Fellowship for Women of Color in STEAM and National Security Act”.

**SEC. 50302. FINDINGS.**

Congress finds the following:

(1) From 1993 to 1995, Ronald V. Dellums served as the Chairman of the Armed Services Committee of the House of Representatives after 20 years of service on such Committee.

(2) As a stalwart champion of diversity and inclusion, Chairman Dellums was an early supporter of integrating lesbian, gay, transgender, and bisexual individuals into the military.

(3) Before Chairman Dellums was elected to the House of Representatives in 1970, he was a psy-
chiatric social worker, community organizer, and lec-
turer.

(4) Chairman Dellums served in the United
States Marine Corps from 1954 to 1956.

(5) In section 4201 of the Fiscal Year 2018
National Defense Authorization Act, Congress reit-
erated the importance of prioritizing this relation-
ship by authorizing more than $12,000,000 above
the President’s requests, including 2,000,000 au-
thorized specifically for minority women in the fields
of science, technology, engineering, and mathe-
maties.

(6) While women of color have made significant
progress in graduating from college in the areas of
study related to STEAM, they continue to be under-
represented in the STEAM fields.

(7) While underrepresented minority students
overall face an opportunity gap in STEAM edu-
cation, women of color face a larger achievement gap
in science and engineering education.

(8) In 2016, of bachelor’s degrees awarded in
STEAM majors—

(A) women received 36 percent;

(B) Black individuals received 13 percent;
(C) Hispanic individuals received 15 percent;

(D) Native American or Alaska Native individuals received 14 percent; and

(E) Asian or Pacific Islander individuals received 33 percent.

(9) A 2017 report published by the National Science Foundation found that the percentage of all bachelor’s degrees in computer sciences, mathematics, and statistics, and engineering received by women of color has declined since 1996.

(10) Intentional and proactive strategies and programs are necessary to ensure the underrepresentation of women of color in the disciplines and professions related to STEAM fields is appropriately addressed to ensure broad and inclusive participation in areas of national importance.

SEC. 50303. FELLOWSHIP PROGRAM.

(a) E STABLISHMENT.—The Secretary of Defense shall establish a fellowship program, which shall be known as the “Ronald V. Dellums Memorial Fellowship for Women of Color in STEAM”, to provide scholarships and internships for eligible students with high potential talent in STEAM.

(4) Consideration of underrepresented students in STEAM fields.—In awarding a fellowship under this section, the Secretary shall consider—

(A) the number and distribution of minority and female students nationally in science and engineering majors;

(B) the projected need for highly trained individuals in all fields of science and engineering;

(C) the present and projected need for highly trained individuals in science and engineering career fields in which minorities and women are underrepresented; and

(D) the lack of minorities and women in national security, especially in science and engineering fields in which such individuals are traditionally underrepresented.

(2) NUMBER OF EXTENSIONS.—There shall be no limit on the number of extensions under paragraph (1) that the Secretary may grant an eligible student.

(3) LIMITATION ON DEGREES.—A fellow may use an extension of a fellowship under this section
for the pursuit of not more than the following number of graduate degrees:

(A) Two master’s degrees.

(B) One doctorate of philosophy.

(4) TREATMENT OF EXTENSIONS.—An extension granted under this subsection does not count for the purposes of—

(A) the number of fellowships granted under subsection (d)(1); or

(B) the percentage of fellowships granted to eligible students.

(5) EXTENSION REQUIREMENTS.—A fellow may receive an extension under this subsection only if—

(A) the fellow is in good academic standing with the institution of higher education where the fellow is enrolled;

Subtitle D—Student Support

SEC. 50401. SHORT TITLE.
This subtitle may be cited as the “Student Support Act”.

SEC. 50402. SCHOOL-BASED MENTAL HEALTH AND STUDENT SERVICE PROVIDERS.
(a) IN GENERAL.—Part A of title IV of the Elementary and Secondary Education Act of 1965 (20 U.S.C. 7101 et seq.) is amended by adding at the end the following:

“Subpart 3—School-Based Mental Health and Student Service Providers

“SEC. 4131. FINDINGS.

“The Congress finds the following:

“(1) The Surgeon General of the Public Health Service has found that 1 in 5 children has a diagnosable mental disorder and 1 in 10 children and adolescents suffer from mental illness severe enough to cause some level of impairment. However, 75 to 80 percent of children in need of mental health services do not receive needed treatment. The short- and long-term consequences of untreated childhood mental disorders are costly, in both human and fiscal terms.
“(2) Thirty-seven percent of students with a mental health condition age 14 and older drop out of school—the highest dropout rate of any disability group.

“(3) Fifty percent of all lifetimes cases of mental illness begin by the age of 14 and 75 percent by age 24.

“(4) In June 2010, the American Academy of Pediatrics called for all pediatricians to screen children and adolescents for mental illness and substance use.

“(5) Just over half (50.6 percent) of children with a mental health condition aged 8–15 received mental health services in the previous year.

“(6) African Americans and Hispanic Americans each use mental health services at about one-half the rate of Caucasian Americans and Asian Americans at about one-third the rate.

“(7) School counselors, school social workers, school psychologists, other qualified psychologists, and child and adolescent psychiatrists are critically needed to help these children and to provide a variety of crucial support services as 70–80 percent of children and adolescents who receive mental health services access these services in school settings.
“(8) Across the United States, there are insufficient resources for school-based counseling professionals, and often students do not get the help they need. The 2017 national average ratio of students to school counselors in elementary and secondary schools was 482 to 1.

“(9) United States public schools need more mental health professionals because participation in the use of school-based mental health centers (SBHC) was positively associated with increases in grade point average (GPA) and attendance.

“(10) According to the leading counseling, guidance, and mental health organizations, including the American School Counselor Association, the National Association of Social Psychologists, the National Association of Social Workers, and the School Social Work Association of America, the maximum recommended ratio of—

“(A) students to school counselors is 250 to 1;

“(B) students to school psychologists is 500 to 700 to 1; and

“(C) students to school social workers is 250 to 1.
“(11) A recent study revealed a national average ratio of 1,653 students per school psychologist, despite the 1:500–700 recommendation from the National Association of Social Psychologists. This deficit is further compounded by studies predicting a 2–4 percent shortage of school psychologists over the next 10 years due to retirement. In some schools, there are no school-based mental health and student service providers available to assist students in times of crisis, or at any other time.

“(12) Counselor-to-student ratios in 35 States exceed 1:400 despite recommendations from the American School Counselor Association for a 1:250 ratio. Only three States—Vermont, Wyoming & New Hampshire—meet the recommended ratio. This shortage occurs during a time when the National Center on Education Statistics forecasts that the Nation’s number of public school students (Pre-K to 12th) will grow by 7 percent between 2011 and 2022, particularly in States that already spend the least money per student.

“(13) Model programs using school-based mental health and student service providers have positive effects on emotional, behavioral and academic outcomes, such as reductions in aggressive and disrup-
tive behavior, referrals to the principal’s office, the use of weapons, force, or threats, and increased students’ feelings of safety. Studies also find that mental health programs can have a range of positive outcomes across all grade levels, including gains in achievement test scores, grade point averages, course credit completion, as well as decreases in absences and substance use.

“SEC. 4132. PURPOSES.

“The purposes of this subpart are to assist States and local educational agencies in hiring additional school-based mental health providers, including additional school counselors, school psychologists, other qualified psychologists, child and adolescent psychiatrists, and school social workers to achieve each of the following:

“(1) To reduce the ratios of school-based mental health and student service providers to students in elementary and secondary schools in the United States to the following minimum ratios recommended by the leading counseling, guidance, and mental health organizations, including the American School Counselor Association, the National Association of Social Psychologists, the National Association of Social Workers, and the School Social Work Association of America:
“(A) One school counselor for every 250 students.

“(B) One school psychologist for every 500 to 700 students.

“(C) One school social worker for every 250 students.

“(2) To provide evidence-based school mental health and student services through a whole school and interdisciplinary approach.

“(3) To remove emotional, behavioral, and psychosocial barriers to learning so as to enhance students’ classroom preparedness, overall school performance, decrease rates of absenteeism, and ability to problem solve and set goals.

“(4) To support school staff and teachers in improving classroom management, conducting behavioral interventions to improve school discipline, and developing the awareness and skills to identify the need for mental health services.

“(5) To support parental involvement in improving the school behavior and academic success of their children.

“(6) To improve the overall mental, behavioral, social, and psychology assessment and trajectory of each student who seeks mental health services.
“(7) To ensure each student feels comfortable and has all the resources they need to continue short and/or long-term mental health treatment.

Subtitle E—Expressing the Sense of the House of Representatives Regarding the Need for Increased Diversity and Inclusion in the Tech Sector, and Increased Access to Opportunity in Science, Technology, Engineering, Arts, and Mathematics (STEAM) Education

Sec. 50501. Findings.

Congress finds the following:

(1) There will be 1,400,000 new tech jobs by 2020, however, 70 percent of those jobs will be unfulfilled at the rate United States universities are currently producing qualified graduates.

(2) Communities of color (African Americans, Latinos, Native Americans, Asian Americans, and
Pacific Islanders) are woefully underrepresented in corporate leadership roles, including the technology sector.

(3) African Americans, Latinos, Native Americans, and Pacific Islanders are disproportionately underrepresented in the technology sector.

(4) Black and Hispanic workers in the science and engineering workforce continue to be underrepresented, Black employees represent 11 percent of the United States workforce but only 9 percent of the science and engineering workforce, and Hispanic employees represent 16 percent of the United States workforce but only 7 percent of the science and engineering workforce.

(5) The share of women working in science and engineering jobs has held steady around 50 percent since 1990, but the share of women in specific fields has varied from 47 percent in life sciences to only 25 percent in computer science.

(6) Women of color represent less than 10 percent of all computer science professionals (African American: 5.7 percent; Hispanic: 6.4 percent; American Indian or Alaska Native: 0.1 percent; and Asian: 22.9 percent).
(7) 50 to 70 percent of employees in tech companies work in non-tech positions, for which an existing pipeline of qualified African Americans and Latinos currently exists.

(8) A pipeline of qualified technical candidates is critical as the tech industry improves its recruiting, hiring, and retaining of candidates and employees of color.

(9) Underrepresented minority students overall face an opportunity gap in STEAM education.

(10) Women of color particularly face an achievement gap in science and engineering education.

(11) In 2015, women were conferred nearly a third of all science and engineering degrees.

(12) In 2015, women of color received only 13 percent of all science and engineering degrees (Black: 3.2 percent; Hispanic: 3.9 percent; Native American or Alaskan Native: 0.2 percent; Asian or Pacific Islander: 4.5 percent; and multi-racial: 1.2 percent).

**Subtitle J—America RISING**

**SEC. 51101. SHORT TITLE.**

This subtitle may be cited as the “America Realizing
the Informational Skills and Initiative of New Graduates
Act of 2020” or “America RISING Act of 2020”.

**SEC. 51102. FINDINGS.**

Congress finds the following:
(1) According to the Bureau of Labor Statistics, in 2012 the national unemployment rate for individuals ages 25 years and older with a bachelor’s degree was 4.5 percent and 6.2 percent for individuals with an associate’s degree. For college graduates ages 18 to 25 the national unemployment rate in 2012 was higher at 7.7 percent. Because the typical college graduates leaves college owing an average of $29,400 in student loan debt, a rate that has increased 6 percent every year since 2008, the current job market offers exceedingly few opportunities for such graduates to obtain employment at a salary adequate to service their college loan debt.

(2) There are more than 26 million small businesses in the United States. In the current economic climate, these small businesses are experiencing difficulty in finding the resources needed to increase sales, modernize operations, and hire new employees.

(3) Recent college graduates need the experience that can be obtained only in the workplace to refine their skills and develop the entrepreneurial qualities that can lead to the creation of new businesses and jobs.

(4) Existing small businesses and companies will benefit from the information and technology
skills possessed by many of the Nation’s recent college graduates.

(5) Enabling recent college graduates to obtain employment with small businesses benefits the national economy by providing such businesses the human capital and technical expertise needed to compete and win in the global economy of the 21st century.

SEC. 51103. ESTABLISHMENT OF AMERICA RISING PROGRAM.

(a) Establishment.—The Secretary of Labor and the Secretary of Education shall, jointly, establish a program under which—

(1) grants are paid to eligible employers to defray the cost of compensation paid by such employers to recent college graduates; and

(2) grants are paid to recent college graduates to enable such graduates to defray the cost of undertaking further postsecondary courses at an institution of higher education for up to 24 months in subjects relating to mathematics, science, engineering, or technology.

(b) Terms and Conditions.—
(1) IN GENERAL.—A grant under this section may be made on such terms and conditions as the Secretary may determine.

(2) DEFERRAL OF FEDERAL STUDENT LOAN OBLIGATIONS.—Each recent college graduate participating in the program under this section (by benefitting from a grant awarded under paragraph (1), or receiving a grant under paragraph (2), of subsection (a)) may defer payment on Federal student loans made to the graduate under title IV of the Higher Education Act of 1965 (20 U.S.C. 1070 et seq.) for the period of the graduate’s participation in the program.

(3) GRANTS TO ELIGIBLE EMPLOYERS.—With respect to a grant awarded under subsection (a)(1)—

(A) an eligible employer—

(i) may use the grant to defray the cost of compensation for not more than 2 recent college graduates; and

(ii) shall provide a compensation amount to each recent college graduate participating in the program that is equal to or greater than the grant amount re-
ceived by the employer for the graduate; and
(B) the Secretary may not award an eligible employer more than $25,000 per recent college graduate.

(4) GRANTS TO RECENT COLLEGE GRADUATES.—With respect to a grant awarded under subsection (a)(2) to a recent college graduate, the graduate shall be eligible to receive Federal student aid under title IV of the Higher Education Act of 1965 (20 U.S.C. 1070 et seq.) without regard to whether the graduate has been or is delinquent on any Federal student loans made to the graduate under such title IV (20 U.S.C. 1070 et seq.).

employment rate by more than two percentage points.

(2) Enterprise Zone.—The term “enterprise zone” has the meaning given the term “HUBzone” in section 3 of the Small Business Act (15 U.S.C. 632).

(3) Institution of Higher Education.—Except as provided in paragraph (3)(B), the term “institution of higher education” has the meaning given the term in section 101 of the Higher Education Act of 1965 (20 U.S.C. 1001).

Subtitle K—Cyber Security Edu-

cation and Federal Workforce
Enhancement Act

SEC. 51201. SHORT TITLE.

This subtitle may be cited as the “Cyber Security
Education and Federal Workforce Enhancement Act”.

SEC. 51202. FINDINGS.

Congress makes the following findings:
(1) The Department of Homeland Security’s Cybersecurity Education & Awareness (CE&A) Branch was established under National Security Presidential Directive–54/Homeland Security Presidential Directive–23, which launched the 2008 Comprehensive National Cybersecurity Initiative. There is no appropriations language that references CE&A; it is funded through the Infrastructure Protection and Information Security appropriation under the National Protection and Programs Directorate.

(2) The Department of Homeland Security’s CE&A works with universities to attract top talent through competitive scholarship, fellowship, and internship programs.

(3) The agency certifies more than 125 institutions nationwide as National Centers for Academic Excellence to teach students valuable technical skills in various disciplines of Information Assurance.

(4) The CE&A prepares and makes available computer and information security lesson plans. At the K–12 level, the Department has partnered with USA Today to provide lesson plans about the importance of prevention of computer and digital information crimes at home and in the classroom.
(5) The agency initiated the IT Security Essential Body of Knowledge (EBK). The National Cybersecurity Division developed the EBK to establish a national baseline of the essential knowledge and skills that IT security practitioners in the public and private sector should have to perform specific roles and responsibilities.

(6) The challenge for computer and information security coordination and development is no single agreed upon voluntary taxonomy nor definitions to rely upon when categorizing or classifying computer or information security jobs.

(7) The fields of computer and information security study is within the field of information assurance.

(8) The information assurance, cybersecurity and computer security workforce encompasses a variety of context, roles, and occupations and is too broad and diverse to be treated as a single occupation or profession.

(9) Science, technology, engineering, and mathematics occupations, which include computer and information security experts and professionals, are expected to grow by 17 percent by the year 2018 compared to 9.8 percent for other jobs.
(10) The Federal Government is experiencing a shortage of qualified professionals with expertise in computer and information security.

(11) Insufficiently trained, educated, or supervised Federal computer workers can reduce the Nation’s ability to secure computer networks from cyber attacks or incidents.

(12) The computing and information security workforce encompasses a variety of context, roles, and occupations and is too broad and diverse to be treated as a single occupation or profession.

(13) Computing and information security is not solely a technical endeavor, and thus encompasses a wide range of backgrounds and skills that will be needed in an effective national computing and information security workforce.

(14) The route toward professionalization of a field of study can be slow and difficult, and not all portions of a field can or should be professionalized at the same time.

(15) It is essential, just as it is for other disciplines like medicine and the law, that academics, employers, and government share a common language to identify, train, educate, and employ computer and information security professionals.
(16) The secure management of digital sensitive information collected maintained or transmitted by Federal Government agencies, including taxpayer data, Social Security records, medical records, intellectual property, proprietary business information, and sensitive Government data vital to national security and national defense requires an educated and well-trained, as well as supervised, Federal workforce.

(17) It is in the Nation’s interest to promote opportunities for science and technology education and employment as a means of addressing the need to fill computer and information security jobs within the Federal Government.

(18) The Department of Homeland Security’s role is to lead, champion, and sustain the development of a national information assurance, cybersecurity and computer security workforce, as well as to educate the citizenry.

(19) Developing, implementing, and articulating programs that protect against and respond to computer and information security threats and hazards to the Homeland’s security.

(20) The Department of Homeland Security must create an agile, diverse workforce and digital
citizenry that are capable of sustaining a safe, secure, resilient computer and information security space, driven by a dynamic Department organization at the forefront of cross-sector computer and information security workforce development.

Subtitle M—CAMPUS HATE Crimes

SEC. 51401. SHORT TITLE.

This subtitle may be cited as the “Creating Accountability Measures Protecting University Students Histori-
1346

cally Abused, Threatened, and Exposed to Crimes Act”
or the “CAMPUS HATE Crimes Act”.

SEC. 51402. FINDINGS.

Congress finds the following:

(1) The incidence of violence motivated by the actual or perceived race, color, religion, national origin, gender, sexual orientation, gender identity, or disability of the victim, known as hate crimes or crimes motivated by bias, poses a serious national problem.

(2) Such violence motivated by hatred and bigotry endangers our citizens and disrupts the communities they live in, by tearing at the fabric of our Nation and our constitutional aspiration to create a stronger, more perfect union.

(3) According to data obtained by the Southern Poverty Law Center, schools were a particularly common location for hate crimes to occur—including 150 incidents on college campuses in 33 States since November.

(4) This level of violence demonstrates an unprecedented escalation in race and hate-based crime being committed on college campuses compared to recent years.
(5) Hate groups have openly declared their efforts to establish a physical presence on college campuses and have specifically targeted young individuals and students for their messaging. Such efforts include placing fliers around campus, online organizing, and bringing national leaders to speak.

(6) College campuses have become the ideal location for hate group activity because they traditionally embrace diversity, tolerance, and social justice and strive for equality and have created safe spaces for students of every gender and identity.

(7) These are soft targets for such groups, because students are more curious and receptive to new, even radical, ideas than older individuals.

(8) The Higher Education Act of 1965 and the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act have enabled Federal authorities to understand, report, and where appropriate, investigate and prosecute hate crimes committed within the jurisdiction of an institution of higher education.

(9) However, an enduring effort cannot be made to address the national problem posed by hate crimes if many of our institutions of higher education fail to properly evaluate, prepare, and imple-
ment an effective strategy to prevent and respond to such crimes.

(10) The annual dissemination of relevant information to students and faculty regarding the institution’s campus safety apparatus will provide for a more transparent and informed campus community on the infrastructure and process in place, and the assistance services available.

(11) Federal financial assistance with regard to providing training, technical assistance, evaluation, and other associated services will allow school security and administration to understand the unique needs for the campus and the assistance to implement the proper safety plan to address those needs.

(12) Amending the Program Participation Agreement between an institution of higher education and the Department of Education to include hate crime programs provides substantial assurance that campus climate and safety will become an increasing priority and focal point to the higher education community.

(13) Modifying the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act will enable campus security and local law enforcement to more efficiently collaborate in detail-
ing and recording information on crimes, including violence motivated by the actual or perceived race, color, religion, national origin, gender, sexual orientation, gender identity, or disability of the victim.

(14) The problem of crimes motivated by bias is sufficiently serious, widespread, and interstate in nature as to warrant Federal financial assistance to States and local jurisdictions.

SEC. 51403. HATE CRIME PREVENTION AND RESPONSE.

Part B of title I of the Higher Education Act of 1965 is amended by adding at the end the following:

“SEC. 124. HATE CRIME PREVENTION AND RESPONSE.

imum, the acts or threats of violence, property
damage, harassment, intimidation, or other
crimes that specifically target an individual

institution’s activities;

or make other arrangements should they feel
unsafe in those spaces due to a hate crime
which affects such space; and

“(2) APPEALS.—Upon determination by the Secretary to terminate financial assistance to any institution of higher education under this section, the institution may file an appeal with an administrative law judge before the expiration of the 30-day period beginning on the date such institution is notified of the decision to terminate financial assistance under this section. Such judge shall hold a hearing with respect to such termination of assistance before the expiration of the 45-day period beginning on the date that such appeal is filed. Such judge may extend such 45-day period upon a motion by the institution concerned. The decision of the judge with re-
spect to such termination shall be considered to be a final agency action.

Subtitle Q—Pell Grant
Preservation and Expansion

SEC. 51801. SHORT TITLE.

This subtitle may be cited as the “Pell Grant Preservation and Expansion Act”.

SEC. 51802. FINDINGS.

Congress finds the following:

(1) The United States needs individuals with the knowledge, skills, and abilities that enable them
to thrive as educated citizens in society and successfully participate in an interconnected economy.

(2) Investments in higher education through student aid such as the Federal Pell Grant program under section 401 of the Higher Education Act of 1965 (20 U.S.C. 1070a) help students and families reach, afford, and complete education and training opportunities beyond high school.

(3) The Federal Pell Grant program is the largest source of federally funded grant aid for postsecondary education.

(4) The Federal Pell Grant program allows millions of people of the United States to attend college and is especially vital to students of color. Three in 5 African American undergraduate students, and one-half of all Latino undergraduate students, rely on the Federal Pell Grant program.

(5) The Federal Pell Grant program should continue to be a reliable source of funding for aspiring students, their families, and future generations that they can count on to be there for them when they seek higher education.

(6) To stabilize Federal Pell Grant funding and ensure the grant will continue to serve millions of students now and in the future, the program should
become a fully mandatory program that grows with inflation.

    (7) Protecting surplus funds, restoring prior eligibility cuts, and expanding access to underserved students will give millions of students and families the critical student aid support they need and deserve.

Subtitle EE—Black History Is American History

SEC. 53301. SHORT TITLE.

This subtitle may be cited as the “Black History is American History Act”.

SEC. 53302. FINDINGS.

Congress finds the following:

(1) Whereas since before its founding, the United States of America has benefited from and been enhanced by the integral role African Americans have played in our country’s history and contributions to the world.

(2) Whereas African American history does not begin in the Americas. It can be traced back to the great empires of West Africa beginning in A.D. 790, which aided the establishment and survival of colonies in America and the New World, generally, and fought against European oppression.

(3) Whereas African Americans have represented a significant portion of the American population from nearly 20 percent at the signing of the Declaration of Independence, almost all of whom, if not all, were victims of the largest forced deportations in recorded history, the transatlantic slave trade and resulting African diaspora. It is estimated
over 10,000,000 free Africans were enslaved between
the mid-fifteenth and nineteenth centuries during
the diaspora.

(4) Whereas slavery was not abolished and Afri-
can Americans not acknowledged as American citi-
zens until the mid-nineteenth century, servitude did
not abate their contributions to the settlement,
growth, and development of the United States,
which continued through Post-Reconstruction, Jim
Crow, industrialization, World Wars and conflicts,
innovation and inventiveness, constitutional
progress, and every aspect of American society.

(5) Whereas during the civil rights movement of
the 1950s and 1960s, civil rights leaders and activ-
ists championed the fight for equal rights, including
voting rights, for all African Americans.

(6) Whereas the seminal case of Brown v.
Board of Education, decided May 17, 1954, found
that the decades old policy of separate but equal ac-
cess to education was inherently unequal, and the
segregation of Black public-school students was no
longer the law of the land.

(7) Whereas African Americans continue to
fight discrimination, structural racism, economic in-
equities, and benign and overt omission of the inte-
gral role they played in our country’s rise to greatness.

(8) Whereas currently, 12 States (Arkansas, California, Colorado, Florida, Illinois, New Jersey, New York, Michigan, Mississippi, Rhode Island, South Carolina, and Texas) have passed educational laws requiring Black history be incorporated into the curricula of all public schools.

(9) Whereas Congress established the National Museum of African American History and Culture in 2003 after decades of efforts to promote and highlight the contributions of African Americans, which serves as an indication of the national importance of examining Black history. Since opening in 2016, the museum has worked to educate the public on the American story through the lens of African American history and culture and provide educators, parents, caregivers, and students with tools and resources on the African American experience, its national impact, race, racism, and the importance of tolerance and inclusivity.

(10) Whereas according to a 2015 research study conducted by the National Museum of African American History and Culture and reported in Research into the State of African American History
and Culture in K–12 Public Schools, key findings indicated that teachers considered Black history as influential in understanding the complexity of United States history.

(11) Whereas the importance of Black history is reflected in the National Assessment of Educational Progress United States History framework, from pre-colonization through contemporary America.

(12) Whereas the Federal Government, through support for educational activities of national museums established under Federal law, can assist teachers in efforts to incorporate historically accurate instruction on the comprehensive history of African Americans and students in their exploration of Black history as an integral part of American history.

Subtitle FF—CAMPUS HATE Crimes

SEC. 53401. SHORT TITLE.

This subtitle may be cited as the “Creating Account-
ability Measures Protecting University Students Histori-
cally Abused, Threatened, and Exposed to Crimes Act”
or the “CAMPUS HATE Crimes Act”.

SEC. 53402. FINDINGS.

Congress finds the following:
(1) The incidence of violence motivated by the actual or perceived race, color, religion, national origin, gender, sexual orientation, gender identity, or disability of the victim, known as hate crimes or crimes motivated by bias, poses a serious national problem.

(2) Such violence motivated by hatred and bigotry endangers our citizens and disrupts the communities they live in, by tearing at the fabric of our Nation and our constitutional aspiration to create a stronger, more perfect union.

(3) According to data obtained by the Southern Poverty Law Center, schools were a particularly common location for hate crimes to occur—including 150 incidents on college campuses in 33 States since November.

(4) This level of violence demonstrates an unprecedented escalation in race and hate-based crime being committed on college campuses compared to recent years.

(5) Hate groups have openly declared their efforts to establish a physical presence on college campuses and have specifically targeted young individuals and students for their messaging. Such efforts
include placing fliers around campus, online organizing, and bringing national leaders to speak.

(6) College campuses have become the ideal location for hate group activity because they traditionally embrace diversity, tolerance, and social justice and strive for equality and have created safe spaces for students of every gender and identity.

(7) These are soft targets for such groups, because students are more curious and receptive to new, even radical, ideas than older individuals.

(8) The Higher Education Act of 1965 and the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act have enabled Federal authorities to understand, report, and where appropriate, investigate and prosecute hate crimes committed within the jurisdiction of an institution of higher education.

(9) However, an enduring effort cannot be made to address the national problem posed by hate crimes if many of our institutions of higher education fail to properly evaluate, prepare, and implement an effective strategy to prevent and respond to such crimes.

(10) The annual dissemination of relevant information to students and faculty regarding the in-
stitution's campus safety apparatus will provide for
a more transparent and informed campus commu-
nity on the infrastructure and process in place, and
the assistance services available.

(11) Federal financial assistance with regard to
providing training, technical assistance, evaluation,
and other associated services will allow school secu-
rity and administration to understand the unique
needs for the campus and the assistance to imple-
ment the proper safety plan to address those needs.

(12) Amending the Program Participation
Agreement between an institution of higher edu-
cation and the Department of Education to include
hate crime programs provides substantial assurance
that campus climate and safety will become an in-
creasing priority and focal point to the higher edu-
cation community.

(13) Modifying the Jeanne Clery Disclosure of
Campus Security Policy and Campus Crime Statis-
tics Act will enable campus security and local law
enforcement to more efficiently collaborate in detail-
ing and recording information on crimes, including
violence motivated by the actual or perceived race,
color, religion, national origin, gender, sexual ori-
entation, gender identity, or disability of the victim.
(14) The problem of crimes motivated by bias is sufficiently serious, widespread, and interstate in nature as to warrant Federal financial assistance to States and local jurisdictions.

SEC. 53403. HATE CRIME PREVENTION AND RESPONSE.

Part B of title I of the Higher Education Act of 1965 is amended by adding at the end the following:

"SEC. 124. HATE CRIME PREVENTION AND RESPONSE.

**Subtitle HH—Beyond the Box for Higher Education**

**SEC. 53601. SHORT TITLE.**

This subtitle may be cited as the “Beyond the Box for Higher Education Act of 2020”.

**SEC. 53602. FINDINGS.**

Congress finds the following:

(1) An estimated 70,000,000 Americans have some type of arrest or conviction record that would appear in a criminal background check.

(2) Each year, more than 600,000 people return to society from State or Federal prison.

(3) Nearly 11,000,000 Americans are admitted to city and county jails each year, with an average daily population of more than 700,000 people.
(4) An estimated 2,100,000 youth under the age of 18 are arrested every year in the United States.

(5) 1,700,000 juvenile delinquency cases are disposed of in juvenile courts annually.

(6) Juvenile records are not always confidential; many States disclose information about youth involvement with the juvenile justice system or do not have procedures to seal or expunge juvenile records.

(7) The compounding effects of collateral consequences due to criminal justice involvement hinder the ability of individuals to reenter society successfully.

(8) People of color and low-income people are disproportionately impacted by the collateral consequences of criminal justice involvement.

(9) Incarceration leads to decreased earnings, unemployment, and poverty.

(10) Upon reentry, lower educational attainment, a lack of work skills or history, and the stigma of a criminal record can hinder a formerly incarcerated person’s ability to return to their communities successfully.
One way to improve reentry outcomes is to increase educational opportunities for people with a criminal or juvenile justice history.

By reducing rearrests and reconvictions, and by increasing educational attainment, formerly incarcerated individuals are better situated to find stable employment, contributing to their communities.

“(C) If an institution of higher education determines that it is necessary to inquire about the criminal or juvenile justice history of applicants for admission, it is recommended that the institution comply with the following:

In addition, the Comptroller General shall—

(1) analyze the extent to which there are an insufficient number of eligible institutions to which students from outlying areas can gain admission, including admission aided by assistance provided under this section, due to—

Sec. 54403. FINDINGS.

Congress finds the following:

(1) A child’s brain grows at a faster rate between birth and age 3 than at any later point in the child’s lifetime.

(2) Decades of research shows that children under age 3 that receive quality child care are more likely to have the behavioral, cognitive, and language skills development necessary for success in school, college, and life.

(3) According to a 2018 survey, 83 percent of parents with a child under age 5 responded that finding quality, affordable child care was a serious problem in their area.

(4) In 2017, on average, center-based child care for an infant cost 61 percent more than for a preschooler, over $11,000 annually per child, and in 28 States, more than the cost of public college tuition.

(5) In the 2015–2016 academic year, approximately 4,300,000 postsecondary education students were raising children while in college, and over half of those students had children preschool-aged or younger.
(6) According to a 2016 survey, 95 percent of child care centers at 2-year and 4-year colleges across the United States had a waiting list, with the average list containing 82 children.

(7) Student parents were 20 percent more likely to leave college without a degree than students without children.

(8) The Child Care Access Means Parents in School Federal Grant program under subpart 7 of part A of title IV of the Higher Education Act of 1965 (20 U.S.C. 1070e et seq.) helps over 3,300 students at institutions of higher education afford child care each year, but this program impacts just 0.5 percent of the entire student parent population, and many institutions of higher education do not open their subsidized child care programs to children under age 3.

(9) The share of community colleges and 4-year institutions of higher education with on-campus child care has been in decline. Community colleges saw a 10 percent decrease in the number of campuses with child care between 2002 and 2017.

(10) Student parents are more likely to be enrolled at community colleges and minority-serving institutions than other institutions of higher edu-
cation. Over a quarter of all community college stu-
dents are parents, and in the 2015–2016 academic
year, 40 percent of Black women attending college
were parents, 3 times the rate for White male col-
lege students.

(11) Community colleges and minority-serving
institutions lead the higher education sector in edu-
cating infant and toddler child care providers, espe-
ially child care providers of color, so they are the
optimal actors for driving quality infant and toddler
child care access in their regions.

Subtitle RR—STEM Opportunities Act

SECTION 54801. SHORT TITLE; FINDINGS.

(a) Short Title.—This title may be cited as the “STEM Opportunities Act of 2020”.

(b) Findings.—The Congress finds the following:

(1) Many reports over the past decade have found that it is critical to our Nation’s economic leadership and global competitiveness that the United States educates and trains more scientists and engineers.

(2) Research shows that women and minorities who are interested in STEM careers are disproportionately lost at nearly every educational transition and at every career milestone.

(3) The National Center for Science and Engineering Statistics at the National Science Founda-
tion collects, compiles, analyzes, and publishes data on the demographics of STEM degrees and STEM jobs in the United States.

(4) Women now earn nearly 37 percent of all STEM bachelor’s degrees, but major variations persist among fields. In 2017, women earned only 20 percent of all bachelor’s degrees awarded in engineering and 19 percent of bachelor’s degrees awarded in computer sciences. Based on Bureau of Labor Statistics data, jobs in computing occupations are expected to account for nearly 60 percent of the projected annual growth of newly created STEM job openings from 2016 to 2026.

(5) In 2017, underrepresented minority groups comprised 39 percent of the college-age population of the United States, but only 18 percent of students who earned bachelor’s degrees in STEM fields. The Higher Education Research Institute at the University of California, Los Angeles, found that, while freshmen from underrepresented minority groups express an interest in pursuing a STEM undergraduate degree at the same rate as all other freshmen, only 22.1 percent of Latino students, 18.4 percent of African-American students, and 18.8 percent of Native American students studying in STEM
fields complete their degree within 5 years, compared to approximately 33 percent of White students and 42 percent of Asian students who complete their degree within 5 years.

(6) In some STEM fields, including the computer sciences, women persist at about the same rate through doctorate degrees. In other STEM fields, women persist through doctorate degrees at a lower rate. In mathematics, women earn just 26 percent of doctorate degrees compared with 42 percent of undergraduate degrees. Overall, women earned 38 percent of STEM doctorate degrees in 2016. The rate of minority students earning STEM doctorate degrees in physics is 9 percent, compared with 15 percent for bachelor’s degree. Students from underrepresented minority groups accounted for only 11.5 percent of STEM doctorate degrees awarded in 2016.

(7) The representation of women in STEM drops significantly from the doctorate degree level to the faculty level. Overall, women hold only 26 percent of all tenured and tenure-track positions and 27 percent of full professor positions in STEM fields in our Nation’s universities and 4-year colleges. Black and Hispanic faculty together hold about 6.8 percent
of all tenured and tenure-track positions and 7.5 percent of full professor positions. Many of the numbers in the American Indian or Alaskan Native and Native Hawaiian or Other Pacific Islander categories for different faculty ranks were too small for the National Science Foundation to report publicly without potentially compromising confidential information about the individuals being surveyed.

(8) The representation of women is especially low at our Nation’s top research universities. Even in the biological sciences, in which women now earn more than 50 percent of the doctorates and passed the 25 percent level 37 years ago, women make up only 25 percent of the full professors at the approximately 100 most research-intensive universities in the United States. In the physical sciences and mathematics, women make up only 11 percent of full professors, in computer sciences only 10 percent, and across engineering fields only 7 percent. The data suggest that approximately 6 percent of all tenure-track STEM faculty members at the most research-intensive universities are from underrepresented minority groups, but in some fields the numbers are too small to report publicly.
(9) By 2050, underrepresented minorities will comprise 52 percent of the college-age population of the United States. If the percentage of female students and students from underrepresented minority groups earning bachelor’s degrees in STEM fields does not significantly increase, the United States will face an acute shortfall in the overall number of students who earn degrees in STEM fields just as United States companies are increasingly seeking students with those skills. With this impending shortfall, the United States will almost certainly lose its competitive edge in the 21st century global economy.

(10) According to a 2014 Association for Women in Science survey of over 4,000 scientists across the globe, 70 percent of whom were men, STEM researchers face significant challenges in work-life integration. Researchers in the United States were among the most likely to experience a conflict between work and their personal life at least weekly. One-third of researchers surveyed said that ensuring good work-life integration has negatively impacted their careers, and, of researchers intending to leave their current job within the next year, 9
percent indicated it was because they were unable to balance work and life demands.

(11) Female students and students from under-represented minority groups at institutions of higher education who see few others “like themselves” among faculty and student populations often do not experience the social integration that is necessary for success in all disciplines, including STEM.

(12) One in five children in the United States attend school in a rural community. The data shows that rural students are at a disadvantage with respect to STEM readiness. Among STEM-interested students, 17 percent of students in rural high schools and 18 percent of students in town-located high schools meet the ACT STEM Benchmark, compared with 33 percent of students in suburban high schools and 27 percent of students in urban high schools.

(13) A substantial body of evidence establishes that most people hold implicit biases. Decades of cognitive psychology research reveal that most people carry prejudices of which they are unaware but that nonetheless play a large role in evaluations of people and their work. Unintentional biases and outmoded institutional structures are hindering the ac-
cess and advancement of women, minorities, and other groups historically underrepresented in STEM.

(14) Workshops held to educate faculty about unintentional biases have demonstrated success in raising awareness of such biases.

(15) In 2012, the Office of Diversity and Equal Opportunity of the National Aeronautics and Space Administration (in this subtitle referred to as “NASA”) completed a report that—

(A) is specifically designed to help NASA grant recipients identify why the dearth of women in STEM fields continues and to ensure that it is not due to discrimination; and

(B) provides guidance that is usable by all institutions of higher education receiving significant Federal research funding on how to conduct meaningful self-evaluations of campus culture and policies.

(16) The Federal Government provides 55 percent of research funding at institutions of higher education and, through its grant-making policies, has had significant influence on institution of higher education policies, including policies related to institutional culture and structure.
SEC. 54802. PURPOSES.

The purposes of this subtitle are as follows:

(1) To ensure that Federal science agencies and institutions of higher education receiving Federal research and development funding are fully engaging the entire talent pool of the United States.

(2) To promote research on, and increase understanding of, the participation and trajectories of women, minorities, and other groups historically underrepresented in STEM studies and careers, including persons with disabilities, older learners, veterans, and rural, poor, and tribal populations, at institutions of higher education and Federal science agencies, including Federal laboratories.

(3) To raise awareness within Federal science agencies, including Federal laboratories, and institutions of higher education about cultural and institutional barriers limiting the recruitment, retention, promotion, and other indicators of participation and achievement of women, minorities, and other groups historically underrepresented in academic and Government STEM research careers at all levels.

(4) To identify, disseminate, and implement best practices at Federal science agencies, including Federal laboratories, and at institutions of higher education to remove or reduce cultural and institu-
tional barriers limiting the recruitment, retention, and success of women, minorities, and other groups historically underrepresented in academic and Government STEM research careers.

(5) To provide grants to institutions of higher education to recruit, retain, and advance STEM faculty members from underrepresented minority groups and to implement or expand reforms in undergraduate STEM education in order to increase the number of students from underrepresented minority groups receiving degrees in these fields.

Subtitle SS—Student Loan Fairness Act

SEC. 54901. SHORT TITLE.

This title may be cited as the “Student Loan Fairness Act”.

SEC. 54902. FINDINGS.

Congress finds the following:

(1) A well-educated citizenry is critical to our Nation’s ability to compete in the global economy.

(2) The Federal Government has a vested interest in ensuring access to higher education.

(3) Higher education should be viewed as a public good benefitting our country rather than as a commodity solely benefitting individual students.

(4) Total outstanding student loan debt officially surpassed total credit card debt in the United States in 2015, and now exceeds $1,400,000,000,000.
(5) Excessive student loan debt is impeding economic growth in the United States. Faced with excessive repayment burdens, many individuals are unable to start businesses, invest, or buy homes. Relieving student loan debt would give these individuals greater control over their earnings and would increase entrepreneurship and demand for goods and services.

(6) Because of soaring tuition costs, students often have no choice but to amass significant debt to obtain an education that is widely considered a prerequisite for earning a living wage.

(7) Amidst rising tuition rates and stagnant grant funding, many students are forced to supplement Federal loans with private loans, which frequently feature higher interest rates with fewer consumer protections.

(8) A borrower who experiences an extended hardship for whatever reason, or a borrower who experiences a series of separate hardships over a longer period of time, will often have no choice but to default on his or her private student loans. Opportunities to put such private loans into forbearance are limited.
(9) During the period of forbearance on private student loans, interest continues to accrue and is capitalized, and once the borrower comes out of forbearance, he or she owes significantly more on the principal of the loan than before the hardship period began.

SEC. 54903. 10/10 LOAN REPAYMENT AND FORGIVENESS.

Part G of title IV of the Higher Education Act of 1965 is amended by adding at the end the following:

“SEC. 493E. 10/10 LOAN REPAYMENT AND FORGIVENESS.

“(i) shall continue to accrue; and
“(ii) shall be capitalized up to an amount equal to 10 percent of the original principal amount of all the eligible loans that the borrower is repaying under this subsection;

“(iii) the regional variation in the cost of living (determined by the Secretary, in consultation with the Bureau of Economic
Analysis of the Department of Commerce and the Bureau of Labor Statistics of the Department of Labor) for the geographic area in which the borrower resides, so that a borrower residing in a higher cost geographic area will experience a downward trend in such monthly payment amount; or

“(3) ELIGIBILITY.—The Secretary shall establish procedures for annually determining the borrower’s eligibility for 10/10 Loan Repayment, including verification of a borrower’s annual adjusted gross income and the annual amount due on the total amount of eligible loans, and such other procedures as are necessary to effectively implement 10/10 Loan Repayment under this subsection.

“(4) SPECIAL RULE FOR MARRIED BORROWERS FILING SEPARATELY.—In the case of a married borrower who files a separate Federal income tax return, the Secretary shall calculate the amount of the borrower’s 10/10 Loan Repayment under this subsection solely on the basis of the borrower’s student loan debt and adjusted gross income, and the re-

“(C) For any month after such date during which the borrower is in deferment due to
an economic hardship described in section 435(o), monthly payment of $0.

“(2) Method of Loan Forgiveness.—To provide loan forgiveness under paragraph (1), the Secretary is authorized to carry out a program—

“(A) through the holder of the loan, to assume the obligation to repay a qualified loan amount for a loan made, insured, or guaranteed under part B of this title; and

“(B) to cancel a qualified loan amount for a loan made under part D of this title.

“(3) Qualified Loan Amount.—After the borrower has made 120 monthly payments described in paragraph (1), the Secretary shall forgive—

Subtitle TT—Financial Aid Fairness For Students Act

SEC. 55001. SHORT TITLE.

This title may be cited as the “Financial Aid Fairness for Students Act” or the “FAFSA Act”.

SEC. 55002. FINDINGS.

Congress finds the following:
(1) Expanding the ability of low- and middle-income borrowers to pursue higher education is critical to reversing decades of exclusionary policies that have adversely impacted people of color.

(2) Under current law, individuals with drug-related offenses are precluded from accessing Federal grants, loans, and work-study aid pursuant to section 484(r) of the Higher Education Act of 1965 (20 U.S.C. 1091(r)), commonly referred to as the “Aid Elimination Penalty”.

(3) The Free Application for Federal Student Aid (FAFSA) screens applicants for Federal financial aid based on her or his history of drug offenses.

(4) Given that criminal sentencing laws in the United States disproportionately impact racial minorities and low-income communities, the Aid Elimination Penalty may disproportionately hinder these same groups from accessing Federal financial aid.

(5) Recognizing that an educated citizenry is the powerhouse of the Nation, that higher education allows Americans to access well-paying jobs, health-care, strong interpersonal relationships and a higher quality of life, the Federal Government should incentivize the pursuit of higher education while ensuring equality of opportunity.
SEC. 55003. REPEAL OF SUSPENSION OF ELIGIBILITY UNDER THE HIGHER EDUCATION ACT OF 1965 FOR GRANTS, LOANS, AND WORK ASSISTANCE FOR DRUG-RELATED OFFENSES.

(a) Repeal.—Subsection (r) of section 484 of the Higher Education Act of 1965 (20 U.S.C. 1091(r)) is repealed.

“(i) Convictions.—The Secretary shall not include any question about the conviction of an applicant for the possession or sale of illegal drugs on the FAFSA (or any other form developed under subsection (a)).”.

(e) Conforming Amendments.—The Higher Education Act of 1965 (20 U.S.C. 1001 et seq.) is amended—

(1) in section 428(b)(3) (20 U.S.C. 1078(b)(3))—

(A) in subparagraph (C), by striking “485(l)” and inserting “485(k)”; and

(B) in subparagraph (D), by striking “485(l)” and inserting “485(k)”;

(4) in section 485 (20 U.S.C. 1092)—

(A) by striking subsection (k); and

Subtitle UU—Supporting the Teaching Profession Through Revitalizing Investments in Valuable Educators

SEC. 55101. SHORT TITLE AND FINDINGS.

(a) Short Title.—This subtitle may be cited as the “Supporting the Teaching profession through Revitalizing Investments in Valuable Educators Act” or the “STRIVE Act”.

(b) Findings.—Congress finds the following:
(1) States identified significant teacher shortages in their reports to the Department of Education during the 2017–2018 school year, with 46 States and the District of Columbia identifying shortages in special education, 47 States and the District of Columbia identifying teacher shortages in mathematics, 43 States identifying teacher shortages in science, 32 States identifying shortages in teachers of English learners, and 32 States identifying teacher shortages in career and technical education. One reason for the shortages in these areas is because mathematics and science teachers can earn significantly higher starting salaries in the private sector. Further, rural communities face limitations in recruiting and retaining teachers for reasons such as funding issues, limited teacher supply, and geographic isolation.

(2) Students in high-poverty and high-minority schools, both urban and rural, typically feel the largest impact of teacher shortages. These schools often experience difficulty hiring and high turnover on a regular basis, and they are the most severely affected when teacher shortages become widespread. This happens, in part, because inequitable funding of schools leaves many low-wealth urban and rural
communities with inadequate resources, so they must pay lower salaries and typically have poorer working conditions.

(3) According to a study by Mathematica, when high-performing teachers were offered large financial incentives to transfer to low-performing schools, their students’ scores climbed 10 points in reading and 9 points in math compared to students statewide over 2 years.

(4) According to a survey conducted by Scholastic, 97 percent of teachers list supportive school leadership as essential or very important for retaining strong teachers and improving student achievement, more than any other factor.

(5) Research suggests that incurring postsecondary education debt can decrease the likelihood that high-achieving students, lower-income students, and students of color choose to work in lower-wage professions in general, especially in the education system. Therefore, loan forgiveness and service scholarships for educators may be especially effective for recruiting teachers and school leaders from diverse, lower-income backgrounds.

(6) According to the Learning Policy Institute, teacher loan forgiveness and service scholarship pro-
grams can be successful in both recruiting and retaining teachers. To be effective, these programs should provide a financial benefit that meaningfully offsets the cost of a teacher’s professional preparation. This includes covering licensing and certification costs.

(7) A 2015 Government Accountability Office study and a 2018 follow up study by the Department of Education of Federal grant and loan forgiveness programs for teachers found that the structure of these programs matters. Further research shows effective loan forgiveness and service scholarship programs follow 5 design principles. These programs—

(A) cover all or a large percentage of tuition;

(B) target high-need fields or schools, or both;

(C) recruit candidates who are academically strong, committed to teaching, and well-prepared;

(D) commit recipients to teach with reasonable incentives to fulfill their commitment; and
(E) are bureaucratically manageable for participating teachers, local educational agencies, and institutions of higher education.

(8) The TEACH grant program under subpart 9 of part A of title IV of the Higher Education Act of 1965 (20 U.S.C. 1070g et seq.) provides up to $16,000 in grants to prospective teachers who agree to teach in low-income schools and high-need subject areas for 4 years. This is far below the Department of Education’s most recent estimate of the average annual cost of approximately $25,409 in tuition, fees, and room and board at the average full-time undergraduate 4-year institution.

(9) The National Center for Education Statistics found that more than 2/3 of the individuals entering the education field borrow money to pay for their higher education. Teachers with a bachelor’s degree have an average debt of $20,000 and teachers with a master’s degree have an average debt of $50,000. Teachers also start out earning 20 percent less than their peers with comparable degrees who pursue jobs outside of education. According to a report by the Center for American Progress, in more than 30 States, a mid-career teacher heading a family of 4 is eligible for several forms of government
assistance, including the free and reduced-price lunch program for their children. These compounding factors can disincentivize prospective teachers from entering the profession.

(10) In evaluating the TEACH grant program, the Government Accountability Office found that almost \( \frac{2}{3} \) of the requests for assistance under the program from October 2011 through March 2014 cited problems submitting certification paperwork. The Government Accountability Office recommended improvements in the program’s design, including reducing burdensome annual paperwork, increasing awareness about the program, and streamlining the dispute process.

(11) Spending by teachers on school supplies adds up to $1,600,000,000 per year nationally. According to the Education Market Association, most teachers spend around $500, with 10 percent spending $1,000 or more.

(12) Teacher quality partnerships are designed to strengthen higher education-based teacher and school leader preparation. Studies show that teachers who are better prepared to enter the classroom stay longer and perform better than their underprepared peers. Teacher quality partnerships also fund
programs like induction and mentoring that have been shown to increase teacher and school leader retention. Research indicates that the ongoing support for teachers provided by teacher quality partnerships, including mentoring and coaching, is an important part of early childhood education programs.

(13) According to the Center for Education Data and Research, a more diverse teaching workforce leads to better student outcomes, particularly in high-poverty environments with significant at-risk student populations. Further, researchers from Vanderbilt University found that greater racial and ethnic diversity in the principal corps benefits students, especially children of color. Three commonly cited rationales for this benefit are—

(A) students of color benefit from seeing minority adult role models in a position of authority;

(B) the higher expectations that teachers of color tend to place on students of color; and

(C) the effect of cultural differences between teachers of different backgrounds on instructional strategies and interpretation of students’ behavior.
(14) According to the report entitled “Empowered Educators: How Leading Nations Design Systems for Teaching Quality”, effective teacher preparation successfully integrates theory and practice components. Further, according to the “Preparing Teachers for a Changing World” report sponsored by the National Academy Foundation, highly effective teachers vary in styles, yet have many teaching strategies in common. Research has identified a set of knowledge, skills, and dispositions essential for beginning teachers that should be incorporated into the teacher education curriculum. This includes the opportunity and capacity to reflect on and evaluate skills and to learn from practice. Evidence-based teacher preparation includes developing teacher skills, content knowledge, inquiry, and the capacity to provide effective learning experiences for a diverse set of students.

(15) As it does in medicine, the Federal Government should maintain a substantial, sustained program of service scholarships or loan forgiveness programs that cover training costs in high-quality preparation programs at the undergraduate or graduate level for those who will teach in a high-need field or location for at least 4 years, as candidates
are much more likely to remain in the profession and to make a difference for student achievement after 3 years of teaching. State governments can augment such an approach with programs targeted to specific local needs.

(16) Research has shown the impact cultural competence can have on closing student achievement gaps and improving student outcomes by incorporating racial and ethnic minority contributions in curricula and diversifying pedagogical practices. Cultural competence is both a moral and ethical responsibility to create a welcoming environment for students to succeed. The impact of having educators who have the ability to challenge and motivate diverse student populations can dramatically improve our educational system and student outcomes.

“(4) ADDITIONAL AMOUNT.—In this subsection, the term ‘additional amount’ means the amount by which the funds appropriated under paragraph (1) for a fiscal year exceeds $2,200,000.’’.

CHAPTER 2—TEACHER LOAN FORGIVENESS PROGRAMS

SEC. 10068. STOP MILITARIZING LAW ENFORCEMENT ACT.

(a) FINDINGS.—Congress makes the following findings:

(1) Under section 2576a of title 10, United States Code, the Department of Defense is authorized to provide excess property to local law enforcement agencies. The Defense Logistics Agency, administers such section by operating the Law Enforcement Support Office program.

(2) New and used material, including mine-resistant ambush-protected vehicles and weapons de-
terminated by the Department of Defense to be “military grade” are transferred to Federal, Tribal, State, and local law enforcement agencies through the program.

(3) As a result local law enforcement agencies, including police and sheriff’s departments, are acquiring this material for use in their normal operations.

(4) As a result of the wars in Iraq and Afghanistan, military equipment purchased for, and used in, those wars has become excess property and has been made available for transfer to local and Federal law enforcement agencies.

(5) In Fiscal Year 2017, $504,000,000 worth of property was transferred to law enforcement agencies.

(6) More than $6,800,000,000 worth of weapons and equipment have been transferred to police organizations in all 50 States and four territories through the program.

(7) In May 2012, the Defense Logistics Agency instituted a moratorium on weapons transfers through the program after reports of missing equipment and inappropriate weapons transfers.
(8) Though the moratorium was widely publicized, it was lifted in October 2013 without adequate safeguards.

(9) On January 16, 2015, President Barack Obama issued Executive Order 13688 to better coordinate and regulate the federal transfer of military weapons and equipment to State, local, and Tribal law enforcement agencies.

(10) In July, 2017, the Government Accountability Office reported that the program’s internal controls were inadequate to prevent fraudulent applicants’ access to the program.

(12) As a result, Federal, State, and local law enforcement departments across the country are eligible again to acquire free “military-grade” weapons and equipment that could be used inappropriately during policing efforts in which people and taxpayers could be harmed.

(13) The Department of Defense categorizes equipment eligible for transfer under the 1033 pro-
gram as “controlled” and “un-controlled” equipment. “Controlled equipment” includes weapons, explosives such as flash-bang grenades, mine-resistant ambush-protected vehicles, long-range acoustic devices, aircraft capable of being modified to carry armament that are combat coded, and silencers, among other military grade items.

“(9) with respect to a recipient that is not a Federal agency, the recipient certifies to the Department of Defense that the recipient notified the local community of the request for personal property under this section by—

“(A) publishing a notice of such request on a publicly accessible Internet website;

“(B) posting such notice at several prominent locations in the jurisdiction of the recipient; and

“(C) ensuring that such notices were available to the local community for a period of not less than 30 days; and

Subtitle B—SAFETY Through Nonviolence

SEC. 10201. SHORT TITLE.

This subtitle may be cited as the “Securing American Families by Educating and Training You (SAFETY) Through Nonviolence Act of 2020”.

SEC. 10202. FINDINGS.

Congress finds the following:

(1) The concept and practice of nonviolent thoughts, words, and actions have a history and a legacy in the United States and the global community.

(2) In the 19th century, American philosophers and authors Ralph Waldo Emerson and Henry David Thoreau were leaders of the transcendentalist philosophical movement which emphasized the potential good of humanity, the importance of truth, and the courage and power of peace.
(3) In the early 20th century, Mohandas (Mahatma) Gandhi advanced the concepts and practices of ahimsa, or non-injury, and satya, or truth as integral to social and active concepts and practices.

(4) Gandhi continued Thoreau’s ideas of Civil Disobedience in developing the doctrine of satyagraha which connects truth and nonviolence to active efforts in nonviolent, civil disobedience.

(5) Dr. Martin Luther King, Jr., built upon these philosophies in developing six principles of nonviolence. He explained these to be a way of life which sought to build friendships and understanding, defeat injustice, accept suffering as a way to educate and transform, and to choose love instead of hate. Nonviolence’s strength is reinforced by the universe siding with justice.
