1       *Be it enacted by the Senate and House of Representa-*  
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE; FINDINGS.**

4       (a) **SHORT TITLE.**—This Act may be cited as the  
5 “Amputation Reduction and Compassion Act of 2020” or  
6 the “ARC Act of 2020”.

7       (b) **FINDINGS.**—Congress makes the following find-  
8 ings:

9           (1) Atherosclerosis occurs when blood flow is  
10 reduced because arteries become narrowed or  
11 blocked with fatty deposits.

12           (2) Atherosclerosis is responsible for more  
13 deaths in the United States than any other condi-  
14 tion, and heart attacks, resulting from clogged coro-  
15 nary arteries, are the leading cause of death in  
16 America.

17           (3) Atherosclerosis also occurs in the legs and  
18 is known as peripheral artery disease (in this sub-  
19 section referred to as “PAD”) and having PAD sig-  
20 nificantly increases the risk for heart attack, stroke,  
21 amputation, and death.

1           (4) While most Americans are aware of athero-  
2           sclerosis in the heart, many Americans have never  
3           heard of PAD and Americans with PAD are often  
4           unaware of the serious risks of the disease.

5           (5) An estimated 21 million Americans have  
6           PAD, and about 200,000 of them—disproportion-  
7           ately minorities—suffer avoidable amputations every  
8           year as a result of such disease.

9           (6) According to the Dartmouth Atlas, amputa-  
10          tion risks for African Americans living with diabetes  
11          are as much as four times higher than the national  
12          average.

13          (7) Data analyses have similarly found that Na-  
14          tive Americans are more than twice as likely to be  
15          subjected to amputation and Hispanics are up to 75  
16          percent more likely to have an amputation.

17          (8) Fifty-two percent of patients with an above-  
18          the-knee amputation and 33 percent of patients with  
19          a below-the-knee amputation will die within two  
20          years of their amputation.

21          (9) Screening and arterial testing for PAD is  
22          cost-effective and should be part of routine medical  
23          care.

1           (10) Once PAD is detected, amputations and  
2           deaths can be reduced through the use of national,  
3           evidence-based PAD care guidelines.

4 **SEC. 2. PERIPHERAL ARTERY DISEASE EDUCATION PRO-**  
5 **GRAM.**

7 (42 U.S.C. 280g et seq.) is amended by adding at the end  
8 the following new section:

15 Administrator of the Health Resources and Services Ad-  
16 ministration, shall establish and coordinate a peripheral  
17 artery disease education program to support, develop, and

19 that inform health care professionals and the public about  
20 the existence of peripheral artery disease and methods to  
21 reduce amputations related to such disease, particularly  
22 with respect to at-risk populations.

24 is authorized to be appropriated to carry out this section
