116TH CONGRESS 1ST SESSION

H.R.89

To direct that certain assessments with respect to toxicity of chemicals be carried out by the program offices of the Environmental Protection Agency, and for other purposes.

IN THE HOUSE OF REPRESENTATIVES

January 3, 2019

Mr. Biggs introduced the following bill; which was referred to the Committee on Science, Space, and Technology, and in addition to the Committee on Energy and Commerce, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned

A BILL

To direct that certain assessments with respect to toxicity of chemicals be carried out by the program offices of the Environmental Protection Agency, and for other purposes.

- 1 Be it enacted by the Senate and House of Representa-
- 2 tives of the United States of America in Congress assembled,
- 3 SECTION 1. SHORT TITLE.
- 4 This Act may be cited as the "Improving Science in
- 5 Chemical Assessments Act".

SEC.	2.	RESEARCH	NEEDS	AND	PRIORITIES	OF EPA	PRO.

- 2 GRAM OFFICES.
- 3 The Environmental Research, Development, and
- 4 Demonstration Authorization Act is amended by striking
- 5 section 7 (42 U.S.C. 4364) and inserting the following:
- 6 "SEC. 7. RESEARCH NEEDS AND PRIORITIES OF EPA PRO-
- 7 GRAM OFFICES.
- 8 "(a) In General.—The Administrator of the Envi-
- 9 ronmental Protection Agency shall assure that the expend-
- 10 iture of any funds appropriated pursuant to this Act or
- 11 any other provision of law for environmental research and
- 12 development related to regulatory program activities shall
- 13 be coordinated with and reflect the research needs and pri-
- 14 orities of the relevant program offices, as well as the over-
- 15 all research needs and priorities of the Agency, including
- 16 those defined in the five-year research plan.
- 17 "(b) Hazard Identification and Dose-Response
- 18 Assessments.—Beginning on the date of the enactment
- 19 of the Improving Science in Chemical Assessments Act,
- 20 any covered assessments carried out with respect to a
- 21 chemical substance through the Integrated Risk Informa-
- 22 tion System program of the Environmental Protection
- 23 Agency as of the day before such date of enactment shall,
- 24 in lieu of being carried out through such program, be car-
- 25 ried out by the relevant program office of the Environ-
- 26 mental Protection Agency, so long as the relevant program

1	office determines there is a need for such an assessment.
2	Such an assessment shall be carried out using the sci-
3	entific standards specified in section 7B and be based on
4	the weight of the scientific evidence.
5	"(c) Toxicity Values.—In carrying out a covered
6	assessment with respect to a chemical substance under
7	subsection (a), the relevant program office shall assign a
8	toxicity value or values, when scientifically supported by
9	the available data, for such chemical substance. With re-
10	spect to that assignment, the following shall apply:
11	"(1) When supported by the available data, the
12	toxicity value or values shall include a range of point
13	estimates of risk as well as sources and magnitudes
14	of uncertainty associated with the estimates.
15	"(2) When multiple point estimates can be de-
16	veloped, the relevant program office shall—
17	"(A) consider all datasets; and
18	"(B) make a determination about how best
19	to represent the human health risk posed by the
20	chemical substance involved.
21	"(d) Chemical Assessment Database.—
22	"(1) In general.—A toxicity value or values
23	assigned to a chemical substance under subsection
24	(c) shall be included in a chemical assessment data-
25	base to be maintained by the Office of Research and

- 1 Development of the Environmental Protection Agen-2 cy.
- "(2) Completed assessments.—All covered 3 assessments stored, as of the date of the enactment of this Act, in the IRIS database of the Environ-5 6 mental Protection Agency shall be retained in the 7 chemical assessment database established pursuant 8 to paragraph (1).
- 9 "(3) UPDATES.—Such database shall be up-10 dated pursuant to a covered assessment performed 11 by a relevant program office, including to make a 12 change in the existing toxicity value or values for a 13 chemical substance included in such database.
- 14 "(e) Certification.—Beginning 2 years after the 15 date of the enactment of the Improving Science in Chemical Assessments Act and every 2 years thereafter, the Of-16 fice of Research and Development of the Environmental 18 Protection Agency shall submit to the Committee on 19 Science, Space, and Technology and the Committee on 20 Energy and Commerce of the House of Representatives 21 and the Committee on Environment and Public Works of the Senate, a report containing a certification that each 23 covered assessment completed during the period covered by the report was conducted using the scientific standards specified in section 7B.

1	"(f) Definitions.—In this section, section 7A, and
2	section 7B:
3	"(1) The term 'covered assessment' means, with
4	respect to the evaluation of the human health effects
5	resulting from chronic exposure to a chemical sub-
6	stance, a chemical hazard identification and dose-re-
7	sponse assessment (as such terms are defined by the
8	Environmental Protection Agency on the day before
9	the date of the enactment of this Act).
10	"(2) The term 'relevant program office' in-
11	cludes the following offices of the Environmental
12	Protection Agency:
13	"(A) The Office of Water.
14	"(B) The Office of Air and Radiation.
15	"(C) The Office of Land and Emergency
16	Management.
17	"(D) The Office of Chemical Safety and
18	Pollution Prevention.
19	"(E) Any successor to an office specified in
20	subparagraphs (A) through (D) and any other
21	office determined to be relevant by the Adminis-
22	trator of the Environmental Protection Agency.

1 "SEC. 7A. HAZARD IDENTIFICATION AND DOSE-RESPONSE

_	
2	STEERING COMMITTEE.
3	"(a) Establishment.—Not later than 30 days after
4	the date of the enactment of the Improving Science in
5	Chemical Assessments Act, the Administrator of the Envi-
6	ronmental Protection Agency shall establish a chemical
7	hazard identification and dose-response steering com-
8	mittee (referred to in this Act as the 'steering committee')
9	to coordinate the conduct of covered assessments by rel-
10	evant program offices for purposes of ensuring that, with
11	respect to such assessments, there is no duplication of ef-
12	fort by such offices.
13	"(b) Duty.—The duties of the steering committee
14	are the following:
15	"(1) If the steering committee learns that more
16	than one relevant program office intends to conduct
17	covered assessments with respect to the same chem-
18	ical substance, the steering committee shall deter-
19	mine the most effective means of carrying out a sin-
20	gle covered assessment to prevent duplication of ef-
21	fort by such offices.
22	"(2) For purposes of supplementing a covered
23	assessment, the steering committee shall consider
24	any third-party assessment of a chemical substance
25	generated by another Federal, State, or inter-

national agency or agencies or members of the sci-

- entific community that meets the requirements spec-
- 2 ified in subsection (e).
- 3 "(c) Chair; Composition.—
- "(1) CHAIR.—The steering committee shall be chaired by the Assistant Administrator of the Office of Research and Development of the Environmental Protection Agency.
- "(2) Composition.—The steering committee 8 9 shall be composed of 15 members, all of whom shall 10 be active, full-time employees of the Environmental 11 Protection Agency, with at least one member rep-12 resenting each relevant program office and each re-13 gional office of the Environmental Protection Agen-14 cy. The members of the steering committee shall be 15 appointed by the Administrator of the Environ-16 mental Protection Agency. Any vacancy shall be 17 filled in the same manner as the initial appointment.
- 18 "(d) Meetings.—The steering committee shall meet 19 at least once each calendar year.
- 20 "(e) Third-Party Assessment Requirements.—
- 21 The requirements specified in this subsection with respect
- 22 to a third-party assessment of a chemical substance are
- 23 that the assessment—
- 24 "(1) is conducted using scientific standards
- 25 specified in section 7B;

- 1 "(2) has undergone independent scientific re-2 view for transparency, completeness, and quality; 3 and "(3) reflects the best available science and the 4 5 weight of the available scientific evidence. 6 "SEC. 7B. SCIENTIFIC STANDARDS. 7 "Covered assessments carried out under section 7 8 and discussion of such assessments and review of thirdparty assessments carried out under section 7A, shall be 10 conducted using scientific information, technical procedures, measures, methods, protocols, methodologies, or 12 models in a manner consistent with the best available science. In carrying out such an assessment, the relevant program office shall integrate all lines of scientific evi-14 15 dence and consider, as applicable— "(1) the extent to which the scientific informa-16 17 tion, technical procedures, measures, methods, proto-
 - "(1) the extent to which the scientific information, technical procedures, measures, methods, protocols, methodologies, or models employed to generate the scientific information are reasonable for and consistent with the intended use of the scientific information;
- "(2) the extent to which the scientific information is relevant for the relevant program office's use in making a decision about a chemical substance;

18

19

20

- "(3) the degree of clarity and completeness with
 which the data, assumptions, methods, quality assurance, analyses employed to generate the scientific information are documented and publicly available in
 a manner that honors legal and ethical obligations to
 reduce the risks of unauthorized disclosure and reidentification;
 - "(4) the extent to which the variability and uncertainty in the scientific information, or in the procedures, measures, methods, protocols, methodologies, or models, are evaluated and characterized;
 - "(5) the extent of independent verification or peer review of the scientific information or of the procedures, measures, methods, protocols, methodologies, or models;
 - "(6) the ability of the scientific findings and research to be replicated or reproduced; and
 - "(7) the extent to which the available scientific information supports dose-response modeling, using non-linear approaches.".
