

116TH CONGRESS
1ST SESSION

S. 2261

To direct the Secretary of the Treasury to issue Clean Energy Victory
Bonds.

IN THE SENATE OF THE UNITED STATES

JULY 25, 2019

Mr. UDALL introduced the following bill; which was read twice and referred
to the Committee on Finance

A BILL

To direct the Secretary of the Treasury to issue Clean
Energy Victory Bonds.

1 *Be it enacted by the Senate and House of Representa-*
2 *tives of the United States of America in Congress assembled,*

3 **SECTION 1. SHORT TITLE.**

4 This Act may be cited as the “Clean Energy Victory
5 Bond Act of 2019”.

6 **SEC. 2. FINDINGS.**

7 Congress finds the following:

8 (1) Potential exists for increasing clean and re-
9 newable energy production and energy efficiency in-
10 stallation in the United States.

1 (2) Other nations, including China and Ger-
2 many, are ahead of the United States in manufac-
3 turing and deploying various clean energy tech-
4 nologies, even though many of these technologies
5 were invented in the United States.

6 (3) Climate change represents an existential
7 threat to the safety, security, and economy of the
8 United States. Rapid and robust deployment of
9 clean energy will reduce greenhouse gas emissions
10 and mitigate the effects of climate change on Amer-
11 ican society.

12 (4) Many segments of the American public
13 want to take charge of efforts to combat the effects
14 of climate change and practice responsible consumer
15 behavior.

16 (5) The Office of Energy Efficiency and Renew-
17 able Energy of the Department of Energy (referred
18 to in this section as the “EERE”) estimates that
19 taxpayer investment of \$12,000,000,000 into the
20 EERE research and development portfolio has al-
21 ready yielded an estimated net economic benefit to
22 the United States of more than \$230,000,000,000,
23 with an overall annual return on investment of more
24 than 20 percent.

1 (6) Investments in renewable energy and energy
2 efficiency projects in the United States create green
3 jobs throughout the Nation. New and innovative jobs
4 could be created through expanded government sup-
5 port for clean energy and energy efficiency.

6 (7) As Americans choose energy efficiency and
7 clean energy and transportation, it reduces our de-
8 pendence on foreign oil and improves our energy se-
9 curity.

10 (8) Bonds are a low-cost method for encour-
11 aging clean energy, as they do not require direct
12 budget allocations or expenditures. The projects sup-
13 ported through Clean Energy Victory Bonds will cre-
14 ate jobs and business revenues that will increase
15 Federal tax revenues, while simultaneously reducing
16 nationwide health and environmental costs incurred
17 by the Federal Government.

18 (9) Bonds are voluntary measures that allow
19 Americans to contribute financially in whatever
20 amount is available to them.

21 (10) During World War II, over 80 percent of
22 American households purchased Victory Bonds to
23 support the war effort, raising over
24 \$185,000,000,000, or over \$2,000,000,000,000 in
25 today's dollars.
