

116TH CONGRESS
2D SESSION

S. 3227

To require the Administrator of the Environmental Protection Agency to designate per- and polyfluoroalkyl substances as hazardous substances under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, and for other purposes.

IN THE SENATE OF THE UNITED STATES

JANUARY 28, 2020

Mr. SANDERS (for himself, Mr. MERKLEY, and Mr. MARKEY) introduced the following bill; which was read twice and referred to the Committee on Environment and Public Works

A BILL

To require the Administrator of the Environmental Protection Agency to designate per- and polyfluoroalkyl substances as hazardous substances under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, and for other purposes.

1 *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

3 SECTION 1. SHORT TITLE.

4 This Act may be cited as the “Prevent Future American Sickness Act of 2020”.

6 SEC. 2. FINDINGS.

7 Congress finds that—

1 (1) PFAS have been found in the blood of 99
2 percent of individuals in the United States;

3 (2) PFAS chemicals have so far been confirmed
4 in the groundwater or tap water of more than 1,400
5 communities;

6 (3) based on sampling data, scientists estimate
7 that more than 100,000,000 individuals in the
8 United States may be drinking water contaminated
9 with PFAS;

10 (4) the Environmental Protection Agency was
11 first notified about the health risks posed by PFAS
12 in 1998, but has failed to set a drinking water
13 standard or restrict ongoing releases in the air and
14 water;

15 (5) existing treatment technologies can reduce
16 the quantity of PFAS in tap water to levels below
17 2 parts per trillion;

18 (6) the Environmental Protection Agency has
19 established lifetime health advisory levels for some
20 PFAS chemicals at 70 parts per trillion;

21 (7) a June 2018 study by the Agency for Toxic
22 Substances and Disease Registry of the Department
23 of Health and Human Services found that PFAS
24 chemicals pose a danger to human health at a level

1 far lower than the lifetime health advisory level es-
2 tablished by the Environmental Protection Agency;

3 (8) PFAS chemical contamination sites appear
4 with particularly high frequency in the States of
5 New Jersey, Michigan, and California, with contami-
6 nation levels as high as—

7 (A) 27,800 parts per trillion found in New
8 Jersey;

9 (B) 1,200,000 parts per trillion found in
10 Michigan; and

11 (C) 8,000,000 parts per trillion found in
12 California;

13 (9) the Department of Defense estimates that
14 PFAS cleanup on military bases will surpass the
15 original cost estimate of the Department of Defense
16 of \$2,000,000,000;

17 (10) a study published in the International
18 Journal of Hygiene and Environmental Health esti-
19 mated the economic cost of PFAS contamination
20 from increased numbers of low birth weight infants
21 was \$13,700,000,000 from 2003 through 2014;

22 (11) States such as Vermont, New Hampshire,
23 New Jersey, and Michigan are leading the way in
24 terms of setting robust drinking water standards for
25 PFAS chemicals;

1 (12) the State of Vermont has implemented the
2 strictest standard for PFAS chemicals in the United
3 States, with a maximum contaminant level of 20
4 parts per trillion for the sum of 5 PFAS chemicals;
5 and

6 (13) the States of Washington and Maine are
7 leading the way in terms of taking action to limit
8 PFAS chemicals in food packaging.
